haven't heard anything and wondered what had been decided. We are approaching nearly a year later already, so it would be great to get this going. The dumping problem is becoming an increasingly worrying problem too, despite the good efforts by the municipality crews who regularly have to clean up the mess. Bollards and trees would be SO MUCH better. Please let me know what is happening!

Kind regards

re: SPONSORED TREE PLANTING AND MAINTAINANCE – OLD HELSHOOGTE ROAD

Herewith a proposal from Trees Unlimited for the upgrading and improvement of the road verge on the lower part of the Old Helshoogte Pass.

Background

The Old Helshoogte Pass has some considerable historical significance. It has now been closed off to the general public and is only open for emergency and forestry vehicles, but also for major public events such as the annual Giro Del Capo and the Stellenbosch Mile swim at the municipal dam.

The lower section of the pass just outside the residential area of The Ridge has become a dumping ground and an eyesore. It has also become a gathering place for gangsters and revelers, especially over weekends resulting in broken bottles strewn over the road and litter scattered all over the place. This mess is constantly having to be cleared up by municipal staff or the workers from the nearby farms 'Lindani' and 'Gatesville' as well as the owner of Bergplaas caravan park.

This factor has also created unsafe conditions for these properties. Cars frequently park in the road, on the blind corner and block access.

On numerous occasions, too many to count, police have had to be contacted to break up the unpleasant situation.

There is a very elegant solution to this problem – and it involves a partnership between the municipality, TREES UNLIMITED and the 3 properties. The result will ensure there is no longer any dumping and no security risks.

Proposal

Trees Unlimited is willing to make a contribution in conjunction with the municipality to the uplifting of this area of the old pass. We would

- at our cost ensure the safe removal of the gum trees growing on the verge plus the undesirable aliens with the view to creating a space for the replanting with more suitable trees.

Tree Oaks trading as TREES UNLIMITED

MEMBER of International Society of Arboriculture

National Arborists Association Western Cape Arborists Association

- Ensure the watering and after care of the trees for 3-5 years
- Supply mulch for the trees
- Prune the large oak on the corner thereby ensuring its safety.

The Municipality would

- Supply and plant approximately 10 suitable trees (pin oaks or plane trees)
- Supply and erect suitable bollards with a strong cable along the entire verge to prevent vehicular access and ensure the trees have a chance to survive.

Underneath the trees, it would be possible to plant with hardy plants such as agapanthus. Perhaps the municipality could supply and plant these as well.

There would have to be access made available to the piece of open veld below the road as fire services must be able to get to fires that are frequently lit in summer and threaten the thatch cottage on 'Lindani'

Benefits

The beautification of this section of verge will prevent any further unwanted dumping, loitering and the inevitable congregation of undesirable members of the public.

It will minimize the security risk to the outlying farms at the end of the road.

It will create a wonderful entry to the old pass.

Please give this idea some consideration. It will mean a site inspection and further discussion but if any planting is to be done, it should be before winter sets in to give the new trees chance to grow before summer of 2010/2011

Yours sincerely

Leon Visser

Subject: LAWLESSNESS ON OUR DOORSTEP

Hi all

Please could you read below and comment so that we can send this to the DA.

Dear Sirs

I am writing to you raising concerns on behalf of, and in support of a number of property owners above Idas Valley, Stellenbosch, in particular Lindani (est. 1815) and Bergplaas Resort and Caravan Park. We desperately need assistance from any level possible which would result in practical resolve to our plight.

The area just adjacent to the entrances to our properties have become a hub of open drug usage, public indecency including nudity and open sex, public drinking, partying, littering, loitering, prostitution, we suspect child abuse, and the like. Drag racing, wheel spinning and drunken driving is a regular occurrence. Drug sales from the boots of vehicles happen nearly daily. Despite police patrols, the situation is getting worse, (probably because certain SAPS members seem "friendly" with the people in question). Furthermore, the area has become a dumping ground.

Despite numerous discussions, on site meetings with officials from Stellenbosch Municipality, including traffic department, cleansing department and the SAPS for well over three years, very little has been done to practically stop the problems. Buck-passing between departments is in the order of the day.

Lindani has been a family owned small holding for well over thirty years. Six families reside on Lindani. Four families were / are business owners, entrepreneurs, and employers within Stellenbosch, and the greater South Africa. At one point the combined employment offered by the four families via their businesses, totalled well in excess of 200 employment positions across South Africa.

During years of dedicated work, both Lindani and Bergplaas have been improved and upgraded over the years, and is ongoing. Despite this, there is no way that I would be able to invite business associates to my home due to the activities described herewith.

Bergplaas resort and caravan park is owned by one of the family members. It is a well situated property for caravanning and camping with resort status. Large investments were made to improve the resort to a functional, well maintained park. Unfortunately the activities outside the gates have resulted in numerous, good paying customers packing up and leaving early, to never return. Caravanning and camping enthusiasts communicate their experience via social media, and visitors' bad experiences have vastly affected the parks income potential.

The above mentioned have now reached a boiling point. Herewith some examples:

1. My wife and daughter were millimetres away from a head on collision with a speedster. Had it not been for the safety features of our vehicle it would have been a serious life and death situation.
2. My mother in law has suffered two such events in a very short period of time. She is aged 72.
3. A number of other family members can also describe their close encounters with speedsters and wheel spinners.

4. At the cost of one of our family members, rubbish and overgrowth were removed to open up a better line of sight around a corner, so to be better prepared in case of speeding drunken / drugged up drivers coming around the corner, normally on the wrong side of the road.
5. One Sunday morning, on our way to church, my wife and children had to view open oral sex next to the road.
6. We are often confronted by open public urinating and defecating, even on the road tarmac.
7. On one occasion two naked people were sleeping in their car parked across the entrance to Lindani. It took a while for them to register where they were, still suffering from the affects of the drugs the night before.
8. We often witness very young children present at gatherings, which might last till early hours of the morning, amidst loud thumping music, drunkenness, drug usage, sexual acts, drag racing and wheel spinning.
9. On one occasion returning from a Friday night function, my family and I were surrounded and blocked from driven to our gate by a group of drugged up / drunken gangsters.
10. About a bakkie load of rubbish which was dumped outside Bergplaas a day or so ago, was kindly collected, loaded and delivered back to the owner's driveway in Cloetesville today by a family member (rubbish contained a copy of an ID, together with discarded copies of accounts and an address in the same persons' name). Previous such evidence handed to authorities did not even result in a fine being issued.
11. To try discourage people from drinking and drugging till early hours of the morning, breaking beer bottles and literally covering both lanes of Helshoogte Road with broken glass, one family member is sometimes forced to surprising them with the odd pepper-ball. In their drunken / drugged state they experience some discomfort without knowing why, and might leave then.
12. The area is very well situated for drug-dealers, with a panoramic view of the road leading through Idas Valley. Any attempts by the SAPS to catch drug carriers red-handed, shifting their merchandise from CA registration vehicles (including a Cadalac driven by a rasta), to CL registration vehicles, are futile. By the time a squad of SAPS vehicles drive through Idas Valley, spotters most likely tip them off. We often experience a fleet of vehicle suddenly all starting up and leaving in hast toward the oncoming SAPS vehicles, as if on a Sunday afternoon drive.
13. We fear for the safety of our wives and children driving to and from our homes daily.

I copy affected family members herewith, who will all concur to the vailidity of this email to you.

Can anyone please offer us a practical resolve to this situation? We do not want to become yet more proudly South Africans looking eisewhere out of pure desperation due to lawlessness on our doorstep, such action known to local authorities for a very long time.

Best Regards

WATER SERVICES BY-LAW**1. PURPOSE OF REPORT**

To request approval from Council, in principle, to advertise the proposed Water Services By-Law for public participation.

2. BACKGROUND

The current by-law, Water Supply, Sanitation Services and Industrial Effluent By-Law is not aligned with the Water Services Act 108 of 1997 and its associated regulations.

The proposed Water Supply, Sanitation Services and Industrial Effluent By-Law will in comparison with the existing by-law address a wider spectrum of Water and Sewerage (Sanitation) Management matters thus ensuring that the Municipality conforms to its mandate in terms of the Constitution ensuring for clean and safe water services for its citizens.

3. DISCUSSION

The By-law contains provisions in support of standard procedures relating service connections to consumers, services specifications, compliance regulations and obligation matters relating to the consumers reforms aimed at minimizing the impacts and volumes of waste in addition to the municipality's Constitutional obligation to effective service delivery, to all relevant legislation.

The by-law propose to regulate all activities, infrastructure and entities associated with potable water, waste water generation, the disposal of sewerage effluent by all types of consumers

The proposed by-law is also not in contradiction with any existing policies (e.g., credit control policy).

CONSTITUTIONAL AND POLICY IMPLICATIONS

A municipality may make and administer by-laws for the effective administration of matters it has a right to administer in terms of section 156(2) and of the Constitution, Act 108 (as amended). The Council is obliged to ensure the provision of municipal services in terms of Chapter 7 of the Constitution which is also underpinned by the Local Government Municipal Systems Act, Act 32 of 2000 as amended.

Water Services are a local government competence to ensure the provision of proper potable water services, collection of sewage effluent from a full spectrum of consumers according to Schedule 5B of the Constitution. The Council has to consider the promulgation of a new by-law that aligns current and new functions with the national policy and legislation. The Water Supply, Sanitation Services and Industrial Effluent By-Law does not clearly address all requirements of the Water Services Act, Act 108 of 1997 with its associated with relevant regulations.

