## BPAMS

### UPGRADING OF THE MUNICIPAL BUILDING PLAN APPLICATION MANAGEMENT SYSTEM

**System Down: 24 June 2022 to 30 June 2022**

It is the role of government to come up with innovative ways to streamline processes and Stellenbosch Municipality is committed to improve the ease of doing business in Stellenbosch. Development plays an important and integral role in the economic vitality of Stellenbosch, and the efficient processing of land use and building development applications is an essential enabler.

To assist with the processing of building plan applications, Stellenbosch Municipality introduced a Building Plans Application Management System, known as BPAMS, which has been in operation since 1 January 2021.

A similar system has now been developed for land use and land development applications and the Town Planning Application Management System, in short known as TPAMS, will be launched on the 1st of July 2022.

To enable the proper integration and functioning of these systems, BPAMS has been upgraded. The upgrading of the system will require that the existing data from the previous version is successfully migrated to the new version, for which purpose BPAMS had to be closed.

Stellenbosch Municipality apologise for any inconvenience.

**The new BPAMS for the submission of Building Plan applications will go live 1 July 2022.**
