It seeks to enhance the effective functioning of the town and surrounding rural areas through integrated planning of transport infrastructure, facilities and operations within the context of the Municipality's IDP and land development objectives. This includes planning for the role of non-motorised forms of transport such as walking and cycling and encourage sustainable modes of transport such as public transport and increased numbers of passengers per vehicle.

Date: 05 May 2022
Time: from 09h00 am until 17h00pm