In terms of Section 160(2) of the Constitution, the passing of by-laws may not be delegated. Section 160(2) of the Constitution of South Africa read with section 12 of the Systems Act empowers a municipal council to pass by-laws. In terms of section 13 of the Systems Act, a by-law gives effect when published in the Provincial Gazette. Local Government Municipal Systems Act, 2000 (Act 32 of 2000).

Local Government Municipal Systems Act, 2000 (Act 32 of 2000):

Chapter 4 of the Systems Act requires a municipality to develop a culture of participatory governance so as to enhance, encourage and create conditions for the local community to participate in the affairs of the municipality.

Section 11(1) of the Systems Act determines that the executive and legislative authority of a municipality is exercised by a municipal council. The legislative authority, which includes the right to make by-laws cannot be delegated, as this is prohibited by section 160(2) of the Constitution. Section 11(3)(m) of the Systems Act relates to the passing of by-laws as a means for a municipality to exercise its legislative authority. Section 12 of the Systems Act provides the following:

Legislative procedures

- (1) Only a member or committee of a municipal council may introduce a draft by-law in the council.
- (2) A by-law must be made by a decision taken by a municipal council-
 - (a) In accordance with the rules and orders of the council; and
 - (b) With a supporting vote of a majority of its members.
- (3) No by-law may be passed by a municipal council unless-
 - (a) All the members of the council have been given reasonable notice; and

The proposed by-law has been published for public comment in a manner that allows the public an opportunity to make representations with regard to the proposed by-law.

In terms of Section 13 of the Systems Act, a by-law gives effect when published in the Provincial Gazette.

As part of the prescribed legislative process for the adoption of the Municipality's by-laws, the following process flow applies:

- (a) serve before Standing Committee and Mayco;
- (b) serve before the Council;
- (c) be advertised in the press for public comments;

(d) be open for inspection to the public at all municipal offices and libraries;

(e) re-submit to the Standing Committee, Mayco and the Council for final adoption

4.1 COMMENTS FROM DIRECTORATE: STRATEGIC & CORPORATE SERVICES (LEGAL SERVICES)

Item is compliant with the legislative prescripts and is supported.

4.2 COMMENTS FROM DIRECTORATE: FINANCIAL SERVICES

Finance supports the item.

The Water Service By-law is attached as **APPENDIX 1**.

RECOMMENDED

- (a) that the attached Water Services By-law be supported by Council in principle;
- (b) that the proposed by-law be duly advertised for public comment, be resubmitted together with any comments/ objections by the public, for final approval and adoption by the Council; and
- (c) that the By-Law, once approved and adopted by Council, be promulgated by the Directorate: Strategic and Corporate Services' legal team.

 - (c) in any other way interfere with a measuring device and its associated apparatus.
- (8) If the engineer considers that, a measuring device is a meter whose size is unsuitable because of the quantity of water supplied to premises, he may install a meter of a size that he considers necessary, and may recover the determined charge for the installation of the meter from the owner of the premises.
- (9) The municipality may require the installation, at the owner's expense, of a measuring device to each dwelling unit, in separate occupancy, on any premises, for use in ascertaining the quantity of water supplied to each such unit; but where controlled volume water-delivery systems are used, a single measuring device may otherwise be used for more than one unit.

87. Quantity of water supplied to customer

- (1) For the purposes of ascertaining the quantity of water that has been measured by a measuring device that has been installed by the engineer and that has been supplied to a customer over a specific period, it will, for the purposes of these by-laws, be presumed except in any criminal proceedings, unless the contrary is proved, that -
- (a) the quantity, where the measuring device designed to provide an uncontrolled volume of water, is the difference between measurements taken at the beginning and end of that period;
 - (b) the quantity, where the measuring device designed to provide a controlled volume of water, is the volume dispensed by the measuring device;
 - (c) the measuring device was accurate during that period;
 - (d) the entries in the records of the municipality were correctly made; and

- (e) if water is supplied to, or taken by, a customer without having passed through a measuring device, the estimate by the municipality of the quantity of that water shall be presumed, except in any criminal proceedings, to be correct unless the contrary is proved.
- (2) Where water supplied by the municipality to any premises is in any way taken by the customer without the water passing through any measuring device provided by the municipality, the municipality may, for the purpose of rendering an account, estimate, in accordance with subsection (3), the quantity of water supplied to the customer during the period that water is so taken by the customer.
- (3) For the purposes of subsection (2), an estimate of the quantity of water supplied to a customer shall, as the municipality may decide, be based either on -
 - (a) the average monthly consumption of water on the premises recorded over three succeeding measuring periods after the date on which an irregularity referred to in subsection (2) has been discovered and rectified, or
 - (b) the average monthly consumption of water on the premises during any three consecutive measuring periods during the twelve months immediately before the date on which an irregularity referred to in subsection (2) was discovered.
- (4) Nothing in these by-laws shall be construed as imposing on the municipality an obligation to cause any measuring device installed by the engineer on any premises to be measured at the end of every month or any other fixed period, and the municipality may charge the customer for an average consumption during the interval between successive measurements by the measuring device.
- (5) Until the time when a measuring device has been installed in respect of water supplied to a customer, the estimated or shared consumption of that customer during a specific period, must be based on the average consumption of water supplied to the specific supply zone within which the customer's premises are situated.
- (6) Where in the opinion of the engineer it is not reasonably possible or cost effective to measure water that is supplied to each customer within a determined supply zone, the municipality may determine a tariff or charge based on the estimated or shared consumption of water supplied to that supply zone.
- (7) The municipality must within seven days, on receipt of a written notice from the customer and subject to payment of the determined charge, measure the quantity of water supplied to the customer at a time, or on a day, other than that upon which it would normally be measured.
- (8) If a contravention of subsection (7) occurs, the customer must pay to the municipality the cost of whatever quantity of water was, in the opinion by the municipality, supplied to him.

88. Special measurement

- (1) If the engineer requires, for purposes other than charging for water consumed, to ascertain the quantity of water which is used in a part of a water installation, may, by written notice, advise the owner concerned of his intention to install a measuring device at any point in the water installation that he may specify.

- (2) The installation of a measuring device referred to in subsection (1), its removal, and the restoration of the water installation after such a removal shall be carried out at the expense of the municipality.
- (3) The provisions of Sections 20(5) and 20(6) shall apply, insofar as they may be applicable, in respect of a measuring device that has been installed in terms of subsection (1).

Notwithstanding the requirement that a certificate be issued in terms of Section 25, all water installations shall comply with SANS 0252 Part 1 and all fixed electrical storage water heaters shall comply with SANS 0254.

95. Use of pipes and water fittings to be authorised

- (1) No person shall, without the prior written authority of the engineer, install or use a pipe or water fitting in a water installation within the Municipality's area of jurisdiction unless it is included in the Schedule of Approved Pipes and Fittings as compiled by the municipality.
- (2) Application for the inclusion of a pipe or water fitting in the Schedule referred to in subsection (1) must be made on the form prescribed by the municipality.
- (3) A pipe or water fitting may be not be included in the Schedule referred to in subsection (1) unless it -

 - (b) bears a certification mark issued by the SANS to certify that the pipe or water fitting complies with an SANS Mark specification or a provisional specification issued by the SANS, provided that no certification marks shall be issued for a period exceeding two years; or
 - (c) is acceptable to the municipality.
- (4) The municipality may, in respect of any pipe or water fitting included in the Schedule, impose such additional conditions, as it may consider necessary in respect of the use or method of installation.
- (5) A pipe or water fitting shall be removed from the Schedule if it -
 - (a) no longer complies with the criteria upon which its inclusion was based; or
 - (b) is no longer suitable for the purpose for which its use was accepted.

- (a) the range of pressure in kPa over which the water fitting or appliance is designed to operate.
- (b) The flow rate, in litres per minute, related to the design pressure range, provided that this information shall be given for at least the following pressures: 20 kPa, 100kPa and 400 kPa.

97. Water demand management

- (1) In any water installation where the dynamic water pressure is more than 200 kPa at a shower control valve, and where the plumbing has been designed to balance the water pressures on the hot and cold water supplies to the shower control valve, a shower head with a maximum flow rate of greater than 10 litres per minute must not be installed.
- (2) The maximum flow rate from any tap installed on a wash hand basin must not exceed 6 litres per minute.

Part 6: Communal water supply services

98. Provision of water supply to several consumers

- (1) The engineer may install a communal standpipe for the provision of water supply services to several consumers at a location it considers appropriate, provided that a majority of consumers, who in the opinion of the engineer, constitute a substantial majority, and to whom Water Services will be provided by the standpipe, has been consulted by him or the municipality.
- (2) The engineer may provide communal water supply services through a communal installation designed to provide a controlled volume of water to several consumers.

Part 7: Temporary water supply services

99. Water supplied from a hydrant

- (1) The engineer may authorise a temporary supply of water to be taken from one or more fire hydrants specified by it, subject to such conditions and for any period that may be prescribed by him and payment of such applicable charges, including a deposit, as may be determined by the municipality from time to time.

- (4) The portable meter and all other fittings and apparatus provided for the temporary supply of water from a hydrant remain the property of the municipality and must be returned to the municipality on termination of the temporary supply. Failure to return the portable meter and all other fittings and apparatus shall result the imposition of penalties determined by the municipality from time to time.

