6.6.2 Cape Winelands District Joint District Approach	116
6.7 Agricultural Interventions	118
6.8 Stellenbosch Municipality Operational Support Plan	118
6.9 Gender Mainstreaming	120
6.9.1 Gender Interventions	120
6.9.2 Gender Disaggregated Matrix	122
CHAPTER 7: Sector Plans and Implementation	125
7.1 Introduction.....	125
7.2 The relationship between the Sector Plans and Strategies.....	126
7.3 Sector Plans and Implementation Strategies.....	128
7.3.1 Air Quality Management Plan	128
7.3.2 Environmental Management Plan	129
7.3.3 Integrated Human Settlement.....	133
7.3.4 Comprehensive Integrated Transport Plan	145
7.3.5 Integrated Waste Management Plan (IWMP)	150
7.3.6 Electrical Master Plan.....	155
7.3.7 Water Services Development Plan.....	156
7.3.8 Water Demand Management (WDM)	162
7.3.9 Long-Term Water Conservation and Water Demand Management Strategy	166
7.3.10 Safety and Security Strategy.....	170
7.3.11 Disaster Management Plan.....	173
7.3.12 Local Economic Development Strategy	180
7.3.13 Community Development Strategy	187
7.3.14 Human Resource Strategy	191
7.3.15 ICT Strategy	192
CHAPTER 8: Council Term Projects 2022 – 2027.....	196
8.1 Smart City	196
8.1.1 Guiding Principles to create inclusive smart cities	196
8.1.2 A smart city as a holistic ecosystem.....	196
8.1.3 The Nature and Purpose of a proposed smart city initiative	197

8.2	Political Leadership: Five-Year Plans.....	198
8.2.1	Executive Mayor	198
8.3	Mayoral Portfolios	224
8.3.1	Portfolio: Human Settlements	225
8.3.2	Portfolio: Rural Management.....	234
8.3.3	Portfolio: Youth, Sport, and Culture	236
8.3.4	Portfolio: Planning, LED and Tourism.....	238
8.3.5	Portfolio: Financial Services	248
8.3.6	Portfolio: Protection Services.....	250
8.3.7	Portfolio: Corporate Services	253
8.3.8	Portfolio: Infrastructure Services	255
8.3.9	Portfolio: Parks, Open Spaces and Environment	260
8.3.10	Portfolio: Community Services	263
CHAPTER 9: Public Interest and Expression of Needs		265
9.1	Community Participation	265
9.2	Public Participation in the drafting of the 2 nd Review of the 5 th Generation IDP 2022 – 2027 266	
9.3	Public Participation Statistics: September 2023	269
9.4	Summary of Needs and Priorities	270
9.5	Ward Priorities.....	273
9.5.1	Ward Priorities: Ward 1	273
9.5.2	Ward Priorities: Ward 2	286
9.5.3	Ward Priorities: Ward 3	291
9.5.4	Ward Priorities: Ward 4	296
9.5.5	Ward Priorities: Ward 5	304
9.5.6	Ward Priorities: Ward 6	315
9.5.7	Ward Priorities: Ward 7	325
9.5.8	Ward Priorities: Ward 8	342
9.5.9	Ward Priorities: Ward 9	346
9.5.10	Ward Priorities: Ward 10	350
9.5.11	Ward Priorities: Ward 11	355
9.5.12	Ward Priorities: Ward 12	365
9.5.13	Ward Priorities: Ward 13	373
9.5.14	Ward Priorities: Ward 14	377
9.5.15	Ward Priorities: Ward 15	380
9.5.16	Ward Priorities: Ward 16	383
9.5.17	Ward Priorities: Ward 17	389
9.5.18	Ward Priorities: Ward 18	393
9.5.19	Ward Priorities: Ward 19	398
9.5.20	Ward Priorities: Ward 20	407
9.5.21	Ward Priorities: Ward 21	416
9.5.22	Ward Priorities: Ward 22	420

9.5.23	Ward Priorities: Ward 23	425
CHAPTER 10: Financial Plan		430
10.1	Introduction.....	430
10.2	Capital and Operating Budget Estimates.....	430
10.2.1	Budget Assumptions.....	430
10.2.2	Operating Budget Estimates	430
10.3	Financial Management Arrangements	432
10.4	Financial Strategies and Programmes	433
10.5	Medium – Term Capital Expenditure per Strategic Focus Area	434
10.6	Medium – Term Operational Expenditure	435
10.7	Medium–Term Operational Revenue per Strategic Focus Area	435
10.8	Capital Budget 2024/25 – 2026/27 per Directorate	436
10.8.1	Capital Budget 2024/25 – 2026/27: Office of the Municipal Manager	436
10.8.2	Capital Budget 2023/24 – 2025/26- Directorate: Planning and Economic Development 436

Integrated Development Plan for 2022 – 2027

Compiled in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)

The Integrated Development Plan is the municipality's principal five-year strategic plan that deals with the most critical development needs of the municipal area (external focus) and the organisation's most critical governance needs (internal focus).

The Integrated Development Plan –

- ✦ is adopted by the council within one year after a municipal election and remains in force for the council's elected term (five years);
- ✦ is drafted and reviewed annually in consultation with the local community as well as interested organs of state and other role players;
- ✦ guides and informs all planning and development, and all decisions concerning planning, management, and development;
- ✦ forms the framework and basis for the municipality's medium-term expenditure framework, annual budgets, and performance management system; and
- ✦ seeks to promote integration by balancing the economic, ecological, and social pillars of sustainability without compromising the institutional capacity required in the implementation, and by coordinating actions across sectors and spheres of government.

STRATEGIC OVERVIEW

Vision, Mission, and Values

Foreword by the Executive Mayor

Cllr Adv Gesie van Deventer
Executive Mayor

DRAFT

As we embark on the 2nd review of the 5th Generation Integrated Development Plan (IDP), we delve into Stellenbosch Municipality's vision for the upcoming five-year term. This comprehensive assessment not only reflects on our achievements but also critically evaluates our current status and outlines the tasks that lie ahead. Over the past few years, we have not only met but often surpassed our goals, triumphing over numerous challenges along the way.

Our overarching strategy centers on implementing pragmatic solutions, delivering exceptional services to our residents, prioritising economic and social development, and fortifying our reputation for good governance practices and sound financial management. Beyond a mere document or report, this IDP is deeply personal to me. It encapsulates the essence

of the Stellenbosch Council's plans, actions, and accomplishments, detailing our government's endeavours to create a clean, safe, and prosperous environment that attracts investment, fosters job creation, and uplifts communities out of poverty. Local government is the closest conduit to our residents and communities. As elected councillors, we are entrusted with the responsibility of serving the needs of all communities, including the 14 "dorpias," equitably and sustainably.

Public participation in the IDP and Budget processes is of paramount importance. Thankfully, our residents in Stellenbosch have actively engaged with the municipality, contributing insights into their needs and priorities. This engagement aids us in meticulous planning and ensures sustainable growth throughout the municipal area (WC024).

The IDP serves as the foundational framework for the municipality to fulfil its mandate and execute its budget. Additionally, it aids us in continuously planning ahead, working diligently, and delivering the services we are accountable for.

Among the key priorities for this term, we are steadfast in ensuring an efficient and effective local government that is accountable and responsive. Our zero-tolerance approach to corruption is unwavering, and we consistently demonstrate our commitment to act decisively when the need arises.

Our commitment to running a clean and transparent government is resolute, with a focus on optimising every public fund for service improvement, maintenance, upgrades, and development. Notably, we are progressing well in our plans to co-generate electricity to shield our communities from the adverse effects of load shedding.

The crucial matter of housing for all our residents remains a top priority. While housing is not a municipal competency, we continue to maximise our resources to provide housing opportunities across various categories, from rental stock to BNG and GAP housing, upgrades of informal settlements, and mixed-use developments.

We will continue to build a municipality of opportunity that creates an enabling environment for economic growth and job creation, and to aid those who need it most. We will also continue to provide quality services to all residents and serve the residents of the Greater Stellenbosch in a well-run, corruption-free administration.

I extend my gratitude to the Deputy Mayor, Councillor Jeremy Fasser, the members of my Mayoral Committee, all our councillors, and the Municipal Manager and Administration for crafting this updated roadmap. Our commitment to realising the vision of becoming a Valley of Opportunity and Innovation for all residents remains steadfast. This document symbolises our unwavering dedication to creating meaningful opportunities for everyone in our community.

CLLR ADV GESIE VAN DEVENTER
EXECUTIVE MAYOR

Overview by the Municipal Manager

Geraldine Mettler
Municipal Manager

DRAFT

In the realm of local governance, I take pride in Stellenbosch Municipality's commitment to delivering essential services amidst considerable pressure and uncertainty. Our ability to adapt and respond to the ever-changing dynamics of the world has been a testament to our resilience as an organisation and our capability as a local government.

The IDP is a strategic tool that guides all the activities of local government in consultation with residents and stakeholders. Its focus is on development in a broader sense and is a structured plan that informs budget priorities, decision-making, and the allocation of resources. Since local government exists to provide municipal services to all residents, it is essential that it interact with the people living in the city and obtain their input in their elected government's plans and vision.

This IDP articulates a set of focused objectives aimed at directing public funds towards programmes and projects that provide the greatest benefit to the public in an equitable manner. The inputs from our communities form the bedrock of the entire IDP and budgeting processes.

Residents now have multiple avenues to express their views on the IDP and articulate their priorities for their wards. Interactive pages on our municipal website, emails, a dedicated WhatsApp line, a variety of social media platforms, and traditional written submissions have become invaluable tools for engaging with our communities. Coupled with community meetings across the entire municipal area, these tools have provided residents with ample opportunities to actively participate in the IDP and Budget processes.

The IDP serves as our roadmap, outlining our current position and future aspirations. It facilitates the evaluation of community needs, the identification of ward priorities, and the reaffirmation of our strategic objectives. Crucially, the IDP informs the municipal budget, aligning practical plans with identified needs. This underscores the importance of reaching as many residents as possible and encouraging active involvement in the decision-making process.

Key priorities outlined for the administration in the 5th Generation IDP encompass various facets:

- ✦ E-governance (SMART CITY);
- ✦ Bulk infrastructure upgrades for economic development;
- ✦ Critical road infrastructure upgrades for safety and development;
- ✦ Clean, green electricity generation for economic sustainability;
- ✦ Financial viability and sustainability through long-term planning;
- ✦ Zero-tolerance approach to corruption;
- ✦ Focus on social and gap housing;
- ✦ Finalising the Inclusionary Housing Policy;
- ✦ Continuing wealth creation through the title deed programme;
- ✦ The Adam Tas Corridor development;
- ✦ Improvements in business processes in the Planning Department;
- ✦ Establishment of a land invasion unit; and
- ✦ Enhancements to safety through expanded surveillance networks.

The municipality's achievements are a testament to our commitment to collaboration, good governance practices, transparency, and organisational stability. Fiscal discipline, operational restraint, and sound corporate governance have positioned the municipality to resiliently weather any storm.

Our effective partnerships with industry, investors, residents, and community organisations continue to strengthen, and I extend my gratitude to all partners and stakeholders for their contributions. I anticipate that opportunities for even stronger partnerships and collaboration will flourish during the implementation of this new IDP.

Special thanks to our Executive Mayor, Mayoral Committee, Councillors, and Directors for their guidance and significant contributions in enhancing the functionality of our administration for all residents. Together with the residents and stakeholders of the Stellenbosch Municipality, we can transform our towns into places of excellence and opportunity for all.

GERALDINE METTLER
MUNICIPAL MANAGER

CHAPTER 1:

Governance and Institutional Arrangements

1.1 Integrated Development Planning

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) mandates South African municipalities to formulate a five-year Integrated Development Plan (IDP) to inform the municipal budget and guide all development within the municipal area. The IDP is considered the municipality's principal strategic plan that deals with the most critical development needs of the municipal area as well as the most critical governance needs of the organisation.

As the principal planning instrument that guides and informs the municipal budget, the planning process has to provide a forum for identifying, unpacking, and resolving the real issues that face the residents of Stellenbosch Municipality. Identifying these issues in consultation with communities makes it possible for the municipality to propose realistic and workable solutions that can be budgeted for, implemented, and monitored in a controlled environment. These issues may be overarching issues that affect the whole municipality or may only affect specific communities. It is therefore crucially important that the IDP be developed after the completion of a public participation process in which community stakeholders were thoroughly consulted. The plan is also developed in partnership with the provincial and national governments as well as the district municipality.

At the heart of the IDP lies improvement in the provision of basic municipal services and expanding livelihood opportunities for the people of the Stellenbosch Municipality. The IDP also focuses on expanding and transforming municipal capacity, enterprise development, and, crucially, exploring new ways of working and living together. This is especially relevant in an ever-changing environment.

1.2 Compilation and Legal Status of the 5th Generation IDP 2022 – 2027

SECTION 35(1) OF THE MSA

- An IDP is adopted by the council of a municipality:
- (a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;
 - (b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and
 - (c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

CHAPTER 5 AND SECTION 26 OF THE MSA

Core components of IDPs: An integrated development plan must reflect-

- (a) The municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;
- (b) An assessment of the existing level of development in the municipality, which must include an identification of communities that do not have access to basic municipal services;
- (c) The council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
- (d) The council's development strategies, which must be aligned with any national and provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
- (e) A spatial development framework that must include the provision of basic guidelines for a land-use management system for the municipality;
- (f) The council's operational strategies;
- (g) Applicable disaster management plans;
- (h) A financial plan, which must include a budget projection for at least the next three years; and
- (i) The key performance indicators and performance targets are determined in terms of Section 41.

The IDP is informed by a leadership agenda, as contained in national and provincial policy documents, as well as the needs of local citizens and public, private, and community organisations. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The 2nd Amendment of the 5th Generation IDP 2022 – 2027 outlines the following chapters:

- Chapter 1: Governance and Institutional Arrangements;
- Chapter 2: State of the Greater Stellenbosch Area;
- Chapter 3: The Strategic Policy Context;
- Chapter 4: Spatial Development Framework;
- Chapter 5: Performance Summary of the 5th Generation IDP 2022 – 2027;
- Chapter 6: One Plan: Service Delivery, Budget, Programme and Projects;
- Chapter 7: Sector Planning and Implementation;
- Chapter 8: Council Term Projects 2022 – 2027;
- Chapter 9: Public Interest and Expression of Needs (Community Participation);
- Chapter 10: Financial Plan;
- Chapter 11: Organisational Scorecard (5 Years); and
- Chapter 12: Implementation, Monitoring and Review (1- year).

1.3 Relationship between the IDP, Budget, Performance Management and Risk Management

The IDP process, together with the performance management process, should be seamlessly integrated, where the IDP ensures that the planning stage for performance management occurs, and performance management fulfils the implementation, monitoring, and evaluation of the IDP process. This is prescribed according to the Performance Management Guide for Municipalities, DPLG, 2001.

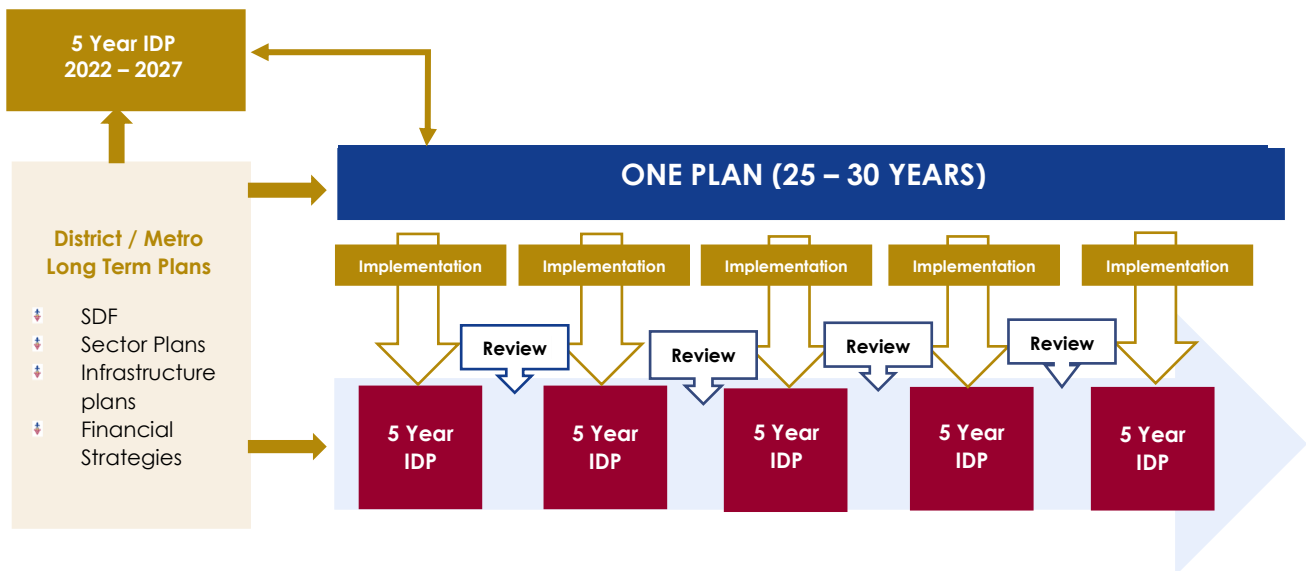

The role of the Budget is to attach money to the objectives that are contained in the IDP, and the Budget gets monitored through the Service Delivery Budget Implementation Plan (SDBIP). The IDP, therefore, provides the strategic direction for the municipality, whereas the Budget should ensure the implementation of the IDP.

Risk management is one of management's core responsibilities according to Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate, and address risks continuously before such risks can negatively impact the service delivery capacity of the Stellenbosch Municipality. Risk management provides reasonable assurance that the institution will be successful in achieving its goals and objectives.

1.4 Relationship between the IDP and One Plan

The One Plan does not replace the Integrated Development Plan (IDP) of the municipality as the "single, inclusive, and strategic plan for the development of the municipality." It is envisaged that the One Plan will strengthen and enhance the IDP and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDP. During the development of the One Plan, the IDP informed the One Plan. However, after approval of the One Plan, the IDP will be guided by the strategies and priorities outlined in the One Plan. In this regard, the IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Figure 1: Relationship between One Plan and IDP

1.5 The IDP and Ward Plans

The **twenty - three (23)** ward plans include:

- A consensus on priorities for the relevant ward(s);
- An implementation plan; and
- The capital budget is available for the relevant wards, including the small capital budget.

Ward plans help make sure that the IDP is more targeted and relevant to the needs of all groups, including the most vulnerable. These plans give ward committees a way to plan and carry out their roles and responsibilities in a systematic way. They are the basis for conversations between the municipality and ward committees about setting priorities and making budget requests. Ward committees will also use them to keep track of and evaluate progress throughout the year. The information is, however, on a detailed level and is not duplicated in the IDP, but a detailed ward plan is available on request.

1.6 The IDP Planning Process (five-year cycle)

According to the MSA, every new council that comes into office after the local government elections has to prepare an IDP that will guide them for the five years that they are in office. The IDP is, therefore, linked to the five-year term of office of councillors. This does, however, not restrict all proposals in the IDP to five years. The strategic goals that are part of the municipality's strategy all have a longer than five-year horizon, similar to the Spatial Development Framework (SDF) of the municipality.

A clear distinction must also be made between the main IDP, which is compiled every five years (or if a new council comes into power within the five-year period and does not accept the previous council's IDP), and the annual review of the IDP. The annual review is not a replacement for the five-year IDP, and its purpose is not to interfere with the long-term strategic orientation of the municipality. The annual review reflects, and progress reports made concerning the five-year strategy (and strategic goals) and proposes adjustments to the strategy, if necessary, because of changing internal and external circumstances that impact the appropriateness of the IDP.

Figure 2: Five-Year IDP Development and review cycle

1.7 Review of the Integrated Development Plan

Section 34 of the MSA prescribes that a municipality -

- a) must review its integrated development plan –
 - (i) annually following an assessment of its performance measurement in terms of section 41; and
 - (ii) to the extent that changing circumstances so demand;

The review process serves as an institutional monitoring process where stakeholders can meet to discuss the successes and progress of the previous financial year. It is not designed to interfere with the long-term strategic objectives of the municipality. The review process is a strategic process to ensure the institution remains in touch with its intentions, informed of the varying needs of residents and up to date with the changing environment within which it functions.

The Stellenbosch Municipality, in collaboration with all relevant stakeholders and following the completion of the IDP public participation engagements during September 2023, must now review its IDP.

This is the second review to occur since the adoption of the 5th Generation IDP 2022 – 2027 in May 2022.

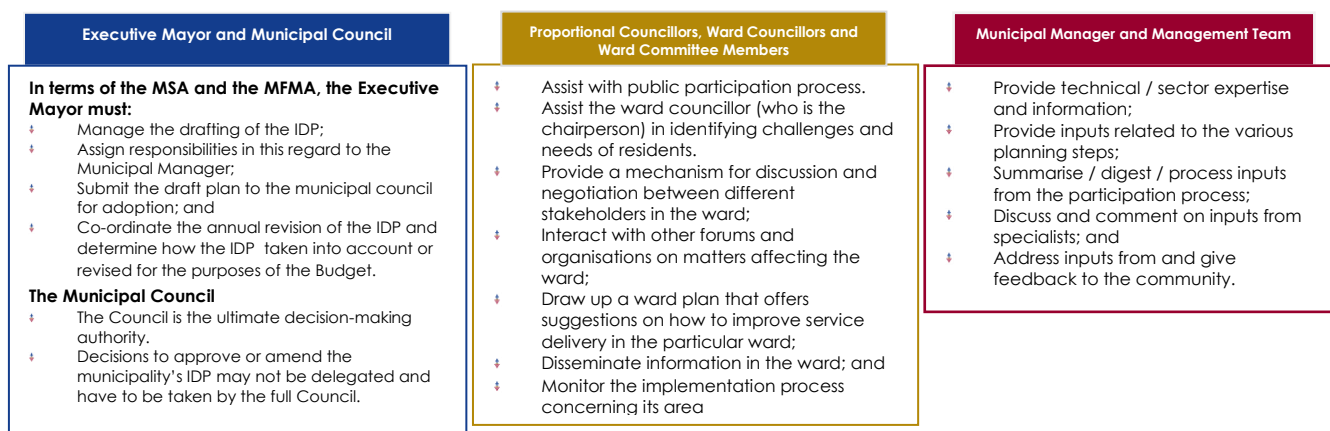

Importantly, this review does not seek to replace or rewrite the IDP that was adopted by the Council on 25 May 2022. The purpose of this review, as instructed by the MSA, is to examine the progress made on the implementation of the IDP and assess the municipality’s strategic objectives and targets as set out in the IDP.

The priorities and key performance deliverables identified in this review of the IDP will seek to better inform the municipality’s budget, and sector plans and streamline service delivery initiatives. This will ensure that the Stellenbosch Municipality remains on course to attain its strategic objectives.

1.8 Roles and Responsibilities

Section 53 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) stipulates, inter alia, that the respective roles and areas of responsibility of each political structure and political office bearer of the municipality and the Municipal Manager must be defined.

Figure 3: Roles and Responsibilities

1.9 Municipal Council

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows:

Table 1: Council Political Representation

Political Party	Number of Councillors
Democratic Alliance (DA)	28
African National Congress (ANC)	8
GOOD	3
Economic Freedom Fighters (EFF)	2
African Christian Democratic Party (ACDP)	1
People's Democratic Movement (PDM)	1
Patriotic Alliance (PA)	1
Vryheidsfront Plus (VF)	1
Total	45

Below is a table that categorises the councillors within their respective political parties and wards.

1.10 Executive Mayor and Mayoral Committee (MayCo)

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the executive mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition to delegated powers assigned by the Council. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

Table 3: Executive Mayor and Mayoral Committee (MayCo)

Name of member	Portfolio
Alderman G van Deventer	Executive Mayor
Cllr J Fasser	Deputy Executive Mayor, including Financial Services
Cllr P Johnson	MayCo member: Infrastructure Services
Cllr X Kalipa	MayCo member: Community Services
Cllr R Pheiffer	MayCo member: Protection Services
Cllr L Nkamisa	MayCo member: Corporate Services
Cllr JC Anthony	MayCo member: Youth, Sport, and Culture
Cllr J Williams	MayCo member: Parks, Open Spaces and Environment
Cllr R du Toit	MayCo member: Human Settlements
Cllr J Joon	MayCo member: Rural Management
Cllr C van Wyk	MayCo member: Planning, Local Economic Development and Tourism

MayCo Members

1.11 The Administration

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily must serve as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Figure 5: Municipal Management Team

1.12 First-Year Process Followed

The table below reflects the preparation for the 5th Generation Integrated Development Plan 2022 – 2027.

Table 4: Preparation for the first year of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2021	<ul style="list-style-type: none"> Approval of the mSDF / IDP / Budget Process Plan / Time Schedule. Cape Winelands District Municipality hosted a discussion session on the Section 27 Framework.
September 2021 – November 2021	<ul style="list-style-type: none"> With the Local Government Elections completed in November 2021, it was critical for the municipality to carefully manage the process to ensure compliance with legislation and the successful development of the 5th Generation IDP 2022 – 2027, therefore an Amended mSDF / IDP / Budget Process Plan / Time Schedule was submitted to Council on 23 November 2021 for consideration and approval. The IDP public participation period started on 29 November 2021 and ended on 12 January 2022. A link to access IDP pre-recorded videos was published on the municipal Youtube Channel, shared via Facebook, Twitter, WhatsApp, Stellenbosch Citizen App and on the municipal website. Feedback was also provided on the implementation of projects per ward. An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the development of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. Hard copies of the submission form were also made available at all libraries and ward offices.
December 2021 – February 2022	<ul style="list-style-type: none"> An Online Sector Engagement was held on 11 January 2022 to determine the sector needs and collectively devise plans to address the needs. MayCo and management had a strategic session from 13 – 14 January 2022 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions). Departmental sessions were held with all departments to set their 5-year implementation plans for the 5th Generation IDP 2022 – 2027.
March 2022 – April 2022	<ul style="list-style-type: none"> The Process Plan for 2022 – 2027 to guide the planning, drafting, adoption and review of the 5th Generation IDP 2022 – 2027 was approved by the Council on 30 March 2022, for public comment for 21 days. A second revision of the SDF / IDP / Budget Time Schedule for 2022/23 was submitted to the Council on 30 March 2022 for consideration and approval, which in effect moved the adoption of the Process Plan to May 2022. This was done to ensure compliance and alignment between the MSA Section 27 Framework of the CWDM and the Process Plan for 2022 – 2027 of the Stellenbosch Municipality. The draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 for Stellenbosch Municipality was submitted to the Council on 30 March 2022 for consideration and approval to be released for public comments. The IDP and Budget public participation process within the Stellenbosch Municipal area commenced on 04 – 28 April 2022. Inputs and comments on the draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 will be compiled and distributed to the directorates for consideration in finalising the IDP and Budget.
May – June 2022	<ul style="list-style-type: none"> Adoption of the final IDP and Budget, Tariffs and Budget-related policies. Submit adopted IDP to Cape Winelands District Municipality, Provincial Government and National Treasury. Approval of SDBIP by the Executive Mayor within 28 days after adoption of the IDP and Budget.

1.13 Second-Year Process Followed

The table below reflects the preparation for the 1st Review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2023/24 financial year.

**Table 5: Preparation for the second year for the 1st Review of the 5th Generation IDP 2022 – 2027**

Date	Action(s)
July / August 2022	<ul style="list-style-type: none"> Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24
September 2022 – November 2022	<ul style="list-style-type: none"> The IDP public participation period was open from 07 – 28 September 2022. The hybrid public participation meetings were held from 19 – 22 September 2022. The online stakeholder engagement was held on 27 September 2022. An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1st Review of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. Hard copies of the “Have Your Say” submission form was also made available at all libraries and ward offices. An all-ward councillor session was held on 7 October 2022, for the reprioritisation of ward priorities for the 2023/24 financial year taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 – February 2023	<ul style="list-style-type: none"> Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. An Indaba 2 Engagement was attended on 7 February 2023 to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. Management strategic session on 15 and 16 February 2023 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2023	<ul style="list-style-type: none"> MayCo and Council considered the draft 1st Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. The IDP and Budget public participation period has commenced on 03 April – 25 April 2023. A virtual Stakeholder Engagement was held on 20 April 2023 to provide feedback on major projects / programmes / initiatives. The closing date for the IDP and Budget submission was 25 April 2023. Consultation and refinement of SDF, IDP and Budget documents. Adoption of final IDP, Budget, Tariffs, and budget-related policies. Submission of the adopted IDP to the Provincial Government and other role-players.

1.14 First Amendment Process Followed

The table below stipulates the key activities in preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027:

Table 6: Preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2023 – September 2023	<ul style="list-style-type: none"> Submit the draft proposed amendments to the IDP to MayCo, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to recommend to the Council. Submit the proposed draft IDP amendments, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to the Council for approval for the purpose of obtaining public comment (21 days). The proposed draft IDP amendments were advertised for a period of 21 days to allow for public comment on the municipal website and local newspaper. The period for public comment on the proposed draft IDP amendments was 21 days. Submit the proposed draft IDP Amendments to the MEC, Provincial Treasury, National Treasury, and other affected organs of state within 10 working days after the Council approval. Submit the draft IDP Amendment to the District Municipality for input within 10 working days after the Council approval.
October 2023	<ul style="list-style-type: none"> Submit the final amended IDP to the Council for adoption together with the memorandum in terms of Regulation 3. The adopted IDP Amendment was placed on the municipal website. An electronic and hard copy of the adopted IDP Amendment was submitted to the MEC for local government as well as Provincial Treasury, National Treasury, and District Municipality within 10 days of the adoption or amendment of the plan. A notice was published in the local newspaper to inform the public of the adoption of the amended IDP (within 14 days of the adoption of the plan) and to place hard copies in libraries and ward offices.

1.15 Third-Year Process Followed

The table below reflects the preparation for the review and proposed 2nd Amendment of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2024/25 financial year.

Table 7: Preparation of the third year for the review and amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2023	<ul style="list-style-type: none"> ⚡ Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2024/25
September 2023 – November 2023	<ul style="list-style-type: none"> ⚡ The IDP public participation period was open from 04 September to 04 October 2023. ⚡ The area-based IDP public participation open days were held from 12 September – 02 October 2023. ⚡ The IDP stakeholder engagement was held on 04 October 2023. ⚡ An electronic submission form was created on the municipal website for the community and stakeholders to provide their community needs and inputs. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. ⚡ Hard copies of the "Have Your Say" submission form was also made available at all libraries and ward offices. ⚡ All-ward councillor sessions were facilitated from 14 to 16 November 2023, for the reprioritisation of the 2022 – 2027 ward priorities, taking into account community inputs as baseline information for the reprioritisation of ward priorities.
December 2023 – February 2024	<ul style="list-style-type: none"> ⚡ Departmental sessions were held to review the IDP deliverables and targets for the 2nd Review of the 5th Generation IDP 2022 – 2027. ⚡ MayCo and Management had a strategic session on 12 January 2024 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2024	<ul style="list-style-type: none"> ⚡ MayCo and Council to consider the draft 2nd Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. ⚡ The IDP and Budget public participation period is scheduled to commence on 02 April – 23 April 2024. ⚡ A Stakeholder Engagement will be held on 16 April 2024. ⚡ Consultation and refinement of the IDP and Budget documents. ⚡ Adoption of the final IDP, Budget, Tariffs, and budget-related policies in May 2024. ⚡ Submission of the adopted IDP to the Provincial Government and other role-players.

1.16 Corporate Governance

Corporate governance is the set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, and controlled. Corporate governance also encompasses the relationships among the many stakeholders involved and the goals for which the institution is governed.

1.17 Risk Management

Section 62 of the MFMA, states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient and transparent systems of financial and **risk management** and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

Certain risks have also been revised to ensure that the municipality can appropriately respond to the impact of these risks on municipal service delivery, taking into account changing external and internal factors. Provision was also made for ineffective service delivery due to geopolitical instability and the impact of Ukraine and the Russian war on global commodities, particularly fuel.

The top 5 **strategic** risks identified include:

- R** | **01** Availability and cost of electricity
- I** | **02** Increased risk of land invasion
- S** | **03** Economic downturn due to civil unrest and crime
- K** | **04** Scarcity of landfill space
- S** | **05** Increase in community unrest since growth in demand for housing exceeds the resources available for development

The municipal risks have been aligned with the Integrated Development Plan (IDP) through linkages to the Strategic Focus Areas (SFAs). The following table depicts these linkages:

Table 8: Risk and IDP Alignment

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate
1	Availability and cost of electricity	Continuous and persistent load shedding; sustainability of the national power supplier	Green and Sustainable Valley Dignified Living	10	10	Directorate: Infrastructure Services
2	Increased risk of land invasion	Legal precedents are set under the disaster management declaration, limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities	Dignified Living Safe Valley Good Governance and Compliance	9	10	All Directorates
3	Economic downturn due to civil unrest, crime, and continuous load-shedding	Increase in criminal activities, civil unrest, and reputational risk due to the perceived increase in the said activities. The impact of prolonged load shedding - not sufficient light at night as streetlights, CCTV cameras, and traffic lights are not functioning—can lead to more criminal activities.	Safe Valley Dignified Living	10	8	Directorate: Community and Protection Services
4	Scarcity of landfill space	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements, i.e., EIA applications and approvals, etc.	Green and Sustainable Valley	8	8	Directorate: Infrastructure Services
5	Increase in community unrest since the growth in demand for housing exceeds the resources available for development	Lack of bulk infrastructure; lack of identified and suitable land, unrealistic eviction judgements, housing backlogs, migration.	Dignified Living Safe Valley	8	8	Directorate: Community and Protection Services

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate
Operational Risks						
1	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	8	8	Directorate: Community and Protection Services
2	Timeous Capital Spending	A steady increase in budget allocation; growing population and demand for services; demand management.	Good Governance and Compliance	10	4	Directorate: Financial Services
3	COVID-19 Pandemic	Manage the COVID-19 pandemic within the context of the prescribed regulations, taking the possible 4 th wave and intensity of new infections into account.	Safe Valley Dignified Living	8	4	All Directorates
4	Climate Change	Changing weather patterns, unpredictable rainfall, flash floods, drought natural disasters, fires (seasonal and other).	Green and Sustainable Valley Safe Valley	8	4	Office of the Municipal Manager
5	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery need to be provided by all departments.	Good Governance and Compliance	8	4	Directorate: Corporate Services

1.18 Anti-Corruption and Anti-Fraud

SECTION 83(C) OF THE MSA

Refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption.

SECTION 115(1) OF THE MFMA

States that the accounting officer must take reasonable steps to ensure that mechanisms and separation of duties in a supply chain management system are in place to minimise the likelihood of corruption and fraud.

SECTION 62(1) OF THE MFMA

States the following “the accounting officer of a municipality is responsible for managing the financial administration of the municipality, and must for this purpose take all reasonable steps to ensure: –

- (a) That the resources of the municipality are used affectively, efficiently and economically;
- (b) That the full and proper records of the financial affairs are kept in accordance with any prescribed norms and standards;
- (c) That the municipality has and maintains effective, efficient and transparent systems –
 - (i) Of financial and risk management and internal control;
 - (ii) Of internal audit operating in accordance with any prescribed norms and standards;
- (d) That unauthorised, irregular of fruitless and wasteful expenditure and other losses are prevented; and
- (e) That disciplinary or, when appropriate, criminal proceedings are instituted against any official of the municipality who has allegedly committed an act of financial or an offence in terms of Chapter 15.”

1.19 Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee (APAC) (refer to Table below for members of the Audit Committee), appointed in terms of Section 166 of the MFMA, has also been appointed as the Performance Audit Committee. Section 166(2) of the MFMA states that an audit committee is an independent advisory body that must:

- (a) advise the municipal council, the political office-bearers, the accounting officer and the management staff of the municipality, on matters relating to: –
 - ✦ internal financial control and internal audit;
 - ✦ risk management;
 - ✦ accounting policies;
 - ✦ the adequacy, reliability, and accuracy of financial reporting information;
 - ✦ performance management;
 - ✦ effective governance;
 - ✦ compliance with this Act, the annual Division of Revenue Act, 2013 (Act No. 2 of 2013) and any other applicable legislation;
 - ✦ performance evaluation; and
 - ✦ any other issues referred to it by the municipality.

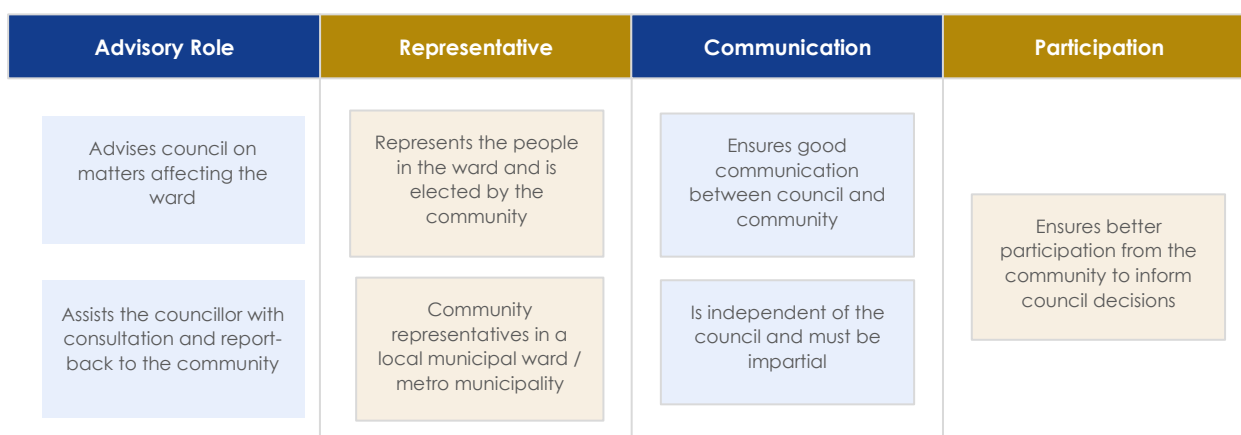

Table 9: Members of the Audit Committee

Name of representative	Capacity
LC Nene (Mr)	Chairperson
J Williams (Ms)	Member
V Botto (Mr)	Member
TW Lesihla (Mr)	Member

1.20 Ward Committees

Stellenbosch Municipality has a ward committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 6: Main duties of the Ward Committee

1.21 Stakeholders

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective inter-governmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of

all spheres of government in the setting of priorities, resource allocation, and development planning. The demonstration of the importance of partnerships for the municipality is illustrated in the table below.

