Reg. no. A/1061/1998

1. GENERAL INFORMATION

1.1 INTRODUCTION

AHG Town Planning was appointed by the owner of Erf 372, Jamestown to apply on behalf of the Trust for the subdivision of the property in order separately alienate the four portions created through this action.

The purpose of the report is to outline the proposed subdivision and motivate the different aspects involved in order to obtain the approval of Stellenbosch Municipality.

1.2 LOCALITY

Erf 372 is situated at the corner of Blakemore Street and Klaradyn Street in Jamestown. A Locality Plan is included.

The site falls within the jurisdiction area of the Stellenbosch Local Municipality.

1.3 TITLE ASPECTS

The property is in the process of being registered in the Deeds office and a copy of the draft Title Deed and application to apply for a Certificate of Registered Title is included.

1.3.1 PROPERTY DESCRIPTION

ERF 372 JAMESTOWN,
IN THE MUNICIPALITY AND DIVISION OF STELLENBOSCH,
PROVINCE WESTERN CAPE,

1.3.2 CONVEYANCER CERTIFICATE

A Conveyancer Certificate was not prepared. It can however be prepared on request.

1.3.2 SIZE

The property is **947 m²** in extent.

1.3.3 OWNERSHIP

The property is registered in the name of **MONICA VAN NIEKERK TRUST Registration Number IT3593/1995**.

1.3.4 MORTGAGE BONDS:

There are no bonds registered against the title of this property.

1.3.5 TITLE DEED CONDITIONS:

There are no conditions of title prohibiting the proposed subdivision.

1.4 EXISTING ZONING AND LAND USE

In terms of the Stellenbosch Municipality Zoning Scheme By-Law, 2019, Erf 372 is zoned "**Conventional Residential Zone**".

The property is currently vacant.

The above aerial photo shows the property in the contexts of its surrounding environment

1.5 SURROUNDING ZONING AND LAND USE

The application site is located within a residential area. Abutting the application site on all sides are single residential erven (some also vacant).

2. THE APPLICATION

2.1 APPLICATION I.T.O PREVAILING LEGISLATION

In terms of the Stellenbosch Municipality Zoning Scheme By-Law, 2019, Erf 372 is zoned “**Conventional Residential Zone**”.

- **Application is made In terms of Section 15(2)(d) of the Stellenbosch Municipal Land Use Planning By-law, 2015 for the subdivision of Erf 372, Jamestown.**

2.2 PROPOSED DEVELOPMENT

There is no specific development proposal available at this stage and the owner will either install services and then sell the subdivided portions on to prospective individual buyers, or she may decide to develop it herself at a later stage and then selling a newly completed house or develop a plot and plan concept for prospective buyers. The owner never-the-less desires to subdivide the property proactively in order to have these options available when a decision is made at a later stage.

Given the current size of this particular erf in question, it is proposed to subdivide the property into four (4) portions, as follows:

- Proposed Portion A, measuring **225 m²**,
- Proposed Portion B, measuring **192 m²**,
- Proposed Portion C, measuring **184 m²** and
- leaving a remainder, indicated as Proposed Portion D, measuring **344 m²** in extent.

Please refer to the subdivision plan included.

3. MOTIVATION

3.1 OVERVIEW AND NEED FOR DEVELOPMENT

As stated above the owner plan to either sell the newly created and serviced subdivisions on to prospective investors, or she may decide at a later stadium to build 4 new dwellings to be made available for sale to prospective buyers.

The proposal is to alienate the properties separately on a “full title” basis rather than to develop four units and register a sectional title which is not viable on such a small scale. Full title ownership is also deemed much more desirable that sectional title.

It is clear from the aerial view on the previous page that the ruling erf size in Jamestown is much smaller that the application property. The need for smaller erven is also evident given the number of subdivision applications handled by just this firm alone in the past 2 -3 years, and by just looking at the similar subdivisions which have already taken place in the immediate area. Jamestown is perceived as still one of the more affordable suburbs in Stellenbosch and properties are in high demand due to its excellent central and highly accessible location and the amazing mountain views visible from nearly

every vantage point in the neighbourhood. From a densification point of view, this phenomenon is also very encouraging, placing less pressure on developing areas outside the existing urban edge.