Part 8: Boreholes

100. Notification of boreholes

- (1) No person may sink a borehole on premises situated in a dolomite area, and before sinking a borehole a person must determine if the premises on which the borehole is to be sunk are situated within a dolomite area.
- (2) The municipality may, by public notice, require -
 - (a) the owner of any premises within any area of the municipality upon which a borehole exists or, if the owner is not in occupation of such premises, the occupier to notify it of the existence of a borehole on such premises, and provide it with such information about the borehole that it may require; and
 - (b) the owner or occupier of any premises who intends to sink a borehole on the premises, to notify it on the prescribed form of its intention to do so before any work in connection sinking it is commenced.
- (3) The municipality may require the owner or occupier of any premises who intends to sink a borehole, to undertake an environmental impact assessment of the intended borehole, to the satisfaction of the municipality, before sinking it.
- (4) The municipality may by notice to an owner or occupier or by public notice, require an owner or occupier who has an existing bore-hole that is used for water supply services to -
 - (a) obtain approval from it for the use of a borehole for potable water supply services in accordance with Sections 6, 7 and 22 of the Act; and
 - (b) impose conditions in respect of the use of a borehole for potable Water Services.

Part 9: Fire services connections

101. Connection to be approved by the municipality

- (1) The engineer shall be entitled in his absolute discretion to grant or refuse an application for the connection of a fire extinguishing installation to the Municipality's main.
- (2) No water shall be supplied to any fire extinguishing installation until a certificate that the municipality's approval in terms of Section 25 has been obtained and that the installation complies with the requirements of these and any other by-laws of the municipality, has been submitted.

- (3) If in the engineer's opinion a fire extinguishing installation, which he has allowed to be connected to the municipality's main, is not being kept in proper working order, or is otherwise not being properly maintained, or is being used for purpose other than fire fighting, that shall be entitled either to require the installation to be disconnected from the main or itself to carry out the work of disconnecting it at the customer's expense.

102. Special provisions

The provisions of SANS 0252-1 shall apply to the supply of water for fire fighting purposes.

103. Dual and combined installations

All new buildings erected after the commencement of these by-laws, must comply with the following requirements in relation to the provision of fire extinguishing services:

- (a) If boosting of the system is required, a dual pipe system must be used, one for fire extinguishing purposes and the other for general domestic purposes.
- (b) Combined installations shall only be permitted where no booster pumping connection is provided on the water installation. In such cases a fire hydrant must be provided by the municipality, at the customer's expense, within 90 metres of the property to provide a source of water for the fire tender to use in extinguishing the fire.
- (c) Combined installations where a booster pumping connection is provided, shall only be permitted when designed and certified by a professional engineer.
- (d) All pipes and fittings must be capable of handling pressures in excess of 1 800 kPa, if that pressure could be expected when boosting takes place and must be capable of maintaining their integrity when exposed to fire conditions.

104. Connection pipes for fire extinguishing services

- (1) After the commencement of these by-laws, a single connection pipe for both fire (excluding sprinkler systems) and potable water supply services shall be provided by the engineer.
- (2) The engineer shall provide and install, at the cost of the owner a combination meter on the connection pipe referred to in (1).
- (3) A separate connection pipe shall be laid and used for every fire sprinkler extinguishing system unless the engineer gives his approval to the contrary.
- (4) A connection pipe must be equipped with a measuring device that will not obstruct the flow of water while the device is operating.

105. Valves and meters in connection pipes

Every connection pipe to a fire extinguishing installation must be fitted with valves and a measuring device which shall be:

- (a) supplied by the engineer at the expense of the customer;
- (b) installed between the customer's property and the main; and
- (c) installed in such position as may be determined by the engineer.

106. Meters in fire extinguishing connection pipes

The engineer shall be entitled to install a water meter in any connection pipe used solely for fire extinguishing purposes and the owner of the premises shall be liable for all costs in so doing if it appears to the municipality that water has been drawn from the pipe for purposes other than for the purpose of extinguishing a fire.

107. Sprinkler extinguishing installation

A sprinkler installation may be installed directly to the main, but the municipality may not be deemed to guarantee any specified pressure at any time.

108. Header tank or double supply from main

- (1) The customer must install a header tank at such elevation as will compensate for any failure or reduction of pressure in the municipality's main for its sprinkler installation, unless this installation is provided with a duplicate supply from a separate main.
- (2) The main pipe leading from a header tank to the sprinkler installation may be in direct communication with the main, provided that the main pipe must be equipped with a reflux valve which, if for any reason the pressure in the main fails or is reduced, will shut off the supply from the main.
- (3) Where a sprinkler installation is provided with a duplicate supply from a separate main, each supply pipe must be equipped with a reflux valve situated within the premises.

109. Sealing of private fire hydrants

- (1) Except where a system is a combined system with a combination meter, all private hydrants and hose-reels must be sealed by the municipality and the seals must not, except for the purposes of opening the hydrant or using the hose when there is a fire, be broken by any person other than by the municipality in the course of servicing and testing.
- (2) The customer must give the municipality at least 48 hours notice prior to a fire extinguishing installation being serviced and tested.
- (3) The cost of resealing hydrants and hose-reels shall be borne by the customer except when the seals are broken by the municipality's officers for testing purposes.
- (4) Any water consumed through a fire installation or sprinkler system shall be paid for by the customer at the charges determined by the municipality.

CHAPTER 5: CONDITIONS FOR SANITATION SERVICES

Part 1: Connection to sanitation system

110. Obligation to connect to sanitation system

- (1) All premises on which sewage is produced must be connected to the Municipality's sanitation system if a connecting sewer is available or if it is reasonably possible or cost effective for the municipality to install a connecting sewer, unless approval for the use of on-site Sanitation Services was obtained in accordance with Section 98.
- (2) The municipality may, by notice, require the owner of premises not connected to the municipality's sanitation system to connect to the sanitation system.
- (3) An owner of premises, who is required to connect those premises to the municipality's sanitation system in accordance with subsection (1), must inform the municipality in writing of any Sanitation Services, provided by the municipality on the site, which will no longer be required as a result of the connection to the sanitation system.
- (4) The owner will be liable for any charge payable in respect of Sanitation Services on the site, until an agreement for rendering those services has been terminated in accordance with the Municipality's By-laws relating to Credit Control and Debt Collection.
- (5) If the owner fails to connect premises to the sanitation system after having had a notice in terms of subsection (2) from the municipality, notwithstanding any other action that it may take in terms of these by-laws, may impose a penalty determined by it.

111. Provision of connecting sewer

- (1) If an agreement for Sanitation Services in respect of premises has been concluded in accordance with the Municipality's By-laws relating to Credit Control and Debt Collection and no connecting sewer exists in respect of the premises, the owner shall make application on the prescribed form, and pay the tariffs and charges determined by the municipality for the installation of a connecting sewer.
- (2) If an application is made for Sanitation Services which are of such an extent or so situated that it will become necessary to extend, modify or upgrade the sanitation system in order to provide Sanitation Services to any premises, the municipality may agree to the extension only if the owner pays or undertakes to pay for the cost, as determined by the engineer, of the extension, modification or upgrading of the services.
- (3) Only the engineer may install or approve an installed connecting sewer; but the owner or customer may connect the sanitation installation to the connection pipe.
- (4) No person may commence any development on any premises unless the engineer has installed a connecting sewer.

112. Location of connecting sewer

- (1) A connecting sewer that has been provided and installed by the engineer must -
 - (a) be located in a position determined by the engineer and be of a suitable size determined by the engineer; and

- (b) terminate at -
 - (i) the boundary of the premises; or
 - (ii) at the connecting point if it is situated on the premises.

- (2) The engineer may at the request of the owner of premises, approve, subject to any conditions that he may impose, a connection to a connecting sewer other than one that is most readily available for the provision of Sanitation Services to the premises; in which event the owner shall be responsible for any extension of the drainage installation to the connecting point designated by the municipality and for obtaining, at his own cost, any servitude over other premises that may be necessary.
- (3) Where an owner is required to provide a sewage lift as provided for in terms of the Building Regulations, or the premises are at a level where the drainage installation cannot discharge into the sewer by gravitation, the rate and time of discharge into the sewer has to be subject to the approval of the municipality.
- (4) The owner of premises must pay the connection charges and tariffs determined by the municipality before a connection to the connecting sewer can be effected.

113. Provision of one connecting sewer for several consumers on same premises

- (1) Notwithstanding the provisions of Section 46, only one connecting sewer to the sanitation system may be provided for the disposal of sewage from any premises, irrespective of the number of accommodation units of consumers located on such premises.
- (2) Notwithstanding subsection (1), the municipality may authorise that more than one connecting sewer be provided in the sanitation system for the disposal of sewage from any premises comprising sectional title units or if, in the opinion of the municipality, undue hardship or inconvenience would be caused to any consumer on such premises by the provision of only one connecting sewer.
- (3) Where the provision of more than one connecting sewer is authorised by the municipality under subsection (2), the tariffs and charges for the provision of a connecting sewer are payable in respect of each sewage connection so provided.

114. Interconnection between premises

An owner of premises must ensure, unless he has obtained the prior approval of the municipality and complies with any conditions that it may have imposed, that no interconnection exists between the drainage installation on his premises and the drainage installation on any other premises.

