4	As Ward Councillor and User Department, we commit to attend all agreed upon meetings and workshop to finalize project plans and ensure that we are prepared for these meetings		
5	We will identify and sign off on all agreed upon ward projects in time for the draft budget approval		
6	The submission for the draft budget will cover the total sum for the ward allocations. No projects will be identified after the approval of the draft budget.		
7	As responsible User Department representative, I commit to cost all identified projects		
8	As Ward Councillor, I understand that projects that have not been approved in the annual budget and included in the SDBIP of the User Department cannot be implemented.		
9	We will utilize the adjustment budget to ensure sufficient funding for approved projects and not identify new projects that are not included in the SDBIP of the User Department.		
10	As Ward Councillor, I commit the active involvement on the day of myself, the ward committee members and ward administrator, should operational funds be earmarked for events.		
11	Should operational funding be utilized for labour intensive projects, I commit to register the project as an EPWP project and abide by the applicable policy. As Ward Councillor, I will not interfere with the recruitment and selection of beneficiaries of the project.		
12	Should capital funding be utilized for the acquisition of moveable assets, all assets will be barcoded and registered on the asset register and insured.		
13	As User Department representative, I will take full responsibility for the procurement processes required for the identified project. I will submit requisitions in time, but cannot take responsibility for the time required by SCM to generate an order.		
14	NO instruction will be given to any service provider without first obtaining a green order slip for said services. Once a service provider has been appointed, changes to the scope of work will not be negotiated with or expected from the service provider.		
15	As User Department representative, I will keep accurate records of all procurements and meetings in order to generate monthly reports.		
16	As Ward Councillor, I will ensure that accurate minutes are kept of ward committee meetings relating to ward projects and that ward administrator will make this freely available to the User Department. I commit the cooperation of the ward administrator with the drawing up of project feedback reports and the taking of photographic evidence.		
17	To protect both the Ward Councillor and User Department representative NO petty cash or direct payments will be allowed as part of ward projects.		
18	All discussions surrounding the ward projects will be followed up with written confirmation of said discussion.		

We agree that ward projects can only be successfully implemented if there is full cooperation between all role-players. Should problems be experienced between the Ward Councillor and the responsible User Department representative, it will be referred to The Speaker and the responsible Director.

By signing this commitment form, I confirm that I have read and understand the content and commit to adhere to all the stipulations.

Signed at _____ on this ____ day of _____ 20_____.

- 59. Short title

Definitions

- 1.1. In this Policy, unless the context otherwise indicates, a word or expression to which a meaning has been assigned in the Act has the same meaning as in the Act, and
- 1.1.1. **“Act”** means the Municipal Finance Management Act, No. 56 of 2003;
- 1.1.2. **“Bid”** means a written offer in a prescribed or stipulated form in response to an invitation by the municipality for the provision of goods, services or construction works through price quotations, advertised competitive bidding process or proposals;
- 1.1.3. **“Bidder”** means any person submitting a competitive bid or a quotation;
- 1.1.4. **“Closing time”** means the time and day specified in the bid documents for the receipt of bids;
- 1.1.5. **“Competitive bidding process”** means a competitive bidding process referred to in paragraph 12(12)(b)(iii) of this Policy;
- 1.1.6. **“Competitive bid”** means a bid in terms of a competitive bidding process;
- 1.1.7. **“Contract”** means the agreement which is concluded when the municipality accepts, in writing, a competitive bid or quotation submitted by a supplier;
- 1.1.8. **“Contract manager”** means an official of the Municipality who is responsible for the planning for the planning and execution of a transaction involving the procurement of goods, services or works;
- 1.1.9. **“Contractor”** means any person or entity whose competitive bid or quotation has been accepted by the municipality;
- 1.1.10. **“Delegated authority”** means any person or committee delegated with authority by the municipality in terms of the provisions of the Municipal Finance Management Act;
- 1.1.11. **“Department”** means a section within a specific directorate in terms of the municipal organigram;
- 1.1.12. **“Electronic format”** means a bid submitted by a bidder via email or made available through a cloud storage services;
- 1.1.13. **“Emergency dispensation”** means emergency as referred to in paragraph 36(1)(a)(i) of this policy under which one or more of the following is in existence that warrants an emergency dispensation;
- (a) The possibility of human injury or death;
 - (b) The prevalence of human suffering or deprivation of rights;
 - (c) The possibility of damage to property, or suffering and death of livestock and animals;
 - (d) The interruption of essential services, including transportation and communication facilities or support services critical to the effective functioning of the municipality as a whole;

Formatted: Not Highlight

- (e) The possibility of serious damage occurring to the natural environment;
- (f) The possibility that failure to take necessary action may result in the municipality not being able to render an essential community service;
- (g) The possibility that the security of the state could be compromised; or
- (h) The prevailing situation, or imminent danger, should be of such a scale and nature that it could not readily be alleviated by interim measures, in order to allow time for the formal procurement process. Emergency dispensation shall not be granted in respect of circumstances other than those contemplated above.

1.1.14. **“Final award”**, in relation to bids or quotations submitted for a contract, means the final decision on which a bid or quote is accepted;

1.1.15. **“Formal written price quotation”** means quotations referred to in paragraph 12 (1) (d) of this Policy;

1.1.16. **“Green procurement”** means the procurement of environmentally friendly products and services;

1.1.17. **“in the service of the state”** means to be –

(a) A member of –

- (i) Any municipal council;
- (ii) Any provincial legislature; or
- (iii) The National Assembly or the National Council of Provinces;

(b) A member of the board of directors of any municipal entity;

(c) An official of any municipality or municipal entity;

(d) An employee of any national or provincial department, national or provincial public entity or constitutional institution within the meaning of the public Finance Management Act, 1999 (Act No.1 of 1999);

(e) A member of the accounting authority of any national or provincial public entity; or

(f) An employee of Parliament or a provincial legislature;

1.1.18. **“Long term contract”** means a contract with a duration period exceeding one year and does not have the same meaning as contracts of a long term nature referred to in paragraph 22(1)(b)(vi) of this policy;

1.1.19. **“Long term nature contract”** means a contract as defined by section 33(1) of the Municipal Finance Management Act imposing financial obligations on the Municipality beyond the first three years covered in the approved annual budget;

1.1.20. **“List of accredited prospective providers”** means the list of accredited prospective providers in terms of Central Supplier Database (CSD) of National

Treasury;

- 1.1.21. **“Other applicable legislation”** means any other legislation applicable to municipal supply chain management, including but not limited to the following –
 - (a) The Preferential Procurement Policy Framework Act;
 - (b) The Broad-Based Black Economic Empowerment Act; and
 - (c) The Construction Industry Development Board Act;
 - (d) The Local Government: Municipal Systems Act;
 - (e) The Competition Act; and
 - (f) The Promotion of Administrative Justice Act.
- 1.1.22. **“Policy”** means the Supply Chain Management Policy of Stellenbosch municipality as amended from time to time;
- 1.1.23. **“Parent municipality”** has the meaning assigned to it in section 1 of the Municipal Systems Act;
- 1.1.24. **“Petty Cash”**, means the procurement of goods and services through the supply chain management requisition and order system by means of one verbal and written quotation below a determined amount in relation with the Petty Cash Policy;
- 1.1.25. **“Single source”**: refers to when the competition exist in the market, but from a selected few suppliers due to technical capabilities and abilities comply with the requirements of the municipality;
- 1.1.26. **“Sole Supplier”**: It refers in instances where there is no competition and only one service provider exist in the market, with sole distribution rights and/or patent rights or manufacturer;
- 1.1.27. **“Strip and quote”**: When the repairs and maintenance on our machines, vehicles are done by one supplier and/or strip-and-quote, for example a municipal vehicle that needs repairs enters the workshop, however to do the repairs, the vehicle has to be send to a supplier that determines what repairs should be done;
- 1.1.28. **“Supplier database”** means the list of accredited prospective providers which the municipality or municipal entity must keep in terms of the Regulation 14 of the Supply Chain Management Regulations;
- 1.1.29. **“Treasury guidelines”** means any guidelines on supply chain management issued by the Minister in terms of section 168 of the Act;
- 1.1.30. **“Trust”** means the agreement through which the property of one person is made over or bequeathed to a trustee to administer such property for the benefit of another person;
- 1.1.31. **“Trustee”** means any person, including the founder of a trust, to whom property is bequeathed in order for such property to be administered for the benefit of another person;
- 1.1.32. **“The Act”** means the Local Government: Municipal Finance Management Act,

2003 (Act No. 56 of 2003);

- 1.1.33. **“The Regulations”** means the Local Government: Municipal Finance Management Act, 2003, Municipal Supply Chain Management Regulations published by Government Notice 868 of 2005;
- 1.1.34. **“The PPPF Regulations”** means Preferential Procurement Policy Regulations, 2017 Published under Government Notice R32 in Government Gazette 40553 of 20 January 2017; and
- 1.1.35. **“Written or verbal quotations”** means quotations referred to in paragraph 12(1)(b) & (c) of this Policy.

CHAPTER 1

IMPLEMENTATION OF SUPPLY CHAIN MANAGEMENT POLICY

2. SUPPLY CHAIN MANAGEMENT POLICY

- (1) All officials and other role players in the supply chain management system of the Stellenbosch Municipality must implement this Policy in a way that –
 - (a) Gives effect to –
 - (i) Section 217 of the Constitution; and
 - (ii) Part 1 of Chapter 11 and other applicable provisions of the Act;
 - (b) Is fair, equitable, transparent, competitive and cost effective;
 - (c) Complies with –
 - (i) The Regulations; and
 - (ii) Any minimum norms and standards that may be prescribed in terms of section 168 of the Act;
 - (d) Is consistent with other applicable legislation;
 - (e) Does not undermine the objective for uniformity in supply chain management systems between organs of state in all spheres; and
 - (f) Is consistent with national economic policy concerning the promotion of investments and doing business with the public sector.
- (2) The municipal entity must, in addition to complying with subparagraph (1), apply this Policy, to the extent determined by the parent municipality, in a way that is consistent with the supply chain management policy of the parent municipality.
- (3) This Policy applies when the Stellenbosch Municipality –
 - (a) Procures goods or services;
 - (b) Disposes goods no longer needed;
 - (c) Selects contractors to provide assistance in the provision of municipal services otherwise than in circumstances where Chapter 8 of the Municipal Systems Act applies; or
 - (d) Selects external mechanisms referred to in section 80(1)(b) of the Municipal Systems Act for the provision of municipal services in circumstances contemplated in section 83 of that Act.

- (4) This Policy, except where provided otherwise, does not apply in respect of the procurement of goods and services contemplated in section 110(2) of the Act, including –
- (a) Water from the Department of Water Affairs or a public entity, another municipality or a municipal entity; and
 - (b) Electricity from Eskom or another public entity, another municipality or a municipal entity.

3. AMENDMENT OF THE SUPPLY CHAIN MANAGEMENT POLICY

- (1) The Accounting Officer must –
- (a) At least annually review the implementation of this Policy; and
 - (b) When the Accounting Officer considers it necessary, submit proposals for the amendment of this Policy to the Stellenbosch Council.
- (2) If the Accounting Officer submits proposed amendments to the Stellenbosch Council that differs from the model policy issued by the National Treasury, the Accounting Officer must –
- (a) Ensure that such proposed amendments comply with the Regulations; and
 - (b) Report any deviation from the model policy to the National Treasury and the relevant provincial treasury.
- (3) When amending this supply chain management policy, the need for uniformity in supply chain practices, procedures and forms between organs of state in all spheres, particularly to promote accessibility of supply chain management systems for small businesses must be taken into account.

4. DELEGATION OF SUPPLY CHAIN MANAGEMENT POWERS AND DUTIES

- (1) The Stellenbosch Council hereby delegates all powers and duties to the Accounting Officer, which are necessary to enable the Accounting Officer –
- (a) To discharge the supply chain management responsibilities conferred on Accounting Officers in terms of –
 - (i) Chapter 8 or 10 of the Act; and
 - (ii) This Policy;
 - (b) To maximize administrative and operational efficiency in the implementation

of this Policy;

- (c) To enforce reasonable cost-effective measures for the prevention of fraud, corruption, favouritism and unfair and irregular practices in the implementation of this Policy; and
 - (d) To comply with his or her responsibilities in terms of section 115 and other applicable provisions of the Act.
- (2) Sections 79 and 106 of the Act apply to the sub-delegation of powers and duties delegated to an Accounting Officer in terms of subparagraph (1).
- (3) The Accounting Officer may not sub-delegate any supply chain management powers or duties to a person who is not an official of Stellenbosch Municipality or to a committee, which is not exclusively composed of officials of the Stellenbosch Municipality.
- (4) This paragraph may not be read as permitting an official, to whom the power to make final awards has been delegated, to make a final award in a competitive bidding process otherwise than through the committee system provided for in paragraph 26 of this Policy.

5. SUB-DELEGATIONS

- (1) The Accounting Officer may in terms of section 79 or 106 of the Act sub-delegate any supply chain management powers and duties, including those delegated to the Accounting Officer in terms of this Policy, but any such sub-delegation must be consistent with subparagraph (2) of this paragraph and paragraph 4 of this Policy.
- (2) The power to make a final award –
- (a) Above R 10 million (VAT included) may not be sub-delegated by the Accounting Officer;
 - (b) Above R 200,000 (VAT included), but not exceeding R 10 million (VAT included), may be sub-delegated but only to –
 - (i) The Bid Adjudication Committee of which the Chief Financial Officer or a senior manager is a member; or
 - (ii) Accounting Officer of the municipality, after due consideration of all facts was done; and
 - (c) Below R 200,000 (VAT included) to be disposed by delegated official according approved delegatory power and functions issued by Accounting Officer.

- (3) The Bid Adjudication Committee to which the power to make final awards has been sub-delegated in accordance with subparagraph (2) must within five days of the end of each month submit to the official referred to in subparagraph (4) a written report containing particulars of each final award made by such official or committee during that month, including –
 - (a) The amount of the award;
 - (b) The name of the person to whom the award was made; and
 - (c) The reason why the award was made to that person.
- (4) A written report referred to in subparagraph (3) must be submitted –
 - (a) To the Accounting Officer, in the case of an award by –
 - (i) The Bid Adjudication Committee of which the Chief Financial Officer or a senior manager is a member; or
 - (b) To the Chief Financial Officer or the senior manager responsible for the relevant bid, in the case of an award by –
 - (i) The Bid Adjudication Committee of which the Chief Financial Officer or a senior manager is not a member.
- (5) Subparagraphs (3) and (4) of this policy do not apply to procurements out of petty cash.
- (6) This paragraph may not be interpreted as permitting an official to whom the power to make final awards has been sub-delegated, to make a final award in a competitive bidding process otherwise than through the committee system provided for in paragraph 26 of this Policy.
- (7) No supply chain management decision-making powers may be delegated to an advisor or consultant.

6. OVERSIGHT ROLE OF COUNCIL

- (1) The Stellenbosch Council reserves its right to maintain oversight over the implementation of this Policy.
- (2) For the purposes of such oversight the Accounting Officer must –
 - (i) Within 30 days of the end of each financial year, submit a report on the implementation of this Policy and the supply chain management policy of any municipal entity under the sole or shared control of the municipality, to the council of the municipality; and
 - (ii) Whenever there are serious and material problems in the implementation of

this Policy, immediately submit a report to Council.

- (3) The Accounting Officer must, within 10 days of the end of each quarter, submit a report on the implementation of the supply chain management policy to the Executive Mayor.
- (4) The reports must be made public in accordance with section 21A of the Municipal Systems Act.

7. SUPPLY CHAIN MANAGEMENT UNIT

- (1) A supply chain management unit is hereby established to implement this Policy.
- (2) The supply chain management unit operates under the direct supervision of the Chief Financial Officer or an official to whom this duty has been delegated in terms of section 82 of the Act.

8. TRAINING OF SUPPLY CHAIN MANAGEMENT OFFICIALS

- (1) The training of officials involved in implementing this Policy should be in accordance with any Treasury guidelines on supply chain management training.

CHAPTER 2

SUPPLY CHAIN MANAGEMENT SYSTEM

9. FORMAT OF SUPPLY CHAIN MANAGEMENT SYSTEM

- (1) This Policy provides systems for –
- (i) Demand management;
 - (ii) Acquisition management;
 - (iii) Logistics management;
 - (iv) Disposal management;
 - (v) Risk management; and
 - (vi) Performance management.

PART 1: DEMAND MANAGEMENT

10. SYSTEM OF DEMAND MANAGEMENT

- (1) The Accounting Officer must establish and implement an appropriate demand management system in order to ensure that the resources required by Stellenbosch Municipality support its operational commitments and its strategic goals outlined in the Integrated Development Plan.
- (2) The demand management system must –
 - (a) Include timely planning and management processes to ensure that all goods and services required by Stellenbosch Municipality are quantified, budgeted for and timely and effectively delivered at the right locations and at the critical delivery dates, and are of the appropriate quality and quantity at a fair cost;
 - (b) Take into account any benefits of economies of scale that may be derived in the case of acquisitions of a repetitive nature;
 - (c) Provide for the compilation of the required specifications to ensure that its needs are met; and
 - (d) To undertake appropriate industry analysis and research to ensure that innovations and technological benefits are maximized.
- (3) Green procurement must be incorporated as far as reasonably possible for all specifications of goods, services and construction works.
- (4) In the development of bid specifications, innovative mechanisms should be explored to render the service or product more resource and energy efficient.

PART 2: ACQUISITION MANAGEMENT

11. SYSTEM OF ACQUISITION MANAGEMENT

- (1) The Accounting Officer must implement the system of acquisition management set out in this Part in order to ensure –
- (a) That goods and services are procured by Stellenbosch Municipality in accordance with authorised processes only;
 - (b) That expenditure on goods and services is incurred in terms of an approved budget in terms of section 15 of the Act;
 - (c) That the threshold values for the different procurement processes are complied with;
 - (d) That bid documentation, evaluation and adjudication criteria, and general conditions of a contract, are in accordance with any applicable legislation; and
 - (e) That any Treasury guidelines on acquisition management are properly taken into account.
- (2) Unless otherwise indicated in the bid documents, the Municipality shall not be liable for any expenses incurred by prospective bidders in the preparation and / or submission of a bid or quotation.

12. RANGE OF PROCUREMENT PROCESSES

- (1) Goods and / or services may only be procured by way of –
- (a) Cash purchases administered by the Expenditure Division up to a transaction value as defined in Council's Petty Cash Policy;
 - (a) Petty cash purchases through one verbal request and or verbal /written quotation for the procurement of goods through the supply chain management requisition and order system of a transaction value between R 0 and R 2,000 (VAT included);
 - (c) Written or verbal quotations for procurement of goods and/or services of a transaction value between R 2,000 and R 10,000 (VAT included);
 - (d) Formal written quotations for procurement of goods and/or services of a transaction value between R 10,000 and R 200,000;
 - (e) Procurements above a transaction value of R 200,000 (VAT included); and
 - (f) The procurement of long-term contracts.
- (2) The Accounting Officer may, in writing-
- (a) Lower, but not increase, the different threshold values specified in subparagraph (1); or
 - (b) Direct that –

Formatted: Indent: Left: 2.54 cm, No bullets or numbering

- (i) Written quotations are obtained for any specific procurement of a transaction value lower than R 2,000;
- (ii) Written price quotations be obtained for any specific procurement of a transaction value lower than R 10,000; or
- (iii) A competitive bidding process be followed for any specific procurement of a transaction value higher than R 200,000.

- (3) Goods or services may not deliberately be split into parts or items of a lesser value merely to avoid complying with the requirements of the policy. When determining transaction values, a requirement for goods or services consisting of different parts or items must as far as possible be treated and dealt with as a single transaction.

13. GENERAL PRECONDITIONS FOR CONSIDERATION OF WRITTEN QUOTATIONS OR BIDS

- (1) A written quotation or bid may not be considered unless the provider who submitted the quotation or bid –

- (a) Has furnished that provider's –

- (i) Full name;
- (ii) Identification number or company or other registration number; and
- (iii) Tax reference number and VAT registration number, if any;

- (b) Has authorised the Stellenbosch Municipality to obtain a tax clearance by means of the Tax Compliance Status Pin from, if applicable from the South African Revenue Services and Central Supplier Database Number (CSD) that the provider's tax matters are in order; and

- (c) Has indicated –

- (i) Whether he or she is in the service of the state, or has been in the service of the state in the previous twelve months;
- (ii) If the provider is not a natural person, whether any of its directors, managers, principal shareholders or stakeholder is in the service of the state, or has been in the service of the state in the previous twelve months; or
- (iii) Whether a spouse, child or parent of the provider or of a director, manager, shareholder or stakeholder referred to in sub-paragraph (ii) is in the service of the state, or has been in the service of the state in the previous twelve months.

14. LISTS OF ACCREDITED PROSPECTIVE PROVIDERS

- (1) The Accounting Officer must –

- (a) Keep a list of accredited prospective providers of goods and services that must be used for the procurement requirements through written or verbal quotations and formal written price quotations;
- (b) At least once a year through newspapers commonly circulating locally, the

Formatted: Indent: Left: 2.54 cm, No bullets or numbering

website and any other appropriate ways, invite prospective providers of goods or services to apply for evaluation and listing as accredited prospective providers;

- (c) Specify the listing criteria for accredited prospective providers as stated within the database registration forms; and
 - (d) Disallow the listing of any prospective provider whose name appears on the National Treasury's database as a person prohibited from doing business with the public sector.
- (2) The list must be updated at least quarterly to include any additional prospective providers and any new commodities or types of services. Prospective providers must be allowed to submit applications for listing at any time.
- (3) The list must be compiled per commodity and per type of service.

15. PETTY CASH PURCHASES

- (1) The Accounting Officer must establish the conditions for the procurement of goods by means of cash purchases and petty cash purchases referred to in paragraph 12(1)(a) and (b) of this Policy, which must include conditions –
- (a) determining the terms on which a manager may delegate responsibility for cash purchases and petty cash purchases to an official reporting to the manager;
 - (b) limiting the maximum number of cash purchases and petty cash purchases or the maximum amounts per month for each manager;
 - (c) excluding any types of expenditure from cash purchases and petty cash purchases, where this is considered necessary;
 - (d) requiring a monthly reconciliation report from each manager to the Chief Financial Officer, including –
 - (i) the total amount of cash purchases and petty cash purchases for that month; and
 - (ii) receipts and appropriate documents for each purchase; and
 - (e) any other conditions determined by the Chief Financial Officer.
- (2) Cash purchases will be dealt with in terms of the Petty Cash Policy of Council.
- (3) Petty cash purchases will be dealt with in terms of the Supply Chain Management Policy of Council.

16. WRITTEN OR VERBAL QUOTATIONS

- (1) The conditions for the procurement of goods or services through written or verbal quotations are as follows –
- Quotations must be obtained from at least three different providers preferably

from, but not limited to, providers whose names appear on the list of accredited prospective providers of the Stellenbosch Municipality, provided that if quotations are obtained from providers who are not listed, such providers must meet the listing criteria set out in paragraph 13 of this Policy;

- (b) Where no suitable providers are available from the list of accredited prospective providers, quotations may be obtained from other possible providers;
- (c) To the extent feasible, providers must be requested to submit such quotations in writing;
- (d) If it is not possible to obtain at least three quotations, the reasons must be recorded and reported quarterly to the Accounting Officer or another official designated by the Accounting Officer;
- (e) The Accounting Officer must record the names of the potential providers requested to provide such quotations with their quoted prices; and
- (f) If a quotation was submitted verbally, the order may be placed only against written confirmation by the selected provider.

17. FORMAL WRITTEN PRICE QUOTATIONS

- (1) The conditions for the procurement of goods or services through formal written price quotations are as follows: -
 - (a) Quotations must be obtained in writing from at least three different providers whose names appear on the list of accredited prospective providers of the Stellenbosch Municipality. Quotations may be obtained from providers who are not listed, provided that such providers meet the listing criteria set out in paragraph 13 of this Policy;
 - (b) Where no suitable providers are available from the list of accredited prospective providers, quotations may be obtained from other possible providers not registered on the municipal supplier database;
 - (c) If it is not possible to obtain at least three quotations, the reasons must be recorded and approved by the Chief Financial Officer or an official designated by the Chief Financial Officer;
 - (d) The Accounting Officer must record the names of the potential providers and their written quotations; and
 - (e) For the obtaining of quotations for services, Stellenbosch Municipality will utilize their notice boards.
- (2) A designated official referred to in subparagraph (1)(c) must within three days of the end of each month report to the Chief Financial Officer on any approvals given during that month by that official in terms of that subparagraph.

18. PROCEDURES FOR PROCURING GOODS OR SERVICES THROUGH WRITTEN OR VERBAL QUOTATIONS AND FORMAL WRITTEN PRICE QUOTATIONS

- (1) The procedure for the procurement of goods or services through written or verbal quotations or formal written price quotations is as follows –
- (a) When using the list of accredited prospective providers the Accounting Officer must promote on-going competition amongst providers by inviting providers to submit quotations on a rotation basis;
 - (b) Where no suitable providers are available from the list of accredited prospective providers, quotations may be obtained from other possible providers not registered on the municipal supplier database;
 - i. All requirements in excess of R 30,000 (VAT included) that are to be procured by means of formal written price quotations must, in addition to the requirements of paragraph 17, be advertised for at least seven days on the website and an official notice board of the Stellenbosch Municipality;
 - ii. The municipality will follow a preferred bidding process in the event that the market did not respond in terms of the sourcing of quotations on the website for seven (7) days and if no responsive bids was received.
 - (c) Offers received must be evaluated on a comparative basis taking into account unconditional discounts;
 - (d) The Accounting Officer or Chief Financial Officer must on a monthly basis be notified in writing of all written or verbal quotations and formal written price quotations accepted by an official acting in terms of a sub-delegation;
 - (e) Offers below R 30,000 (VAT included) must be awarded based on compliance to specification and conditions of contract, ability and capability to deliver the goods and services and lowest price;
 - (f) Acceptable offers, which are subject to the preference points system (PPPFA and associated regulations), must be awarded to the bidder who scored the highest points; and
 - (g) Stellenbosch Municipality will maintain a proper record keeping system.

19. COMPETITIVE BIDS

- (1) Goods or services above a transaction value of R 200,000 (VAT included) and long term contracts may only be procured through a competitive bidding process, subject to paragraph 11(2) of this Policy.
- (2) No requirement for goods or services above an estimated transaction value of R 200,000 (VAT included), may deliberately be split into parts or items of lesser value merely for the sake of procuring the goods or services otherwise than through a competitive bidding process.

20. PROCESS FOR COMPETITIVE BIDDING

- (1) The procedures for the following stages of a competitive bidding process are as follows:-

- (a) Compilation of bidding documentation as detailed in paragraph 21;
- (b) Public invitation of bids as detailed in paragraph 22;
- (c) Site meetings or briefing sessions as detailed in paragraph 22;
- (d) Handling of bids submitted in response to public invitation as detailed in paragraph 23;
- (e) Evaluation of bids as detailed in paragraph 28;
- (f) Award of contracts as detailed in paragraph 29;
- (g) Administration of contracts;
- (h) After approval of a bid, the Accounting Officer and the bidder must enter into a written agreement;
- (i) Proper record keeping; and
- (j) Original / legal copies of written contracts agreements must be kept in a secure place for reference purposes.

21. BID DOCUMENTATION FOR COMPETITIVE BIDS

- (1) The criteria to which bid documentation for a competitive bidding process must comply, must –
 - (a) Take into account –
 - (i) The general conditions of contract and any special conditions of contract, if specified;
 - (ii) Any Treasury guidelines on bid documentation; and
 - (iii) The requirements of the Construction Industry Development Board, in the case of a bid relating to construction, upgrading or refurbishment of buildings or infrastructure;
 - (b) Include the preference points system to be used, goals as contemplated in the Preferential Procurement Regulations and evaluation and adjudication criteria, including any criteria required by other applicable legislation;
 - (c) Compel bidders to declare any conflict of interest they may have in the transaction for which the bid is submitted;
 - (d) If the value of the transaction is expected to exceed R 10 million (VAT included), require bidders to furnish –
 - (i) If the bidder is required by law to prepare annual financial statements (AFS) for auditing, their audited AFS –
 - (aa) For the past three years; or

- (bb) Since their establishment if established during the past three years;
- (ii) A certificate signed by the bidder certifying that the bidder has no undisputed commitments for municipal services towards a municipality or other service provider in respect of which payment is overdue for more than 30 days;
- (iii) Particulars of any contracts awarded to the bidder by an organ of state during the past five years, including particulars of any material non-compliance or dispute concerning the execution of such contract;
- (iv) A statement indicating whether any portion of the goods or services are expected to be sourced from outside the Republic, and if so, what portion and whether any portion of payment from the municipality or municipal entity is expected to be transferred out of the Republic; and
- (e) Stipulate that disputes must be settled by means of mutual consultation, mediation, adjudication (with or without legal representation), or, when unsuccessful, in a South African court of law;
- (f) The period for which bids are to remain valid and binding must be indicated in the bid documents; and
- (g) A provision for the termination of the contract in the case of non- or under-performance and objections and complaints must be included in the bid documentation.

22. PUBLIC INVITATION FOR COMPETITIVE BIDS

(1) The procedure for the invitation of competitive bids is as follows –

- (a) Any invitation to prospective providers to submit bids must be by means of a public advertisement in a newspaper commonly circulating locally, the website of the Stellenbosch Municipality or any other appropriate ways (which may include an advertisement in the Government Tender Bulletin); and

(b) The information contained in a public advertisement, must at least include

- (i) The closure date for the submission of bids, which may not be less than 30 days in the case of transactions over R10 million (VAT included), or which are of a long term nature, or 14 days in any other case, from the date on which the advertisement is placed in a newspaper, subject to subparagraph (2) of this policy; and
- (ii) A statement that bids may only be submitted on the bid documentation provided by the Stellenbosch Municipality
- (iii) Contact details for further enquiries.

(2) The Accounting Officer may determine a closure date for the submission of bids which is less than the 30 or 14 days requirement, but only if such shorter period can be justified on the grounds of urgency or emergency or any exceptional case where it is impractical or impossible to follow the official procurement process.

Formatted: Indent: Left: 1 cm, Hanging: 1 cm, No bullets or numbering

- (3) Bids submitted must be sealed and must clearly indicate the bid number on the outside of the envelope for which the bid is being submitted.
- (4) Where bids are requested by the Municipality in electronic format, such bids must be supplemented by sealed hard copies.
- (5) The municipality may require bidders to submit section(s) of their bid in electronic format, but only after the bid closing date. If the electronic copy differs from the original hard copy, the original hard copy will be binding.

23. PROCEDURE FOR HANDLING, OPENING AND RECORDING OF COMPETITIVE BIDS AND FORMAL WRITTEN PRICE QUOTATIONS IN EXCESS OF R 30,000

- (1) The procedures for the handling, opening and recording of bids are as follows
 - (a) Bids –
 - (i) Must be opened only in public;
 - (ii) must be opened at the same time and as soon as possible after the period for the submission of bids has expired; and
 - (iii) Received after the closing time should not be considered and returned unopened immediately; and
 - (b) Any bidder or member of the public has the right to request that the names of the bidders who submitted bids in time must be read out and, if practical, also each bidder's total bidding price;
 - (c) No information, except the provisions in subparagraph (b), relating to the bid should be disclosed to bidders or other persons until the successful bidder is notified of the award;
 - (d) The Accounting Officer must –
 - (i) Record in a register all bids received in time;
 - (ii) Make the register available for public inspection; and
 - (iii) Publish the entries in the register and the bid results on the website.
 - (e) The bidder shall choose a *domicilium citandi et executandi* in the Republic and unless notice of the change thereof has duly been given in writing, it shall be the address stated in the bid.
 - (f) Opening of bid procedures –
 - (i) At the specified closing time on the closing date the applicable bid box shall be closed;
 - (ii) The bid box shall be opened in public as soon as practical after the closing time by at least two officials from the Supply Chain Management Unit and the Security Officer on duty;
 - (iii) It is the responsibility of the bidder to ensure that their bid is placed in the correct bid box. The municipality will not on its own initiative

redirect any bid if it is placed in an incorrect bid box before the closing time of submissions.

- (iv) Immediately after the opening of the bid box all bids shall be opened in public;
- (v) At the official opening of the bids, the bids shall in all cases be read out in terms of the name of the bidder and, if practical, the amount of the bid;
- (vi) As soon as a bid or technical proposal has been opened the bid / proposal shall be stamped with the official stamps, and endorsed with the opening officials' signatures;
- (viii) The name of the bidder, and where possible, the bid sum shall be recorded in a bid opening record kept for that purpose; and The responsible officials who opened the bidding documentation received shall forthwith place their signatures on the bid opening record (register) and shall ensure that the bid opening record, indicating at least the bid price of each bidder, the BBBEE status level contribution of each bidder and where applicable the local content percentages of the goods offered are made available for public inspection and are published on the municipality's website.

(g) Site Inspections / clarification meeting –

- (i) Site inspections / clarifications meeting, where applicable, will be compulsory.
- (ii) If site inspections / clarification meeting are to be held, full details must be included in the bid notice. Service providers that are late for the commencement of the site inspection/clarification meeting will be disqualified.
- (iii) Minutes of all site inspection/clarification meetings must be kept for record purposes.
- (iv) Any proposed Addendums to the advertised bid document must be tabled at the Bid Specification Committee Meeting for consideration and approval.

Formatted: Font: 12 pt

Formatted: No bullets or numbering

(ii)

(h) Bid validity periods

- (i) The validity period is calculated from the bid closure date and bids shall remain in force and binding for a period of six (6) months as indicated in the invitation to bid and the bid documents, subject to any other applicable legislation and instructions from the National Treasury for specific types of procurement.
- (ii) The period of validity may be extended by the SCM Department, provided that the original bid validity period has not expired and that all bidders are given an opportunity to extend such period.
- (iii) Any such extension shall be agreed to by a bidder in writing.

Bidders who fail to respond to such a request before the validity of

their bid expires, or who decline such a request shall not be considered further in the bid evaluation process.

- (iv) All bidders who indicated the acceptance of the extension of the bid validity period, bids will be considered for evaluation purposes.
- (v) If the validity of all bids expired without it being awarded within the bid validity period, including any extensions thereof allowable in terms of applicable legislation, the bid must be cancelled and published in the same media in which the original bid invitation appeared.
- (vi) All bidders must be notified in writing of the cancellation of a bid.
- (i) Samples
 - (i) The call for samples should be limited to where samples are called for in the bid documents, samples (marked with the bid and item number as well as the bidder's name and address) shall be delivered separately (to the bid) to the addressee mentioned in the bid documents by no later than the closing time of the bid.
 - (ii) Bids may not be included in parcels containing samples.
 - (iii) If samples are not submitted as required in the bid documents, then the part of the bid for which no sample is provided shall be declared invalid.
 - (iv) Samples shall be supplied by a bidder at his / her own expense and risk. Stellenbosch Municipality shall not be obliged to pay for such samples or compensate for the loss thereof, unless otherwise specified in the bid documents, and shall reserve the right to return such samples or to dispose of them at its own discretion.
 - (v) If a bid is accepted for the supply of goods according to a sample submitted by the bidder, that sample will become the contract sample. All goods/materials supplied shall comply in all respects to that contract sample.
- (j) Bid Sum
 - (i) A bid will not necessarily be invalidated if the amount in words and the amount in figures do not correspond, in which case the amount in words shall be read out at the bid opening.

24. NEGOTIATIONS WITH PREFERRED BIDDERS

- (1) The Accounting Officer may negotiate the final terms of a contract with bidders identified through a competitive bidding process as preferred bidders, provided that such negotiation –
 - (a) Does not allow any preferred bidder a second or unfair opportunity;
 - (b) Is not to the detriment of any other bidder; and

(c) Does not lead to a higher price than the bid as submitted.

(2) Minutes of such negotiations must be kept for record purposes.

25. TWO-STAGE BIDDING PROCESS

(1) A two-stage bidding process is allowed for –

(a) Large complex projects;

(b) Projects where it may be undesirable to prepare complete detailed technical specifications; or

(c) Long term projects with a duration period exceeding three years.

(2) In the first stage technical proposals on conceptual design or performance specifications should be invited, subject to technical as well as commercial clarifications and adjustments.

(3) In the second stage final technical proposals and priced bids should be invited.

26. COMMITTEE SYSTEM FOR COMPETITIVE BIDS

(1) A committee system for competitive bids is hereby established, consisting of the following committees for each procurement or cluster of procurements as the Accounting Officer may determine as issued within the directive and stating the terms of reference of each bid committee –

(a) A Bid Specifications Committee;

(b) A Bid Evaluation Committee; and

(c) A Bid Adjudication Committee.

(2) The Accounting Officer appoints the members ~~and secundus~~ of each committee, taking into account section 117 of the Act; and

(3) The committee system must be consistent with –

(a) Paragraph 27, 28 and 29 of this Policy;

(b) Any other applicable legislation; and

(c) The Accounting Officer may apply the committee system to formal written price quotations.

~~(e) Secundus referred to in sub paragraph (2) represents a specific standing member of that specific committee in the event that the standing member is not available. Secundus has the same powers and duties of the standing member.~~

Formatted: No bullets or numbering

27. BID SPECIFICATIONS COMMITTEES

- (1) A Bid Specifications Committee must compile the specifications for each procurement of goods or services by the Stellenbosch Municipality.
- (2) Specifications –
 - (a) Must be drafted in an unbiased manner to allow all potential suppliers to offer their goods or services;
 - (b) Must take account of any accepted standards such as those issued by Standards South Africa, the International Standards Organisation, or an authority accredited or recognised by the South African National Accreditation System with which the equipment or material or workmanship should comply;
 - (c) Must, where possible, be described in terms of performance required rather than in terms of descriptive characteristics for design;
 - (d) May not create trade barriers in contract requirements in the forms of specifications, plans, drawings, designs, testing and test methods, packaging, marking or labelling of conformity certification;
 - (e) May not make reference to any particular trade mark, name, patent, design, type, specific origin or producer unless there is no other sufficiently precise or intelligible way of describing the characteristics of the work, in which case such reference must be accompanied by the word “equivalent”;
 - (f) Must indicate the preference points system set out in the Preferential Procurement Regulations 2017;
 - (g) Must be approved by the Accounting Officer prior to publication of the invitation for bids in terms of paragraph 22 of this Policy; and
 - (h) The Accounting Officer may sub-delegate the requirements in sub-paragraph 2(g) above to the Chairperson of the Bid Specifications Committee.
- (3) A Bid Specifications Committee must be composed of one or more officials of the Stellenbosch Municipality preferably the manager responsible for the function involved, and may, when appropriate, include external and / or internal specialist advisors.
- (4) No person, advisor or corporate entity involved with the Bid Specifications Committee, or director of such a corporate entity, may bid for any resulting contracts.

28. BID EVALUATION COMMITTEES

- (1) A Bid Evaluation Committee must –
 - (a) Evaluate bids in accordance with –
 - (i) The specifications for a specific procurement; and
 - (ii) The points system set out in terms of paragraph 27(2)(f);
 - (b) Evaluate each bidder's ability to execute the contract;

- (c) Check in respect of the recommended bidder whether municipal rates and taxes and municipal service charges are not in arrears; and
 - (d) Submit to the adjudication committee a report and recommendations regarding the award of the bid or any other related matter.
- (2) A Bid Evaluation Committee must as far as possible be composed of
- (a) Officials from departments requiring the goods or services; and
 - (b) At least one supply chain management practitioner of the Stellenbosch Municipality.
- (3) The relevant user department's official shall carry out a preliminary evaluation of all valid bids received and shall submit a bid evaluation report to the Bid Evaluation Committee for consideration.
- (4) Any evaluation of a bid shall consider the bids received and shall note for inclusion in the evaluation report, a bidder –
- (a) Whose bid does not comply with the provisions of paragraph 38 of this Policy;
 - (b) Whose bid does not comply with the provisions of paragraph 13 of this Policy;
 - (c) Whose bid is not in compliance with the specification;
 - (d) Whose bid is not in compliance with the terms and conditions of the bid documentation;
 - (e) Who is not registered and verified on the municipality's supplier database within seven days of the closing time for bids. In this regard bid documentation shall state that the responsibility for registration and verification rests solely with the bidder;
 - (f) Who, in the case of construction works acquisitions, does not comply with the requirements of the Construction Industry Development Board Act regarding registration of contractors. Verification of compliance with this requirement shall be by means of Stellenbosch Municipality's Supplier Database;
 - (g) Whose tax status are non-compliant and cannot be verified with the South African Revenue Services (SARS) certifying that the taxes of the bidder are in order or that suitable arrangements have been made with SARS; and
 - (h) Who fails to comply with any applicable Bargaining Council agreement.
- (5) Bids shall be evaluated according to the following as applicable –
- (i) Bid price (corrected if applicable and brought to a comparative level where necessary);
 - (ii) The unit rates and prices;
 - (iii) The bidder's ability to fulfil its obligations in terms of the bid documents;

- (iv) Any qualifications to the bid;
 - (v) The bid ranking obtained in respect of Preferential Procurement as required by Stellenbosch Municipality's Preferential Procurement Policy;
 - (vi) The financial standing of the bidder, including its ability to furnish the required institutional guarantee, where applicable; and
 - (vii) Any other criteria specified in the bid documents.
- (6) The Bid Evaluation Committee shall check in respect of the recommended bidder whether municipal rates and taxes and municipal service charges are not in arrears.
 - (7) The evaluation of bids on an equitable basis may be considered during the evaluation process.
 - (8) Additional information or clarification of bids may be called for if required.
 - (9) Alternative bids may be considered, provided that a bid free of qualifications and strictly in accordance with the bid documents is also submitted. Stellenbosch Municipality shall not be bound to consider alternative bids. The alternative offer is to be submitted with the main offer together with a schedule that compares the specifications of the bid documents with the alternative offer.
 - (10) If a bidder requests in writing, after the closing of bids, that his/her bid be withdrawn, then such a request may be considered and reported in the bid evaluation report.
 - (11) If, after bids have been brought to a comparative level, two or more scores equal total adjudication points, regulation 11(5) of the Preferential Procurement Regulations of 2017 will apply.
 - (12) If two or more bids are equal in all respects after applying regulation 11(5), the Bid Evaluation Committee shall draw lots to decide on the recommendation for award.
 - (13) All disclosures of conflict of interest shall be considered by the Bid Evaluation Committee and if the conflict of interest is of a material nature, this shall be reported to the Bid Adjudication Committee.
 - (14) The relevant ~~Director-User Department~~ in ~~consultation~~ in consultation with the SCM Unit may, before the bid is considered by the Bid Evaluation Committee, provide a reasonable opportunity to a bidder who made an innocent error and / or omission in their bid document, to correct the innocent error and / or omission, provided that such opportunity will not unduly prejudice any of the other bidders.
 - (15) In an event as described in sub-paragraph 14, bidders shall be afforded a minimum of two (2) working days up to a maximum of five (5) working days (in consultation with on-discretion of the relevant ~~Director-User Department~~ or the Manager: Supply Chain Management) from time of notification to correct such innocent errors and / or omissions. If no response is received from such bidders at the deadline the bid may be deemed to be non-responsive.

29. BID ADJUDICATION COMMITTEES

Formatted: Not Highlight

Formatted: Not Highlight

- (1) A Bid Adjudication Committee must –
 - (a) Consider the report and recommendations of the Bid Evaluation Committee; and
 - (b) Either –
 - (i) Depending on its delegations, make a final award or a recommendation to the Accounting Officer to make the final award; or
 - (ii) Make another recommendation to the Accounting Officer how to proceed with the relevant procurement.
- (2) A Bid Adjudication Committee must consist of at least four senior managers of the Stellenbosch Municipality, which must include –
 - (a) The Chief Financial Officer or, if the Chief Financial Officer is not available, another manager in the budget and treasury office reporting directly to the Chief Financial Officer and designated by the Chief Financial Officer;
 - (b) At least one senior supply chain management practitioner who is an official of the Stellenbosch Municipality; and
 - (c) A technical expert in the relevant field who is an official, if such an expert exists.
- (3) The Accounting Officer must appoint the chairperson of the committee. If the chairperson is absent from a meeting, the members of the committee who are present must elect one of them to preside at the meeting.
- (4) Neither a member of a Bid Evaluation Committee, nor an advisor or person assisting the evaluation committee, may be a member of a Bid Adjudication Committee.
 - (a) If the Bid Adjudication Committee decides to award a bid other than the one recommended by the Bid Evaluation Committee, the Bid Adjudication Committee must prior to awarding the bid–
 - (i) Check in respect of the preferred bidder whether that bidder's municipal rates and taxes and municipal service charges are not in arrears; and
 - (ii) Notify the Accounting Officer.
 - (b) The Accounting Officer may –
 - (i) After due consideration of the reasons for the deviation, ratify or reject the decision of the Bid Adjudication Committee referred to in paragraph (a); and
 - (ii) If the decision of the Bid Adjudication Committee is rejected, refer the decision of the adjudication committee back to that committee for reconsideration.

- (6) The Accounting Officer may at any stage of a bidding process, refer any recommendation made by the evaluation committee or the adjudication committee back to that committee for reconsideration of the recommendation.
- (7) The Accounting Officer must comply with section 114 of the Act within 10 working days

30. PROCUREMENT OF BANKING SERVICES

- (1) A contract for banking services –
 - (a) Must be procured through competitive bids;
 - (b) Must be consistent with section 7 or 85 of the Act; and
 - (c) May not be for a period of more than five years at a time.
- (2) The process for procuring a contract for banking services must commence at least nine months before the end of an existing contract.
- (3) The closure date for the submission of bids may not be less than 60 days from the date on which the advertisement is placed in a newspaper in terms of paragraph 22(1). Bids must be restricted to banks registered in terms of the Banks Act, 1990 (Act No. 94 of 1990).

31. PROCUREMENT OF IT RELATED GOODS OR SERVICES

- (1) The Accounting Officer may request the State Information Technology Agency (SITA) to assist with the acquisition of IT related goods or services through a competitive bidding process.
- (2) Both parties must enter into a written agreement to regulate the services rendered by and the payments to be made to SITA.
- (3) The Accounting Officer must notify SITA together with a motivation of the IT needs if –
 - (a) The transaction value of IT related goods or services required in any financial year will exceed R 50 million (VAT included); or
 - (b) The transaction value of a contract to be procured whether for one or more years exceeds R 50 million (VAT included).
- (4) If SITA's comments on the submission and the Stellenbosch Municipality disagree with such comments, the comments and the reasons for rejecting or not following such comments must be submitted to the council, the National Treasury, the relevant provincial treasury and the Auditor General.

32. PROCUREMENT OF GOODS AND SERVICES UNDER CONTRACTS SECURED BY OTHER ORGANS OF STATE

- (1) The Accounting Officer may procure goods or services under a contract secured by another organ of state, but only if –
 - (a) The contract has been secured by that other organ of state by means of a competitive bidding process applicable to that organ of state;
 - (b) There is no reason to believe that such contract was not validly procured;
 - (c) There are demonstrable discounts or benefits to do so; and
 - (d) That other organ of state and the provider has consented to such procurement in writing.
- (2) Subparagraphs (1)(c) and (d) do not apply if –
 - (a) A municipal entity procures goods or services through a contract secured by its parent municipality; or
 - (b) A municipality procures goods or services through a contract secured by a municipal entity of which it is the parent municipality.
- (3) If paragraph (1) is complied with, Stellenbosch Municipality must request at least the following documents from the relevant organ of state and service provider as referred to under subparagraph (1)(d) –
 - (a) A written declaration confirming –
 - (i) That the organ of state followed a competitive bidding process applicable to it;
 - (ii) That the organ of state has no reason to believe that the contract was not validly procured by itself;
 - (iii) That the organ of state evaluated the bid in terms of price and BBBEE and if applicable, in terms of functionality or quality, and concluded that the bid(s) that were accepted were in all aspects the best compliant and respective bid(s); and
 - (iv) That the organ of state gives formal written permission to Stellenbosch Municipality to procure goods and / or services from the approved bid(s) as accepted by the organ of state;
 - (b) Agenda and minutes of the organ of state's Bid Evaluation Committee at which the specific bid was evaluated;
 - (c) Agenda and minutes of the organ of state's Bid Adjudication Committee at which the bid was awarded or the approval of the Accounting Officer of that organ of state who approved the bid;
 - (d) A copy of the successful bidder(s) bid submissions; and
 - (e) Written consent from the service provider.
- (4) If Stellenbosch Municipality should enter into a contract secured by other organs of state, it shall enter into a contract with the successful bidder(s) on the same terms and conditions as accepted by the relevant organ of state.
- (5) Contracts entered into by Stellenbosch Municipality under paragraph (4) shall not be deemed to be a deviation from the official procurement processes.

- (6) The Accounting Officer shall report to Council on a monthly basis all contracts entered into in terms of paragraph (4) above.

33. PROCUREMENT OF GOODS NECESSITATING SPECIAL SAFETY ARRANGEMENTS

- (1) The acquisition and storage of goods in bulk (other than water), which necessitate special safety arrangements, including gasses and fuel, should be avoided wherever possible.
- (2) Where the storage of goods in bulk is justified, such justification must be based on sound reasons, including the total cost of ownership, cost advantages and environmental impact and must be approved by the Accounting Officer.

34. PROUDLY SA CAMPAIGN

- (1) Stellenbosch Municipality supports the Proudly SA Campaign to the extent that, all things being equal, preference is given to procuring local goods and services from –
- (a) Firstly: Suppliers and businesses within the municipality or district;
 - (b) Secondly: Suppliers and businesses within the relevant province; and
 - (c) Thirdly: Suppliers and businesses within the Republic.

35. APPOINTMENT OF CONSULTANTS

- (1) The Accounting Officer may procure consulting services provided that any Treasury guidelines in respect of consulting services, Construction Industry Development Board guidelines and Council's Cost-Containment Policy in respect of services related to the built environment and construction works are taken into account when such procurements are made.
- (2) Consultancy services must be procured through competitive bids if –
- (a) The value of the contract exceeds R 200,000 (VAT included); or
 - (b) The duration period of the contract exceeds one year.
- (3) In addition to any requirements prescribed by this policy for competitive bids, bidders must furnish particulars of –
- (a) All consultancy services provided to an organ of state in the last five years; and
 - (b) Any similar consultancy services provided to an organ of state in the last five years.
- (4) The Accounting Officer must ensure that copyright in any document produced, and the patent rights or ownership in any plant, machinery, thing, system or process designed or devised, by a consultant in the course of the consultancy service is vested in the Stellenbosch Municipality.

- (5) Where the estimated value of fees is less than R 200,000 and the duration of the appointment is less than one year, any National Treasury and, where applicable, Construction Industry Development Board guidelines in respect of consulting services are taken into account.

36. DEVIATION FROM AND RATIFICATION OF MINOR BREACHES OF PROCUREMENT PROCESSES

- (1) The Accounting Officer may –
- (a) Dispense with the official procurement processes established by this Policy and to procure any required goods or services through any convenient process, which may include direct negotiations, but only –
 - (i) In an emergency (as per definition);
 - (ii) If such goods or services are produced or available from a single source or sole provider only (as per definition);
 - (iii) For the acquisition of special works of art or historical objects where specifications are difficult to compile;
 - (iv) Acquisition of animals for zoos and/or nature and game reserves; or
 - (v) In any other exceptional case where it is impractical or impossible to follow the official procurement processes; and
 - (b) Ratify any minor breaches of the procurement processes by an official or committee acting in terms of delegated powers or duties, which are purely of a technical nature.
- (2) The Accounting Officer must record the reasons for any deviations in terms of subparagraphs (1)(a) and (b) of this policy and report them to the next meeting of the council and include as a note to the annual financial statements.
- (3) Subparagraph (2) does not apply to the procurement of goods and services contemplated in paragraph 11(2) of this policy.

37. UNSOLICITED BIDS

- (1) In accordance with section 113 of the Act there is no obligation to consider unsolicited bids received outside a normal bidding process.
- (2) The Accounting Officer may decide in terms of section 113(2) of the Act to consider an unsolicited bid, only if –
- (a) The product or service offered in terms of the bid is a demonstrably or proven unique innovative concept;
 - (b) The product or service will be exceptionally beneficial to, or have exceptional cost advantages;

- (c) The person who made the bid is the sole provider of the product or service; and
 - (d) The reasons for not going through the normal bidding processes are found to be sound by the Accounting Officer.
- (3) If the Accounting Officer decides to consider an unsolicited bid that complies with subparagraph (2) of this policy, the decision must be made public in accordance with section 21A of the Municipal Systems Act, together with –
- (a) Reasons as to why the bid should not be open to other competitors;
 - (b) An explanation of the potential benefits if the unsolicited bid were accepted; and
 - (c) An invitation to the public or other potential suppliers to submit their comments within 30 days of the notice.
- (4) The Accounting Officer must submit all written comments received pursuant to subparagraph (3), including any responses from the unsolicited bidder, to the National Treasury and the relevant provincial treasury for comment.
- (5) The adjudication committee must consider the unsolicited bid and may award the bid or make a recommendation to the Accounting Officer, depending on its delegations.
- (6) A meeting of the adjudication committee to consider an unsolicited bid must be open to the public.
- (7) When considering the matter, the adjudication committee must take into account –
- (a) Any comments submitted by the public; and
 - (b) Any written comments and recommendations of the National Treasury or the relevant provincial treasury.
- (8) If any recommendations of the National Treasury or provincial treasury are rejected or not followed, the Accounting Officer must submit to the Auditor General, the relevant provincial treasury and the National Treasury the reasons for rejecting or not following those recommendations.
- (9) Such submission must be made within seven days after the decision on the award of the unsolicited bid is taken, but no contract committing the Stellenbosch Municipality to the bid may be entered into or signed within 30 days of the submission.

38. COMBATING OF ABUSE OF SUPPLY CHAIN MANAGEMENT SYSTEM

- (1) The Accounting Officer must –
- (a) Take all reasonable steps to prevent abuse of the supply chain management system;
 - (b) Investigate any allegations against an official or other role player of fraud, corruption, favouritism, unfair or irregular practices or failure to comply with

this Policy, and when justified –

- (i) Take appropriate steps against such official or other role player; or
 - (ii) Report any alleged criminal conduct to the South African Police Service;
- (c) Check the National Treasury's database prior to awarding any contract to ensure that no recommended bidder, or any of its directors, is listed as a person prohibited from doing business with the public sector;
- (d) Reject any bid from a bidder –
- (i) If any municipal rates and taxes or municipal service charges owed by that bidder or any of its directors to the Stellenbosch Municipality or to any other municipality or municipal entity, are in arrears for more than three months; or
 - (ii) Who during the last five years has failed to perform satisfactorily on a previous contract with the Stellenbosch Municipality or any other organ of state after written notice was given to that bidder that performance was unsatisfactory;
- (e) Reject a recommendation for the award of a contract if the recommended bidder or any of its directors, or trust or its trustees has committed a corrupt or fraudulent act in competing for the particular contract;
- (f) Cancel a contract awarded to a person if –
- (i) The person committed any corrupt or fraudulent act during the bidding process or the execution of the contract; or
 - (ii) An official or other role player committed any corrupt or fraudulent act during the bidding process or the execution of the contract that benefited that person; and
- (g) Reject the bid of any bidder if that bidder or any of its directors –
- (i) Has abused the supply chain management system of the Stellenbosch Municipality or has committed any improper conduct in relation to such system;
 - (ii) Has been convicted for fraud or corruption during the past five years;
 - (iii) Has wilfully neglected, reneged on or failed to comply with any government, municipal or other public sector contract during the past five years; or
 - (iv) Has been listed in the Register for Tender Defaulters in terms of section 29 of the Prevention and Combating of Corrupt Activities Act (No 12 of 2004).
- (2) The Accounting Officer must inform the National Treasury and relevant provincial treasury in writing of any actions taken in terms of subparagraphs (1)(b)(ii), (e) or (f) of this Policy.

PART 3: LOGISTICS, DISPOSAL, RISK AND PERFORMANCE MANAGEMENT

39. LOGISTICS MANAGEMENT

- (1) The Accounting Officer must establish and implement an effective system of logistics management, which must include –
 - (a) The monitoring of spending patterns on types or classes of goods and services incorporating, where practical, the coding of items to ensure that each item has a unique number;
 - (b) The setting of inventory levels that includes minimum and maximum levels and lead times wherever goods are placed in stock;
 - (c) The placing of manual or electronic orders for all acquisitions other than those from petty cash;
 - (d) Before payment is approved, certification by the responsible officer that the goods and services are received or rendered on time and is in accordance with the order, the general conditions of contract and specifications where applicable and that the price charged is as quoted in terms of a contract;
 - (e) Appropriate standards of internal control and warehouse management to ensure that goods placed in stores are secure and only used for the purpose for which they were purchased;
 - (f) Regular checking to ensure that all assets including official vehicles are properly managed, appropriately maintained and only used for official purposes; and
 - (g) Monitoring and review of the supply vendor performance to ensure compliance with specifications and contract conditions for particular goods or services.

40. DISPOSAL MANAGEMENT

- (1) A supply chain management policy must provide for an effective system of disposal management for the disposal or letting of assets, including unserviceable, redundant or obsolete assets, subject to sections 14 and 90 of the Act
- (2) A supply chain management policy must specify the ways in which assets may be disposed of, including –
 - (a) Transferring the asset to another organ of state in terms of a provision of the Act enabling the transfer of assets;
 - (b) Transferring the asset to another organ of state at market related value or, when appropriate, free of charge;
 - (c) Selling the asset; and

- (d) Destroying the asset.
- (3) The Accounting Officer must ensure that –
- (a) Immovable property is sold only at market related prices except when the public interest or the plight of the poor demands otherwise;
 - (b) Movable assets are sold either by way of written price quotations, a competitive bidding process, auction or at market related prices, whichever is the most advantageous, except when the public interest or the plight of the poor demands otherwise;
 - (c) Firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;
 - (d) Immovable property is let at market related rates except when the public interest or the plight of the poor demands otherwise;
 - (e) All fees, charges, rates, tariffs, scales of fees or other charges relating to the letting of immovable property are annually reviewed;
 - (f) Where assets are traded in for other assets, the highest possible trade-in price is negotiated; and
 - (g) In the case of the free disposal of computer equipment, the provincial department of education is first approached to indicate within 30 days whether any of the local schools are interested in the equipment.
- (4) All matters relating to the alienation of movable and immovable assets shall be dealt with in terms of Council's Asset Transfer Policy and the Asset Transfer Regulations, 2008 and Council's adopted Immovable Assets Policy.
- (5) Notwithstanding the provisions of paragraph 3 hereof, the following statutory powers of Stellenbosch Council in respect of the alienation of immovable property, are reserved to be exercised by Council –
- (a) To decide on reasonable grounds that an asset is not needed to provide the minimum level of basic municipal services; and
 - (b) To considered the fair market value of the asset and the economic and community value to be received in exchange for the asset, and
- (6) Notwithstanding sub-paragraph (3)(b) & (g) above, the Accounting Officer must determine the most advantageous way for the disposal or letting of movable capital assets, i.e. written price quotations, competitive bidding, or auction, except when public interest or the plight of the poor demands otherwise.
- (7) The Accounting Officer is hereby authorized to dispose of movable capital assets:
- (8) (a) U-p to a value below a value of R 2 000 000.00
 - (7) (b) 500,0Up to a value of 99R1 000 000.00 (CFO and BAC Members) (excluding the approval for selling of assets via public auction process) and to make the determinations in terms of Section 14(2)(a) and (b) of the Act, provided that, in respect of capital assets above a value of R 200 000 not being auctioned, the

~~Accounting~~

~~Officer shall first consider a recommendation from the Supply Chain Management Bid Adjudication Committee.~~

Formatted: Justified, Indent: Left: 1.27 cm, Don't allow hanging punctuation

41. RISK MANAGEMENT

- (1) The criteria for an effective risk management strategy within supply chain management system, should include the identification, consideration and avoidance of potential risks.
- (2) Risk management should include –
 - (a) The identification of risks on a case-by-case basis;
 - (b) The allocation of risks to the party best suited to manage such risks;
 - (c) Acceptance of the cost of the risk where the cost of transferring the risk is greater than that of retaining it;
 - (d) The management of risks in a pro-active manner and the provision of adequate cover for residual risks; and
 - (e) The assignment of relative risks to the contracting parties through clear and unambiguous contract documentation.

42. PERFORMANCE MANAGEMENT

- (1) The Accounting Officer must establish and implement an internal monitoring system in order to determine, on the basis of a retrospective analysis, whether the authorised supply chain management processes were followed and whether the objectives of this Policy were achieved. The retrospective analysis will link to the regulatory reports and submissions on the implementation of the supply chain management policy to the delegated authorities as prescribed in terms of supply chain management regulations and the delegation system of council, as amended from time to time.

PART 4: OTHER MATTERS

43. PROHIBITION ON AWARDS TO PERSONS WHOSE TAX MATTERS ARE NOT IN ORDER

- (1) No award above R 30,000 (including VAT) may be made in terms of this Policy to a person whose tax matters have not been declared by the South African Revenue Service to be in order.
- (2) Before making an award to a person the Accounting Officer must first check with SARS whether that person's tax matters are in order.
- (3) If SARS does not respond within 7 days such person's tax matters may for purposes of subparagraph (1) be presumed to be in order.

- (4) Where the recommended bidder is not tax compliant on the date of award, the bidder should be notified of the non-compliant status and be requested to submit written proof of tax compliance from SARS within 7 working days from the date of award. The proof of tax compliance submitted by the bidder must be verified by the Municipality. The Municipality will reject a bid submitted by the bidder if such bidder fails to provide proof of tax compliance within the timeframe as set out in this sub-paragraph.

44. PROHIBITION ON AWARDS TO PERSONS IN THE SERVICE OF THE STATE

- (1) Irrespective of the procurement process followed, no award may be made to a person in terms of this Policy –
 - (a) Who is in the service of the state;
 - (b) If that person is not a natural person, of which any director, manager, principal shareholder or stakeholder is a person in the service of the state; or
 - (c) A person who is an advisor or consultant contracted with the Stellenbosch Municipality.

45. AWARDS TO CLOSE FAMILY MEMBERS OF PERSONS IN THE SERVICE OF THE STATE

- (1) The Accounting Officer must ensure that the notes to the annual financial statements disclose particulars of any award of more than R 2,000 to a person who is a spouse, child or parent of a person in the service of the state, or has been in the service of the state in the previous twelve months, including –
 - (a) The name of that person;
 - (b) The capacity in which that person is in the service of the state; and
 - (c) The amount of the award.

Formatted: Indent: Left: 1.29 cm, No bullets or numbering

46. ETHICAL STANDARDS

- (1) A code of ethical standards as set out in [subparagraph (2) / the "National Treasury's code of conduct for supply chain management practitioners and other role players involved in supply chain management, which also include all other municipal officials not involved in supply chain management system"] is hereby established for municipal officials and other role players in the supply chain management system of the Stellenbosch Municipality in order to promote-
 - (a) Mutual trust and respect; and
 - (b) An environment where business can be conducted with integrity and in a fair and reasonable manner.
- (2) A municipal official or other role player involved in the implementation of this Policy-
 - (a) Must treat all providers and potential providers equitably;
 - (b) May not use his or her position for private gain or to improperly benefit another person;
 - (c) May not accept any reward, gift, favour, hospitality or other benefit directly or indirectly, including to any close family member, partner or associate of that person, of a value more than R 350;
 - (d) Notwithstanding subparagraph (2)(c), must declare to the Accounting Officer details of any reward, gift, favour, hospitality or other benefit promised, offered or granted to that person or to any close family member, partner or associate of that person;
 - (e) Must declare to the Accounting Officer details of any private or business interest which that person, or any close family member, partner or associate, may have in any proposed procurement or disposal process of, or in any award of a contract by, the Stellenbosch Municipality;
 - (f) Must immediately withdraw from participating in any manner whatsoever in a procurement or disposal process or in the award of a contract in which that person, or any close family member, partner or associate, has any private or business interest;
 - (g) Must be scrupulous in his or her use of property belonging to Stellenbosch Municipality;
 - (h) Must assist the Accounting Officer in combating fraud, corruption, favouritism and unfair and irregular practices in the supply chain management system; and
 - (i) Must report to the Accounting Officer any alleged irregular conduct in the supply chain management system which that person may become aware of, including –
 - (i) Any alleged fraud, corruption, favouritism or unfair conduct;
 - (ii) Any alleged contravention of paragraph 47(1) of this Policy; or

(iii) Any alleged breach of this code of ethical standards.

(3) Declarations in terms of subparagraphs (2)(d) and (e) –

- (a) Must be recorded in a register, which the Accounting Officer must keep for this purpose; and
- (b) By the Accounting Officer must be made to the Executive Mayor of the municipality who must ensure that such declarations are recorded in the register.

(4) The National Treasury's code of conduct and Schedule 2 of the Systems Act must be adhered to by supply chain management practitioners and other role players involved in supply chain management.

(5) A breach of the code of ethics must be dealt with as follows –

- (a) In the case of an employee, in terms of the disciplinary procedures of the Stellenbosch Municipality envisaged in section 67(1)(h) of the Municipal Systems Act;
- (b) In the case a role player who is not an employee, through other appropriate means in recognition of the severity of the breach;
- (c) In all cases, financial misconduct must be dealt with in terms of chapter 15 of the Act; and
- (d) All cases of non-compliance to this Policy should be reported to the Accounting Officer.

47. INDUCEMENTS, REWARDS, GIFTS AND FAVOURS TO MUNICIPALITIES, OFFICIALS AND OTHER ROLE PLAYERS

(1) No person who is a provider or prospective provider of goods or services, or a recipient or prospective recipient of goods disposed or to be disposed of may either directly or through a representative or intermediary promise, offer or grant –

- (a) Any inducement or reward to the Stellenbosch Municipality for or in connection with the award of a contract; or
- (b) Any reward, gift, favour or hospitality to –
 - (i) Any official; or
 - (ii) Any other role player involved in the implementation of this Policy.

(2) The Accounting Officer must promptly report any alleged contravention of subparagraph (1) to the National Treasury for considering whether the offending person, and any representative or intermediary through which such person is alleged to have acted, should be listed in the National Treasury's database of persons prohibited from doing business with the public sector.

- (3) Subparagraph (1) does not apply to gifts less than R 350 in value.

48. SPONSORSHIPS

- (1) The Accounting Officer must promptly disclose to the National Treasury and the relevant provincial treasury any sponsorship promised, offered or granted, whether directly or through a representative or intermediary, by any person who is –
- (a) A provider or prospective provider of goods or services; or
 - (b) A recipient or prospective recipient of goods disposed or to be disposed.

49. OBJECTIONS AND COMPLAINTS

- (1) Persons aggrieved by decisions or actions taken in the implementation of this supply chain management system, may lodge within 14 days of the decision or action, a written objection or complaint against the decision or action.

50. RESOLUTION OF DISPUTES, OBJECTIONS, COMPLAINTS AND QUERIES

- (1) The Accounting Officer may, if deem so, appoint an independent and impartial person, not directly involved in the supply chain management processes –
- (a) To assist in the resolution of disputes between the Stellenbosch Municipality and other persons regarding –
 - (i) Any decisions or actions taken in the implementation of the supply chain management system; or
 - (ii) Any matter arising from a contract awarded in the course of the supply chain management system; or
 - (b) To deal with objections, complaints or queries regarding any such decisions or actions or any matters arising from such contract.
- (2) The Accounting Officer, or another official designated by the Accounting Officer, is responsible for assisting the appointed person to perform his or her functions effectively.
- (3) The person appointed should, if appointed –
- (a) Strive to resolve promptly all disputes, objections, complaints or queries received; and
 - (b) Submit monthly reports to the Accounting Officer on all disputes, objections, complaints or queries received, attended to or resolved.
- (4) A dispute, objection, complaint or query may be referred to the relevant provincial treasury if –

- (a) The dispute, objection, complaint or query is not resolved within 60 days; or
 - (b) No response is forthcoming within 60 days.
- (5) If the provincial treasury does not or cannot resolve the matter, the dispute, objection, complaint or query may be referred to the National Treasury for resolution.
- (6) This paragraph must not be read as affecting a person's rights to approach a court at any time.

51. CONTRACTS PROVIDING FOR COMPENSATION BASED ON TURNOVER

- (1) If a service provider acts on behalf of a Stellenbosch Municipality to provide any service or act as a collector of fees, service charges or taxes and the compensation payable to the service provider is fixed as an agreed percentage of turnover for the service or the amount collected, the contract between the service provider and the Stellenbosch Municipality must stipulate
- (a) A cap on the compensation payable to the service provider; and
 - (b) That such compensation must be performance based.

52. CONTRACTS HAVING BUDGETARY IMPLICATIONS BEYOND THREE FINANCIAL YEARS

- (1) Stellenbosch Municipality may not enter into any contract that will impose financial obligations beyond the three years covered in the annual budget for that financial year, unless the requirements of Section 33 of the Act have been fully complied with.

53. INCREASE / EXTENSION IN APPROVED CONTRACT SUM / PERIOD

- (1) Any increase and / or extension in the approved contract sum that may become necessary as a result of exceptional circumstances during the contract period must be approved by the appropriate bid committees prior to implementation.
- (2) Contracts may be expanded or varied by not more than 20% of the original contract value for construction related goods, services and/or infrastructure projects and 15% for all other goods and/or services.
- (3) Any expansion or variation in excess of these thresholds as stated under subparagraph (2) must be dealt with in terms of the provisions of section 116(3) of the Act which will be regarded as an amendment of a contract.
- (4) Where community participation has been a part of the project, the community must be advised of the proposed increase and be invited to provide written comment within a minimum period of seven (7) days.

~~Any unapproved increase in the contract sum must be explained in a report to the Accounting Officer, requesting condonation for of such unapproved increase.~~

54. RIGHT OF APPEAL

Formatted: Indent: Left: 0 cm, Hanging: 1 cm, No bullets or numbering

Formatted: Indent: Left: 0 cm, Hanging: 1 cm, Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 54 + Alignment: Left + Aligned at: 0.63 cm + Tab after: 1.27 cm + Indent at: 1.27 cm, Tab stops: Not at 1.27 cm

- (1) In terms of Section 62 of the Municipal Systems Act (Act 32 of 2000 as amended), a person whose rights are affected by a decision taken by the Municipality, in terms of a delegated authority, in the implementation of its supply chain management system, may appeal against that decision by giving written notice of the appeal and reasons to the Municipal Manager within 21 days of the date of the notification of the decision.
- (2) Notification of the decision in terms of sub-paragraph 55(1) of this policy must state that any appeal must be submitted in writing to the Municipal Manager and must at least contain the following information:
 - (a) The reasons and / or grounds for the appeal;
 - (b) The way in which the appellants rights have been affected; and
 - (c) The remedy sought by the appellant.
- (3) No award, where a competitive bidding process was followed, shall be formally implemented until a ruling has been made on any appeal/s received. The Municipal Manager may however grant approval for the implementation of bid awards prior to the conclusion of the appeal process in respect of bids which in his / her opinion are deemed as urgent.
- (4) The Appeal Authority will provide the service provider with copies of the Bid Committee minutes applicable to the specific tender on request within the 21 days period, of the service provider to enable him/her to motivate his/her appeal. Should the service provider request other documentation a PAIA application should be submitted.
- (5) The appeal authority must consider the appeal and confirm, vary or revoke the decision, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.

56.55. NOTIFICATION OF BID DECISIONS

- (1) The successful and unsuccessful bidders shall be notified in writing by the Supply Chain Management once a bid has been accepted.
- (2) The bidders shall, in addition, be advised of the 21 day appeal period in terms of section 62 of the Municipal Systems Act and be notified that no rights will accrue to him / her until the bid is formally accepted in writing.
- (3) Once the 21 day appeal period has lapsed and a decision has been made by the appeal authority, the appellant and the service provider who the tender was initially awarded will be notified in writing of the outcome thereof by the Supply Chain Management.
- (4) Every notification of decision shall be faxed or sent via electronic mail and ordinary mail to the address chosen by the bidder, with a copy of proof of transmission kept for record purposes, or shall be delivered by hand, in which case acknowledgement of receipt must be signed and dated on a copy of such notification to be kept for record purposes.

Formatted: Indent: Left: 0 cm, Hanging: 1 cm, Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 55 + Alignment: Left + Aligned at: 0.63 cm + Tab after: 1.27 cm + Indent at: 1.27 cm, Tab stops: Not at 1.27 cm

57.56. UNSUCCESSFUL BIDDER DEBRIEFING

Formatted: Indent: Left: 0 cm, Hanging: 1 cm, Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 56 + Alignment: Left + Aligned at: 0.63 cm + Tab after: 1.27 cm + Indent at: 1.27 cm, Tab stops: Not at 1.27 cm

- (1) The Municipality will offer an unsuccessful bidder debriefing service to unsuccessful bidders upon request.
- (2) During the debriefing unsuccessful bidders will be informed of how their proposal scored against required criteria and obtain comments from the evaluation team on their bid.
- (3) The debriefing should be a positive and constructive experience that explains how bidders can improve future submissions.
- (4) The debriefing is an opportunity for unsuccessful bidders to –
 - (a) Learn more about the procurement and evaluation process in an informal setting;
 - (b) Find out how their proposal scored against the required criteria;
 - (c) Hear the overall comments from the evaluation team on their bid; and
 - (d) Gather information on how future submissions may be improved.
- (5) The debriefing is not part of the Supply Chain complaint or appeal process in terms of paragraph 49 or 55 of this Policy.
- (6) The debriefing is not a legal proceeding and no legal representation is permitted at the debriefing session.
- (7) At the debriefing session the unsuccessful bid is not compared to other bids, nor will information be provided to the unsuccessful bidder about other bids.
- (8) In scheduling a bidder's debriefings session upon the request of the unsuccessful bidder, the municipality must –
 - (a) Confirm the date and time of the debriefing session in writing;
 - (b) Conduct separate debriefings with each unsuccessful bidder;
 - (c) Ensure that proper minutes are kept of each debriefing session; and
 - (d) Retain all correspondence and documentation relevant to the debriefing session as part of the procurement documentation.
- (9) In conducting bidders' debriefings, the municipality may –
 - (a) Provide a general overview of the evaluation process set out in the bid documents;
 - (b) Discuss the strengths and weaknesses of the bidder's submission in relation to the specific evaluation criteria and the bidders evaluated score;
 - (c) Provide suggestions on how the supplier may improve future submissions; and
 - (d) Address specific questions and issues raised by the supplier in relation to their submission.

58.57. THE SUSPENSION OF SERVICE PROVIDERS FOR POOR PERFORMANCE AND OTHER BREACHES

- (1) Any failure to fulfil the deliverables in line with the contract or service levels constitutes a material breach or poor performance which will result in the termination of the contract and/or sanctions will be imposed in the form of suspension from the database.
- (2) Such sanctions will have variation in the periods of suspension based on the gravity of the breach.
- (3) The municipality must consider imposing following sanctions, subject to sub-clause (2) above:
 - a) 6 months for non-declarations of relative/spouse within the municipality;
 - b) 12 months for misleading information provided to the municipality; and
 - c) 24 months for certain or above a certain threshold value based.
 - d) All the above will be applicable based on the gravity of the poor performance and will be analysed on a case by case basis co-ordinated by the Contract Management Section.

Formatted: Indent: Left: 0 cm, Hanging: 1 cm, Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 57 + Alignment: Left + Aligned at: 0.63 cm + Tab after: 1.27 cm + Indent at: 1.27 cm, Tab stops: Not at 1.27 cm

59.58. CONDONATION OF POLICY CONTRAVENTIONS

- (1) Council may condone a contravention in terms of this Policy, provided that such contravention is also not a contravention of the Act or the Municipal Supply Chain Management Regulations, 2005
- (2) Any expenditure relating to such condonation by Council in terms of this Policy, will not constitute irregular expenditure as contemplated under section 1 of the Act.
- (3) Contraventions of the Act relating to supply chain management or the Municipal Supply Chain Management Regulations, 2005 must be dealt with in terms of section 32 and section 170 of the Act.

Formatted: Indent: Left: 0 cm, Hanging: 1 cm, Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 57 + Alignment: Left + Aligned at: 0.63 cm + Tab after: 1.27 cm + Indent at: 1.27 cm, Tab stops: Not at 1.27 cm

59. GENERAL

The Framework for Infrastructure Delivery and Procurement Management (FIDPM) and relevant Circular is attached as AppendixAnnexures 26 A and B respectively, depending on the ability of Stellenbosch Municipality to implement the content of the Framework, only those parts that are practically implementable will be applied. The proper assessments will be done accordingly.

Foreword

In 2012, the Infrastructure Delivery Management System (IDMS) was adopted as the chosen government wide system for infrastructure delivery in South Africa. In the same year (2012), the National Treasury, together with the eight metropolitan municipalities, initiated the customisations of the IDMS for implementation by municipalities. The product of that engagement became the Cities Infrastructure Delivery Management Toolkit (CIDMT), focusing mainly on cities or metros.

In order to establish a common approach to infrastructure delivery across all organs of state, the Standard for Infrastructure Procurement and Delivery Management (SIPDM) was issued for adaptation and adoption by municipalities in terms of Circular 77.

In the process of implementing and institutionalising the SIPDM, institutions expressed concerns regarding the operational challenges imposed by aspects of the SIPDM. This constraint was further compounded when the Preferential Procurement Regulations, 2017 were promulgated and effected, resulting in conflict between the SIPDM and the Regulations.

The National Treasury, in consultation with relevant stakeholders, initiated the SIPDM review process, which resulted in the development of the Local Government Framework for Infrastructure Delivery and Procurement Management (LGFIDPM). The LGFIDPM provides for minimum requirements for effective governance of infrastructure delivery and procurement management. It also recognises the different capacities in the various categories of municipalities and therefore requests municipalities to review their institutional and capacities before adapting and adopting this model.

Introduction

- a) The Integrated Development Plan (IDP) is the principal strategic planning instrument for municipalities. The IDP process requires a robust process of gathering and synthesising information related to the medium to long-term management of the municipality's infrastructure needs.
- b) The preparation of Roads and Storm Water Services, Water and Sanitation Services, Waste Disposal Services, Electricity Services and Community Facilities and Municipal Buildings, Infrastructure Asset Management Plans (IAMPs) enables municipalities to rank projects and determine budgets, based on a holistic view of local needs and priorities; and serves as a source of valuable information in preparing the IDP.
- c) Through the Infrastructure Delivery Management System, Cities Infrastructure Delivery Management System was developed to provide a holistic system for the management of infrastructure based on the requirements of SANS 55001: Asset management tailored for application in South African metropolitan spaces and specifically in support of the country's spatial transformation agenda.
- d) There is need to develop an infrastructure delivery management system tailor-made for all municipalities (excluding cities) which should integrate asset management strategy, policy to guide infrastructure planning, delivery management and decision making. The LGFIDPM introduces the initial process focusing on the project processes of the infrastructure delivery management and infrastructure procurement.
- e) The Framework for Infrastructure Procurement Management should be implemented together with the project management processes, to ensure alignment, integration and efficient and effective service delivery.

1. Scope

- 1.1. The Local Government FIDPM applies to organs of state which are subject to the Municipal Finance Management Act (MFMA).
- 1.2. The Framework provides minimum requirements for the implementation of Infrastructure Delivery and Procurement Management through the:
 - a) Project processes for infrastructure delivery management, and
 - b) Infrastructure procurement gates.
- 1.3. The Framework specifies the allocation of responsibilities for performing activities and making decisions at project stages and procurement gates.

2. Terms and Definitions

Approved: Officially agreed and signed-off by an Accounting Officer or a delegated person / body.

Construction: Everything constructed or resulting from construction operations.

Employer: Organ of state intending to, or entering into, a contract with a contractor.

Gate: A control point at the end of a process where a decision is required before proceeding to the next process or activity.

Gateway review: An independent review of the available information at a gate upon which a decision is made whether to proceed to the next process, or not.

Infrastructure:

- a) Immovable asset, which is acquired, constructed or results from construction operations; or
- b) Movable asset, which cannot function independently from purpose-built immovable asset(s).

Infrastructure delivery: The combination of all planning, technical, administrative and managerial actions associated with the construction, supply, refurbishment, rehabilitation, alteration, maintenance, operation or disposal of infrastructure.

Infrastructure procurement: The procurement of goods or services, including any combination thereof, associated with the acquisition, refurbishment, rehabilitation, alteration, maintenance, operation or disposal of infrastructure.

Organ of State: Any department of state or administration in the national, provincial and local sphere of government.

Procurement strategy: The selected packaging, contracting, pricing and targeting strategy and procurement procedure for a particular procurement.

Project: A unique set of processes consisting of coordinated and controlled activities with start and end dates, performed to achieve the project objective.

Stage: A collection of periodical and logically related activities in the Project Management Control Stages, that culminates in the completion of an end of stage deliverable.

4. NORMATIVE REFERENCES

4.1 Acts of Parliament

The following referenced Acts of Parliament are indispensable in the application of this document:

- Architectural Profession Act, 2000 (Act No. 44 of 2000)
- Broad-Based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003)
- Constitution of the Republic of South Africa, 1996 (Act No. 108 of 1996)
- Construction Industry Development Board Act, 2000 (Act No. 38 of 2000)
- Division of Revenue Act (Annual)
- Engineering Profession Act, 2000 (Act No. 46 of 2000)
- Landscape Architectural Profession Act, 2000 (Act No. 45 of 2000)
- Municipal Finance Management Act, (No. 56 of 2003)
- Local Government: Municipal Systems Act, 2000 (Act No. 32 Of 2000)
- National Archives and Record Services of South Africa Act, 1996 (Act No. 43 of 1996)
- Occupational Health and Safety Act, 1993 (Act No. 85 of 1993)
- Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000)
- Project and Construction Management Professions Act, 2000 (Act No. 48 of 2000)
- Public Finance Management Act, 1999 (Act No. 1 of 1999)
- Quantity Surveying Profession Act of 2000 (Act No. 49 of 2000)
- Other Sector Specific Acts of Parliament.

4.2 Regulations issued in terms of the MFMA and MFMA Circulars

- Regulations issued in terms of the MFMA
- Preferential Procurement Policy Framework Act Regulations (PPPFA of 2017 or as amended from time to time) and circulars.

4.3 Standards

- Applicable Construction Industry Development Board Standard for Uniformity
- Construction Sector Code.

4.4 Management System

- Infrastructure Delivery Management System (IDMS)
- Cities Infrastructure Delivery Management Toolkit (CIDMT).

4.5 National Treasury Guidelines

- Local Government Capital Asset Management Guideline and Planning Guidelines
- Budget Facility for Infrastructure (BFI).

4.6 Department of Cooperative Governance and Traditional Affairs Guidelines

- Guidelines for Infrastructure Asset Management in Local Government.

5. FRAMEWORK FOR INFRASTRUCTURE DELIVERY

5.1 The Infrastructure Delivery Management Project Processes

- a) The project process of infrastructure delivery management contains control stage deliverables at the end of each stage. Table 1 outlines the stage deliverables that must be approved. The control stages are specific to project management processes; and outline and describe the stages in the life of a project from start to end. The specific stages are determined by the specific project's governance and control needs. The stages follow a logical sequence with a specified start and end. The deliverable is considered to have passed through the relevant stage when it is approved and signed off. The project then moves on to the next sequential stage. It is expected that the municipality's organisation reflects an engagement between the Budget Treasury Office, Engineers and Planners when developing and approving projects. It is also expected that there should be engagements with the National and Provincial Treasury where appropriate or where projects dictate so.

Table 1: Project stage deliverables

Stage		Project Stage Deliverables
No	Name	End of Stage Deliverables
1	Initiation	<p>Initiation Report or Pre-feasibility Report</p> <p>(i) The Initiation Report defines project objectives, needs, acceptance criteria, organisation's priorities and aspirations, and procurement strategies, which set out the basis for the development of the Concept Report.</p> <p>Or</p> <p>(ii) A Pre-feasibility Report is required on Mega Capital Projects, to determine whether to proceed to the Feasibility Stage; where sufficient information is presented to enable a final project implementation decision to be made. Mega capital projects should be determined in the municipality's policy approved by the Municipal Council.</p> <p>Stage 1 is complete when the Initiation Report or Pre-feasibility Report is approved.</p>
2	Concept	<p>Concept Report or Feasibility Report</p> <p>(i) The Concept Stage presents an opportunity for the development of different design concepts to satisfy the project requirements developed in Stage 1. This stage presents alternative approaches and an opportunity to select a particular conceptual approach. The objective of this stage is to determine whether it is viable to proceed with the project, premised on available budget, technical solutions, time frame and other information that may be required.</p> <p>(ii) The Concept Report should provide the following minimum information:</p>

Stage		Project Stage Deliverables
No	Name	End of Stage Deliverables
		<p>a) Document the initial design criteria, cost plan, design options and the selection of the preferred design option; or the methods and procedures required to maintain the condition of infrastructure, or the project.</p> <p>b) Establish the detailed brief, scope, scale, form and cost plan for the project, including, where necessary, the obtaining of site studies and construction and specialist advice.</p> <p>c) Provide an indicative schedule for documentation and construction, or maintenance services, associated with the project.</p> <p>d) Include a site development plan, or other suitable schematic layouts, of the works.</p> <p>e) Describe the statutory permissions, funding approvals and utility approvals required to proceed with the works associated with the project.</p> <p>f) Include a baseline risk assessment for the project and a health and safety plan, which is a requirement of the Construction Regulations issued in terms of the Occupational Health and Safety Act.</p> <p>g) Contain a risk report, need for further surveys, tests, investigations, consents and approvals, if any, during subsequent stages.</p> <p>(iii) A Feasibility Report must provide the following minimum information:</p> <p>a) Details regarding the preparatory work covering:</p> <ul style="list-style-type: none"> • A needs and demand analysis with output specifications. • An options analysis. <p>b) A viability evaluation covering:</p> <ul style="list-style-type: none"> • A financial analysis. • An economic analysis, if necessary. <p>c) A risk assessment and sensitivity analysis;</p> <p>d) A professional analysis covering:</p> <ul style="list-style-type: none"> • A technology options assessment. • An environmental impact assessment. • A regulatory due diligence. <p>e) An implementation readiness assessment covering:</p> <ul style="list-style-type: none"> • Institutional capacity. • A procurement plan. <p>Stage 2 is complete when the Concept Report or the Feasibility Report is approved.</p>
3	Design Development	<p>Design Development Report</p> <p>(i) The Design Development Report must, as necessary:</p> <p>a) Develop, in detail, the approved concept to finalise the design and definition criteria.</p>

Stage		Project Stage Deliverables
No	Name	End of Stage Deliverables
		<ul style="list-style-type: none"> b) Establish the detailed form, character, function and costings. c) Define the overall size, typical detail, performance and outline specification for all components. d) Describe how infrastructure, or elements or components thereof, are to function; and how they are to be safely constructed, be commissioned and be maintained. e) Confirm that the project scope can be completed within the budget, or propose a revision to the budget. <p>Stage 3 is complete when the Design Development Report is approved.</p>
4	Design Documentation	<p>Design Documentation</p> <ul style="list-style-type: none"> (i) Design documentation provides: <ul style="list-style-type: none"> a) the production information that details performance definition, specification, sizing and positioning of all systems and components that will enable construction; b) the manufacture, fabrication and construction information for specific components of the work, informed by the production information. <p>Stage 4 is complete when the Design Documentation Report is approved.</p>
5	Works	<p>Completed Works capable of being used or occupied</p> <ul style="list-style-type: none"> (i) Completion of the Works Stage requires: <ul style="list-style-type: none"> a) Certification of the completion of the works in accordance with the provisions of the contract; or b) Certification of the delivery of the goods and associated services in accordance with the provisions of the contract. <p>Stage 5 is complete when the Works Completion Report is approved.</p>
6	Handover	<p>Works which have been taken over by the user or owner; Completed Training; Record Information</p> <ul style="list-style-type: none"> (i) The handover stage requires the following activities to be undertaken: <ul style="list-style-type: none"> a) Finalise and assemble record information which accurately reflects the infrastructure that is acquired, rehabilitated, refurbished or maintained; b) Hand over the works and record information to the user organisation and, if necessary, train end user staff in the operation of the works. <p>Stage 6 is complete when the Handover/Record Information Report is approved.</p>
7	Close-Out	<p>Defects Certificate or Certificate of Final Completion; Final Account; Close-Out Report</p>

Stage		Project Stage Deliverables
No	Name	End of Stage Deliverables
		<p>(i) The Close-Out Stage commences when the end user accepts liability for the works. It is complete when:</p> <ul style="list-style-type: none"> a) Record information is archived; b) Defects certificates and certificates of final completion are issued in terms of the contract; c) Final amount due to the contractor is certified in terms of the contract; d) Close-Out Report is prepared by the Implementer and approved by the Municipality. <p>Stage 7 is complete when the Close-out Report is approved.</p>

- b) Procurement of PSPs and Contractors can occur at different points in the project stages.
- c) Additional stages may be added to the described stages above, if deemed necessary. For example, additional stages could include those necessary to ensure that project activities are appropriately carried out and stages linked. Contract activities would, in many instances, be contingent upon the requirements of the specific contract being used.
- d) For project progress using the project stages, reporting must be for the deliverable achieved in the stage immediately prior to the 'in progress' stage. For example, if a project is shown as being at Stage No. 3 (Design Development), it implies that the deliverable for Stage No. 2 (i.e. the Concept Report) has been achieved; and that the deliverable for Stage 3 (i.e. the Design Development Report) is in the process of being prepared.
- e) Where an organ of state engages another organ of state to provide agency services, a service delivery agreement must be developed that outlines the roles and responsibilities for each organ of state; and establishes a relationship between the client and the implementer. The development of all deliverables should be carried out in a cooperative and consultative manner between the Client and Implementer parties. All deliverables must be developed and signed off in compliance with the specific service delivery agreement.

5.2 Gateway Reviews

5.2.1 Gateway reviews for mega capital projects

- (i) The MFMA (Act 56 of 2003), section 19 (2) states: "Before approving a capital project in terms of subsection (1)(b), the council of a municipality must consider the projected cost covering all financial years from the start until the project is operational; and the future operational costs and revenue on the project, including municipal tax and tariff implications."
- (ii) The LGFIDPM prescribes the Gateway Review at the end of stage 2, as the minimum requirement to comply with section (i) above.
- (iii) The focus of such a review must be on the quality of the documentation in the first instance, and thereafter on:
 - a) Deliverability: the extent to which a project is deemed likely to deliver;
 - b) Expected benefits: within the declared cost, time and performance area;
 - c) Affordability: the extent to which the project's level of expenditure and financial risk can be accepted, given the organisation's overall financial position, both singly, and when considering its other current and projected commitments; and

- d) Value for money: The optimum combination of whole life costs and quality (or fitness of purpose), to meet the user's requirements.
- (iv) A gateway review team must comprise of not less than three persons who are neither involved, nor associated with the project, but have a broad understanding of the subject matter.
- (v) A gateway review must be led by a person who has experience in the planning of infrastructure projects and is registered as a professional with a statutory council under the built environment professions. The members of the team must, as relevant, have expertise in the key technical areas, cost estimating, scheduling and implementation of similar projects.
- (vi) It is the duty of the institution's Accounting Officer or Authority to appoint a team responsible for the gateway review of his or her institution.
- (vii) The gateway review team must base its findings primarily on:
 - a) The information contained in the end-of-stage deliverable;
 - b) Supplementary documentation, if any, provided by key staff and obtained during an interview process; and
 - c) Interviews with key staff members and stakeholders.
- (viii) The gateway review team must issue a report at the conclusion of a gateway review, which reflects the team's assessment of the information at the end of a stage; and provides findings or recommendations on areas where further work should be undertaken to improve such information.
- (ix) The gateway review findings must be classified by the gateway review team as:
 - a) Critical: Findings that pose adverse effect to the project or package. Critical findings are findings related to the stage deliverable that are wholly unacceptable.
 - b) Major: Findings that pose a potentially adverse effect to the project or package. Major findings are serious findings and are in direct violation of key legislation, e.g. The Constitution of the Republic of South Africa, the MFMA or the PPPFA.
 - c) Minor: Findings that do not pose any adverse effect to the project or package. Minor findings indicate the need for improvement of practices and processes.
- (x) A Stage 2 deliverable must not be approved until such time that all findings have been resolved.

6. FRAMEWORK FOR INFRASTRUCTURE PROCUREMENT

6.1 INTRODUCTION

The framework for infrastructure procurement outlines the minimum infrastructure procurement policy requirements for municipal planning and implementation.

The strategic direction set in the Integrated Development Plan (IDP) informs the framework for infrastructure procurement. For example, procurement strategies must be aligned to the municipality's developmental and internal transformation needs, as specified in the IDP.

6.2 MINIMUM REQUIREMENT FOR INFRASTRUCTURE PROCUREMENT

- 6.2.1 Infrastructure procurement must be undertaken in accordance with all applicable Infrastructure Procurement related legislation and this Framework.
- 6.2.2 Infrastructure procurement must be implemented in accordance with the institutional Supply Chain Management System, which promotes differentiated procurement for infrastructure.
- 6.2.3 Infrastructure procurement must be implemented in accordance with the procurement gates prescribed in clause 6.3 below.
- 6.2.4 The Accounting Officer must ensure that a budget is available for the duration of the project, in line with MFMA provisions for capital and operating budgets.
- 6.2.5 The Accounting Officer must ensure that cash flow management processes are in place to meet payment obligations within the time periods specified in the contract.
- 6.2.6 Procurement gates provided in 6.3 below must be used, as appropriate, to:
 - a) Authorise commencement of activities that lead to the next control gate;
 - b) Confirm conformity with requirements; and/or
 - c) Provide information to eliminate any cause of non-conformity and to prevent reoccurrence.
- 6.2.7 The authorisation to proceed to the next procurement gate must be given by a delegated person or body. The delegated person or body must be able to apply relevant built environment knowledge and skill to achieve the intended results required at the relevant procurement gate. The level of detail contained in the documentation on which a decision to proceed to the next procurement gate is made, must be sufficient to enable an informed decision.
- 6.2.8 The Accounting Officer must develop and implement effective and efficient emergency procurement procedures, including relevant approval delegation, in compliance with relevant legislation.
- 6.2.9 The Accounting Officer must develop and implement an effective and efficient infrastructure disposal policy in line with the Municipal Asset Transfer Regulations. The institution may consider disposal strategies aligned to their internal disposal policy, prior to proceeding with the procurement strategy.
- 6.2.10 The Accounting Officer must keep records of Procurement Gate Approvals, in a manual or electronic format, with the following minimum requirements:
 - a) Procurement gate;
 - b) Delegated person/s or body;
 - c) Date on which the approval request was received;
 - d) Date on which the approval was actioned; and
 - e) Signature of the delegated person or body.
- 6.2.11 All assets must be recorded in the municipal asset register as required by the GRAP standards.

6.3 Infrastructure Procurement Gates

6.3.1 Procurement Gate 1 (PG 1)

- a) Initiate a procurement process;
- b) **Minimum Requirement for PG 1:**
 - 1) Establish and clarify the procurement need, aligned to the municipality's development and transformation priorities specified in the IDP.
 - 2) Determine a suitable title for the procurement, to be applied as the project description.
 - 3) Prepare the broad scope of work for the procurement.
 - 4) Perform market analysis.
 - 5) Estimate the financial value of proposed procurement and contract for budgetary purposes, based on the broad scope of work.
 - 6) Confirm the budget.
 - 7) Compliance with section 33 of the MFMA with respect to community and stakeholder consultation.
- c) **PG 1 is complete when a designated person or body makes the decision to proceed/not to proceed, with the procurement of the infrastructure.**

6.3.2 Procurement Gate 2 (PG 2)

- a) Approve procurement strategy to be adopted.
- b) **Minimum Requirement for PG 2:**
 - 1) Develop a procurement strategy aligned to the institutional procurement strategy:
 - a. Establish contracting and pricing strategy comprising of an appropriate allocation of responsibilities and risks; and the methodology for contractor payments.
 - b. Identify service required for works.
 - c. Decide on contracting strategy.
 - d. Decide on pricing strategy.
 - e. Decide on form of contract.
 - f. Establish opportunities for promoting preferential procurement in compliance with legislative provisions and the Construction Sector Code.
- c) **PG 2 is complete when a delegated person or body approves the procurement strategy that is to be adopted.**

6.3.3 Procurement Gate 3 (PG 3)

- a) Approve procurement documents.
- b) **Minimum requirements for PG 3:**
 - 1) Prepare procurement documents that are compatible with:
 - (i) approved procurement strategies.
 - (ii) project management design documentation.
- c) **PG 3 is complete when the Bid Specification Committee approves the procurement document. .**

6.3.4 Procurement **Gate 4 (PG 4)**

- a) Confirm that cash flow processes are in place to meet projected contractual obligations.
- b) **Minimum requirement for PG 4**
 - 1) Confirm that cash flow processes are in place to meet contractual obligations.
 - 2) Establish control measures for settlement of payments within the time period specified in the contract.
- c) **PG 4 is complete when a delegated person or body confirms in writing that cash flow processes are in place; and control measures are established for the procurement to take place.**

6.3.5 Procurement **Gate 5 (PG 5)**

- a) Solicit tender offers.
- b) **Minimum requirements for PG 5**
 - 1) Invite contractors to submit tender offers.
 - 2) Receive tender offers.
 - 3) Record tender offers.
 - 4) Safeguard tender offers.
- c) **PG 5 is complete when tender offers received are recorded and safeguarded by a delegated person from the SCM unit.**

6.3.6 Procurement **Gate 6 (PG 6)**

- a) Evaluate tender offers premised on undertakings and parameters established in procurement documents.
- b) **Minimum Requirement for PG 6:**
 - 1) Determine whether tender offers are complete.
 - 2) Determine whether tender offers are responsive.
 - 3) Evaluate tender submissions.
 - 4) Review minimum compliance requirements for each tender.
 - 5) Perform a risk analysis.
 - 6) Prepare a report on tender offers received, and on their achievement of minimum compliance.
- c) **PG 6 is complete when the chairperson of the Bid Evaluation Committee approves the BEC report.**

6.3.7 Procurement **Gate 7 (PG 7)**

- a) Award the contract.
- b) **Minimum Requirement for PG 7:**
 - 1) Bid adjudication committee review of the BEC evaluation report.
 - 2) Bid Adjudication Committee makes an award.
 - 3) Accounting Officer approval of the tender process.
 - 4) Notify successful tenderer and unsuccessful tenderers of the outcome.
 - 5) Sign contract document.
 - 6) Formally accept tender offer.
- c) **PG 7 is complete when the Accounting Officer, or the Bid Adjudication Committee where delegated, confirms that the tenderer has provided evidence of complying with all requirements stated in the tender data and formally accepts the tender offer in writing, and issues the contractor with a signed copy of the contract.**

6.3.8 Procurement **Gate 8 (PG 8)**

- a) Administer and monitor the contract.
- b) **Minimum Requirements for PG 8:**
 - 1) Finance department to:
 - (i) Capture contract award data.
 - (ii) Manage cash flow projection.
 - (ii) Administer contract in accordance with the terms and provisions of the contract.
 - 2) Delivery department to:
 - (i) Ensure compliance with contractual requirements.
- c) **PG 8 is complete when a delegated person captures the contract completion/termination data (close out reports and relevant documents), including payment certificates due.**

7. Conclusion

It is advised that municipalities and municipal entities review this document from a practical implementation perspective and amend its SCM policies accordingly by inserting those parts that is practically implementable into the SCM Policy to be approved by the municipal council. You are also encouraged to share this with the relevant officials within the institution to ensure organisational awareness of this reform.

NATIONAL TREASURY

MFMA Circular No 106

Municipal Finance Management Act No. 56 of 2003

LOCAL GOVERNMENT FRAMEWORK FOR INFRASTRUCTURE DELIVERY AND PROCUREMENT MANAGEMENT

PURPOSE

In order to establish a common approach to infrastructure delivery across all organs of state, the Standard for Infrastructure Procurement and Delivery Management (SIPDM) was issued for municipalities and communicated in MFMA Circular 77.

In the process of institutionalising the SIPDM municipalities experienced challenges with some aspects thereof. The reforms to the Preferential Procurement Regulations, 2017 which was promulgated and effected also had an impact on the earlier reform.

The National Treasury, in consultation with relevant stakeholders, initiated the SIPDM review process which resulted in the development of the Local Government Framework for Infrastructure Delivery and Procurement Management (LGFIDPM). The LGFIDPM introduces minimum requirements for effective governance of infrastructure delivery and procurement management.

BACKGROUND AND DISCUSSION

In 2012, the Infrastructure Delivery Management System (IDMS) was adopted as the chosen government wide system for infrastructure delivery in South Africa. In the same year (2012), the National Treasury, together with the eight metropolitan municipalities, initiated the customisation of the IDMS for implementation by municipalities. The product of that engagement became the Cities Infrastructure Delivery Management Toolkit (CIDMT), focusing mainly on metropolitan municipalities.

The Planning Commission's National Development Plan 2030: *Our future-make it work* proposes that the following five areas be focused on in designing a procurement system that is better able to deliver value for money, while minimising the scope for corruption:

8. differentiate between the different types of procurement which pose different

9. adopt a strategic approach to procurement above the project level to balance competing objectives and priorities rather than viewing each project in isolation;
10. build relationships of trust and understanding with the private sector;

11. develop professional supply chain management capacity through training and accreditation; and
12. incorporate oversight functions to assess value for money.

National Treasury's 2015 Public Sector Supply Chain Management Review expressed the view that supply chain management (SCM) is one of the key mechanisms enabling government to implement policy which traditionally has been misunderstood and undervalued. This Review, which identified the need for SCM reform, suggests that if such reforms are implemented as envisaged in terms of section 217 of the Constitution, the benefits will be enormous and include, amongst others:

- f) good quality service delivery will be increasingly possible, with significant improvements in the welfare of citizens, especially the poor who rely heavily on government for support;
- g) the economy will grow as economic infrastructure is expanded and efficiently maintained;
- h) goods, services and infrastructure will be bought at lower costs;
- i) innovation will result in different approaches to the commodities used in some sectors; and
- j) for suppliers, the cost of doing business with the state should decrease substantially.

There is a need to develop an infrastructure delivery management system tailor-made for municipalities and municipal entities which integrate asset management strategy, policy to guide infrastructure planning, delivery management and decision-making. The LGFIDPM introduces this and focuses on the implementation of project processes and infrastructure procurement that forms part of the infrastructure delivery management.

Due care and focus must be given to addressing institutional arrangements, internal controls, and gaps to ensure value is extracted from this reform.

CONCLUSION

This MFMA Circular provides the basis for municipalities and municipal entities to establish an appropriate system for implementation of the project process and infrastructure procurement in the infrastructure delivery management value chain.

Accounting officers of municipalities and municipal entities are therefore advised to bring the contents of this Circular and the LGFIDPM annexure to the attention of their respective municipal councils, board of directors of municipal entities, and to expedite the process to amend and align their SCM policies accordingly. This will require undertaking a proper assessment of its ability to implement the content of the Framework and to only insert those parts that is practically implementable into the SCM Policy, to be approved by the municipal council.

Therefore, municipalities and municipal entities are advised to customise the model policy to suit the specific needs of its environment before tabling it in the municipal council and municipal entity board for adoption.

It is envisaged that a phase-in process will be considered by municipalities and municipal entities, however, it is expected that this be implemented as soon as possible.

This Circular replaces MFMA Circular 77.

1. DEFINITIONS

In this policy, unless the context indicates otherwise -

- 1.1 **'applicant'** means a person who makes a land development application;
- 1.2 **'bulk service'** means the capital infrastructure assets associated with that portion of an external engineering service which is intended to ensure provision of municipal infrastructure services for the benefit of multiple users or the community as a whole - the relevant Master Plan shall be used as a guide to identify such bulk services;
- 1.3 **'By-Law'** means the Stellenbosch Municipality: Land Use Planning By-Law published in the Western Cape Provincial Gazette Extraordinary of 20 October 2015;
- 1.4 **'capacity'** means the extent of availability of a municipal infrastructure service, based on the capital infrastructure asset or combination of capital infrastructure assets installed for provision of such municipal infrastructure services;
- 1.5 **'capital infrastructure asset'** means a capital asset which is required for provision of a municipal infrastructure service, limited to immovable assets and insofar as movable assets are concerned, specialised vehicles, used for waste collection and disposal only;
- ~~4.5~~1.6 **'consumer'** means a person who purchases electricity, water or a service relating to the supply of electricity, water or removal of sewerage.
- ~~4.6~~1.7 **'developer'** means an applicant for land development whose land development application is approved, in whole or in part, by the Municipality or the Municipal Planning Tribunal or municipal official authorised to determine land development applications;
- ~~4.7~~1.8 **'development charge (DC)'** means a charge imposed by the Municipality on a developer or consumer in terms of any applicable law referred to in this policy, or a condition of the approval, payment of which will contribute towards the Municipality's expenditure on capital investment in municipal infrastructure services;
- ~~4.8~~1.9 **"Engineer"** means an eEngineer employed by the "Municipality" or any person appointed by the "Municipality" from time to time and notified as such in writing to the "Developer" to perform the duties envisaged in terms of this Agreement Policy;
- ~~4.9~~1.10 **'engineering services installation agreement'** means an agreement concluded between the Municipality and a developer, recording their detailed and specific respective rights and obligations regarding the provision and installation of the external engineering services required for an approved land development, and regarding the associated development charge;
- ~~4.10~~1.11 **'external engineering service'** means an engineering service situated outside the boundaries of a land area and which is necessary to serve the use and development of the land area, provided that in circumstances where the characteristics of a specific area or the design of the relevant engineering service so requires, such services can be located within the boundaries of a land area;
- ~~4.11~~1.12 **'impact zone'** means a geographical zone within which the capital infrastructure assets or system of capital infrastructure assets required to provide bulk services to an approved land development are located (the impact zones are Stellenbosch Town, Dwars River, Franschhoek and Klapmuts);

- 4.121.13** **'internal engineering service'** means an engineering service within the boundaries of a land area which is necessary for the use and development of the land area and which is to be owned and operated by the Municipality or service provider;
- 4.131.14** **'land development'** means the erection of buildings or structures on land, or the change of use of land, including township establishment, the subdivision or consolidation of land or any deviation from the land use or uses permitted in terms of an applicable land use scheme;
- 4.141.15** **'land development application'** means an application for land development submitted with the Municipality or referred to the Municipal Planning Tribunal or other decision-making body for approval, in accordance with applicable national or provincial legislation, including the National Building Regulations and Building Standards Act 103 of 1977 (including any regulations promulgated thereunder), the SPLUMA, the LUPA and the By-Law;
- 4.151.16** **'land use'** means the purpose for which land is or may be used lawfully in terms of a land use scheme, existing scheme or in terms of any other authorisation, permit or consent issued by a competent authority, and includes any conditions related to such land use purposes;
- 4.161.17** **'link service'** means the capital infrastructure assets associated with that portion of an external engineering service which links an internal engineering service to the applicable bulk service, and which is not shared by multiple users or the community as a whole;
- 4.171.18** **'LUPA'** means the Western Cape Land Use Planning Act, 2014, Act. 3 of 2014 (PN 99/2014 of 7 April 2014);
- 4.181.19** **'Municipality'** means the Stellenbosch Municipality (WCO24) established in terms of Provincial Notice 489 of 22 September 2000 in terms of the Local Government: Municipal Structures Act, 117 of 1998, and includes all political structures or office bearers and municipal staff members to whom authority has been delegated to take decisions in terms of the Municipality's delegation system;
- 4.191.20** **'municipal infrastructure service'** means any of the following municipal services:
- 1.20.1 potable water;
 - 1.20.2 sewerage and wastewater treatment;
 - 1.20.3 electricity distribution
 - 1.20.4 municipal roads;
 - 1.20.5 street lighting
 - 1.20.6 storm water management;
 - 1.20.7 solid waste disposal;
 - 1.20.8 public transport, including non-motorised transport;
 - 1.20.9 social infrastructure services;
- 4.201.21** **'Municipal Planning Tribunal'** means a Municipal Planning Tribunal referred to in Chapter 6 of SPLUMA;
- 4.241.22** **'Social Infrastructure services'** means community services provided in terms of the functions which are the responsibility of the Municipality in terms of the Constitution, which includes, but is not limited to:

- 2.2.1 Early Childhood Development Centres;
- 2.2.2 Public Open Spaces, parks, sports fields;
- 2.2.3 Fire Fighting and Emergency Services;
- 2.2.4 Local Tourism;
- 2.2.5 Cemeteries;
- 2.2.6 Burial of animals;
- 2.2.7 Noise pollution; and
- 2.2.8 Municipal health services;

[4-221.23](#) **'SPLUMA'** means the Spatial Planning and Land Use Planning Act, 16 of 2013;

[4-231.24](#) **'Systems Act'** means the Local Government: Municipal Systems Act, 2000, Act 32 of 2000).

2. INTRODUCTION

- 2.1 This policy is applicable to the Development Charges charged for the following services: Water, Sewer, Stormwater, Solid Waste, Roads, Community Facilities and Electricity.
- 2.1 In terms of Section 152 of the Constitution, the objects of local government include the provision of services to communities in a sustainable manner and the promotion of social and economic development.¹ Chapter 8 of the Systems Act provides for the general duty of the Municipality to provide municipal services and the manner in which such services are to be provided.
- 2.2 Social and economic development has a positive impact on the Municipality's finances as it increases revenue from property rates, fees, service charges and tariffs by expanding the base of ratepayers. However, development associated with this economic growth has an impact on the demand for municipal infrastructure services as well as social infrastructure services such as clinics, schools and other public amenities. Therefore, infrastructure is needed to support sustainable social and economic development in Stellenbosch. Without infrastructure, both public and private sector investment in Stellenbosch will slow down. The cost to the Municipality for providing this infrastructure is high. Funding to cover these costs is obtained from three sources:
 - 2.2.1 Grants are provided by national or provincial government and are generally targeted towards social infrastructure, particularly in support of low-income housing development.
 - 2.2.2 Loans are converted into tariffs and are recovered by user fees paid by all consumers to the Municipality.
 - 2.2.3 Development charges are a more targeted and more equitable way of ensuring that the main beneficiaries of infrastructure make an appropriate and fair contribution to that cost, without unduly burdening the Municipality's ratepayers. Development Charges are the most important form of capital contribution raised by the Municipality to pay for infrastructure.

¹ Section 152(1)(b) and (c).

- 2.3 The general duty of the Municipality to provide municipal services is inter alia provided for in terms of Section 73(2) of the Systems Act, which section provides as follows:

“(2) Municipal services must—

- (a) be equitable and accessible;*
- (b) be provided in a manner that is conducive to—*
 - (i) the prudent, economic, efficient and effective use of available resources; and*
 - (ii) the improvement of standards of quality over time;*
- (c) be financially sustainable;*
- (d) be environmentally sustainable; and*
- (e) be regularly reviewed with a view to upgrading, extension and improvement.”*

- 2.4 The goal of this policy includes the following:

- 2.2.1 Striving to make Stellenbosch the preferred town for investment and business, where investment inflows and new enterprise translate into jobs and prosperity.
- 2.2.2 Establishing the greenest municipality which will not only make Stellenbosch attractive for visitors and tourists, but will also provide a desirable environment for new businesses and appropriate industries.
- 2.2.3 Ensuring a dignified living for all Stellenbosch citizens, who feel that they own their town, take pride in it and have a sense of self-worth and belonging.
- 2.2.4 Creating a safer Stellenbosch, where civic pride and responsibility supplant crime and destructive behaviour.

3. OBJECTIVES

- 3.1 The objectives of this policy are to provide a sustainable and equitable framework for the financing of capital infrastructure assets and to ensure that:
- 3.1.1 The Municipality is able to provide capital infrastructure assets in a timely and sufficient manner to support land development;
 - 3.1.2 Development charges complement other sources of capital finance available to the Municipality and are not utilised as a general revenue source;
 - 3.1.3 Development charges are managed in a predictable, fair and transparent manner; and

- 3.1.4 Unnecessary litigation in the administration of development charges is minimised.

4. PRINCIPLES OF THE POLICY

- 4.1 Four key principles underlie the system of development charges. These are:

- 4.1.1 **Equity and Fairness:** Development charges should be reasonable, balanced and practical so as to be equitable to all stakeholders. The key function of a system of development charges is to ensure that those who benefit from new infrastructure investment, or who cause off-site impacts, pay their fair share of the associated costs.

This implies that:

- 4.1.1.1 The Municipality should recover from applicants a contribution that is as close as possible to be full and actual costs of the capital infrastructure assets that are needed to mitigate the impacts of land development and to provide services to new land developments;
- 4.1.1.2 Development charges are levied to recover the infrastructure costs incurred or to be incurred due to land development, and are thus not a form of taxation;
- 4.1.1.3 Costs which should be covered by development charges can be determined both in relation to the value of pre-installed capital infrastructure assets resulting from historical investments, and the provision of new capital infrastructure assets to meet new capacity requirements; and
- 4.1.1.4 Development charges are not an additional revenue source to be used to deal with historical backlogs in provision of services, such as backlogs that exist in some historically disadvantaged areas.

- 4.1.2 **Predictability:** Development charges should be a predictable, legally certain and reliable source of revenue to the Municipality for providing external engineering services, and should be clearly and transparently accounted for. In order to promote predictability in municipal finance systems the costs associated with municipal capital infrastructure assets provided expressly to benefit poor households should be established before subsidies are applied in a transparent manner to fund the liability.

- 4.1.3 **Spatial and Economic Neutrality:** The primary role of a system of development charges is to ensure the timely, sustainable financing of required capital infrastructure assets.

This implies that:

- 4.1.3.1 Development charges should be determined based on identifiable and measurable costs so as to avoid distortions in the economy and in patterns of spatial development;

- 4.1.3.2 Development charges should not be used as a spatial planning policy instrument;
- 4.1.3.3 Costs recovered should be dedicated only to the purpose for which they were raised; and
- 4.1.3.4 Development charges should be calculated where possible on a sectoral or geographic scale to more accurately approximate costs within a specific impact zone.

- 4.1.4 **Administrative ease and uniformity:** The determination, calculation and operation of development charges should be administratively simple and transparent.

5. LEGISLATIVE FRAMEWORK

Development Charges are an integral part of the broader legal framework for urban land development and municipal finance. This legal framework has undergone substantial changes at national, provincial and municipal levels with the introduction of the SPLUMA, LUPA and the By-Law.

5.1 Policy context

This policy is consistent with the Final Draft Policy for Municipal Development Charges (Version 10) issued by the National Treasury on 15 December 2015 and which reflects a broadly shared understanding of the role, purpose and legal nature of Development Charges across the country.

5.2 Applicable legislation

The Systems Act

- 5.2.1 The general power of the Municipality to recover charges is provided for in Section 75A. In terms of Section 75A (2) charges are levied by the Municipality by resolution passed by the Municipal Council with a supporting vote of a majority of its members.
- 5.2.2 All development charges levied in terms of the general power of the Municipality, as envisaged in terms of Section 75A, will be levied in terms of a Council's Resolution by virtue of which this policy is approved.
- 5.2.3 When the development charges are determined pursuant to a Council's Resolution envisaged in terms of Section 75A(2), regard must at least be had to the factors provided for in Section 40(3), (4) and (5) of the LUPA read with the changes required by the context. See **Paragraph 5.2.7** below.