Table 10: Key Stakeholders

Name of Partner	Purpose of MOU / MOA
@ Heart	The @heart partnership is a long-standing relationship built on experience with youth work and HCT testing from a municipal facility.
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klappmuts area.
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote and implement: <ul style="list-style-type: none"> 📌 platforms to share knowledge; 📌 disaster risk reduction initiatives; 📌 community safety programmes; and 📌 campaigns to promote safe resilient sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness, and resilience at all levels through knowledge, innovation and education.
Department Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the University's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television in the interest of the security of the town and the campus with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the Province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay at the night shelter, a blanket, or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people who are homeless.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, Waste and Electricity Generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Infrastructure Innovation Committee (IIC)	A partnership with the Stellenbosch University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with the Stellenbosch University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and University.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.

Name of Partner	Purpose of MOU / MOA
LTAB (Land Transport Advisory Board)	A partnership was formed between political leaders to discuss Land Transport related matters that affect transport in the area.
NMT (Non-motorised Transport) Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the University and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation, and maintenance of effective services within its area of jurisdiction.
Provincial Waste Management Officer's Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.).
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods, and communities.
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learners' license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sports Development at the Indoor Sports Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, the Council for Scientific and Industrial Research, the Western Cape Government, and the municipality to investigate the generation of alternate electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing Social Housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug River.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the University, whereby students provide: <ul style="list-style-type: none"> 👉 relief aid (clothing, food); 👉 placement of students to assist during incidents/disasters; and 👉 awareness programmes.
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects, and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.

Name of Partner	Purpose of MOU / MOA
Western Cape Government Department of Environmental Affairs and Development Planning.	A Partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Western Cape Department of Public Works, Roads and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads, and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly meetings (meetings involving the private sector, industries, and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

CHAPTER 2:

State of the Greater Stellenbosch Area

2.1 Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town Harbour, the shipping portal to both the Atlantic and Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first wine route in South Africa. A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area has a variety of theatres, which include Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street Theatre, and Aan de Braak Theatre.

2.2 Ward Demarcation

The Stellenbosch Municipality is currently structured into the following 23 wards:

Table 11: Municipal ward demarcation

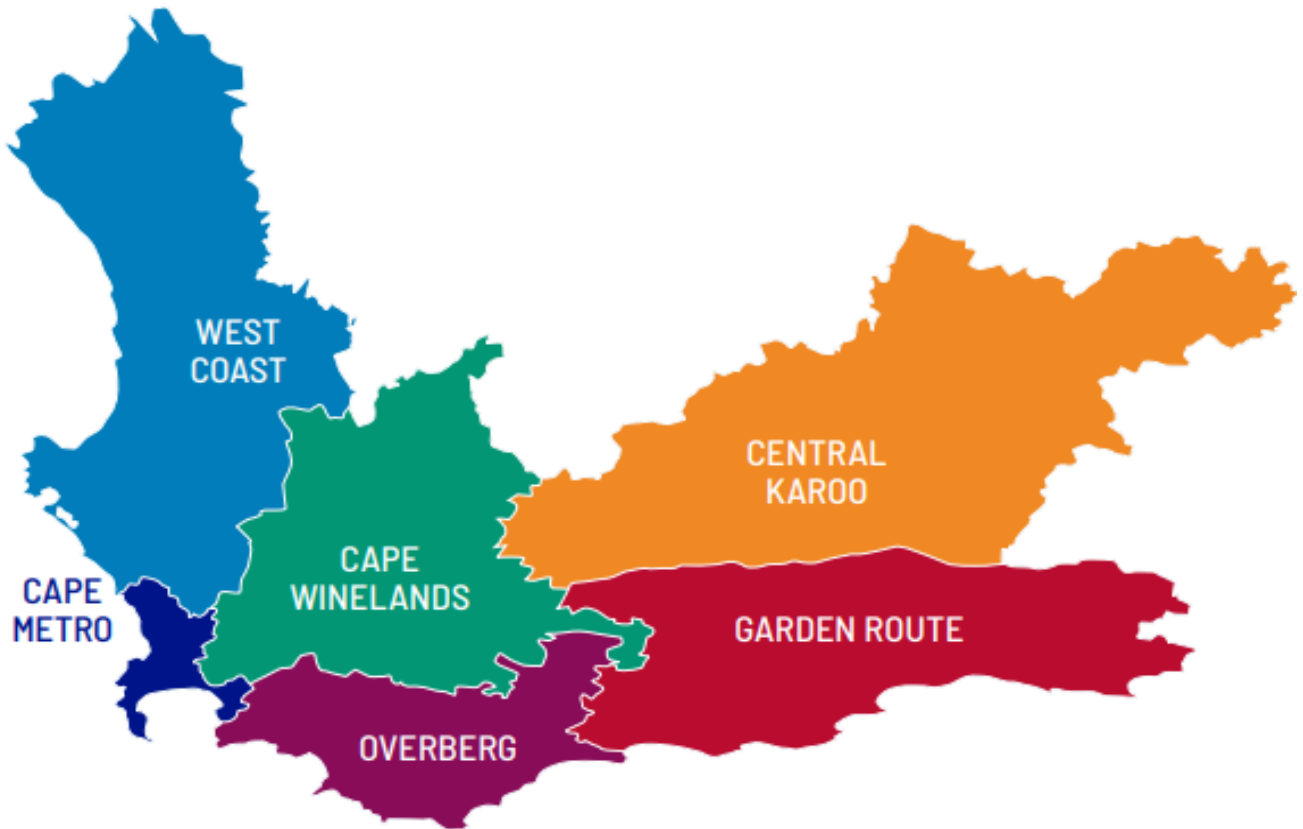

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan(Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms
7	Mostertsdrift, Karindal, Rozendal, Uniepark, Simonswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Oliehout Street, Banghoek Road, Academia, Bosman Street, Smuts Road, Joubert Street, De Beer Road, De Villiers Road from Ryneveld Street to Cluver Road on the left-hand side
11	Boundaries of the ward are: Kridge Road, Herte Street, Skone Uitsig Road onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Road onto George Blake Street, Mark Street, Distillery Road, Santhagen Road, Swawel Avenue, Kanarie Road, Tarentaal Road, Bokmakierie Road, Fisant Road, Devon Valley Road, Kiewiet Road, Dagbreek Road, Pelikaan Street, Patrys Road, Hammerkop Road, Loerie Road, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwellitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4 th and 5 th Avenue, 10 th , 12 th and 14 th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Road, Long Street, Crombi Road to the end of Gabriels Road. Asalea Road, 2 nd Road, Noble Road, Bailey Road, Eike Street, Curry Street, Hoop Road, Pansy Road, West Road, Laai Road, Anthony Road, Carriem Road, Archilles Road, Bergstedt Road, Davidse Road, Cupido Road, Pearce Road, Robyn Road, Gonzalves Road, Hercules Road, Chippendale Road, Afrika Road, Arnolds Road, September Road, Jakaranda Street, Short Road, Quarry Road, Middle Road, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Road towards Langstraat – Suid Road, Kloof Street, Fir Street, Fontein Road, Williams R towards Gabriels Road towards February Road, Valentyn Road, Pool Road, Raziet Road, Ortell Road, Rhode Road, King Road, Hine Road, Hendrikse Road, Rhode Road), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Road, Belladonna Street, Wildeklaar Welgevonden Boulevard, Olive Road, Sonnedou Road, Mountain Silver Road, Silver Oak Road, Froetang Road, Katbos Road, Everlasting, Fynbos Street, Sourfig Street, Scarlet Crescent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Street.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultray / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raihby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm

Ward	Areas
23	Dorp Street, Krige, Hamman Street, Schroder Road, Die Braak, Bird Street from Dorp Street, Dennesig area, Muller Road, Banghoek Road, Ryneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

Below is a map of the Cape Winelands District concerning the provincial district boundaries:

Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km². The province's spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands, and West Coast), and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:

Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. Stellenbosch Municipality, as a local authority, governs the towns of Stellenbosch, Pniël, Klappmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi, and Vlotenburg, as well as the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein, and Theewaterskloof Municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch, Franschoek, and Klappmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlotenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living while being near city life. This has placed the municipal area under constant development pressure.

2.3 Stellenbosch Municipality at a Glance

Table 12: Stellenbosch Municipality - Summarised Statistics

Population Estimates, 2022			Actual households, 2022		
	Population 175 411			Households 59 626	
Education		2022	Poverty		2022
	Matric Pass Rate	84.7%		Gini-Coefficient	0.61

2.4 Socio – Economic Context

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2022 and 2023. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The GDPR performance, risk, and vulnerability factors can be read in detail within the Local Government Socio-economic Profile 2023 for the Stellenbosch municipal area.

2.4.1 Population Growth

In 2022, the Stellenbosch municipal area, a prominent region within the Cape Winelands, accommodated 21 per cent of the area's population, totalling **175 411** individuals. Projections indicate a steady rise, estimating a population of **192 951** residents by 2027, marking an average annual population growth rate of 2.0 per cent during this period. This growth rate surpasses the Cape Winelands District's average annual population growth rate of 1.7 per cent by 0.3 percentage points. The socio-economic implications of this demographic shift are multifaceted, impacting various sectors including housing, employment, and education within the region.

The table below depicts the population growth from 2022 to 2027:

Table 13: Estimated Population Growth

Area	2022	2023	2024	2025	2026	2027
	%					
Stellenbosch	3.3	2.0	2.1	1.8	2.0	1.6
Cape Winelands	2.7	1.6	1.6	1.7	1.7	1.6
Western Cape	2.9	1.6	1.6	1.6	1.7	1.6

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4.2 Racial Split

The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. Much of the population comprises Black African individuals, accounting for 37.0 per cent of the total, followed closely by the Coloured community, constituting 37.8 per cent. White residents make up 23.3 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 0.5 per cent.

This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The table and graph below indicate the ratio split within the Cape Winelands District.

Table 14: Racial Split

Race	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
Black African	28.2%	30.1%	27.6%	37.0%	29.1%	19.4%
Coloured	61.8%	64.1%	61.8%	37.8%	62.3%	70.6%
Indian or Asian	0.4%	0.2%	0.4%	0.5%	0.5%	0.3%
White	9.6%	5.7%	10.2%	23.3%	8.1%	9.6%

Figure 7: Racial Split for the WCO24

Source: Western Cape Local Government Social-Economic Profile 2023 and Statistics South Africa 2022

2.4.3 Gender Ratio

According to Stats SA, the Stellenbosch municipal area presented a gender ratio of 94.2, indicating that there are 94.2 men for every 100 women in the population. This ratio translates to 48.5 per cent males and 51.5 per cent females.

The slight increase in the ratio observed towards 2023 suggests a potential influx of working males to the area or a rise in female mortality rates. This demographic shift carries significant socio-economic implications, as it impacts workforce dynamics and social structures within the municipal area.

The table below depicts the gender ratio within the Stellenbosch municipal area.

Table 15: Gender Ratio

Year	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2022	94.1	97.7	98.8	94.2	93.3	92.7
2023	98.7	110.0	98.4	96.2	94.4	96.9
2024	98.8	110.3	98.5	96.3	94.4	97.0
2025	98.9	110.6	98.6	96.3	94.3	97.1
2026	99.0	110.3	98.9	96.3	94.3	97.4

Source: Western Cape, Social-Economic Profile 2023 and StatsSA 2022

Figure 8: Ratio of % females and males

Source: Western Cape, Social-Economic Profile 2023 and StatsSA 2022

2.4.4 Age Cohorts

Within the Stellenbosch municipal area, a distinct age composition was apparent in 2022. The youth population was the largest, accounting for a substantial 73.1 per cent of residents.

Following closely behind were those between the ages of 35 and 64, who constituted 31.5 per cent of the population. This composition is primarily attributed to the presence of the acclaimed Stellenbosch University, which attracts students from across South Africa and around the world.

Additionally, the age composition of the population is analysed through dependency ratios, which highlight the proportion of individuals within the working age group (15 – 64) supporting dependents, including children and senior citizens. The higher dependency ratio in the graph below places increased strain on social systems and essential service delivery.

Graph 1: Age Cohorts for 2022

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4.5 Household Size

Household size refers to the number of people per household. The average size of households is expected to remain an average of 2.9 individuals from 2022 to 2026. The trend of the average household size could be attributed to a wide range of factors, including but not limited to underlying socio-economic factors like patterns in employment opportunities, educational access, and housing market dynamics that shape this trend.

The table below depicts the household sizes from 2022 to 2026:

Figure 9: Household size

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4.6 Population Density

Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health, and service delivery risks. In 2022, the population density of the Cape Winelands District was 45 persons per square kilometer. In order of highest to lowest, the various local municipal areas are compared as follows:

In order of highest to lowest, the various local municipal areas compare as follows:

↓	Stellenbosch	245 people/km ² ;
↓	Drakenstein	194 people/km ² ;
↓	Breede Valley	51 people/km ² ;
↓	Langeberg	27 people/km ² ; and
↓	Witzenberg	14 people/km ² .

According to the above comparison, Stellenbosch has the **highest density** in the Cape Winelands District. This is helped a lot by the fact that the Municipal Spatial Development Framework (mSDF) says that urban development should stay within the limits of the urban edge.

Graph 2: Level of Urbanisation

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.5 Education

The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Quality education equips individuals with essential skills, knowledge, and critical thinking abilities, empowering them to participate meaningfully in the local economy. As the educational attainment level rises within a municipality, there is a corresponding increase in employment opportunities and higher earning potential for residents. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty.

2.5.1 Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch experienced a notable surge from 28 033 enrolments in 2020 to 29 092 in 2022, which reflects an increase of 1 059 learners. It is evident that the educational growth depicts a positive socio-economic trend within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities.

The graphs below depict learner enrollments, learner-teacher ratios, and learner retention from 2020 to 2022.

Graph 3: Learner Enrolment

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality)

It is crucial to establish healthy learner-teacher ratios to determine the schools' capacity to accommodate the students. Lower learner-teacher ratios are associated with enhanced teacher-student interaction, fostering better-quality education. The 2022 Schools Realities Publications emphasise that government-paid teachers face high learner-teacher ratios, indicating larger class sizes. Despite a minor decrease from 26.8 students per teacher in 2020 to 26.6 in 2022, the ratio remains within the recommended range of 35:1 to 40:1.

This suggests relatively uncrowded classrooms, aligning with established standards and ensuring a conducive learning environment, ultimately impacting the socio-economic landscape positively.

Graph 4: Learner-Teacher Ratio

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality)

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior. This can reflect essential socio-economic factors and personal circumstances that have a significant impact on education.

The inverse of the learner-retention rate is commonly referred to as the drop-out rate. Learner retention rates are influenced by a wide array of factors, including low socio-economic background, student attitudes towards education, overcrowded classrooms, critical thinking skills, study skills, and other personal circumstances that can make it difficult for the learner to focus on education. Despite the learner retention rate progressing in the Stellenbosch municipal area, improving from 79.1 per cent in 2021 to 82 per cent in 2022, 18 per cent of the learners did not complete their studies. Addressing these

factors is necessary for encouraging a more conducive learning environment, ensuring higher retention rates, and ultimately enhancing the region's overall socio-economic landscape.

Graph 5: Learner retention

Source: Western Cape, Social-Economic Profile 2022 and 2023 (Stellenbosch Municipality)

2.5.2 Number of schools and no-fee schools

Figure 10: Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area was recorded at 42 in 2022. Over the Medium-Term Expenditure Framework (MTEF), a substantial budget has been allocated for vital upgrades, additions, and the construction of new facilities in specific schools. This allocation is slated for use in enhancing the infrastructure of key educational institutions, including Aviation, Elsenburg Agri School, New Klappmuts Primary and High Schools, and New Stellenbosch Primary School. Such investments signify a proactive approach to bolstering the educational landscape, fostering an environment conducive to quality learning.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 66.7 per cent in 2022, whereby 71.4 per cent are equipped with libraries.

Source: Western Cape, Social-Economic Profile 2023

2.5.3 Schools with libraries / media centres

The Stellenbosch municipal area consists of 42 schools in 2022, of which 30 were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information, which is in turn directly linked to improved education outcomes.

2.5.4 Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised.

The graph below depicts the Matric pass rates from 2020 to 2022.

Graph 6: Education outcomes (matric pass rate)

Source: Western Cape, Social-Economic Profile 2023

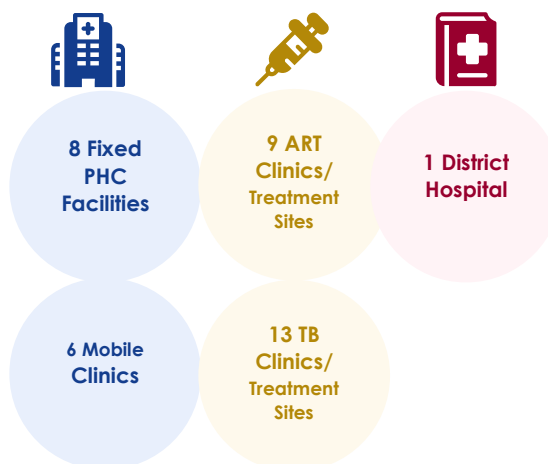

2.6 Health

2.6.1 Health Facilities

According to the LGSEP 2022, in 2021, the Stellenbosch municipal area had 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre, as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, nine ART treatment sites, and 13 TB clinics. The municipal area has 14 (17.9 per cent) out of the 78 primary healthcare facilities within the Cape Winelands district.

The table depicts the total healthcare facilities.

Table 16: Health facilities

Source: Western Cape, Social-Economic Profile 2023

2.6.2 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 11: Emergency Medical Services

2.6.3 HIV / AIDS and Tuberculosis

The number of clients (patients) that remain committed to their antiretroviral treatment (ART) plan in the Stellenbosch municipal area increased from 6 915 registered patients in 2021/22 to 7 062 in 2022/23, while the number of new patients receiving ART declined from 481 to 429 during the same period. Similarly, the number of registered patients receiving TB treatment exhibited an average annual decrease of 9.7 per cent between 2021/22 and 2022/23.

Table 17: HIV/AIDS Management

Area	Registered patients receiving ART		Number of new ART patients	
	2021/22	2022/23	2021/22	2022/23
Stellenbosch	6915	7062	481	429

Source: Western Cape, Social-Economic Profile 2023

Graph 7: Number of TB patients registered on treatment

Source: Western Cape, Social-Economic Profile 2023

2.6.4 Child Health

The immunisation coverage rate for children under the age of one in the municipal area worsened from 73.3 per cent to 64.5 per cent between 2021/22 and 2022/23. The overall Child Welfare and Development (CWD) rate also showed improvement, rising from 60.6 per cent to 62.2 per cent. However, there was a notable increase in malnourished children under the age of five, with severe acute malnutrition rising from 1.5 to 1.6 per 100 000 people between 2021/22 and 2022/23.

The CWD also increased from 1.8 per cent to 2.2 per cent while the provincial average changed from 0.9 to 1.3 per cent. The neonatal mortality rate (deaths per 1 000 live births before 28 days of life) for the municipal area declined from 6.3 in 2020/21 to 3.1 in 2021/22. The rate was still notably below the CWD average of 8.0. A total of 9.8 per cent of all babies born in a facility in the municipal area in 2021/22 weighed less than 2 500 grams, indicating possible challenges with long-term maternal malnutrition and poor health care during pregnancy.

Table 18: Child Health

Area	Low Birth Weight		Neonatal Mortality Rate per 1000		Acute Malnutrition Rate (Under 5) per 100 000		Immunisation Rate (Under 1)	
	2022	2023	2022	2023	2022	2023	2022	2023
Stellenbosch	9.8	9.8	3.1	4.8	1.5	1.6	73.3	64.5
Cape Winelands District	16.0	16.7	8.0	8.6	2.2	2.5	77.0	76.4

Source: Western Cape, Social-Economic Profile 2023

2.6.5 Maternal Health

In 2021/22, the Stellenbosch municipal area recorded the second lowest number of maternal deaths (61.1 per cent) and the lowest teenage pregnancies (13.2 per cent) in the CWD; however, these numbers decreased to 60.2 per cent (maternal deaths) and 12.5 per cent (teenage pregnancies) in 2022/23. However, the termination of pregnancy rate (0.7 per cent) remained unchanged across this period.

Table 19: Maternal Health

Area	Maternal Mortality Rate		The delivery rate of women 10- 19 years		Termination of pregnancy rate	
	2022	2023	2022	2023	2022	2023
Stellenbosch	61.1	60.2	13.2	12.5	0.6	0.7
Cape Winelands District	120.1	54.7	14.0	13.3	0.7	0.8

Source: Western Cape, Social-Economic Profile 2023

2.7 Poverty

2.7.1 GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the LGSEP 2023, the real GDPR per capita was R93 873 whereby the Stellenbosch municipal area has grown significantly with a per capita income of R110 7, marking the highest figure in the Cape Winelands District for 2022. All the data below are sourced from the Local Government Socio-economic Profile 2023 for the Stellenbosch Municipal area.

Despite a moderate regression in the period between 2016 and 2022, this highlights the municipality's robust economic potential, particularly noteworthy considering the recent economic challenges posed by the recession and the global COVID-19 pandemic, which impacted economic activities regionally and globally.

Graph 8: GDP Per Capita

Source: Western Cape, Social-Economic Profile 2022

2.7.2 Income Inequality

According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen through a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. In the Cape Winelands District, income inequality worsened to 0.69 in 2022, a trend expected to exacerbate due to the potential aftermath of the COVID-19 pandemic. Stellenbosch improved its income inequality, with inequality levels declining from 0.63 in 2021 to 0.61 in 2022, aligning below the district's trajectory.

Graph 9: Income Inequality

Source: Western Cape, Social-Economic Profile 2022

2.7.3 Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL. In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL, a slight improvement from 2016 and 2019. Stellenbosch and Drakenstein had the highest poverty rates in the Cape Winelands District, with Stellenbosch's 66.7 per cent slightly below the district's 64.8 per cent in 2022. Addressing these socio-economic challenges is essential for ensuring sustainable growth and development within the municipality.

Table 20: Poverty Line

Source: Western Cape, Social-Economic Profile 2023

2.8 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.

This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2021. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

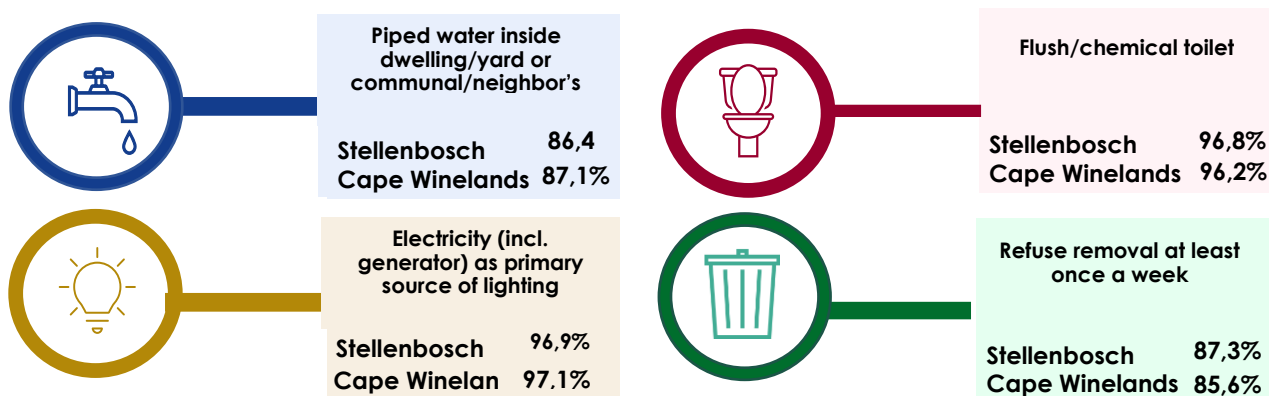

2.8.1 Housing and household services

During 2023, the Stellenbosch municipal area, which comprises 59 626 households, 87.3 per cent had access to formal housing, lower than the Cape Winelands District average of 88.8 per cent. The area also recorded a significantly higher proportion of informal dwellings, totaling 11.8 per cent, in contrast to the District's 10.3 per cent.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (86.4 per cent), flush or chemical toilet access (96.8 per cent), electricity access (including generators) for lighting (96.9 per cent), for lighting at 96.9 per cent and the removal of refuse at least weekly by the local authority at 87.3 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 12: Service delivery access levels (HH)

Source: Western Cape: Socio-Economic Profile 2023

2.8.2 Free Basic Services

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total number of indigent households excludes all informal households and includes formal households that have been registered as indigent households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R6 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

The table below indicates the number of households receiving free basic services.

Table 21: Access to Free Basic Services

Year	Number of Households								
	Total no. of HH	Free Basic Water		Free Basic Sanitation		Free Basic Electricity		Free Basic Refuse Removal	
		Access	%	Access	%	Access	%	Access	%
2018/19	52 374	6 813	13.01	6 813	13.01	4 833	9.23	6 813	13.01
2019/20	52 374	6 666	100%	6 666	100%	4 932	100%	6 666	100%
2020/21	50 328	7 283	100%	7 283	100%	5 189	100%	7 283	100%
2021/22	50 328	4 681	100%	4 681	100%	4 982	84.25%	4 681	100%
2022/23	59 626	5 744	100%	5 744	100%	5 744	100%	5 744	100%

Source: Western Cape Local Government Social-Economic Profile 2023 and Statistics South Africa 2022

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2020. The strained economic conditions are anticipated to increase demand for these services, leading to a rise in the number of indigent households. However, this trend is area-specific and contingent on the qualifying criteria applied. These findings underscore the persistent challenges and socio-economic factors influencing housing and essential service access within the Stellenbosch municipal area, emphasising the need for targeted interventions to uphold citizens' constitutional rights and enhance overall living standards.

2.9 Safety and Security

All the data below are sourced from the Local Government Socio-Economic Profile for 2023 for Stellenbosch Municipal area.

2.9.1 Murder

Murder is defined as the unlawful and intentional killing of another person.

Within the Stellenbosch area, the number of murders de-escalated from 90 cases in 2021/22, reaching 77 cases in 2022/23. The Stellenbosch municipal area's murder rate (per 100 000 people) decreased from 46 in 2021/22 to 38 in 2022/23, reflecting a similar trend in the Cape Winelands District, where the rate increased from 45 to 41 for the same period.

2.9.2 Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency, and human trafficking.

In 2022/23, there were 207 sexual offences in the Stellenbosch area, compared to 989 reported cases in the Cape Winelands District. The incidence of sexual offences (per 100 000 people) in the Stellenbosch municipal area (104) was higher than that of the district (102) in 2022/23.

2.9.3 Common Assault

In Stellenbosch, the crime rate per 100 000 people for common assault showed a concerning upward trend, with 510 reported incidents per 100 000 people, which increased from 527 in 2021/22 to 557 in 2022/23. This escalation in common assault cases per capita suggests a challenging security environment, which could potentially have socio-economic implications. Addressing this rising trend is vital to ensuring the safety and well-being of the community and fostering a secure environment for residents, businesses, and investors. Implementing effective crime prevention measures and community outreach initiatives may be essential to reversing this trend and creating a safer atmosphere conducive to economic growth and development.

2.9.4 Commercial Crime

In Stellenbosch, the crime rate per 100 000 people for commercial crime showed a steady upward trend over the analysed period. In 2020/21, there were 340 reported incidents per 100 000 people, which increased slightly to 443 in 2021/22 but then increased significantly to 528 in 2022/23. This fluctuation in commercial crime rates could indicate varying challenges faced by local businesses and law enforcement in combating economic offences. Addressing this issue is crucial as it directly impacts the business environment, investor confidence, and the overall economic stability of the municipality. Implementing robust measures to combat commercial crimes, such as fraud and embezzlement, is essential for fostering a secure and trustworthy business environment, supporting economic growth, and attracting investments in the Stellenbosch municipal area.

2.9.5 Drug-Related Offences

Drug-related crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.

Drug-related crime within the Stellenbosch area increased from 1 224 cases in 2021/22 to 1 463 cases in 2022/23. The Cape Winelands District's drug-related offences surged from 6 047 in 2021/22 to 6 783 in 2022/23. When considering the rate per 100 000 people, with 734 drug-related offences per 100 000 people in 2022/23, the Stellenbosch area's rate is above the district's rate of 700 per 100 000 population.

2.9.6 Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area declined from 262 in 2021/22 to 251 in 2022/23. This translates into a rate of 126 per 100 000 people in 2022/23, which is above the district's 79 per 100 000 people.

2.9.7 Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

Stellenbosch's rate of 436 residential burglaries per 100 000 people, which is well below the district's rate of 453 for 2022/23, indicates that the targeted strategies that were implicated to address these crime rates improved the safety and security in the community.

2.10 Economy and Labour Market Performance

2.10.1 Sectoral Overview

In 2021, the economic landscape of the Stellenbosch municipal area boasted a Gross Domestic Product at regional level (GDPR) totaling R20.6 billion and provided gainful employment to 69 012 individuals. The municipality's economy thrives on a robust agriculture sector, primarily specialising in grape cultivation for its globally acclaimed wineries, which serves as a pivotal driver for trade and tourism. Notably, the finance sector emerged as the primary contributor to the local economy, generating R5.3 billion in 2021 and constituting 25.7 per cent of the total GDPR, further solidifying the area's economic significance. The sectors that contributed to GDPR growth in 2022 were finance and transport, both accounting for 1.0 percentage point, followed by trade, which contributed a 0.6 percentage point.

Moreover, the potential for overall Gross Domestic Product at the regional level (GDPR) growth was impeded by declines in the primary and secondary sectors. Apart from agriculture, which experienced growth rates of 20.3 per cent in 2020 and 5.0 per cent in 2021, these sectors have yet to recover to their 2019 levels. The occurrence of load-shedding in 2022 had adverse effects on both farmers and manufacturers, diminishing their production capacities significantly.

In the current economic landscape of South Africa, marked by challenges such as load-shedding, constrained consumer spending, and diminished business confidence, the Stellenbosch municipal area is predicted to experience near-stagnant Gross Domestic Product at regional level (GDPR) growth of 0.3 per cent in 2023, as indicated on the graph below. Several sectors, including agriculture, manufacturing, construction, general government, and personal services, are expected to underperform due to the macroeconomic pressures dampening overall business activities. However, there is a more optimistic outlook for GDPR growth in 2024, projected at 1.0 per cent. This optimism is rooted in the anticipation of increased tourist activities and robust growth in the finance sector, which are poised to bolster the local economy.

Figure 13: Sectoral contribution to GDP 2021

Source: Western Cape, Social-Economic Profile 2023

Graph 10: GDP Forecast

Source: Western Cape, Social-Economic Profile 2023

2.10.2 Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a significant workforce composition, with 20.9 per cent classified as skilled workers and 33.5 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute significantly to employment, accounting for 19.7 per cent of the workforce in 2021. However, a notable challenge exists for low-skilled workers, constituting 25.8 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic.

Graph 11: Skills Level Contribution, 2022

Source: Western Cape, Social-Economic Profile 2023

2.10.3 Unemployment

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for affected demographic areas.

Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

CHAPTER 3:

Strategic Policy Context

3.1 Municipal Vision and Strategy

Figure 14: Municipal Vision and Strategy

OUR MISSION: To deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

OUR VALUES: In all of our work and engagements, we subscribe to the following values:

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Integrity: As servants of the public, we undertake to perform the functions and operations of the Municipality in an honest and ethical manner.

Innovation: We will continuously review our systems, procedures and processes to make them more responsive to customer needs. In partnership with our stakeholders we will seek innovative solutions to complex problems. We will encourage and reward initiatives which show creativity and ingenuity.

Transformation: We, as custodians of hope, will work tirelessly at transforming our Municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley

Responsiveness: The municipality to be a responsive municipal entity with zero tolerance for corruption and illegal actions.

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the “**An Integrated Valley of Opportunity and Innovation**”

MISSION

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality honestly and ethically.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding of the need to give an account of our actions to individuals, groups, and organisations.

Transformation: We, as custodians of hope, will work tirelessly to transform our municipality, communities, and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social, and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures, and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness: The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

3.2 Strategic Focus Areas (SFAs)

3.2.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunities for enterprise, creativity and business development in our cities, towns and villages is an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that address these challenges: The first relates to the provision of services to citizens and how these services can assist them in facilitating development and job creation. The second relates to the internal workings of the municipality and how municipal procurement of services aids in fostering opportunities for enterprise development and creativity. The third dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens and also enable enterprise and business development. Without appropriate, well-maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work, and learning.

3.2.2 Strategic Focus Area 2: Green and Sustainable Valley

Several dimensions of the environment underpin its importance for the greater Stellenbosch area and the people living within it. The first is an ecological dimension, which recognises that the natural environment and its processes provide the setting in which and the basic resources with which human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins vitally important tourism and agricultural economies. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, people's activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why the spatial dimension is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impacts people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and the food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts disposable income, work productivity, and transport infrastructure provision. Secondly, the municipal strategy has, over the last decade, taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has helped to hide spatial inequity in our settlements. Thirdly, the municipal government has considerable influence over the space economy of settlements. Under its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts economic success through the provision and maintenance of infrastructure and how activities are organised in space.

3.2.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law-abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunities, and sound financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas, and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure greater Stellenbosch area is thus not only a functional necessity but also underpins elements of economic and social development strategies.

3.2.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life, we mean, inter alia, access to shelter, ethical administration of municipal housing, and sufficient choice in housing opportunities for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women, and elderly, is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

3.2.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where, and to whose benefit it is, however, is a difficult task. The range of

services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also ensure synergy between the work of the political and administrative spheres of the municipality, their work, and that of other spheres of government, civil society, and the business sector. Municipalities should communicate well and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, both external and internal to the organisation, be recognised and built upon.

We cannot serve the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given the rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure the best use of public resources, regular performance management is essential. The information must be readily available and contact between citizens and the municipality should be responsive and as efficient as possible.

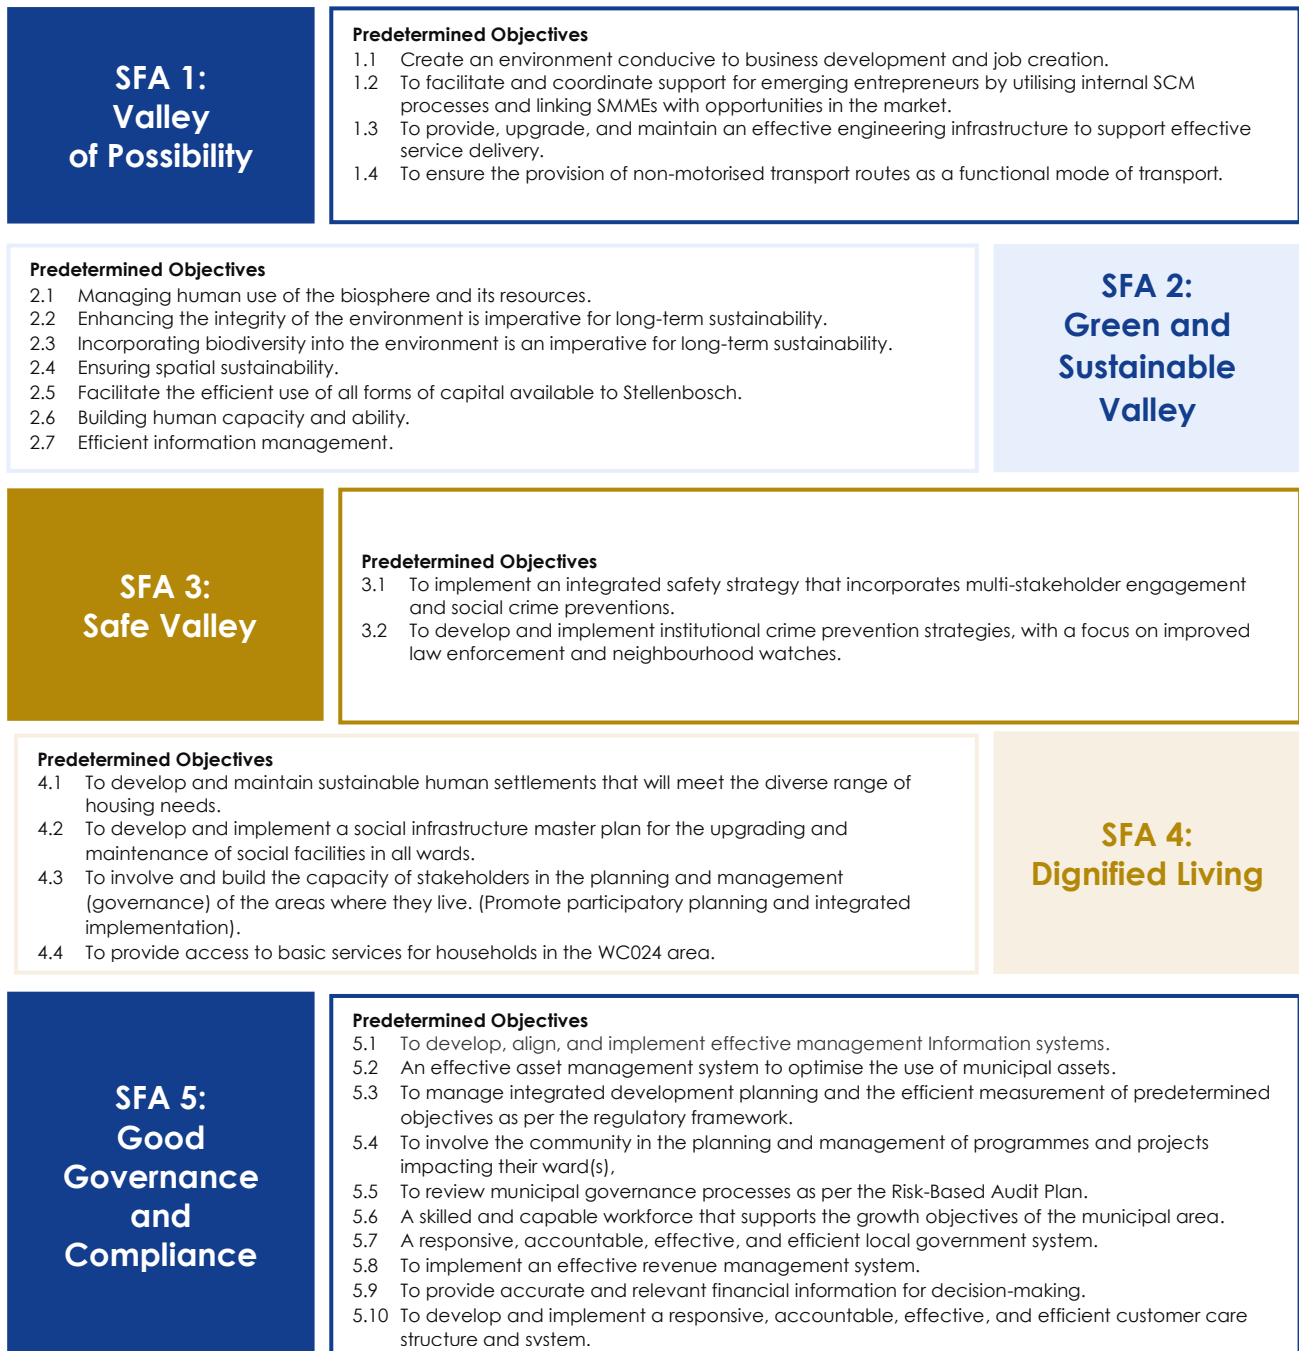

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership, and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To meet the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensuring the integrity of the municipality. It is most important that the use of municipal resources supports agreed-upon objectives; in other words, the municipal budget and ongoing expenditure must be strategy-led.

