PART B – SPECIFICATIONS AND PRICING SCHEDULE

12. SPECIFICATIONS

1. Introduction

Stellenbosch Municipality requires a spatially based integrated Capital Expenditure Framework (CEF) which outlines capital investment plans over a 10 year horizon, taking into account all key plans and spatial strategies and concepts.

As a local authority Stellenbosch Municipality qualified as an intermediary city municipality in 2018, which entitled the municipality to gain access to the Integrated Urban Development Grant. To secure the grant, the municipality is required to publish a Capital Expenditure Framework annually by 31 March annually. The municipality obtained funding at the end of 2019 from DBSA to assist with the development of a fully compliant CEF by 31 March 2021.

2. Background

The Integrated Urban Development Grant Framework requires intermediate city municipalities to develop a Capital Expenditure Framework. The “Capital Expenditure Framework” (CEF) is referred to as a key component of the SDF in the Spatial Planning and Land Use Management Act, Act 16 of 2013 (SPLUMA) section (21)(n). The legislative context is within the realm of municipal planning and relates specifically to Integrated Development Plans (IDPs), Spatial Development Frameworks (SDFs) and Municipal Budgeting. The Department of Cooperative Governance has prepared guidelines that seek to assist intermediate cities to develop their CEF. Section 153 of the Constitution of South Africa states that a municipality must structure and manage its administration, budgeting and planning process to give priority to basic needs of the community and to promote the social and economic development of the community. It instructs municipalities to be developmental in nature, and it states that it should be done through two vehicles, namely planning processes and budgeting processes.

In April 2016 cabinet adopted the Integrated Urban Development Framework (IUDF) as the official national urban policy of government under the custodianship of the Department of Cooperative Governance (CoGTA). The IUDF marks a new deal for South Africa’s cities and towns. It sets a policy framework to guide the development of inclusive, resilient and liveable urban settlements while addressing the unique conditions and challenges facing South Africa’s cities and towns. The key outcome of the IUDF is spatial transformation and to create a growth model of compact, connected and coordinated cities and towns.

Whilst the IUDF responds to the National Development Plan (NDP), it also responds to urbanisation challenges that South Africa (SA) is faced with.

The role of a CEF is to frame the outcomes of a multitude of planning documents within a municipality in order to ensure that implementation is guided by a strategic, spatial, financial and social logic. This is informed by national and provincial strategies and policies and those at the municipal level, namely, Integrated Development Plans (IDP), Spatial Development Framework (SDF) and other departmental strategies.

A CEF serves not only as a rationale towards capital investment planning that provides business intelligence, data validation, programme and project synchronisation and prioritisation but also as performance evaluation mechanism. This fundamental element of a municipality – its planning and investment rationale – is guided, managed and finally implemented through means of numerous processes guided by many more legislative frameworks, guidelines, toolkits, and circulars, each related to a specific component of the municipal planning and implementation process essentially described in the municipal Spatial Development Framework (*mSDF*), Integrated Development Plan (IDP), the Long Term Financial Plan (LTFP) and finally the Capital Expenditure Framework (CEF).

The simultaneous management of these processes - processes relating to strategic analysis and planning, best scenario identification, phasing and implementation, as well as monitoring and readjusting, is complex and data-intensive. This complexity, together with numerous challenges at the local government level that relates to inadequate internal capacity, insufficient backlog-, asset- and budgeting management processes are at the heart of what the CEF seeks to address. The role of the CEF is therefore to strengthen the process currently institutionalised within the municipality, and to show how capital flows from planning to implementation, whilst aligning to a spatial transformation vision. The aim is that the CEF becomes the main pivot point around which these processes will rally. The overall aim of the CEF in summary is to clearly outline:

- priorities identified in the spatial development framework (*mSDF*);
- promote long-term infrastructure planning;
- promote infrastructure planning that is better integrated across sectors;
- outline long terms financial planning and the application of the financial strategy within the context of the capital investment framework (CIF) over 10 years;
- Prioritise capital projects in line with funding availability;
- Clearly outline the demand quantification and prioritization; promote a more integrated approach to planning bringing together spatial, technical, financial and planning expertise into a single strategy aligned to the Integrated Development Plan of the Municipality.

One element of the implementation of the IUDF is the introduction of a consolidated infrastructure grant, and all 39 ICMs are all eligible for the Integrated Urban Development Grant (IUDG) starting from the 2019/20 financial year. Among other features, the IUDG moves towards programmatic grant monitoring. The business plan for the IUDG is a three-year capital programme that is aligned with a long-term (10-year) Capital Expenditure Framework (CEF).

The CEF will be used as the primary instrument for grant qualification in the application for IUDG funding by the municipality in addition to the governance criteria set out for ICM's.

Stellenbosch has a demand quantification tool, CP³⁶, which will be utilised to identify capital projects over a 10 year period, which will inform the 2021/22 MTREF Budget (3 years) and the CEF.

⁶ The CP3 tender expires on 30 June 2021 but remains in effect to be used for the demand quantification of