LUPA

- 5.2.4 The LUPA came into force on 1 December 2015 pursuant to Proclamation No 30 of 2015 (Western Cape).
- 5.2.5 In terms of Section 40(2) the Municipality may, when it approves a land use application subject to conditions, impose reasonable conditions which arise

from the approval relating to the provision of engineering services and infrastructure and the cession of land or the payment of money. The aforementioned type of conditions may require a proportional contribution to municipal public expenditure according to the normal need therefore arising from the approval, as determined by the Municipality.

5.2.6 Municipal public expenditure is provided for in Section 40(4) as follows:

"40(4) Municipal public expenditure contemplated in subsection (3) includes, but is not limited to, municipal public expenditure for municipal service infrastructure and amenities relating to—

- (a) community facilities, including play equipment, street furniture, crèches, clinics, sports fields, indoor sports facilities or community halls;*
- (b) conservation purposes;*
- (c) energy conservation;*
- (d) climate change; or*
- (e) engineering services."*

5.2.7 Section 40(5) provides as follows:

"40(5) When determining the contribution contemplated in subsections (3) and (4), a municipality must have regard to at least—

- (a) the municipal service infrastructure and amenities for the land concerned that are needed for the approved land use;*
- (b) the public expenditure on that infrastructure and those amenities incurred in the past and that facilitates the approved land use;*
- (c) the public expenditure on that infrastructure and those amenities that may arise from the approved land use;*
- (d) money in respect of contributions contemplated in subsection paid in the past by the owner of the land concerned; and*
- (e) money in respect of contributions contemplated in subsection (3) to be paid in the future by the owner of the land concerned."*²

SPLUMA

5.2.8 In terms of Section 49, an applicant is responsible for the provision and installation of internal engineering services and the Municipality is responsible for the provision of external engineering services.

5.2.9 Section 49(4) and (5) provides as follows:

² Section 83(7) of the By-Law contains a similar provision.

- "40(4) An applicant may, in agreement with the municipality or service provider, install any external engineering service instead of payment of the applicable development charges, and the fair and reasonable cost of such external services may be set off against development charges payable.
- (5) If external engineering services are installed by an applicant instead of payment of development charges, the provision of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003), pertaining to procurement and the appointment of contractors on behalf of the municipality does not apply."

Stellenbosch Municipality: Land Use Planning By-Law

- 5.2.10 In terms of Section 83(1) of the By-Law, an applicant (as defined in Section 1 of the By-Law) must pay development charges to the Municipality in respect of the provision and installation of external engineering services. The external engineering services for which development charges are payable must be set out in the policy and be reviewed annually by the Municipality. The amount of development charges payable by such applicant must be calculated in accordance with a policy adopted by the Municipality.³
- 5.2.11 The provision of engineering services is prescribed in detail in Chapter 8 of the By-Law. Specific reference is made to Section 66(4) and (5). National Land Transport Act 5 of 2009
- 5.2.12 Although public transport infrastructure is not typically included as one of the engineering services covered by development charges, this act allows the Municipality to raise a user charge from 'land, buildings or other developments that generate the movement of passengers, including land or buildings of which the State is the owner, in its area', provided that this money goes into the Municipality's 'land transport fund'.

6. OBLIGATION TO IMPOSE A DEVELOPMENT CHARGE

- 6.1 When the Municipality approves a land development application (as defined in this policy) which will or may result in intensified land use with an increased demand for such municipal infrastructure services, the Municipality must levy a development charge proportional to the municipal public expenditure according to the normal need arising from such approval. The instances when development charges will be levied will include:
- 6.1.1 When the Municipality approves an application in terms of Section 15(2) of the By-Law and imposes conditions in terms of Section 66 thereof relating to the provision of engineering services and infrastructure and the cession of land or the payment of money;

³ See Chapter VIII of the By-Law.

6.1.2 The approval of building plans in terms of the National Building Regulations and Building Standards Act 103 of 1977.

6.2 Development Charges will not apply to the following land use applications, which are deemed to have no significant impact on provision of bulk infrastructure, and which has a social and/or economic benefit to the municipality and/or the community:

6.2.1 Home / non-commercial early childhood development centres that serve the surrounding community.

6.2.2 Community based churches and places of religious worship (it must be clear that such development will not lead to a significant additional service usage that will have an increased demand on municipal services)

6.2.3 House shops up to the lesser of 30% of the floor area of the buildings on the site or 50m² per erf.

6.2.4 Second dwellings – up to a total maximum of five bedrooms per erf will not trigger a Development Charges payment, any bedrooms in excess of five will be charged per bedroom at the usage rate of the “student room” category.

6.2.5 Accommodation establishments (bed and breakfast/guest rooms): up to the first five bedrooms of an existing dwelling – thereafter Development Charges will be charged per bedroom at the usage rate of the “student room” category. The assessment will be based on the total number of bedrooms in the house and not the number of bedrooms operating as guest rooms. Any additional land use that is not integral to the accommodation function – (restaurant, spa, gym, office, and conference centre) must be added as GLA (General Business) and will be additional to the Development Charges calculated per room.

6.2.6 Breaking New Ground (BNG) housing projects implemented by the municipality. These projects are approved by council prior to implementation and such approval should include financial commitments regarding the provision of bulk services for these projects. It is thus not necessary for development charges since the provision of bulk services are to be funded by alternative funding sources.

6.2.7 Development Charges will also not apply to the following land use applications. This is in order to incentivise and support private landowners and/or emerging developers to supply affordable housing units for rental or purchase as government alone cannot keep up with this demand. This incentive will be granted at the discretion of the Director: Infrastructure Services and the Developer must provide proof that the development complies with the following criteria:

The further densification on a residential erf (excluding subdivision) that comply with the following criteria:

- the intention of the development should be to cater for the housing demand in the low and middle income bracket i.e. those who qualify for the Finance Linked Individual Subsidy Programme (FLISP). Currently this means households with a max gross income of R 22 000. The cost of these units may not exceed R 5 000 per month (rental) or R ~~65~~00 000 (unit purchase price). Proof of sale prices must be submitted.

- the proposed residential development must be located within a “Less formal residential” zoning as per the Zoning Scheme.

6.2.8 Public schools, hospitals, clinics and other public infrastructure projects developed and funded by government which provides a service to especially the poorer communities. These projects will have a social and economic benefit to these communities and the municipality in its whole and in so doing will alleviate some institutional and financial pressure on the Municipality in terms of providing social infrastructure and social development programmes.

Formatted: Not Highlight

- 6.3 A development charge will be determined by the Municipality in terms of and on the basis of the applicable statutory provisions referred to in **Paragraph 5.2** above read with this policy.
- 6.4 A developer must pay to the Municipality the full amount of the applicable development charge prior to the exercise of any rights to use, develop or improve the land arising from the approval of a land development application, unless in the case of a phased land development –
- 6.4.1 The Municipality authorises phased payments in the land development approval conditions, to take into account the timing of the proposed phases of the land development; and
- 6.4.2 If agreed to by the Municipality, the developer provides a written guarantee from a registered financial institution, in an amount and subject to terms and conditions agreed in writing by the Municipality.
- 6.4.3 The Municipality may also consider the payment of the outstanding development charge into an attorneys trust account, in cases where this will enable the completion of infrastructure projects in lieu of Development Charges that are not yet completed at the time that clearance is sought and if such withholding of clearance is deemed to be unfair towards the developer. An example of this is where the municipality has requested the upgrade or installation of a service in-lieu of Development Charges, of which the upgrade was not an original condition of approval, or which is not specifically triggered by the development, but of which the immediate upgrade will be of benefit to the municipality and/or the greater public. The conditions for the utilisation of the funds in this trust account shall be stipulated in a letter of undertaking issued by the trust attorney and as agreed to in writing by the Municipality.
- 6.5 When approving a land development application, the Municipality must stipulate at least the following matters relating to the development charge –
- 6.5.1 The total amount of the development charge,;
- 6.5.2 The dates/development milestones on which the payment or payments must be made and the amount of such payments;
- 6.5.3 Whether the Municipality and the developer have agreed that the developer will install any bulk services, as contemplated in **Paragraph 10**; and
- 6.5.4 Where the developer is to install bulk services instead of the payment of some portion or all of a development charge –

- 6.5.4.1 The nature and extent of the bulk services to be installed by the developer;
 - 6.5.4.2 The timing of commencement and completion of the bulk services to be installed by the developer;
 - 6.5.4.3 The amount of the developer's fair and reasonable costs of installation, or the process for determining that amount, including the process, after installation, for making any adjustments to an amount specified as determined by the Municipality; and
 - 6.5.4.4 The engineering and other standards to which the installed external engineering services must conform.
- 6.6 The Municipality and a developer may, and in the circumstances provided for in **Paragraph 10** must, conclude an engineering services installation agreement to give detailed effect on the arrangements contemplated in this **Paragraph 6**, provided that an engineering services installation agreement may not permit any intensification of land use beyond that which was approved.
- 6.7 The impact zones with reference to which the Municipality will calculate development charges in respect of civil services, are Stellenbosch Town, Dwars River, Franschhoek and Klapmuts.

7. PURPOSE OF DEVELOPMENT CHARGES

- 7.1 Money collected by the Municipality in respect of development charges must be used for purposes of funding or acquiring capital infrastructure assets in a timely and sufficient manner to support current and projected future land development in the area of jurisdiction of the Municipality, and where calculated with reference to a particular impact zone, must be used for capital infrastructures assets in that impact zone.
- 7.2 Development charges are not a general revenue source and money collected in respect of development charges may not be used to fund the operating or maintenance costs incurred by the Municipality in respect of municipal infrastructure services.

8. CALCULATION OF DEVELOPMENT CHARGES

- 8.1 Subject to the provisions of this policy, a development charge shall be calculated with reference to the estimated increased load placed on the external engineering services networks that results from the development in a specific impact zone.
- 8.2 The capital cost of internal engineering services is for the account of the developer.
- 8.3 Subject to **Paragraph 6.3** above and for purposes of calculation of the bulk services component of a development charge, the Municipality must –
 - 8.3.1 Determine a unit cost for each municipal infrastructure service, which unit cost must include all land cost, professional fees, materials, labour and

reasonable costs of construction, but must exclude the value of any debts incurred by the Municipality for purposes of funding existing capital infrastructure assets, to the extent that such debt has not been repaid by the Municipality;

8.3.2 Apply a formula, which formula will –

8.7.2.1 Be aimed at determining the impact of the proposed land use on municipal infrastructure services, taking into account current and planned capacity, relative to the impact of the land use occurring at the date of approval of the land development application; and

8.7.2.2 Calculate the amount payable by multiplying the unit cost referred to in **Paragraph 8.7.2.1**, by the estimated proportion of the municipal infrastructure services, including current and planned capacity, that will be utilised by the proposed land development.

8.4 The basis upon which development charges unit costs of the civil services and community services will be determined, as envisaged in **Paragraph 8.7**, shall be consistent with National Treasury's "Policy Framework for Municipal Development Charges (as amended). The methodology for calculating unit costs can be summarised as follows:

- Choose a planning horizon in the future (say 20 years).
- Use town-planning scenarios and engineering masterplanning to determine what new services are required, such that at that point in the future, the joint capacity of existing and future services matches the number of consumption units that will be in place, being the existing amount plus the future development amount.
- Estimate the costs of the existing and future infrastructure, as though it was all being constructed at the present day, i.e. replacement cost for existing infrastructure or present-day cost for future infrastructure.
- Establish the number of consumption units that the total infrastructure will cater for i.e. existing consumption plus future consumption.
- From the above calculate the cost per unit consumption factor.
- The DC for the development in question is then calculated by multiplying the nett additional consumption needed for that development, by the cost per unit consumption factor.

~~8.4 will be as recorded in the Development Charge Calculation report revision 6, dated 28 April 2018 by iCE Tygerberg Consulting Engineers. The aforementioned report does not provide for the calculation of development charges in respect of all components of municipal infrastructure services. Development charges in respect of any component of municipal infrastructure services not provided for, will be determined and calculated in terms of a separate policy, conditions of approval or Council's Resolution/s.~~

8.5 The basis upon which development charges will be determined i.t.o. electricity will be as per NRS 069: Code of practice for the recovery of capital costs for distribution network assets.

8.6 The Municipality must adjust the unit cost for each municipal infrastructure service on an annual basis during the budget preparation process referred to in Section 21 of the Local Government: Municipal Finance Management Act 56 of 2003, to take account of inflationary impacts and must publish the adjusted unit costs within two months of approving the municipal budget. The Municipality will use the Contract Price

Adjustment Factor as prescribed in the SAICE General Conditions of Contract for Construction Works (as amended) to determine the annual effect of inflation.

- 8.7 ~~The Municipality must re-calculate the unit cost for each municipal infrastructure service at least once every five years or within such longer period as is approved in advance by the Council of the Municipality. Where possible, unit costs for each municipal infrastructure service should be re-calculated every five years~~ to take into account the current and planned capacity for each municipal infrastructure service at the date of re-calculation, and any other relevant factors.
- 8.8 In the event of the Municipality discovering that a gross error has occurred in the determination of the development charges, or if there are justifiable reasons to review the charges, it may, by means of a council resolution, correct such error or review the charges.

9. ACTUAL COSTS

- 9.1 Notwithstanding the provisions of **Paragraph 8.3**, the Municipality may at its own instance or on request by a developer, increase or reduce the amount of the bulk services component of a development charge so as to reflect the actual cost of installation of the required bulk services, where:
- 9.1.1 Exceptional circumstances, as motivated by the developer and if accepted by the Council, justify such an increase or reduction; or
- 9.1.2 a particular land development significantly exceeds the size or impact thresholds set out in the applicable Development Charges tariff tables .
- 9.1.3 the actual usage of a particular land development varies significantly from the usage of the approved Development Charges tariff tables and of which the actual usage is motivated by a professional engineer and can be justified by means of recognised engineering guidelines and/or industry norms and standards.
- 9.1.4 Where a development is situated outside the urban area and was not taken into account during the determination of the Development Charges tariffs, then the Development Charges of that development will be based on its actual impact, as confirmed by a report by a ~~professionally registered engineer-Consultant~~, appointed by the Developer, and as approved by the Municipality. Examples of such a scenario would be development on farms that supports the primary farming activity, i.e. a cellar on a wine farm. The actual trip generation might be less than what is allowed for in the Development Charges tariff tables and if it can be justified the Development Charges can be based on the actual impact/demand on the bulk infrastructure.
- 9.2 Where the Municipality adjusts the amount of the bulk services component of a development charge on the basis of actual costs in terms of this section
- 9.2.1 the developer is responsible for the costs of performing the calculation of such adjustment, which must be carried out by a registered professional civil engineer appointed by the developer with appropriate experience and

Formatted: Not Highlight

expertise having regard to the nature and extent of the proposed land use; and

- 9.2.2 the actual cost must include, where applicable and without limitation, land costs, professional fees, materials, labour, the reasonable costs of construction and any tax liabilities: provided that all such costs would otherwise have been borne by the municipality, in the provision and installation of the bulk services concerned.

10. INSTALLATION OF EXTERNAL ENGINEERING SERVICES INSTEAD OF THE PAYMENT OF DEVELOPMENT CHARGES.

- 10.1 The Municipality may agree with a developer that the developer installs all or part of the external engineering services required for an approved land development instead of the payment of the applicable development charge. Such external engineering services must also be a "bulk service".
- 10.2 Where a developer installs external engineering services to the technical standards required by the Municipality, as reflected in the applicable conditions of approval of the land development application or as agreed with the Municipality in writing, the developer may set off the fair and reasonable cost of such installation, as determined by the Municipality, against the applicable development charges.
- 10.3 Any capital infrastructure assets forming part of an external engineering service installed by a developer instead of payment of any part of a development charge shall, upon installation, become the property of the Municipality, and-
- 10.3.1 the developer shall bear the responsibility of ensuring that ownership or other relevant rights to the affected capital infrastructure assets is or are transferred to the Municipality;
- 10.3.2 the Municipality must include the applicable capital infrastructure asset gain in its next adjustments budget, in accordance with regulations relating to asset gains, made in terms of the Local Government: Municipal Finance Management Act 56 of 2003.
- 10.4 The Municipality may require that a developer installs external engineering services to accommodate a greater capacity than that which would be required for the proposed land use alone in accordance with any master plan approved by the Municipality, in order to support planned future development in the vicinity of the approved land development. Where the total fair and reasonable cost of installation of such required external engineering services exceeds the development charge payable by the developer, the Municipality may reimburse the developer the amount in excess of the development charge, in accordance with a written agreement, provided that such infrastructure has been provided for in accordance with an approved master planning programme for such service and which has been approved as a capital project in terms of the budget of the Municipality.
- 10.5 If the developer elects to develop outside the municipality's capital expenditure programme that is approved by the municipal council, he or she will have to fund the provision of services to enable such development. There is no obligation on the Municipality to provide services to land simply because an owner wants to develop

his/her land and the Municipality is not obligated to re-imburse the Developer for such expense. Section 152 of the Constitution emphasises the fact that the municipality must structure its administration and budgeting and planning processes to give priority to the basic needs of the community.

- 10.6 When a developer installs external engineering services instead of payment of a development charge, he or she must adopt the most cost-effective and efficient approach to meet the Municipality's technical standards. The principles of procuring the most cost –effective and efficient services must be followed. Therefore, the installation of engineering services must be provided at a competitive bidding process. As a minimum, three quotations or tenders should be obtained and evaluated by the Developer's consultant with a recommendation for appointment. Such recommendation must be approved by the Municipality before the appointment of a contractor.

11. NON-PROVISION BY THE MUNICIPALITY.

- 11.1 Where the Municipality has agreed to install the required external engineering services and fails to do so within a period of twelve months from the date for completion stipulated in such agreement, the Municipality must return the development charge paid by the developer, to the developer, with interest charged at the applicable rate for debts owed to the state.
- 11.2 Notwithstanding the provisions of **Paragraph 11.1**, the Municipality and the developer may agree to:
- 11.2.1 an extension of the time period for the installation of the required external engineering services by the Municipality; provided that such extended time period may not exceed twenty-four months and provided further that where the Municipality completes the installation within such extended time period, it has no obligation to return the development charge paid by the developer, to the developer; or
 - 11.2.2 an engineering services installation agreement, or revised engineering services installation agreement, in terms of which the developer agrees to install the required external engineering services in whole or in part and, where agreeing to install in part, the time period within which the municipality will install those external engineering services for which it remains responsible: provided that the extended time period for installation by the Municipality may not exceed twenty-four months and provided further that where the Municipality completes its portion of the installation within such extended time period, it has no obligation to return that portion of the development charge paid by the developer which pertains to the external engineering services installed by the Municipality, to the developer.

12. WITHHOLDING CLEARANCES AND APPROVALS.

- 12.1 The Municipality shall be entitled to withhold any consent, clearance or approval in respect of a land development in the event where development charges owed by the developer remain unpaid or the developer fails to install external engineering services

in accordance with an engineering services installation agreement entered into with the Municipality.

- 12.2 The Municipality shall not be obliged to allow any internal or link services to be connected to the bulk services of the Municipality until all development charges have been paid by a developer.

13. SUBSIDIES AND EXEMPTIONS

- 13.1 *The Stellenbosch Municipal Council* is the approving authority for subsidies and exemptions. Applications must be in writing and addressed to the Director: Infrastructure Services for consideration, before submitting to council for approval.

- 13.2 As stated by the Final Draft of the Policy Framework for Municipal Development Charges being drawn up by National Treasury, the Municipality should seek to

13.2.1 Minimise the number and value of any subsidies or exemptions it provides for the payment of development charges and

13.2.2 Apply any subsidies, exemption or surcharges in an equitable transparent and administratively feasible manner

- 13.3 Developers will be allowed to apply for exemption for developments that comply with the following criteria:

13.3.1 In the case of registered non-profit organisations/[community organisations/charity organisation](#) developing social development projects that is beneficial to the community and where the applicant is able to demonstrate how the proposed development will have a social and/or economic benefit to the municipality. The use of any land or buildings, or any part thereof, shall not be for the private financial benefit of any individual, including as a shareholder in a company or otherwise.

- 13.4 Before the Municipality grants an individual exemption, it must:

13.4.1 calculate the applicable development charge as if it were payable (Infrastructure Services);

13.4.2 ensure that the revenue to be forgone as a result of any exemption approved by the Municipal Council is reflected in the Municipality's budget (Finance);

13.4.3 must provide for budgetary provision for the realisation of the revenue forgone to be made, from another realistically available source of revenue (Finance);

13.4.4 ensure that the monetary value of the exemption, together with the amount of any other payment or payments received by the Municipality towards the capital costs of external engineering services for an approved land development, is at least equal to the development charge calculated in accordance with **Paragraph 13.4.1**.

- 13.5 Any development for which exemption has been granted and is used for any purpose other than the purpose for which it was so granted an exemption, the payment of Development Charges will become applicable.

14. OTHER PRINCIPLES TO BE APPLIED

- 14.1 Development Charges will be applied based on the impact on services by the increase in land use rights and/or intensification of land use leading to increased demand, irrespective of the geographical location of the development. For example, the traffic generated by a development located along a provincial road, will ultimately end up on the Municipality's road network that link to the provincial roads. The same applies to the additional stormwater run-off that ends up in downstream municipal networks and river courses, increase in demand and the bulk supply of water, and sewer and solid waste disposal.
- 14.2 Development Charges in rural areas/farms: Development Charges will be determined in terms of **paragraph 9.1.43** for buildings/development related to the primary farming activities and can be classified as an agricultural building/agricultural industry i.e.: cellar and bottling facilities on a wine farm or a fruit packaging and storage facility on a fruit farm. It can be assumed that in most cases, the people already working or residing on the farm will work in these buildings and not place a significant additional demand on the bulk services. The approved Development Charges tariffs will be applicable for any other development on a farm i.e. a farm stall, function venues, tourist accommodation facilities, conference facilities or other business and commercial activities including wine tasting since these land uses attract people from outside and places an additional demand on the bulk infrastructure.
- 14.3 Where a development's Development Charges are utilised to upgrade a specific service in order to create the required capacity, and the Development Charges for that specific service category is not sufficient to cover the cost of the upgrade, the Director: Infrastructure, at his discretion, will determine if Development Charges from the other service categories can be utilized to cover the cost. Factors to be taken into consideration include the status of bulk services in the development area, the practicality and timing to secure alternative sources of funding, etc. Electrical Development Charges may not be used to cross fund civil engineering infrastructure and vice versa. The Community Facilities Development Charges must be ring fenced and not utilised on civil or electrical infrastructure.
- 14.4 GLA – Gross Leasable Area – where this is not known at the time of the Development Charges calculation being done, it will be deemed to be 15% less than the total bulk i.e. 85% of the total bulk.
- 14.5 Development Charges In lieu of Parking bays: If the development is located in an area where the lack of sufficient on-site parking is currently causing problems for the municipality and or the public, this option will not be considered. Some or all of the following criteria must be met before a Development Charges payment in lieu of parking will be favourably considered:
- If located in the historical CDB core where buildings were approved with limit parking provision
 - When a development is situated within a 500m radius of a public transport hub or facility
 - When a development is situated along a primary functional public transport route – provide that the necessary embayment is provided
 - When a development is situated along a primary NMT route (as defined by the NMT Masterplan) – provide that the necessary facilities is of good state
 - Where public parking garage has been constructed that can cater for shortfall in parking demand.

Commented [TK1]: Already covered in 10.1

14.6 Provincial Roads – 20% of the value of upgrades on provincial roads have been allowed for in the determination of the Development Charges tariffs and therefore this percentage will be allowed to be offset from Development Charges. The offsetting of Development Charges against the full cost of provincial road upgrades would result in an under-recovery of Development Charges for municipal roads. Exception is upgrades to intersections between municipal and provincial roads, where the full amount can be offset from Development Charges.

14.7 The use of Development Charges on non-motorised transport (NMT) facilities will be allowed as a functional and safe non-motorised transport (NMT) and public transport network will reduce the dependence on private motor vehicles and therefore relieve road congestion and free up capacity on the roads and intersections. The non-motorised transport (NMT) master plan will be used as a guideline in determining which non-motorised transport (NMT) items this applies to. A further guiding principle is that the non-motorised transport (NMT) item must be for the benefit of multiple users/developments and/or the community as a whole and not just benefit an individual private development/small cluster of private developments.

14.8 Handling of properties with historical land use rights: If a property (especially business and industrial zoned property) has an existing zoning right, it does not necessarily mean that DCs have been paid on the full development potential of the property when such zoning was approved. A DC credit can only be granted if a DC for a specific development or building has been paid in the past, or if there are existing permanent, legal buildings (has building plan approval) on the site which service demand has already been absorbed into the bulk service networks. Otherwise there is no justification for granting such a credit. The onus to prove that DCs have been paid is on the Developer/Applicant.

14.9 Any increase of the demand of a service, such as electricity, water and sanitation, will trigger the equivalent payment of DCs, whether such property has gone through a town planning development exercise or not. Such DCs will be payable and the increase of services will not be allowed until such DCs have been paid, as provided for in Section 7 of the Norms & Standards for Water Services Authorities as allowed for by the Water Services Act as well as the NRS 069 CODE OF PRACTICE FOR RECOVERY OF CAPITAL COSTS FOR DISTRIBUTION NETWORK ASSETS as allowed for by the Electricity Regulation Act, Section 15

14.10 Temporary Departures: No DCs will be charged on a temporary departure application, since the impact will be of a temporary nature. However any further application to extend such right will trigger a DC. Should any upgrades be required due to the impact, even if of a temporary nature, the Developer will have to construct such upgrade at his own cost.

1. DEFINITIONS

“Appendix A” means the application for Grant-in-Aid, detailed more fully below, and provided for in clause 5.2.

“Appendix B” refers to the memorandum of agreement (MOA), detailed more fully below, and provided for in clause 10.

“Capacity building” Capacity building refers to a process which enables human beings to realize their potential, build self-confidence and lead lives of dignity and fulfillment. These Capacity Building programs have to align to the basket of services of the Directorate: Social Development and Early Childhood Development i.e. Early Childhood Development, Youth Development, Substance Abuse, Poverty Alleviation, Vulnerable Groups and Street People.

“Community Based Organization (CBO)” are nonprofit groups that work at a local level to improve life for residents. The focus is to build equality across society in all streams – health care, environment, quality of education, access to technology, access to spaces and information.

“Early Childhood Development (“ECD”) Facility” means any place, building or premises, including a private residence, maintained or used partly or exclusively, for the reception, protection and temporary or partial care of more than six children that shall be registered, managed and maintained in terms of the Children’s Amendment Act, 41 of 2007.

“Grant-in-aid” means a grant-in-aid or allocation, as referred to in Section 12, 17 (3) (j) (iv) of the MFMA, made by the municipality to any organisation or body referred to in Section 67(1) and to be utilised to assist the municipality in fulfilling the Constitutional mandates including social developmental and arts and culture programmes as set out therein.

“Local Agenda 21” means the international program, adopted by South Africa to put sustainable development into practice.

“Memorandum of agreement (MOA)” means the agreement entered into between the municipality and any organisation or body which receives a Grant-in-Aid in terms of this Policy and **Appendix A**.

“Non-governmental organisation (NGO)” means a non-governmental organisation (NGO) that is a legally constituted non-profit organisation that operates independently from any form of government.

“Non-profit company (NPC)” means a company whose Memorandum of Incorporation must set out at least one object of the company and each such object must be either a public benefit object or object relating to one or more cultural or social activities, or communal or group interests as required by Item 1(1) of Schedule 1 of the Companies Act, 71 of 2008.

“Non-profit organisation (NPO)” means a non-profit organisation registered in terms of Section 13 of the NPO Act, 71 of 1997, established for public purpose and which income and

property thereof is not distributable to its members or office-bearers, except as reasonable compensation for services rendered.

“Stellenbosch Environmental Management Framework (SEMF)” means legal and moral obligations of Stellenbosch Municipality as it relates to the environment, and provides a dynamic vision, goals and objectives, and spatial and strategic directives towards giving effect to such obligations.

2. PURPOSE, AIMS AND OBJECTIVES

- 2.1. This policy aims to provide a framework for Grant-in-Aid to non-governmental organisations (NGOs), community-based organisations (CBOs), non-profit organisations (NPOs) or non-profit companies (NPC) and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12, 17 and 67 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003).
- 2.2. The purpose of the Grant-in-Aid Policy is to complement the goals, objectives, programmes and actions of the Stellenbosch Municipality's Integrated Development Plan (IDP), in order to create a sustainable, credible and caring municipality by empowering and building communities and enhancing growth and sharing through partnerships. Priority ward needs as identified through Council's IDP MUST be the guiding factor in developing these partnerships.
- 2.3. Grant-in-Aid should not duplicate services already provided for by Council or which falls within the geographical jurisdiction in which Council operates, being WC024.
- 2.4. Grant-in-Aid should improve the opportunity for Council to elicit the support of external organisations to deliver those services to communities which fall within the Council's area of responsibility in a way that allows the Stellenbosch community and town to create an enabling environment for community development.

3. LEGAL FRAMEWORK

All transfers of funds in terms of this policy shall comply with the: Constitution of the Republic of South Africa, 1996 as amended (Constitution); Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) as amended (MSA); Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003) (MFMA); and any other applicable legislation, regulations and policies that may govern the transfer of municipal funds and that are not in contradiction to the above.

4. RESTRICTIONS

- 4.1. The Policy applies to all transfers of grants made by the Municipality towards support of services for the poor, marginalized or otherwise vulnerable people. Individuals may not apply for Grant-in-Aid and no payment may be made under this policy to individuals. Council may however set aside a specific amount from

which the Municipal Manager, after consultation with the Executive Mayor, may, at his/her discretion, make donations to support individual, meritorious cases in order to assist and/or recognise individual excellence in whichever field. Bursaries to individuals are treated according to the Council's Bursary Policy.

- 4.2. The total expenditure on grants may not exceed 1% of the operational budget of the Municipality.
- 4.3. Grants will only be made for services rendered in the WCO24.
- 4.4. Transfers made to categories A and B
 - 4.4.1. Transfers provided for those listed in Category A below may be made to a maximum of R40 000-00 per organisation or body per annum.
 - 4.4.2. Transfers in Category B may exceed this amount where funding relates to night shelters or addresses specific ward priorities identified and specified in the IDP and upon proper motivation contained in a business plan to address said issue. Consideration for grants larger than R 40 000, 00 requires audited financial statements, schedule of estimated annual costs and a business plan as provided for in 6 below. The decision to grant an amount more than R 40 000,00 is solely at the discretion of council and subject to available funds.
- 4.5. Grant-in-Aid transfers/payments shall be restricted to deserving organisation and bodies serving, especially those working with the poor/aged/youth/disabled/women, as per the eligible categories in 6.2, provided that such organisations or bodies:
 - 4.5.1. Operate as a separate legal entity and are recognised as such by South African legislation;
 - 4.5.2. Are governed by their constitutions, have regular meetings with their membership and subscribe to sound accounting practices; and
 - 4.5.3. Are located and serve communities and individuals who are most in need within the jurisdiction of the Municipality.
- 4.6. No Grant-in-Aid may be made to any political body, rate payers association or for any religious purposes.
- 4.7. No grant will be allocated, under this policy, to organisations or bodies in cases where a member of Council, an official of Stellenbosch Municipality or close relatives of said individuals receive any financial or other gain.
- 4.8. Funds may only be transferred to an organisation or body if provision has been made for the expenditure on the budget or appropriations budget.
- 4.9. An organisation or body is only entitled to one allocation per financial year, but disbursements can be made more often.

5. PUBLIC ADVERTISEMENT

- 5.1. The advertisements must meet the following requirements:
 - 5.1.1. The Municipal Manager must, place a public advert in local newspapers distributed in the Stellenbosch Municipal area, calling for proposals.
 - 5.1.2. This advert must be placed in time to complete all relevant processes prior to the approval of the annual draft budget or any adjustment budget in order to invite public comment on the proposed donations prior to the approval of the final or adjustment budget.
 - 5.1.3. Advertisements should clearly specify the categories for which proposals are called, the closing date for applications, who the proposal should be addressed to, and where and how to obtain the relevant documentation pertaining to such applications/proposals, including the prescribed forms.
 - 5.1.4. Advertisements should also clearly reflect the Municipality's right not to make an award, as well as the fact that awards will not be made to organisations that have received funds in the previous year but have not submitted a final report on the projects or previous expenditure.
 - 5.1.5. The advertisement should also clearly state that final approval is reliant on the approval of the budget and that **no late submissions will be considered.**
- 5.2. Only applications made on the prescribed form, being **Appendix A**, may be considered.
- 5.3. Funds may not be transferred to any organisation or body that has not submitted a proposal in response to a public advertisement and after the attendance of a compulsory briefing session and that have not signed a Memorandum of Agreement with the Municipality.

6. GENERAL GUIDELINES AND CATEGORIES

- 6.1. General Guidelines

Funding of applications shall proceed on the basis listed below in response to an advertisement issued after the expiry of the relevant period associated with the specific category and after a compulsory workshop explaining the policy, application process and the required documentation has been attended by the applicants. Subject to the MOA provided for in clause 10, all funding is unrequited, provided there is compliance with said MOA. Funding of application in –

 - 6.1.1. Category A will be considered on an annual basis ; and

- 6.1.2. Category B shall be considered on a three year basis subject to a monthly review at the discretion of the Municipality which may result in early termination for unsatisfactory and reckless expenditure.
- 6.1.3. Council in 6.1.1 and 6.1.2 reserve the right not to fund an organisation for two periods in succession and to cancel said funding in accordance with the MOA concluded.
- 6.1.4. Funding applications however will not be considered in the following instances:
- (i) Where a project or organisation is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding;
 - (ii) Where in Council's opinion, an organisation receives sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and a budget for the ensuing financial year;
 - (iii) Where only an individual will benefit;
 - (iv) For political or ratepayers organisations/groupings;
 - (v) Projects outside the boundaries of the Municipality;
 - (vi) Where expenses have already been incurred, Where an applicant did not attend the compulsory clarification session as advertised, and
 - (vii)(viii) Where applications were received after the due date and time for submissions.
- 6.1.5. Funding of projects and to organisations shall exclude travel costs, subsistence, accommodation, food or entertainment expenses of any kind, staff salaries, bursaries, payments in lieu of rates or other municipal charges except for where the transport and nutrition is intended for beneficiaries/participants in the projects in question. The Municipality may also exercise their discretion to allow funding to extend to the above costs on a needs basis for the organisation or body clearly motivated for in the application.
- 6.1.6. Subsequent requests from applicants to cover overspending on projects will not be considered.

6.2. Categories Eligible for Grant-in-Aid

The following categories currently apply. Cognisance should be taken that these categories are not exhaustive. Other than the general guidelines and conditions set out above, categories now indicated may require specific criteria applicable to its projects/programmes:

Category A

6.2.1. Health

Projects/programmes include the following but are not limited to:

- (i) Public Health interventions inclusive of TB, STDs and HIV/Aids;

Formatted: Not Expanded by / Condensed by

- (ii) Preventable lifestyle diseases e.g. drug/alcohol abuse, tobacco related illnesses; and

- (iii) Promotive and preventative services to infants, children and women.

6.2.2. Environment

Purpose: To stimulate the development of sustainable leisure, aesthetic and environmental projects within the municipal area; to increase the awareness of the environment by promoting "Greening of the City"; to promote swimming skills and water safety.

Projects/programmes include the following but are not limited to:

- (i) Voluntary rescue organisations;
- (ii) Lifesaving clubs and swimming organisations;
- (iii) Environmental groups/organisations; and
- (iv) Organisations promoting community involvement as a means of sustaining leisure, aesthetic or environmental projects.
- (v) Projects which further the Council's aims and the strategies of SEMF (Strategic Environmental Management Framework) and including but not limited to the sustainable management of:
 - o Riverine corridors;
 - o Biodiversity;
 - o Natural and built environment;
 - o Heritage resources;
 - o Quality urban spaces;
 - o Ecological conservation areas;
 - o Urban agricultural complexes;
 - o Bioregional planning;
 - o Nature area management;
 - o Wetlands;
 - o Local Agenda 21 projects

6.2.3. Solid Waste (Cleansing)

Purpose: Waste Reduction and awareness.

Projects/programmes include the following but are not limited to:

- (i) Waste reduction and awareness;
- (ii) Educational programmes/projects addressing litter and waste handling; and
- (iii) Waste minimisation solutions.

6.2.4. Social Development

Purpose: The promotion of projects/programmes which stimulates the Stellenbosch Municipality's Integrated Development Plan (IDP) focusing especially on the needs of the most marginalised sectors in the greater Stellenbosch as identified in the ward priorities.

Projects/programmes include the following but are not limited to:

- (i) Poverty alleviation;
- (ii) Urban renewal;
- (iii) Capacity building of communities;

- (iv) Youth development;
- (v) Women and gender development;
- (vi) Early childhood development;
- (vii) Street people programmes;
- (viii) Arts and culture programmes
- (ix) Facilitation of public participation processes; arts and culture programmes
- (x) Development of disabled persons, and
- (xi) Development of elderly people

6.2.5. Sports and Recreation

Purpose: To stimulate the development of sustainable Sport and Recreation infrastructure and programmes within the municipal area especially targeting disadvantaged communities; encourage creativity and self-reliance on the part of grassroots sport and recreation bodies or groups; to increase participation in sport and recreation programmes and activities.

Projects/programmes include the following but are not limited to:

- (i) Local sport and recreation clubs;
- (ii) School sport teams
- (iii) Local sport and recreation councils or associations
- (iv) Informal sport and recreation groups; and
- (v) Community and non-government organisations.

Category B

6.2.6. Night Shelters

Purpose: Provision of shelter for vulnerable individuals living on the street, without homes, in the need of shelter at night. Shelter is provided on a temporary basis and residency should not be provided for on a permanent basis. The Municipality aims to reduce the number of people living on the streets of Stellenbosch and as such the organisation or body's goals should align with this vision. Further the Municipality aims to reduce the socio-economic effects of poverty on the community of Stellenbosch. The organisation or body must therefore present to Council a clear business plan with a comprehensive response to the prevention, reduction, outreach and stabilisation of street people. Organisations or bodies that provide a continuum of services and that collaborate with businesses, government departments and other organisations are preferred. Street people programmes listed in Category A shall fall under this category if provision is made for overnight stay.

Projects/programmes must include the following but are not limited to:

- (i) Provision of basic services (overnight facility, shower, morning and evening meals
- (ii) Provision of social work services inclusive of referrals

- (iii) Family re-integration services
- (iv) Social support
- (v) Community work programme
- (vi) Facility maintenance (Infrastructure and operational equipment)

6.2.7. Projects aligned to the strategic objectives of the municipality as described in the IDP

Purpose: The promotion of projects/programmes which stimulates the Stellenbosch Municipality's Integrated Development Plan (IDP) focusing on the strategic objectives of the Municipality and identified ward priorities. The organisation must therefore present to Council not only a clear business plan detailing how they intend to address the specific issue but how they intend to partner with other organisations to achieve a unified approach to that particular challenge. Organisations or bodies that provide a continuum of services and that collaborate with businesses, government departments and other organisations are preferred.

Projects/programmes include the following strategic objectives but are not limited to:

Those listed in Category A that address specific ward priorities identified and specified in the IDP and upon proper motivation contained in a potential plan to address said issue.

- (i) Valley of Possibility
- (ii) Green and Sustainable Valley
- (iii) Dignified Living
- (iv) Safe Valley
- (v) Good Governance and Compliance

7. APPLICATION PROCEDURE

Applications and proposal for Grant-in-Aid must be on the prescribed form stated in 5.2 above, a copy of which is attached hereto as **Annexure A for Category A and B**. Applications must be accompanied by a covering letter on the letterhead of the organisation or body, signed by the head of the organisation or body and must include the following information. Should an applicant wish to submit a Category B application, but would want to be considered for a Category A application in the event that the Category B application is declined, this must be clearly stated in the covering letter and supporting documents **MUST** be submitted for both types of applications:

- 7.1. The applicant's legal name and a brief description of the applicant organisation's or body's business;
- 7.2. if the applicant claims to be a non-profit organisation, the registration number and the certificate;
- 7.3. the date of establishment, details of the applicant's member founding documents, including constitution and certificates of incorporation;

- 7.4. a contact name, full street address, telephone number and an e-mail address;
- 7.5. if funding is required for a specific project, a brief description of the project what it aims to achieve, as well as the detailed budget for and duration of the project;
- 7.6. a description on how the project aligns with the needs identified in the community through the IDP process and which ward priorities will be addressed through the project;
- 7.7. if the request is for general support, the organisation's or body's overall budget must be included;
- 7.8. references, independent of the applicant and its executive;
- 7.9. most recent audited financial statements (subject to MFMA, section 67(4)) statements; or at least statements signed off by the treasurer and chairperson of the organization in the case of small emerging organizations;
- 7.10. a summary of past achievements;
- 7.11. a declaration by the head of the organization to the satisfaction of the Municipal Manager, that the organisation or body implements effective, efficient and transparent financial management and internal control mechanisms to guard against fraud, theft and financial mismanagement and has in the past complied with requirements for similar transfers of funds; and
- 7.12. notwithstanding the above requirements, the CFO after considering the merits of an application not complying with the minimum application criteria and after consulting the Municipal Manager, may for the purpose of this policy approve a deviation from the norm;
- 7.13. Applications for Category B **must** include a schedule of annual costs for a three year period, business plan and audited financial statements.

8. OBLIGATIONS OF THE APPLICANT

- 8.1. The head of the organisation or body must acknowledge in writing to the Municipal Manager that the money was received in its bank account and that the amount is/will be utilised to the benefit and in accordance with the role of the organisation or body in society. The funds should be used as outlined in the application form.
- 8.2. The organisation or body shall regularly report, if and when required but at least once a year, to the Municipal Manager regarding the activities conducted, the ward within which activities are conducted, as well as the number of people benefiting from the activities.

- 8.3. If funding is required for a specific project, a brief description of the project and what it aims to achieve, as well as the detailed budget for and duration of the project.
- 8.4. The applicant must attend a compulsory workshop on the Grant-in-Aid policy and application procedure prior to submission of the application.
- 8.5. If successful with the application, the applicant must spend funds according to the approved Grant-in-Aid funding request. Should the need change over the funding period, written consent needs to be obtained from the municipality prior to spending the funds on alternative needs. Failure to spend funding on approved projects can result in the applicant being required to return the funding and/or the applicant being excluded from future applications for a period of 5 years.

9. RIGHTS OF THE MUNICIPALITY

- 9.1. The Municipality shall be entitled, from time-to-time, to verify and inspect the existence and activities of the organisation or body. The municipality will therefore have the right to physically visit the premises where the organisation, or the funded project, is based; to peruse the budgets and any progress reports related to the project (in contract).
- 9.2. The Municipality shall manage contracts entered into with organisations or bodies by receiving reports and doing the necessary site visits and inspections to ensure that this policy and contract are being complied with.
- 9.3. The Municipality has the right not to give a Grant-in-Aid to any or all organisations applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.
- 9.4. The Municipality will run proposed donations through a public participation process before final awards are made.

10. AGREEMENT

Before any funds are transferred to an organisation an agreement (**Annexure B**) must be concluded by the Municipal Manager with the beneficiary to protect the interest of the Municipality.

11. DEVIATION

This policy constitutes the entire framework for Grant-in-Aid and no deviation will be entertained.

12. COMMENCEMENT

This Policy takes effect on the date on which it is adopted by the Council of Stellenbosch Municipality.

STELLENBOSCH

PROOF OF REGISTRATION/AFFILIATION											
6	(Attach a copy of the organisation's Registration Certificate of Affiliation)										

REQUIREMENTS CATEGORY B APPLICATIONS		
L	(Please note that Category B applications MUST adhere to the following requirements and those listed under section K, except where indicated otherwise.)	
1	AUDITED FINANCIAL STATEMENTS	
	A copy of the latest audited financial statements must be included in the application. Category B applications MUST submit their latest audited financial statements. Statements signed off by the treasurer, chairperson or other delegated party will not be accepted.	
2	THREE YEAR BUSINESS PLAN	
	See the requirements for the business plan as listed under section K as guideline. NOTE: Category B applications MUST provide a clear proposal for a period of three years. Each year must be indicated separately and be costed per annum indicating all expenditure against the projected measurable outcomes. Outcomes must be listed to how they will be reported on and measured on a monthly basis.	
M	FORMAT FOR FEEDBACK REPORT	
	(Please ensure that your feedback of previous funding received, includes the following)	
1	Narrative report on the project including numbers reached, outcomes reached, evaluation of the project indicating successes and failures/lessons learned.	
2	Pictures of the project/program.	
3	Financial report on expenditure regarding previous donation separate from the annual financial statements. (Attach proof of expenditure).	
N	THE FOLLOWING SHALL APPLY:	
1	The allocation of Grant-In-Aid will only be considered if the application document has been fully completed and signed and is accompanied by the required and supporting documentation referred to therein.	
2	An applicant who has been registered as a non-profit organization in terms of Section 13 of the Non-Profit Organisation Act, 1997, and the necessary proof thereof is submitted together with this application.	
3	Applicants must in their submission clearly indicate/specify and motivate what the funds will be utilized for.	
4	The Grant-In-Aid must be exclusively utilized for the purpose defined and the successful applicant must submit the necessary undertaking to this effect.	
5	Applicants must in their submission satisfy the Council of their ability to execute the project successfully.	
6	Organisations who have already received financial or other assistance from the Council during the previous financial year MUST specify same in their application.	
7	No funding will be considered for political groupings, churches or ratepayers organisations.	
8	No funding will be considered where only an individual will benefit or where a member of Council or an official of Stellenbosch Municipality will receive any financial or other gain.	
9	Projects outside the boundaries of the Council will not be considered.	
10	Expenditure that will not be funded includes: travel costs (unless it is for the transport of beneficiaries), subsistence, accommodation, food (unless intended for the beneficiaries) or entertainment expenses of any kind, staff salaries including bonuses, bursaries and payments in lieu of rates or other municipal charges.	
11	Subsequent requests from the applicants to cover overspending on projects will not be considered.	
12	Successful applicants must at all times comply with the provisions of Section 67(1) of the Municipal Finance management Act no. 56 of 2003 which inter alia stipulates that the organization or body has to:-	
	❖ Enter into and comply with a Memorandum of Agreement with the Municipality as well as with all reporting financial management and auditing requirements as may be contained in such an agreement. This memorandum of agreement will bind the successful applicant to deliver on what the application speaks to, but also to commit to become involved with municipal programs of the community where it functions. The Memorandum of Agreement will be made available to successful applicants for completion.	
	❖ Report monthly on the actual expenditure of the amount allocated to it. Should monthly allocations be made.	
13	The Council reserves the right not to give a Grant-In-Aid to any organization applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.	
14	Funding will not be considered where a project or organization is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding, failing which such applicant will be disqualified.	
15	Funding will not be considered where in Council's opinion, an organization received sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and budget for the ensuing financial year.	
16	Organisations having received funding from Stellenbosch Municipality during the previous financial year, are required to attach to any new application, a copy of the financial statements relating to the year in which the funding was received from Council, as required in terms of Section 17 of the Non-profit Organisation Act, 1997 and Section 67(1) of the Municipal Finance Management Act, 2003 (MFMA).	
17	Funding will not be considered where expenses have already been incurred on a project by the applicant. (The Council's Grant-In-Aid Policy must be consulted for the sake of completeness).	

O DECLARATION OF INTEREST:	
The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations:

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

APPENDIX B

MEMORANDUM OF AGREEMENT

Entered into and between

STELLENBOSCH MUNICIPALITY

(hereafter called the "**MUNICIPALITY**")

Herein represented by **Geraldine Mettler**, in her capacity as **Municipal Manager**, being duly authorised

and

(hereafter called the "**BENEFICIARY**")

Herein represented by _____ in his/her capacity as _____,
being duly authorised.

WHEREAS Section 67(1) of the Local Government: Municipal Finance Management Act, Act 56 of 2003 (MFMA) oblige the Accounting Officer of a **MUNICIPALITY** to satisfy himself that, before transferring funds of the **MUNICIPALITY** to an organisation or body outside any sphere of government otherwise than in compliance with a commercial or other business transaction, that such organisation or body:-

- (a) has the capacity and has agreed-
 - (i) to comply with any agreement with the **MUNICIPALITY**;
 - (ii) for the period of the agreement to comply with all reporting, financial management and auditing requirements as may be stipulated in the agreement;
 - (iii) to report at least monthly to the Accounting Officer on actual expenditure against such transfer (should transfers be done on a monthly basis); and

- (b) implements effective, efficient and transparent financial management and internal control systems to guard against fraud, theft and financial mismanagement; and
- (c) has in respect of previous similar transfers complied with all the requirements as set out above; and
- (d) give permission to site visits done by the **MUNICIPALITY**.

WHEREAS the **MUNICIPALITY** has approved a Grants-in-Aid Policy, in terms whereof applications are considered;

WHEREAS the **BENEFICIARY** has applied for a grant-in-aid as per the official grant-in-aid application form; and

WHEREAS the **MUNICIPALITY** has approved such application, subject to certain conditions;

NOW THEREFORE THE PARTIES AGREE AS FOLLOWS:

1. TRANSFER OF FUNDS

- 1.1 The **MUNICIPALITY** hereby undertakes to transfer an all-inclusive amount of

R..... (.....), being a donation for the period **01 July 20...** to **30 June 20...** to the **BENEFICIARY**.

- 1.2 Bank Account details: (The following are confirmed through a correctly completed Creditors Control Form.)

Account number : _____
 Name of financial institution : _____
 Name of account holder : _____
 Branch code : _____
 Type of account : _____

- 1.3 The all-inclusive amount will be transferred in equal amounts on the following dates (if applicable):

2. OBLIGATIONS OF BENEFICIARY

- 2.1 The **BENEFICIARY** must acknowledge in writing to the Municipal Manager that the amount(s) was(were) received in its bank account.
- 2.2 The **BENEFICIARY** hereby certifies that the money will be utilised in accordance with the role of the organisation or society, to the benefit of the community and in accordance with the project(s) / programme(s) as indicated in the application form.
- 2.3 The **BENEFICIARY** undertakes to regularly report on a monthly basis to the Municipal Manager regarding the activities conducted, actual expenditure against such transferred funds, as well as the number of people benefiting from the activities should monthly payments be made. If not, an annual report on the expenditure will be provided.
- 2.4 The **BENEFICIARY** further undertakes to submit an audited financial statement for its financial year to the Municipal Manager by not later than **30 April 20...**

3. SPECIFIC CONDITIONS

- 3.1 The parties specifically agree on the following:

That the organization will commit to active involvement in any programme run by the municipality in the area of operation of the organization when such a programme is active in the community.

Other conditions:

4. DECLARATION OF INTEREST

The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations: (Name and designation)

5. ACQUISITION OF ASSETS

- 5.1 Should the **BENEFICIARY** wish to acquire any moveable or immovable assets with the money donated in terms of this Agreement, the **BENEFICIARY** hereby undertakes to:-
- 5.1.1 adhere to the principles as per the **MUNICIPALITY'S** Supply Chain Management Policy, and
- 5.1.2 take all reasonable steps to ensure that such assets are maintained and that a system of internal control of such assets is in place.

6. RIGHTS OF THE MUNICIPALITY

- 6.1 The **MUNICIPALITY** shall be entitled, from time to time, to verify the existence and to inspect the activities of the **BENEFICIARY**, having regards for its right to privacy as entrenched in terms of the Constitution of the Republic of South Africa..
- 6.2 The **MUNICIPALITY** shall further be entitled to peruse the budgets and any progress reports related to the project / programme as per this Agreement.

7. FAILURE TO COMPLY

- 7.1 Failure by the **BENEFICIARY** to comply with the obligations as set out in Clause 2 of this Agreement, may lead to the cancellation of this Agreement, in which case the **MUNICIPALITY** may demand that the organisation pays back any unspent funds as per this Agreement. The **MUNICIPALITY** may even, depending on the circumstances leading to the non-compliance by the **BENEFICIARY**, demand that the organisation pays back the full amount paid to the **BENEFICIARY**.

8. INDEMNIFICATION

- 8.1 The **BENEFICIARY** hereby acknowledges that it receives the grant voluntarily and that it shall keep the **MUNICIPALITY** indemnified at all times against any loss, cost, damage, injury or liability suffered by the **MUNICIPALITY** resulting from any action, proceeding or claim made by any person (including themselves) against the **MUNICIPALITY** caused directly or indirectly by the use/spending of the grant.

9. DISPUTE RESOLUTION

9.1 Any dispute arising from this Agreement shall be mediated between the Parties by a mutually agreed upon and suitably skilled mediator. Should the mediator be unsuccessful and the Parties fail to reach agreement, the dispute may be referred by

the aggrieved Party to the arbitration of a single arbitrator, to be agreed upon between the Parties, or failing agreement, to be nominated on the application of any Party, by the President for the time being of the South African Association of Arbitrators. The decision of the single arbitrator shall be final and binding on the Parties.

10. NOTICES AND DOMICILIA

10.1 The parties choose as their *domicilia citandi et executandi* their respective addresses as set out in this clause for all purposes arising out of or in connection with the agreement at which addresses all processes and notices arising out of or in connection with this Agreement, its breach or termination, may validly be served upon or delivered to the Parties.

10.2 For purposes of this Agreement the Parties' respective addresses shall be:

10.2.1 The MUNICIPALITY:

Town House
Plein Street
Stellenbosch
7600
Fax: 021 – 808 8025

10.2.2 The BENEFICIARY:

email address: _____

or at such other address of which the Party concerned may notify the other(s) in writing provided that no street address mentioned in this sub-clause shall be changed to a post office box or poste restante.

10.3 Any notice given in terms of this Agreement shall be in writing and shall-

10.3.1 if delivered by hand be deemed to have been duly received by the addressee on the date of delivery;

10.3.2 if posted by prepaid registered post be deemed to have been received by the addressee on the 8th (eighth) day following the date of such posting;

10.3.3 if transmitted by facsimile be deemed to have been received by the addressee on the day following the date of dispatch;

10.4 Notwithstanding anything to the contrary contained or implied in this Agreement, a written notice or communication actually received by one of the Parties from another, including by way of facsimile transmission, shall be adequate written notice or communication to such party.

11. ENTIRE AGREEMENT

This Agreement, including the **Grant-in-Aid policy and application form**, reflects the entire Agreement between the Parties and no variation, amendment or addendum shall be of any force and effect between the Parties unless contained in writing, signed and agreed on by both Parties.

Signed at Stellenbosch on this _____ day of _____ 20....

1. Basis of Preparation

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

~~In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5. Accounting policies for material transactions, events or conditions not covered by the GRAP Standards have been developed in accordance with paragraphs 7, 11 and 12 of GRAP 3.~~

~~Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.~~

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

1.1 Going concern assumption

These unaudited annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.1.2 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Provincial MEC responsible for housing.

1.3 Internal reserves

Capital replacement reserve (CRR)

In order to finance the acquisition of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of the Annual Budget. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

Self-insurance reserve

The municipality has a Self-insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self-insurance fund is invested in short-term investments. Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

Accumulated surplus

The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.

1.4 Materiality

~~Self insurance reserve~~

~~The municipality has a Self insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self insurance fund is invested in short term investments. Claims are settled by transferring a corresponding amount from the self insurance reserve to the accumulated surplus.~~

~~Accumulated surplus~~

~~The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.~~

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.5 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are insignificant to the annual financial statements are set out below:

Sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Revenue recognition

Accounting Policy 1.16 on Revenue from Exchange Transactions and Accounting Policy 1.17 on Revenue from Nonexchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality.

In concluding judgement, management considered the detailed criteria for recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

Impairment of financial assets

Accounting Policy 1.911: Financial Instruments, referring to the paragraph on impairment of financial assets, describes the process followed to determine the value with which financial assets should be

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments - Recognition and Measurement. The management of the municipality is satisfied that impairment of financial assets recorded during the year is appropriate. Details of the impairment loss calculation are provided in the applicable notes to the annual financial statements.

Useful lives of property, plant and equipment and intangible assets

As described in Accounting Policy 1.86 and 1.97 the municipality depreciates its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful life, which is determined when the assets are brought into use.. The review of useful life and residual values of assets are only reviewed if one of the indicators of potential review is triggered.

Employee benefit obligations

The municipality obtains actuarial valuations of its employee benefit obligations. The employee benefit obligations of the municipality that were identified are post-retirement health benefit obligations and long-service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the applicable notes to the annual ~~f~~Financial ~~s~~Statements.

Impairment of non-financial assets

The recoverable amounts of cash-generating units have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

~~The recoverable (service) amounts of cash-generating units and individual assets have been determined based in the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.~~

The recoverable amounts of individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

Value in use of cash generating assets

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including economic factors such as inflation and interest.

Value in use of non-cash generating assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that the impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Provisions

Provisions are raised and management determines an estimate based on the information available. Additional disclosures of these estimates of provisions are included in note 20 - Provisions.

Allowance for slow moving, damaged and obsolete stock

An allowance for inventory to write inventory down to the lower of cost or net realisable value. Management has made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the surplus/deficit.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure ~~purposes~~ is purposes

Accounting Policies

1.21 Statutory receivables (continued)

is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows-.

Allowance for doubtful debts

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Impairment of statutory receivables

If there is an indication that a statutory receivable, may be impaired, the ~~entity-municipality~~ measures ~~and the~~ impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, are reduced, either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Accounting by principals and agents

The entity makes assessments on whether it is the principal or agent in principal-agent relationships.

1.6 Biological assets that form part of an agricultural activity

The municipality recognises biological assets that form part of an agricultural activity or agricultural

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

produce when and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity or agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of a biological assets that form part of an agricultural activity, is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable, is used to determine fair value.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

The municipality classifies biological assets as consumables which consist of timber in the form of pine trees. All biological assets are held for sale.

Item	Useful life
Trees in a plantation forest	indefinite

1.7 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or for
- administrative purposes; or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that is associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Depreciation is calculated at the straight line method over a period of 30 - 99 years

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued) at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property - buildings	30-99 years
Property - land	indefinite

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 11).

When classification is difficult, the criteria used to distinguish investment property from owner -occupied property and from property held for sale in the ordinary course of operations, are as follows:

Transfers to, or from, investment property shall be made when, and only when, there is a change in use, evidenced by:

- (a) commencement of owner-occupation, for a transfer from investment property to owner-occupied

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

- property;
- (b) commencement of development with a view to sale, for a transfer from investment property to inventories;
- (c) end of owner-occupation, for a transfer from owner-occupied property to investment property; or
- (d) commencement of an operating lease (on a commercial basis) to another party, for a transfer from inventories to investment property.

1.8 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

Property, plant and equipment is recognised as an asset when:

- it is probable that the future economic benefits or service potential that are associated with the property, plant and equipment will flow to the municipality; and
- the cost or fair value of the item can be determined reliably.

Measurement

Property, plant and equipment are initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary cost of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Incomplete construction work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is ~~ready to be used~~ available for use.

Impairment

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable service amount, it is written down immediately to its recoverable service amount and an impairment loss is charged to the statement of financial performance.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Depreciation

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

The useful lives of items of property, plant and equipment have been assessed as follows:

Land	indefinite
Machinery and equipment	1-25
Furniture and office equipment	2-24
Transport assets	4-20
Computer equipment	5-23
Community assets	4-30
Other property, plant and equipment	6-99
Capital restoration asset	5-30
Electrical infrastructure	10-50
Water supply infrastructure	10-100
Solid waste infrastructure	10-30
Roads infrastructure	10-100
Information and communication infrastructure	3-15
Waste water network	10-100
Stormwater infrastructure	10-50

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 10).

1.9 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations. A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it;
- there is an ability to use or sell it;
- it will generate probable future economic benefits or service potential;
- there are available technical, financial and other resources to complete the development and to use or sell the asset; and
- the expenditure attributable to the asset during its development can be measured reliably. Intangible assets are initially measured at cost.

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated goodwill, brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Item		Useful life
Computer software		3 - 30 years
<u>Internally generated: Capital development</u>	<u>Straight-line</u>	<u>5 - 7 years</u>
<u>Service operating and land rights</u>	<u>Straight-line</u>	<u>5 - 30 years</u>

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset is the difference between the net disposal proceeds and the carrying amount and is included in surplus or deficit when the asset is derecognised.

1.10 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 14 Heritage assets.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Subsequent to initial measurement classes of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.11 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by a municipality on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an municipality's statement of financial position.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, a municipality shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the municipality shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another municipality; or
- a contractual right to:
 - o receive cash or another financial asset from another municipality; or
 - o exchange financial assets or financial liabilities with another municipality under conditions that are potentially favourable to the municipality.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another municipality; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the municipality.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the municipality had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed

or determinable payments, excluding those instruments that:

- the municipality designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - o it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - o on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking
 - o non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - o financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Class	Category
Receivables from exchange transactions	Financial asset measured at amortised cost
Receivables from non-exchange transactions	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost
Other receivables from exchange transactions	Financial asset measured at amortised cost
Short term investments	Financial asset measured at amortised cost
Long term receivables	Financial asset measured at amortised cost

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Payables from exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Other financial liabilities	Financial liability measured at amortised cost

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

~~The municipality recognises financial assets using trade date accounting.~~

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus, in the case of a financial asset or a liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The municipality first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the municipality analyses a concessionary loan into its component parts and accounts for each component separately. The municipality accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the municipality uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data..

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Reclassification

The municipality does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification

Where the municipality cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the municipality reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the municipality reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

The calculation in respect of the impairment of fines receivable (receivables from non-exchange

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

transactions) is based on an assessment of the past history of fines per category.

Derecognition

Financial assets

The municipality derecognises financial assets using trade-date accounting. The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Cash includes cash on hand and cash with banks. Cash equivalents are short term highly liquid investments that are held with registered banking institutions with a maturity period of between three and twelve months and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried in the balance sheet at amortised cost.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and cash with bank, net of bank overdrafts.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by a n o t h e r municipality by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Housing rental and instalments

Finance income from the sale of housing by way of instalment sales agreements or finance leases is recognised on a time proportion basis.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Any contingent rent is expensed in the period in which they are incurred.

1.13 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, and then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs. The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

1.14 Landfill site

Site restoration and dismantling cost - The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes:

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located;
- changes in the measurement of an existing decommissioning, restoration and similar liability that result from change in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in discount rate; and
- the obligation the municipality incurs for having used the items during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.15 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Cash generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset. Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash generating unit is the smallest identifiable group of assets used with the objective of generating a

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

~ the period of time over which an asset is expected to be used by the municipality; or

~ the number of production or similar units expected to be obtained from the asset by the municipality.

Management has judged all assets as non cash generating assets.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

~~Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.~~

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.16 Impairment of non- cash generating assets

Non cash generating assets are assets other than cash generating assets.

Identification

When the carrying amount of a non cash generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non cash generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non cash generating intangible asset with an indefinite useful life or a non cash generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non cash generating assets is the present value of the non cash generating assets remaining service potential.

The present value of the remaining service potential of a non cash generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non cash generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non cash generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non cash generating asset is adjusted in future periods to allocate the non cash generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non cash generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non cash generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non cash generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non cash generating asset is adjusted in future periods to allocate the non cash generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.161.17 Employee benefits

Employee benefits are all forms of consideration given by a municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- a municipality's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from a municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Accrued leave pay

Liabilities for annual leave are recognised as they accrue to employees. Liability is based on the total accrued leave days owing to employees and is reviewed annually.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which a municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Multi-employer plans

The municipality classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Where a plan is a defined contribution plan, the municipality accounts for in the same way as for any other defined contribution plan.

Where a plan is a defined benefit plan, the municipality account for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the municipality account for the plan as if it was a defined contribution plan.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the municipality during a reporting period, the municipality recognizes the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the municipality recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement.

The amount determined as a defined benefit liability may be negative (an asset). The municipality measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The municipality determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, the municipality shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality attributes benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the municipality re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The municipality offsets an asset relating to one plan against a liability relating to another plan when

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other long term employee benefits

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

Long term ~~serices~~service awards is payable after 10 years of ~~continious~~continuous service and after every 5 years thereafter to employees. Additional to this employees shall be entitled to a 14th cheque for ~~continious~~continuous ~~employment~~employment on their 30th and every 5th year ~~rf onward~~onward. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover based on historical staff turnover. No other long service benefits are provided to emp~~lo~~yees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost; and
- the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

The municipality is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than twelve months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

benefits shall be based on the number of employees expected to accept the offer.

1.171.18 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

~~Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.~~

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Provision for the rehabilitation of landfill sites

At year end a provision is raised for the rehabilitation of landfill sites. The provision is the net present value of the future cash flows to rehabilitate damaged land at year end.

As the related asset is measured using the cost model:

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period;
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;
- if the adjustments result in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may be fully recoverable. If there is such an indication, the municipality tests the asset for the impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in the accounting policy on impairment of cash-generating assets and/ or impairment of non-cash generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur.

Provision for constructive obligations

A constructive obligation to restructure arises only when the municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality.

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingencies

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability is a:

- possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality;
- present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; the amount of the obligation cannot be measured with sufficient reliability.

~~Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 51.~~

1.181.19 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Service charges

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

reporting date, an accrual is made based on the billings done during July and August. The billing and invoiced amounts done in July are recognized in total as an accrual as all billing in July pertains to services rendered prior 30 June. An estimate is then made based on August billing pertaining to services rendered up until 30 June. -

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by surveys of work performed.

Pre-paid electricity

Revenue from the sale of electricity prepaid units is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measure reliably.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Interest earned

Interest earned on investments is recognised in the statement of financial performance on the time proportionate basis that takes into account the effective yield on the investment.

Dividends

Dividends are recognised on the date that the municipality becomes entitled to receive the dividend in accordance with the substance of the relevant agreement, where applicable.

Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant approved tariff. This includes the issuing of licences and permits.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Income from agency services

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

~~1.19~~1.20 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, the municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs are recognised in the statement of financial performance in the period in which they become receivable.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Property rates

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources.

Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Debt forgiveness and assumption of liabilities

The municipality recognises revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables. Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting municipality.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Services in-kind that are significant to the municipality's operations and/or service delivery objectives are recognised as assets and the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

Collection charges and penalties

Collection charges and penalty interest is recognised when:

- it is probable that the economic benefits or service potential associated with the transactions will flow to the municipality; and
- the amount of revenue can be measured reliably; and

to the extent that there has been compliance with the relevant legal requirements (if applicable).

~~1.19 Value Added Tax~~

~~The municipality accounts for Value Added Tax on the cash (payment) basis.~~

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

1.201.21 Statutory receivables Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of the Standard of GRAP on Statutory Receivables) means- the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the accounting policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the accounting policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the accounting policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the municipality and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount. Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised. Accrued interest

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the accounting policy on Revenue from exchange transactions or the accounting policy on Revenue from non-exchange

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled to levy additional charges in terms of legislation, supporting regulations, by-laws or similar means on overdue or unpaid amounts, these charges are accounted for in terms of the municipality's accounting policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (taxes and transfers).

Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- significant financial difficulty of the receivable, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- it is probable that the receivable will enter sequestration, liquidation or other financial re-organisation.
- a breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable, or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognises the receivable; and
 - recognises separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The municipality considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.22 Accounting by principles and agents

2 Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.23 Borrowing costs

Borrowing costs are interest and other expenses incurred by the municipality in connection with the borrowing of funds. Borrowing costs are recognised as an expense in the period in which they are incurred.

1.24 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 59 and 60 for detail.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.25 ~~UU~~unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.26 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.27 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

~~1.27— Impairment of non-cash-generating assets~~

~~Non-cash-generating assets are assets other than cash-generating assets.~~

~~Identification~~

~~When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.~~

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

~~The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.~~

~~Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.~~

Value in use

~~Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.~~

~~The present value of the remaining service potential of non-cash-generating assets is determined using the following approach:~~

Depreciated replacement cost approach

~~The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.~~

~~The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.~~

Recognition and measurement

~~If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.~~

~~An impairment loss is recognised immediately in surplus or deficit.~~

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

~~After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.~~

Reversal of an impairment loss

~~The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.~~

~~An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.~~

~~A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.~~

~~After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.~~

GRAP

1.28 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

Key management as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management are those persons responsible for planning, directing and controlling the activities of the municipality including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

Changes in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Commitments

Items are classified as commitments where the municipality commits itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.29 Changes in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

1.30 ~~Budget information~~ Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.31 ~~Budget information~~ Value Added Tax

The municipality accounts for Value Added Tax on the cash (receipt) basis.

1.291.32 Budget information

The approved budget is prepared on the accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019/07/01 to 2020/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the statement of comparison of budget and actual amounts.

1.33 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting ~~events~~ after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.34 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

0.27 Going concern assumptions

~~These audited annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.~~

0.27 Accounting by principals and agents

Identification

~~An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.~~

~~A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.~~

~~A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).~~

Identifying whether an entity is a principal or an agent

~~When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.~~

~~The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.~~

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement reassess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

~~The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.~~

~~The municipality recognises assets and liabilities arising from principal agent arrangements in accordance with the requirements of the relevant Standards of GRAP.~~

2 New standards and interpretations

2.1 Standards and interpretations not yet effective or relevant

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2019 or later periods but no effective date has been determined by the Minister:

2.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2020 or later periods:

<u>Standard/ Interpretation:</u>	<u>Effective date: Years beginning on or after</u>	<u>Expected impact:</u>
• <u>GRAP 34: Separate Financial Statements</u>	<u>01 April 2020</u>	<u>Unlikely there will be a material impact</u>
• <u>GRAP 35: Consolidated Financial Statements</u>	<u>01 April 2020</u>	<u>Unlikely there will be a material impact</u>
• <u>GRAP 36: Investments in Associates and Joint Ventures</u>	<u>01 April 2020</u>	<u>Unlikely there will be a material impact</u>
• <u>GRAP 37: Joint Arrangements</u>	<u>01 April 2020</u>	<u>Unlikely there will be a material impact</u>
• <u>GRAP 38: Disclosure of Interests in Other Entities</u>	<u>01 April 2020</u>	<u>Unlikely there will be a material impact</u>

• <u>GRAP 110 (as amended 2016): Living and Non-living Resources</u>	<u>01 April 2020</u>	<u>Unlikely there will be a material impact</u>
• <u>GRAP 18 (as amended 2016): Segment Reporting</u>	<u>01 April 2020</u>	<u>Not expected to impact results but may result in additional disclosure</u>

GRAP 34: Separate Financial Statements

The objective of this Standard is to prescribe the accounting and disclosure requirements for investments in controlled entities, joint ventures and associates when an entity prepares separate financial statements.

It furthermore covers Definitions, Preparation of separate financial statements, Disclosure, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 35: Consolidated Financial Statements

The objective of this Standard is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

To meet this objective, the Standard:

- requires an entity (the controlling entity) that controls one or more other entities (controlled entities) to present consolidated financial statements;
- defines the principle of control, and establishes control as the basis for consolidation;
- sets out how to apply the principle of control to identify whether an entity controls another entity and therefore must consolidate that entity;
- sets out the accounting requirements for the preparation of consolidated financial statements; and
- defines an investment entity and sets out an exception to consolidating particular controlled entities of an investment entity.

It furthermore covers Definitions, Control, Accounting requirements, Investment entities: Fair value requirement, Transitional provisions and Effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 36: Investments in Associates and Joint Ventures

~~The objective of this Standard is to prescribe the accounting for investments in associates and joint ventures and to set out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.~~

~~It furthermore covers Definitions, Significant influence, Equity method, Application of the equity method, Separate financial statements, Transitional provisions and Effective date.~~

~~The effective date of the standard is not yet set by the Minister of Finance.~~

~~The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.~~

~~It is unlikely that the standard will have a material impact on the municipality's annual financial statements.~~

GRAP 37: Joint Arrangements

~~The objective of this Standard is to establish principles for financial reporting by entities that have an interest in arrangements that are controlled jointly (i.e. joint arrangements).~~

~~To meet this objective, the Standard defines joint control and requires an entity that is a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations and to account for those rights and obligations in accordance with that type of joint arrangement.~~

~~It furthermore covers Definitions, Joint arrangements, Financial statements and parties to a joint arrangement, Separate financial statements, Transitional provisions and Effective date.~~

~~The effective date of the standard is not yet set by the Minister of Finance.~~

~~The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.~~

~~It is unlikely that the standard will have a material impact on the municipality's annual financial statements.~~

GRAP 38: Disclosure of Interests in Other Entities

~~The objective of this Standard is to require an entity to disclose information that enables users of its financial statements to evaluate:~~

~~~the nature of, and risks associated with, its interests in controlled entities, unconsolidated controlled entities, joint arrangements and associates, and structured entities that are not consolidated; and~~

~~~the effects of those interests on its financial position, financial performance and cash flows.~~

~~It furthermore covers Definitions, Disclosing information about interests in other entities, Significant judgements and assumptions, Investment entity status, Interests in controlled entities, Interests in joint arrangements and associates, Interests in structured entities that are not consolidated, Non-qualitative ownership interests, Controlling interests acquired with the intention of disposal, Transitional provisions and Effective date.~~

~~The effective date of the standard is not yet set by the Minister of Finance.~~

~~The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.~~

~~It is unlikely that the standard will have a material impact on the municipality's annual financial statements.~~

1. PREAMBLE

- Section 63 of the Municipal Finance Management Act Number 56 of 2003 governs Asset and Liability Management and states the following:

Asset and liability management

- 63.** (1) The accounting officer of a municipality is responsible for the management of— 10
- (a) the assets of the municipality, including the safeguarding and the maintenance of those assets; and
 - (b) the liabilities of the municipality.
- (2) The accounting officer must for the purposes of subsection (1) take all reasonable steps to ensure— 15
- (a) that the municipality has and maintains a management, accounting and information system that accounts for the assets and liabilities of the municipality;
 - (b) that the municipality's assets and liabilities are valued in accordance with standards of generally recognised accounting practice; and 20
 - (c) that the municipality has and maintains a system of internal control of assets and liabilities, including an asset and liabilities register, as may be prescribed.

The Municipal Finance Management Act Number 56 of 2003 will be the legislative framework for the Asset Management Policy whilst Generally Recognised Accounting Practice (GRAP) will be the accounting framework.

- The Municipal Council of Stellenbosch is in terms of the MFMA and GRAP obliged to adopt an Asset Management Policy to regulate the effective management of all council's assets.
- **And whereas** the municipal manager as accounting officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.
- **And whereas** these assets must be protected over their useful life and may be used in the production or supply of goods and services or for administrative purposes in meeting the municipality's operational requirements.
- **Now therefore** the municipal council of the Stellenbosch Municipality adopts this asset management policy:

2. DEFINITIONS

In this Policy, unless the context indicates otherwise

An **asset** means a resource

- a) controlled by Stellenbosch Municipality
- b) as a result of a past event
- c) it is probable that future economic benefits or service potential associated with the assets will flow to the municipality

Property, Plant and Equipment (PPE) refers to tangible, identifiable assets that:

- a) are held for-
 - i. use in the production or supply of goods or services
 - ii. rental, or
 - iii. administrative purposes, and
 - iv. are expected to be used for more than one year.

PPE should be classified according to the following definition groups:

- a) **Infrastructure assets** which are defined as assets that usually display some or all of the following characteristics:
 - i. they are part of a system or network,
 - ii. they are specialised in nature and do not have alternative uses
 - iii. they are immovable, and
 - iv. they may be subject to constraints on disposal
 - v. examples are road networks, sewer systems, water networks etc.
- b) **Community assets** which are defined as assets that contributes to the communities' well-being. Community assets are disclosed in accordance with its nature.
- c) **Heritage assets** which are defined as cultural significant resources.
- d) **Investment Properties** are defined as properties (land or buildings) that are acquired for economic and capital gains or held by Stellenbosch Municipality as finance lease to earn rentals. Examples are office parks and undeveloped land acquired for the purpose of resale in future years.
- e) **Other assets** which are defined as assets utilised in normal operations.
- f) **Intangible assets** which are defined as being assets without physical substance.

g) **Biological assets** are assets acquired for agricultural purposes.

Capitalization of assets means the recording of assets in the Fixed Asset Register with its historical financial cost in accordance with GRAP.

Carrying amount means the amount at which an asset is recognized after deducting any accumulated depreciation and accumulated impairment losses.

Classification of assets means the grouping of assets of a similar nature of functionality in an entities operation that is shown as a single item for the purpose of disclosure in the financial statements.

Cost means the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognized in accordance with specific requirements of other Standards of Generally Recognized Accounting Practices (GRAP).

Contributed assets means items received by the municipality as a donation.

Depreciation means the systematic allocation of the depreciable amount of an asset over its useful life.

Depreciable amount means the cost of an asset, or other amount substituted for the cost less its residual value.

Fair value means the amount for which an asset could be exchanged or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Fixed Asset Register means a register for recording assets in accordance with GRAP

Impairment of an asset

- An impairment loss of cash - generating assets is the amount by which the carrying amount of an asset exceeds its recoverable amount.
- An impairment loss of non - cash generating assets is the amount by which the carrying amount of an asset exceeds its recoverable service amount.

Recoverable amount means the amount that the municipality expects to recover from the future use of an asset, including the residual value on disposal.

Residual value means the estimated amount that Stellenbosch municipality would

currently obtain from disposal of the asset, after deducting the estimated cost of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

Useful life means the period over which an asset is expected to be available for use by the municipality.

Contributed Assets means items received by the Stellenbosch Municipality in the form of a donation.

3. ACRONYMS

| | |

| PPE: | Property, Plant and Equipment |
| AMC Form: | Asset Movement Capture Form |
| MFMA: | Municipal Finance Management Act |
| GRAP: | General Accepted Accounting Practice |
| DIR: | Departmental Inventory Register |
| SCM: | Supply Chain Management |
| FAR: | Fixed Asset Register |
| NARC: | New asset receipt capture form |
| AT: | Asset transfer form |

4. AIM

This policy will lay down broad guidelines for consistent, effective and efficient asset management principles of Stellenbosch Municipality

5. OBJECTIVES

- Specifying Council's practice regarding accounting for assets
- Ensure consistency in accounting treatment.
- To assist officials in understanding their legal and managerial responsibilities with regard to key asset functions such as:
 - safeguarding of assets,
 - maintaining assets,
 - establishing and maintaining a management, accounting and information system

- that accounts for the assets of the municipality.
- asset valuation principles in accordance with GRAP.
- establishing and maintaining systems of internal controls over assets.
- establishing and maintaining asset registers.
- clarifying responsibilities and accountabilities for the asset management process.

6. STATUTORY AND REGULATORY FRAMEWORK

This policy must comply with all relevant legislative requirements including:

- The Constitution of the Republic of South Africa, 1996
- Municipal Structures Act, 1998
- Municipal Systems Act, 2000
- Division of Revenue Act (enacted annually)
- Municipal Finance Management Act of 2003

Also, this policy must comply with the standards specified by the Accounting Standards Board. The relevant currently recognized accounting standards include:

- GRAP 17 Property, plant or equipment
- GRAP 16 Investment property
- GRAP 100 Non-current Assets held for Sale and Discontinued Operations
- GRAP 31 Intangibles
- GRAP 103 Heritage Assets
- GRAP 101 Agriculture
- GRAP 21 & 26 Impairment

7. RESPONSIBILITIES AND ACCOUNTABILITIES

The purpose of this section is to prescribe the responsibilities of the various functionaries within Stellenbosch Municipality.

7.1 The Accounting Officer (Municipal Manager)

The Accounting Officer (Municipal Manager) or his duly delegated representative is responsible to ensure implementation and compliance with the responsibilities prescribed in section 63 of the MFMA.

- The municipality has and maintains a management, accounting and information system that accounts for the assets of the municipality;

- The municipality's assets are valued in accordance with standards of generally recognized accounting practice;
- The municipality has and maintains a system of internal control of assets, including an asset register; and
- The senior managers and their teams comply with this policy.
- In consultation with the asset managers, he approves the temporary or permanent transfer of a movable asset between departments as determined in the "Delegation of Authority to officials of the Stellenbosch Municipality".

7.2 The Chief Financial Officer (Director: Finance)

The Chief Financial Officer is responsible to the Municipal Manager to ensure that the financial investment in the municipality's assets is safeguarded and maintained.

The Chief Financial Officer must take reasonable steps to ensure that:

- i. Appropriate systems of financial management and internal control are established and carried out diligently;
- ii. The financial and other resources of the municipality are utilized effectively, efficiently, economically and transparently;
- iii. Any unauthorized, irregular or fruitless or wasteful expenditure and losses resulting from criminal or negligent conduct are prevented;
- iv. The systems, processes and registers required to substantiate the financial values of the municipality's assets are maintained at standards sufficient to satisfy the requirements of the Auditor-General.
- v. Financial processes are established and maintained to ensure that the municipality's financial resources are optimally utilized through an appropriate asset plan, budgeting, purchasing, maintenance and disposal decisions.
- vi. The managers and asset champions are appropriately advised on the exercise of their powers and duties pertaining to the financial administration of assets;
- vii. The policy and supporting procedures or guidelines are established, maintained and effectively communicated;
- viii. The Chief Financial Officer may delegate or otherwise assign responsibility for performing the functions but he/she will remain accountable for ensuring these activities are performed.

7.3 Asset Managers/ Directors

- a) The manager referred to in Section 56 of the municipal systems act being someone reporting directly to the Municipal Manager and has the functional accountabilities for the physical management of a particular set of assets in order to achieve the municipalities strategic objectives relevant to their directorate.
- b) Directors shall be directly responsible for the physical safeguarding of any fixed asset controlled or used by the directorate in question. In exercising this responsibility, directors shall adhere to the stipulations of this policy as well as any other written directives issued by the municipal manager to the directorate in question, or generally to all directorates, in regard to the control of or safeguarding of the municipality's fixed assets.

Asset managers should:

- i. ensure that employees in their departments adhere to the approved Asset Management Policy;
- ii. ensure that all assets are procured in terms of the SCM Policy;
- iii. ensure that council are properly informed about any contributed (donated) assets and that approval from council is obtained timeously
- iv. ensure that the contributed asset is recorded on the NARC form and communicated with the Asset Management Department.
- v. ensure that employees with delegated authority have been nominated to implement and maintain physical control over assets in their departments. Although authority has been delegated, responsibility remains with the respective Managers of the departments and overall accountability with the Directors of relevant directorates;
- vi. ensure that the termination of service asset verification form for staff, is duly completed and submitted to the Strategic and Corporate Services Directorate;
- vii. ensure that assets are properly maintained in accordance with their respective asset maintenance policy;
- viii. ensure that, where applicable, all their movable assets as reflected on the Fixed Asset Register are barcoded to exercise control;
- ix. ensure that the Asset Management Section is notified via the AT form within 10 working days of any changes in the status of assets under the department's control;
- x. ensure that transfers between departments within directorates are administered internally;
- xi. ensure that a complete asset verification of all inventory and asset

- items is performed annually;
- xii. ensure that all obsolete, damaged and unused assets, supported by relevant asset and condemnation forms, are handed in at the Asset Management Department without delay;
 - xiii. be responsible for maintaining and managing their own DIR;
 - xiv. ensure that all assets are safeguarded against loss/theft and that they are adequately insured; and
 - xv. ensure that location changes are made timeously and location/room information are updated and reported on the relevant form to the Asset Management Section regularly.

7.4 Asset Champions

Asset Champions are senior officials appointed by the Asset Manager in the different Directorates.

The Asset Champion must:

- i. Assist the Asset Manager/ Director in performing his/her functions and duties.
- ii. Ensure that all new assets (purchased or donated) are recorded on the NARC form.
- iii. Ensure that the NARC forms are completed in full and send with copies of the relevant documentation to the asset control department within 7 working days after receipt of the assets.
- iv. Ensures that all their movable assets, where applicable, are barcoded.
- v. Ensure that asset listings are verified and kept up to date in collaboration with the Finance Directorate.
- vi. Assist the Finance Department with the annual verification of movable assets by making sure that the assets, as per asset listing, are at the correct locations, that these locations are accessible when the verification of assets takes place and provides a full report on any missing assets to the Asset Manager.
- vii. Notify the Finance Department when he/she identifies obsolete and redundant assets so that these assets can be moved to the Write-off Store.
- viii. Report all changes affecting asset listing sheets to the Director: Finance and the Finance Department: Asset Management Division within 7 days of occurrence.

The following require the written recommendation of the Asset Manager and approval of Municipal Manager on the prescribed form:

- a) The temporary or permanent transfer of all movable assets between departments.
- b) The writing off or disposal of obsolete or redundant assets.

7.5 Financial Services Directorate: Asset Management Section

- i. Is the asset registrar of the municipality and shall ensure that a complete, accurate and up to date asset register is maintained that conforms to the GRAP specifications.
- ii. Ensures that physical asset verification is performed annually by all departments to verify the assets on the asset register. The results of this verification must be reported to the Municipal Manager and Council.
- iii. Will perform reconciliations between the asset register and the General Ledger on a monthly basis.
- iv. Ensures adequate bar codes and equipment to exercise the function relating to asset control is available at all times.
- v. Will ensure that all audit queries are resolved in a timely manner.
- vi. Dispose of asset in accordance with the SCM policy
- vii. Handles the administrative functions with regards to the transfers received.

7.6 The responsibility of the Budget and Treasury

- i. Ensure that a clear description is provided with each project and the appropriate funding source is identified.
- ii. Release capital funds only after receiving written authority and a clear and concise description of the item to be purchased.
- iii. Ensure that any changes in the capital budget, with regards to funds transferred or project description changes are communicated to the Asset Management Division.

7.7 The Strategic and Corporate Services Directorate

The Strategic and Corporate Services directorate shall ensure that no monies are paid out to the staff on termination of their service prior to receiving the relevant asset resignation form signed off by the relevant directorate- refer to Termination of Service Asset Confirmation form.

8. SAFEGUARDING OF ASSETS

Custody and Security

- i. All barcoded assets shall be tracked by physical location through the Fixed Asset Register.
- ii. A physical asset verification process shall be performed every year and all directorates will be verified simultaneously.
- iii. The coordination of the process and verification of the assets will rest with the Asset Management Section and all directorates are responsible to see that the assets under their control are available during the verification process.

Communication

- i. Directorates are responsible to report any stolen or damage property to the Asset Management Section.
- ii. All changes must be accurately recorded on the AT forms and reported to the Asset Management Section within 10 working days.
- iii. Any discrepancies between the Fixed Asset Register and the physical inventory must be reconciled and motivated by the relevant directorates.

9. PROCEDURE WITH REGARD TO CONTRIBUTED ASSETS

Governance

- i. The authority to endorse and approve acceptance of assets contributed to the Stellenbosch Municipality vests with Council as such assets have an impact on future operational costs.
- ii. A report including the fair value/cost price of the contributed asset as well as the financial implications of acceptance of the contributed asset must be submitted to Council, so that acceptance of the asset can be confirmed.

Procedures

- i. Once Council has approved the donation, the departments must:
- ii. Notify the Financial Services Directorate of any assets contributed, by submitting the Council approved report including the cost/fair value of the contributed asset so that the asset can be recorded and capitalized

at the appropriate value.

10. FINANCIAL MANAGEMENT

Pre-Acquisition Planning

Before a capital project is included in the draft municipal budget for approval, the Asset Manager must prove that they have considered:

- The projected acquisition and implementation cost over all the financial years until the project is operational;
- The future operational costs and revenue on the project, including tax and tariff implications;
- The financial sustainability of the project over its economic life span including revenue generation and subsidization requirements;
- The physical and financial stewardship of the asset through all stages in its economic life span including acquisition, installation, maintenance, operations, disposal and rehabilitation; and
- The inclusion of the capital project in the Integrated Development Plans and future budgets.

The Chief Financial Officer is accountable to ensure that the Asset Managers/Directors receive all reasonable assistance, guidance and explanation to enable them to achieve their planning requirements.

Approval to acquire Property, Plant and Equipment:

Funds can only be invested with a capital project if:

- The funds have been appropriated in the capital budget;
- The project, including the total cost and funding sources, has been approved by the Council;
- The Director: Finance confirms that funding is available for that specific project; The Supply Chain Management prescripts/procedures have been adhered to.
- Any contract that will impose financial obligations more than two years beyond the budget year is appropriately disclosed.

The funding sources of Assets:

Within the municipality's ongoing financial, legislative or administrative capacity, the Chief Financial Officer will establish and maintain the funding strategies that optimize the municipality's ability to achieve its Strategic Objectives as stated in the Integrated Development Plan.

Four main sources of finance are utilized to acquire Property Plant and Equipment

for the municipality, namely:

- The Accumulated Surplus/Deficit (Capital Replacement Reserve)
- The External Financing Fund (EFF).
- Grants, Subsidies and Public
- Contributions. Fair value

The sources of finance that may be utilized to finance assets are utilized in accordance with the provisions of S19 of the Municipal Finance Management Act.

a) Accumulated Surplus/Deficit (The Capital Replacement Reserve)

The Council must annually approve the basis and the amounts for which contributions should be appropriated to the Accumulated Surplus/Deficit in conjunction with the availability of funds and the requirements of the capital program for that financial year.

The funds in the Accumulated Surplus/Deficit are accumulated by: An annual contribution from revenue

The cash backed profit on the sale/disposal of assets

When an amount is advanced to a borrowing service to finance the acquisition of an asset, the money must be transferred to the Accumulated Surplus created for the purpose of acquiring a specific asset and the accumulated funds in the Accumulated Surplus/Deficit must be reduced by the amount of the advance.

The balance of the accumulated funds in the Accumulated Surplus/Deficit will therefore represent the amount that is available to finance assets in future periods. This balance must be cash backed at all times.

The balance in the Accumulated Surplus is transferred to the income statement over the estimated life of assets financed by the Accumulated Surplus/Deficit to offset the depreciation charge included in the income statement relating to fixed assets.

b) The External Financing Fund (EFF)

When loans are obtained from external sources, they must be paid into the EFF. The corresponding cash should be invested until utilized for the purpose of acquiring assets. When the external loan is utilized to finance assets in a service entity it should be recorded in an "advances" account in the EFF.

Where a loan has a fixed period the installments should be calculated to determine the cash that should be set aside in the EFF. This is done so that there will be sufficient money to repay the loan when it matures as well as any interest charges as they occur.

When the loan is an annuity loan, the cash required to be paid into the EFF should be based on the actual loan repayments. Once the money has been received by the EFF, the cash would be used to repay the loan.

When the EFF is consolidated with the various services, the "advances made" account in the EFF will contra with the "advances received" account in the various service entities.

Loan finance option

A municipality should ensure that a loan satisfies the requirements of legislation on incurring debt. In particular, municipalities should ensure that long-term debt is:

- Incurred only for the purposes of capital expenditure for the purpose of achieving the objectives stated in section 152 of the Constitution (MFMA S46);
- incurred in line with its capital budget (MFMA S19 and S46(2));
- Is incurred only after the anticipated debt repayment schedule has been submitted to council (MFMA S46(3)(b)(i));
- Included in the liabilities register and
- Satisfies the other requirements of sections 19, 46 and 63 of the MFMA, the MSA and the Constitution.

c) Grants, Subsidies and Public Contributions (Capital Receipts)

Unutilized conditional grants are reflected on the Balance Sheet as a Creditor called Creditor (Unspent and Receipts). They represent unspent government grants, subsidies and contributions from the public. This creditor always has to be backed by cash.

The following provisions are set for the creation and utilization of this creditor:

- The cash which backs up the creditor is invested until it is utilized.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is the council's interest it is recognized as interest earned in the income statement.
- Whenever an asset is purchased out of the unutilized conditional grant an amount equal to the cost price of the asset purchased is transferred from the Unutilized Capital Receipts into the income statement as revenue. Thereafter

an equal amount is transferred on the statement of changes in equity to a reserve called an Accumulated Surplus/Deficit (Future Depreciation Reserve). This reserve is equal to the remaining depreciable value (book value) of assets purchased out of the Unutilized Capital Receipts. The Future Depreciation Reserve is used to offset depreciation charged on assets purchased out of the Unutilized Capital Receipts to avoid double taxation of the consumers.

- If a profit is made on the sale of assets previously purchased out of Unutilized Capital Receipts the profit on these assets sold is reflected in the notes to the income statement and is then treated in accordance with Council policy.

The acquisition of assets will not be funded over a period longer than the useful life of that asset.

Disposal of assets

- The municipality may not transfer ownership as a result of a sale or other transaction or otherwise permanently dispose of an asset needed to provide the minimum level of basic municipal services, unless such asset is obsolete or surplus to requirements or beyond a state of good repair or being replaced and provided that the delivery of the minimum level of basic municipal services must not be compromised as a result of the disposal of the asset.
- The decision that a specific asset is not needed to provide the minimum level of basic municipal services, may not be reversed by the municipality after that asset had been sold, transferred or otherwise disposed of.
- The disposal of an item of property, plant or equipment must be fair, equitable, transparent, competitive and cost effective and comply with a prescribed regulatory framework for municipal supply chain management and the Supply Chain Management Policy of the municipality.
- The transfer of assets to another municipality, municipal entity, national department or provincial department is excluded from these provisions, provided such transfer is being done in accordance with a prescribed regulatory framework. Directors shall report in writing to the Director: Finance on 31 May of each financial year on all fixed assets controlled or used by the directorate concerned which such Director wishes to alienate by public auction or public tender. The Director: Finance shall thereafter consolidate the requests received from the various directorates, and shall promptly report such consolidated information to the council or the Municipal Manager of the municipality, as the case may be, recommending the process of alienation to be adopted.
- Once the fixed assets are alienated, the Director: Finance shall de-recognize the asset from the accounting records and the fixed asset register.

Loss, theft, destruction or impairment of fixed assets

The different directorates shall ensure that any incident of loss, theft, destruction, or material impairment of any fixed asset controlled or used by the directorate in question is promptly reported in writing to the Director: Financial Services, to the internal auditor, and in cases of suspected theft or malicious damage, also to the South African Police Service.

11. ACCOUNTING FOR ASSETS

Capitalization of Assets

Stellenbosch Municipality does not capitalize an asset based on a capitalization cost threshold, but recognizes an asset when it complies with the definition of an asset as stipulated in GRAP 17 and the cost of the asset to the municipality can be measured reliably.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition (GRAP 17.22).

Assets will only be capitalized in the asset register on completion or finalization of the project.

Multi Year projects

Projects to be completed over more than one financial year will be initially disclosed in the asset register and financial statements as "Work in Progress" thereafter only on completion the asset will be capitalized and depreciated.

Assets will be recorded in the asset register continuously on completion thereof and bar-coded with an aluminium label where appropriate for identification.

Only expenses incurred in the enhancement of a fixed asset (in the form of improved or increased services or benefits flowing from the use of such asset) or in the material extension of the useful operating life of a fixed asset shall be capitalized (GRAP 17.19-20):

- Parts of some items of property, plant and equipment may require replacement at regular intervals. For example, a road may need resurfacing every few years, a furnace may require relining after a specified number of hours use, or aircraft interiors such as seats and galleys may require replacement several times during the life of the airframe. Items of property, plant and equipment may also be required to make a less frequently recurring replacement, such as replacing the interior walls of a building, or to make a non-recurring replacement. Under the recognition principle in an entity

recognizes in the carrying amount of an item property, plant and equipment the cost replacing part of such an item when that cost is incurred if the recognition criteria are met. The carrying amount of those parts that are replaced is derecognized in accordance with the de-recognition provision of this Standard (GRAP 17.19).

- A condition of continuing to operate an item of property, plant and equipment (for example, an aircraft) may be performing regular major inspections for faults regardless of whether parts of the item are replaced. When each major inspection is performed, its cost is recognized in the carrying amount of the item of property, plant and equipment as a replacement if the recognition criteria are satisfied. Any remaining carrying amount of the cost of the previous inspection (as distinct from physical parts) is derecognized. This occurs regardless of whether the cost of the previous inspection was identified in the transaction in which the item was acquired or constructed. If necessary, the estimated cost of a future similar inspection may be used as an indication of what the cost of the existing inspection component was when the item was acquired or constructed (GRAP 17.20)

Computer software will be capitalized and classified as intangible assets.

MAINTENANCE

Maintenance Strategy

Each directorate must develop a maintenance strategy that will ensure that the assets of Stellenbosch Municipality are maintained at an adequate operational level or standard by ensuring that all statutory, technical and operational objectives are achieved. This strategy must ensure that tangible assets under the custody and control of the relevant directors are properly maintained and repaired so that their possible maximum useful lives are realised.

Directorates Responsibilities

Each Directorate is responsible for ensuring:

- i. That all tangible assets under their control are maintained in a good working condition. The directorates must take adequate care that the working environments for the various assets are appropriate and suitable for such types of tangible assets.
- ii. That their assets are not misused or used for personal use or benefit.
- iii. That repair and maintenance costs incurred is reviewed and properly controlled.
- iv. The development of a maintenance program according to their

operating budget resources. The program must provide a schedule of the repairs and maintenance to be done. The program must also consist of planned and unplanned repairs and maintenance to be performed.

- v. The following matrix will assist in distinguishing capital expenditure from maintenance expenditure:

| CAPITAL EXPENDITURE | MAINTENANCE |
|---|--|
| <ul style="list-style-type: none"> Acquiring a new asset | <ul style="list-style-type: none"> Restoring an asset so that it can continue to be used for its intended purpose |
| <ul style="list-style-type: none"> Replacing an existing asset | <ul style="list-style-type: none"> Maintaining an asset so that it can be used for the period for which it was initially intended |
| <ul style="list-style-type: none"> Enhancing an existing asset so that its use is expanded | |
| <ul style="list-style-type: none"> Further developing an existing asset so that its original useful life is extended | |

When assets are capitalized a distinction should be made on whether the new asset is purchased to replace an existing asset or whether it is a total new asset that is purchased.

Assets held under leases

- **Finance leases** are leases, which in effect transfer all risks and rewards associated with the ownership of an asset from the lessor to the lessee. Assets held under finance leases are capitalized by the municipality and reflected as such in the fixed asset register. It will be capitalized at its leased value at commencement of the lease, which will be the price stated in the lease agreement. The asset is then depreciated over its expected useful life.
- **Operating leases** are those leases which do not fall within the scope of the above definition. Operating lease rentals are expensed as they become due. Assets held under operating leases are not accounted for in the asset registers of the municipality.

INVESTMENT PROPERTY

- An item shall be recognised as investment property if it meets the definition. Investment property is recorded at cost.
- Disclosable value measured at recognition:
 - Initially at acquisition cost plus transaction cost, or nominal value
 - Where acquired at no cost or nominal value, fair value at acquisition is deemed to be cost for disclosure
 - If held under a lease and classified as Investment Property, is the lower of fair value and the present value of the minimum lease payments
- Cost value is determined according to the requirements of the GRAP standard on Investment Property.
- Assets classified as Investment Property shall be re-defined once such assets usage changes

Cost Model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses

Depreciation is provided to write down the cost, less estimated residual value by equal instalments over the useful life of the property, which is as follows:

| Item | Useful life |
|----------------------|--------------------|
| Property – buildings | 30-99 years |
| Property – land | indefinite |

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable

Depreciation

- Depreciation will be done in accordance with the GRAP frame work
- The depreciable amount of an item of property, plant or equipment should be allocated on a systematic basis over its useful life.
- Stellenbosch Municipality's depreciation method will be the straight-line method for all assets of the Council unless otherwise agreed to in writing by the Director: Financial Services.
- Depreciation shall be calculated from the day the fixed asset is available for

use (commissioning date) (GRAP 17.65).

- If the cost of land includes the cost of site dismantlement, removal and restoration, the portion of the land asset is depreciated over the period of benefits or service potential obtained by incurring those costs. In some cases, the land itself may have a limited useful life, in which case it is depreciated in a manner that reflects the benefits or service potential to be derived from it (GRAP 17.69).

Review of residual value and useful life

- The municipality should assess whether there is any indication that the expected useful life of the asset has changed based on whether the condition of the asset has improved or declined. This is based on any condition assessments undertaken by the entity on its assets during the reporting period. Paragraph .60(f) of GRAP 17 should not be read as requiring a condition assessment at each reporting date. Condition assessments will be undertaken by entities on selected or identified assets as part of its on-going asset management. Instead, any information available from any condition assessments undertaken during the reporting period should be used to assess whether the useful life of particular assets should be changed. The residual value and useful life of an asset should be reviewed at least at each reporting date (GRAP 17.61).

Formatted: Font: (Default) Arial, 12 pt

Formatted: Font: (Default) Arial, 12 pt

- All movable assets with a useful life of two years or less will be reviewed on an annual basis to ensure adherence to GRAP 1757 (c) if no other indicators are present or detected during the year under review.

Formatted: Highlight

Formatted: Font: (Default) Arial, 12 pt, Highlight

- If the review indicates that a change has taken place and expectations differ from previous estimates, the changes should be accounted for as a change in the accounting estimate in accordance with the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.
- The remaining useful life of capital assets should be reviewed annually and, if expectations are significantly different from previous estimates, the depreciation charge for the current and future periods should be adjusted.
- This review should be done by the asset manager in conjunction with the impairment review.
- The review of useful life is a check to see if there is any evidence to suggest that expected life should be changed.
- The Table of Useful Lives is provided in the MFMA Local Government Capital Asset Management Guideline (Refer to Annexure A). These should be used as a guide to the minimum useful lives only because actual asset lives experienced greatly exceed those recommend lives.
- The residual value of an asset may increase to an amount equal to or greater than the asset's carrying amount. If it does, the asset's depreciation charge is zero unless and until its residual value subsequently decreases to an amount

below the asset's carrying amount (GRAP 17.6⁵⁴).

Impairment of assets

The accounting treatment relating to impairment losses is outlined as follows in GRAP 17:

- The carrying amount (Book value) of an item or a group of identical items of property, plant and equipment should be reviewed periodically in order to assess whether or not the recoverable amount has declined below the carrying amount.
- Recoverable amount is the higher of a cash – generating asset's net selling price and its value in use.
- When such a decline has occurred, the carrying amount should be reduced to the recoverable amount. The amount of the reduction should be recognized as an expense immediately.
- The recoverable amount of individual assets, or groups of identical assets, is determined separately and the carrying amount reduced to recoverable amount on an individual asset, or group of identical assets, basis.
- However, there may be circumstances when it may not be possible to assess the recoverable amount of an asset on this basis, for example when all of the plant and equipment in a sewerage purification work is used for the same purpose. In such circumstances, the carrying amount of each of the related assets is reduced in proportion to the overall decline in recoverable amount of the smallest grouping of assets for which it is possible to make an assessment of recoverable amount.

The following may be indicators that an item of PPE has become impaired:

- The asset has been damaged.
- The asset has become technologically obsolete.
- The asset remains idle for a considerable period either prior to it being put into use or during its useful life.
- Land is purchased at market value and is to be utilized for subsidized housing developments, where the subsidy is less than the purchase price.

Procedure to identify, budget and account for impairment losses:

- The following needs to be done to ensure that impairment losses that are identified by the above indicators are budgeted for during the operating budget cycle and are accounted for in the next financial year. The following steps will

have to be performed during the operating budget cycle:

Financial Services Directorate - Asset Management Section shall issue a memo to all directorates requesting them to identify assets that:

- a) Are in a state of damage at the start of the operating budget cycle;
- b) Are technologically obsolete at the start of the operating budget cycle; This can be facilitated if directorates require that Financial Services Directorate - Asset Management - section to supply them with a Fixed Asset Register printout pertaining to major assets showing the remaining useful lives of assets. The directorates can then assess and indicate cases where the assessed remaining useful life is shorter than the remaining useful life on the printout.
- c) Have remained idle for a considerable period either prior to them being put into uses at the start of the operating budget cycle or during their useful life;
- d) Are subject to impairment losses because the subsidies to be received in exchange for assets are less than the carrying amounts. An example of this is Land that is purchased at market value and is to be utilized for subsidized housing developments;
 - The recoverable amounts of these assets need to be calculated by calculating the Net selling Price per asset as defined above.
 - The impairment loss per asset needs to be calculated as the difference between the Net selling price and the book value of the asset.
 - The impairment loss needs to be budgeted for.
 - The following steps will have to be performed regularly during the year to account for impairment losses:

Directorates will identify and inform Financial Services Directorate - Asset Control section of assets that:

- a) Are in a state of damage at year-end,
- b) Are technologically obsolete at year-end. This can be facilitated if directorates require Finance Directorate - Asset Control section to supply them with a Fixed Asset Register printout pertaining to major assets showing the remaining useful lives of assets. The directorates can then assess and indicate cases where the assessed remaining useful life is shorter than the remaining useful life on the printout.
- c) Have remained idle for a considerable period either prior to them being put into uses at year-end or during their useful life
- d) Are subject to impairment losses because the subsidies to be received in exchange for assets are less than the carrying amounts. An example of this is

Land that is purchased at market value and is to be utilized for subsidized housing developments. The recoverable amounts of these assets need to be calculated by calculating the Net selling Price per asset as defined above.

The impairment loss per asset needs to be calculated as the difference between the Net selling price and the book value of the asset.

The impairment loss needs to be accounted for by identifying the relevant funding source.

Disclosure requirements relating to impairment losses:

All material impairment losses need to be disclosed in the notes to the income statement as a separately disclosed item. They are normally disclosed as part of the note on the amounts that are included in the calculation of the Net Surplus or Deficit for the year.

DISPOSAL AND RETIREMENTS

Governance

Section 14 and 90 of the MFMA governs the disposal of assets. This section provides inter alia:

- The council may not dispose of assets that are utilized to provide minimum level of basic municipal services.
- Assets other than those utilized to provide minimum level of basic service may be disposed of subject to Council approval.
- An item of property, plant or equipment should be eliminated from the Statement of Financial Position, on disposal or when the asset is permanently withdraw from use and no future economic benefits or potential service delivery is expected from its disposal, in accordance with GRAP 100.
- Gains or losses arising from the retirement or disposal of an item of property, plant or equipment should be determined as the difference between the actual or estimated net disposal proceeds and the carrying amount of the asset, and should be recognized as revenue or expense in the Statement of Financial Performance.

Procedures

- a) Any items declared obsolete or damaged will be handed in to the Finance department - Asset Control section for safekeeping.
- b) No items will be received by the Financial Services Directorate, Asset Management section without a completed AT form and attached condemnation forms, counter signed by Finance Directorate - Asset Management section, describing the status of the item and the reason for writing-off the item.
- c) Directorates must ensure that assets are disposed of in terms of the SCM policy.
- d) It is the responsibility of each directorate to ensure that all such assets to be disposed of are delivered to and received at the Finance Directorate - Asset Management section.
- e) Approval for the disposal of assets is considered by the Municipal Manager only after a recommendation has been obtained from the following persons:
 - i. Vehicles and Plant - The Fleet Manager and applicable Directorate;
 - ii. Computers -Information Technology Manager;
 - iii. Other Items - Directors (Asset Managers) within the different directorates.
- f) After the approval of the Municipal Manager has been obtained, any vehicle written off must be deregistered immediately.
- g) All asset items lost, stolen or damaged must be reported to the Financial Services Directorate – Insurance section as well as Finance Directorate - Asset Management section by completing the AT form.
- h) All asset items lost or stolen also need to be reported to the SAPS by the relevant department.

An item of property, plant and equipment should be eliminated from the balance sheet on disposal or when the asset is permanently withdrawn from use and no future economic benefits or potential service delivery is expected from when it is disposed of.

Gains and losses arising from the retirement or disposal of an item of property, plant and equipment should be determined as the difference between the actual or estimated net disposal proceeds and the carrying amount of the asset, and should be recognized as revenue or expense in the Statement of Financial Performance.

The accounting treatment relating to the profit or loss on the sale of property, plant & equipment is outlined in GRAP 17. The following is a summary of the relevant aspects:

Profits and losses, which are disclosed in total in the financial statements, are calculated by use of the following formula: -

| | |
|-----------------------------|--|
| <i>Proceeds</i> | Sales value, trade-in value or proceeds received from insurance if the asset was damaged or stolen. |
| <i>Less: Carrying value</i> | Cost, or if valued, revaluation amount, less accumulated depreciation up to the date of sale or when asset can no longer be used for its intended purpose. |
| <i>Equals PROFIT or</i> | If proceeds greater than carrying value, or |
| <i>Equals LOSS</i> | If proceeds less than carrying value. |

12.INTERNAL CONTROL OVER ASSETS

- Establishment and Management of the Financial Asset Register:

The Chief Financial Officer will establish and maintain the Asset Register containing key financial data on each item of Property, Plant or Equipment that satisfies the criterion for recognition as per the accounting standards.

Each Asset Manager is responsible to ensure that sufficient controls exist to substantiate the quantity, value, location and condition of all assets in the asset register.

Each Asset Manager must appoint an Asset Champion in each Directorate/Section which will be responsible to ensure that the asset listings are verified and kept up to date in collaboration with the Directorate: Finance Services.

- Contents of the Fixed Asset Register

The fixed asset register shall be maintained in the format determined by the

Director: Financial Services, which format shall comply with the requirements of generally recognized accounting practice (GRAP) and any other accounting requirements which may be prescribe Directors under whose control any fixed asset falls shall promptly provide Director: Financial Services in writing with any information required to compile the fixed asset change which may occur in respect of such information. Contents of the Financial Asset Register:

The details included in the Asset Register will include:

- The depreciation methods used
- The useful live
- Depreciation charge
- The carrying amount
- The accumulated depreciation
- Additions
- Disposals and transfers
- Date of acquisition
- Date of disposal (if relevant)
- Asset description
- Historical cost of the asset
- Asset classification
- Asset ID
- Residual value

Internal Controls over the Financial Asset Registers

- Controls around their asset register should be sufficient to provide an accurate, reliable and up to date account of assets under their control to the standards specified by the Chief Financial Officer and required by the Auditor-General.
- Controls around the asset registers should be sufficient to provide Directors with an accurate, reliable and up to date account of assets under their control to the standards specified by the Director: Finance and required by relevant legislation.

These controls will include the physical management and recording of al acquisition, assignments, transfers, losses and disposals of assigned assets

as well as regular asset counts and systems audits to confirm the adequacy of controls.

Identification of fixed assets:

The Municipal Manager shall ensure that the municipality maintains a fixed asset identification system which shall be operated in conjunction with its computerized fixed asset register.

Transfers, Reallocation or Reassignment of Property, Plant or Equipment

- a) An Asset Manager retains management accountability and control for a particular asset until another Asset Manager in writing does accept responsibility for that asset, and the Chief Financial Officer endorses the transfer.
- b) The Asset Manager must advise the Chief Financial Officer on the prescribed form whenever an asset is permanently or temporarily reallocated or reassigned from one location to another.
- c) The form must be completed and signed by both the sender and receiver
- d) The Director: Financial Services will appropriately amend the Asset Register with all approved transfers.
- e) Assets must solely and exclusively be used for the purpose of the
- f) Council's business.

Verification of fixed assets

- a) Financial Services Directorate: Asset Management Section shall at least once during every financial year undertake a comprehensive verification of all fixed assets controlled or used by the directorate concerned.
- b) Finance Directorate: Asset Management Section shall promptly and fully report in writing to the Director: Financial Services in the format determined by the Director: Financial Services, all relevant results of such fixed asset verification, provided that each such asset verification shall be undertaken and completed as closely as possible to the end of each financial year, and that the resultant report shall be submitted to the Director: Financial Services not later than 30 June of the year in question.

Asset listings

- a) The Chief Financial Officer must submit within six months after each financial year, asset listings of capitalised assets to all Asset Managers.
- b) At all times these asset listings should indicate the assets in particular location and should be easily accessible.
- c) When employees get appointed or resign from any specific post the relevant

asset listings must be verified and accordingly endorsed by the Asset Champion for the specific workplace.

- d) All changes on asset listing sheets must be reported in writing to the Director: Financial Services within 7 days of when change took place.

13. FINANCIAL DISCLOSURE

Assets must be disclosed in respect of each class of property, plant and equipment, in accordance with Generally Recognized Accounting Practice.

14. CLASSIFICATION OF ASSETS

Any asset recognized as an asset under this policy will be classified according to categories as per the Fixed Asset Register. All fixed assets should be classified under the following headings in the Asset Register:

Property, plant and equipment:

Other Assets

Other Assets shall be recorded under the following main categories;

- Bins and Containers;
- Emergency Equipment;
- Furniture and Fittings;
- Motor Vehicles;
- Office Equipment;
- Plant and Equipment;
- Specialised Vehicles;
- Watercraft; and
- Other Assets.

Heritage Assets

A Heritage Asset is an asset that has historical, cultural or national importance and needs to be preserved. The following is a list of some typical heritage assets encountered in the municipal environment:

- Archaeological sites;
- Conservation areas;

- Historical buildings or other historical structures (such as war memorials);
- Historical sites (for example, historical battle site or site of a historical settlement);
- Museum exhibits;
- Public statues; and
- Works of art (which will include paintings and sculptures).

Intangibles Assets

- Computer Software
- Databases

Community Assets

Community Assets shall be recorded under the following main categories;

- Recreational Facilities;
- Sporting Facilities; and
- Other Facilities.

Land and Buildings

Land and buildings shall be treated using the cost model.

Land shall be accounted for at cost, and shall not be depreciated. Land on which infrastructure and community assets are located shall be identified as land and buildings and not disclosed together with the infrastructure and community assets. Land not registered in the name of the municipality but controlled by the municipality by virtue of owner-occupied buildings thereon, shall be recognised at cost.

Buildings shall be accounted at cost, less any accumulated depreciation and any accumulated impairment losses.

Investment property

The classification of an investment property is based on management's judgement; the following criteria will be applied to distinguish investment properties from owner-occupied property or property held for resale:

| Investment property | PPE | Non-current assets held for sale |
|---|--|--|
| the asset generates its own cash flows in the form of rentals (on a commercial basis) | rental income earned is below market value, and the asset is held for service delivery rather than to generate a commercial return | land and other properties held for sale within the next 12 months, if the criteria in GRAP 100 are met |
| the asset is held for capital appreciation | the asset is held to achieve service delivery objectives rather than to earn rental or for capital appreciation | |
| investment property that is being redeveloped for continued use as an investment property | property that is being constructed or developed for future use as investment property (until the asset meets the definition of investment property it is accounted for as PPE) | |
| Land held for an undetermined use | owner occupied-property such as office buildings and residential buildings occupied by staff members (assets used by employees, irrespective of whether or not the employees pay rent at market rates, are owner-occupied) | |

The judgement of the Management of Stellenbosch Municipality is that the following classes of Municipal Property will be classified as Investment Property:

- Land held for long-term capital appreciation rather than for short-term sale in

the ordinary course of operations which council intends to sell at a beneficial time in the future.

- Land held for a currently undetermined future use.
- A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases on a commercial basis.
- A building that is currently vacant but is held to be leased out under one or more operating leases on a commercial basis to external parties.

ANNUAL REVIEW ON THE POLICY

This policy will be reviewed and updated annually or whenever legislative or accounting standards amendments significantly change the requirements pertaining to asset management in general and the administration of property, plant and equipment at a sooner event.