3.3 DESIRABILITY OF THE PROPOSED DEVELOPMENT

3.3.1 ACCESSIBILITY & PARKING

The existing property is a corner erf bordering Klaradyn -, Blakemore - and Montrose Streets. The 4 proposed subdivisions will not take access of the same street and it is proposed that portion "A" take access via a 3,5m panhandle from Blakemore Street; Portion "B" take access off Klaradyn Street, while the portion "C" will take access from either Klaradyn or Blakemore streets depending on the final design of the house. The remainder, indicated as portion "D" will take access of Blakemore Street.

In terms of parking provision, the zoning scheme requires two parking bays per residential unit. Given the size of the proposed subdivisions, this requirement can easily be met.

3.2.2 SPATIAL PLANNING AND LAND USE MANAGEMENT ACT, 2013

Section 7 stipulates principles that apply to spatial planning, land development & land use management. Under the principles of spatial sustainability and efficiency:

- Under the principle of spatial sustainability that: spatial planning must (*inter alia*) protect prime and unique agricultural land and promote land development in locations that are sustainable **and limit urban sprawl** and result in communities that are viable.
- Under the principle of efficiency that: land development optimises the use of **existing resources and infrastructure**.

The location of the property within the existing build up area of Jamestown ensures that the proposed development is compliant with these principles.

3.2.3 WESTERN CAPE LAND USE PLANNING ACT, 2014.

Chapter 6 stipulates principles that apply to land use planning. Under the principles of spatial sustainability:

land use planning should (*inter alia*) —

- (i) promote land development that is **spatially compact**, resource-frugal and within the fiscal, institutional and administrative means of the relevant competent authority in terms of this Act or other relevant authority;
- (ii) ensure that special consideration is given to the **protection** of prime, unique and high potential **agricultural land**;
- (vi) promote land development in locations that are sustainable and **limit urban sprawl**;

Under the principles of spatial efficiency:

- (a) land development should **optimise** the use of ***existing resources, infrastructure, agriculture, land, minerals and facilities***;
- (b) integrated cities and towns should be developed, whereby—
 - (i) the social, economic, ***institutional*** and physical aspects of land development is integrated;
 - (ii) land development in rural and urban areas in support of each other is promoted;

- (iii) the **availability** of **residential** and **employment opportunities** in **close proximity** to, or **integrated** with, each other is **promoted**;
- (iv) a **diverse combination** of **land uses** is **promoted**;
- (v) the phenomenon of **urban sprawl** in urban areas is **discouraged** and the development of **more compact towns** and cities with **denser habitation** is promoted;
- (vi) historically distorted spatial patterns of settlement are corrected; and
- (vii) the quality and functionality of the public spatial environment is promoted;

The above selected extracts, with relevant **emphasis added**, indicates the support and legislative requirement for well-planned and coordinated densification. This application is therefore deemed compliant with this legislative principles.

3.3.4 AVAILABILITY OF ENGINEERING SERVICES

The property is linked to existing municipal service infrastructure and the application will have little additional service capacity requirements. New service connections will be provided for the additional portions created. See included engineers plan indicating existing and new water and sewer connections.

3.3.5 IMPACT ON THE ENVIRONMENT:

The proposal merely entails the subdivision of this fairly large residential property into smaller erven which will be in line with the character of the surrounding area. It is our opinion that the possible addition of four well designed residential dwellings on this vacant property will bring much needed renewal and enhance the character of the area.

3.3.6 PUBLIC PARTICIPATION

The adjacent property owners will be notified of the proposed subdivision as per the requirements of the By-law and notifications send out to them for comment and/or objections.

Any neighbour who feels that their rights are affected will have an opportunity to make a representation or lodge an objection. This is however not anticipated since the development of this vacant property is expected to enhance the area and is viewed as a positive addition to the street scape.

4. SUMMARY AND CONCLUSION

Application is made for the subdivision of the erf into four portions. The owner plans to either sell the newly created and serviced subdivisions on to prospective investors, or maybe at a later stadium build 4 new dwellings to be made available for sale to prospective buyers.

The information provided supports the fact that the proposed subdivision will be desirable and lead to the positive enhancement of the area and promote new development potential in the area.