115. Disconnection of connecting sewer

The engineer may disconnect a drainage installation from the connection pipe and remove the connection pipe on the termination of an agreement for the provision of water supply services in accordance with the Municipality's By-laws relating to Credit Control and Debt Collection.

Part 2: Standards**116. Standards for Sanitation Services**

Sanitation Services provided by the municipality must comply with the minimum standards set for the provision of Sanitation Services in terms of the Section 9 of the Act.

Part 3: Methods for determining charges**117. Measurement of quantity of domestic effluent discharged**

- (1) As from 1 July 2008, the quantity of domestic effluent discharged shall be determined as a percentage of water supplied by the municipality; provided that where the municipality is of the opinion that such a percentage in respect of specific premises is excessive, having regard to the purposes for which water is consumed on those premises, the municipality may reduce the percentage applicable to those premises to a figure which, in its opinion and in the light of the available information, reflects the proportion between the likely quantity of sewage discharged from the premises and the quantity of water supplied.
- (2) Where premises are supplied with water from a source other than, or in addition to, the municipality's water supply system, including abstraction from a river or borehole, the quantity must be a percentage of the total water used on those premises that is reasonably estimated by the municipality.

118. Measurement of quantity and determination of quality of industrial effluent discharged

- (1) The quantity of industrial effluent discharged into the sanitation system must be determined -
 - (a) where a measuring device is installed, by the quantity of industrial effluent discharged from the premises as measured by that measuring device; or
 - (b) until the time that a measuring device is installed, by a percentage of the water supplied by the municipality to those premises.
- (2) The municipality may require the owner of any premises to incorporate in any drainage installation conveying industrial effluent to a sewer, any control meter or gauge or other device of an approved type and in the control of the municipality for the purpose of ascertaining to the satisfaction of the municipality, the tempo, volume and composition of the effluent.
- (3) The municipality may install and maintain any meter, gauge or device referred to in subsection (2) at the expense of the owner of the premises on which it is installed.
- (4) Where premises are supplied with water from a source other than or in addition to the municipality's water supply system, including abstraction from a river or borehole, the quantity will be a percentage of the total water used on those premises reasonably estimated by the municipality.
- (5) Where a portion of the water supplied to the premises forms part of the end product of any manufacturing process or is lost by reaction or evaporation during the manufacturing process or for any other reason, the municipality may on application by the owner reduce the assessed quantity of industrial effluent.

- (6) The municipality may at its discretion enter into an agreement with any person discharging industrial effluent into the sanitation system, establishing an alternative method of assessing the quantity and tempo of effluent so discharged.
- (7) Charges relating to the quality of industrial effluent will be based on the formula for industrial effluent discharges as prescribed in Schedule C.
- (8) The following conditions apply in respect of the assessment of the quality of industrial effluent discharged:
 - (a) each customer must conduct the prescribed tests, on a regular schedule as provided for in the approval to discharge industrial effluent, and report the results to the municipality;
 - (b) the municipality may conduct random compliance tests to correlate with those used in subsection (a) and, if discrepancies are found, the values of the municipality shall, except for the purpose of criminal proceedings, be presumed to be correct and further tests may be required by the municipality to determine, at the cost of the customer, the values for the formula;
 - (c) the average of the values of the different analysis results of 24 hourly composite or snap samples of the effluent, taken during the period of charge, will be used to determine the quality charges payable;
 - (d) in the absence of a complete daily set of 24 hourly composite or snap samples, the average of not less than two values of the sampled effluent, taken during the period of charge, will be used to determine the charges payable;
 - (e) in order to determine the strength (Chemical oxygen demand, suspended solids concentration, Ammonia concentration, and orthophosphate concentration) in the effluent as well as the concentration of Group 1 and 2 metals, pH value and conductivity, the municipality will use the tests normally used by municipalities for these respective purposes. Details of the appropriate test may be ascertained from the municipality or the SANS. Test results from a laboratory, accredited by the municipality, will have precedence over those of the municipality;
 - (f) the formula is calculated on the basis of the different analysis results of individual snap or composite samples and the period of treatment for calculation shall not be less than one full 24-hour period; unless evidence, is submitted to the municipality that a lesser period is actually applicable;
 - (g) the terms of the disincentive formula cannot assume a negative value;
 - (h) the total system values for quality charges shall remain constant for an initial period of one month, but in any case not longer than twelve months from the date of commencement of these charges, after the expiry of which time they may be amended or revised from time to time depending on such changes in the analysis results or further samples, as may be determined from time to time: provided that the municipality in its discretion in any particular case, may levy the minimum charges prescribed in subsection (7)(l) without taking any samples;
 - (i) whenever the municipality takes a sample, one half of it must be made available to the customer;

- (j) for the purpose of calculating of the quantity of effluent discharged from each point of discharge of effluent, the total quantity of water consumed on the premises shall be allocated to the several points of discharge as accurately as is reasonably practicable;
- (k) the costs of conveying and treating industrial effluent shall be determined by the municipality and shall apply with effect from a date determined by the municipality; and
- (l) in the discretion of the municipality, the charges for industrial effluent may be changed to a fixed monthly charge determined by taking into consideration the effluent strengths, the volume and the economic viability of micro and small industries.

119. Reduction in the measured quantity of effluent discharged

- (1) A person shall be entitled to a reduction in the quantity of effluent discharged, as determined in terms of Sections 51 and 52, where the quantity of water, on which a percentage is calculated, was measured during a period where water was wasted or a leakage went undetected, if the consumer demonstrates to the satisfaction of the municipality that the water was not discharged into the sanitation system.
- (2) The reduction in the quantity shall be based on the quantity of water lost through leakage or wastage during the leak period.
- (3) The leak period shall be either the measuring period immediately prior to the date of repair of the leak, or the measurement period during which the leak is repaired, whichever results in the greater reduction in the quantity.
- (4) The quantity of water lost shall be calculated as the consumption for the leak period less the average consumption, based on the pre-ceding 3 (three) months, for the same length of time. In the event of no previous history of consumption being available, the average water consumption will be determined by the municipality, after taking into account all information that is considered by it to be relevant.
- (5) There shall be no reduction in the quantity if a loss of water, directly or indirectly, resulted from a consumer's failure to comply with these or other by-laws.

120. Charges in respect of "on-site" Sanitation Services

Charges in respect of the removal or collection of conservancy tank contents, night soil or the emptying of pits will cover all the operating and maintenance costs arising from the removal of the pit contents, its transportation to a disposal site, the treatment of the contents to achieve a sanitary condition and the final disposal of any solid residues and are payable by the owner.

Part 4: Drainage installations

121. Installation of drainage installations

An owner must provide and maintain his drainage installation at his own expense, unless the installation constitutes a basic sanitation facility as determined by the municipality, and

except where otherwise approved by the municipality, must ensure that the installation is situated within the boundary of his premises.

- (1) The municipality may prescribe the point in the sewer, and the depth below the ground, at which any drainage installation is to be connected and the route to be followed by the drain to the connecting point and may require the owner not to commence the construction or connection of the drainage installation until the municipality's connecting sewer has been laid.
- (2) Any drainage installation that has been constructed or installed must comply with any applicable specifications in terms of the Building Regulations and any standard prescribed in terms of the Act.
- (3) No person shall permit the entry of any liquid or solid substance whatsoever, other than clean water for testing purposes, to enter any drainage installation before the drainage installation has been connected to the sewer.
- (4) Where premises are situated in the 1 in 50 years flood plain, the top level of all service access holes, inspection chambers and gullies must be above the 1 in 50 years flood level.
- (5) After the completion of any drainage installation, or after any alteration to any drainage installation is completed, the plumber responsible for the execution of the work must submit to the building inspection section of the municipality a certificate certifying that the work was completed to the standards set out in the building regulations, these by-laws and any other relevant law or by-laws.
- (6) No rainwater or storm-water, and no effluent other than an effluent that has been approved by the municipality, may be discharged into a drainage installation.

122. Disconnection of drainage installations

- (1) Except for the purpose of carrying out maintenance or repair work, no drainage installation may be disconnected from the connection point.
- (2) Where any part of a drainage installation is disconnected from the remainder because it will no longer be used, the disconnected part must be destroyed or entirely removed from the premises on which it was used, unless the municipality approves otherwise.

THE MUNICIPAL SYSTEMS ACT

Tariffs

Section 75 of the Municipal Systems Act provides as follows -

“75. By-laws to give effect to policy

- (7) *A municipality must adopt by-laws to give effect to the implementation and enforcement of its Tariff Policy.*
- (8) *By-laws in terms of subsection (1) may differentiate between different categories of users, debtors, service providers, services, service standards and geographical areas as long as such differentiation does not amount to unfair discrimination.”*

When making by-laws relating to tariffs it is important that a Tariff Policy must be drafted by the municipality prior to making such by-laws. The policy must precede the by-laws.