GENERAL

This policy does not overrule the requirement to comply with other policies like supply chain management, tendering or budget policies. The Chief Financial Officer will provide guidance or recommend an amendment to this policy to comply with the essence and understanding of the policies, regulations or legislation being conflicted.

1. DEFINITIONS

In this Policy, words or expressions shall bear the meaning assigned to them and, unless context otherwise indicates: –

“additional rate” means an additional rate contemplated in sections 19(1)(d) and 22(1)(b) of the Property Rates Act and in section 12(2) of the By-Law;

“applicant” means any owner who makes an application for the determination of a special rating area in accordance with provisions of Chapter 1 of the By-Law, or if a management body is established in terms of section 10 of the By-Law, any reference to **“the Applicant”** means the management body;

“By-Law” means the Stellenbosch Municipality’s Special Rating Area (SRA) By-Law;

“CFO” means the Chief Financial Officer of Stellenbosch Municipality, or his or her nominee;

“Council” means Council of Stellenbosch Municipality;

“implementation plan” means an Implementation Plan as contemplated in section 6 of the By-Law;

“majority” means the majority of property owners as contemplated in section 22 of the Property Rates Act;

“management body” means the management body of a special rating area to be establishment in accordance with the provision of section 10 of the By-Law;

“motivation report” means a motivation report as contemplated in section 6 of the By-Law;

“the Municipality” means Stellenbosch Municipality (WC024),

“owner” has the meaning assigned to it in section 1 of the Property Rates Act;

“Policy” means the policy for the determination of special rating areas and will be referred to as this Policy;

“Property Rates Act” means the Local Government: Municipal Property Rates Act, 2004 (Act No.6 of 2004);

“rateable property” has the meaning assigned to it in section 1 of the Property Rates Act;

“special rating area” means a special rating area approved by the Council in accordance with the provisions of section 22 of the Property Rates Act and section 8 of the By-Law.

2. INTRODUCTION

- 2.1 This policy for the establishing of special rating areas must be read together with the Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004) and the Municipality’s Special Rating Area (SRA) By-law, as in force from time to time.
- 2.2 This policy is strictly applicable to Special Rating Areas that have been established in terms of sub-sections 22(1) to 22(4) of the Property Rates Act. Therefore, this policy does not deal or apply to internal municipal service districts as envisaged in section 85 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) and in sub-section 22(5) of the Property Rates Act.
- 2.3 All words and phrases defined in the Property Rates Act and the By-Law have the same meaning in this Policy.
- 2.4 In the event of any conflict between the provisions of the By-Law and the provisions of this Policy, the By-Law prevails.
- 2.5 This Policy needs to be read together with the Municipality’s Rates Policy.

3. AIM OF THE POLICY

This Policy aims to –

- 3.1 Set out Council’s position on special rating areas and the factors that will influence Council’s decision whether or not to institute a particular Special Rating Area.
- 3.2 Provide guidance to members of the local community and to decision-makers within the Municipality in relation to the establishment of special rating areas; and
- 3.3 Strike an appropriate balance between facilitating self-funded community initiatives that aim to improve and/or upgrade neighbourhoods by –
 - (a) making use of Council resources and structures; or
 - (b) making use of a Non-Profit (previously known as a Section 21) company structure (refer paragraph 8.12.5 of this Policy); and to
 - (c) ensure commitment to good, fair and transparent governance by the managing body, by implementing a transparent process when appointing service providers to

improve and/or upgrade the special rating area in the public areas and ensuring that these improved and/or upgraded services are not provided on private properties.

4. POLICY STATEMENT

- 4.1 The special rating area model is aimed at preventing the degeneration of towns and the consequential urban decay, and facilitating their upliftment, economic growth and sustainable development.
- 4.2 The purposes of a special rating area are to –
- (a) enhance and supplement the municipal services provided by Stellenbosch Municipality;
 - (b) facilitate investment in the special rating area;
 - (c) facilitate a cooperative approach between Stellenbosch Municipality and the private sector in the provision of municipal services;
 - (d) halt the degeneration and facilitate the upliftment of distressed business and mixed-use areas; and
 - (e) promote economic growth and sustainable development and in this way, assist the Council in the fulfilment of its objects and developmental duties as set out in its Integrated Development Plan (“IDP”).
- 4.3 Stellenbosch Municipality regards special rating areas as a potential tool for allowing it to fulfil its constitutional and statutory obligations to promote;
- (a) social and economic development; and
 - (b) a safe and healthy environment in a way which balances the guiding principles underlying its Rates Policy.
- 4.4 Special rating areas allow property owners within an explicitly defined geographical area to improve and upgrade their area by means of a property rate in addition to the standard property rate.
- 4.5 Special Rating Areas do not give property owners or the management structures of the Special Ratings Area the right to infringe on any of the constitutional rights as enshrined in the Bill of Rights, Chapter Two of the Constitution of South Africa, 1996 of any juristic or natural person in any way. Specifically, the right to freedom of movement and residence of any juristic or natural person referred to in Section 21 of the Constitution must be guaranteed by the Special Rating Area as a pre-requisite for approval by the municipality.

5. FACTORS CONSIDERED WHEN DETERMINING A SPECIAL RATING AREA

The Council will consider instituting a special rating area where the requirements of Section 22 of the Property Rates Act are complied with, including that –

- 5.1 the purpose of the special rating area is to allow an additional rate to be levied on property in the defined area to raise funds for improving or upgrading the area;
- 5.2 the special rating area will not be used to reinforce existing inequities in the development of the Stellenbosch Municipality's (WCO24) area of jurisdiction;
- 5.3 the determination of the special rating area is consistent with Stellenbosch Municipality's IDP;
- 5.4 residential special rating area refers to an area in which more than 40% (forty percent) of the rates based municipal valuation consists of Residential Property as defined in the Rates policy.
- 5.5 any residential special rating area must comply fully with the provision of the By-Law, save that, with reference to the majority support the applicant must provide written proof to the Council that owners of rateable property within the boundary of the special rating area who own not fewer than 60% (sixty percent) in number of such properties, approve the formation of the special rating area.
- 5.6 the majority of members of the local community who will be liable for paying any additional rate in the special rating area, other than residential special rating areas, have consented to its establishment;
- 5.7 the procedural requirements of Section 22 of the Property Rates Act as well as the By-Law and this Policy are complied with, which include the community consultation requirement as determined by the Municipality's Chief Financial Officer (CFO);
- 5.8 the proposed improvement or upgrade has been clearly and fully defined;
- 5.9 the proposed improvement or upgrade can be clearly and logically linked to a geographical area, the boundaries of which must be clearly determined;
- 5.10 there is evidence that it will be financially viable to use a special rating area to raise funds for the proposed improvement or upgrade;
- 5.11 Stellenbosch Municipality is satisfied with the institutional arrangements proposed in respect of the special rating area; and
- 5.12 Ultimately, the decision whether or not to determine a special rating area rests with the Council in its sole discretion.

6. APPLICABILITY OF STELLENBOSCH MUNICIPALITY'S RATES POLICY AND OTHER POLICIES

- 6.1 When Stellenbosch Municipality grants any rebate to Senior Citizens, Disabled Persons and Non-Profit Organisations in terms of the Rates Policy, or registered indigents in terms of the Indigent Policy, the relevant property owner will be granted a full (100%) rebate in relation to the additional special ratings area rate.

7. PROCESS

This Policy sets out –

- (a) the institutional arrangements for special rating areas (paragraph 8 of this Policy)
- (b) the establishment requirements which must be followed (paragraph 9 of this Policy);
- (c) the information which needs to be submitted to Stellenbosch Municipality in order to motivate a request for determination of a special rating area (paragraph 10 of this Policy);
- (d) the annual requirements which must be followed (paragraph 11 of this Policy);
- (e) the amendments and/or extension of term for a special rating area (paragraph 12 of this Policy);
- (f) the dissolution requirements which must be followed (paragraph 13 of this Policy)
- (g) financial arrangements (refer paragraph 14 of this Policy).

8. INSTITUTIONAL ARRANGEMENTS

Section 22 of the Property Rates Act is not prescriptive as to the structural arrangements which need to be put in place to administer a special rating area. The structural arrangement that will be considered by the municipality is the following:

8.1 Administration by a Non-Profit Company

- 8.1.1. Stellenbosch Municipality will require the ratepayers within the special rating area to establish and participate in an appropriate structure to carry out planning, contracting, financial control and administrative functions within the special rating area.
- 8.1.2. This does not entail ratepayers setting the additional rate, which under law can only be done by Stellenbosch Municipality (paragraph 14 of this Policy).
- 8.1.3. This places funds collected by government in the hands of the private sector, thus the requirements set out in this Policy must be met.

8.1.4. The functions of the Non-Profit Company would include:

- (a) Determining the funding required each year (refer paragraph 14.2 of this Policy);
- (b) Appointing contractors or service providers to effect the improvement/s or upgrade/s;
- (c) Receiving the additional rate collected by Stellenbosch Municipality and expending the funds in accordance with the approved Business Plan.

8.1.5. Structural requirements of the Non-Profit company:

- (a) Before Stellenbosch Municipality will consider allowing ratepayers in a special rating area to carry out administrative and other functions in relation to the area, the Steering Committee must establish a Non-Profit company (company not for gain) as per the Companies Act, Act 71 of 2008 (as amended or replaced) ("the Companies Act") for that purpose. The provisions of the Companies Act must be complied with, particularly those relating to non-profit companies (which effectively replaced Section 21 companies as per the old Companies Act, Act 61 of 1973), subject to the transitional provisions contained therein;
- (b) The founding documentation ("the Memorandum of Incorporation") in relation to the structure established by ratepayers (this is equivalent to the Memorandum and Articles of Association, as per the old Companies Act, Act 61 of 1973), must be as per the prescribed format determined by the CFO;
- (c) The Non-Profit company must be managed under the Companies Act, and also comply with any other legislation as a result of the financial connections to Council; and
- (d) The Non-Profit company must give a written notice by the most effective manner to all the property owners within the special rating area of the intention to hold an Annual General Meeting (AGM) on the date stated in the notice;
- (e) A Special General Meeting ("SGM") must be called within 6 months of the establishment of the Non-Profit Company. The purpose of the SGM is to:
 - (i) Accept new members;
 - (ii) Appoint directors;
 - (iii) Amend the Memorandum of Incorporation if required; and
 - (iv) Approve the following year's Budget and Implementation Plan (refer paragraph 14.2 of this Policy).

9. APPLICATION FOR THE ESTABLISHMENT OF A SPECIAL RATING AREA

- 9.1 The process for establishing special rating areas as set out in Chapter 1 of the By-Law must be followed.
- 9.2 The special rating area application must be submitted by end of September of the financial year preceding the establishment of the special rating area.
- 9.3 Further to section 7.2 of the By-Law the applicant must hold another public meeting within 30 days after submitting the application to confirm that it was lodged and to discuss details with the community.

10. MOTIVATING A SPECIAL RATING AREA

The Motivation Documentation must comprise of the following:

10.1 Business Plan –

The Business Plan must clearly define and indicate all the required improvements or upgrades and must contain -

10.1.1. Introduction;

- (a) an executive summary of the improvement or upgrade proposed for the special rating area as set out in the Implementation Plan;
- (b) An explanation of how the proposed improvement or upgrade is linked to the geographical area of the proposed special rating area;
- (c) An explanation of why the proposed special rating area will not reinforce existing inequities in the development of Stellenbosch Municipality;
- (d) An explanation of how the special rating area, if instituted, will be consistent with Stellenbosch Municipality's IDP as per the Service Departments' Business Plans;
- (e) An explanation of the institutional arrangements proposed in relation to the special rating area.

10.1.2. Vision;

10.1.3. Mission;

10.1.4. Goal;

10.1.5. A diagram clearly indication the boundaries of the proposed special rating area;

10.1.6. Management;

- (a) Administrative policies of the Non-Profit company;
- (b) Proposed management structure:
 - Composition of the management body including allocation of portfolios and;
 - Operational Arrangements

10.1.7. Services;

Service providers must be appointed as per paragraph 3.3(c) and 10.1.1(d) of this Policy.

10.1.8. Financial Impact;

- (a) Provide details regarding the calculation of the cent-in-the-rand and as acted on the municipal valuation value of each property;
- (b) Provide details of criteria to qualify for exemption of additional rate;

10.1.9. A list of all rateable properties within the proposed special rating area, contact details of owners and the value of each property as set out in the Council's municipal valuation role. Differentiation between categories of properties, as provided for in Section 8 of the Property Rates Act and used in the valuation role, must be considered;

10.1.10. Proof of the consent of the majority of the members of the local community as per paragraph 5.5 of this Policy, in the proposed special rating area who will be liable for paying the additional rate;

10.1.11. Proof of the notice of the public meeting or meetings contemplated in the By-Law;

10.1.12. Minutes of the public meeting or meetings; and

10.1.13. Compilation date.

10.2 Implementation Plan

The Implementation Plan is a schedule of goals to implement improvements or upgrades as per the motivation report and must at least address the following:

10.2.1 Milestones;

10.2.2 Tasks per milestone;

10.2.3 Start and finish date per task;

10.2.4 Assign responsibility per goal, milestone & task; and

10.2.5 Performance indicators per milestone.

10.3 Budget Plan

The Budget Plan for the proposed improvements or upgrades must at least address the following:

10.3.1 a budget line item should be set for each milestone or task and grouped in such a way that there is a clear indication how the Implementation Plan is financially structured;

10.3.2 an annual budget per line item commencing on 01 July of the first year and end on 30 June of the last year of the term; and

10.3.3 a budget split for the provision of improvements or upgrades between the different categories of properties.

11. ANNUAL REQUIREMENTS

11.1 Confirm property data base (Register of members in the special rating area);

11.2 Submit an audited financial Statement and Trail Balance as approved/accepted at a SGM called for that purpose and

11.3 Submit an annual budget and an Implementation Plan as approved at the Annual General Meeting (AGM) by 31 January (refer paragraph 14.2 of this Policy).

12. AMENDMENT AND/OR EXTENSION OF TERM

In the event that a special rating area seeks to extend the term over which it will operate or amend the goals as per its Implementation Plan, then the procedures set out in Chapter 3 of the By-Law must be followed and submitted by the end of October.

13. DISSOLUTION

The special rating area may be cancelled by resolution of the Council, subject to the provision of section 16 of the By-Law.

14. FINANCIAL CONTROL

14.1 As stated in the By-Law, the amount of any additional rate levied in a special rating area is determined by the Council. The additional rate as imposed by the Council, is debt owing to Stellenbosch Municipality and is payable and collected in the same manner as other property rates imposed by the Council.

- 14.2 The management structure must recommend the annual budget amount of the additional rate to the Stellenbosch Municipality by 31 January, with appropriate motivation including an Implementation Plan and a Budget Plan for the next financial year, and the Council will consider the recommendation during its budgeting process.
- 14.3 Before Stellenbosch Municipality will pay over any additional rate collected to the management structure, the management structure and Stellenbosch Municipality must have concluded a written finance agreement regulating, amongst other things;
- (a) the mechanisms and manner of payment;
 - (b) how the additional rate is to be held by the management structure;
 - (c) any parameters relating to expenditure; and
 - (d) any obligations on the management structure to take out and maintain appropriate insurance.
- 14.4 The financial year of the Municipality shall be deterministic and shall be applied to the Budget plan and all financial transactions.

15. COMMENCEMENT AND IMPLEMENTATION

- 15.1 Implementation of this Policy will commence on 01 July 2020.
- 15.2 Where Stellenbosch Municipality is legally empowered to do so, requirements set out in this Policy may be imposed as conditions attached to the determination of a special rating area.
- 15.3 This Policy and its implementation will be reviewed annually.

16. COST

Stellenbosch Municipality shall not be liable for any costs incurred by ratepayers within the relevant proposed special rating area in respect of the implementation of the steps set out in this Policy and in the By-Law.

17. SHORT TITLE

This policy is the Special Rating Area Policy of the Stellenbosch Municipality.

STELLENBOSCH MUNICIPALITY

| 7. SHORT TITLE | 12 |

PREAMBLE

In accordance with Section 74 of the Local Government Municipal Systems Act, Act 32 of 2000, Stellenbosch Municipal Council must adopt and implement a tariff policy on the levying of tariffs for municipal services which complies with the provisions of the Municipal Systems Act and with any other applicable legislation.

Tariffs represent the charges levied by Council on consumers for the utilization of services provided by the Municipality and rates on properties. Tariffs will be calculated in various ways, dependent upon the nature of the service being provided.

In furtherance of reusable energy, Council may consider tariffs pertinent to the purchase of surplus energy from consumers.

1. OBJECTIVE

The objective of this Tariff Policy is to ensure the following:

- (a) Tariffs must conform to acceptable policy principles;
- (b) Municipal services must be sustainable;
- (c) Tariffs must comply with the applicable legislation; and
- (d) Tariffs should take indigent consumers into consideration.

2. LEGAL FRAMEWORK

The following legislation is applicable for the determination of tariffs for municipal services delivered or for the purchase of surplus energy:

The Constitution of the Republic of South Africa, 1996 (Act 108 of 1996)

Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003)

Local Government: Municipal Systems Act, 2000 (Act 32 of 2000)

Water Services Act, 1997 (Act 108 of 1997)

Electricity Regulation Act, 2006 (Act 4 of 2006)

Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004)

3. TARIFF PRINCIPLES

The following principles will apply in the Stellenbosch Municipal Area of jurisdiction (WC024):

- (a) Users of municipal services are treated equitably in the application of tariffs;
- (b) The amount individual users pay for services are generally in proportion to their use of that service;
- (c) Indigent households have access to basic services through:
 - (i) Special or lifeline tariffs for low levels of use or consumption of services or for basic levels of service; or

- (ii) Any other direct or indirect method of subsidisation of tariffs for poor households.
- (d) Tariffs reflect the costs reasonably associated with rendering the service, including capital, operating, maintenance, administration, replacement costs and interest charges;
- (e) Tariffs are set at levels that facilitate the financial sustainability of the service, taking into account subsidisation from sources other than the service concerned. A service is financially sustainable when it is provided in a manner that would ensure its financing from internal and external sources is sufficient to cover the costs of the initial capital expenditure required, operating the service, maintaining, repairing, and replacing the physical assets used in its provision;
- (f) Provision is made in appropriate circumstances for a surcharge or a rebate on the tariff for a service;
- (g) Provision is made for the promotion of local economic development through special tariffs for categories of commercial and industrial users;
- (h) The economical, efficient, and effective use of resources, the recycling of waste and other appropriate environmental objectives are encouraged;
- (i) The extent of subsidisation of tariffs for poor households and other categories of users are fully disclosed; and
- (j) The safeguarding of the integrity of the electrical distribution network and the continued economic viability for the purchasing of surplus energy from consumers.

It is further stated that tariffs, rates, and the employment of resources, in general, take into account the Council's Integrated Development Plan (IDP) principles and goals.

4. CLASSIFICATION OF SERVICES

Traditionally, municipal services have been classified into five groups based on how they are financed. The five groups are as follows:

- | | | |
|-----|---------------------|---|
| (a) | Trading services | Water and Electricity Services |
| | | These services must generate a surplus which will be used to subsidize community services other than economical services. |
| (b) | Economical services | Refuse Removal and Sewerage Services |
| | | These services' charges must cover the cost of providing the services, i.e. it must at least break even. In the event of the latter not being possible within a period, the shortfall will be financed from the Municipal Property Rates revenue. |
| (c) | Rates Services | The revenue from Municipal Property Rates is utilized for Rates related services. |
| (d) | Housing Services | Housing Schemes |
| | | These services are ring-fenced in the Housing Development Fund and the net operating balance is set off as a contribution to/from the Housing Development Fund. |
| (e) | Sundry Services | Various Services |
| | | All Services not defined in paragraphs (a) to (d) above. |

5. CALCULATION OF TARIFFS FOR MAJOR SERVICES

5.1 Water Tariffs

Although a fairly large proportion of the water needs is supplied from own sources, water is also purchased from external suppliers, such as the City of Cape Town. The increase in water tariffs are largely influenced by the changes in the Consumer Price Index (CPI),

the purchase price of water and the need for financing bulk water infrastructure expansion.

Water is bought at a one-part tariff expressed in Rand per kilolitre. For this reason, it is found that water tariff structures for end-users follow the same trend. In order to manage consumption, an inclining block rate tariff structure is applied in the Stellenbosch Municipal area of jurisdiction.

The first block rate for domestic consumers represents the Lifeline volume in kilolitres (kl) per month (considered to be the lowest sustainable water volume per household), which is supplied at a rate targeted to be below cost. Losses incurred in this tariff category may be recovered by contributions from the higher tariff categories, conforming to the principle of cross-subsidisation.

Tariff structures for water supply are applied in the form of a sliding scale or a flat tariff in the area of jurisdiction of Stellenbosch Municipality. This is reflected in the Tariff Schedule approved by Council.

The specific sliding scale(s) linked to each consumer group or the service charge types and the applicable tariffs, including any specific tariffs that would be applicable when Council adopts water restriction strategies, are reflected in the Water Tariff Schedule as approved by Council.

The following table illustrates the principals for tariff charges applied to various consumers or the specialised water service charge types for water consumption in the Stellenbosch Municipal Area:

(a) Domestic:

Includes residential erven, Sectional Title Units, as well as residential erven managed by legal entities, each being served by an individually metered water connection.

(b) Domestic Cluster:

Refers to a cluster (block of flats) served by a single water connection.

(c) MASO:

A MASO tariff for the affected parties will be applied.

(d) Bulk Users:

A sliding scale tariff will be applied on water consumption for irrigation of sports grounds of schools, irrigation of Council property by sports clubs, as well as irrigation of parks and other grounds or properties serviced by Council's Parks and Recreation Department.

(e) Business, Commercial and Industrial:

A single tariff for all business, commercial and industrial consumers will apply.

(f) All other consumers and Miscellaneous cases:

A single tariff for all other consumers and miscellaneous cases including schools, sportbodies, charity organizations and churches or any other user as determined by the relevant Director, will apply.

(g) Leakages:

Different tariffs may apply to Municipal, Domestic, Business, Commercial or Industrial consumers.

(h) Basic Charge:

A Basic (a fixed monthly) charge will be applied to each domestic consumer, a domestic cluster consumer and all other non-domestic consumers, irrespective whether a gated/non-gated development is supplied via a bulk meter.

The Basic charge will be applied to Indigent Households as per the Indigent Policy of the Municipality.

(i) Availability Fee:

An availability fee is charged on properties not connected to the water network, should it be available. This fee aims to recoup capital and maintenance costs of networks as well as certain fixed administrative costs in respect of such properties.

5.2 Electricity Tariffs

In addition to general cost factors, the following is taken into account when determining a tariff structure for electricity:

- (i) Electricity is primarily supplied by Eskom, and distributed by the Municipality.
- (ii) Minimum standards for distribution are determined nationally and must be adhered to in order to conform to both safety and continuity of supply norms.
- (iii) Due to the fact that a large part of the operating expenditure consists of bulk electricity purchases, tariff structures and levels are very sensitive to any change in the cost of supply by Eskom.
- (iv) Electricity is supplied under a distribution license, granted by the National Electricity Regulator of South Africa (NERSA) for a specific area of jurisdiction. All tariff structures and tariffs must be approved by NERSA prior to application thereof by a distributor on an annual basis.

Electricity is distributed by Stellenbosch Municipality in the areas of Stellenbosch, Johannesdal, Pniel and Franschhoek.

Eskom distributes electricity in the areas of Jamestown, Raithby, Kylemore, Klapmuts and the rural areas. In these areas, the distribution is managed, operated and controlled by the applicable service provider.

Export of surplus energy from an approved and certified consumer to the Municipality's distribution network shall be subject to special and specific agreements embracing in broad terms the operational and financial imperatives for a sustainable and economically viable alliance.

In order to manage consumption, inclining block rate tariff structures are applied in the Stellenbosch Municipal areas of distribution, or any part or area incorporated where due course was followed. In these areas, different tariff structures may be implemented for consumers using renewable energy for own use and/or where the export of surplus energy is approved under the proviso of specific conditions, limits on energy export and reimbursement of exported energy.

Additional fees may be levied on consumers for which maximum demand charges are in effect and who have exceeded specific limits.

The specific inclining block rate(s), any other charges linked to the tariff structure and the applicable tariffs are reflected in the Electricity Tariff Schedule as approved by Council.

The following table illustrates the principals for tariff charges applied to various consumers or the service charge types for electricity consumption or export in the Stellenbosch Municipal Area:

(a) Domestic Lifeline (PP):

Domestic Lifeline Tariffs will apply to prepaid Indigent consumers in order to promote the affordability of the service. A fixed monthly charge will not be applied to this category of consumers.

(b) Domestic Regular:

Domestic Regular tariffs will apply, in various service charge types, to other domestic consumers other than Indigent consumers on either conventional or prepaid metering systems. A fixed monthly charge may be applied to this category of consumers.

(c) Commercial Lifeline Low energy rate:

A Commercial Lifeline energy rate tariff will apply in respect of prepaid commercial low consumers. A fixed monthly charge will not be applied to this category of consumers.

(d) Commercial Low energy rate:

Commercial Low energy rate tariffs will apply, in various service charge types, in respect of conventional and prepaid commercial low consumers. A fixed monthly charge will be applied to this category of consumers.

(e) Commercial Regular energy rate:

Commercial Regular energy rate tariffs will apply, in various service charge types, in respect of conventional and prepaid commercial regular consumers. A fixed monthly charge is applied to this category of consumers.

(f) Agricultural energy rate:

Agricultural energy rate tariffs will apply, in various service charge types, in respect of agricultural use. A fixed monthly charge is applied to this category of consumers.

(g) Industrial energy rate:

Industrial energy rate tariffs as well as various types of energy demand tariffs will apply, in various service charge types, in respect of Industrial use. A fixed monthly charge is applied to this category of consumers.

(h) Municipal energy rate:

Municipal energy rate tariffs will apply, in various service charge types, for municipal consumption for street and traffic lights and for municipal buildings. A fixed monthly charge will not be applied to this category of consumers.

(i) Non-profit Organisations (NPO) energy rate:

Non-profit organisation's tariffs will apply, in various service charge types, to Non-profit Organisations in order to promote the affordability of the service for Non-profit Organisations. A monthly fixed charge will not be applied for this category of consumers.

(j) Sport Organisations energy rate:

Sport energy rate tariffs will apply and a Maximum Demand Charge may apply on sports fields as per approved contracts being classified as either Low Consumers or High Consumers. A fixed monthly charge will not be applied to this category of consumers.

(k) Time-of-Use energy rate:

Different fixed monthly tariffs as well as various types of energy demand tariffs will apply during the low demand and the high demand tariff periods (also referred to as the summer and winter periods respectively) in respect of low and medium voltage consumers. For the purpose of these tariffs the low demand period shall be defined as being the summer period and the high demand period as the winter period.

(l) Availability fee:

An availability fee is charged to properties not connected to the electricity network, where it is available. This fee aims to recoup capital and maintenance costs of networks as well as certain fixed administrative costs.

5.3 Refuse (Solid Waste) Removal Tariffs

The specific services rendered, any other charges linked to the service and the applicable tariffs are reflected in the Solid Waste Tariff Schedule as approved by Council.

(a) Residential properties:

Residential refuse (solid waste) will be removed once a week. Households are allowed 3 bags or one “Otto”-type container per week.

Refuse removal tariffs are based on a flat rate per household.

A specific tariff for Indigent consumers in respect of single residential properties will apply as per the approved Solid Waste Tariff Schedule.

(b) Business and industries:

Business and industry refuse (solid waste) are removed by means of “Otto”-type or bulk containers. Each container (size in volume) is accepted as a refuse unit at a specific tariff and number of removals per week.

(c) Availability Fee:

An availability fee is charged to all vacant properties, businesses, flats and developments not permanently using the municipal collection services.

5.4 Sewerage Tariffs

Tariff structures for sewerage are applied uniformly in the area of jurisdiction of Stellenbosch Municipality.

The tariff structures for specific services rendered, any other charges linked to the service and the applicable tariffs are reflected in the Sewerage Tariff Schedule as approved by Council.

(a) Residential properties:

A tariff structure utilizing plot sizes is applied to allocate the sewerage costs to a specific property.

(b) Business and industries:

A tariff structure utilizing plot sizes, as well as floor areas per usage is applied to allocate the sewerage costs to a specific property.

The removal of industrial effluent is charged at a cost as per the applicable tariffs.

(c) Septic Tanks:

The clearance of septic tanks is charged per 5 000 litre or part thereof.

(d) Availability Fee:

An availability fee based upon a tariff structure utilizing plot sizes will apply to all vacant properties.

6. CALCULATION OF OTHER TARIFFS

6.1 Sundry Tariffs

(a) Tariff Structure:

- (i) The tariff structure as reflected in the Sundry Tariffs Tariff Schedule as annually approved by Council will be used to determine regulatory community and subsidized services.

(b) Method of calculation:

- (i) Existing tariffs will be revised annually, for application during the next financial year, by adjusting the tariff that applied during the current financial year by a percentage (suitable rounding will be applied) to recover increased costs or to compensate for any cost reductions where appropriate.
- (ii) New tariffs will be calculated based on the estimated actual cost where appropriate or to recover some costs depending on the type of community service.

(c) Building Clause references:

- (i) Obligations pertaining to Building Clauses as per the development agreements or contracts will be dealt with according to the contract obligations.

6.2 Rates Tariffs

The Stellenbosch Municipality's Rates Policy describes the process for imposing property rates for the various categories of owners and properties.

The tariff structures for the applicable categories, any other charges linked to the service and the applicable provisions for relief measures are reflected in the Property Rates Tariff Schedule and Rates Policy as approved by Council.

7. SHORT TITLE

This policy is the Tariff Policy of the Stellenbosch Municipality.

1. PREAMBLE

- (1) Section 229(1) of the Constitution authorizes a municipality to impose:
 - (a) rates on property and surcharges on fees for services provided by or on behalf of the municipality; and
 - (b) if authorized by national legislation, other taxes, levies and duties.
- (2) In terms of section 75A of the Systems Act a municipality may:
 - (a) levy and recover fees, charges or tariffs in respect of any function or service of the municipality; and
 - (b) recover collection charges and interest on any outstanding amount.
- (3) In terms section 74(1) of the Systems Act, a municipal council must adopt and implement a tariff policy on the levying of fees for a municipal service provided by the municipality or by way of service delivery agreements and which complies with the provisions of the Systems Act, the Municipal Finance Management Act and any other applicable legislation.
- (4) In terms of section 75(1) of the Systems Act, a municipal council must adopt by-laws to give effect to the implementation and enforcement of its tariff policy.
- (5) In terms of section 75(2) of the Systems Act, by-laws adopted in terms of section 75(1) of the Systems Act may differentiate between different categories of users, debtors, service providers, services, service standards and geographical areas as long as such differentiation does not amount to unfair discrimination.
- (6) In furtherance of reusable energy, Council may determine tariffs pertinent to the purchase of surplus energy from consumers, subject to regulations issued and approved by the National Electricity Regulator of South Africa (NERSA).

2. INTERPRETATION

"Municipality" means the Stellenbosch Municipality (WC024).

"Tariff Policy" means the Tariff Policy adopted by the Municipality in terms of this By-Law.

"Constitution" means the Constitution of the Republic of South Africa.

"Council" means the Council of the Municipality.

"Credit Control and Debt Collection Policy" means the Municipality's Credit Control and Debt Collection Policy as stipulated by sections 96(b) and 97 of the Systems Act.

"Systems Act" means the Local Government: Municipal Systems Act, (Act 32 of 2000).

"Finance Management Act" means the Local Government: Municipal Finance Management Act, (Act 53 of 2003).

"Tariff" means fees, charges or any other tariffs levied by the Municipality in respect of any function or service provided, or surplus energy purchased, by the Municipality including rates levied by the Municipality in terms of the Local Government: Property Rates Act, (Act 6 of 2004).

"Tariff List" or **"Tariff Schedule"** means the list of the Tariffs applicable and in respect of any function or service provided, or surplus energy purchased, by the Municipality. This list, effective for a specific financial year, is approved by Council during the annual budget process.

3. OBJECTS

The object of this By-Law is to give effect to the implementation of the Tariff Policy as contemplated in section 74(1) of the Systems Act, and of the Tariff Schedule for a given financial year as approved by Council during the Municipality's annual budget process.

4. ADOPTION AND IMPLEMENTATION OF TARIFF POLICY

- (1) The Municipality shall adopt and implement a Tariff Policy on the levying of fees for a municipal service provided by the Municipality or by way of service delivery agreements which complies with the provisions of the Systems Act, the Municipal Finance Management Act and any other applicable legislation.

- (2) The Municipality shall not be entitled to impose tariffs other than in terms of the valid Tariff Policy.

5. CONTENTS OF TARIFF POLICY

The Municipality's Tariff Policy shall, inter alia:

- (1) Apply to all the tariffs fees (as per the Tariff List) imposed by the Municipality pursuant to the adoption of the Municipality's annual budget.
- (2) Reflect the principles referred to in section 74(2) of the Systems Act and specify any further principles for the imposition of Tariffs which the Municipality may wish to adopt.
- (3) Specify the manner in which the principles referred to in paragraph 4(2) above are to be implemented in terms of the Tariff Policy.
- (4) Specify the basis of differentiation, if any, for tariff purposes between the different categories of users, debtors, service providers, services, service standards and geographical areas as long as such differentiation does not amount to unfair discrimination.
- (5) Include such further enforcement mechanism, if any, as the Municipality may wish to impose in addition to those contained in the Credit Control and Debt Collection Policy.
- (6) Provide tariffs for the export of surplus energy from approved and certified consumers, within the jurisdiction of the Municipality, into the Municipality's distribution network.

6. ENFORCEMENT OF TARIFF POLICY

The Tariff Policy shall be enforced through the Credit Control and Debt Collection Policy and any further enforcement mechanisms stipulated in the Municipality's Tariff Policy.

7. REPEAL

The provisions of any by-laws relating to Tariffs by the Municipality are hereby repealed insofar as they relate to matters provided for in this By-Law.

8. INTERPRETATION

If there is a conflict of interpretation between the English version of this By-Law and a translated version, the English version prevails.

9. SHORT TITLE and EFFECTIVE DATE

This By-law is the Tariff By-Law of Stellenbosch Municipality and shall take effect on 01 July 2017.

| 9. Accountability | 7 |
| 10. Annexures | 7 |

1. Preamble

Cognisance taken of the need that may arise to transfer within approved votes due to the change in circumstances and priorities.

2. Definitions

"Approved budget," means an annual budget-

- a) approved by a municipal council, or
- b) includes such an annual budget as revised by an adjustments budget in terms of section 28 of the MFMA;

"Budget transfer" means transfer of funding within a vote subject to limitations.

"Capital budget" means a financial plan catering for large and long-term sums for investment in property, plant and machinery, over a period greater than the period considered under an operating budget.

"Chief Financial Officer" means a person designated in terms of section 80(2) (a) of the MFMA;

"Delegation", in relation to a duty, includes an instruction or request to perform or to assist in performing the duty;

"Financial year" means a twelve months period commencing on 1 July and ending on 30 June each year

"Municipal council" or "council" means the council of a municipality referred to in section 18 of the Municipal Structures Act;

"Municipality"-

- a) when referred to as a corporate body, means a municipality as described in section 2 of the Municipal Systems Act; or
- b) when referred to as a geographic area, means a municipal area determined in terms of the Local Government: Municipal Demarcation Act, 1998 (Act No. 27 of 1998);

"Official", means-

- a) an employee of a municipality or municipal entity;

- b) a person seconded to a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity; or
- c) a person contracted by a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity otherwise than as an employee;

"Operating budget" An operating budget is the annual budget of an activity stated in terms of Budget Classification Code, functional/sub-functional categories and cost accounts. It contains estimates of the total value of resources required for the performance of the operations in terms of revenue and expenditure including reimbursable work or services for others;

"Overspending"-

- a) means causing the operational or capital expenditure incurred by the municipality during a financial year to exceed the total amount appropriated in that year's budget for its operational or capital expenditure, as the case may be;
- b) in relation to a vote, means causing expenditure under the vote to exceed the amount appropriated for that vote; or
- c) in relation to expenditure under section 26 of the MFMA, means causing expenditure under that section to exceed the limits allowed in subsection (5) of this section;

"Virement" refer to the definition of budget transfer

"Vote" means-

- a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the
- b) municipality; and
- c) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned.

3. Legislative Framework

Paragraph 4.6 of Circular 51 of the MFMA states that:

“The MFMA and the Municipal Budget and Reporting Regulations seek to move municipalities away from the traditional approach of appropriating/approving budgets by line item. The aim is to give the heads of municipal departments and programmes greater flexibility in managing their budgets. To further facilitate this, each municipality must put in place a council approved virements policy, which should provide clear guidance to managers of when they may shift funds between items, projects, programmes and votes.”

4. Objective of Policy

This policy shall give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the Approved budget.

The policy sets out the virement principles and processes which Stellenbosch Municipality will follow during a financial year.

These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year.

The policy shall apply to all staff and councillors of the Stellenbosch Municipality that are involved in budget implementation.

5. Virement Clarification

Virement is the process of transferring budgeted funds from one line item number to another, with the recommendation of the relevant Director to the CFO or delegated finance official, to enable the Budget Office to effect the adjustments.

6. Virement Procedure

- a) All virement proposals must be completed on the appropriate documentation and forwarded to the relevant Finance Officer for checking and implementation. (See annexure 1 and 2)

- b) All virements must be signed and supported by the relevant Director of the directorate within which the vote is allocated. (Section 79 MFMA)
- c) Projected cash flows in the SDBIP should be attached to all virement request and be adjusted in line with the virement.
- d) Relevant corroborating documentation must be attached on the virement form to support the transfer.
- e) All documentation must be in order and approved before any expenditure can be committed and incurred.
- f) All virementations must be motivated and need to be approved by the CFO or a delegated official after the Director of the department has recommended said transfer. The latter requires that such application reaches the office of the CFO prior to incurring expenditure.
- g) The turnaround time for processing of virementations are 72 hours, only if the virement request meets all the necessary requirements.
- h) No virementations will be considered if it equates to facilitating fiscal dumping
- i) No virements after the closing of orders as stipulated in the financial protocol and/or formally communicated in line with the financial year-end preparation will be considered unless in an absolute emergency that could reasonably not have been foreseen.

7. Virement Restrictions

- a) Virements are not permitted in relation to the revenue side of the budget.
- b) No virements of funds across votes (directorates) will be accommodated during the year; unless within the adjustments budget.
- c) Virements from the capital budget to the operating budget are not permitted.
- d) Virements will not result in adding 'new' projects to the Capital Budget.

- e) Virements of conditional grant funds to purposes outside of that specified in the relevant conditional grant framework will not be permitted.
- f) The budget savings from the following line items (necessary adjustments) may only be considered and transferred by the CFO:
 - (i) Employee Related Cost
 - (ii) Remuneration of councillors
 - (iii) Depreciation and asset impairment
 - (iv) Finance Charges (Interest on Loan)
 - (v) Municipal Services Consumption (Water, Electricity, Refuse and Sewerage)
 - (vi) Bulk Purchases (Water and Electricity)
 - (vii) Transfers and subsidies paid
- g) An approved virement does not give expenditure authority outside of what is allowed by Council's Supply Chain Management Policy.

8. General Principle

Virements will only be approved if they facilitate and promote sound risk and financial management.

9. Accountability

Accountability to ensure that the virement application forms are completed in accordance with Council's virement policy and are not in conflict with the directorate's strategic objectives manifests with the head of the relevant directorate.

10. Annexures

Annexure 1: Virement Form (Capital and Operating)

Annexure 2: Supporting document to Ward Allocation virement request.

1. PREAMBLE

In the spirit of the Municipal Finance Management Act, (No.56 of 2003) “ to modernize budget and financial management practices by placing local government finances on a sustainable footing in order to maximize the capacity of municipalities to deliver services to all residents customers, users and investors” and,

Whereas chapter 4 of the Municipal Finance Management Act, (No 56 of 2003) determines that a municipality may, except where otherwise provided in the Act, incur expenditure only in terms of an approved budget; and within the limits of the amounts appropriated for the different votes in an approved budget,

In terms of the Budget and Reporting Regulations the municipality has to adopt a policy which includes the following:

1. a policy dealing with the shifting of funds within votes
2. a policy dealing with the introduction of adjustment budgets
3. policies dealing with unforeseen and unavoidable expenditure
4. policies dealing with management and oversight

Therefore the Stellenbosch Municipality revised its Budget Policy to give effect to the Budget and Reporting Regulations as set out in this policy.

2. DEFINITIONS

"Accounting officer" means a person appointed in terms of section 82(l) (a) or (b) of the Municipal Structures Act;

"Allocation", means-

- (a) a municipality's share of the local government's equitable share referred to in section 214(l) (a) of the Constitution;
- (b) an allocation of money to a municipality in terms of section 214(1) (c) of the Constitution;
- (c) an allocation of money to a municipality in terms of a provincial budget; or
- (d) any other allocation of money to a municipality by an organ of state, including by another municipality, otherwise than in compliance with a commercial or other business transaction;

"Annual Division of Revenue Act" means the Act of Parliament, which must be enacted annually in terms of section 214 (1) of the Constitution;

"Approved budget," means an annual budget-

- (a) approved by a municipal council, or
- (b) includes such an annual budget as revised by an adjustments budget in terms of section 28 of the MFMA;

"Basic Municipal Service" means a municipal service that is necessary to ensure an acceptable and reasonable quality of life and which, if not provided, would endanger public health or safety or the environment;

"Budget-related Policy" means a policy of a municipality affecting or affected by the annual budget of the municipality, including-

- (a) the tariff policy, which the municipality must adopt in terms of section 74 of the Municipal Systems Act;
- (b) the rates policy which the municipality must adopt in terms of legislation regulating municipal property rates; or
- (c) the credit control and debt collection policy, which the municipality must adopt in terms of section 96 of the Municipal Systems Act;

"Budget transfer" means transfer of funding within a function / vote subject to limitations.

"Budget Year" means the financial year of the municipality for which an annual budget is to be approved in terms of section 16(1) of the MFMA;

"Chief Financial Officer" means a person designated in terms of section 80(2) (a) of the MFMA;

"councillor" means a member of a municipal council;

"current year" means the financial year, which has already commenced, but not yet ended;

"delegation", in relation to a duty, includes an instruction or request to perform or to assist in performing the duty;

"executive mayor" means the councillor elected as the executive mayor of the municipality in terms of section 55 of the Municipal Structures Act;

"financial recovery plan" means a plan prepared in terms of section 141 of the MFMA

"financial year" means a twelve months period commencing on 1 July and ending on 30 June each year

"financing agreement" includes any loan agreement, lease, and instalment purchase contract or hire purchase arrangement under which a municipality undertakes to repay a long-term debt over a period of time;

"fruitless and wasteful expenditure" means expenditure that was made in vain and would have been avoided had reasonable care been exercised;

"irregular expenditure", means-

- (a) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the MFMA , and which has not been condoned by Council (b) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of that Act;
- (b) expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or

- (c) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or entity or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law, but excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure";

"investment/s", in relation to funds of a municipality, means-

- (a) the placing on deposit of funds of a municipality with a financial institution; or
- (b) the acquisition of assets with funds of a municipality not immediately required, with the primary aim of preserving those funds;

"local community" has the meaning assigned to it in section 1 of the Municipal Systems Act;

"Municipal Structures Act" means the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998);

"Municipal Systems Act" means the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000);

"long-term debt" means debt repayable over a period exceeding one year;

"municipal council" or **"council"** means the council of a municipality referred to in section 18 of the Municipal Structures Act;

"municipality"-

- (a) when referred to as a corporate body, means a municipality as described in section 2 of the Municipal Systems Act; or
- (b) when referred to as a geographic area, means a municipal area determined in terms of the Local Government: Municipal Demarcation Act, 1998 (Act No. 27 of 1998);

"municipal service" has the meaning assigned to it in section 1 of the Municipal Systems Act (refer to the MSA for definition);

"municipal tariff" means a tariff for services which a municipality may set for the provision of a service to the local community, and includes a surcharge on such tariff;

"National Treasury" means the National Treasury established by section 5 of the Public Finance Management Act;

"official", means-

- (a) an employee of a municipality or municipal entity;
- (b) a person seconded to a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity; or
- (c) a person contracted by a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity otherwise than as an employee;

"overspending"-

- (a) means causing the operational or capital expenditure incurred by the municipality during a financial year to exceed the total amount appropriated in that year's budget for its operational or capital expenditure, as the case may be;
- (b) in relation to a vote, means causing expenditure under the vote to exceed the amount appropriated for that vote; or
- (c) in relation to expenditure under section 26 of the MFMA, means causing expenditure under that section to exceed the limits allowed in subsection (5) of this section;

"quarter" means any of the following periods in a financial year:

- (a) 1 July to 30 September;
- (b) 1 October to 31 December;
- (c) 1 January to 31 March; or
- (d) 1 April to 30 June;

"service delivery and budget implementation plan" means a detailed plan approved by the executive mayor of a municipality in terms of section 53(l)(c)(ii) of the MFMA for implementing the municipality's delivery of municipal services and its annual budget, and which must indicate-

- (a) projections for each month of-
 - (i) revenue to be collected, by source; and
 - (ii) operational and capital expenditure, by vote;
- (b) service delivery targets and performance indicators for each quarter; and
- (c) any other matters that may be prescribed, and includes any revisions of such plan by the executive mayor in terms of section 54(l) (c) of the MFMA;

"unauthorised expenditure", means any expenditure incurred by a municipality otherwise than in accordance with section 15 or 11(3) of the MFMA, and includes-

- (a) overspending of the total amount appropriated in the municipality's approved budget;
- (b) overspending of the total amount appropriated for a vote in the approved budget;
- (c) expenditure from a vote unrelated to the department or functional area covered by the vote;
- (d) expenditure of money appropriated for a specific purpose, otherwise than for that specific purpose;
- (e) spending of an allocation referred to in paragraph (b), (c) or (d) of the definition of "allocation" otherwise than in accordance with any conditions of the allocation; or
- (f) a grant by the municipality otherwise than in accordance with the MFMA;

"virement" refer to the definition of budget transfer

"vote" means-

- (a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the
- (b) municipality; and
- (c) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned.

3. OBJECTIVES OF POLICY

The objective of the budget policy is to:

- a) Set out the principles which the municipality will follow in preparing each medium term revenue and expenditure framework budget
- b) Outline the responsibilities of the executive mayor, the accounting officer, the chief financial officer and other senior managers in compiling the budget
- c) Establish and maintain procedures to ensure adherence to Stellenbosch Municipality's Integrated Development Plan (IDP) review and budget processes
- d) Give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the planning, preparation and approval of the annual and adjustments budgets

The policy shall apply to all staff and councillors of the Stellenbosch Municipality that are involved in budget implementation.

4. BUDGET PREPARATION PROCESS

4.1 Budget Steering Committee

- a) The mayor of a municipality must establish a budget steering committee to provide technical assistance to the mayor in discharging the responsibilities set out in section 53 of the Act.
- b) The steering committee must consist of at least the following persons:
- I. the councilor responsible for financial matters;
 - II. the municipal manager;
 - III. the chief financial officer;
 - IV. the senior managers responsible for at least the three largest votes in the municipality;
 - V. the manager responsible for budgeting;
 - VI. the manager responsible for planning; and
 - VII. any technical experts on infrastructure.

4.2 Roles and responsibilities

4.2.1 Executive Mayor

- a) As provided in Section 21(1) of the MFMA, the Mayor is responsible for:
- I. Co-ordinating the process for preparing the annual budget and for reviewing the Integrated Development Plan ("IDP") and budget related-policies;
 - II. Tabling in the council a time schedule outlining key deadlines.
- b) In addition, as provided in Section 21(2) of the MFMA, for purposes of preparing the budget, the Mayor is required to:
- I. Take into account the Municipality's IDP;
 - II. Take all reasonable steps to ensure that the Municipality revises the IDP;
 - III. Take into account the national budget, the provincial budget, the national government's fiscal and macro-economic policy, the Annual Division of Revenue Act and any agreements reached in the budget forum;

- IV. Consult the relevant district municipality, if applicable, and local municipalities within the district, the provincial treasury, and when requested, the national treasury, and any national organs of state as may be prescribed;
- V. Provide on request information to the National Treasury and other organs of state and other municipalities affected by the budget.

c) Pursuant to Section 52 of the MFMA the mayor must:

- I. provide general political guidance over the fiscal and financial affairs of the municipality;
- II. in providing such general political guidance. may monitor and. to the extent provided in
- III. the MFMA, oversee the exercise of responsibilities assigned in terms of the MFMA to the accounting officer and the chief financial officer, but may not interfere in the exercise of those responsibilities;
- IV. must take all reasonable steps to ensure that the municipality performs its constitutional and statutory functions within the limits of the municipality's approved budget;
- V. must within 30 days of the end of each quarter. submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality; and
- VI. must exercise the other powers and perform the other duties assigned to the mayor in terms of the MFMA or delegated by the council to the mayor.

d) As Required by Section 53 of the MFMA, the mayor must:

- I. provide general political guidance over the budget process and the priorities that must guide the preparation of a budget;
- II. co-ordinate the annual revision of the integrated development plan in terms of section 34 of the Municipal Systems Act and the preparation of the annual budget, and determine how the integrated development plan is to be taken into account or revised for the purposes of the budget; and
- III. take all reasonable steps to ensure that:
 - a. the municipality approves its annual budget before the start of the budget year;
 - b. the municipality's service delivery and budget implementation plan is approved by the mayor within 28 days after the approval of the budget; and

- c. the annual performance agreements as required in terms of section 57(1)(6) of the Municipal Systems Act, for the municipal manager and all senior managers comply with the MFMA and in particular, the provisions of Section 53(1)(c)(iii) of the MFMA;
- iv. promptly report to the municipal council and the MEC for finance in the province any delay in the tabling of an annual budget, the approval of the service delivery and budget implementation plan or the signing of the annual performance agreements referred to above; and
- v. ensure-
 - a. that the revenue and expenditure projections for each month and the service delivery targets and performance indicators for each quarter, as set out in the service delivery and budget implementation plan, are made public no later than 14 days after the approval of the service delivery and budget implementation plan; and
 - b. that the performance agreements of the municipal manager, senior managers and any other categories of officials as may be prescribed are made public no later than 14 days after the approval of the municipality's service delivery and budget implementation plan. Copies of such performance agreements must be submitted to the council and the MEC for local government in the province.

4.2.2 Accounting Officer

- a. The Accounting Officer shall provide technical and administrative support to the Executive Mayor in the preparation and approval of the annual and adjustment budgets, as well as the consultative process and the furnishing of information.
- b. The Accounting Officer shall ensure that all heads of departments provide the inputs required by the Chief Financial Officer for the purpose of preparing the budget.
- c. The Accounting Officer shall delegate to the Chief Financial Officer all such powers as may be necessary for the Chief Financial Officer to prepare the budgets.

4.2.3 Chief Financial Officer

- a. The Chief Financial Officer shall provide technical and administrative support to the Executive

Mayor in the preparation and approval of the annual and adjustment budgets, as well as the consultative process and the furnishing of information.

- b. The Chief Financial Officer shall be responsible for preparing the budgets, as delegated by the Accounting Officer.
- c. The Chief Financial Officer shall ensure that the annual and adjustments budgets comply with the requirements of the National Treasury, reflect the budget priorities determine by the mayor, are aligned with the IDP, and comply with all budget-related policies, and shall make recommendations to the mayor on the revision of the IDP and the budget-related policies where these are indicated.

4.2.4 Directors directly accountable to the Accounting Officer

- a. Directors shall provide technical and administrative support to the Executive Mayor in the preparation and approval of the annual and adjustment budgets, as well as the consultative process and the furnishing of information.

4.3 Public participation process

a) Immediately after the draft resolutions of the annual budget is tabled in a municipal council, the Accounting Officer of the municipality must— in accordance with Chapter 4 of the Municipal Systems Act-

- I. make public the annual budget and the documents referred to in section 17(3); and
- II. invite the local community to submit representations in connection with the budget; and
- III. submit the annual budget—(draft budget)
- IV. in both printed and electronic formats to the National Treasury and the relevant provincial treasury as prescribed by National Treasury ; and
- V. in either format to any prescribed national or provincial organs of state and to other municipalities affected by the budget.

b) When the annual budget has been tabled, the municipal council must consider any views of-

- I. the local community; and
- II. the National Treasury, the relevant provincial treasury and any provincial or national organs of state or municipalities which made submissions on the budget.

c) The Municipal Manager must also make public any information that the municipal council considers appropriate to facilitate the budget consultation process, including:

- i. Summaries of the annual budget and supporting documents in alternate language predominant in the community; and
- ii. Information relevant to each ward in the municipality
- iii. All the information contemplated in sub-regulation (c) must cover
- iv. The relevant financial and service delivery implications of the annual budget; and
- v. At least the previous year's actual outcome, the current year's forecast outcome, the budget year, and the following two years.

d) When submitting the annual budget to the National Treasury and the relevant provincial treasury, the municipal manager must also submit to National Treasury and the relevant provincial treasury, both in printed and electronic form –

- I. The supporting budget documentation as tabled in the municipal council;
- II. The draft Service Delivery and Budget Implementation Plan (SDBIP); and
- III. Any other information as may be required by National Treasury.

e) The Municipal Manager must send copies of the annual budget and supporting documentation as tabled in the municipal council, in both printed and electronic form to:

- I. Any other municipality affected by the annual budget within ten working days of the annual budget being tabled in the municipal council; and
- II. Any organ of state on receipt of a request from the organ of state.

f) After considering all budget submissions, the council must give the Executive Mayor an opportunity-

- I. to respond to the submissions; and
- II. if necessary, to revise the budget and table amendments for consideration by the council.

g) Within consideration of the approval of the Annual Budget and thirty (30) days before the start of the budget year the Executive Mayor must table the following documents in the Council in consideration of the annual budget approval

- I. A report summarizing the local community's views on the annual budget;

- II. Any comments on the annual budget received from National Treasury and Provincial Treasury;
- III. Any comments on the annual budget received from any organ of state, including any affected municipality; and
- IV. Any comments on the annual budget received from any other stakeholders.

h) The Municipal Manager must assist the Executive Mayor in the preparation of the documents referred to in sub-regulation (g) and 23 (2) of the Act.

4.4 Approval of the budget

- (a) Council shall consider the medium term revenue and expenditure framework budget (MTREF) for approval not later than 31 May (30 days before the start of the budget year).
- (b) The council resolution must contain budget policies and the performance measures to be adopted.
- (c) The council must consider the full implications, financial or otherwise, of the annual budget and supporting documentation before approving the annual budget.
- (d) When approving the annual budget, the council must consider and adopt separate resolutions dealing with each of the matters contemplated.
- (e) Should the municipality fail to approve the budget before the start of the budget year, the executive mayor must inform the MEC for Finance that the budget has not been approved.
- (f) The budget tabled to Council for approval shall include the following supporting documents:
 - I. draft resolutions approving the budget and levying property rates, other taxes and
 - II. tariffs for the financial year concerned;
 - III. measurable performance objectives for each budget vote, taking into account the
 - IV. municipality's IDP;
 - V. the projected cash flows for the financial year by revenue sources and expenditure
 - VI. votes;
 - VII. any proposed amendments to the IDP;
 - VIII. any proposed amendments to the budget-related policies;
 - IX. particulars of any proposed allocations or grants to other municipalities, municipal
 - X. entities, external mechanisms assisting the municipality in service delivery, other

- XI. organs of state, and organizations such as non- governmental organizations,
- XII. welfare institutions and so on;
- XIII. particulars of the municipality's investments;
- XIV. particulars of any proposed service delivery agreements, including material
- XV. amendments to existing service delivery agreements;
- XVI. the proposed cost to the municipality for the budget year of the salary, allowances
- XVII. and benefits of-

- (i) each political office-bearer of the municipality;
- (ii) councillors of the municipality; and
- (iii) the municipal manager, the chief financial officer, each senior manager of the municipality and any other official of the municipality having a remuneration package greater than or equal to that of a senior manager;

4.5 Service Delivery and Budget Implementation Plan (SDBIP)

a) The Executive Mayor must approve the Service Delivery and Budget Implementation Plan not later than 28 days after the approval of the Budget by Council, and within ten days (10) after the Executive Mayor has approved the Plan it has to be made public.

b) The SDBIP shall include the following components:

- I. Projections for each month of Revenue to be collected, by source, and Operational and capital expenditure, by vote;
- II. Service delivery targets and performance indicators for each quarter;
- III. Monthly projections of revenue to be collected for each source;
- IV. Monthly projections of expenditure (operating and capital) and revenue for each vote;
- V. Quarterly projections of service delivery targets and performance indicators for each vote;
- VI. Information for expenditure and delivery; and
- VII. Detailed capital works plan.

5. BUDGET PRINCIPLES

- a) The municipality shall ensure that revenue projections in the budget are realistic taking into account actual collection levels. The expenses may only be incurred in terms of the approved annual budget (or adjustments budget) and within the limits of the amounts appropriated for each vote in the approved budget.
- b) Stellenbosch Municipality shall prepare a three-year budget (medium term revenue and expenditure framework (MTREF)) which will be reviewed annually and will be approved by Council. The MTREF budget will at all times be within the framework of the Municipal Integrated Development Plan (IDP).
- c) The annual budget will consist of a Capital and Operating Budget which will be discussed below:

5.1 Capital Budgets

- a) The capital budget refers to the allocations made to specific infrastructural projects and the purchase of equipment and other forms of assets having a lifespan of more than one year.

5.1.1 Basis of Calculation

- a) The zero based method is used in preparing the annual capital budget, except in cases where a contractual commitment has been made that would span over more than one financial year.
- b) The annual capital budget shall be based on realistically anticipated revenue (capital loans to be taken up will be deemed to be part of this), which should be equal to the anticipated capital expenditure in order to result in a balanced budget.
- c) The impact of the capital budget on the current and future operating budgets in terms of finance charges to be incurred on external loans, depreciation of fixed assets, maintenance of fixed assets and any other operating expenditure to be incurred resulting directly from the capital expenditure, should be carefully analyzed when the annual capital budget is being compiled.
- d) In addition, the council shall consider the likely impact of such operational expenses- net of any revenues expected to be generated by such item- on future property rates and service tariffs.

5.1.2 Financing

1. Own Financing Sources

The Council shall establish a Capital Replacement Reserve (CRR) for the purpose of financing capital projects and the acquisition of capital assets. Such reserve shall be established from the following:

- a) unappropriated cash-backed surpluses to the extent that such surpluses are not required for operational purposes;
- b) further amounts appropriated as contributions in each annual or adjustments budget; and
- c) net gains on the sale of fixed assets in terms of the fixed asset management and accounting policy.

2. Other Finance Sources

The Ad- Hoc capital budget shall be financed from external sources such as the following:

- a) Grants and subsidies as allocated in the annual Division of Revenue of Act;
- b) Grants and subsidies as allocated by Provincial Government;
- c) External Loans;
- d) Private Contributions;
- e) Contributions from the Capital Development Fund (developer's contributions); and
- f) Any other financing source secured by the local authority.

5.1.3 Implementation

- a) After the budget has been approved, the service delivery and budget implementation plan (SDBIP) should be compiled.
- b) The SDBIP must be tabled to the Mayor within 28 days after aforementioned approval.
- c) Each director has to indicate the intended spending patterns of both their capital and operating budgets. (Cash flows)
- d) These listed cash flows are consolidated into the Service Delivery and Budget Implementation Plan of the organisation.

- e) The SDBIP will be monitored on a monthly basis where actual spending will be compared with the planned spending as indicated by the directors at the beginning of the year.
- f) Each directorate can use their respective vote numbers as indicated on the capital budget

5.2 Operational Budget

The operational budget refers to the funds that would be raised in the delivery of basic services, grants & subsidies and any other municipal services rendered. These funds are in turn used to cover the expenses incurred in the day to day running of the organization.

5.2.1 Basis of Calculation

- a) A zero based approach is used in preparing the annual operating budget.
- b) The annual operating budget shall be based on realistically anticipated revenue.
- c) An income based approach shall be used whereby realistically anticipated income is determined first and the level of operating expenditure would be based on the determined income flows.

5.2.2 Financing

The operating budget shall be financed from the following sources:

- a) Service Charges
 - (i) Electricity Charges
 - (ii) Water Sales
 - (iii) Refuse Removal Fees
 - (iv) Sewerage Fees

Increases in tariffs should be cost reflective.

- b) Property rates

Increases in rates will as far as possible be limited to inflation.

c) Grants & Subsidies

Grants and subsidies shall be based on all the gazetted grants and subsidies plus all other subsidies received by the organization.

d) Interest on Investments

The budget for interest and investment shall be in accordance with the Cash Management and Investment policy of the organization.

e) Rental Fees

Income from rental property will be budgeted for based on the percentage growth rate as determined by Financial Services for a particular budget year.

f) Fines

Income from fines will be budgeted for based on the actual income received in the preceding year (calculated on the basis of actual receipts until end of February of each year, extrapolated over 12 months) and the percentage growth rate as determined by Financial Services for a particular budget year.

g) Other Income

All other income items will be budgeted for based on the actual income received in the preceding year (calculated on the basis of actual receipts until end of February of each year, extrapolated over 12 months) and the percentage growth rate as determined by Financial Services for a particular budget year.

5.2.3 Implementation

a) After the budget has been approved, the service delivery and budget implementation plan (SDBIP) is compiled.

b) The SDBIP must be tabled to the Mayor within 28 days after aforementioned approval.

- c) Each director has to indicate the intended spending patterns of both their capital and operating budgets. (Cash flows)
- d) These listed cash flows are consolidated into the Service Delivery and Budget Implementation Plan of the organisation.
- e) The SDBIP will be monitored on a monthly basis where actual spending will be compared with the planned spending as indicated by the directors at the beginning of the year.
- f) Each directorate can use their respective vote numbers as indicated on the capital budget.

5.3 Contents of the Budget

- a) The budget must comply with the provisions of Section 17(1) of the MFMA, and in particular:
 - i. The budget must be in the format prescribed by the regulations;
 - ii. The budget must reflect the realistically expected revenues by major source for the budget year concerned;
 - iii. The expenses reflected in the budget must be divided into the votes of the various departments of the municipality;
 - iv. The budget must also contain:
 - 1. the foregoing information for the two years immediately succeeding the financial year to which the budget relates;
 - 2. the actual revenues and expenses for the previous financial year , and
 - 3. the estimated revenues and expenses for the current year.
- b) The budget must be accompanied by all of the documents referred to in Section 17(3) of the MFMA.
- c) For the purposes of Section 17(3) (k) of the MFMA, the salary, allowances and benefits of each group referred to therein must be stated individually.

5.4 Components of the Budget

- a) The annual budget and adjustments budget shall, as required by Section 17(2) of the MFMA consist of:
 - I. the capital component, and
 - II. the operating component.

- b) The operating component shall duly reflect the impact of the capital component on:
 - I. Compensation of employees & Remuneration of Councilors
 - II. Bulk Service Expenses
 - III. Depreciation charges;
 - IV. Repairs and maintenance expenses;
 - V. Interest payable on external borrowings; and
 - VI. Other operating expenses.

- c) Before approving the capital budget component of the annual or adjustments budget, the council shall consider the impact of the capital component on the present and future operating budgets of the municipality in relation to the items referred to:
 - I. The projected cost covering all financial years until the project is operational;
 - II. The future operational costs and revenue on the project, including municipal tax and tariff implications.
 - III. All capital projects have an effect on future operating budgets. The following cost factors must therefore be considered before approval:
 - 1) Additional personnel cost to staff new facilities once operational;
 - 2) Additional contracted services, such as security, cleaning etc.
 - 3) Additional general expenditure, such as services cost, stationery, telephones, material etc.
 - 4) Additional other capital requirements to operate the facility, such as vehicles, plant and equipment, furniture and office equipment etc.
 - 5) Additional costs to maintain the assets;
 - 6) Additional interest and redemption in the case of borrowings;
 - 7) Additional depreciation charges;
 - 8) Additional revenue generation. The impact of expenditure items must be offset by additional revenue generated to determine the real impact on tariffs.

6. ADJUSTMENTS BUDGETS

- (a) Each adjustments budget shall reflect realistic excess, however nominal, of current revenues over expenses.
- (b) The chief financial officer shall ensure that the adjustments budgets comply with the requirements of the National Treasury, reflect the budget priorities determined by the executive mayor, are aligned with the IDP, and comply with all budget-related policies, and shall make recommendations to the executive mayor on the revision of the IDP and the budget-related policies where these are indicated.
- (c) Council may revise its annual budget by means of an adjustments budget as regulated.
- (d) The Accounting Officer must promptly adjust its budgeted revenues and expenses if a material under-collection of revenues arises or is apparent.
- (e) The Accounting Officer shall appropriate additional revenues, which have become available but only to revise or accelerate spending programmes already budgeted for or any areas of critical importance identified by Council in compliance with Item 2 of Section 10.
- (f) The Council shall in such adjustments budget, and within the prescribed framework, confirm unforeseen and unavoidable expenses on the recommendation of the Executive Mayor.
- (g) Only the Executive mayor shall table an adjustment budget. Adjustments budget shall be done once as part of the mid-year budget performance assessment.
- (h) An adjustments budget must contain all of the following:
 - I. an explanation of how the adjustments affect the approved annual budget
 - II. appropriate motivations for material adjustments; and
 - III. an explanation of the impact of any increased spending on the current and future annual budgets.
- (i) Any unappropriated surplus from previous financial years, even if fully cash-backed, may not be used to balance any adjustments budget, but may be appropriated to the municipality's capital replacement reserve.

- (j) Municipal taxes and tariffs may not be increased during a financial year except if required in terms of a financial recovery plan and or per National Treasury Regulations.
- (k) Unauthorised expenses may be authorised in an adjustments budget.

6.1 Formats of adjustments budgets

- (a) An adjustment budget and supporting documentation of a municipality must be in the format specified by National Treasury and include all the required tables, charts and explanatory information, taking into account any guidelines issued by the Minister in terms of section 168(1) of the Act.

6.2 Funding of the adjustments budgets

- (a) An adjustments budget of a municipality must be appropriately funded.
- (b) The supporting documentation to accompany an adjustments budget in terms of section 28(5) of the Act must contain an explanation of how the adjustments budget is funded.

6.3 Timeframes for tabling of adjustments budgets

- (a) An adjustments budget referred to in section 28(2)(b), (d) and (f) of the Act may be tabled in the municipal council at any time during the mid-year budget and performance assessment has been tabled in the council, but not later than 28 February of the current year.
- (b) Only one adjustments budget referred to in subregulation (1) may be tabled in the municipal council during a financial year, except when the additional revenues contemplated in section 28(2)(b) of the Act are allocations to a municipality in a national or provincial adjustments budget, in which case subregulation (3) applies.
- (c) If a national or provincial adjustments budget allocates or transfers additional revenues to a municipality, the mayor of the municipality must, at the next available council meeting, but within 60 days of the approval of the relevant national or provincial adjustments budget, table an adjustments budget referred to in section 28(2)(b) of the Act in the municipal council to appropriate these additional revenues.

- (d) An adjustments budget referred to in section 28(2)(c) of the Act must be tabled in the municipal council at the first available opportunity after the unforeseeable and unavoidable expenditure contemplated in that section was incurred within the period set in section 29(3) of the Act.
- (e) An adjustments budget referred to in section 28(2)(e) of the Act may only be tabled after the end of the financial year to which the roll-overs relate, and must be approved by the municipal council by 25 August of the financial year following the financial year to which the roll-overs relate.
- (f) An adjustments budget contemplated in section 28(2)(G) of the Act may only authorise unauthorised expenditure as anticipated by section 32(2)(a)(i) of the Act, and must be –
- (g) dealt with as part of the adjustments budget contemplated in subregulation (1); and
- (h) a special adjustments budget tabled in the municipal council when the mayor tables the annual report in terms of section 127(2) of the Act, which may only deal with unauthorised expenditure from the previous financial year which the council is being requested to authorise in terms of section 32(2)(a)(i) of the Act.

6.4 Submission of tabled adjustments budgets

- (a) The municipal manager must comply with section 28(7) of the Act, read together with section 22(b)(i) of the Act, within ten working days after the mayor has tabled an adjustments budget in the municipal council.
- (b) When submitting the tabled adjustments budget to the National Treasury and the relevant provincial treasury in terms of section 28(7) of the Act, read together with section 22(b)(i) of the Act, the municipal manager must submit in both printed and electronic form
 - i. the supporting documentation referred to in section 28(5) of the Act within ten working days of the adjustments budget being tabled in the municipal council; and
 - ii. any other information as may be required by National Treasury.
- (b) The municipal manager must send copies of an adjustments budget and supporting documentation, in both printed and electronic form to –
 - i. any other municipality affected by that adjustments budget within ten working days of the adjustments budget being tabled in the municipal council; and

- II. any other organ of state on receipt of a request from that organ of state.

6.5 Approval of adjustment budget

- (i) A municipal council must consider the full implications, financial or otherwise, of the adjustments budget and supporting documentation referred to in section (1) (a) before approving the adjustments budget.
- (j) When approving the adjustment budget, a municipal council must consider and adopt separate resolutions dealing with each of the matters listed in item 4 of Schedule B.

6.6 Publications of approved adjustment budget

- (a) Within ten 10 working days after the municipal council has approved an adjustment budget, the municipal manager must in accordance with section 21A of the Municipal Systems Act make public the approved adjustments budget and supporting documentation, as well as the resolutions referred to in section 5 (a).
- (b) When making public an adjustment budget and supporting documentation, the municipal Manager must make public awareness of the adjustment budget, including –
- (c) Summaries of the adjustment budget and supporting documentation in alternate languages predominant in the community;
- (d) Information relevant to each ward in the municipality, if that ward is affected by the adjustments budget; and
- (e) Any consequential amendment of the service delivery and budget implementation plan that is necessitated by the adjustments budget.

6.7 Submission of approved adjustments budget and other documents

- (a) The municipal Manger must comply with section 28(7) of the Act read together with section 24(3) of the Act within ten working days after the municipal council has approved and adjustments budget.

- b) When submitting an adjustments budget to National Treasury and other relevant provincial treasury in terms of section 28(7) of the Act read together with section 24(3) of the Act, the municipal manager must also submit to National Treasury and the relevant provincial treasury, in both printed and electronic form –
 - i. The supporting documentation within ten working days after the municipal council has approved the adjustments budget;
 - ii. The amended service delivery and budget implementation plan, within ten working days after the council has approved the amended plan in terms of the section 54(1)(c) of the Act; and
 - iii. Any other information as may be required by the National Treasury.
- (c) The municipal manager must send copies of an adjustments budget and supporting documentation, in both electronic and printed form to –
 - i. Any other municipality affected by that adjustments budget within ten (10) working days of the adjustments budget being tabled in the municipal council; and
 - ii. Any other organ of state on receipt of a request from that organ of state.

7. BUDGET IMPLEMENTATION

7.1 Monitoring (Section 71 of MFMA)

- (a) The Accounting Officer with the assistance of the Chief Financial Officer and other senior managers is responsible for the implementation of the budget, and must take all reasonable steps to ensure that:
- I. funds are spent in accordance with the budget;
 - II. expenses are reduced if expected revenues are less than projected; and
 - III. revenues and expenses are properly monitored.

7.2 Reporting

7.2.1 Monthly budget statements (Section 71 of the MFMA)

- (b) Accounting Officer with the assistance of the Chief Financial Officer must, not later than ten working days after the end of each calendar month, submit to the Executive Mayor and Provincial and National Treasury a report in the prescribed format on the state of the municipality's budget for such calendar month, as well as on the state of the budget cumulatively for the financial year to date.
- (c) This report must reflect the following:
- i. actual revenues per source, compared with budgeted revenues;
 - ii. actual expenses per vote, compared with budgeted expenses;
 - iii. actual capital expenditure per vote, compared with budgeted expenses;
 - iv. actual borrowings, compared with the borrowings envisaged to fund the capital budget;
 - v. the amount of allocations received, compared with the budgeted amount;
 - vi. actual expenses against allocations, but excluding expenses in respect of the equitable share;
 - vii. explanations of any material variances between the actual revenues and expenses as indicated above and the projected revenues by source and expenses by vote as set out in the service delivery and budget implementation plan;

- viii. the remedial or corrective steps to be taken to ensure that the relevant projections remain within the approved or revised budget; and
- ix. projections of the revenues and expenses for the remainder of the financial year, together with an indication of how and where the original projections have been revised.

7.2.2 Quarterly Reports (Section 52 of MFMA)

- (a) The Executive Mayor must submit to Council within thirty days of the end of each quarter a report on the implementation of the budget and the financial state of affairs of the municipality. The report submitted to National and Provincial Treasury must be both in electronic format and in a signed written document.

7.2.3 Mid-year budget and performance assessment (Section 72 and 88 of MFMA)

- (a) The Accounting Officer must assess the budgetary performance of the municipality for the first half of the financial year, taking into account all the monthly budget reports for the first six months, the service delivery performance of the municipality as against the service delivery targets and performance indicators which were set in the service delivery and budget implementation plan.
- (b) The Accounting officer must then submit a report on such assessment to the Executive Mayor by 25 January each year and to Council, Provincial Treasury and National Treasury by 31 January each year.
- (c) The Accounting Officer may in such report make recommendations after considering the recommendation of the Chief Financial Officer for adjusting the annual budget and for revising the projections of revenues and expenses set out in the service delivery and budget implementation plan.

8. REVIEW OF POLICY

- (a) This shall be reviewed on an annual basis to ensure that it is in line with the municipality's strategic objectives, good governance, prudent expenditure management and with relevant legislation.

1. INTRODUCTION

The documented **Borrowing, Funds and Reserves Policy**, sets out the framework for the prudent use of Borrowing, Funds and Reserves available to the Municipality.

This Policy should be implemented in conjunction with the approved **Liquidity Policy**. The Liquidity Policy sets out the prudent level of cash to be maintained by the Municipality as one of several factors to ensure long term financial sustainability. It is however of equal importance to protect, maintain and extend the infrastructure of the Municipality to ensure the continued provision of services at an acceptable standard.

This policy is implemented to provide guidance on the appropriation of capital funding resources on a sustainable basis in the longer term.

2. BACKGROUND AND APPROACH

With reference to the applicable legislation as referred to in paragraph 3 below. Legislation exists and prescribes the framework of a Borrowing as well as Funds and Reserves Policy and these factors will all be addressed in this Policy.

Although legislation provides guidance as to the broader framework to ensure financial management of resources to ensure the Council meets all of its obligations timeously, it is not prescriptive with regards to quantifying not only the prudent level of Borrowing, Funds and Reserves but more so the optimal level hereof.

Therefore in this Policy cognisance has been taken of the legislative guidelines whilst more prescriptive guidelines are set for the optimal management and monitoring of resources to the Municipality's avail based on sound financial practices.

3. LEGISLATIVE REQUIREMENTS

The legislative framework governing borrowings, funds and reserves are:

- 1.1. Local Government Municipal Finance Management Act, Act 56 of 2003 (MFMA) must be complied with; and

- 1.1.1. MFMA Circular 71 stipulates the following guidelines regarding borrowing:

Capital Cost (Interest Paid and Redemption) as a % of Total Operating Expenditure

$(\text{Capital Cost (Interest Paid and Redemption)} / \text{Total Operating Expenditure}) \times 100$

Criteria: 6% - 8%

Debt (Total Borrowings) / Revenue

$(\text{Overdraft} + \text{Current Finance Lease Obligation} + \text{Non Finance Lease Obligation} + \text{Short Term Borrowings} + \text{Long Term Borrowings}) / \text{Total Operating Revenue}$

Criteria: Maximum 45%

1.2. Local Government Municipal Budget and Reporting Regulation, Regulation 393, published under Government Gazette 32141, 17 April 2009.

4. FUNDING POLICY

The Local Government Municipal Budget and Reporting Regulation, Regulation 393, published under Government Gazette 32141, 17 April 2009 stipulates:

8. (1) *Each municipality must have a funding and reserves policy which must set out the assumptions and methodology for estimating –*

- (a) *projected billings, collections and all direct revenues;*
- (b) *the provision for revenue that will not be collected;*
- (c) *the funds the municipality can expect to receive from investments;*
- (d) *the dividends the municipality can expect to receive from municipal entities;*
- (e) *the proceeds the municipality can expect to receive from transfer or disposal of assets;*
- (f) *the municipality's borrowing requirements;*
- (g) *the funds to be set aside in reserves.*

In terms of Section 18 and 19 of the MFMA an **annual budget** may only be funded from:

Cash backed accumulated funds from previous years' surpluses not committed for other purposes:

Transfers from the accumulated surplus to fund operating expenditure will only be allowed for specific once-off projects with no recurring operating expenditure resulting thereof.

Borrowed funds, but only for capital projects:

Actual capital expenditure may only be incurred on a capital project if the funding for the project has been appropriated in the Capital Budget, but has also been secured from the financial source that is not committed for another purpose.

Realistically anticipated revenues to be collected:

Realistic anticipated revenue projections must take into account projected revenue for the current year based on actual collection levels in previous financial years.

4.1. OPERATING BUDGET

The Operating Budget should be cash funded. The Operating Budget is funded from the following main sources of revenue:

- a) Property Rates;
- b) Surplus generated from Service Charges;
- c) Government Grants and Subsidies;
- d) Other revenue, fines, interest received etc.;

The following guiding principles apply when compiling the Operating Budget:

- a) Growth parameters must be realistic taking into account the current economic conditions;
- b) Tariff adjustments must be in line with the following approved policies: ***Tariff Policy and Indigent Policy***;
- c) Revenue from Government Grants and Subsidies must be in line with allocations gazette in the Division of Revenue Act and provincial gazettes. Transfers of a conditional nature must be appropriated only as prescribed and should not be used to fund the Operating Budget;
- d) Revenue from public contributions, donations or any other grants may only be included in the Budget if there is acceptable documentation that guarantees the funds and if the transfers are unconditional of nature;

- e) Provision for revenue that will not be collected is made against the expenditure item bad debt and based on actual collection levels for the previous financial year and the reasonably projected annual non-payment rate;
- f) Interest received from actual Long-term and or Short-term Investments are based on the amount reasonably expected to be earned on cash amounts available during the year according to the expected interest rate trends. The actual amount allocated for interest on investments is contributed to the Capital Replacement Reserve;
- g) A detailed salary budget is compiled on an annual basis. All funded positions are budgeted for in total as well as new and/or funded vacant positions. As a guiding principle the salary budget should not constitute more than 35% of annual Operating Expenditure;
- h) Depreciation charges are fully budgeted for according to the Asset Register.
- i) The annual cash flow requirement for the repayment of borrowings must fully be taken into consideration with the setting of tariffs;
- j) Sufficient provision must be made for the maintenance of existing infrastructure based on affordable levels. The maintenance budgets are normally lower than the recommended levels. As a guiding principle repair and maintenance should constitute between 5% and 8% of total operating expenditure and should annually be increased incrementally until the required targets are achieved;
- k) Individual expenditure line items are to be revised each year when compiling the budget to ensure proper control over expenditure.

4.2. CAPITAL BUDGET

The capital budget provides funding for the municipality's capital programme based on the needs and objectives as identified by the community through the Integrated Development Plan and provides for the eradication of infrastructural backlogs, renewal and upgrading of existing infrastructure, new developments and enlargement of bulk infrastructure.

The capital budget is limited by the availability and access to the following main sources of funding:

- a) Accumulated cash backed internal reserves such as the Capital Replacement Reserve;
- b) External borrowings;
- c) Government Grants and Subsidies;
- d) Public Donations and Contributions.

The following guiding principles apply when considering sources of funding for the capital budget:

a) Government Grants and Subsidies:

- a. Only Government Gazetted allocations or transfers as reflected in the Division of Revenue Act or allocations as per Provincial Gazettes may be used to fund projects;
- b. The conditions of the specific grant must be taken into consideration when allocated to a specific project.

b) Public Donations and Contributions:

- a. In the case of public contributions, donations and/or other grants, such capital projects may only be included in the annual budget if the funding has been received by the municipality already.

c) External Borrowing:

- a. The borrowing requirements as contained in the **Borrowing Policy** in paragraph 6 are used as a basis to determine the affordability of external loans over the Medium Term Income and Expenditure Framework. The ratios to be considered to take up additional borrowings are as follows, unless in contravention with any loan covenants:
 - i. Estimated long-term credit rating of BBB and higher;
 - ii. Interest Paid to Total Expenditure not to exceed 5%;
 - iii. Total Long-term Debt to Total Operating Revenue (excluding conditional grants and transfers) not to exceed 35%;
 - iv. Operating Cash Surplus generated before loan repayments are made covers the Total Annual Repayment at least 1 time;
 - v. Percentages of Total Annual Repayment (Capital and Interest) to Operating Expenditure to be less than 10%.

d) Cash backed Reserves

- a. Allocations to capital projects from cash backed internal reserves will be based on the available funding for each ring-fenced reserve according to the conditions of each reserve. With reference to Paragraph 5, **Reserves Policy**.

All capital projects have an effect on future operating budget therefore the following additional cost factors should be considered before approval:

- a) Personnel cost to staff new facilities once operational;
- b) Contracted services, that is, security, cleaning etc.;
- c) General expenditure such as services cost, stationery, telephones, material etc.;
- d) Other capital requirements to the operate facility such as vehicles, plant and equipment, furniture and office equipment etc.;
- e) Costs to maintain the assets;
- f) Interest and redemption in the case of borrowings;
- g) Depreciation charges;
- h) Revenue generation as the additional expenses incurred may be offset by additional revenue generated to determine the real impact on tariffs.

5. RESERVES POLICY

All reserves are “ring fenced” as internal reserves within the accumulated surplus, except for provisions as allowed by the General Recognized Accounting Practices (GRAP):

- a) Housing Development Fund;
- b) Revaluation Reserve

The municipality endeavours to effectively utilise and maintain the **Capital Replacement Reserve** for the funding of capital replacement and renewal for future financial years. This reserve needs to be cash backed. This will provide the Municipality with a more balanced capital funding approach in the longer term thereby reducing the risk of reaching its maximum gearing ability or depleting its free cash.

This Reserve can be generated as follows from the Operating Budget; the following methodology needs to be read in conjunction with the **Liquidity Policy**:

a) Cash generated from Operating Activities:

- a. The Municipality has maintained a strong ability to generate surplus operational cash flow which it has used to fund most of its capital spending in the past;
- b. In the past depreciation charges could be considered sufficiently cash backed based on the cash surplus generated prior to capital spending. However going

forward should capital spending increase sharply it will result simultaneously with Depreciation charges increasing sharply which may therefore in future not be fully supported by cash;

- c. Depreciation is a method to generate future cash. Therefore it is prudent to annually measure the cash coverage for depreciation charges until it is fully funded from cash through tariff setting;
- d. As at year end it is to be determined whether the Municipality meets its **Minimum Liquidity Criteria** as stipulated in the **Liquidity Policy**, excess cash in addition to this prescribed level is to be calculated and appropriated to the Capital Replacement Reserve and no more than 80% of the balance of the Capital Replacement Reserve as at year end should be allocated to the following year's capital budget unless sufficient recommendations are made to Council to substantiate such a decision.

b) Interest received on the investment made for the Capital Replacement Reserve

6. BORROWING POLICY

It is required that the Municipality comply with the guidelines of Chapter 6 of the MFMA with regards to Debt Disclosure as detailed in Sections 46, 47, 48 and 49. This section should be read in conjunction with point c) under paragraph 4.2. on page 6. External borrowings may only be incurred for approved capital programmes and may under no circumstances be allocated to fund the Operating Budget.

Municipal infrastructure has a long-term economic life and it is appropriate to fund assets of this nature with long term external borrowing. The economic life of assets should be equal to or longer than the tenure of the external borrowing.

The following needs to be taken into consideration when accessing external borrowing:

a) Types of loan financing

- a. Annuity Loans enable the Municipality to provide for the redemption of loans on an amortising basis which is generally the most cost effective method of financing often referred to as vanilla funding;
- b. Bullet Redemption Loans are attractive as interest on the loan is serviced with the capital redemption only taking place at the end of the tenure of the loan. However, this method is more costly as interest is paid on the full debt

throughout the term as the Capital does not reduce. This type of loan also requires an annual contribution to a sinking fund, which in essence then mimics the traits of an annuity loan although at a higher cost. The use of such structure warrants a detailed motivation based on the benefits to the implementation of the capital project;

- c. Sculpted Repayment Loans offer a combination of the above two types, as loans are sculpted according to the potential cash flows to be generated from the capital project in future. For example the following can be included in a sculpted loan:
 - i. A capital grace period in the first years of the development of the capital project;
 - ii. An incremental annual increase in the repayment in relation to the projected growth in revenue from the project.

b) Interest Rate Risk Management

- a. The impact of interest and capital redemption payments on both the current and forecasted property rates and service charges through tariffs taking into consideration the current and future capacity of the consumer to pay therefore;
- b. Likely movement in interest rates for variable rate borrowings. There are benefits to be yielded from borrowing on a variable rate if rates are projected to decrease in future, however it is prudent for the Municipality to enter into fixed interest rate loans to accurately budget for expenses incurred.

c) Tenure of Borrowing

- a. The tenure of external borrowings should where possible match the economic useful life of the asset.

d) Security

- a. Unless sufficient motivation is provided and other than for the provision of a sinking fund for the redemption of a bullet loan, the provision of any security against external borrowings, should be specifically motivated by the CFO for approval.

e) Loan Covenants

- a. The Municipality is to maintain a Loan Covenants Register detailing the covenants entered into with each active loan agreement until date of maturity thereof;
- b. Compliance with all loan covenants are to be monitored and reported on semi-annually to ensure that the Municipality does not breach any covenants;
- c. Should a default be triggered based on non-compliance with loan covenants, the Municipality is to alert Council and send the related Financial Institutions a written commitment to address the matter within a reasonable timeframe.

f) Level of gearing

- a. As stipulated in point c) under paragraph 4.2. on page 6, gearing is not only limited by the level of debt against the Total Operating Income (excluding conditional grants) but also limited by other operational factors including compliance with the stipulations of the approved **Liquidity Policy**.

7. CORPORATE GOVERNANCE (OVERSIGHT)

Compliance with the various stipulations as documented in this Borrowing, Funds and Reserves Policy need to be monitored by the Chief Financial Officer and reported on to the Municipal Manager on a monthly basis and to the Finance/Audit Committee on a quarterly basis.

Where compliance has been breached the Chief Financial Officer must present an action plan to correct the non-compliance. The Finance Committee must monitor the successful implementation of the corrective action plans and report progress to Council.

8. TRANSITIONAL ARRANGEMENT

Upon adoption of this policy by the Council, the Municipal Manager in conjunction with the Chief Financial Officer must determine the current performance levels of the Municipality against this Policy and present a plan of action towards achieving and maintaining the stipulation as set out in this policy thereby utilising a more blended funding mix for capital infrastructure investment.

The Council must approve an appropriate timeframe within which the Municipality must achieve the approved stipulations as set out in this Policy. The period between the date of the policy adoption by Council and the target date for compliance shall be known as the Transitional Period.

The Finance Committee must report progress during the approved Transitional Period to the Council.

9. POLICY MANAGEMENT

The Borrowing, Funds and Reserves Policy forms part of the Municipality's overall financial objectives and therefore forms part of approved Budget Policies. The policy must be reviewed at least annually during the budget revision and presented to Council for approval.

The Policy is effective from the date it is approved by Council.

1. DEFINITIONS

1.1 In this policy unless the context indicates otherwise:

- 1.1.1 **“Accounting Officer”** means the Municipal Manager as referred to in section 60 of the Local Government: Municipal Finance Management Act, 56 of 2003 (“MFMA”);
- 1.1.2 **“Approved Budget”** means the Municipality’s annual budget approved by the Council in terms of section 24 of the MFMA and include an adjustment budget in terms of Section 28 of the MFMA;
- 1.1.3 **“Community”** means the residents within the Stellenbosch WCO24 area;
- 1.1.4 **“Constitution”** means the Constitution of the Republic of South Africa, 1996;
- 1.1.5 **“Director”** means a person appointed in terms of section 56 of the Systems Act who is directly accountable to the Municipal Manager;
- 1.1.6 **“Executive Mayor”** means the councillor elected as the Executive Mayor in terms of section 55 of the Local Government: Municipal Structures Act, 32 of 2000 (“the Structures Act”);
- 1.1.7 **“Chief Financial Officer”** or “CFO” means an official as envisaged in section 80(2)(a) of the Local Government: Municipal Finance Management Act, 56 of 2003 (“MFMA”);
- 1.1.8 **“Grant”** means a grant or allocation, as referred to in section 17(3)(j(ii) and 17(3)(j(iv) of the MFMA, made by the Municipality to any organisation or body referred to in section 67(1) and to be utilised to assist the Municipality in fulfilling its constitutional mandates including local tourism, municipal health services and such other municipal functions contemplated in Part B of Schedules 4 and 5 of the Constitution;
- 1.1.9 **“Grant Committee”** means the Committee established in terms of clause 7 of this policy;
- 1.1.10 **“official”** means an employee in the service of the Municipality;
- 1.1.11 **“organisation or body”** means those organisations or bodies outside any sphere of government making application for Grants in terms of this Policy, Which include associations, non-profit organisations or companies or trusts;
- 1.1.12 **“the Systems Act”** means the Local Government: Municipal Systems Act, 32 of 2000;
- 1.1.13 **“the Structures Act”** means the Local Government: Municipal Structures Act, 117 of 1998;
- 1.1.14 **“the MFMA”** means the Local Government: Municipal Finance Management Act, 56 of 2003;
- 1.1.15 **“the Municipality”** means the Stellenbosch Municipality and reference to Council has a similar meaning;

- 1.1.16 **“the Policy”** means the Financing of External Organisation/Bodies Performing Municipal Function Policy as set out in this document.
- 1.1.17 **"service delivery agreement"** or "MOA" means the agreement entered into between the Municipality and any organisation or body which received a Grant in terms of this Policy.

1. PURPOSE, AIMS AND OBJECTIVES

- 1.1 The purpose of this Policy is to provide a framework for financial assistance by Stellenbosch Municipality (“the Municipality”) to external organisations / bodies performing local government functions to the extent as set out in section 155(6)(a) and (7) of the Constitution as listed in Part B of Schedule 4 and 5.
- 1.2 The purpose of this Policy is to ensure the efficient performance of the municipal function entrusted to that external organisation/body in a manner which gives effect to the goals and objectives of the Municipality’s Integrated Development Plan ("IDP") by establishing partnerships between the municipality and the organisations and bodies performing the functions on behalf of the Municipality.
- 1.3 The Municipality will favour grants for achievement of outcomes aligned to the IDP. The objective of the funding of external bodied performing municipal functions is primarily to ensure the achievement of agreed outcomes to improve the health and well-being of the citizens and not to cover administrative costs and salaries.

2. LEGAL FRAMEWORK

- 2.1 In terms of section 156 of the Constitution, the Municipality has executive authority in respect of and the right to administer –
- 2.1.1 the local government matters listed in Part B of Schedule 4 and 5; and
- 2.1.2 any other matters assigned to it by national and provincial legislation.
- 2.2 Section 16(2) of the MFMA provides that the Mayor of the Municipality must table the annual budget at a council meeting at least 90 days before the start of the budget year. Section 17(3)(j)(ii) and 17(3)(j)(iv) provides that when an annual budget is tabled in terms of section 16(2) it must include particulars of any proposed allocation or grants by the municipality to any municipal entities and other external mechanism assisting the municipality in the exercise of its functions or power and any organisation or bodies referred to in section 67(1).
- 2.3 Immediately after the tabling of the annual budget the accounting officer must make public the annual budget and invite the local community to submit representations in connection with the budget before the budget is approved by Council in terms of section 24 of the MFMA.
- 2.4 Section 67 of the MFMA provides that the Municipality implement and sustain proper and effective controls and procedures when transferring funds of the

- Municipality to an organisation or body outside any sphere of government.
- 2.5 Section 67(1) provides that the accounting officer must be satisfied that the organisation or body has the capacity and agreed to comply with any agreement with the Municipality including all reporting, financial management and auditing requirements as may be stipulated in the agreement, to report at least monthly to the accounting officer on actual expenditure against such transfer and to submit audited financial statements for its financial year to the accounting officer promptly. The organization must implement effective, efficient and transparent financial management and internal control systems to guard against fraud, theft and financial mismanagement and has the obligation to prove in terms of previous similar transfers that it has complied with all the requirements. The accounting officer must through contractual and other appropriate mechanism enforce compliance with this policy.
- 2.6 All transfer of funds in terms of this Policy shall comply with the Constitution, the Systems Act, the Structures Act, the MFMA and any other applicable legislation, regulations and policies that may govern the transfer of municipal funds and that are not in contradiction to the aforementioned legislation.

3. PUBLIC ADVERTISEMENT AND APPLICATION PROCEDURE

- 3.1 Applications for funding of external bodies performing municipal functions shall be considered where organisations or bodies have responded to advertisements published in the local newspapers distributed in the Stellenbosch Municipal Area calling upon organisations or bodies to submit proposals in the prescribed form, as set out 4.3 below, to perform a specific municipal function for a period up to 3 years. Such advertisements may be published quarterly by the accounting officer.
- 3.2 Advertisements should clearly specify the categories for which requests are called, the closing date for applications, who they should be addressed to, and where and how to obtain the relevant documentation pertaining to such applications, including the prescribed forms. Only applications made on the prescribed form (see Annexure A) may be considered.
- 3.3 The organisation/body must submit a detailed business plan with its application, confirming the envisaged outcomes their past achievements in the field and their commitment to performing that particular municipal function effectively and in line with Council's goals as set out in the IDP. Applications must be accompanied by a covering letter on the organisation/body letterhead, signed by the head of the organisation/body and must include the following information:
- 3.3.1 the organisation/body's legal name and a brief description of the organisation/body's business;
 - 3.3.2 the organisation/body's registration number, if any;
 - 3.3.3 the date of establishment, details of the organisation/body's members, founding documents, including constitution and certificates of incorporation;
 - 3.3.4 the contact name of the person signing the application, full street address, telephone number and email address of the organisation;
 - 3.3.5 if funding is required for a specific project, a brief description of the project and what it aims to achieve, as well as the detailed budget

- for and the duration of the project together with a written confirmation by the relevant municipal Director that the project is part of the IDP projects or programs;
- 3.3.6 references, independent of the organisation/body and the head of the organisation/body;
- 3.3.7 most recent audited financial statements not older than 24 months;
- 3.3.8 a summary of its past achievements; and
- 3.3.9 a declaration by the head of the organisation/body to the satisfaction of the Municipal Manager that the organisation/body implements effective, efficient and transparent financial management and internal control mechanism to guard against fraud, theft and financial mismanagement and has in the past complied with requirements for similar transfers of funds.
- 3.4 Individuals will not be considered or appointed as an organisation/body to provide a municipal function as contemplated in this Policy.
- 3.5 Organisations or bodies whose directors, managers, major shareholders or trustees are in service of the state will not be considered or appointed as an organisation/body to provide a municipal function as contemplated in this Policy.
- 3.6 The appointment of a particular organisation/body to perform a municipal function for a period of three (3) years does not guarantee financial support by the Municipality, which will be determined annually when the municipal budget is approved by the Municipal Council.
- 3.7 No late applications received, in response to an advertisement as contemplated in clause 3.1 and 3.2 above will be considered and processed by the Grant Committee.

4. OBLIGATIONS OF THE ORGANISATION/BODY

- 4.1 The head of the organisation/body must acknowledge in writing to the Municipal Manager that the money allocated was received in its bank account and that the money will be utilised in accordance with the completed and signed MOA, the submitted application and this Policy within 30 days of transfer of funds / payment, failing which no future grants may be considered.
- 4.2 The organisation / body shall submit monthly reports on actual expenditure against such transfer, the ward within which activities are conducted as well as the number of people benefiting from the activity to the Municipal Manager.
- 4.3 The relevant municipal Director must co-sign each monthly report to confirm monthly management and oversight of the activities.

5. RIGHTS OF THE MUNICIPALITY, CONTROL AND MONITORING

- 5.1 The relevant municipal Director shall be entitled, at any reasonable time from time to time, to verify and inspect the existence and activities of the organisation/body. The relevant municipal Director or his delegate has the right to physically visit the premises where the organisation/body or funded project is based, to peruse the budgets and any progress report related to the project.

- 5.2 The relevant municipal Director shall manage the service delivery agreement entered into between the Municipality and the organisation / body by inter alia receiving and considering monthly reports, inspecting financial records including audited financial statement.
- 5.3 If the organisation / body fails to comply with the terms and conditions of its service delivery agreement with the Municipality, the accounting officer may in consultation with the relevant municipal Director terminate the agreement with reasonable notice or grant the organization / body an opportunity to rectify the breach within an agreed period of not more than 90 days, failing which the accounting officer may terminate the agreement with reasonable notice.
- 5.4 The Municipality has the right not to give a Grant to any or all organisations/bodies applying for such Grants or to give proportional or partial grants to give. Having been awarded a Grant previously does not give an organisation/body the right to receive a Grant again.
- 5.5 The relevant municipal Director shall ensure that those organisations or bodies, who have received Grants in terms of this Policy:-
 - 5.5.1 comply with all the provisions of the completed and signed MOA;
 - 5.5.2 comply with all reporting, financial management and auditing requirements as stipulated in the MOA;
 - 5.5.3 report at least monthly to the Municipality on actual expenditure against such transfer;
 - 5.5.4 promptly, or no longer than 4 months after the end of their financial year, submit their audited financial statements; and
 - 5.5.5 utilise the grant funding strictly in accordance with the approved business plan and approved budget.
- 5.6 The requirements in paragraphs 5.5.1 to 5.5.4 above shall not apply to organisations where the transfer does not exceed R200 000,00 (two hundred thousand rand), provided the Accounting Officer takes all reasonable steps to ensure that the targeted beneficiaries, as identified by the organisation or body in its application, receive the benefit of such grants and it certifies that compliance by that organisation or body with 5.5.1 to 5.5.4 above is uneconomical or unreasonable.

6. GRANT COMMITTEE

- 6.1 A Grant Committee consisting of at least the Municipal Manager, the Chief Financial Officer and one director of the Municipality, as well as any other official whom the Municipal Manager may include, shall evaluate all applications received in response to the local advertisement.
- 6.2 The Grant Committee will have the power to make recommendations to Council for final appointments and financial allocations.
- 6.3 The Grant Committee must submit a report on its decisions to the Council for final approval.
- 6.4 The Grant Committee shall, in terms of the Systems Act, establish a programme for community consultation and information dissemination regarding the appointment of any organisation/body and the availability of the service delivery agreement for perusal will be communicated to the local community through the media prior to any service delivery agreement being entered into between the Municipality and the organisation or body.

- 6.5 No payments in terms of the allocation will be made to any organisation / body until a service delivery agreement in the form approved by the accounting officer has been signed by the respective parties.
- 6.6 No payment can be made to an organisation/body until it has submitted its audited financial statements as contemplated in this Policy and a statement certified by its auditor that it has fully complied with its agreement with the Municipality.
- 6.7 Payments may be allocated as a once off amount or in tranches as determined by the CFO in consultation with the relevant municipal Director.

7. Funding acknowledgement of the Municipality

Successful applicants will be required to acknowledge the Municipality as the provider of Grant funding in their funding record as well as any public record in respect of Grants received in order to confirm that these transfers of funds are also part of the Municipality's endeavours to meet its strategic objectives and to assist it in carrying out its constitutional powers and functions.

8. COMMENCEMENT

This Policy called the **FINANCING OF EXTERNAL BODIES PERFORMING MUNICIPAL FUNCTIONS POLICY** takes effect on the date on which it is adopted by the Council.

| | <ol style="list-style-type: none"> 7. If the Organisation is a non-profit company as defined in the section 1 of the Companies Act, 2008, a certificate/letter issued by the Companies and Intellectual Property Commission (CIPC) confirming registration must be attached; 8. If the Organisation has been registered as a “non-profit” organisation in terms of the Non-Profit Organisation Act, 1997, a certificate/letter issued by the Department of Social Development confirming registration as a non-profit organisation must be attached; 9. If the Organisation has been registered as a “Public Benefit Organisation” in terms of the Income Tax Act, 1962, a certificate/letter issued by SARS confirming the Organisation's tax exemption status must be attached; and 10. Valid Tax Clearance Certificate issued by SARS. |
| G | <p>The following shall apply:</p> <ol style="list-style-type: none"> 1. The allocation of funds will only be considered if the application document has been fully completed and signed and is accompanied by the required and supporting documentation referred to therein.
Applicants must in their submission clearly indicate / specify and motivate what the funding will be utilised for. 2. The funding must be exclusively utilised for the purpose defined and the successful applicant must submit the necessary undertaking to this effect. 3. Applicants must in their submission satisfy the Council of their ability to execute the project successfully. 4. Organisations who have already received financial or other assistance from the Council during the previous financial year <u>must</u> specify same in their application. 5. No funding will be considered for political groupings, church/sectarian bodies or ratepayers organisations. 6. No funding will be considered where only an individual will benefit or where a member of Council or an official of Stellenbosch Municipality will receive any financial or other gain. 7. Projects outside the boundaries of the Council will not be considered. 8. Subsequent requests from applicants to cover overspending on projects will not be considered. 9. Council will not pay any funds to anyone who has already procured against the perception that they will receive any municipal funds. 10. Successful applicants must at all times comply with the provisions of Section 67(1) of the Municipal Finance Management Act No. 56 of 2003 which <i>inter alia</i> stipulates that the organisation or body has to:- <ul style="list-style-type: none"> • Enter into and comply with a Memorandum of Agreement with the Municipality as well as with all reporting, financial management and auditing requirements as may be contained in such agreement. This memorandum of agreement will bind the successful applicant to deliver on what the application speaks to, but also to commit to become involved with municipal programmes of the community where it functions. The Memorandum of Agreement will be made available to successful applicants for completion. • Report monthly on the actual expenditure of the amount allocated. |

| | |
|----------|---|
| | <ol style="list-style-type: none"> 11. The Council reserves the right not to give funding to any or all organisations applying. 12. Having been awarded funding previously does not give an applicant the right to receive a grant/funding again. 13. Funding will not be considered where a project or organisation is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding, failing which such applicant will be disqualified. 14. Funding will not be considered where in Council's opinion, an organisation received sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and budget for the ensuing financial year. 15. Organisations having received funding from Stellenbosch Municipality during the previous financial year, are required to attached to any new application, a copy of the financial statements relating to the year in which the funding was received from Council, as required in terms of section 67(1) of the Municipal Finance Management Act, 2003 (MFMA). <p>(The Funding of External Bodies Performing a Municipal Function Policy must be consulted for the sake of completeness)</p> |
| H | <p>Undertaking:</p> <p>I/We hereby verify that the information provided in this application is true and correct and that the conditions applicable to the allocation of funds as set out above have been read, understood and will be complied with.</p> <p>I/We also declare that the organisation implements effective, efficient and transparent financial management and internal control mechanisms to guard against fraud, theft and financial mismanagement and has in the past complied with requirements for similar transfer(s) of funds.</p> <p>This completed and signed at Stellenbosch on this.....day of.....20....</p>

| ANNEXURE 1 | 8 |

1. INTRODUCTION

The documented Liquidity Policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to in order to ensure that its current and future liquidity position is managed in a prudent manner.

Liquidity is the amount of cash and / or “near cash” (which refers to assets or security that can easily and quickly be converted to cash), available to be utilized to meet obligations and / or pay commitments. The marketability or ability to buy or sell an asset without incurring unacceptable large losses thus determines the liquidity of an asset or defines it as near cash.

This Policy is implemented to provide guidance on the minimum liquidity level that Stellenbosch Municipality has to maintain in order to comply with required legislative and / or National Treasury directives and within the overall financial management objectives as approved/reviewed by the Council from time to time.

2. BACKGROUND AND APPROACH

Various policies and procedures exist that direct the way in which the business of Stellenbosch Municipality is or should be conducted in a prudent manner. Generally these policies and procedures flow from the prescription made in Legislation i.e. the Municipal Finance Management Act (“MFMA”) and/or directives issued by a national department such as National Treasury.

Guidelines provided by National Treasury indicate that an acceptable level of cash resources needs to be available for working capital requirements (see below).

It is for this reason that the need to have an official Liquidity Policy was identified.

3. LEGISLATIVE REQUIREMENTS

3.1. The MFMA circular 71 stipulates the following two prescribed ratios to manage liquidity:

Cash/Cost Coverage Ratio (Excluding Unspent Conditional Grants) is calculated as:

$$\frac{((\text{Cash and Cash Equivalents} - \text{Unspent Conditional Grants} - \text{Overdraft}) + \text{Short Term Investment})}{\text{Monthly Fixed Operational Expenditure excluding (Depreciation, Amortisation, Provision for Bad Debts, Impairment and Loss on Disposal of Assets)}}$$

Criteria: 1 – 3 times

Current Ratio Current Assets / Current Liabilities

Criteria: 1.5 - 2:1

The above guidelines are noted but the proposed policy is more conservative to ensure that the municipality secures its strong financial position thereby providing comfort to investors.

4. LIQUIDITY POLICY

This policy provides guidance on the determination of the minimum liquidity requirement and the calculation of the liquidity available of Stellenbosch Municipality from time to time (see **Annexure 1**).

Notwithstanding the requirements as reflected in this policy, Stellenbosch Municipality should ensure that its Current Assets (excluding debtors older than 90 days) cover all of its Current Liabilities at least two times.

The policy encapsulates certain key aspects and considerations which have been outlined below:

4.1. KEY COMPONENTS OF MINIMUM LIQUIDITY REQUIRED:

The following constitutes the key elements to take into consideration when determining the liquidity requirement of Stellenbosch Municipality:

- 4.1.1. To comply with statutory requirements it is proposed that the following funds, reserves and provisions be fully covered by unencumbered cash and investments:
 - 4.1.1.1. *All earmarked or conditional grant transfers from spheres of Government or from Public Contributions made to Stellenbosch Municipality that have not yet been utilized;*
 - 4.1.1.2. *All commitments resulting from the legally entrenched rights and benefits employees have, with specific reference to the Council's short term commitment to staff retirement benefits and medical fund claims payable;*
 - 4.1.1.3. *All funds not yet been utilized in relation to agency services provided on behalf of Provincial or National Government should also be treated as earmarked funds;*
 - 4.1.1.4. *All reserves stated by Stellenbosch Municipality on its Statement of Financial Position that have been established for the purposes of making provisions for a defined purpose.*

- 4.1.2. Cognisance also needs to be taken of the external loan commitments and the servicing of capital and interest on these loans. Therefore provision should be made that Stellenbosch Municipality can meet its external loan/financial commitments together with the normal operational expenditure, as well as its liabilities to staff.
- 4.1.3. All investments ceded as security against long term loans need to be excluded from total cash and investment balances for calculation of the minimum liquidity level required.
- 4.1.4. In addition, a level of cash available for normal operational expenditure needs to be held in cash to ensure that, notwithstanding fluctuations in the monthly income levels of Stellenbosch Municipality, Stellenbosch Municipality will be in a position to meet its financial requirements. In this respect, the average monthly operational expenditure needs to be used as a guide of the minimum buffer required. One month's operational expenditure excluding debt impairments, depreciation and other non-cash expenses should be available for liquidity cover.
- 4.1.5. The "golden rule" should be to ensure that Stellenbosch Local Municipality will have adequate liquid assets (those that can be made into cash within 24 hours, weekly or monthly as the requirement might be) to meet its short term financial commitments.

4.2. CALCULATION OF AVAILABLE LIQUIDITY

The amount of liquidity available should be determined from time-to-time. The following, should be regarded as cash and or near cash in calculating the available liquidity:

- 4.2.1. *All cash held in a bank account or invested with a money market fund;*
- 4.2.2. *95% of the value of all NCD's or other tradable instruments issued by a bank that are not already ceded;*
- 4.2.3. *90% of the market value of all listed bonds on the JSE in which Stellenbosch Municipality is allowed to invest in;*
- 4.2.4. *Consumer debtors aged current to 60 days;*
- 4.2.5. *Amount of unspent conditional grants and public contributions excluded from own funds held in bank accounts;*
- 4.2.6. *Funds provided to Council for expenditure on activities executed on behalf of other spheres of Government (Provincial and / or National) as part of an agency function, excluded from own funds held in bank accounts;*
- 4.2.7. *Funds ring-fenced for cash backed reserves that are excluded from own funds held in bank accounts;*
- 4.2.8. *Cash amounts that need to be held by Council resulting from loan covenants' that are part of the conditions of loans extended, but not ceded outright to lenders;*

4.2.9. *The undrawn portion of unconditional bank overdraft facility or liquidity facility available to Stellenbosch Municipality.*

The aforementioned in paragraphs 4.1. and 4.2. can schematically be reflected as follows:

4.3. IMPLEMENTATION AND MONITORING OF COMPLIANCE WITH LIQUIDITY POLICY:

Once the policy is approved, the CFO is to be tasked to ensure that the required cash has to be maintained to continue meeting the requirements as set out in this policy.

Firstly, the minimum required liquidity level should be calculated based on audited annual financial statements. This level of liquidity required needs to be specifically budgeted for and on a quarterly basis be reported to the Finance Committee and / or other Committees as might be stipulated by Council as well as to Council.

Notwithstanding National Treasury's three months operational expenditure guideline and the one month operational expenditure buffer proposed as a minimum by the liquidity policy, it is recommended that Council set a target of one month's operational expenditure liquidity buffer to be achieved at the end of the transitional period (reference paragraph 6).

The cash provisions made to repay external loan commitments, if specifically earmarked, should also be added to this minimum working capital liquidity, to prevent

fluctuations in the working capital reserve that could put the minimum level of liquidity levels under pressure.

5. CORPORATE GOVERNANCE (OVERSIGHT)

Compliance with this policy will be monitored by the Chief Financial Officer. The Chief Financial Officer must present the liquidity compliance reports to the Finance Committee and the Audit Committee of the municipality.

Where compliance has been breached the Chief Financial Officer must present an action plan to correct the non-compliance. The Finance Committee must monitor the successful implementation of the corrective action plans and report progress to Council.

6. POLICY MANAGEMENT

The Liquidity Policy forms part of Stellenbosch Municipality overall financial objectives and therefore forms part of approved Budget Policies. The policy must be reviewed at least annually during the budget revision and presented to Council for approval.

The policy is effective from the date it is approved by Council.

ANNEXURE 1Liquidity Requirement as per Liquidity Policy

Financial Year End: _____

Liquidity Requirement Calculation [as stipulated in Paragraph 4.1.]

| | |
|---|--|
| All earmarked and/or conditional grants received but not yet utilised | |
| Value of legally entrenched short term rights and benefits of employees related to Medical benefits & Retirement benefits | |
| Funds held for agency services not yet performed | |
| Reserve funds reflected in Statement of Financial Position that are assumed to be held in cash | |
| Capital redemption and interest payments on external loans not reflected as part of normal operational expenditure | |
| Onemonth operational expenditure excluding non-cash items | |
| Commitments resulting from contracts concluded as part of Capex Programme, not reflected in operational budget | |
| TOTAL LIQUIDITY REQUIREMENT | |

Actual available liquidity held [reference paragraph 4.2.]

| | |
|--|--|
| Bank Balance at e.g.: | |
| - ABSA, FNB, Standard Bank, Nedbank, Investec, Money Market | |
| Bank balance sub total | |
| 95% of all other term investments with Banks | |
| 90% of Market value of all Bonds on the JSE that are held | |
| Consumer debtors (current – 60 days) | |
| Other reserves held in cash not reflected in bank balances mentioned above for e.g.: | |
| - Unspent conditional grants | |
| - Payments received for agency functions not yet performed | |
| - The cash value of reserves held | |
| - Cash deposits held as part of loan covenants or ceded | |
| - Undrawn bank overdraft facility or committed liquidity lines available | |
| TOTAL LIQUIDITY AVAILABLE | |

LIQUIDITY SURPLUS (SHORT FALL)

SURPLUS TO BE APPROPRIATED TO CAPITAL REPLACEMENT RESERVE

(See Borrowing, Funds and Reserves Policy)

1. DEFINITIONS

1.1 In this Policy, unless the context indicates otherwise, the following definitions are applied:

| | |
|-------------------------------------|---|
| <i>“Accounting Officer”</i> | means the Municipal Manager for the Municipality as contemplated in section 60 of the Local Government: Municipal Finance Management Act, 56 of 2003 |
| <i>“CFO”</i> | means the Chief Financial Officer designated in terms of section 80(2) (a) of the Local Government: Municipal Finance Management Act, 56 of 2003 |
| <i>“Cost”</i> | shall comprise costs of purchase, costs conversion and other costs incurred in bringing the inventories to their present location and condition |
| <i>“Delegated authority”</i> | means the official who is given the authority for relevant functions in terms of the municipality’s written delegations; |
| <i>“Good received note”</i> | means a document which is used to acknowledge the receipt of goods in good condition and correct quantities |
| <i>“Inventories”</i> | are assets:
In the form of material or supplies to be consumed in the production process,
In the form of materials or supplies to be consumed or distributed in the rendering of services
Held for sale or distribution in the ordinary course of operations,
or
In the process of production for sale or distribution |
| <i>“Municipality”</i> | shall mean the Stellenbosch Municipality; |
| <i>“Net Realisable”</i> | Is the estimated selling price in the ordinary course of operations less the estimated costs of completion and estimated costs necessary to make the sale exchange or distribution. |

| | |
|--------------------------------------|---|
| <i>“Obsolete inventory”</i> | means items that have expired, are redundant or damaged; |
| <i>“Re-order level”</i> | means the level of inventory at which inventory is re-ordered; |
| <i>“Requisition form”</i> | means a written request to supply specified inventory; |
| <i>“Store”</i> | means a place where inventory is stored and reserved for future use, or a source from which supplies may be drawn; |
| <i>“Inventory Controller”</i> | means an official responsible for the requisition, receipt, issue, recording, safeguarding of inventory and cost-effective and efficient management of inventory. |
| <i>“Stock Issue Register”</i> | means a document which is used to authorize the removal or issue of stock items from stores. |

2. OBJECTIVE OF THE POLICY

- 2.1 The policy aims to achieve the following objectives which are to:-
- a) Provide guidelines that employees of the Municipality must follow in the management and control of inventory, including safeguarding and disposal of inventory.
 - b) Procure inventory in line with the established procurement principles contained in the Municipality's Supply Chain Management Policy.
 - c) Eliminate any potential misuse of inventory and possible theft.

3. SCOPE

- 3.1 This policy applies to Stellenbosch Municipality's inventory received by the Inventory Controller and issued to users.
- 3.2 This policy specifically excludes:
- a) Pharmaceutical inventory, livestock and face value forms; and
 - b) Equipment and other assets not defined as inventory;

4. LEGAL FRAMEWORK

- 4.1 In terms of the MFMA, the Accounting Officer for a municipality must:
- a) Be responsible for the effective, efficient, economical and transparent use of the resources of the municipality as per section 62 (1)(a);
 - b) Take all reasonable steps to prevent unauthorised, irregular and fruitless and wasteful expenditure and other losses as per section 62(1)(d);
 - c) Be responsible for the management, including the safeguarding and the maintenance of the assets, and for the management of the liabilities, of the municipality as per section 63 (1)(a) and (b).