3.3 Strategic Objectives and Predetermined Objectives

Figure 15: Strategic Focus Areas and Predetermined Objectives

3.4 Core Principles in Executing Strategy

The municipality comprises three core components:

- Democratically elected political leadership;
- The administration, comprising officials; and
- Citizens, as individuals, interest groups, and organisations (public, community-based and private).

For sustainable municipal management, political leadership and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critics or passive bystanders. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs, and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

3.4.1 Alignment with institutional structures and processes

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the “now” – the need to guide decisions today. For municipalities, the “now” has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is “under preparation” is used as an excuse for inaction or even poor decision-making. The arm’s length approach also appears to neglect local experiential knowledge – what people know through working with service issues daily. With this in mind, we have provided for regular, informal, but structured engagements between the MayCo and Director’s Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct the development and management of the municipality. Written up as an initial strategy, provision is made for influencing the

decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

3.4.2 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining, and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: elaborating on behaviour outlined in legislation through guidelines, standards, and so on.

Fiscal measures: fees, charges, and taxes for services as a means for raising government revenue and directing action in support of policy and legislation (through fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policy and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements, and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the positions that the government takes on issues, "positive" and "negative." This could be through the media, public meetings / engagements, events, and so on.

3.5 Global Policy Direction

The Stellenbosch Municipality's strategic planning does not occur in a vacuum. Various key policy directives are being employed that range from a global reach to more specific directives applicable to the municipality and its neighbouring municipalities. All these directives are considered when framing future strategic planning and resource allocation. The sections below outline key policy directives considered when framing Stellenbosch Municipality's 2nd Review and Amendment of the 5th Generation IDP 2022 – 2027.

3.5.1 Sustainable Development Goals (SDGs)

Figure 16: Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs), officially known as *Transforming Our World: The 2030 Agenda for Sustainable Development* is a set of seventeen aspirational "Global Goals" with 169 targets between them. The Agenda is an action plan for people, the planet, and prosperity, with a focus on strengthening peace and partnerships. The SDGs are integrated and indivisible and balance the three dimensions of sustainable development: the **economic**, **social**, and **environmental**. The Goals are the following:

Sustainable Development Goals (SDGs) 2030

- 🚩 Goal 1: End poverty in all its forms everywhere.
- 🚩 Goal 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.
- 🚩 Goal 3: Ensure healthy lives and promote well-being for all ages.
- 🚩 Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.
- 🚩 Goal 5: Achieve gender equality and empower all women and girls.
- 🚩 Goal 6: Ensure availability and sustainable management of water and sanitation for all.
- 🚩 Goal 7: Ensure access to affordable, reliable, sustainable, and modern energy for all.
- 🚩 Goal 8: Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.
- 🚩 Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation.
- 🚩 Goal 10: Reduce inequality within and among countries.
- 🚩 Goal 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.
- 🚩 Goal 12: Ensure sustainable consumption and production patterns.
- 🚩 Goal 13: Take urgent action to combat climate change and its impacts.
- 🚩 Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development.
- 🚩 Goal 15: Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat deforestation, halt and reverse land degradation, and halt biodiversity loss.
- 🚩 Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable, and inclusive institutions at all levels.
- 🚩 Goal 17: Strengthen the means of implementation and revitalise the global partnership for sustainable development.

3.6 National Policy Direction

Based on the national government's election manifesto and Medium-Term Strategic Framework, a set of twelve outcomes was developed through extensive consultation and discussion at both the ministerial and administrative levels. These outcomes reflect the desired development impacts sought nationally, given the government's policy priorities indicated below:

National Strategic Outcomes

- 🚩 Goal 1: Improved quality of basic education.
- 🚩 Goal 2: A long, healthy life for all South Africans.
- 🚩 Goal 3: All people in SA are and feel safe.

- ⚡ Goal 4: Decent employment through inclusive economic growth.
- ⚡ Goal 5: A skilled and capable workforce to support an inclusive growth path.
- ⚡ Goal 6: An efficient, competitive, and responsive economic infrastructure network.
- ⚡ Goal 7: Vibrant, equitable and sustainable rural communities with food security for all.
- ⚡ Goal 8: Sustainable human settlements and improved quality of household life.
- ⚡ Goal 9: A responsive, accountable, effective, and efficient local government system.
- ⚡ Goal 10: Environmental assets and natural resources that are well protected and continually enhanced.
- ⚡ Goal 11: Create a better SA and contribute to a better and safer Africa and World.
- ⚡ Goal 12: An efficient, effective, and development-oriented public service and an empowered, fair and inclusive citizenship.

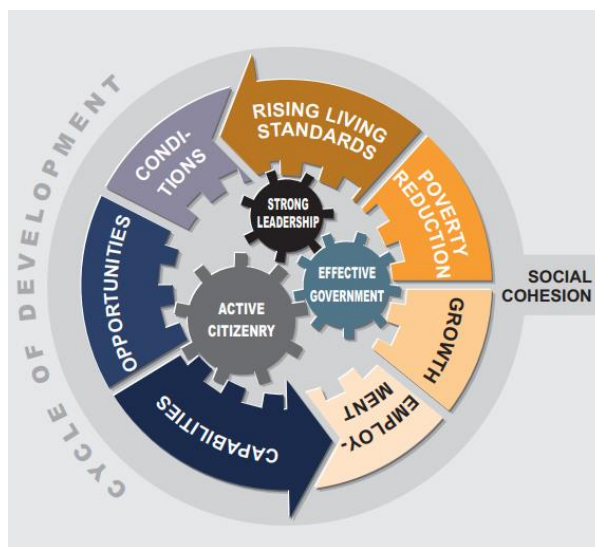

3.6.1 National Development Plan (NDP) – 2030

The President appointed a National Planning Commission in May 2010 to draft a vision and plan for the country. On 9 June 2011, the Commission released a diagnostic document and elements of a vision statement. On 11 November 2011, the vision statement and the plan were released for consideration. The Commission consulted widely on the draft plan. The National Development Plan was adopted by the Cabinet in September 2012.

An approach to change

The graphic below demonstrates the close link between capabilities, opportunities, and employment on social and living conditions. It shows how leadership, active citizenry and effective government can help drive development in a socially cohesive environment.

Figure 17: National Development Plan – An approach to change

The plan focuses on the critical capabilities needed to transform the economy and society. Achieving these capabilities is not automatic, nor will they emerge if the country continues on its present trajectory. Rising levels of frustration and impatience suggest that time is of the essence: failure to act will threaten democratic gains. In particular, South Africa must find ways to urgently reduce alarming levels of youth unemployment and provide young people with broader opportunities.

Progress over the next two decades means doing things differently. Given the complexity of national development, the plan sets out six interlinked priorities:

- ⚡ Uniting all South Africans around a common programme to achieve prosperity and equity.

- ✦ Promoting active citizenry to strengthen development, democracy, and accountability;
- ✦ Bringing about faster economic growth, higher investment, and greater labour absorption;
- ✦ Focusing on key capabilities of people and the state;
- ✦ Building a capable and developmental state; and
- ✦ Encouraging strong leadership throughout society to work together to solve problems.

The Plan in brief

By 2030

- ✦ Eliminate income poverty – Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39% to zero; and
- ✦ Reduce inequality – The Gini coefficient should fall from 0.69 to 0.6.

Enabling milestones

- ✦ Increase employment from 13 million in 2010 to 24 million in 2030.
- ✦ Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- ✦ Increase the share of national income in the bottom 40% from 6% to 10%.
- ✦ Establish a competitive base of infrastructure, human resources, and regulatory frameworks.
- ✦ Ensure that skilled, technical, professional, and managerial posts better reflect the country's racial, gender, and disability makeup.
- ✦ Broaden ownership of assets to historically disadvantaged groups.
- ✦ Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- ✦ Provide affordable access to quality health care while promoting health and well-being.
- ✦ Establish effective, safe, and affordable public transport.
- ✦ Produce sufficient energy to support the industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- ✦ Ensure that all South Africans have access to clean running water in their homes.
- ✦ Make high-speed broadband internet universally available at competitive prices.
- ✦ Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- ✦ Ensure household food and nutrition security.
- ✦ Entrench a social security system covering all working people, with social protection for the poor and other groups in need, such as children and people with disabilities.
- ✦ Realise a developmental, capable, and ethical state that treats citizens with dignity.
- ✦ Ensure that all people live safely, with an independent and fair criminal justice system.
- ✦ Broaden social cohesion and unity while redressing the inequities of the past.
- ✦ Play a leading role in continental development, economic integration, and human rights.

3.6.2 Medium-Term Strategic Framework 2019 – 2024 (MTSF)

The MTSF is a high-level strategic document to guide the five-year implementation and monitoring of the National Development Plan (NDP) 2030. It identifies the priorities to be undertaken during the 2019 – 2024 period to put the country on a positive trajectory towards the achievement of the 2030 vision. It sets targets for the implementation of the priorities and interventions for the next five years and states the outcomes and indicators to be monitored.

The implementation of the MTSF 2019–2024 was, however, disrupted by the outbreak of the COVID-19 pandemic and the declaration of a National State of Disaster on 15 March 2020. The government had to reprioritise its plans and budgets in response to the pandemic, which has had a devastating impact on the health, social, and economic aspects of the lives of South Africans. The President launched the Economic Reconstruction and Recovery Plan (ERRP) on 15 October 2020, which sought to restore much-needed economic growth and employment. The combination of all these factors

has meant that the MTSF 2019–2024 had to be revised to include critical interventions that are part of the government's relief and recovery efforts.

The Revised MTSF 2019–2024 also prioritises government commitments to prevail over the coronavirus pandemic and to work towards recovery. These commitments are to defeat the coronavirus pandemic, accelerate our economic recovery, implement economic reforms to create sustainable jobs and drive inclusive growth, and lastly, fight corruption and strengthen the capacity of the state. These commitments are included in the revised MTSF for 2019–2024 and will provide the focus for annual and strategic plans.

The MTSF 2019 – 2024 aims to address the challenges of **unemployment**, **inequality**, and **poverty** through the three pillars of the NDP.

Figure 18: Three NDP Pillars

The priorities, which will be achieved through more focused implementation, coordination, and integration by the various levels of government, including state-owned enterprises, the private sector, and civil society, are as follows:

- Priority 1:** A capable, ethical, and developmental state;
- Priority 2:** Economic transformation and job creation;
- Priority 3:** Education, skills, and health;
- Priority 4:** Consolidating the social wage through reliable and quality basic services;
- Priority 5:** Spatial integration, human settlements, and local government;
- Priority 6:** Social cohesion and safe communities; and
- Priority 7:** A better Africa and world.

3.6.3 National District Development Model and One Plan

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way to speed up service delivery to ensure that municipalities are properly supported and adequately resourced. The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

The objectives of the DDM are to:

- solve the silos at a horizontal and vertical level;
- maximise impact and align plans and resources at our disposal through the development of "One District, One Plan, and One Budget";

- narrow the distance between people and government by strengthening the coordination role and capacities at the district level;
- ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level;
- build government capacity to support municipalities;
- strengthen monitoring and evaluation at district and local levels;
- implement a balanced approach towards development between urban and rural areas;
- ensure sustainable development while accelerating initiatives to promote poverty eradication, employment, and equality; and
- exercise oversight over budgets and projects in an accountable and transparent manner.

Nationally, the DDM is expressed through the development of a One Plan. The One Plan is defined as an intergovernmental plan setting out a 25–30-year long-term strategic framework (consisting of short, medium, and long-term actions) to guide investment and delivery in each of the districts and metropolitan spaces. This plan for each space is to be jointly developed and agreed to by all three spheres of government.

3.6.4 Integrated Urban Development Framework (IUDF)

The National Development Plan (NPD) indicated that by 2030, South Africa should observe meaningful and measurable progress in creating more functionally integrated, balanced, and vibrant urban settlements. To attain this goal, the Department of Cooperative Governance, working in collaboration with other national departments and other role-players, developed the Integrated Urban Development Framework (IUDF) to transform and restructure South Africa's urban spaces.

The IUDF aims to guide the development of **inclusive, resilient, and liveable urban settlements** while directly addressing the unique conditions and challenges facing South Africa's cities and towns.

To achieve the transformation vision, four (4) overall strategic goals were introduced:

Figure 19: IUDF Strategic Goals and Levers

Source: Integrated Urban Development Framework

The IUDF strategic goals listed above create nine policy levers. These policy levers can only be used if they are added to tools for planning municipal development, like the Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

3.7 Provincial Policy Direction

3.7.1 The Western Cape Government Provincial Strategic Plan 2019 – 2024

The Western Cape Provincial Government (WCG) committed itself, through its recently adopted Vision Inspired Priorities (VIPs), to building a values-based competent state that enables opportunity and promotes responsibility in a safer Western Cape.

The VIPs are as follows:

1. Safe and Cohesive Communities (VIP 1);
2. Growth and Jobs (VIP 2);
3. Empowering People (VIP 3);
4. Mobility and Spatial Transformation (VIP4); and
5. Innovation and Culture (VIP 5).

Figure 20: WCG: Vision Inspired Priorities (VIPs)

3.8 The Cape Winelands District Municipality (CWDM) Strategic Focus

The Cape Winelands District Municipality has set the following strategic objectives for their District:

Table 22: CWDM Strategic Objective 2022 – 2027

SOs	Strategic Objective 2022 – 2027
SO 1	Creating an environment and forging partnerships that ensure social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SO 2	Promoting sustainable infrastructure services and a transport system which fosters social and economic opportunities.
SO 3	Providing effective and efficient financial and strategic support services to the Cape Winelands District Municipality.

3.9 Local Policy Direction

3.9.1 Stellenbosch Municipality

The intent of the strategic goals for the 1st Review of the 5th Generation IDP 2022 – 2027 will remain the same as the strategic goals of the 5th Generation IDP 2017 – 2022.

The table below indicates how the municipality's Strategic Focus Areas (SFAs) are aligned with national, provincial, and district plans.

Table 23: Horizontal Alignment Matrix

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	National Strategic Outcomes	Medium-Term Strategic Framework	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 1- Valley of Possibility	Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all (8)	Ensuring decent employment through inclusive economic growth (4)	Economic transformation and job creation (2)	Growth and Jobs (VIP 2)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 2- Green and Sustainable Valley	Take urgent action to combat climate change (13) Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss (15)	Ensuring that the environmental assets and natural resources are well protected and continually enhanced (10)	Social cohesion and safe communities (6) Spatial integration, human settlements, and local government (5)	Empowering People (VIP 3)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District through economic, environmental, and social infrastructure investment.
	Make cities and human settlements inclusive, safe, resilient, and sustainable (11)	Ensuring vibrant, equitable and sustainable rural communities with food security for all (7) Promoting sustainable human settlements and improved quality of household life (8)	Social cohesion and safe communities (6)	Mobility and Spatial Transformation (VIP 4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 3- Safe Valley	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Ensuring all people in South Africa are and feel safe (3)	Social cohesion and safe communities (6)	Safe and Cohesive Communities (VIP 1)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District.

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	National Strategic Outcomes	Medium-Term Strategic Framework	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 4- Dignified Living	<p>Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4)</p> <p>Ensure healthy lives and promote well-being for all at all ages (3)</p>	<p>Providing improved quality of basic education (1)</p> <p>Enabling a long, healthy life for all South Africans (2)</p>	<p>Education, skills, and health (3)</p>	<p>Growth and Jobs (VIP 2)</p>	<p>Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.</p>
	<p>Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation (9)</p>	<p>Setting up an efficient, competitive, and responsive economic infrastructure network (6)</p>	<p>A capable, ethical, and developmental state (1)</p>	<p>Empowering People (VIP 3)</p>	<p>Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.</p>
SFA 5- Good Governance and Compliance	<p>Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)</p>	<p>Achieving an accountable, effective, and efficient local government system (9)</p> <p>Creating a better South Africa and a better and safer Africa and the world (11)</p> <p>Building an efficient, effective, and development-oriented public service and an empowered fair and inclusive citizenship (12)</p>	<p>A capable, ethical, and developmental state (1)</p> <p>Education, skills, and health (3)</p> <p>Social cohesion and safe communities (6)</p>	<p>Innovation and Culture (VIP 5)</p>	<p>Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.</p>
		<p>Achieving a responsive, accountable, effective, and efficient local government system (9)</p>	<p>A capable, ethical, and developmental state (1)</p>	<p>Embed good governance and integrated service delivery through partnerships and spatial alignment (5)</p>	<p>To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.</p>

CHAPTER 4:

Spatial Development Framework

4.1 The Purpose of the Spatial Development Framework

Spatial Development Frameworks (SDFs) serve to provide strategic direction and align the efforts of all government spheres as they apply within the municipal area. The SDF serves to give a coherent spatial direction to the municipal Integrated Development Plan (IDP) and provide a planned and integrated approach to achieve the shared spatial development vision, goals, and objectives for sector plans of government over the short term (5 years) as well as over the strategically longer term (10–20 years) to achieve the desired spatial growth and development pattern of the municipality. Most importantly, the SDF outlines the municipality's spatial agenda for its service departments, ensuring that their sector plans, programmes, and projects are grounded in sound and common spatial logic.

In essence, the SDF is a spatial contract between all spheres of government as well as the private sector, which is binding and must assist in integrating, coordinating, aligning, and expressing development efforts. It should be actively supported through the specific arrangement of prioritising, mobilising, sequencing, and implementing investment in priority spatial structuring areas to achieve the legislated development principles of sustainable development. Therefore, the SDF and the Capital Expenditure Framework (CEF) indicate where and how the municipality intends to channel public investment, influence, and other resources at its disposal. In broad terms, this includes where infrastructure and public facility investment will be prioritised, where private sector partners will be sought in development, and how the municipality will view development applications through its spatial planning and land use management system.

4.2 The relationship between the IDP and SDF

Figure 21: Relationship: IDP and SDF

At its core, SDFs deal with the art and science of shaping places at different scales (or areas of influence, from large regions to municipal jurisdictions or neighbourhood precincts). The SDF aims to:

- Enable a long-term spatial vision for the future of regions and places to be best developed over time that is based on evidence, local distinctiveness, and community-derived objectives;
- Translate this vision into a set of strategic municipal planning, policies, priorities, programmes,

and land allocations, together with the public-sector resources (budget) to deliver them;

- ✦ Create a framework for private investment and regeneration that promotes economic, environmental, and social well-being for a specific region or area, i.e., the Adam Tas Corridor Local Areas Spatial Development Framework and Development Guidelines (October 2022); and
- ✦ Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation through its CEF (medium-term) and IDP (short-term).

In the case of Stellenbosch Municipality, the SDF, CEF, and IDP must answer the following questions: “How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place, where will it take place, and who will be responsible for what aspect of the development?”

4.3 The Legislative Framework of Municipal SDFs

With the enactment of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), a new planning regime was introduced in South Africa. The coherent legislative system has been designed to spatially transform the country in its democratic era. In broad terms, SPLUMA differentiates between two components of the planning system:

- ✦ Spatial Development Frameworks; and
- ✦ The Land Use Management System (LUMS).

Section 12(1) of SPLUMA sets out general provisions that apply to the preparation of all scales of SDFs. These provisions require that all SDFs must:

- ✦ Interpret and represent the spatial development vision of the responsible sphere of government and competent authority;
- ✦ Be informed by a long-term spatial development vision;
- ✦ Represent the integration and trade-off of all relevant sector policies and plans;
- ✦ Guide planning and development decisions across all sectors of government;
- ✦ Guide a provincial department or municipality in taking any decision or exercising any discretion in terms of this Act or any other law relating to spatial planning and land use management systems;
- ✦ Contribute to a coherent, planned approach to spatial development in the national, provincial, and municipal spheres;
- ✦ Provide clear and accessible information to the public and private sectors and provide direction for investment purposes;
- ✦ Include previously disadvantaged areas, areas under traditional leadership, rural areas, informal settlements, slums, and land holdings of state-owned enterprises and government agencies, and address their inclusion and integration into the spatial, economic, social, and environmental objectives of the relevant sphere;
- ✦ Address historical spatial imbalances in development;
- ✦ Identify the long-term risks of spatial patterns of growth and development and the policies and strategies necessary to mitigate those risks;
- ✦ Provide direction for strategic developments, and infrastructure investment;
- ✦ Promote efficient, sustainable, and planned investments by all sectors;
- ✦ Indicate priority areas for investment in land development;
- ✦ Promote a rational and predictable land development environment to create trust and stimulate investment;
- ✦ Take cognisance of any environmental management instrument adopted by the relevant environmental management authority;
- ✦ Give effect to national legislation and policies on mineral resources and sustainable utilisation and protection of agricultural resources; and

- Consider and, where necessary, incorporate the outcomes of substantial public engagement, including direct participation in the process through public meetings, public exhibitions, public debates and discourses in the media, and any other forum or mechanisms that promote such direct involvement.

Chapter 2 of SPLUMA sets out the development principles that must guide the preparation, adoption, and implementation of any SDF, policy, or by-law concerning spatial planning and the development or use of land. The table below summarises the five SPLUMA principles and what they mean.

Table 26: SPLUMA and Development Principles

Principle	Meaning
Spatial justice	<ul style="list-style-type: none"> Past spatial and other development imbalances must be redressed through improved access to and use of land. SDFs (and associated policies) must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements, and areas characterised by widespread poverty and deprivation. Spatial planning mechanisms, including zoning scheme by-laws, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons. Land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas and informal settlements. Land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas. In considering an application, a Municipal Planning Tribunal may not impede or restrict the exercise of its discretion solely because the value of land or property is affected by the outcome of the application.
Spatial sustainability	<ul style="list-style-type: none"> Promote land development that is within the fiscal, institutional, and administrative means of government. Give special consideration to the protection of prime and unique agricultural land. Uphold the consistency of land use measures under environmental management instruments. Promote and stimulate the effective and equitable functioning of land markets. Consider all current and future costs to all parties for the provision of infrastructure and social services in land developments. Promote land development in sustainable locations, limit urban sprawl, and result in viable communities.
Efficiency	<ul style="list-style-type: none"> Land development must optimise the use of existing resources and infrastructure. Decision-making procedures must be designed to minimise negative financial, social, economic, or environmental impacts. Development application procedures must be efficient and streamlined, and timeframes must be adhered to by all parties.
Spatial resilience	<ul style="list-style-type: none"> The flexibility of spatial plans, policies, and land use management systems is necessary to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.
Good administration	<ul style="list-style-type: none"> All spheres of government must ensure an integrated approach to land use and land development, guided by spatial planning and land use management systems. All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of SDFs. The requirements of any law relating to land development and land use must be met timeously. Transparent processes of public participation are incorporated into the preparation and amendment of spatial plans, policies, land use schemes, and development applications to allow all parties to provide input on matters affecting them. Policies, legislation, and procedures must be set up to inform and empower members of the public.

At the municipal sphere of government, aligned with SPLUMA, and the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), the Stellenbosch Municipal Land Use Planning By-law (dated 9 June 2023) further outlines minimum standards for SDFs, both in the preparation process and content. In support of SPLUMA, the Department of Rural Development and Land Reform (now known as the Department of Agriculture, Land Reform, and Rural Development) prepared a detailed process and content entitled “Guidelines for the Development of Provincial, Regional and Municipal Spatial Development Frameworks and Precinct Plans.” The Stellenbosch Municipality follows these legislative frameworks and guidelines in its work on the municipal and local SDFs, which is subject to an extensive review every five years, with less comprehensive reviews annually.

4.4 Stellenbosch Municipality's work on its SDF, Review and Proposed Amendments

The Council approved the commencement of the proposed amendment to the Municipal Spatial Development Framework, 2019 due to the following pertinent factors:

- The review of the MSDF highlighted the need for minor amendments to the MSDF to incorporate previous Council resolutions to ensure continued strategic support and guidance from an integrated spatial and financial planning perspective.
- The proposed amendment process of the MSDF was initiated through Council decisions and actions as part of the implementation framework of the MSDF and other strategic / master planning documents, which include the Housing Pipeline, the Integrated Waste Management Plan, and the Capital Expenditure Framework.

In essence, the amendment process of the MSDF was initiated to achieve strategic, spatial, and financial alignment and to enable the coordination of policies within the municipality. Following the integrative spatial and financial planning approach helps to avoid duplication of efforts and ensure maximum positive impact from the investment of resources.

Accordingly, the review and amendment process of the MSDF was initiated and approved by the Council in November 2021. The amendment was included in the Integrated Development Plan (IDP) and Budget Process Plan for 2022-2027 and the revised SDF/IDP/Budget Time Schedule for 2022/2023. The Council also supported and approved the process as stipulated in terms of Section 11 (b) of LUPA; Section 3(1)(b) of the MPBL for amending the MSDF. Therefore, Council approved the establishment of a municipal project steering committee (PSC) and the publication of the proposed amended MSDF for a sixty-day period for public commenting to all organs of the state and the public. The standard operating procedure for the amendment of the MSDF without an Intergovernmental Steering Committee (ISC), as contained in the WCG: DEA&DP Circular, was used as a guideline, and the steps were recorded in the IDP and Budget Time Schedule / Process Plan (as referenced above) in terms of Section 28 of the MSA.

In preparing the review and amendment of the MSDF, previous studies, new and updated policy documents, and plans have been considered and continue to form the basis of the MSDF, 2019 and its subsequent proposed and adopted amendment (27 June 2023). The methodology comprised primary and secondary data collection and intensive consultation with local, national, and provincial government actors as well as the communities. The collected data were triangulated with a desktop review of multiple literature sources, including academic sources. A set of spatial analyses were conducted from regional, municipal, and neighbourhood scales to define the major challenges and opportunities to inform the implementation plans (including the CEF). These socio-economic, spatial profiles, and spatial demand quantification were initiated during the CEF process in 2021 and updated in the 2023/24 document with specific consideration for the adoption of the catalytic projects as approved in the ATC LASDF (2022). These profiles and spatial outcomes were reviewed and validated with the strategic assessment and primary actors in the project. The profiles inform and confirm the status quo of the MSDF in 2019 and the spatial transformation vision and targets reflected in the spatial strategies of the MSDF.

In the drafting of the proposed draft amended MSDF, some of the sections of the MSDF, 2019 were found not necessary to be updated due to no changes being noted since the adoption of the MSDF (2020) and its subsequent reviews (2022/23). The sections listed below were updated to reflect the current status quo:

- Part 1: Introduction, which reflects the approach and actions of the amendment to the MSDF process.
- Part 2: Legislative and Policy Context (partially updated) to reflect the updated 5th Generation IDP 2022-2027.

- Part 5: Plans and Settlement Proposals (partially updated) to reflect the corrected Tables 20 and 28 as adopted by Council on 25 May 2022.
- Part 7: Capital Expenditure Framework as updated and adopted by the Council on 31 March 2021. Currently, the CEF is being updated as a result of the approval and implementation of the catalytic project, Adam Tas Corridor, and the new updated and adopted CEF (which is a core component of the SDF) will be attached in Appendix G.
- Appendix F: Reviewed Housing Pipeline was updated and adopted by the Council on 25 May 2022. The yearly review and update will be attached to the first draft amended MSDF in Appendix F for public participation.

In addition to the abovementioned process, the public was also invited to submit any development proposals for consideration in September 2022. Submissions received consisted of strategic catalytic and infrastructure projects committed to by the Council in previous decisions and sector planning policies, as well as a few private sector development representations for urban edge amendments. These proposals were considered by the Planning Steering Committee (PSC), consisting of the Municipal Manager, Chief Financial Officer, and Directors and Senior Managers of municipal departments – Corporate Services (specifically IDP); Planning and Economic Development; Infrastructure Services; and Community and Protection Services. The MSDF Project Steering Committee (PSC) considered and made recommendations on the proposals that were incorporated within the first amended MSDF. These recommendations and the first draft amended MSDF were presented to the Council, and they were supported at the 12th Council Meeting dated 29 March 2023, and the amended MSDF was accordingly advertised for public comment for a period of sixty (60) days.

During this second round of public participation, general comments were received from various interested and affected parties, including property owners requesting amendments to the urban edges. These proposals for the amendment of the urban edge were submitted during the comment period for the proposed draft amended MSDF during April - May 2023 and accordingly, they were not submitted timeously for consideration as part of the amended MSDF, inclusive of the amendment and review of the CEF. Although the proposals were submitted outside of the timeframe, they were captured and considered using the principles of the MSDF, spatial alignment criteria applicable within the CEF, and a high-level strategic environmental assessment using applicable policies (i.e., SEMF, Heritage Inventory, Biodiversity Spatial Plan) and spatial datasets normally associated with these policies. The aforementioned criteria were broadly used to ascertain if, in terms of adopted and approved municipal spatial policies, a form of compliance, conformance, and / or deviation was found between the proposals and policy. The outcome of the preliminary analysis demonstrated that the proposals currently deviate from the Council policy and principles, and accordingly, the recommendations that these proposals should not be recommended were supported by a Council Meeting dated 27 June 2023. It is also important to note that, should these proposals be considered, they will have a material impact on the spatial strategies of the MSDF as well as the spatial targeting of the capital expenditure framework. Accordingly, both documents will have to procedurally follow another amendment process as prescribed by the applicable legislation.

The sections below provide an overview of the spatial challenges, opportunities, strategies, and programmes as reflected in the SDF over the longer term. The spatial challenges and opportunities identified in the SDF

The Stellenbosch Municipality's SDF attempts to address the spatial dimensions of varied challenges, documented in this IDP and numerous studies and documents produced to date, dealing with spatial and non-spatial matters.

Framed as a question, the key challenge revolves around how to achieve, through managing the spatial distribution and form of development—primarily land use activities and associated structures, both new and existing—shared and inclusive growth, increased access to opportunities (particularly for disadvantaged citizens), improved sustainability by minimising ecological footprints, and

maintenance of the unique sense of place of the settlements and surrounding lands that constitute the municipality.

In addressing these challenges, the SDF has two tasks. The first relates to how activities should be organised and accommodated in space to best address challenges. The second is to guide how other sectors, services, or functional areas should adjust their focus and work to support the recommended organisation and accommodation of activities in space.

Without re-stating the varied challenges of the municipality outlined in full in the IDP and sector documents, the table below lists specific spatial challenges addressed by the SDF, following the broad themes contained in the SDF Guidelines.

Table 27: Spatial Challenges

Theme	Spatial Challenges
Biophysical context	<ul style="list-style-type: none"> ⚠ The degradation of key ecological assets and the loss of productive agricultural land have been ongoing. ⚠ The condition of the river systems within the municipality has deteriorated. ⚠ Climate change is likely to have a significant impact on the natural resource base of the municipal area, which will include a reduction in water, increased temperatures, increased fire risks, and increased incidences of extreme weather events. This in turn will impact agricultural production, scenic landscapes, the liveability of urban areas, and the ability to provide basic services such as water and sewerage treatment.
Socio-economic context	<ul style="list-style-type: none"> ⚠ The population in the municipality will continue to grow above the average provincial rate, and urbanisation rates will increase with settlements absorbing the bulk of growth. ⚠ The ability of the economy to absorb growth, particularly concerning job creation, is concerning. ⚠ The informal sector will continue to provide livelihoods to a significant proportion of residents. ⚠ The growing youthful population, large student population, and seasonal influx of labour are likely to increase the municipality's dependency ratio, in addition to a smaller base from which the municipality can collect revenue to provide services and opportunities that will improve the lives of the poor. ⚠ Inequality in the municipal area, and particularly in historic towns such as Stellenbosch and Franschhoek, remains significant, and current development patterns are not addressing the issue. ⚠ Crime rates remain high, and the market response, i.e., private security provision for those who can afford it, is likely to exacerbate inequality. ⚠ Upgrading and providing basic services and housing will remain the focus of the municipality, including other government agencies, for the foreseeable future. The focus on these priority areas can lead to foregoing investment in other areas that would likely have more socio-economic spin-offs and result in improved place-making. ⚠ The municipality's inability to provide basic services (e.g., refuse removal) leads to dumping, environmental degradation, and resulting health-related problems.
Built environment context	<ul style="list-style-type: none"> ⚠ Infrastructure backlogs – especially in poor areas – and essential municipal infrastructure require significant investment and maintenance. This applies to all basic services (electricity, water supply, wastewater management, and solid waste disposal). ⚠ The need for housing and shelter – both for the lower-income groups and those with employment – has not been adequately met. The existing housing pipeline will not meet the needs of those requiring state assistance, and little is built that is affordable to ordinary workers. A pattern of intermittent land invasions and associated responsive basic infrastructure provision, as well as the daily inward commuting of ordinary workers and students, is likely to continue. ⚠ Property and land are inordinately expensive in the municipality, locking out both the poor and lower / middle-income workers from the property market. Without significant intervention in the property market, this situation is likely to worsen. ⚠ Inequality in the municipality is particularly evident in the structure of settlements, with low-density development accommodating the wealthy, while the poor are accommodated in high-density, poor-quality peripheral areas. Significant numbers of people live in informal shelters. Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, amongst other inefficiencies. ⚠ The new high-density development mostly focuses on the student market, and target groups using private vehicles. ⚠ Numerous heritage resources located within the settlements are assets of immense value. Many of these, are underutilised and have the potential to become vehicles for innovative development that can contribute to creating a more inclusive economy. ⚠ The existing industrial / manufacturing operations and land holdings in the centre of Stellenbosch town impede large-scale restructuring of the settlement. ⚠ The planned move of Distell – occupying large tracts of strategic land in Stellenbosch town – to Klappmuts presents very significant opportunities for the future development of Stellenbosch, Klappmuts, and the broader regional space economy. If not rigorously managed as a shared initiative between the public and private sectors, the opportunity may be lost. The municipality should focus maximum effort on utilising the opportunity presented to address the needs of the town.

Theme	Spatial Challenges
	<ul style="list-style-type: none"> <li data-bbox="371 203 1437 360">✚ Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns. <li data-bbox="371 360 1437 465">✚ This regional mobility and growth approach's focus has very high financial, economic, social, and environmental costs, as it is unsustainable and exclusionary for most of the population. The regional focus on private vehicle growth has an adverse consequence for managing transport at the localised level where trips are generated. <li data-bbox="371 465 1437 622">✚ The provision of public transport, non-motorised modes, and travel demand management programmes is generally considered a local municipal function and not a core responsibility or competency of the provincial government. Given the extent of transport issues in the municipality, the municipality has limited institutional capacity and funding for the management of transport issues. As a result, sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions. <li data-bbox="371 622 1437 678">✚ The municipality continuously updates the online housing demand database and associated mobile applications to provide a valuable source for planning and delivery.
<p style="text-align: center;">Institutional context</p>	<ul style="list-style-type: none"> <li data-bbox="371 707 1437 741">✚ The limited capital budget of the municipality, given the extent and depth of community needs. <li data-bbox="371 741 1437 819">✚ Limited funds to address critical issues, especially those related to infrastructure augmentation and maintenance, place the municipality in a tenuous position to reverse backlogs or negative trends in shelter or infrastructure needs. <li data-bbox="371 819 1437 875">✚ Private sector investment is not structured to contribute to the long-term maintenance of common assets or address the developmental needs of the municipal area. <li data-bbox="371 875 1437 931">✚ The growth in rates of income will largely be used to maintain existing infrastructure and services and will likely not focus on new productive investments. <li data-bbox="371 931 1437 987">✚ The limited professional resources of the municipality, specifically concerning the rigorous and dedicated full-time management of large-scale projects. <li data-bbox="371 987 1437 1016">✚ Sector planning remains fragmented, and most developments follow a business-as-usual pattern.