The by-laws must give effect to the Tariff Policy. The Municipal Systems Act provides the following in respect of a Tariff Policy -

“74. Tariff Policy

- (9) *A municipality must adopt and implement a Tariff Policy on the levying of fees for municipal services provided by the municipality itself or by way of service delivery agreements, and which complies with the provisions of this Act and with any other applicable legislation.*
- (10) *A Tariff Policy must reflect at least the following principles, namely that -*
 - (a) *users of municipal services should be treated equitably in the application of tariffs;*
 - (b) *the amount individual users pay for services should generally be in proportion to their use of that service;*
 - (c) *poor households must have access to at least basic services through –*
 - (i) *tariffs that cover only operating and maintenance costs;*
 - (ii) *special tariffs or life line tariffs for low levels of use or consumption of services or for basic levels of service; or*
 - (iii) *any other direct or indirect method of subsidization of tariffs for poor households;*
 - (d) *tariffs must reflect the costs reasonably associated with rendering the service, including capital, operating, maintenance, administration and replacement costs, and interest charges;*
 - (e) *tariffs must be set at levels that facilitate the financial sustainability of the service, taking into account subsidization from sources other than the service concerned;*
 - (f) *provision may be made in appropriate circumstances for a surcharge on the tariff for a service;*

- (g) *provision may be made for the promotion of local economic development through special tariffs for categories of commercial and industrial users;*
- (h) *the economical, efficient and effective use of resources, the recycling of waste, and other appropriate environmental objectives must be encouraged:*
 - (i) *the extent of subsidization of tariffs for poor households and other categories of users should be fully disclosed.*
- (11) *A Tariff Policy may differentiate between different categories of users, debtors, service providers, services, service standards, geographical areas and other matters as long as the differentiation does not amount to unfair discrimination.”*

Credit Control

Section 75 of the Municipal Systems Act provides as follows -

“98. By-laws to give effect to policy

- (2) *By-laws in terms of subsection (1) may differentiate between different categories of ratepayers, users of services, debtors, taxes, services, service standards and other matters as long as the differentiation does not amount to unfair discrimination.”*

When making by-laws relating to Credit Control and Debt Collection it is important that a Credit Control and Debt Collection policy must be drafted by the municipality prior to making such by-laws. The policy must precede the by-laws.

The by-laws must give effect to the Credit Control and Debt Collection policy. The Municipal Systems Act provides the following in respect of a Credit Control and Debt Collection Policy -

ANNEXURE B

EXTRACTS FROM THE STRATEGIC FRAMEWORK FOR WATER SERVICES, 2003

Tariffs

Retail tariff policies must be based on the following tariff principles:⁷

- Tariffs should be applied equitably and fairly.
- The amount individual users pay for services generally should be in proportion to their use of that service.
- Water and sanitation tariffs for domestic use should be pro-poor in their orientation, that is, they should seek to ensure that a minimum basic level of water supply and sanitation service is affordable for all households, especially vulnerable groups such households headed by women or children or affected by HIV/Aids.
- Tariffs must reflect all of the costs reasonably associated with rendering the service.
- Tariffs must be set at levels that facilitate the financial sustainability of the service, taking into account subsidization from sources other than the service concerned.
- The economical, efficient and effective use of resources, the reduction of leaks and unaccounted-for water, the recycling of water, and other appropriate environmental objectives must be encouraged.
- A Tariff Policy may differentiate between different categories of users, debtors, service providers, services, service standards, geographical areas and other matters as long as the differentiation does not amount to unfair discrimination.
- All forms of subsidies should be transparent and fully disclosed.

Retail Water and Sanitation Tariff Policies – Water Services Authorities

Retail water and sanitation tariff policies must be developed by Water Services authorities. These must conform to the following requirements.

Revenue requirements: When determining the revenue requirements for Water Services, a Water Services institution must take into account at least the following: realistic operating and maintenance costs (including any relevant and applicable overheads, charges and levies), interest costs, depreciation charges, a reasonable rate of return on assets (where appropriate), and provisions for bad debt and other future costs (including infrastructure expansion). In addition, a Water Services institution must determine the cash needs to maintain a financially viable and sustainable operation over time, taking into account any available and secure operating subsidies. A Water Services institution may take into account a contribution to the general municipal rates fund (where appropriate).

⁷ These tariff principles are consistent with those set out in the Municipal Systems Act and the Water Services Act.

Costs: All Water Services authorities must plan to provide all households with at least a basic level of water supply and sanitation service). In the first instance, national government subsidies in the form of the municipal infrastructure grant and the local government equitable share should be used to assist in the provision of these services). Taking these sources of subsidy into account, any additional costs associated with the provision of basic water supply and Sanitation Services (including the implementation of free basic water supply and sanitation policies) must be included in the revenue requirements outlined above. The costs of rehabilitation and system expansion must be taken into account. Water losses and unaccounted-for water must be managed down to acceptable levels. The allocation of funds for maintenance must be sufficient to maintain the Water Services infrastructure and related systems adequately.

Contributions: The contribution from Water Services to the rates and general fund should be limited to less than ten percent of gross revenue from the sale of water. Income from sanitation charges should not be used to subsidize other services.

Consumer categories: Retail water and wastewater tariffs shall distinguish between at least three categories of consumers: domestic, industrial and other.

Levels of service: Retail water and wastewater tariffs shall distinguish between significantly different levels and standards of service provided and between at least the following: a communal water service (Water Services provided to more than one household); where a controlled (limited or restricted) volume of water is supplied to a household; where an uncontrolled volume of water is supplied to a household (that is, the volume of water supply is not limited for all practical purposes); where a household is connected to a sewer and where a household is not connected to a sewer.

Cross-subsidies: Tariffs shall support the viability and sustainability of water supply services to the poor through cross-subsidies (where feasible) and discourage wasteful or inefficient use.

Metering: All connections providing an uncontrolled volume of water supply shall be metered and tariffs shall be applied in proportion to water use.

Marginal domestic tariff above the basic amount: Where domestic consumers consume just more than a defined basic amount, Water Services authorities shall not be entitled to recoup the full financial cost of providing the basic amount in the marginal tariff for the next small increment consumed. In other words, if the free basic water allocation is 6 kl per month, then a Water Services authority may not require a consumer who uses 7 kl per month to pay for the full financial costs for the supply of 7 kl per month.

Domestic water tariffs for water consumed significantly in excess of a defined basic amount shall at least recover the full direct financial costs of the service provided in excess of the defined basic amount, and may take into account any external economic costs and benefits (externalities) associated with the provision of the service including, where appropriate, the average incremental costs that would be incurred to increase the capacity of the water supply and wastewater infrastructure to meet an incremental growth in demand.

Industry and non-domestic: Water and sanitation tariffs for industrial and other categories of non-domestic consumer shall at least recover the full direct financial costs of the service. Tariffs may take into account any external economic costs and benefits (externalities) associated with the provision of the service including, where appropriate, the average incremental costs that would be incurred to increase the capacity of the water supply and wastewater infrastructure to meet an incremental growth in demand.

Tariff increases: Water Services authorities must strive to keep tariff increases to below the rate of inflation. Tariff increases must be based on the efficient use of resources and the actual input cost increases incurred (for example, chemical and energy costs). Where there have been no recent expansions in infrastructure, then it should be possible to keep tariff increases to well below the rate of inflation due to the fact that fixed depreciation and financing costs are likely to make up a significant share of total costs. Conversely, when system expansion has occurred and this has resulted in increased depreciation and financing costs, then tariff increases in excess of inflation may be necessary in order to maintain the financial viability of the service. Where current tariffs do not adequately cater for system rehabilitation and maintenance, then tariffs will need to be increased appropriately.

Subsidies: Where subsidies for Water Services are applied, these shall be prioritized for the provision of basic water supply and Sanitation Services in terms of the free basic water and free basic sanitation policies.

Special tariffs: Water Services authorities may implement special tariffs during periods of water restrictions to reduce water use to within sustainable levels.

CREDIT CONTROL

Effective credit control is a critically important component of providing a reliable and effective service to all communities and consumers. Failure to consistently apply fair credit control policies can result in consumers and whole communities going without water.

Water Services authorities have the responsibility to develop a credit control policy. This policy must provide for credit control procedures which are fair and equitable, provide for warnings and adequate notice, provide for consumer representations, allow alternative payment arrangements, and set out a fair procedure that will be applied in the event of non-payment. Where a consumer continues to fail to pay for services provided after the application of such procedures and a fair warning, a municipality must be able to take actions that will limit its financial loss and promote good payment habits.

When a municipality formulates its credit control policy it must take into account the impact of credit control mechanisms (and the lack thereof) on the community, the existing service delivery context, the need for financial viability to support the sustainable provision of services and the effectiveness of the proposed credit control mechanisms.

The following principles must be incorporated in the credit control policy:

Compassion: Local government must develop and implement a credit control policy which is compassionate, especially towards poor and vulnerable households. This means that priority should be given to providing a reliable, secure, sustainable and affordable water supply and sanitation service to all households including the poor. Policies and procedures should seek to avoid the accumulation of bad debt and the high costs associated with restrictions or disconnections and reconnections.

Communication: Consumers must be informed with respect to water consumption, credit control, debt collection and disconnection policies, credit control procedures and consumer responsibilities. Communication must be clear and accessible and, wherever practical, in the home language of the consumer.

Fair Process: All restrictions and disconnections must be done in terms of a fair and transparent process and as a result of the failure of a consumer (or consumers) to fulfill their obligations in terms of a consumer contract.

Warning: Domestic consumers must receive a warning prior to any credit control action.

Restricting Domestic Connections: In the first instance, and after following due process (including a warning), domestic water supply connections must be restricted and not disconnected, ensuring that at least a basic supply of water is available. (Only where the costs associated with restricting Water Services in this manner would have a substantial and significant impact on the sustainable provision of Water Services to the broader community, may Water Services be disconnected after proper procedures have been followed.)

Tampering: Disconnection (after a warning) may be appropriate where services equipment has been tampered with, since tampering may jeopardize the health of consumers and the proper functioning of the system.