4.2 In terms of GRAP 12:

- 4.2.1 Inventories shall be recognized as an asset if, and only if,
- a) it is probable that future economic benefits or service potential associated with the item will flow to the entity ,and
 - b) the cost of the inventories can be measured reliably.

4.3 MEASUREMENT AT RECOGNITION

- 4.3.1 Inventories that qualify for recognition as assets shall initially be measured at cost,

- 4.3.2 Where inventories are acquired at no cost, or for nominal consideration, their costs shall be their fair value as at the date of acquisition.

4.4 MEASUREMENT AFTER RECOGNITION

- 4.4.1 Inventories shall be measured at the lower of cost and net realization value, except where paragraph .18 of GRAP 12 applies.
- 4.4.2 Inventories shall be measures at the lower of cost and current replacement cost where they are held for:
- a) distribution at no charge or for a nominal charge ,or
 - b) consumption in the production process of goods to be distributed at no charge or for a nominal charge.

4.5 RECOGNITION AS AN EXPENSE

- 4.5.1 When inventories are sold, exchanged or distributed, the carrying amount of those inventories shall be recognized as an expense in the period in which the related revenue is recognized. If there is no related revenue, the expense is recognized when the goods are distributed, or related service is rendered. The amount of any write-down of inventories to net realizable value and all losses of inventories shall be recognized as an expense in the period the write-down or loss occurs. The amount of any reversal of any writes –down of inventories arising from an increase in net realizable value, shall be recognized as a reduction in the amount of inventories recognized as an expense in the period in which the reversal occurs.
- 4.5.2 Some inventories may be allocated to other assets accounts, for example, inventory used as a component of self-constructed property, plant or equipment. Inventories allocated to other assets in this way are recognized as an expense during the useful life of that asset.

5. INVENTORY PROCEDURES

- 5.1 The procedures for inventory must be followed to ensure that:
- a) Inventory is safeguarded at all times;
 - b) There are accurate records of quantities on hand at all times;
 - c) Optimum inventory levels are maintained to meet the needs of users;
 - d) Only authorised issues of inventory are made to users; and
 - e) Items placed in store are secured and only used for the purpose for which they were purchased.

5.2 APPOINTMENT OF RESPONSIBLE OFFICIALS

- 5.2.1 The CFO must appoint, in writing, officials to perform the duties of an Inventory Controller in terms of this Policy.
- 5.2.2 Adequate segregation of duties between the requisition, receipt, recording, storage and safekeeping of inventory and the management and control thereof must be maintained to avoid the potential occurrence of errors and fraud.

5.3 ORDERING OF INVENTORY

Standard Supply Chain Management procedures as per approved Supply Chain Management policy are to be implemented.

5.4 RECEIPT OF INVENTORY

All inventory must be received by the completion of a goods received note and processed on the financial management system.

5.5 STORAGE OF INVENTORY

- 5.5.1 Inventory must be stored in a secured, exclusive use area, under lock and key, furthermore the inventory must be insured in terms of the Risk Management Policy of the municipality.
- 5.5.2 The area must be used exclusively for the storage of inventory, with limited authorised access only.
- 5.5.3 Inventory must be positioned to facilitate efficient handling and checking.
- 5.5.4 All items must be stored separately, with proper segregation.
- 5.5.5 Inventory must be clearly labeled for easy identification. Inventory tag/bin cards or inventory labels may be used to identify each item and to aid in the physical verification of the items.
- 5.5.6 Where practically possible, all items of the same type and reference must be stored together as per the description on the inventory records.
- 5.5.7 Items with limited shelf life must be rotated on a first in first out basis, in accordance with paragraph .35 of GRAP, to reduce the occurrence of expired or obsolete stocks.
- 5.5.8 Due diligence and care must be exercised to prevent damage of, or deterioration of inventory.

- 5.5.9 Due regard must be given to any safety standards which may apply to the storage of certain inventories.
- 5.5.10 Steps must be taken to ensure safe custody of items, including precautions against loss or theft.
- 5.5.11 The Inventory Controller or Delegated Official responsible for the custody and care of inventory must ensure that in his/her absence such items, where applicable, are securely stored.
- 5.5.12 The responsibility for the custody of the storeroom keys must be allocated by the delegated authority to an official who is accountable for its use.
- 5.5.13 No unauthorised persons/officials shall obtain entry to premises, buildings or containers where inventory is kept, unless accompanied by the responsible official.
- 5.5.14 Whenever a change in the Inventory Controller occurs, an inventory count must be conducted.
- 5.5.15 An independent official shall be nominated in writing by the delegated authority to assist the official handing and taking over with the checking of the inventory and any discrepancies.
- 5.5.16 Should the above not be complied with, the official taking over shall be liable for any discrepancies.
- 5.5.17 A handing-over certificate as prescribed by the CFO, must be completed by the handing and taking over officials and a copy retained for record purposes.
- 5.5.18 The following fire protection precautions must be adhered to:
- a) Inventories of an inflammable or dangerous nature shall be stored and handled in such a manner that persons or property are not endangered and in compliance with the requirements of any local authority;
 - b) The area must be clearly signposted; and
 - c) Fire extinguishing equipment must be placed in the area where inventories are held and must be serviced regularly.

5.6 ISSUE OF INVENTORY

- 5.6.1 Only the Inventory Controller is authorised to issue inventory from the storeroom.
- 5.6.2 Inventory must only be issued in terms of the approved requisition form of the Municipality.
- 5.6.3 All requisition forms must be ruled off immediately below the last item to prevent items being added once the requisition is authorised by the responsibility manager.

- 5.6.4 The Inventory Controller must prepare the Stock Issue Register once stock items to be issued have been picked up from the shelves
- 5.6.5 The official receiving the inventory must acknowledge the receipt of stock items requested, by signing the Stock Issue Register prepared by the Inventory Controller.
- 5.6.6 Inventories must be issued and used for official purposes only.

5.7 OBSOLETE INVENTORY

- 5.7.1 The preparatory work for the disposal of obsolete inventory must be undertaken by the Inventory Controller and verified by the Assets Accountant.
- 5.7.2 The Accounting Officer or delegated authority must convene a Disposal Committee for the disposal of obsolete inventory.
- 5.7.3 The Disposal Committee should consist of at least three officials, one of whom must act as the chairperson.
- 5.7.4 The delegated authority may approve the write-off of inventory, if satisfied that: -
 - a) The inventory has expired and is redundant;
 - b) The inventory is of a specialised nature and has become outdated due to the introduction of upgraded and more effective products;
 - c) The inventory cannot be used for the purpose for which it was originally intended; or
 - d) The inventory has been damaged and is rendered useless.
- 5.7.5 All disposed of items must be updated in the inventory records/register/database for the purposes of proper management and control.

5.8 INVENTORY COUNT

- 5.8.1 Items may be subject to an inventory count on a quarterly basis.
- 5.8.2 Where the quantity of inventory is too large for the count to be completed on a single occasion, inventory counts may be carried out on a rotational basis with a full inventory count at the end of each financial year.
- 5.8.3 All approved Municipal procedures and processes must be complied with during the inventory count.

- 5.8.4 The Inventory Controller must submit a report to the CFO after investigating any discrepancies between the inventory records/register/database, bin/tag cards or inventory labels and the physical inventory.
- 5.8.5 The CFO must submit a report with the findings to the Accounting Officer, in order to have the matter reported to the Council of the Municipality for the write-off of any inventories losses, or the write –up of surpluses.
- 5.8.6 The appropriate disciplinary action must be instituted when applicable.
- 5.8.7 The inventory record, register, database or system must be updated accordingly.

6. INVENTORY RECORDS

- 6.1. An inventory record/register/database must be maintained for all inventory items, either manually and / or electronically.
- 6.2 All relevant information must be included for the proper management and control of all inventory items. It is recommended that details include but are not limited to:
 - a) Order number/date;
 - b) Item description;
 - c) Quantity and value of stock on hand;
 - d) Quantity and value of stock received;
 - e) Quantity and value of stock issued;
 - f) Re-order level;
 - g) Optimum inventory level;
 - h) Quantity and value of obsolete stock; and
 - i) Opening/closing balance.
- 6.3 An inventory register/database must be printed monthly and the hard copy filed in a chronological order to maintain a proper audit trail.

7. REPORTING

- 7.1 A report must be submitted at least quarterly to the Chief Financial Officer and/or the Assets Manager detailing the following:
 - a) Any inventory shortages or surpluses and the reasons for such;
 - b) Any inventory deficits proposed to be written-off; and
 - c) Any obsolete inventory items.

- 7.2 Inventories purchased during the financial year must be disclosed at cost or net realizable value in the disclosure notes of the Financial Statements of the Municipality.
- 7.3 In terms of GRAP the financial statements shall disclose:
- a) the accounting policies adopted in measuring inventories, including the cost formula used,
 - b) the total carrying amount of inventories and the carrying amount in classifications appropriate to the entity,
 - c) the carrying amount of inventories carried at fair value less costs to sell,
 - d) the amount of inventories recognized as an expense during the period,
 - e) the amount of any write-down of inventories recognized as an expense in the period in accordance with paragraph .43,
 - f) the amount of any reversal of any write-down that is recognized as a reduction in the amount of inventories recognized as an expense in the period in accordance with paragraph .43,
 - g) the circumstances or events that led to the reversal of a write-down of inventories in accordance with paragraph .43, and
 - h) the carrying amount of inventories pledged as security for liabilities.

8. CLASSIFICATION OF INVENTORY

As per National Treasury Standard Chart of Accounts, inventory shall be classified as follows:

| Inventory Categories | Consumable Categories |
|--------------------------------------|---------------------------------|
| Ammunition & Security Supplies | Consumable Supplies (level 4) |
| Clothing Material & Accessories | Agricultural Supplies (level 5) |
| Farming & Gardening Supplies | Gifts & Awards |
| Fuel, Oil & Gas | Fuel Supplies |
| Crockery & Linen | Media Collections |
| Learning & Teaching Support Material | Building & Construction |
| Assets for Distribution | Contraceptives |
| Materials & Supplies | First Aid Kit |
| Medical Supplies | Laboratories |
| Medicines | Security Accessories |
| Military Stores | Bags & Accessories |
| Laboratory Chemicals & Supplies | Stationary |

9. POLICY ADOPTION

This policy has been reviewed and approved by the Council of Stellenbosch Municipality and is applicable with effect from 1 July 2019.

STELLENBOSCH MUNICIPALITY

PREFERENTIAL PROCUREMENT POLICY

2021/2022

STELLENBOSCH MUNICIPALITY

PREFERENTIAL PROCUREMENT POLICY

TABLE OF CONTENTS

1. PREAMBLE

- 1.1 The Constitution of the Republic of South Africa, 1996 in section 217 requires an organ of state to contract for goods or services in accordance with a procurement system which is fair, equitable, transparent, competitive and cost effective and to grant preferences within a framework prescribed by National Legislation.
- 1.2 A National Preferential Procurement Policy Framework Act, 2000 (Act 5 of 2000)- [PPPFA] was promulgated in response to the Constitutional provision and allow for an organ of state to develop a preferential procurement policy and to implement such policy within the PPPFA framework.

From the preamble from the Constitution:

*We therefore, through our freely elected representatives, adopt this Constitution as **the supreme law of the Republic** so as to*

- *Heal the divisions of the past and establish a society based on democratic values, social justice and fundamental human rights;*
- ***Lay the foundations for a democratic and open society in which government is based on the will of the people and every citizen is equally protected by law;***
- ***Improve the quality of life of all citizens and free the potential of each person; and***
- *Build a united and democratic South Africa able to take its rightful place as a sovereign state in the family of nations.*

From Chapter 7 of the Constitution:

152. Objects of local government

1. The objects of local government are -

- a. *to provide democratic and accountable government for local communities;*
- b. *to ensure the provision of services to communities in a sustainable manner;*
- c. *to promote social and economic development;*
- d. *to promote a safe and healthy environment; and*
- e. *to encourage the involvement of communities and community organisations in the matters of local government.*

2. A municipality must strive, within its financial and administrative capacity, to achieve the objects set out in subsection (1).

153. Developmental duties of municipalities

A municipality must

- a. *structure and manage its administration, and budgeting and planning processes to give priority to the basic needs of the community, and to promote the social and economic development of the community; and*
- b. *participate in national and provincial development programmes.*

2. FOREWORD

The policy of Stellenbosch Municipality – in respect of Preferential Procurement is that:

- 2.1 State expenditure is recognised as an instrument of government policy to achieve economic, socio-economic and development objectives.
- 2.2 Procurement can be applied as an instrument of secondary redistribution to alter primary income distribution and as a means to address historic imbalances by means of creating employment and business opportunities for historically disadvantaged groups in the South African society.
- 2.3 Preferential Procurement is recognised as a valid instrument for such social reform.
- 2.4 It is recognised that preferential procurement cannot be applied without cost and that such cost should be subject to the Municipal Budget and the prioritisation processes applicable to all Municipal expenditure.
- 2.5 Ultimately, preferential procurement could go some way to providing a springboard to encourage redistribution and reducing economic concentration, which in turn would foster competition and promote effective and appropriate resource allocation.
- 2.6 The Stellenbosch Municipality Preferential Procurement Policy will be reviewed regularly.
- 2.7 This Policy marks the beginning of a long term path the Stellenbosch Municipality intends to walk with the citizens of Stellenbosch and that this Policy represents the first phase of implementation. With the increase in maturity of the Stellenbosch Municipality as well as its suppliers, it is further accepted that this Policy will also mature to the extent that visible socio- and economic benefits can be experienced by all citizens living in Stellenbosch.

3. PURPOSE AND OBJECTIVES

The broad purpose of the Preferential Procurement Policy is to:

- 3.1 Validate Stellenbosch Municipality's commitment to Preferential Procurement.
- 3.2 Ensure effective and efficient application of resources.
- 3.3 Promote accountability, transparency and fairness.
- 3.4 Create opportunities for local small, medium and micro enterprises.

- 3.5 Enhance quality of services.
- 3.6 Stimulate socio-economic development.
- 3.7 Eliminate and counter corruption.
- 3.8 Contribute towards reduction of unemployment, especially within the Stellenbosch Municipal Area.
- 3.9 Broadening the tax base within the Stellenbosch Municipal Area.
- 3.10 Encourage linkages between small and large enterprises.
- 3.11 Promote skills transfer and training of the historically disadvantaged.
- 3.12 Protect local industry against unfair competition.

4. LEGISLATIVE FRAMEWORK

Constitution, 1996 (Act 108 of 1996)

- 4.1 Section 217(1) of the Constitution, 1996 (Act 108 of 1996) provides that when contracting for goods and services, organs of state must do so in accordance with a system that is fair, equitable, transparent, competitive and cost effective.
- 4.2 Section 217(2) and (3) of the Constitution allows organs of state to grant preferences when procuring for goods and services within a Framework prescribed by National legislation.

Local Government Municipal Finance Management Act, 2003 (Act 56 of 2003) – [MFMA] and related SCM Treasury Regulations, 2005 [SCM TR]

- 4.3 The MFMA aims to regulate financial management and Supply Chain Management [SCM] of local government to ensure that all revenue, expenditure, assets and liabilities are managed efficiently and effectively.
- 4.4 Sections 110 – 119 of the MFMA deals with SCM requirements and must be read together with the SCM TR's 1 – 52 issued in terms of section 168 of the MFMA through GG 27636 effective from 30 May 2005. Both these sets of prescripts supports the application of the PPPFA.

Preferential Procurement Policy Framework Act, 2000 (Act 5 of 2000) – [PPPFA]

- 4.5 The PPPFA, 2000 took effect on 3 February 2000. The main thrust of the PPPFA, 2000 is that an organ of state must determine its preferential procurement policy and implement such within the preferential procurement framework, the latter which is commonly called the '80/20 or 90/10 principle'.
- 4.6 The National Treasury, in consultation with the Department of Trade and Industry, reviewed the Regulations issued in terms of the PPPFA, in 2001, and issued new Regulations that become effective on 01 April 2017

5. PRINCIPLES

- 5.1. The principles that underpin this policy are as follows:
- 5.1.1 Sound commercial principles will underlie all transactions. There will be no compromise on quality, service delivery or any other commercial aspects related to the delivery of business objectives.
- 5.1.2 All preferential procurement processes will be transparent and subjected to audit in accordance with sound business principles and practices.
- 5.1.3 Stellenbosch Municipality will only conduct business with service providers that comply with legal requirements (registered with SARS; municipal taxes are not in arrears for more than three months; not on the restricted suppliers or tender defaulters lists; suppliers not deemed as in the service of the State, etc.)
- 5.2. The Policy is founded upon the following core principles:

5.2.1. Value for money

Price alone is often not a reliable indicator and will not necessarily obtain the best value for money by accepting the lowest price offer that meets mandatory requirements. Best value for money means the best available outcome when all relevant costs and benefits over the procurement cycle are considered.

5.2.2. Open and effective competition

All procurement laws, policies, practices and procedures must be readily accessible to all parties involved in the procurement process. The procurement process must be open and transparent and reasons must be provided for decisions in terms of current legislation.

5.2.3. Ethics and fair dealing

All procurement officials must comply with the municipal ethical standards to promote mutual trust and respect and an environment where business can be conducted in a fair and reasonable manner. The following is regarded as an acceptable ethical behaviour:

- Open, honest and co-operative business relations.
- Confidentiality of commercial information.
- Avoidance of conflict of interest or a perception of bias.
- Disclosure of conflict of interest as soon as they arise.
- Fair dealing and impartiality in the conduct of tender evaluations.
- Avoidance of combative or collusive practices.

5.2.4. Accountability and reporting

Procurement officials and other officials involved in SCM must be answerable for their decisions and actions to the public.

5.2.5. Equity

Stellenbosch Municipality will at all times strive to enhance the development of SMME's and B-BBEE enterprises' to allow them to contribute meaningfully in the economy of the Stellenbosch Municipal Area.

6. POLICY STATEMENTS**6.1 Application**

6.1.1. This Policy will apply to all active industry sectors in the Stellenbosch Municipal Area. It is accepted that through the population of reliable data, trends will be evident which will continuously require a review of the Policy to ensure its relevance of all active industry sectors.

6.1.2. This Policy must be read with the Stellenbosch Municipality's SCM Policy

6.1.3. Construction tenders will also have to adhere to the requirements of the CIDBA.

6.2 Targeting

6.2.1. Targeting will be regarded as a specific goal identified by Stellenbosch Municipality and will be reflected in Part 7 to this Policy.

- 6.2.2. These targets will be determined prior to the invitation of tenders and reflected as special conditions.

6.3 Payment cycles

- 6.3.1. The payment of invoices is dependent on timely invoicing, approval of invoices and on the payment administration. Responsible officials must process approved invoices within 30 days of receiving the invoice, unless otherwise provided for in the contract.
- 6.3.2. Reasons for not approving an invoice must be communicated to the tenderer prior to the lapsing of the said 30 days.
- 6.3.3. Officials must endeavour to, where feasible, process invoices of SMME's within 7-15 days in order to promote their cash flow position.

7. PREFERENCE TARGETS IDENTIFIED

7.1 Considering all the data available this Policy for the 2019/20 financial years will strive to achieve the following targets linked to its identified opportunities listed in paragraph 7.1 above:

| POLICY OBJECTIVE | TARGET |
|---|--|
| Improve the local economic market | ➤ Make 10%appointments to local businesses through Formal Quotations for appointments below R200,000 |
| Improve the local economic market | ➤ Obtain 30% quotations from local businesses for appointments below R30,000 |
| Employment of local semi-& unskilled workers | ➤ Identify 10% of SCM tenders that are labour intensive to include specific conditions of a practical content of local semi-& unskilled workers from LED database / Indigent list. |

Methodology to achieve targets in the short term is to include specific conditions in the SCM documents for Formal Quotations and Bids similar to the following two examples:

Example No 1:

“SPECIFIC CONDITIONS: TOTAL MAINTENANCE OF PARKS AND P.O.S WITH MANUAL MACHINES AS WELL AS ALL FLOWERBEDS AND YOUNG TREES IN THE MUNICIPAL AREA:

The intention of the municipality is to promote development of all enterprises. Suitably qualified contractors will be expected to spend at least **80%** of the value of the work on local people to ensure that local economic development is promoted. For this purpose the municipal area is divided into 5 smaller areas. For each area the service provider will be required to appoint a supervisor, and a team of at least **6** people.”

Monitoring will be based on the following methods by the End user dept.

1. Local Municipal accounts / Affidavits with ID numbers certified
2. Training and skills development certificates issued

Example No 2:**TENDER DATA: SPECIAL CONDITIONS RELEVANT TO PROJECT.**

The following Conditions shall be adopted as per the Municipal PPPFA Policy

| SPECIAL CONDITIONS OF TENDER | | |
|--|-----------------------|----------------------------|
| | Comply
Y/N | Ref in
proposal |
| A. CONDITIONS APPLICABLE TO THE PROMOTION OF MUNICIPAL LOCAL AND SOCIO-ECONOMIC DEVELOPMENT | | |
| <p>The full portion budgeted for unskilled labour will be executed by unskilled, unemployed labourers who are beneficiaries of this project. The service provider must provide evidence of the identity and addresses of these labourers within 14 days after award of the contract.</p> <p>Minimum prescribed wages must be paid.</p> <p>In the event that this condition cannot be adhered to the contractor must obtain prior approval from the Municipality.</p> | | |
| <p>All materials procured for this project MUST be sourced from local suppliers</p> <p>In the event that this condition cannot be adhered to the contractor must obtain prior approval from the Municipality.</p> | | |
| <p>Use a local EME sub-contractor in for all manual labour in regards to excavations, filling and compaction of cable trenches, pole holes road crossings etc.</p> <p>Suppliers must submit sub-contracting agreement with the tender proposal, together with an indication of the payment arrangements.</p> <p>In the event that this condition cannot be adhered to the contractor must obtain prior approval from the Municipality.</p> | | |
| Suppliers must submit sub-contracting agreement with the tender proposal, together with an indication of the payment arrangements | | |
| B. CONDITIONS APPLICABLE AFTER CLOSING OF TENDER BUT BEFORE A SELECTED SERVICE PROVIDER IS ANNOUNCED | | |
| Any additional information upon request must be submitted in writing within 48 hours of receipt. | | |
| C. CONDITIONS APPLICABLE AFTER AWARDING OF THE TENDER | | |
| The service provider must provide the Municipality with a completed list of local labourers to be used, within 14 days after final award of the tender for approval by the Municipality. | | |
| <p>The aforesaid list must be updated and submitted together with the service providers progress report and invoice, inclusive of the following details:</p> <p>a) Salary / wages spent on local employees versus total wages / salary budget at site</p> <p>b) Number of local employees employed versus per total workforce at site</p> <p>c) Payments made to the subcontractor and his performance</p> | | |

| | | |
|---|--|--|
| Any amendments prior approval from the Municipality.
The service provider must provide local labourers with basic on-the-job training and provide them with a reference letter after completion of their services. | | |
|---|--|--|

8. IMPLEMENTATION

- 8.1 This Policy is effective from 1 July 2019.
- 8.2 It is the responsibility of the Office of the CFO and various Line Department Managers to bring the content of this Policy to the attention of all parties concerned.
- 8.3 This Policy marks the beginning of a long term path the Stellenbosch Municipality intends to walk with the citizens of Stellenbosch and that this Policy represents the first phase of implementation. With the increase in maturity of the Stellenbosch Municipality as well as its suppliers, it is further accepted that this Policy will also mature to the extent that visible socio- and economic benefits can be experienced by all citizens living in Stellenbosch.
- 8.4 In order to achieve the above, the following immediate implementation steps are required:

By 30 September 2019:

- a. Increased capacity in the SCM Unit.
- b. Identification and appointment of a PPPFA Champion.

9. DEFINITIONS

The words in this policy shall bear a meaning as prescribed and/or ascribed by applicable legislation, and in the event of a conflict, the meaning attached thereto by National Legislation shall prevail.

- 9.1 **“Act”** means the Preferential Procurement Policy Framework Act, 2000 (Act No. 5 of 2000);
- 9.2 **“Black people”** as defined in the Broad-Based Black Economic Empowerment Act, 2003 (Act No 53 of 2003), is a generic term which means Africans, Coloured and Indians.
- 9.3 **“B-BBEE”** means broad-based black economic empowerment defined as the economic empowerment of all black people including women, workers, youth, people with

disabilities and people living in rural areas through diverse but integrated socio-economic strategies that include, but are not limited to:

- Increasing the number of black people that manage, own and control enterprises and productive assets;
- Facilitating ownership and management of enterprises and productive assets by communities, workers cooperatives and other collective enterprises;
- Human resource and skills development;
- Achieving equitable representation in all occupational categories and levels in the workforce;
- Preferential procurement; and
- Investment in enterprises that are owned or managed by black people.

- 9.4 **“B-BBEE status level of contributor”** means the B-BBEE status received by a measured entity based on its overall performance using the relevant scorecard contained in the Codes of Good Practice on Black Economic Empowerment, issued in terms of section 9(1) of the Broad-Based Black Economic Empowerment Act.
- 9.5 **“Broad-Based Black Economic Empowerment Act”** means the Broad-Based Black Economic Empowerment Act, 2003 (Act No 53 of 2003);
- 9.6 **“Collusion”** means an intentional and unlawful agreement by two or more companies/firms which is intended or calculated to misrepresent facts or defraud with the sole purpose of influencing the procurement process thereby prejudicing the interests of the service provider;
- 9.7 **“Companies and Shares”** shall be read so as to include Close Corporations and members interests mutatis mutandis;
- 9.8 **“Comparative price”** means the price after the factors of a non-firm price and all unconditional discounts that can be utilised have been taken into consideration;
- 9.9 **“Consortium or Joint Venture”** means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract;
- 9.10 **“Contract”** means the agreement that results from the acceptance of a tender by an organ of state;
- 9.11 **“CFO”** means Chief Financial Officer

- 9.12 **“Disability”** means, in respect of a person, a permanent impairment of a physical, intellectual, or sensory function, which results in restricted, or lack of, ability to perform an activity in the manner, or within the range, considered normal for a human being;
- 9.13 **“Executive Management Committee”** shall mean a committee comprising the Agency’s Heads of Divisions and any other Manager so invited.
- 9.14 **“Firm price”** is the price that is only subject to adjustments in accordance with the actual increase or decrease resulting from the change, imposition, or abolition of customs or excise duty and any other duty, ‘levy, or tax, which, in terms of a law or regulation, is binding on the contractor and demonstrably has an influence on the price of any supplies, or the rendering costs of any service, for the execution of the contract;
- 9.15 **“Individual”** an individual shall mean a natural person;
- 9.16 **“Indigent”** any person who appears on the Municipality’s indigent register as of 1 July of the year under consideration;
- 9.17 **“Local Labour”** means South African residents who permanently resides in the Stellenbosch Municipal area;
- 9.18 **“Local Business”** means an enterprise which has its sole office or head office located within the Stellenbosch Municipal area;
- 9.19 **“Local Content”** means local manufacturing as contemplated in PPPFA Regulations 2011, Regulation 1;
- 9.20 **“Local economic development”** means local and socio-economic development as contemplated in section 152 of the Constitution, 1998;
- 9.21 **“Management”** in relation to an enterprise or business, means an activity inclusive of control and performed on a daily basis, by any person who is a principal executive officer of the company, by whatever name that person may be designated, and whether or not that person is a director;
- 9.22 **“Non-firm prices”** means all prices other than “firm” prices;
- 9.23 **“Person”** includes reference to a juristic person;
- 9.24 **“Rand value”** means the total estimated value of a contract in Rand denomination which is calculated at the time of tender invitations and includes all applicable taxes and excise duties;

- 9.25 **“Sub-Contracting”** means the primary contractor’s assigning or leasing or making out work to, or employing another person to support such primary contractor in the execution of part of a project in terms of the contract;
- 9.26 **“Nominated Sub-contractor”** means contractors accredited on the Municipal database for construction related work as contemplated in the CIDBA.
- 9.27 **“Tender”** means a written offer or bid in a prescribed or stipulated form in response to an invitation by an organ of state for the provision of services or goods;
- 9.28 **“Tender format/strategy”** means the special conditions describing the tender strategy approach in order to achieve identified targets.
- 9.29 **“Trust”** means the arrangement through which the property of one person is made over or bequeathed to a trustee to administer such property for the benefit of another person; and
- 9.30 **“Trustee”** means any person, including the founder of a trust, to whom property is bequeathed in order for such property to be administered for the benefit of another person.

Introduction

The purpose of the annual budget circular is to guide municipalities with their compilation of the 2021/22 Medium Term Revenue and Expenditure Framework (MTREF). This circular is linked to the Municipal Budget and Reporting Regulations (MBRR) and the municipal Standard Chart of Accounts (*mSCOA*); and strives to support municipalities' budget preparation processes so that the minimum requirements are achieved.

Among the objectives of this budget circular is to demonstrate how municipalities should undertake annual budget preparation in accordance with the budget and financial reform agenda by focussing on key “game changers”. These game-changers include ensuring that municipal budgets are funded, revenue management is optimised, assets are managed efficiently, supply chain management processes are adhered to, *mSCOA* is implemented correctly and that audit findings are addressed.

Municipalities are reminded to refer to the annual budget circulars of the previous years for guidance on budget preparation that is not covered in this circular.

1. The South African economy and inflation targets

The National Treasury projects real economic growth of 3.3 per cent in 2021, following an expected contraction of 7.8 per cent in 2020. Real GDP growth is expected to moderate to 1.7 per cent in 2022 and 1.5 per cent in 2023, averaging 2.1 per cent over the medium term.

South Africa experienced its largest recorded decline in economic output in the second quarter of 2020 due to the strict COVID-19 lockdown. Real GDP fell by 17.1 per cent relative to the previous quarter (or 51 per cent on a seasonally adjusted and annualised basis), with all major sectors except agriculture declining. The second-quarter results were weaker than expected in the June 2020 special adjustments budget, which projected a contraction of 7.2 per cent in 2020.

High-frequency data for the third quarter – such as the volume of electricity distributed, mining and manufacturing output, business confidence and the Absa Purchasing Managers' Index (PMI) – shows evidence of a limited economic rebound. Although growth rates are likely to improve quickly as restrictions are removed, based on current projections, output is only expected to return to pre-pandemic levels in 2024.

The main risks to the economic outlook are weaker-than-expected growth, continued deterioration in the public finances and a failure to implement structural reforms. A second wave of COVID-19 infections, accompanied by new restrictions on economic activity, would have significant implications for the outlook. Government's fiscal position is a risk to growth: higher long-term borrowing costs and risk premiums have started to affect the broader economy.

In addition, recovery efforts will fail unless structural constraints (including in energy, infrastructure and competitiveness) are urgently addressed. While the reforms required in these areas do not immediately affect growth, they are critical for market confidence and investment.

Electricity remains a binding constraint on economic recovery, with power interruptions expected to continue into 2021. Private generation will only be able to plug the electricity gap to a limited extent over the next year.

Job creation is a top priority of the economic recovery plan that will guide policy actions over the medium term, supported by new infrastructure investment and large-scale public

employment programmes. In addition, targeted skills development will improve productivity and employment prospects.

Headline inflation is at the lower end of the 3 to 6 per cent target range. Goods and services inflation has broadly declined due to weak demand and falling oil prices. Inflation is forecast to fluctuate around the 4.5 per cent midpoint over the medium term in line with moderating inflation expectations.

In summary, the country's tax collection targets have not been met and this means that the fiscus has less funds available to allocate across the various spheres of government. There are measures in place to reduce expenditure to narrow the deficits.

The following macro-economic forecasts must be considered when preparing the 2021/22 MTREF municipal budgets.

Table 1: Macroeconomic performance and projections, 2016 - 2020

| Fiscal year | 2019/20 | 2020/21 | 2021/22 | 2022/23 | 2023/24 |
|---------------|---------|----------|----------|---------|---------|
| | Actual | Estimate | Forecast | | |
| CPI Inflation | 4.1% | 3.2% | 4.1% | 4.4% | 4.5% |

Source: Medium Term Budget Policy Statement 2020.

Note: the fiscal year referred to is the national fiscal year (April to March) which is more closely aligned to the municipal fiscal year (July to June) than the calendar year inflation.

2. Key focus areas for the 2021/22 budget process

2.1 Local government conditional grants allocations

Transfers to local government will be reduced by R17.7 billion, including R14.5 billion from the local government equitable share, R2.7 billion from the general fuel levy and R569 million in direct conditional grants over the 2021 MTEF period. The local government equitable share formula has been updated to account for projected household growth, inflation and estimated increases in bulk water and electricity costs over the MTEF period.

Government will revisit underperforming programmes. For example, some cities receiving the Public Transport Network Grant (PTNG) have not launched their integrated public transport networks. Over the MTEF period, government will suspend at least two more poorly performing cities from this grant and the remaining cities will be required to reduce costs and demonstrate their effectiveness to remain funded.

The annual Division of Revenue Bill will be published in February 2021 after the Minister of Finance's budget speech. The Bill will specify grant allocations and municipalities must reconcile their budgets to the numbers published herein.

Municipalities are advised to use the indicative numbers presented in the 2020 Division of Revenue Act to compile their 2021/22 MTREF. In terms of the outer year allocations (2023/24 financial year), it is proposed that municipalities conservatively limit funding allocations to the indicative numbers as presented in the 2020 Division of Revenue Act for 2020/21. The DoRA is available at

<http://www.treasury.gov.za/documents/national%20budget/2020/default.aspx>

Division of Revenue Second Amendment Bill, 2020: changes to local government allocations

Roll-over of funds - R390 million is rolled over in the Urban Settlement Development Grant (USDG) to fund commitments for bulk infrastructure related projects in Nelson Mandela Bay Metropolitan Municipality. R98 million is rolled over in the PTNG to continue with the rollout of the integrated public transport network (IPTN) for public and non-motorised infrastructure in Nelson Mandela Bay Metropolitan Municipality.

R307 million is rolled over in the Regional Bulk Infrastructure Grant (RBIG) for drought and COVID-19 water and sanitation interventions nation-wide.

Water Services Infrastructure Grant (WSIG) - R12 million has been reprioritised from the Department of Water Affairs' budget into the indirect component of WSIG for the implementation of various water services interventions.

Reductions to municipal conditional grants

In the Medium-Term Policy Budget Statement, the Minister of Finance indicated that R10.5 billion is required for the rescue plan for the South African Airways. Therefore, R613 million has been proportionately reduced across municipalities in respect of conditional grants while no reductions were made to the local government equitable share for the 2020/21 financial year.

These changes are shown in Schedule 4, Part B; Schedule 5, Part B and Schedule 6, Part B of the Bill.

Additional instruments to finance infrastructure in municipalities

Municipalities can access other instruments to finance the development of infrastructure that boosts economic growth beyond infrastructure grants. Reforms over the medium term will enhance the ability of municipalities to raise revenue to invest in their own development. An update on development charges and borrowing reforms is summarised below:

- ***Development charges*** - Municipalities earn revenue from charging developers to connect new developments to municipal services. The draft Municipal Fiscal Powers and Functions Amendment Bill proposes new, uniform regulations in respect of these development charges, thereby strengthening the revenue-raising framework of municipalities. After processing comments, the National Treasury will submit the Bill to Cabinet and Parliament for consideration in 2021; and
- ***Borrowing*** - Creditworthy municipalities can also borrow in capital markets. The National Treasury has updated the original municipal borrowing policy framework, which guides this borrowing, and will shortly submit it to Cabinet for approval. The proposed changes aim to increase the term maturity of borrowing improve the secondary market for the trade of municipal debt instruments and define the role of development finance institutions to avoid crowding out the private sector.

3. 2021 Local Government Elections and the budget process

Local government elections are scheduled to take place in 2021, and the proposed date is yet to be determined. Elections are important events as we reaffirm our commitment to democratic and accountable government by choosing representatives of the people who will guide the work of local government for the next five years.

The following four risks need to be explicitly managed:

1. In terms of section 13 of the Municipal Property Rates Act, 2004 (Act No 6 of 2004)(MPRA) and sections 24 and 42 of the Municipal Finance Management Act, 2003 (Act No 56 of 2003)(MFMA), new tariffs for property rates, electricity, water and any other taxes and similar tariffs may only be implemented from the start of the municipal financial year (1 July). This means that the municipal council must approve the relevant tariffs as part of the MTREF budget before the commencement of the financial year on 1 July. Failure to obtain council approval for the annual tariff increases would most likely cause an immediate financial crisis that may lead to the provincial executive intervening in the municipality in terms of section 139 of the Constitution. Therefore, if the elections take place after the start of the financial year, the outgoing council will be responsible for approving tariffs for the 2021/22 MTREF and the newly elected council for the implementation thereof as section 28(6) of the MFMA does not allow the increase of tariffs in-year;
2. In terms of section 16 of the MFMA, a municipal council must approve the annual budget for the municipality before the start of the financial year, and should a municipal council fail to do so, section 26 of the MFMA prescribes that the provincial executive **must** intervene. This provincial intervention may include dissolving the municipal council and appointing an administrator to run the municipality. Therefore, the outgoing council must ensure that they comply with the timeframes for approval of the budget;
3. The outgoing council may be tempted to prepare an 'election friendly budget' with unrealistically low tariff increases and an over-ambitious capital expenditure programme. The outcome of this approach will undoubtedly be an unfunded municipal budget that threatens their respective municipality's financial sustainability and service delivery; and
4. Given that the timing of election campaigning may coincide with the municipal public budget consultations, there is a risk that these consultations may be neglected or used to serve the narrow interests of political parties. It is reiterated that transparency and public participation is an integral part of our constitutional democracy, hence municipalities must ensure that public and stakeholder consultation processes are adhered to as required by the legislative framework.

In the build-up to the 2021 local government elections, the financial sustainability of the municipality should be protected. Now, more than ever before, it is paramount for sound municipal decision-making so that the long-term sustainability of municipal finances and service delivery is achieved beyond the election period.

Finances of some municipalities have been unstable for many years, and this was exacerbated by the financial impact of the COVID-19 pandemic. Therefore, there is severe pressure to maintain healthy cash flows and increase cost containment measures while sustaining efficient service delivery levels. It is therefore imperative that municipalities refrain from suspending credit control and debt collection efforts. Municipalities are also reminded of the regulatory framework set out in the Municipal Cost Containment Regulations insofar as it relates to the use of municipal funds to fund election campaigns and other non-priority issues as this might further impact the financial sustainability of municipalities.

Furthermore, as the current municipal leadership will be responsible for the compilation of the 2022/23 MTREF budgets, councils are advised to prioritise expenditure appropriations aligned to the policy intent as described in the integrated development plans (IDPs). Infrastructure provisioning for water, sanitation, roads and electricity remain key priorities.

In addition, the outgoing council is advised to critically consider the financial implications before entering into new long-term contracts that are not of priority to the municipality and avoid if possible, committing the incoming council. Municipalities should refrain from filling non-critical positions, purchasing cars, procuring new financial systems and from incurring any other expenditure at this stage that will financially burden the incoming council.

During this time of transition, all stakeholders should work together to ensure that municipalities continue to perform their functions efficiently and effectively. The Mayor and municipal manager should now be engaging in the process of the annual review of the fifth and last year of the IDP in terms of section 34 of the Municipal Systems Act (MSA) and the 2022/23 budget preparation process in terms of section 21 of the MFMA. It is particularly important to ensure that arrangements for the review of IDPs and preparation of budgets continue seamlessly as these processes cannot be delayed in anticipation of the announcement of an election date.

In deciding on the schedule for the 2022/23 budget process, the Mayor and municipal manager must also note that the MFMA, read together with the Municipal Budget and Reporting Regulations, only allows for a 'main adjustments budget' to be tabled after the mid-year budget and performance assessment has been tabled in council, i.e. after 25 January 2022. In addition, the permitted scope of an adjustments budget is quite limited in that taxes and tariffs may not be increased (refer to section 28(6) of the MFMA) and any additional revenues may only be appropriated to programmes and projects already budgeted for (refer to section 28 of the MFMA). Therefore, the idea of the current council passing a 'holding budget' which the new council will change substantially through an adjustments budget soon after the start of the municipal financial year is not legally permitted.

Though an IDP is a five-year strategic document of council, municipalities should note that when a new council takes office after a local government election, the norm has been that the new council implements the last adopted IDP during the first year of office. It is normally only in the second year of office that the newly elected council adopts a new IDP after thorough interrogation, extensive consultation and finalisation of a new five-year strategy.

In the absence of detailed information on the 2021 Local Government Elections, National Treasury will provide further guidance in the follow-up MFMA Budget Circular to be issued in March 2021.

4. Municipal Standard Chart of Accounts (*m*SCOA)

4.1 Release of Version 6.5 of the Chart

On an annual basis, the *m*SCOA chart is reviewed to address implementation challenges and correct chart related errors. Towards this end, Version 6.5 is released with this circular.

Version 6.5 of the chart will be effective from 2021/22 and must be used to compile the 2021/22 MTREF and is available on the link below:

<http://mfma.treasury.gov.za/RegulationsandGazettes/MunicipalRegulationsOnAStandardChartOfAccountsFinal/Pages/default.aspx>

4.2 Budgeting and Reporting for the COVID-19 pandemic and water inventory

In terms of the Annexure to MFMA Circular No. 99, *m*SCOA Circular No. 9, and GRAP 12, municipalities were advised to:

1. Record and ringfence all funding and expenditure pertaining to the COVID-19 pandemic for the 2020/21 MTREF when budgeting and transacting; and

2. Budget and account for bulk water purchases as inventory as per GRAP 12 (paragraph 07).

It is evident from the snapshots that were drawn from the Local Government Database based on the *mSCOA* data strings that were submitted by municipalities in terms of the monthly Section 71 reporting, that most municipalities have not budgeted or reported on COVID-19 related allocations and expenditure, nor bulk water inventory as per the guidance provided.

Although the regulated A1 Schedule will only be amended from the 2021/22 MTREF to align to GRAP 12 (as per MFMA Circular No. 98), municipalities should already record water inventory in the *mSCOA* chart. ***Municipalities must budget for water as inventory in the 2021/22 MTREF.*** This means that municipalities will no longer be able to budget for water bulk purchases as an expense on table A4. Municipalities must use bulk water purchases i.e. system input volume on table A6: inventory. This provides for three different water sources i.e. water treatment works, bulk purchases and natural sources. When water is issued through the billing/ distribution, the cost should be expensed through table A4: inventory consumed with the corresponding accounting transaction in the inventory account on table A6: current assets: water: authorised consumption.

Municipalities that did not adjust their 2020/21 MTREF budgets by 30 September 2020 to respond to the COVID-19 pandemic or budget for bulk water inventory are reminded to do so in the main adjustments budget process in February 2021.

It should also be noted that the National Treasury's reporting on COVID-19 will be drawn as per *mSCOA* Circular No. 9 and we will not be able to identify COVID-19 allocations and expenditure that have been ringfenced in another manner.

Municipalities must submit the adjustments budget and revised project list for 2020/21 in the format of a *mSCOA* data strings (ADJB and PRAR) uploaded to the Local Government (LG) Upload Portal within 10 working days after Council has adopted the adjustments.

4.3 Revised Municipal Property Rates Act Categories

By now all municipalities should be aware that section 8 of the Municipal Property Rates Act on the determination of categories of **rateable** properties has been revised through the Local Government Municipal Property Rates Amendment Act, 2014 ("the Amendment Act"). The new rateable property categorisation framework based on use (provided these property categories exist within the municipality) and consequently, all property categories that are based on ownership, geographic location or any other basis fall away.

Municipalities must implement the new property categorisation framework by not later than 1 July 2021. The *mSCOA* chart Version 6.5 makes provision for the new and the old framework. However, the old framework will be retired in the next version of the chart and municipalities are advised to implement the new property categorisation framework as legislated. Therefore, municipalities cannot use both frameworks to avoid duplication and overstatement of revenue from property rates.

4.4 Forbidden activities

The Item Assets segment of the *mSCOA* chart currently includes items such as staff loans as non-current receivables from non-exchange transactions. This is in contravention with Section 164(1)(c) of the MFMA that stipulates that a municipality may not make loans to councillors or officials of the municipality; directors or officials of the entity; or members of the public. Therefore, municipalities are advised not to use these items when budgeting as National Treasury may retire these items in the next version of the chart.

4.5 Independent Audits on Municipal Financial Systems

All municipalities and municipal entities had to comply with the *mSCOA* Regulations by 1 July 2017. MFMA Circular No. 80 provided guidance on the minimum business processes and system specifications for all categories of municipality (A, B and C). The Request for Proposal (RFP) issued on 4 March 2016 for the appointment of service providers for an integrated financial management and internal control system for local government (RT25-2016 published in Tender Bulletin No. 2906), provided further guidance on the requirements applicable to a specific category of municipality.

The National Treasury will conduct independent audits on all municipal financial systems in 2021 to determine to what extent the financial systems that are currently being used by municipalities comply with the minimum business processes and system specifications required in terms of *mSCOA*. These audits were initially planned for 2020, but due to restrictions on procurement processes and travel in terms of the COVID-19 pandemic it was postponed to 2021. The results of the audits will also inform the new transversal tender for the procurement of municipal financial and internal control systems in 2022. **Until these audits have been concluded, and the results have been released, municipalities should exercise caution when changing their financial system to avoid purchasing a system that does not comply with the necessary *mSCOA* functionality requirements.** However, should a municipality need to procure a new financial system, they must follow the processes set out in the MFMA read together with the Municipal Supply Chain Management Regulations and MFMA Budget Circulars No. 93, 98 and *mSCOA* Circulars No 5 and 6. In addition, National Treasury has not accredited any of the municipal financial systems available in the market and this should therefore not be advertised as a requirement in municipal tender documents.

It should be emphasised that the onus to ensure compliance with the *mSCOA* Regulations and minimum system specifications as per MFMA Circular No. 80 and its Annexure B rests with the municipality and not the system vendor. Municipalities must properly manage Service level agreements (SLA) with system vendors. Penalties, including the termination of the SLA in cases of persistent non-compliance, should be imposed if the system vendor does not meet the agreed upon milestones. Likewise, if a system vendor has delivered on the services agreed upon in the SLA, then the municipality should pay all money owing to the system vendor within 30 days of receiving the relevant invoice or statement, as per the requirements of Section 65(2)(e) of the MFMA. Lastly, municipalities must agree on the services that are to be provided by the system vendors and costs thereof in the SLA that is signed by the municipality and system vendor. Municipalities should consider the financial implications thereof and negotiate more favourable terms with the system vendor if necessary before signing the SLA. Once signed, the SLA is legally binding.

4.6 Regulation of Minimum Business Processes and *mSCOA* System Specifications

National and Provincial Treasuries held extensive engagements with key system providers during which the system functionality on the following were demonstrated: IDP and budget, supply chain management (SCM), asset management, annual financial statements, revenue management, cash flow and period control. These engagements provided National and Provincial Treasuries with an understanding of what functionality is available on each system and what the key system related challenges are.

It was evident from the engagements that municipalities are not using their financial systems optimally. Some of the challenges that were identified in this regard include the following:

- Some municipalities have not purchased all the modules of the core financial system or have not upgraded to the Enterprise Resource Planning (ERP) (*mSCOA* enabling) version of their financial systems;

- A few municipalities are not paying for the required licences to use system solutions and they are not upgrading and maintaining their servers, hardware and software to become and remain *mSCOA* compliant and to protect their data;
- Several municipalities are still transacting on their legacy systems that are not *mSCOA* enabling or they are using excel spreadsheets that are not incorporated in the functionality of their financial systems, while they are paying for maintenance and support for the *mSCOA* enabling system that was procured. This constitutes fruitless and wasteful expenditure; and
- Other municipalities are not using all the modules of the core financial system (using 3rd party systems) while they have procured these modules. This is once again fruitless and wasteful expenditure.

Municipalities should include the cost of the above in their 2021/22 MTREF budgets.

One of the key objectives of the *mSCOA* reform is to ensure that municipalities are budgeting, transacting and reporting directly on and from integrated ERP systems to have one version of the truth in terms of the reported financial performance. The manual correction of data strings by municipal officials or system vendors are not allowed in terms of the *mSCOA* Regulations.

National Treasury will expand and regulate the business processes and system specifications communicated in MFMA Circular No. 80 and its Annexure B in the 2021/22 MTREF to ensure that municipalities are using the functionality available on their financial systems. MFMA Circular No. 80 was issued in 2016, and several Regulations and best practises as per the MFMA Circulars have been introduced since then. The expansion of the requirements will accommodate these new developments.

4.7 Non-compliance with *mSCOA* requirements

If your municipality has not yet achieved the required level of *mSCOA* implementation, then it must provide a detailed action plan (road map) to the National and the respective provincial treasury to indicate how the municipality will fast track the implementation of *mSCOA*. The action plan should include the following priority areas, as applicable to the municipality:

- The functionality of the financial system, including the minimum system functionality and business process as per MFMA Circular No. 80 and Annexure B and functionality required in terms of Regulations and MFMA Circulars that was issued after 08 March 2016 (the date on which MFMA Circular No. 80 was issued);
- Integration of 3rd party sub-systems with the *mSCOA* enabling financial system as required in terms of MFMA Circular No. 80 and Annexure B;
- Change management initiatives to ensure that *mSCOA* is institutionalised as an organisational reform and not only a financial reform; and
- Training initiatives to ensure that all officials in the organisation are familiar with the *mSCOA* chart, basic accounting, balance sheet budgeting and movement accounting and the use of the *mSCOA* enabling financial system.

Importantly, the action plan must be drafted by the municipality and not the system vendor and the progress against it should be carefully monitored by the municipality's *mSCOA* Project Steering Committee (chaired by the Accounting Officer). Municipalities must present progress against the action plan at the 2020/21 Mid-Year Budget and Performance visits and Budget and Benchmark engagements with the National and the respective provincial treasury.

4.8 Extension and Procuring of Service Level Agreements (SLA) for Financial Systems

At least six (6) months prior to the expiry of the SLA for the support and maintenance of the financial system, the municipality should either:

- Extend the existing SLA with the same system vendor subject to the provisions of Section 33 and 116(3) of the MFMA (read in conjunction with MFMA Circular No. 62); or
- Approach the market to procure services for the support and maintenance of the financial system consistent with the Municipal Supply Chain Management Regulations and municipality's Supply Chain Management Policy.

Importantly, once the SLA has expired, it cannot be extended, and the municipality will have to embark on a new procurement process. In addition, when the contract for the support and maintenance of the financial system comes to an end, it does not mean that the municipality must procure a new financial system. It is only support and maintenance services pertaining to the financial system that needs to be procured. Municipalities need to properly document their systems and the system language used to ensure that system support can be procured in the local market when required.

4.9 Cash flow reconciliation

The population of the cash flow reconciliation in tables A7, B7 and C7 of the MBRR formats using *mSCOA* data strings has been a challenge in previous financial years. The main contributing factors to this were that:

- Municipalities were not using the *mSCOA* segments correctly to populate their cash flow information;
- A number of municipalities did not use the movement accounts correctly in the *mSCOA* chart which distorts the figures reported in the cash flow tables;
- Some municipalities did not budget, transact or report directly in or from their financial systems; and
- There were errors in the linkages of the MBRR cash flow tables to the *mSCOA* data strings in the segment item: asset and liabilities on the Local Government Database.

It is critical that municipalities undertake balance sheet and cash flow budgeting to provide accurate cash flow information. National Treasury has provided guidance in this regard in MFMA Circular No. 98 and *mSCOA* Circular No. 10 and have also corrected the errors in the linkages of the MBRR cash flow tables to the *mSCOA* data strings. This has resulted in improvements in the section 71 cash flow data that were published at the end of quarter 1 of the 2020/21 MTREF. Further guidance on the application of the funding segment has also been issued in *mSCOA* Circular No. 11 on 4 December 2020.

4.10 *mSCOA* Calendar for 2021/22

Important dates pertaining to *mSCOA* related activities for the 2020/21 financial year is summarised below for planning purposes:

| Activity | | Time Frames |
|----------|--|--|
| 1. | Independent System Audits | February to December 2021 |
| 2. | Regulation of Minimum Business Processes and System Specifications | For comments and testing: October 2021 |
| 3. | <i>mSCOA</i> Virtual Training Sessions (various topics) | Monthly |
| 4. | Roll out of eLearning <i>mSCOA</i> course through | July 2020 |

| | | |
|----|--|---------------|
| | National School of Governance | |
| 5. | Issue proposed <i>m</i> SCOA chart changes for version 6.6 | October 2021 |
| 6. | Annual <i>m</i> SCOA CIGFARO Budgeting Workshop | November 2021 |
| 7. | Issuing of transversal contract for provision of financial systems | March 2022 |

5. The revenue budget

Similar to the rest of government, municipalities face a difficult fiscal environment. Even as demand for services rises, weak economic growth has put stress on consumers' ability to pay for services, while transfers from national government are growing more slowly than in the past. Some municipalities have managed these challenges well, but others have fallen into financial distress and face liquidity problems. These include municipalities that are unable to meet their payment obligations to Eskom, water boards and other creditors. There is a need for municipalities to focus on collecting revenues owed to them and eliminate wasteful and non-core spending. Municipal budgets will be scrutinised to ensure that municipalities adequately provide for the servicing of their debt obligations. Municipalities must ensure that expenditure is limited to the maximum revenue collected and not spend on money that they do not have.

Municipalities are reminded that the local government equitable share allocation is mainly to fund the costs of free basic services and to subsidise the administrative costs of the smaller and more rural municipalities. The increasing unemployment and growth in the number of persons per household means that the revenue foregone in respect of free basic services will likely increase, and it will become even more difficult to collect revenue. Household budgets are becoming increasingly under more pressure, and trade-offs might be applied when it becomes unaffordable to pay all household expenses on a monthly basis.

National Treasury encourages municipalities to maintain tariff increases at levels that reflect an appropriate balance between the affordability to poorer households and other customers while ensuring the financial sustainability of the municipality. The Consumer Price Index (CPI) inflation is forecasted to be within the lower limit of the 3 to 6 per cent target band; therefore, municipalities are required to ***justify all increases in excess of the projected inflation target for 2021/22*** in their budget narratives and pay careful attention to tariff increases across all consumer groups. In addition, municipalities should include a detail of their revenue growth assumptions for the different service charges in the budget narrative.

5.1 Maximising the revenue generation of the municipal revenue base

Reference is made to MFMA Circular No. 93, paragraph 3.1 and No. 98, paragraph 4.1. The emphasis is on municipalities to comply with Section 18 of the MFMA and ensure that they fund their 2021/22 MTREF budgets from realistically anticipated revenues to be collected. Municipalities are cautioned against assuming collection rates that are unrealistic and unattainable as this has been identified as a fundamental reason for municipalities not attaining their desired collection rates.

It is therefore essential that municipalities pay attention to reconciling the valuation roll data to that of the billing system to ensure that revenue anticipated from property rates are accurate. Municipalities are encouraged to undertake this exercise as a routine practice. The list of exceptions derived from this reconciliation will indicate where the municipality may be compromising its revenue generation in respect of property rates. A further test would be to reconcile this with the Deeds Office registry. In accordance with the MFMA Circular No. 93,

municipalities are once more requested to submit the reconciliation of the valuation roll to the financial system to the National Treasury by no later than **05 February 2021**.

The above information must be emailed to linda.kruger@treasury.gov.za or must be uploaded by approved registered users using the LG Upload Portal at: <https://lguploadportal.treasury.gov.za/>.

5.2 Setting cost-reflective tariffs

Reference is made to MFMA Circular No. 98, paragraph 4.2. The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. A credible budget is one that ensures the funding of all approved items and is anchored in sound, timely and reliable information on expenditure and service delivery (FFC, 2011). Credible budgets are critical for local government to fulfil its mandate and to ensure its financial sustainability.

A credible expenditure budget reflects the costs necessary to provide a service efficiently and effectively, namely:

- An effective budget is one that is adequate to deliver a service of the necessary quality on a sustainable basis; and
- An efficient budget is one that delivers services at the lowest possible cost.

Municipalities are encouraged to utilise the tariff setting tool referenced in MFMA Circular 98, item 4.2. This tool will assist in setting tariffs that are cost-reflective and would enable municipalities to recover costs to fulfil its mandate. The National Treasury Municipal Costing Guide is also available on the link below on the National Treasury website.

<http://mfma.treasury.gov.za/Guidelines/Documents/Forms/AllItems.aspx?RootFolder=%2fGuidelines%2fDocuments%2fMunicipal%20Costing%20Guide&FolderCTID=0x0120004720FD2D0551AE409361D6CB3E122A08>

5.3 Bulk Account Payments - Eskom Concessions

During 2018/19, intense work had been undertaken to resolve systemic and structural issues pertaining to the electricity function in municipalities. Core to this work was addressing the escalating Eskom debt that threatened the sustainability of Eskom as well as that of municipalities.

During the process, Eskom was engaged on providing relieve in certain areas. Municipalities must be made aware that the following concessions were agreed upon:

- Reducing the interest rate charged on overdue municipal bulk accounts from prime plus 5 per cent to prime plus 2.5 per cent;
- Payment terms being extended from 15 days to 30 days for municipal bulk accounts; and
- Payments received from municipalities will be allocated to capital first and then the interest.

These concessions are aligned to the MFMA and are meant to curb the growing debt levels by allowing municipalities a more conducive payment regime than what was previously employed. In addition, municipalities are encouraged to budget for bulk services and honour their current account payments religiously to avoid stringent application of the bulk suppliers' credit control policy.

5.4 Timeous allocations and clearing of the control accounts

Municipalities are encouraged to clear the control accounts on a monthly basis and to allocate trade and other receivable payments in these suspense accounts to the relevant debtor accounts regularly before the monthly submissions as required by the MFMA. Implementing and enforcing the credit control policy of the municipality whilst payments are not cleared in the control account is negligent and irresponsible. Municipalities are warned against this bad practice, and this must be avoided at all costs.

5.5 Eskom Bulk Tariff increases

The National Energy Regulator of South Africa (NERSA) is responsible for price determination of the bulk costs for electricity. In March NERSA approved a municipal tariff increase of 6.9 per cent effective 1 July 2020 (1.2 per cent lower than the tariff increase in Multi-Year Price Determination (MYPD) 4 period due to differences in municipal and national financial years).

Municipalities are advised to use the tariff increases previously (March 2019) approved by the Regulator of 5.2 per cent 2021/22, 8.9 per cent for 2022/23 and 8.9 per cent in 2023/24 (*for 2023/24, an average annual tariff increase is used for the National Energy Regulator of South Africa's multi-year price determination period of 1 April 2019 to 31 March 2022*). The outer year is anticipated to be the first year of the MYPD 5 period, which is yet to be published.

6. Funding choices and management issues

Municipalities are under pressure to generate revenue as a result of the economic landscape, the COVID-19 pandemic, weak tariff setting and increases in key cost drivers to provide basic municipal services. The ability of customers to pay for services is declining and this means that less revenue will be collected. Therefore, municipalities must consider the following when compiling their 2021/22 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;
- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulations read with MFMA Circular No. 82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates; and
- Curbing the consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

Accounting officers are reminded of their responsibility in terms of section 62(1)(a) of the MFMA to use the resources of the municipality effectively, efficiently and economically. Failure to do this will result in the accounting officer committing an act of financial misconduct which will trigger the application of chapter 15 of the MFMA, read with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings.

6.1 Employee related costs

The *Salary and Wage Collective Agreement* for the period 01 July 2018 to 31 June 2020 has come to an end and a new agreement is under consultation, which we hope will take into account the current fiscal constraints faced by government. Therefore, in the absence of any information in this regard from the South African Local Government Bargaining Council (SALGBC), municipalities are advised to take into account their financial sustainability when considering salary increases. It has been observed over the previous years that salary

increases were above inflation. In addition, municipalities that could not afford such increases did not apply for exemption as provided by SALGBC. Given the current economic condition exacerbated by the COVID-19 pandemic, municipalities are urged to consider projecting increases to wage that would reflect their affordability as many municipalities that are already not in a position to afford the current wage cost would indeed have to apply no more than zero per cent increase in the 2021/22 MTREF and to exercise the option for exemption for any negotiated increase above the level of their affordability.

6.2 Remuneration of councillors

Municipalities are advised to budget for the actual costs approved in accordance with the Government Gazette on the Remuneration of Public Office Bearers Act: Determination of Upper Limits of Salaries, Allowances and Benefits of different members of municipal councils published annually between December and January by the Department of Cooperative Governance. It is anticipated that this salary determination will also take into account the fiscal constraints. Municipalities should also consider guidance provided above on salary increases for municipal officials during this process.

7. Conditional Grant Transfers to Municipalities

7.1 Non-compliance of in-year monitoring

In terms of Section 74(1) of the MFMA, municipalities must submit to the transferring officers, National and Provincial treasuries documents and monthly grant reports as may be prescribed or required. The *mSCOA* Regulations requires the uniform recording and classification of municipal budget and financial information at a transaction level in the form of a *mSCOA* data string that must be submitted to the LG Upload portal. Most municipalities are still not reporting on conditional grants as per the *mSCOA* requirements. As per MFMA Circular No 93, the National Treasury has only used *mSCOA* data strings as the source of data for publications on municipal financial performance from 1 July 2019. The *mSCOA* data strings will also be the main source of data that will be used to monitor the performance against grants and to inform decisions on the stopping and reallocation of conditional grants funding in the 2021/22 MTREF. The credibility of the *mSCOA* data strings reporting on grants will be closely monitored going forward.

Furthermore, section 12(2) of the Division of Revenue Act, 2020 (Act No. 4 of 2020) (DoRA) states that the municipality, as part of the report required in terms of section 71 of the MFMA, report on the matters referred to in subsection (4) and submit a copy of that report to the relevant provincial treasury, the National Treasury and the relevant Transferring Officer.

Some municipalities have not been complying with the reporting requirements as stipulated above. Municipalities are reminded that the non-submission of monthly reports translates to non-compliance with the MFMA and DoRA. The National Treasury and Transferring Officer will be implementing stringent measures to municipalities that do not comply with the prescripts. This includes, but is not limited to, the stopping and reallocation of conditional grants funding of non-compliant municipalities. Municipalities are encouraged to comply with the reporting requirements to avoid withholding or stopping of an allocation.

In terms of performance reporting on conditional grants, municipalities and Transferring Officers are urged to pay particular attention to the contents of money spent against conditional grants. Government is not realising full value for money against the substantial investments it makes through grants.

8. The Municipal Budget and Reporting Regulations

8.1 Ensuring municipal sustainability through a funded budget

A budget is funded from realistically anticipated revenues to be collected, cash backed accumulated funds from the previous year as well as borrowed funds to be utilised for capital projects. A budget is realistic if it takes into account projected revenue for the current year based on the collection levels to date and actual revenue collected in the previous financial year. Municipal budgets must be prepared on this basis. The economic climate and the impact of COVID-19 pandemic had an effect on the ability of municipalities to collect arrear debt during levels 5, 4 and 3 of the national lockdown. This inability to exercise credit control measures during this period had decreased the collection rate in many municipalities.

Municipalities need to be proactive in exercising credit control measures to ensure that arrear debt is collected. Whilst collection rates decreased during the period mentioned above, municipalities must implement efforts to collect arrear debt and return collection rates to pre-COVID-19 levels. Whilst this unprecedented COVID-19 period is the exception, collection rates need to be maintained at 95 per cent in order to ensure the financial sustainability of municipalities. If collection rates have decreased, prudent financial management requires expenditure to be adjusted downward accordingly. This is to ensure that deficits are not realised and that realistically anticipated revenue based on projected collection rates funds expenditure. This will also ensure financial sustainability and avoid situations of financial distress in municipalities.

The Municipal Systems Act states that a municipal council must adopt, maintain and implement a credit control and debt collection policy that would be utilised for the collection of money that is due and payable to it. The municipal Councillors therefore are the custodians of the policy and responsible for its implementation. As a result, Councillors are required to encourage consumers in their municipal jurisdiction to pay for municipal services and to ensure that such debt that is due and payable to the municipality is collected. This would ensure compliance with the Act and ensure that a culture of payment is implemented in the municipal area. Council needs to play an active role in implementing their adopted policies to increase collection rates and ensure that funds are received to render services to the people.

Municipalities are reminded to develop a credible funding plan where the budget is unfunded. This plan must be tabled in and adopted by Council with the 2021/22 MTREF budget and submitted to the National and provincial treasuries when they submit their tabled and adopted budget in terms of Section 22(b)(i) and 24 (3) of the MFMA. Failure to approve a credible plan will result in the invoking of Section 216(2) of the Constitution.

8.2 Budgeting for indirect grant allocations

Some municipalities continue to budget for allocations not directly allocated to them as revenue in the Statement of Financial Performance. This results in revenue being overstated. Therefore, municipalities must refrain from budgeting for indirect grant allocations. A municipality must only budget for the allocations that are directly allocated and transferred to them.

8.3 Monthly reporting of debtors

National Treasury has observed through in-year monitoring that most municipalities are overstating debtors as they report on gross debtors instead of net. The format of the monthly debtors' data strings provides for a column to disclose provision for impairment as per council policy. Therefore, municipalities are urged to always reflect the provision for impairment in the column as indicated above for National Treasury to be able to reconcile the net debtors.

8.4 Schedule A - version to be used for the 2021/22 MTREF

National Treasury has released Version 6.5 of the Schedule A1 (the Excel Formats) which is aligned to Version 6.5 of the *mSCOA* classification framework and must be used when compiling the 2021/22 MTREF budget.

It is imperative that all municipalities prepare their 2021/22 MTREF budgets in their financial systems and that the Schedule A1 be produced directly from their financial system. Vendors have demonstrated their budget modules to the National Treasury and provincial treasuries. All financial systems have this functionality to assist and prepare budgets and to generate the prescribed Schedule A1 directly from the financial system. Therefore, there is no reason why the 2021/22 MTREF budget must be done manually. National Treasury has protected the A1 schedule version 6.5, therefore manual population will not be allowed as the schedule must be extracted from the financial system.

ALL municipalities **MUST** prepare their 2021/22 MTREF tabled and adopted budgets using the A1 schedule version 6.5.

Municipalities must start early enough to capture their tabled budget (and later the adopted budget) in the budget module provided and must ensure that they produce their Schedule A1 directly out of the budget module. **Manual capturing on A1 schedule version 6.5 is not allowed** in terms of the *mSCOA* Regulations.

The National Treasury has indicated in MFMA Circular No. 93 that municipalities must submit all A1 Schedules in PDF format only from the 2019/20 MTREF. Given the fact that the *mSCOA* classification framework makes it possible to generate the financial data required in the A1 schedule directly from the data strings and that additional data needed must be obtained from sub-systems that integrate with the financial system, the National Treasury will only accept the prescribed data string containing the supporting data, populated and uploaded by each municipality. National Treasury published the layout for the data string on the website in MFMA Budget Circular No. 98 and an amended version to be used for the 2021/22 MTREF forms part of this circular. The publication in the 2020/21 MTREF of non-financial data will be done using the supporting data uploaded from these data strings.

The National Treasury **will no longer gather supporting data from the MBRR A1 Schedules** but will expect each municipality to **submit the prescribed supporting data strings** containing the required data using the LG Upload Portal.

The budget, adjustments budget and Section 71 monthly reporting Schedules that have been regulated in terms of the MBRR have also been aligned to the *mSCOA* chart version 6.5 changes. The revised MBRR Schedules for the 2021/22 MTREF and its linkages to the data string are available on the link below:

<http://cenvappsp10:31200/RegulationsandGazettes/Municipal%20Budget%20and%20Reporting%20Regulations/Documents/Forms/AllItems.aspx?RootFolder=%2fRegulationsandGazettes%2fMunicipal%20Budget%20and%20Reporting%20Regulations%2fDocuments%2f2020%2d21&FolderCTID=0x0120001860D4A2BD7AD042BF8427FC3BB59F67>

The Municipal Budget and Reporting Regulations, formats and associated guides are available on National Treasury's website at:

<http://mfma.treasury.gov.za/RegulationsandGazettes/Pages/default.aspx>

8.5 Assistance with the compilation of budgets

If municipalities require advice with the compilation of their respective budgets, specifically the budget documents or Schedule A1, they should direct their enquiries to their respective provincial treasuries or to the following National Treasury officials:

| Province | Responsible NT officials | Tel. No. | Email |
|-------------------------------------|--------------------------|--------------|--|
| Eastern Cape | Matjatji Mashoeshoe | 012-315 5553 | Matjatji.Mashoeshoe@treasury.gov.za |
| Buffalo City | Mandla Gilimani | 012-315 5807 | Mandla.Gilimani@treasury.gov.za |

National and provincial treasuries will analyse the credibility of the data string submissions.

8.6 Assessing the 2021/22 MTREF budget

National and provincial treasuries will assess the 2021/22 MTREF budgets to determine if it is complete, funded and complies with the *m*SCOA requirements. The *m*SCOA data strings for the tabled (TABB) and adopted (ORGB) budgets will be used for this assessment.

The **assessment period** of all municipal budget will therefore be from **31 May to 30 June**. In this one-month period, the National and provincial treasuries will evaluate all municipal budgets for completeness and for being fully funded. Any adjustment that need to be made must be done before the start of the municipal financial year on 1 July.

Importantly, in order to generate an adopted budget (ORGB) data string, the budget must be locked on the financial system by the 10th working day of July each year. Therefore, once the ORGB data string has been generated, errors in the ORGB can only be corrected via an adjustments budget in February of each year. In terms of the design principles of *m*SCOA, municipalities are not allowed to open the budget on the system for corrections after it has been locked. This means that the tabled budget data string (TABB) should in fact be verified and errors in the TABB should be corrected in the ORGB **before the adopted budget is locked on the financial system and the ORGB data string is generated**.

The previous verification process and timeframes (i.e. July to September) can no longer be applied as municipalities are already transacting against the adopted and locked budget from 01 July 2020.

Amending an unfunded, incomplete and erroneous budget through an adjusted budget is also not encouraged as the National Treasury only considers an adjusted budget in the third and fourth quarter of the financial year for analysis and publication purposes. This will result in overspending and unauthorised expenditure not been monitored in the first six months of the financial year.

Municipal managers are reminded that the annual budget must be accompanied by a quality certificate and council resolution, as well as a budget locking certificate (in the case of the adopted budgets) in accordance with the format specified in Regulation 31 of Schedule A of the MBRR. The A1 schedule must be included as part of the budget documentation in pdf format.

The National Treasury would like to emphasise that ***where municipalities have adopted an unfunded budget without a credible funding plan, they will be required to correct the budget and go back to the Municipal Council to ensure they adopt and implement a funded budget as required in terms of Section 18 of the MFMA.***

Municipalities with municipal entities are once again reminded to prepare consolidated budgets and in-year monitoring reports for both the parent municipality and its entity or entities. The following must be compiled:

- An annual budget, adjustments budget and monthly financial reports for the parent municipality in the relevant formats;
- An annual budget, adjustments budget and monthly financial reports for the entity in the relevant formats; and
- A consolidated annual budget, adjustments budget and monthly financial reports for the parent municipality and all its municipal entities in the relevant formats.

The budget and data strings that the municipality submits to National Treasury must be a consolidated budget for the municipality (including entities). The budget of each entity must be submitted on the D schedule in pdf format.

In the past it was noted that municipalities have challenges to align the audited outcomes on the financial system to A1 Schedule. Municipalities must ensure that the audited figures and adjusted budget figures captured on the A1 Schedule aligns to the annual financial statements and Schedule B respectively.

9. Budget process and submissions for the 2021/22 MTREF

9.1 Submitting budget documentation and A1 schedules for 2021/22 MTREF

To facilitate oversight of compliance with the Municipal Budget and Reporting Regulations, accounting officers are reminded that:

- Section 22(b)(i) of the MFMA requires that, ***immediately*** after an annual budget is tabled in a municipal council, it must be submitted to the National Treasury and the relevant provincial treasury in electronic formats. If the annual budget is tabled to council on **31 March 2021**, the final date of submission of the electronic budget documents and corresponding mSCOA data strings is **Thursday, 01 April 2021**.

Section 24(3) of the MFMA, read together with regulation 20(1) of the MBRR, requires that municipalities must submit the approved annual budget to both National Treasury and the relevant provincial treasury ***within ten working days*** after the council has approved the annual budget. E.g. if the council approves the annual budget on **31 May 2021**, given the new timeframe for the evaluation of the municipal budgets, the adopted budget data strings and documentation must be submitted by the latest **Monday, 14 June 2020**.

Municipalities are no longer expected to submit hard copies of all required documents including budget-related, Annual Financial Statements and Annual Reports to National Treasury via post or courier services. Hard copies must be submitted in pdf format to the LG Upload portal.

9.2 Expected submissions for 2021/22 MTREF

- The budget documentation as set out in the MBRR. The budget document must include the main A1 Schedule Tables (A1 - A10);
- The non-financial supporting tables (A10, SA9, SA11, SA12, SA13, SA24 and any other information not contained in the financial data string) in the A1 in the prescribed mSCOA data string in the format published with Version 6.5 of the A1 schedule;
- The draft and final service delivery and budget implementation plan (SDBIP) in electronic PDF format;
- The draft and final IDP;
- The council resolution for the tabled and adopted budgets;
- Signed Quality Certificate as prescribed in the MBRR for the tabled and adopted budgets;
- D Schedules specific for the entities; and
- A budget locking certificate immediately at the start of the new municipal financial year on 1 July.

Budget-related documents and schedules must be uploaded by approved registered users using the LG Upload Portal at: <https://lguploadportal.treasury.gov.za/>. It should be emphasised that municipalities should submit all required documents to the LG Upload portal and not to lgdocuments@treasury.gov.za. National Treasury will retire lgdocuments@treasury.gov.za on 1 July 2021 to ensure that there is a single collection point of municipal financial data.

Also note that the LG Upload Portal does not have the same size restrictions encountered with lgdocuments@treasury.gov.za but requires all documents to:

1. Be in PDF format only; and
2. Each PDF file must NOT contain multiple document e.g. council resolution and quality certificate within the budget document. Each document type must be identified clearly and uploaded separately.

Any problems experienced with the submission of documents can be addressed with Elsabe Rossouw at Elsabe.Rossouw@treasury.gov.za.

The 2020/21 MTREF and the preliminary Quarter 1 Section 71 results for the 2020/21 financial year that has recently been published, have indicated that the credibility of the mSCOA data strings is still a concern although we have observed a marked improvement in some areas. At the core of the problem is:

- The incorrect use of the *m*SCOA chart and segments, balance sheet budgeting, movement accounting and basic municipal accounting practices by municipalities;
- Some municipalities are not budgeting, transacting and reporting directly in/from their core financial systems; and
- Municipalities are not locking their adopted budgets and their financial systems at month-end to ensure prudent financial management. To enforce municipalities to lock their budgets and close their financial system at month-end in 2020/21, the Local Government Database and Reporting System will lock all submission periods within the reporting period at the end of each quarter. The published period will NOT be opened again to ensure consistency between publications. System vendors were also requested to build this functionality into their municipal financial systems.

To improve the credibility of these data string, National and provincial treasuries are analysing the accuracy of the data strings and the use of the six regulated segments. The National Treasury has developed tools to analyse the segment/chart use and trained budget analysts from both National and provincial treasuries on the use thereof. To date, the analysis has highlighted that municipalities are not using the FUND, REGION and COSTING segments correctly. In many instances, these segments are simply defaulted which impedes the multi-dimensional reporting power of the *m*SCOA classification framework. Another common area of concern is that total capital expenditure do not balance to total funding. Currently, the expenditure is much higher than the available funding reported.

It needs to be noted that the single source for all analysis and publications will be the data strings submitted by the municipalities for the 2020/21 municipal financial year. It is therefore imperative that municipalities ensure the credibility and accuracy of the data strings before submission.

9.3 Publication of budgets on municipal websites

In terms of section 75 of the MFMA, all municipalities are required to publish their tabled budgets, adopted budgets, annual reports (containing audited annual financial statements) and other relevant information on the municipality's website. This will aid in promoting public accountability and good governance.

All relevant documents mentioned in this circular are available on the National Treasury website, <http://mfma.treasury.gov.za/Pages/Default.aspx>. Municipalities are encouraged to visit it regularly as documents are regularly added / updated on the website.

9.4 Communication by municipal entities to National Treasury

Municipal entities should not request meetings directly from National Treasury. National Treasury will only engage the entities through the parent municipalities. This includes all communications apart from the legislative reporting requirements.

Introduction

This budget circular is a follow-up to the one issued in December 2020. It guides municipalities with their preparation of the 2021/22 Medium Term Revenue and Expenditure Framework (MTREF) and, as with previous annual budget circulars, it should be read within this context. This Circular is linked to the Municipal Budget and Reporting Regulations (MBRR) and the municipal Standard Chart of Accounts (mSCOA); and strives to support municipalities' budget preparation processes so that the minimum requirements are achieved. The key focus of this Circular is the grant allocations per the 2021 Budget Review and the 2021 Division of Revenue Bill.

Municipalities are reminded to refer to the previous years' annual budget circulars for guidance on budget preparation that is not covered in this circular.

1. The South African economy and inflation targets

The South African economy contracted by an estimated 7.2 per cent in 2020 compared with the 7.8 per cent contraction projected in the 2020 Medium Term Budget Policy Statement (MTBPS). The revised estimate results from easing lockdown restrictions in the third quarter and a faster-than-expected resumption of global growth, especially in China. The National Treasury projects real economic growth of 3.3 per cent in 2021, following an estimated contraction of 7.2 per cent in 2020. Real GDP growth is expected to moderate to 1.9 per cent in 2022 and 2023.

The outlook remains highly uncertain, and the economic effects of the pandemic are far-reaching. There were 1.7 million fewer jobs by the third quarter of 2020 compared to the same period in 2019. Rising unemployment and income losses have entrenched existing inequalities. GDP is only expected to recover to pre-pandemic levels in late 2023. High-frequency data for the third quarter, such as the volume of electricity distributed, mining and manufacturing output, business confidence and the ABSA Purchasing Managers' Index (PMI) shows evidence of a limited economic rebound.

Although growth rates are likely to improve quickly as restrictions are removed, based on current projections, the output is only expected to return to pre-pandemic levels in 2024. Given South Africa's structural constraints, its recovery will be slower than many of its developing-country peers. Industrial sectors (which include mining, manufacturing, construction and utilities) lagged substantially, undermined by structural constraints including unreliable electricity supply and weak public investment that preceded the pandemic. Over the next several years, the country requires the implementation of long-standing structural reforms to sustainably move to a higher growth path.

These economic challenges will continue to exert pressure on municipal revenue generation and collection levels; hence a conservative approach is advised for revenue projections.

The following macro-economic forecasts must be considered when preparing the 2021/22 MTREF municipal budgets.

Table 1: Macroeconomic performance and projections, 2019 - 2023

| Fiscal year | 2019/20 | 2020/21 | 2021/22 | 2022/23 | 2023/24 |
|---------------|---------|----------|----------|---------|---------|
| | Actual | Estimate | Forecast | | |
| CPI Inflation | 4.1% | 3.3% | 3.9% | 4.2% | 4.4% |

Source: 2021 Budget Review.

Note: the fiscal year referred to is the national fiscal year (April to March) which is more closely aligned to the municipal fiscal year (July to June) than the calendar year inflation.

2. Key focus areas for the 2021/22 budget process

2.1 Changes to local government allocations

Over the next three years, municipalities will have to adjust to significant changes in expenditure plans while improving accountability. The 2021 Budget protects transfers that focus on infrastructure, service delivery and COVID-19 spending while reducing those spent less effectively. The 2021 Budget includes funding for initiatives to improve municipal revenue collection and support financially distressed municipalities.

Transfers to local government over the medium-term account for **9.4 per cent** of nationally raised funds after providing for debt-service costs, the contingency reserve and provisional allocations. Local government's share of revenue has risen in relative terms because reductions to the public-service wage bill affect only national and provincial government. Local government transfers grow by an annual average of 5.2 per cent over the MTEF; the equitable share declines by 4.4 per cent and conditional grants grow by 7.3 per cent. As part of government's fiscal consolidation policies over the medium term, transfers to local government are reduced by R19.4 billion, including R14.7 billion from the local government equitable share, R2.7 billion from the general fuel levy and R2 billion in direct conditional grants.

Conditional grants

The reduction to direct conditional grants includes R329 million from the *municipal infrastructure grant* and R21 million from the *integrated urban development grant*. These amounts have been reprioritised from underspending grants to fund a once-off councillor gratuity for non-returning councillors. The largest proportional reduction of R1.3 billion to local government grants has been made in the *public transport network grant*, because only six of the 13 cities receiving the grant have successfully launched public transport systems. Indirect conditional grants are reduced by R286 million over the period.

Government continues to reform the system of conditional grant transfers to local government based on the principles set out in the 2019 Budget Review. In 2021, government will expand the scope of the *municipal infrastructure grant* to allow municipalities to use up to 5 per cent of their allocation to develop infrastructure asset management plans. This change addresses poor asset management in municipalities.

In 2020, the *integrated city development grant* was repurposed to assist cities to build internal capacity or obtain technical support to prepare and package key infrastructure projects. This will continue in 2021 and private sector participation will be encouraged in these projects.

Two standalone *informal settlement upgrading grants* for provinces and municipalities will be introduced from 2021/22. These grants are made up of components previously within the *human settlements development grant* and the *urban settlements development grant* for provinces and municipalities respectively. In addition, the Municipal Systems Improvement Grant scope is extended to fund comprehensive institutional diagnostic assessments of the 21 district areas where the district municipality is a water service authority and the development of institutional improvement/ support plans that will inform all future capacity development programmes and municipal support initiatives to enhance the continued rollout of the rollout of the District Development Model (DDM).

Municipalities are reminded that all allocations included in their budgets must correspond to the allocations listed in the Division of Revenue Bill. All the budget documentation can be accessed from the National Treasury website by clicking on the link below:
<http://www.treasury.gov.za/documents/national%20budget/2021/>

3. 2021 Local Government Elections and the budget process

Municipalities are advised to refer to MFMA Circular No. 107 on risks related to the Local Government elections and issues to be considered in compiling the 2021/22 MTREF in addition to the information provided below.

3.1 Transitional processes - development and adoption of IDPs during the 2021 election year

The 2020/21 municipal financial year represents the last year of the current municipal councils' electoral term. Therefore, the next municipal election to usher in new councils is expected to take place between August and November 2021 in terms of the Section 24 (2) of the Municipal Structures Act, 2000 (Act No. 32 of 2000) (MSA).

It is acknowledged that the period within which the coming election's date is expected takes place after the start of a new financial year. This particular scenario poses a latent challenge in so far as adherence to legislated timeframes with regard to the adoption of the 5-year Integrated Development Plan (IDP) and the subsequent implementation.

Given the fact that the IDP and budget would need to be reviewed and adopted by 30 June 2021, the current council has an obligation to ensure that these stipulations are complied with. In this regard, the current council will be expected to continue reviewing the IDP and ensuring that it is adopted within the legislated timeframe.

Section 25 (3) of the MSA does allow the municipal council to adopt the IDP of the preceding council. However, should the incoming councils be unhappy with the priorities set out by the current council, in this case, municipal councils are advised to consider the existing adopted IDP and resolve to initiate or not to initiate an amendment procedure as guided by the MSA and the Municipal Performance and Planning Regulations (2001).

The Department of Cooperative Governance (DCoG), through the Chief Directorate: Development Planning, is rolling out the revised IDP guidelines to municipalities. These guidelines are aimed to, amongst others, guide municipalities with regards to the adoption of IDPs during an election year.

3.2 Hand-over reports for the newly elected councils

Each municipal manager, working together with the CFO and senior managers, is encouraged to prepare a hand-over report that can be tabled at the first meeting of the newly elected council. This hand-over report aims to provide the new councils important orientation information regarding the municipality, the state of its finances, service delivery and capital programme, as well as key issues that need to be addressed.

It is proposed that the hand-over report should include:

- An overview of the demographic and socio-economic characteristics of the municipality;
- An overview of the organisational structure of the municipality, with the names and numbers of senior managers;
- An overview of key municipal policies that councillors need to be aware of and where they can obtain the full text of such policies;
- An overview of issues that still need to be addressed in relation to the municipality's turnaround strategy;
- An overview of the municipality's financial health, with specific reference to:
 - o Its cash and investments, and its funding of commitments (Table A8);
 - o Cash coverage of normal operations (see Supporting Table SA10);

- o Creditors outstanding for more than 30 days, along with reasons for delayed settlement;
- o Current collection levels and debtors outstanding for more than 30 days; and
- o Extent of existing loans and associated finance and redemption payments.
- The municipality's 2019/20 audit outcome and its strategy to address audit issues;
- An overview of the provision of basic services, including plans to address backlogs;
- An overview of the state of the municipality's assets, with particular reference to the asset management plan, and repairs and maintenance requirements;
- A list of the main infrastructure projects planned for the 2021/22 budget and MTREF;
- A list of key processes requiring council input over the next six months, e.g. revision of the IDP, approval of specific policies etc. and
- Any other information deemed to be important.

In addition to the hand-over report, each new councillor should be given the municipalities' revised IDP, the adopted 2021/22 MTREF budget, the mid-year budget and performance assessment report for 2020/21, and the latest monthly financial statement, and the annual report for 2019/20.

Municipal managers should submit their municipality's hand-over report to the relevant provincial department responsible for local government, to the Department of Co-operative Governance (DCoG) and National and Provincial Treasuries.

4. Municipal Standard Chart of Accounts (*m*SCOA)

4.1 Opening balances

It was noted that some municipalities are not transferring their opening balances consistently to the current year of transacting. Opening balances for the previous year must be transferred in the first month (M01) of the current year, and all adjustments made during the preparation of the annual financial statements in period 14 and 15 must be transferred through journals to the opening balances of the current year in the month that it becomes apparent. When municipalities are not doing this correctly and consistently, it compromises the credibility of the *m*SCOA data strings submitted.

Importantly, journals may only be passed in the core financial system and not in 3rd party sub-systems.

4.2 Surplus or deficit journals

The Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) and MBRR require that municipalities perform their month-end reconciliations at the end of every month before they submit their financial performance information to the National Treasury. Surplus or deficit journals must be passed monthly before a data string is generated to ensure that the financial system remains in balance. The monthly data strings reflected in the Statement of Financial position (table C6 of the regulated C Schedules) will not be in balance for those municipalities that are not doing this, and their *m*SCOA data strings will therefore not be accurate.

Municipalities must also reconcile their creditors and debtors and all month-end processes **before** they submit their monthly data strings to ensure that the data submitted to the National Treasury Local Government Database is credible.

4.3 Rollovers and repayment of unspent grants

Municipalities are required to use the correct posting levels and movement accounting when conditional grants are being receipted, recognised, rolled over, and unspent grants are repaid. The accounting for grants should be done in accordance with GRAP 23: Revenue from

exchange transactions (Taxes and Transfers). Refer to **Annexure A** of this Circular on the correct treatment of rollovers and repayment of unspent grants in *mSCOA*.

5. The revenue budget

National Treasury encourages municipalities to maintain tariff increases at levels that reflect an appropriate balance between the affordability to poorer households and other customers while ensuring the municipality's financial sustainability. The Consumer Price Index (CPI) is forecasted to be within the lower limit of the 3 to 6 per cent target band; therefore, municipalities are required ***to justify all increases in excess of the projected inflation target for 2021/22 MTREF*** in their budget narratives and pay careful attention to the differential incidence of tariff increases across all consumer groups. It is noted that the tariff increases by Eskom and Water Boards are above inflation and should be considered as such while determining cost-reflective tariffs. In addition, municipalities should include a detail of their revenue growth assumptions for the different service charges in the budget narrative.

Local government also confronts tough fiscal choices in the face of financial and institutional problems that result in service-delivery breakdowns and unpaid bills. Municipalities can offset these trends by improving its own revenue collection, working more efficiently and implementing cost-containment measures.

5.1 Eskom Bulk Tariff increases

The National Energy Regulator of South Africa (NERSA) is responsible for price determination of the bulk costs for electricity. In March, NERSA approved a municipal tariff increase of 6.9 per cent effective 1 July 2020 (1.2 per cent lower than the tariff increase in Multi-Year Price Determination (MYPD) 4 period due to differences in municipal and national financial years).

The equitable share formula uses the 9.9 per cent bulk tariff increase used when National Treasury calculated the baseline for this year in the 2020 MTEF period. Other (non-bulk) electricity costs are updated based on the National Treasury's inflation projections in the 2020 MTBPS. This is due to fiscal constraints and the fact that the court had not pronounced on the Eskom matter at the time that the budget was finalised.

The additional R10 billion that the courts have allowed Eskom to recover in the 2021/22 national financial year translates to a 15.6 per cent bulk increase over the national financial year. However, given that the increase only comes into effect in July for municipalities, NERSA typically allows a higher percentage increase so that Eskom can recover the additional allowable revenue from municipalities over 9 months before the national financial year ends. Therefore, the increase should be expected to be between 16 to 20 per cent. Municipalities can mitigate the negative impact of this increase by improving efficiencies on both the revenue collections and the spending side.

The outer two years of the 2021 MTEF use 8.9 per cent, which is an average annual tariff increase used for the NERSA's multi-year price determination period of 1 April 2019 to 31 March 2022. Moreover, the outer year is anticipated to be the first year of the MYPD 5 period, yet to be published.

6. Funding choices and management issues

Municipalities are under pressure to generate revenue as a result of the economic landscape, the COVID-19 pandemic, weak tariff setting and increases in key cost drivers to provide basic municipal services. Customers' ability to pay for services is declining, which means that less revenue will be collected.

In order to achieve financial sustainability, municipalities must demonstrate the political will to implement the changes required to improve their performance. Where municipalities consistently fail to deliver their mandates, the Constitution provides for provincial and/or national government to intervene.

6.1 Employee related costs

The *Salary and Wage Collective Agreement* for the period 01 July 2018 to 31 June 2020 has come to an end and a new agreement is under consultation, which we hope will take into account the current fiscal constraints faced by government. Therefore, in the absence of any information in this regard from the South African Local Government Bargaining Council (SALGBC), municipalities are advised to take into account their financial sustainability when considering salary increases. It has been observed over the previous years that salary increases were above inflation. In addition, municipalities that could not afford such increases did not apply for exemption as provided by SALGBC.

Given the current economic condition exacerbated by the COVID-19 pandemic, municipalities are urged to consider projecting increases to wage that would reflect their affordability. Some municipalities are already not able to afford the current wage cost and would indeed have to apply no more than a zero per cent increase in the 2021/22 MTREF and exercise the option for exemption for any negotiated increase above the level of their affordability.

Therefore, should accounting officers fail to consider salary increases within the ambit of the municipality's available resources and financial position, such failure will constitute an act of financial misconduct as defined in section 171 of the MFMA read with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings.

6.2 Remuneration of councillors

Municipalities are advised to budget for the actual costs approved in accordance with the Government Gazette on the Remuneration of Public Office Bearers Act: Determination of Upper Limits of Salaries, Allowances and Benefits of different members of municipal councils published annually between December and January by the Department of Cooperative Governance. It is anticipated that this salary determination will also take into account the fiscal constraints. Municipalities should also consider guidance provided above on salary increases for municipal officials during this process.

6.3 Payment of danger allowance to the employees

The work undertaken by the frontline staff in rendering services to communities must be appreciated whilst understanding the country's economic situation and the world resulting from the impact of COVID-19 pandemic. The SALGBC Circular No. 5 of 2020 provides advice to municipalities about the payment of danger allowance to employees working at the frontline to fight the COVID-19 pandemic.

The Circular provides that the council of the municipality must have an approved policy that should guide how the danger allowance should be paid, based on the affordability of the municipality. During this difficult financial situation posed by the COVID-19 pandemic, municipalities must consider the following:

1. Determine whether or not the municipality will afford the percentage increase in order to accommodate the Danger Allowance;
2. Assess the current status of the Employee Related Costs that form part of the municipality's budget in order to ascertain whether or not the inclusion of such allowance will not place the municipality's financial position in jeopardy in terms of the total Employee Related Costs as a percentage of the total expenditure;
3. Determine the credible funding source for the payment of Danger Allowance;

4. In this case the municipality must subject that change to “public participation processes” when dealing with the 2021/2022 MTREF based on the funding source; and
5. The municipality must also have a policy that operationalise the implementation of this kind of an allowance, only based on the determination/ assessment as per the aforementioned points.

6.4 Mayor’s discretionary funds and similar discretionary budget allocations

It has been observed that many municipal budgets contain sub-votes or allocations to “Mayoral Discretionary Funds”, “Special Projects”, “Special Events” or similar discretionary type funds. Municipalities must refer to section 12 of the MFMA in relation to setting up a relief, charitable, trust or other funds.

National Treasury regards these types of allocations as a bad practice because:

- It is not clear how they are aligned to the constitutional requirement that municipalities structure their budgeting and planning processes to give priority to the basic needs of the community, and to promote the social and economic development of the community (see section 153(a) of the Constitution);
- They do not provide for the appropriation of funds for the purposes of a department or functional area of the municipality (see the definition of ‘vote’ in section 1 of the MFMA);
- They undermine the budget consultation processes since the intended use of the funds is not transparently reflected in the tabled budget; and
- There is a risk that they may be abused for personal gain or to improperly benefit another person or organisation.

Therefore, National Treasury discourages allocations of this nature. Good budget practice requires that a municipal budget should transparently indicate the purposes and areas where municipal funds (i.e. public funds) are to be allocated. These kinds of discretionary funds immediately raise public suspicions of impropriety and corruption. In terms of section 52(a) of the MFMA the Mayor “must provide general political guidance over the fiscal and financial affairs of the municipality”. The Mayor, therefore, provides direct input into the budget. If this is the case, why does the Mayor require a ‘discretionary / personal slush fund’?

Section 17(3)(b) of the MFMA requires that when an annual budget is tabled it must be accompanied by “measurable performance objectives ... for each vote in the budget”. What measurable performance objectives can be set in relation to these funds given that their use is at the discretion of the Mayor? This means the transparent and effective use of these funds cannot be monitored and assessed by the council and the public.

National Treasury notes that section 17(3)(j) of the MFMA requires that when an annual budget is tabled it must be accompanied by “particulars of any proposed allocations or grants by the municipality to ... (iv) any organisations or bodies referred to in section 67(1)”. The aim of this provision is to ensure that all proposed allocations or grants are presented transparently in the budget documentation that is tabled for public consultation and council approval, as well as for budget management and monitoring purposes. *Any allocations or grants made to organisations or bodies that are not reflected in a municipality’s budget or adjustments budget must be regarded as unauthorised expenditure because they are “(f) a grant by the municipality otherwise than in accordance with this Act”* (see definition of unauthorised expenditure in section 1 of the MFMA).

National Treasury further notes that section 67 of the MFMA only allows funds to be transferred to ‘an organisation or body’ and not to an individual. *Any allocations or grants to individuals, other than in terms of the municipality’s indigent policy or bursary scheme, must be regarded as*

irregular expenditure because they are expenditures not in accordance with a requirement of the MFMA.

National Treasury and provincial treasuries will exercise close oversight of all discretionary type allocations in municipal budgets. If there are any concerns about the use of these funds, section 74 of the MFMA will be used to request information in this regard and analyse it for consistency with the MFMA legal framework.

7. Conditional Grant Transfers to Municipalities

The annual Division of Revenue Act requires that municipalities must request for a rollover approval against any unspent conditional grants that were allocated through the Act, therefore this section provides guidance to municipalities with regard to the preparation for the 2020/21 unspent conditional grant and rollover process and should be referenced against previous annual budget circulars.

7.1 Criteria for the rollover of conditional grant funds

In terms of Section 22 of the Division of Revenue Act, 2020 (Act No.4 of 2020) (DoRA) in conjunction with the Division of Revenue Amendment Act, 2020 (Act No. 10 of 2020) (DoRAA) and the Division of Revenue Second Amendment Act, 2020 (Act No. 20 of 2020), the Act requires that any conditional allocation or a portion thereof that is not spent at the end of the 2020/21 financial year reverts to the National Revenue Fund, unless the rollover of the allocation is approved in terms of subsection (2). Furthermore, the receiving officer, provincial treasury and national transferring officer is required to prove to National Treasury that the unspent allocation is committed to identifiable projects, in which case the funds may be rolled over.

When requesting a rollover in terms of section 22(2) of the 2020 DoRA, municipalities must include the following information with their submission to National Treasury:

1. A formal letter, signed by the accounting officer addressed to the National Treasury requesting the rollover of unspent conditional grants in terms of section 22(2) of the 2020 DoRA;
2. A list of all the projects that are linked to the unspent conditional grants and a breakdown of how much was allocated and spent per project;
3. The following evidence indicating that work on each of the projects has commenced, as applicable to the specific rollover(s):
 - a) Proof that a contractor or service provider was appointed for delivery of the project before 31 March; or
 - b) Proof of project tender and tender submissions published and closed before 31 March with the appointment of contractor or service provider for delivery of service before 30 June in cases where additional funding was allocated during the course of the final year of the project;
 - c) Incorporation of the Appropriation Statement;
 - d) Evidence that all projects linked to an allocation will be fully utilised by 30 June 2022 (attach cash flow projection for the applicable grant).
4. A progress report (also in percentages) on the status of each project's implementation that includes an attached **legible implementation plan**;
5. The value of the committed project funding and the conditional allocation from the funding source;
6. Reasons why the grants were not fully spent during the year of original allocation per the DoRA;

7. Rollover of rollovers will not be considered therefore municipalities must not include previous year's unspent conditional grants as rollover request;
8. An indication of the time period within which the funds are to be spent if the rollover is approved; and
9. Proof that the Municipal Manager and Chief Financial Officer are permanently appointed.

No rollover requests will be considered for municipalities with vacant or acting Chief Financial Officers and Municipal Managers for a period exceeding 6 months from the date of vacancy; this also includes acting appointments as a result of suspensions of either MM or CFO that are more than 12 months.

If any of the above information is not provided or the application is received by National Treasury (Intergovernmental Relations Division) after 31 August 2021, the application will be declined.

In addition, National Treasury will also consider the following information when assessing rollover applications; and reserves the right to decline an application should there be non-performance by the municipality in any of these areas:

1. Compliance with the in-year reporting requirements in terms of sections 71 and 72 of the MFMA and section 12 of the 2020 DoRA, **including the municipal manager and chief financial officer signing-off on the information** sent to National Treasury;
2. Submission of the pre-audited Annual Financial Statements to National Treasury by 31 August 2021;
3. Accurate disclosure of grant performance in the 2020/21 pre-audited Annual Financial Statements, (i.e. correct disclosure of grant receipts and spending in the notes to the AFS);
4. Despite the fact local government is required to comply to different norms and standards prescribed by different legislations, municipalities are expected to fully comply with the provisions of DoRA that relates to rollover processes and disclose conditional grant performance in the 2020/21 pre-audited Annual Financial Statements in order to verify grant expenditure; and
5. Cash available in the bank (net position including short term investments) as at 30 June 2021 is equivalent to the unspent amount at the end of the financial year. If the amount that is requested for rollover **is not entirely cash-backed**, such a rollover will not be approved. National Treasury will also not approve portions of rollover requests.

It should be noted that under no circumstances will the National Treasury consider requests to rollover:

1. The entire 2020/21 allocation to the municipality, in cases whereby the rollover request is more than 50 per cent of the total allocation, National Treasury will approve the rollover amount up to 50 per cent of the 2020/21 allocation;
2. Rollover request of the same grant for the third consecutive time;
3. Funding for projects constituted through Regulation 32 of the Municipal Supply Chain Management Regulations (Gazette No.27636). Projects linked to additional funding and disasters are exempted; and
4. A portion of an allocation where the proof of commitment for the rollover application is linked to invoices that were issued before or on 31 May 2021.

7.2 Rollover request against the Covid-19 allocated through the Equitable Share

The Division of Revenue Amendment Act, 2020 (Act No 10 of 2020) made available to Local government an amount of R11 billion following the President's speech on 20 April 2020. The President pronounced that R20 billion would be made available to municipalities in order to provide emergency water supply, increase sanitation of public transport facilities, and provide

food and shelter for the homeless. The R20 billion consisted of an additional allocation of R11 billion, which was transferred through the Equitable Share, and the R9 billion was funded from the repurposed spending within conditional grants allocated to municipalities. This increased the 2020/21 municipal Equitable Share allocation from R74.7 billion to R85.7 billion.

The R11 billion added to the local government Equitable Share allowed municipalities to maintain existing services despite a temporary decline in revenue collections and also cover some additional expenses incurred in response to the pandemic, including the provision of temporary shelter for homeless people during the lockdown.

Although the R11 billion was allocated through an unconditional grant (Equitable Share), these are committed funds in response to the Covid-19 pandemic. Consequently, the municipalities are required to request a rollover from National Treasury of any unspent committed Covid-19 allocation to be rolled over into the 2021/22 financial year.

Municipalities are therefore required to provide the following information to National Treasury in order to prove that the unspent funds are committed and also provide approval to allow the unspent funds to be spent in the 2021/22 financial year.

1. Provide the contracts that are linked to the response of the Covid-19 pandemic in line with the provisions made in the 2020 DoRAA;
2. Reasons why the funds were not fully spent during the year of original allocation per the DoRAA;
3. Accurate disclosure of Covid-19 allocation expenditure in the 2020/21 pre-audited Annual Financial Statements, (i.e. correct disclosure of grant receipts and spending in the notes to the AFS); and
4. Any expenditure incurred against the unspent Covid-19 funds that was not approved for the rollover will be regarded as unauthorized expenditure.

7.3 Unspent conditional grant funds for 2020/21

The process to ensure the return of unspent conditional grants for the 2020/21 financial year will be managed in accordance with section 22 of the DoRA. In addition to the previous MFMA Circulars, the following practical arrangements will apply:

- Step 1: Municipalities must submit their June 2021 conditional grant expenditure reports according to section 71 of the MFMA reflecting all accrued expenditure on conditional grants and further ensure that expenditure reported to both National Treasury and national transferring officers reconcile;
- Step 2: When preparing the Annual Financial Statements, a municipality must determine the portion of each national conditional grant allocation that remained unspent as at 30 June 2021. These amounts **MUST** exclude all interest earned on conditional grants, retentions and VAT related to conditional grant spending that has been reclaimed from SARS, which must be disclosed separately; and
- Step 3: If the receiving officer wants to motivate in terms of section 22(2) of the 2020 DoRA that the unspent funds are committed to identifiable projects, the rollover application pack must be submitted to National Treasury by no later than 31 August 2021.

National Treasury will not consider any rollover requests that are incomplete or received after this deadline.

- Step 4: National Treasury will confirm in writing whether or not the municipality may retain any of the unspent funds as a rollover based on criteria outlined above by 22 October 2021;

- Step 5: National Treasury will communicate the unspent conditional grants amount by 08 November 2021. A municipality must return the remaining unspent conditional grant funds that are not subject to a specific repayment arrangement to the National Revenue Fund by 19 November 2021; and
- Step 6: Any unspent conditional grant funds that should have, but has not been repaid to the National Revenue Fund by 19 November 2021, and for which a municipality has not requested a repayment arrangement, will be offset against the municipality's 07 December 2021 equitable share allocation.

All other issues pertaining to Appropriation Statement and reporting on approved rollovers are addressed in the Annexure to MFMA Circular No. 86.

7.4 Importance of section 17 of the Division of Revenue Act

The purpose of this section is to provide further clarity on section 17 of DoRA in relation to the transfer of funds to the organ of state in order to implement projects on behalf of the municipalities.

Section 17 (3) of DoRA states that a receiving officer may not allocate any portion of a schedule 5 allocation to any other organ of state for the performance of a function, unless the receiving officer and the organ of the state agree on the obligation of both parties and a payment schedule, the receiving officer has notified the transferring officer, the relevant provincial treasury and National Treasury of the agreed payment schedule and:

- a. The allocation
 - i) Is approved in the budget for the receiving provincial department or municipality; or
 - ii) If not already approved;
 - aa) the receiving officer notifies the National Treasury that the purpose of the allocation is not to artificially inflate the expenditure estimates of the relevant municipality and indicates the reasons for the allocation; and
 - bb) the National Treasury approves the allocation; or
- b. The allocation is for the payment for goods or services procured in accordance with the procurement prescripts applicable to the relevant province or municipality and, if it is an advance payment, paragraph (a) (ii) applies with the necessary changes.

Further, section 17 (4) states that the receiving officer must submit a copy of the agreement envisaged in subsection (3) to the transferring officer and the National Treasury before payment is made.

This section requires municipalities to comply with section 17 (3) before any DoRA allocated funds are allocated to any organ of state, and the municipality should first seek approval from National Treasury.

Note that National Treasury considers the following when assessing the request from the municipality for approval:

1. If the municipality is benefitting and utilising from the five per cent from capital grants that may be utilised for Project Management Unit (PMU). In terms of the capital grant framework (i.e. MIG and IUDG and three per cent for the USDG), municipalities are allowed to utilise a certain per cent of the grant for PMU or capacity support in order to implement capital projects. Therefore, if municipalities are benefitting from this initiative, the PMU should be capacitated enough to implement capital project;
2. Municipalities that are benefitting from the added technical support from Municipal Infrastructure Support Agent (MISA) will not be granted approval because MISA would assist with providing support and develop technical capacity towards sustained

accelerated municipal and service delivery. This implies that the municipality would be capacitated and be in a better position to implement capital project; and

3. If the request does not comply with the grant conditions, framework and if the transfer artificially inflates the expenditure estimates.

The following information must be submitted to National Treasury before approval is granted to municipalities to transfer funds to organs of the state:

1. In consultation with the relevant transferring officer municipalities must submit their request to National Treasury for approval;
2. Provide the time frames regarding the duration of this arrangement between the municipality and the organ of the state;
3. Provide the Service Level Agreement between the municipality and the organ of the state in consultation with the relevant transferring officer;
4. Provide the agreed payment schedule reflecting the disbursement of the funds;
5. Must provide the reasons why the municipality has taken such a decision;
7. If amongst the reasons for the request is related to capacity challenges, the municipality must therefore prove beyond reasonable doubt that there are capacity challenges and the reasons thereof; and
8. Upon approval, the municipality must submit the approved budget that includes the allocation.

Note that once the allocation has been approved, the payment for goods or services must be procured in accordance with or in compliance with the procurement prescripts applicable to the relevant municipality. If there is an agreement for an advancement, subsection (a) (ii) will apply in order to determine if the payment does not artificially inflate the expenditure estimates. Further, before funds are transferred, the national transferring officer and National Treasury must agree on the payment schedule.

Therefore, if any expenditure incurred which emanates from such an arrangement while there was non-compliance with section 17, grant conditions and framework, such expenditure will not be recognised by both National Treasury and relevant transferring officer and will be classified as unauthorised expenditure.

8. The Municipal Budget and Reporting Regulations

8.1 Service Level Standards

Municipalities are reminded to update the service level standards which must form part of their 2021/22 MTREF tabled budget documentation. A broad framework on the minimum service standards was issued with MFMA Circular No. 75. Therefore, the outline must be used as a guideline and be amended accordingly to align to the municipality's specific circumstances.

8.2 Assistance with the compilation of budgets

If municipalities require advice with the compilation of their respective budgets, specifically the budget documents or Schedule A1, they should direct their enquiries to their respective provincial treasuries or to the following National Treasury officials:

| Province | Responsible NT officials | Tel. No. | Email |
|--------------|--------------------------|--------------|--|
| Eastern Cape | Matjatji Mashoeshoe | 012-315 5553 | Matjatji.Mashoeshoe@treasury.gov.za |
| Buffalo City | Mandla Gilimani | 012-315 5807 | Mandla.Gilimani@treasury.gov.za |

9. Budget process and submissions for the 2021/22 MTREF

9.1 Submitting budget documentation and A1 schedules for 2021/22 MTREF

To facilitate oversight of compliance with the MBRR, accounting officers are reminded that:

- Section 22(b)(i) of the MFMA requires that **immediately** after an annual budget is tabled in a municipal council, it must be submitted to the National Treasury and the relevant provincial treasury in electronic formats. If the annual budget is tabled to council on **31 March 2021**, the final date of submission of the electronic budget documents and corresponding mSCOA data strings is **Thursday, 01 April 2021**.

Section 24(3) of the MFMA, read together with regulation 20(1) of the MBRR, requires that municipalities must submit the approved annual budget to both National Treasury and the relevant provincial treasury **within ten working days** after the council has approved the annual budget. E.g. if the council approves the annual budget on **31 May 2021**, given the new timeframe for the evaluation of the municipal budgets, the adopted budget data strings and documentation must be submitted by the latest **Monday, 14 June 2020**.

Municipalities are no longer expected to submit hard copies of all required documents including budget-related, Integrated Development Plan, Service Delivery Budget and Implementation Plan, Annual Financial Statements and Annual Reports to National Treasury via post or courier services. Electronic copies must be submitted in pdf format to the LG Upload portal or lgdocuments@treasury.gov.za.

9.2 Consolidated budgets and reports

Municipalities with entities are reminded that they must prepare and submit MTREF budgets, section 71 reports, annual financial statements and annual reports for both the parent municipalities and consolidated documents that incorporates the entity information in terms of the MBRR.

9.3 Submission using LG Upload Portal

In MFMA Budget Circular No 107, it was indicated that budget-related documents and schedules must be uploaded by approved registered users using the LG Upload Portal at: <https://lguploadportal.treasury.gov.za/> and that National Treasury was planning to retire lgdocuments@treasury.gov.za from 01 July 2021 to ensure that there is a single collection point of municipal financial data. However, based on workflow licensing challenges on the LG Upload Portal, data string submissions will shortly be shifted to the Open Portal GoMuni while documents must still be submitted using lgdocuments@treasury.gov.za. The document submissions will also be shifted to GoMuni as soon as possible.

All municipalities and their entities had to prepare their MTREF budget directly on the mSCOA financial systems from 01 July 2017. Therefore, all MBRR schedule submissions must be submitted in **PDF format only**.

9.4 Publication of budgets on municipal websites

In terms of section 75 of the MFMA, all municipalities are required to publish their tabled budgets, adopted budgets, annual reports (containing audited annual financial statements) and other relevant information on the municipality's website. This will aid in promoting public accountability and good governance.

All relevant documents mentioned in this circular are available on the National Treasury website, <http://mfma.treasury.gov.za/Pages/Default.aspx>. Municipalities are encouraged to visit it regularly as documents are regularly added/ updated on the website.

| <div> <div></div> Municipal Infrastructure Grant(IR-003-005-001-002-005-002) </div> |

Rollovers

In the event that the full grant was not spent at the end of the financial year, the municipality must apply for a rollover as per the process stipulated in the Division of Revenue Act (DoRA). Until such approval has been granted by the National Treasury, a municipality may not continue to incur expenditure against the unspent conditional grant allocation. This does not mean that the municipality should stop or cancel ongoing projects, but Council approval must be obtained to fund the spending from own funding sources until rollover approval is granted by the National Treasury. Once the rollover has been approved by the National Treasury, the amount of the rollover must be ratified through an adjustments budget. The mSCOA chart makes provision for all the required transactions in this regard.

Roll over not approved/ Offset against Equitable share

In the event that the rollover is not approved by the National Treasury, the unspent grant funding must be paid back to the National Revenue Fund or alternatively be offset against the Equitable Share and the Liability must be reduced by:

- 1) Debiting Unspent Grant (Repayment) to reduce the liability that was still outstanding; and
- 2) Crediting Item Revenue Equitable Share to adjust the revenue in line with DoRA.

This is further illustrated below:

- 1) Debit Liability: posting level

| 8.3 | TABLING OF REVISED CAPITAL EXPENDITURE FRAMEWORK 2021 AS PART OF THE INTEGRATED URBAN DEVELOPMENT GRANT |
|------------|--|

Collaborator No: 704203
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: Council 31 March 2021

1. SUBJECT: TABLING OF REVISED CAPITAL EXPENDITURE FRAMEWORK 2021 AS PART OF THE INTEGRATED URBAN DEVELOPMENT GRANT

2. PURPOSE

For Council to:

- (a) Adopt the 2021 Capital Expenditure Framework as revised; and
- (b) Support and approve the submission of the Revised Capital Expenditure Framework (CEF) to the National Department of Cooperative Government and Traditional Affairs (CoGTA) as part of the Integrated Urban Development Grant.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

According to section 21(n) of the Spatial Planning and Land Use Management Act (SPLUMA), Act No. 16 of 2013, the content of a municipal spatial development framework must determine a Capital Expenditure Framework (CEF) for the municipality's development programmes. This means that the CEF is informed by the Spatial Development Framework i.e. stating the spatial vision of the municipality where the CEF states the spatial and strategic, vision of the municipality supported by a clear financial strategic plan.

The Integrated Urban Development Framework (IUDF) was approved by Cabinet in April 2016, which led to the Integrated Urban Development Grant that was introduced in the 2019/2020 Division of Revenue Act as a Consolidated Grant for Intermediate City Municipalities (ICM's). Stellenbosch Municipality was identified as one of the municipalities to benefit from this new grant, subject to specified criteria. The purpose of the ICMs support strategy is to help translate IUDF policy into practical programmes of action in the ICMs.

The business plan for the IUDG is a three-year capital programme that is aligned with a long-term CEF (10 year plan). The draft Revised Capital Expenditure Framework must be submitted to the Department of Cooperative Governance (DCoG), by 31 March 2021.

5. RECOMMENDATIONS

that the Draft Revised Capital Expenditure Framework be approved for submission to CoGTA by 31 March 2021.

6. DISCUSSION / CONTENTS

6.1 Background

The Integrated Urban Development Grant Framework requires intermediate city municipalities to develop a Capital Expenditure Framework. The "Capital Expenditure Framework" (CEF) is referred to as a key component of the SDF in the Spatial Planning and Land Use Management Act, Act 16 of 2013 (SPLUMA) section (21)(n). The legislative context is within the realm of municipal planning and relates specifically to Integrated Development Plans (IDPs), Spatial Development Frameworks (SDFs) and Municipal Budgeting. The Department of Cooperative Governance has prepared guidelines that seek to assist intermediate cities to develop their CEF. Stellenbosch

Municipality was identified as one of the municipalities to benefit from this new grant, subject to specified criteria.

6.2 Discussion

In April 2016 cabinet adopted the Integrated Urban Development Framework (IUDF) as the official national urban policy of government under the custodianship of the Department of Cooperative Governance (CoGTA). The IUDF marks a new deal for South Africa's cities and towns. It sets a policy framework to guide the development of inclusive, resilient and liveable urban settlements while addressing the unique conditions and challenges facing South Africa's cities and towns. The key outcome of the IUDF is spatial transformation and to create a growth model of compact, connected and coordinated cities and towns.

The role of a CEF is to frame the outcomes of a multitude of planning documents within a municipality in order to ensure that implementation is guided by a strategic, spatial, financial and social logic. This is informed by national and provincial strategies and policies and those at the municipal level, namely, Integrated Development Plans (IDP), Spatial Development Framework (SDF) and other departmental strategies.

There are a number of key intentions in introducing the CEF as the basis for monitoring the IUDG:

- a) To ensure that priorities identified in the spatial development framework are translated into capital programmes;
- b) To promote long-term infrastructure planning;
- c) To promote infrastructure planning that is better integrated across sectors and spheres and within space; and
- d) To promote a more integrated approach to planning within municipalities that brings together technical, financial and planning expertise.