4.5 The Spatial Proposals of the SDF

4.5.1 Spatial development 20 -year vision statement

In line with the SM's vision as the "valley of opportunity and innovation" (as contained in the IDP), the vision for spatial development and management is described as follows:

"We envisage a municipal area even more special than it is today; a place of natural beauty, rich in the way it preserves and exposes elements of history and culture, its produce from the land, the quality of its institutions, and the mindfulness and innovations of its people.

It is a future Stellenbosch municipal area that remains familiar; it has retained what differentiates the municipality from other places, its landscapes, historic buildings and settlement patterns, and the specialness of its institutions. It is resilient; it has adapted to the needs of today without losing what is special from the past. It is inclusive; it has accommodated the needs of citizens from all walks of life without fear. It is diverse and therefore productive. Adapting to new needs, and accommodating new people, it becomes the stage for new expressions of culture, new businesses, and new ways of doing.

In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape, the reach and extent of its public institutions, and the capacity and opportunity of its infrastructure. Each provides for a range of citizens from all walks of life, with significant choice in place of residence."

4.5.2 Strategic Focus and Spatial Alignment between the IDP and SDF

The table below illustrates how work on the SDF relates – in terms of its focus and contribution – to achieving the five municipal strategic focus areas as contained in the IDP.

**Table 28: IDP Strategic Focus Areas and the SDF**

IDP Strategic Focus Area	Related concerns of the SDF	SDF Strategic Direction
SFA1: Valley of Possibility	The way settlements, nature, and agriculture are spatially developed and managed to enhance individual and collective livelihood opportunities and enterprise development and overcome inequity and exclusion.	<ul style="list-style-type: none"> ⚡ Containment of settlements to protect nature / agricultural areas and enable public and non-motorised transport and movement. ⚡ A focus on public and non-motorised transport and movement.
SFA2: Green and Sustainable Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to maintain and enhance natural resources and ensure a future balance between human settlement and its use of natural resources and opportunities.	Protection of natural areas, agricultural areas, and river corridors.
SFA3: Safe Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective safety in living, in movement, at work, in institutions, and play.	Denser settlements with diverse activity to ensure surveillance.
SFA4: Dignified Living	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure equal access to shelter, facilities, and services, notwithstanding material wealth, age, gender, or physical ability.	A specific focus is on the needs of "ordinary" citizens, who experience limited access to opportunity because of restricted material resources.
SFA5: Good Governance and Compliance	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective participation – based on accessible information and open processes – in matters related to spatial planning and land use management.	Presenting information, including opportunities and choices, in a manner that assists its internalisation by all.

4.5.3 Spatial Proposals and Structuring elements of the SDF

The conceptual framework extracted from the SDF shows the expression of the seven key principles, which include:

Maintain and grow the assets of Stellenbosch's natural environment and farming areas

- ⚡ The spatial policies that relate to this principle, focus on protective actions, also called urban management.
- ⚡ The intent is to protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality.
- ⚡ Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives (including settlement hierarchy), and rural guidelines.
- ⚡ Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.

Respect, preserve, and grow our cultural heritage

- ⚡ The spatial policies that relate to this principle, focus on protective actions around specific spatial elements, e.g., scenic landscapes, scenic routes, and special places of arrival, while also focusing on improving the landscape and public amenities associated with these cultural assets.
- ⚡ The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.
- ⚡ As far as possible, protect cultural landscape assets – including undeveloped ridgelines, view corridors, scenic routes, and vistas – from development.

Direct growth to areas of lesser natural and cultural significance as well as movement opportunity

- ✦ The spatial policies that relate to this principle, focus on protective actions around specific spatial elements e.g. maintaining the urban edge and following the defined settlement hierarchy.
- ✦ In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include, informal settlement upgrading; residential densification and infill development; mixed land use and improved economic opportunity; improved access and mobility; improved access to community facilities; and improved landscaping and public amenities.

The spatial policies are spatially targeted in priority development areas and include Baden Powell Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts.

- ✦ The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected while ensuring that the capacity of existing infrastructure can accommodate change and growth.
- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements focus on new growth and development primarily in larger settlements (as referenced in principle 3 above), to:
 - a) Minimise associated impacts on the environment, agricultural land, and natural resources.
 - b) Maximise the livelihood opportunity (also referred to as quality of life) by building on the availability of existing public facilities and commercial opportunities.
 - c) Maximise the sustainability of new facilities and commercial opportunities.
 - d) Enable the provision of infrastructure most efficiently and cost-effectively.
 - e) Minimise the need for inter-settlement movement.
 - f) Maximise opportunity for and use of non-motorised and public transport.
 - g) Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
 - h) Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.

Clarify and respect the roles and functions of different elements of the movement structure

- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensure a balanced approach to transport in the municipality that appropriately serves regional mobility needs and local-level accessibility improvements.
- ✦ The spatial policies actively promote compact, dense, mixed-use development, which reduces and promotes non-motorised and public transport.

Ensure balanced, sustainable communities

- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge) work towards and maintain, for each settlement, a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- ✦ Adopting a conservative view towards the extension of existing urban edges over the SDF period.
- ✦ Actively support infill development and adaptive reuse of existing structures.
- ✦ Support increased densities in new, infill, and redevelopment projects.

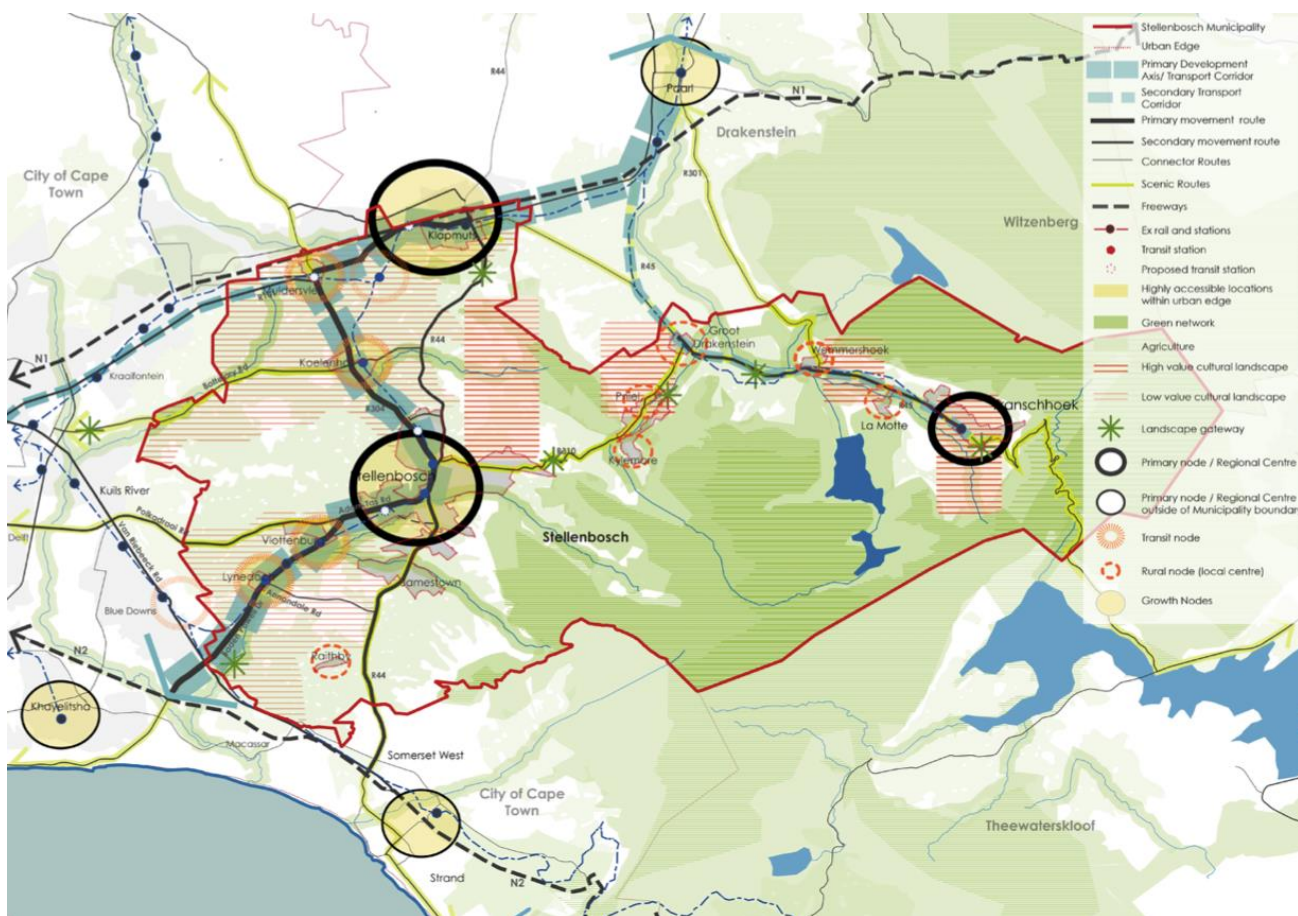

- ⚡ Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.
- ⚡ Support the general upgrading and transformation of existing informal settlements.
- ⚡ Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.
- ⚡ Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- ⚡ Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- ⚡ Ensure work and commercial opportunities are accessible through public transport and NMT to all communities and provide opportunities to emerging and small entrepreneurs.
- ⚡ Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, ensuring walkability, and so on.

Focus collective energy on a few catalytic areas that offer extensive opportunity and address present risk

- ⚡ The spatial policies focus on major development efforts concerning new mixed-use, industrial, and residential developments, and significant changes in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klappmuts.

Figure 22: Consolidated Concept for the Municipal Area (Approved November 2019 and 27 June 2023)

4.6 SDF and CEF Implementation Frameworks

The SPLUMA guidelines require, as part of the SDF, a high-level implementation framework setting out the required measures that will support the adoption of the SDF proposals while aligning the capital

investment and budgeting processes moving forward. The SDF, and CEF Implementation Framework comprise the following sections:

- A proposed settlement hierarchy to inform and guide the investment rationale (linked to plans and settlement proposals);
- Priority development areas and themes;
- A policy framework (linked to strategies);
- Guidelines, studies, and information supporting the policies;
- Implications for sector planning and specific development themes, including:
 - Environmental and rural area management
 - Movement;
 - Housing; and
 - Local economic development;
- Land use management guidelines and regulations;
- Implications for inter-municipal planning;
- Catalytic initiatives;
- Further planning work;
- Institutional arrangements;
- Checklists in support of decision-making;
- A municipal leadership and advocacy agenda related to spatial development and management;
- Capital Expenditure Framework; and
- Monitoring and review.

4.6.1 Settlement hierarchy, priority development areas and themes

In terms of the SDF concept, prioritisation of development – at a broad level – is done through two main spatial structuring elements. The first is spatial and targeted at significant future growth in functional and priority development areas. The second is sectoral or thematic, focused on the kind of development to be prioritised.

The functional and priority development areas are categorised into urban and rural nodes and are depicted in the figure below, with the detailed description provided in the table:

The spatial areas for priority development over the *SDF* planning period are:

- Stellenbosch Town;
- Klapmuts; and
- Franschhoek (maintenance).

In terms of sectoral or thematic focus, the spatial development priority in all settlements should be to:

- Upgrade the servicing and transformation of informal settlements;
- Provide housing for lower-income groups in well-located areas (specifically through infill of vacant and underutilised land or redevelopment of existing building footprints);
- Expand and improve public and NMT routes;
- Improve public and community facilities and places (e.g., through clustering, framing them with infill development to improve edges and surveillance, prioritising landscaping, and so on); and
- Expand the recognition, restoration, and exposure of historically and culturally significant precincts and places (both in the form and use of precincts and places).

Figure 23: Functional and priority development areas (CEF, June 2023)

The proposed settlement hierarchy for SM, supporting the spatial plan and proposals for the settlement, is A significant centre comprising extensive education, commercial, and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities outlined in the table below.

Table 29: Proposed settlement hierarchy for the Stellenbosch Municipality

Settlement	Role	Development and Land Use Management Focus
Primary urban settlements		
Stellenbosch town	A significant centre comprising extensive education, commercial and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities.	<ul style="list-style-type: none"> ⬇ Broadening of residential opportunities for lower-income groups, students, and the lower to middle housing market segments. ⬇ Upgrade of informal settlements. ⬇ Retention of university functions in the town. ⬇ Enablement of the Adam Tas Corridor. ⬇ Sensitive residential infill and compaction. ⬇ Drive to establish “balanced” precincts. ⬇ Public transport development, travel demand management, parking controls, and NMT improvements.
Klapmuts	Focus on economic development (using a favourable location for manufacturing, logistics, and warehousing enterprises) and associated residential opportunities.	<ul style="list-style-type: none"> ⬇ Support for the development of RE / Farm 736 as a lever to economic development utilising a favourable location for manufacturing, logistics, and warehousing enterprises. ⬇ Balanced housing provision in Klapmuts South is focused on those who can benefit from employment provision through unlocking Klapmuts North. ⬇ Establishing the Klapmuts town centre. ⬇ NMT improvements.
Franschhoek	Secondary service centre, significant tourist destination, and place of residence.	<ul style="list-style-type: none"> ⬇ Upgrade of informal settlements. ⬇ NMT improvements. ⬇ Sensitive infill within the urban edge provides inclusive housing and extended commercial opportunity (also for small and emerging entrepreneurs). ⬇ Retention of historic character.
Secondary urban settlements		

Settlement	Role	Development and Land Use Management Focus
La Motte	Contained rural settlement.	<ul style="list-style-type: none"> ↓ Diversification of existing activities to curtail the need for movement. ↓ Sensitive location of diversified uses closer to the R45. ↓ Limited further housing development.
Wemmershoek	Contained rural settlement.	<ul style="list-style-type: none"> ↓ Possible extension of residential opportunity linked to re-use of the saw-mill site and local employment opportunity.
Groot Drakenstein	Contained rural settlement.	<ul style="list-style-type: none"> ↓ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Dwars River Valley	Contained historic rural settlements.	<ul style="list-style-type: none"> ↓ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Jonkershoek	Contained, but a dispersed collection of institutional, recreational, and residential uses.	<ul style="list-style-type: none"> ↓ Potential future consolidated, inclusive settlement linked to rail / bus.
Muldersvlei	Contained rural settlement.	<ul style="list-style-type: none"> ↓ Potential future consolidated, inclusive settlement linked to rail / bus.
Koelenhof	Contained rural settlement.	<ul style="list-style-type: none"> ↓ Potential future consolidated, inclusive settlement linked to rail / bus.
Vlottenburg	Contained rural settlement.	<ul style="list-style-type: none"> ↓ Gradual expansion of a unique development model based on sustainable living and education.
Lynedoch	Contained village and institutional clusters.	<ul style="list-style-type: none"> ↓ Containment and limited expansion of existing offerings.
Spier	Contained tourism and cultural centre.	<ul style="list-style-type: none"> ↓ Protection of unique historic settlement structure and form.
Raithby	Contained historic rural settlement.	<ul style="list-style-type: none"> ↓ Potential future consolidated, inclusive settlement linked to rail/ bus.

Over the longer term, Muldersvlei / Koelenhof, and Vlottenburg / Lynedoch along the Baden Powell-Adam Tas-R304 could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing opportunity for a range of income groups) and integration with the corridor in terms of public transport. They are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klappmuts.

The focus on Stellenbosch town and Klappmuts does not exclude all development efforts in Franschhoek and the smaller settlements. Rather, it is argued that these settlements should not accommodate significant growth, as the pre-conditions for accommodating such growth do not exist to the same extent as in Stellenbosch town and Klappmuts.

What should be emphasised in Franschhoek, and smaller settlements is improving conditions for existing residents and natural growth within the context of retaining what is uniquely special in each (from the perspective of history, settlement structure and form, relationship with nature and agriculture, and so on).

4.6.2 Policy Framework

The table below sets out specific spatial policies to support the SDF concept and settlement plans. In using the policy framework, it is important to note that one specific policy or guideline should not be highlighted or used exclusively to support a specific initiative. Rather, each policy supports the other; each "frames" the other. Thus, initiatives or proposals should be evaluated in terms of the policy framework as a whole.

Further, the successful implementation of spatial policies and guidelines is often dependent on related, supportive, non-spatial policies. This implies policy alignment across municipal functional areas and services.

The table also includes specific work guidelines that begin to frame the work to be undertaken or continued in support of proposed policies.

Table 30: Specific work guidelines

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
1.	Maintain and grow the assets of SM's natural environment.	<ul style="list-style-type: none"> As far as possible, protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality. Resist the subdivision of viable agricultural land unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives, an agri-village in line with provincial policy for the settlement of farmworkers, or the formalisation of the "urban" component of existing forestry settlements (for example, Jonkershoek and La Motte). Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate. 	<ul style="list-style-type: none"> Proactively maintain and upgrade municipal infrastructure services to limit / mitigate the risk to ecological services. Support initiatives to protect water resources, rehabilitate degraded aquatic systems, retrofit or implement water demand management systems, and mainstream water conservation. Support energy diversification and energy efficiency initiatives to enable a transition to a low-carbon, sustainable energy future. Support initiatives to extend public access to natural assets without compromising the integrity of natural areas or ecological services. Support initiatives by the private sector to extend environmental stewardship. Assist in initiatives to diversify, strengthen, and open up new opportunities and jobs in the rural economy, including the identification of strategically located land for land reform purposes. Support initiatives to utilise municipal-owned agricultural land for small-scale agriculture, forge partnerships with non-governmental or public benefit organisations to assume management responsibilities for commonages and provide basic agricultural services to commonages. 	<ul style="list-style-type: none"> Prepare and implement management plans for municipal nature reserves and other ecological assets. Prepare and implement invasive species control plans for municipal properties. Prepare and implement initiatives for the rehabilitation of rivers and wetlands in urban areas. Develop resource-efficient strategies for all municipal services and land and building development (e.g., compulsory green energy installations in building development, greywater circulation, sustainable urban drainage, etc.). Utilise and contribute to municipal and provincial mapping and planning initiatives that inform land-use decision-making supportive of ecological integrity, secure natural resources, and protect agricultural land of high value. Delineate and manage urban edges and watercourse setbacks in a manner that diverts urban growth pressures away from important natural and agricultural assets. Apply biodiversity offsets in cases where development in areas of endangered and irreplaceable biodiversity cannot be avoided. Actively engage with adjoining municipalities and provincial governments to ensure that the integrity of SM's natural environment is maintained (specifically regarding land use management in adjoining municipal areas).

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
2.	Respect, preserve and grow the cultural heritage of SM.	<ul style="list-style-type: none"> • Preserve significant cultural and historic assets within the municipality and grow the opportunity for new or emerging forms of cultural expression through expanding the use of existing cultural assets or supporting new uses for areas or structures of historic value. • As far as possible, protect cultural landscape assets – including undeveloped ridgelines, view corridors, scenic routes, and vistas – from development. • Support alternative uses for historic structures and places that will enable their preservation (subject to adherence to the general SDF strategy and policies). 	<ul style="list-style-type: none"> • Support the transfer of municipal assets of cultural and historic value to organisations geared to manage these assets sustainably in the interest of the broader community. • Manage heritage places and structures in terms of the recommendations of municipal heritage studies. 	<ul style="list-style-type: none"> • Maintain and utilise municipal and inter-governmental evaluation and mapping initiatives to inform land-use decision-making supportive of cultural integrity and secure historic places and structures. • Actively engage – continuously – with adjoining municipalities and the provincial government to ensure that the integrity of SM’s heritage is maintained (specifically regarding land use management in adjoining municipal areas).
3.	<p>Direct significant growth or new development in SM to areas:</p> <ul style="list-style-type: none"> • Not identified as having the most critical natural or cultural significance. • Where the most opportunity exists in existing infrastructure investment, whether reconfigured, augmented, or expanded. 	<ul style="list-style-type: none"> • Prioritise the targeted settlements on the Baden Powell-Adam Tas-R304 corridor for growth / new development. • Over the SDF period, focus on Stellenbosch town and Klappmuts to accommodate significant new growth. 	<ul style="list-style-type: none"> • Align the policy and planning of all municipal services to support accommodating significant growth and new development as proposed in specific areas. • Progressively utilise the municipality’s significant asset of land as a resource to direct major growth or new development to areas not identified as of the most critical natural or cultural significance. • Allocate municipal funds for land acquisition in areas identified as most suitable for growth or new development (specifically for development as lower-income housing). 	<ul style="list-style-type: none"> • Together with the WCG, undertake inter-service investigations to determine the exact location, size, nature, and form of new settlement areas to accommodate new growth. • Develop specific framework planning, land use management, infrastructure, financial, and urban design provisions, and directives to ensure the optimal development of identified settlement areas to accommodate new growth.
4.	Clarify and respect the different roles and potentials of settlements in SM and maintain the identity of each.	<ul style="list-style-type: none"> • Ensure that each settlement – large and small – remains a distinct entity, surrounded by natural open space and agricultural land. • Maintain a clear hierarchy of settlements that (in general terms) focuses on new growth and development in larger settlements to: <ul style="list-style-type: none"> – Minimise associated impacts on the environment, agricultural land, and natural resources. – Maximise livelihood opportunities by building on the availability of existing public facilities and 	<ul style="list-style-type: none"> • Align the policy and planning of all municipal services to support the proposed settlement hierarchy and development / management approach. • Reinforce the role of Stellenbosch town as a regional service and tourism centre focused on higher-order educational, health, government, and commercial uses, as well as unique historic assets. • Reinforce the role of Klappmuts as a potential regional logistics / warehousing / manufacturing hub – with associated residential opportunity – based on its location at the intersection of the N1 and regional north / south movement routes. 	<ul style="list-style-type: none"> • Support the re-location of land extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town to Klappmuts. • Maintain the nature and form of small rural settlements while enabling small changes towards improving livelihood opportunities.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		<p>commercial opportunities.</p> <ul style="list-style-type: none"> – Maximise the sustainability of new facilities and commercial opportunities. – Enable the provision of infrastructure most efficiently and cost-effectively. – Minimise the need for inter-settlement movement. – Maximise the opportunity for and use of non-motorised and public transport. <ul style="list-style-type: none"> • Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily). • Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements. 	<ul style="list-style-type: none"> • Maintain Franschhoek as a centre for tourism and culture with limited growth potential. 	
5.	<p>Ensure a balanced approach to transport in SM, that appropriately serves regional mobility needs and local-level accessibility improvements.</p>	<ul style="list-style-type: none"> • Actively promote compact, dense, mixed-use development that reduces car dependence and enables and promotes the use of public and NMT. 	<ul style="list-style-type: none"> • Shift municipal resources to include a greater focus on non-motorised, shared vehicle travel, and public transport solutions. • Establish measures to ensure that there is an inter-service agreement on the settlement hierarchy, settlement roles, associated functions, modes of transport to be carried out, and the development / management approach to be followed concerning different sections of the municipal movement network. • Work with the provincial and national governments to affirm the proposed categorisation of movement forms, and associated infrastructure and management needs in Stellenbosch. • Proactively seek management of travel demand among key stakeholders in SM in such a manner that significantly higher passenger volumes are gradually achieved from existing transport infrastructure. • Proactively allocate resources to improve NMT in the municipal area. • Strengthen the role played by rail-based public transport, including advocating for a new, lighter, frequent rail service on the Eerste River / Klapmuts rail line as the backbone of transport movement along the Baden Powell-Adam Tas-R304 corridor. 	<ul style="list-style-type: none"> • Assess future transport development / improvements concerning the impact on the complete settlement system. • Guard against needed / required vehicular routes of necessity resulting in the development of undeveloped land traversed by the route.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
6.	Develop all settlements as balanced, inclusive, appropriately serviced, communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land.	<ul style="list-style-type: none"> • Work towards and maintain – for each settlement in the municipality – a compact form and structure to achieve better efficiency in service delivery and resource use, the viability of public and NMT, and facilitate inclusion, integration, and entrepreneurship development. • Adopt a conservative view towards the extension of existing urban edges over the SDF period. • Actively support infill development and the adaptive reuse of existing structures. • Support increased densities in new, infill, and redevelopment projects. • Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing. 	<ul style="list-style-type: none"> • Proactively drive transport demand management programmes (specifically in and around Stellenbosch town) to curtail private vehicle use. • Shift more transport resources to the development and operation of effective public transport services and the comprehensive provision of NMT. 	<ul style="list-style-type: none"> • Review the delineation of restructuring zones to support the mSDF objectives. • Support development that emphasises public transport / NMT as opposed to private vehicular use. • Integrate spatial planning, transport planning (emphasis on public and NMT), and social facility planning. • Move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use. • Actively engage – continuously – with adjoining municipalities and provincial government to ensure that the integrity of SM's settlements as contained, and balanced communities is maintained (specifically about land use management in adjoining municipal areas).
		Support the general upgrading and transformation of existing informal settlements.	<ul style="list-style-type: none"> • Prioritise basic residential services for poor households, specifically in informal settlements and backyard dwellings, and a minimum level of basic services for marginalised rural settlements. • Resist existing informal settlements as the only viable settlement option for poor households by supporting the identification and servicing of alternative areas for settlement. • Ensure that asset management best practices are followed to maintain existing infrastructure investments and prevent greater replacement costs in the future. • Reinforce basic service delivery with good-quality urban management to support household and economic asset development. 	<ul style="list-style-type: none"> • Put in place an inter-governmental portfolio of land (existing and earmarked for purchase), an agreed land preparation programme, and a release strategy, for publicly assisted, lower-income housing (including the BNG, FLISP, social / rental, and GAP markets). • Identify alternative settlement locations for poor households, over and above existing informal settlements. • To assist the municipality in housing provision, and support initiatives to house farmworkers on farms (in a manner that secures tenure).
		Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.	<ul style="list-style-type: none"> • The planning of infrastructure and social facilities should accommodate the likelihood of back-yarding and its contribution to livelihood strategies. 	<ul style="list-style-type: none"> • Develop an inclusionary housing policy and guidelines. • Prioritise infill housing opportunities on public land for the BNG, FLISP, social / rental, and GAP markets. • Where possible, proactively plan for back-yarding opportunities in lower-income housing projects. • Actively support the development of student

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
				housing in Stellenbosch town.
		Provide and maintain a system of accessible social facilities, integrated with public space and public and NMT routes.	<ul style="list-style-type: none"> Reinforce social facilities with good quality urban management to ensure service excellence and sustainability. Focus on fewer but better social facilities. 	<ul style="list-style-type: none"> Cluster social facilities. Locate facilities in association with public space and public and NMT routes.
		Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets (e.g., river corridors).	<ul style="list-style-type: none"> Prioritise open / public space development in poor and denser neighbourhoods of the municipality. Reinforce open / public space with good quality urban management to ensure use and safety. 	Ensure that the edges between building development and open spaces promote activity and passive surveillance.
		Ensure work and commercial opportunities are accessible through public and NMT to all communities and provide opportunities for emerging and small entrepreneurs.		<ul style="list-style-type: none"> Avoid large retail malls and office parks in peripheral locations reliant on private vehicular access, which detract from the viability of established commercial and work areas and lock out small entrepreneurs.
7.	Actively seek conditions to enable the private and community sectors to align their resources and initiatives with the SDF principles and proposals.	Conscious of public resource constraints, actively seek and support private and community sector partnerships to expand livelihood opportunities, settlement opportunities for ordinary citizens, and the national imperative to expand participation in the economy.	Develop an incentive package to support private and community sector partnerships in achieving the SDF principles and proposals.	<ul style="list-style-type: none"> Enable private and community sector participation by making known the municipality's spatial principles and intent in user-friendly communicate and guidelines. Require private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on.
8.	Focus major development energy in SM on a few catalytic development areas that offer extensive, inclusive opportunities.	Focus major development effort in SM on: <ul style="list-style-type: none"> Unlocking development in Klappmuts North. The Adam Tas Corridor (in Stellenbosch Town). 	<ul style="list-style-type: none"> Communicate municipal objectives and principles – across functional areas and services – for development and urban management in catalytic areas. Seek landowner, provincial government, and national government support to develop catalytic areas in the best public interest. Support the establishment of institutional arrangements solely dedicated to enabling the development of catalytic areas and proceed with work to detail the broader plan and activity programme. Align municipal infrastructure and social services planning to support development in catalytic areas. Use municipal and government-owned land assets to support development in catalytic areas. 	<ul style="list-style-type: none"> Ensure that catalytic areas are developed as inclusive, appropriately serviced communities, negotiable through NMT, and exhibit a positive relationship with surrounding nature and agricultural land. Prepare land use management measures to enable development in catalytic areas. Define catalytic areas as "restructuring" or other special-measure areas to enable benefit from national and provincial support and incentives.

4.7 Catalytic Initiatives - Adam Tas Corridor (ATC) Local Areas Spatial Development Framework, Development Guidelines (October 2022) and overlay zone (March 2023)

Large industrial spaces, including land that was formerly home to Cape Sawmills and Distell facilities, make up the most strategically located land in Stellenbosch town. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces – at scale – can contribute meaningfully to meeting existing challenges and SDF objectives.

In simple terms, the concept is to launch a process of re-imagining and re-purposing the land around Adam Tas Road within Stellenbosch town to enable the maximum potential of this space. This will entail the redevelopment of the Adam Tas Corridor, which includes the area stretching along the R310 and R44 along the foot of Papegaaiberg, from the disused Cape Sawmills site to the west of Kayamandi and Cloetesville along the northern part of this corridor.

Figure 24: Adam Tas Corridor Local Areas SDF (October 2022)

It forms the western edge of the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier / severance effect of the R44 and the railway line. Much of the area was historically used for light industrial and manufacturing purposes. It includes the disused Sawmill site, the government-owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, the Bergkelder complex, the Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloetesville. Under-utilised and disused land in the area measures more than 300ha.

Conceptually, a linear new district within Stellenbosch is envisaged adjacent to and straddling (in places) Adam Tas Road, the R44, and the railway line. Overall, development should be residentially led with a strong mixed-use basis and high density and should favour non-motorised ("NMT") access to the centre of Stellenbosch Town. It is estimated that the Adam Tas Corridor, through a preliminary

development conceptual framework, will produce approximately 3 million square metres of bulk within a 293-hectare area, with 69% earmarked for residential usage.

A central movement system (with an emphasis on public transport and NMT) forms the spine of the area and is linked to adjacent districts south and west of the corridor. The corridor retains west-east and north-south vehicular movement (both destined for Stellenbosch town and through movement), as well as the rail line. Remote parking facilities will enable ease of access within the corridor concept, with passengers transferring via public transport, cycling, and walking to reach destinations within the town of Stellenbosch.

The corridor is not envisaged as homogenous along its length, with uses and built forms responding to existing conditions and its relationship with surrounding areas. Conceptually, three (3) areas could be defined, each linked through a sub-district.

- ⚡ Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- ⚡ Stimulate and act as a catalyst for the development of improved public transport and NMT;
- ⚡ Rethink and reconstruct infrastructure, particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn integrating the east and west of town and releasing land for development;
- ⚡ Integrate Kayamandi and Stellenbosch town seamlessly;
- ⚡ Shift the new development focus to the west of town, with the Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- ⚡ Investigating options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on NMT;
- ⚡ Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, while also assisting in establishing a compact, less sprawling town, public transport, and NMT; and
- ⚡ Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Along the corridor as a whole – depending on local conditions – significant re-use of existing buildings is envisaged. This is seen as a fundamental prerequisite for diversity, in-built character, and activity (as re-purpose offers the opportunity for a great variety of spaces). Aspects of the industrial history of the area should remain visible. A range of housing typologies accommodates different income groups and family types.

Redevelopment, in terms of the concept, offers the opportunity to:

- ⚡ Re-imagine the future use of the land encompassed in the ATC;
- ⚡ Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- ⚡ Stimulate and act as a catalyst for the development of improved public transport and NMT;
- ⚡ Reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development;
- ⚡ Integrate Kayamandi and Stellenbosch town seamlessly;
- ⚡ Shift new development focus to the west of town, with Die Braak and Rhenish complexes forming the centre and seam between the new west and east of Stellenbosch town;
- ⚡ Investigate options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on non-motorised transport; and
- ⚡ Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, as well as assisting in establishing a compact, less sprawling town, public transport, and NMT.

Existing manufacturing businesses can gradually relocate to the north, closer to the N1 logistics corridor (as Distell has planned for their operations).

A Local Spatial Development Framework (“LSDF”) for the Adam Tas Corridor as well as comprehensive development guidelines were formally approved by the Council in October 2022 and will be used as the enabling planning framework to realise the implementation of the Adam Tas Corridor over the next 3–20 years. This LSDF includes an implementation framework that will guide the following:

- Most appropriate land use strategy;
- Action Areas / Catalytic Projects;
- Framework for Investment; and
- Other enabling interventions.

Following the implementation framework, the overlay zone for the Adam Tas Corridor has been approved (24 May 2023) and has been included as a special zone in the Stellenbosch Municipality Zoning Scheme Bylaw, 2023 (17 November 2023). The purpose of the overlay zone is to award the zoning rights envisaged by the Adam Tas Corridor LSDF to the individual land portions, together with the conditions applicable to each property, for the landowner to take up these rights.

Institutional arrangements are critical and include all spheres of government, private stakeholder involvement, and established partnerships. It would include a broad agreement between landowners and the municipality to pursue the corridor development concepts. The landowners collective and the municipality entered into a Memorandum of Understanding (MOU) confirming the spatial vision and implementation of the ATC LASDF. The Council approved the MOU in August 2022.

To assist Stellenbosch Municipality in coordinating the implementation of the Adam Tas Corridor LSDF and development guidelines, a project management unit (PMU) needs to be established. The purpose of the project management unit (PMU) is to coordinate, plan, and assist with the implementation of development along the corridor. The PMU will be formed on an equal basis between the municipality and the private sector involved with the Adam Tas corridor. The purpose of the PMU is to provide additional capacity and expertise to manage and implement the vision of the Adam Tas corridor. The establishment of the unit is currently being investigated and will be set up by 30 June 2024. The Council appointed the Economic Development Partnership (EDP) to help the municipality set up the PMU and Steering Committee.

Considering the capital infrastructure investment requirements for the ATC, the municipality and the landowners collectively agreed on the phasing of the corridor over the next 10 years. Over the short term (1–5 years), the first phase of the ATC was agreed to be Precincts 2–6, and a portion of Precinct 10, while the planning and infrastructure demand quantification for the rest of the precincts are considered in the CEF’s capital expenditure programme (2023) and the capital infrastructure investment portfolio. The amendment of the CEF as part of the MSDF, 2023, and the review (2024) enable the municipality to strategically plan based on an understanding of the projects that are necessary to meet the needs of the municipality, including ensuring the allocation of resources is financially sustainable while also achieving the goals of the municipality.

4.7.1 Development of Klappmuts

The Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF) contains very specific policy directives related to Klappmuts, aimed at addressing pressing sub-regional and local space economy issues. Key policy objectives include:

- Using infrastructure assets (e.g., key movement routes) as “drivers” of economic development and job creation;
- Recognition that existing infrastructure in the area (i.e., N1, R101, R44, and the Paarl-Bellville railway line and station) dictates the location of certain transport, modal change, or break-of-

bulk land uses;

- ✦ Recognition of the Klapmuts area as a significant new regional economic node within the metropolitan area and spatial target for developing a “consolidated platform for the export of processed agri-food products (e.g., inland packaging and containerisation port)” and “an inter-municipal growth management priority”;
- ✦ The consolidation of and support for existing and emerging regional economic nodes as they offer the best prospects to generate jobs and stimulate innovation;
- ✦ The clustering of economic infrastructure and facilities along public transport routes;
- ✦ Maintaining valuable agricultural and natural assets; and
- ✦ Providing work opportunities in proximity to living areas.

There is no doubt that Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM, as it is located on the N1 transport corridor, which carries 93% of metropolitan freight traffic. To date, the settlement is characterised by residential use and limited commercial and work-related activity.

Public sector resource constraints have prevented the infrastructure investment required to enable and unlock the full potential of the area for private sector economic development, as envisaged in the GCM RSIF.

The decision by Distell Limited to relocate to and consolidate its operations in Klapmuts is critical to the more balanced development of the settlement. Distell Limited proposes to develop a beverage production, bottling, warehousing, and distribution facility on Paarl Farm 736/RE, located north of the N1, consolidating certain existing cellars, processing plants, and distribution centres in the Greater Cape Town area. The farm measures some 200 ha in extent. The beverage production, bottling, warehousing, and distribution facility will take up approximately 53 ha.

The project proposal includes commercial and mixed-use development on the remainder of the site, which is not environmentally sensitive, to provide opportunities for both Distell's suppliers to co-locate and for other business development in the Klapmuts North area. The site does not have municipal services, and the proposed development will therefore require the installation of bulk service infrastructure, including water, wastewater treatment, stormwater electricity, and internal roads.

Significant progress has been made in planning for an "Innovation Precinct" or "Smart City" district west of but contiguous to Klapmuts south. This includes a land agreement with the University of Stellenbosch to possibly establish university-related activities in this area. The urban edge has been adjusted in recognition of the opportunity associated with this initiative (see the figure below for the concept of the development framework).