Interference: Where a domestic consumer's access to Water Services has been restricted (in terms of an appropriate policy and procedure) and that consumer interferes with the restriction in a manner that renders the limitation less effective, the municipality may disconnect such a consumer (after a warning) until such time as the consumer has made an arrangement for settlement of the outstanding amount and has paid any fine that the Water Services provider may impose.

Disconnecting Water Supplies: A Water Services provider has the right to disconnect Water Services of domestic water consumers only where all of the above provisions have been followed. A Water Services provider has the right to disconnect Water Services of non-domestic water consumers whenever a non-domestic consumer has breached its contract with the Water Services provider, provided a fair process is followed.

In addition to the above, various alternative or complementary credit control mechanisms could be considered where appropriate.

Responsibility for Implementing Credit Control: Water Services providers have the responsibility of implementing credit control (in terms of the credit control policy established by the Water Services authority) where they assume the financial risk and have the responsibility for collecting user charges. Where this is not the case, then the Water Services authority has the responsibility to implement credit control itself. In order to protect the financial viability of a Water Services provider, a Water Services authority must give the Water Services provider the right to restrict and disconnect Water Services connections subject to the credit control policy established by the Water Services authority and developed in terms of the policies set out in this White Paper.

Balancing Rights and Responsibilities: The limitation and disconnection of Water Services is a sensitive issue that requires the balancing of rights and obligations. Consumers have a right to a basic water supply and sanitation service. However, this right also embodies the obligation to exercise that right reasonably and in accordance with general limitations placed on that right. At the same time, Water Services authorities must ensure sustainable provision of Water Services and safeguard the financial viability of the Water Services provider. These rights and responsibilities must be clearly communicated to consumers.

Kode van Goeie Praktyk insake die Hantering, Vervoer en Versorging van

Diere wat Geskut word

DEEL I: Kraalvereistes

1. Vir doeleindes van hierdie bylae het kraal, kamp en hok dieselfde betekenis, en is enige verwysing na 'n kraal ook 'n verwysing na 'n kamp of 'n hok of 'n soortgelyke struktuur waarin 'n dier bewaar kan word.
2. Verskillende spesies diere moet in afsonderlike krale gehou word.
3. Diere mag nie in oorvol krale opeengehoop word nie en die ruimte moet voldoende wees sodat alle diere gelyktydig kan lê en daar mag nie minder as een-punt-vyf (1.5) vierkante meter beskikbare grondruimte per dier wees nie.
4. Opstandige diere mag nie saam met ander diere aangehou word nie.
5. Jong, gespeende of jeugdige diere mag nie saam met volwasse diere in dieselfde kraal aangehou word nie, met uitsondering van 'n vroulike dier en haar kleintjies.
6. Voorsiening moet in krale gemaak word vir–
 - (a) geriewe soos rakke, voerbakke of ander geskikte houers wat maklik skoonmaak, wat die voer van diere van die grond af moontlik maak en wat gediens kan word sonder om diere te steur;
 - (b) watertroë wat 'n voldoende, geskikte voorraad vars water te alle tye voorsien;
 - (c) voldoende geriewe vir die behoorlike skoonmaak van krale; en
 - (d) geriewe vir die veilige hantering van diere.
7. (a) Krale moet te alle tye in 'n goeie, skoon en werkende toestand gehou word.
- (b) Skerp punte van drade, gebreekte planke, happerige punte, en skarniere of boutte wat uitsteek, wat beserings aan diere kan veroorsaak moet verwyder of na behore bedek word.
8. Die vloer van elke kraal, insluitend die op-en-aflaai vragwal, toevoerbane en drukgange van die laaifasiliteit by 'n skut, moet voorsien word met oppervlaktes wat glipvry is en wat effektief en behoorlik skoongemaak kan word, sodat dit geskik sal wees vir die aanhou en / of hantering van diere.

DEEL II: Hantering van diere

9. Diere moet te alle tye menslik, met geduld en verdraagsaamheid behandel word.
10. Die volgende moet in gedagte gehou word tydens die hantering van diere– (a) diere reageer beter wanneer hul aanjaer agter hulle staan, maar binne
 hul
 gesigsveld.
- (b) diere in 'n trop reageer beter wanneer hulle in 'n trop aangejaag word in plaas van een een.
11. Diere mag nie aan hul bene gesleep, of aan hul koppe, ore of sterte gedra word nie.
12. Jong kalfies moet opgelig word by die bors en agterkwart en gedra word indien hulle nie self met gemak kan loop nie. As alternatief moet hulle gerig word deur een hand op 'n agterkwart en die ander hand naby die skof of nek te plaas, en deur saam te stap in die vereiste rigting, teen 'n geskikte en gemaklike pas, gestuur word.
13. Slegs stokke met seildoek oorgetrek of dryfbande mag gebruik word tydens die aanjaag van diere, en dit is verkieslik om op die grond agter die dier te slaan, as op die dier self.
14. Elektriese aanporders, stokke of sambokke mag nie op jong diere gebruik word nie.
15. Elektriese aanporders mag nie oormatig of onnodig gebruik word nie, en mag glad nie op die gesig of anus of geslagsdele van diere gebruik word nie.

DEEL III: Verskuiwing van diere

16. Diere wat aangejaag word, moet te alle tye onder behoorlike en bekwame toesig wees.
17. Diere moet op 'n kalm manier teen 'n pas wat ontspanne, gemaklik, en natuurlik vir sodanige dier sal wees, aangejaag word, wat nie vinniger mag wees, as die pas van die stadigste dier in die trop nie.
18. Diere mag nie vir langer as tien (10) uur aaneen aangejaag word, sonder 'n rustyd van minstens een (1) uur nie. Genoegsame en geskikte vars water moet aan al die diere voorsien word, gedurende die proses van aanjaag.
19. Geen dier mag vir afstande langer as die volgende afstande aangejaag word nie–
 - (a) Gedurende 'n reis wat nie langer as een (1) dag duur nie– (i) 20 km vir skape en bokke; en
 (ii) 30 km vir
 beeste;
 - (b) Gedurende 'n reis wat meer as een (1) dag duur–

- (i) twintig (20) km gedurende die eerste dag, en vyftien (15) km vir elke daaropvolgende dag, vir skape en bokke; en
 - (ii) vyf-en-twintig (25) km gedurende die eerste dag, en twintig (20) km vir elke daaropvolgende dag vir beeste;
20. Sodra diere hul oornag kamp bereik, moet hulle onmiddellik voer en water kry, welke voer voldoende en geskik moet wees vir elke betrokke spesie.
21. Diere mag nie na donker aangejaag word nie.
22. Geen dier wat siek, beseer of vermink is, mag aangejaag word nie.

DEEL IV: Voertuie gebruik tydens die vervoer van diere

23. Voertuie en alle sleepwaens wat vir die vervoer van gehoefde diere gebruik word, moet geskik wees vir sodanige diere en in 'n padwaardige toestand wees.
24. Alle voertuie en sleepwaens in paragraaf 23 genoem moet–
- (a) 'n geskikte glipvrye vloerbedekking hê, wat nie die skoonmaak van die voertuie se vloer sal belemmer nie, en wat bevestig mag wees met verwyderbare heglatte of staal roosters, of heglatte of staalroosters wat kan skanier;
 - (b) voldoende lug en lig deurlaat, terwyl dit in beweging of stilstaande is, terwyl geen voertuig geheel en al toegemaak mag wees nie.
 - (c) voldoende beskerming teen uitlaatgasse hê, aangesien blootstelling aan uitlaatgasse diere se asemhaling kan belemmer en angs kan veroorsaak;
 - (d) sywande hê wat hoog genoeg is, om te voorkom dat diere ontsnap of uit die voertuig val, met dien verstande dat die sywande en / of afskortings -
 - (i) wanneer in gebruik op 'n voertuig om diere van mekaar te skei, van sodanige hoogte moet wees, dat die afskorting nie laer as die skouer van die grootste dier wat vervoer word, sal wees nie;
 - (ii) in die geval van beeste, maar uitgesonderd kalwers, 'n minimum hoogte van eenduisend agthonderd (1800) millimeter moet wees; en
 - (iii) in die geval van kleiner diere, 'n minimum hoogte van sewehonderd-en-vyftig (750) millimeter moet wees.
 - (e) in die geval van multi-dek voertuie, moet die hoogtes tussen dekke voldoende wees, ten einde die grootste diere in staat te stel om natuurlik vry en ten volle regop te staan, en moet voldoende ruimte toegelaat word bokant die diere vir lug om vrylik te vloei. In die geval van skape en varke, mag die vryhoogte nie minder as eenduisend (1000) millimeter wees nie.
 - (f) soliede ondeurdringbare vloere hê;
 - (g) op en aflaaioeninge aan die agterkant van die voertuig hê, wat

oor die volle wydte van die voertuig strek of indien dit aan die kante van die voertuig is, moet dit 'n opening hê, van nie minder as tweeduisend vierhonderd (2400) millimeter nie;

- (h) hekke hê, met of sonder afskortings, wat -
 - (i) van sodanige ontwerp en konstruksie is, dat dit sterk genoeg is en geskik is vir die beoogde vervoer van die betrokke diere; en
 - (ii) wat goed beveilig is, en vrylik kan oop en toemaak.