The key changes made in the draft Revised CEF, include updates to project within the context of the municipal available funding envelope, including:

- Section 2: Functional and Priority Development Area Identification -updates on spatial development concepts;
- Section 3: Updates to the socio-economic and spatial profile;
- Section 5: Integrated Infrastructure Investment Framework - updates to the demand captured on CP3;
- Section 6: Long Term Financial Strategy - updates to take into account new capital demand captured on CP3 and the Draft 2020/21 MTREF Budget;
- Section 7: Affordability Envelope – funding envelope in line with Draft 2020/21 MTREF Budget;
- Section 8: Prioritisation Model – updated with 2020/21 CEF context prioritisation and budget fit.
- Section 9: Budget Scenario – updated
- Section 10: 10 year Programme Analysis – updated

6.3 Financial Implications

The review to the 2020 Capital Expenditure Framework was done through support of external service providers which could be appointed as a result of funding to support to the value of R2 million received from the DBSA. The financial implications is depicted below for ease of reference.

DBSA Funding received for the Revision and Update of the Stellenbosch CEF 2021:

| Deliverables | Description | Estimated Costs |
|---|---|-----------------|
| Updated CEF | Revised CEF with all components as determined by DCOG | R500 000 |
| Updated Long Term Spatial Quantification and Modelling | Demand quantification and modelling for municipal area based on approved SDF | R250 000 |
| Long Term Financial Plan | Updated 10 year Long Term Financial Plan | R500 000 |
| Asset Management Framework / Strategy | Asset Management Framework to guide infrastructure demand quantification aligned to industry standards. | R750 000 |

6.4 Legal Implications

According to section 21(n) of the Spatial Planning and Land Use Management Act (SPLUMA), Act No. 16 of 2013, the content of a municipal spatial development framework must determine a Capital Expenditure Framework (CEF) for the municipality's development programmes. This means that the CEF is informed by the Spatial Development Framework i.e. stating the spatial vision of the municipality where the CEF states the financial vision of the municipality.

6.5 Staff Implications

There are no additional staff implications should the recommendation as set out above be accepted.

6.6 Previous / Relevant Council Resolutions

The following Council approval is applicable:

COUNCIL MEETING: 2019-05-29

RESOLVED (majority vote)

that the Final Capital Expenditure Framework be approved for submission to COGTA.

COUNCIL MEETING: 2020-03-30

RESOLVED (majority vote)

that the Final Capital Expenditure Framework be approved for submission to COGTA.

6.7 Risk Implications

None.

ANNEXURES

Annexure 1: Stellenbosch Municipality - Draft Revised Capital Expenditure Framework 2021.

1.1 Legislative context of a Capital Expenditure Framework

1.1.1 The constitution of South Africa

The term “Capital Expenditure Framework” (CEF) became a municipal mandate with the promulgation of the Spatial Planning and Land Use Management Act, Act 16 of 2013 (SPLUMA) section (21)(n). However, the concept of a Capital Investment- or Capital Expenditure Framework has been alluded to in several other preceding legislative and policy instruments. The legislative context is best understood when considering a brief history of municipal planning, with specific reference to Integrated Development Plans (IDPs), Spatial Development Frameworks (mSDFs), and Municipal Budgeting. To understand the evolution of municipal planning in this context, the point of departure is the Constitution of South Africa.

Section 153 of the Constitution of South Africa states that a municipality must structure and manage its administration, budgeting and planning process to prioritise basic needs and to promote social and economic development. The Constitution instructs municipalities to have a developmental focus and that this should be achieved through the planning- and budgeting processes.

1.1.2 Municipal planning processes

The Local Government Transitions Act (Act 209 of 1993) was the first act stating that a municipality should compile an IDP - it did however not define the content or the nature thereof.

The Local Government Transitions Act Second Amendment (Act 97 of 1996) then defined an IDP as a plan aimed at the integrated development and management of the area of jurisdiction of a municipality. Section (10)(c) specifically showed that IDPs would promote rational and developmentally oriented budgeting, monitoring and tracking of development. A similar definition of an IDP was included in the Local Government Municipal Structures Act (Act 117 of 1998). This definition further underlined the inter-relationship between the planning and budgeting process.

The Local Government Municipal Systems Act (MSA) (Act 32 of 2000) was a successor to the Local Government Municipal Structures Act (Act 117 of 1998). The MSA was deemed the most important statute furthering all aspects of integrated development planning. Chapter 5 of the act is titled “Integrated Development Planning” and provides that municipalities must undertake developmental-oriented planning. This is to ensure that the objectives of local government and its developmental duties (as set out in the constitution) are achieved.

The act states that an IDP is the principal, single, inclusive and strategic planning instrument of a municipality. One of the objectives of the IDP is to align the resources and capacity of the municipality with implementation of the plan. This forms the policy framework and general basis on which annual budgets must be based, and should be compatible with national and provincial development plans and planning requirements. The core components and content of an IDP must reflect the following:

- The municipality’s vision for its own long-term development of the municipality;
- An assessment of the existing level of development in the municipality;
- The municipality’s development priorities and objectives;

- The municipality's development strategies;
- The municipality's mSDF;
- The municipality's operational strategies;
- An applicable disaster management plan;
- A financial plan, and;
- Performance indicators and performance targets.

In section (5)(1)(a) of SPLUMA (Act 16 of 2013), it is stated that municipal planning consists of the compilation, approval, and review of an IDP. SPLUMA further states in Part E (20)(2) that the municipal mSDF must be prepared as part of a municipality's IDP in accordance with the provisions of the MSA (Act 32 of 2000).

Section 21 of SPLUMA prescribes what the content of a municipal mSDF must be. Section 21(n) is of particular importance as it states that a municipal mSDF must determine a CEF for the municipality's development programmes, depicted spatially.

1.1.3 Municipal budgeting processes

The Municipal Systems Act (Act 32 of 2000) states that an IDP must consist of a financial plan. The Municipal Planning and Performance Management Regulations (Regulation 2 of 2001) describes the details of such a financial plan and states in section (3) that the financial plan in a municipality's IDP must:

- Include budget projections;
- Indicate the financial resources that are available for capital project developments, and;
- Include a financial strategy that defines sound financial management and expenditure control, as well as ways and means of increasing revenues and external funding for the municipality and its development priorities and objectives.

After the MSA (Act 32 of 2000) defined what should be done in terms of the IDP and financial planning, the Local Government: Municipal Finance Management Act (MFMA) (Act 56 of 2003) was established to secure sound and sustainable management of the financial affairs of municipalities and other institutions in the local sphere of government and to establish treasury norms and standards for local government. The MFMA (Act 56 of 2003) was revised in 2011 and redefined its aim to enable improved processes of municipal planning budgeting, allowing for more informed decisions.

In order to achieve the aim of the MFMA (Act 56 of 2003), the MFMA prescribes the typical content of municipal budgets in chapter 4. In section 17(3)(b) the act states that when an annual budget is tabled it must be accompanied by measurable performance objectives for revenue from each source and for each vote in a budget, taking into account the municipality's IDP. This means that a municipal budget cannot be drafted in isolation of the IDP. Furthermore, section 21 of the act states that a mayor must co-ordinate the processes for preparing the annual budget and for reviewing the municipality's IDP in order to ensure that the tabled budget and the IDP are mutually consistent and credible.

Section 7(1) of the Municipal Budget and Reporting Regulations (MBRR) states that policies that affect or are affected by the annual budget of a municipality should include a policy related to a Long-term Financial Plan.

1.1.4 The relationship between the planning and budgeting processes

From the legislative context provided in this section, the following municipal mandate imperatives are highlighted:

- That the Constitution of South Africa demands planning and budgeting processes in local government (Constitution of South Africa, Act 108 of 1996);
- That the Constitution of South Africa demands local government to be developmental and resource efficient (Constitution of South Africa, Act 108 of 1996);
- That an IDP is deemed as the principal, single, inclusive and strategic planning instrument of a municipality and that it should comprise of a financial plan as well as a mSDF (Municipal Systems Act, 32 of 2000);
- That the municipal budgeting process cannot stand alone from the IDP process (Municipal Finance Management Act, 56 of 2003), and;
- That the mSDF must contain a CEF that is spatially referenced (Spatial Planning and Land Use Management Act, 16 of 2013).

In April 2016 Cabinet approved the Integrated Urban Development Framework (IUDF). The IUDF is coordinated by the Department of Cooperative Governance (COGTA). The IUDF capital programme requires alignment by participating municipalities wishing to access the Integrated Urban Development Grant (IUDG). This required alignment should be achieved through the development of a long-term CEF, with a 10-year planning horizon. According to the 2018 COGTA guideline on preparing a CEF, a CEF is the outcome of strategic prioritisation within the available affordability envelope of a municipality, based on a long-term financial plan. Furthermore, the CEF must:

- Translate the priorities identified in the mSDF, into capital programmes;
- Promote long-term infrastructure planning;
- Promote infrastructure planning that is better integrated across sectors and spheres and within space, and;
- Promote a more integrated approach to planning within municipalities that brings together technical, financial and planning expertise.

1.2 The role of the CEF in relation to the IUDF

The IUDF is a policy initiative of the Government of South Africa, coordinated by COGTA, which seeks to foster an understanding between local government and civil society on how best to manage urbanisation and achieve the goals of economic development, job creation and improved living conditions within municipalities.

The IUDF marks a new deal for South African cities and towns and sets a policy framework to guide the development of inclusive, resilient and liveable urban settlements, while addressing the unique conditions and challenges facing South Africa's cities and towns. It advocates the effective management of urbanisation so that the increasing concentration of an economically active population translates into higher levels of economic activity, greater productivity and higher rates of growth, thereby transforming our South African cities into engines of growth and prosperity.

The key outcome of the IUDF is spatial transformation. The identified policy levers and priorities are crucial for maximising the potential of urban areas, by integrating and aligning investments in a way that improves the urban form. The CEF is therefore the recommended mechanism for local

government to achieve spatial transformation by aligning capital investment in such a way that the key outcomes of the IUDF are achieved.

Figure 1-1: Core elements of IUDF

1.3 The role of the CEF in relation to the IUDG

A review of Local Government Infrastructure Grants was initiated in October 2013, led by National Treasury together with the COGTA, the Financial and Fiscal Commission, the South African Local Government Association (SALGA), and the Department of Performance Monitoring and Evaluation (DPME). The review envisioned a grant system that should include:

- Greater differentiation in the type of grants provided to different municipalities;
- A move from focussing on rolling out new infrastructure to increased focus on the management, maintenance and renewal of existing infrastructure;
- An approach to ensure greater value for money for the funds spent, and;
- A framework to provide coherence and consistency in the management of the grant system.

The IUDF is consistent with - and reinforces - the findings of the Review of Local Government Infrastructure Grants. As a result, the IUDG is scheduled to be introduced in the 2019/20 Division of Revenue Act (DORA) as a consolidated grant for Intermediate City Municipalities (ICMs)¹. The aim of the IUDG is to support spatially aligned public infrastructure investment that will lead to functional and efficient urban spaces and to ultimately unlock urban growth. In terms of the IUDG description, the purpose of the grant is to:

- Provide funding for public investment in infrastructure for the poor;
- Promote increased access to municipal owned sources of capital finance in order to increase funding for public investment in economic infrastructure;
- Ensure that public investments are spatially aligned with the local government development vision, and;
- Promote the sound management of the assets delivered.

According to the IUDG policy framework, a CEF is a comprehensive, high-level, long-term infrastructure plan that flows from a mSDF, which estimates the level of affordable capital investment

¹ Intermediate City Municipalities was defined by COGTA through the IUDF programme.

by the municipality over the long-term. The CEF is therefore the municipal instrument to realise the agenda of the IUDF.

1.4 The role of the CEF

A Capital Expenditure Framework is a consolidated, high-level view of infrastructure investment needs in a municipality over the long-term (10 years) that considers not only infrastructure needs but also how these needs can be financed and what impact the required investment in infrastructure will have on the financial viability of the municipality going forward.

Guide to preparing an Infrastructure Investment Framework, SALGA, 2017, page 2

The role of a CEF is to frame the outcomes of a multitude of planning documents within the municipality in order to ensure that implementation is guided by a strategic, spatial, financial and socio-economic logic. A CEF serves not only as a performance evaluation mechanism, but also as a rationale towards capital investment planning that provides business intelligence, data validation, project synchronisation and prioritisation. Furthermore, the role of the CEF is to strengthen the process currently institutionalised within the municipality, and to show how capital investment matures from planning to implementation through various stages of governance.

The primary outputs of the CEF can be best understood in terms of the process flow shown in Figure 1-2 below:

- Firstly, prior to subjecting projects applying for budget to a prioritisation and budgeting process, the municipality must first identify all capital demand or needs that are required over the long-term within their jurisdiction, irrespective whether the capital demand stems from local, provincial or national spheres of government. The Integrated Infrastructure Investment Framework (IIIF) or Capital Investment Framework (CIF) therefore aims to gather the long-term capital demand required for the municipality to function optimally.
- The next step is to consolidate the capital demand into one synthesised plan depicted spatially, along with all the budget reform requirements emanating from the MFMA and National Treasury (i.e. SIPDM project life-cycle planning, mSCOA segments etc.).
- The mSDF is then unpacked to identify the spatial vision as well as the functional areas and priority development areas for the municipality in order to prepare a socio-economic and developmental profile for the municipality.
- The socio-economic and developmental profiling serves as a primary input to the demand quantification and setting of programmatic long-term infrastructure investment targets required realise the spatial vision of the municipality.
- The spatial development vision of the municipality, along with other strategic, financial, policy, socio-economic and technical objectives are used to prepare a prioritisation model in order to rank or score capital demand (projects) based on their alignment to the spatial, strategic, financial, policy, socio-economic and technical objectives of the municipality.
- The process of setting up a budget for the CEF draws from the outcomes of the long-term financial plan whereby the affordability envelope and the optimal funding mix for capital investment for the municipal is modelled based on key socio-economic and population growth projections. Once the affordability envelope is known, the 10-year capital budget can be prepared with inputs from the project prioritisation results.

- The final step in preparing the CEF is to define an implementation programme for the medium term – in line with the Medium-Term Expenditure Framework (MTEF). The medium-term implementation plan of the CEF is known as the Capital Expenditure Implementation Programme (CEIP) which is essentially the first three budget years of the 10-year Capital Expenditure Framework.

Figure 1-2: The role of the CEF in relation to other internal processes

1.5 Roll-out of the IUDG

In 2016, Cabinet adopted the IUDF which positions intermediate sized municipalities and towns (ICMs). The IUDF is coordinated by COGTA, which has set up the institutional arrangements for the coordination of activities across government departments and agencies, under the overall management of an IUDF Working Group.

The IUDF ICM programme, targeting 39 municipalities, is intended to provide support for the municipalities in the middle size and density range of cities and towns. The purpose of the ICM support strategy is to help translate IUDF policy into practical programmes of action. In so doing the initiative aims to give impetus to achieve the main IUDF goals, which are forging new integrated forms of spatial development; ensuring that people have access to social economic services, opportunities and choices; harnessing urban dynamism to achieve inclusive and sustainable growth; and enhancing the governance capacity of the state and citizens in ICMs.

One element of the implementation of the IUDF is the introduction of the IUDG. The 39 ICMs are all eligible for the IUDG as from the 2019/20 financial year. The IUDG is a three-year capital programme that must be aligned with a long-term Capital Expenditure Framework (CEF). This CEF must be developed by each ICM in order to qualify for the IUDG.

1.6 CEF Planning Method and Guidelines

The planning approach towards developing this CEF was to draw on the information obtained from the municipality, the institutional arrangements within the municipality, and the guidelines provided from the IUDF on the content of a CEF.

1.6.1 Draft IUDG CEF Guidelines

According the guidelines for the preparation of a CEF prepared by COGTA, a CEF should comprise of the following components:

- Step 1: Identify Functional Areas (FA) and Priority Development Areas (PDAs);
- Step 2: Undertake developmental and socio-economic profiling for the municipality as a whole, as well as each functional area;
- Step 3: Compile a land budget for residential and commercial growth for the next 10 years;
- Step 4: Confirm the appropriateness of the mSDF vision and long-term spatial structure for the municipality as an input to the prioritisation and budget alignment of the municipality;
- Step 5: Prepare programmatic and project-based responses per sector based on the land budget and residential and commercial growth estimates, in order to identify capital investment requirements and backlogs;
- Step 6: Develop a long-term financial plan, with a planning horizon of 10 years;
- Step 7: Compile an affordability envelope and optimal capital funding mix;
- Step 8: Structure capital investment programmes per functional area;
- Step 9: Compile a CEF for a 10-year horizon based on spatially-prioritisation; and
- Step 10: Conceptualise a 3-year (MTREF) CEIP with project and programmes which will serve as the municipal capital budget.

1.6.2 Stellenbosch City Strategic Planning and Implementation Framework Process

The Figure 1-3 below depicts the process followed to facilitate the development the Capital Expenditure Framework.

Figure 1-3: Capital Investment Planning and Long-Term Financial Planning

This process depicted in Figure 1-3 can be broken down into 11 distinct steps.

a. Step 1: Identify Functional Areas and Priority Development Areas

In order to define the context in which the CEF is applicable, this section aims to analyse the current spatial and demographic realities of the municipality and conclude by identifying the Functional Areas² and Priority Development Areas from the mSDF as the primary spatial structuring elements of the municipality.

This step is essential for the rest of the process, as it identifies the areas with sustainable development potential and areas which qualify as spatial targeting areas during the prioritisation process. Different Functional Areas / Priority Development Areas within the municipality, are fulfilling different functions, and should therefore not enjoy the same priority – a hierarchy of these areas should therefore be identified as to inform investment scenarios and decisions going forward.

b. Step 2: Complete socio-economic and spatial profiling

The purpose of this step is to understand the nature of the demographic and socio-economic characteristics of the municipality as a whole, and in each of the identified functional areas of the municipality. This assessment includes the current accessibility to, and quality of basic services as well as social facilities and amenities. This information serves as the base-data to be used for infrastructure and financial modelling.

c. Step 3: Compile a land budget and demand quantification

Once the socio-economic and spatial profiling has been concluded, growth scenarios are considered for the municipality in order to prepare a future land use budget including residential and commercial growth projections along with population projections over a 10-year period. These growth projections will serve as modelling input to derive demand for infrastructure and services in the municipality. Three components contribute to the demand for investment and can be summarised as follows:

- Existing households without access to services;
- Renewal and maintenance of existing infrastructure, and;
- The growth in households.

d. Step 4: Verify the mSDF

The purpose of this step is to verify whether the municipal growth projections, in terms of the population, social facilities, basic services and land budget, is in line with the municipality's latest approved version of the mSDF.

e. Step 5: Identify infrastructure demand and Capital Investment Framework

The purpose of this step is to identify specific infrastructure and service backlogs and requirements within the municipality's jurisdictional area. It will incorporate existing backlogs and include backlogs with regards to access-to-services requirements, assets refurbishment requirements and lastly, replacement and renewal requirements for a 10-year horizon. At the end of this step, a comprehensive list of interventions will be identified that is required to realise the spatial vision of the municipality.

² Please note, that the term "Functional Area" is defined by COGTA – but in essence refers to the core spatial structuring elements of the municipality.

Considering firstly the institutional context in which municipalities finds themselves and secondly the fact that other tiers of government are responsible for different investment mandates in the same jurisdiction, the CIF should not only consider capital investment from the local municipality, but also investment planning by provincial and national government. The purpose of the inter-governmental project pipeline is to enable a view of planned interventions by various spheres of government, within the same jurisdictional area, given that not all required infrastructure is the responsibility of the local government authority.

f. Step 6: Develop a long-term financial model and plan

The purpose of this step is to apply a sound long-term financial planning methodology which comprise of a four-step modelling process. This iterative process consists of the following key steps:

- Populate the financial planning base model;
- Calibrate financial planning base model;
- Forecast financial municipal financial position and ratios, and;
- Scenario Testing.

Once the long-term financial planning methodology has been applied, different scenarios can be tested, and the outcome results in a municipal affordability envelope and optimal capital investment funding mix.

g. Step 7: Identify an affordability envelope

Based on the LTFM, an affordability-envelope is compiled. The aim of the affordability envelope is to set the financial parameters for the CEF to prepare a 10-year horizon capital investment scenario.

h. Step 8: Project prioritisation and budget scenario development

The purpose of this step is to prioritise the list of capital demand or needs to realise the mSDF developmental vision and population growth scenario. Once the project needs have been prioritised, by using a sophisticated model that enables spatial and alpha numeric data inputs, the projects are fitted to the affordability envelope. The spatial prioritisation is of specific importance as it facilitates the allocation of budget towards the spatially targeted Functional Areas and Priority Development Areas of the municipality as required by legislation referred to in Section 1.1 of this document. The purpose of this step is to effectively and efficiently allocate limited resources to an unlimited demand which will enable the city to sustainably allocate resources and priority to projects that will realise the strategic and spatial vision of the municipality.

i. Step 9: Compile programmes per Functional Area

The purpose of this step is to allocate the identified projects to functional implementation programmes. This aims to enable and ease sequential implementation within the Functional Areas.

j. Step 10: Capital Expenditure Implementation Framework

Once the spatial and financial framework have been developed, the next step entails the identification of a medium-term implementation framework. The CEF is compiled to provide the most sustainable development path and implementation of the CEF is guided by the MTREF, which is the capital expenditure implementing mechanism of the municipality.

k. **Step 11: Implementation tracking**

The purpose of this step is to provide insight on the implementation of the MTREF. This is done by ensuring the project pipeline (from conceptualisation to prioritisation and budgeting), is compliant³ with the requirements of National Treasury and that the SDBIP project schedule, cashflows and milestones are captured after budget approval, to facilitate financial and non-financial performance reporting within the implementation year(s).

³Complies with the requirements of mSCOA and SIPDM

2 Functional and Priority Development Area Identification (Step 1)

The objectives of this section is to:

- Identify the FA's & PDA's based on the mSDF
- Identify the hierarchy based on the functional classification
- Identify the intended spatial outcomes for each of the primary PDA's

In terms of Section 152 (1) (b), (c) and (d) of the Constitution, a municipality must ensure the provision of services to communities in a sustainable manner, promote social and economic development and promote safe and healthy environments. It continues and state in Section 152 (2) that a municipality must strive, within its financial and administrative capacity, to achieve the objectives set out in Section 152 (1). The current developmental pressures experienced within the South African context, specifically the lack of available resources to address the infrastructure demand faced by municipalities, together with the legislative framework as set out in the Constitution of South Africa and other planning documents, led to the implementation of the principle of spatial targeting.

Spatial targeting refers to the deliberate focus of particular actions in a specific spatial area to achieve a desired outcome or objectives. This concept is an essential addition to the traditional planning approach followed by municipalities in delivering on their mandate, as spatial targeting is an effective and efficient instrument when a municipality aims to address spatial injustices within the prevailing resource constraints.

The purpose of this section, within the context of spatial targeting, is to identify and delineate Functional Areas (FAs) and Priority Development Areas (PDAs) for the Stellenbosch Local Municipality as the primary future spatial structuring elements using the draft mSDF as a primary input. Once the FAs and PDAs have been identified and delineated, a hierarchy of importance or priority will be allocated to the PDAs in order to inform the prioritisation and budget scenario process spatially.

The following sections will describe the concept of a Functional Area – as defined by COGTA – and it will furthermore describe FAs and how they relate to the mSDF, and the application thereof. The last component of this section will define the PDAs and express them in terms of Stellenbosch Local Municipality spatial context and hierarchy of importance.

2.1 A spatial contextualisation

2.1.1 Demarcation history

South Africa undergoes a reassessment of its municipal boundaries before each municipal election. Changes in municipal boundaries affect all levels of planning and also long-term development strategies. The next table shows the municipality(s) which previously formed part of the current municipality.

Table 2-1: Demarcation History

| | 2011 | 2006 | 2001 | 1996 |
|---|----------------|-------------------|---------------------------------|---|
| District municipality(s) / Metropolitan area(s) affected: | Cape Winelands | Cape Winelands DC | Boland DM, City of Cape Town MM | Metropolitan Area
Overberg DC
Winelands DC |
| Local municipality(s) affected: | Stellenbosch | Stellenbosch | City of Cape Town | Franschhoek TLC
Helderberg MLC
Nuweberg TRC
Oostenberg MLC
Paarl TRC
Pniel TLC
Stellenbosch TLC
Stellenbosch TRC |
| Number of wards | 22 | 19 | 19 | No data |

The data shows that Stellenbosch had little demarcation disruptions over its history. This contributes to stability in the municipal administrative area. Major shifts in demarcations can have a disruptive impact.

2.1.2 Regional context

Stellenbosch Municipality (SM) is located in the Cape Winelands' heart, a highly valued cultural landscape with globally important natural habitats. The municipality is bounded to the east and south by the Drakenstein, Wemmershoek and Limietberg mountain ranges. The Hottentots Holland range (i.e. Stellenbosch, Jonkershoek and Simonsberg Mountains) and the Bottelary Hills form the backdrop to the town of Stellenbosch itself. These mountains, and the fertile agricultural valleys that they shelter, are key elements contributing to the municipal area's sense of place. Significant portions of the municipality fall within globally recognised biosphere areas with large tracts of land designated as public and private conservation areas.

Institutionally, SM forms part of the Cape Winelands District Municipality (CWDM) of the Western Cape Province of South Africa. The municipality adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein and Theewaterskloof Municipalities to the east and north. Functionally, SM forms part of the Cape Town Region. SM covers a geographical area of approximately 830km².

Figure 2-1: Regional context

2.1.3 Local context

The main settlements are the historic towns of Stellenbosch and Franschhoek, and Klapmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniel, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlotenburg.

The location of Stellenbosch in the regional context is significant. On the one hand, it has a strong link with the Cape Town area through its location. On the other hand, however, its location on the fringe of one of South Africa's most prominent city regions provides challenges in its spatial and economic competitiveness. Issues related to its urban-rural transitional character provide challenges of growth and development.

Figure 2-2: Local context

2.2 Spatial Development Framework

2.2.1 Status

A vital component of the Capital Expenditure Framework, as envisioned by the Capital Expenditure Framework Guidelines (2018) developed by the National Department of Cooperative Governance and Traditional Affairs (COGTA), is the relationship between the Spatial Development Framework (mSDF) and the Capital Expenditure Framework (CEF).

The Stellenbosch Spatial Development Framework was approved on 11 November 2019. The underlying conceptual structure and investment paradigm as expressed in the mSDF has guided capital expenditure for more than 3 years based on the strategic decision making tools used by the municipality.

2.2.2 Spatial proposals and structuring elements – Conceptual Framework

The conceptual framework extracted from the mSDF⁴ shows the expression of the seven key principles, which include:

- Maintain and grow the assets of Stellenbosch's natural environment and farming areas
 - The spatial policies that relate to this principle, focuses on protective actions or alternatively called urban management.
 - The intent is to protect and expand priority conservation areas, establish ecological linkages, & preserve high-potential agricultural land within the municipality.
 - Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the mSDF objectives (including settlement hierarchy), and rural guidelines.
 - Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.
- Respect, preserve and grow our cultural heritage.
 - The spatial policies that relate to this principle, focuses on protective actions around specific spatial elements e.g. scenic landscapes, scenic routes, and special places of arrival, whilst also focussing on improving the landscape and public amenities associated with these cultural assets.
 - The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.
 - As far as possible, protect cultural landscape assets – including undeveloped ridge lines, view corridors, scenic routes, and vistas – from development.
 - Support alternative uses for historic structures and places which will enable its preservation (subject to adherence to general mSDF strategy and policies)
- Direct growth to areas of lesser natural and cultural significance as well as movement opportunity
 - The spatial policies that relate to this principle, focuses on protective actions around specific spatial elements e.g. maintaining the urban edge and following the defined settlement hierarchy.

⁴ refer to *Figure 24. Consolidated Concept* on page 59 of the document

- In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include, informal settlement upgrading; residential densification and infill development; mixed land use and improved economic opportunity; improved access and mobility; improved access to community facilities; and improved landscaping and public amenities.
- The spatial policies are spatially targeted in priority development areas, and include Baden Powell-Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts. Clarify and respect the different roles and functions of existing settlements
 - The spatial policies that relate to this principle, focuses on protective actions around specific spatial elements e.g. maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected, whilst ensuring that the capacity of existing infrastructure can accommodate change and growth.
 - The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements, focusses new growth and development primarily in larger settlements (as referenced in principle 3 above), in order to:
 - Minimise associated impacts on the environment, agricultural land, and natural resources.
 - Maximise the livelihood opportunity (also referred to as quality of life) through building on the availability of existing public facilities, and commercial opportunity.
 - Maximise the sustainability of new facilities and commercial opportunity.
 - Enable the provision of infrastructure in the most efficient and cost effective way.
 - Minimize the need for inter-settlement movement.
 - Maximise opportunity for and use of non-motorised and public transport.
 - Minimize growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
 - Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.
- Clarify and respect the roles and functions of different elements of movement structure
 - The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensures a balanced approach to transport in the municipality, that appropriately serving regional mobility needs and local level accessibility improvements.
 - The spatial policies actively promote compact, dense, mixed use development, which reduces and promotes non-motorised and public transport.
- Ensure balanced, sustainable communities

- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge), work towards and maintains -for each settlement – a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- Adopting a conservative view towards the extension of existing urban edges over the mSDF period.
- Actively support infill development and adaptive re-use of existing structures.
- Support increased densities in new, infill, and redevelopment projects.
- Rationalise space standards – especially of social facilities – and release surplus land for other uses, specifically housing.
- Support the general upgrading and transformation of existing informal settlements.
- Expand housing opportunity for a broader range of groups – including lower income groups and students – particularly in settlement forming part of the Baden Powell-Adam Tas-R304 corridor.
- Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- Ensure work and commercial opportunity are accessible through public transport and NMT to all communities and providing opportunities to emerging and small entrepreneurs.
- Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, walkability, and so on.
- Focus collective energy on a few catalytic areas that offer extensive opportunity and address present risk
 - The spatial policies focussed on major development effort with regards to new mixed use, industrial, residential and significant change in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klapmuts.

Figure 2-3: Spatial Development Framework Conceptual Framework

Source: mSDF 2019

2.3 CEF Spatial Structuring Elements

According to the CEF Guidelines, two main spatial structuring elements should be defined in order to interpret the mSDF. These include:

- Functional Areas; and -
- Priority Development Areas.

2.3.1 Functional Areas

A functional area (FA) is a region with similar characteristics from a developmental and service demand perspective. A typical example is to demarcate all areas with rural traits because it has more or less similar challenges (low density, lack of high order services, etc.). It also requires a specific development strategy that is unique to the area's development challenges.

The ability to sustain any function or service is based on a demand threshold. The threshold population, for example, to support a small café, is entirely different from the threshold population to sustain a hospital. Matters such as the threshold population's income, mobility, and many other factors complicate matters. Nevertheless, the crucial issue is that functional boundaries vary and do not coincide with municipal boundaries. Municipal boundaries describe administrative jurisdiction, but municipal councils cannot plan for areas outside their jurisdiction for apparent reasons. In the same way that development efforts are focused on selected nodal areas, the demand for services and

uses are determined and generated by the broader functional area that a node serves rather than the extent of development within the node only. To accommodate this dynamic, it was necessary to distinguish between different functional areas in the municipality.

a. Stellenbosch Local Municipality Functional Areas

During the previous Stellenbosch CEF completion, the functional areas were still in development as part of the Stellenbosch Local Municipal Spatial Development Framework (2019). Therefore, the preceding CEF relied on many existing area demarcations from older mSDFs and analysis to define the functional areas. With a completed mSDF and designated functional areas, the current iteration of the CEF will conform to these demarcations.

These functional areas are categorised into urban and rural nodes. The Functional Areas are narrowly demarcated and differs from the current development footprint. Figure 2-4 illustrates the functional areas and their typologies. The functional areas classified as A, B and C are urban functional areas, while those with a numerical value are rural functional areas. Any land outside these areas (also referred to as nodes) are indicated as farming and natural areas.

Figure 2-4: Stellenbosch Local Municipality Functional Areas

To better understand the functional areas, a summarised profile of each of the functional areas are provided⁵. The profiles include aspects related to:

- Population;
- Households;
- Daily movement of people;
- Housing typologies;
- Land cover, and;
- Social Facilities.

b. Population profile

The summarised population profile of the functional areas shows how the number of people and population density has changed over time. It includes the population figures for the three census periods of 1996, 2001, and 2011. A figure was also derived from the 2017 GTI advanced population data. Table 2-2 below presents the population profile for each of the functional areas.

Table 2-2: Functional Areas - Summarised population profile

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|--------------------|-------------|-------------|---------------------|---------|
| Area (ha) | 3 971 | 1 145 | 80 243 | 85 359 |
| Population 1996 | 61 909 | 5 564 | 36 846 | 104 319 |
| Population 2001 | 69 004 | 7 728 | 42 267 | 118 999 |
| Population 2011 | 101 234 | 13 517 | 40 908 | 155 659 |
| Population 2017 | 142 563 | 12 735 | 60 810 | 216 108 |
| Population/ha 1996 | 15,59 | 4,86 | 0,46 | 1.22 |
| Population/ha 2001 | 17,38 | 6,75 | 0,53 | 1.39 |
| Population/ha 2011 | 25,49 | 11,81 | 0,51 | 1.82 |
| Population/ha 2017 | 35,90 | 11,12 | 0,76 | 2.53 |

The numbers visualised in Figure 2-5, and Figure 2-6 show a substantial increase in the number of people, specifically in urban nodes. This increase is also the reason for the sharp rise in densities. The Farming and Natural functional areas also increased, albeit by a small amount. Interestingly, the rural nodes show a slight decrease in people between 2011 and 2017.

Figure 2-7 shows the population's spatial distribution in 2017 in terms of the functional areas. Here one can see the population concentration in the urban functional areas such as Stellenbosch and Franschoek. Many rural nodes show a tiny population at a low density. Comparing the spatial distribution of the population from 1996 to 2017, one can see an increase in the number of people outside the Stellenbosch urban node. This increase accounts for the growth in the number of people in the farming and natural functional area.

⁵ More detail regarding the functional areas and the detailed social profiles are contained in the next section.

Figure 2-5: Population per functional area

Figure 2-6: Population density per functional Area

Figure 2-7: Population distribution 2017

c. Households profile

The number of households follows a similar trend to the previous section's population figures. Households in the urban, farming and natural functional areas have increased, while rural areas have shown a slight decrease. Interestingly, there has been a reduction in the urban functional areas' household size. The reason for this is not immediately apparent. However, the pattern presented here could be because of a few reasons including but not limited to:

- An improvement in living standards;
- People migrate to urban functional areas for economic reasons;
- A growth in student numbers can also contribute, and;
- Housing subsidy system that encourages households' proliferation in targeting single-family residential housing.

From Table 2-4, it is clear that household sizes in rural and farming areas have remained relatively the same.

Table 2-3: Functional Areas - Summarised household profile

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|----------------------|-------------|-------------|---------------------|--------|
| Area (ha) | 3 971 | 1 145 | 80 243 | 85 359 |
| Households 1996 | 16 013 | 1 149 | 8 985 | 26 147 |
| Households 2001 | 17 548 | 1 619 | 9 960 | 29 127 |
| Households 2011 | 30 562 | 3 143 | 9 617 | 43 322 |
| Households 2017 | 47 914 | 2 572 | 14 608 | 65 094 |
| Households /ha 1996 | 4,03 | 1,00 | 0,11 | 0.31 |
| Households /ha 2001 | 4,42 | 1,41 | 0,12 | 0.34 |
| Households /ha 2011 | 7,70 | 2,74 | 0,12 | 0.51 |
| Households /ha 2017 | 12,07 | 2,25 | 0,18 | 0.76 |
| Households size 1996 | 3,87 | 4,84 | 4,10 | 3.99 |
| Households size 2001 | 3,93 | 4,77 | 4,24 | 4.09 |
| Households size 2011 | 3,31 | 4,30 | 4,25 | 3.59 |
| Household size 2017 | 2.98 | 4.95 | 4.16 | 3.32 |

Figure 2-8: Households per functional area

Figure 2-9: Household size per functional area

d. Daily movement of people profile

People's daily movements indicate that all functional areas, and the municipality as a whole, shed people. As can be expected, the urban nodes attract over 30 000 formal workers daily. This attraction of formal workers emphasises the strong economic cores of Stellenbosch and Franschhoek. The other urban functional area, Klapmuts, is one of the regions that shed the most people. Klapmuts only receives 828 formal workers daily, while over 10 000 people leave the area.

Table 2-4: Functional Areas - Summarised advanced population profile

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|------------------------------|-------------|-------------|---------------------|---------|
| Daily Migration Out: | 53 880 | 4 697 | 25 677 | 84 254 |
| Daily Migration In: | 35 729 | 1 455 | 23 690 | 60 874 |
| Day/Night Population Change: | -18 152 | -3 243 | -1 985 | -23,380 |
| Daytime formal workers | 30 439 | 1 165 | 21 125 | 52 729 |

Figure 2-10: Nett daily migration of people

e. Housing typologies profile

Table 2-5 shows the housing typology profile for each of the functional areas. In the urban (area / node?) and rural nodes, estates, smallholdings, and rural and farm housing typologies account for less than 10% of housing types. The urban nodes show many cluster housing typologies accounting for 37% of all housing types, while formal houses account for 32% and informal structures 26%.

The rural nodes have significantly less informal (17%) and cluster housing types (15%), with almost 60% of housing in the rural nodes classified as formal. The farming and natural functional areas indicate that 29% of the houses in these areas are informal, and 42% are rural and farm housing.

Table 2-5: Functional Areas - Summarised housing typologies

| Housing type | Urban areas | Rural nodes | Farms | Total 2020 |
|-------------------------------|---------------|--------------|--------------|---------------|
| Formal houses | 13 977 | 1 949 | 1 789 | 17 715 |
| Townhouses | 1 823 | 450 | 218 | 2 491 |
| Flats | 5 491 | 4 | 343 | 5 838 |
| Estates | 1 905 | 125 | 330 | 2 360 |
| Security villages | 285 | 7 | 94 | 386 |
| Sub-total | 23 481 | 2 535 | 2 774 | 28 790 |
| Student residencies / hostels | 8 233 | 0 | 85 | 8 318 |
| Institutional housing | 1 044 | 50 | 362 | 1 456 |
| Smallholdings | 22 | 57 | 102 | 181 |
| Sub-total | 9 299 | 107 | 549 | 9 955 |

| Housing type | Urban areas | Rural nodes | Farms | Total 2020 |
|--|-------------|-------------|--------|------------|
| Informal Structures | 8 188 | 70 | 2 504 | 10 762 |
| Backyard dwellings | 3 209 | 504 | 817 | 4 530 |
| Sub-total | 11 397 | 574 | 3 321 | 15 292 |
| Total | 44 177 | 3 216 | 6 644 | 54 037 |
| Farmstead housing units (excl labour houses) | 57 | 40 | 1 670 | 1 767 |
| Rural workers housing | 119 | 55 | 3 100 | 3 274 |
| Total | 44 353 | 3 311 | 11 414 | 59 078 |

Figure 2-11: Housing typology per functional area

f. Land cover profile

As expected, urban and rural nodes have little non-urban related land cover contained within their boundaries while the farming and natural areas consist of almost 30% cultivated land.

Table 2-6: Functional Areas - Summarised Land Cover 2014 non-urban (ha)

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|------------------------------|-------------|-------------|---------------------|--------|
| Area (ha) | 3 971 | 1 145 | 80 243 | 85 359 |
| Cultivated commercial fields | 176 | 32 | 3 784 | 3 993 |
| Cultivated commercial pivot | 0 | 0 | 84 | 84 |
| Cultivated orchard and vines | 356 | 133 | 18 947 | 19 435 |
| Sugarcane | 0 | 0 | 0 | 0 |
| Subsistence farming | 0 | 0 | 0 | 0 |
| Forests & Plantations | 45 | 15 | 2 950 | 3 010 |
| Mining | 0 | 17 | 45 | 62 |
| Total | 577 | 197 | 25 810 | 26 584 |

Residential land cover accounts for over 20% of land in urban nodes, while land related to sporting activities (7%) and commercial uses (8%) also features prominently. The largest category is land classified as townships (14%) in the rural nodes, with other types contributing little. Urban related land cover contributes little to farming and natural areas.

Table 2-7: Functional Areas - Summarised Land Cover 2014 urban (ha)

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|---------------------------|-------------|-------------|---------------------|--------|
| Area (ha) | 3 971 | 1 145 | 80 243 | 85 359 |
| Urban built-up | 20 | 0 | 14 | 34 |
| Urban commercial | 307 | 1 | 42 | 350 |
| Urban industrial | 146 | 27 | 259 | 432 |
| Urban residential | 868 | 33 | 54 | 955 |
| Urban townships | 218 | 161 | 102 | 481 |
| Urban informal | 48 | 0 | 4 | 52 |
| Rural villages | 0 | 0 | 0 | 0 |
| Urban sports and golf | 274 | 3 | 113 | 391 |
| School and sports grounds | 67 | 19 | 17 | 103 |

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|----------------|-------------|-------------|---------------------|-------|
| Small holdings | 69 | 13 | 339 | 421 |
| Total | 2 017 | 258 | 943 | 3 218 |

Figure 2-12: Landcover urban 2014

g. Social Facilities profile

There are a total of 49 schools in the municipal area. Interestingly, when assessing these facilities in terms of the number of people they serve, the rural nodes provide more access to the facilities. In the urban nodes, primary schools are provided at a ratio of one per 5 328 people, while primary schools in rural nodes provided one school per 1 931 people. Education facilities are concentrated mainly within the urban nodes.

Table 2-8: Functional Areas - Summarised Number of Education Facilities

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|---------------------|-------------|-------------|---------------------|-------|
| Primary school | 19 | 7 | 4 | 30 |
| Secondary school | 11 | 1 | 1 | 13 |
| Intermediate school | 0 | 0 | 1 | 1 |
| Combined schools | 1 | 0 | 4 | 5 |
| Total | 31 | 8 | 10 | 49 |

As with education facilities, health facilities are most common in the urban nodes.

Table 2-9: Functional Areas - Summarised Number of Other Community Facilities

| Type | Urban Nodes | Rural Nodes | Farming and Natural | Total |
|---------------------------|-------------|-------------|---------------------|-----------|
| Public health facilities | 12 | 2 | 0 | 14 |
| Private health facilities | 1 | 0 | 0 | 1 |
| SAPS stations | 4 | 1 | 0 | 5 |
| Lower courts | 1 | 0 | 1 | 2 |
| Total | 18 | 3 | 1 | 22 |

2.3.2 Priority Development Areas

According to the CEF Guidelines "Priority Development Areas" as the name suggests, are areas where the municipality intends to focus investment in order to achieve the goals of the mSDF and other strategic documents.

•

Spatial targeting are furthermore proposed depending on the settlement hierarchy and development potential derived from the mSDF. Based on the aforementioned the following primary settlements (i.e. PDAs, also referred to urban nodes in figure 2-4) have been prioritised over the short term, namely:

- Stellenbosch town (urban node A);
- Klipmuts (urban node B); and –
- Franschhoek (urban node C)

It should however be noted that even though Franschhoek has been identified as a primary settlement, the short term focus within this settlement should not be on urban growth, as the preconditions for the accommodation of such growth does not exist to the same extent as the other primary settlements. The emphasises in Franschhoek and the smaller settlements (as listed below), needs to be on improving conditions for existing residents and natural growth within the context of retaining the unique characteristic of the settlements.

The secondary settlements (i.e. PDAs, also referred to rural nodes numbered 1-10 as referenced in figure 2-4) to be considered over the longer term includes namely:

- La Motte;
- Wemmershoek;
- Groot Drakenstein;
- Dwars River Valley (Pniel, Johannesburg, Kylemore, Lanquedoc);
- Jonkershoek;
- Muldersvlei;
- Koelenhof;
- Vlottenburg;
- Lynedoch;
- Spier;
- Raithby;
- Muldersvlei; and

Vlottenburg.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg / Lynedoch along the Baden Powell–Adam Tas–R304 (also referred to as PDA corridor) could possibly accommodate more growth, and this is currently being investigated in the Adam Tas Corridor Local Spatial Development Framework (ATC: LmSDF) development.

Table 2-10: Priority Development Area - Nodes

| Priority Development Area Type | Spatial Development Framework Element |
|--------------------------------|--|
| Node | CBD, University, Commercial, Student Housing |
| Node | Commercial / Mixed-use Node |
| Node | Intensive Mixed-use Redevelopment (Adam Tas) |
| Node | Tourism, Commercial, Residential |
| Urban Node | Die Boord, Brandwacht, Paradyskloof |
| Urban Node | Droedyke |
| Urban Node | Franschhoek Estate |
| Urban Node | Ida's Valley |
| Urban Node | Jamestown |
| Urban Node | Klapmuts |
| Urban Node | Onder Papegaaiberg |
| Urban Node | Stellenbosch East |
| Urban Node | Stellenbosch North |
| Rural node | Groot Drakenstein |
| Rural node | Koelenhof |
| Rural node | La Motte |
| Rural node | Lanquedoc |
| Rural node | Lyndoch |
| Rural node | Muldersvlei |
| Rural node | Pniel |
| Rural node | Raithby |
| Rural node | Vlottenburg |
| Rural node | Wemmershoek |

a. Priority Development Areas - Corridors

| Priority Development Area Type | Spatial Development Framework Element |
|----------------------------------|---------------------------------------|
| Mobility route | Mobility route |
| Development corridor | Development corridor |
| Lower order development corridor | Lower order development corridor |

2.3.3 Priority Development Areas as spatial structuring elements

a. Adam Tas Corridor (Stellenbosch town PDA)

The most strategically located land in Stellenbosch town comprises large industrial spaces, including land previously occupied by Cape Sawmills and Distell facilities. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces – at scale – can contribute meaningfully to meeting existing challenges and mSDF objectives. In simple terms, the concept is to launch the restructuring of Stellenbosch town through redevelopment of the Adam Tas Corridor (ATC), the area stretching along the R310 and R44 along the foot of Papegaaiberg from the disused Cape Sawmills site in the west to Kayamandi and Cloetesville in the north.

It forms the western edge to the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier/ severance effect of the R44 and the railway line. Much of the area has a manufacturing use history. It includes the disused sawmill site, the government owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, Bergkelder complex, Van der Stel sports complex, the George Blake Road area, and

Fundamentally, the project will seek to enable development of the ATC as an integrated, inclusive environment for living, work, and enjoyment; a place which embodies our best knowledge in what constitutes good, equitable, and efficient settlement, and supports national, provincial, and municipal policy, such as:

- Expanded opportunity: The project must enable expanded opportunity for all partners and stakeholders over and above what exists today. This applies to all dimensions of “value add”, including returns on investment, community access to opportunity, facilities, and so on.
- Spatial principles: The project must specifically support the following spatial principles:
 - Spatial restructuring and justice: The project must challenge past spatial and other development
 - imbalances through improved access to and use of land and the inclusion of persons and areas that were previously excluded.
 - Resource efficiency: Land development must optimise the use of land, existing structures, and;
 - infrastructure, and actively seek alternative, environmentally responsible servicing solutions, including non-motorised transport.
- Contextual aptness: The project must recognise the special structure and form of Stellenbosch town, current access limitations, and the need to protect environmental resources, historic elements and precincts of value while accommodating further growth and expanded opportunity.
- Flexibility and responsiveness: Land development processes must ensure both certainty of rights and development of the land together, in a manner which best serves the public interest.
- Addressing urgent needs and opportunities
- The project must contribute to address urgent local needs and opportunities in Stellenbosch, as outlined in numerous municipal working documents, policy, and plans. These include:
 - Exploring ways in which the project can counteract the divided urbanism that characterises the town and directly benefit the poor.
 - Using underutilised and vacant urban land within the urban edge for settlement, thereby growing
 - Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl, creates conditions for efficient, creative living and working, and enables sustainable public and non-motorised transport.
 - Rethinking and reconstructing infrastructure, and particularly the movement system, including solutions to east-west and north-south movement systems, in a manner which integrates the east and west of town and releasing land for development.
 - Integrating Kayamandi and Stellenbosch town seamlessly to enable movement and interaction.
 - Shifting new development focus to the west of town, with the Braak and Rynse complex forming the centre and seam between the new west and east of Stellenbosch town.

- Accommodating higher density housing and university expansion, also assisting in establishing a compact, less sprawling town, public transport, pedestrianism, and reduced need for workers and students to commute to Stellenbosch on a daily basis.
- Enabling job creation, entrepreneurship, and livelihoods for many thousands of citizens.
- Expanding Stellenbosch's stock of publicly accessible historic precincts and places, supporting national heritage and a critical tourism industry.
- Increasing land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.
- Urban qualities: Urban qualities sought through the development include:
 - Compact development, mixed use, pedestrianism, and non-motorised transport.
 - Accommodation of large and small actions/ activities.
 - Maximum re-use of existing structures and exposing of history and familiarity.
 - Mindful resource use and environmental restoration.
 - Spaces enabling innovative, creative, and entrepreneurial use.
 - Adaptiveness and incremental development (across scales).
- Working Together: Following tradition and the norm, it is possible for individual land owners in the area to "go it alone", to alienate land no longer needed for their purposes, or attempt profitable development for alternative uses. However, it is believed that much is to be gained if the different land owners, large institutions, government, and communities in Stellenbosch explore, plan, and execute development of the land together, in a manner which best serves the public interest. Only in this way is a scale of development achievable which will ensure affordability of required infrastructure to unlock the area to its full potential, and to achieve a full range of activities and benefits, including the highly profitable, ones requiring subsidisation, the large and the small. Thus, the project should:
 - Respect the different resources and assets which individual interests bring to the project.
 - Seek the broad sweeping in of information across sectors, and its consideration in an inter-sectoral and inter-disciplinary manner.
 - Recognise the inherent creativity and community of common interest that exists in people to solve urban problems. It implies that people working together with a collective self-interest can come up with solutions that individuals or governments working alone might never consider.
 - Seek to enable change processes that build coalitions for change, create shared purpose and make systems work better for everyone, converting potentially controversial policy problems into projects of collaborative innovation.
 - Specifically support parallel work undertaken by work groups at STIAS to explore options for the project.

- **Beneficiation framework:** The allocation of development rights will be subject to landowner/ developer obligations. The project recognises – and will actively support – parallel work undertaken at STIAS to prepare a “beneficiation framework”, aimed at preparing the private sector for acting appropriately (i.e. beyond purely private interest) in response to the rights allocated to them and the “themes” of beneficiation that they may want to support specifically (e.g. education and sport).
- **Financial value and funding:** The project needs to create value for landowners and shareholders in a manner which can also assist in the funding of public services and facilities requiring a level of cross subsidization. The project should seek ways to fund the development “internally”, meaning that the cost of infrastructure and some community services could be funded by the development opportunity.
- **Challenge and innovation:** Work must challenge the status quo and come up with new ideas, tools and tactics that will realise progressive and practical change. This means:
 - Posing alternatives, considering stumbling blocks or barriers to change, and seeing how these can be overcome.
 - Thinking and acting differently and enabling locally developed innovation and technology.
- **Start by starting and learn by doing:** The project should commit to thinking big but taking “baby” steps, including enabling lead projects that improve current conditions and provide the opportunity for learning through constant experimenting. Only in this way is a scale of development achievable which will ensure affordability of required infrastructure to unlock the area to its full potential, and to achieve a full range of activities and benefits, including the highly profitable, ones requiring subsidisation, the large and the small. The project should support adaptiveness, and incremental development (across scales).
- **Land use management:** The project should commit to develop a regulatory environment which meets core criteria of responsibility, inclusive management, and consideration of all relevant factors, while serving fast, efficient delivery. Specifically, the land use management system should provide for both upfront certainty on the extent of development opportunity available and progressive discussion and approval of detailed implementation parameters.
- **Roles and responsibilities:** While various partners contribute to ATC work, the project will respect the statutory roles and responsibilities – and associated institutional arrangements and processes – of partners in relation to the project.
- **Public participation:** While recognising the provisions for public participation contained in spatial planning and built environment statute and regulations, the project should seek to enable active participation by the public, those interested and affected, and landowners, on an ongoing basis. With the above in mind, the project will contribute to build an accessible common information-sharing platform across the full spectrum of urban scales and with all actors in the system.
- **Environment and resource use:** The project commits to:
 - Protect environmental resources, promote the linkage of environmental assets, and the restoration of degraded environmental assets.
 - Explore “low” infrastructure options (as opposed to infrastructure “rich” options).
 - Enable maximum re-use of existing structures.

- Conservation, heritage, and culture: The project commits to retain elements of the area which contributes to history and place character and enable the establishment of new places and processes which contributes to cultural development.

b. Klapmuts

Located as it is on the N1 transport corridor – which carries 93% of metropolitan bound freight traffic – Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM (as identified in the GCM RSIF). To date, the settlement is characterized by residential use and limited commercial and work-related activity. Public sector resource constraints have prevented the infrastructure investment required to enable and unlock the full potential of the area for private sector economic development as envisaged in the GCM RSIF. The decision by Distell to relocate to and consolidate many of its operations in Klapmuts is critical to commence more balanced development of the settlement. Distell proposes to develop a beverage production, bottling, warehousing and distribution facility on Paarl Farm 736/RE, located north of the N1, consolidating certain existing cellars, processing plants, and distribution centres in the Greater Cape Town area. The farm measures some 200 ha in extent. The beverage production, bottling, warehousing and distribution facility will take up approximately 53 ha. The project proposal includes commercial and

mixed-use development on the remainder of the site which is not environmentally sensitive to provide opportunities both for Distell's suppliers to co-locate, and for other business development in the Klapmuts North area. The site does not have municipal services, and the proposed development will therefore require the installation of bulk service infrastructure, including water, wastewater treatment, stormwater, electricity, and internal roads.

Significant progress has been made in planning for a "Innovation Precinct" or "Smart City" district west of but contiguous to Klapmuts south. This include a land agreement with the University of Stellenbosch

to possibly establish university related activities in this area. The urban edge has been adjusted in recognition of the opportunity associated with this initiative.

A number of issues require specific care in managing the development of Klapmuts over the short to medium term. The first is speculative applications for land use change on the back of the proposed Distell development. Already, a draft local plan prepared by DM has indicated very extensive development east of Farm 736/RE. Distell will not fund the extensive infrastructure required to unlock development here, and arguably, land use change to the east of Farm 736/RE could detract from the opportunity inherent in Farm 736/RE. The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road and a possible NMT crossing over the N1 linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunity enabled north of the N1. The third is speculative higher income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher income development is not a problem in and of itself, but ideally it should not be in the form of low density gated communities.

Most importantly, the N1 corridor – including adjacent land also serviced by the old Main Road and railway – stretching from the CCT through Klapmuts towards Paarl, requires urgent joint planning. Much potential to generate economic opportunity exists here, but careful planning and decisions are required in relation to where to start, what areas to prioritise for development, and what to protect as nature and agriculture.

A critical non-spatial issue related to Klapmuts is its split administration between DM and SM. Consideration should be given to approach the Demarcation Board to adjust municipal boundaries in

a manner where Klapmuts North and South falls within one municipal administration. In this regard, Klapmuts appears functionally more related to SM than DM. SM has also, for many years, invested in services for the Klapmuts community.

Figure 2-14: Klapmuts framework

Figure 2-15 below shows the priority development areas (PDAs), derived from the mSDF and spatialises the focus of the municipality in terms of development priorities within the two structuring elements, namely:

- Priority Development Areas Nodes
- Priority Development Areas Corridors

Spatial targeting are furthermore proposed depending on the settlement hierarchy and development potential derived from the mSDF. Based on the aforementioned the following primary settlements (i.e. PDAs, also referred to urban nodes in figure 2-4) have been prioritised over the short term, namely:

- Stellenbosch town (urban node A);
- Klapmuts (urban node B); and –
- Franschhoek (urban node C)

It should however be noted that even though Franschhoek has been identified as a primary settlement, the short term focus within this settlement should not be on urban growth, as the preconditions for the accommodation of such growth does not exist to the same extent as the other primary settlements. The emphasises in Franschhoek and the smaller settlements (as listed below),

needs to be on improving conditions for existing residents and natural growth within the context of retaining the unique characteristic of the settlements.

The secondary settlements (i.e. PDAs, also referred to rural nodes numbered 1-10 as referenced in figure 2-4) to be considered over the longer term includes namely:

- La Motte;
- Wemmershoek;
- Groot Drakenstein;
- Dwars River Valley (Pniel, Johannesburg, Kylemore, Lanquedoc);
- Jonkershoek;
- Muldersvlei;
- Koelenhof;
- Vlottenburg;
- Lynedoch;
- Spier;
- Raithby;
- Muldersvlei; and
Vlottenburg.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg / Lynedoch along the Baden Powell–Adam Tas–R304 (also referred to as PDA corridor) could possibly accommodate more growth, and this is currently being investigated in the Adam Tas Corridor Local Spatial Development Framework (ATC: LmSDF) development.

Table 2-10: Priority Development Area - Nodes

| Priority Development Area Type | Spatial Development Framework Element |
|--------------------------------|--|
| Node | CBD, University, Commercial, Student Housing |
| Node | Commercial / Mixed-use Node |
| Node | Intensive Mixed-use Redevelopment (Adam Tas) |
| Node | Tourism, Commercial, Residential |
| Urban Node | Die Boord, Brandwacht, Paradyskloof |
| Urban Node | Droedyke |
| Urban Node | Franschhoek Estate |
| Urban Node | Ida's Valley |
| Urban Node | Jamestown |
| Urban Node | Klapmuts |
| Urban Node | Onder Papegaaiberg |
| Urban Node | Stellenbosch East |
| Urban Node | Stellenbosch North |
| Rural node | Groot Drakenstein |
| Rural node | Koelenhof |
| Rural node | La Motte |
| Rural node | Lanquedoc |
| Rural node | Lynedoch |
| Rural node | Muldersvlei |
| Rural node | Pniel |
| Rural node | Raithby |
| Rural node | Vlottenburg |
| Rural node | Wemmershoek |

c. Priority Development Areas - Corridors

| Priority Development Area Type | Spatial Development Framework Element |
|----------------------------------|---------------------------------------|
| Mobility route | Mobility route |
| Development corridor | Development corridor |
| Lower order development corridor | Lower order development corridor |

2.3.4 Priority Development Areas as spatial structuring elements

a. Adam Tas Corridor (Stellenbosch town PDA)

The most strategically located land in Stellenbosch town comprises large industrial spaces, including land previously occupied by Cape Sawmills and Distell facilities. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces – at scale – can contribute meaningfully to meeting existing challenges and mSDF objectives. In simple terms, the concept is to launch the restructuring of Stellenbosch town through redevelopment of the Adam Tas Corridor (ATC), the area stretching along the R310 and R44 along the foot of Papegaaiberg from the disused Cape Sawmills site in the west to Kayamandi and Cloeteville in the north.

It forms the western edge to the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier/ severance effect of the R44 and the railway line. Much of the area has a manufacturing use history. It includes the disused sawmill site, the government owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, Bergkelder complex, Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloeteville. Underutilised and disused land in the area measures more than 150ha.

Redevelopment in terms of the concept offers the opportunity to:

- Grow Stellenbosch town – and accommodate existing demand – in a manner which prevents sprawl, and create conditions for efficient, creative living and working.
- Stimulate and act as a catalyst for the development of improved public transport and NMT.
- Rethink and reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east- west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development.
- Integrate Kayamandi and Stellenbosch town seamlessly.
- Shift new development focus to the west of town, with Die Braak and Rhenish complex forming the center and seam between the new west and east of Stellenbosch town.
- Accommodate the parking of vehicles on the edge of town whilst the corridor provides for and promotes a greater focus on pedestrianism and cycling into the core town.
- Accommodate uses which meet urgent needs, specifically higher density housing and university expansion, also assisting in establishing a compact, less sprawling town, public transport, and pedestrianism; and
- Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Figure 2-13: Stellenbosch Town Framework

Source: mSDF 2019

Fundamentally, the project will seek to enable development of the ATC as an integrated, inclusive environment for living, work, and enjoyment; a place which embodies our best knowledge in what constitutes good, equitable, and efficient settlement, and supports national, provincial, and municipal policy, such as:

- Expanded opportunity: The project must enable expanded opportunity for all partners and stakeholders over and above what exists today. This applies to all dimensions of “value add”, including returns on investment, community access to opportunity, facilities, and so on.
- Spatial principles: The project must specifically support the following spatial principles:
 - Spatial restructuring and justice: The project must challenge past spatial and other development
 - imbalances through improved access to and use of land and the inclusion of persons and areas that were previously excluded.
 - Resource efficiency: Land development must optimise the use of land, existing structures, and;
 - infrastructure, and actively seek alternative, environmentally responsible servicing solutions, including non-motorised transport.
- Contextual aptness: The project must recognise the special structure and form of Stellenbosch town, current access limitations, and the need to protect environmental resources, historic elements and precincts of value while accommodating further growth and expanded opportunity.

- Flexibility and responsiveness: Land development processes must ensure both certainty of rights and development of the land together, in a manner which best serves the public interest.
- Addressing urgent needs and opportunities
- The project must contribute to address urgent local needs and opportunities in Stellenbosch, as outlined in numerous municipal working documents, policy, and plans. These include:
 - Exploring ways in which the project can counteract the divided urbanism that characterises the town and directly benefit the poor.
 - Using underutilised and vacant urban land within the urban edge for settlement, thereby growing
 - Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl, creates conditions for efficient, creative living and working, and enables sustainable public and non-motorised transport.
 - Rethinking and reconstructing infrastructure, and particularly the movement system, including solutions to east-west and north-south movement systems, in a manner which integrates the east and west of town and releasing land for development.
 - Integrating Kayamandi and Stellenbosch town seamlessly to enable movement and interaction.
 - Shifting new development focus to the west of town, with the Braak and Rynse complex forming the centre and seam between the new west and east of Stellenbosch town.
 - Accommodating higher density housing and university expansion, also assisting in establishing a compact, less sprawling town, public transport, pedestrianism, and reduced need for workers and students to commute to Stellenbosch on a daily basis.
 - Enabling job creation, entrepreneurship, and livelihoods for many thousands of citizens.
 - Expanding Stellenbosch's stock of publicly accessible historic precincts and places, supporting national heritage and a critical tourism industry.
 - Increasing land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.
- Urban qualities: Urban qualities sought through the development include:
 - Compact development, mixed use, pedestrianism, and non-motorised transport.
 - Accommodation of large and small actions/ activities.
 - Maximum re-use of existing structures and exposing of history and familiarity.
 - Mindful resource use and environmental restoration.
 - Spaces enabling innovative, creative, and entrepreneurial use.
 - Adaptiveness and incremental development (across scales).

- Working Together: Following tradition and the norm, it is possible for individual land owners in the area to “go it alone”, to alienate land no longer needed for their purposes, or attempt profitable development for alternative uses. However, it is believed that much is to be gained if the different land owners, large institutions, government, and communities in Stellenbosch explore, plan, and execute development of the land together, in a manner which best serves the public interest. Only in this way is a scale of development achievable which will ensure affordability of required infrastructure to unlock the area to its full potential, and to achieve a full range of activities and benefits, including the highly profitable, ones requiring subsidisation, the large and the small. Thus, the project should:
 - Respect the different resources and assets which individual interests bring to the project.
 - Seek the broad sweeping in of information across sectors, and its consideration in an inter-sectoral and inter-disciplinary manner.
 - Recognise the inherent creativity and community of common interest that exists in people to solve urban problems. It implies that people working together with a collective self-interest can come up with solutions that individuals or governments working alone might never consider.
 - Seek to enable change processes that build coalitions for change, create shared purpose and make systems work better for everyone, converting potentially controversial policy problems into projects of collaborative innovation.
 - Specifically support parallel work undertaken by work groups at STIAS to explore options for the project.
- Beneficiation framework: The allocation of development rights will be subject to landowner/developer obligations. The project recognises – and will actively support – parallel work undertaken at STIAS to prepare a “beneficiation framework”, aimed at preparing the private sector for acting appropriately (i.e. beyond purely private interest) in response to the rights allocated to them and the “themes” of beneficiation that they may want to support specifically (e.g. education and sport).
- Financial value and funding: The project needs to create value for landowners and shareholders in a manner which can also assist in the funding of public services and facilities requiring a level of cross subsidization. The project should seek ways to fund the development “internally”, meaning that the cost of infrastructure and some community services could be funded by the development opportunity.
- Challenge and innovation: Work must challenge the status quo and come up with new ideas, tools and tactics that will realise progressive and practical change. This means:
 - Posing alternatives, considering stumbling blocks or barriers to change, and seeing how these can be overcome.
 - Thinking and acting differently and enabling locally developed innovation and technology.
- Start by starting and learn by doing: The project should commit to thinking big but taking “baby” steps, including enabling lead projects that improve current conditions and provide the opportunity for learning through constant experimenting. Only in this way is a scale of

development achievable which will ensure affordability of required infrastructure to unlock the area to its full potential, and to achieve a full range of activities and benefits, including the highly profitable, ones requiring subsidisation, the large and the small. The project should support adaptiveness, and incremental development (across scales).

- Land use management: The project should commit to develop a regulatory environment which meets core criteria of responsibility, inclusive management, and consideration of all relevant factors, while serving fast, efficient delivery. Specifically, the land use management system should provide for both upfront certainty on the extent of development opportunity available and progressive discussion and approval of detailed implementation parameters.
- Roles and responsibilities: While various partners contribute to ATC work, the project will respect the statutory roles and responsibilities – and associated institutional arrangements and processes – of partners in relation to the project.
- Public participation: While recognising the provisions for public participation contained in spatial planning and built environment statute and regulations, the project should seek to enable active participation by the public, those interested and affected, and landowners, on an ongoing basis. With the above in mind, the project will contribute to build an accessible common information-sharing platform across the full spectrum of urban scales and with all actors in the system.
- Environment and resource use: The project commits to:
 - Protect environmental resources, promote the linkage of environmental assets, and the restoration of degraded environmental assets.
 - Explore “low” infrastructure options (as opposed to infrastructure “rich” options).
 - Enable maximum re-use of existing structures.
- Conservation, heritage, and culture: The project commits to retain elements of the area which contributes to history and place character and enable the establishment of new places and processes which contributes to cultural development.

b. Klapmuts

Located as it is on the N1 transport corridor – which carries 93% of metropolitan bound freight traffic – Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM (as identified in the GCM RSIF). To date, the settlement is characterized by residential use and limited commercial and work-related activity. Public sector resource constraints have prevented the infrastructure investment required to enable and unlock the full potential of the area for private sector economic development as envisaged in the GCM RSIF. The decision by Distell to relocate to and consolidate many of its operations in Klapmuts is critical to commence more balanced development of the settlement. Distell proposes to develop a beverage production, bottling, warehousing and distribution facility on Paarl Farm 736/RE, located north of the N1, consolidating certain existing cellars, processing plants, and distribution centres in the Greater Cape Town area. The farm measures some 200 ha in extent. The beverage production, bottling, warehousing and distribution facility will take up approximately 53 ha. The project proposal includes commercial and

mixed-use development on the remainder of the site which is not environmentally sensitive to provide opportunities both for Distell’s suppliers to co-locate, and for other business development in the Klapmuts North area. The site does not have municipal services, and the proposed development will

therefore require the installation of bulk service infrastructure, including water, wastewater treatment, stormwater, electricity, and internal roads.

Significant progress has been made in planning for a “Innovation Precinct” or “Smart City” district west of but contiguous to Klapmuts south. This includes a land agreement with the University of Stellenbosch

to possibly establish university related activities in this area. The urban edge has been adjusted in recognition of the opportunity associated with this initiative.

A number of issues require specific care in managing the development of Klapmuts over the short to medium term. The first is speculative applications for land use change on the back of the proposed Distell development. Already, a draft local plan prepared by DM has indicated very extensive development east of Farm 736/RE. Distell will not fund the extensive infrastructure required to unlock development here, and arguably, land use change to the east of Farm 736/RE could detract from the opportunity inherent in Farm 736/RE. The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road and a possible NMT crossing over the N1 linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunity enabled north of the N1. The third is speculative higher income residential development in the Klapmuts area, based on the area’s regional vehicular accessibility. Higher income development is not a problem in and of itself, but ideally it should not be in the form of low density gated communities.

Most importantly, the N1 corridor – including adjacent land also serviced by the old Main Road and railway – stretching from the CCT through Klapmuts towards Paarl, requires urgent joint planning. Much potential to generate economic opportunity exists here, but careful planning and decisions are required in relation to where to start, what areas to prioritise for development, and what to protect as nature and agriculture.

A critical non-spatial issue related to Klapmuts is its split administration between DM and SM. Consideration should be given to approach the Demarcation Board to adjust municipal boundaries in a manner where Klapmuts North and South falls within one municipal administration. In this regard, Klapmuts appears functionally more related to SM than DM. SM has also, for many years, invested in services for the Klapmuts community.

Figure 30. Klapmuts Plan

Figure 2-15: Priority Development Areas

3 Socio-Economic and Spatial Profiling

The objectives of this section is to:

- Developmental profile for the municipality as a whole & each functional areas as identified
- Socio-economic profile for the municipality as a whole & each functional areas as identified

This section shows the demographic, socio-economic and spatial characteristics for the municipal area, and in each of the identified functional areas (FAs) of the municipality. The spatial and socio-economic profile of the municipality drives future demand and hence capital and operating investment and expenditure.

The aim of this analysis is to obtain an in-depth understanding of the demographic and socio-economic characteristics of the population that are being served in each FA of the municipality. This assessment typically includes access to infrastructure and social services and amenities, as well as the level of service of these services and amenities. The purpose of the municipal and FA profiling is, therefore, twofold:

- Firstly, to identify the population within the municipality and FAs in order to determine the base unit of needs estimation as input to the infrastructure modelling and financial modelling, and;
- Secondly, to understand the status quo of services within the municipality.

These two basic elements can be used to quantify and project growth, which in turn will unlock the ability to project infrastructure provision demand over the planning horizon of 10 years. Understanding the socio-economic and spatial profile of the municipality enables the municipality to make more accurate and informed decisions regarding capital investment going forward.

Social profiling is usually presented in the mSDF, however, given the lack of quantification in the existing mSDFs across local governments nation-wide, municipal and FA profiling is deemed as a necessary step by the CEF guidelines as a prerequisite to evidence-based planning.

It is vital to consider as many as possible data sources in determining future population and household numbers. The following data and datasets informed the estimates of future population and household levels.

- Official data sources:
 - Census data from StatsSA. This data covers 1996, 2001 and 2011
 - Community Surveys from StatsSA for 2007 and 2016
 - Mid-year population estimates from StatsSA
 - Local housing data from the municipality
- Commercial data sources:
 - Quantec that provides times series data per annum since 1993. This data is only available at the municipal level
 - Spatial Data Services Africa (SDSA) providing a range from spatial data from its own database

3.1 Social Profiling: Population characteristics

A range of factors impacts the demographic profile of the municipality. These factors interact horizontally and, importantly, have a hierarchical relationship with national, provincial and regional demographics. The analysis of variables is therefore done on a comparative basis and by also exploring relationships between demographic variables as well as the relationship that the demographics have with economic development. The factors considered are:

- Population size, household numbers and size and the expected change in these numbers;
- Age, language, and education;
- The impact of HIV and AIDS on population growth expectations, and -
- Migration.

3.1.1 Population structure, age, and gender

The total population is the starting point. For any planning assessment, the total population is fundamental to the current and long-term demand for services and facilities. Table 3-1 shows the population, with a gender split, for the three census periods and Community Survey 2016. From the time-related figures, inferences can be drawn about population growth or decline. Gender splits, if appropriate under local conditions, also serves as a proxy for migrant labour. Generally speaking, male absenteeism indicates that an area is shedding workers while surplus males show the area is attracting migrant labour based on expectations of economic growth and job creation.

Table 3-1 below shows that the region has always had a nearly equal split of gender in the population. As explained above, indications are that migrant labour is not a factor to consider.

Table 3-1: Population and gender

| | 1996 | 2001 | 2011 | 2016 | 2019 |
|---------------------------------|----------------|----------------|----------------|----------------|----------------|
| Males | 51,224 | 57,850 | 76,158 | 85,161 | 91,836 |
| Females | 53,411 | 61,129 | 79,536 | 88,035 | 95,962 |
| Population density (persons/ha) | 1.15 | 1.40 | 1.83 | 2.04 | 2.20 |
| Total Population | 104,635 | 118,979 | 155,694 | 173,196 | 187,797 |

Source: Statistics South Africa/SDSA

Age groups are significant in any demographic assessment. The population's age structure provides a clear indication of the expected long-term demand for community and social services, housing, and infrastructure services. The table below only reflects on four age categories. The first category is the preschool population; the second category is the extent of the school population, the third category is predominantly the economically active population, and the last group is the elderly population.

The age structure (refer to Table 3-2 below) of the study area has remained relatively unchanged over the time period for all the age groups. Interestingly, over 63% of the population falls within the economically active group of 20 to 65 years of age, as reported in the 2016 Community Survey figures. This percentage has also increased from just over 50% in 1996.

Table 3-2: Age groups

| | 1996 | | 2001 | | 2011 | | 2016 | |
|----------|--------|--------|--------|--------|--------|--------|--------|--------|
| | Male | Female | Male | Female | Male | Female | Male | Female |
| <5 | 5,680 | 5,527 | 5,734 | 5,811 | 8,010 | 7,861 | 6,861 | 7,317 |
| 5 to 19 | 15,407 | 16,111 | 17,524 | 18,210 | 19,811 | 20,740 | 21,997 | 21,057 |
| 20 to 65 | 27,786 | 28,719 | 32,516 | 34,298 | 45,428 | 46,891 | 53,192 | 55,632 |

| | 1996 | | 2001 | | 2011 | | 2016 | |
|-------------|---------|--------|---------|--------|---------|--------|---------|--------|
| | Male | Female | Male | Female | Male | Female | Male | Female |
| >65 | 1,637 | 2,412 | 2,077 | 2,810 | 2,909 | 4,045 | 3,111 | 4,029 |
| Unspecified | 715 | 642 | 0 | | 0 | | 0 | |
| Total | 51,224 | 53,411 | 57,850 | 61,129 | 76,158 | 79,536 | 85,161 | 88,035 |
| | 104,635 | | 118,979 | | 155,694 | | 173,196 | |

Source: Statistics South Africa/SDSA

The following two maps (Figure 3-1 and Figure 3-2:) show the percentage population below 20 years and the working-age group population. Figure 3-2: emphasises the high percentage of people within the working-age group in the municipality.

Figure 3-1: % of the Population: 20 years and younger 2011

Source: Statistics South Africa/SDSA

Figure 3-2: % of the Population: Working Age (20 to 64 years) 2011

Source: Census Statistics South Africa/SDSA

The figure below (Figure 3-3) shows the comparative population structures and how they've changed since 2005, between South Africa, the Western Cape and the Stellenbosch Municipality. Comparatively the overall structure between the national, provincial, and local municipality is vastly different. The national pyramids all show a large base in the younger age cohorts while this pattern is far less prominent in the provincial and local comparisons. The provincial and municipal pyramids also show the substantial economically active population described above. A unique characteristic of the Stellenbosch municipal population structure is the prominent number of people in the 20-24 age cohort. This pattern also doesn't change over time and reflects the large student population present within the municipality.

Figure 3-3: Comparative population structures

3.1.2 The differences in population groups

Population groups is normally not a consideration to determine spatial development needs. However, looking at the local population's racial composition might help explain current dynamics based on historical population settlement patterns.

Table 3-3 below shows the populations at various geographic levels in 2019. The population figures show structural differences in composition between the various scales and racial groups. The Coloured population is the dominant group in the municipality and accounts for more than half of the population. The second-largest group is the Black population group, followed by the White and Asian groups, which accounts for less than 15% of the population. This pattern is relatively similar in the district and the province. Compared to the national population structure, a clear difference is evident.

Table 3-3: Comparative population numbers by population group 2019

| 2019 | South Africa | | Western Cape | | Cape Winelands | | Stellenbosch | |
|-----------------------------|--------------|---------|--------------|---------|----------------|---------|--------------|---------|
| | Total | % | Total | % | Total | % | Total | % |
| Black African population | 47 443 259 | 80,72% | 2 548 966 | 37,24% | 248 364 | 26,94% | 56 350 | 31,49% |
| Coloured population | 5 176 750 | 8,81% | 3 295 979 | 48,16% | 575 031 | 62,37% | 96 398 | 53,88% |
| Indian and Asian population | 1 503 007 | 2,56% | 77 649 | 1,13% | 3 519 | 0,38% | 651 | 0,36% |
| White population | 4 652 006 | 7,91% | 921 678 | 13,47% | 94 995 | 10,30% | 25 528 | 14,27% |
| Population total | 58 775 022 | 100,00% | 6 844 272 | 100,00% | 921 911 | 100,00% | 178 927 | 100,00% |

Source: Quantec 2020

Table 3-4 below shows the population in the municipality as it has changed over the last 26 years. The figures indicate substantial growth in the Black and Coloured populations while the other population groups declined.

Table 3-4: Population groups

| | 1995 | 2000 | 2005 | 2010 | 2015 | 2019 |
|------------------|---------|---------|---------|---------|---------|---------|
| Black African | 19 348 | 26 339 | 33 448 | 42 384 | 49 989 | 56 350 |
| White | 62 621 | 67 866 | 72 989 | 81 398 | 89 562 | 96 398 |
| Coloured | 265 | 306 | 372 | 482 | 576 | 651 |
| Indian and Asian | 25 126 | 25 587 | 26 656 | 27 771 | 26 352 | 25 528 |
| Total | 107 359 | 120 098 | 133 465 | 152 036 | 166 479 | 178 927 |

Source: Quantec 2020

Figure 3-4 below illustrates these changes. The growth in the Black and Coloured population groups seems to be consistent over the assessed period. The White population group shows an increase in the population until 2010, where after there is a strong decline in numbers. The Asian population group has also increased, but from a small base.

Figure 3-4: Population growth 1993 to 2019

Source: Quantec 2020

Figure 3-5 below shows the rate of change of the population between different groups. All the population groups, except for whites, show a similar trend. The figures show a real decline in the number of whites since 2011.

Figure 3-5: Population growth rates by population group

Source: Quantec 2020

The spatial distribution of the dominant population group (the population majority in an area) in the municipality is shown in Figure 3-2: on the subsequent page.

Figure 3-6: Population majority 2011

3.1.3 Language groups

Language groups display clear spatial patterns in South Africa. However, its impact on the demand for some social facilities, such as schools, is not significant for the planner. Structurally the different language groups remained largely the same since 1996, except for the isiXhosa language group that has seen a steep rise. Afrikaans is the dominant language group (51%), followed by isiXhosa (39%). This is also reflected spatially reflected below.

Table 3-5: Language groups

| | 1996 | 2001 | 2011 | 2016 |
|-----------|-------|-------|-------|-------|
| Afrikaans | 80767 | 88185 | 99397 | 89033 |
| English | 7275 | 8329 | 10613 | 9194 |
| Ndebele | 445 | 36 | 225 | 223 |
| Sepedi | 10 | 78 | 143 | 0 |
| Sesotho | 514 | 1155 | 1783 | 1874 |
| Siswati | 7 | 30 | 48 | 0 |
| Tsonga | 8 | 54 | 103 | 0 |
| Tswana | 29 | 54 | 538 | 6 |
| Venda | 3 | 27 | 65 | 0 |

| | 1996 | 2001 | 2011 | 2016 |
|--------------|---------------|---------------|---------------|---------------|
| Xhosa | 13234 | 20189 | 30538 | 67635 |
| Zulu | 45 | 147 | 369 | 173 |
| Other | 2297 | 695 | 11873 | 5058 |
| Total | 104635 | 118979 | 155694 | 173196 |

3.1.4 Population, AIDS and crude death rate

HIV and AIDS's impact was very contentious until national policy changes regarding treatment. However, the effects of HIV and AIDS is an integral part of the South African demographic profile. HIV and AIDS's impact remains significant, albeit not on the forefront of national issues impacting development.

HIV and AIDS affected demographic change and is shown below. There are two stages in this process. The first shows declines in infection and death rates up to about 2003 after that it stabilises around 2% and 3,3%. Two factors need to be considered; the high rates resulted from growth from a relatively small base, a lack of education, and a lack of treatment for HIV and AIDS. After 2004 treatment improved and there has been a success with the understanding and general knowledge on HIV and AIDS.

Figure 3-9: Rate of changes in population growth, HIV infections and related deaths

Source: Quantec 2020

The infection and death rates show only one side of the picture. In real terms, the HIV positive component of the population continues to increase, as shown in Figure 3-10 below.

Figure 3-10: HIV positive persons in the population

Source: Quantec 2020

The increase in the number of people living with HIV and AIDS results from the success of treating it. This is reflected in the decrease in the number of AIDS deaths, as shown in Figure 3-11 below. The decrease in deaths directly impacts the population structure as assessed above and reflects the increase in the number of children below ten years old over the past decade.

Figure 3-11: HIV deaths and other deaths

Source: Quantec 2020

3.1.5 Migration

In a country where urbanisation plays a pivotal role in long-term development strategies and where the local economy is open, migration is an important factor. The table below shows the country of origin of residents. The most significant aspect is the extent to which people from inside South Africa migrated to the municipality. There is a total increase of 78% between 1996 and 2016, or 3.9% per annum. Migration from other areas are small but the number of people from other SADC countries are increasing.

Table 3-6: Migration - country of origin

| Migration | 1996 | 2001 | 2011 | 2016 |
|-------------------|----------------|----------------|----------------|----------------|
| RSA Origin | 95 112 | 117 811 | 139 577 | 170 150 |
| SADC | 794 | 379 | 1 851 | 2 286 |
| Rest of Africa | 49 | 61 | 373 | 24 |
| Europe | 876 | 568 | 482 | 576 |

Source: Statistics South Africa

Figure 3-12: Migration from outside South Africa

Source: Statistics South Africa

Also significant is the movement of people within South Africa to the area. Most residents originated in the Western Cape. The flow of people from other provinces is small, but there seems to be a significant decline in people from the Eastern Cape since 2011.

Table 3-7: Province of previous residence

| Migration | 1996 | 2001 | 2011 | 2016 |
|--------------|------|------|------|------|
| Eastern Cape | 4131 | 3928 | 4368 | 2321 |

3.1.6 Population change and growth

a. Population transition theory

According to the scholar Thomas Malthus, population growth is limited by available resources. But if that's so, why is the world's population growing so rapidly in regions with the fewest resources? In part, this can be explained by the demographic cycle. As the figure below shows, population changes move through five broad phases where the differential determines population numbers between birth and death rates. This model ignores the impact of migration, and many factors affect death and birth rates. Nevertheless, it helps in defining the broad, long-term expectations around population changes.

Figure 3-14: Population transition theory

The key factors that impacted birth rates are:

- Stage 1 and 2: Reflects mainly on an agrarian society where any children are needed for farming, although many die early. Religious and cultural factors play a role in high birth rates and where there is no family planning
- Stage 3: Improved medical care and diet still keep birth rates high, but children's need decreases.
- Stage 4 and 5: Improved socio-economic condition encourages family planning, health is good, and the status of women improves, and marriages take place at a later age. This leads to a drastic decrease in birth rates.

The factors that impact changes in the death rate are:

- Stage 1: Diseases are prevalent, and famine occurs regularly. This is aggravated by poor medical knowledge and many children die.
- Stages 2 and 3: Improvements in health services and access to medical care, improved water supply and sanitation decreases death rates drastically.
- Stages 4 and 5: Health care is good, and the food supply is reliable, which leads to further decreases in death rates.

In terms of this model, South Africa is approaching the latter phases of stage 4, although substantial differences occur at the regional level and also between urban and rural areas. This model has a value at the local level but should be used with circumspection. The element not addressed in this model is migration and particularly urbanisation.

Urbanisation generally occurs with modernisation and industrialisation and is often motivated by economic factors. These factors pull people to cities at the same time that they push people from rural homes. Urbanisation manifest as "rural flight". This flight often occurs in a region following the industrialisation of agriculture—when fewer people are needed to bring the same amount of agricultural output to market - and related agricultural services and industries are consolidated. These factors negatively affect the economy of small- and middle-sized farms and strongly reduce the rural

labour market size. Rural flight is exacerbated when the population decline leads to the loss of rural services (such as business enterprises and schools), leading to more significant population loss as people leave to seek those features. In South Africa, this occurred at low levels. Firstly, the commercial farming areas depopulate due to farming practices and hence a loss in jobs and businesses and social amenities. In tribal areas, the social grant system has replaced subsistence farming and made people less bound to the land, which encourages migration to cities and towns as perceived economic opportunity areas.

Urbanisation occurs naturally to reduce time and expense in commuting while improving jobs, education, housing, entertainment, and transportation opportunities. Living in cities permits individuals and families to take advantage of the opportunities of proximity, diversity, and marketplace competition. Due to their high populations, urban areas can also have more diverse social communities than rural areas, allowing others to find people like them

The historical perspective on population and household changes are essential. It is also the basis for determining future household and population levels. However, countless factors impact population and household growth. Long-term estimates and the scale of a municipality remains challenging due to the open nature of the development systems and the free movement of people and access to goods and services across municipal boundaries. Any long-term projection must only be regarded as indicative, and changes need to be monitored continuously. Population and household growth ultimately determine the services demand in the municipality.

b. Assessing population change

Assessing population change in a municipal area is challenging for several reasons:

- Municipalities function in an integrated environment where changes at a national, provincial, and neighbouring areas directly impact local growth.
- Data sources differ in terms of baseline data used and hence in outcomes which complicate comparative assessments.
- Municipal population figures are, with a few exceptions, a disaggregation of higher-order data. Between censuses, mid-year population estimates at the district level are the only available sources. Most data sets use StatsSA's mid-year population estimates as a benchmark.
- Long-term projections (ten years and longer) are subject to high uncertainty levels because many factors drive local development.
- Interventionistic policies from the government are often unpredictable and focus on deliberately change historical trends. This increases the level of uncertainty in outcomes.

Notwithstanding these challenges, it remains essential to project and estimate future population and household numbers. Population and household changes are the drivers of the long-term demand for land and services.

The historical perspective on population and household changes are essential. It is also the basis for determining future household and population levels. However, countless factors impact population and household growth. Long-term estimates and the scale of a municipality remains challenging due to the open nature of the development systems and the free movement of people and access to goods and services across municipal boundaries. Any long-term projection must only be regarded as indicative, and changes need to be monitored continuously. Population and household growth ultimately determine the services demand in the municipality.

The next series of graphs show how the different available data sets relate. The approach is to build from the known official data and then add the commercial datasets after using trend analysis to reach a workable scenario.

Figure 3-15, below starts by looking at the main StatsSA data sources. These include the census data for 1996, 2001, and 2011 as well as the 2007 and 2016 Community Surveys. One can immediately see some questionable results, especially from the 2007 Community Survey where a figure of 200 524 people seems out of place compared to the other results. Applying a trend line to the Census data a perfect correlation between the data occurs. Following this growth path, one sees a drastic expected increase in the municipality's future population, reaching well over 300 000 people by 2040.

Figure 3-15: Census and Community Survey outcomes

The next graph shows the results when the Population estimates of StatsSA in Stellenbosch local municipality comes into play. This data was prepared for the Stellenbosch local municipality by StatsSA. The trendline also shows near-perfect correlation but unlike the census data is shows a predicted slowing down of the population growth rate over time. In this case, the expected future population by 2040 is below 250 000.

Figure 3-16: Projections based on StatsSA data

Figure 3-16 below shows the results when the mid-year population estimates of StatsSA. The trendlines of the mid-year estimates and the Stellenbosch StatsSA data show a similar trend and a strong correlation. Based on this, one can assume that a future estimate based only on the three census figures might present inaccurate results.

The complication with these three data sets from Statistics South Africa is apparent. One dataset show strong growth in the future population and the other two a slowdown in terms of growth rate.

Figure 3-17: Projections based on StatsSA data

Figure 3-18 below shows the Quantec data, as well as a GTI data point for 2018. The Quantec data provides the most extended set of historical data. It is interesting to note the different trends between the data sets and that the Quantec data correlates with the results of StatsSA's mid-year population estimates. This is to be expected as the Quantec data benchmarks on the mid-year population estimates.

Figure 3-18: Quantec and GTI population data

GTI's data can be empirically verified, and it might point to an undercount of about 22.5% in the population. An undercount of this extent can have serious implication for planning in the municipality. Similarly, households show a 33.7% undercount based on the mid-year population estimates.

When one uses the Quantec data and applies Microsoft Excel's forecast function, the following forecast shows the population levels until 2040 within a 95% confidence limit. The figure below shows the results.

Figure 3-19: Forecasting population using Quantec data

The forecast indicates that the expected population in 2040 is 243 046. Although this is statistically within 95% confidence levels, the upper and lower confidence bounds are different but possible. The variation in a 95% confidence between the upper and lower limits highlights the importance of closely monitoring population continuously.

The projected population figures are presented in Table 3-8 below. The Census trend forecast shows strong growth in the expected population, while the mid-year population estimate forecast is close to Quantec data. To ensure consistency in the use of these figures in the municipality, the mid-year population estimate figures, as accepted by Stellenbosch for planning purposes, will be used. The

possibility and extent of a substantial undercount in both population and household figures, imply that the midyear estimates are very conservative.

Table 3-8: Projected population numbers

| | 2019 | 2020 | 2025 | 2030 | 2035 | 2040 |
|--|---------|---------|---------|---------|---------|---------|
| Quantec forecast | 178 927 | 181 980 | 197 247 | 212 513 | 227 779 | 243 046 |
| Census Trend | 193 860 | 199 159 | 227 426 | 258 651 | 292 833 | 329 972 |
| Mid-year population estimates trends
(Stellenbosch working figures) | 188 099 | 192 128 | 211 539 | 228 895 | 243 059 | 252 895 |

3.2 Social Profiling: Household characteristics

3.2.1 Reported household numbers

Households are usually assessed in the context of the total population. This gives rise to density ratios and household size. The total number of households is always an important factor in determining the overall demand for infrastructure services and housing. Household density is an important indicator of settlement efficiency and plays an important role in urban planning and development strategies. Household size has an impact on the extent of consumption of goods and services. One should note that housing support strategies have affected household formation to the extent that there are often different rates of change between households and population. The basic household profile for the assessment area is shown in Table 3-9 below. Table 3-10 shows the number of households per population group.

Table 3-9: Total households, size and density

| | 1996 | 2001 | 2011 | 2016 |
|-----------------------------------|--------|--------|--------|--------|
| Total households | 26,154 | 35,165 | 43,328 | 52,274 |
| Household density (households/ha) | 0.29 | 0.41 | 0.51 | 0.62 |
| Ave household size | 4.00 | 3.38 | 3.59 | 3.31 |

Source: Statistics South Africa/SDSA

Table 3-10: Number of households by population group

| | 1995 | 2000 | 2005 | 2010 | 2015 | 2019 |
|---------------------|--------|--------|--------|--------|--------|--------|
| Black Households | 5 540 | 7 708 | 10 116 | 13 313 | 16 149 | 18 480 |
| Coloured households | 13 367 | 14 547 | 15 621 | 17 352 | 19 020 | 20 420 |
| Asian households | 75 | 85 | 99 | 120 | 137 | 151 |
| White households | 10 924 | 11 740 | 12 074 | 12 061 | 10 951 | 10 280 |
| Households total | 29 907 | 34 081 | 37 909 | 42 846 | 46 258 | 49 332 |

Source: Quantec 2020

3.2.2 Historical household growth trends

As shown in Figure 3-20 below, the trends for households are broadly the same as for population. This is also true for the next graph showing the growth rates (Figure 3-21: Comparative household growth rates from 1993 to 2019). However, the change dynamics in population and households are not precisely the same, and when the two data sets are used to show household sizes and the changes in household size, several important aspects emerge.

The number of black households has grown significantly between 1993 to 2019 and still shows the most robust growth of all population groups. Coloured households also show strong growth but not at the rate of black households. White households show an interesting pattern. There was a decline in white households since 2009, and by 2019 white households numbers decreased to below the 1993 level.

Figure 3-20: Household growth from 1993 to 2019

Source: Quantec 2020

The corresponding growth rates are shown in the figure below. The graph shows a similar trend for the country, province, district, and the municipality. It is interesting to note that the household growth rate in the Stellenbosch Local Municipality has been below that of the district, province and national rates since 2012.

Figure 3-21: Comparative household growth rates from 1993 to 2019

Source: Quantec 2020

The figure below confirms the declining growth rates and compares the household growth rates per population group in the municipality. The household growth rates for the black and Asian population groups have generally been above the municipality's total. The coloured population group follows a very similar trend that the total. This is to be expected as the coloured population group accounts for the majority of the population. The white population group is below the total for the municipality and is continuously declining. Since 2010 the household growth rate for the white population group has been negative.

Figure 3-22: Household growth rates in Stellenbosch Local Municipality 1993 to 2019

Source: Quantec 2020

Figure 3-23 below shows household densities in the municipality at a 2km kernel density. As can be expected, the overall densities follow a similar pattern to the population's spatial distribution. The highest densities are in and around Stellenbosch with some lower densities being recorded in Franschoek, Klapmuts and the area around Pniel, Langedoc and Kylemore.

Figure 3-23: Household densities - Dwelling Units per km2 (2km Kernel)

Source: SDSA

3.2.3 Household size

Household size is an important indicator. In demographic terms, it relates to the stages of the demographic cycle, and decreasing household sizes is also an indicator of improving socio-economic conditions. However, increasing household sizes may also indicate economic stress leading to overcrowding and bigger households. Decreasing household sizes might also result from government housing programs that, in effect, encourage large family units to split up to access subsidised housing.

Table 3-11 below and the graph show that overall household sizes have relatively stable in the assessed period. The Coloured population's household size remains the same, while the Asian and White populations' households size increased.

Table 3-11: Household size from 1993 to 2019

| | 1995 | 2000 | 2005 | 2010 | 2015 | 2019 |
|---------------------|------|------|------|------|------|------|
| Black population | 3,5 | 3,4 | 3,3 | 3,2 | 3,1 | 3,0 |
| Coloured population | 4,7 | 4,7 | 4,7 | 4,7 | 4,7 | 4,7 |
| Asian population | 3,5 | 3,6 | 3,8 | 4,0 | 4,2 | 4,3 |

Source: Quantec

Figure 3-24: Household sizes by population group

Source: Quantec 2020

3.2.4 Dwelling type

Housing backlogs and the demand for housing will always remain an issue in development and social support strategies in South Africa. The next table shows the different dwelling types in the municipality under assessment.

Table 3-12: Dwelling type

| | 1996 | 2001 | 2011 | 2016 |
|----------------------|--------|--------|--------|--------|
| Traditional | 467 | 768 | 254 | 366 |
| House made of bricks | 14,143 | 18,681 | 24,817 | 29,600 |
| Flat | 3,026 | 2,959 | 4,353 | 1,294 |

| | 1996 | 2001 | 2011 | 2016 |
|-------------------------------|---------------|---------------|---------------|---------------|
| Multiple housing | 2,508 | 1,198 | 2,644 | 2,686 |
| Dwelling in backyard | 1,180 | 554 | 445 | 195 |
| Room/ granny flat | 700 | 265 | 279 | 197 |
| Informal | 2,937 | 3,478 | 7,496 | 15,927 |
| Informal dwelling in backyard | 601 | 1,111 | 2,442 | 1,902 |
| Other | 592 | 6,150 | 598 | 107 |
| Total | 26,154 | 35,165 | 43,328 | 52,274 |

Source: Statistics South Africa

3.2.5 Dwelling ownership

Dwelling ownership data must be treated with circumspect. The data from the census below is based on the occupant's perceptions. There are many ownership systems available. If ownership is interpreted as freehold ownership in terms of a title deed, most areas in South Africa are excluded from this form of ownership. This applies to tribal land and many of the townships in South Africa that were surveyed but never proclaimed. Table 3-13 below reflects the position as reported in the censuses.

Table 3-13: Dwelling ownership

| | 2001 | 2011 | 2016 |
|----------------------------|---------------|---------------|---------------|
| Rented | 8,544 | 13,002 | 9,831 |
| Owned but not yet paid off | 4,533 | 4,312 | 4,121 |
| Occupied rent-free | 8,210 | 12,576 | 10,089 |
| Owned and fully paid off | 7,848 | 11,080 | 22,002 |
| Other | 6,031 | 2,358 | 6,231 |
| Total | 35,165 | 43,328 | 52,274 |

3.2.6 Household change and growth forecasts

Households and household change are one of the most critical aspects of long term planning in any area. The number of households translates into customer units, and households usually represent more than 95% of the customers in a municipality.

Except for the outdated censuses and community surveys, all official statistics used at a municipal or sub-municipal level are all derived from the mid-year population estimates of StatsSA. Both Quantec and GTI use the midyear estimates to calculate and calibrate their household figures. However, GTI also uses their building-based land use (BBLU) data derived from satellite imagery, to aggregate statistics and then to calibrate using mid-year population estimates.

The differences in sources of base year figures are noticeable, and when these figures are projected for planning purposes, small variations in number translates into big differences over a twenty-year planning horizon.

The necessity to do forecasts is important since it becomes the basis for all planning activities. Housing programmes, service delivery planning and budgets are all dependent on estimating and forecasting the long-term customer profiles of the service providers. As a previous section highlighted the challenges with population forecasts, housing units' forecasts are even more challenging. This does not imply that one should not do household forecasts, but it is important to continuously monitor changes and patterns. Underlying any planning implementation systems is a data and information monitoring system

The following graphs highlight the implications of current household data sources for different forecast scenarios.

StatsSA shows household data in the censuses for 1996, 2001 and 2011, community surveys for 2016 and the mid-year estimates. The data points are shown in the figure below. The trendline shows a very good correlation coefficient of 0.9999 on the mid-year estimates. The trend line shows about 75 744 households by 2040.

Figure 3-26: Household trends based on StatsSA data

Figure 3-14 below shows Quantec data, benchmarked to mid-year population estimates, and also the GTI figure for 2017. The GTI figure is substantially higher, but it is verifiable as it based on observed structures. There are 64 593 physically observed housing structures compared to the 48 645 households according to the Quantec data based on the StatsSA baseline. It implies a substantial undercount as indicated paragraph 3.1.6b

Figure 3-27: Household trends based on Quantec data

The following household numbers support the identified trends.

Table 3-14: Projected household numbers

| | 2019 | 2020 | 2025 | 2030 | 2035 | 2040 |
|---|--------|--------|--------|--------|--------|--------|
| Quantec forecast | 49 332 | 53 583 | 57 724 | 61 865 | 62 693 | 66 834 |
| Census trend | 52 336 | 53 528 | 59 488 | 65 449 | 71 409 | 77 370 |
| Mid-year population estimates trends
(Figures adopted by Stellenbosch) | 50 822 | 51 936 | 57 614 | 63 474 | 69 518 | 75 744 |

However, uncertainty is high and requires continuous growth monitoring.

3.3 Economic profiling

The economic profile of any area largely determines its resource base, and hence, the level of development it can sustain. Linked to local demographics, the combination of population and economic variables determines the demand for infrastructure and services to sustain long-term development.

However, local and District municipalities are not necessarily demarcated as functional economic entities but rather as political-administrative units. This leads to several challenges in economic assessment. Amongst others, the following limitations should be considered:

- Economies are open and cannot be ring-fenced or isolated, such as a specific municipal area.
- Economic growth is affected by internationally linked markets, and hence, supply and demand for goods and services cannot be determined locally alone.
- National fiscal policies are outside the control of local economies and are impossible to predict over the long-term.
- National and local politics impact local and national economies, and changes in political stability levels are impossible to predict.
- Economic growth tends to follow cycles. These cycles are difficult to discount over the longer-term.
- It is not possible to accurately discount the current COVID19 crisis's long-term impact at a local level.

South Africa has a highly interventionist economy, and there are continuous efforts to manipulate economic development and growth. These interventions are not always based on rational economic decision-making but often based on socio-political agendas, such as the government's economic transformation agenda. The aim of these non-economic agendas is also specifically to alter the current or natural course of the economy. It becomes, therefore, virtually impossible to predict economic development outcomes based on existing trends and tendencies.

This section gives an overview of the local economy and will draw inferences based on the available information regarding long-term growth and development prospects.

This section addresses several economic issues on a comparative geographical basis. The following are relevant:

- The value of economic production of goods and services,
- Employment and
- Household income and expenditure.

This mostly descriptive section will be followed by a section dealing with relationships and performance in the economic environment. The main issues are:

- Drivers in the local economy, and
- Levels of specialisation in the economy

3.3.1 The value of economic production, good and services

Gross value added (GVA) is a measure of the value of goods and services produced in an area, industry, or economic sector. GVA is linked as a measurement to gross domestic product (GDP), as both are output measures. Simplistically, GVA is the total of all revenues. The relationship is defined as:

$$\text{GVA} = \text{GDP} - (\text{taxes} + \text{subsidies})$$

The next table shows the GVA per sector in the district from 1993 to 2019.

Table 3-15: GVA per annum per sector (R' million at 2010 constant prices)

| GVA | Agriculture | Mining | Manufacturing | Utilities | Construction | Trade | Transport and Telecommunications | Business service | Social services | Government services | Total |
|----------------|-------------|---------|---------------|-----------|--------------|--------|----------------------------------|------------------|-----------------|---------------------|---------|
| 1993 | 630 | 48 | 1 892 | 65 | 126 | 628 | 221 | 1 031 | 868 | 385 | 5 893 |
| 1994 | 669 | 54 | 1 921 | 69 | 130 | 656 | 236 | 1 110 | 866 | 410 | 6 120 |
| 1995 | 523 | 50 | 1 968 | 71 | 135 | 708 | 260 | 1 134 | 861 | 438 | 6 149 |
| 1996 | 546 | 42 | 1 980 | 72 | 127 | 751 | 275 | 1 195 | 904 | 451 | 6 344 |
| 1997 | 583 | 26 | 2 091 | 74 | 138 | 766 | 298 | 1 231 | 898 | 450 | 6 556 |

| Average growth | -0,18% | -62,61% | -0,33% | 2,04% | 9,76% | 8,97% | 16,07% | 7,19% | 0,91% | 3,50% | 3,26% |

The Stellenbosch Local Municipality has had an average annual economic growth rate of 3.26% during the period assessed. The largest contributing sectors to this growth are Business services (27.18%), Trade (19.20%) and Manufacturing (15.86%). Business services and trade are also two of the sectors that have shown the strongest growth. Manufacturing has been declining since 2008. During this time Business services overtook manufacturing as the leading economic sector.

Some sectors have shown a substantial decline. Mining has shown the largest decline (62,61%), but its base is small and insignificant to the assessment. More significant is the decline of the agriculture and manufacturing sectors which has shown an average annual decline of 0.18% and 0.33% respectively. These patterns are also illustrated in Figure 3-28 below.

Figure 3-28: GVA per sector

3.3.2 Employment

Employment and the level of employment directly impact the long-term financial well-being of the government sector. Employment eventually translates into growth in the potential revenue base of the all spheres of government. On the other hand, employment and eventual unemployment challenges increase poverty and the demand for the government's social support programmes.

a. Labour force characteristics

Table 3-17 describes key labour force characteristics between 1995 and 2019. The following needs to be highlighted.

- While the population grew at 2.78% per annum over the period, the working-age population has grown by 3.25% per annum. That is almost 0.5% larger than the population growth rate.
- The ability of the economy to employ new job-seekers increased by 0.29% per annum. Where 79.3% of people in the economically active age could have been accommodated in the economy in 1995, this figure decreased to 69.2% in 2019.

Table 3-16: Labour absorption and participation

| | 1995 | 2000 | 2005 | 2010 | 2015 | 2019 | Average pa% |
|---------------------------------|---------|---------|---------|---------|---------|---------|-------------|
| Population - Total | 107 359 | 120 098 | 133 465 | 152 036 | 166 479 | 178 927 | 2,78% |
| Population - Working Age | 71 868 | 83 029 | 94 915 | 109 744 | 119 376 | 127 995 | 3,25% |

b. Employment and skills levels

The workforce and its employment characteristics are important. The relationships between formal and informal employment and the employment of different skills levels give an indication of the general wellbeing and stress points in the local economy which eventually impacts the demand for and the ability of the council to deliver services

Table 3-17: Workforce characteristics

| | 1995 | 2000 | 2005 | 2010 | 2015 | 2019 | Average pa% |
|----------------------------------|--------|--------|--------|--------|--------|--------|-------------|
| Employed - Formal and informal | 55 762 | 60 836 | 63 148 | 65 732 | 76 550 | 78 594 | 1,71% |
| Employed - Formal - Total | 45 154 | 48 998 | 47 123 | 45 217 | 53 076 | 57 359 | 1,13% |
| Employed - Formal - Skilled | 9 255 | 9 521 | 10 077 | 10 621 | 12 417 | 13 719 | 2,01% |
| Employed - Formal - Semi-skilled | 15 865 | 17 116 | 18 007 | 18 538 | 22 474 | 25 127 | 2,43% |
| Employed - Formal - Low skilled | 20 034 | 22 361 | 19 039 | 16 058 | 18 185 | 18 513 | -0,32% |
| Employed - Informal | 10 608 | 11 838 | 16 025 | 20 515 | 23 474 | 21 235 | 4,17% |
| Unemployed | 1 230 | 2 201 | 5 293 | 6 841 | 7 513 | 9 976 | 29,63% |
| Unemployment rate (%) | 2,2 | 3,5 | 7,7 | 9,4 | 8,9 | 11,3 | 17,58% |

Source: Census 2011/MapAble 2020

A distinction is made between skilled, semi- or unskilled (low skilled) employment in the formal sector. The table shows that skilled people's employment is 0.77% lower than general population growth (2.78% per annum) at 2.01%, while semi-skilled employment increased by 2.43%. Unskilled employment decreased by 0.32% per annum. The net result is that total formal employment increased while by 1.13%. In 1995 there were an estimated 45 154 formal employed persons in the area, and the figure for 2019 is 57 359.

Employment within the informal sector has doubled since 1995. This represents an increase of 10 627 informal job opportunities since 1995. When the economically active people's growth is taken into account, only two options are remaining; they either find employment in the informal sector or remain unemployed. The informal sector experienced the most growth, with a 4.17% increase per annum and currently accounts for 37% of all employment. The figure for 1995 was only 23%. It shows the importance of informal employment in generating personal income. However, by definition, the informal sector is unrecorded and thus outside the scope of the municipal financial resource base and does not usually allow for direct cost recovery measures and taxation. Total employment increased by 1.71%, which is below the growth in the active economic population. The net effect increased in unemployment. The unemployment rate stood at 2.2% in 1995 and increased to 11.3% in 2019. This represents an annual growth rate of 17.6% per annum and an increase in the total amount of unemployed people.

c. Level of education

Education is pivotal in the development process. Skill levels are derivatives of levels of education. The next table shows the profile of the highest level of education for the area. The table and figure below indicate that the municipality has increased the total number of people with Matric and Post-Matric qualifications. The increase in education levels can both be the result of an expansion of education services in the municipality and the migration of skilled labourers into the municipality.

Table 3-18: The highest level of education

| | 1996 | 2001 | 2011 | 2016 |
|---------------|----------------|----------------|----------------|----------------|
| Under 5 | 9 240 | 9 584 | 22 172 | 14 178 |

Figure 3-30: Change in level of education

d. A change-perspective on employment and unemployment (Labour)

This section assesses the employment per sector and how it changed over time. The period under investigation stretches from 1993 to 2019. From 1993 to 2006, the Agricultural sector employed almost 30% of the labour force. After this period, there was a substantial decline with that figure falling to 13.5% in 2019. After 2003 the wholesale and retail trade sector started showing strong growth, and in 2008 trade overtook the agricultural sector in terms of employment. This trend has continued with the trade sector showing continuous growth. Around 2010 business services also surpassed the agricultural sector and as with wholesale and retail trade, shows strong growth. Social services, government services and the manufacturing sector each employ between 10% and 12% of the labour force. These sectors, along with construction and transport, all show slow but steady growth. Mining and utilities remain largely unchanged but account for less than 0.3% of the total labour force.

The annualised changes in employment per sector below show how much employment can fluctuate or the short-term. Therefore, it is appropriate to continuously monitor tendencies, but long-term trends remain important for strategic decision-making and planning.

These changes are reflected in Figure 3-31 below. Table 3-19 presents the percentage share overtime of each sector to the labour force, while Table 3-20 shows the extent of employment per sector.

Figure 3-31: Employment per sector

e. GVA and employment

The last aspect of employment is its relation to GVA. The extent that the GVA/employment ratio change is an indicator of the extent to which a sector is capital intensive or at least its propensity to shed labour over the long-term.

Table 3-21: GVA per employment

| | Agriculture | Mining | Manufacturing | Utilities | Construction | Trade | Transport | Business service | Social services | Government services | Total |
|------|-------------|-----------|---------------|-----------|--------------|--------|-----------|------------------|-----------------|---------------------|-----------|
| 1993 | 38 360 | 2 100 174 | 204 305 | 668 299 | 56 143 | 65 416 | 253 734 | 190 486 | 153 184 | 55 304 | 1 741 399 |
| 1994 | 41 196 | 2 349 304 | 212 188 | 752 380 | 58 965 | 70 047 | 285 878 | 198 806 | 151 122 | 58 324 | 1 731 965 |

| Average growth | 1.85% | -2.71% | 0.31% | -0.16% | 4.17% | 2.05% | 0.96% | 0.55% | -0.50% | 1.22% | 0.05% |

Figure 3-32: GVA per employment opportunity at constant 2010 prices

The labour productivity of agriculture increased marginally mainly due to the historically labour intensive nature of agricultural activities in the municipality. It indicated that there were no large scale

shifts towards more capital intensive practices in the agricultural sector. Government services become more labour intensive and this correlates with the growth in government employment over the past two decades. All other sectors increased their GVA output per labour unit except for mining.

3.3.3 Drivers in the economy

Priority investment should support those economic sectors that drive local development and those sectors that it supports. The basis for finding the economic drivers in the municipality is a basic/non-basic analysis. The comparative advantage of a region indicates a relatively more competitive production function for a product or service in that specific economy (e.g. a local municipality) than in the aggregate economy it is compared to (e.g. a province). Therefore, the local economy produces a product or renders a service more efficiently than the province, for example.

An indication of the comparative advantage of an economy is its location quotient. A region's economy, for instance, has a location quotient larger (or smaller) than 1, or a comparative advantage (or disadvantage) in a particular sector, when the share of that sector in the specific economy is greater (less) than the share of the same sector in the aggregate economy.

Being a measure of comparative advantage, the location quotient effectively provides a tool used to identify key drivers within a local economy. It does so by employing an offset principle based on the employment figures within the various sub-sectors of the subject local and aggregate economy.

The analysis utilizes two main components, basic and non-basic activities:

- Basic activities generate a surplus (i.e. a location quotient larger than 1) with respect to the local economy and, as a result, can export its goods/services to bring in wealth from the outside.
- Non-basic activities support the basic activities and do not produce a surplus of goods/services (i.e. a location quotient smaller than 1).

The location quotient is expressed as a ratio between employment within a sub-sector of the economy divided by the total employment within the local/regional/national economy. A ratio greater than one, suggests that the specific economy employs proportionally more people within the local economy than the economy it is being compared to. As a result, it generates more than what can be consumed locally, and the sector is thus a net exporting sector. This implies that it generates income for the local economy (i.e. a comparative advantage and key driver). The opposite is then true for ratios smaller than one.

The tables below provide a comparative location quotient for the Stellenbosch Local Municipality.

Table 3-22: Basic/Non-basic ratios measured against the national economy in 2019

| | Agriculture | Mining | Manufacturing | Utilities | Construction | Trade | Transport | Business service | Government services | Community services |
|----------------|-------------|--------|---------------|-----------|--------------|-------|-----------|------------------|---------------------|--------------------|
| Western Cape | 1,52 | 0,03 | 1,10 | 0,79 | 1,12 | 1,06 | 1,08 | 1,38 | 0,64 | 1,13 |
| Cape Winelands | 3,63 | 0,02 | 1,09 | 0,66 | 1,39 | 1,18 | 0,94 | 1,13 | 0,57 | 1,30 |
| Witzenberg | 6,08 | 0,00 | 1,02 | 1,03 | 1,81 | 1,13 | 0,67 | 0,93 | 0,62 | 1,27 |
| Drakenstein | 2,72 | 0,03 | 1,07 | 0,78 | 1,61 | 1,13 | 0,84 | 1,20 | 0,60 | 1,46 |
| Stellenbosch | 2,29 | 0,02 | 1,18 | 0,40 | 1,12 | 1,27 | 1,10 | 1,19 | 0,58 | 1,12 |
| Breede Valley | 4,27 | 0,02 | 0,98 | 0,53 | 1,19 | 1,16 | 1,01 | 1,15 | 0,55 | 1,38 |
| Langeberg | 5,22 | 0,02 | 1,25 | 0,60 | 1,13 | 1,22 | 1,08 | 0,97 | 0,44 | 1,14 |

Within the context of the national economy, the Stellenbosch Municipality shows a comparative advantage in various sectors. It is only in mining, utilities and community services where the municipality does not show a good contribution. It is also interesting to note that the other local municipalities, the district and the province have similar profiles.

When comparative advantage is measured against the provincial economy in Table 3-23 below, the number of sectors where the municipality has a comparative advantage decrease. Agriculture, manufacturing, construction and trade show strong figures.

Table 3-23: Basic/Non-basic ratios measured against the provincial economy in 2019

| | Agriculture | Mining | Manufacturing | Utilities | Construction | Trade | Logistics | Business services | Government services | Community services |
|----------------|-------------|--------|---------------|-----------|--------------|-------|-----------|-------------------|---------------------|--------------------|
| Cape Winelands | 2,38 | 0,71 | 0,99 | 0,84 | 1,24 | 1,11 | 0,86 | 0,81 | 0,90 | 1,15 |
| Witzenberg | 4,00 | 0,10 | 0,92 | 1,31 | 1,62 | 1,06 | 0,62 | 0,67 | 0,98 | 1,12 |
| Drakenstein | 1,79 | 0,99 | 0,97 | 0,99 | 1,44 | 1,07 | 0,77 | 0,87 | 0,94 | 1,29 |
| Stellenbosch | 1,51 | 0,68 | 1,07 | 0,51 | 1,00 | 1,20 | 1,02 | 0,86 | 0,91 | 0,99 |
| Breede Valley | 2,80 | 0,76 | 0,88 | 0,68 | 1,06 | 1,09 | 0,93 | 0,83 | 0,86 | 1,21 |
| Langeberg | 3,43 | 0,57 | 1,13 | 0,76 | 1,01 | 1,15 | 0,99 | 0,70 | 0,70 | 1,00 |

Measured against the other municipalities within the district an interesting shift takes place. The municipality's strong agricultural advantage disappears, and a shift seems to take place with a focus on services sectors. This highlights the Stellenbosch municipality's role as a service centre in the larger district.