Figure 25: Concept Development Framework

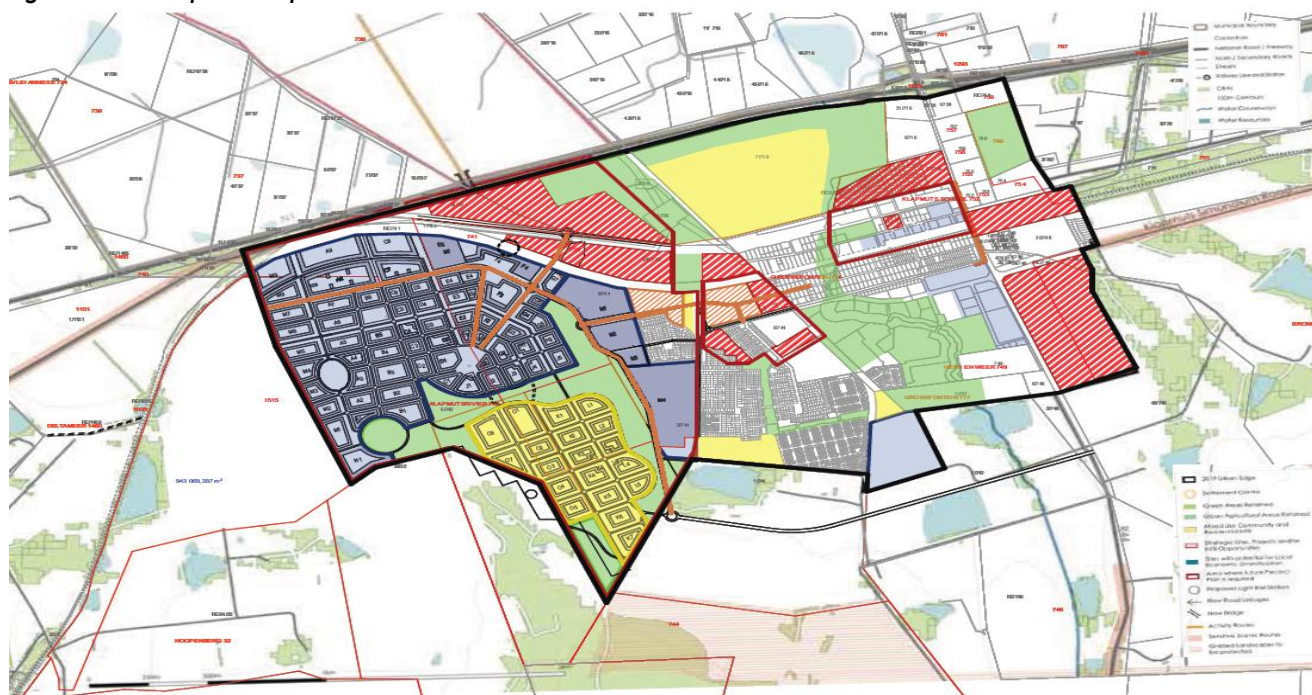

Figure 56. The proposed Klapmuts "Innovation Precinct" Concept (Osmond Lange Architects and Planners)

Several issues require specific care in managing the development of Klapmuts over the short to medium term.

- ⚠ The first is speculative applications for land use change on the back of the proposed Distell development. Already, a draft local plan prepared by DM has indicated very extensive development east of Farm 736/RE. Distell will not fund the extensive infrastructure required to unlock development here, and arguably, land use change to the east of Farm 736/RE could detract from the opportunity inherent in Farm 736/RE;
- ⚠ The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road, and a possible NMT crossing over the N1, linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunities enabled north of the N1; and
- ⚠ The third is a speculative higher-income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.

Given that management of Klapmuts is split between DM and SM (respectively responsible for the area north and south of the N1), special arrangements will be required to ensure that the settlement as a whole develops responsibly in a manner that ensures thoughtful prioritisation, infrastructure investment, and opportunity for a range of income groups.

Arguably, recent LSDF planning work commissioned by DM for the area east of Farm 736/RE begins to illustrate the problem of insufficiently coordinated planning. The LSDF envisages a very significant extent of development for Klapmuts North. Specifically, in terms of a 20-year growth trajectory, commercial office development of 912 354m² is envisaged, commercial retail development of 187 839m², and general light industrial development of 370 120m². Several issues emerge:

Firstly, the realism of these land use projections within the context of the regional economy is questioned. To illustrate:

- ⚠ Considering the envisaged commercial office allocation, it is noted that Cape Town CBD currently has some 940 000m² of office space, Sandton in Gauteng is larger at over 1,2m m² of commercial office space, Midrand at some 640 000m², and Century City (some 20 years in the making) at some 340 000m²;

- ✦ Concerning commercial retail space, it is noted that more of this use is envisaged for Klapmuts North than Century City's current 140 000m²;
- ✦ While 370 120m² is provided for general light industrial development, the proposed Distell distribution centre alone will comprise 125 000m², and many new logistic centres recently completed in the Kraaifontein / Brackenfell area range in size between 45 000m² and 120 000m². The master plan prepared as part of the acquisition process of Farm 736/RE foresees a significantly lighter industrial floor area than the 370 120m² indicated in the LSDF.

Secondly, these land use allocations need to be viewed against the policy context, which sees Klapmuts as a regional freight / logistics hub – with a focus on job creation – and establishing a balanced community. It would appear that the LSDF over-emphasises commercial office and retail development, “exploiting” the areas' access to regional vehicular routes, and private vehicular access, at the expense of job creation at scale – and establishing a regional light industrial hub – serving an existing poorer community in proximity to a freight movement corridor.

Thirdly, it is maintained that the infrastructure service requirements – and affordability – of the projected land use allocations are understated. For example, it is known that any development north of the N1 over and above the proposed Distell distribution centre of 125 000m² will involve very costly reconfiguration and augmentation of intersections with the N1. It would be irresponsible to create expectations around land use without these associated requirements being resolved to a fair degree of detail.

Finally, Farm 736/RE is remarkably unique; comprising some of the least valuable agricultural lands within the Paarl / Stellenbosch area. It would appear that the LSDF, given the development process for Farm 736/RE, assumes that adjacent land to the east, of higher agricultural value, should also be developed.

4.7.2 Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, it is critical, both for the Adam Tas Corridor and the broader Baden Powell-Adam Tas-R304 development corridor, to explore the feasibility of introducing a more frequent and reliable rail service along the Eerste River-Stellenbosch-Muldersvlei-Klapmuts rail line. The aim should be to have a more frequent passenger service along the corridor, connecting larger and smaller settlements. Lighter rail stock – possibly in the form of a “tram” system has been suggested - offering the advantage of safe at grade crossing of the rail line and other modes of transport, in turn, enabling “lighter” infrastructure support for settlement development and concomitant cost savings. Alternatively, the viability of regular bus service along this route should be explored. The SM should commence engagements with PRASA in this regard.

As argued elsewhere in this document, Stellenbosch town and Klapmuts should be the focus of significant settlement growth. It is here, by settlement location concerning broader regional networks and existing opportunities within settlements, that the needs of most people can be met, in a compact settlement form while protecting the municipality's natural and agricultural assets.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing opportunity for a range of income groups) and integration with the corridor in terms of public transport.

The smaller settlements are therefore not prioritised for significant development over the *SDF* period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

4.8 Institutional Arrangements

The SM has dedicated staff resources for spatial planning, land use management, and environmental management organised as the Planning and Economic Development Directorate. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act, 1998 (Act No. 107 of 1998)).

The Planning and Economic Development Directorate will facilitate the implementation of the SDF in terms of institutional alignment, including:

- The extent to which the main argument and strategies of the SDF are incorporated into the Capital Expenditure Framework, annual reports, annual IDP reviews, future municipal IDPs, and so on;
- The annual review of the SDF is part of the IDP review process.
- The extent to which the main argument and strategies of the SDF inform sector planning and resource allocation;
- The extent to which the main argument and strategies of the SDF inform land use management decision-making;
- Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- The mutual responsiveness of the SDF and national, provincial, and regional plans, programmes, and actions (including the extent to which SDF implementation can benefit from national and provincial programmes and funding).

Over and above the institutional arrangements in place, it appears that two aspects require specific focus in support of the SDF.

4.8.1 Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the SDF, SM (and other adjoining municipalities) appear to be experiencing increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation, or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for “both sides” of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule). However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

4.8.2 Private Sector Joint Planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- The municipal human and financial resource base are simply too small to achieve the vision of the SDF or implement associated strategies and plans;
- Many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives;
- It is increasingly evident that individual landowners are finding it difficult to develop – to make

the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;

- ✦ Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- ✦ The municipality's focus is often – and understandably so – on the “immediate”, or shorter-term challenges. Much of what is needed to implement the SDF or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak and Rhenish complex – in a manner which contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the “pooling” of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

4.8.3 Further Planning Work

As indicated above, over the longer term, Muldersvlei / Koelenhof, and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical pre-conditions for significant development include:

- ✦ The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- ✦ Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- ✦ Understanding to what extent settlements can provide local employment and, in this way, minimising the need for transport to other settlements.

4.8.4 Other local planning initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the SDF in more detail. The position and function of settlements in the SM settlement hierarchy should determine the priority for LSDFs. The municipality aims to procure the services of a service provider to compile a series of local community investment plans in the form of local spatial development frameworks over the next three years for ten of the priority nodes (both urban and rural). The aim is to compile localised planning and development outcomes that need to address the following:

- ✦ Spatial and design frameworks, plans, and strategies;
- ✦ Economic development intervention business plans;
- ✦ Social service delivery plans and interventions; and
- ✦ Innovative and interactive engagement and public participation processes.

In addition to the aforementioned, a number of precinct plans for specific areas as identified in the MSDF have been completed and are in the process of being finalised by initiatives driven by the municipality and private property owners. The Rhenish Complex and Surroundings Precinct Plan was initiated by the municipality and adopted by the Council on 29 November 2023. The precinct plan includes an urban design framework that aims to guide the future utilisation, preservation, and

development of the study area with a specific view to unlocking the potential of the area, which plays an important role as a key site of cultural and heritage significance.

The Franschhoek Development Framework contained in the MSDF further identified an area in Groendal for "strategic sites, projects, and / or infill opportunities", and the development of a precinct plan. A spatial and urban design framework for a specific area within the strategic site has been commissioned by the landowners of Klein La Provence. In the drafting of the proposed spatial and urban design framework, the municipality required that the precinct plan consider the relationship of the site to its broader context and setting while also being replicable across similar contexts. The precinct plan is currently being finalised and will be public participated in due course.

4.8.5 Checklists in Support of Decision-Making

To further assist in aligning day-to-day land use and building development management decision-making and detailed planning – public and private – with the SDF, it is proposed that a "checklist" of questions be employed.

If the initiators of development proposals, applicants, officials, and decision-makers all, in general terms, address the same questions in the conceptualisation, assessment, and decision-making related to proposals, a common, shared "culture" could be established where key tenets of the SDF are considered and followed continuously.

Although focused on the location, nature, and form of activities in space, the checklist incorporates questions addressing issues beyond space, including matters of resource management, finance, institutional sustainability, and so on.

It is not envisaged that the checklist be followed slavishly in considering every development proposal. Yet, its use is important in ensuring that relevant issues are addressed and discussed to enable decision-making in line with the SDF and broader provincial and national planning policies. If, in assessing a proposal or project, posing a question results in a negative answer, the proposal probably requires very careful consideration, further work, or change.

The checklist should not be viewed as static. Rather, it should be reviewed periodically and in parallel with the SDF review – perhaps under the leadership of the Municipal Planning Tribunal and with input from all stakeholders – to reflect the municipal spatial planning agenda and challenges.

It is proposed that the questions – together with the SPLUMA principles, and the key SDF strategies and policies, be packaged in an easy-to-use and accessible form to facilitate wide usage.

4.8.6 Partnerships

Arguably, the municipal budget is simply too small to achieve the vision of the SDFs or implement associated strategies and plans. Also, many matters critical to implementing the SDF, fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives.

Even if the municipal budget is increased ten-fold, or its staff resources are significantly enhanced, it would still not have the control to do what is needed to drive critical projects. The municipality's focus is often – and understandably so – on the "immediate," or the shorter-term challenges. Much of what is needed requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed-upon objectives. Further, partnerships are required between individual corporations and owners of the land. It is increasingly evident that individual landowners are finding it increasingly difficult to develop and make the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and

dedicated integration. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak and Rhenish complex – in a manner that contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the “pooling” of land resources, sharing of professional costs, infrastructure investment, and so on.

The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

There appears to be an opportunity to establish a new partnership with businesses, on the side of the municipality to drive major integrated projects, specifically the Adam Tas Corridor. Fortunately, Stellenbosch has established (private sector) institutions with an astounding track record of achieving urban development / management objectives (e.g., Historiese Huise). Their work can be expanded to assist in meeting new challenges, in partnership with the municipality.

A formal Memorandum of Agreement exists between Stellenbosch municipality and the Stellenbosch Heritage Foundation to host the Heritage Inventory on the GIS system and to give free public access to the system until such a time that the municipality can do so. A tender was advertised in January 2024 for the updating of the Heritage Inventory on the GIS system and to assist Stellenbosch municipality to undertake heritage assessments in areas under severe development pressure.

To strengthen the ability of the Directorate: Planning and Economic Development to manage development taking place within the Franschhoek and Stellenbosch historical cores and along the scenic routes in the rural landscape, the Council appointed an advisory committee to evaluate, consider, and make recommendations to the directorate with respect to new developments and alterations to the existing built environment. This committee consists of registered architects and experts in the field of cultural and historic environments.

The municipality owns several significant historical properties in Stellenbosch that require proper maintenance and appropriate uses that should support and enhance the tourism sector. To assist the municipality in managing these assets, the Council is in the process of outsourcing the responsibility to maintain, manage, and lease some of the buildings to Historiese Huise of South Africa. His partnership will ensure the proper maintenance of historical landmarks and appropriate use that will ensure public access, and the support of the tourism sector will be obtained.

CHAPTER 5: Performance Summary of the 5th Generation IDP 2022 – 2027

5.1 Introduction

The performance reporting on the IDP deliverables for the period 2022 – 2027 of the 5th Generation IDP 2022 – 2027 covers the period from 01 July 2022 to 30 June 2027.

The reporting focuses on the implementation of the Municipal Manager, Mayoral, Mayoral Portfolio, and Sector Plans priorities encapsulated throughout the various sections in the IDP document, and the format reflects the IDP deliverables per priority area. The IDP deliverables were revised in January / February 2023 to allow for adequate planning and implementation in the 2024/25 financial year and the outer financial years.

The overall assessment of actual performance against targets set for the IDP deliverables as documented in the various sections of the IDP document is illustrated below:

5.2 IDP Performance Reporting: Municipal Manager IDP Priorities for 2022 - 2027

Thirteen (13) IDP deliverables are linked to the Municipal Manager's Priorities across directorates and will be measured for the period 2022 – 2027. In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, while 1 (14.29 per cent) were not achieved. Furthermore, in Year 2 (2023/24), four (100 per cent) IDP deliverables are in progress and will be reported on by 30 June 2024.

Figure 26: Number of Municipal Manager Priorities achieved for 2022 – 2027

5.3 IDP Performance Reporting: Executive Mayor Priorities for 2022 - 2027

The **Executive Mayoral** 5 – year plan has a total of 68 IDP deliverables linked to nine (9) mayoral outcomes which are applicable for the 5th Generation IDP 2022 – 2027.

Executive Mayoral Outcome 1: Clean, accountable, and responsive local government has a total of 8 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved and 1 (14.29 per cent) was not met. In Year 2 (2023/24), 1 (14.29 per cent) of the seven (7) IDP deliverables were achieved, and 6 (85.71 per cent) was in progress and will be reported on by 30 June 2024.

Graph 13: Executive Mayoral Outcome 1: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area has a total of 14 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (70 per cent) of the ten (10) IDP deliverables were achieved, 1 (10 per cent) is in progress, and 2 (20 per cent) were not met. In Year 2 (2023/24), 8 (80 per cent) of the ten (10) IDP deliverables are in progress and will be reported on by 30 June 2024, and 2 (20 per cent) are not measured yet.

Graph 14: Executive Mayoral Outcome 2: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers has a total of 10 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (57.14 per cent) of the seven (7) IDP deliverables were achieved, 1 (14.29 per cent) is in progress, and 2 (28.57 per cent) were not met. In Year 2 (2023/24), 6 (75 per cent) of the eight (8) IDP deliverables are in progress and will be reported on by 30 June 2024, and 2 (25 per cent) were achieved.

Graph 15: Executive Mayoral Outcome 3: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements, and mixed-use developments) has a total of 12 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 9 (90 per cent) of the ten (10) IDP deliverables were achieved, and 1 (10 per cent) are in progress with anticipated completion by 30 June 2024. In Year 2 (2023/24), 6 (85.71 per cent) of the seven (7) IDP deliverables are in progress, and 1 (14.29 per cent) will be reported by 30 June 2024.

Graph 16: Executive Mayoral Outcome 4: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpias across the municipality area has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (100 per cent) of the two (2) IDP deliverables were achieved. In Year 2 (2023/24), 2 (100 per cent) of the two (2) IDP deliverables were achieved.

Graph 17: Executive Mayoral Outcome 5: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth has a total of 3 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (100 per cent) IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) IDP deliverable was in progress and will be reported on by 30 June 2024.

Graph 18: Executive Mayoral Outcome 6: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 7: To create safer environments in our communities has a total of 11 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (60 per cent) of the ten (10) IDP deliverables were achieved, 1 (10 per cent) is in progress, 1 (10 per cent) was not met, and 1 (10 per cent) was not yet measured. In Year 2 (2023/24), 5 (55.56 per cent) of the nine (9) IDP deliverables are in progress and will be reported on by 30 June 2024, 3 (33.33 per cent) were achieved, and 1 (11.11 per cent) was not yet measured.

Graph 19: Executive Mayoral Outcome 7: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation has a total of 3 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) were not yet measured. In Year 2 (2023/24), 1 (100 per cent) IDP deliverable was not yet measured.

Graph 20: Executive Mayoral Outcome 8: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 9: Alternative Energy has a total of 10 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were not yet measured.

Graph 21: Executive Mayoral Outcome 9: Implementation Progress 2022 – 2027

5.4 IDP Performance Reporting: Mayoral Portfolios for 2022 - 2027

The 10 (ten) **Mayoral Portfolio's** each have a 5 – year plan with specific IDP deliverables and targets applicable for the period 2022 - 2027.

A total of 89 IDP deliverables are linked to ten (10) mayoral portfolios that were applicable for the 2022/23 financial year.

Mayoral Portfolio Human Settlements has a total of 22 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 16 (94.12 per cent) of the seventeen (17) IDP deliverables were achieved, and 1 (5.88 per cent) were not met. In Year 2 (2023/24), 16 (94.12 per cent) of the seventeen (17) IDP deliverables are in progress and will be reported on by 30 June 2024 and 1 (5.88 per cent) were achieved.

Graph 22: Mayoral Portfolio – Human Settlements 2022 – 2027

Mayoral Portfolio Rural Management has a total of 4 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) were not met. In Year 2 (2023/24), 2 (100 per cent) of the two (2) IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 23: Mayoral Portfolio – Rural Management

Mayoral Portfolio Youth, Sport and Culture has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 1 (50 per cent) of the two (2) IDP deliverables is in progress, and 1 (50 per cent) has yet to be measured.

Graph 24: Mayoral Portfolio – Youth, Sport, and Culture

Mayoral Portfolio Planning, LED and Tourism has a total of 38 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 22 (81.48 per cent) of the 27 IDP deliverables were achieved, 1 (3.70 per cent) is in progress, and 4 (14.82 per cent) were not met. In Year 2 (2023/24), 4 (16 per cent) of the 25 IDP deliverables were achieved, 13 (52 per cent) are in progress to be reported on by 30 June 2024 and 8 (32 per cent) has not yet been measured.

Graph 25: Mayoral Portfolio – Planning, LED and Tourism

Mayoral Portfolio Community Services has a total of 9 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 8 (100 per cent) of the 8 IDP deliverables were achieved. In Year 2 (2023/24), 1 (25 per cent) of the 4 IDP deliverables were achieved, 1 (25 per cent) are in progress to be reported on by 30 June 2024 and 2 (50 per cent) has not yet been measured.

Graph 26: Mayoral Portfolio – Community Services

Mayoral Portfolio Financial Services has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (100 per cent) of the four (4) IDP deliverables were achieved. In Year 2 (2023/24), 3 (75 per cent) of the four (4) IDP deliverables are in progress and will be reported on by 30 June 2024, and 1 (25 per cent) were achieved.

Graph 27: Mayoral Portfolio – Financial Services

Mayoral Portfolio Protection Services has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) were not met. In Year 2 (2023/24), 2 (66.67 per cent) of the three (3) IDP deliverables are in progress and will be reported on by 30 June 2024, and 1 (33.33 per cent) were achieved.

Graph 28: Mayoral Portfolio – Protection Services

Mayoral Portfolio Corporate Services has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 29: Mayoral Portfolio – Corporate Services

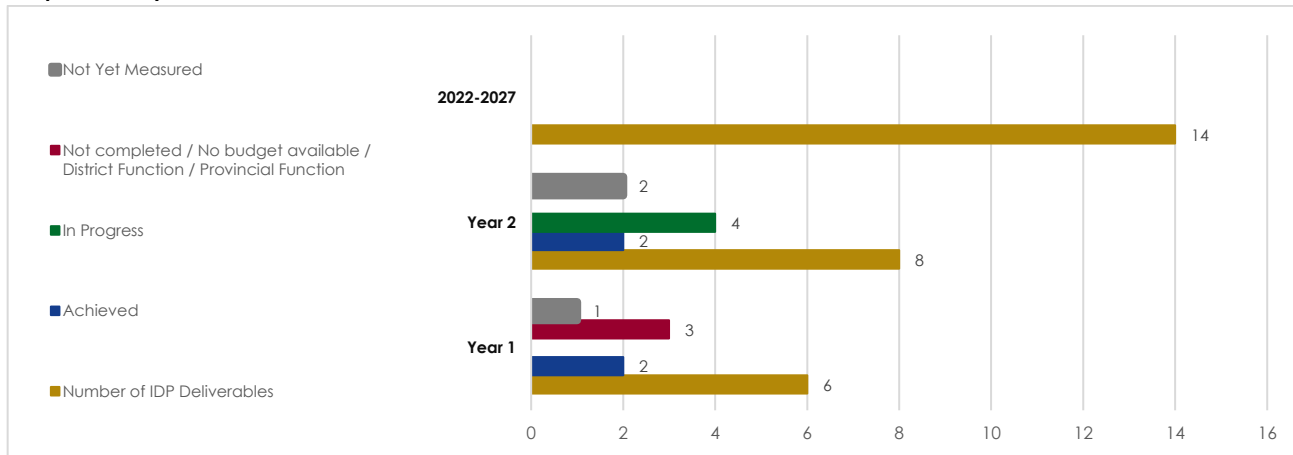

Mayoral Portfolio Infrastructure Services has a total of 14 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (33.33 per cent) of the six (6) IDP deliverables were achieved, 1 (16.67 per cent) has not yet been measured, and 3 (50 per cent) were not met. In Year 2 (2023/24), 4 (50 per cent) of the eight (8) IDP deliverables are in progress and will be reported on by 30 June 2024, 2 (25 per cent) were achieved, and 2 (25 per cent) has not yet been measured.

Graph 30: Mayoral Portfolio – Infrastructure Services

Mayoral Portfolio Parks, Open Spaces and Environment has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (100 per cent) of the four (4) IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 31: Parks, Open Spaces and Environment

5.5 IDP Performance Reporting: Sector Plans Implementation for 2022 - 2027

The seven (7) sector plans below each have a 5 – year implementation plan with specific IDP deliverables and targets for the period 2022 - 2027.

The **Environmental Management Plan** has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 3 (75 per cent) of the four (4) IDP deliverables were achieved and 1 (25 per cent) is in progress to be completed by 30 June 2024. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 32: Environmental Management Plan – Implementation Plan Progress 2022 – 2027

The section on **Integrated Human Settlements** that highlights priority housing projects and upgrading of informal settlements has a total of 14 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (66.67 per cent) of the nine (9) IDP deliverables were achieved, 2 (22.22 per cent) is in progress to be completed by 30 June 2024 and 1 (11.11 per cent) not achieved. In Year 2 (2023/24), 100 per cent of the five (5) IDP deliverables are in progress to be reported on by 30 June 2024.

Graph 33: Integrated Human Settlements – Implementation Plan Progress 2022 - 2027

The **Comprehensive Integrated Transport Plan** has a total of 12 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 3 (75 per cent) of the four (4) IDP deliverables were achieved, and 1 (25 per cent) is in progress to be completed by 30 June 2024. In Year 2 (2023/24), 2 (40 per cent) of the five (5) IDP deliverables are in progress to be reported on by 30 June 2024 and 3 (60 per cent) IDP deliverables were achieved.

Graph 34: Comprehensive Integrated Transport Plan – Implementation Plan Progress 2022 - 2027

The **Integrated Waste Management Plan (IWMP)** has a total of 13 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 5 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 8 (80 per cent) of the ten (10) IDP deliverables are in progress and will be reported on by 30 June 2024 and 2 (20 per cent) IDP deliverables were achieved.

Graph 35: Integrated Waste Management Plan – Implementation Plan Progress 2022 – 2027

The **Water Services Development Plan (IWMP)** has a total of 8 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 36: Water Services Development Plan – Implementation Plan Progress 2022 – 2027

The **Disaster Management Plan (DMP)** has a total of 7 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 5 (83.33 per cent) of the six (6) IDP deliverables are in progress and will be reported on by 30 June 2024 and 1 (16.67 per cent) IDP deliverables were achieved.

Graph 37: Disaster Management Plan – Implementation Plan 2022 – 2027

The **Local Economic Development Strategy** has a total of 10 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (77.78 per cent) of the nine (9) IDP deliverables were achieved and 2 (22.22 per cent) is in progress to be completed by 30 June 2024. In Year 2 (2023/24), 9 (100 per cent) of the IDP deliverables are in progress to be reported on by 30 June 2024.

Graph 38: Local Economic Development – Implementation Plan 2022 – 2027

The **Community Development Strategy** has a total of 4 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 4 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 39: Community Development – Implementation Plan 2022 – 2027

CHAPTER 6:

One Plan: Service delivery, budget, programmes, and projects

6.1 Introduction

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way, where there is higher performance and accountability for coherent and effective service delivery and development outcomes.

The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

It is acknowledged that the DDM introduces a new planning instrument in the form of the **One Plan**. This process comes into a planning environment where there are existing planning instruments at local, provincial, and national levels of government. However, the One Plan is not meant to replace any of the existing prescribed development, departmental strategic, and annual performance plans that each sphere, department, and state entity is responsible for or required to develop. The One Plan is rather informed by these plans, and once in place, it will guide the review of these plans and budgets.

The Western Cape Government-specific approach to the DDM is called the **Joint District and Metro Approach (JDMA)**. The JDMA envisages the three spheres of government to converge, using intergovernmental (IGR) engagements, to develop similar Western Cape strategic, development, and planning priorities with aligned budgets and accelerated implementation for service delivery.

The **Joint District and Metro Approach (JDMA)** -

- † is a geographical (district) and team-based and citizen-focused approach;
- † has the output of a single implementation plan to provide planning and strategic priorities, developmental initiatives, service delivery, and capacity building;
- † has the desired outcome of improving the living conditions (lives) of citizens;
- † has a horizontal interface (between provincial departments) and a vertical interface (national, provincial, and local government spheres);
- † does not exclude local municipalities;
- † is not a functions and power debate; and
- † promotes collaboration using the District Coordinating Forum as the governance instrument for co-planning, co-budgeting, and co-implementation to strengthen service delivery to communities.

This chapter will provide details from all three spheres of government to give effect to the objectives and strategies contained in the 5th Generation Integrated Development Plan.

6.2 Relationship between the One Plan and Integrated Development Plan (IDP)

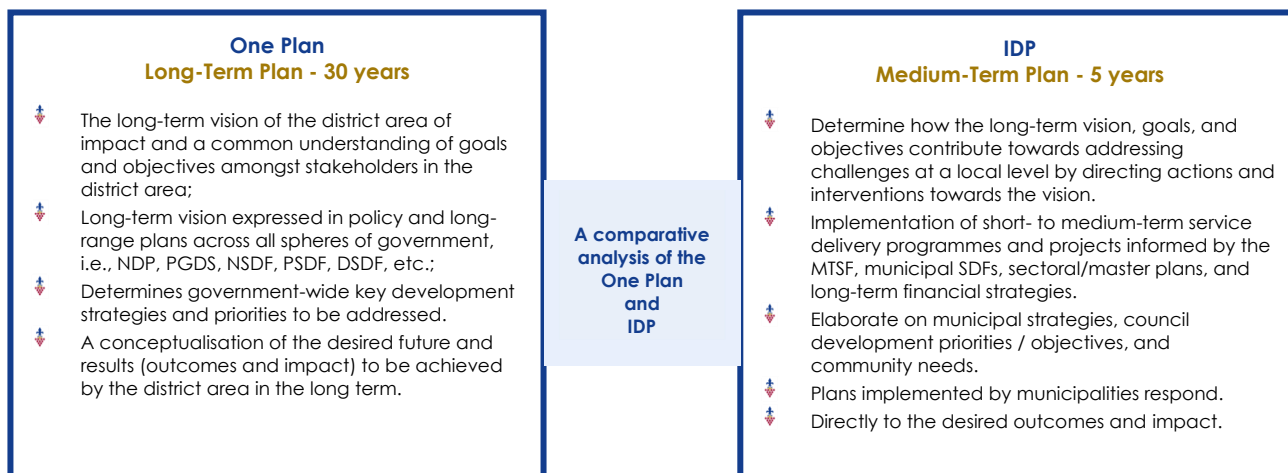

The One Plan does not replace the Integrated Development Plans of municipalities as the “single, inclusive, and strategic plan for the development of the municipality,” but is meant to strengthen and enhance the IDPs and other plans of the municipalities. It is foreseen to provide greater certainty and

direction for the IDPs. The IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Below is a comparative analysis of the One Plan and IDP:

Figure 27: Comparative analysis of the One Plan and IDP

6.3 National and Provincial Government Priorities

6.3.1 State of the Nation Address (SONA) 2024

President Cyril Ramaphosa presented the State of the Nation Address (SONA) on 08 February 2024. President Ramaphosa's SoNA 2024 highlighted both achievements and challenges, emphasising the need for continued efforts to build a stronger, more inclusive South Africa.

The following are key highlights from the SONA:

South Africa has had to:

- ✦ revitalise the economy after more than a decade of poor economic performance;
- ✦ rebuild public institutions after the era of state capture;
- ✦ recover from a devastating global pandemic that caused great misery and hardship, closed businesses, and cost jobs; and
- ✦ confront and overcome a debilitating electricity crisis that, despite significant improvement in recent months, continues to hold back the economy.

South Africa has come a long way in the last five years. Government has:

- ✦ built on the achievements of the last three decades, and it has taken decisive measures to address the immediate challenges facing South Africans;
- ✦ restored the independence and capability of law enforcement agencies to tackle corruption and crime;
- ✦ worked to advance the rights of persons with disability;
- ✦ The government took great pride in making South African Sign Language, the 12th official language of the country;
- ✦ safeguarded and promoted the basic rights in the
- ✦ Constitution, such as the freedom of speech, association, and belief;
- ✦ defended media freedom and the independence of the judiciary;
- ✦ protected and advanced the rights of members of the lesbian, gay, bisexual, transgender, queer / questioning and intersex communities, and continue to combat all forms of prejudice and intolerance; and
- ✦ made significant progress on measures to grow the economy, create jobs, and reduce poverty.

While the government has set in motion the process of renewal and reform, there is more work to be done to see these reforms through to the end. Government will:

- ✦ see through the work underway with partners to end load-shedding and revive the performance of ports and rail network;
- ✦ continue to strengthen law-enforcement institutions, tackle GBV, and fight corruption to make South Africa a safe place for all;
- ✦ continue to strengthen local government, professionalise the public service, and ensure that public officials are held accountable for their actions;
- ✦ continue to position the economy to grow and compete in a fast-changing world, to support small businesses, to give young people economic opportunities, and to provide social protection to the vulnerable;
- ✦ continue the work to improve the country's fiscal position and hold firm to a sound macroeconomic trajectory;
- ✦ use the opportunities provided by the AfCFTA to increase trade and expand industries; and
- ✦ continue to build an inclusive economy, focusing on the empowerment of black and female South Africans, advancing workers' rights, intensifying land reform, and pursuing a just energy transition that leaves no one behind.

6.3.2 State of the Province Address (SOPA) 2024

Premier Alan Winde presented the State of the Province Address (SOPA) on 16 February 2023.

The following are key highlights from the SOPA:

Power of our People

- ✦ Ensure to create the space for diverse views to be shared and expressed and that the rule of law is adhered to.
- ✦ Focus on our residents' critical needs, like safety, growing the economy and enabling jobs, and ending load shedding.

The Western Cape Government "FOR YOU"

- ✦ The WCG is the first provincial government in the world to be awarded the Top Employer Certification.
- ✦ To serve with dignity and humility, placing the needs of our residents above everything.

Devolution of critical services for you our residents

- ✦ Fix Cape Town's central line and get trains back on track.
- ✦ Attract private investors to the Port of Cape Town so it can again be an efficient logistics hub that helps create jobs and fuel our economic growth.

Looking after the most vulnerable citizens

- ✦ 365-day approach to addressing gender-based violence, and the aim is to do everything to ensure that survivors of violence get the support and assistance they need.

Feeding those in need

- ✦ Continued our school feeding schemes.
- ✦ School Nutrition Programme at Western Cape Government schools.
- ✦ Continued support for community nutrition and development centres and soup kitchens across the province.

Job Creation

- ✦ Highlights the importance of job creation and economic growth in the Western Cape, emphasising the government's efforts to empower citizens through employment opportunities.
- ✦ The focus on building an enabling job ecosystem, as outlined in the Growth for Jobs (G4J) strategy, has led to a significant decrease in the unemployment rate in the province.
- ✦ The Western Cape Government's initiatives, such as the Red Tape Reduction Unit and the SMME Booster Fund, aim to support businesses and promote economic development.

Tourism

- ✦ Introduced the G4J Tourism Challenge Fund which invests in the development of new tourism infrastructure and experiences to stimulate private sector investment.

Infrastructure – led economic growth

- ✦ Infrastructure projects will be a key artery for many more jobs in the future.

Education

- ✦ Exploring additional models of public-private partnerships and drawing private investment into the education sector through Edu Invest.

Agriculture

- ✦ Private sector involvement and more control of the port.
- ✦ High-quality support for emerging farmers.

Safety

- ✦ Safety cannot be achieved in isolation. Creating jobs has become as critical as fighting crime. A safe community is a prosperous one.
- ✦ Launched the Getting YOU to Work project, an exciting new initiative that offers jobseekers free travel to job interviews using Golden Arrow Bus Services.

Load shedding

- ✦ The ongoing crisis significantly hinders the economic development of the Western Cape, worsening unemployment rates and affecting the safety and dignity of our residents.
- ✦ The Western Cape is well on its way to becoming the first load shedding-free province in the country.
- ✦ Building an energy ecosystem to bring more private sector role players into the fold will help us overcome the power crisis.
- ✦ Handed out load shedding relief packs to vulnerable groups, starting with facilities funded by the Western Cape Department of Social Development.

Clean Governance and corruption

- ✦ The power of good governance has profound and far-reaching repercussions that help enable job creation. It is therefore a key building block of economic growth.
- ✦ Assisting struggling municipalities.

6.4 Investments

This section reflects on investment priorities within the Stellenbosch area for 2023/24.

6.4.1 Public Sector Investment

In the farming towns and tourist hubs of the CWD region, strategic investment by the provincial and local governments plays a significant role in maintaining a suitable environment for businesses to operate and communities to live in, ensuring social welfare and economic growth. In the short term, the injection of funds breathes life into the local economy, as communities reap the rewards of increased capital expenditure and prospects for new job opportunities. However, the true reward unfolds in the long run when the resultant operational activities of these investments stimulate growth that echoes across the district. Constraints on public sector investment have become more prevalent, with challenges such as load shedding, high poverty levels, and sluggish economic growth negatively affecting local governments' revenue-generating capabilities. However, in the face of adversity, the resolve of the local municipalities has proven to be unyielding, and investing in infrastructure remains a priority.

The pressing challenges presented by ageing water supply infrastructure and load shedding have significantly impacted sustainable water provision in the CWD. Given the District's economic reliance on agriculture and its growing population, the Witzenberg (R19.4 million) and **Stellenbosch (R117.2 million)** municipal areas have put water management as one of the priority items within their annual budgets. Moreover, wastewater management is under pressure throughout the district.

As load shedding continues and concerns about productivity and economic stability rise, many municipal areas are seeking alternative energy sources to minimise the effects of electricity constraints. The Stellenbosch municipal area has allocated much of its budget (R113.2 million) to energy infrastructure. Energy infrastructure projects in the Stellenbosch municipal area include high-voltage substations valued at R75.0 million provided for in the 2023/24 MTREF budget period and medium-voltage substations and networks valued at R72.8 million envisaged for the same period.

6.5 Intergovernmental Budgetary Allocation

The infrastructure projects and related capital projects listed below are in various stages of implementation, with certain projects being in the planning phases, others in implementation with construction in progress, and some in the close-up phase of the project.

6.6 Cape Winelands District (CWD) JDMA Implementation Plan

A **CWDM JDMA profile** was developed in 2020 and updated in September 2023. The Cape Winelands District Profile - 2020 Perspective is a first-generation knowledge product to provide information and evidence to government stakeholders and also to:

- Provide an information source that, at a glance, highlights what needs to be maintained, the strengths and challenges facing the Cape Winelands District (i.e., sets the context and provides the government with an intergovernmental understanding of key development trends and patterns within the District); and
- Assist in informing catalytic or strategic projects for the Joint District and Metro Approach Implementation Plan for the longer-term development of this geographical area that is both focused and targeted, but also implementation-ready, resilient, coordinated, and integrated.