25. Die aantal diere wat saam geplaas is in enige ruimte vir doeleindes van die transport van sodanige diere moet sodanige beperk word, dat die veiligheid en gerief van die diere gedurende die vervoer daarvan verseker word en die voorgestelde vloerruimte per dier sal wees -

(a) een-punt-vier (1.4) vierkante meter oppervlakte per groot dier; en

(b) nul-punt-vyf (0.5) vierkante meter oppervlakte per klein dier wees.

DEEL V: Verskaffing van voer en water aan diere voor die oplaai daarvan

26. Diere moet voorsien word van voldoende en geskikte voeding en vars water, totdat hulle afgevoer word per voertuig.

DEEL VI: Op-en-aflaai prosedures

27. Die op- en aflaai van diere, op en vanaf voertuie, moet so stil en kalm moontlik geskied, en moet met die nodige geduld en verdraagsaamheid plaasvind, sonder die onnodige teistering, verskrikking, verkneusing en besering van diere, of onnodige lyding of spanning.

28. Geen dier mag aan sy kop, wol, vel, ore, stert, horings of bene op- of afgelaai word nie.

29. Geen dier mag op enige ander wyse as die volgende, op- of afgelaai word nie—

(a) By wyse van 'n glipvry oppervlakte, wat sterk genoeg is om die gewig van die spesie dier wat hanteer word te ondersteun, en wat met voldoende sypanele of traliewerk toegerus is, wat die ontsnapping of afval van diere vanaf die loopplank sal voorkom. Sodanige loopplank mag nie 'n helling van meer as vyf-en-twintig (25) grade hê nie; of

(b) By wyse van 'n laaiwal wat op dieselfde hoogte is as die vloer van die voertuig, of wanneer die afgelaai van diere plaasvind, nie meer as driehonderd-en-tien (310) millimeter onder die vloer van die aflaai voertuig is nie en met 'n helling van nie meer as vyf-en-twintig (25) grade nie.

30. Indien 'n voertuig toegerus is met 'n eie verwyderbare laaibrug, moet dit 'n glipvrye oppervlakte hê, en moet dit van voldoende lengte wees sodat, wanneer dit laat sak is, die helling daarvan nie

meer as vyf-en-twintig (25) grade sal wees nie, met die afstand tussen die grond en die haak van die laaibrug nie meer as eenhonderd-en-tien (310) millimeter nie.

31. 'n Laaibrug se hoogte moet elke keer aangepas word, om presies met die voertuig se vloerhoogte ooreen te stem.
32. Die reis vir die afvoer van diere, moet so gou moontlik begin nadat die diere opgelaai is en diere moet onmiddellik afgelaai word, wanneer die bestemming bereik word.
33. Tensy voldoende voorsiening gemaak is vir die effektiewe skeiding van verskillende spesies diere, mag sodanig verskillende spesies diere nie in dieselfde voertuig gelaai en vervoer word nie.
34. Diere van verskillende ouderdom, grootte en geslag mag nie saam gelaai en vervoer word nie, tensy voldoende voorsiening gemaak is vir die effektiewe skeiding van sodanige diere.
35. Volwasse beeste met horings, mag nie saam met poenskapbeeste vervoer word nie en hulle moet altyd afsonderlik gehok word.
36. Indien daar voldoende rede bestaan om te glo dat 'n dier tydens 'n voorgenome reis geboorte mag skenk, mag sodanige dier nie gelaai word vir vervoer daarvan nie.
37. Ingeval 'n dier wel tydens 'n reis geboorte skenk, moet die nodige voorsorg getref word om die ma en kroos te beskerm teen vertrapping of besering of teistering deur ander diere.
38. Ingeval die–
 - (a) transport voertuig onklaar raak;
 - (b) transport voertuig in 'n ongeluk of botsing betrokke raak; of
 - (c) 'n dier of diere in transito beseer raak of vrek, moet die karweier onmiddellik die besonderhede rapporteer aan, of hulp vra
 - van - (i) in die geval van paragraaf (a), 'n insleepdiens;
 - (ii) in die geval van paragraaf (b), die Suid-Afrikaanse Polisie Diens en / of die betrokke verkeersowerheid;
 - of
 - (iii) in die geval van paragraaf (c), 'n veearts.
39. Indien die vervoer van enige dier, 'n besering aan die dier self of ander diere kan veroorsaak, moet dit op so 'n manier onder bedwang gehou word, dat sodanige besering voorkom kan word.
40. Geen dier mag vir meer as vier (4) uur in enige vier en twintig (24) uur tydperk onder bedwang gehou word nie.
41. Geen draad of baaltou mag gebruik word om diere se bene of voete mee vas te bind nie.
42. Ten einde verwurging of nekbreke by diere te voorkom, mag geen dier met 'n skuifknoop aan hul horings of nek aan 'n voertuig vasgemaak

word nie. Die tou wat gebruik word om 'n dier onder bedwang te hou, moet op die dier se kniehoogte aan die voertuig vasgemaak word, sodat ingeval die dier sou val, die risiko dat die dier beseer sou raak of sou sterf, verminder word. Die tou aldus gebruik, moet lank genoeg wees, ten einde 'n dier toe te laat om gemaklik in 'n natuurlike posisie te lê, met die kop regop.

DRAFT

5.7.2	BY-LAW ON THE PREVENTION OF PUBLIC NUISANCES AND THE KEEPING OF ANIMALS
--------------	--

1. PURPOSE OF REPORT

The purpose of this submission is to submit the repealed draft “By-Law on the Prevention of Public Nuisances and the Keeping of Animals,” to the Council for in principle adoption.

2. BACKGROUND

Several complaints regarding various types of nuisances have been received. Methods to address said complaints were investigated by the administration. It was proven that the previous by-laws were not adequate to address the problems experienced. Copies of said By-laws are attached hereto as **APPENDICES 1 – 5**. A new By-law has thus been drafted and is herewith submitted to Council for consideration, which is attached as **APPENDIX 6**.

3. DISCUSSION

The Manager: Corporate Strategy and Compliance has indicated that the By-Law had been distributed internally. The By-Law will be advertised after Council approval for public comment, after which the By-Law will be resubmitted to Council for consideration.

4. CONCLUSION

The By-Law is thus submitted to Council for consideration.

RECOMMENDED

- (a) that Council approves the draft “By-Law on the Prevention of Public Nuisances and the Keeping of Animals”; and
- (b) that the Administration be mandated to advertise said By-law after which it will be re-submitted to Council for final consideration.

- (b) that the Administration be mandated to advertise said By-law whereafter same be re-submitted to the relevant Committee for consideration and subsequent recommendation to Council for finalisation.

FURTHER COMMENTS BY COMMUNITY AND PROTECTION SERVICES

It was established that the said By-Law was never advertised by the then Director: Strategic and Corporate Services as per Council resolution. The Acting Manager: Law Enforcement identified the need to have the draft by-law reviewed due to certain shortcomings in the draft which would have been problematic should the draft By-Law have been adopted and approved in its current format. The department has till now been using the old By-Law applicable to Stellenbosch Municipality insofar as the control of dogs and the suppression of public nuisances were concerned.

The following By-Laws will be repealed with the promulgation of the new By-Law;

BY-LAWS OF THE DISESTABLISHED MUNICIPALITY OF STELLENBOSCH		
PN No.	Short title	Extent of repeal
<i>PK 683/1984</i>	Stellenbosch Municipality: By-law relating to the control and Keeping of Dogs	Whole
<i>PK 667/1994</i>	Amendment to the Dog Control By-law	Whole
<i>PK 539/1995</i>	Municipality for the area of Franschhoek: By-law on the Prevention and Suppression of Nuisances	Whole
<i>PK 180/1998</i>	Stellenbosch Transitional Local Council: By-law on the Prevention and Suppression of Nuisances	Whole
<i>PK 6011/2003</i>	Stellenbosch Municipality: By-law for the Control of Certain Offences in Public Places	Whole

The draft By-Law has been amended and is attached as **APPENDIX 7**.

COMMENTS BY OTHER DEPARTMENTS**LEGAL DEPARTMENT****CONSTITUTIONAL AND LEGAL FRAMEWORK**

A municipality may make and administer by-laws for the effective administration of matters it has a right to administer in terms Section 156 (2) of the Constitution. The Council is obliged to ensure the provision of municipal services in terms of Chapter 7 of the Constitution which is reinforced by the Local Government Municipal Systems Act, Act 32 of 2000 as amended.

Section 160(2) of the Constitution, provides that the passing of by-laws may not be delegated. In terms of Section 160(2) of the Constitution read with Section 12 of the Systems Act, empowers a municipal council to pass by-laws. Section 160(4) of the Constitution, provides that a Municipal Council has both legislative and executive powers to make policies and by-laws, provided these fall within the competencies of the Municipality. Furthermore, no by-law may be passed by a municipality unless all the members of the council have been given reasonable notice and the proposed by-law has been published for public comment.

The concept by-law must be advertised for public input in terms of Section 12(3)(b) of the Systems Act. In terms of section 13 of the Systems Act, a by-law gives effect when published in the Government Gazette.

As part of the prescribed legislative process for the adoption of the Municipality's by-laws, the following process flow applies:

1. Mayoral Committee to adopt in principle
2. Submit draft by-law to Council for adoption in principle
3. Advertise proposed by-laws in press.
4. Re-submit by-laws together with any public input to the Mayoral committee and thereafter the Council for final approval.
5. Once the By-law is adopted by the Council, a list of contraventions will be drawn

The draft By-Law and recommendations are supported.

