Own revenue consists mainly of service charges at 63.67% per cent of the R2 020 050 868 billion own revenue budget.

Operating Revenue Variance Report

The variances between actual operating revenue and the planned operating revenue contained in the SDBIP are explained per revenue source and are as follow:

Revenue by Source

3.1 Property Rates and Service charges - refuse

Property rates and service charges refuse are billed monthly. However, some consumers applied to have their property rates and service charges billed annually. This has resulted in an over performance when compared to the year-to-date budget projections as the annual applications did not form part of the monthly budgeted revenue projections.

3.2 Service charges - electricity revenue

The municipality has billed R27 756 407 more electricity than initially anticipated. The largest over performance was noted for electricity sales relating to the time of use tariffs (R27 651 013). On average the municipality has billed R11 970 066 more per month, on this category of usage, than for the same period of the prior financial year. This is as a result of the impact the lock-down regulations had on the local economy and the related consumption. When considering the increasing trend over the winter months, the relaxing of the lock-down levels as well as the historical consumption, it is probable that the municipality will exceed its amended budget for the time of use tariff by R17 326 933. An increase for this category of usage is recommended to be considered during the Mid-year adjustment budget process.

3.3 Service charges - water revenue

The municipality has billed R6 456 029 less water than initially anticipated. Water usage fluctuates according to seasonal trends and an increase in consumption is expected during the summer season. The largest under performances were noted for the water sales relating to conventional users (R6 609 099). On average the municipality has billed R2 275 250 less per month, on this category of usage, than for the same period of the prior financial year. The water revenue will be closely monitored to inform amendments needed during the Mid-year adjustment budget process.

3.4 Service charges - sanitation revenue

The municipality has billed R6 828 153 more sanitation than initially anticipated. The largest over performances were noted for pump/removal of wastewater (R1 594 522) and sanitation charges (R2 909 953). On average the municipality has billed R398 630 and R194 561 more per month, on these categories of usage, than for the same period of the prior financial year. The sanitation revenue will be closely monitored to inform amendments needed during the Mid-year adjustment budget process.

3.5 Interest earned – external investments

An under performance was noted for interest earned – external investments to the amount of R4 084 357. The variance is mainly due to the Covid- 19 pandemic which resulted in the prime interest rate being reduced. This reduction has resulted in a significant decrease in our call accounts and primary bank account interest rates. Furthermore, we have received lower rates on offer from investing institutions than the previous financial years and a decline in the availability of capital investment further negatively impacts this line item. Cognisance will be taken of the above during the Midyear adjustment budget process.

3.6 Fines, penalties, and forfeits

An underperformance was noted to the amount of R35 783 809. The recognition of traffic fines in terms of iGRAP 1 will be done monthly, including the journal processed on the financial system. The lack of processing is due to capacity constraints experienced and the appointment of staff will be expedited. It should be noted that the budget projections will be re-assessed during the Mid-year adjustment budget process as the past three financial years yielded an average income of R100 294 857.

3.7 Licences and permits

An over performance is noted for licences and permits to the amount of R1 483 130. The over performance is due to more licences and permit renewals as well as accompanying applications being received than initially anticipated.

3.8 Agency services

An over performance is noted for agency services to the amount of R415 410. The over performance is due to no revenue being anticipated for the agency service (vehicle registrations) for the first two months of this financial year.

3.9 Other revenue

An under performance is noted for other revenue to the amount of R3 875 311. The underperformance is largely due to no revenue being recognised in respect of parking fees which accounts for R3 218 751 of the negative variance. Capacity constraints are being experienced by the relevant section and are being attended to. An interim arrangement has been made and an improvement will be noted during the next reporting period.