Given the above, the following strategic priorities have been identified for inclusion in the CWD JDMA Implementation Plan and approved by the District Coordinating Forum (DCF).

- Waste minimisation and management solutions
 - Regional Landfill
 - Waste Minimisation Strategies
 - Integrated Waste Management Plan
 - Waste Workshop
- Resource Resilience
 - Climate Change, Water Management and Wildfire Urban Interphase Risks
 - **Municipal Energy Resilience Programme**
- Infrastructure management and development
 - N1 Eastern by-pass
 - ESKOM Infrastructure delays (Witzenberg)
- Economic Recovery and Unemployment
 - Economic Recovery Plan - Implementation
- Urbanisation
 - Develop a guide to inform future developments
 - Monitor mega human settlement projects to inform the Guide
 - Address Land invasions
 - Provision of Basic Services for Prioritised Informal Settlements
- Community Safety
 - District Plan
 - Area-based Plan (Witzenberg)
 - SANTAM (fire and IT equipment, PPE and smoke alarms)
- Municipal Business Sustainability
 - Financial Sustainability
 - Revenue Collection: ESKOM

- Shared Services: Development of 4 Models

- External Stakeholder involvement
- Communication and IGR
- Data Governance and Profile update

- The development of a dynamic profile to inform JDMA Implementation Plan developmental priorities and projects.

- Digital Transformation Strategy

6.6.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations

The Municipal Energy Resilience (MER) Project was developed following an amendment to Schedule 2 of the Electricity Regulation Act in 2020, allowing municipalities to generate electricity. The key objectives of the MER Project are development, support, and capacity building to implement renewable energy projects in municipalities across the province for municipalities, businesses, and households to generate, procure, and sell electricity. The project aims to secure reliable electricity supplies for the province and increase economic resilience. The project includes four approaches: creating space for small-scale embedded generation (SSEG), providing assistance in procurement processes for municipalities to source energy from independent power producers (IPPs), building a business case for utility-scale to-power generation, and finally, reforming the sector. The Stellenbosch Municipality and five other candidate municipalities are participating in the first phase of the MER Project.

This project will look at several innovative renewable energy technologies and scales, as well as cost options, the size of the investment needed, location issues, risks, municipal readiness needs, infrastructure needs, timelines for getting capacity onto the grid, transaction and procurement mechanisms, and regulatory issues.

SSEG enables solar photovoltaic (PV) systems to be grid-tied and feed in any excess electricity generated. Registering a feed-in system allows one to export excess electricity to the grid and receive credit based on the SSEG tariff. This is structured to support PV system owners while covering the cost of their electricity services.

6.6.2 Cape Winelands District Joint District Approach

The following Strategic Projects apply to the Stellenbosch municipal area:

Figure 29: Cape Winelands District Joint District Approach

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH						
Municipal Priority	Key Initiative (s)	Municipalities Involved	Project	Project lead and team ((link to existing technical structures and / or projects)	Action/s	Progress
Provincial Priority (Vision Inspired Priority 2) – Growth and Jobs						
Waste minimisation and management solutions (priority project)	Integrated Waste Management Plan	All municipalities	Review of Integrated Waste Management Plan	CWDM and DEADP	<ul style="list-style-type: none"> ⬆️ Update the JDMA Implementation Plan in terms of DEADP lead on Waste. ⬆️ Western Cape Provincial Government to assist with supply chain management challenges. 	Integrated Waste Management Plan ⬆️ Project has commenced.
Waste minimisation and management solutions (priority project)	Establishment of a Regional Waste Management Facility	All municipalities	Regional Waste Management Facility: Conduct a section 78 investigation and implement the recommendations		<ul style="list-style-type: none"> ⬆️ A waste management conference will be arranged as soon as the new council is fully functional. 	⬆️ The project has commenced.
Resource Resilience	Water Governance and Water Service Development Plan Joint Strategy: Bulk Storage Facilities (to provide for drought) Local Economic Development / Growth and Development Strategy (for the District to address risks associated with Climate Change / Water Security)	All municipalities	Municipal Energy Resilience Programme	DLG, DEDAT, Stellenbosch Municipality and Drakenstein Municipality	<ul style="list-style-type: none"> ⬆️ Specific pioneering projects for Drakenstein and Stellenbosch were identified. ⬆️ DEDAT did a proxy for the cost-supply studies required by NERSA. ⬆️ The next step is to compile a roadmap for the pioneering projects and their implementation thereof. ⬆️ DEDAT to establish a MER Fund to assist municipalities in preparing for the studies and enable them to look at new generation capacity specifically for renewable energy. ⬆️ Wheeling support for individual municipalities is in the process of being finalised. 	<ul style="list-style-type: none"> ⬆️ During the Municipal Energy Resilience Programme, Stellenbosch and Drakenstein progressed as per stakeholder agreements. ⬆️ Initial engagements facilitated with WESGRO / Invest SA and DEDAT: ESKOM infrastructure delays (Witzenberg).

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH

Municipal Priority	Key Initiative (s)	Municipalities Involved	Project	Project lead and team ((link to existing technical structures and / or projects)	Action/s	Progress
Provincial Priority (Vision Inspired Priority 2) – Growth and Jobs						
Economic Recovery, long term unemployment and its consequences (priority project)	Address factors associated with Youth unemployment	All municipalities	Economic Recovery Plan	CWDM and all local municipalities; with WESGRO and DEDAT	Further offline discussions will be held regarding unemployment.	<ul style="list-style-type: none"> Quarterly updates are done on projects in the Economic Recovery Plan. Implementation is ongoing while further discussions are underway to understand the address of long-term unemployment challenges.
Municipal Business Sustainability (priority project)	Saving costs across certain functions	All municipalities	Shared Service Model Development	CWDM and all local municipalities, DLG and IGNITE	Follow up on progress with the appointed service provider.	<ul style="list-style-type: none"> Audited completed.
Data Governance and JDMA Profile	Towards developing a Dynamic Profile and sharing data	All municipalities	Data Governance and JDMA Profile	DLG, CWDM and all local municipalities, DEADP, DotP, DSD	<ul style="list-style-type: none"> Data governance is a transversal JDMA Project. CEI is busy drawing up a Memorandum of Understanding (MOU) for Metros and non-Metros. Provincial governance structures are being set up and aligned with local government in the Western Cape. This is being done with support from the Department of the Premier and will address monitoring and evaluation. 	<ul style="list-style-type: none"> Municipal interface structures are being finalised. Data-sharing MoUs are being drafted, with consultations underway. The CWDM Data Management Plan was developed. Gaps in the 2020 profile were identified.

6.7 Agricultural Interventions

In support of the Western Cape Department of Agriculture Strategic Plan, the municipality has identified two priority interventions on which the municipality will embark in the **period 2022 – 2027**.

Table 33: Agricultural Interventions for 2022 – 2027

Project Rating					
	Project completed.		Project in progress.		Not completed / No budget available / District Function / Provincial Function

Table 34: Agricultural Interventions

Proposed Municipal Actions in Support of the Strategic Focus Areas of the Western Cape Department of Agriculture					Target and Progress Rating					Performance Comment
Priority Area	Desired Municipal Deliverable	Status Quo within Municipality	Proposed Local Intervention (appropriate municipal action)	Timeframe to deliver (Short / medium / long term or ongoing)	2022/23	2023/24	2024/25	2025/26	2026/27	
Farmer Support	Lease agreement for use of commonage land (e.g. Terms of the lease, roles and responsibilities of each party, preference for individual agreements, and need for longer leases)	In 2020, two (2) land parcels were identified and advertised for emerging farmers. The process is to be finalised.	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers	Medium / long term	2	4	2	2	2	Sixteen (16) farming applications have been received. Assessments of farming applications have been completed. Four applications were shortlisted for potential allocation on the two portions of available land. An item was prepared for the council, and the four portions of land were approved and allocated to the successful applicants. In the first quarter of 2024, the Executive Mayor and a representative from the Office of the Minister will conduct an official handover.
							n/a	n/a	n/a	
Market Access	Infrastructural development that supports agriculture development value chain and market access	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers.	Ensuring vibrant, equitable and sustainable rural communities with food security for all	Medium / long term	2	4	2	2	2	In the first quarter of 2024, the Executive Mayor and a representative from the Office of the Minister will conduct an official handover.

6.9 Gender Mainstreaming

Gender mainstreaming is the process of assessing the impact on women and men of any planned development projects, including policies and programmes. It is a strategy for making women's as well as men's concerns and experiences an integral dimension in the planning, implementation, monitoring, and evaluation of projects and programmes in all areas of governance, economics, basic services, and social spheres. The ultimate goal of gender mainstreaming in the municipality is to achieve gender equality at all levels of service delivery. The United Nations Organisation defines gender equality as equal rights, responsibilities, and opportunities for women and men. It implies that the interests, needs, and priorities of both women and men are taken into consideration in the planning, decision-making, and performance of organisational functions.

Gender mainstreaming is one of the SDGs and District Development Model (DDM) objectives. The SDG (Goal 5) and DDM advocate that the government should aim for gender equality, empower all women and girls, and ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level. In support of the SDG and DDM objectives, the Stellenbosch Municipality aims to establish an environment that encourages gender mainstreaming interventions at the municipal level. Although priority issues identified by the different segments of the community cannot be addressed at once due to sufficient resources, the municipality is implementing interventions as a start to address gender and gender mainstreaming.

Gender mainstreaming will require the municipality to shift in organisational cultures and ways of thinking, as well as in the goals, structures, and allocation of resources. Through the IDP and in support of the SDG and DDM objectives, the Stellenbosch Municipality will make an effort to incorporate gender into each phase of planning. As a stepping stone to incorporating gender in municipal planning, it will take the form of identifying key gender indicators linked to the projects and programmes encapsulated in the 5th Generation IDP 2022 – 2027. The table below on the gender matrix will be revised during the 3rd Review of the 5th Generation IDP 2022 – 2027 to allow directorates the opportunity to shift to a level of implementing projects, programmes, and policies that take into account the principles of gender mainstreaming as stipulated below:

- ♣ Gender-sensitive language;
- ♣ Gender-specific data collection and analysis;
- ♣ Equal access to and utilisation of services;
- ♣ Women and men are equally involved in decision-making; and
- ♣ Equal treatment is integrated into steering processes.

The benefits of incorporating gender outcomes into the IDP will be:

- ♣ Positive impact on individuals, organisations, and at a societal level;
- ♣ Acceleration of implementation of Sustainable Development Goals (SDGs);
- ♣ Higher rate of growth and development;
- ♣ Improved resource management;
- ♣ Improved productivity; and
- ♣ By examining the overall situation of women and men across municipalities, a stronger analysis could provide a basis for identifying their specific needs and assessing whether certain groups of women and men could be adversely affected by development programmes and projects.

6.9.1 Gender Interventions

In terms of integrated planning and streamlining governance processes, the Department: Community Development and the Provincial Department: Social Development signed an MOU to collectively focus on various programmes with gender as one of the focal points. This includes the implementation of empowering programmes for women, reaching out to single mothers, hosting the 16 Days of Activism / Gender-Based Violence, and establishing a Gender-Based Violence Forum.

The implementation of gender-specific programmes is depicted in the table below:

**Table 36: Gender-Based Interventions**

Key Activity / Project / Programme / Initiative (measurable action)	Description of Unit of Measurement	Performance Comment
Establishment of the Greater Stellenbosch GBV Forum	Number of Greater Stellenbosch GBV Forums established by 30 June 2024	The IDP deliverable was omitted from the DSD MOU. However, DSD is to establish a GBV Forum. This will be included in an addendum to the MOU.
Hosting of 16 days of activism event	Number of 16 days of activism events hosted by 30 November	The 16 days of activism event will be hosted each financial year for the period 2022 – 2027. This programme is linked to the Mayoral Outcome, to create safer environments for communities. Implementation and monitoring of the programme will be on a departmental level.

6.9.2 Gender Disaggregated Matrix¹

Disaggregating information by gender, count males and females separately when gathering information on projects and programmes. Gender-disaggregated data is important because it will assist the municipality to see whether an initiative is successful at targeting and benefiting women and men. The indicators specify that all data about target groups and beneficiaries will be gender disaggregated.

Table 37: Gender Disaggregated Matrix

Directorate	Department	Indicator Description	5-Year Target 2022 – 2027		Target 2022/23		Target 2023/24		Target 2024/25		Target 2025/26		Target 2026/27

Community and Protection Services	Community Development	5.7	Number of participants in accredited training programmes, disaggregated by gender	99	93	19	13	20	20	20	20	20	20	20	20
Community and Protection Services	Community Development	5.8	Number of participants in programmes for vulnerable groups (Youth, Elderly and Disability)	1287	3061	807	2581	120	120	120	120	120	120	120	120

Note: All residents, regardless of gender, benefit from the installation of ablution facilities and water points in an informal settlement. The facilities are gender-neutral and hence 100% beneficial to all genders.

CHAPTER 7:

Sector Plans and Implementation

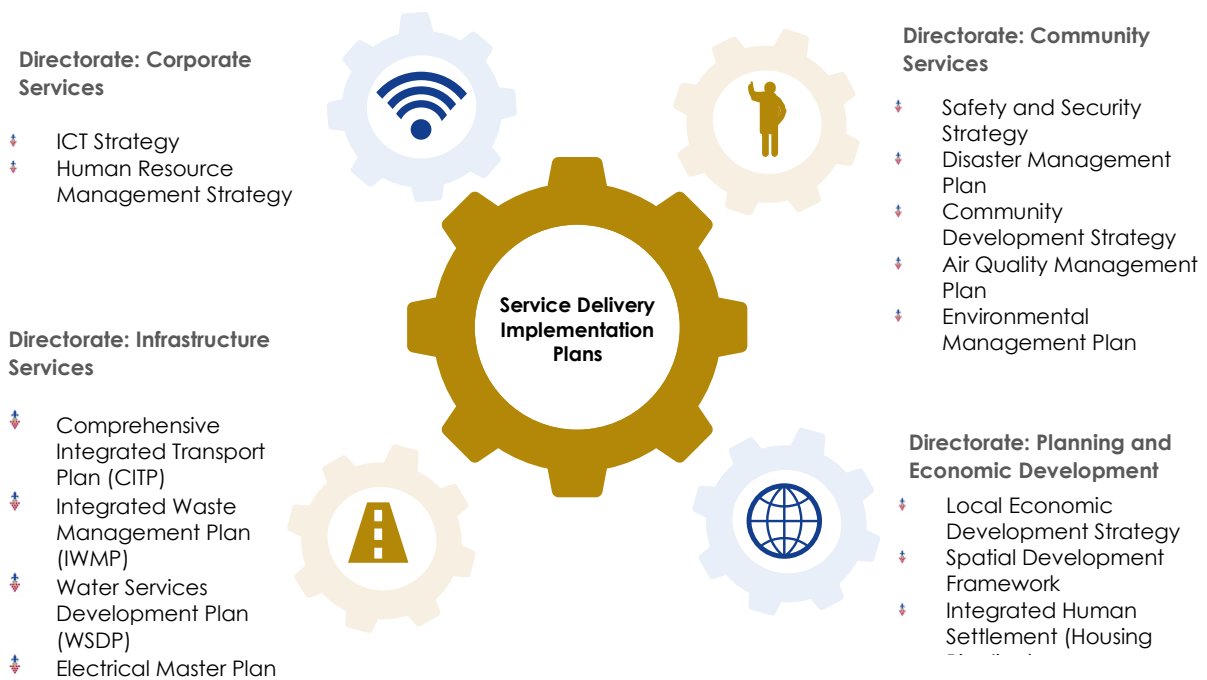

7.1 Introduction

The municipality has several medium- and longer-term sector plans that direct the implementation of the different functional areas. These plans form an integral part of the Integrated Development Plan (IDP).

Although the time periods for sector plans and the IDP differ (e.g., the mSDF has a 20-year horizon, the IDP has a 5-year horizon, and sector plans can be revised annually), the IDP and sector plans inform each other mutually. Like the IDP, sector plans are subject to periodic review. Alignment between sector plans and the IDP allows for more effective budgeting integration.

Other service delivery implementation processes include:

Figure 30: Service Delivery Implementation Plans

7.2 The relationship between the Sector Plans and Strategies

Sector plans need to support and reinforce each other to have meaning and assist in the sustainable development of the municipal area. The table below illustrates how different key sector plans inform and direct each other.

Table 38: The relationship between sector plans

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
Municipal Spatial Development Framework (mSDF)		<ul style="list-style-type: none"> Identifies areas for the satisfaction of human settlement needs Designates areas for developmental needs. Indicates areas desirable for a specific nature and form of urban development. Indicates areas desirable for conservation. Spatially, it reflects the distribution of community facilities. Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). Designates housing priority / restructuring areas. Integrates settlement patterns with infrastructure plans. 	<ul style="list-style-type: none"> Identifies areas for the satisfaction of human settlement needs. Indicates areas desirable for conservation. Spatially, it reflects the distribution of community facilities. Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). Designates housing priority / restructuring areas. Indicates areas desirable for densification / specific land use / integrated networks. Spatially, it reflects the Council's approved nature and form of urban development. 	<ul style="list-style-type: none"> Identifies municipal growth direction Identifies areas to be protected from development (e.g. heritage, agriculture and natural) Identifies priority development areas Identifies infrastructure priority areas

Identifies interventions required to support growth / infill. Provides for services not provided by the municipality, e.g., SANRAL, Provincial Roads, PRASA, and Transnet. 	

7.3 Sector Plans and Implementation Strategies

7.3.1 Air Quality Management Plan

Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) has been approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018.

7.3.1.1 Vision, Mission, and Goals

Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is co-operatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.

The goals to achieve the mission of the AQMP are listed below and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The three goals for the Stellenbosch Municipality AQMP are:

- ‡ **Goal 1:** Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory framework and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'Ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'Effective air quality management;
- ‡ **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDM AQMP goal of 'Effective air quality management through an 'Emission reduction strategy; and
- ‡ **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management.
- ‡ **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such an impact.

7.3.1.2 Time frames

The timeframes defined for the Implementation of the AQMP are:

Figure 31: AQMP Time frames

The following immediate items were included in the AQMP:

Table 39: Items in AQMP

Objective	Activity	Responsibility
Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law.	Air Quality Officer, Council
Emissions from waste burning are reduced.	Enforcement of the by-law.	Air Quality Officer
An Air Quality Management System exists in Stellenbosch Municipality, including an emission inventory, ambient air quality monitoring, and reporting.	Prepare an annual report on progress with AQMP implementation and the state of air quality, including emissions, ambient data, and complaints.	Air Quality Officer
Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g. EIA, SDF, SEMF).	Air Quality Officer
Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

7.3.2 Environmental Management Plan

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned.

To this effect, Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF), approved by the Council as a sector plan for the Municipal Spatial Development Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (IAP Management Plan), prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), completed during the 2017/18 financial year. This document has been reviewed and adopted by the Council in 2022 and the Department of Forestry, Fisheries, and the Environment (DFFE). Stellenbosch Municipality reports annually to DFFE on the implementation of its IAP Management Plan.

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park (a nature reserve), and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- ⚡ Mont Rochelle Nature Reserve: approved by the Council in 2022 and will be reviewed in 2026;
- ⚡ Papegaaiberg Nature Reserve: An approved EMP is in place and is currently up for a 5-year review;
- ⚡ Jan Marais Nature Reserve: Final draft EMP prepared;
- ⚡ Paradyskloof Nature Area: approved by the Council in 2019 and will be reviewed in 2024; and
- ⚡ Ida's Valley / Botmaskop Nature Area: Approved by Council in 2023, to be reviewed in 2027.

7.3.2.1 Implementation Plan: Environmental Management Plan

7.3.3 Integrated Human Settlement

7.3.3.1 Overview

An Integrated Human Settlement Plan (IHSP) is the road map for the provision of all forms of housing within a municipal area. This plan is closely linked to the municipal IDP and the Municipal SDF.

The aim of the Integrated Human Settlements Plan (IHSP) is therefore to:

- ✦ To outline the municipality's implementation plan for providing for the housing needs of its steadily growing and increasing population.
- ✦ To enable the municipality to prepare funding applications for submission to the Provincial Department of Infrastructure (branch Human Settlements) (PDol) that are consistent with funding conditions and included in the municipal IDP and Housing Pipeline as per Provincial Department of Infrastructure guidelines is a requirement; and
- ✦ To inform the municipal Housing Pipeline spanning over ten years, reflected in five-year periods, the funding required in the Provincial Department of Infrastructure's Business Plan.

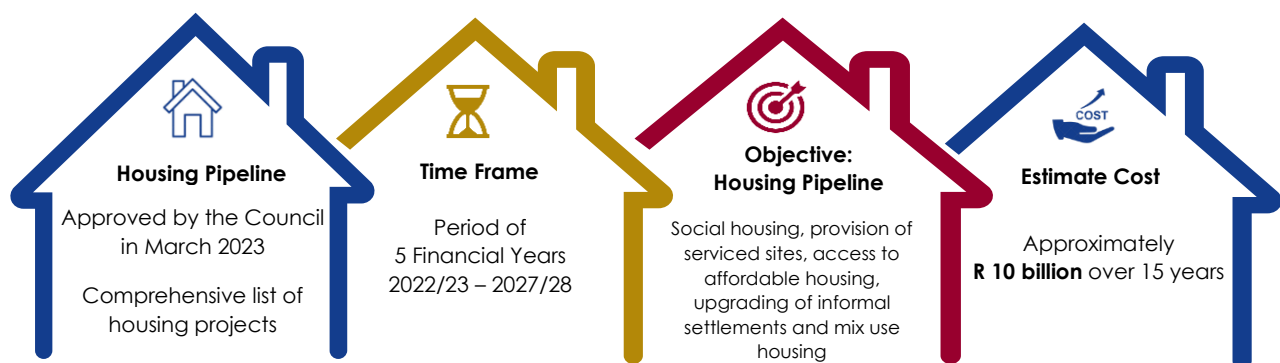

The IHSP will therefore not only comply with the requirements of the National Housing Act, whereby the municipality is obliged to facilitate the delivery of housing opportunities as part of their municipal function but will also develop a credible Housing Pipeline and operational models for human settlement development within the WC024.

7.3.3.2 Housing Pipeline

The PDol requires that every municipality must have a Housing Pipeline. The Housing Pipeline is premised on a **five-year horizon** and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each municipality's Housing Pipeline is an integral component of the Provincial Department of Human Settlements' Business Plan.

It is required that the Housing Pipeline must be reviewed annually. The latest review of the Housing Pipeline was approved by the Council in March 2023. This revision includes the following:

Figure 32: Housing Pipeline Time Frame, Objective and Estimate Cost

The objective of the Housing Pipeline is to place more emphasis on the following housing types or programmes:

- ✦ Social housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in November 2016);
- ✦ Provision of serviced sites;
- ✦ Access to affordable housing (GAP housing);
- ✦ Upgrading of Informal settlements; and

- ✦ Mixed-use housing (which includes formalised homeownership especially employer housing).

The estimated cost of this programme will be approximately **R10 billion** over **15 years**.

- ✦ Upgrading of informal settlements, (La Rochelle, Klappmuts, Langrug, and Franschhoek);
- ✦ Access to basic services (ABS);
- ✦ Jamestown, Farm 527 (phases 2, 3, and 4);
- ✦ Upgrading of Zone O, Kayamandi;
- ✦ Enumeration of people on farms and backyarders;
- ✦ Rectification of Cloetesville subsidy houses at The Steps and Orlean Lounge;
- ✦ Erf 7001, Cloetesville (known as “Soek-mekaar”);
- ✦ Upgrade of the Kayamandi CBD; and
- ✦ Northern Extension.

7.3.3.3 Upgrading of Informal Settlements

The municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- ✦ In-situ upgrading of informal settlements;
- ✦ Upgrade informal settlements through the provision of basic services;
- ✦ Develop emergency housing sites geared to accommodate evictees;
- ✦ Enumerate / undertake demographic surveys of identified informal settlements;
- ✦ Facilitate tenure security in informal settlements;
- ✦ Assist in short-term job creation through linkages with the Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- ✦ Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- ✦ Manage the provision of services and development programmes to informal settlements.

7.3.3.4 Informal backyard dwellings

The municipality, through the Housing Pipeline is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database, and hopefully, this will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious, and the chance of actually obtaining a formal house is very slim. Therefore, the Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes, (especially Social Housing (affordable rental)).

7.3.3.5 Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017 by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the municipality, and the latter culminated in a Council decision instructing the administration to attract social housing institutions (SHIs) and / or other development agencies (ODAs) to effect the municipality's social housing programme.

This programme aims to ensure improved quality of life for communities through a rental housing programme. This process of integration speaks to the importance of:

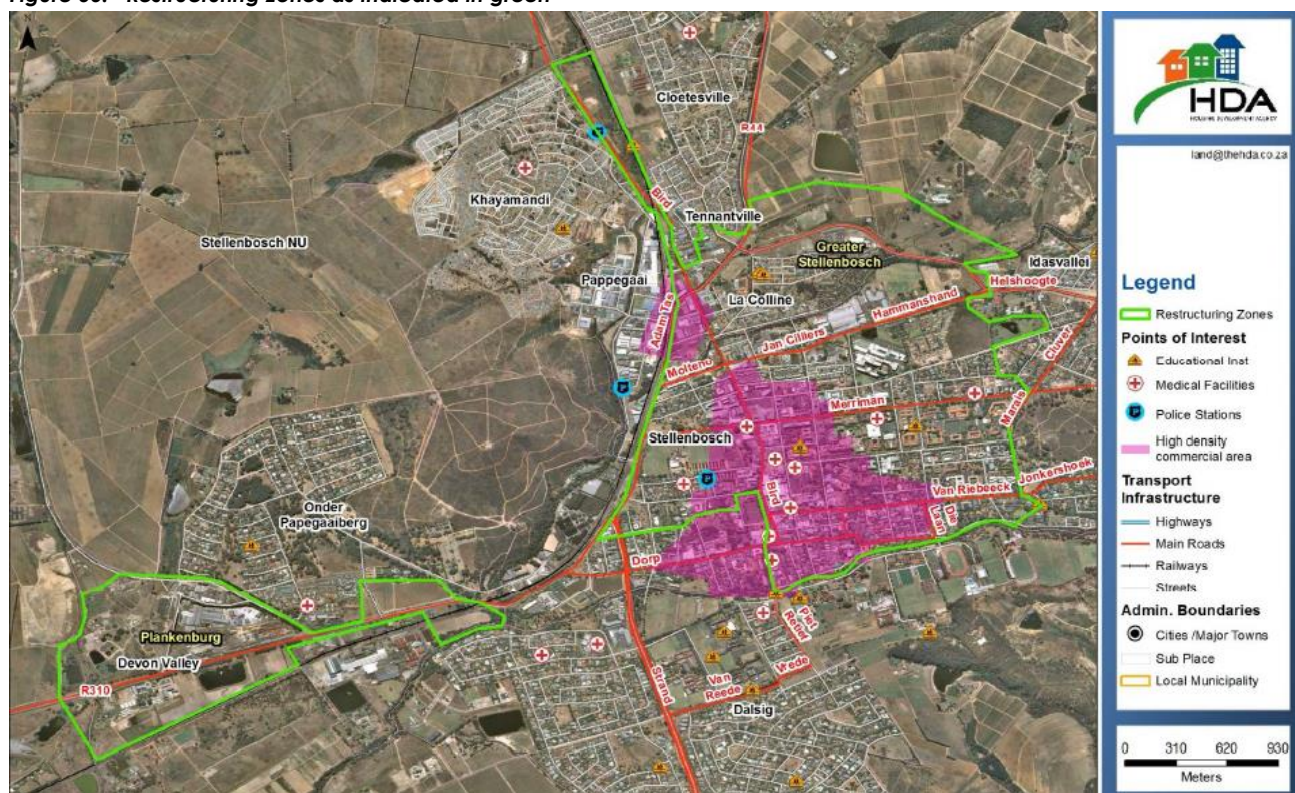

- ✦ Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium-density housing stock, etc.;
- ✦ Social sustainability: social integration between various income groups, access to educational, recreational, and health facilities, etc.; and

Ecological sustainability: conservation of scarce resources.

The figure below depicts areas that have been declared **restructuring zones** for Stellenbosch Municipality.

Figure 33: Restructuring Zones as indicated in green

7.3.3.6 The Western Cape Housing Delivery Model

In 2020, the National Department of Human Settlements (NDoHS) issued a letter to the Provincial Department of Human Settlements (PDoHS) regarding the new directives for human settlement projects. The letter stated that the delivery of top structures was fiscally unsustainable, and therefore there is a need to downscale the delivery of top structures to prioritise the delivery of enhanced service sites. The **four newly prioritised categories** for the top structure of the letter were:

- The elderly;
- Military veterans;
- Persons with disabilities; and
- Child-headed households.

Considering the correspondence received from the NDoHS, the PDoHS added it to the above-existing **priority categories**:

- Backyard residents; and
- Person, longest on the waiting list.

After consultation with the National Department, the PDoHS confirmed that all new project applications received from municipalities, which include top structures, must adhere to the above criteria. All the supporting applicable beneficiary approval information must be attached to the top structure project application.

7.3.3.7 Priority Human Settlements and Housing Development Areas (PDSHDA)

In 2020, the Minister of Human Settlements Gazetted the declaration of Priority Human Settlements and Housing Development Areas (PHSHDAs). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households, and overcome apartheid spatial patterns by fostering integrated urban forms.

The PHSHDAs are underpinned by the principles of the National Development Plan (NDP) and the allied objectives of the National Spatial Development Framework (NSDF) and the Integrated Urban Development Framework (IUDF), which include:

- ✦ **Spatial Justice:** reversing segregated development and creating poverty pockets in the peripheral areas, integrating previously excluded groups, and resuscitating declining areas;
- ✦ **Spatial efficiency:** consolidating spaces and promoting densification and efficient communication patterns;
- ✦ **Access to connectivity, economic and social infrastructure:** ensure the attainment of basic services, job opportunities, transport networks, education, recreation, health, and welfare to facilitate and catalyse increased investment and productivity;
- ✦ **Access to adequate accommodation:** the emphasis is on the provision of affordable and fiscally sustainable shelter in areas of high need; and
- ✦ **Provision of quality housing options:** ensure that different housing typologies are delivered to attract different market segments of appropriate quality and innovation.

The emphasis is placed on synchronising national housing programmes in these priority human settlements and housing development areas, namely:

- ✦ **Integrated Residential Development Programme** provides a tool to plan, fund, and develop integrated settlements that include all the necessary land uses, housing types, and price categories to create integrated communities. It provides for subsidised as well as finance-linked housing, social and rental housing, and commercial, institutional, and other land use to be developed.
- ✦ **Social Housing Programme in Restructuring Zones** provides for social housing located in specific, defined localities (mostly urban), which have been identified as areas of opportunity (largely economic) where the poor have limited or inadequate access to accommodation and where the provision of social housing can contribute to redressing structural, economic, social, and spatial dysfunctions. It is also aimed at improving and contributing to the overall functioning of the housing sector, and particularly the rental sub-component thereof, especially insofar as social housing can contribute to widening the range of housing options available to the poor.
- ✦ **Informal Settlements Upgrading Programme** provides for the structured in situ upgrading of informal settlements to address the social and economic exclusion of communities. It remains evident that informal settlements provide new migrants and the urban poor with an affordable point of access to towns and cities, although they are also associated with high degrees of physical and social vulnerability.
- ✦ **Finance Linked Individual Subsidy Programme** provides for the creation of an inclusive and vibrant residential property market that can provide state assistance to households who are unable to independently access housing credit to become upwardly mobile and progress up the housing ladder.
- ✦ **The Special Presidential Package (SPP) Programme on Revitalisation of Distressed Mining Communities** by developing and implementing human settlement spatial transformation plans for identified mining areas.

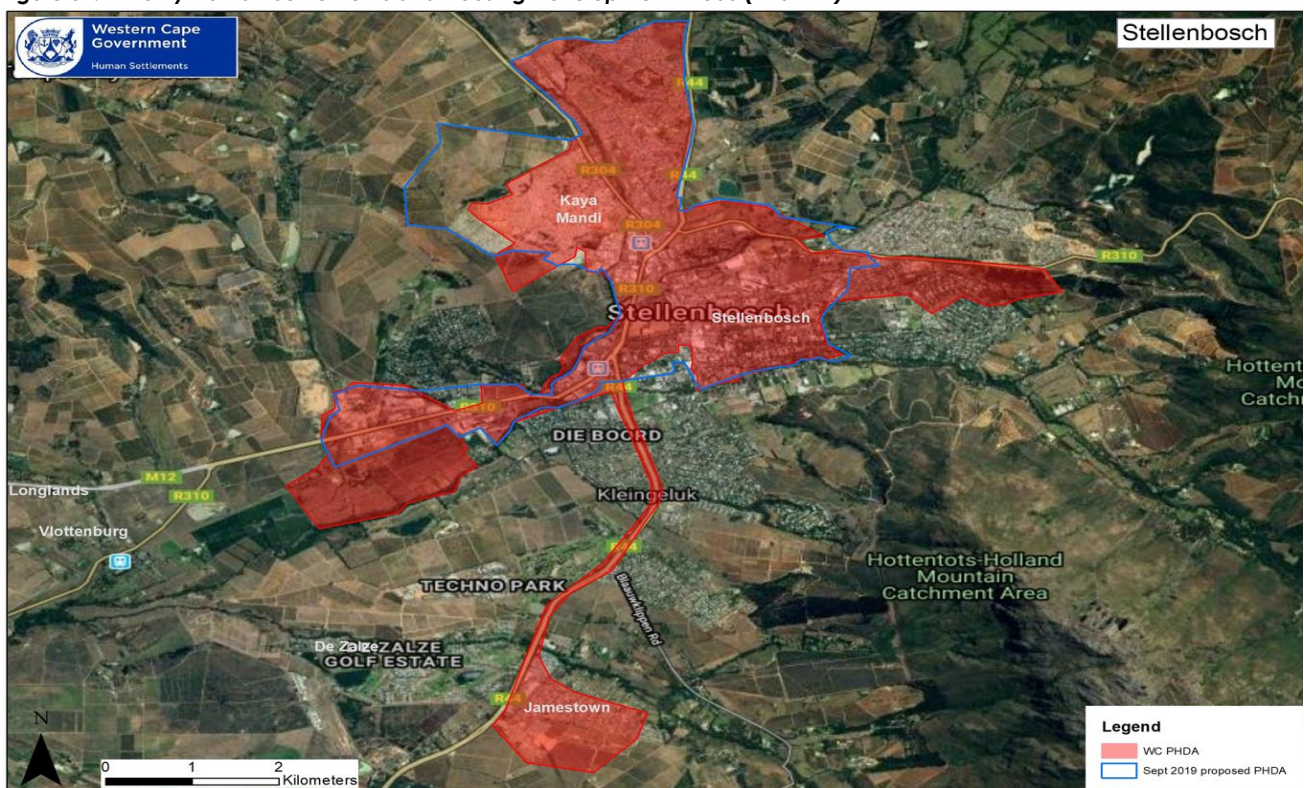

- ✦ **Enhanced People's Housing Process** provides for a process in which beneficiaries actively participate in decision-making over the housing process and housing product and make a contribution in such a way that:
 - Beneficiaries are empowered individually and collectively;
 - Various partnerships are created;
 - Social capital is retained and expanded upon, and 4) housing is valued as an asset far beyond its monetary value; and
 - Housing is valued as an asset far beyond its monetary value.

The current status of the PSHDA for Stellenbosch Municipality, namely:

- ✦ The "Stellenbosch Urban Core Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazetted on 15 May 2020 (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi, and Central Stellenbosch;
- ✦ To date, the Housing Development Agency (HDA), with assistance from the Provincial Department of Human Settlements (PDoHS), has undertaken a Status Quo Analysis in preparation for the drafting of the Stellenbosch PSHDA Development Plan. The Status Quo Analysis has been completed and will inform the drafting of the Development Plan going forward; and
- ✦ The PDoHS, Stellenbosch Municipality, and the HDA will proceed with the drafting of the Stellenbosch PSHDA Development Plan shortly.

The figure below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

Figure 34: Priority Human Settlements and Housing Development Areas (PDSHDA)

The approved Housing Pipeline is available on request at the Directorate: Planning and Economic Development, on 021 808 8462 or via email at: lester.vanstavel@stellenbosch.gov.za.

7.3.4 Comprehensive Integrated Transport Plan

The National Land Transport Act, 2009 (Act No. 5 of 2009) (NLTA) requires “Type 1” planning authorities (the country’s major cities and towns (including Stellenbosch Municipality)) to prepare a Comprehensive Integrated Transport Plan (CITP). Generally, a CITP is considered a mechanism by which planning authorities can plan for, develop, manage, integrate, and provide for all modes of transport in their areas of jurisdiction.

The vision for the municipality’s 2023–2028 CITP is as follows: Stellenbosch Municipality has an integrated, effective, and sustainable transport system that unlocks economic opportunities and is accessible, safe, reliable, and affordable to all communities serviced by the municipality.

Pursuant to achieving the vision and addressing user needs, issues, and gaps, the objectives for the transport system for Stellenbosch Municipality over the next 5 years and beyond are as follows (Chapters 2.3 and 2.4 of the CITP):

Figure 35: Objectives for the Stellenbosch Municipality Comprehensive Integrated Transport Plan (CITP)

7.3.5 Integrated Waste Management Plan (IWMP)

This third-generation IWMP was developed in 2020. The development of the IWMP is necessary, as it is an integral tool to identify current needs and act as a guide towards sustainable waste management. With regular updates to this document, changing needs and progress in the waste management sector can be tracked, and strategies can be adjusted as needed.