RECOMMENDED

- (a) that Council approves the amended draft "By-Law on the Prevention of Public Nuisances and the Keeping of Animals", in principle; and
- (b) that the Administration be mandated to advertise said By-Law for public comment whereafter same be re-submitted to Council for approval.

EVENTS POLICY

1. PURPOSE OF REPORT

To request Council to approve and adopt the Events Policy for Stellenbosch Municipality.

2. BACKGROUND

The Events Policy, attached as **APPENDIX 1**, sets the strategic direction for Stellenbosch and its region, and aims to create mutually beneficial outcomes for the Greater Stellenbosch residents, businesses and visitors by using the platforms created by events to contribute to Stellenbosch's, growth, development and inclusivity.

Stellenbosch is known for hosting major local, national and international events. The Events Policy will assist and guide the municipality in managing event related activities in an efficient and effective manner thereby providing clarity to all role players and stakeholders. Stellenbosch Municipality would like to ensure that it becomes a town for great events for visitors to the town and the events industry, by creating stability in the town's events calendar and clearly defining processes and systems that support events. The Municipality plays an important role in: the regulations of events, partnerships with events organized in the WC024, events organization, facilitation and the provision of services at events. Currently events are regulated by the Events Act of 2010 and are applicable to events which accommodate more than 2000 people. The municipality has recently approved the Events Bylaw which was promulgated on 12 February 2016. The Events Bylaw gives the legal parameters under which the Events Policy will function in terms of processes to be followed and implemented.

3. DISCUSSION

The draft Events Policy prescribes processes to be followed by the Municipality for providing event support, commercial partnerships, event permit applications, co-ordination of the Municipality's events calendar, hospitality, guest management, ticketing, event marketing and event services.

The Municipality may from time to time choose to partner with event organizers in delivering events in Stellenbosch. This could include events with the following outcomes;

- Events that attract a high proportion of visitors to Stellenbosch.
- A media attraction, particularly international and national media.
- Events that provide the Municipality with marketing opportunities.
- Demonstrates a positive economic, social and environmental impact.
- Events that address seasonality in the Municipality's events calendar.
- Applies responsible tourism and sustainable living principles.
- Events that apply event greening principles.
- Information on trading opportunities for local traders.
- Job creation opportunities as a result of the event.
- Information on local suppliers.

- Lasting legacies from the hosting of the event.

It's important to note that should Council support the idea of partnerships as defined in the Events Policy, consideration be given to the establishment of a Special Events Committee of Council to facilitate the selection of events that the Council wishes to support.

Regulation 319 of the said Act provides:

- for the attendance of the service
- (b) for the use of the service and equipment; or

- The tariffs are payable to the municipality

Tariffs

Chances are that there may be an increase in the demand for hosting events within the municipal jurisdiction which will result in a higher demand for service delivery by the Community and Safety Services at increasing cost. The increasing demand may have a negative influence on normal service delivery in the sense of having to pay officials overtime for the duration of these events, putting extreme financial obligation on the municipality.

It is therefore imperative that all sport and event organisers have to pay the prescribed tariffs in terms of Council's tariff policy as per Chapter 2 (4) of the Bylaw. It is advisable that the delegation is amended to make provision that the Director Community and Protection Services has the authority to partially waive or completely waive the service delivery cost for any specific event after consultation with the Municipal Manager as Accounting officer.

It is advisable that the event organiser pay the full amount of service delivery fee at least three (3) working days prior to the event to ensure that service delivery at the event will continue as planned and agreed upon. If the organiser does not pay the prescribed fees, the directorate hold the right to refuse service delivery recognizing that the department has certain legal obligations at certain event even if the organizer should refuse to pay the prescribed tariff amount. It is furthermore advisable that the event organiser be held responsible for any/ all additional charges in regards to damage incurred or for additional services rendered.

TRAFFIC SERVICES

1. Overview -

During the Festive Season all major routes through Stellenbosch become an access route to beaches and surrounding towns which increases vehicle and pedestrian traffic.

During this period, foreign visitors to the town increases as well as holiday makers from the rest of the country, placing a higher risk in crime opportunities and traffic volumes.

This integrated operational plan reflects on traffic law enforcement operations, communication and road safety initiatives during the festive season 2016/17.

It includes operational implementation and reports on roadside activities on all National, Provincial and the general road network in and surrounding WC 024.

The objective is to contribute to a reduction in road crashes, fatalities and trauma during this heightened period of celebrations and festivities.

Road fatalities and injuries are sudden, violent and traumatic events and the impact is long-lasting and often permanent.

The grief and distress experienced by huge number of people is all the greater because many of the victims are young and many of the crashes could and should have been prevented.

COMMUNITY SERVICES

SPORTS AND FACILITIES

1. INTRODUCTION

Cloetesville Swimming Pool is a community pool that is situated in Curry Street, Cloetesville in Stellenbosch. The area is about 1 hectare in size.

The Swimming Pool is managed by the Sports and Facilities Department and caters mostly for the communities of the Cloetesville and Kayamandi areas.

The pool can accommodate up to three hundred and fifty (350) people.

2. SITUATION

With the school holidays, year-end functions, festive and summer season, the pool is daily utilized by visitors who want to utilize the pool. The lack of recreational facilities leads to the over utilisation and over-crowding of the pool. This result in less people being able to travel and visit beaches due to the increase in the economy. Therefore more people use the opportunity to visit the local public Swimming Pool.

Due to this, the pool is often over utilized which send out panic alerts because of possible drowning that can happen. The appointment of lifesavers is also a problem due to budget constraints. There is also the possibility of visitors who is under the influence of substance abuse which is not always easy to control. The racial issue is a huge concern because of the diversity of the patrons using the facility.

3. MISSION

- The Department will formulate performance management standards to measure the use and output of our facilities.
- To provide formal sports participation opportunities through an integrated and sustainable club structure that is endorsed by their Sports Councils.

5.8	YOUTH, SPORTS AND CULTURE: (PC: XL MDEMKA (MS))
5.8.1	PROGRESS REPORT ON THE FORMULATION OF THE LEASE AGREEMENTS FOR EACH SPORT COUNCIL

1. PURPOSE OF REPORT

To illustrate the progress made in the finalization of the lease agreements for the various Sport Councils in the Greater Stellenbosch. The report outlines the public participation processes and a range of engagements with the Sport Councils which lead to the signing of a pledge in support of the implementation of the New Sports Management Model.

2. BACKGROUND

2.1 Adoption of the Sport Plan

Council has adopted the Sports Management Model in 2016 and the department Community Services with the assistance of the legal department is in the process of drafting the lease agreements for the various categories as outlined in the model.

The first draft management plan was circulated in 2011 to various internal and external stakeholders for comments to kick start the design process. A draft was then tabled before Council and various concerns were raised relating to the first draft.

A second draft was submitted to Council in 2012 and it was recommended that more consultation should take place with stakeholders. The recommendation of Council has led to a workshop being held with the SSRA in 2013 and the proposed plan was discussed with Councillors, members of the public and the various Sports Councils.

The New Management Plan proposed different categories of facility management based on the existing infrastructure on each Sport field. During the special workshop in June 2014 presentations was made to the Sport Councils explaining the new categories and facility management approach for the future.

The draft plan was resubmitted to Council and again concerns were raised by Councillors due to their limited knowledge of the practical implication of the plan. Subsequently it was referred back for a special meeting with the previous Speaker and all Ward Councillors.

A discussion document was created and distributed to all Sport Councils, Councillors and the SSRA relating to the plan in December 2015. This was again followed by a workshop which were held on 9 December 2015 with the SSRA and Sport Councils that discussed the key elements of the sport plan and the broader understanding of the National Sport and Recreation Plan (=NSRP).

A strategic meeting was held in January 2016 by the department with Director Community & Protection Services and the Portfolio Chair, Pietman Retief, relating to the progress and processes to be followed.

Two special meetings were held in February 2016 with the SSRA executive to clarify concerns and uncertainties relating to the rollout and implementation of the sport plan. A follow-up session with the SSRA and Sport Councils was held on 18 February 2016 to explain the process relating to the roll-out of the Sport Plan and the briefing sessions that will explain clearly to each individual sport council the sport plan and the lease agreement.

A roadshow was done in which the sport plan was explained and the basic stipulations of the lease agreements were highlighted. This roadshow was completed in May 2016. The sport plan was adopted in June 2016.

2.2 The draft Lease Agreements

A draft lease agreement was developed in 2015 that could not be used for all the categories as envisioned by the sport plan. Weber Wentzel Attorneys was appointed with the assistance of our legal department who developed a draft lease agreement from all of the above inputs and consultative meetings.

On 13 October 2016 the draft lease agreement was discussed with all the Sport Councils and additional roadshows were held in all wards.

The lease agreements will be finalised by the end of November 2016 which will serve before Council in February 2017.

3. DISCUSSION

An extensive public participation process was followed with the relevant stakeholders who set the scene for the development of the new plan and the lease agreements.

4. LEGAL IMPLICATION

This item is for noting, and it explains the process that was followed.

5. FINANCIAL IMPLICATION

The Sports Councils currently operate and function with the approved operational and capital budgets.

The progress reports are attached as **APPENDIX 1** and **2**

RECOMMENDED

that the progress made with the implementation of the Sport Management Model and the drafting of the various lease agreements, **be noted**.