This assessment highlights and underlines the importance of recognising spatial differences and not treating the municipality as a uniform economic and demographic entity.

Table 3-24: Basic/Non-basic ratios measured against the district economy in 2019

| | Agriculture | Mining | Manufacturing | Utilities | Construction | Trade | Logistics | Business services | Government services | Community services |
|---------------|-------------|--------|---------------|-----------|--------------|-------|-----------|-------------------|---------------------|--------------------|
| Witzenberg | 1,68 | 0,15 | 0,93 | 1,57 | 1,30 | 0,95 | 0,72 | 0,83 | 1,09 | 0,97 |
| Drakenstein | 0,75 | 1,40 | 0,98 | 1,19 | 1,16 | 0,96 | 0,90 | 1,06 | 1,04 | 1,12 |
| Stellenbosch | 0,63 | 0,96 | 1,09 | 0,61 | 0,81 | 1,08 | 1,18 | 1,06 | 1,02 | 0,86 |
| Breede Valley | 1,18 | 1,08 | 0,90 | 0,81 | 0,86 | 0,98 | 1,07 | 1,02 | 0,96 | 1,06 |
| Langeberg | 1,44 | 0,80 | 1,15 | 0,91 | 0,81 | 1,03 | 1,15 | 0,86 | 0,78 | 0,87 |

3.3.4 Economic specialisation and vulnerability

The size of the economy and sectors driving the local economy are important. However, the local economy's vulnerability is equally important, and the economy's ability to sustain itself through economic cycles will determine sustainability at many levels of development and operations. Economic diversity is one of the major factors that determine risk. It simply implies that the more diverse an economy is, the more resilient it is when one or more sectors are affected by external change and pressures on the local economy. Diversity in an economy is measured through the tress index. A tress index of zero represents a totally diversified economy. On the other hand, the higher the index (closer to 100), the more concentrated or vulnerable the region's economy is to exogenous variables, such as adverse climatic conditions, commodity price fluctuations, etc.

Table 3-25: Tress index based on 22 sectors of the Standard Industrial Classification

| Geography | 1995 | 2000 | 2005 | 2010 | 2015 | 2016 | 2017 | 2018 | 2019 |
|----------------|------|------|------|------|------|------|------|------|------|
| South Africa | 37.4 | 35.9 | 36.4 | 37.8 | 39.4 | 40.1 | 39.6 | 40.1 | 40.9 |
| Western Cape | 46.2 | 47.2 | 48 | 48.7 | 49.5 | 50 | 49.8 | 50.4 | 51.2 |
| Cape Winelands | 47 | 45.1 | 43.5 | 42.3 | 42.5 | 42.9 | 42.9 | 43.3 | 44.2 |
| Witzenberg | 49.7 | 48.3 | 44.3 | 40.5 | 39.4 | 39 | 39.7 | 39.5 | 39.9 |
| Drakenstein | 50.7 | 48.6 | 45.7 | 43.4 | 42.6 | 43.5 | 43.1 | 43.9 | 45 |
| Stellenbosch | 53.8 | 51.8 | 49 | 47.7 | 47.7 | 48.4 | 48.1 | 48.9 | 49.8 |
| Breede Valley | 38.2 | 36.4 | 35.9 | 39.1 | 41.7 | 42.4 | 42.8 | 43.5 | 44.3 |
| Langeberg | 54.6 | 53.1 | 48.7 | 44.4 | 42.8 | 43.2 | 43.2 | 43.8 | 44.5 |

The municipality has become more diversified over time. This contrasts with the national and provincial economies that show a slight shift to more specialised economies. Although the figures suggest that the municipality has diversified it is still more specialised than the overall national economy.

3.4 Spatial Profiling: Settlement dynamics

Stellenbosch is a combination of various changing systems. This is reflected in the growth and movement of people. This section shows at how, and to what extent, growth has taken place in the municipality and investigate the municipal areas' historical growth, its changing settlement patterns, and daily movement of people, to assess the spatial realities. This should give a picture of the alignment between the proposed spatial policies and the existing situation to determine if these policies are realistic and manageable.

3.4.1 Historical growth

The historical growth of the municipality is assessed by mapping the age of general plans. This gives some insight into the development structure and history of the municipality but also how some policies might have shaped the spatial structure of Stellenbosch.

Figure 3-33: Age of general plans

Source: Surveyor General

Many of the earliest registered general plans are related to farms. These areas are largely ignored in the assessment as it is more important to investigate the growth and expansion of the urban areas.

The outward expansion from towns such as Stellenbosch and Franschhoek is clear. This outward development is also linked to major road and rail infrastructure.

3.4.2 Settlement footprint

This section deals with land cover. The dataset has been derived from multi-seasonal Landsat 8 imagery, using operationally proven, semi-automated modelling procedures developed specifically for this dataset's generation, based on repeatable and standardised modelling routines. The data is at a 30m resolution, and as a result, the accuracy of the query results is affected accordingly.

3.4.3 Primary economic activities

The chapter dealing with the municipality's economic profile clearly showed the importance of primary economic activities and specifically agriculture. These activities cover 38% of the total area of the municipality. In general, there has been a 16% decrease in land cover related to primary economic activities from 1990 to 2014. Most of the prominent agricultural-related categories have shown a decrease. Smallholdings have increased by 123% from 187 hectares to 420 hectares.

The large percentage changes of cultivated commercial pivots and mining can largely be ignored as these increases happened from a small or previously non-existent base.

Table 3-26: Land cover: Primary economic activities

| Land cover category | Extent of cover
1990 (ha) | % | Extent of cover
2014 (ha) | % | % change |
|------------------------------|------------------------------|--------------|------------------------------|--------------|---------------|
| Cultivated commercial fields | 4 216 | 11.0% | 3 992 | 11.9% | -5.3% |
| Cultivated commercial pivot | 1 | 0.0% | 84 | 0.3% | 8311.0% |
| Cultivated orchard and vines | 19 690 | 51.4% | 19 436 | 58.0% | -1.3% |
| Sugarcane | 0 | 0.0% | 0 | 0.0% | 0.0% |
| Small holdings | 187 | 0.5% | 420 | 1.3% | 123.8% |
| Subsistence farming | 0 | 0.0% | 0 | 0.0% | 0.0% |
| Forests & Plantations | 8 019 | 20.9% | 3 010 | 9.0% | -62.5% |
| Mining | 1 | 0.0% | 62 | 0.2% | 6063.0% |
| Total | 32 114 | 83.9% | 27 004 | 80.6% | -15.9% |

a. Human settlement activities

The following table lists the extent of land cover in the municipality related to human settlement activities. The results are expressed as hectares covered by a category, and the data for 1990 and 2014 is directly comparable.

Overall, the footprint of human settlement-related activities has increased by 39%. This is even though urban land cover only constitutes 3.1% of the municipality's total land area. In total, the land cover related to human settlement activities has increased by 5.5% over the period assessed.

Urban commercial activities have grown by 3% while industrial activities decreased by over 10%. But the largest changes came in the land cover categories related to residential uses and activities. Its interesting to note a small decrease (3.6%) in the formal residential category. Urban informal and urban townships have shown big increases. Urban townships grew by 22% while the figures indicate that of informal activities increased by 52 hectares.

Table 3-27: Landcover: Human settlement activities

| Land cover category | Extent of cover
1990 (ha) | % | Extent of cover
2014 (ha) | % | % change |
|---------------------------|------------------------------|-------------|------------------------------|-------------|-------------|
| Urban built-up | 24 | 0.1% | 38 | 0.1% | 56.4% |
| Urban commercial | 340 | 0.9% | 350 | 1.0% | 3.0% |
| Urban industrial | 484 | 1.3% | 432 | 1.3% | -10.8% |
| Urban residential | 990 | 2.6% | 955 | 2.9% | -3.6% |
| Urban townships | 393 | 1.0% | 481 | 1.4% | 22.4% |
| Urban informal | 1 | 0.0% | 52 | 0.2% | 3957.5% |
| Rural villages | 0 | 0.0% | 0 | 0.0% | 0.0% |
| Urban sports and golf | 290 | 0.8% | 392 | 1.2% | 35.1% |
| School and sports grounds | 133 | 0.3% | 103 | 0.3% | -22.8% |
| Total | 2 656 | 6.9% | 2 802 | 8.4% | 5.5% |

Figure 3-34: Land cover: Human settlement activities

Source: SDSA based on Department of Environmental Affairs

3.4.4 Urban growth and expansion

Figure 3-35 below shows the physical expansion of urban-related growth in the municipality from 1990 to 2014. The map clearly indicates peripheral growth. In terms of area, this growth is rather small with a 5% increase in footprint from 2 656 Ha to 2 802 Ha.

However, this does not tell the entire story because the map does not show if densification has taken place or to what extent. Using the Quantec demographic data and relating it to the land cover in the same or closest year, one can estimate the urban density and how it has changed. Based on this, the density (people per hectare) in 1990 was 38.7 or 10.6 households per hectare. What is interesting is that if you compare that figure to 2014 the density increased to 58.8 people per hectare or 16.4 households per hectare. This means that although peripheral growth took place, the densification of existing urban areas took place at a faster rate. In terms of these figures, it implies that while urban land increased by 5%, the number of people increased by 60% resulting in 425 people being accommodated for every additional hectare developed, or in other words, new developments in this period took place at 122 households per hectare.

Figure 3-35: Settlement growth 1990 – 2014

Source: SDSA based on Department of Environmental Affairs

3.5 Access to social facilities

Social and community facilities are an important part of developing strong communities. As the population's size increases over time, this growth will put pressure on existing facilities and create a need for new social and community resources.

This section will provide an overview of the spatial distribution and, where available, counts of education facilities, health care facilities, and safety resources.

3.5.1 Education facilities

Education facilities include primary, secondary, combined and intermediate schools as listed in the database of the National Department of Education. A breakdown of the type of schools are as follows:

- 30 primary schools,
- 13 secondary schools
- 5 combined schools, and
- 1 intermediate schools

The teacher to learner ratio needs to be below 40. In general, very few schools exceed this ratio with most schools showing some capacity available.

Most assessments use broad guidelines from the CSIR to determine the need for education facilities. These assessments are often done without taking into consideration the existing capacity of the facilities and ignore the distance metric that plays a critical role in the provision of education facilities. Another factor that is often disregarded is to assess the actual age groupings of the municipality's population. These factors all contribute to the need for these facilities.

Table 3-28: School in the Stellenbosch area

| School Type | Number of Schools | Total Learners | Total Teachers | Learners/Education |
|--------------|-------------------|----------------|----------------|--------------------|
| Primary | 30 | 18817 | 671 | 28.04 |
| Secondary | 13 | 9445 | 400 | 23.61 |
| Intermediate | 1 | 471 | 14 | 33.64 |
| Combined | 5 | 2508 | 249 | 10.07 |

Source: National Department of Education

Figure 3-36: Spatial distribution of education facilities

Source: MapAble based on National Department of Education

3.6 Health facilities

A distinction is made between public and private health facilities in the assessment. There is a total of 14 public health facilities and three private health facilities. Table 37 below shows the public health facilities in the area.

Table 3-29: Public health facilities in the Stellenbosch area

| Name of public health facility | Type of public health facility |
|------------------------------------|--------------------------------|
| Pad Clinic | Clinic |
| Bird Street Clinic | Clinic |
| Cloetesville CDC | Community Day Centre |
| Dirkie Uys Street Satellite Clinic | Satellite Clinic |
| Don and Pat Bilton Clinic | Clinic |
| Groendal Clinic | Clinic |
| Idas Valley Clinic | Clinic |
| Kayamandi Clinic | Clinic |
| Klapmuts Clinic | Clinic |
| Kylemore Clinic | Clinic |
| Rhodes Fruit Farm Satellite Clinic | Satellite Clinic |
| Stellenbosch EMS Station | EMS Station |
| Stellenbosch Hospital | District Hospital |
| Victoria Street Clinic | Clinic |

The tables below show the private facility and its ownership and also the beds per specialist function for each of the facilities.

| Name of private health facility | Private health group |
|---------------------------------|----------------------|
| Stellenbosch Medi-Clinic | Medi-Clinic |

The next table indicates the beds per specialist function in each of the facilities.

| Name of private health facility | Beds: Total | Beds: ICU | Beds: Pediatric | Beds: General | Beds: Neo-ICU | Beds: Special ICU | Beds: High care | Beds: Psychiatric | Beds: Day/Ward |
|---------------------------------|-------------|-----------|-----------------|---------------|---------------|-------------------|-----------------|-------------------|----------------|
| Stellenbosch Medi-Clinic | 90 | 3 | 7 | 75 | 1 | 0 | 4 | 0 | 0 |

Figure 3-37: Spatial distribution and density of public healthcare facilities

3.6.1 Safety and security

There are 5 SAPS stations in the area, however, the area is serviced by a total of 14 police precincts. Policies precinct boundaries do not align with municipal boundaries. The SAPS stations include:

- Cloetesville
- Franschhoek
- Groot Drakenstein
- Klipmuts
- Stellenbosch

Figure 3-38: Spatial distribution of SAPS stations and precincts

3.6.2 Courts

The courts of South Africa are the civil and criminal courts responsible for the administration of justice in South Africa. The total amount of lower courts in the municipality is 2.

| Type of court | Area/Office | Address |
|------------------|--------------|-------------------------------------|
| Magistrate Court | Stellenbosch | n/a |
| Periodical Court | Franschoek | Alexander Street, Stellenbosch 7600 |

Figure 3-39: Spatial distribution of lower courts

3.7 Access to services

Access to infrastructure services is a driving force for the betterment of all communities in South Africa. It is a core function of government, and since 1994, access to services for previously disadvantaged communities was emphasised to the extent that it becomes the driving force of most government delivery policies. Initial approaches were to meet the health requirements of the World Health Organisation and hence the adoptions of the so-called RDP standards, later referred to as access to basic services. However, these policies have evolved over time for many reasons, to the extent that many of the services currently contemplated by the government at all levels exceed the initial norms and standards.

3.7.1 Water services

Water services have been a very high priority in services delivery strategies over the past two decades. It is one of the key Millennium Goals adopted in 2000, which stated that countries should aim to halve people's proportion without access to safe drinking water and basic sanitation by 2015. In terms of these goals, at least 50% of households should have access to at least basic services. The table below shows the access to water has changed between 1996 and 2011

Table 3-30: Access to water services 1996, 2001 and 2011

| | | Full | Intermediate | Basic | Below Basic | None |
|------|-------|---------|--------------|---------|-------------|--------|
| 1996 | Total | 19,580 | 2,795 | 2,879 | 660 | 240 |
| | % | 74.86 % | 10.69 % | 11.01 % | 2.52 % | 0.92% |
| 2001 | Total | 25,005 | 4,066 | 2,706 | 3,143 | 245 |
| | % | 71.11 % | 11.56 % | 7.70 % | 8.94 % | 0.70 % |
| 2011 | Total | 31,337 | 3,521 | 6,231 | 1,835 | 404 |
| | % | 72.33 % | 8.13 % | 14.38 % | 4.24 % | 0.93 % |

Source: Census 2011

3.7.2 Sanitation services

Access to appropriate sanitation services is a very high health priority. Although sanitation services received a high priority from the government, there are always challenges and this service did not achieve the same level of success as improved access to water services. This section shows the sanitation access for the municipality.

Table 3-31: Access to sanitation services 1996, 2001 and 2011

| | | Full | Intermediate | Basic | Below Basic | None |
|------|-------|---------|--------------|--------|-------------|--------|
| 1996 | Total | 21,960 | NA | NA | 2,348 | 1,846 |
| | % | 83.96 % | NA | NA | 8.98 % | 7.06 % |
| 2001 | Total | 31,132 | 114 | 596 | 1,067 | 2,257 |
| | % | 88.53 % | 0.32 % | 1.69 % | 3.03 % | 6.42 % |
| 2011 | Total | 39,437 | 319 | 206 | 2,331 | 1,035 |
| | % | 91.02 % | 0.74 % | 0.48 % | 5.38 % | 2.39 % |

Source: Census 2011

3.7.3 Electricity services

Although electricity does not have the same implications for health as water and sanitation, access to electricity is very important for general development and especially education. Access to electricity

was therefore, always a high priority. The table below shows how access to electricity has changed since 1996. This table is based on access to lighting as a proxy for access to electricity.

Table 3-32: Access to electricity services 1996, 2001 and 2011

| | | Full access | No access | Total |
|------|-------|-------------|-----------|--------|
| 1996 | Total | 23,530 | 2,625 | 26,154 |
| | % | 89.96 % | 10.04 % | 100 % |
| 2001 | Total | 32,362 | 2,803 | 35,165 |
| | % | 92.03 % | 7.97 % | 100 % |
| 2011 | Total | 40,305 | 3,023 | 43,328 |
| | % | 93.02 % | 6.98 % | 100 % |

Source: Census 2011

3.7.4 Refuse removal

Solid waste management and refuse removal are important for health and environmental considerations. The table below shows how access to refuse removal services was reported in the previous three censuses.

Table 3-33: Access to refuse removal services 1996, 2001 and 2011

| | | Full | Intermediate | Basic | Below Basic | None |
|------|-------|---------|--------------|--------|-------------|--------|
| 1996 | Total | 19,946 | 257 | 2,415 | 2,632 | 905 |
| | % | 76.26 % | 0.98 % | 9.23 % | 10.06 % | 3.46 % |
| 2001 | Total | 28,643 | 561 | 1,320 | 4,442 | 2,257 |
| | % | 81.45 % | 1.60 % | 3.75 % | 12.63 % | 0.57 % |
| 2011 | Total | 37,672 | 1,068 | 1,347 | 2,053 | 1,188 |
| | % | 86.95 % | 2.46 % | 3.11 % | 4.74 % | 2.74 % |

4 Land Budget & Demand Quantification

The objective of this section is to:

- Determine the land budget, and;
- Identify the investment required to service the growing population.

The capital investment emphasis within local government in South African over the past two decades has largely been on extending services to poor households. This is done in an environment where major population shifts have occurred, through accelerated urbanisation and decreased growth and even population declines in rural areas. However, extending access to services must be regarded as only one of three major investment areas that require attention in order to sustain or accelerate development and economic growth in any municipality. In this dynamic process, three components contributing to the demand for investment:

- The number of existing households without access to services;
- The need to renew existing infrastructure reaching the end of their economic useful life (EUL), and;
- The growth in households as a result of migration and household formation.

In South Africa, addressing backlogs was the key focus, while demand created through growth received indirect and mostly inadequate attention. Prioritising exiting backlogs and not addressing growth demands resulted and contributed to growing backlogs. Infrastructure practitioners always recognised asset renewal as a critical component to sustain service delivery. However, with the deteriorating state of infrastructure in municipalities and its impact on service delivery, asset renewal started to feature planning, financing and support strategies.

4.1 Investment demand and growth: The infrastructure planning equation

Long-term customer growth is usually one of the biggest drivers of investment demand. The ability to address annual customer growth ensures, at a minimum, that increases in backlogs do not occur. However, it adds to operating expenditure and the maintenance burden of a service provider that must offset income and revenue streams through appropriate cost recovery processes.

Figure 4-1 below shows the relationship and components of infrastructure and service delivery. Within this framework, the demand for infrastructure services (investment programme) is the sum of existing backlogs and household growth plus service upgrading requirements and asset renewals. Capital expenditure funds the investment programme. The capital expenditure adds interest and redemption, operating and maintenance, and bulks purchases costs to the current or operating account of the municipality. Capital subsidies and grants, connection and bulk service contributions, and borrowing funds the capital account.

Maintaining this equilibrium over the long term ensures financial sustainability. In terms of the CEF, the planning horizon is a minimum of ten years.

Figure 4-1: Infrastructure investment planning equation⁶

Investment demand is a function of three core processes, namely:

- The investment required to address backlogs in services access;
- Investment to address the required renewal of assets and renewal backlogs, and;
- The investments to address the demand created through growth.

The quantification of investment requirements is a detailed and very complicated process. The assessment below address all the elements necessary for the CEF process. Within the scope and timeframes of the project, it was, for example, not possible to assess the impact of existing infrastructure capacity. Available capacities will lower investment demands.

4.1.1 Dealing with infrastructure backlogs

The drive behind government infrastructure and service policies since 1994 was to eradicate backlogs. Many factors do affect the extent of backlogs and also the ability of municipalities to address the matter. The project brief did not allow for a backlogs study to determine the current size of the backlogs. However, the assessment of backlogs was made and addressed as part of the demand for capital investment.

Determining the extent of the backlog is difficult. There are conflicting figures on backlogs that cannot be reconciled. The following were considered:

- Census 2011 was the last comprehensive dataset on service access and backlogs.
- Backlogs reflect the total position in the Municipality irrespective of service areas or service server provider responsibilities.

⁶ [BC Gildenhuys, Creating a framework to develop revenue enhancement strategies and support asset management planning in a sustainable investment and service delivery environment \(2018\)](#)

- Service areas differ for each service. The service area for water and sanitation is not the same as that for electricity or refuse removal services or the municipality's responsibility for constructing and maintaining roads.
- The CEF addresses services in terms of the different functional areas, which implies no wall-to-wall service coverage; for example, the municipality may not provide reticulated water and sanitation services to farms. Within the project's scope and the timeframes, it was not possible to further explore this matter.
- Policy decisions directly impact the extent of the backlog, such as a policy position on the acceptability of backyard shacks as a housing typology. There are an estimated 4 530 backyard shacks in Stellenbosch. If backyard shacks represent an acceptable housing typology, then they are not part of the backlog. However, as the provincial housing policy suggests, they are indeed part of the backlog, then it adds an estimated R380 million to the capital requirements of the municipality. Policy decisions have a considerable impact on the municipality's finances and impact on capital and operating expenditure.

The sections and tables below show the backlog situation as calculated from the different censuses. It was impossible to desegregate any 2016 Community Survey figures or other official data source at a sub-municipal level.

a. Access to water services

Table 4-1: Change in access to water services per functional area per census

| Level of service | Census | Urban | | Rural | | Farms | | Total Area | |
|------------------|--------|--------|--------------|-------|--------------|-------|--------------|------------|--------------|
| | | Total | % for census | Total | % for census | Total | % for census | Total | % for census |
| Full | 1996 | 12 235 | 76% | 947 | 83% | 6 398 | 71% | 19 580 | 75% |
| | 2001 | 16 234 | 70% | 1 414 | 87% | 7 357 | 71% | 25 005 | 71% |
| | 2011 | 21 035 | 69% | 2 606 | 83% | 7 696 | 80% | 31 337 | 72% |
| Intermediate | 1996 | 1 100 | 7% | 126 | 11% | 1 569 | 17% | 2 795 | 11% |
| | 2001 | 2 134 | 9% | 133 | 8% | 1 799 | 17% | 4 066 | 12% |
| | 2011 | 2 192 | 7% | 413 | 13% | 916 | 10% | 3 521 | 8% |
| Basic | 1996 | 2 525 | 16% | 6 | 1% | 348 | 4% | 2 879 | 11% |
| | 2001 | 2 106 | 9% | 23 | 1% | 577 | 6% | 2 706 | 8% |
| | 2011 | 5 477 | 18% | 75 | 2% | 679 | 7% | 6 231 | 14% |
| Below Basic | 1996 | 82 | 1% | 43 | 4% | 535 | 6% | 660 | 3% |
| | 2001 | 2 578 | 11% | 52 | 3% | 513 | 5% | 3 143 | 9% |
| | 2011 | 1 628 | 5% | 26 | 1% | 181 | 2% | 1 835 | 4% |
| None | 1996 | 72 | 0% | 24 | 2% | 144 | 2% | 240 | 1% |
| | 2001 | 159 | 1% | 3 | 0% | 83 | 1% | 245 | 1% |
| | 2011 | 231 | 1% | 23 | 1% | 150 | 2% | 404 | 1% |

The table shows the following:

- Farms and rural nodes generally have better higher levels of services than the Municipality's urban component, and no access and access to less than basic services is also higher in the urban areas.
- The figures highlight the urban components' pressure, notwithstanding substantial increases in the number of households with service access.

The Municipality reported the following figures to Statistic South Africa (StatsSA) for the Non-Municipal Financial Census released in 2019.

Table 4-2: Number of consumer units receiving water services

| | Number of domestic consumer units served through a delivery point | | | | Total number of non-domestic consumer units receiving water services | Total number of consumer units receiving water services |
|------|---|----------------------------|----------------------------|--|--|---|
| | Inside the yard | Less than 200m from a yard | More than 200m from a yard | Total number of domestic consumer units receiving water services | | |
| 2017 | 39 044 | 6 231 | 1830 | 47 105 | 903 | 48 008 |
| 2018 | 41 623 | 9 699 | 0 | 51 322 | 903 | 52 225 |

According to these figures, there are no service backlogs in the Municipal area and access to full services increased by more than 32% in 8 years (time period 2011 - 2018). The figures show an increase from 31 337 households with access to full services in 2011 to 41 623 households in 2019. However, one should consider the fact that there are currently more than 15 000 informal and backyard structures in the municipal area.

b. Access to sanitation services

Access to sanitation follows a similar pattern to water services, and again, the pressure on the urban areas is evident. The number of households with below basic services is proportionally higher than in the urban areas. From the table, the policy to provide full services to all households is evident.

Table 4-3: Change in access to sanitation services per functional area per census

| | | Urban | | Rural | | Farms | | Total Area | |
|--------------|------|--------|------|-------|------|-------|------|------------|------|
| | | Total | % | Total | % | Total | % | Total | % |
| Full | 1996 | 14 121 | 88% | 968 | 84% | 6 871 | 76% | 21 960 | 84% |
| | 2001 | 21 031 | 91% | 1 456 | 90% | 8 645 | 84% | 31 132 | 89% |
| | 2011 | 28 532 | 93% | 2 760 | 88% | 8 145 | 85% | 39 437 | 91% |
| Intermediate | 1996 | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. |
| | 2001 | 25 | 0% | 3 | 0% | 86 | 1% | 114 | 0% |
| | 2011 | 56 | 0% | 12 | 0% | 251 | 3% | 319 | 1% |
| Basic | 1996 | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. | n.a. |
| | 2001 | 168 | 1% | 8 | 0% | 420 | 4% | 596 | 2% |
| | 2011 | 41 | 0% | 7 | 0% | 158 | 2% | 206 | 0% |
| Below Basic | 1996 | 587 | 4% | 160 | 14% | 1 601 | 18% | 2 348 | 9% |
| | 2001 | 250 | 1% | 113 | 7% | 704 | 7% | 1 067 | 3% |
| | 2011 | 1 345 | 4% | 255 | 8% | 731 | 8% | 2 331 | 5% |
| None | 1996 | 1 306 | 8% | 19 | 2% | 521 | 6% | 1 846 | 7% |
| | 2001 | 1 737 | 7% | 44 | 3% | 476 | 5% | 2 257 | 6% |
| | 2011 | 587 | 2% | 109 | 3% | 339 | 4% | 1 035 | 2% |

The Statistic South Africa (StatsSA) for the Non-Municipal Financial Census released in 2019 shows the table below's figures. These figures confirm full services as the preferred service option. However, it shows only 40 373 households receiving services while the data on water services shows a total of 51 322 households in the municipal area. It is not possible to account for the more than 10 000 household discrepancy.

Table 4-4: Number of consumer units receiving sanitation services

| | Flush toilets connected to a public sewerage system | Flush toilets connected to septic tank | Bucket system | Ventilated improved pit latrines | Other | Total number of domestic consumer units receiving sanitation services | Total number of non-domestic consumer units receiving sanitation services | Total number of consumer units receiving sanitation services |
|------|---|--|---------------|----------------------------------|-------|---|---|--|
| 2017 | 37 939 | 1079 | 0 | 0 | 1 193 | 40 211 | 1024 | 41235 |
| 2018 | 38 027 | 1079 | 0 | 0 | 1 267 | 40 373 | 925 | 41298 |

c. Access to electricity services

Households without electricity totals about 7% of total households. The non-financial census does not report on access to electricity. Even though the percentage access improved, the available data shows that more people are without electricity in real terms. The current position cannot be confirmed, and backlogs used for modelling purposes were estimated as the percentages of the current households per functional areas shown in the table below.

Table 4-5: Change in access to electricity services per functional area per census

| | | Urban | | Rural | | Farms | | Total Area | |
|-----------|------|--------|-----|-------|-----|-------|-----|------------|-----|
| | | Total | % | Total | % | Total | % | Total | % |
| Full | 1996 | 14 646 | 91% | 1 065 | 93% | 7 819 | 87% | 23 530 | 90% |
| | 2001 | 21 253 | 92% | 1 570 | 97% | 9 539 | 92% | 32 362 | 92% |
| | 2011 | 28 472 | 93% | 2 990 | 95% | 8 843 | 92% | 40 305 | 93% |
| No Access | 1996 | 1 368 | 9% | 82 | 7% | 1 175 | 13% | 2 625 | 10% |
| | 2001 | 1 958 | 8% | 54 | 3% | 791 | 8% | 2 803 | 8% |
| | 2011 | 2 090 | 7% | 153 | 5% | 780 | 8% | 3 023 | 7% |

d. Access to refuse removal

The table confirms the focus on urban and rural nodes with only between 2% and 3% of the households without access.

Table 4-6: Change in access to refuse removal services per functional area per census

| | | Urban | | Rural | | Farms | | Total Area | |
|--------------|------|--------|-----|-------|-----|-------|-----|------------|-----|
| | | Total | % | Total | % | Total | % | Total | % |
| Full | 1996 | 15 145 | 95% | 1 024 | 89% | 3 777 | 42% | 19 946 | 76% |
| | 2001 | 21 877 | 94% | 1 528 | 94% | 5 238 | 51% | 28 643 | 81% |
| | 2011 | 29 068 | 95% | 2 990 | 95% | 5 614 | 58% | 37 672 | 87% |

| | 2011 | 288 | 1% | 35 | 1% | 745 | 8% | 1 068 | 2% |
| Basic | 1996 | 317 | 2% | 46 | 4% | 2 052 | 23% | 2 415 | 9% |
| | 2001 | 324 | 1% | 17 | 1% | 979 | 9% | 1 320 | 4% |
| | 2011 | 561 | 2% | 16 | 1% | 770 | 8% | 1 347 | 3% |
| Below Basic | 1996 | 303 | 2% | 45 | 4% | 2 284 | 25% | 2 632 | 10% |
| | 2001 | 587 | 3% | 71 | 4% | 3 784 | 37% | 4 442 | 13% |
| | 2011 | 301 | 1% | 37 | 1% | 1 715 | 18% | 2 053 | 5% |
| None | 1996 | 189 | 1% | 28 | 2% | 688 | 8% | 905 | 3% |
| | 2001 | 1 737 | 7% | 44 | 3% | 476 | 5% | 2 257 | 6% |
| | 2011 | 344 | 1% | 65 | 2% | 779 | 8% | 1 188 | 3% |

e. The customer base for service delivery

The previous sections provide available base profiles of service access in the Municipality. The demand for services is a function of the Municipality's existing customer base's current profile and characteristics. There is a distinction between the following customer categories:

- Residential or domestic customers. Domestic customers are entitled to a range of social and community services from the municipality, irrespective of where they reside in the municipal area. However, the municipality focus its housing support in particular areas, and generally, people living on farms are excluded from the municipality delivered infrastructure and housing services. However, this does not absolve the municipality from its Constitutional obligation to ensure that these households have access to essential services. However, practically, service delivery focuses on the urban and rural nodes in the Municipality.

- Non-residential customers are all other customers that receive services from the Municipality, and the focus of service delivery is again on the urban and rural nodes. However, this does not exclude service delivery outside these areas. The demand for services is a derivative of socio-economic growth and changes.

For modelling purposes, the table below shows the distinction in the residential customer base between a "service population" (those who uses social and community services) and a "housing population", which is representative of the number of households that fall within the housing mandate of the municipality and Government. The next table shows the key numbers:

Table 4-7: Service demand and housing demand inputs to model demand

| | Service demand | Housing demand |
|---|----------------|----------------|
| Average household size | 3.32 | 3.08 |
| Base year population | 192 474 | 126 095 |
| Population growth rate | 1.58% | 1.76% |
| Population estimate at end of programme | 225 071 | 150 184 |
| Households | 59 078 | 40 940 |

The smaller number that constitutes the gross housing demand excludes the following:

- A total of 8 308 households in hostels and student residences
- The 1 456 households accommodated in institutions such as nursing homes, orphanages, etc.
- The 5 041 households residing on farms
- 3 323 "other" formal households that live outside the urban and rural areas on farms.

The housing demand includes backyard shacks.

f. The backlog profile

It is not possible to provide an exact number for backlogs. The available data is irreconcilable, and the figures are estimates based on available information.

Table 4-8: Assignment of levels of services for assessment purposes

| | Number of households | Comments |
|--|----------------------|---|
| Water services | | |
| House/building connection unlimited metered supply | 26 095 | This figure does not affect the outcomes of the assessment as they are fully serviced. Their impact reflects in asset renewal demand. |
| Communal standpipe less than 200m distance | 8 258 | It was assumed all informal structures in the urban and rural nodes have access to a communal standpipe within 200m of the residence |
| Waterpoint more than 200m distance | 2 057 | These are the informal structure outside the urban and rural nodes which the municipality will have to accommodate. |
| No formal service | 4 530 | These are the households currently residing in backyards |
| Water total | 40 490 | |
| Sanitation services | | |
| Waterborne sewerage to each stand 110mm connection | 23 481 | These are the total formal households in urban areas |
| Septic or conservancy tank with toilet structure | 2 535 | The households in rural nodes were assigned here. |
| Communal chemical toilet | 1 193 | The "other" category reported by the municipality to StatsSA were assumed to be in this category |
| No formal service | 13 731 | This is the balance of the households. |
| Sanitation total | 40 490 | |

| | | |
|---------------------------------|--------|---|
| Electricity services | | |
| Electricity connections | 26 095 | The total of all formal households in the urban and rural nodes |
| No formal services | 14 845 | Households in the urban and rural nodes not included above |
| Electricity total | 40 490 | |
| Refuse | | |
| Weekly kerbside waste removal | 26 016 | Assumed that all formal households receive a weekly refuse removal service |
| Communal waste collection point | 8 258 | All informal structures in the urban and rural nodes were included here. |
| No formal service | 6 666 | Households in the urban and rural nodes not included above |
| Refuse removal total | 40 490 | |
| Roads & stormwater | | |
| Paved 6.5 | 2 244 | These figures were derived from the data in the municipality's Roads Asset Management Plan. The figures remain an estimate. |
| Paved 5.5 | 21 181 | |
| Paved 4.5 | 2 535 | |
| Gravel/graded | 1 082 | |
| No service | 13 898 | |
| Roads & stormwater total | 40 940 | |

4.1.2 Asset renewals and renewal backlog

Asset renewals and renewal backlogs should be calculated from asset registers. Asset registers for the main infrastructure services were not available, and the figures used came from the municipality's unaudited financial statements for FY1920 ((See note 10 on page 59). The assets' valuation/cost was assumed to be equal to the current replacement cost (CRC), and carrying value is representative of the depreciated replacement cost (DRC) of the assets.

The general rule is that asset renewals should more or less be equal to the annual depreciation on assets based on their Economic Useful Life (EUL). Renewal backlogs is a function of the condition of an asset and renewal backlogs occur where an asset's Remaining Useful Life (RUL) is less than about 45% of its Current Replacement Cost (CRC).

Table 4-9: The municipality's asset base

| Asset group | Current replacement cost (CRC) | Depreciated replacement cost (DRC) | DRC as % of CRC | Renewal backlog | Renewal target years | % of CRC | CRC per serviced household | CRC per serviced household |
|--------------------|--------------------------------|------------------------------------|-----------------|-----------------|----------------------|----------|----------------------------|----------------------------|
| | R'000 | (R'000) | | (R) | n.a | | (R) | R'000 |
| Water | 1 706 353 | 1 326 747 | 77.8% | 0 | n.a | 32.5% | 27 209 | 46 865 |
| Sanitation | 1 127 953 | 971 838 | 86.2% | 0 | n.a | 21.5% | 17 986 | 41 455 |
| Electricity | 1 328 810 | 951 685 | 71.6% | 0 | n.a | 25.3% | 21 189 | 50 922 |
| Roads & Stormwater | 1 006 034 | 553 933 | 55.1% | 0 | n.a | 19.2% | 16 042 | 37 203 |
| Refuse removal | 81 220 | 51 145 | 63.0% | 0 | n.a | 1.5% | 1 295 | 2 370 |
| | 5 250 370 | 3 567 128 | 67.9% | 0 | n.a | 100.0% | 83 720 | 178 814 |

The municipality has a substantial asset base that amounts to an average of about R83 720 per household for the five major infrastructure services. However, the average cost per serviced households is R178 814. The high cost per household reflects the high levels of services in the municipal area.

The figures show that the municipality's assets are in excellent condition but that roads and stormwater may present challenges within the next few years if asset renewal is not addressed to the extent required. According to these figures, there are no renewal backlogs in the municipal area.

4.1.3 Demand created through growth

In the processes to determine the demand created through growth, four elements were addressed.

- Land demand created through growth expectations;
- Long-term capital requirements to meet the growing demand;
- Operating impact of capital expenditure, and;
- Consumption and use.

a. Land demand

Land demand is determined by norms standards that were applied to various land uses. A distinction was made between the demand for housing (residential demand) and demand for other land uses, including business, industrial, open space, community, and social facilities. Land demand for residential purposes was restricted to the urban and rural nodes. It was assumed that the Municipality would prioritise infrastructure services in these areas.

However, the land demand for the other uses is a function of thresholds to sustain them, and it was therefore calculated on the total growth demand in the municipal area. This is technically not 100% correct since the service function of these uses may exceed administrative boundaries. It gives recognition that factors outside its jurisdiction may determine development demand in a municipality. In this assessment, the long-term demand was only calculated based on growth expectations within the municipal area. It is not practical to separate Stellenbosch from its region.

b. Long-term capital expenditure

Long-term capital expenditure is a function of land demand and the growth in customers. The results show the incremental cost for bulk and reticulated infrastructure. The point of departure is the assignment of appropriate service levels to each user or customer category. This is essentially a policy matter. For the purposes of assessment, the municipality's current approach of providing a full level of service was adopted. This is one area where different approaches and policy options can be introduced to assess the impact of service level approaches on demand for capital and the operating impact thereof. The capital cost per service for each of the land use categories was calculated.

c. The operating impact of capital expenditure

It is relatively easy to calculate capital demand. However, the critical aspects are the long-term operating impact of capital expenditure. Furthermore, an over-investment in services that do not address affordability may lead to structural impediments where the Municipality will find it difficult to meet customers' operating obligations that cannot pay for services. This is usually one of the main contributors to cash flow constraints in municipalities. Operating cost is based on a life-cycle approach that considers both maintenance and operating costs. All costs are presented as marginal costs.

d. Consumption and use

Since consumptions and use norms and standards are used to calculate operating costs, the same values are used to calculate the demand for water, wastewater discharge, electricity consumption, the roads required and the solid waste volume and tonnage. The results are also presented as annual increments to reflect the impact of growth.

4.2 Modelling outcomes and growth impact forecasts

A development cost model⁷ was used to model and forecast long-term investment demand.

4.2.1 Population growth as the basis for modelling investment demand

As indicated earlier, the investment demand modelling is premised on population growth that translated into customer units. The first step was to do a population growth forecast. A forecast was done for the Municipality. (See the section of the socio-economic profile of the Municipality) This represents the growth of the service population. The housing population was calculated using the forecast for the whole Municipality and factoring the household characteristics of the urban and rural nodes into the equation.

The issues and challenges with reliable population and household figures were highlighted in the previous section on the socio-economic characteristics of the municipal area. In being consistent with a conservative approach, low population growth was accepted where the population would increase at an average rate of 1.4% per annum. There is, however, the possibility that this may even be lower. The following projection were used for modelling purposes

Table 4-10: Population as the basis for the assessment

| | Base | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 | 2029 | 2030 |
|--------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Service population | 192 474 | 195 981 | 199 991 | 204 044 | 208 196 | 211 685 | 212 583 | 215 710 | 218 834 | 221 954 | 225 071 |
| Annual increment | | 3 507 | 4 009 | 4 054 | 4 152 | 3 489 | 3 308 | 3 127 | 3 124 | 3 120 | 3 117 |
| Housing population | 126 095 | 126 898 | 128 504 | 130 913 | 134 125 | 138 140 | 142 155 | 145 366 | 147 775 | 149 381 | 150 184 |
| Annual increment | | 2 592 | 2 963 | 2 996 | 3 068 | 2 578 | 2 445 | 2 311 | 2 308 | 2 306 | 2 303 |

4.2.2 Scenario assessment

The scenario applied for assessment tried to emulate the current policy and strategy choices of the Municipality as closely as possible. However, it is important to remember that this remains a modelling approach that crudely aims to replicate a very complicated system. It was, therefore, necessary to make some basic assumptions before the model was calibrated.

a. Assumptions and inputs on housing variables

As described above, the model uses the growth in population to determine housing demand as well as ancillary uses. However, there several key inputs that need to be considered. They are:

- Residential typologies;
- The residential mix in terms of stand sizes, and;
- Stand sizes assigned to the different typologies.

Housing typologies for the CEF are configured around low, medium and high-density residential development that includes different housing typologies. Stand, and households sizes were linked to

⁷ The Development Cost Model V15 is propriety model develop and applied by BC Gildenhuys and Associates over the past 20 years to address the land use and capital expenditure demand and the operating consequences thereof in municipal service delivery.

each of these typologies. Household sizes and cars per household were also considered in the model. The table below shows the input assumptions for housing typologies, stand sizes and household sizes.

Table 4-11: Assumptions on housing typologies, mix stand and household sizes

| Residential types | Residential mix | Stand sizes | Household size |
|-----------------------------------|-----------------|-------------|----------------|
| Single Residential: Low income | 20.0% | 250 | 4.11 |
| Single Residential: Medium income | 22.5% | 500 | 3.75 |
| Single Residential: High income | 15.5% | 850 | 3.00 |
| Medium Density: Low income | 15.0% | 5 000 | 3.50 |
| Medium Density: Medium income | 7.0% | 4 000 | 3.25 |
| Medium Density: High income | 5.0% | 3 000 | 2.90 |
| High Density: Low income | 2.5% | 5 000 | 3.00 |
| High Density: Medium income | 2.5% | 4 000 | 2.50 |
| High Density: High income | 5.0% | 3 000 | 2.10 |

Future backyard dwellers were included as part of the demand for capital expenditure in the equation. It was assumed that this would remain for the full assessment period although there are indications that household incomes have been decreasing.

b. Norms and standards for land use budgeting

The following land use norms and standards were used in the land use budgeting process.

Table 4-12: Land use budgeting norms and standards

| Land use | Provision unit | Provision norm - persons/cars/ children | Ruling stand size m2 |
|--|------------------------|---|----------------------|
| Residential | | | |
| Single Res: Low Inc | units per net ha (net) | 40 | 250 |
| Single Res: Med Inc | units per net ha (net) | 20 | 500 |
| Single Res: High Inc | units per net ha (net) | 12 | 850 |
| Medium Dens: Low Inc | units per net ha (net) | 40 | 2 000 |
| Medium Dens: Med Inc | units per net ha (net) | 30 | 3 000 |
| Medium Dens: High Inc | units per net ha (net) | 25 | 3 000 |
| High Dens: Low Inc | units per net ha (net) | 80 | 2 000 |
| High Dens: Med Inc | units per net ha (net) | 75 | 3 000 |
| High Dens: High Inc | units per net ha (net) | 60 | 3 000 |
| Backyard dwellings | units per household | 0 | 0 |
| Business | | | |
| 3rd Order commercial | m2 per capita | 2.00 | 2 000 |
| 2nd Order Commercial | m2 per capita | 3.00 | 5 000 |
| 1st Order Commercial | m2 per capita | 6.00 | 25 000 |
| Market/trading area | m2 per capita | 7.00 | 5 000 |
| Garages & filling stations | per 2500 cars | 1 | 2 000 |
| Industrial & commercial | | | |
| Light industrial | ha per 7500 people | 3 | 3 000 |
| Heavy industrial | ha per 5000 people | 3 | 10 000 |
| Commercial | ha per 5000 people | 3 | 10 000 |
| Public spaces: recreation | | | |
| Parks: public | ha per 1000 people | 0.33 | 5 000 |
| Parks: private | ha per 1000 people | 1 | 10 000 |
| Sports fields | per 1000 housing units | 3.5 | 10 000 |
| Stadiums | per 125000 people | 1 | 50 000 |
| Community facilities: municipal | | | |
| Municipal office | per 75000 people | 1.00 | 3 000 |
| Community hall | per 25000 people | 1.00 | 3 000 |
| Local library | per 50000 people | 1.00 | 1 500 |
| Primary health clinic | per 50000 people | 1.00 | 3 000 |
| Fire station & Ambulance | per 75000 people | 1.00 | 7 500 |

| Land use | Provision unit | Provision norm - persons/cars/ children | Ruling stand size m2 |
|------------------------------------|------------------------|---|----------------------|
| Ambulance station | per 75000 people | 1.00 | 3 000 |
| Cemeteries | ha per 5500 people | 1.00 | 20 000 |
| Public parking areas | m2 per capita | 0.20 | 3 000 |
| Market/trading area | ha per 10000 people | 1.00 | 7 500 |
| Taxi ranks | m2 per capita | 0.10 | 3 000 |
| Community facilities: other | | | |
| Post office | per 20000 people | 1.00 | 1 500 |
| Lower Court | per 100000 people | 1.00 | 2 000 |
| Post collection point | per 3000 housing units | 1.00 | 200 |
| Police station | per 80000 people | 1.00 | 5 000 |
| District hospital | per 300000 people | 1.00 | 50 000 |
| Community health centre | per 100000 people | 1.00 | 2 000 |
| Hospice | per 50000 people | 1.00 | 2 000 |
| Old age home | per 50000 people | 1.00 | 10 000 |
| Children's homes | per 200000 people | 1.00 | 5 000 |
| Thusong centre | per 70000 people | 1.00 | 10 000 |
| Place of worship | per 1000 people | 1.00 | 2 000 |
| Crèche | per 2800 people | 1.00 | 2 000 |
| Nursery school | per 5000 people | 1.00 | 3 000 |
| Primary school | per 6700 people | 1.00 | 32 000 |
| Secondary school | per 12400 people | 1.00 | 45 000 |
| After school centre | per 5000 people | 1.00 | 2 000 |
| ABET/Skills training | per 50000 people | 1.00 | 50 000 |

The norms and standards were derived from different sources. The main sources were the cadastre from the office of the Surveyor General, the CSIR norms and standards for social and community facilities and then also calculated from the current land cover in the Municipality. The approach was to calibrate the model on local data as far as possible.

c. Service levels

Service levels relate to the technology used to supply a customer with a service. It should not be confused with a service standard which represents the qualitative aspects of service delivery.

The following describes the levels of services (LOS) available for the modelling process.

Table 4-13: Levels of service options for water

| Level of services | Description |
|-------------------|--|
| LOS00 | No formal service |
| LOS01 | Water point more than 200m distance |
| LOS02 | Communal standpipe less than 200m distance |
| LOS03 | Yard tap connection (single tap) and or limited supply with a dry on-site system |
| LOS04 | Yard tap connection (single tap) and or limited supply linked to waterborne sanitation |
| LOS05 | House/building connection unlimited metered supply |
| LOS06 | Supply volume. is limited to 100mm connection, peak flow limited, and on-site storage required |
| LOS07 | All requirements met up to 150mm pipe, 150mm connection |

Table 4-14: Levels of service options for sanitation

| Level of services | Description |
|-------------------|---|
| LOS00 | No formal service |
| LOS01 | Bucket system |
| LOS02 | Unventilated pit latrines and soakaways |
| LOS03 | Ventilated improved pit (VIP) |
| LOS04 | Dry composting toilet |
| LOS05 | Communal chemical toilet |

| Level of services | Description |
|-------------------|---|
| LOS06 | Low flow (small bore) system with toilet structure |
| LOS07 | Septic or conservancy tank with toilet structure |
| LOS08 | Waterborne sewerage to each stand 110mm connection (no toilet structure) |
| LOS09 | Waterborne sewerage to each stand 110mm connection, with toilet structure |
| LOS10 | Waterborne sewer available, max connection size 150 mm or larger |
| LOS11 | Waterborne sewerage, discharge load is above normal limits. |

Table 4-15: Levels of service options for electricity

| Level of services | Description |
|-------------------|---|
| LOS00 | No electricity service |
| LOS01 | None grid electricity service |
| LOS02 | Grid-connected and metered - Single phase 230V up to 20A or 4.6 kVA |
| LOS03 | Grid-connected and metered - Single phase 230V up to 60A or 13.8kVA |
| LOS04 | Grid-connected and metered - Three phase / Multiphase 230/400V up to 150A or 100kVA |
| LOS05 | Grid-connected and metered - Bulk higher than 230/400V - not exceeding 11kV (at least 25 kVA) |
| LOS06 | Grid-connected and metered - Bulk - exceeding 11kV (at least 100 kVA) |

Table 4-16: Levels of service options for roads and stormwater

| Level of services | Description |
|-------------------|------------------------------|
| LOS00 | No service |
| LOS01 | Tracks (Graded) |
| LOS02 | Gravel within 500m |
| LOS03 | Gravel |
| LOS04 | Paved 4.5m |
| LOS05 | Paved 5.5m |
| LOS06 | Paved 6.5 |
| LOS07 | Paved heavy capacity of 7.5m |

Table 4-17: Levels of service options for refuse removal services

| Level of services | Description |
|-------------------|-------------------------------------|
| LOS00 | None |
| LOS01 | Communal waste collection point |
| LOS02 | Weekly kerbside waste removal |

| LOS07 | Daily waste removal from site 2 |

Based on the available service level options, the following levels of services were assigned to the land uses in the development cost model. Changes in the levels of service do have significant impacts on the demand for capital and also the operating position of the municipality and hence its sustainability. The impact of different service level choices and resulting scenario were not tested as part of this report.

Table 4-18: Level of service assigned per land use

| | Water | Sanitation | Electricity | Roads & stormwater | Refuse removal |

4.2.3 The modelling outcomes

This section documents the results of the modelling process. The outcomes are presented as a high-level summary. It is important to note that the tables show incremental quantities, which includes all service elements and components. It is currently impossible to model the impact of major interventions such as building a new wastewater treatment work or significant investment to reconfigure the management of solid waste. Those aspects must be discounted in the project prioritisation process.

Although the results link the demand to a specific year, it is still important to take note of budgeting processes and the extent of lead times before project implementation can commence. The figures are indicative, annual demands and the actual demands will be reflected in the project prioritisation process as part of the project outputs.

a. Land use demand

Table 4-19 shows the summary of land use demand which is a result of the growth forecasts.

Table 4-19: Land use demand for the programme period 2019 to 2028

| | No of units | % of the total land | No of stand required | Area (ha) included |
|---------------------------------|-------------|---------------------|----------------------|--------------------|
| Residential | 8 049 | 35.68% | 4 058 | 282.39 |
| Single Res: Low Inc | 1 173 | 3.71% | 1 173 | 29.33 |

b. Summary of general elements

Table 4-20 and Table 4-21 show the context and main elements that define the expected level of capital and operating expenditure. The outcomes are shown per annum (refer to Table 4-20) and cumulative (refer to Table 4-21).

Table 4-20: Summary of totals per annum (annual increments)

| | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 | 2027 | 2028 | 2029 | 2030 |
|----------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Service population | 3 507 | 4 009 | 4 054 | 4 152 | 3 489 | 3 308 | 3 127 | 3 124 | 3 120 | 3 117 |

d. Summary of operating expenditure

One of the key elements that are often overlooked in capital investment planning is the operating consequences of capital investment. The next two tables show the forecasted operating and maintenance cost associated with the projected capital expenditure. It is an incremental cost and does not reflect on the revenue side and cost recovery strategies that the Municipality may apply.

Table 4-24: Incremental operating & maintenance expenditure: All services per annum (R'000)

e. Summary of consumption and use

Service delivery is about consumption and use. The next two tables show the expected demand for water and electricity. Also, the estimated wastewater and solid waste generated was calculated. These number can be used to assess the impact of future demand on the existing capacities of bulk facilities.

Table 4-26: Incremental consumption and usage

4.2.4 Issues to be considered

The modelling was done against the backdrop of uncertainty and data limitations impacting the process and outcomes. The following should be considered.

⁹ Water consumption reflects net consumption based on delivery norms and standards. It excluded unaccount for water and waterlosses.

- Conflicting population sources necessitated an estimate. The availability of data and an appropriate system to track and monitor change is a challenge and may directly impact the ability of the municipality to quantify, measure and manage change and development.
- There a range of policy options regarding service levels, the rate of backlog eradication, dealing with backyard settlement and other issues that needs to be considered. This assessment of give a broad outline of current approach and policies within the municipality.
- There is not detailed bulk services capacity assessment data available. The extent of current bulk capacities is not known and may impact the estimates of capital expenditure.
- The recent announcement regarding changes in housing policies of the national government will have to be considered. It might have an impact on settlement and urbanisation pattern that will have to be monitored.
- Many of the current issues may lead to long term structural problems resulting from a long history of investment inappropriate service levels and the impact it had and will continue to have on the operations of the municipality.
- The current economic climate and the impact government interventions regarding COVID19 will have negative impact on the customer base and hence the ability to recover cost and sustain itself financially withing the framework of current delivery polices. Measure is required to continuously monitor the medium and long term impact on the municipality.

5 Integrated Infrastructure Investment Framework

The objectives of this section is to:

- Define the total planned capital expenditure within the municipal area.

The Integrated Infrastructure Investment Framework (IIIF) also referred to as the Capital Investment Framework (CIF), outlines the demand identified of capital projects within the Stellenbosch Local Municipality jurisdiction. It represents all capital projects identified across various sectors by various departments on one platform. Stellenbosch Local Municipality has recognised the following three realities:

- Firstly, that capital investment projects not only originate and/or are implemented by the local municipality;
- Secondly, that it is the mandate of other spheres of government to provide services, specifically infrastructure related services, and;
- Thirdly, that the IUDF calls for integrated planning and implementation.

Based on this above mentioned, the Stellenbosch aims to identify the total investment demand within the Stellenbosch Local Municipality jurisdiction. The IIIF therefore not only depicts capital investment projects identified from Stellenbosch, but also those capital investment projects from other spheres of government within the jurisdiction of Stellenbosch. Once other government entities' data is on the Consolidated Inter-Governmental Project Pipeline Platform, Stellenbosch Local Municipality has the ability to incorporate such projects to the Integrated Infrastructure Investment Framework and so the Capital Expenditure Framework. This will unlock the ability to:

- Develop an integrated urban form as guided by the National Development Plan and the Integrated Urban Development Framework;
- Reduce wasteful expenditure and so optimise capital investment; and
- Collaboratively invest in the urban form by different bodies of government.

The institutional process that can deliver an Integrated Infrastructure Investment Framework requires project specific information in order to consolidate the capital expenditure demand as identified by various bodies of government within the municipal jurisdiction. Each project should be adjoined with a set of minimum information to enable uniform appraisal through prioritisation. This is important for a number of reasons:

- A centralised record of all capital needs can be backed up regularly assuring a measure of redundancy and independence on the knowledge of individuals within the various technical departments;
- The centralised data can be called upon by those that are involved in the appraisal of the relative importance of the respective projects and the subsequent budgeting and tracking of those projects;
- It provides a collaborative space for departments to keep record of their needs and to lobby for an appropriate and responsive portion of the annual budget allocation;
- It also provides a platform where project commitments can be communicated to the municipality, and;
- It enables in year monitoring of capital project roll-out.

Project capturing allows for the logging of a new project even though that particular project may still be on a wish-list. In other words, not enough detail of the project is known for the candidate project to qualify to a complete project status. Importantly though, the project is recorded and as a result, recognised as a need by the planning authority.

The minimum information collected includes:

- Project Name;
- mSCOA Project Segment;
- Project location;
- Project beneficiary / affected area;
- Project budget, and;
- Alignment of project budgets with Organisational Objectives.

5.1 Capital expenditure planning: Process

Figure 5-1: From collaborative planning to implementation

Figure 5-1 shows the ideal process of capital expenditure planning, prioritisation, implementation and tracking. The first step towards initiating the process is to accumulate project specific information.

This was achieved through collaboration with departments, annually, at Stellenbosch Local Municipality and making use of the Collaboration Planning Prioritisation Performance (CP3) tool.

The CP3 tool is a centralised decision support system, that is configured to the requirements and specific preferences of each client. In order to do this, it comprises of four modules. These four modules are able to facilitate the business processes that are associated with the capital planning environment within an organisation. The tool provides one place where all capital needs of the organisation reside and serves as a project preparation portal.

The role of CP3 in the capital planning environment has been recognised internationally and locally, as a fundamental tool to support in strategic alignment and decision making. The CP3 tool is critical in compiling a legitimate Capital Expenditure Framework – specifically when it comes to the following three abilities:

- The ability to simultaneously evaluate projects against a prioritisation model of the municipality;
- The ability to run various budget scenarios in collaboration with the municipality, and;
- The ability to spatially report on capital demand, and planned capital expenditure over various years, in terms of various attributes.

5.2 Planned capital expenditure

The current capital expenditure project pipeline of the municipality includes the current planned capital expenditure for the financial year 2021/2022 up to financial year 2030/2031. Even though the municipality does have sight of planned capital expenditure beyond that horizon, a ten year horizon will be used to align with CEF guidelines.

5.2.1 Planned capital expenditure: summary

The municipal capital expenditure process is based around a three-year budget cycle as per the Medium-Term Expenditure Framework (MTREF). This approach more often than not has a negative unintended consequence in that it limits municipalities to plan for the same short-term horizon. However, the introduction of the CEF has brought about a total capital expenditure view based on a 10-year horizon. In the long term, this will result in a better understanding of capital expenditure. However, there are efforts such as fostering institutional support of long-term planning, concerning sector plans, before a mature 10-year planning can be formed. This is inclusive of municipal IDP's that have a 5-year plan. The revision of longer-term planning will foster an understanding of the developmental direction that a municipality is undertaking. It is important to note, however, that the further one plans into the future, the more difficult it becomes to express a planned capital expenditure. It is for that reason that the total capital demand decreases as the years increase.

Table 5-1: 2021/2022 - 2030/2031 Total Planned Capital Expenditure

| Year | Total Planned Capital Expenditure | Total Planned Capital Expenditure % |
|-------------|-----------------------------------|-------------------------------------|
| 2021 / 2022 | R 1 471 328 211 | 22,35% |
| 2022 / 2023 | R 909 681 550 | 13,82% |
| 2023 / 2024 | R 720 959 363 | 10,95% |
| 2024 / 2025 | R 549 631 401 | 8,35% |
| 2025 / 2026 | R 548 338 364 | 8,33% |
| 2026 / 2027 | R 606 838 592 | 9,22% |
| 2027 / 2028 | R 544 582 074 | 8,27% |
| 2028 / 2029 | R 566 010 613 | 8,60% |

| Year | Total Planned Capital Expenditure | Total Planned Capital Expenditure % |
|-------------|-----------------------------------|-------------------------------------|
| 2029 / 2030 | R 409 408 322 | 6,22% |
| 2030 / 2031 | R 256 470 000 | 3,90% |
| Total | R6 583 248 491 | 100% |

Municipal capital demand provides a “blueprint” of needed spending not only for the three-year budget MTREF, but foreseeable future (in this instance, a 10-year horizon). Demand for capital on a more long-term commitment is based on the current revenue projects of the municipality. From Table 5-1, it is evident that the planned capital expenditure is made up of an average of 47% of the 10 year planned expenditure in the MTREF and decreases the further out of the MTREF one moves. This is indicative that capital demand budget in the outer years remains a guestimate. This illustrates that departments only have a better understanding and planning for projects that are occurring in the immediate future. There is an increased demand in the 2026/2027 financial year. The possible reasons for the slight increase (then again a decrease) is due to project phasing. The total planned capital expenditure amounts to R 6 583 248 491 during the 10 - year planning horizon.

Figure 5-2 illustrates the locations of each of the planned capital expenditure projects over the 10-year horizon within the municipality, at a unit level. The planned projects are clustered within the major towns; Stellenbosch town (integrated with Kayamandi), Klapmuts and Franschhoek. Stellenbosch town remains as the major settlement within the municipality as it comprises of a number of essential amenities, tourism attractions as well as government services that reach both locally and beyond the borders of the municipality. According to the Stellenbosch Municipality mSDF (2019), Klappmuts is characterised as a settlement for residential use and limited commercial and work-related activity. However, the decision by Distell Limited to relocate and consolidate many of its operations in Klappmuts is critical to commence municipal services. This is inclusive to the installation of bulk service infrastructure, including water, wastewater treatment, stormwater, electricity, and internal roads. Planned capital expenditure is also anticipated in the smaller settlements of the Dwars River Valley, inclusive of Pniel and Kylemore. There is significant development foreseen in the abovementioned areas over the short-to-medium term as well as over longer term development. The spatial targeting depiction in Figure 5-2 of the planned capital demand, is in line with the planned strategies of Stellenbosch municipality.

Figure 5-2: 2021/2022 - 2030/2031 Total Planned Expenditure

5.2.2 Planned capital per Unit and Department

Table 5-2 and Figure 5-3 indicate Stellenbosch's Planned Capital Expenditure over the 10-year horizon expressed in Units. Infrastructure Services boasts 72% of the planned capital expenditure. A key strategic objective of the Cape Winelands District Municipality (CWDM) is to promote sustainable infrastructure services and a transport system that fosters social and economic opportunities. This prompts a continuous budget for the provision and upgrading of services throughout the Stellenbosch Municipal area. Figure 5-4 illustrate the Unit to Department split of projects within the Stellenbosch Municipality jurisdiction. Water and Wastewater Services: Water and Sanitation are collectively at 21%. Electrical Services is at 20% of the planned capital expenditure for the 10-year horizon and 12% is assigned to Transport Services. The Corporate Services planned capital expenditure amounts to 10% while Community and Protection Services as well as Planning and Economic Development are at 9% respectively.

Although there is a request for funding under Financial Services and Municipal Manager units, the overall planned capital expenditure is less than 1% of the total demand. This is logical, in that the projects that fall under this unit relate to operational costs and not capital expenditure. The planned capital expenditure in this instance is the provision of infrastructure-based and housing services. Long-term infrastructure capital planning is therefore imperative, in order to ensure sustainable development for the city as well as help direct the objectives in facilitating spatial transformation.

Table 5-2: 2021/2022 - 2030/2031 planned capital per unit

| Year | Community and Protection Services | Corporate Services | Financial Services | Infrastructure Services | Municipal Manager | Planning and Economic Development | Grand Total |

Figure 5-3: 2021/2022 - 2030/2031 planned capital per unit and department

Figure 5-4 2021/2022 - 2030/2031 planned capital per unit and department

a. Planned Capital Expenditure: Community and Protection Services

The departments that fall within the Community and Protection Services unit are inclusive of Environmental Management: Implementation and Urban Forestry, which make up a combined total of 23% of the planned capital demand budget. The Stellenbosch Municipality landscape boasts unique and critical biodiversity and agricultural areas, which provide life-supporting ecosystem services. The Parks and Cemeteries as well as Sports Grounds and Picnic Sites departments, each have a total of 21% of the planned capital budget. The provision of open spaces and community facilities is an integral part of developing strong communities as well as healthy environmental considerations within the municipality. With the likely population increase in Stellenbosch Municipality, the pressure on existing facilities will create a need for new social and community resources over the analysis period. According to the Stellenbosch IDP (2017-2022), a strategic focus area of the Stellenbosch Municipality is that of a “Safe Valley”, with the aim of developing and implementing situational crime prevention strategies. This aids in explaining the 17% planned capital budget in the Law Enforcement and Security department.

It is worth noting that the intense fluctuating nature of the Community and Protection Services’ planned total capital expenditure in the outer years (id est. 2027/28 – 2030/31) is indicative of the necessity to understand and planning for the long-term in order to respond adequately to the municipality’s needs.

Figure 5-5: 2021/22 – 2030/31 planned capital expenditure: Community and Protection Services

b. Planned Capital Expenditure: Corporate Services

The Corporate Services unit makes up 10% of the planned capital expenditure within the Stellenbosch Municipality. The Properties and Municipal Building Maintenance department's capital budget request is 84%, Information and Communications Technology (ICT) is at 15% and Strategic Corporate Services: General's planned capital demand is 1%. It is worth noting that the services provided within this unit are that of essential service delivery services. However, in order to have a complete view on capital expenditure, it is vital to understand the entire capital demand over the analysis period.

Figure 5-6: 2021/22 – 2030/31 planned capital expenditure: Corporate Services

Figure 5-7: 2021/22 – 2030/31 planned capital expenditure: Corporate Services

c. Planned Capital Expenditure: Infrastructure Services

The Electrical Services department makes up a total of 28% of the Infrastructure Services unit. The department shows a significant capital demand in the 2021/2022 MTREF, in comparison to other departments. Distell Limited's decision to relocate and consolidate many of its operations in Klapmuts is critical to commence municipal bulk service infrastructure, inclusive of electrical infrastructure service. There is 29% of the total planned capital expenditure that is geared towards Water and

Wastewater department, where 19% is aimed at the Water division and 10% at the Sanitation division. Stellenbosch municipality is faced with the challenge of an annual household growth rate exceeding the municipality's ability to provide piped water to households. There is also an increased socio-economic concern of water supply infrastructure being in disrepair as well as maintenance backlogs in poorer areas. The sanitation infrastructure is in a poor or very poor condition and according to the Stellenbosch IDP (2017-2022), the condition backlog is in the order of R250 million. It is for these reasons that serious remedial investment is required. Bulk water supply capital budget has been planned for the 2021/2022 and 2022/2023 financial years, in accordance to the IDP. This can also be seen in Table 5-4, where the capital budget in the abovementioned financial years are significantly higher for the Water and Wastewater department, in comparison to the other years in the 10-year analysis period. Stellenbosch municipality has also unveiled the new Wastewater Treatment Works, which is the biggest bulk infrastructure project in Stellenbosch to date. The municipality has begun with upgrades at several other wastewater treatment facilities, as this will assist in response to the growing population demands.

It is worth noting that that time of reporting, the infrastructure master plans for the municipality, particularly that of; Water, Stormwater and Electricity have last been drafted over 10-years ago. In order to have a sufficient capital planning budget, the redrafting of these plans is essential, as the current plans are inadequate in terms of providing clear direction as to the interventions required or further development to be undertaken. 16% of the planned capital demand is geared towards the Transport Planning department. A strategic goal of the Integrated Urban Development Framework (IUDF) is that of spatial integration, to forge new spatial forms in settlement, transport and social and economic areas. With regards to Stellenbosch Municipality, there is a need for improvement on integrated transport and a focus on Non-Motorised Transport (NMT) and public transport to ensure user convenience and less dependence on the private vehicle. Catalytic developments such as the Adam Tas Corridor and the Klappmuts Development are key drivers of a sustainable transport approach. The Roads and Stormwater department makes up a total of 11% of the capital budget planning. Annually, the municipality tries to respond to the various road infrastructure Stellenbosch IDP (2017-2022). The remainder of the departments in the Infrastructure Services unit, serve as a support. It is for this reason that the total capital demand of the departments is relatively low, in comparison to the abovementioned departments. However, in order to have a complete view on capital expenditure, it is vital to understand the entire capital demand for all departments, over the analysis period.

d. Planned Capital Expenditure: Planning and Economic Development

The Planning and Economic Development unit's total planned capital budget amounts to R 615 555 200, as indicated in Table 5-2. Linked to the Planning and Economic Development unit are objectives relating, but not limited to spatial planning and land-use management, community development, local economic development, housing and informal settlement upgrade and management. Hence, Table 5-5 shows that IHS: New Housing and Informal Settlements departments make up a total of the bulk of the unit's planned capital expenditure, at 66%. Stellenbosch municipality released their Draft Integrated Human Settlement Plan (IHSP) in 2018, in order to address the residential component of the municipality. This plan is closely linked to the municipal IDP and mSDF. The housing pipeline is premised on a 10-year horizon and serves as planning and budgeting tool for the implementation of Human Settlements initiatives. The period of 10 financial years provides a comprehensive list of housing projects and programmes with quantitative data on the projects' goals. It is for this reason that a steady spread of capital budget can be observed for the IHS departments, in Table 5-5. The capital demand in the Spatial Planning: Planning and Development department fluctuates over the analysis period. Departments with significantly lower capital demand in the analysis period are inclusive of the Administrative Support at 10% and Economic Development and Tourism at 7% of the total unit's demand. It is worth noting the Economic Development is not an explicit municipal function as defined in the Constitution of the republic of South Africa, 1996. Instead, it is an obligation imposed on local government in terms which determine amongst others that the objects of local government are to promote social and economic development to strive, within its financial and administrative capacity, to achieve the objects set out in The Constitution, amongst others through budgeting and planning processes to give priority to the basic needs of the community, and to promote the social and economic development of the community. Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction. However, initiatives within the department could be improved on a more longer-term planning horizon.

5.3 Planned capital: Asset action and type demand

National Treasury has implemented Integrated Financial Management and Internal Control System processes for local government. Key to this is the implementation of the Regulation of a Standard Chart of Accounts, commonly referred to as the Municipal Standard Chart of Accounts (mSCOA). mSCOA makes provision for a uniform and standardised financial transaction classification framework as per the Municipal Regulations and Standard Chart of Accounts as gazetted on 22 April 2014 (Gazette No 37577). The Municipal Chart of Accounts is classified within the segment as indicated in Figure 5-10.

Figure 5-10: mSCOA segment classification

Typically, within the Project Class, projects identified as “Infrastructure” and can be further classified as “engineering type” services as a secondary project class. These are inclusive of Electricity, Water and Sanitation as well as Roads and Storm-water type services. They display some or all of the following characteristics:

- Part of a system/ Network;
- Specific in nature and do not have alternative uses;
- Immovable, and;
- Subject to constraints at disposal.

Projects that fall under the “non-infrastructure” category are projects of a capital nature, identified by management. For example, procurement of a new bus fleet for use as urban transport. Housing and Human Settlements also fall within the “non-infrastructure” category.

The project Action and Sub-Action component of the Project Segment within mSCOA, is an umbrella term that includes a “New” or “Existing” project. Sub-actions for an “Existing” project include “Upgrade” or “Renewal”. For ease of reference the category descriptions are as follows:

- New: Capital projects to provide new assets to meet the current and future growth demands;
- Existing: Capital projects to provide an upgrade or renewal to asset in order to meet the current and future demands;
- Existing - Upgrade: Upgrade projects are generated according to the requirement for the replacement of a part of an asset component with the aim to increase the current capacity of the asset, and;
- Existing - Renewal: Replacing of existing infrastructure that has reached a Remaining Useful Life (RUL) of zero, while providing the same capacity and service.

Figure 5-11 and Table 5-6 indicate the asset type classification of the capital expenditure within the municipality. Figure 5-11: Planned capital expenditure per mSCOA action segment

Figure 5-11: Planned capital expenditure per mSCOA action segment

| 2027 / 2028 | R 64 922 862 | R 178 570 000 | R 272 239 013 | R 28 850 199 | R 544 582 074 |
| 2028 / 2029 | R 53 120 425 | R 168 385 644 | R 311 707 315 | R 32 797 229 | R 566 010 613 |
| 2029 / 2030 | R 40 492 140 | R 103 860 000 | R 238 306 182 | R 26 750 000 | R 409 408 322 |
| 2030 / 2031 | R 16 650 000 | R 67 320 000 | R 171 550 000 | R 950 000 | R 256 470 000 |
| Total | R 603 872 146 | R 1 898 032 871 | R 3 786 342 932 | R 295 000 541 | R 6 583 248 491 |
| % | 9% | 29% | 58% | 4% | 100% |

The proportion of New to Existing asset planned capital expenditure remains relatively constant throughout the 10-year analysis period. The majority of assets in terms of planned capital expenditure

is geared towards New assets at 58%. Characteristically, new assets should amount to between 10% to 20% of the municipality's capital expenditure demand. This contributes to an increasing rates base, but also reflects on the expansion of the urban footprint of Stellenbosch. The Upgrading of Existing assets is at 29% and Renewal of Existing assets is at 9%. This highlights the underlying dilemma regarding maintenance and upgrading backlogs within the municipality. Stellenbosch municipality is challenged in meeting the current demand for services and the further expansion of the current built footprint will dissipate the municipality's ability to maximise the use and productivity of existing infrastructure.

5.4 Planned capital expenditure: Discipline based analysis

The discipline-based analysis is a method of showing the types of assets to be developed or planned for. This enables a deduction on the planning intention of the municipality over the ten-year period. Please note that this is only considering sector plans and not necessarily the IDP needs of future years. Asset types in this instance has been compiled, based on the mSCOA project segment category per project. Please refer to Table 5-7, for the mSCOA type category and discipline-based relationship.

Table 5-7: mSCOA - Type Category and Discipline relationship

| Discipline | MSCOA - Type Category |
|------------------|---|
| Community Assets | Community Assets |
| Electricity | Electrical Infrastructure |
| Other | Biological or Cultivated Assets |
| Other | Computer Equipment |
| Other | Expanded Public Works Programme |
| Other | Furniture and Office Equipment |
| Other | Heritage Assets |
| Other | Indigent and Cultural Management and Services |
| Other | Information and Communication Infrastructure |
| Other | Intangible Assets |
| Other | Investment Properties |
| Other | Machinery and Equipment |
| Other | Meter Conversion and Replacement |
| Other | Other Assets |
| Other | Spatial Planning |
| Other | Strategic Management and Governance |
| Other | (blank) |
| Roads | Roads Infrastructure |
| Roads | Transport Assets |
| Sanitation | Sanitation Infrastructure |
| Solid Waste | Solid Waste Infrastructure |
| Stormwater | Storm water Infrastructure |
| Water Supply | Water Supply Infrastructure |

Assets related to the Other discipline totals 45% of the planned capital demand budget. This is inclusive of but not limited to Computer Equipment, Machinery and Equipment, Intangible Assets as well as Furniture and Office Equipment. These assets are not directly revenue generating. The infrastructure-based disciplines make up the other 45% of the capital demand. The Electricity discipline at 17%, Water Supply at 15%, Sanitation is at 7% and Roads and Solid Waste make are each at 3% of the budget respectively.

5.5 Planned capital expenditure: Asset type analysis

The planned capital expenditure analysis by mSCOA asset classification, is shown in Figure 5-13 and Table 5-9 respectively. From Figure 5-13 it is evident that Roads Infrastructure makes up three quarters of the total planned expenditure of the municipality. Electrical Infrastructure and Water Supply Infrastructure collectively make up a significant total planned capital expenditure within the municipality. It can be deduced that the majority of planning in terms of capital expenditure lends itself towards establishing infrastructure services and top structures, followed by supporting services

such as community assets. Collectively, the mix of services work towards a complex and integrated urban space and human settlements.

Figure 5-13: Planned capital expenditure – asset type and sub type classification

For a detailed view of the asset types planned for, as part of the planned capital expenditure, please refer to the summary sheet; Table 5-9. It is important to take note of the following:

- Each project that is being planned for by the municipality are classified in terms of the latest mSCOA – namely version 6.4, and;
- Some asset type strings, or in other words, asset type classifications, do not go down to the same level of categorisation – hence the term “lowest level – not applicable” on the sheet. This does not mean there is a lack of data, but rather a lack of a request or an option to capture more detail per project.

Table 5-9: Total planned capital expenditure per asset type captured on CP3

5.6 Inter-Governmental Project Pipeline

The IIIF chapter outlined the demand identified of capital projects within the Stellenbosch Municipality jurisdiction. It represented all capital projects that were identified across various sectors by various departments on the CP3 platform. In working towards an inter-governmental project pipeline, the Stellenbosch Collaboration Project Prioritisation and Performance Platform, was used in conjunction with the Western Cape Collaboration Project Prioritisation and Performance Platform.

Figure 5-14: Western Cape Collaboration Project Prioritisation and Performance Platform

The establishment of an inter-governmental pipeline enables the following objectives:

- Establishing an integrated public planning network;
- View different entities of government planned intervention spatially; and,
- Identify clear and obvious overlap or expenditure that is not in line with any other public entity's strategic vision or spatial targeting.

5.6.1 Planned capital expenditure: Provincial Analysis

It can be deduced from Figure 5-15 as well as Table 5-10 that there are existing and/or planned provincial projects that are within the Stellenbosch Municipality jurisdiction. These projects make up 3% of the total provincial projects and emanate from various departments within the municipality. A total of 45% of projects lie outside the Stellenbosch boundary and 52% of projects within the Western Cape CP3 system have not been mapped. The unmapped projects account for over half of the planned expenditure within the Western Cape province. In order to have sight of the province's spatial agenda and a clearer view of the intergovernmental projects, a re-evaluation of the spatial data completion of these projects is a requisite on the CP3 system.

5.6.2 Planned capital expenditure: Provincial analysis

The Figure 5-16 and Table 5-11 illustrate the Western Cape Province's projects, that are located with the Stellenbosch municipal boundary. It is important to note that the capital expenditure of these projects limited to only 2021/22_MTREF and do not show a 10-year capital demand. This shows that municipal-provincial institutional arrangements that seek to address joint planning challenges appear weak and intermittent. The departments with the most spending in the identified wards are the Transport, Education and Health departments. As part of the Provincial Sustainable Transport Programme (PSTP) the Western Cape Department of Transport and Public Works identified Stellenbosch as a priority Municipality for the development of a sustainable transport system. This is in line with the municipality's plans for the development of an efficient public transport system and infrastructure to improve non-motorised transport, as stated in the IDP. Health and Education are also a major contributor to the general quality of life in Stellenbosch municipality and the overall Western Cape province.

Figure 5-17: Total planned capital expenditure: Provincial analysis within Stellenbosch (spatial)

6 Long Term Financial Model Outcome

The objectives of this section is to:

- recommend strategies and policies that will maximise the probability of the municipality's financial sustainability into the future.
- forecasting future cash flows and affordable capital expenditure based on the municipality's historic performance and the environment in which it operates.

6.1 Financial model high-level outline

Figure 6-1: Financial Model Process

In forecasting the affordability envelope it is important to consider the four sources of capital funding available to the municipality, being:

- Capital grants from the fiscus, informed and affected by the National budget and macro-economic environment;
- Capital contributions by developers;
- Optimal and affordable external borrowings, informed by an analysis against financial sustainability parameters and ratios, including gearing levels, liquidity levels and the debt servicing capacity of the municipality; and

- Own cash resources of the municipality, from either cash-backed capital replacement reserves or annual residual cash generated by the municipality.

To recommend the most optimal funding mix between external borrowings and own cash resources, it is important to forecast the cash generated by the municipality (net cash for the year) in each of the next 10 years by considering the difference between:

- inflows from revenue (a function of quantity and price) and applying a reasonable collection rate and inflation expectations; and
- outflows of cash to staff and suppliers in the form of operating expenses of the municipality.

The net cash should first and foremost be utilised for servicing of existing loans and funding of cash backed reserves. Any free cash flow remaining after this would be available to service new debt, with the residual cash being utilised as part of own cash resources funding capital expenditure. These principles are depicted in the figure below.

Figure 6-2: Financial model Input

6.1.1 Financial Model High Level Outline

The long-term financial model used for this section of the Capital Expenditure Framework is populated with the latest information of Stellenbosch Local Municipality and is used to make a base case financial forecast. The figure below illustrates the outline of the model.

The model was adapted for the purpose of this update in that no large infrastructure projects have yet been assessed. Once the capital prioritisation exercise has been completed, we shall include

selected projects to determine the impact on the long-term financial position of the municipality. For now, the capital budget as presented in the MTREF¹⁰ was included and used to forecast an affordable future capex programme.

Figure 6-3: Financial model high level outline

6.1.2 Financial Model Detailed Elements

As a basis, the Long-Term Financial Model relies on the input of reliable data and reasonable assumptions. The data utilised and key assumptions in the model are mainly informed by an independent financial assessment, which entails:

- a historic demographic-, economic- and household infrastructure perspective, which was based on the latest available information as published in the latest Municipal Economic Review and Outlook (MERO);
- a historic financial analysis updated with the information captured in the municipality's draft annual financial statements of 30 June 2020;
- the 2019/20 to 2022/23 MTREF budget and associated worksheets data;
- the capital budget as presented in the 2021/2022 to 2023/2024 draft MTREF; and

¹⁰ MTREF 2021/2 – 2023/4 used was not approved at the time of preparing this report.

- information gathered from market research, National Treasury related circulars, other strategic documents of the municipality (including the IDP, master plans etc), from experience gained in the sector and other relevant sources.

The outcomes of the independent financial assessment and the key assumptions made are discussed in more detail below.

6.2 Updated Historic Financial Assessment

6.2.1 Financial Position

The financial position of Stellenbosch remained positive throughout the 4 years of assessment. As at 30 June 2020, Stellenbosch's balance sheet reflected a Total Asset position of R 6.4 billion, increasing from R 5.8 billion at the end of the 2017 financial year.

Stellenbosch's low gearing ratio of 17.7% and a positive debt coverage ratio (cash generated from operations/debt service) of 4.0 indicate that long-term interest-bearing liabilities levels are contained. Total interest-bearing liabilities were R 292.9 million at the end of 2020, decreasing from R 318.8 million in 2018/19.

Table 6-1: Interest Bearing vs Non-Interest-Bearing Liabilities R(m)

| | 2017
R(m) | 2018
R(m) | 2019
R(m) | 2020
R(m) |
|---------------------------------------|--------------|--------------|--------------|--------------|
| Short Term Provisions | 48,45 | 50,68 | 62,02 | 83,17 |
| LT Liabilities (Interest Bearing) | 173,30 | 158,80 | 292,93 | 266,18 |

| Short Term Portion of Loans | 13,08 | 14,50 | 25,87 | 26,75 |
| Total Interest-Bearing Liabilities | 186,39 | 173,30 | 318,80 | 292,93 |

Figure 6-4: Interest Bearing vs Non Interest-Bearing Liabilities

a. Current Liabilities

Current Liabilities decreased to R 407.4 million in 2020 from R435.5 million in 2019 (6% decrease). The decrease in unspent conditional grants of 85% (between 2016/17 and 2019/20) was the main contributing factor to the decrease in current liabilities.

Consumer deposits had increased at a consistent rate over the prior year (4%).

Table 6-2: Current Liabilities by Item R(m)

| | 2017
R(m) | 2018
R(m) | 2019
R(m) | 2020
R(m) |
|-----------------------------|--------------|--------------|--------------|--------------|
| Consumer Deposits | 14,58 | 15,67 | 17,08 | 17,78 |
| Short Term Portion of Loans | 13,08 | 14,50 | 25,87 | 26,75 |
| Unspent Conditional Grants | 74,44 | 100,32 | 59,05 | 8,86 |
| Short Term Provisions | 48,45 | 50,68 | 62,02 | 83,17 |
| Creditors | 282,09 | 243,32 | 271,46 | 270,82 |

Figure 6-5: Current Liabilities in Total

b. Current Assets

Current cash had decreased significantly from the prior year mainly due to the increase in capital expenditure of R612 million of which 50.8% came from own funding. In order to meet this capital funding requirement, the municipality had to reduce short term investments with R 91.5 million as well as cash with R 58.3 million.

The reduction in short term investments have been on a reducing trend since 2016/17 to 2019/20.

The decrease in consumer debtors between 2018/19 and 2019/20 of R 30.9 million relates to a significant decrease in the Electricity accrual from R67 million in 2018/19 to R13.5 million in 2019/20. The negative variance in the accrual is due to the cut-off for meter readings at the end of June. A further contributor to the decrease was bad debt written off during 2019/20 of R 123.2 million.

Table 6-3: Current Assets by Item

| Total Cash and Cash Equivalents | 621,74 | 526,30 | 567,65 | 417,84 |

Figure 6-7: Current Assets in Total

c. Liquidity Ratio

Although in a decline, the municipality remains in a healthy liquidity position of 1.74:1 as at the end of 2019/20 and is consistent with the 2018/19 trend. The liquidity position remains healthy at 1.59:1 when debtors older than 30 days are excluded.

Table 6-5: Liquidity Ratio (%)

| Current Assets (Less Debtors>30 days): Current Liabilities | 2,05 | 1,99 | 2,01 | 1,59 |

Figure 6-8: Liquidity Ratio

d. Net Consumer Debtors

Net Consumer Debtors decreased to R 182.5 million in 2019/20, due to bad debts written off during 2018/19 (R 105 million) and 2019/20 (R 123 million).

Figure 6-9: Gross Consumer Debtors vs. net Consumer Debtors

e. Debtors Age Profile

The Debtors Age Profile for the 2019/20 financial year indicates that 63% of Gross Consumer Debtors being older than 90 days. The provision does not sufficiently cover debtors older than 90 days as prescribed by National Treasury. Current debtors represent 27% of the debtor's book. It is anticipated that the reduction in economic activity due to the lockdown imposed as a result of the COVID-19 pandemic will have a severe negative impact on the Stellenbosch Municipal's economy and as a result a significant impact on the citizens ability to pay for services.

Table 6-6: Consumer Debtors by Age Analysis

Figure 6-10: Consumer Debtors by Age Analysis

f. Consumer Debtors by type

Net consumer debtors have a declining trend from the 2016/17 financial year (R 233 million) to the 2019/20 financial year (R 183 million). Debtors relating to electricity are still the major contributor to debtors, as expected, with water and rates also significant contributors to the overall balance.

Figure 6-11: Consumer Debtors by Type

6.2.2 Financial Performance

Stellenbosch realised an Accounting Surplus of R 81.15 million in 2019/20, decreasing from R 121 million at the end of the 2018/19 financial year. The decrease in accounting surplus was mainly driven by an increase in total operating expenditure of R 153 million (9%), above the R113 million (6%) increase in total income.

When capital grants are excluded from total income, the operating surplus is eroded and an operating loss of R43.20 million is reflected in the 2019/20 financial year.

Figure 6-12: Analysis of Surplus

The Municipality experienced above inflation revenue growth for the 2019/20 year of 7.7%. Income from Electricity Services and Property Rates remained the biggest drivers of Total Operating Income, with a combined contribution of 58%. Income from Water Services (11%) and Equitable Share (9%) are also key contributors.

Water services revenue increased by 16.5% from the prior year due to the lifting of the water restrictions.

Figure 6-14: Cash Generated from Operations / Own Source Revenue

Staff Costs, Electricity Bulk Purchases and Depreciation represent 66% of Total Operating Expenses. The annual increases in staff costs were in line with inflation, with an average increase of 5% in the past 3 years.

Electricity Services, represents the second largest expense after staff costs. Over the short term, expected steep increases in bulk electricity prices may narrow historic margins, lead to increased electricity theft and cause both businesses and higher income households to consider alternative energy sources. This will further reduce electricity sales. The increase in Water Services from the 2017/18 to the 2018/19 financial year of R 14.5 million was as a result of the lifting of water restrictions post the drought experienced in the Western Cape. Water services remained consistent from 2018/19 to 2019/20 with only a 1% increase.

Figure 6-15: Contribution per Expense Item

Interest received from external investments exceeded interest paid on external borrowings throughout the assessment period, resulting in R 9.4 million net interest inflow during the 2019/20 financial year. The decrease in interest received from the 2018/19 to the 2019/20 financial year was due to a decrease in Short-term Investments. The increase of 82% interest paid indicates that there is an increase in utilisation of external borrowings.

Stellenbosch Local Municipality has recorded steady growth in both total income and total expenditure over the 4-year period under review. Total operating income increased to R 1.74 billion against a total operating expenditure of R 1.66 billion.

The gap between total income and total operating expenditure has notably decreased since 2017/18, resulting in income to somewhat stagnate and operating expenditure increased.

6.2.3 Cash Flow and Capital Expenditure

The financial performance from the prior years allows the municipality to remain in a strong position to maintain and increase capital expenditure with a timeous investment in capital asset replacement.

Total capital expenditure has been increasing from 2016/17 throughout 2019/20. However, total operating income had been increasing by a greater marginal increase than capital expenditure, hence showing stability in the Capital Funding Mix. The Capital Funding Mix of Stellenbosch, in previous periods has been reliant on the municipality's own Cash Reserves. Noteworthy is that external borrowings have been utilised in the period of review.

| Unencumbered Cash | 622 | 526 | 568 | 418 |

Figure 6-21: Minimum Liquidity Required

Total cash and cash equivalents decreased from R 621.7 million in 2017 to R 417.8 million in 2020. This level of cash insufficiently covers the minimum liquidity requirements which includes Short Term Provisions of R 83.2 million, Unspent Conditional Grants and Receipts of R 8.8 million, Cash-backed reserves of R 259.6 million and Working capital provision (including one month's operational expenditure) of R 112.2 million. The cash shortfall was R (46.04) million at the end of the 2020 financial year, decreased from the highest level of R 224.5 million in 2017.

The cash coverage ratio (including working capital) remained positive at 3.4 as at the end of the 2020 financial year.

6.3 Outcome of the Independent Financial Assessment

6.3.1 Statement of financial position assumptions

The following assumptions have been made to arrive at the parameters used to forecast beyond the Medium-Term Revenue and Expenditure Framework (MTREF):

- The payment ratio for property rates, service charges and other debtors has been set at 95% for the period 2020/21 to 2029/31. This will only be achieved if a concerted effort is made to collect all collectible outstanding debtors and the debtor database is cleansed to ensure that all data is verified and correct. Stellenbosch Local Municipality (SLM) needs to collect debtors far more efficiently and effectively with information that is accurate and current and by so doing increase revenue levels to allow for increased borrowing, capital investment and infrastructure management. Going forward all future operating budgets should provide for the correct amount for debt impairment.
- The creditor payment period has been set at 30 days, which is in terms of the Municipal Finance Management Act (MFMA), Section 65(2)(e) which states that creditors should be paid within 30 days of receiving the relevant invoice or statement.
- Depreciation of assets has been set at 5% of the total of Property, Plant and Equipment (PPE) for the period 2020/21 to 2029/31. This has been set slightly higher than the trend up to 2019/20.

6.3.2 Statement of financial performance assumptions

The following assumptions have been made to arrive at the parameters used to forecast beyond the Medium-Term Revenue and Expenditure Framework (MTREF):

- CPIX of 3.3% for the year 2020/21, 3.9% for 2021/22, 4.2% for 2022/23 and 4.4% for 2023/24 to 2029/31. The base being as per National Treasury, MFMA Circular No. 99, Municipal Budget Circular for the 2020/21 MTREF.
- Employee costs have been escalated by 3.3% for the years 2020/21, 3.9% for 2021/22, 4.2% for 2022/23 and 4.4% for the period 2023/24 to 2029/31. This assumption however could change depending on agreements made at the South African Local Government Bargaining municipality.
- Bulk purchases have been escalated by 9.5% for 2020/21, 6.4% for the period 2021/22, 6.6% for 2022/23 and 4.4% for the period 2023/24 to 2029/31.
- Repairs and maintenance have been escalated in line with CPIX, as indicated above, for the years 2020/21 to 2029/31.
- Property rates have been escalated by 10.1% for the year 2020/21 and 6.5% for the years 2021/22 to 2022/23 and 4.4% from 2023/24 to 2029/31.
- Service charges have been escalated by 5.0% for the year 2020/21, 6.6% for 2021/22, 7.3% for 2022/23 and 4.4% for the years 2023/24 to 2029/31, with the latter years being in line with the CPIX assumptions.
- In respect of rates and service charges the household growth has been estimated to increase by 1.8% per year for the period 2020/21 to 2029/31.
- Economic growth is predicted to be 0.5% for 2020/21, 0.6% for 2021/22, 0.7% for 2022/23, 0.8% for 2023/24, 0.9% for 2024/25 and 1.0% for the years 2025/26 to 2029/31.

6.3.3 Capital budget and assumptions

The following assumptions have been made to arrive at the parameters used to forecast beyond the Medium-Term Revenue and Expenditure Framework (MTREF):

- The capital budget has been decreased from R 460.6 mil in 2020/21 to R423.4 mil in 2029/31 a decrease of 9% over the projected period.
- The financing mix for the period 2020/21 to 2022/23 was set inline with MTREF and 2023/24 to 2029/31 is in the region of 23.0% Government Grants, 40% Own Funding and 37% External Borrowings.

6.4 Impact of assumptions and recommendations

The following key findings are based on a review of the audited financial statements for the 2017/18 and 2018/19 financial years, unaudited financial statements for 2019/20, budget for 2020/21 and the projections from 2021/22 to 2029/31, using the assumptions in Section 6.4.1 above. The results are reflected in the tables set out in Annexures A to D below which projects the long-term financial strategy from the 2020/21 to the 2029/31 financial years. The analysis is done using the Ratios and Norms as set out in National Treasury MFMA Circular No. 71.

Capital expenditure is projected to decrease from 24.6% of total expenditure in 2018/19 to 12.2% in 2029/31. The norm in terms of Circular 71 is 10 to 20%, so SLM with the reduction of capital expenditure falls into the range of the norm in the period 2020/21 through to 2029/31. The mix of the financing of capital expenditure from 2020/21 to 2029/31 is sound with a good mix between own funding, borrowings and grants.

Repairs and maintenance actual expenditure for the period 2017/18 to 2019/20 was in the region of 1.0% of total assets, while the norm is 8%. In the projected long-term financial strategy from 2020/21 to 2029/31 the ratio increases from 1.6% to 2.0%. It is necessary to make additional cash available to be allocated to repairs and maintenance. If further cash is not found to undertake repairs and maintenance the services to the communities could deteriorate, which will result in the non-payment of debtors and/ or protests. The planned spend on repairs and maintenance needs to be monitored to ensure assets are kept in a sound condition to ensure efficient and effective services are provided to the citizens of SLM.

Debtor management and the collection rate of debtors in 2017/18 was 96.8% and this decreased to 93.5% in 2019/20 while the norm is 95%. A collection rate of 95% was used for the purpose of the long-term financial strategy. This is the most important initiative to sustain the positive cash flow of SLM, as if the debtors are not collected there will be less cash to undertake the delivery of an efficient and effective service to the communities of SLM. Revenue collection strategies will need to be maintained to achieve the projected payment ratio slightly above the norm for the period from 2020/21 to 2029/31 (ranging between 95.1% and 95.2%).

Cash to cost coverage for the period 2020/21 to 2029/31 fluctuates between 1.8 and 5.1 months and generally is in an upward trend. The good positive cash flow experienced in the past needs to be maintained to achieve the projected cash to cost coverage ratios mentioned above.

Liability management ratios which relate to interest and redemption payments and total borrowings are below the norms, however the Capital Cost ratio remains low due to the low gearing but increase throughout the 10 year forecast period to 7.1% which is within the norm. SLM with its projected capital budget which will decrease over the projected period is on the right track to getting the total

borrowings ratio within the norm of 45% by 2029/31. Capital expenditure however should be carefully considered and be in line with the Integrated Development Plan (IDP). Where possible capital expenditure should be channeled towards revenue generating infrastructure and PPE. The assumption as regards projected new borrows is an interest rate of 9.7% over a period of 10 years.

Electricity distribution losses is set at 8% from 2020/21 to 2029/31 and are within the norm of 7 to 10%. Water distribution losses were set at 23% in line with the previous trend and within the norm of 15-30%. SLM should continue maintaining its infrastructure as they have in the past to ensure they achieve the projected figures. However, the repairs and maintenance budgeted figures which are below the norm could impact negatively on the distribution loss projected figures if the required maintenance is not carried out to the electricity and water infrastructure.

Creditors' payment period is set at 30 days during the period 2020/21 to 2029/31. This is inline with the MFMA, Section 65(2)(e) which states that creditors should be paid within 30 days of receiving the relevant invoice or statement. The historical creditors' payment ratio was above the 30 days norm. We reduced short term investments to fund the cash flow required to bring the creditors' payment ratio back to the 30 days norm. Provision should be made in future budgets or surplus funds should be utilised to provide funds to make sure all creditors are paid within 30 days. This is more than likely due to the accrual of creditors at the end of the financial year. However, where at all possible creditors should be paid within 30 days in compliance with the MFMA.

Irregular expenditure is high and has an increasing trend as per the below table. There were no Fruitless and Wasteful and Unauthorised expenditure recorded.

Table 5: Irregular, Fruitless and Wasteful and Unauthorised Expenditure

| Year | Irregular Expenditure
R. | Fruitless and Wasteful
Expenditure
R. | Unauthorised Expenditure
Balance
R. |
|---------|-----------------------------|---|---|
| 2017/18 | R 34 736 802 | - | - |
| 2018/19 | R 39 223 925 | - | - |
| 2019/20 | R 63 548 476 | - | - |

These numbers should be reduced to ensure there are funds available for the provision of services to the communities serviced by SLM.

Contracted services fluctuate from 12.9% in 2020/21 to 11.9% in 2029/31 and this is well above the norm of 2 to 5%. All contracts should be scrutinised to ascertain whether the service is required and if so whether SLM is getting value for money or if the service could be done by SLM staff. If it is established that the contracted service is not required, the contract should be terminated.

Staff remuneration is within the norm of 25 to 40% of total operating expenditure and was 30.1% in 2019/20. The projections show that for the 10-year period, it stays within the norm fluctuating between 31.6% to 32.6%. However, this should be considered along with contracted services. The organogram should be assessed to evaluate whether all the posts are relevant or new posts should be added to ensure SLM has the human resources to provide efficient and effective services to its communities.

As regards grant dependency for both the capital and operating budgets SLM is not overly dependent on grants with the capital budget being in the region of 73.9% to 76.8% own funded while the operating budget is own funded in the 85.2% to 86.9% region.

The budget implementation indicators for both capital and operating budgets for the period 2017/18 to 2019/20 are all above 85% which is a good indicator even though the norm is 95 to 100%. However, the budget implementation indicators for the electricity, water, refuse, sanitation and waste water

show high percentages for the surpluses for these services. This is due to all expenditure not being matched to the revenue which is easily identifiable. Going forward and with the introduction of mSCOA this anomaly should be rectified.

The SLM has for the years 2017/18 to 2019/20 had an operating surplus and for the projected period it is estimated that each year will achieve a surplus. This indicates good financial management which should continue to ensure the financial viability of SLM.

The financial situation of SLM is healthy however the matters reflected under Section 6.6 should be considered which could enhance the services supplied throughout the municipal area and could also enhance the liquidity of SLM.

6.5 Recommendations as regards areas of concern that may require implementation

The impact of the action points below on the long-term financial strategy of the Municipality by the Management of SLM could have a positive impact on the projected financial well-being of SLM, if implemented. The goal is to improve the financial management of SLM to enhance the required services to its communities.

6.5.1 Creditor and expenditure management

Spending on repairs and maintenance is very low and if necessary, should be increased annually to the stage where the amount spent is equal to or greater than the norm of 8% of PPE. Budget savings need to be found to ensure this happens.

Calculated creditor payment days for the historical financial years are in the region of 60 days. Liquidity needs to be improved or surplus cash used to ensure payment within 30 days in compliance with the MFMA in this regard.

A cost-benefit analysis needs to be performed on contracted services. Each service agreement for contractor services should be assessed and where it is considered that the agreement is not beneficial to SLM the agreement should be terminated with the view to reducing operating expenditure. If the service is necessary and can be done in-house the contract should be terminated.

Supply Chain Management - To minimise irregular expenditure, supply chain management processes should be compliant with legislation, regulations and policies. The necessary policies and standard operating procedures should be put in place, implemented and monitored. The regularisation of the irregular expenditure should take place and if necessary, steps should be taken to reclaim any monies which might be due to SLM.

6.5.2 Capital expenditure management

The capital budget needs to be aligned to SLMs infrastructure needs and aligned to the IDP and where possible capital expenditure should be channeled towards revenue generating infrastructure and PPE.

To obtain a holistic and credible long-term financial strategy the above recommendations need to be implemented, if necessary, by SLM with workable solutions to any challenges that may exist and the outcomes should provide sufficient funds to provide efficient and effective services to the communities served by SLM.

6.5.3 Strengths

- Strong balance sheet & liquidity position; low gearing;
- Strong cashflows from own operations and limited reliance on transfers from national and provincial treasuries;
- Diversified economy with educational infrastructure;
- Aggressive addressing of backlogs; and
- High-quality financial and institutional governance evidenced by among others, clean audits.

6.5.4 Weaknesses

- Own cash reserves decreasing due to heavy reliance on own cash resources to fund its capital programme and the low reliance on utilisation of external borrowing;
- Urban limits & difficulties to densify;
- Repairs and Maintenance – below National Treasury Norm;
- Creditors payment period above the National Treasury Norm; and
- High levels of unspent conditional grants since 2017.

6.6 Key Assumptions

The following key assumptions were used in the Long-Term Financial Model:

Table 6-20: Key assumptions used in the LTFM

| Assumption Analyses Report | | Assumptions – Percentage Increase/ (Decrease) per year | | | | | | | | | | | Commentary |
|----------------------------|--|--|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---|
| | | 2020/21 | 2021/22 | 2022/23 | 2023/24 | 2024/25 | 2025/26 | 2026/27 | 2027/28 | 2028/29 | 2029/30 | 2030/31 | |
| 1 | CPIX | 3.3% | 3.9% | 4.2% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | CPIX of 3.3% for the year 2020/21, 3.9% for 2021/22, 4.2% for 2022/23 and 4.4% for 2023/24 to 2030/31. The base being as per National Treasury, MFMA Circular No. 99, Municipal Budget Circular for the 2020/21 MTREF |
| 2 | Employee Cost Escalation | 3.3% | 3.9% | 4.2% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | 4.4% | Employee costs have been escalated by 3.3% for the years 2020/21, 3.9% for 2021/22, 4.2% for 2022/23 and 4.4% for the period 2023/24 to 2030/31. This assumption however could change depending on agreements made at the South African Local Government Bargaining municipality. |

6.7 Future Revenues

6.7.1 Municipal Area GDPR and COVID-19 Impact

An increase in real GDP per capita, i.e. GDP per person, is experienced only if the real economic growth rate exceeds the population growth rate. Even though real GDP per capita reflects changes in the overall wellbeing of the population, not everyone within an economy will earn the same amount of money as estimated by the real GDP per capita indicator. At R62'000 in 2018, Stellenbosch's real GDP per capita is well above that of the Cape Winelands District's figure of R50'000 as well as that of the Western Cape.¹¹

GDPR PER CAPITA GROWTH, Cape Winelands District, 2009 – 2019

Source: Quantec Research, 2020 (e denotes estimate)

It is anticipated that the reduction in economic activity due to the lockdown imposed as a result of the COVID-19 pandemic will have a severe negative impact on the Stellenbosch municipal economy. The GDPR is expected to experience the highest contraction in the Cape Winelands District (7.6 per cent) in 2020 but is expected to recover somewhat by 4.3 per cent in 2021.¹²

¹¹ Western Cape Government: Socio Economic Profile https://www.westerncape.gov.za/provincial-treasury/files/atoms/files/SEP-LG%202020%20-%20WC024%20Stellenbosch%20Municipality_0.pdf

¹² Western Cape Government: Municipal Economic Review and Outlook 2020 [https://www.westerncape.gov.za/provincial-treasury/files/atoms/files/Mero%202020%20Single%20pages%20\(20%20Oct\)_compressed2.pdf](https://www.westerncape.gov.za/provincial-treasury/files/atoms/files/Mero%202020%20Single%20pages%20(20%20Oct)_compressed2.pdf)

The leading contributor to GDP in the Stellenbosch municipal area is the finance, insurance, real estate and business services sector, with a contribution of 21.6 per cent in 2018. Other notable contributors to GDP in the region are the wholesale and retail trade, catering and accommodation sector (20.7 per cent) and the manufacturing sector (16.4 per cent). Despite its small contribution to GDP (5.6 per cent), the agriculture, forestry and fishing sector is an important driver of the Stellenbosch municipal area's economy, as agro-processing accounts for a large proportion of the manufacturing sector's activities.

6.7.2 Municipal Revenues

Over the forecast period the municipality generates positive cash flow from operations and maintains a positive Accounting Surplus. The Total Operating Surplus (excluding grants) is negative up to 2031.

Improvements in revenue are ascribed to (i) tariff increases (ii) increased sales and (iii) additional revenue sources and importantly, (iv) sustained revenue-collection rates of 95%. We forecast sustained Operating Surpluses throughout the 10-year period.

The Stellenbosch municipal region is not immune to national and provincial socio-economic conditions. The Stellenbosch municipal area had the highest Gini coefficient (0.613) in 2019 compared with the CWD and municipal areas within the CWD. Although the Gini coefficient in the Stellenbosch municipal area was high in 2019, the income inequality in the municipal area improved from 2013 (0.619). While the Gini coefficient of the Stellenbosch municipal area decreased in 2016, there was persistent growth of the Gini coefficient between 2013 and 2019 in all the other municipal areas. The persistent growth is indicative of how the municipal areas have become more unequal over the years and indicative of increasingly unequal distribution of income towards the higher-income individuals.

GINI COEFFICIENTS, Cape Winelands District, 2013 - 2019

6.8 Affordable Future Capital Investment

The total affordable capital expenditure for the 10-year planning period amounts to R 4 087 million. This 10-year amount was calculated by the Long-Term Financial Model:

- by relying on and maintaining the capital programme and funding mix over the MTREF period up to 2020/21 (3 years), as contained in the latest approved MTREF budget of Stellenbosch; and
- forecasting the optimal capital programme and funding mix, taking several indicators and parameters into account, for the next 7 years of the forecast period.

The annual affordable envelope, which entails the forecast capital expenditure and proposed funding mix per annum is dealt with in detail in the next section of this report.

6.8.1 MTREF Capital Funding Mix

Stellenbosch Municipality's MTREF budget 2020/21 – 2022/23 expects a capital budget amounting to R1.293 billion and funded as follows:

Table 6-21: 3-Year MTREF Funding Mix

| | Total
R(m) | 2020/21
R(m) | 2021/22
R(m) | 2022/23
R(m) |
|--------------|------------------|-----------------|-----------------|-----------------|
| Loans | 444 000 | 144 000 | 140 000 | 160 000 |
| Cash | 533 386 | 196 453 | 164 427 | 172 506 |
| Grants | 316 123 | 120 126 | 95 295 | 100 702 |
| Total | 1 293 509 | 460 579 | 399 722 | 433 208 |

The Long-Term Financial Model accommodated the increased Borrowing of R444m, Internally Generated Funding of R533 m and Capital Grants of R316m for the MTREF period of 3 years to 2022/23 and allowed the model to calculate the future funding mix. Here we note the potential impact of the strong liquidity position on capital expenditure. Following sustained increases in the capital expenditure since 2020, this now declines over the MTREF-period to about R433m in 2022/23. To keep pace with anticipated population growth and ongoing investment in new infrastructure as well as upgrading and renewal projects, we increased the capital expenditure by 1.5% per year from 2022/23 over the planning period. The municipality has both sufficient own resources and capacity to borrow, allowing it to accelerate capital investment, despite the decreased grant transfers. (Fluctuations in grant amounts due to the allocation of housing grants for top structures and for infrastructure in different years.)

The capital expenditure budget of the municipality is financially feasible. Due to the healthy liquidity position, the budgeted capital expenditure can be implemented. Cash available is sufficient to cover the minimum recommended liquidity level to cater for unspent conditional grants, short term provisions, and working capital. These findings are illustrated in the graphs below.

The municipality mainly relies on own reserves to fund the capital expenditure. The strong financial and liquidity position of the municipality allows it to accelerate the capital investment programmes which can be supported by borrowing.

6.8.2 10-Year Capital Funding Mix

Table 6-22: 10-Year Capital Funding Mix

| Source | Rm | % |
|------------------------------------|-------|-----|
| Public & Developers' Contributions | 0 | 0% |
| Capital Grants | 966 | 24% |
| Financing | 1 476 | 36% |

| Source | Rm | % |
|-------------------------|-------|------|
| Cash Reserves and Funds | 1 646 | 40% |
| Cash Shortfall | 0 | 0% |
| Capital Expenditure | 4 087 | 100% |

Due to the prevailing national fiscal constraint, reliance on grant funding in future is probably doubtful and the amount of capital transfers in this latest estimate, when compared to previous estimates, has declined.

A balanced funding mix, incorporating a conservative level of external borrowing, will preserve Stellenbosch's own cash resources and will improve long term financial sustainability. Equally important is the average duration at which external borrowing are obtained in the market and the impact that this may have on liquidity and gearing levels.

6.9 Scenarios

In the scenario analysis we developed two basic scenarios to compare to the Base Case. The Base Case reflects the model forecast. The Upside and Downside Scenarios were developed by adjusting (upwards and downwards, respectively) 5 variables as follows:

Table 6-23: Variables assessed in a Scenario Analysis

| Variable | Base Case | Upside | Downside |
|---|----------------|--------|----------|
| | % of Base Case | | |
| Employee related cost escalation (Margin above Base Case) | 100% | 80% | 120% |
| Bulk cost escalation (Margin above Base Case) | 100% | 80% | 120% |
| Bad Debt Written Off (% of Base Case) | 100% | 80% | 120% |
| Property Rates escalation (Margin above Base Case) | 100% | 120% | 80% |
| Services Tariff escalation (Margin above Base Case) | 100% | 120% | 80% |

The impact of these adjustments was measured on 10 selected financial metrics for the R 3 999 million capital expenditure between 2021/22 and 2030/31. We noted the following outcomes:

- Average Annual Increase in Revenue differs only marginally on the upside but has a severe impact on the downside;
- The impact on percentage increases in Expenditure is marginally on both scenarios;
- Cash generated by Operations ranges between –R 2 996 million and R 5 312 million;
- The cash position after 10 years remains very healthy at R 919 million in the base case. In the down-side case this amount is in deficit of R 233 million; and
- The great variation of outcome for a realistic combination of input variables, demonstrates the need to manage the municipality's finances with care and discipline.

Table 6-24: Outcome of Scenario Analysis

| Outcome | Base Case | Upside | Down Side |
|--|-----------|---------|-----------|
| Average annual % increase in Revenue | 4.7% | 5.3% | 4.2% |
| Average annual % increase in Expenditure | 4.8% | 4.3% | 5.3% |
| Accounting Surplus accumulated during Planning Period (Rm) | R 1 415 | R 2 663 | R 168 |
| Cash generated by Operations during Planning Period (Rm) | R 4 332 | R 5 312 | R 2 996 |
| Average annual increase in Gross Consumer Debtors | 10.7% | 10.9% | 10.5% |
| Capital investment programme during Planning Period (Rm) | R 3 999 | R 3 999 | R 3 999 |

| Outcome | Base Case | Upside | Down Side |
|--|-----------|---------|-----------|
| External Loan Financing during Planning Period (Rm) | R 1 488 | R 1 632 | R 1 843 |
| Cash and Cash Equivalents at the end of the Planning Period (Rm) | R 919 | R 2 078 | R (233) |
| Gearing at the end of the Planning Period | 27.3% | 22.5% | 38.5% |
| Debt Coverage | 2.6 | 3.9 | 1.2 |

6.10 Ratio Analysis

The Base Case forecast ratios are presented below. The model provides comfort that the municipality is sustainable in future - on condition that it operates within the assumed benchmarks set in the financial plan.

6.11 Outcome of the Long Term Financial Model

6.11.1 The socio-economic base and future revenue

- Strong economic base and diversified economy, but rapid increase in migration to the municipal area placing pressure on existing infrastructure;
- However – national conditions also impact on the municipality – with the negative impact of COVID-19 on the global economy only moderate growth forecast over the forecast period;
- A key structural weakness can now be identified: as economic growth rates slow, which might have a negative on revenue collection to extract additional revenue for ever-growing needs;
- To pursue and sustain progressive / redistributive / pro-poor policies – it is essential that the economic base expands and critically, job creation (especially at entry-level) accelerates; and
- Over the forecast period – we still see scope for tariff increases (broadly aligned with CPI) and for more progressive tariff structures.

6.11.2 Capital investment

- Stellenbosch embarked on an aggressive capex programme since 2014 – largely funded from own resources but reduced capital expenditure from R612m in 2019/20 to R381m in 2023/24 in the latest MTREF Capital Budget;
- As the population continues to increase, the municipality needs to deal with normalising historic settlement patterns to accommodate new migrants and improve access to and mobility within the municipal area;
- Although the total budgeted investment returns to the R388 million p.a. level over the MTREF period, we envisage a moderate growth-rate in capex over the forecast period. This is to ensure capital investment keeps pace with population growth and continues to address backlogs;
- We have introduced a conservative borrowing programme which remains well within the prudential limits (Gearing Ratio of 23.9% at the end of the MTREF budget and 29.8% at the end of the 10-year forecast);
- More spatial and economic modelling is required for a comprehensive perspective on the long-term corridor development and spatial settlement patterns in the municipal area;
- Significant "high-impact projects" can be modelled to determine long-term financial impact of such projects on the financial position of the municipality; and
- Despite continued use of own resources and a depletion of cash reserves, the liquidity metrics remain positive over the forecast period.

6.11.3 Scenario analysis

- The generic scenario analysis forecast reasonable logical outcomes; and
- One aspect worth noting is the gearing ratio which is 24.7% and 40.5% for the up- and downside scenarios respectively.

6.12 Projected Financial Statements

7 Affordability envelope

The objective of this section is to:

- determine the affordable future capital expenditure and proposed capital funding mix (affordability envelope) of the municipality over the next 10 years.

The affordability envelope, or otherwise stated, the funding envelope is the result of the Long Term Financial Strategy. The aim of the Long Term Financial Model is to define a set of parameters to which the municipality can roll out capital expenditure projects. The key parameter of interest for the budget scenario process to continue is the total capital expenditure that is deemed as affordable per year.

The purpose of this section is therefore to take the results of the Long Term Financial Strategy and to indicate what should be actively used to guide capital investment through the budget scenario template – better defined as the total available capital expenditure budget per year.

7.1 A Sustainable Funding Mix

The annual funding mix proposed by the model, given the approved budget and optimal forecast thereafter, is illustrated by the graph below.

Figure 7-1: Distribution of Future Funding

7.1.1 Liquidity and Capital Replacement Reserve

For purposes of the projections in this report the minimum required liquidity level caters for unspent conditional grants, reserves, short term provisions, consumer deposits and 1 month's working capital. The municipality exceeds the minimum liquidity requirement over the MTREF-period and throughout the planning period.

Noteworthy though, is the decrease in liquidity over the MTREF period. Sufficient cash remains available to fund capital projects required with further potential for borrowing. The municipal bank balance recovers above the minimum required in later years Capital Expenditure Framework period.

Figure 7-2: Bank balance vs Minimum Liquidity Required Proposed Cash Backed Reserves

Figure 7-3: Bank balance vs Minimum Liquidity Required

7.1.2 Gearing

The ratio of Long-Term Interest-Bearing Liabilities to Income is illustrated in the graph below. The Stellenbosch Local Municipality has a debt policy which sets the gearing-level to 35%. The model forecast that gearing increases from 2023/24 and peaks at 27.3% during 2030/31, but never breaches this level. This level of gearing is within both its policy and National Treasury guidelines.

Figure 7-4: Gearing

Based on the forecast External Financing requirement, the Debt Service to Total Expense Ratio never breaches the 8% benchmark over the planning period.