Figure 36: Integrated Waste Management (IWMP) Purpose, Scope, and Status Quo

7.3.5.1 Implementation Plan: Integrated Waste Management Plan (IWMP)

Based on the gaps and needs identified, the aligned goals of the IWMP, and planned projects by the municipality, the plan contains the objectives, timeline, and resources required for the implementation of the IWMP. The gaps and needs identified are linked to the main goals contained in the Western Cape Provincial IWMP.

7.3.6 Electrical Master Plan

With the approval of the SDF in November 2019, which was almost within the time that the Master Plan was due for an update, the review was not done. The complete update was planned for September 2020, but due to the COVID-19 pandemic, the updating of the Masterplan was delayed.

In October 2020, the Minister of DME announced that municipalities would be allowed to purchase electricity from other sources and also generate their own electricity in the future. This drastically changed the whole concept of the Stellenbosch Municipality's Masterplan. Where the municipality previously had one supplier of electricity, it would have major intake points from this one supplier. As networks flow from these points to consumers, the size of the cables will depend on the demands of these consumers for electricity. Because the municipality may now receive electricity from multiple sources, the municipal network design will no longer be compatible with this new policy. The entire Master Plan must now change, as cables in certain areas may now be too big and in a few places too small. The whole system of intake points must first be established, and once that is known, the network itself must be redesigned with the knowledge of existing and future intake points and methods of energy acquisition.

To understand what the energy sources for electricity would look like, an **Energy Masterplan** has been launched and conducted by the Council for Scientific and Industrial Research (CSIR), which forms the basis for how electricity is likely to be generated or purchased. The Energy Master Plan was finalised in December 2022 and the **Electricity Masterplan** by June 2023.

The plans aim to provide the Stellenbosch Municipality with a clear view and a long-term plan for the development of the electrical infrastructure required to support the envisaged demand growth in Stellenbosch and surrounding areas. The municipality also evaluated the long-term viability of existing infrastructure and the expansion and refurbishment requirements thereof, where new infrastructure should be located, and which components, either existing or new, will be required.

Apart from spatial changes, the **Electrical Masterplan** is to contain the following main elements:

- Documented assessments of primary equipment at all 66/11 kV substations and 11 kV switching substations within the municipal area;
- Site-specific assessments to provide a systematic estimate of the life remaining in substation facilities and planning to extend the life of facilities to meet future needs;
- Development of a geographical load forecast based on regional demographic and historical load growth patterns, as informed by the SDF. (The anticipated long-term load forecast was directly used as input to the expansion plan.);
- Development of network strengthening and expansion options and technical evaluations to ensure that load and performance criteria are met over the short, medium, and term (2028);
- Preparation of cost estimates for the technically viable expansion and strengthening options; and
- The Electrical Master Plan is updated every five years and is used in medium-term project planning, prioritisation, and budgeting.

7.3.7 Water Services Development Plan

As a Water Services Authority (WSA), the Stellenbosch Municipality has a duty, in terms of sections 12 and 13 of the Water Services Act, 1997 (Act No. 108 of 1997), to prepare and maintain a Water Services Development Plan (WSDP). The municipality prepared a comprehensive WSDP in 2007, 2012, and 2019 that is valid for a period of five years. The revision and updating of the WSDP commenced in the 2022/23 financial year and will be completed in the 2023/24 financial year.

The Department of Water and Sanitation is responsible for looking after South Africa's water resources. Stellenbosch Municipality's Water Services sees itself as an extension of this caretaking. Water Services is responsible for acting in line with the Water Services Act and the implementation of municipal by-laws, policies, and procedures.

As part of the WSDP package, the municipality maintains:

- Water and Sewer Master Plans;
- Water Resources Study;
- Annual water audit;
- A Water Safety Plan;
- A drinking water quality sampling programme;
- Water and sewer pipe replacement prioritisation programme; and
- A Water Demand Management (WDM) Strategy.

The Water Master Plan, Sanitation Master Plan, Bulk Water Resources / Drought Intervention Plan, Asset Register, and Pipe Replacement Prioritised Programme were updated in 2019.

A new master plan has commenced and will be completed in the 2023/24 financial year. Since water management has drastically changed with the advent of drought, the use of greywater, and the increasing cleansing of rivers, it needed to be redone. It will also align the Water Master Plan with the latest changes to the SDF.

The Water Conservation and Water Demand Management (WC and WDM) strategy is a comprehensive study that includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC and WDM and will ensure ongoing planning, management, monitoring, and an enabling environment. The WC and WDM initiatives include a water pipe replacement programme, indigent domestic leak repair and meter replacement programme, Stellenbosch water meter audit, and Stellenbosch in-house water services operation and maintenance.

Poverty reduction and improved water management are closely linked. Section 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

Access to basic water is defined as 25 liters of potable water per day supplied within 200 meters of a household.

Due to the severe drought experienced recently and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions that were lifted in recent years. The Western Cape has been fortunate in the last two years with above-average rainfall, and thus no water restrictions have needed to be implemented since the previous drought ended. No water restrictions are currently envisioned for 2024.

Stellenbosch Municipality supplies water to its consumers through the following water supply systems:

- Stellenbosch (Jonkershoek and Theewaterskloof Tunnel);
- Franschhoek;
- Wemmershoek (treated water imported from the City of Cape Town);

- ⚡ Blackheath (treated water imported from the City of Cape Town);
- ⚡ Faure (treated water imported from the City of Cape Town); and
- ⚡ Other sources (boreholes).

The total population supplied with water in the Stellenbosch Municipal Area amounts to approximately 186 094 residents. Water is also supplied to a fairly extensive industrial area.

Emergency water is supplied to farm communities that do not get water from the farms that they stay on.

Stellenbosch Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek. The potable water supply from these works amounts to 20.0 Ml/d on average, and a further 9.6 Ml/d was obtained from the City of Cape Town during the 2022/23 financial year, ensuring a supply of approximately 29.6 Ml/d to the municipal area.

Areas supplied by the Wemmershoek Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier, and Vloffenburg. Areas supplied by the Faure Water Treatment Works are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact on water quality and quantity needs to be monitored and considered by Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 48 reservoirs / holding tanks, and water towers, 36 water pump stations, 44 pressure-reducing valve installations; 734 kilometers of pipeline; and 84 water supply zones. The network is fully controlled and operated by a telemetry system.

The bulk water input into the water network for 2022/2023 was 10 801 183 kl, with an annual average daily demand of 29.592 kl/day. About 36% of the water supplied is purified from its water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the City of Cape Town and the Paradyskloof Water Treatment Plant, where raw water supplied by the Department of Water and Sanitation is purified. Potable water supplied by the City of Cape Town is analysed every month by the City of Cape Town.

Figure 37: WCWSS Storage Record (2008 – present)

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities, and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. Maintenance of equipment is performed in-house and by specialist contractors.

7.3.7.1 Basic Services and Level of Services

- ▼ There is no backlog of basic water and sanitation services in the urban areas of the municipality. A small number of households on farms are still without basic water and sanitation services.
- ▼ The clinics, hospitals, and schools in the municipal area have adequate and safe water supply and sanitation services.
- ▼ All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.
- ▼ All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.
- ▼ A sustainable type of water and sanitation facility needs to be provided to the households on those farms with current services below the minimum service level standard. Stellenbosch Municipality is committed to supporting the private landowners as far as possible concerning addressing the current service backlog on farms, as identified through the Cape Winelands Rural Survey of Service Levels.
- ▼ From a water services perspective, the most significant challenges are the augmentation of the existing water sources, the replacement and upgrading of old infrastructure to accommodate development, the provision of sustainable basic services to informal settlements, and ensuring the provision of basic services to rural communities located on private farms.

7.3.7.2 Maintenance of Infrastructure

Both water infrastructure and sanitation infrastructure require serious remedial investment. About a third of the water supply infrastructure is in poor or very poor condition, and the condition backlog is more than R300 million. The bulk of the backlog is made up of the old Asbestos Cement (AC) water reticulation pipeline assets. The update to the Pipe Replacement Prioritisation study will indicate what percentage of sanitation infrastructure is in poor or very poor condition and what the condition backlog is. The bulk of the backlog consists of the old Asbestos Cement (AC) and Pic Fibre sewer reticulation assets in the Stellenbosch area.

Wastewater Treatment Works

An Infrastructure Asset Register is in place for all water and sanitation infrastructure. An Infrastructure Asset Management Plan must be developed and implemented, based on the principle of preventative maintenance to ensure that damage to assets is prevented before it occurs. Assets must be rehabilitated and / or replaced before the end of their economic life and the necessary capital funds must be allocated for this purpose. Maintenance activities have been increasingly focused on reactive maintenance as opposed to preventative maintenance.

7.3.7.3 Implementation Plan: Water Services Development Plan

7.3.8 Water Demand Management (WDM)

Stellenbosch Municipality is actively implementing their adopted WDM Strategy to reduce the current percentage of non-revenue water and to keep future water demand as low as possible. The municipality has a block-step tariff system that discourages wasteful or inefficient use of water. The restriction of water use by indigent households and non-payers was prioritised with the implementation of the Leak Repair Programme, which includes repairs to private leaks and the installation of water demand management vices. These devices restrict users to 400 litres of water per day. More than 1 753 devices have been installed, saving over 493 084 litres of water per day.

7.3.8.1 Climate Change

In terms of adapting to climate change, water systems will need to be more robust, and newer or alternative sources of supply may need to be found. Increased skills will be required from water managers, and long-term water projections are required. Although an overall decrease in rainfall is not generally forecast, increased variability in the climate and frequency of extreme events, as well as increased temperature and wind, could have an impact on water sources, particularly surface waters. It is, therefore, advisable for the municipality to maintain a conservative approach to the management of water sources, including the following actions:

- Establish assurance of the supply levels of all water sources;
- Increase assurance of the supply of water resources by ensuring that there is at least 10% additional capacity (headroom) when considering the maximum 24-hour demand in the peak month of the year;
- Do not undertake new developments unless a proper investigation of the implications for water sources and sustainability in the long term has been undertaken.
- Vigorous implementation of WDM measures, especially in terms of increased water efficiency, frequent monitoring of the water supply system from the sources to the consumers, and regular and adequate system maintenance and repairs; and
- The IRIS monitoring system, including the Blue Drop Awards system, is active in the municipality. The municipality did not receive a Blue Drop Award for the recent Blue Drop assessment period.

7.3.8.2 Level of Service

In the rural area, the responsibility lies with the landowner to manage stormwater over his land. In the urban area, the responsibility lies with the local municipality. The objective in stormwater management is to be able to accommodate a 1:5-year storm in the residential areas and 1: 2 in the urban areas as contemplated in the Guideline for Human Settlements Planning and Design. The Water Act, 1998 (Act No. 36 of 1998) determines that flood lines should be indicated on development plans.

Flood line determination has been done in the past, but this information is outdated. The municipality is currently busy compiling a hydrological model to determine the latest flood lines on the rivers in Stellenbosch and Franschoek for the urban area. It is a development condition for all future developments to do a flood-line determination.

7.3.8.3 Risk Mitigation – Drought Response Plan

Water is probably the most fundamental and indispensable of all natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Due to the threat of re-occurring droughts and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality implemented water restrictions to lower water consumption.

The success of this initiative is largely dependent on the consumer's cooperation in taking ownership of the new smart meter. The use of the water demand management device (smart meter) has been implemented nationally with huge success and a reduction in water losses.

The project is currently underway and has received a positive reaction from the community.

An update to the Water Services By-Laws will be undertaken in the 2024/25 financial year to be approved by the Council and promulgated. This will contribute to increasing the management and control of water and sanitation-related aspects within the municipality.

The following planning documents are continuously updated to include the latest planning: the Water Master Plan, Water Services Audit Report, and the Pipe Replacement Study and Model, and all projects and daily operations are done in line with the aforementioned studies and guidelines.

7.3.8.4 Backlogs in Water and Sanitation Services

A municipality as a Water Services Authority (WSA) has a duty to all its customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical, and sustainable access to water and sanitation services to promote sustainable livelihoods and economic development. To ensure this, it is important that the backlogs within the water and sanitation infrastructure be addressed. Backlogs could be defined in three broad categories:

- ✦ Backlogs regarding access to basic water and sanitation services. (Basic water and sanitation services in terms of national norms and standards);
- ✦ Conditional backlogs (lack of maintenance); and
- ✦ Capacity backlogs (increase in consumers).

7.3.8.5 Backlogs – Access to Basic Levels of Services

All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.

All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.

A sustainable type of water and sanitation facility needs to be provided to households with current service levels below RDP standards. Stellenbosch Municipality is committed to supporting private landowners as far as possible in addressing the current service backlog on farms.

Figure 38: Water supply and accommodating growth (Total for WCO24)

Detailed water balance and future water demand projection models were developed as part of the WSDP process to adequately plan for the augmentation of the existing water sources. Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Based on the municipality's IWA Water Balance Sheet for the 2022/23 financial year, the municipality recorded 28.2% for "non-revenue" water, which is a decrease of 1.5 % from the previous financial year, and 13.3% for real network losses. The no-revenue water for the 2022/23 financial year is 28.2%, which is above the target set of 25%. The real physical network losses are 13.3%, which is below the best practice value of 15%.

Figure 39: Water Losses from July 2022 to June 2023

7.3.8.6 Borehole Drilling in WCO24

Part of the drought mitigation plan was to manufacture and install water purification plants in the Stellenbosch Municipality water networks at strategic positions. The containerised water purification plants treat water up to SANS 241 standards before it is included in the water supply networks. This water is, however, more expensive compared to our Ida's Valley WTP supply and is not used unless necessary.

Figure 40: Stellenbosch Bulk Water Consumption

7.3.9 Long-Term Water Conservation and Water Demand Management Strategy

A comprehensive Water Conservation and Water Demand Management (WC and WDM) Strategy which includes a 10-year financial plan, has been developed. The strategy has two goals. The municipality will:

- Prioritise the implementation of the WC and WDM Strategy; and
- Ensure ongoing planning, management, monitoring, and enabling environment.

This long-term WC and WDM Strategy was approved by the Council on Tuesday, 25 February 2014 and has since been implemented. Water Conservation and Water Demand Management (WC/WDM) are more cost-effective and have a lower environmental impact when compared with developing new sources of supply, provided there is scope for implementing WC / WDM measures. The payback period for the implementation of WC / WDM in this municipality is 3 years, which is considerably less than the 20 years that one would expect with major infrastructure projects. The updating of the long-term plan is underway.

The results of the successful implementation of the strategy are evident, with declining input volumes and lower water losses recorded since implementation started. The active Leak Repair Programme, the installation of the Water Demand Management Device, the active replacement of faulty water meters and the replacement of asbestos cement pipelines all contributed to below-average Real Network Losses and non-revenue water losses. It is, therefore, an effective way of delaying the development of infrastructure for new water resources and reducing the need to upgrade or construct new bulk water infrastructure.

WC / WDM involves measures which:

Figure 41: WC / WDM Measures

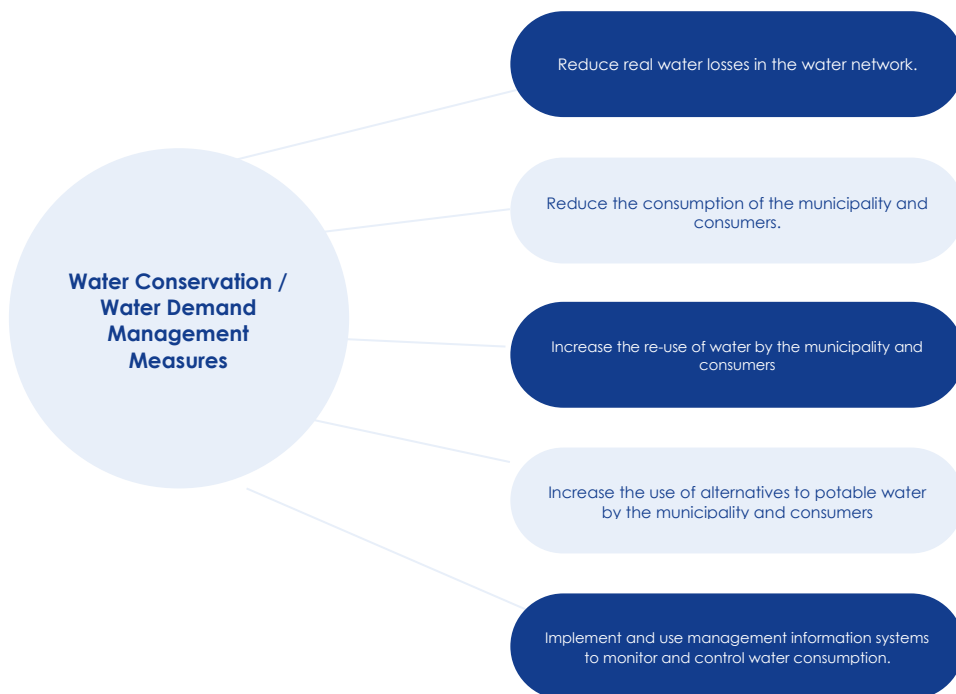

Figure 42: Stellenbosch Bulk Water input volumes

Figure 43: Stellenbosch Bulk Water Sales

The unrestricted growth in water demand versus the growth in water demand assuming WC and WDM are implemented as shown in the figure below.

Figure 44: Unrestricted versus WDM growth in demand

Note that each town in the municipality has water supplies independent of each other. When implementing WC / WDM in the municipality, it is critical to implement it in those towns where the existing supply will become inadequate for the demand as soon as possible. This will enable the municipality to delay the implementation of expensive infrastructure. The estimated budget required is about R80 million over 10 years.

The municipality embarked on a Drought Intervention Programme that accelerated and expanded some of the WC / WDM plans and programmes.

Figure 45: Updated growth in demand 20-year planning horizon

7.3.10 Safety and Security Strategy

The purpose of the Safety and Security Strategy is thus to reduce crime and increase safety through an integrated, multi-pronged approach. The strategy is revised annually to ensure that it remains relevant to the real challenges of the day. To this end, the municipality partners with a range of stakeholders ranging from the Western Cape Government, the Cape Winelands District Municipality, SAPS, and Stellenbosch University, as well as various private, public, and community-based safety and security organisations and institutions.

The Stellenbosch Safety Partnership (SSP) serves as an operational platform for safety and security entities to plan and operationalise enforcement plans. It's very important to break down barriers between departments and private organisations that have similar goals. Without an integrated, multidisciplinary approach that includes everyone, no strategy will work. This method has been shown to work in reducing crime. The SSP is open to any registered entity that contributes towards safety and security initiatives in the Stellenbosch Municipality.

The Stellenbosch Municipality has and continues to invest in and support neighbourhood watches (NHWs) and mobilise communities to support them. This includes direct assistance to NHWs to formalise their registration with the Department of Police Oversight and Community Safety (DPOCS) so that they can qualify for financial support and participate in sanctioned safety projects. The NHWs form a critical part of the community-based safety focus of the municipality in that they are located in the communities and understand the particular challenges faced by those communities. In addition to the support received from DOCS, the municipality continues to provide training for under-resourced neighbourhood watches and provides them with radios for swift and effective communication with the municipal control room as and when required. To achieve this, the following role players have been identified as key stakeholders and partners for success:

- South African Police Services (SAPS);
- Department of Community Safety (DOCS);
- Cape Winelands District Municipality (CWDM);
- Neighbourhood watches and farm watches;
- Community Policing Forums (CPFs);
- Private and corporate businesses;
- Private security companies;
- Winelands Safety Initiative (WSI);
- Department of Correctional Services (DCS);
- Department of Justice (DoJ);
- University of Stellenbosch (Campus Control); and
- Stellenbosch Municipality
 - Law Enforcement
 - Traffic Services
 - Fire and Rescue
 - Disaster Management.

Building collaborative relationships with our community stakeholders and highlighting the Council's commitment to maintaining strong partnerships with primary law enforcement agencies remains the foundation of ensuring safety throughout the Greater Stellenbosch.

The control room is fully functional and situated at the Stellenbosch Fire Department. The municipality still strives and will continue to, as part of the strategy, to provide a space where all safety and security stakeholders can jointly monitor and communicate with each other on safety and security matters. This includes the monitoring of municipal bylaw transgressions, criminal activity, emergency response in case of disasters, emergencies, and a range of other safety and security-related incidents.

One dedicated emergency number is available to residents within the municipal boundaries, which will mobilise all relevant units in response to alerts received on this number: **021 808 8999**. Additionally, the control room also monitors a dedicated WhatsApp number for general and safety complaints within the municipal boundaries of Stellenbosch. The WhatsApp number is **079 622 4722**.

All registered NHWs and security companies registered with the SSP have been and are in the process of being allocated space in the control centre.

Awareness initiatives have been and will continue to be launched as they contribute to making communities aware of crime prevention tips and other preventative tips, for example, fire safety and what to do in case of disasters. This will be a joint approach between role-players, supplemented based on crime patterns and situations experienced. Training will also be provided to enhance safety initiatives, for example, road safety (crossing of roads).

The Community Safety Forum (CSF) was approved by the Council on 30 March 2022. The CSF is a multi-stakeholder forum that will address matters of community safety and security in the WC024 area. The purpose of the CSF is to promote the development of communities in a safe environment and provide access to high-quality services at the local government level through multi-agency collaboration between the different spheres of government and communities. The CSF, as a multi-sectoral structure, would champion the coordination, integration, and implementation of crime and violence prevention and community safety initiatives. The CSF has three clusters, namely: Law Enforcement, Social Cohesion and Crime Prevention through Environmental Design.

Fire Services

The Stellenbosch Municipal Fire and Rescue section is dedicated to the provision of services that seek to safeguard the public against fire and other natural and man-made disasters and emergencies.

The role of the Fire and Rescue Services is to deal proactively and reactively with the following:

- ✦ The proactive provision of general fire safety guidance and assistance with respect to venues and their users;
- ✦ Protection and rescue of life and property from any threatening danger;
- ✦ Prevent the outbreak or spread of fire;
- ✦ Extinguish fire;
- ✦ Any other duties as stipulated in the Fire Brigade Services Act;
- ✦ Through the Department of Planning and Development and Building Department, consolidate initial structural damage assessments from other departments, conduct evaluations of structures, and support the efforts of property owners to address structural issues;
- ✦ Assist SAPS with inspections at licensed premises to combat illegal activities identified by crime intelligence;
- ✦ Determine slide (land) danger areas of informal settlements, oversee the direction, management, and cordoning off identified slopes, and stabilise;
- ✦ Activate the Disaster Management Unit in case of any life-threatening incident, for example, flooding, loss of residence due to fire, etc; and
- ✦ Conduct annual evacuation drills at designated buildings and premises.

Traffic Services

Stellenbosch Municipality has a legislative mandate to provide traffic services to the general public and its community and to ensure safe road usage in the municipal area. Traffic Services is committed to managing, controlling, and improving road safety in the municipal area by providing effective Traffic Administration and Traffic Law Enforcement services.

This will be achieved through the implementation of specific operational activities throughout the year, which focus on enforcement and education. The enforcement of public transport violations, speed violations, and sustained education at schools will be a specific focus for this year.

Another focus is also to improve the smart policing concept by optimally utilising technology for our officers, fine devices, and other policing techniques to provide effective and efficient services at our Motor Vehicle Registration and Licensing, Driver License Testing Centre, and our Vehicle Testing Centre.

The Traffic Management Plan contains the full spectrum of road safety programmes and projects across all functions, stakeholders, and users in WC024. The plan describes the various challenges to road safety and presents a range of action plans to address or mitigate these challenges.

Traffic Services is committed to:

- Ensure the road safety of all members of the community by providing quality traffic services in all its divisions (Traffic Administration, Traffic Law Enforcement, Licensing, Education and Accident Statistics);
- Reducing the accident rate, which will result in fewer fatalities and injuries;
- Increase the voluntary compliance of road users with respect to the rules, legislation, and regulations of the road;
- Improve management practises throughout all traffic services divisions; and
- Provide a safe environment by integrating best practices with internal and external agencies and role-players.

Traffic Services will focus on,

- Ensure the constant free flow of traffic;
- Enforcement of the National Road Traffic Act and the National Land Transport Act;
- To achieve a measurable improvement in road user behaviour, including the skill level of drivers, safer decision-making, and better regard for other road users;
- To reduce the incidence of traffic offences, including speeding, dangerous driving, drunk-driving, driving under the influence of a narcotic substance, dangerous overtaking, moving violations, etc;
- Parking enforcement / management;
- To ensure that un-roadworthy (including overloaded) vehicles are removed from the road;
- Point duty during the morning, midday, and evening peak at critical locations, during loadshedding, as well as school points;
- Special operations team to focus on driving under the influence of alcohol or drugs, illegal racing, and transportation of illegal substances;
- Road safety training and education are provided for crèches, nurseries, schools, primary / high schools, colleges, and universities, as well as for pedestrians, cyclists, farm workers, rehabilitation centres and youth groups. Training also includes learner's license programmes for youth and scholar patrol and level-crossing awareness;
- Events (road closures, escort duties);
- Public transport activities and checking of roadworthy status buses and minibuses;
- ANPR (automatic number-plate recognition) focusing on offenders with outstanding fines;
- Conducting driving and learner's license testing;
- Conducting driver's license conversions / renewals;
- Accepting and processing Professional Driving Permit (PrDP) applications;
- Conducting vehicle testing (all classes of vehicles); and
- Vehicle registration and licensing.

Law Enforcement

With the review of the Safety Strategy, the municipality has had to adapt to the changing environment of crime in its area and actively pursue closer working relationships with SAPS, private security, and neighbourhood watches active in the WC024 area to be able to make an impact. It is common knowledge that criminals become smarter and migrate from neighbourhood municipalities, which means that the municipality has to think smarter to always be one step ahead.

The municipality has completed all three phases of the action plan as identified during the previous review. This includes the installation of License Plate Recognition cameras (LPR) at all the main entrances and exits to Stellenbosch and Franschhoek towns. These LPR cameras are supplemented with additional LPR cameras within residential areas, which make it possible to track the direction of suspect vehicles linked to crimes picked up by these. The municipality continuously invests in CCTV to enhance safety. The municipality also has a CCTV Masterplan, which is a "living" document and is frequently updated based on needs identified concerning safety.

The use of neighbourhood watches to enhance public safety within the CBD's under the auspice of the "eyes and ears" project has assisted with crime prevention and is deemed to be a successful project.

The focus of Law Enforcement

- Effective monitoring and surveillance of CCTV cameras with reaction units to respond immediately;
- Establishment and implementation of the CBD Safety Project—a zero tolerance approach;
- Weekly operational planning with SAPS and safety partners;
- Amendment of the structure of Law Enforcement to accommodate identified needs;
- Establishment of a Tactical Response Unit (TRU);
- Strengthening coordination of communication strategies between neighbouring municipalities;
- Social Crime Prevention Strategies in conjunction with the Section: Community Development in terms of the Council's Street People Policy and Social Justice SOP;
- Consult with the CWDM in terms of sharing resources and information flow;
- Use of innovative technology to improve enforcement strategies;
- Compile a Security and Safety Camera Master Plan for WC024;
- Completion of the municipal control room, Joint Operating Centre (JOC);
- Issuing of radios to all neighbourhood watches to be able to communicate with and through the Stellenbosch Municipality control room (JOC);
- Provide training to neighbourhood watches;
- Implementation of the externally funded Law Enforcement (Rent-a-Cop) Policy; and
- Implementation of the Reservist policy.

7.3.11 Disaster Management Plan

The National Disaster Management Centre (NDMC) provided a set of guidelines, developed in terms of Section 19(a) of the Disaster Management Act, 2002 (Act No. 57 of 2002) (DMA) and Section 3.6 of the National Disaster Management Framework, 2005 (NDMF), that provide a uniform structure and checklist to organs of state to develop a Disaster Management Plan.

This plan confirms the arrangements for managing disaster risks and for preparing for and responding to disasters within the Greater Stellenbosch Municipality as required by the Disaster Management Act, 2002 (Act 57 of 2002).

SECTION 53(1) DISASTER MANAGEMENT ACT, 2002 (ACT NO. 57 OF 2002)

- a) Prepare a disaster management plan for its area according to the circumstances prevailing in the area;
- b) Coordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and
- c) Regularly review and update its plan; and through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.

7.3.11.1 The Key Outcome of the Disaster Management Plan

The Disaster Management Plan (DMP) seeks to achieve the following key outcomes:

- ✦ integration of Disaster Risk Management into the strategic and operational planning and project implementation of all line functions and role-players within the municipality;
- ✦ resilient communities; and
- ✦ an integrated, fast, and efficient response to emergencies and disasters by all role-players.

7.3.11.2 Linkage to Stellenbosch Municipality's IDP

The MSA and the Disaster Management Act require the inclusion of the Disaster Management Plan into the Integrated Development Plan (IDP) of the Stellenbosch Municipality as a core component of the IDP document. However, it is not practical to include the entire Disaster Management Plan with annexures within the IDP of the Stellenbosch Municipality. Therefore, a summary of the key points is encapsulated in the IDP.

7.3.11.3 Linkage to the Disaster Management Framework of the CWDM

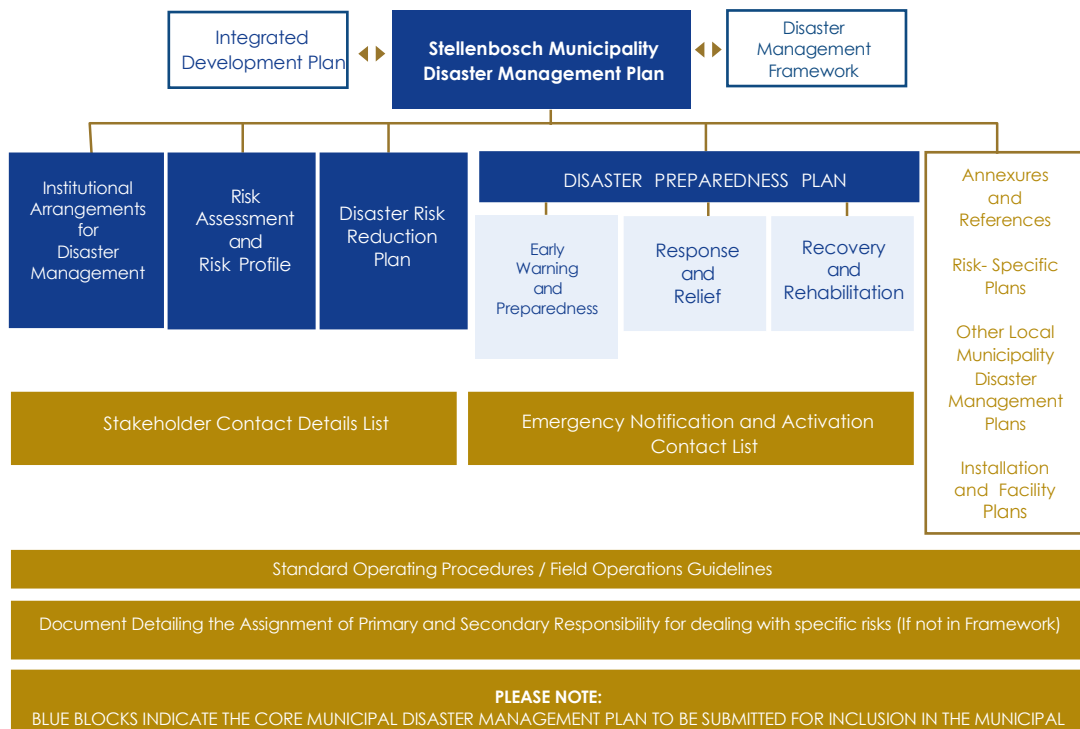

The Stellenbosch Municipality must prepare and execute its Disaster Management Plan within the Disaster Management Framework of the Cape Winelands District Municipality. The National, Western Cape Provincial, and Cape Winelands' frameworks guide the development of the municipal Disaster Management Plan and future versions of this plan.

7.3.11.4 Structure of the Disaster Management Plan

The municipal Disaster Management Plan of Stellenbosch Municipality consists of the components as indicated in the figure below:

Figure 46: Structure of Disaster Management Plan

7.3.11.5 The Purpose of the Stellenbosch Municipality Disaster Management

The purpose of Stellenbosch Municipality Disaster Management is to ensure coordination of multi-disciplinary and multi-sectorial risk reduction through the integrated institutional capacity for disaster risk management, risk assessment, response and recovery, and implementation of measures aimed at:

- ⚡ Preventing or reducing the risk of disasters;
- ⚡ Mitigating the severity or consequences of disasters;
- ⚡ Emergency preparedness;
- ⚡ Rapid and effective response to disasters; and
- ⚡ Post-disaster recovery and rehabilitation.

7.3.11.6 Risk assessment throughout WCO24

An all-ward-based Disaster Risk Assessment was conducted in collaboration with the Cape Winelands District Municipality to identify all possible hazards that could impact the community and environment of Greater Stellenbosch was undertaken and completed. As the environment is dynamic and constantly changing, so are the risks that affect our communities. In the period since the risk assessments took place, some of these risks would have been addressed by projects implemented by municipalities; however, new risks might have also emerged. Therefore, it is necessary to regularly review the risk assessments. Several risks were identified; however, six were identified as high-priority risks.

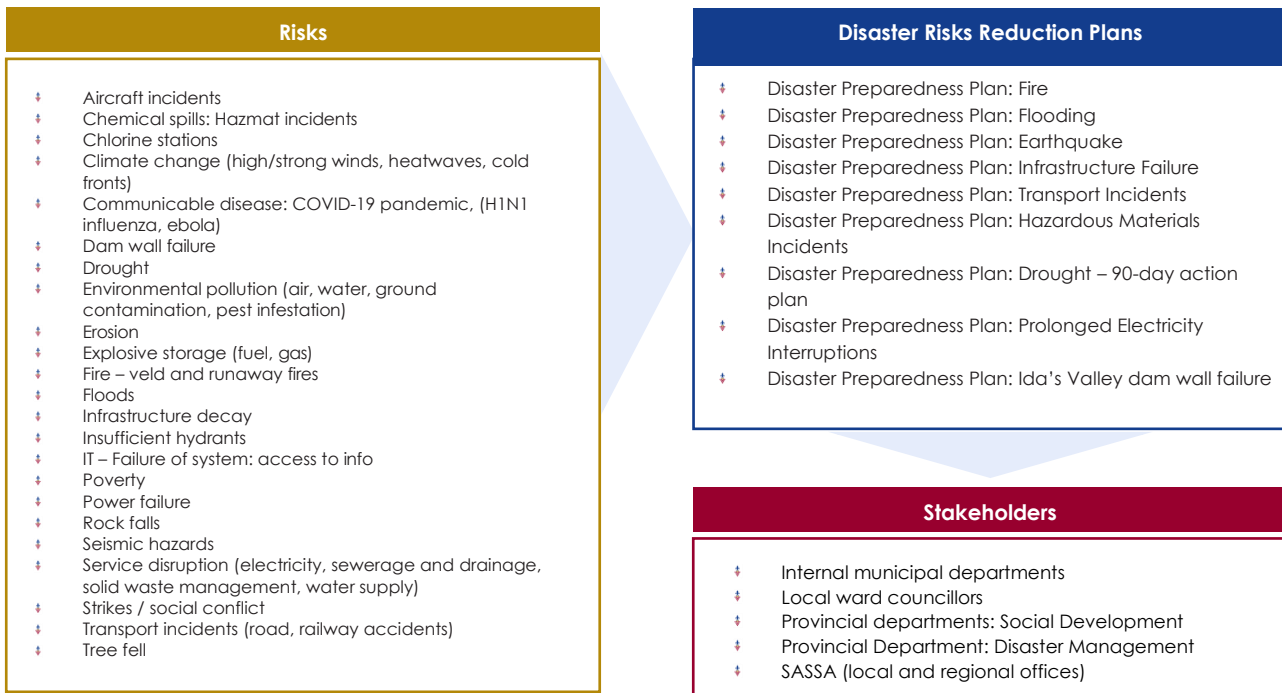

High-priority risks identified that pose a risk to the WCO24 are listed in the table below.

Table 50: High-Priority Risks Identified

High Priority Risks	Description of risks
A. Inability to control urbanisation	<ul style="list-style-type: none"> ⚠ "Urbanisation: the increase in the number of people living in towns and cities, resulting in the growth of urban populations." ⚠ Several disadvantages occur with rapid and unplanned urban growth. These disadvantages include, but are not limited to, poor infrastructure / inadequate housing, water and sanitation, waste disposal and pollution, and transport and healthcare services.
B. Increased poverty and unemployment	<ul style="list-style-type: none"> ⚠ Poverty and unemployment directly correlate with the quality of life of the members of the community. ⚠ The risk is exacerbated by the expansion of the informal sector and a low-skilled population.
C. Access to basic services	<ul style="list-style-type: none"> ⚠ The lack of basic services results in major personal and environmental health concerns. ⚠ Lack of formal electrical infrastructure results in structural fire risks within informal settlements.
D. Safety and Security	<ul style="list-style-type: none"> ⚠ Human-induced hazards such as crime (which includes theft, robbery, rape, and murder), gangsterism, and alcohol and drug abuse remain one of the top hazards in most wards within the Stellenbosch municipal area.
E. Poor / no electricity	<ul style="list-style-type: none"> ⚠ Inadequate electricity supply is not only a result of cable theft but also of continuing population growth, specifically within the informal settlements. ⚠ Increased population growth leads to the increased erection of informal structures that require electricity. ⚠ In most cases, electricity is obtained illegally through illegal electrical connections. ⚠ Cable theft is becoming more common in larger parts of South Africa, and the Stellenbosch municipal area is not excluded from this phenomenon. This hinders the operations of businesses, households, and transportation systems.
F. Illegal dumping	<ul style="list-style-type: none"> ⚠ Illegal dumping poses great environmental and health risks. Not only are these locations where infectious diseases spread, but they also attract unwanted pests such as cockroaches, mice, and rats. In most cases, illegal dumping occurs in highly populated informal settlements due to a lack of proper and frequent waste disposal.

