## B. REAGENTS, BUFFERS AND STANDARDS

### 1. INTRODUCTION

An essential component of managing water resources and the environment is that of monitoring and analysis of samples taken from the environment. Without the chemical and microbiological analysis of water samples, it would not be possible to determine the status and safety of water supplies, which are an essential requirement for the well-being of communities, and the sustenance of life. General Conditions of Contract as amended will apply to this tender.

Stellenbosch Municipality as a Water Services Authority is responsible for the provision of water and wastewater services, it is required to ensure that suitable monitoring programmes are implemented in accordance with the requirements of the latest version of SANS 241 Drinking Water as well as in accordance with the requirements of the General Authorisation or the site-specific permit/license of the respective Wastewater Treatment Plants. Stellenbosch Municipality Laboratory Services perform routine analytical tests by analysing the water or effluent for the different substances of concern on a weekly basis. Certain operational parameters will be measured on an hourly basis.

To ensure fairness and compliance with the Municipal Financial Management Act (Act No. 56 of 2003) and the Preferential Procurement Policy Framework Act, bidders are not required to provide the brands mentioned. However, any reagents offered must work (plug and play) on existing equipment without the need to recalibrate any equipment.

### 2. SCOPE

Various chemicals and consumables are used in the analytical and microbiological tests performed at Stellenbosch Municipality Laboratory Services situated at the Stellenbosch Wastewater Treatment Works. This tender caters for the supply and delivery of chemicals and consumables used in the operational processes of Laboratory Services. It must be clearly understood that the tendered prices must include the cost of all arrangements necessary for the delivery of the goods to Stellenbosch Municipality Laboratory Services. Delivery times must be clearly stipulated.

Since the Stellenbosch Municipality owns equipment from various manufacturers, it has been found that reagent concentrations varies from manufacturer to manufacturer. For this purpose, some reagents will appear more than once in the pricing schedule under different categories. Bidders may bid for any one or more category. For the bidder to be considered responsive for a category, the bidder must bid for all items in the category.

### 3. QUALITY

Stellenbosch Municipality participate in laboratory proficiency schemes to ensure credibility of results which is in line with the ISO 17025 standard and therefore requires manufacturers/suppliers of chemicals and consumables, to subscribe to at least a similar certification or at least ISO 9000 certified. All chemicals must be of Analytical Grade (AR) unless otherwise stipulated. All standards/buffers listed must be traceable to the National Institute of Standards and Technology (NIST) and a certificate must be provided to confirm traceability with delivery. Suppliers must be able to provide an original copy of the certificate of analysis for the respective

chemicals/consumables upon delivery. Suppliers must not quote on generics, equivalents or alternatives, those suppliers who quote on those will not be considered.

Please quote on what is stipulated on the tender document. The successful tender/s must keep stock of the items they have been awarded, the maximum waiting time for chemicals/consumables to arrive from date of order must not be more than two weeks unless otherwise stipulated. Should the item take longer than the delivery time specified, a penalty will be implemented, which will be charged at 10% per day of total purchase price. If the tenderer can demonstrate that the delay was beyond their control then the penalty will be re-considered.

All chemicals/consumables supplied to Stellenbosch Municipality Laboratory Services must have at least an 80% shelf life remaining upon delivery, where applicable. If the item delivered has <80% shelf life the item will be returned to the supplier at the cost of the tenderer.

All consumables required are given in the pricing schedule. If the minimum order quantity is more than the packaging size stipulated in the pricing schedule, the bidder must include a letter stating minimum order quantities and the reasons thereof in the tender submission.