Figure 7-5: Debt Service tot Total Expense Ratio

The amount of annual external financing is estimated to be distributed as follows:

Figure 7-6: Estimate of Future External Financing

7.1.3 Capital Need and Affordability Envelope by Year

A summary of the capital need and affordability envelope by year is presented in the table below:

Table 7-1: Capex need

| Year | Total Planned Capital Expenditure | Total Planned Capital Expenditure % |
|--------------|-----------------------------------|-------------------------------------|
| 2021 / 2022 | R 1 471 328 211 | 22,35% |
| 2022 / 2023 | R 909 681 550 | 13,82% |
| 2023 / 2024 | R 720 959 363 | 10,95% |
| 2024 / 2025 | R 549 631 401 | 8,35% |
| 2025 / 2026 | R 548 338 364 | 8,33% |
| 2026 / 2027 | R 606 838 592 | 9,22% |
| 2027 / 2028 | R 544 582 074 | 8,27% |
| 2028 / 2029 | R 566 010 613 | 8,60% |
| 2029 / 2030 | R 409 408 322 | 6,22% |
| 2030 / 2031 | R 256 470 000 | 3,90% |
| Total | R6 583 248 491 | 100,00% |

The table above includes all capital projects captured by departments projected for the 10 year period of the Capital Expenditure Framework.

What the planned capital expenditure analysis illustrates is that:

- Near future is more predictable than the distant future;
- Insufficient demand captured across the ten year horizon;
- In total, the capital demand is equal to R5.8 billion, subject to what is affordable within the financial envelope available.

It is apparent that whilst good progress has been made to plan ahead over a longer period, more careful upfront planning, extension of master plan periods and upfront capturing of pending and approved projects must bear relevance.

Capital expenditure fluctuates annually in line with the needs identified.

7.1.4 Proposed Amendments to MTREF Capital Programme and Associated Funding Mix

Whereas the current approved MTREF reflect a decrease in capital expenditure until 2021, the total capital spend over the next 10 years come to R4.0 billion, which is affordable to Stellenbosch LM. The LTFM indicates that should there be a need for Stellenbosch to accelerate the capital spend over the

MTREF, but still within an affordable envelope over the next ten years, such an acceleration would be possible with increased external borrowing.

8 Project prioritisation

The objectives of this section is to:

- Define the capital expenditure prioritisation rationale, and;
- Express the project prioritisation results in relation to the strategy of the municipality.

The Stellenbosch Local Municipality commissioned the utilisation of a capital budget prioritisation framework, which are based on the fundamental principles as set out in the PESTLE method for prioritisation and as endorsed by the National Department of Monitoring and Evaluation.

The Stellenbosch Capital Prioritisation Model (CPM) is a systematic and objective methodology that provides a way to rank or sort a diverse set of projects into an order of importance based on each project's alignment to the strategic, spatial, social, economic, environmental and financial objectives of the municipality. The CPM identifies each project's relative importance by deriving a numerical value representative of the project's priority.

The CPM provides a means for ranking projects based on criteria or principles that are the most important to focus on first in terms of meeting the municipality's overarching developmental objectives and strategies. This also assists in promoting co-ordinated and aligned departmental planning and budgeting.

The aim of Stellenbosch Local Municipality is to utilise the prioritisation methodology as a scientific basis for capital expenditure decision making, as a framework for institutional strategic planning, and as a vehicle to give effect to various planning ideology albeit either spatial, infrastructure or financial in nature.

This position of Stellenbosch is not unprecedented and is founded in sound legislated processes, both from a planning and budgeting perspective – as explained in the introduction of the CEF. To reiterate, various legislative mechanisms necessitate a prioritisation log-frame to assign scarce resource.

Historically, Stellenbosch Local Municipality has primarily considered the rateability of an asset – in other words the extent to which the asset contributes to the expansion of the municipal rates base. In recent years, starting 2015/16, Stellenbosch Local Municipality employed the prioritisation methodology explained in this section – fundamentally a Multi Criteria Assessment (MCA) framework, where the rateability of an asset is but one variable that is considered to determine the priority of a capital project.

This section will discuss not only the rationale for prioritisation but will set out the framework and associated results after employing the CPM. It will therefore comprise of:

- The South African reality;
- The need for rationalised prioritisation;
- The design principles for prioritisation;
- The design elements for prioritisation;
- The Stellenbosch Capital prioritisation model high level approach;
- The Stellenbosch Capital prioritisation model detailed criteria;
- Capital prioritisation model application, and;
- Capital prioritisation model results.

8.1 The South African reality

In South Africa, the capital expenditure of a municipality should primarily be driven by the IDP. SPLUMA, as explained in the introduction of this document, furthermore, compels authorities to formulate a prioritisation rationale as part of the municipality's overall strategy and spatial transformation agenda. The meaningful allocation of capital expenditure for municipalities is however a challenging balancing act that must seek to address:

- Infrastructure backlogs;
- The restoration of human dignity;
- The creation of a safe and secure environment;
- The provision of basic services;
- The maintenance of existing assets;
- The protection of our heritage and environment;
- The creation of sustainable job opportunities;
- The boosting and creation of economic activities/opportunities, and;
- Strategically investing into a growing, sustainable, liveable and globally competitive city environment.

A prioritisation methodology is therefore required that will consider qualitative, quantitative and spatial priorities as articulated by municipality's strategic as well as technical leadership, and as enshrined by municipality's various strategic plans. It is recognised that the planning environment is continuously changing in response to new challenges and new dynamics are introduced constantly due to a variety of reasons. The process of prioritisation, therefore, must possess of the ability to comprehensively on-board new issues for consideration and easily, and most importantly, transparently bring on board and represent to the changing needs of the municipality.

The need for a mechanism to drive the strategic, yet equitable, allocation of capital within the municipality stems from the following realities:

- **Urbanisation, immigration and growth:** "The State of South African Cities" report produced by the South African Cities Network (SACN) in 2016, report that South African Cities are inundated by rapid urbanisation. A significant number of the population within South African municipalities has low levels of education resulting in high unemployment, very low incomes and poor living standards. There are not enough job opportunities for unskilled labourers in the economy to address this issue adequately. Because of this urbanisation, municipalities must deal with a relentless demand for infrastructure and services. Unconstrained urbanization and population growth have resulted in the demand for infrastructure and services outstripping the financial resources of municipalities. Given the limited resources to address these needs, prioritisation of capital expenditure has become a factor of critical importance. Typical prioritisation metrics used in this regard includes the consideration of a project with respect to the Urban Edge, or the identification of Priority Development Areas (PDAs) or Spatial Targeted Investment Areas (STIAs) in terms of the mSDF.
- **The importance of the city and regional economy:** One of the main drivers of economic sustainability is the creation of job-opportunities. Affecting economic changes requires a multi-pronged approach involving a range of interventions across a number of industries. From a capital expenditure perspective though, the process of prioritisation can benefit from the sophistication

of a complex, macro-economic econometric model. Typical prioritisation metrics used in this regard includes Job creation (opportunities - per R1m capex).

- **Increasing maintenance burden:** Municipalities are faced with the conundrum of balancing spatial, social and economic transformation, whilst maintaining the existing asset base of the city. Spatial, social and economic transformation is often associated with the provision of new, quality infrastructure in support of liveable communities either in newly demarcated development areas or as part of upgrading severely marginalized communities, with a poor service provision history and a backlog of service delivery demands. A balanced approach to capital spending, focusing partially on the provision of new infrastructure, whilst maintaining the existing asset base and revenue stream is important. A fundamental consideration of all capital expenditure therefore must include the estimated operating expenditure burden that will result from the capital that is being spent. The operating expenditure burden is inevitable – a situation can however arise whereby the operating expenditure continues to grow to the extent that it starts to impact on the available capital expenditure. Typical prioritisation metrics used in this regard is the lifespan of a specific asset or the rateability of the asset.
- **Coordination and Inter-dependency:** Capital project preparation is often undertaken in a non-integrated way in that the different departments, divisions and agencies plan and budget for capital projects in isolation from each other. This is not necessarily intended, it is simply a consequence of a large, multi-disciplinary organisation. Departments often have their own priorities and their own methods of determining such priorities. These methods vary in terms of sophistication and detail. The provision of municipal infrastructure requires integrated project planning and preparation. Therefore, a decision support system, which facilitates the coordination and integration between planning and infrastructure provision on a project preparation as well as an institutional level is critical.
- **Competing Interests:** Although basic services infrastructure (i.e. water, sanitation, electricity and solid waste management) is often as high on the community delivery agenda as social facilities and amenities (i.e. clinics, libraries, community facilities etc.), these different infrastructure types do not always receive equitable capital allocation. Often, income generating capital expenditure (i.e. capital spent on infrastructure which can yield some form of monetary return) receives larger quantities of capital budget than non-income generating infrastructure. A decision support system, which allows for scenario testing in relation to the ratio of income generating and non-income generating capital expenditure, taking into account the impact that this would have on the city's financial sustainability is required.
- **Spatial transformation agenda:** The spatial vision of South African municipalities seeks to transform the developmental landscape to become a more inclusive, efficient and equitable. Consequently, capital spending should be earmarked to drive the spatial transformation agenda which in turn will result in a spatially transformed and economically sustainable city structure. A decision support system, which enables capital project prioritisation, reporting and tracking quantitatively, qualitatively and spatially, is required to ensure that capital spending is focused on strategic spatial structuring areas to achieve the desired city spatial form. Typical prioritisation metrics used in this regard is the spatial consideration of the mSDF.

The complexity and interdependency of these issues is very challenging, and each year, new considerations and priorities are introduced. The need for a scientifically based tool to facilitate complex decision making of this nature, is evident.

8.2 The need for rationalised prioritisation

The need for a rationalised prioritisation methodology is embedded in legislation. In addition, a defensible prioritisation methodology is becoming the preferred response when considering the daunting and increasingly complex realities facing urban and rural environments today, and other developmental and resource constraint pressures facing decision makers.

There are three fundamental criteria that further bolsters the need for a rationalised prioritisation methodology that should be applied to scarce resources. These fundamental criteria, irrespective of the context are essential for successful prioritisation.

If these criteria are met, a prioritisation methodology can be justifiably applied to cast light on the complex decision making environment, assisting decision makers to deal with seemingly daunting pressures, including the compliance of legislation and the ability to defend decisions on a scientific basis.

Any organisation with the following three criteria, needs a methodology for prioritisation:

- The organisation has a defined strategy or goal-set;
- The organisation has the intention and a mandate to implement the strategy or goal-set, and;
- The organisation is faced with a resource constraint within which to execute the strategy (i.e. resource limitations).

Stellenbosch Local Municipality adheres to the fundamental criteria outlined above and consequently has a need for prioritisation in that:

- Stellenbosch Local Municipality has a formal strategic document, in the form of the Integrated Development Plan, with supporting strategic positions such as the LTFP, Technical Master Plans and the Spatial Development Framework;
- Stellenbosch Local Municipality has the mandate to implement the above-mentioned strategic documentation in order to achieve the goals of the National Development Plan 2030 through the delivery of specific services and assets, and;
- Stellenbosch Local Municipality, as with the majority of municipal entities in South Africa, has limited financial resources through which to implement the demand for capital investment in its jurisdiction.

It is therefore necessary for the Stellenbosch Local Municipality continue to use the prioritisation mechanism to navigate the trade-offs and strategic decision making required for the execution of its strategy within the resource limitations it is facing.

8.3 Design principles for prioritisation

The following principles have shown to be central to successful prioritisation:

- Scientific – measurable criteria based on best practice to produce defensible results;
- Participative – obtain key stakeholder buy-in in the criteria and weighting applied
- Transparent – complex enough to yield credible results but simple enough to be explained to all stakeholders;
- Adaptable – flexible model design to allow for immediate changes, and;
- Collaborative – to harness institutional knowledge.

8.3.1 A scientific prioritisation approach

In the process of prioritisation, the importance of a multitude of considerations must be emphasized. Although it is commonly accepted that the municipality's IDP should be the primary driver of priorities, there are however many other metrics that should be considered in the process. This is done through a multi-criteria weighted approach. Some of these considerations are briefly highlighted.

The first fundamental to consider is funding that is available for implementation and how this capital is sourced. This informs of the affordability of implementing the list of capital needs. In a municipal environment, capital is sourced from a number of places. Among these sources are bonds and loans. The affordability and the debt thresholds set by the MFMA are important considerations in this process.

Technical inputs stemming from the municipality's asset management system or from other technical reports or processes represent another important aspect to consider in the process of prioritisation. These technical inputs often do not align optimally with IDP objectives but are important all the same due to age, wear or other important reasons. Other technical aspects such as the technical interdependence of projects also play an important role. This will have the consequence that projects that appear to be of a lower priority, may be elevated in importance if they are enablers of other, important projects.

The economic, socio-economic and environmental impacts also represent impact lenses that casts an important perspective on project impacts. There are various methods and models to determine these impacts to varying degrees of accuracy. Within a service delivery framework, it is essential that these elements be included in the prioritisation process.

Lastly and very importantly, the spatial alignment of a project to a municipality's strategic or political objectives needs to be included in prioritisation process. The assumption is often erroneously made that these spatial aspects are adequately captured by the IDP process. The reality is however more complex and dynamic. Spatial priorities are often revealed throughout the IDP cycle by new processes such as the development of Spatial Development Frameworks (mSDFs).

8.3.2 A participative prioritisation approach

The prioritisation process facilitated by a system, should be easy to understand and interpret whilst allowing for accessibility and input by its users on any level of detail required. Given the diverse range of different departments and divisions within the typical South African municipality and the divergent needs stemming from each department, it is essential that the prioritisation methodology lends itself towards participation and allows for easy calibration by key decision makers.

8.3.3 A transparent prioritisation approach

In order to ensure the transparency of a prioritisation model and methodology, it is critically important to ensure that such a model is scalable, adaptable and flexible. A model can be measured as scalable if the same methodology can be applied on a small number of projects as well as a large number of projects, with relatively the same input effort, and ensuring a reliability in the results.

A model can be considered adaptable, if its content, methodology and outcome can be fully explained, and consequently changed at the request of the user. Adaptability relates to the ability of the model to adapt – either to the client's needs, i.e., what is considered as a priority, or to changing realities, or

to any other factor that might be considered necessary to change the prioritised direction of the municipality.

A model can be regarded as flexible, if it can accommodate different data inputs and different evaluation criteria.

8.3.4 A system-based approach

One of the most recognised methods to evaluate various options in line with principles or strategic positions, is a multi-criteria decision-making framework. It requires the set-up of specific principles, linked to distinguishable criteria and a set of options carrying attribute data related to the criteria.

If a human was to manually calculate the outcome of each option, assuming 3 000 options, and 12 criteria, then it will take a human about 51 years to complete a single task. The power of a system based, not an excel-based prioritisation tool, enables a human to make the same set of calculations in 9 minutes or less depending on processing power. This enables strategists and decision makers to focus efforts on making the right decisions based on several scenarios and trade-off, not hampered by computational power.

8.3.5 A collaborative approach

In environments characterised by silo-oriented organisational management, collaboration brings a viable remedy for the ills spawned from the previous configuration. Some of those viable remedies, that if implemented correctly can not only change decision making, but overall organisation behaviour, includes:

- Facilitates reaching agreement on priorities and key issues;
- Establish a platform for conversations about what is important;
- Guide, co-ordinate and align the municipal budget;
- Provides for a transparent and rationalised budget process;
- Helps collective prioritising of complex or unclear issues;
- Provides a quick and easy, yet consistent, method for evaluating options;
- Takes some of the emotion out of the process, and;
- Quantifies the decision with numeric rankings.

8.4 Design elements for prioritisation

8.4.1 CPM mathematical framework

The prioritisation process should be easy to understand and interpret whilst allowing for accessibility and input by its users on any level of detail required. Given the diverse range of different role-players within the municipality and the divergent needs stemming from each, it was deemed essential that the methodology lends itself towards participation and allows for easy calibration by key decision-makers.

To fully take into account all factors relevant in deciding which projects to receive priority, the Utility Analysis Method is used that takes all the relevant system constraints into account.

“Utility analysis is in effect a semi-quantitative means of ‘trading off’ the effects of implementing any given scheme, that is, the relative desirability of achieving a given set of goals and objectives and the degree to which this target system is fulfilled, are combined to

give a measure of how far each scheme will go in meeting all or any of the goals and objectives, and so provides the answer to the question of the effectiveness of the scheme. The distinguishing feature of utility analysis is that it can handle financial, quantitative and qualitative effects simultaneously. Consequently, all of the impacts or effects of a project which can be envisaged can be included in the analysis."

Evaluation of Transportation Projects – Utility Analysis; JV Baxa; January 1981; CSIR

Utility analysis provides a structured input mechanism for the decision-maker and indicates the overall effectiveness with which alternatives will satisfy the complex target system. The process begins by defining the problem in a structured way. As already mentioned, the problem definition can incorporate diverse inputs which cover quantitative, qualitative and spatial factors.

The starting point for a utility analysis is to define the goals that should ultimately be addressed by the modelling. For each of these goals and subsequent objectives then must be established. Each objective requires a specific input, which will be modelled based on a predetermined method or value function, to provide an output. The following basic steps apply:

- Define the relative preferences for each goal that was set out;
- Define relative preferences for each objective that was set out, and;
- Weight each criterion that was set up to reflect their relative importance.

By following these steps, each alternative (or in the case of capital prioritisation – each project) can be 'scored' to attain a measurement of performance that can be translated into several points system with which each criterion is weighted, as indicated on the matrix of utilities, is normalised to a number between 0 and 100.

The complexity of the number of variables that have to be taken into account in the model from the municipality's point of view requires that the model methodology be adapted to allow for more than one level of "objectives". Importantly, these objectives all contribute towards a fundamental set of goals defined at the start of the utility analysis process.

These goals possess the ability to influence how projects will be rated rather dramatically, by their hierarchical importance relative to objectives and criteria on the utility analysis. The benefit of this is that the municipality now can fix the fundamental considerations on this level, to ensure that it manifests in prudent financial management whilst still ensuring that the transformation as contained in the various municipal strategies, manifests itself at this level.

Figure 8-1 the basic structure of the model. More about the actual criteria that will be used is discussed later in this document.

The diagram illustrates a hierarchical structure for a Vision, decomposed into Goals, Objectives, and Criteria, with associated weights and signs.

- Vision** (Weight: 100%)
 - Goal 1** (Weight: 35%)
 - Objective 1** (Weight: 30%)
 - Criteria 1** (Weight: 40%, Sign: -)
 - Criteria 2** (Weight: 30%, Sign: -)
 - Criteria 3** (Weight: 30%, Sign: -)
 - Objective 2** (Weight: 70%)
 - Criteria 4** (Weight: 100%, Sign: -)
 - Goal 2** (Weight: 65%)
 - Objective 3** (Weight: 100%)
 - Criteria 5** (Weight: 100%, Sign: +)
 - Objective 4** (Weight: 100%)
 - Criteria 6** (Weight: 100%, Sign: +)

Signs (+/-) indicate the direction of impact or relationship between the elements.

This approach offers a significant advantage in that the “principles” of prioritisation becomes important debating points, instead of individual merits projects. Projects emanating from different departments do not have a mutual or common ground to enable a meaningful one-to-one comparison. Using this model though provides a platform where all projects, irrespective of their origin or sophistication, is subjected to the same principles.

Choosing the right objectives becomes important. Fortunately, a lot of thought and research have been put into this already, and the proverbial wheel does not need to be reinvented. Some of the basic elements of priority can be onboarded and sculpted for the specific purpose of this plan. A method that was first invented in 1967 at Harvard University is called the PESTLE method. PESTLE is a mnemonic which in its expanded form denotes:

- **P** for **P**olitical;
- **E** for **E**conomic;
- **S** for **S**ocial;
- **T** for **T**echnological;
- **L** for **L**egal, and;
- **E** for **E**nvironmental.

The method provides a bird's eye view of the whole environment that is appraised from many different angles that one wants to check and keep a track of while contemplating a certain idea/plan. The method has been tested and honed over the past decade at many of South Africa's municipality's and metros with good outcomes.

8.4.3 Evidence Based Planning

The key advantage of following the utility analysis using the PESTLE criteria as described in the previous sections, is that the input rely heavily on evidence-based data. When looking at evidence-based data, as opposed to raw data it is crucial to understand data. Raw data has no intrinsic meaning of its own. Evidence-based data implies a verification of a data element, a hypothesis, a viewpoint. Still, this data has no value. It is only through tools such as the utility based analysis that this data is interpreted – objectively – with the output being an evidence-based data element that can inform decision making based on the process it has gone through.

As an example, if the data shows that a certain area has a significant backlog in water infrastructure, one may be tempted to simply invest in water infrastructure to mitigate this issue. The utility analysis compels the decision maker to hypothesize the consideration of additional data to make a decision as to which of the priorities are more important. If this approach highlights the area with water infrastructure backlog to further benefit climate-change objectives as well as the economic enhancement of the agricultural sector, the decision has moved from a data decision towards an evidence-based decision.

An evidence base in the appraisal stage helps decision-makers in the following ways:

- Standardized, evidence-based methods and considerations are used (PESTLE approach);
- The most up to date, available spatial data are used as input to make;
- It improves transparency, accountability, and value;
- It improves quality of decision-making, and;
- It improves the outcomes for the ultimate beneficiaries of the strategy - the communities.

Evidence based decision making is receiving a lot of attention in the medical industry lately, as the same principles of data usage and decision making is propelling certain sectors forwards. Quoting from a paper published for BMJ Best Practice by Caroline Blaine:

"It [An evidence-based approach] requires us to be sceptical, to question our knowledge and beliefs, to identify the key questions, and to not be afraid to admit we don't have all the answers."

8.4.4 Multi-Criteria Assessment Framework Criterion Consideration

When compiling a multi-criteria assessment framework, and when introducing new criterion to assist in decision making, it is important to understand three elements. This includes:

- Firstly, what the model seeks to achieve;
- Secondly, what the nature of the criteria is, and;
- Thirdly, what the available data is and how it is collected.

From Figure 8-2, a four quadrant, two axel system shows the two scales used to evaluate a scoring criteria. The x-axis shows a measure of objectivity. The more objective a criteria is the better the criteria is to achieve the desired goal assuming a logical alignment between the criteria and the goal. The y-axis shows a measure of accuracy. The less accurate a criteria is, the less desirable a criteria is to measure a goal.

- **Intent:** This figure is based on the premise that a prioritisation model constructed for strategic decision making, planning and budgeting in the public sector seeks to achieve objective, repeatable and accurate measures in prioritisation. The more objective and accurate a measure, the more reliable, and the more valid results a model will generate.
- **Nature of criteria:** This figure shows that the nature of a criteria is important in achieving objectivity, and accuracy. A calculated response mechanism, say a mathematical formula, will always give the same answer if the same input is given. This characteristic is deemed as desirable in the context of the DDM. A question, however, say a rating between two elements, or a scale-based expression of an opinion, will not necessarily always result in the same answer – even from the same person. This unstable nature of decision making is fatal in a strategic decision-making process and should be minimised.
- **Available data:** If data is available based on calculations, sound quantitative and qualitative data – it is deemed as more desirable in the context of capital planning decision making. If data of a specific question is not available in the participating population of projects, then unfair discrimination will occur, resulting in an undesirable outcome.

Figure 8-2: Prioritisation model dependability scale

8.5 Stellenbosch Capital Prioritisation Model - high-level structure

The following part of this document will show how the prioritisation model works. It should be noted that this part of this section will start at the high level model structure, followed by a detailed layout of how each branch of the multi criteria decision making tool is used to evaluate projects. The following figure displays a typical Prioritisation for Stellenbosch, as developed in CP3.

Figure 8-3: Screenshot of the prioritisation model that is used

The CPM allows for projects to be ranked or scored between two mutually exclusive branches, namely:

- Model;
- Housing Outside Urban Edge.

The “Model” allows for projects to be ranked or scored between two mutually exclusive branches, namely:

- Spatially Mapped;
- City Wide; or
- Administrative Head Quarters.

These two model branches are mutually exclusive, which means that any project can only pass through one of the two branches and can never be scored on both branches. Projects which have spatial locations (i.e. works and affected areas) are evaluated through the “Spatially Mapped” branch of the model, whereas unmapped projects marked under the MSCOA regional segment as “City Wide” or “Admin HQ” are evaluated through the “City Wide / Admin HQ” branch of the model. This distinction

is made so that City Wide and Admin HQ projects are not artificially penalised under the “Spatial” branch of the prioritisation model.

Figure 8-4: Capital Prioritisation Model High level Structure

Once it has been determined whether a project is **spatially mapped**, the project evaluation takes place according to the following themes or goals:

- Social alignment;
- Strategic alignment;
- Spatial alignment;
- Financial alignment;
- Economic alignment; and
- Technical alignment.

Once it has been determined whether a project is **city wide or Admin HQ**, the project evaluation takes place according to the following themes or goals:

- Social alignment;
- Strategic alignment;

- Financial alignment;
- Economic alignment; and
- Technical alignment.

It is evident from the high-level tree structure above that the “Spatial alignment” theme is only utilised under the “Spatially Mapped” scorecard.

The “Housing Outside Urban Edge” branch excludes all housing projects that are partially or totally outside the Urban Edge of Stellenbosch.

8.6 Stellenbosch Capital Prioritisation Model - Detailed Criteria

The following sections should be read in conjunction with Annexure 4: Prioritisation model. The annexure provides a more detailed description for each scoring criteria, whereas this section provides an overview of the scoring criteria branches.

The capital prioritisation model criteria will be discussed in more detail under the five (5) themes of the model, namely:

- Strategic alignment;
- Spatial alignment;
- Financial alignment;
- Economic alignment;
- Social alignment; and
- Technical alignment.

8.6.1 Strategic Alignment

The strategic alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget aligns with the organisations developmental objectives as well as strategic outcomes set out in the strategic guiding document of the municipality. The policy alignment score is calculated within five distinct categories¹³, namely:

- IDP Outcome 1: Valley of Possibility;
- IDP Outcome 2: Dignified Living;
- IDP Outcome 3: Good Governance and Compliance;
- IDP Outcome 4: Green and Sustainable Valley; and
- IDP Outcome 5: Safe Valley.

¹³ These categories are aligned with the IDP Outcomes.

Figure 8-5: Capital Prioritisation Model: Strategic Alignment

8.6.2 Spatial Alignment

The spatial alignment goal or theme of the prioritisation model evaluates the degree to which projects aligns with the spatial development framework and other spatial targeting objectives set out in various strategic documents of the municipality (i.e. IDP, mSDF, CIF etc.). The alignment of projects to the spatial targeting areas of the municipality are scored according to the following criteria:

- Spatial Development Framework; and
- Inside Urban Edge.

These criteria measured under these sub-branches seek to ensure that projects within the municipal budget align with the spatial structure or spatial development objectives of the municipality.

Figure 8-6: Capital Prioritisation Model: Spatial Alignment

8.6.3 Financial Alignment

The financial alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget are considered to be credible, affordable, funded, applied to expand the rateable asset base and improving the fiscal position of the municipality. The financial alignment score is calculated within six distinct categories, namely:

- Fiscal deficit as % of GDP;
- Affordability;
- Confidence in Cost Estimate;
- Co-Funding;
- Lifespan of asset; and
- Opex Consequence.

Figure 8-7: Capital Prioritisation Model Financial Alignment

8.6.4 Economic Alignment

The economic alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget contributes to the growth of the municipal economy and improves the economic position of the residents within the municipality.

A macro-economic impact model (EIM) was developed for the municipality specifically to make use of the data from the CP3 system. The econometric model is specific for the municipality and draws from a sophisticated range of financial data, regional data, and population data sourced from StatsSA. As such, the EIM generates values for the impact of individual and portfolio capital projects in terms of a set of economic, socio-economic and fiscal indicators – for the City as a whole, as well as a selection of key sub-regions or ‘main places’.

The EIM is based on the outputs of a comprehensive suite of econometric models. The workings of the EIM are dynamic and consider the indirect City-wide impacts of projects and programmes – not only the localised ward-specific impact.

The EIM therefore captures the iterative, dynamic impacts of all of the role-players within the economy – households, business, government, foreign sector, as well as the full economic flow of goods, services, factors and money is accounted for, and an iterative computational process is utilised.

The outputs from the economic model is further augmented spatially by evaluating the alignment of the project’s location and affected area, with geographic areas that were graded across the entire municipal area in terms of its economic impact in a separate economic study that was conducted for this purpose.

The economic alignment score is calculated within two distinct categories, namely:

- Focus on targeted portfolios;
- Focus on impact; and
- Focus on people.

Figure 8-8: Capital Prioritisation Model: Economic Alignment

8.6.5 Social Alignment

The social alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipality aligns with servicing of areas with the highest demand and where the most vulnerable communities are situated.

The social alignment score is calculated within two distinct categories, namely:

- Services; and
- Deprivation Index.

8.6.6 Technical Alignment

The technical alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget aligns with the asset management plans, analysis and modelling of the technical or utility services departments as well as the sustainability goals of the municipality, and most importantly, whether the project is ready to be implemented (i.e. all statutory and governance requirements have been met).

The technical alignment score is calculated within four distinct categories, namely:

- Implementation readiness;

- Risk Rating;
- Departmental Rating; and
- Legally Bound.

Figure 8-9: Capital Prioritisation Model: Technical Alignment

8.7 Capital Prioritisation Model - application

By applying the following steps, each alternative in terms of criteria and projects can be scored to attain a measurement of performance that can be translated into a number of points per criteria, per project. The points system with which each criterion is weighted, as indicated on the matrix of utilities, is a number between 0 and 100 – where 0 is low and 100 is high.

8.7.1 Step 1: Define the relative preferences for each goal that was set out

Relative preferences, expressed as weights, are best determined in a consultative manner, where key stakeholders debate which goals are more important to pursue than others. In some instances of prioritisation, it does happen that all goals are weighted equally – implying that all goals are of exact similar importance.

8.7.2 Step 2: Define relative preferences for each objective that was set out

Each goal is achieved by a set of objectives. However, some objectives – if achieved – can better contribute to a goal than other. Therefore, indicating that some objectives are more important, and should contribute more to the potential total score of a project being subjected to the prioritisation framework.

This approach offers a significant advantage in that the “principles” of prioritisation becomes important debating points, instead of individual merits of projects. Projects emanating from different departments do not have “common ground” to enable a meaningful one-to-one comparison. Using this model though, provides a platform where all projects, irrespective of their origin or sophistication, is subjected to the same principles.

8.7.3 Step 3: Set-up each criterion to evaluate relative importance

Each objective is measured by a set of criteria. These can be directly translated from a performance indicator framework, or as traditionally used, be defined by a series of measures using spatial, qualitative or quantitative measures. Of importance in this step, is that no unfair discrimination occurs. In other words, each project subject to the criterion must have an equal opportunity to compete in that criterion’s test. This is achieved by using evaluation criteria that can be defined for each project (Scope, cost, duration, readiness, environmental impact, population impacted, contribution to GDP etc).

8.7.4 Step 4: Data collection & standardisation: project data

A further important factor to keep in mind is the availability of suitable data to measure each project against. If the base data is not readily available, a proxy criterion should be sought that would still address the main issue on is attempting to appraise.

Typical data required per project for useful prioritisation includes, but are not limited to:

- Project Name
- Implementing department
- Project Scope (Similar to MSCOA Classification)
- Spatial details (GPS Coordinates)
- Project cost

- Project readiness
- Strategic alignment

8.7.5 Step 5: Calculate score

After defining the criteria that will be used in a prioritisation model, determining its relative weights, determining the evaluation criterion, and setting up a project portfolio, this step entails subjecting the set of projects to the multi-criteria assessment framework by using the different project attributes – the result being a relative ranking of projects indicating the most important to least important projects.

8.7.6 Step 6: Assess outcome

As with any model, this step enables the decision maker to calibrate the model to ensure that the model is reliable in its results, and provides justifiable validity to the outcome of the model.

8.8 Capital Prioritisation Model Results

The relative ranking, as a result of the applied Capital Prioritisation Model (CPM), which will be used to contribute to the budget scenario routine are discussed in detail in the next sub section.

8.8.1 Scores per prioritisation branch

The CPM results shows that projects are best aligned with the strategic branch of the model. This could be attributed to the fact that the strategic branch of the model is firstly weighted the most with respect to the total score in comparison with the other branches, and secondly because of the relative number of opportunities to score, in other words the number of criteria set below the strategic alignment branch.

The second best aligned branch, that is projects aligned with the CPM, are financial alignment. This shows that even before the LTFP is considered, the prioritisation model already factors in financial realities.

The third noteworthy observation to make, is the low level of technical alignment. This is a function of the weighting allocated to the technical branch of the CPM.

Figure 8-10: Score per Criteria Branch

8.8.2 Scores per Unit

A box and whisker diagram are used to summarise a range of results per a unit. The box component of the diagram shows where the projects that scored between the 25th and 75th percentile scored of the specific unit. The average score of the unit is depicted by the “x”. The ends of the whiskers are the maximum and minimum scores. Projects scoring between the minimum value and the 25th percentile are arranged along the bottom whisker, and projects scoring between the maximum value and the 75th percentile are arranged along the top whisker and the box.

Figure 8-11: Prioritisation model results – score per unit

When evaluating a box and whisker diagram, it is possible to make a value judgement on the intent of the model, and whether it is achieved. The box and whisker diagram differentiates score distribution between directorates, and within directorates.

Comparing between directorates, it is possible to see that infrastructure services and community protection services scores the highest, and are the best spread in terms of scores within the directorate. This aligns with the strategic intent of the CPM for Stellenbosch and shows that in terms of project readiness, and alignment a clear pipeline has been defined.

8.8.3 Scores per Department

A prioritisation model's purpose is to indicate a relative ranking between projects. When a relative ranking between projects has been determined, it is possible to indicate which projects are more important than others. Even though a prioritisation model is an objective application of an evaluation and comparison framework, it could still be subject to subjectivity in the form of unfair criteria, or unfair weightings. To statistically defend such a model, is to consider the spread of the model outputs, i.e. scores.

The score distribution per project should estimate a gradual and continual increase of number of projects with respect to the score. This means, that one would not expect incremental bunching of projects, say 400 of the 1200 project scoring below 30, and the remainder between 80 and 100. In such a case, the prioritisation model would be extremely biased, and polarising. Therefore, the more equally spread the project scores are, the more fair a prioritisation model was set up for the project population.

From the series of diagrams below, one can see that the main form of the score distribution adopts a gradual increase, in particular projects related to infrastructure services. What is interesting to note that there are no project scoring higher than 50 for the department of corporate services, and that the projects within planning and economic development increase in score at an increasing rate – the former can be attributed to the fact that the model is spatially and infrastructure driven, and the latter can be attributed to data completion and alignment – especially within the housing department.

| Grand Total | 5,4 | 78,1 | 36,2 |

8.8.4 Scores distribution per project

The project scores emanating from the Stellenbosch CPM approximates a normal distribution, which is indicative of the following:

- The prioritisation model is not bias towards any project;
- The prioritisation model evaluates projects on a scientific basis, and;

The fundamental data captured for projects is sufficient for a prioritisation.

Figure 8-14: Project Score Distribution – per number of projects in score category

8.8.5 Scores distribution: Spatial distribution

One of the key benefits of the prioritisation model is that it enables alphanumeric and spatial data analytics, which means that spatial inputs are used to prioritise projects. Spatial prioritisation and budget alignment is not only a prerequisite in terms of SPLUMA, but it is also a policy imperative for the IUDF – therefore, spatially-based prioritisation enables true spatial targeting.

Considering the spatial parameters used in the CPM, it is not surprising to see that projects within the FAs, and PDAs scored higher than projects in the commercial farming areas. This is as a result of the increased emphasis and weighting on these criteria within the CPM. It is important to take note of the following when interpreting the spatial distribution of project prioritisation scores:

- Projects' geo-referenced locations are captured on CP3 as either a point, line or polygon geometry;
- Project geo-referenced locations were reduced to the centroid of each project location for aggregation and displaying purposes, and;
- Project score distribution locations are therefore an approximation of a project's location, and not an absolute indication of the project's location or implementation area.

From the spatial distribution of projects in Stellenbosch it is clear that the priority areas does influence the total score of the projects. It is also clear, that Klapmuts, Franschoek and Kayamandi – all areas within the urban edge – does enjoy a higher score value than the rest. Likewise, Stellenbosch central and in particular the Adam Tas Corridor, are hosts of some of the highest scoring projects. However, to think of prioritisation in terms of location is one dimensional. When cross relating the spatial distribution with the different branches of the prioritisation model it is possible to conclude the following:

- A concentration of high scoring projects in the central part of Stellenbosch with regard to financial alignment highlights the principle that it is better from a financial point of view to invest in areas closer to the city centre. This supports the bid-rent theory where investment closer to the urban nexus is more financially sound from an efficiency point of view, than further from the urban nexus.
- From an economic point of view, investment is better in areas associated to places of living and places of working. From the spatial view of the economic alignment branch, it is clear that projects closer to the access points enjoy a higher score, and a higher concentration of scores.
- Social alignment focus dominantly on population distribution. The prioritisation model shows spatially that investment in areas focussed on the spatial population pattern are highlighted.
- Urban structuring mechanisms is a key driver that adds to the total score per project. In terms of the spatial alignment branch, it clearly shows the bias engineered into the prioritisation model from a spatial targeting principle vantage point.
- Strategic alignment is more inclusive, and this shows spatially. A lesser degree of concentration and differentiation across the jurisdiction of the municipality, shows that from a strategic point of view, the municipality does prioritise all areas.
- Projects scoring good in terms of technical alignment correlates with firstly the older parts of the municipality, such as the central nexus of the municipality, and secondly with the recently newly developed, or under construction parts of the municipality.

Figure 8-15: Spatial expression of prioritisation branches

Figure 8-16: Project Prioritisation Results – Spatial

9 Budget scenario

The objectives of this section is to:

- Define the budget determination process;
- Unpack the budget in terms of modelled demand;
- Unpack the budget in terms of planned capital expenditure, and;
- Unpack the budget in terms of affordability.

Developing a budget scenario builds on the information gathered throughout the annual capital planning process and applies a systematic approach to determining which projects should be included in the 10-year capital expenditure framework, together with the annual draft budget, based on a set of pre-defined rules and scenario parameters.

The Stellenbosch Local Municipality makes use of the budget scenario methodology to determine the draft Medium Term Revenue and Expenditure Framework (MTREF) capital budget annually, and applies the outcomes of the above mentioned sections to prepare for the development of a budget scenario through:

- Assessing the outcomes of the demand quantification process and including this as part of the annual capital planning process;
- Preparing an integrated infrastructure investment framework for input to the budget scenario and determining the capital demand across a 10-year planning horizon;
- Aligning the outcomes of the Long-Term Financial Model (LTFM) to the budget scenario parameters, in order to determine sustainable affordability envelopes across a 10-year planning horizon;
- Ensuring a balanced and sustainable funding mix based on the annual publication of the Division of Revenue Act (DoRA) and building a budget scenario template which aligns to the total funding source availability as documented for the MTREF, and;
- Determining a relative ranking of importance for projects identified as part of the integrated infrastructure investment framework, through incorporating the outcomes of the Stellenbosch Capital Prioritisation Model (CPM) to the budget scenario preparation process.

The following section is structured based on the budget scenario development process, as outlined in Figure 9-1 below, and includes the following:

- Preparing for a budget scenario through managing the baseline used as input to the budget scenario (Section 9.1.1), followed by allocating a project status (Section 9.1.2) and obtaining a relative project score from the Stellenbosch CPM (Section 9.1.3);
- Establishing budget scenario parameters as set out in the annual publication of the DoRA together with the prescribed grant allocations (Section 9.2.1) and including a view on affordability envelopes spanning across a 10-year horizon as calculated by the LTFM (Section 9.2.2). When establishing a budget scenario template optional ring-fencing of budget can also be applied based on outcome-based portfolios, departmental indicatives or stage gates (Section 9.2.3);
- Applying a budget scenario and the sequence in which capital budget is allocated based on the budget scenario preparation data and parameters (Section 9.3.1), and;
- Analysing the budget scenario results (Section 9.4) and applying these results as a draft MTREF capital budget for implementation.

Figure 9-1: Budget scenario development process

9.1 Preparing for a Budget Scenario

To initiate the process of applying a budget scenario, a number of input variables should be prepared. These variables provide the content of the budget scenario and how the budget scenario parameters are applied, in order to achieve a draft capital budget. These include:

- Baseline management;
- Project status, and;
- Relative project score.

9.1.1 Baseline Management

As part of the annual capital planning process, a baseline is generated for purposes of outlining projects and the capital demand required to implement these projects. Planned capital expenditure is captured according to a specific financial year in which a certain project may require budget and outlines the total lifecycle cost for each project. The source of funding is also captured in conjunction with the capital amount and includes own funding, borrowings or grant funding.

Baseline management refers to the creation and selection of a baseline as input to the budget scenario to allow for the consideration of the planned capital expenditure as captured through the planning process, together with a view on the planned capital expenditure or capital demand across a 10-year planning horizon and project statuses (refer to Section 9.1.2). During the budget scenario development process, the input baseline can be engineered based on the preference of a municipality to include either one of the following options:

- A demand only baseline which includes the capital demand budget as originally captured; or
- A combination of the capital demand budget captured and the outer years of a previously approved MTREF capital budget.

The Stellenbosch Local Municipality makes use of the second option and prepares a baseline which combines the outer years of the previously approved capital adjustment budget and the demand budget as captured during the capital planning process.

9.1.2 Project Status

Project status is considered as a first priority during the application of the budget scenario. The allocation of a projects status considers projects which are earmarked as Assets Under Construction (AUC's); committed projects from previous original or adjusted capital budgets and projects which are ready for implementation. A status is allocated to selected projects during the baseline management process and can include one of the following:

- **Committed** - Includes projects identified as AUC's, which are contractually committed, and previously formed part of either the approved capital budget or adjusted capital budget. Termination of a committed project will result in either legal or financial liability for the municipality. Given commitments made on these projects, the budget scenario methodology regards these projects as non-negotiable, irrespective of the CPM project score. Furthermore, projects with a committed status will be fitted to the budget scenario template based on the financial year in which budget is requested (refer to Section 9.3.1).
- **Provisioned-In** - Includes projects which previously formed part of either the approved capital budget or adjusted capital budget but not identified as contractually committed AUC's. Projects

classified as provisioned-in include projects which are ready for implementation, but without contractual commitments in place. Termination of a provisioned-in project will not result in either legal or financial liability for the municipality. The budget scenario methodology regards these projects as having a higher priority than projects without a status, however the implementation timeframes are negotiable to an extent. Projects which form part of this category will be fitted to the budget scenario template based on the financial year in which budget is required, but only if there is sufficient capital budget available (refer to Section 9.3.1).

9.1.3 Relative Project Score

The Stellenbosch CPM is a systematic and objective methodology that provides a way to rank or sort a diverse set of projects into an order of importance based on each project's alignment to the strategic, spatial, social, economic, environmental and financial objectives of the municipality. The CPM identifies each project's relative importance by deriving a numerical value representative of the project's priority in terms of the municipality's strategic direction..

As part of the budget scenario preparation process, the Stellenbosch CPM is applied to the input baseline to obtain an order of importance for projects and capital demand captured during the planning process. The relative importance of projects determines which projects will be allocated budget within the parameters of the budget scenario. For more information on how relative project scores are applied to the budget scenario refer to Section 9.3 below.

9.2 Budget scenario setup

To prepare a budget scenario template, budget scenario parameters are applied to establish a rule set in which planned capital expenditure is applied.

The budget scenario template defines the available capital budget for the MTREF and is distributed according to the grant allocations as documented within the DoRA. Although the DoRA indicates a total available capital budget for the MTREF, the outcomes of the LTFM determine a 10-year affordability envelope.

In addition to defining the overall total available budget and the distribution thereof per funding source, optional ring-fencing of capital budget can also be applied per outcomes-based portfolios, departmental level or stage gates.¹⁴

9.2.1 Funding Source Balancing and Grant Allocations

The DoRA is published on an annual basis with the distinct purpose to document the equitable share and grant allocations to municipalities. Although the publication dates may differ annually, the DoRA publication will set out all the external available capital funding for a municipality emanating from national and provincial budgets. Typical funding sources for a municipal capital budget documented through the DoRA publication include:

- Public Transport Infrastructure Systems Grant (PTIS);
- Neighbourhood Development Partnership Grant (NDPG);
- Urban Settlements Development Grant (USDG);

¹⁴ The ring-fencing mechanism of the budget scenario tool is not utilized by Stellenbosch LM.

- Integrated National Electrification Programme (INEP);
- Community Library Services (CLS);
- Social Infrastructure Grant (SIG);
- LG SETA Discretionary Allocation, and;
- Integrated City Development Grant (ICDG).

It is important to note that not all projects are eligible to utilise all of the funding sources as documented within the DoRA publication. An example of this includes the PTIS grant which is only applicable to public transport orientated infrastructure and the INEP grant which is only applicable to electrification programmes.

Although the budget scenario template outlines the total capital budget and source of funding as documented within the DORA publication, together with internal capital funding sources, funding source alignment should be undertaken prior to publishing a final capital budget. The process of funding source balancing ensures the correct alignment of capital budget as outlined within the grant conditions.

9.2.2 Long-Term Financial Model and Resultant Affordability Envelopes

As part of National Treasury's Budget Reporting Regulations and Templates, the Stellenbosch Local Municipality submits all internally generated capital funding as determined through the use of a Long-Term Financial Model (LTFM). Internal capital budget funding typically comprises of the following funding sources:

- Own Municipal Funding: Funding generated from municipality revenue (i.e. rates and taxes);
- Public Contributions and Donations: Donations and bulk services contributions for capital expenditure to provide additional bulk capacity to service new developmental demand;
- Capital Replacement Reserves (CRR): Savings by the municipality for deferred capital expenditure to maintain the existing municipal asset base, and;
- Borrowings: External loans from the financial markets or bonds issued by the municipality to the financial markets.

Based on the outcome of the LTFM, a Funding Envelope is established which evaluates amongst others the municipality's financial position. This includes a view on the optimal funding mix per annum which aids the municipality in maintaining a desirable financial position.

9.2.3 Ring-fencing CapEx Demand

During the budget scenario process, a municipality might choose to ring-fence a portion of the total available capital budget based on preference or to ensure that certain types of projects receive budget irrespective of project status or project score. Developing a budget scenario template allows for the inclusion of an additional set of rules whereby the capital budget amount is defined as per the following options:

- **Outcome-based portfolios** – Outcome-based portfolios are defined as part of the baseline management process, whereby projects can be categorised or grouped into a set of pre-defined portfolios. For example, suppose the municipality executives decide that 15% of the total municipal budget must be ring-fenced for repairs and maintenance of existing assets. The budget scenario template could be used to ring-fence 15% of the total capital budget for a portfolio called "Repairs and Maintenance". During the baseline management process, projects are classified as

contributing to the “Repairs and Maintenance” portfolio by virtue of the MSCOA project segment classification. When applying the budget scenario projects classified as part of the “Repairs and Maintenance” portfolio will be fitted based on project status, followed by the relative project score, until the budget amount allocated for the “Repairs and Maintenance” portfolio has been depleted.

- **Departmental Indicatives** – Defining a capital budget amount on a departmental level can be applied in instances where some projects have difficulty in effectively competing for capital budget owing to the nature of the project. For example, capital investments in the form of computer equipment or the procurement of vehicles may struggle to compete on a CPM score basis with utility services projects such as water and sanitation or electricity. Departmental budget amounts will be ring-fenced per department and only projects which are earmarked to form part of those departments may compete for the budget amount as specified. When applying the budget scenario, projects which belong to the specified departments will be fitted to the departmental budget amount based on project status, followed by the relative project score, until the allocated budget amount has been depleted.
- **Stage Gates** – Stage Gates are defined as part of the baseline management process, whereby projects are allocated to different stages based on the implementation progress or status of the project. For example, suppose the municipality executives decide that 10% of the total municipal budget must be ring-fenced for projects within Stage Gate 9: Project Close-Out. The budget scenario template could be used to ring-fence 10% of the total capital budget for Stage Gate 9 projects. When applying the budget scenario projects classified as “Stage Gate 9” will be fitted based on project status, followed by the relative project score, until the budget amount allocated for “Stage Gate 9” has been depleted.

9.3 Applying a Budget Scenario

Section 9.1 outlined the preparation of the budget scenario input variables which included the baseline management process, allocation of project status and the calculation of the relative project score based on the outcome of the Stellenbosch CPM. These input variables should be in place before a budget scenario can be applied, as this provides the content of the budget scenario together with the sequence in which projects are allocated budget.

In addition to the budget scenario input variables the budget scenario template should be defined as described in Section 9.2, in order to provide the framework in which the budget scenario is applied. The budget scenario template provides the total available capital amounts as set out for each parameter including the available capital amount per funding source together with the total affordability envelope across a 10-year planning horizon.

The following section is structured according to the sequence in which projects are fitted to the budget scenario template, which results in a 10-year capital expenditure framework of which the first three years comprise of the draft capital budget. It is important to note that Section 9.3 builds on the outcomes for Section 9.1 and 9.2 and cannot be regarded as a section on its own.

9.3.1 Budget Scenario Sequence

Once the input baseline and variables are prepared, the budget scenario template is selected. When applying the budget scenario, projects and requested capital budget is fitted to the budget scenario template based on an established budget scenario routine. The sequence in which the budget scenario routine is applied indicates which projects will be allocated budget and in which financial year. Projects included in the draft capital budget will be assigned a budget scenario status in order of the following:

1. **Committed Projects** receive first priority within the budget scenario sequence, given the contractual commitments as described in Section 9.1.2 above. Committed projects will be fitted to the capital budget, within the financial year that budget is requested (no delays may be applied) and may exceed the total available budget as allocated within the budget scenario template.

2. **Provisioned-In Projects** receive second priority within the budget scenario, given the priority status above projects without a status assigned (Section 9.1.2). Provision-In projects will only be fitted to the capital budget if budget is available but will not be allowed to exceed the total available budget as allocated within the budget scenario template. If there is available budget to fit a provisioned-in project, it will be fitted without delay.

3. **Provisioned-In Projects – Fitted with Delay** include projects which have been allocated a provisioned in status, but due to unavailability of budget within the budget scenario template, the budget requested is fitted with a delay. Fitted with delay allocates the requested budget amount to the first financial year in which additional budget is available.

4. **Projects Fitted** include projects which have been fitted to the budget scenario, based on the relative project score (Section 9.1.3). Projects with a higher ranking and without a status will only be fitted to the capital budget if budget is available, but will not be allowed to exceed the total available budget as allocated within the budget scenario template

5. **Projects Fitted with Delay** include projects which have been fitted to the budget scenario, based on the relative project score, but due to unavailability of budget within the budget scenario template the budget requested is fitted with a delay. Fitted with delay allocates the requested budget amount to the first financial year in which additional budget is available.

6. **No Fit** includes projects which have not been fitted to the budget scenario. This can be due to very low relative project scores or due to budget availability constraints within the budget scenario template.
7. **No Fit – Zero Budget** includes projects which have not requested budget.

9.3.2 Negotiated adjustments (Force-in / Force-out)

Once a draft capital budget has been developed using the budget scenario process, the portfolio of projects which make up the draft capital budget needs to undergo a number of municipal approvals.

It is inconceivable that any portfolio of capital projects, which has been prepared in a complex multi-disciplinary collaborative framework will meet all the expectations. Therefore, a negotiated adjustment process is accommodated in the budget scenario process whereby projects can be added or removed from the portfolio of capital projects based on motivations and representations made during budget forums.

9.4 Budget Scenario Results Analysis

Sections 9.1, 9.2 and 9.3 outlined the process of preparing for a budget scenario, establishing a budget scenario template and applying a budget scenario template. The following section is structured to analyse the results of the 2021/22 budget scenario which consists of the overall planned capital expenditure as captured through the planning process.

9.4.1 Planned Capital Expenditure Review

The overall planned capital expenditure is estimated at R6,7 Bn across the planning period, subsequent to the second capital demand capturing cycle. This, although already in excess of the affordable capital expenditure forecasted, only represents planned capital expenditure as captured in the CP3 system. Table 9-1 outlines the total planned capital expenditure per annum.

Table 9-1: Planned Capital Expenditure and Affordable Capital Expenditure

| Year | Planned Capital Expenditure | % |
|--------------|-----------------------------|-------------|
| 2021/2022 | R1 539 451 125 | 23% |
| 2022/2023 | R963 681 550 | 14% |
| 2023/2024 | R722 959 363 | 11% |
| 2024/2025 | R551 631 401 | 8% |
| 2025/2026 | R550 338 364 | 8% |
| 2026/2027 | R610 338 592 | 9% |
| 2027/2028 | R553 582 074 | 8% |
| 2028/2029 | R579 010 613 | 9% |
| 2029/2030 | R434 408 322 | 6% |
| 2030/2031 | R264 470 000 | 4% |
| Total | R6 769 871 405 | 100% |

The total planned capital expenditure should be considered in light of an affordable capital programme of R 3 970 million, as forecast by the Long-Term Financial Model taking into account the 2020/21 Capital Expenditure Framework of Stellenbosch.

9.4.2 Budget Scenario Results

Table 9-2 outlines the capital budget results per fit status after the budget scenario has been applied, refer to the budget scenario development process (Figure 9-1). As outcome to the budget scenario, 66% of the total capital demand has been assigned to the financial year in which budget was originally requested.

Table 9-2: Budget Scenario Results by Fit Status

| Budget Scenario Status | Total during analysis period | Total % |
|------------------------------------|------------------------------|-------------|
| Fitted | R308 176 026 | 5% |
| Fitted with delay | R867 854 182 | 15% |
| No Fit | R1 039 943 644 | 18% |
| No Fit - Zero Budget In Fit Period | R0 | 0% |
| Project Committed | R3 447 325 601 | 61% |
| Total | R5 663 299 453 | 100% |

Based on the results outlined above, 61% of the total capital demand is marked as committed, which indicates the ratio of projects which received priority during the allocation of the available funding envelope. In line with the budget scenario sequence (Section 9.3.1), a smaller amount of the available funding envelope is thus available for projects without a project status. Due to this, 15% of the capital demand has been fitted with delay and a further 18% of the capital demand was not fitted to the available funding envelope.

Figure 9-2: Budget Scenario Status Over Time

Figure 9-2 indicates the budget scenario results, per status, as applied across the 10-year affordability horizon and can be interpreted based on the status definitions as described in Section 9.3.1 above:

- **Committed:** Projects in construction phase will have contractual commitments and cannot be fit at any other stage without having a negative impact on the municipality. These projects therefore are allocated budget in the year in which budget is requested, and not at a later stage over the 10-year period. These projects also have a long-term effect on the budget scenario, due to the commitment of the available affordability envelope.

- **Fitted:** Between the fourth and sixth financial year there is an increase in capital demand that is fitted. This is because of the finalisation of projects with a committed status. Once the commitments have been served, the funding envelope opens up capacity to fit new projects.
- **Fitted with delay:** In the first two financial years almost no capital expenditure is allocated to projects with delay. That is because there is no capacity in year one and two, and a Fit with Delay status can only be assigned to projects that are delayed. Fit with Delay budget gradually increase as the funding envelope opens up, and then decrease as the capital demand decrease.
- **No Fit:** Projects that do not fit are projects with the lowest score. This means that projects with higher score was fitted with delay. Once the funding envelopes has been depleted, these projects – the no fit projects – are not included in the budget scenario. It has a high proportion of the capital demand in the first year, as the low scoring projects in this year compete with high capital demand assigned to statuses such as committed and provisioned in. It decreases sharply as more capital is fitted with delay.
- **No Fit – Zero Budget:** Even though these projects do not ask for any capital demand, they have been conceptualised and will reach a point of maturity in the next ten years where they will have a capital demand. It is therefore important to have sight of these projects on one single platform, together with the rest of the project pipeline.

Figure 9-3: Planned Capital Expenditure vs Funding Envelope vs Budget Scenario Results

Table 9-3: Planned Capital Expenditure vs Funding Envelope vs Budget Scenario Results

| Financial Year | Demand | Funding Envelope | Budget Scenario |
|----------------|-----------------------|------------------------|------------------------|
| 2021/2022 | R1 539 451 125 | R 397 763 924 | R 397 763 924 |
| 2022/2023 | R963 681 550 | R 384 460 268 | R 384 444 768 |
| 2023/2024 | R722 959 363 | R 381 494 643 | R 381 524 643 |
| 2024/2025 | R551 631 401 | R 446 301 712 | R 446 300 868 |
| 2025/2026 | R550 338 364 | R 452 996 237 | R 468 956 537 |
| 2026/2027 | R610 338 592 | R 459 791 181 | R 459 789 028 |
| 2027/2028 | R553 582 074 | R 466 688 049 | R 554 125 454 |
| 2028/2029 | R579 010 613 | R 473 688 369 | R 502 730 966 |
| 2029/2030 | R434 408 322 | R 480 793 695 | R 537 316 790 |

Figure 9-3 and Table 9-3 above indicate the following: Table 9-3: Planned Capital Expenditure vs Funding Envelope vs Budget Scenario Results

- Planned capital expenditure exceed the desired funding envelope up to 2028/29 after which the available capital in terms of the funding envelope exceed the demand. The first four years has the highest proportion between planned capital expenditure and the funding envelope. This is because of the nature of forward planning and project budget estimation – project managers have more clarity and certainty on how much a project will cost in the near future versus a period further than that.
- In 2021/2022 the funding envelope is fitted a 100%. This means that the funding envelope is achieved, and that the municipality is planning to spend within the affordable funding envelope.

9.4.3 Budget Scenario Profile

The budget profile is a culmination of the CEF, where the Modelled Demand, the Planned Capital Expenditure, the Funding Envelope and the Budget Scenario is compared over time.

Figure 9-4: Budget Profile

Based on the budget profile depicted in Figure 9-4 the following can be deduced:

- **Modelled Demand:** The modelled demand does exceed the funding envelope. This means that the municipality is spending less than what is required from a modelled infrastructure perspective – based on the current service standards of the municipality.
- **Planned Capital Expenditure:** The planned capital expenditure is significantly higher than what is affordable for the first three years and exceeds what is minimum requirements as per the modelled demand in terms of providing for the growing population of the municipality. This means that in the long run, the municipality will have to revisit planned infrastructure in order to ensure a suitable project pipeline that firstly respond the modelled infrastructure demand and secondly to what is affordable.
- **Funding Envelope:** The funding envelope that was proposed as per the Long-Term Financial Plan remains relatively constant across the 10-year affordability horizon with a slight increase from the fourth financial year and onwards. The reduction in affordability for the MTREF compared to previous years can be attributed to the economic impact of the COVID-19 pandemic together with reduced grant allocations.
- **Budget Scenario:** The budget scenario uses the funding envelope as guidance to fit projects to the affordable budget. The budget scenario aligns with the funding envelope, until 2026/27 where the budget scenario starts to exceed what is affordable in the municipality. This calls for a review of project specific budgetary planning, and potentially innovative means to deliver the same infrastructure but at a more affordable price.

[illegible]

From Figure 9-5 above it can be seen that the spatial investment paradigm has realised through the prioritisation and budget scenario methodology:

- Klapmuts: Most projects in this area either has no budget requested or are fit with delay. This highlights the fact that this future expansion node of Stellenbosch will enjoy capital expenditure, but the majority thereof will realise later on.
- Koelenhof: The Koelenhof node development is still in concept phase. One this area has a clear spatial vision, the municipality can respond with capital projects required to facilitate such expansion.
- Vlottenburg: The potential that boasts within this area is unprecedented. It is for that reason that most of the capital projects within the Vlottenburg area has been fit as per the budget scenario module of CP3.
- Stellenbosch Central: It is clear from the figure above that Stellenbosch central is house of a variety of projects, and so a variety of fit statuses is assigned to this part of the municipality.
- Franschoek: Small capital projects within the Franschoek area has been fitted to the Capital Expenditure Framework. The majority has been fitted with delay which means that other projects across the municipality has been prioritised and fitted to the budget first.

10 CEF spatial targeting analysis

The objectives of this section is to:

- Provide context to the degree of spatial targeting relative to the Functional Areas, for a 10 year period
- Provide context to the degree of spatial targeting relative to the Priority Development Areas, for a 10 year period
- Provide detailed breakdown on the capital expenditure framework, for a 10 year period

The policies plans and programmes of any sphere of government are part of a basic methodology developed in public administration for the rational performance of governmental functions entrusted by law to the Government. The policies, plans and programmes stand in a tiered or hierarchical relationship with one another:

- At the first level in this hierarchy lies the formulation of a governmental policy, which in essence identifies the desired outcome or goal of the governmental functions in question which the particular sphere of government is entrusted with;
- The second level in this hierarchy consists of the development of a plan, setting out the preferred strategy or pathway by means whereof the desired outcome or goal of the governmental functions in question will be pursued; in other words, the plan at this level manifests a strategic choice at a high level between the various options available for realising the adopted policy, inter alia taking into account the availability of resources; and
- At the third level in this hierarchy then follows the identification of programmes, each of which details how various aspects of the approved plan will be implemented so that the desired outcomes or goals of the governmental functions in question can be achieved and the objectives of the adopted policy can be realised.

Within the context of this methodology, these three instruments (policies, plans and programmes) operate on a higher level of strategic assessment and decision-making. At the next level different projects are the implementation agents of programmes. Given the focus by government policy such as the National Development Plan, the Integrated Urban Development Framework and the Spatial Development Framework on spatial targeting, spatial justice, and spatial transformation projects are allocated to area-based programmes to ensure an integrated view on project roll out and true integrated spatial development. To take a disciplinary based view of programmes revert planning methodology back to a per-line-function mentality within the municipality and so move away from the integrational effort of the IUDF and CEF, and toward the historic silo-based planning style. This section will focus on the spatial, and otherwise defined, implications of the budget scenario developed in the previous section. The spatial analysis is on Stellenbosch's Functional Areas (FAs), Priority Development Areas (PDAs) and Wards. Within the three categories of analysis, please take note of the following:

- Duplication of a project budget is possible as geometric shape could possibly overlap, which result in double calculation, and;
- No intersect refers to a portion of projects that falls outside the functional areas' jurisdiction.

10.1 FA capital expenditure targeting

For this part of the section, the 2021/2022 capital expenditure framework has been expressed in terms of the FAs over the 10-year horizon. It seeks to identify the degree of spatial targeting achieved by the municipality. Table 10-1 indicates that 43% of the capital expenditure is occurring in the Urban Node functional area. In its current planning, the municipality focuses its growth stimulation within its urban nodes. The Rural Area and Rural Node functional areas total 24% of the capital expenditure. The implications of the municipality's rural area landscapes are rural (farming)-based developments, and do not make up a large portion of capital expenditure. A total of 22% of the capital expenditure is at City Wide level and 7% is targeted to the municipality's Administrative Head Quarters.

Figure 10-2: FA capital expenditure spatial targeting analysis

10.2 PDAs capital expenditure targeting

For this part of the section, the 2021/2022 capital expenditure framework has been expressed in terms of the PDAs, over the 10-year horizon. It seeks to identify the degree of spatial targeting achieved by the municipality. The PDA's are derived from the Stellenbosch mSDF and spatialises the focus of the municipality in terms of development priorities. This analysis are more focussed on specific developmental alignment with the municipality's spatial vision. Table 10-2 is indicative of a total of 46% of the capital expenditure is not directly spatial targeted towards PDA's as 25% is allocated to the Rest of the Municipality PDA and the other 21% spatial targeting is at a City Wide level. A total of 25% of the capital expenditure is towards the Residential PDA's such as Stellenbosch North, Klapmuts and Ida's Valley. Intensive mix use development makes a total 8% of the capital expenditure's PDA spatial targeting. Figure 10-4 is shows that the Tourism, commercial, residential PDA is primarily located in Franschhoek. Some capital expenditure occurs in that area because Franschhoek falls within the municipality's urban node and it is *"regarded as the second most significant settlement in the municipality, after Stellenbosch town"* (Stellenbosch mSDF 2019, p.75). Please note that the Commercial/ mixed use node PDA has a capital expenditure of less than R100. This is due to the location of the project(s) works locations that have hit the boundary of the PDA, therefore contributing to the budget count in that PDA.

Figure 10-4: PDA capital expenditure spatial targeting analysis

10.3 Ward-based capital expenditure targeting

The 2021/2022 capital expenditure framework has been expressed in terms of ward-based spatial targeting over the 10-year horizon. It seeks to identify the degree of spatial targeting achieved by the municipality. Figure 10-5 and Table 10-1 are indicative of capital spent within specified wards, where the total of the capital distribution is 69% over 21 wards, out of a possible 22. A total of 21% of the capital expenditure is at a City-Wide level and not spatially targeted to a specific ward – but rather all of the wards. Figure 10-6 illustrates that the ward-based capital expenditure of the municipality is targeted towards Stellenbosch Town, Klapmuts, Kayamadi, Jamestown and Franschhoek. However, the capital expenditure in these areas might vary in strategic priority and needs. Therefore, the prioritisation and budget scenario mechanisms applied to this analysis help ensure a more targeted and relevant address of capital expenditure throughout the municipality.

Figure 10-6: Ward-based capital expenditure spatial targeting analysis

10.4 Discipline-based capital expenditure analysis

Table 10-4 is indicative of the Electricity and “Other” discipline that make up 20% of the capital expenditure in the 10-year analysis period. Capital expenditure in the Electricity discipline fluctuates

greatly throughout the analysis period. This could be as a result of projects that are indeed “programmes”, a cluster of projects, within the discipline. The impact thereof is the significant amount(s) of capital expenditure. In order to ensure financial sustainability and have a more realistic spread over the 10-year horizon outer-year expenditure should be revised. The Roads and Water Supply disciplines make up 18% of the capital expenditure respectively and Sanitation is 11%. The abovementioned disciplines make up the majority of infrastructure-led capital spending – which correlates with the infrastructure focus of the municipality. Of concern is that no asset type that relates to Storm water is noted; however, this could be a function of classification, rather than actual projects not having any capital in this regard. Often storm water management is included as part of road design. Community Assets discipline makes up 7%, and the Solid Waste and Transport disciplines make up 3% of the capital expenditure respectively, the second being attributed to the inter-governmental approach to waste management.

The discipline-based budget split has been compiled based on the mSCOA project segment category per project. Please refer to Table 10-5.

Table 10-5: mSCOA – Project type category and discipline relationship

| Discipline | MSCOA - Type Category |
|------------------|---|
| Community Assets | Community Assets |
| Electricity | Electrical Infrastructure |
| Other | Biological or Cultivated Assets |
| Other | Computer Equipment |
| Other | Expanded Public Works Programme |
| Other | Furniture and Office Equipment |
| Other | Heritage Assets |
| Other | Indigent and Cultural Management and Services |
| Other | Information and Communication Infrastructure |
| Other | Intangible Assets |
| Other | Investment Properties |
| Other | Machinery and Equipment |
| Other | Meter Conversion and Replacement |
| Other | Other Assets |
| Other | Spatial Planning |
| Other | Strategic Management and Governance |
| Other | (blank) |
| Roads | Roads Infrastructure |
| Transport | Transport Assets |
| Sanitation | Sanitation Infrastructure |
| Solid Waste | Solid Waste Infrastructure |
| Stormwater | Storm water Infrastructure |
| Water Supply | Water Supply Infrastructure |

10.5 Asset type capital expenditure analysis

The capital budget analysis by mSCOA asset classification, is shown in the figure below. From the diagram, it is clear that the Roads Infrastructure asset group represents the majority portion of the 10-year capital expenditure. The Water supply and Electrical Infrastructure groups make up the other large capital spending of the municipality, while Community Assets, Other Assets and Transport Asset types benefits the least. There are some asset type strings, specifically asset type classifications that do not go down to the same level of categorisation - hence the term “lowest level – not applicable” on the sheet. This does not mean there is a lack of data, but rather a lack of a request or an option to capture more detail per project.

[illegible]

The IUDF guides municipalities to reconfigure urban spaces, from the inherited segregated spatial structure form to an integrated and optimally functional built environment. In order to do that noteworthy steps should be taken toward redeveloping and reconfiguring the spatial structure of today. One step towards achieving the vision of the IUDF is to identify the capital expenditure towards non-poor poor communities. The CEF guidelines, in this regard, claims that a municipality should have the ability to report on the ratio of capital expenditure in non-poor and poor areas. This is however a difficult task for the following reasons:

- The definition of “non-poor”: “poor” is not clear;
- Municipal wide information that relates to metrics qualifying one as “indigent” is not commonly available;
- Various criticism exists for only using income as a measure as it does not necessarily relate to elements such as housing structures, access to services, levels of services, education, population density, household dynamics etc;
- The majority of data sources relies on pseudo-realistic interpretations of the number of people within a specific area, and;
- By framing the question of non-poor: poor expenditure with respect to the current urban form, together with the principle to increase capital expenditure in non-poor areas, forces the municipality to perpetuate the segregates’ spatial structure.

Regardless of the technical pitfalls noted above, it is still possible to take a relative simplistic view on where the non-poor and poor population is situated within the municipality, followed by where the capital expenditure occurs which enables the municipality to determine the non-poor: poor capital expenditure ratio.

10.6.1 Stepwise process to calculate the non-poor: poor capital expenditure ratio

The following section plot out the process used to calculate the non-poor: poor capital expenditure ratio.

- Step 1: Generate 500m hexagon grid
- Step 2: Determine household distribution
- Step 3: Identify households per hexagon
- Step 4: Calculate household income ratio per hexagon
- Step 5: Calculate capital expenditure per hexagon
- Step 6: Calculate capital expenditure per income class

10.6.2 Non-poor: poor capital expenditure ratio

The following section will discuss the results after applying the poor vs non poor calculation methodology. The most significant finding of the results is that over the next ten years, for every rand spent on the non-poor, a rand will be spent on the vulnerable areas and communities of Stellenbosch. This trend holds true from the 2021/22_MTREF throughout the 10-year analysis period. The years 2022/23, 2024/25, 206/27 and 2028/29 see a slight increase in spending towards the poor population. However, in 2030/31, there is a slightly lesser spend. Overall, the ratio illustrates a good indication of an integrated planning approach and equitable expenditure – specifically deriving from the principles of spatial targeting.

11 Capital expenditure implementation plan

The objective of this section is to:

- Provide insight in the implementation component of the CEF through a breakdown of the 3-year MTREF budget.

11.1 2021/2022 – 2023/24 Budget Analysis

Once the ten year Capital Expenditure Framework has been set up as a result of the prioritisation and budget scenario process, a three year Capital Expenditure Implementation follows. In order to manage the Capital Expenditure Implementation; National Government, through the MFMA has established the Medium Term Revenue and Expenditure Framework (MTREF). The MTREF is a rolling three-year expenditure planning tool and defines the expenditure priorities for a period of three years.

This section depicts the first three years of implementation. It shows an estimation of the following implementation frameworks, however, one must take into cognisance of the fact that the municipal planning and implementation process is ongoing and that the implementation framework will be adjusted as new capital demand is introduced to the Capital Expenditure Framework.

It is important to note that the Capital Expenditure Framework process must be aligned with the municipal budgeting process. This document will be submitted for approval with the final MTREF budget. The first three years therefore aligns at 100% with the MTREF budget.

11.1.1 2021/2022 MTREF Capital Budget by Financial year

The budget analysis will be done in terms of the total Capital Expenditure Framework. In some instance capital expenditure in the MTREF might seem without a context, but understanding that the budget is drafted with a ten year Capital Expenditure Framework in mind, it will be easier to rationalise several findings.

Given that the whole budgeting process up to this point has been done with the assistance of the CP3 platform, it is now possible to analyse the budget not only in terms of the total Capital Expenditure Framework, but also in terms of key project related information. It is therefore essential to plan on a project level – this enables the grouping and analysis of several project attributes.

Figure 11-1 shows a consistent spread of capital budget allocation over the three financial years within the MTREF. The outer year is the smallest amount of the MTREF, with the highest probability of change. The slightly higher capital budget for the 2021/2022 financial year, might be an indication of capital projects not being implemented during the 2020/2021 financial year due to COVID-19 or the maturity level of the project that can be implemented now due to various other reasons. The commitment of capital projects within the first year will have an impact on the following financial years, and capital projects should therefore be well planned to prevent the pressure on the following financial years. The reducing total capital expenditure planned in the analysis period signals a risk averse strategy of the municipality regarding the uncertainty brought about by COVID-19 and takes into account the ability to recover on investments to be made for the next three years. This aligns with the financial strategy of the municipality.

Figure 11-1: 2021/2022 MTREF Capital Budget per financial year

Table 11-1: MTREF Capital Budget per financial year

| Financial Year | Total | % of Total MTREF |
|----------------|-----------------------|------------------|
| 2021 / 2022 | R397 763 924 | 34,18% |
| 2022 / 2023 | R384 444 768 | 33,04% |
| 2023 / 2024 | R381 524 643 | 32,78% |
| Total | R1 163 733 335 | 100,00% |

11.1.2 2021/2022 MTREF Capital Budget by Unit

From Figure 11-2 the MTREF Capital budget allocation towards Infrastructure services is the highest overall towering over the other units within the organisation. The Infrastructure Services unit by tradition and nature has the most 'expensive' capital projects and the current budget allocation is true to this reality. However, it should be noted that the impact of capital projects should also be measured from an Economic Impact, spatial targeting and needs perspective and not just in terms of quantity of capital investment. The quality measure of each capital projects is as important as the capital investment amount of budget allocations within the respective units of the organisation.

11.1.3 2021/2022 MTREF Capital budget by mSCOA Expenditure Type

The largest portion of the capital budget is allocated towards Infrastructure capital projects at 71% of the total MTREF capital budget. This highlights the focus of development enhancing capital expenditure within Stellenbosch, enabling the municipality to provide infrastructure services to all people within Stellenbosch.

Figure 11-3: 2021/2022 MTREF Capital budget by mSCOA Expenditure Type

11.1.4 2021/2022 MTREF Capital budget by Functional Area

The MTREF capital budget indicates a large amount towards the Rural functional area and consistently over the three financial years within the Urban node. The Rural Functional area is the largest functional area per square kilometre of the identified functional areas, and the spread of the investment within the Rural Functional area can be seen throughout the municipal jurisdiction. Thus, the large amount allocated within the Rural functional area might not produce high impact outcomes but rather indicate that the Rural Functional area is served from a capital investment perspective. Based on the overall percentage of the MTREF capital budget allocation, Urban Node has 32,75% of the total MTREF, highlighting the development focus of the municipality towards urban areas investments. This signals high potential high impact investment relative to the area of the Urban Nodes.

A portion of 12% is not Mapped and 16% is City Wide projects. The 2022/2023 financial year indicates a high amount allocated towards City wide projects, further investigation should be done to enable better spatial targeting of site-specific investment and reducing the non-spatial budgeted amounts.

Capital projects that are spatial referenced provides the municipality with a better understanding of investment and strengthens the future planning of specific areas. Future capital projects should be spatially reference to a larger percentage to ensure spatial targeting of the capital budget and project and area specific investment. The 5,63% capital budget allocation within the MTREF towards Administrative HQ is reasonable.

Figure 11-4: 2021/2022 MTREF Capital budget by Functional area

Figure 11-5: 2021/2022 MTREF Capital budget Spatial Targeting - Functional Areas

11.1.5 2021/2022 MTREF Capital budget by Priority development area

The capital budget based on the Priority development area's spatial layer depicted in Figure 11-6 shows the budget allocation per priority development area within Stellenbosch. The priority development areas that have reasonable investments amounts are, CBD, University, Commercial, Student housing with 8,41% in the total MTREF. Residential Stellenbosch North has 11,73% of the total MTREF budget allocation. The focus of most of the capital projects within this priority development area is towards better infrastructure services and the formalisation of residential areas, enabling a better Stellenbosch for all residents.

Residential Klipmuts with 4,14% of the total MTREF budget allocation indicates the development drive towards better service delivery and opening of future development potential in the area. The highest amount of MTREF capital budget is outside the priority development areas, a future effort should be made to ensure targeted investments within the priority development areas or additional Priority development areas should be considered. Some of the capital projects outside of the priority development areas may have a positive influence on the priority development areas as it may relate to large infrastructure projects that cannot be located within the demarcated areas but serves these areas with water/ sanitation or electricity in terms of capacity upgrades and improved quality of services.

11.1.6 2021/2022 MTREF Capital budget by electoral wards

With a view on the MTREF budget within the electoral wards layer of Stellenbosch Local Municipality, the ward with the largest amount allocated within the MTREF is ward 20. Ward 20 is located on the western border of the municipality with Vlorentburg part of this ward. Vlorentburg has 2 large infrastructure projects boosting the infrastructure investment in the area and providing need additional infrastructure to the area. These large projects also enables future development potential to the area. Ward 3 has a reasonable amount of the capital budget allocated towards the upgrading of Wemmershoek Waste Water treatment works as the largest capital project within this ward. Ward 2 has a large amount of capital allocated within the 2021/2022 financial year, with the Upgrading of the Pniel waste water treatment works as the main capital contributor.

12 Annexure

12.1 Annexure 1: Prioritisation model

Annexure 1: Prioritisation Model

The capital prioritisation model criteria will be discussed in more detail under the five (5) themes of the model, namely:

- Strategic alignment;
- Spatial alignment;
- Financial alignment;
- Economic alignment;
- Social alignment; and
- Technical alignment.

12.1.1 Strategic Alignment

The strategic alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget aligns with the organisations developmental objectives as well as strategic outcomes set out in the strategic guiding document of the municipality. The policy alignment score is calculated within five distinct categories¹⁵, namely:

- IDP Outcome 1: Valley of Possibility;
- IDP Outcome 2: Dignified Living;
- IDP Outcome 3: Good Governance and Compliance;
- IDP Outcome 4: Green and Sustainable Valley; and
- IDP Outcome 5: Safe Valley.

¹⁵ These categories are aligned with the IDP Outcomes.

Figure 12-1: Capital Prioritisation Model: Strategic Alignment**a. IDP Outcome 1: Valley of Possibility****Table 12-1: Scoring Criteria - Departmental Classification**

| Category | Description |
|-----------------------|---|
| Definition | Specific departments' mandate is to deliver specific services. Those services correlates with the definition of this IDP outcome. |
| Branch Weight | 20 |
| Input Variable | The department by which the project is owned. |
| Process | =if(x in ("Community and Protection Services","Infrastructure Services","Planning and Economic Development"),100,0) |
| Mathematical Operator | Value achieved by the project is passed through to the parent scoring branch. |

Table 12-2: IDP Alignment

| Category | Description |
|-----------------------|---|
| Definition | IDP alignment measures the alignment of a project with respect to the different IDP outcomes. |
| Branch Weight | 10 |
| Input Variable |  <p>The screenshot shows a 'Technical Information' window with a 'Strategic Outcomes' tab selected. It displays a grid of outcomes from the National Development Plan, National IDP, Provincial Strategic Outcomes, and Provincial Strategic Objectives, mapped to IDP Outcomes. A green bar at the bottom indicates a 100% alignment score.</p> |
| Process | If a project aligns in terms of this specific IDP outcome, it scores 100% on this branch, if not, it scores 0 on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-3: Scoring Criteria - Transit Oriented Development

| Category | Description |
|---------------|---|
| Definition | Transit Oriented Development (TOD) aims to identify a hierarchy of Investment priority areas towards deification and mixed-use investments. |
| Branch Weight | The different TOD zones have been weighted differently, as they contribute differently to the priority of the municipality: |

| Category | Description |
|----------|--------------------------------|
| | TOD Consent ration Zones: 100% |
| | TOD Promotion Zones: 75% |
| | TOD Supportive Zones: 50% |

Input Variable

| | |
|-----------------------|--|
| Process | If the spatial intersect returns a result where a project intersect with the TOD zone, the maximum possible score is returned and passed through to the parent branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-4: Scoring Criteria - Empowering Poor Communities - Housing

| Category | Description |
|---------------|--|
| Definition | The provision of quality housing across a range of housing typologies and tenure options is a key focus for the municipality. Therefore, given the focus on providing housing stock, the relevant departments are given additional priority based on the fact that they are responsible for meeting the housing stock mandate of the municipality. |
| Branch Weight | 40 |

Table 12-5: Scoring Criteria - Empowering Poor Communities - Planning

| Category | Description |
|-----------------------|--|
| Definition | Local economic development is a key enabler of possibilities. By identifying projects of this nature, within poor communities, the maximum return on investment will be achieved. |
| Branch Weight | 40 |
| Input Variable | <p>The following departments are pre-filtered during this scoring test, so that only the relevant projects are eligible to score on this branch:</p> <p>Development Planning: Spatial Planning</p> <p>Spatial Planning: Planning and Development</p> <p>A further spatial test is conducted, to see if the said departments' projects are within targeted communities.</p> |
| Process | All planning project receive additional score based on their alignment with the municipality's mandate of empowering poor communities. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

b. IDP Outcome 2: Dignified Living
Table 12-6: Scoring Criteria - Departmental Classification

| Category | Description |
|-----------------------|--|
| Definition | Specific departments' mandate is to deliver specific services. Those services correlate with the definition of this IDP outcome. |
| Branch Weight | 20 |
| Input Variable | The department by which the project is owned. |
| Process | =if (x in ("Infrastructure Services", "Community and Protection Services"),100,0) |
| Mathematical Operator | Value achieved by the project is passed through to the parent scoring branch. |

Table 12-7: Scoring Criteria - IDP Alignment

| Category | Description |
|----------------|---|
| Definition | IDP alignment measures the alignment of a project with respect to the different IDP outcomes. |
| Branch Weight | 10 |
| Input Variable |  |

| Category | Description |
|-----------------------|---|
| Process | If a project aligns in terms of this specific IDP outcome, it scores 100% on this branch, if not, it scores 0 on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-8: Scoring Criteria - Clean and safe target communities

| Category | Description |
|----------------|--|
| Definition | A component of being able to live in a dignified manner, is providing one of man's most basic need – safety. By prioritising specific departments responsible for safety and cleanliness, within specific areas, a clean and safe community will be achieved. |
| Branch Weight | 50 |
| Input Variable | <p>The following departments, with projects within the area depicted below are eligible to score on this branch:</p> <p>Traffic Engineering</p> <p>Waste Management: Solid Waste Management</p> <p>Parks, Rivers and Area Cleaning</p> <p>Fire and Rescue Services</p> <p>Law Enforcement and Security</p> |

| Category | Description |
|----------|-------------|
|----------|-------------|

| | |
|-----------------------|---|
| Process | The following departments receive additional score based on their mandate and their works location. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-9: Scoring Criteria - Basic Services for target communities

| Category | Description |
|----------------|--|
| Definition | Basic service delivery is one of the most important targets of the municipality, as well as national government. |
| Branch Weight | 50 |
| Input Variable | <p>The following units enjoys the opportunity to score on this branch:</p> <p>Infrastructure Services</p> <p>Planning and Economic Development</p> <p>The said units' projects must be within these areas:</p> |

Table 12-11: Scoring Criteria - IDP Alignment

| Category | Description |
|-----------------------|---|
| Definition | IDP alignment measures the alignment of a project with respect to the different IDP outcomes. |
| Branch Weight | 10 |
| Input Variable |  |
| Process | If a project aligns in terms of this specific IDP outcome, it scores 100% on this branch, if not, it scores 0 on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-12: Scoring Criteria - MSCOA Compliance

| Category | Description |
|---------------|---|
| Definition | mSCOA is an institutional arrangement set out by national Treasury intended for amongst other to instil good governance practices within the municipality. It represents a business process focus, that standardises all municipal accounting practices and reporting across the country. In order to be mSCOA compliant, a project must contain several segments of information. |
| Branch Weight | 60 |

| Category | Description |
|-----------------------|--|
| Input Variable | Functional Segment (20)
Item Segment (20)
Project Segment (20)
Regional Segment (20)
Cost Segment (20) |
| Process | If a project contains the lowest level GUID information on the following segments, it will be eligible to score. |
| Mathematical Operator | The sum of all the values achieved by the project is passed through to the parent scoring branch. |

d. IDP Outcome 4: Green and Sustainable Valley

Table 12-13: Scoring Criteria - Departmental Classification

| Category | Description |
|-----------------------|--|
| Definition | Specific departments' mandate is to deliver specific services. Those services correlate with the definition of this IDP outcome. |
| Branch Weight | 20 |
| Input Variable | The department by which the project is owned. |
| Process | =if(x in ("Environmental Management: Urban Greening","Environmental Management: Nature Conservation","Disaster Management","Parks, Rivers and Area Cleaning"),100,0) |
| Mathematical Operator | Value achieved by the project is passed through to the parent scoring branch. |

Table 12-14: Scoring Criteria - IDP Alignment

| Category | Description |
|-----------------------|---|
| Definition | IDP alignment measures the alignment of a project with respect to the different IDP outcomes. |
| Branch Weight | 20 |
| Input Variable |  |
| Process | If a project aligns in terms of this specific IDP outcome, it scores 100% on this branch, if not, it scores 0 on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-15: Scoring Criteria - Density of Area

| Category | Description |
|---------------|---|

Concentration Zone (100)

Promotion Zone (75)

Supportive Zone (50)

Process

If a projects' work location are within the above mentioned areas, it will score and be eligible to score.

| Category | Description |
|-----------------------|---|
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-16: Scoring Criteria - Portfolio

| Category | Description |
|-----------------------|---|
| Definition | A portfolio of projects is a specific grouping of projects all aligned with a similar characteristic or mandate. In this case, four portfolios are used to test this branch of the prioritisation model. |
| Branch Weight | 30 |
| Input Variable | Projects belonging the following portfolios are eligible to score on this branch.

Public Transport Portfolio (100)

NMT Portfolio (100)

Renewable energy Portfolio (100)

Carbon Offset Portfolio (100) |
| Process | If a project is part of a specific portfolio, it is eligible to score on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

e. IDP Outcome 5: Safe Valley**Table 12-17: Scoring Criteria - Departmental Classification**

| Category | Description |
|----------------|---|
| Definition | Specific departments' mandate is to deliver specific services. Those services correlates with the definition of this IDP outcome. |
| Branch Weight | 65 |
| Input Variable | The department by which the project is owned. |
| Process | =if(x in ("Community and Protection Services"),100,0) |

| Category | Description |
|-----------------------|---|
| Mathematical Operator | Value achieved by the project is passed through to the parent scoring branch. |

Table 12-18: Scoring Criteria - IDP Alignment

| Category | Description |
|---------------|---|
| Definition | IDP alignment measures the alignment of a project with respect to the different IDP outcomes. |
| Branch Weight | 65 |

Input Variable

The screenshot displays the 'Technical Information' section of the IDP Alignment tool. It features a navigation bar with tabs: General, Organisation Entity, Project Contacts, Project Scope, Strategic Outcomes (selected), Questions, Risk Register, and External References. Below the navigation bar, there are three main columns: 'Strategic Outcomes', 'National Development Plan', and 'National IUDF'. The 'Strategic Outcomes' column lists various outcomes such as '1. Basic Service Delivery', '2. Local Economic Development (LED)', '3. Civil Governance and Public Participation', '4. Municipal Environmental Development and Transformation', '5. Municipal Financial Viability and Management', '6. KPM, Not Applicable', 'Outcome 1: Improve quality of basic education', 'Outcome 2: A long and healthy life for all South Africans', 'Outcome 3: All people in South Africa feel safe', 'Outcome 4: Decent employment through inclusive economic growth', 'Outcome 5: A skilled and capable workforce to support inclusive growth', 'Outcome 6: An efficient, competitive and responsive economic infrastructure network', 'Outcome 7: Vibrant, sustainable and accessible rural communities with food security for all', 'Outcome 8: Sustainable human settlements and improved quality of life', 'Outcome 9: A responsive, accountable and efficient local government system', and 'Outcome 10: Environmental assets and natural resources that'. The 'National Development Plan' column lists 'NDP, Not Applicable', 'Outcome 1: Improve quality of basic education', 'Outcome 2: A long and healthy life for all South Africans', 'Outcome 3: All people in South Africa feel safe', 'Outcome 4: Decent employment through inclusive economic growth', 'Outcome 5: A skilled and capable workforce to support inclusive growth', 'Outcome 6: An efficient, competitive and responsive economic infrastructure network', 'Outcome 7: Vibrant, sustainable and accessible rural communities with food security for all', 'Outcome 8: Sustainable human settlements and improved quality of life', 'Outcome 9: A responsive, accountable and efficient local government system', and 'Outcome 10: Environmental assets and natural resources that'. The 'National IUDF' column lists 'IUDF, Not Applicable', 'Effective Cooperative Governance', 'Environmental Well Being', 'Job Creation', 'Economic Growth', 'Social Inclusion', 'Sustainable', 'Urban', 'Inclusive', and 'Integrative'. The 'Provincial Strategic Outcomes' column lists 'Provincial Outcomes, Not Applicable', 'Create opportunities for growth and jobs', 'Embed good governance and integrated services, delivery through partnerships and social alignment', 'Enable resilient, sustainable, quality and inclusive living environment', 'Improve education outcomes and opportunities for youth development', 'Promote Wellbeing, Safety and Public Social Life', 'Provincial Strategic Objectives' (selected), 'Provincial Objectives, Not Applicable', 'Economic growth in Strategic Sectors - tourism, agri, growing and all 8 key services', 'Energy Security in the Western Cape', 'Enhanced municipal governance capacity in the Western Cape Government and municipalities', 'Improve broadband access for the economy', 'Improve family support in children and youth, and facilities development', 'Improve the efficiency of the region's transport system', 'Improve the level of language and mathematics skills', 'Improve the number of artisan and technical skills', and 'Improve the regulatory environment to enhance the rate of doing business'. The 'IDP Outcomes' column lists 'IDP, Not Applicable', 'Identified Living', 'Good Governance and Council', 'Green and Sustainable Valley', 'Safe Valley', 'Valley of Prosperity', and '100 %'.

| | |
|-----------------------|---|
| Process | If a project aligns in terms of this specific IDP outcome, it scores 100% on this branch, if not, it scores 0 on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

12.1.2 Spatial Alignment

The spatial alignment goal or theme of the prioritisation model evaluates the degree to which projects aligns with the spatial development framework and other spatial targeting objectives set out in various strategic documents of the municipality (i.e. IDP, mSDF, CIF etc.). The alignment of projects to the spatial targeting areas of the municipality are scored according to the following criteria:

- Spatial Development Framework; and
- Inside Urban Edge.

These criteria measured under these sub-branches seek to ensure that projects within the municipal budget align with the spatial structure or spatial development objectives of the municipality.

Figure 12-2: Capital Prioritisation Model: Spatial Alignment

a. Spatial Development Framework

Table 12-19: Scoring Criteria - Functional Areas

| Category | Description |
|-----------------------|---|
| Definition | The IUDF requires specific focus on functional areas within the municipality. These boundaries are determined not by the jurisdictional boundary of the municipality, but rather the economic effect of a certain node within the municipality. |
| Branch Weight | 60 |
| Input Variable | <p>The four Functional areas have been defined as:</p> <p>Klapmuts (50)</p> <p>Koelenhof (50)</p> <p>Vlottenburg (50)</p> <p>Stellenbosch Central (50)</p> |
| Process | If a project's works location is within one of the functional areas it will be partially elevated on this branch. If it is within more than one, it will be elevated in totality. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

Table 12-20: Scoring Criteria - Spatial Development Framework

| Category | Description |
|-----------------------|--|
| Definition | The spatial Development Framework is the strategic guiding document of the municipality. A hierarchy of nodes has been defined in which development must be promoted in order to control urban sprawl, and to ensure effective and efficient investment. |
| Branch Weight | 40 |
| Input Variable |  |
| Process | If a project is within the identified areas, it will enjoy a relative elevation of its score on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

b. Inside Urban Edge**Table 12-21: Scoring Criteria - Urban Edge**

| Category | Description |
|---------------|---|
| Definition | Urban sprawl is a real issue in South African municipalities and should be managed in such a way that development correlates with the strategic vision of the city; in a sustainable, yet integrated fashion. |
| Branch Weight | 10 |

12.1.3 Financial Alignment

The financial alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget are considered to be credible, affordable, funded, applied to expand the rateable asset base and improving the fiscal position of the municipality. The financial alignment score is calculated within six distinct categories, namely:

- Fiscal deficit as % of GDP;
- Affordability;
- Confidence in Cost Estimate;
- Co-Funding;
- Lifespan of asset; and
- Opex Consequence.

Figure 12-3: Capital Prioritisation Model Financial Alignment

a. Fiscal deficit as % of GDP

Table 12-22: Scoring Criteria - Change in fiscal position

| Category | Description |
|----------------|--|
| Definition | <p>The 'fiscal deficit to GDP ratio'-indicator measures changes in the deficit position of the City/Province relative to changes in economic activity, which again is a result of the project/programme/portfolio of projects. The indicator number will always be very small, but need to be interpreted as the % improvement (if positive) or deterioration (if negative) of the deficit relative to GDP.</p> <p>The indicator is expressed as the change in fiscal deficit position (measured in terms of R'000) for every R1m change in GDP. Example: a number of 0.00001 need to be interpreted as a R10000 improvement in the fiscal position, i.e. a R10000 decline in the deficit of the City/Province per R1m GDP gains. Therefore, in the case where a project results in R50 mil additional GDP, the deficit should decline with R500 000.</p> <p>However, the primary value of the fiscal indicator is (1) to determine whether the project/programme will have a POSITIVE impact on the fiscal position, i.e. result in a decline in the deficit, and (2) to compare various projects in terms of their impact on the City's (Province's) financial position.</p> |
| Branch Weight | 10 |
| Input Variable | Economic Impact Model Outputs |
| Process | <p>The indicator calculated by the EIM is normalised by multiplying the calculated EIM value (percentage points) with a common denominator namely a million. This normalises the indicator to Rand per R1mil GDP increase. The last step in the process is to rank the actual outcomes linearly from most positive to least positive. This results in the typical graph shown below. The project with the highest score, scores 100 and the project with the lowest score, scores 0. The rest of the projects scores proportional to their rank.</p> |

| Category | Description |
|-----------------------|--|
| |  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

b. Affordability

Table 12-23: Scoring Criteria - Affordability (75th Percentile Test)

| Category | Description |
|------------|---|
| Definition | <p>With “Affordability”, all the project budget demands summed over the MTREF period is plotted from smallest to largest. The 75th percentile value is calculated across this range of values. This value is used as an approximation of what may be considered as the turning point in the budget range beyond which project can be considered to become increasingly expensive. The term “expensive” is used with great circumspection and should not be used beyond the context of this model. It simply is an indicator representative of the specific range of budget values that were requested over the MTREF for this specific budget cycle.</p> <p>Projects that are “cheaper” than the 75th percentile does not have a great variance in requested budgets and can all be drawn in a relatively flat curve on a graph as shown on the graph below. Projects that are more expensive than the 75th percentile, increases in budget exponentially and rapidly has the “crowding out” effect. “Crowding out” means that a single “expensive” project budget may “crowd out” numerous smaller project budgets. In terms of service delivery, having more projects visibly being implemented often has a greater impact than one “mega project”. There are of course many exceptions to this assumption. This criterion simply penalises – from a purely financial budgeting perspective – projects that are excessively expensive.</p> |

| Category | Description |
|----------|---|
| | It must be kept in mind that this is simply one criteria out of many in the model, and does not have an overriding effect. Contextually though, when looking at the financial planning aspects of a municipality purely, without consideration of anything else, the “expensiveness” of a project is a fundamental consideration. |

Branch Weight 30

Input Variable The input values for this criterion is the total capital budget requested over the MTREF, the 75th percentile of all capital budget requests over the MTREF and the maximum capital budget request over the MTREF.

Process Score = 100 if calculated value ≤ 75th percentile of MTREF
 The score decays from 100 to zero using linear regression for any MTREF budget that is more expensive than the 75th percentile MTREF budget (over the entire range of budgets for all projects).

Mathematical Operator Calculated value achieved by the project is passed through to the parent scoring branch.

c. Confidence in Cost Estimate

Table 12-24: Scoring Criteria - Confidence in Cost Estimate

| Category | Description |
|-----------------------|---|
| Definition | <p>The “Credibility” of the budget that is being asked for, is measured in by testing the credibility or accuracy of the cost estimate as well as the estimated lifespan of the asset for which funding is requested. The scale provided for the evaluation of budget estimate accuracy, is the scale provided by National Treasury in terms of their CIDMS guidelines. Better accuracy is awarded as well as a longer estimated lifespan of the asset under evaluation.</p> <p>The project owner needs to indicate the accuracy of the budget estimate based on the following scale:</p>  |
| Branch Weight | 30 |
| Input Variable | The input variables are taken from the predetermined drop-down list representing the National Treasury prescribed ranges as contained in their CIDMS guidelines. |
| Process | <p>The scoring mechanism takes the form of a stepping function with each option carrying a representative score.</p>  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

d. Co-Funding

Table 12-25: Scoring Criteria - Co-funding

| Category | Description |
|-----------------------|---|
| Definition | <p>The “Co-Funding” criterion appraises how much of the requested capital is funded by sources other than the municipality’s own funds. The more co-funding by other sources, the more the project will score under this criterion. The logic behind this is two-fold. Firstly, the more external funding is used, the lesser is the burden on municipality’s own ability to fund the project. Secondly, some of the co-funding sources within a municipal environment is conditional and there are often time-limitations or conditions to these external sources.</p> <p>Therefore, if the funding is not utilised, the opportunity or availability of the funding expires or lapses. From a budgeting and planning perspective, a project that may be slightly lower down the ranks of priorities, but that has other sources of funding, may be prioritised more in order to gain the benefit from its implementation and the availability of funding to do so.</p> |
| Branch Weight | 10 |
| Input Variable | The input values for this criterion is the total capital budget requested over the MTREF and the percentage of co-funding over the MTREF. |
| Process |  <p>A maximum score of 100 is achieved under this criterion of the project is 100% co-funded by other sources. The more co-funding, the better the score here.</p> |
| Mathematical Operator | Calculated value achieved by the project is passed through to the parent scoring branch. |

e. Lifespan of asset

Table 12-26: Scoring Criteria - Lifespan of Asset

| Category | Description |
|-----------------------|---|
| Definition | The “Credibility” of the budget that is being asked for, is measured in by testing the credibility or accuracy of the cost estimate as well as the estimated lifespan of the asset for which funding is requested. The scale provided for the evaluation of budget estimate accuracy, is the scale provided by National Treasury in terms of their CIDMS guidelines. Better accuracy is awarded as well as a longer estimated lifespan of the asset under evaluation. |
| Branch Weight | 10 |
| Input Variable | <p>The input variables are taken from the predetermined drop-down list representing the National Treasury prescribed ranges as contained in their CIDMS guidelines.</p>  |
| Process | <p>The scoring mechanism takes the form of a stepping function with each option carrying a representative score.</p>  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

f. Opex Consequence

Table 12-27: Scoring Criteria - OpEx Consequence

| Category | Description |
|------------|---|
| Definition | Municipalities are faced with the conundrum of balancing spatial, social and economic transformation, whilst maintaining the existing asset base of the city. Spatial, social and economic transformation is often associated with the provision of new, quality infrastructure in support of liveable communities either in newly demarcated development areas or as part of upgrading severely marginalized communities, with a poor service provision history and a backlog of service delivery demands. |

| Category | Description |
|----------------|--|
| | A balanced approach to capital spending, focusing partially on the provision of new infrastructure, whilst maintaining the existing asset base and revenue stream is important. A fundamental consideration of all capital expenditure therefore must include the estimated OpEx burden that will result from the capital that is being spent. The OpEx burden is inevitable – a situation can however arise whereby the OpEx continues to grow to the extent that it starts to impact on the available CapEx. |
| Branch Weight | 10 |
| Input Variable | The input variables are taken from the predetermined drop-down list on CP3. |

Process

Mathematical Operator The highest score value on this branch that is achieved is passed through.

12.1.4 Economic Alignment

The economic alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget contributes to the growth of the municipal economy and improves the economic position of the residents within the municipality.

A macro-economic impact model (EIM) was developed for the municipality specifically to make use of the data from the CP3 system. The econometric model is specific for the municipality and draws from a sophisticated range of financial data, regional data, and population data sourced from StatsSA. As such, the EIM generates values for the impact of individual and portfolio capital projects in terms of a set of economic, socio-economic and fiscal indicators – for the City as a whole, as well as a selection of key sub-regions or ‘main places’.

The EIM is based on the outputs of a comprehensive suite of econometric models. The workings of the EIM are dynamic and consider the indirect City-wide impacts of projects and programmes – not only the localised ward-specific impact.

The EIM therefore captures the iterative, dynamic impacts of all of the role-players within the economy – households, business, government, foreign sector, as well as the full economic flow of goods, services, factors and money is accounted for, and an iterative computational process is utilised.

The outputs from the economic model is further augmented spatially by evaluating the alignment of the project’s location and affected area, with geographic areas that were graded across the entire municipal area in terms of its economic impact in a separate economic study that was conducted for this purpose.

The economic alignment score is calculated within two distinct categories, namely:

- Focus on targeted portfolios;
- Focus on impact; and
- Focus on people.

Figure 12-4: Capital Prioritisation Model: Economic Alignment**a. Focus on targeted portfolios****Table 12-28: Scoring Criteria - Targeted Portfolios**

| Category | Description |
|----------------|---|
| Definition | A portfolio of projects is a specific grouping of projects all aligned with a similar characteristic or mandate. In this case, four portfolios are used to test this branch of the prioritisation model. |
| Branch Weight | 10 |
| Input Variable | Projects belonging to the following portfolios are eligible to score: <ul style="list-style-type: none"> Agriculture Sector Wealth Management and Finance Sector Education Sector Renewable Energy Sector |

| Category | Description |
|-----------------------|---|
| | Tourism Sector |
| Process | If a project is part of a specific portfolio, it is eligible to score on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

b. Focus on impact

Table 12-29: Scoring Criteria - Economic Activity (Income) in terms of GDP

| Category | Description |
|----------------|--|
| Definition | <p>GDP measures/represents the value of economic activity (income) that has been generated across ALL industries as a result of the project/programme/portfolio of projects. It takes into account the value of taxes and subsidies on both production and consumption goods/services. As such, the GDP figure is presented at 'market price' value. It is measured in nominal Rand, i.e. at current prices. The number represents the TOTAL, NET impact of the project, i.e. taking into account the 'winners' and 'losers' in the economy; the benefits and costs associated with the project.</p> <p>The number is not 'time'-bound, in the sense that the GDP figure represents the full impact, once the project investment/spending has had time to 'mature', i.e. the investment/spending impact has filtered ('rippled') through the economy and the feedback have stabilised. As such, the number is an indicating of the net POTENTIAL income impact of the project/programme, assuming no other interventions/interruptions, etc.</p> <p>The GDP indicator is valuable in comparing the relative impact of different projects/programmes or portfolios of projects, in terms of the additional economic activity that they 'unlock' for every Rand invested and/or spent over the project implementation time-line. The GDP-indicator also provides a measure of the 'net tax revenue' available to government, but also the 'net tax burden' on producers and consumers.</p> |
| Branch Weight | 25 |
| Input Variable | Economic Impact Model Outputs |
| Process | The indicator calculated by the EIM is normalised by dividing the calculated EIM value with a common denominator namely the capital requested over the MTREF. This is done as a necessary step to establish comparability between projects and wards. The last step in the process is to rank the actual |

| Category | Description |
|-----------------------|--|
| | outcomes linearly from most positive to least positive. This results in the typical graph shown below. |
| |  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

Table 12-30: Scoring Criteria - Income per capita

| Category | Description |
|----------------|---|
| Definition | The “Income per Capita” indicator measures the Rand value of income (through GDP) per member of the population. It links the changes in economic activity (on the back of ‘matured’ implementation of the project spending on the GDP to household income and therefore presents a measure for income distribution as well as the effectiveness of the project in achieving socio-economic gains. |
| Branch Weight | 25 |
| Input Variable | Economic Impact Model Outputs |
| Process | The indicator calculated by the EIM is normalised by dividing the calculated EIM value with a common denominator namely the capital requested over the MTREF. This normalises the indicator to Rand per R1bn capital spending. The last step in the process is to rank the actual outcomes linearly from most positive to least positive. This results in the typical graph shown below. |

| Category | Description |
|-----------------------|--|
| |  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

Table 12-31: Scoring Criteria - Operational expenditure as percentage of GDP

| Category | Description |
|------------|---|
| Definition | <p>The 'operational expenditure to GDP'-indicator measures the impact of the project/programme/portfolio of projects on the operational expenditure of the City/Province, which include the wage bill impact of the project(s).</p> <p>Again, the indicator number will be very small, and also need to be interpreted as the % increase (if positive) in government expenditure relative to the project's income gains. The indicator is expressed in terms of a R'000 (thousand rand) increase in operational expenditure for every R1m change in GDP associated with the project(s). Therefore, a number of 0.00002 need to be interpreted as a R20000 increase in operational expenditure per R1m project income (GDP gains). In the case of a R50 mil additional GDP, the operational expenditure is expected to increase with R100 000.</p> <p>However, this number need to be interpreted along with the previous fiscal-indicator. The fiscal indicator ALREADY incorporates the changes in operational expenditure. Therefore, in the case where the fiscal deficit-indicator is positive (i.e. a decline in deficit), while the operational indicator is also positive (i.e. increase in expenses), the implication is that the income and potential revenue gains for the City/Province is larger than the increased and associated operational expense.</p> <p>This indicator is therefore valuable in (1) planning with respect to operational expenditure, (2) making the business case for high- impact investment</p> |

| Category | Description |
|-----------------------|--|
| | projects, which over time (maturity) generate sufficient income to cover the associated increased operational expenditure, and (3) compare project(s) with respect to their relative impact on the City's (Province's) financial position. |
| Branch Weight | 25 |
| Input Variable | Economic Impact Model Outputs |
| Process | <p>It is not necessary to normalise this indicator as is the case with the other Economic Impact Model indicators. The indicator value is already reflected as a percentage of GDP. The values for the database is normally ranked as depicted below.</p>  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

Table 12-32: Scoring Criteria - Increase in Rates Base

| Category | Description |
|------------|---|
| Definition | <p>The "Increase in rates base" evaluates whether a project's implementation will contribute towards rates and taxes directly or not. From a purely financial perspective, if a project's implementation will directly lead to increased rates and taxes that would be collected by the municipality, this will be beneficial.</p> <p>In order to determine whether a project will contribute to rates and taxes, it has to be ascertained whether the project represents a service (e.g. the provision of electricity) that can be levied from the end-user. Here, the benefit of the data that can be harvested from the MSCOA classification process is evident. The MSCOA classification assists to determine whether</p> |

| Category | Description |
|-----------------------|--|
| | the funding applied for is for new infrastructure or for the upgrading of existing infrastructure in order to improve capacities. |
| Branch Weight | 25 |
| Input Variable | <p>A two-tier test is applied to determine to what extent the existing rates base or asset base is protected and expanded. The first test which is applied is based on the MSCOA project action and sub-action relating to the MSCOA Project Segment. The following categories are tested:</p> <p>New rateable infrastructure: MSCOA project action = "New"</p> <p>Upgrading of existing rateable infrastructure: MSCOA project sub- action = "Upgrading"</p> <p>Maintenance of rateable infrastructure: MSCOA project sub-action = "Renewal"</p> <p>The following category weights are applied:</p> <p>New rateable infrastructure = 100</p> <p>Upgrading of existing rateable infrastructure = 75</p> <p>Maintenance of rateable infrastructure = 50</p> <p>Once the projects have been pre-filtered for new, upgrading or renewal actions, a second test is performed to ascertain whether the project is from one of the following departments:</p> <p>Energy</p> <p>Water</p> <p>Sanitation</p> |
| Process | If a project is requesting capital and it emanates from one of the departments that provides infrastructure that directly leads towards an increase in the rates and taxes that can be collected, the project will score fully under this criterion. |
| Mathematical Operator | Scored value achieved by the project is passed through to the parent scoring branch. |

c. Focus on people

Table 12-33: Scoring Criteria - Job creation

| Category | Description |
|-----------------------|---|
| Definition | <p>The “Job Creation” indicator represents the number of people that may become employed across all industries as a result of the project. It distinguishes between “job-opportunities” and “job-absorption” – these are distinctly different. Job opportunities measures the total number of potential jobs that may be generated across all industries on the back of matured implementation. Job absorption is the number of jobs that may be occupied across all industries. The job absorption figure adjusts (lowers) the job opportunities figure for structural unemployment, i.e. the percentage of the labour force that are unemployable for reasons of lack of skills, socio-economic impediments, etc.</p> |
| Branch Weight | 20 |
| Input Variable | Economic Impact Model Outputs |
| Process | <p>The indicator calculated by the EIM is normalised by dividing the calculated EIM value with a common denominator namely the capital requested over the MTREF. This is done as a necessary step to establish comparability between projects and wards. The result is presented as jobs created per R1m capital spent. The last step in the process is to rank the actual outcomes linearly from most positive to least positive. This results in the typical graph shown below.</p> |
| Mathematical Operator | <p>Ranked value achieved by the project is passed through to the parent scoring branch.</p> |

Table 12-34: Scoring Criteria - Income-expenditure ratio

| Category | Description |
|-----------------------|---|
| Definition | The “Income to expenditure ratio” indicator is an indicator of surplus income of potential savings per household. This is a direct “wealth measure”. It expresses the potential income gains relative to the higher spending behaviour on the back of changes in economic activity. This indicator therefore measures the impact/effectiveness of the investment/spending portfolio in increasing households’ propensity to save. As such, the indicator is also a measure of ‘wealth’ improvement associated with the project. |
| Branch Weight | 20 |
| Input Variable | Economic Impact Model Outputs |
| Process | <p>The indicator calculated by the EIM is normalised by multiplying the calculated EIM value with a common denominator namely the GDP value. This normalises the indicator to Rand per R1bn GDP increase. The last step in the process is to rank the actual outcomes linearly from most positive to least positive. This results in the typical graph shown below.</p>  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

Table 12-35: Scoring Criteria - Production Output in terms of GVA)

| Category | Description |
|------------|--|
| Definition | Gross Value Addition (GVA) measures/represents the value of economic activity (income) that has been generated across ALL industries as a result of the project/programme/portfolio of projects. It does not take into account the value of taxes and subsidies on both production and consumption goods/services. As such, the GVA figure is presented at ‘market price’ value. It is measured in nominal Rand, i.e. at current prices. |

| Category | Description |
|-----------------------|---|
| | <p>The number represents the TOTAL, NET impact of the project, i.e. taking into account the 'winners' and 'losers' in the economy; the benefits and costs associated with the project. The number is not 'time'-bound, in the sense that the GVA figure represents the full impact, once the project investment/spending has had time to 'mature', i.e. the investment/spending impact has filtered ('rippled') through the economy and the feedback have stabilised. As such, the number is an indicating of the net POTENTIAL income impact of the project/programme, assuming no other interventions/interruptions, etc.</p> <p>The GVA indicator is valuable in comparing the relative impact of different projects/programmes or portfolios of projects, in terms of the additional economic activity that they 'unlock' for every Rand invested and/or spent over the project implementation time-line.</p> |
| Branch Weight | 20 |
| Input Variable | Economic Impact Model Outputs. |
| Process | <p>The indicator calculated by the EIM is normalised by dividing the calculated EIM value with a common denominator namely the capital requested over the MTREF. This is done as a necessary step to establish comparability between projects and wards. The last step in the process is to rank the actual outcomes linearly from most positive to least positive. This results in the typical graph shown below.</p>  |
| Mathematical Operator | Ranked value achieved by the project is passed through to the parent scoring branch. |

Table 12-36: Scoring Criteria - Number of Beneficiaries

| Category | Description |
|-----------------------|---|
| Definition | The spatial analysis capability of the CP3 system, in combination with the affected area that is drawn for each project, is used to automatically deduct the number of beneficiaries that will be impacted or benefitted by the project. From an economic perspective, the more people that are affected by an investment, the larger the impact should be on the economy. |
| Branch Weight | 20 |
| Input Variable | Project affected area |
| Process | <p>The number of beneficiaries of the Statistics South Africa Census 2011 is loaded onto the CP3 system at small area level. The proportional spatial intersect of the project's affected area and the Census 2011 small area layer is calculated. The sum of the population in the intersected Census 2011 small area layer is divided by the maximum population affected by any project in the CP3 database in order to create a beneficiary population index. Projects are therefore ranked from highest number of beneficiaries impacted to the lowest number of beneficiaries impacted. The above calculation is expressed by the following mathematical equation:</p> $Y = (x / \text{Max Affected Area Population}) * 100$ |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

12.1.5 Social Alignment

The social alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipality aligns with servicing of areas with the highest demand and where the most vulnerable communities are situated.

The social alignment score is calculated within two distinct categories, namely:

- Services; and
- Deprivation Index.

Figure 12-5: Capital Prioritisation Model: Social Alignment

a. Services

Table 12-37: Scoring Criteria - Service Delivery Deprived Areas

| Category | Description |
|------------|---|
| Definition | Basic Service delivery is one of the most important priorities of local government. Basic services such as Energy, Water, Sanitation, Waste Collection, Roads and Public transport is key in establishing a desired social environment. |

| Category | Description |
|---------------|-------------|
| Branch Weight | 100 |

Input Variable

Services within deprived areas are prioritised on this branch.

A combination of Department and service deprived area are used to calculate the score of projects with respect to this branch. The combinations include:

Department of Electrical services + Works location within deprived areas

Department of Water and wastewater services + Works location within deprived areas

Category

Description

Department of Water and wastewater services + Works location within deprived areas

Department of Waste Management: Solid Waste Management + Works location within deprived areas

Department of Roads and Stormwater as well as Transport Planning+ Works location within areas identified as poverty pockets

Category

Description

Process

If a project contributes to one of the sub branches, it scores the maximum available value on this branch.

Mathematical Operator

Maximum value achieved by the project is passed through to the parent scoring branch.

Table 12-38: Scoring Criteria - Health Vitality and Universal Access

| Category | Description |
|----------------|--|
| Definition | Health, Vitality and Universal Access focusses on projects that contribute to the socially vulnerable. It specifically focus on departments that are geared towards the upliftment of the socially vulnerable. |
| Branch Weight | 75 |
| Input Variable | Departments:

Water and Wastewater Services: Water

Water and Wastewater Services: Sanitation

Waste Management: Solid Waste Management

Community Safety |

| Category | Description |
|-----------------------|---|
| | Disaster Management |
| | Fire and Rescue Services |
| | Law Enforcement and Security |
| | Traffic Services |
| | Traffic Engineering |
| | Portfolios: |
| | Health |
| | Universal Access |
| Process | If a project is owned by the above-mentioned department, and/or falls within the identified portfolios it will be eligible to score on this branch. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

b. Deprivation Index

Table 12-39: Scoring Criteria - Deprivation Index

| Category | Description |
|------------|---|
| Definition | <p>Deprivation Index serves to elevate project scores which impact underserved areas as described in the National Treasury Urban Network Structure. The Deprivation Index is a spatial layer calculated from Statistics South Africa data at small area level for the Census 2011, which provides an indication of the level of impoverishment or lack of services across the municipality. The Deprivation Index considers the following indicators:</p> <p>Household Income (25%)</p> <p>Household Size (5%)</p> <p>Household Dwelling Type (5%)</p> <p>Household Cooking (10%)</p> <p>Household Heat (5%)</p> <p>Household Light (5%)</p> <p>Household Piped Water (20%)</p> <p>Household Toilet (20%)</p> |

| Category | Description |
|-----------------------|---|
| | Household Refuse Disposal (5%) |
| Branch Weight | 70 |
| Input Variable | Project works location is used as the input to test the deprivation index score of each project based on the deprivation layer or area returned based on the spatial intersect between project works location and deprivation index areas. |
| Process | The higher the deprivation index value and consequently the level of poverty or lack of access to basic services. Projects with works locations overlapping or intersecting with areas with low levels of service delivery will receive elevated score. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

12.1.6 Technical Alignment

The technical alignment goal or theme of the prioritisation model evaluates the degree to which projects in the municipal capital budget aligns with the asset management plans, analysis and modelling of the technical or utility services departments as well as the sustainability goals of the municipality, and most importantly, whether the project is ready to be implemented (i.e. all statutory and governance requirements have been met).