The figure below illustrates the types of disasters that pose the highest risks within the area of the Stellenbosch Municipality, the disaster risk reduction plans, and stakeholders in the event of a disaster. The municipality engages on numerous platforms by partnering with stakeholders to gain access to new resources, information, expertise, and skills to facilitate service delivery.

7.3.12 Local Economic Development Strategy

Local Economic Development (LED) is not an explicit municipal function as defined in the Constitution of the Republic of South Africa, 1996. Instead, it is an obligation imposed on local government in terms of sections 152 and 153 of the Constitution that stipulates the objectives of local government are to promote social and economic development within its financial and administrative capacity.

Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction and should play the leading role in municipal sector planning.

The focus on individual economic sectors and spatial planning as the key focus areas, rather than on social and economic development results tends to delink economic growth benefits (increase in indicators like GDP, per capita income, etc.) into local economic development benefits (improvement in the life expectancy rate, infant mortality rate, literacy rate, and poverty rate).

Local economic development is the means of systematic identification, development, and utilisation of economic opportunity to benefit local businesses and create opportunities for local communities to improve the lives of residents.

The growth of the informal economy reduces the demand for jobs while increasing the number of entrepreneurs and potential contributors to private sector demand.

The health of the entire economy is important. The economy does not divide neatly into the 'formal sector' and the 'informal sector'. Rather, the different sectors, such as manufacturing, tourism, services, and construction, are on a continuum that has a more formal and a more informal end.

The great challenge to local government, in its support for economic development, is to enable job opportunities at different points along the continuum while ensuring health and safety, orderly planning, and management. All work, whether on the more formal or more informal ends of the continuum, has to be valued, especially when unemployment is high and when there is a highly probable link between unemployment and crime. The number of people relying on the informal economy for work can and will increase, while the formal economy struggles to grow and make meaningful progress in global markets.

Given the above, local economic development is therefore a multi-stakeholder effort in support of creating economic opportunities for both the private sector and the local community.

7.3.12.1 Strategic approach

The strategic approach to LED in general is to create economic opportunities for all citizens residing in the Stellenbosch Municipal Area. It is imperative that the municipality, in partnership with role players in society, review its strategy going forward to ensure better resilience in its economy to deal with future challenges and contribute towards better livelihoods for all.

Technology changes, especially connectivity, have become more important for businesses and the government to do business. This was highlighted by the lockdown experience that forced the municipalities to work remotely.

The following ways of doing business must be seen within the context of the "new normal":

- ✦ To maximise prospects for sustained economic growth, stakeholders must be permitted to strengthen their competitiveness and collaboration within the local business environment. Networking, local government responsiveness to business needs, effective service delivery, and

business-oriented organisational structuring will be used to address this aspect;

✚ New business development or investment and expansion of existing businesses will be actively promoted, as the consequence of increased investment more often than not resulting in new jobs and local economic growth. Spatial development framework planning, the Integrated Zoning Scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect;

✚ It appears that the formal economy is rapidly becoming more informal, as seen in the increase in the number of occupational practices and businesses run from residential premises. The informal economy offers diverse opportunities for absorbing those who have lost their jobs and for new entrants into the economy. The integrated zoning scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect;

✚ Create an enabling environment. An enabling environment refers to “a set of policies, institutions, support services, and other conditions that collectively improve or create a general business setting where enterprises and business activities can start, develop, and thrive.” Spatial Development Framework planning, the integrated zoning scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect; and

✚ The formal and informal parts of the economy are mutually interdependent. The good health of one depends on the good health of the other. It is difficult to promote the growth of smaller enterprises if the overall rate of economic growth is slow. Dedicated networking projects to create opportunities for the informal economy to contribute to the demands of the formal economy will be used to address this aspect.

7.3.13 Community Development Strategy

Moreover, Schedules 4b and 5b list the functions of local government to include the following, which have relevance to community development functions:

- Childcare facilities;
- Building regulations (concerning SANS 10400S);
- Municipal Planning (concerning ECD registration applications and provisions to be made for social infrastructure, inclusive of education and health services);
- Municipal public works (accessibility);
- Local amenities (concerning the contribution to social development);
- Local sports fields (regarding their contribution to social development);
- Municipal parks and recreation (regarding the contribution to social development); and
- Municipal roads (accessibility).

INTERGOVERNMENTAL RELATIONS FRAMEWORK ACT, 2005 (ACT NO. 13 OF 2005) (IGRFA)

The IGRFA, which defines the relationship between the three spheres of government and facilitates coordination in the implementation of policy and legislation, includes coherent government, effective provision of services, monitoring implementation of policy and legislation, and realisation of national policies. Because these services are primarily provided by the national and provincial spheres of government but significantly affect local communities and residents, this department / function plays a pivotal role.

LOCAL GOVERNMENT: MUNICIPAL SYSTEMS ACT, 2000 (ACT NO. 32 OF 2000) (MSA)

The MSA further demonstrates in Chapter 4 the mandate of the municipality to develop a culture of community participation (16(1)(b)) in order to contribute to building the capacity of— (i) the local community to enable it to participate in the affairs of the municipality (networks and forums) and must do so with specific emphasis on the inclusion of (17(2)) the specific needs of (a) people who cannot read or write; (b) people with disabilities; (c) women; and (d) other disadvantaged groups.

The White Paper on Local Government (1998:23–26) identifies four interrelated characteristics of the role and function of local government related to community development:

- Maximising social development and economic growth: The role and function of the local government are to promote the development of communities so that the basic needs of the poor and vulnerable are met. It involves the regulation of service delivery. This means that the local government is not directly responsible for services but rather takes steps (i.e., strategies) to encourage good service delivery that addresses the specific needs of the specific community. It could therefore be viewed as a facilitation role. Partnerships between organisations could be encouraged, training opportunities could be provided, and facilities could be developed to support existing service providers in the community;
- Integrating and coordinating: Coordination should include national and provincial departments, trade unions, community groups, and private sector institutions. “Developmental local government must provide a vision and leadership for all those who have a role to play in achieving local prosperity.” An IDP could contribute to proper coordination;
- Democratising Development: Local Government practices should be aimed at the involvement of “...citizens and community groups in the design and delivery of municipal programmes”.

Coordination should lead to democratic "...leadership, encouragement, practical support, and resources for community action." Another key aspect is that democratic development should aim to involve all community groups; and

Leading and learning: Community development should lead to networks, partnerships, and coalitions. To this extent, a Memorandum of Understanding (MOU) was signed with DSD.

It includes training opportunities and awareness programmes. The ultimate aim is to empower communities and create opportunities for sustainable change and growth. The emphasis is therefore on capacity building within communities.

The above characteristics are aimed at improving service delivery within the constraints of available resources. As mentioned before, partnerships with businesses and non-profit organisations (NGOs) become a key aspect of this developmental model (White Paper on Local Government, 1998:35). These services are aimed at specific vulnerable groups, and social issues are also highlighted in policy documents.

Further to the above, the department gives effect to the strategic goal of Dignified Living in the IDP of Stellenbosch Municipality through:

The implementation of critical key performance areas and processes associated with the creation of a conducive environment for community / social development, forging relations with national, provincial, and local stakeholders, and the generation of current social data; and

The development of six vulnerable groups (youth, gender, children, elderly, people who are homeless, and people living with disabilities) within the municipal area through strategy and policy development and monitoring and reporting on the intended goals of the department's key performance areas.

7.3.14 Human Resource Strategy

High quality and a responsive Stellenbosch Municipality, with a focus on skills identification, supply, demand, retention, employability, and social mobility, is essential if the municipality is to realise its IDP ambitions. As such, Stellenbosch Municipality needs to be pre-emptive in terms of its human resource requirements and more responsive to service delivery improvement and best practices. The strategic role of Human Resource Management and Development (HRM&D) is ultimately to facilitate performance improvement through people. The table below provides a clarification of roles and involves the following:

- Understanding the business environment within which HRM&D operates;
- Partnering with management in effective people practices;
- Enabling change and transition;
- Engaging constructively with internal and external stakeholders' groups; and
- Delivering service-level commitments.

Table 57: Clarifying the role of HRM&D vis-à-vis Manager and employees

HRM	Line Managers	Employees
<ul style="list-style-type: none"> • Develops HRM&D strategies, principles, policies, and procedures in line with business requirements. • Ensures consistency and standardisation of processes and practices across the municipality. • Provides expert advisory services. • Ensure the application of appropriate best practice HRM&D service. • Partners line management in effective people practices • Enables change and transition. • Facilitates the assimilation of culture and values. • Build the capacity of line managers to effectively manage people. • Ensure good corporate governance around HRM&D practices. • Delivers on service level agreements. • Measures and reports on the effectiveness of HRM&D services within the municipality. • Interaction and negotiations with trade unions and feedback. 	<ul style="list-style-type: none"> • Partners with HRM&D in developing and implementing HRM&D strategies to achieve results. • Manage people according to HRM&D principles, policies, and procedures. • Complies with HRM&D legal requirements. • Proactively engages and partners with HRM&D around business and people challenges and solutions. • Initiate and lead change. • Drives the organisational values. • Takes responsibility for being informed of HRM&D matters and building their own people management skills. • Follows fair and procedural HRM&D practices and processes. • Ensures high performance through effective performance management and retention practices. • Communicates and gives feedback on service level expectations. • Tracks and measures the impact of HRM&D strategies in functional areas. • Measure and report on the effectiveness of people management within functional areas. 	<ul style="list-style-type: none"> • Partners with line and HRM&D to: • Remain relevant to local; government by taking responsibility for own performance development and career planning; • Taking advantage of appropriate opportunities for development; • Remain informed of HRM&D policy and procedure; • Discuss expectations; • Take personal accountability for and support change initiatives; • Live the organisational values; • Participate in HRM&D surveys and feedback mechanisms; and • Provides feedback to / and liaises with Unions and relevant employee forums.

This HRM&D Framework provides Stellenbosch Municipality with the structure to plan, implement, monitor, and improve its HRM&D standards. This framework does not operate in isolation and will be central to all activities involving the human resources of Stellenbosch Municipality. It is, therefore, not an HR document but must be “owned” by the Council, management, staff, and trade unions. Since the field of HR management is a dynamic discipline, it is envisaged that this framework will change and develop over time to reflect the realities of the municipality’s environment.

Table 58: Key Strategies

Strategic Focus Area (SFA)	Key strategies	Alignment with HR Standards
SFA 1: Valley of Possibility	Ensuring that infrastructure and service planning and resourcing occur sustainably over the long term and draw on the expertise of other service delivery agencies, the private sector, and the university.	<ul style="list-style-type: none"> Strategic HR Management.

7.3.15 ICT Strategy

7.3.15.1 Background

Information and Communication Technology (ICT) Systems and Services are playing an ever-increasing role as a strategic enabler of organisational transformation and service delivery in the public sector. There is also a growing acknowledgement at the corporate governance level that ICT services and systems form an integral part of the municipal service delivery value chain.

The continuous alignment of ICT services and systems with the strategic goals and objectives of the municipality, as well as statements of direction from the National Government and the Western Cape Provincial Government, impose major challenges on the Department: ICT and its resources.

This document aims to articulate and describe changes in the Stellenbosch Municipality's ICT Strategy with the view of ensuring alignment with the municipality's strategy. The emphasis is placed on identifying the municipality's new requirements and opportunities for information and communication technology to move towards meeting the ICT-related requirements of the municipality and management. The municipality intends to review and update the ICT Strategy for approval in the 2023/24 financial year.

The successful implementation of the municipality's IDP and the achievement of its strategic objectives are highly dependent on several critical enabling resources to be managed effectively to support the IDP, including finances, human resources, and information technology.

The achievement of the strategic objectives of the municipality's IDP is indirectly dependent on various information technology services, without which the core and supporting functions of the municipality will not be able to operate. The vital ICT-related services include:

- ✦ Provisioning of Municipal Financial Management and Payroll Management software applications;
- ✦ Hosting of the municipal website;
- ✦ E-mail and internet services;
- ✦ Data storage;
- ✦ Data recovery;
- ✦ ICT planning;
- ✦ Provisioning of the network, wireless networks, and telephony services;
- ✦ End-user support for the ICT environment;
- ✦ Disaster Recovery Management;
- ✦ Business Continuity;
- ✦ ICT Risk Management;
- ✦ ICT contract management; and
- ✦ Public Wi-Fi.

7.3.15.2 The Mission and Vision of ICT

ICT's mission is to deliver cost-effective ICT infrastructure and ICT business solution services that will provide the most enabling environment to assist the Stellenbosch Municipality in delivering sustainable services that are operationally efficient and cost-effective to all its stakeholders and communities, which includes:

- ✦ Cost-effective solutions;
- ✦ Quality Service Delivery;
- ✦ Ongoing performance monitoring; and
- ✦ Aligned to business processes.

The vision of the ICT Department is to become a trusted and reliable information and communication technology partner to enable Stellenbosch Municipality's management and end-users to build a better town using cutting-edge ICT technology solutions.

7.3.15.3 Success Factors to Adopt in getting closer to the community

The Department: ICT will continue to strive to achieve its goals of closing the gap between the municipality and the community by improving services and engagement. These goals include:

- ✦ Understanding the needs of the community;
- ✦ Always deliver a consistent and quality service; and
- ✦ Manage the relationships with vendors and stakeholders providing a service to the public.

CHAPTER 8:

Council Term Projects 2022 – 2027

8.1 Smart City

As cities compete for global investment and talent in efficient cities with fewer red tape barriers, ICT competitiveness comes centre stage. A smart city is adaptable to change and demands that emanate from growth and, in response, applies information and communication technologies to enhance performance and urban services to respond to demand while reducing consumption, waste, and costs. Smart cities need to capitalise on digital technology to facilitate the speed of information, support more efficient delivery of goods and services, and contribute to the greater vibrancy of cities.

A smart city is a municipality that uses information and communication technologies to increase operational efficiency, share information with the public, and improve both the quality of government services and citizen welfare.

8.1.1 Guiding Principles to create inclusive smart cities

For a smart city to be inclusive, it should adhere to six interdependent principles. The principles provide guidance when decisions must be made regarding the identification, planning, and implementation of smart initiatives and technologies.

Decisions on the nature and purpose of a smart initiative or technology should be guided by the following principles:

1. It should be smart for all;
2. It should use technology as an enabler rather than a driver;
3. It should be shaped by and respond to the local context;
4. It should be informed by the real needs of the community;
5. It should embrace innovation, partnership, and collaboration; and
6. It should be sustainable, resilient, and safe.

8.1.2 A smart city as a holistic ecosystem

Global best practices recommend three primary categories when determining the benefits and priorities for the design and implementation of the smart city roadmap. The smart city roadmap includes the following:

Smart Governance

Transform the institutional systems, processes, and organisational structure into one of the high-performance organisations to effectively deliver basic services.

Smart Livelihood

Implementation and integration of innovative digital platforms to enable social upliftment.

Smart Economy

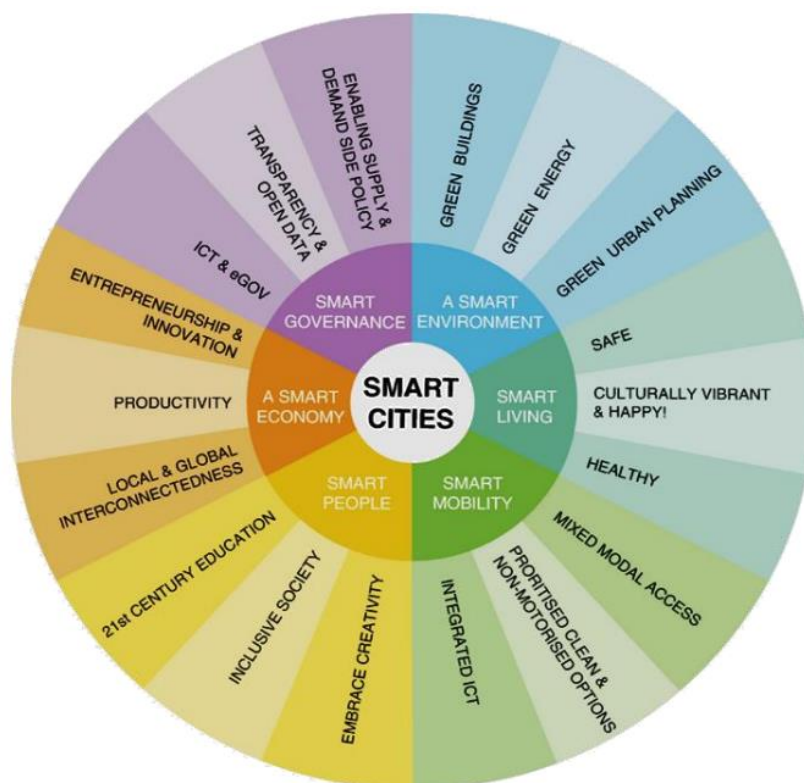

Grow and diversify the local economy through the attraction of new investment, skills development, and facilitation of an enabling environment for small business growth and job creation.

8.1.3 The Nature and Purpose of a proposed smart city initiative

The implementation of smart city initiatives should be guided by a clear understanding of the nature and purpose of the proposed interventions. These initiatives could be focussed on benefitting different target services in municipal-driven smart city initiatives, addressing the needs of the entire city (municipal area). Smart City initiatives should be aimed at improving the lives of the people residing in the city, especially in the different services that are delivered to the residents in the municipal area.

Smart city initiatives can be placed within a specific smart city theme, the figure below indicates the different smart city themes:

Figure 48: Smart City components and initiatives

Source: A South African Smart Cities Framework

Realising the goal and implementation of smart city initiatives will require the collaboration of internal and external stakeholders. Within the next five years (2022 – 2027), Stellenbosch Municipality will emphasise smart governance with a focus on e-governance. The aim is to formulate a Smart City Framework for approval by the Council in the 2023/24 financial year.

The purpose of the Smart City Framework will be to guide decision-making and provide internal stakeholders with a structured framework when identifying, planning, and implementing smart city initiatives that are appropriate to the theme of smart governance.

The legacy projects will be undertaken by the administration and political leadership, which will remain applicable for the duration of the political term under the leadership of the Executive Mayor and the respective portfolios of the Mayoral Committee Members.

8.2 Political Leadership: Five-Year Plans

8.2.1 Executive Mayor

In developing the proposed 2nd Amendment of the 5th Generation IDP 2022 – 2027, the Stellenbosch Municipality ensured proper alignment and integration with the IDP, Budget, SDF and sector plans. There is no fundamental shift in the outstanding projects / programmes and initiatives that were planned in the 5th Generation IDP 2022 - 2027.

The 5th Generation IDP 2022 – 2027 will be the Municipality's road map for the next five years and track the progress on the implementation of projects / programmes and initiatives. It is an exciting journey in working together with the administration, communities, and other spheres of government in making greater Stellenbosch a valley of opportunity. For this to happen, the following mayoral outcomes for the period 2022 – 2027 have been set and are reviewed on an annual basis.

Mayoral Outcome 1: Clean, accountable, and responsive local government;

Mayoral Outcome 2: Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area;

Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers;

Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements and mixed-use developments);

Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpias across the municipality area;

Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth;

Mayoral Outcome 7: To create safer environments in our communities;

Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation;

Mayoral Outcome 9: Alternative Energy.

8.2.1.1 Mayoral Outcome 1: Clean, accountable and responsive local government

8.3 Mayoral Portfolios

The mayoral portfolios are a tool for the Executive Mayor to use to reach the mayoral goals for 2022 – 2027. In support of the mayoral outcomes, each portfolio has set performance-based strategic priorities that are aligned and will give effect to the mayoral outcomes. The performance-based strategic priorities for the 1st Review of the 5th Generation IDP 2022 – 2027, have a focused approach on the implementation of the strategic projects / programmes and initiatives with set targets and time frames.

The following portfolio performance-based implementation plans are listed below:

1. Portfolio: Human Settlements;
2. Portfolio: Rural Management;
3. Portfolio: Youth, Sport, and Culture;
4. Portfolio: Planning, LED, and Tourism;
5. Portfolio: Community Services;
6. Portfolio: Financial Services;
7. Portfolio: Protection Services;
8. Portfolio: Corporate Services;
9. Portfolio: Infrastructure Services; and
10. Portfolio: Parks, Open Spaces and Environment.

8.3.1 Portfolio: Human Settlements

CHAPTER 9:

Public Interest and Expression of Needs

9.1 Community Participation

Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) requires municipalities to create a culture of community participation. According to section 16(1)(a)(i) of the MSA, "A municipality must develop a culture of municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose encourage, and create conditions for, the local community to participate in the affairs of the municipality, including in the preparation, implementation and review of its integrated development plan in terms of Chapter 5". It is therefore essential to have effective public participation structures in place.

The SDF, IDP, Budget, Sector Plans as well as major municipal policies, by-laws and decisions should be engaged to ensure that they are designed and implemented for and with the community. This also adds to the credibility of the needs reflected in the IDP, the Budget calculated in addressing these needs and the SDBIP drafted in implementing programmes and projects which reflect the communities' needs.

The growing trend of mature and constructive discussions from the public, the level of complexity and the investment made in understanding the municipality's business are encouraging. The direct participation and involvement of the ward councillors, communities, and stakeholders in the identification of ward-based priorities and their involvement in the public participation process have added great value to the maturity and quality of the discussions between the public and the municipality. Ward Councillors are a critical link in connecting the municipality with the public. As members of the Council, and recipients of all the decisions taken by the Council, it positions Councillors strategically to ensure that the municipality not only understands the needs of the community, better but also to provide the public with honest and accurate feedback on the municipality's initiatives. These endeavours are supported by well-functioning Ward Committees. Councillors are, however, encouraged to always adhere to the code of ethics for Councillors and to always act with the utmost integrity and accountability toward their constituents and the municipality, as this is the only way in which to form a responsible local government.

Public participation takes place through various means and platforms and is often tailored to suit a specific audience or community. Importantly, communities from different socio-economic backgrounds use different platforms to communicate. It is important to cater for all scenarios and to utilise all available platforms to their optimum potential, given that a certain degree of apathy exists in certain communities.

The maturity level that the public participation process has achieved during the COVID-19 pandemic, has reached new heights from both the community members and the administration. Further feedback will be provided on the comments captured on written submissions made via the various platforms created for public participation. To ensure that the public participation process is a two-way process, all comments have been carefully considered and discussed with internal departments.

9.2 Public Participation in the drafting of the 2nd Review of the 5th Generation IDP 2022 – 2027

Stellenbosch Municipality implemented a IDP Open Days from **04 September - 04 October 2023** during the analysis phase to determine the needs of the community in developing the 2nd Review of the 5th Generation IDP 2022 – 2027.

A notice was published in the local newspaper and on the municipal website to announce the start of the public participation process for the development of the 2nd Review of the 5th Generation IDP 2022 – 2027. At the start of the process, a link to an **electronic submission form** was made available on the municipal website, the Stellenbosch Citizen App, and broadcast via WhatsApp, Facebook, and email. Have Your Say forms were made available at the ward office, municipal libraries, and satellite offices

Members of the community and other interested and affected parties were encouraged to attend the IDP Open Days for their ward / area. The IDP public participation Open Days served as a one-stop municipal desk for the community to get information on municipal services and to have a one-on-one discussion with municipal departments of their choice to raise their community needs and ask questions. Community members were encouraged to visit any of the IDP Public Participation Open Days at the various specified venues. The concept of the open days was more of a decentralised meeting at the various service desks that were set – up per directorate. The IDP Open Days were implemented per area, for example, Wards 1 and 2 were clustered as one (1) area. No registration of indigent customers, housing demand, or unemployment databases was done on the open days, but information on these services was shared with communities at the service desk.

9.3 Public Participation Statistics: September 2023

The graphs below indicate the number of individual line-item submissions received on the various communication platforms.

Graph 40: Total number of individual submissions per platform (Sept 2023)

As noted from the graph above, the electronic form, which was made available on the municipal website, input recorded in the IDP Open Day minutes was the most popular platforms used by the community and stakeholders to submit their needs and priorities in September 2023. A total of **984** individual line items were recorded during the **IDP Open Days in September 2023**, with the **electronic form** on the municipal website as the second most popular platform with **388** individual line-item submissions recorded.

The graph (dark blue) below indicates that **Ward 06** and **Ward 20** have the highest number of line items / inputs per ward received and capture during the public participation period for September 2023.

Graph 41: Total number of Ward inputs per ward (Sept 2023)

9.4 Summary of Needs and Priorities

The graphs below present a summary of the key priorities and needs raised by communities during the public participation period in September 2023. It is evident from both graphs that the **top 5 priorities** identified for WCO24 by community members are listed below:

1. Roads, Transport and Stormwater;
2. Safety and Security;
3. Recreation and Sport;
4. Electrical Services; and
5. Housing Administration.

Graph 42: Number of community inputs per priority area in Sept 2023

CHAPTER 10:

Financial Plan

the Stellenbosch Municipality's medium-term financial planning and the extent to which it is possible to align the budget to all the priorities of the wards, given our financial constraints and the need to concentrate on basic service delivery.

10.1 Introduction

The long-term financial viability of municipalities depends largely on:

- the extent to which improved and sustainable revenue capacity can be achieved; and
- the sound **financial management of its resources**.

These imperatives necessitate proper multi-year financial planning. Future impacts of revenue and expenditure streams and the financial implications for the community (i.e. the potential influence on rates, tariffs, and service charges) must be identified and assessed to determine the sustainability of planned interventions, programmes, projects, and sundry service delivery actions.

10.2 Capital and Operating Budget Estimates

10.2.1 Budget Assumptions

The selected key assumptions relating to this budget are as follows:

- Government grants for the years 2024/25 to 2026/27 are as per the Division of Revenue Act and Provincial Gazette (capital and operational); and
- The inflation **rate has been estimated at 4.9% for 2024/25**.

10.2.2 Operating Budget Estimates

A municipality is a non-profit organisation, and it should break even after contributing to the different funds and reserves and meeting normal operating expenses. With the structuring of rates and tariffs, both the user-pay principle and the full cost recovery principle are applied. It should be noted that the surplus is calculated in terms of the accrual principle and therefore is not 100% cash-backed.

Table 125: Operating Budget Estimates

	(Current) 2023/24 Budget	Year 1 2024/25 Budget	Year 2 2025/26 Budget	Year 3 2026/27 Budget

10.3 Financial Management Arrangements

For the effective and efficient financial management of the municipality, all role-players, inclusive of the municipal councillors, must provide an environment conducive to good management. Local government legislation and National Treasury circulars articulate and provide regulatory structure. Council and officials define this environment by developing and accepting policy guidelines to govern financial decision-making and fiscal discipline.

The management arrangements of Stellenbosch Municipality are reflected in the policy documents listed in the table below:

Table 127: Management Arrangements

Document	Purpose	Status
Delegation Register	To provide for administrative, managerial and institutional arrangements in respect of the delegation of responsibilities.	In place
Credit Control and Debt Collection Policy	<ul style="list-style-type: none"> To establish consolidated, sound and practically executable credit control measures to be applied in respect of all property owners and consumers. To regulate the actions about arrear accounts, including extensions granted, written arrangements to pay off arrears, the monitoring thereof and legal actions associated with unpaid accounts. 	In place
Indigent Policy	To subsidise indigent households with a specified level of income enabling them to pay for a basic package of municipal services.	In place
Irrecoverable Debt Policy	To provide a framework for the writing off of irrecoverable debt, to ensure that Council is in a position where it is not carrying debt that has been prescribed or which is irrecoverable on its books.	In place
Tariff Policy	To provide a framework to determine rates and tariffs to finance expenditure.	In place
Rates Policy	To ensure that all the stipulations of the Municipal Property Rates Act are effected administratively and also layout and stipulate all the requirements for rebates for all qualifying property owners.	In place
Special Rating Areas Policy	To strike an appropriate balance between facilitating self / funded community initiatives that aim to improve and / or upgrade neighbourhoods.	In place
Supply Chain Management Policy	To provide a system of procurement that gives effect to the principles of: <ul style="list-style-type: none"> Fairness; Equity; Transparency; Competitiveness; and Cost-effectiveness. 	In place
Budget Implementation and Monitoring Policy	<ul style="list-style-type: none"> Sets out the budgeting principles that Stellenbosch Municipality will follow in preparing each annual budget. To give effect to the requirements and stipulations of the Municipal Finance Management Act (MFMA) and Municipal Budget and Reporting Framework in terms of the planning, preparation and approval of the annual and adjustments budgets. 	In place
Borrowing, Funding and Reserves Policy	To provide a framework to ensure that the annual budget of Stellenbosch Municipality is fully funded and that all funds and reserves are maintained at the required level to avoid future year non-cash-backed liabilities.	In place
Cash Management and Investment Policy	To regulate and provide directives in respect of the investment of funds and to maximise returns from authorised investments, consistent with the primary objective of minimising risk.	In place
Travel and Subsistence Policy	To set out the basis for the payment of subsistence, travel allowance, and hourly rate when applying for official travelling.	In place
Accounting Policy	To provide the accounting framework applicable to the finances of the municipality and is informed by the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003).	In place

Document	Purpose	Status
Grant-in-aid Policy	To provide the framework for grants-in-aid to NGOs, CBOs or NPOs and bodies that are used by the government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12 and 67 of the MFMA.	In place
Development Contributions for Bulk Engineering Services	<ul style="list-style-type: none"> Local government has the discretionary power when granting development approvals to impose conditions about the provision of engineering services and the payment of money that is directly related to requirements resulting from those approvals in respect of the provision of the necessary services to the land to be developed. To provide the framework for the calculation of these contributions. 	In place
Petty Cash Policy	To stipulate clear processes and procedures to ensure that all transactions are processed effectively and efficiently in a bid to ensure prudent financial control. All purchases below R2 000 are regulated by this policy.	In place
Asset Management Policy	The Municipal Manager as Accounting Officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.	In place
Liquidity Policy	The documented policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to ensure that its current and future liquidity position is managed prudently.	In place
Virement Policy	The policy sets out the virement principles and processes which the Stellenbosch Municipality will follow during a financial year. These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year.	In place

10.4 Financial Strategies and Programmes

The optimal use of available resources, the maximum raising of revenue and the sustainable delivery of services are the key elements to a successful financial strategy. The municipality has developed and implemented various strategies in this regard. The table below summarises the key strategies:

Table 128: Key Financial Strategies

Strategy	Currently in Place
Financial viability and sustainability through long-term financial planning	<ul style="list-style-type: none"> Long-term financial planning tool effective implementation and monitoring.
COVID-19 Policy Initiatives and Incentives to enhance vaccinations	<ul style="list-style-type: none"> Revise budget and related policies
Clean Audit	<ul style="list-style-type: none"> Audit Action Plan Annual Financial Statement compilation standard operating procedure Monthly Reconciliations Training Sessions Participation in Forums
Staffing	<ul style="list-style-type: none"> Revise Organogram Fill critical vacancies
Capital expenditure	<ul style="list-style-type: none"> Implementation of Project Management System including in-year reporting
Revenue Enhancement Strategy	<ul style="list-style-type: none"> Implementation of Revenue Enhancement Strategy Roll-out of WMD and Pre-payment Water Meters Data cleansing Validity of registered indigent households
Billing system enhancement	<ul style="list-style-type: none"> Web-based billing system Review Municipal Account Layout Investigate payment methods
Debt management	<ul style="list-style-type: none"> Debt Review Committee Quarterly Report on Debt and Possible Debt to be written off

10.5 Medium – Term Capital Expenditure per Strategic Focus Area

The proposed capital expenditure per strategic focus area over the medium term is illustrated in the table below:

Table 129: Capital Expenditure per Strategic Focus Area

Strategic Goal	2024/25	2025/26	2026/27
SFA 1 - Valley of Possibility	208,397,474	189,521,957	141,312,395
SFA 2 - Green and Sustainable Valley	44,949,985	30,692,500	29,966,750
SFA 3 - Safe Valley	55,543,326	60,400,000	50,434,317
SFA 4 - Dignified Living	244,391,541	258,642,750	286,267,820
SFA 5 - Good Governance and Compliance	67,062,977	51,884,318	35,798,864

Figure 51: Capital Expenditure per Strategic Focus Area

Source: Capital Budget 2024/25

The most capital-intensive strategic focus area is Dignified Living with an allocation of R244,3 million in the upcoming financial year, totaling R789,3 million over the MTREF. Water and Wastewater Services: Sanitation projects dominate this strategic objective receiving an investment of R75.7 million in 2024/25, and it is increasing over the outer years.

The second most capital-intensive strategic focus area is Valley of Possibility, with a total allocation of R539,2 million for the duration of the MTREF. Project highlights include:

- Bien don 66/11kV substation new;
- Electrification INEP;
- Kayamandi(Costa grounds) new substation 11 kV switching station;
- Bulk Water Supply Pipe and Reservoir: Stellenbosch; and
- Bulk Water Supply Pipeline and Reservoir - Jamestown.

The Safe Valley strategic focus area receives the 3rd highest capital investment with the total MTREF budget amounting to R166,3 million. The Alternative Energy project takes centre stage as part of the broader Safe Valley Strategy to reduce the impact of loadshedding.

The municipality is also making a concerted effort to improve ICT infrastructure platforms, allocating R31,8 million for this purpose over the multi-year budget period.

10.6 Medium – Term Operational Expenditure

The proposed Operational Expenditure per Strategic Focus Area over the medium term is illustrated in the table below.

Table 130: Operational Expenditure per Strategic Focus Area

Operational Expenditure	2024/25	2025/26	2026/27
SFA 1 - Valley of Possibility	764,879,901	788,873,141	835,224,937
SFA 2 - Green and Sustainable Valley	7,315,028	7,404,429	7,495,618
SFA 3 - Safe Valley	68,849,401	64,174,231	60,041,606
SFA 4 - Dignified Living	1,023,951,833	1,145,981,247	1,299,813,052
SFA 5 - Good Governance and Compliance	569,204,852	584,474,747	606,560,898

10.7 Medium–Term Operational Revenue per Strategic Focus Area

The proposed Operational Revenue per Strategic Focus Area over the medium term is illustrated in the table below.

10.9 National and Provincial Investment

The following tables depict the National and Provincial allocations to the municipality over the MTREF period. It should be noted that the information is subject to change depending on fiscal constraints and the availability of resources.

The table below sets out the allocations by the national government for the MTREF period for Stellenbosch Municipality.

As indicated in the table below the total National allocation for Stellenbosch amounts to **R293 776** million for the 2024/25 financial year.

Table 138: National and Provincial Investment

National Allocations / Provincial	2024/25	2025/26	2026/27
Stellenbosch Municipality			
Equitable Share	215,604,000	232,617,000	251,231,000
Integrated Urban Development Grant	64,495,000	42,969,000	46,603,000
Integrated National Electrification Programme (Municipal) Grant (Schedule 5)	5,056,000	11,000,000	9,943,000
Energy Efficiency and Demand Side Management Grant	5,000,000	5,000,000	5,000,000
Local Government Financial Management Grant	1,600,000	1,700,000	1,800,000
EPWP Integrated Grant for Municipalities	2,021,000	-	-
Total	293,776,000	293,286,000	314,577,000

The table below sets out the allocations by the provincial government for the MTREF period for Stellenbosch Municipality.

As indicated in the table below the total Provincial allocation for Stellenbosch Municipality amounts to **R52 788** million for the 2024/25 financial year.

Table 139: Provincial allocation to the Stellenbosch Municipality

Cape Winelands District Grant	650,000	-	-
Total	52,788,000	108,164,000	147,688,000

CHAPTER 11:

Organisational Scorecard (5 – years)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between Council, administration, and the community. It gives effect to the IDP and budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly and annual performance reports must also be submitted to Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one-year detailed implementation plan which gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis for measuring the performance in service delivery against end-year targets and implementing the budget.

Indicators developed for the Stellenbosch Municipality address the Strategic Focus Areas of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers its service delivery mandate by indicating clear indicators and targets. These indicators also form the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The five necessary components are:

1. Monthly projections of revenue to be collected for each month;
2. Monthly projections of expenditure (operating and capital) and revenue for each vote;
3. Quarterly projections of service delivery targets and performance indicators;
4. Ward information for expenditure and service delivery; and
5. Detailed capital works plan broken down by ward over three years.

11.1 Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP)

The SDBIP gives effect to the Integrated Development Plan (IDP) and is essentially the management and implementation tool setting out the quarterly service delivery targets.

The Top Layer SDBIP include the main service delivery indicators of the municipality. The following table reflects the 5 Year Implementation Plan of the Integrated Development Plan:

Note: The Five-year Municipal Scorecard will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP). The TL SDBIP must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget, to be tabled in the Council during May.

CHAPTER 12:

Implementation, Monitoring and Review (1 – year)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between Council, administration, and the community. It gives effect to the IDP and budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly and annual performance reports must also be submitted to the Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one-year detailed implementation plan which gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis of measuring the performance in service delivery against end year targets and implementing budget.

Indicators developed for the Stellenbosch Municipality addresses the Strategic Focus Areas of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers of its service delivery mandate by indicating clear indicators and targets. These indicators also form the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The **five** necessary components are:

- Monthly projections of revenue to be collected for each month;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators;
- Ward information for expenditure and service delivery; and
- Detailed capital works plan broken down by ward over three years.

Note: This chapter, the one-year Municipal Scorecard, will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2024/25 during June 2024 and, therefore, **is subject to change**. The TL SDBIP 2024/25 must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget to be tabled in the Council in May 2024.