The technical alignment score is calculated within four distinct categories, namely:

- Implementation readiness;
- Risk Rating;
- Departmental Rating; and
- Legally Bound.

Figure 12-6: Capital Prioritisation Model: Technical Alignment

a. **Implementation readiness**

Table 12-40: Scoring Criteria - Project Readiness

| Category | Description |
|----------------|---|
| Definition | <p>The project readiness criteria seeks to determine whether a project will be in a position to spend the allocated budget within the financial year in which the budget is requested. In other words, if a project still needs a record of decision on an Environmental Impact Assessment once the project budget has been awarded to the project, it may take between 6-8 months for the record of decision to be finalised. Therefore, the project will only realistically be able to start during the 2nd or 3rd quarter of the financial year. Projects with outstanding project readiness criteria are therefore penalised over projects that have all compliance documentation and approvals in place.</p> |
| Branch Weight | 47 |
| Input Variable | <p>A number of project readiness question categories are required to be filled in for each project, namely:</p> <ul style="list-style-type: none"> Feasibility study EIA Water use license (WULA) Way-leaves Township establishment Rezoning Site development plan Land acquisition Ownership status Materials availability Supply chain / procurement Project readiness comment / motivation Geotechnical Study <p>Evidence of completion or compliance to any of these project readiness categories required documentation to be uploaded to the system as proof.</p> |

| Category | Description |
|----------|--|
| Process | <p>The readiness score of a project is calculated as the minimum score achieved across all project readiness questions. Each of the project readiness categories allow for a standard set of responses, namely:</p> <p>Duration of time to meet compliance: < 2 months = 100</p> <p>Duration of time to meet compliance: 2 - 4 months = 90</p> <p>Duration of time to meet compliance: 4 - 6 months = 80</p> <p>Duration of time to meet compliance: 6 - 8 months = 50</p> <p>Duration of time to meet compliance: 8 - 10 months = 30</p> <p>Duration of time to meet compliance: 10 - 12 months = 10</p> <p>Duration of time to meet compliance: > 12 months = 0</p> <p>Duration of time to meet compliance: Completed = 100</p> <p>Duration of time to meet compliance: Not applicable = 100</p> <p>An example of the question categories and drop-down selections on the system is shown below:</p> |

| | |
|-----------------------|---|
| Mathematical Operator | <p>Minimum value achieved by the project achieved across all branches is passed through to the parent scoring branch. This is because project readiness is a compliance or governance test, so if for example and EIA is still required, the score of the project should be penalised, hence the minimum value is carried over.</p> |
|-----------------------|---|

b. Risk Rating

Table 12-41: Scoring Criteria - Risk Rating

| Category | Description |
|------------|--|
| Definition | <p>Risk management is an important aspect of capital planning. Understanding the risk mitigated by a project lead to a better understanding of a project and its</p> |

| Category | Description |
|-----------------------|--|
| | relevance to the municipality. By considering a likelihood criteria – ranging from improbable to frequent – and a severity index – ranging from negligible to catastrophic – it is possible to identify the outcome should a project not be implemented. |
| Branch Weight | 6 |
| Input Variable |  |
| Process | Once a risk and his likelihood and severity has been determined, an outcome is derived which carries a weighting on this branch. A project that qualifies for a specific outcome will be assigned that specific value. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

c. Departmental Rating

Table 12-42: Scoring Criteria - Departmental Rating

| Category | Description |
|----------------|---|
| Definition | The departmental rating incorporates the relative importance bestowed on each project by the originating department. A score out of 100 is asked and can be entered by means of a slider. Departments that do not introduce enough variability in their department's project scores are penalised somewhat. This is to prevent that a department marking all their projects as "100" or critical does not get an unfair advantage over departments that rates their projects honestly (i.e. numerous project scores ranging from 0 to 100). |
| Branch Weight | 47 |
| Input Variable | The department technical rating is captured using a project priority rating slider for each project on the technical section of the project capturing screen. |

| Category | Description |
|----------|--|
| |  |

Process The departmental rating score is a normalised score per project based on the range between the department's minimum project rating and maximum project rating. The above calculation is expressed by the following mathematical equation:

$$Y_{project} = \left(\frac{(TPR_{project} - TPR_{Dept\ min})}{(TPR_{dept\ max} - TPR_{Dept\ min})} \right) \times \left(\frac{(TPR_{Dept\ Max} - TPR_{Dept\ min})}{(TPR_{dept\ max})} \right) \times 100$$

Where:

Y = project score

TPR = Technical priority rating (between 0 and 100)

Dept_Min = lowest department project technical rating

Dept_Max = highest department project technical rating

Mathematical Operator Maximum value achieved by the project is passed through to the parent scoring branch.

d. Legally Bound

Table 12-43: Scoring Criteria - Legally Bound

| Category | Description |
|----------------|---|
| Definition | Projects that originate from some sort of legal obligation are being prioritised due to the negative downstream impact of not implementing such projects. |
| Branch Weight | 100 |
| Input Variable | Project owners must indicate whether a project has any legal obligation. |
| |  |

| Category | Description |
|-----------------------|---|
| Process | If a project is related to any legal obligation, then it will be eligible to score on this branch of the scoring model. |
| Mathematical Operator | Maximum value achieved by the project is passed through to the parent scoring branch. |

END

| | |
|-----|--|
| 8.4 | TABLING OF THE DRAFT ANNUAL REPORT 2019/20 |
|-----|--|

Collaborator No: 704227
File No: 3/4/5/2/32 X 8/1/2/6
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: Council, 31 March 2021

1. SUBJECT: TABLING OF THE DRAFT ANNUAL REPORT 2019/20

2. PURPOSE

- a) To table to Council the Draft Annual Report 2019/20 for consideration and to be released for public comment; and
- b) Furthermore, it is also the purpose of this submission to, after adoption of the Draft Annual Report 2019/20 by Council, to refer the Draft Annual Report 2019/20 to the Municipal Public Accounts Committee (MPAC) to fulfil the role of an Oversight Committee and to make a recommendation to Council as contemplated in terms of Section 129(1) of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA).

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Annual Report must be tabled by the Executive Mayor within 7 months after the end of the financial year. The Draft Annual Report must be made public and the Municipal Manager must invite the public to provide input into the draft report. It has become practise that the Oversight Committee also invites the public to make verbal representations at meetings where the report is being discussed.

A schedule with proposed dates for the meetings is also included hereto as **ANNEXURE A**. Council resolved in 2017 that MPAC has, as part of its terms of reference, the role to sit as the Oversight Committee to consider the Draft Annual Report.

The commencement of the external audit process was delayed, as a result of the COVID-19 pandemic in 2020, which has had an impact in the timelines of finalising the Draft Annual Report. Council should therefore also take notice that the Auditor General of South Africa (AGSA) has not concluded, at the time of this submission to Council, its audit on the Annual Financial Statements 2019/20 and on the Annual Performance Report 2019/20.

5. RECOMMENDATIONS

- (a) that Council takes note of the Draft Annual Report 2019/20;
- (b) that Council takes note that the Municipal Manager will make the Draft Annual Report 2019/20 public for comment on the official website of the Stellenbosch Municipality and at the offices of the municipality for a period of 21 days; the public will be invited through the local print media to provide written inputs / comments on the draft report on or before 26 April 2021, at 23:59;
- (c) that Council refer the Draft Annual Report 2019/20 (**ANNEXURE B**) to the MPAC to consider the Draft Annual Report 2019/20 and to make recommendations to Council as contemplated in terms of Section 129(1) of the MFMA;

- (d) that Council takes note of the proposed dates for the MPAC / Oversight meetings, where the Draft Annual Report 2019/20 will be discussed, as detailed in Annexure A hereto. These dates are subject to change. Final dates will be published on the municipality's website and in the local media; and
- (e) that Council approves the MPAC's mandate to co-opt two members of the public with expertise in specific fields to assist and advise the Committee;

Rates for additional nominated community members as per Treasury Regulation 20.2.2. The once-off preparation tariff was used as a guide since the national Treasury does not have guidance in that regard. Consultation must take place to decide if the rate will remain the same.

| Tariff | Number of co-opted Members | Not exceeding no. of hours | Remuneration |
|---|----------------------------|----------------------------|-------------------------|
| Per hour tariff for attendance of meeting as a member | 2 | 45 hours | R 327.00 per hour |
| Once-off Tariff for duties performed in preparation | 2 | 6 hours | R 1 500 (for six hours) |

- (f) that Council approve that the co-opted members can be remunerated in line with the recommendations of National Treasury Regulation in this regard;
- (g) that Council takes notice that the AGSA has not yet concluded its audit on the Annual Financial Statements 2019/20 and the Annual Performance Report 2019/20; and
- (h) that Council takes notice that the AGSA audit outcome will be made available to Council as soon as it is available.

6. DISCUSSION

6.1 Background

The MFMA promotes transparency and accountability for the fiscal and financial affairs of all municipalities and municipal entities through in-year and annual reporting. This can be achieved where there is a clear link between the strategic objectives agreed with the community, the Integrated Development Plan (IDP), the Budget, Service Delivery and Budget Implementation Plan (SDBIP), performance agreements of senior management and officials, in-year reports, annual financial statements, annual performance report and the Annual Report. All these form one process to ensure that the actual performance is reported against what was planned and contained in the IDP. In this manner the annual reporting is a backward-looking process of financial and non-financial performance for the financial year ended, and audited. It is therefore a post-financial year document.

The Annual Report requires the collection and consolidation of a range of financial and non-financial performance information about the municipality. It provides an authoritative record of the activities and performance of the municipality for each financial year. Over time it will serve as a key historic record of the municipality revealing the progress, growth and development of municipal services and performance.

In terms of Section 121(3) of the MFMA, the Annual Report of a municipality or municipal entity must include the following core components. These core components are normally annexed to the Draft Annual Report:

- a) The Annual Financial Statements as submitted to the AGSA (Section 121(3)(a));
- b) the AGSA's audit report in terms of section 126(3) on those financial statements (Section 121(3)(b));
- c) the annual performance report of the municipality prepared by the municipality in terms of Section 46 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) (Section 121(3)(c));
- d) the AGSA's audit report in terms of section 45(b) of the MSA (Section 121(3)(d)); and
- e) particulars of any corrective action taken or to be taken in response to issues raised in the audit reports referred to in paragraphs (b) and (d) in the MFMA (Section 121(3)(g)).

The Minister of Finance issued a Ministerial Exemption in terms of section 177(1)(b) of the MFMA on 05 August 2020, exempting municipalities and municipal entities from submitting their annual financial statements and related reports for auditing at the end of August 2020. The notice allowed for a two-month delay in the submission of Annual Financial Statements, Annual Reports, Audit opinions, and oversight reports. Hence, the reason why the Draft Annual Report 2019/20 is submitted to Council in March 2021, and not within 7 months (January each year) after the end of the financial year, as normally required.

It must, therefore, be noted that the AGSA commenced with its audit later than usual. As a result, the AGSA has not yet concluded on its audit of the Annual Financial Statements 2019/20 and the Annual Performance Report 2019/20 of the municipality. The municipality is therefore not in a position to fully comply with Section 121(3)(d) and (g) of the MFMA. For this reason, the municipality will have to follow the process and procedure forthright as prescribed in terms of Section 133 of the MFMA.

Council should also take notice that the Draft Annual Report 2019/20 is also submitted to Council in accordance with Section 127(3)(a) of the MFMA which provides as follows:

"If the mayor, for whatever reason, is unable to table in the council the annual report of the municipality, or the annual report of any municipal entity under the municipality's sole or shared control, within seven months after the end of the financial year to which the report relates, the mayor must- (a) promptly submit to the council a written explanation referred to in section 133(1)(a) setting out the reasons for the delay, together with any components of the annual report listed in section 121(3) or (4) that are ready"

Therefore, Council should take notice that the Draft Annual Report 2019/20 is submitted to Council within seven months after the financial year (taking notice of the ministerial exemption), thereby satisfying Section 127(2) of the MFMA.

Furthermore, Council should also take notice that the Draft Annual Report 2019/20 is complete as it contains all relevant information and all the core components listed in Section 121(3) of the MFMA. However, due to the AGSA not having completed its audit on the Annual Financial Statements 2019/20 and on the Annual Performance Report 2019/20, the AGSA's audit report as contemplated in terms of Section 121(3)(b) and (d) is not available and could not be annexed to the Draft Annual Report 2019/20. The AGSA informed Council in February 2021 of the fact that the audit is running late (Council Agenda Item 7.2 of 24 February 2021). Said letter is attached hereto as Annexure C. Directly linked to the AGSA's audit report, any corrective measures as contemplated in terms of Section 121(3)(g) could also not be included in the Draft Annual Report 2019/20, at the time of this submission to Council.

These outstanding components of the Draft Annual Report 2019/20 will be submitted to Council as soon as the AGSA completed the audit on the Annual Financial Statements 2019/20 and the Annual Performance Report 2019/20 of the municipality.

6.2 Financial Implications

There are no financial implications beyond that which was approved in the 2020/21 MTREF Budget.

6.3 Legal Implications

Section 121(3) of the MFMA states that the annual report of a municipality must include—

- (a) *the annual financial statements of the municipality, and in addition, if section 122(2) applies, consolidated annual financial statements, as submitted to the Auditor-General for audit in terms of section 126(1);*
- (b) *the Auditor-General's audit report in terms of section 126(3) on those financial statements;*
- (c) *the annual performance report of the municipality prepared by the municipality in terms of section 46 of the Municipal Systems Act;*
- (d) *the Auditor-General's audit report in terms of section 45(b) of the Municipal Systems Act;*
- (e) *an assessment by the municipality's accounting officer of any arrears on municipal taxes and service charges;*
- (f) *an assessment by the municipality's accounting officer of the municipality's performance against the measurable performance objectives referred to in section 17(3)(b) for revenue collection from each revenue source and for each vote in the municipality's approved budget for the relevant financial year;*
- (g) *particulars of any corrective action taken or to be taken in response to issues raised in the audit reports referred to in paragraphs (b) and (d);*
- (h) *any explanations that may be necessary to clarify issues in connection with the financial statements;*
- (i) *any information as determined by the municipality;*
- (j) *any recommendations of the municipality's audit committee; and*
- (k) *any other information as may be prescribed.*

Section 127(2) of the MFMA states that “*The mayor of a municipality must, within seven months after the end of a financial year, table in the municipal council the annual report of the municipality and of any municipal entity under the municipality's sole or shared control.*”

Furthermore, Section 127(3) of the MFMA states that “*If the mayor, for whatever reason, is unable to table in the council the annual report of the municipality, or the annual report of any municipal entity under the municipality's sole or shared control, within seven months after the end of the financial year to which the report relates, the mayor must— (a) promptly submit to the council a written explanation referred to in section 133(1)(a) setting out the reasons for the delay, together with any components of the annual report listed in section 121(3) or (4) that are ready; and (b) submit to the council the outstanding annual report or the outstanding components of the annual report as soon as may be possible.*”

6.4 Staff Implications

This report has no additional staff implications to the municipality.

6.5 Risk Implication

None.

TABLE OF CONTENTS

CHAPTER 1: EXECUTIVE MAYOR'S FOREWORD AND EXECUTIVE SUMMARY 17

| | | |
|--------|---|----|
| 1.1 | COMPONENT A: EXECUTIVE MAYOR'S FOREWORD | 17 |
| 1.2 | COMPONENT B: EXECUTIVE SUMMARY | 20 |
| 1.2.1 | Municipal Manager's Overview | 20 |
| 1.2.2 | Introduction | 22 |
| 1.2.3 | Vision, Mission and Values of the Stellenbosch Municipality | 22 |
| 1.2.4 | Strategic Focus Areas | 23 |
| 1.2.5 | Core principles in executing the strategy | 25 |
| 1.2.6 | Alignment with Institutional Structures and Processes | 26 |
| 1.2.7 | Demographic and Socio-Economic Information | 27 |
| 1.2.8 | Municipal Performance Highlights and Challenges | 52 |
| 1.2.9 | Service Delivery Overview | 54 |
| 1.2.10 | Organisational Development Overview | 59 |
| 1.2.11 | MFMA Competencies | 61 |
| 1.2.12 | Auditor General Report | 62 |

CHAPTER 2: GOVERNANCE 63

| | | |
|--------|--|-----|
| 2.1 | NATIONAL KEY PERFORMANCE INDICATORS - GOOD GOVERNANCE AND PUBLIC PARTICIPATION | 63 |
| 2.1.1 | Performance Highlights - Good Governance and Public Participation | 63 |
| 2.1.2 | Challenges - Good Governance and Public Participation | 64 |
| 2.2 | COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE | 65 |
| 2.2.1 | Political Governance Structure | 65 |
| 2.2.2 | Council – 01 July 2019 to 30 June 2020 | 65 |
| 2.2.3 | Executive Mayoral Committee | 67 |
| 2.2.4 | Portfolio Committees | 68 |
| 2.2.5 | Section 79 Committees | 72 |
| 2.2.6 | Strategic Governance Structure | 74 |
| 2.3 | COMPONENT B: PUBLIC ACCOUNTABILITY | 75 |
| 2.3.1 | Intergovernmental Relations | 75 |
| 2.3.2 | Representative Forums | 79 |
| 2.3.3 | Ward Committees | 80 |
| 2.3.4 | Functionality of Ward Committees | 89 |
| 2.4 | COMPONENT C: CORPORATE GOVERNANCE | 94 |
| 2.4.1 | Risk Management | 94 |
| 2.4.2 | Strategic Risks Identified | 95 |
| 2.4.3 | Anti-Corruption and anti-fraud | 96 |
| 2.4.4 | Audit and Performance Audit Committee | 97 |
| 2.4.5 | Functions of the Audit and Performance Audit Committee | 97 |
| 2.4.6 | Internal Auditing | 98 |
| 2.4.7 | Supply Chain Management | 100 |
| 2.4.8 | By-Laws and Policies | 104 |
| 2.4.9 | Website | 105 |
| 2.4.10 | Communication | 106 |
| 2.4.11 | Community Satisfaction Survey | 107 |
| 2.4.12 | Public satisfaction on municipal services | 107 |

CHAPTER 3: SERVICE DELIVERY PERFORMANCE 108

| | | |
|-----|---|-----|
| 3.1 | OVERVIEW OF PERFORMANCE WITHIN THE ORGANISATION | 108 |
| 3.2 | LEGISLATIVE REQUIREMENTS | 108 |
| 3.3 | ORGANISATIONAL PERFORMANCE | 109 |

| | | |
|--------|--|-----|
| 3.4 | ADOPTION OF A PERFORMANCE MANAGEMENT POLICY FRAMEWORK..... | 109 |
| 3.5 | GOVERNANCE FRAMEWORK FOR THE IDP, BUDGET AND PERFORMANCE MANAGEMENT | 109 |
| 3.6 | SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN | 110 |
| 3.6.1 | The Municipal Scorecard (Top-Layer SDBIP) | 110 |
| 3.6.2 | Amendment of the Top-Layer SDBIP | 111 |
| 3.6.3 | Actual performance | 111 |
| 3.6.4 | Monitoring of the Service Delivery and Budget Implementation Plan | 111 |
| 3.6.5 | Service Delivery Performance | 113 |
| 3.7 | SERVICE PROVIDERS STRATEGIC PERFORMANCE..... | 115 |
| 3.8 | MUNICIPAL FUNCTIONS | 116 |
| 3.8.2 | National Key Performance Indicators – Basic Service Delivery and Local Economic Development | 117 |
| 3.8.3 | Water Provision | 118 |
| 3.8.4 | Waste water (sanitation) provision | 126 |
| 3.8.5 | Electricity | 128 |
| 3.8.6 | Waste management, refuse collections, waste disposal and recycling | 131 |

CHAPTER 1: EXECUTIVE MAYOR'S FOREWORD AND EXECUTIVE SUMMARY

1.1 COMPONENT A: EXECUTIVE MAYOR'S FOREWORD

It is important to note that this report provides feedback for the financial year stretching from 01 July 2019 and ending 30 June 2020 and will be my last refection in an annual report produced in this term of Council. The budget for this year was informed by the needs expressed by our entire community, not only through the IDP process, but through the constant communication and interaction that we have had with our residents throughout the year. On a daily basis, we have met, formally and informally, with our residents and stakeholders, listening and incorporating what they have said. This was incorporated into our short, medium and long term planning.

Throughout all our interaction, our residents expressed the need for ongoing provision of dignified living spaces, safer communities, more economic opportunities, excellent and sustainable service delivery and the redressing of past

inequalities. These needs also form the cornerstone of our IDP and inspired a budget that creates opportunities throughout our Municipality, as far as is achievable with the resources available. As we all know, 2020 was a game changing year, locally and internationally, due to the global COVID-19 pandemic. The resulting hard lockdown, resulted in the loss of the entire last quarter of the financial year under discussion. Despite the severe impact of the pandemic, we however still managed to make significant progress in service delivery for the benefit of our community. I will take this opportunity to share some of my favourite highlights with you.

One of our flagship projects in terms of infrastructure was definitely the upgrading of the Stellenbosch Waste Water Treatment Works (WWTW).

The opening of this facility was a wonderful highlight for me as Mayor. At the start of my term in 2016, the existing facility was no longer of sufficient capacity for the needs of the Stellenbosch town and it had a serious impact on the ecology and economy of the area.

Today, we can proudly boast with a world class water treatment facility that makes use of innovative technology. It is the single biggest capital project in the history of Stellenbosch, at a total value of R382 million, (excluding VAT). The new facility makes use of UV disinfection technology, uses a biological membrane reactor, an advanced ultrafiltration membrane that delivers a better final product and is also more energy efficient and environmentally friendly.

Of importance is that it includes a new laboratory with trained staff that monitors our water quality continuously as well as the operations at the treatment plant, ensuring that we are delivering the best possible service.

Throughout my tenure we have focused on empowering, restoring and promoting access to property and land for historically disadvantaged communities in particular. Our Ida's Valley mixed housing development is the first housing project in Ida's Valley in decades and provided a unique combination of fully subsidised, lower GAP, middle income, higher GAP, entry level and affordable housing units for the community of Ida's Valley. In December 2019 we were privileged to hand over the keys to the first buyers in this project, assisting residents with their first steps into the property market and providing a secure future for themselves and their families. We have also been able to hand over the keys for some of the fully subsidised houses to residents who have been patiently waiting for years.

To empower our aspiring local small farmers, we crafted and adopted a new Land Policy in 2018, so that we could make land available to emerging farmers as agricultural land became available.

In December 2019 we handed over the first five contracts to emerging farmers. The contracts range between 9 – 11 year leases at a subsidised rate structure, with the option to renew should the land be used productively. Our goal is to enable emerging farmers to access municipal agricultural land, to enhance economic opportunities and job creation and to ensure the optimal use of available agricultural land. This demonstrates our commitment to creating a conducive environment for farming enterprises, especially for those emerging farmers who have historically been excluded from economic opportunities.

The successful applicants were selected following a strict and detailed evaluation process during which experience in farming / agriculture, a business plan and the financial readiness of all applicants were evaluated. This is an ongoing process and as more agricultural land becomes available we will make sure to empower more of our residents through agriculture.

We have continued to expand on our partnerships to bring about economic change and opportunities as well as aid during times of crisis. During this financial year we partnered with *Ranyaka* to develop the once neglected old Victoria Street clinic into an economic hub. This project is ongoing and when completed, it will provide a space for entrepreneurs to launch their businesses from. This historic site will finally have a meaningful purpose again and is ideally located in the heart of our Stellenbosch town centre.

We also hosted our first ever *Get Started* entrepreneurship summit. This amazing event helped to unite the various stakeholders at government and NGO level with potential and existing entrepreneurs, to provide guidance and support in a challenging economic environment.

Our focus on cooperation and partnership has been most beneficial with the outbreak of the global COVID-19 pandemic. In a very short space of time many, many residents were left without an income, jobless and without resources due to the hard lockdown. The collaboration brought together Stellenbosch Municipality, Stellenbosch University, Visit Stellenbosch (civil society), SCAN (Stellenbosch Civil Advocacy Network, representing the non-profit sector) and the Greater Stellenbosch Development Trust (administrators) to provide aid and relief to residents who were especially hard hit financially during the pandemic. With the assistance of the Provincial Government we managed to donate R1,2 million in aid of our most vulnerable and affected residents during the Level 5 lockdown period.

This financial year we have also stepped up our use of technology to connect to our residents by making use of mobile applications to create greater connectivity and communication.

In August 2019 we launched a new housing application. The VOIS Housing App is an added tool developed for housing applicants to easily gain access to the database, apply for opportunities and update their information. The App increases accessibility but also caters to the many residents who work full time and find it difficult to travel to and queue at the housing office. This was done as part of our Housing Demand Database update and upgrade so as to ensure that we have access to the most current and updated information, to aid us in our future planning and projects.

With the worldwide COVID-19 pandemic hitting South Africa in March of 2020, the government landscape changed very quickly and very fast. COVID-19 resulted in a complete national lockdown, but government processes and service delivery simply had to continue. To aid our communication efforts, we designed and launched the Stellenbosch Citizens Application. This App allows for public participation as well as regular and emergency communication via smart phone as well as feature phones such as Motorola or Nokia. The App allows residents to contact us directly and provide platforms for electronic communication. The application has allowed us to share information and news during COVID-19 without having to rely on public and private news companies.

As Mayor, I would like to thank the Municipal Manager, all staff members, Councillors, residents, interest groups, associations and forums for working with us to better our municipality and the lives of all our people. Constructive criticism remains a pillar of public participation and is always welcomed. I also want to express my sincere appreciation for all the positive comments and support from all over WC024.

Although the municipality faces many challenges, we are a sustainable and financial stable municipality. We have successfully managed many challenges and we are en route to position Stellenbosch as one of the most successful municipalities in South Africa.

I want to thank our Municipal Manager, all our staff and our residents for working with us, challenging and encouraging us to make this dream come true.

ADV GESIE VAN DEVENTER
EXECUTIVE MAYOR

1.2 COMPONENT B: EXECUTIVE SUMMARY

1.2.1 MUNICIPAL MANAGER'S OVERVIEW

As we table the Annual Report 2019/20, I am reminded of the great progress that has been made in our aim to strengthen the integration of service delivery across the greater municipal area. The year under review has provided the municipality with the opportunity to establish itself as a frontrunner and example of best practice in the local government sphere.

This despite several challenges, the most pressing of which being the worldwide COVID-19 pandemic that affected us during the last quarter of the financial year. The pandemic changed our way of life, the way in which we interact, do business, deliver services and go about our daily activities. Our organisation however remained fully committed to ensuring that

the strategic intent is responsive to what our communities need and that service delivery could continue uninterrupted throughout the lockdown period.

This has been a year like no other, with the COVID-19 pandemic and subsequent national lockdown placing immense pressure on our resources, staff complement and ability to provide municipal services in an uninterrupted manner. With the start of the national lockdown in March 2020, the two immediate objectives of the municipality were to ensure that essential and emergency service delivery could continue unabated and that our municipal officials were safe and protected.

Despite these and many other challenges, the 2019/20 financial year proved very busy and exceptionally rewarding. As this annual report will show, the Stellenbosch Municipality has made steady progress towards realising its vision of becoming a valley of opportunity and innovation. We have consistently strived towards creating more opportunities and delivering quality services to our residents while staying true to our values of innovation, transformation, integrity and accountability.

Delivering our vision requires the dedicated application of many resources, ranging from the municipality's own financial inputs and ongoing investment by those who recognise our valley's growth potential, to the hard work of our capable and devoted officials, managers and executives. The Annual Report 2019/20 offers an overview of the extent of that work and investment for the past financial year, and more importantly, of the positive outcomes that the municipality has delivered.

To achieve our goals, we have been guided by our main strategic planning document – the Integrated Development Plan (IDP). We have gone to great lengths to ensure that our IDP is a true reflection of the needs of all our residents, implementing several innovative solutions to ensure that we reach as many residents and stakeholders as possible even during the months of the initial Level 5 lockdown restrictions. We also recognise the role of provincial and national government and regularly engage on various platforms to share information and best practices. These platforms include SALGA, ISAMAO, CIGFARO, the Premier's Coordinating Forum and Municipal Managers Forum.

One of the highlights during the 2019/20 financial year, and indeed a personal highlight for me since assuming the role as Municipal Manager, was the opening of the brand new Stellenbosch Waste Water Treatment Works (WWTW). This project is the single biggest capital expenditure in the history of the Stellenbosch Municipality and is expected to serve our communities for generations to come. The new facility has greatly improved our wastewater treatment capacity, making use of a membrane biological reactor (MBR) process – an advanced wastewater treatment process that uses ultrafiltration membranes for liquid solid separation instead of conventional clarifiers. The use of these new technologies has significantly improved the state of the downstream river and the quality of water available to residents. The facility was also designed to be energy efficient by tailoring the technologies used and minimising pumping through the works – making this an eco-friendlier plant that saves a lot on energy costs.

During the course of the 2019/20 financial year, the municipality continued to experience stability at senior management level, which has fostered even greater organisational wellbeing. All Senior Management posts are filled and fully functional. The municipality also invested in new communication platforms by developing the Stellenbosch Citizen App, expanding our WhatsApp service lines and launching a new municipal website to improve user experience and two-way communication. We have maintained a healthy payment rate of consumers as a result of effective credit control and debt collection measures. Financial sustainability, as reflected by the financial ratios, indicates that the municipality is in a healthy financial position.

What we have achieved in the municipality is as a result of our commitment to working together, good governance practices, transparency and organisational stability. It is a privilege to be a public servant and to have the opportunity of working with our residents to improve the lives of all. It is through this spirit of cooperation that we continue to be a destination of choice for investors, business, industry, visitors and students.

Thank you Stellenbosch.

It is a pleasure to present the Annual Report 2019/20 of the Stellenbosch Municipality.

The years ahead should be a significant period of growth and development for our residents, now that so much groundwork has been completed. Together with the residents and stakeholders of the Stellenbosch Municipality, we can make our towns places of excellence and opportunities for all. Let us work together on this plan to leave a lasting legacy for future generations.

GERALDINE METTLER
MUNICIPAL MANAGER

1.2.2 INTRODUCTION

This report addresses the performance of the Stellenbosch Municipality, in the Western Cape, South Africa, in respect of its core legislative obligations. Local government must create the participatory framework that defines and enhances the relationship between elected leaders and their communities. This requires that the municipal councils provide regular and predictable reporting on programme performance and the general state of affairs in their locality.

The Annual Report 2019/20 reflects on the performance of the Stellenbosch Municipality for the period of 01 July 2019 to 30 June 2020. The Annual Report is prepared in terms of section 121(1) of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), in terms of which the municipality must prepare an Annual Report for each financial year.

1.2.3 VISION, MISSION AND VALUES OF THE STELLENBOSCH MUNICIPALITY

The figure below illustrates our overarching strategy of Stellenbosch Municipality.

Figure 1:1: House of Values

The Stellenbosch Municipality has committed itself to the following vision and mission:

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the **“Valley of Opportunity and Innovation.”**

MISSION

Our mission is to deliver cost-effective services that will provide the most enabling environment for civil and corporate citizens.

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality in an honest and ethical manner.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Transformation: We, as custodians of hope, will work tirelessly at transforming our municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

1.2.4 STRATEGIC FOCUS AREAS

1.2.4.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunity for enterprise, creativity and business development in our cities, towns and villages are an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that addresses these challenges: The first relates to the provision of services to citizens, and how these services can assist them to facilitate development and job creation. The second relates to the internal working of the Municipality and how municipal procurement of services aids in fostering opportunity for enterprise development and creativity. The third dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens, and also enable enterprise and business development. Without appropriate, well- maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work and learning.

1.2.4.2 Strategic Focus Area 2: Green and Sustainable Valley

There are a number of dimensions to the environment that underpinned its importance for the greater Stellenbosch area and for the people living within it. The first is an ecological dimension, which recognises that the natural environment and its processes provide the setting in which, and the basic resources with which, human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins a vitally important tourism and agricultural economy. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place, and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, peoples' activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why spatial direction is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impact on people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts on disposable income, work productivity and transport infrastructure provision. Secondly, the municipal strategy has over the last decade taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has assisted to hide spatial inequity in our settlements. Thirdly, municipal government has considerable influence over the space economy of settlements. By virtue of its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts on economic success through the provision and maintenance of infrastructure and how activities are organised in space.

1.2.4.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunity and sound a financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure greater Stellenbosch area is thus not only a functional necessity, but underpins elements of economic and social development strategies.

1.2.4.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life we mean, inter alia, access to shelter, pursuit of ethical administration of municipal housing, and sufficient choice in housing opportunity for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women and the elderly is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

1.2.4.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where and to whose benefit it is, however, is a difficult task. The range of services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy- and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also ensure synergy between the work of the political and administrative spheres of the municipality, their own work and that of other spheres of government, civil society and the business sector. Municipalities should communicate well; and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, external and internal to the organisation, needs to be recognised and built upon.

We cannot service the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure best use of public resources, regular performance management is essential. Information must be readily available, and contact between citizens and the municipality should be responsive and as efficient as possible.

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. In order to deliver on the needs of its citizens, the municipality is required to manage revenue streams in a sustainable manner. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensure the integrity of the municipality. It is most important that the use of municipal resources supports agreed upon objectives; in other words, the municipal budget and on-going expenditure must be strategy-led.

1.2.5 CORE PRINCIPLES IN EXECUTING THE STRATEGY

Shared work between political leadership, the administration and community.

The municipality encompasses three core components:

- ✦ Democratically elected political leadership;
- ✦ The administration, comprising officials; and
- ✦ Citizens, as individuals, interest groups and organisations (public, community-based and private).

For sustainable municipal management, it is critical that political leadership and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their own neighbourhoods. Stellenbosch Municipality is committed to ensure that real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critic or passive bystander. It is vital that local communities play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 22 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their own destiny and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

1.2.6 ALIGNMENT WITH INSTITUTIONAL STRUCTURES AND PROCESSES

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the “now” – the need to guide decisions today. For municipalities, the “now” has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is “under preparation” is used as an excuse for inaction or even poor decision-making. The arm's length approach also appears to neglect local experiential knowledge – what people know through working with services issues on a daily basis. With this in mind we have provided for regular, informal but structured engagements between the MayCo and Director's Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct development and management of the town. Written up as an initial strategy, provision is made for influencing the decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

1.2.7 DEMOGRAPHIC AND SOCIO-ECONOMIC INFORMATION

1.2.7.1 Municipal Geographical Information

Stellenbosch Municipality is located at the edge of the City of Cape Town still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West / Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town harbour, the shipping portal to both the Atlantic and the Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it is able to sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as a number of rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniel, Johannesdal, Languedoc, Groot Drakenstein, Muldersvlei, Klappmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vloottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes a number of informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect its heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and a number of prestigious schools. It has a strong business sector, varying from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound and the area is the home of the very first Wine Route in South Africa. A variety of sport facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The Municipal area has a number of theatres, which include the Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre and dance), Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street at Theatre and Aan de Braak Theatre.

1.2.7.2 Wards

The Stellenbosch Municipality is currently structured into the following 22 Wards:

Table 1:1 Municipal Wards

| WARD | AREAS | Population (2011) |
|--------------|--|-------------------|
| 1 | Franschhoek Town, Bo-Hoek Farms, Mooiwater | 12 389 |
| 2 | Langrug, La Motte, Dennegeur, Groendal | 7 519 |
| 3 | Wemmershoek, Lanquedoc, Meerlust | 8 952 |
| 4 | Pniel, Kylemore, Johannesdal | 8 230 |
| 5 | The Ridge, Lindida, Ida's Valley (The Hydro in the direction of Ida's Valley and Omega Street to Jonkershoek) | 5 656 |
| 6 | Ida's Valley and farms (Nietvoorbij, Timberlea, Morgenhof, Remhoogte, Muratie, Groenhof, Delheim, Lievland, Kanonkop, Uitkyk, Glenelly, Emerie, Laundry, Packham, L'Avenir) | 5 856 |
| 7 | Mostertsdraif, Kolonieshof, Karindal, Rozendal, Uniepark, Simonswyk, Universiteitsoord, De Weides | 3 873 |
| 8 | Stellenbosch Central and university areas | 5 682 |
| 9 | Boundaries of the Eerste River, Krige, Herte, Skone Uitsig, Bird, Merriman, Bosman, Victoria, Neethling, Van Riebeeck, Drosty and Helderberg Street | 822 |
| 10 | Tenantville, Lappan street to Lackay street, La Colline-Faure, Dr Malan street to Irene Park, Conde Street, Mount Albert, Taylor, Voorplein to Kromriver, Municipal Flats (Lavanda, Aurora, Phyllaria, Molteno Avenue) to Paul Kruger Street and Banghoek Avenue | 5 270 |
| 11 | Dorp Street to Herte Street, Mark Street, Alexander Street, bottom of Bird Street to the Stellenbosch Train Station, all areas in Onder Papegaaiberg and businesses | 6 545 |
| 12 | Kayamandi: Enkanini, Snake Valley, Watergang, Thubelitsha, New Watergang (106), Zone O (next to Enkanini), Chris Hani Drive, Municipal Flats(10TH and 13TH Street), School Crescent, Ekuphumleni, Siyahlala, Zone A and George Blake | 8 009 |
| 13 | Kayamandi: Old Location from Lamla Street to Luyolo Street, Red Bricks and Old Hostels | 2 482 |
| 14 | Kayamandi: Zone I Setona Street), Zone O (lower part) Mgabadeli Crescent, Monde Crescent , Costa Land, Strong Yard, Zone M (8th Avenue) | 5 280 |
| 15 | Kayamandi: Mjandana Street(Zone L), Mputa Close, Zone K, Ndumela Street(Zone J), Distell Hostels, Vineyard, Zone O Middle part(Fire Street), Municipal Workers Flats, Zone N, and M, Old Corrobricks Hostels, Mdala Street(Old Hostels) Eight(8) Close | 10 403 |
| 16 | Long Street to end of Smarty Town, Eike Street, Curry Street, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street, Smarty Town and Weltevrede | 8 626 |
| 17 | Kloof and Longstreet flats, Welgevonden and Weltevreden | 7 728 |
| 18 | Klapmuts and surrounding farms | 8 763 |
| 19 | Elsenburg, De Novo | 10 493 |
| 20 | Vlottenburg, Raithby, Lynedoch to Meerlust, Eikendal, Mooiberge, Faure | 9 628 |
| 21 | Jamestown, Paradyskloof, De Zalze, Techno Park, Blaauwklippen, surrounding farms | 8 651 |
| 22 | Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm | 4 873 |
| Total | | 155 733 |

Source: StatsSA

Below is a map of the Cape Winelands District in relation to the provincial district boundaries:

Figure 1:2: Locality of Cape Winelands District in relation to Provincial Boundaries

Source: Western Cape provincial Spatial Development Framework

The Western Cape Province, which makes up 10.6% of the country's land surface and encompasses an area of 129 462 km². The province spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Garden Route, Overberg, Cape Winelands and West Coast) and 24 local municipalities.

Below is a map of the municipalities in relation to the Cape Winelands District:

Figure 1:3: Locality map of Stellenbosch Municipality in relation to Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within close proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second largest container port in the country and a comprehensive road and rail network. This gives the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Figure 1:4: Locality map of Municipal Boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. As a local authority Stellenbosch Municipality governs the towns of Stellenbosch, Franschhoek and Pniel, and the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CCT) to the west and south and the Breede Valley, Drakenstein and Theewaterskloof Municipalities to the east and north. Functionally, SM forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch and Franschhoek and Klapmuts. There are also a number of smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniel, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlotenburg. Stellenbosch is a sought after space, offering opportunity and quality of living, yet in close proximity to city life. This has placed the municipal area under constant development pressure.

1.2.7.3 State of the Greater Stellenbosch

Stellenbosch is situated about 50 km from Cape Town and is flanked by the N1 and N2 main routes. The municipal area covers roughly 900 km². According to population growth estimates, of the Community Survey the population figures for Stellenbosch for 2020 indicates a number of 192 879 people and 52 374 households. The municipality's area of jurisdiction includes the town of Stellenbosch and stretches past Jamestown to Raithby in the South, Bottelary, Koelenhof, and Klapmuts to the North, and over the Helshoogte Pass to Pniel, Kylemore, Groendal and Franschhoek in the East.

Apart from formal settlement areas, the municipal area also includes a number of informal settlements. Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the

Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in that year. Today, the area has become primarily known for its extraordinary wines, fruit, world renowned cultural landscapes and exceptional scenic quality. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their rich heritage and traditions, but also the divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch, Boland College, sports and culinary institutions and a number of prestigious schools. It has a strong business sector, varying from major South African businesses and corporations, to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. The area's numerous wine farms and cellars are very popular and the area is the home of the very first wine route in South Africa.

A variety of sport facilities are available. Coetzenburg, with its athletics and rugby stadiums, has hosted star performances over many generations while the Danie Craven Stadium is the home of Maties rugby, the largest rugby club in the world. The municipal area has a number of theatres, which include the University's HB Thom Theatre, Spier Amphitheatre, Dorp Street Theatre, Aan de Braak Theatre, and Oude Libertas Amphitheatre – well-known for its summer season of music, theatre and dance.

The area is known for its quality, award-winning restaurants and is a tourist haven with many boutiques, galleries, and curio shops. There are several museums and art galleries and the area is host to a number of annual cultural, food, wine and sports festivals. A wide array of accommodation is available for visitors to choose from.

Welfare and community organisations play a leading role in assisting to meet the needs of previously neglected communities.

The following municipalities share their borders with Stellenbosch Municipality:

- The City of Cape Town (South);
- Drakenstein Municipality, Cape Winelands District (North);
- Breede Valley Municipality, (North-east); and
- Theewaterskloof Municipality, (South-west).

Stellenbosch municipal area is now divided into 22 Wards, with recent amendments to some of the ward boundaries by the Municipal Demarcation Board in 2016. The wards consist of urban settlements as well as the surrounding rural areas which contain agricultural and natural environments. The table below describes the urban settlements and rural areas within the different wards and the figure on the next page indicates the ward demarcation for the respective 22 wards within the WCO24 boundary.

1.2.7.4 Stellenbosch at a Glance

Table 1.2: Stellenbosch Municipality: Summarised Statistics

| Demographics | | | Population Estimates | | |
|---|---|---|---|---|---------------------------|
|  | Population | 192 879 |  | Households | 52 374 |

Source: DLG 2020 Socio- Economic Profile- Stellenbosch Municipality

1.2.7.5 Socio-Economic Context

Population

The population of Stellenbosch is 192 879 people in 2020, ranking amongst the most populated municipal areas in the CWD. This total is expected to increase to 209 849 by 2024, equating to an average annual growth rate of 2.1 per cent.

Table 1:3: Age Cohorts and Dependency Ratio

| Year | Children:
0 – 14 Years | Working Age:
15 – 65 Years | Aged:
65 + | Dependency Ratio |
|--------|---------------------------|-------------------------------|---------------|------------------|
| 2020 | 43 095 | 139 312 | 10 472 | 38.5 |
| 2023 | 44 917 | 149 263 | 11 543 | 37.8 |
| 2026 | 46 390 | 154 594 | 12 758 | 38.3 |
| Growth | +1.2% | +1.7% | +3.3% | - |

Source: Western Cape, Socio-Economic Profile 2020

The above table depicts Stellenbosch's population composition by age cohorts. These groupings are also expressed as a dependency ratio which in turn indicates who are part of the workforce (ages 15-64) and those, who are depending on them (children and senior citizens). A higher dependency ratio implies greater pressure on social systems and the delivery of basic services.

Between 2020 and 2026, the largest population growth was recorded in the 65+ aged cohort which grew at an annual average rate of 3.3 per cent. This predicted growth rate increases the dependency ratio towards 2026.

Sex Ratio

The overall sex ratio (SR) depicts the number of males per 100 females in the population. The data indicates that there are less males than females in the Stellenbosch municipal area with a ratio of 49 per cent (males) to 51 per cent (females). The SR for Stellenbosch increases slightly year on year towards 2024 which could be attributed to a wide range of factors such as an increase female mortality rates as well as the potential inflow of working males to the municipal area.

Age Cohorts

Between 2020 and 2026, the largest population growth projection was recorded in the 65+ aged cohort which grew at an annual average rate of 3.3 per cent. The dependency ratio however, decreases towards 2023, and increases towards 2026.

Household sizes

Household size refers to the number of people per household. The actual size of households remains steady at 3.7 from 2020 to 2024. Contributing factors to a stagnation in household size growth could include, but are not limited to, lower fertility rates, occurrences of divorce, ageing population, etc.

Population density

Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision makers to mitigate environmental, individual health and service delivery risks. In 2020, the

population density of the Cape Winelands District (CWD) was 44 persons per square kilometer. In order of highest to lowest, the various local municipal areas in the CWD compare as follows:

- Stellenbosch 232 people/km²;
- Drakenstein 189 people/km²;
- Breede Valley 50 people/km²;
- Langeberg 26 people/km²; and
- Witzenberg 14 people/km².

1.2.7.6 Education

Education and training improves access to employment opportunities and helps to sustain and accelerate overall development. Quality Education is the 4th Sustainable Development Goal, whilst the National Development Plan (NDP) emphasises the link between education and employment as well as the significant contribution it makes to the development of the capabilities and wellbeing of the population.

Early childhood development (ECD) is one of the priority areas of the South African government and remains a critical policy issue that the Department of Education aims to address. Early years in life are critical for acquisition of perception motor skills required for reading, writing and numeracy in later years.

Table 1:4: Early Childhood Development – attendance levels

| Early Childhood Development (ECD) | | |
|-----------------------------------|---------------------------|-------|
| Ages | Stellenbosch Municipality | |
| 1 | Attending | 26.4% |
| | Not Attending | 73.6% |
| 2 | Attending | 61.9% |
| | Not Attending | 38.1% |
| 3 | Attending | 72.9% |
| | Not Attending | 27.1% |
| 4 | Attending | 71.9% |
| | Not Attending | 28.1% |
| 5 | Attending | 50.6% |
| | Not Attending | 49.4% |

Source: Western Cape, Socio-Economic Profile 2018

Attendance of children between 1 and 2 years old at educational facilities fluctuates and is largely attributed to working parents in need of child care. Attendance between 3 and 5 years old shows a promising increase of attendance at early childhood facilities, with attendance of 73% for age group 3 and 72% for age group 4. The results for age group 5 is 51% and comparable to other local municipalities. A number of children within this age group still remain home with a parent or guardian.

Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch increased from 27 087 enrollments in 2018 to 27 491 in 2019, an increase of 1.5 per cent. The learner-teacher ratio also reflected an increase from 28.5 in 2018 to 28.9 in 2019. The learner retention rate improved from 72.5 per cent in 2018 to 75.5 per cent in 2019. This could be attributed to a number of factors including improvement in the socio-economic context.

Figure 1:5: Learner enrolment

Source: Western Cape, Socio-Economic Profile 2020

It is commonly assumed that children receive less personalised attention in larger class environments and that high learner-teacher ratios are detrimental to improved educational outcomes. Factors influencing the learner-teacher ratio is the ability of schools to employ more educators when needed and the ability to collect fees.

Figure 1:6: Learner-Teacher Ratio

Source: Western Cape, Socio-Economic Profile 2020

Stellenbosch has the lowest learner-teacher ratio in the District, which bodes well for educational outcomes.

The learner retention rate refers to the number of students that start Grade 12 as a percentage of the number of students that enrolled in Grade 10 two years prior. The inverse of the learner-retention rate is commonly referred to as the drop-out rate. Learner-retention rates are influenced by multiple social, economic and psychological factors.

Figure 1:7: Learner retention

Source: Western Cape, Socio-Economic Profile 2020

Number of schools and no-fee schools

In 2019, Stellenbosch had a total of 39 public ordinary schools, of which 25 are no-fee schools. In an effort to alleviate some of the funding challenges the Western Cape Department of Education (WCED) offered certain fee-paying schools to become no-fee schools. This means that almost two-thirds of the schools in Stellenbosch, 52 per cent, are registered with the Western Cape Department of Education as no-fee schools.

Schools with libraries and media centres

Schools with libraries and media centres has remained at 29 over the reference period, contributing to the overall quality of education in the area.

Schools with libraries

Schools with libraries and media centres has remained at 29 over the reference period, contributing to the overall quality of education in the area.

There was no change in the number of schools with libraries in the Stellenbosch area from 2016 to 2020. The availability of library facilities within schools contribute towards narrowing the academic attainment gap by allowing students access to information which in turn directly links to improved education outcomes.

Education Outcomes (Matric Pass Rates)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. Stellenbosch's matric outcomes has declined slightly from 85.2 per cent in 2018 to 85.0 per cent in 2019.

Figure 1:8: Education Outcomes

Source: Western Cape, Socio-Economic Profile 2020

1.2.7.7 Health

According to the 2019 Inequality Trend Report by Statistics South Africa, 75.1 per cent of households in South Africa usually use public healthcare facilities when a household member gets ill compared to 24.9 per cent who used private healthcare facilities in 2017. This is associated with the low proportion of households with access to Medical Aid, 16.9 per cent for South Africa and 25 per cent for the Western Cape. In terms of healthcare facilities, Stellenbosch had 14 primary healthcare clinics (PHC) in 2019, which comprises 8 fixed and 6 mobile clinics. In addition, there is a district hospital.

Table 1:5: Health care facilities

| Area | PHC facilities
(Fixed clinics,
CHCs and CDCs) | | Community
Health
Centres ¹ | Community
Day
Centres ² | Hospitals | | Treatment Sites | |
|-------------------------|---|-----------|---|--|-----------|----------|-----------------|------------|
| | Fixed | Non-fixed | | | District | Regional | ART Clinics | TB Clinics |
| Stellenbosch | 7 | 6 | 0 | 1 | 1 | 0 | 8* | 15* |
| Cape Winelands District | 39 | 33 | 0 | 6 | 4 | 2 | 49* | 100* |

*Source: Western Cape, Socio-Economic Profile 2020

¹ **Community Health Centre:** A facility that normally provides primary health care services, 24 hour maternity, accident and emergency services and beds where health care users can be observed for a maximum of 48 hours and which normally has a procedure room but not an operating theatre.

² **Community Day Centre:** A health facility that provides a comprehensive health care services during day hours, including mother and child health, chronic diseases care, women's health, HIV and TB care, men's health, acute services, physio therapy, mental health services and oral health care.

Emergency Medical Services

Provision of more operational ambulances can provide greater coverage of emergency medical services. Stellenbosch has 3 ambulances per 10 000 inhabitants in 2019 which is above the district average of 2 ambulances per 10 000 people. It is worth noting that this number only refers to Provincial ambulances and excludes all private service providers.

HIV / AIDS / TB

Stellenbosch's total registered patients receiving ARTs increased by 896 patients between 2018 and 2019. A total of 32 366 registered patients received antiretroviral treatment in the Cape Winelands District in 2019. Stellenbosch, at 6 960 patients, represent 21.5 per cent of the patients receiving ART in the Cape Winelands District. The number of new antiretroviral patients decreased from 637 to 538 in 2019.

Stellenbosch experienced an increase of in tuberculosis (TB) cases in 2019. 1 176 TB patients were registered in 2019 compared to 1 176 in 2018.

HIV / AIDS management is crucial given its implications for the labour force and the demand for healthcare services.

Table 1:6: HIV/AIDS Management

| Area | Registered patients receiving ART | | Number of new ART patients | |
|-------------------------|-----------------------------------|--------|----------------------------|-------|
| | 2018 | 2019 | 2018 | 2019 |
| Stellenbosch | 6 064 | 6 960 | 637 | 538 |
| Cape Winelands District | 30 724 | 32 366 | 3 851 | 3 434 |

Source: Western Cape, Socio-Economic Profile 2020

Figure 1:9: Tuberculosis

Source: Western Cape, Socio-Economic Profile 2020

Child Health

Immunisation rates in the Stellenbosch area is at 55.1 per cent in 2019 having decreased slightly from 55.2 per cent in 2018. In 2019, the number of malnourished children under five years (per 100 000) was 2.6, a slight decline from 2018. Neonatal mortality rate (NMR) (per 1 000 live births decreased from 6.6 in

2018 to 5.2 in 2019. The low-birth-weight indicator was recorded at 8.2, a decrease from 9.2 recorded in 2018.

Figure 1:11: Child Health

Source: Western Cape, Socio-Economic Profile 2020

Maternal Health

The maternal mortality rate in the Stellenbosch area is zero and Cape Winelands District is 42.7 deaths per 100 000 live births in 2019.

The delivery rate to women under 20 years in Stellenbosch and Cape Winelands District was recorded at 13.5 and 15.1 in 2019 per cent respectively.

The termination of pregnancy rate increased from 0.5 to 0.6 from 2018 to 2019 in the Stellenbosch area.

Table 1:7: Maternal Health

| Area | Maternal Mortality Rate | | Delivery rate to women under 20 years | | Termination of pregnancy rate | |

1.2.7.8 Poverty

GDPR Per Capita

An increase in real GDPR per capita, i.e. GDPR per person, is experienced only if the real economic growth rate exceeds the population growth rate. Even though real GDP per capita reflects changes in the overall well-being of the population, not everyone within an economy will earn the same amount of money as estimated by the real GDPR per capita indicator.

At R62 000 in 2018, Stellenbosch's real GDPR per capita is well above that of the Cape Winelands District's figure of R50 000 as well as that of the Western Cape.

Figure 1:12: GDPR Per Capita

Source: Western Cape, Socio-Economic Profile 2020

Income Inequality

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. Income inequality has increased in Stellenbosch between 2012 (0.60) and 2018 (0.65) with the exception of 2012, when it dropped below 0.58.

Furthermore, income inequality levels were the highest in Stellenbosch for 2018 with a Gini coefficient of 0.60 when compared to neighbouring municipalities across Cape Winelands District and the Western Cape. These disparities in income are certain to worsen across the ensuing MTREF given the potential aftereffects of the COVID-19 pandemic.

Figure 1:13: Income Inequality

Source: Western Cape, Socio-Economic Profile 2020

Human Development

The United Nations uses the Human Development Index (HDI) to assess the relative level of socio-economic development in countries. Indicators that measure human development are education, housing, access to basic services and health.

The HDI is a composite indicator reflecting education levels, health, and income. It is a measure of peoples' ability to live a long and healthy life, to communicate, participate in the community and to have sufficient means to be able to afford a decent living. The HDI is represented by a number between 0 and 1, where 1 indicates a high level of human development and 0 represents no human development.

There has been a general increase in the HDI in Stellenbosch from 0.72 in 2012 to 0.76 in 2018. The trend for the Cape Winelands District and the Western Cape in general has been similar between 2012 and 2018. Naturally, per capita income as per definition is expected to mimic the trend of HDI and this is clearly displayed in the graphic above. In short, what this graphic illustrates is that for the most part an increase in GDP per capita across a particular region is generally accompanied by an improvement in HDI levels with a short lag.

Figure 1:14: Human Development

Source: Western Cape, Socio-Economic Profile 2020

1.2.7.9 Basic Service Delivery

The Constitution stipulates that every citizen has the right to access to adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to services such as potable water, basic sanitation, safe energy sources and refuse removal services, to ensure that households enjoy a decent standard of living.

This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2019. The latest official statistics was collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities survey findings.

Housing and Household Services

With a total of 52 374 households in the Stellenbosch municipal area, only 73.4 per cent had access to formal housing, the lowest access level when compared to the other municipalities in the Cape Winelands District area; the District average was 81.2 per cent. The area also had highest proportion of informal households in the District, a total of 24.5 per cent compared with the District average of 17.0 per cent.

Subsequently, service access levels were high in the area, with access to piped water inside / within 200m of the dwelling at 94.5 per cent, access to a flush or chemical toilet at 91.2 per cent, access to electricity (for lighting) at 92.4 per cent and the removal of refuse at least weekly by local authority at 86.7 per cent of households.

Free Basic Services

Municipalities also provide a package of free basic services to households who are financially vulnerable and struggle to pay for services. The number of households receiving free basic services in the Stellenbosch municipal area has shown a generally increasing trend up to 2018. The stressed economic conditions are anticipated to exert pressure on household income levels, which is in turn likely to see the number of indigent households and the demand for free basic services increase.

Figure 1:15: Total number of households

1.2.7.10 Safety and Security

Murder

Murder is defined as the unlawful and intentional killing of another person.

Within the Stellenbosch area, the actual number of murders increased from 69 in 2019 to 76 in 2020. The murder rate (per 100 000 people) also increased from 37 in 2019 to 39 in 2020. The murder rate for the CWD increased from 39 in 2019 to 42 in 2020 (per 100 000 people).

Table 1:8: Murder (per 100 000)

Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency and human trafficking.

In 2020, there were 231 reported sexual offences in the Stellenbosch area compared to 204 in 2019. In 2020, there were 966 reported cases in the Cape Winelands District in total compared to 880 in 2019.

Drug-related Offences

Drug-related crimes refer to the situation where the perpetrator is found to be in possession of, under the influence of, or selling illegal drugs.

Drug-related incidences within the Stellenbosch area decreased from 2 563 cases in 2019 to 2 166 cases in 2020. The CWD's drug-related offences decreased sharply from 11 225 in 2019 to 7 895 in 2020. When considering the rate per 100 000 people, at 1 123 crimes per 100 000 people in 2020, the Stellenbosch area rate is above that of the District (837).

Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area shows a decrease from 309 in 2019 to 237 in 2020. This translates into a rate of 123 per 100 000 people in 2020, which is above the District's 100 per 100 000 people in 2020.

Road user fatalities

The type of road user that died in or during a crash i.e. driver, cyclist, passengers, pedestrians.

The number of road user fatalities in the Stellenbosch municipal area decreased from 37 in 2018/19 to 35 in 2019/20. The number of fatal crashes remained constant at 34 across the same reference period.

Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually a theft.

The 2019/20 crime statistics released by SAPS and Stats SA indicate that the number of residential burglaries fell by 6.7 per cent in South Africa. Within the Western Cape Province, burglaries at residential areas decreased by 8.5 per cent between 2019 and 2020. Residential burglary cases within the Stellenbosch area also decreased from 1 363 in 2019 to 1 242 in 2020.

When considering the rate per 100 000 populations, with 644 cases per 100 000 in 2020, Stellenbosch's rate is above the district rate of 587 per 100 000 in the same reporting year.

1.2.7.11 Economy and Labour Market Performance

Sectoral Overview

In 2018, the economy of Stellenbosch was valued at R16.2 billion (current prices) and employed 78 701 people. Historical trends between 2014 and 2018 indicate that the municipal area realised an average annual growth rate of 1.4 per cent which can mostly be attributed to the tertiary sector that registered a positive annual growth rate of 2.1 per cent.

In terms of sectoral contribution, the wholesale and retail trade, catering and accommodation (R3.3 billion), finance, insurance, real estate and business services (R3.5 billion), and manufacturing (R2.7 billion) sectors were the main drivers that contributed to the positive growth in the local economy. These sectors are also estimated to have performed well in 2019, particularly the finance, insurance and real estate services and the wholesale and retail trade, catering and accommodation sectors, which are both estimated to have grown by 2.4 per cent. Employment creation in the wholesale and retail trade, catering and accommodation sector mirrored the high growth rate, with 400 new jobs created. In 2019, the transport, storage and communication sector was also an important source of job creation (169 jobs).

Despite its important role in the local economy, particularly as one of the main sources of employment, the agriculture, forestry and fishing sector experienced below-average performance between 2014 and 2018 and is estimated to have contracted by 8.9 per cent in 2019. This contraction led to the loss of 113 jobs. The agriculture, forestry and fishing sector is still recovering from the provincial drought.

Formal and Informal Employment

It is estimated that Stellenbosch's total labour force in 2019 amounted to 78 701 workers of which 56 601 (71.9 per cent) are in the formal sector while 22 100 (28.1 per cent) are informally employed.

Most of the labour force consisted of semi-skilled (43.8 per cent) and low-skilled (32.3 per cent) workers. The skilled category contributed 23.9 per cent to total formal employment and grew on average by 2.5 per cent, while the semi-skilled and low-skilled categories grew at 2.8 and 0.4 per cent respectively. Evidently, the demand for skilled labour is on the rise which implies the need to capacitate and empower low-skilled and semi-skilled workers.

Unemployment

Stellenbosch (11.3 per cent) has the second highest unemployment rate in the Cape Winelands District. It is also higher than the District average (11.3 per cent) but considerably lower than the Western Cape rate of 19.4 per cent. Stellenbosch's high unemployment rate is based on the narrow definition of unemployment i.e. the percentage of people that are able to work, but unable to find employment. The broad definition generally refers to people that are able to work, but not actively seeking employment.

Table 1:14: Economic Sector Overview

| Sector | GDPR | | | Employment | | |
|--|----------------------|-------------------|------------------------|---------------------|-----------------------------------|------------------|
| | R Million value 2018 | Trend 2014 - 2018 | Real GDPR growth 2019e | Number of jobs 2018 | Average annual change 2014 - 2018 | Net change 2019e |

1.2.7.12 Public Infrastructure Spending

Spending on Social Infrastructure

Spending on social infrastructure aids in social development and has the spill-over effect of enabling economic growth. The Western Cape Government (WCG) will spend 22.5 per cent (R49.174 million) of its infrastructure budget on social infrastructure.

As displayed in the pie chart below, the WCG will be allocating 7.1 per cent of the budget (R15.430 million) towards education in the municipal area. Spending on education is crucial as it can serve to improve education outcomes and skills levels within a community, and more importantly alleviate poverty through increased long-term income for individuals.

A healthy and resilient community increases productivity and reduces pressures on government resources. As such the Department of Health has allocated 0.8 per cent (R1.668 million) of infrastructure spending on health. A further R32.076 million (14.7 per cent) has been allocated by the WCG towards Human Settlements, serving to reduce housing backlogs. This was complemented by R10.361 million in spending on housing infrastructure by the municipality.

Community safety has been prioritised by the WCG due to high levels of crime in the Western Cape. Crime has a negative impact on the quality of lives of individuals, but also on the economy by deterring private investment and causing business losses. It further creates a burden on government resources in terms of justice system costs, victim assistance and replacement of assets. The municipality has as such allocated R6.7 million of its capital budget on community and public safety. The municipality has also made R14.330 million available for sports and recreation and R3.190 million for social development which will serve to improve the quality of life of individuals within the municipal area.

Spending on Economic Infrastructure

Economic infrastructure is defined as infrastructure that promotes economic activity. Considering the sluggish economic growth throughout the country, spending on economic infrastructure is crucial to stimulating economic activity.

The WCG allocated R169.256 million (77.5 per cent) towards economic infrastructure, more specifically towards transport (R147 million) and public works (R22.256 million). Transport and public works infrastructure goes a long way towards unlocking the region's economic potential, especially due to it being a tourist destination and its proximity to the City of Cape Town economic hub. The municipality contributes a further R54.0 million towards road transport. As part of their economic infrastructure allocation, the municipality will also contribute R52.5 million towards planning and development and R1.8 million towards environmental protection.

Spending on Trading Services

Basic services are crucial to improving the living conditions of citizens within the municipal area and enabling economic activity for businesses via access to water, electricity, sanitation and refuse removal. The majority of the municipality's infrastructure budget is allocated towards the provision of basic services. The majority of spending on trading services have been allocated towards waste water management (R109.7 million). This was followed by water management (R53.4 million), electricity (R39.3 million) and waste management (R7.7 million).

1.2.8 MUNICIPAL PERFORMANCE HIGHLIGHTS AND CHALLENGES

1.2.8.1 Municipal performance highlights

The following performance highlights for the 2019/20 financial year is worth mentioning:

Table 1:18: Performance Highlights

| Highlight | Description |
|--|---|
| Development Services | Development Charges (DCs) are calculated by the municipality and set as a development condition for new developments.
1. DCs paid in: R6,4M.
2. Assets created in lieu of DCs: R10,5M.
Total value created for the municipality in 2019/20: R16,9M. |
| Watergang, Kayamandi (20 units) | The 20 units were completed during the financial year. |
| TRA, Watergang | The upgrading of Zone O is of immense importance to assist with the relocation strategy that is needed to upgrade Zone O, Kayamandi. The temporary relocation area (TRA) accommodates 277 families and after the services have been installed in Zone O, the relocation strategy will commence. |
| Longlands, Vlothenburg | After the signing of the Tripartite Agreement between the land-owner, PDoHS and Stellenbosch Municipality, the funding application to install the internal services were approved. Contractor commenced with the installation of the internal services. This is a multi-year project. |
| Ida's Valley housing project (Erf 11330) | Installation of 195 internal services were completed. The construction of Phase 1, consisting of 84 GAP housing units, were completed. The construction of the BNG housing units commenced and 8 units received completion certificates for hand over. All the BNG houses will be handed over during the next financial year. |
| Mandela City, Klipmuts | The completion of 76 units was delayed as a result of the lockdown regulations that were implemented during the final quarter of the financial year. 20 units were completed and the balance will be completed during the 2020/21 financial year. |
| Kayamandi Town Centre | A comprehensive survey was done to determine the different businesses in the Town Centre of Kayamandi. This information enabled the professional team to revisit the entire layout of the Town Centre and thereby addressing high density developments and business opportunities for the effected residents. A progress report with a proposed concept layout design will be submitted to Council for approval. |
| Smartie Town, Cloeteville | The amount of 66 housing units were successfully completed and the balance of the units will be repaired during the 2020/21 financial year. |
| Upgrading of The Steps / Orlean Lounge | Contractor was appointed and commenced with the upgrading of the units during February 2020. This is a multi-year project and the anticipated completion date is 30 June 2023. |
| Watergang Farm Upgrading | Consultants were appointed to finalise the designs for the installation of 100 waterborne toilets and 80 water taps. Tender document was compiled and will be advertised during the first quarter of the 2020/21 financial year. |
| Erf 7001, Cloeteville | In accordance with the market challenges to provide GAP housing, the municipality did a backyard survey in Cloeteville and revisited the Call for Proposal in line with community statistics.
Bids were received from a potential service provider with proposed layout to develop Erf 7001. During the evaluation of the Call for Proposals, the bidders were found non-responsive and the BAC cancelled the tender. A new Call for Proposal was prepared and advertised. |

1.2.8.2 Municipal Challenges

The following general challenges were experienced by the municipality:

Table 1:19: Municipal Challenges

| Challenge | Actions to address |
|--|---|
| Watergang, Kayamandi (20 units) | Although the repairs of the damaged houses and electrical infrastructure were of the major challenges, the completion of the 20 units were concluded in 2019/20 financial year. |
| TRA, Watergang | The contractor after the community unrest that took place during May 2018, experienced many challenges to create new platforms as well as an acceptable housing typology. After the community workshops, the TRA unit was accepted and approved by Council and PDoHS. The TRA units were completed in the financial year under review. |
| Longlands, Vloffenburg | The signing of the Tripartite Agreement paved the way for the installation of internal services, although the relocation of certain families on the site stays a challenge.
The national lockdown impacted the proposed programme of the Contractor. The funding of the bulk and link services must be provided to address the capacity constraints on site. Funding application for the top structures must be submitted to prevent delays on site. The relocation of families residing on the site poses a risk of delaying the project. |
| Ida's Valley housing project (Erf 11330) | The project was delayed due to the national lockdown regulations. The contractor's programme had to be reviewed in order to fast track the completion of the housing units. An additional funding application was submitted to the PDoHS in order to provide a fence/wall next to the BNG houses. The fence must be erected prior to the occupation of the houses. |
| Mandela City, Klappmuts | The invasion of the land for developable space is a major challenge on site, and will result in project delay. |
| Kayamandi Town Centre | The layout for the Town Centre had to be revised to accommodate more formal and informal businesses. These changes minimises the amount of housing opportunities that was originally created. The community acceptance of high density development but public participation remain an ongoing challenge. |
| Smartie Town, Cloetesville | A contractor was appointed to do the rectification of 106 existing housing units. Due to the extent of defects in the houses, some of the families had to be relocated to temporary structures whilst their housing units were repaired. The appointment of local labour from the effected community was a major challenge and cause delays on-site. |
| Upgrading of The Steps / Orlean Lounge | The national lockdown regulations impacted the proposed programme of the Contractor. The informal structures (backyarders) causes delay on the project due to restricted access for construction activities. A temporary relocation area was provided for the beneficiaries in order to upgrade their respective units. |
| Watergang Farm Upgrading | The application was submitted to the PDoHS to fund the project during the next financial year and imposes a risk should funding not be considered to implement the project. |
| Erf 7001, Cloetesville | A new Call for Proposal was advertised and two bids were received. Unfortunately, both bids were deemed non-responsive and a new Call for Proposal has to be drafted and advertised. |
| Erf 2175, Enkanini | The project was completed at the end of 2019/20 financial year. The project included upgrading of the road system, the ablution facilities and the connection of approximately 300 informal structures.
Electricity was installed to 242 structures in the 2019/20 financial year on erf 2175, phase 4 of Enkanini Electrification. Plans to install electricity to a further 1 000 structures are underway to be executed in the 2020/21 financial year. |
| Congestion on road network | The municipality's main road network operates at and beyond capacity and not adequately meet peak travel demands, resulting in high levels of congestion. |
| Theft of road infrastructure | The theft of manhole covers; pedestrian handrails on bridges, and foundation material under road and bridges pose a safety risk to pedestrians and residents. |
| Illegal electrical connections | Illegal and unsafe connections as an alternative means that communities get themselves electricity, continues to be a challenge.
The awareness of dangers of such continue being shared with communities and |

| Challenge | Actions to address |
|--|---|
| | the challenge at IDP meetings. |
| Staff shortage | <p>The severe staff shortages continue being experienced as a challenge that hampers with service delivery. This was further exposed by COVID-19 pandemic, when a number of staff were either, quarantined, isolated or on sick leave, and no one was available to act.</p> <p>Planned electricity maintenance as a result, is not done to the level the applicable standards requires, which poses a major risk to the municipality.</p> <p>To adequately meet current and future transport challenges, and to effectively manage municipal roads and transport Infrastructure, vacant positions must be filled.</p> |
| Vandalism and cable theft | Infrastructure vandalism continues being a challenge experienced by the municipality. As a result, funding which could have been used elsewhere, is constantly being used to repair such. Fencing of mini-substations and substations where possible is realised. Kiosks where possible and funding allowing are replaced with strongboxes. This is a costly exercise though. |
| Safety of the staff | The safety of staff is also in jeopardy when working in high risk areas and special arrangements must be made with Law Enforcement to accompany staff to ensure their safety when called out to high-risk areas. |
| Electrification of informal settlements | Enclosing infrastructure by building around it, makes it impossible to conduct repairs and as such repairs restore power outages when experienced. Satellite dishes on poles also makes it impossible for operators to conduct repairs. |
| Unqualified staff appointed at libraries | Identified relevant library courses which have been included in the Work Skills Plan developed for the Libraries Department. |
| Security at Cloeteville Library | Alarm was installed and there is security deployed. |

1.2.9 SERVICE DELIVERY OVERVIEW

1.2.9.1 Basic Service Delivery Performance Highlights

Table 1:20: Basic Service Delivery Highlights

| Highlight | Description |
|---|---|
| Stellenbosch Wastewater Treatment Plant | Won the "Project between R 250 million and R 1 billion" category at the Consulting Engineers South Africa (CESA) AON Engineering Excellence Awards. |
| Fire and Disaster Services | The revision of the Disaster Management Plan is done yearly in accordance with Section 53(1) of the Disaster Amendment Act, 2015 (Act No. 16 of 2015). |
| | Smoke alarm installation project continues. |
| | Disaster Management and Fire and Rescue Services received a new fleet; water tankers, bakkies, etc., including specialised tools of trade. |
| | Outdoor gym installed at La Motte and Stellenbosch Fire Stations. |
| | 50% of vacancies filled. |
| Parks, Rivers and Open Spaces | <p>Lawn at Main Building Plein Street, Klipmuts town entrances and selected parks were replaced with artificial grass due to water saving initiatives. This project worked very well especially, and the area remained neat and admirable.</p> <p>2019/2020</p> <p>Ward 1: New outdoor gym was installed; Ward 2 Pathways in Park next to community hall in La Motte.; New fencing and outdoor gym in Lanquedoc ward 3; new gates was installed at river park in ward 4</p> <p>New fencing completed in The Ridge ward 5 and play items in Kreefgat Park Ward 5. Ward 5 swings and play items was refurbished. Beautification on Ida's Valley entrance done in ward 6. New pathway and refurbishment of pathway in ward 7 Brummer Park. New park signage installed in ward 7. Wards 8, 9 and 10 new pots with plants and flowers to beautify the town, ward 10 received new outdoor gym. Park equipment installed in various parks and park bins installed in most wards. Town entrance beautified at Kayamandi entrance ward 13. New slate pathway installed in ward 9 Voorgelegen gardens. Pots planted up outside Utopia. RSEP park completed in Ward 16 with fencing artificial grass play items and outdoor gym. New play items, new fencing, new outdoor gym, integrated park project commenced in Last Street Ward 16. Noble Park received new gates and play item and outdoor gym. Community garden was erected with public participation in ward 16. New play items and outdoor gym installed in ward 17. Gates was installed at Kloof Street Park ward</p> |

| Highlight | Description |
|----------------|---|
| | <p>17. Pots were beautified in Long street ward 17 and 16. Wilger Park received play items in ward 17. New Play items was installed in Ward 18 and Adam Street Park was upgraded. Gym was installed in ward 19. Montrose Rose Park received fencing and artificial grass in ward 21. Ward 22 received outdoor gym, new bins, new signage. Ward 20 received outdoor gym and artificial grass.</p> <p>Parks received one bakkie and two trucks in Stellenbosch and one truck in Franschhoek.</p> <p>Cemeteries received new fleet one truck and one bakkie and Jamestown Cemetery landscaping was improved.</p> <p>Palisade Fencing installed in Curry Street Park Cloeteville. Project was successfully completed. Fencing, Play equipment and outdoor gym installed in Kreefgat Park Ida's Valley. Project was successfully completed.</p> <p>Play equipment and outdoor gym installed in Kudu Park Klapmuts. Project was successfully completed.</p> <p>Play equipment installed in Adam Street Klapmuts Project was successfully completed.</p> <p>Outdoor gym equipment installed in ward 3, 21, 19, 18 and 16. Projects were successfully completed.</p> <p>Flower pots were installed in ward 8 Victoria Street; ward 11 Adam Tas Road centre island and ward 17 Welgevonden Circle. Project was successfully completed.</p> <p>Parks and cemeteries received new fleet, water trailers, trucks and bakkies. All items have been paid and put to work.</p> |
| Social Housing | <p>The municipality was awarded an amount of R500 000 for a feasibility study by the Social Housing Regulator Authority (SHRA) on selected Restructuring Zones. SHRA followed a procurement process and appointed a service provider to do the necessary feasibility studies which will assist the municipality to appoint a Social Housing Institution (SHI) or Other Development Agency (ODA). The feasibility study was submitted to Council and approved accordingly. The development processes that were included in the feasibility study, will also assist the municipality in Social Housing projects going forward.</p> |

1.2.9.2 Basic services delivery challenges

Table 1:21: Basic Service Delivery Challenges

| Service Area | Challenge | Actions to address |
|--|---|--|
| Social Service expectations on Local Government | <p>It is expected of municipalities to assist provincial and national government in the rolling out of services that is not defined as functions of local government (funding and management of temporary homeless shelters), implementation of the Children's Act, Local Drug Action Committees. In the case of the last two examples, it is captured in legislation as the responsibility of municipalities without it being reflected in Schedule 4 and 5 B of the constitution. Budget expenditure on items not perceived to be functions of local government becomes difficult to motivate.</p> | <p>Issue raised with the leadership of the municipality.</p> |
| Development Services, Asset Management and Project Management Unit (PMU) | <p>The municipality has been without a permanent Infrastructure Asset Management and Systems Manager since the post was created in 2018. The current staff shortage, in Asset Management and Development Services leads to excessive workload on remaining staff and in turn has an effect on meeting deadlines – notably those with legislated timeframes. Developers can suffer financial losses and economic activity can be delayed / stalled if the municipality doesn't respond to applications and requests timeously. Similarly, non-compliance with DoRA Integrated Urban Development Grant (IUDG) conditions could lead to IUDG funds being stopped. Therefore, sufficient capacity within this Department is of critical importance.</p> | <p>The following posts have been earmarked for appointment in the 2020/21 financial year:</p> <ol style="list-style-type: none"> 1. Senior Clerk reporting to Senior Manager <p>Development Services – Technician</p> |
| Wayleave Administration and | <p>The installation of telecommunications infrastructure in the road reserve increased</p> | <p>The current organogram must be modified to include a dedicated Wayleave Officer.</p> |

| Service Area | Challenge | Actions to address |
|--|---|--|
| Management | dramatically post the announcement of the National Lockdown Regulations in the final quarter of the year. Due to a combination of staff shortages and the National Lockdown Regulations, there was a failure to adequately coordinate and regulate all work carried out within the public road reserves which resulted in inconvenience to the public and damage to existing services. Though telecommunication licensees have been operating in the WC024, the current levels of activity require a more coordinated and concerted approach. | A Wayleave Policy will be tabled in 2020/21 for review and implementation.

The following post has been earmarked for appointment in the 2020/21 financial year: Asset Management and Systems – Wayleave Office – Field Inspector. Though not nearly enough to enable Quality Assurance and Control across the entire WC024 – this post is currently vacant after a resignation during 2019/20. |
| Illegal and unsafe electricity connections
Vandalism of electrical Infrastructure | Kayamandi and Langrug have illegal and unsafe electrical connections that pose danger to the communities. | An arrangement with law enforces to provide required protection to the officials when removing the illegal and unsafe connections have been made, however with no success. The department will keep on trying.

The department of Labour was also advised of the challenge. Structures are often extended around the existing infrastructure which makes it impossible to access when repairs need to be conducted. Satellite dishes installed on the poles also have the same effect. |
| | The municipality is faced with a challenge of vandalism and forceful opening of its infrastructure to:
1. Steal copper
2. Connect the illegal connections | The municipality has fenced three of the critical mini-substations. A tender for the fencing of the remaining mini-substation and kiosks is at evaluation stages. |
| Organisational Design | Sourcing of experienced, skilled and qualified electricians remain a challenge. A total of seven vacancies existing dating as far back as 2017. As a result, Sups and Managers are often forced to perform duties that would have been performed by these electricians. This has a snowball effect, as their duties in such instances, are neglected, which hampers severely on service delivery. | JDs were sent to TASK, however the challenge still remain, despite the TASK positive outcome, as the outcome was not effected correctly. |
| Security at facilities | Highly problematic, especially Beltana depot where access control is less than desirable. | Beltana committee established to deal with all issues pertaining to facility. Law Enforcement to be more effective.
The access control is currently been investigated to improve the situation. |
| Roads and Transport | Theft of infrastructure.
Theft of manhole covers and pedestrian handrails on bridges and theft of foundation material (sand and stone) under roads and bridges pose a safety risk to pedestrians and residents. | Measures being put in place to replace vandalised and stolen materials as soon as practically possible, and using alternative materials where possible (such as handrails made of fibre cement instead of steel). |
| | Road network operating at capacity and not adequate to meet peak travel demands, resulting in frequent and high levels of congestion. | Prioritising the planning and implementation of new Roads and Transport infrastructure as well as improvements and upgrades to existing Infrastructure, such as Roadways, NMT facilities and Taxi facilities. |
| Parks and Rivers | Vandalism and theft in Kayamandi Parks.
Fencing stolen in Thubelitsha Park and Play equipment stolen and vandalised in other parks. | A decision has been taken that the municipality is not proceeding with the development of Thubelitsha Park. Discussions is ongoing with community members to help with the security at play parks. |
| | Lack of security leading to vandalism and dumping on selected Parks and Cemeteries
Lack of immediate cemetery space remaining a challenge whilst we await authorisations for new zoned cemeteries. | Is not enough staff or other resources to provide security at all the play parks.
A new section has been developed in Jamestown cemetery to accommodate burials until a new cemetery is developed |

| Service Area | Challenge | Actions to address |
|--------------|---|---|
| | Lack of approved tenders affecting the operational programme. | Additional tenders have been put in place to be able to provide service to the community. |

1.2.9.3 Proportion of Households with access to Basic Services

Table 1:22: 2011 Households with minimum level of Basic Services

| Service | 2011 |
|--|-------|
| Formal Dwellings | 90.7% |
| Informal Dwellings | 9.3% |
| Formal Dwelling Backlog | 3 149 |
| Electricity Connections (% Share of HHS) | 98.8% |
| Hygienic Toilets | 97.2% |
| Water (Piped Water) | 96.7% |
| Formal Refuse Removal (% share of HHS) | 89.9% |

Source: Statistics South Africa

1.2.9.4 Financial Viability Highlights

Table 1:23: Municipal Viability Highlights

| Highlight | Description |
|-------------------------------|--|
| Capital Expenditure Framework | Developed a capital expenditure framework for the period 2019 - 2029 compliant with the requirements of the Integrated Urban Development Framework and the Spatial Planning and Land Use Management Act (SPLUMA). |
| Long Term Financial Plan | Developed a 10-year Long Term Financial Plan that is incorporated in the capital expenditure framework. |
| Current ratio | The Municipality maintained a very good current ratio of 1.74:1. This compares well with the norm of 1.5 to 2:1. |
| Collection rate | The Municipality maintained a good collection rate of 102.68 which is above the norm of 95%. This indicates that the Municipality creditor control and debt collection processes are in place and the revenue is management effectively. |
| Finance Charges | Finance charges represent 1.87% of the total operational expenditure. This compares favourably with the norm of 6% to 8%. |
| Liability Management | Capital Cost (Interest Paid and Redemption) represent 3.43% of total operating expenditure. This indicates that the Municipality has the capacity to take on additional financing from borrowing to invest in revenue generating assets. |
| Debt Management | The Municipality's total debt represents 17.63% of the total operational expenditure. This compares favourably with the norm of 45% and is an indication that the Municipality has the capacity to take on additional financing from borrowings. |

1.2.9.5 Financial Viability Challenges

Table 1:24: Financial Viability Challenges

| Challenge | Description |
|---------------------|--|
| Financial Viability | The traceability of all debtors poses a challenge to the debt collection process. Low economic growth, increase in unemployment and above inflation increases of cost of water impacts on affordability of municipal accounts. |
| Revenue Leakage | An integrated revenue enhancement approach followed to combat revenue leakages. |

1.2.9.6 National Key Performance Indicators – Municipal Financial Viability and Management (Ratios)

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations no. 796 of 2001 and section 43 of the MSA. These key performance indicators are linked to the National Key Performance Area namely Municipal Financial Viability and Management.

Table 1:25: Financial Viability and Management (Ratios)

| KPA and Indicator | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|--|---------|---------|---------|---------|---------|---------|
| Debt coverage (total operating revenue - operating grants received): debt service payments due within the year | 42.45 | 64.13 | 41.29 | 40.87 | 46.49 | 25.43 |
| Service debtors to revenue – total outstanding service debtors: revenue received for services. | 18.22% | 10.22% | 18.09 | 20.7% | 30.96% | 25.45% |
| Cost coverage (available cash + investments): monthly fixed operating expenditure. | 9.89 | 1.4 | 5.71 | 5.75 | 0.33 | 2.41 |

1.2.9.7 Financial Overview

Table 1:26: Financial Viability and Management Financial Overview

| Details | Original budget | Adjustment Budget | Actual |
|-------------------------------|-----------------|-------------------|-----------|
| | R | | |
| Income | | | |
| Grants(Operating and Capital) | 313 427 | 329 555 | 285 026 |
| Taxes, Levies and Tariffs | 1 380 710 | 1 285 711 | 1 240 215 |
| Other | 225 597 | 219 274 | 217 355 |
| Sub-Total | 1 919 735 | 1 834 539 | 1 742 596 |
| Less Expenditure | 1 808 247 | 1 778 284 | 1 661 441 |
| Net surplus/(deficit) | 111 488 | 56 255 | 81 155 |

1.2.9.8 Operating Ratios

Table 1:27: Operating Ratios

| Detail | Expected norm | Actual | Variance |
|-------------------------|---------------|--------|----------|
| Employee Cost | 25 %– 40 % | 29.95% | 9.05% |
| Repairs and Maintenance | 8% | 3.63% | 4.37% |
| Finance Charges | 6%-8% | 1.87% | 6.13% |

Employee cost is below the national norm of between 25% to 40%, representing a positive outcome, Repairs and maintenance are below the norm, which indicates that expenditure on repairs and maintenance would have to be increased in future budgets to properly maintain Council's assets. Finance charges are 6% lower than the norm of 6-8%, this can be attributed mainly to our low reliance on borrowings to fund our capital budget.

1.2.9.9 Total Capital Expenditure

Table 1:28: Total Capital Expenditure

| Detail | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|-------------------|---------|---------|---------|---------|---------|---------|
| Original Budget | 294 188 | 452 759 | 463 792 | 418 057 | 528 041 | 558 276 |
| Adjustment Budget | 251 031 | 437 183 | 482 580 | 499 855 | 563 550 | 577 905 |
| Actual | 230 351 | 348 861 | 410 562 | 433 682 | 493 303 | 405 931 |

1.2.9.10 Municipal Standard Chart of Accounts

MFMA Circular No. 80: Municipal Financial Systems and Processes requirements in support of the Municipal Standard Chart of Accounts (mSCOA) issued in terms of the Municipal Finance Management Act No. 56 of 2003. In MFMA SCOA Circular 1 it was indicated that mSCOA is a business reform rather than a mere financial reform and requires a multi-dimensional relationship.

The municipal standard chart of accounts was implemented in Stellenbosch Municipality on 1 July 2017. The Municipality is in continuous engagement with the service provider, National Treasury and other municipalities through various working groups as well as online platforms to improve mSCOA compliance and functionality.

1.2.10 ORGANISATIONAL DEVELOPMENT OVERVIEW

Section 66 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) allows a Municipal Manager to develop a staff establishment and submit it to Council for approval. On the 26th of April 2017 the Municipal Council resolved for the development of a draft macro and micro organogram.

A process plan, paving the way for ensuring an inclusive and comprehensive IDP process and culminated in the adoption of the 2020/21 (revised) IDP in May 2020. The process was also marked by a renewed commitment to ensuring that the organisational structure, human resources, skills and capacity entrenched in its officials and councillors all contribute immensely to the successful execution of the municipal strategy.

1.2.10.1 COVID- 19 and Public Participation

As the Third Draft IDP Review was tabled, South Africans was confronted by a nationwide lockdown limiting most movement and confining South Africans to their homes and forcing businesses to close. The fast response to the COVID-19 pandemic and ensuing lockdown was at the time aimed at flattening the curve by reducing the rate of infections. Level 5 of this lockdown was very restrictive with drastic measures implemented to contain the spread of the virus. Only essential services were allowed to operate, taking into account only those functions absolutely necessary to sustain livelihoods and to enforce the lockdown regulations.

The lockdown also had far reaching implications for municipalities who are required to respond positively to the lockdown regulations whilst simultaneously being responsive to the most critical needs of the public under lockdown. Interventions put in place under COVID-19 by Stellenbosch Municipality included:

- A payment reprieve / holiday on property rates was implemented from 01 April 2020 to 30 June 2020;

- No interest was charged for property rates billed over this period (subject to criteria that was made available on the municipal website);
- Free basic water allocation for indigent residents was increased from 6 to 10 kilolitres per household from 1 April 2020 to 30 June 2020;
- A temporary suspension of all credit control measures and procedures were implemented until the end of April 2020, meaning that all electricity meters that were blocked because of overdue accounts, were unblocked and residents were able to buy and upload electricity freely during this period; and
- Essential municipal services continued during the lockdown period. These included refuse removal, water, electricity, traffic, law enforcement and fire services.

The 5-week lockdown from 27 March to 30 April 2020 fell smack-bang in the middle of the commenting period on the Draft IDP and MTREF Budget. Whereas the municipality would have engaged in various forms of public meetings to provide the public the opportunity to share their views with the municipality, the municipality were confined to online platforms and written comments. The municipality put a few alternative measures in place, including the Stellenbosch Citizen App, available in the App stores, which allowed everyone the opportunity to comment and share views via their mobile devices.

During May 2020 the first easing of the national lockdown measures was implemented taking the lockdown from level 5 to level 4. Level 4 meant readiness to respond to greater movement of the public across municipal space as economic activity expands.

As at 18 May 2020 the Western Cape had 9 246 COVID-19 infections with Stellenbosch Municipality accounting for 60 infections of which 39 was active.

In spite of the limitations faced by the lockdown and the banning of all gatherings and meetings, the municipality remained committed to ensuring that the public participation process is a two-process.

The public comments received from the engagement with the public and with the respective ward committees over September and October 2019 was captured and carefully considered by each department. These considerations formed part of the strategic conversations of each directorate in the determination of their strategic approach and budgetary requirements the year under review of the Medium Term Revenue and Expenditure Framework (2021 to 2023 MTREF).

1.2.10.2 Municipal Transformation and Organisational Development Highlights

1.2.12 AUDITOR GENERAL REPORT

The Minister of Finance has issued Government Gazette number 851 which exempts municipalities in terms of S177 (1) (b) of the MFMA. The exemption relates to the adhering to the deadlines for the submission of the Annual Financial Statements, Annual reports and Oversight reports. The audit opinion for the 2019/20 financial year has not yet been concluded.

2 CHAPTER 2: GOVERNANCE

Good Governance is an approach of government that is committed to creating a system founded strengthening democracy, promoting transparency, building public administrative capacity, responsive to public needs and respect for human rights. Good Governance is measured by the eight factors including participation, rule of law, transparency, responsiveness, consensus oriented, accountability, effectiveness and efficiency, equitability and inclusivity. With a context of good governance corruption is minimised, the views of minorities are taken into account and the voices of the most vulnerable in society are heard in decision-making. It is also responsive to the present and future needs of society.

2.1 NATIONAL KEY PERFORMANCE INDICATORS - GOOD GOVERNANCE AND PUBLIC PARTICIPATION

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations 796 of 2001 and section 43 of the MSA. This key performance indicator is linked to the National Key Performance Area - Good Governance and Public Participation.

Table 2.1: National KPIs - Good Governance and Public Participation Performance

| KPA and Indicators | 2013/14 | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|---|---------|---------|---------|---------|---------|---------|---------|
| The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan. | 92.97% | 91.52% | 79.74% | 85.08% | 86.5% | 87.5% | |

2.1.1 PERFORMANCE HIGHLIGHTS - GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Table 2.2: Performance Highlights - Good Governance and Public Participation

| Highlight | Description |
|--|--|
| Council | Council has remained stable and well-functioning throughout 2019/20. |
| Audit Outcomes | Outstanding |
| Organisational | The new organisation structure was approved and the placement process is largely completed. |
| Review of System of Delegations | The review of the System of Delegations was completed. |
| S.80 and S.79 Committees of Council | The S.80 and S.79 Committees of Council as establishment commenced actively and a number of these committees meet regularly. |
| Public Participation | Public participation sessions were held with all 22 ward committees in September 2019.
However, due to the outbreak of the COVID-19 pandemic in March 2020, public participation was moved to online platforms. Interested and affected parties were encouraged to participate online and to provide feedback on the IDP and Budget through the newly developed Stellenbosch Citizen App and email. |
| Management of land occupation in Kayamandi | The municipality has been actively engaging with SAPS, the Sheriffs and the Dept. of Justice to effectively manage the land invasion in Kayamandi. |
| Functioning of the Municipal Planning Tribunal (MPT) meeting | The Municipal Planning Tribunal is established and fully functioning. |

| Highlight | Description |
|-----------------|---|
| Master Planning | <p>Updates to the following master planning had commenced:</p> <ul style="list-style-type: none"> • CCTV Master Plan development in progress; • Stellenbosch Municipality's By-Law: Roads and Streets (review and update of previous by-law); • Stellenbosch Municipality's By-Law: Stormwater (new); and • Stellenbosch Municipality's By-Law: Parking (review and update of previous by-law). |
| Communication | <p>Stakeholder engagement has improved significantly and media releases / media responses for local, regional and national publications and broadcasters are released on a weekly basis.</p> <p>Activity on our social media platforms and municipal website has improved. Social media platforms have grown significantly and now reaches a much larger, ever-growing audience.</p> |

2.1.2 CHALLENGES - GOOD GOVERNANCE AND PUBLIC PARTICIPATION

Table 2:3: Challenges - Good Governance and Public Participation

| Description | Actions to address |
|---|--|
| Communication | The municipal website is in need of redesign for ease of access to the public. |
| Fraud and Corruption Management | Through the fraud hotline, direct calls received and walk-ins, active reporting has been ongoing. Unfortunately, it has become apparent that the fraud hotline and in-particular the Regulations for Senior Managers (Misconduct and Financial Misconduct) is being abused to unfairly target individual and management. Most of the allegations against senior management (MM and section 56) has had no basis other than causing disrepute. Continuous threats of charging people with no basis is also ongoing. This gives rise to excessive use of resources and risk to the reputation of individuals and the municipality to remain compliant with relevant legislation. |
| Unrest and Protest | Regular patrols are being executed and the situation continuously monitored. Proposal to establish a tactical response unit with Nyala for deployment has been submitted. |
| Illegal and unsafe electrical connections | Illegal and unsafe electrical connections in Kayamandi and Langrug poses serious danger to the communities. |
| Master Planning | The Electricity Masterplan needs to be reviewed. |
| Vandalism of electrical infrastructure | Attempts to steal copper and illegal connections has contributed to vandalism and forceful opening of electrical infrastructure. |
| Illegal dumping | Illegal dumping has been on the increase especially around open areas and parks. Regular monitoring and enforcement of transgressors. |

2.2 COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE

2.2.1 POLITICAL GOVERNANCE STRUCTURE

The council performs both legislative and executive functions. It focuses on legislative, oversight and participatory roles, and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly and to facilitate political debate and discussion. Apart from their functions as policy makers, Councillors are also actively involved in community work and in the various social programmes in the municipal area.

2.2.2 COUNCIL – 01 JULY 2019 TO 30 JUNE 2020

Below is a table that categorises the councillors within their specific political parties and wards:

Table 2:4: Council for the period 01 July 2019 to 30 June 2020

| Name of councillor | Capacity | Political Party | Ward representing or proportional |
|------------------------|--|-----------------|-----------------------------------|
| F Adams | Part-time | DNCA | Proportional Representative (PR) |
| FJ Badenhorst | MayCo member from 20 November 2019 | DA | Ward Councillor: Ward 21 |
| F Bangani-Menziwa [Ms] | Part-time | ANC | Ward Councillor: Ward 13 |
| Ald PW Biscombe | Single Whip | DA | Ward Councillor: Ward 17 |
| G Cele [Ms] | Part-time | ACDP | PR |

2.2.3 EXECUTIVE MAYORAL COMMITTEE

The Executive Mayor of the municipality heads the executive arm of the municipality and is assisted by the Mayoral Committee. The Executive Mayor is at the centre of the system of governance, since executive powers are vested in her to manage the day-to-day affairs. This means that the Executive Mayor has an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, delegated by the council, as well as the powers assigned by legislation. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor and Mayoral Committee are acting in sync with one another.

The Executive Mayoral position were occupied as follows:

Table 2.6: Executive Mayor for the period

| Executive Mayor for the period | Period |

2.2.4 PORTFOLIO COMMITTEES

In terms of section 80 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), if a council has an executive committee, it may appoint, in terms of section 79, committees of councillors to assist the executive committee or executive mayor. Section 80 stipulates that committees are permanent committees that specialise in a specific functional area of the municipality and, in some instances, may make decisions on specific functional issues. They advise the executive committee on policy matters and make recommendations to council.

The portfolio committees for the 2019/20 mayoral term and their chairpersons are as in the tables below.

2.2.6 STRATEGIC GOVERNANCE STRUCTURE

The Municipal Manager is the Chief Accounting Officer of the municipality. She is the head of the administration and serve as chief custodian of service delivery and implementation of political priorities. She is assisted by her directors, which constitutes the Management Team, whose structure is outlined in the table below:

Table 2:39: Administrative Governance Structure

| Name of Official | Department | Performance agreement signed |
|-------------------|--|------------------------------|
| | | (Yes/No) |
| Geraldine Mettler | Municipal Manager | Yes |
| Annalene De Beer | Director: Corporate Services | Yes |
| Tabiso Mfeya | Director: Planning and Economic Development (until 29 February 2020) | Yes |
| Anthony Barnes | Director: Planning and Economic Development (from 01 June 2020) | Yes |
| Kevin Carolus | Chief Financial Officer | Yes |
| Gary Boshoff | Director: Community and Protection Services | Yes |
| Deon Louw | Director: Infrastructure Services | Yes |

2.3 COMPONENT B: PUBLIC ACCOUNTABILITY

MSA section 15(b) requires a municipality to establish and organise its administration to facilitate a culture of accountability amongst its staff. Section 16(i) states that a municipality must develop a system of municipal governance that complements formal representative governance with a system of participatory governance. Section 18(i) (d) requires a municipality to supply its community with information concerning municipal governance, management and development.

The participation outlined above is required in terms of the:

- preparation, implementation and review of the IDP;
- establishment, implementation and review of the performance management system;
- monitoring and review of performance, including the outcomes and impact of such performance; and
- preparation of the municipal budget.

2.3.1 INTERGOVERNMENTAL RELATIONS

2.3.1.1 National Intergovernmental Structures

The National Forum, i.e. The Municipal Managers Forum, facilitated by the Department of Cooperative Government and Traditional Affairs (COGTA) meets twice per annum. New legislation and its implications, as well as challenges for local government, e.g. financial sustainability, professionalism and oversight structures are discussed.

The Directorate: Infrastructure Services represented by the Director: Infrastructure Services as a member of the national WRC / SALGA Municipal Benchmarking Initiative in Water Services, which collaborates in a national programme towards the improvement of water services, co-driven by SALGA and the Water Research Commission (WRC) and in collaboration with Ethekwini Municipality, MILE (Municipal Institute of Learning), representatives of other municipalities, the Institute of Municipal Engineers (Imesa) and the Department of Water and Sanitation (DWS).

2.3.1.2 Provincial Intergovernmental Structures

Office of the Municipal Manager

The Stellenbosch Municipality is a keen participant of joint intergovernmental planning initiatives of Provincial Government. MinMay (Provincial Ministers, Provincial Heads of Departments, Mayors and Municipal Managers) and the Premier's Coordinating Forum are provincial forums for fruitful interaction regarding local government cooperation and challenges. These meetings are held twice per annum. The Provincial Municipal Managers Forum meets quarterly.

Chief Audit Executive and Chief Risk Officer fora are held on a quarterly basis in conjunction with Provincial Treasury where all municipalities share best practises and consult on areas of improvement.

Stellenbosch is represented on the Provincial IDP Managers Forum, the Provincial Public Participation and Communication Forum, all of which are facilitated by the Provincial Department of Local Government.

Financial and Corporate Services

The Directorate: Financial Services participates in several provincial fora on a quarterly basis. The fora include the Supply Chain Management Forum, the Municipal Property Rates Act forum, the Management Accountants forum as well as the Chief Financial Officer Forum.

The Municipal Court is in full operation and collaborates with the Department of Justice on a regular basis.

Planning and Economic Development

The municipality is represented by the Manager: Spatial Planning on the task team set up by DEA&DP to revise the Provincial Spatial Development Framework (PSDF). Through this inter-governmental process Stellenbosch Municipality is able to provide input into the format and substance of this document that will have a legal bearing on all local municipalities in the Western Cape.

The DEA&DP and the municipality established a working group to consult monthly or more regularly as the need arises about environmental authorisation applications and land use (spatial planning) matters. Slow response times to applications by developers, entrepreneurs, farmers, service providers (Eskom, Telkom, cellular operators, etc.), waste management bodies, mining operators and roads authorities, cause delayed investment and infrastructure provisions. This has negative effects on the economy, hence the working group was established to increase the speed with which the applications are administered.

The working group consists of the technical role players and it is overseen by the portfolio councillors of the municipality. This structure ensures prior commitment to and understanding of matters to be reported to the relevant portfolio committees or council. The working group is administered by the DEA&DP and meetings are in liaison with the Directorate: Planning and Economic Development, who must invite and ensure attendance by affected internal role players.

Regional Forum Meetings between Provincial Department of Human Settlements (PDoHS) and Municipalities in the Cape Winelands region:

- The PDoHS and the municipalities in the Cape Winelands Region meet on a quarterly basis to discuss all new housing policies and budget related matters in housing delivery. During the meeting, all the housing officials of the various municipalities are present to share their new innovative ideas. The overall performance of each municipality is discussed in detail as well as mitigating options if the need arises;
- Applications of new and existing projects are also discussed with the feedback from the PDoHS. The municipalities receive information relating to: beneficiary administration, outstanding approvals, informal settlement challenges, title deed transfers, farm worker evictions and other matters with regards to the housing delivery. Legislation and court rulings are also discussed to ensure that senior officials are aware of any new implementation programmes, circulars and legal precedents. Each of the five municipalities is given the opportunity to host this engagement;
- The Informal Settlements Department also represents the municipality at the bi-monthly Informal Settlements Support Programme (ISSP) meetings of the Provincial Department of Human Settlements (PDoHS). The latter programme aims to interpret National and Provincial guidelines with respect to upgrading of informal settlements. The purpose of these monthly meetings is to discuss best practices in informal settlements within the Cape Winelands region; and
- The Informal Settlements Department furthermore collaborates between various Municipal Departments and Stats SA. The collaboration is aimed at regularising the municipality's data

collection efforts into a format that is acceptable to Stats SA and that the collected data eventually will meet the standards as required by Stats SA.

Infrastructure Services

The Directorate participates in the Stellenbosch River Collaborative Steering Committee with the aim of developing a multi-stakeholder collaborative governance process within which to deal with issues of water quality and pollution in the Stellenbosch rivers. The participants include the Winelands Water Users Association, Stellenbosch Municipality, Department of Water Affairs, the Department of Environmental Affairs, Cape Nature, WWF, Wildlands and key stakeholders in the wine industry such as Spier and the Distell group.

The 3rd Generation Integrated Waste Management Plan (IWMP), gives direction regarding Waste-to-Energy, Alternate Waste Management options and Waste Management projects proposals. This innovative approach was recognised by the DEA&DP when the municipality was requested to assist three other local municipalities in taking this approach. The municipalities of Beaufort West, Prins Albert and Laingsburg were assisted in this manner by the visit of the Waste Management Department team, who trained the local officials as well as assisted in the first data collection exercise.

Stellenbosch Municipality is also represented at the quarterly Waste Management Officers Forums, where best practices, changing legislation, feedback from national and provincial government policy changes, etc. are discussed to keep all municipalities in the Western Cape abreast of all issues pertaining to waste management. The Western Cape Recycling Action Group (RAG) quarterly forums, although more geared at private sector contributions to waste minimisation, also provide the platform for municipalities to engage with each other and the private sector for waste minimisation opportunities.

The Electrical Department is extensively involved with the other local municipalities' electricity departments through the Association of Municipal Electricity Utilities (AMEU). This project is an initiative to implement energy saving and load shifting capacity within the municipal area and is being used with great success.

Community and Protection Services

Traffic Services liaises with Western Cape Government: Department Transport and Public Works on a continuous basis on matters related to transport administration and licensing, traffic law administration regarding motor-vehicle licensing and issuing of learner and driving licenses.

The department further engages with RTIA, RTMC, Director Public Prosecutions, Department of Justice regarding legislative requirements and adherence.

To execute the Safely Home Programme, the department interacts with various engineering entities such as provincial engineers and Cape Winelands District Council. The Western Cape Government developed the Provincial Strategic Plan (PSP) which gave rise to policies, programmes and projects forming partnerships amongst government, citizens, civil society and business. Various spheres of government are being engaged to co-create a culture of wellness and safety in the workplace and to promote wellness and safety through integrated service delivery models in order to address the social determinants of health through interaction with Department Education, Health Department and SAPS.

The municipality engages in numerous partnerships to facilitate service delivery.

Table 2:40: Municipal Partnerships

| Name of Partner / Partnership | Purpose |
|--|--|
| Mayor / Rector Forum | A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the university's expertise and resources. |
| Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU) | Cooperation in terms of closed circuit television in the interest of the security of the town and the campus with a view to a crime-free university town. |
| Landfill Monitoring Committee | A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site. |
| IMESA (Institute for Municipal Engineers South Africa) | A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery. |
| Integrated Development Committee (IPC) | A partnership with the university and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and university. |
| Department Social Development, DCAS, Cape Winelands District Municipality | Joint implementation of programmes focussing on common issues within WC024. |
| SALGA Municipal Benchmarking Initiative | A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing and iterative performance improvements. |
| Stellenbosch River Collaborative | A partnership was formed between various role players to improve the water quality in the Eerste River catchment, with the focus on the Plankenbrug river. |
| Bergriver Improvement Programme | A partnership was formed to improve the quality of the storm water run-off from the Langrug Informal Settlement. The project entails the implementation of biomimicry, waste recycling and a Sustainable Urban Drainage lab. |
| LTAB | A partnership was formed between political leaders to discuss Land Transport-related matters that affect transport in the area. |
| Transport Working Group | A Transport Working Group was established to discuss transport related matters that affect Stellenbosch, including all relevant governmental institutions and other role players. |
| IPC | The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha, Overstrand, Theewaterskloof, and Drakenstein Municipality that discuss all transport related matters to effectively promote regional planning |
| NMT Working Group | A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consist of NMT users, officials, representatives from the university and the disabled fraternity. |
| Drought Steering Committee | This is a committee consisting of a panel of roll players in the drought intervention plan including consultants to discuss, plan, manage and action the Drought Intervention strategies that culminated from various source documents including WCWDM strategies, WSDP, Audit Reports and various Master Plans and processes. It also oversees the SCM and construction phase of the plans. |
| GreenCape | The GreenCape partnership represents a cooperation with the province's 110% green initiatives, focussing on alternative waste management initiatives and energy efficiency. |
| CSIR | A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch. |
| Genius of Space | This initiative developed from, and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River. |
| General | Municipal Partnerships. |

| Name of Partner / Partnership | Purpose |
|--|---------|
| District Intergovernmental Structures | |
| <p>The Cape Winelands District Municipality's Executive Mayor is Chairperson of the District Coordinating Forum which has been established in accordance with the Intergovernmental Relations Framework Act, No. 13 of 2005. This forum meets quarterly and seeks to promote and facilitate intergovernmental relations between the district municipality and the local municipalities in the district. The Stellenbosch Municipality participates in this forum and the Cape Winelands District Municipal Managers Forum and benefits immensely from this involvement by being exposed to good practises in other municipalities and strengthening the relationship with the district municipality in forging joint partnerships in the interest of good governance and service delivery. The Cape Winelands District Municipality supports community development and use indigenous sports to create social cohesion amongst communities in the district. Special focus and attention was given to our communities in rural areas. Stellenbosch, Drakenstein and Breede Valley Municipalities have participated in various indigenous games which were hosted by the Cape Winelands Municipality. The relationship between Stellenbosch Municipality and the district municipality has dramatically improved and the Community Services Department has managed to exceed all expectations in this regard. A targeted approach was followed and sports were used as a catalyst to cement this relationship with the district.</p> <p>The areas that the Department of Community Services targeted were communication, sharing of resources, capacity building and financial resources. The improved relationship between the district municipality and Stellenbosch Municipality enabled the communities to also participate in the Provincial and National Indigenous Games.</p> | |

2.3.2 REPRESENTATIVE FORUMS

2.3.2.1 Local labour Forum

The table below lists the members of the Local Labour Forum for the 2019/20 financial year:

Table 2:41: Local Labour Forum

| Name of representative | Capacity | Meeting dates |
|---|---|-------------------|
| E Groenewald [Ms] | Councillor and Chairperson | 01 August 2019 |
| R Du Toit [Ms] | Councillor | |
| AR Frazenburg | Councillor | |
| LK Horsband [Ms] | Councillor | |
| XL Mdemka [Ms] | Councillor | |
| RS Nalumango [Ms] | Councillor | 26 August 2019 |
| A de Beer [Ms] | Director: Corporate Services | 30 September 2019 |

| E Vergotine | IMATU Representatives | |
| D Williams | IMATU Representatives | |

2.3.3 WARD COMMITTEES

The advent of democracy in 1994 brought about a new democratic local governance system which promotes certain basic values and principles. Such values and principles include transparency, accountability and an open and inclusive system of governance through community involvement in governance, and planning and democratisation of development. This certainly placed South Africa on par with other democratic governments throughout the world and positioned it as a reputable reference form of effective decentralised system of government.

The notion of participation remains a key cornerstone of good governance and constitutes an integral component in the policy making process, development planning and budgeting. Section 152 of the Constitution, places the participation of communities at the centre of service delivery and other matters of Local Government. Correspondingly, the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998) and the MSA provides the legislative framework for the establishment of Ward Committees by municipalities.

Section 42 of the MSA stipulates that a municipality, through appropriate mechanisms, processes and procedures established in terms of Chapter 4 of said Act, must involve the local community in the development, implementation and review of the municipality's performance management system and, in particular, allow the community to participate in the setting of appropriate key performance indicators and performance targets for the municipality.

A general understanding has emerged that a ward committee is an area-based committee whose boundaries coincide with ward boundaries.

Ward Committees:

- are made up of representatives of a particular ward;
- are made up of members who are elected to represent a specific geographical area/block;
- are chaired by the ward councillor;
- are meant to be an institutionalised channel of communication and interaction between communities and municipalities;
- give the community members the opportunity to express their needs and opinions on issues that affect their lives, and to be heard at the municipal level via the ward councillor; and
- are advisory bodies created within the sphere of civil society to assist the ward councillor in carrying out his or her mandate in the most democratic manner possible.

Ward committees should be elected by the community they serve. A ward committee may not have more than 10 members and women should be well represented. The ward councillor serves on the ward committee and acts as the chairperson. Although ward committees have no formal powers, they advise the ward councillor, who makes specific submissions directly to the council. These committees play a critical role in the development and annual revision of the integrated development plan of the area.

The ward committee support the ward councillor, who receive reports on development, participate in development planning processes and facilitate wider community participation. The municipality constantly strives to ensure that all ward committees function optimally in terms of the provision of community information, convening meetings, ward planning, service delivery, IDP formulation and performance feedback to communities.

The year 2020 will undoubtedly be remembered as a year that changed the world. The COVID-19 pandemic has undeniably brought about profound changes on all levels of society. These changes, inter alia, demand new ways of thinking about development and public participation.

Ward 1: Franschhoek town, Bo-Hoek Farms, Mooiwater

Table 2:42: Ward 1 Committee Members

| Name of representative | Capacity representing |
|------------------------------|-------------------------------------|
| Aldridge Frazenburg | Councillor |
| AH Bauer | Bo-hoek farms |
| H Diedericks | Beaucop De Leau to School Street |

| Wendy Crowley | Ward Administrator |

2.3.4 FUNCTIONALITY OF WARD COMMITTEES⁴

The purpose of a ward committee is to:

- create formal communication channels between the community and Council;
- advise the Ward Councillor in identifying the needs and concerns of the community;
- support the Ward Councillor in informing the community about their rights and responsibilities; and
- support the Ward Councillor in consulting with community members and providing feedback.

The COVID-19 pandemic has undoubtedly brought the world to a standstill prompting governments including local governments to be responsive to the plight of marginalised individuals and vulnerable groups.

In an effort to limit the spread of the pandemic, large gatherings were banned including all public meetings, ward meetings at local government level and other invited or created spaces of engagements. The rapid transmission of the pandemic across the globe caused severe panic and its prevention became the number one priority to be addressed.

It is without a doubt that the biggest casualty of the COVID-19 pandemic is public participation. Local government has the responsibility to provide the platforms / tools thereby enabling people to be part of the oversight and public participation activities.

Public participation is crucial in the collective response to the COVID-19 pandemic from adherence to the regulations to the steps needed to be taken on easing of the restricting imposed by National Government.

Ward committees need to find new ways of conducting business inter alia through various platforms such as virtual meetings or zoom meetings which produce various challenges for some constituencies.

The table below provides information on the establishment of Ward Committees and their functionality:

Table 2:64: Functionality of Ward Committees

| Ward Number | Committee established | Number of items /reports submitted to the Speakers/IDP Office | Number of Public meetings | Meeting dates of ward committees | Committee functioning effectively |

6 Feb | Yes |

⁴ Under the heading Functionality of Ward Committees (paragraph 2.3.4) in the Annual Report 2018/19, it was stated that the Policy and Procedures for Ward Committees was under review and that it would be submitted to Council for consideration. This was not correctly stated. It should be noted that said policy was (during the 2018/19 financial year) submitted to, and subsequently adopted by, Council at a meeting held on 24 April 2019.

2.4 COMPONENT C: CORPORATE GOVERNANCE

Corporate governance is the set of processes, practices, policies, laws and stakeholders affecting the way an institution is directed, administered or controlled. Corporate governance also includes the relationships among the many stakeholders involved and the goals for which the institution is governed.

2.4.1 RISK MANAGEMENT

Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient and transparent systems of financial and risk management and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

This responsibility was delegated to the Chief Risk Officer. During this current financial year, the following were done:

- continuous awareness raising throughout the municipality;
- the Risk Management Committee was established to facilitate and govern the risk management process, with a terms of reference, and has been operational since January 2013;
- the Chief Audit Executive has a seat on the Risk Management Committee where all risk and fraud management related activities are reported;
- the Risk Management Committee reports into the Audit Committee;
- risk registers have also been completed at an operational level;
- the previous year's strategic registers were revisited and an acceptable risk appetite was determined;
- the revised risk register was adopted by Council;
- risks were also identified which could prevent the achievement of the predetermined objectives, and were noted in the SDBIP; and
- the Risk Management Policy was reviewed and adopted by Council;

Although the Chief Risk Officer is responsible for coordinating and facilitating risk management at all levels within the municipality, management plays an active role in risk management and the mitigation of risk exposure.

The top 5 risks identified for 2019/20 are as follows:

1. Scarcity of landfill space.
2. Increase community unrest in the run up to the elections.
3. Growth in demand for housing exceeds the resources available for development and growing asset management constraints.
4. Electricity Supply Constraints.
5. Financial Sustainability.

Risk Management Grid

2.4.2 STRATEGIC RISKS IDENTIFIED

Table 2:65: Strategic Risks Identified

| Revised Strategic Risks | | | | | | |
|-------------------------|---|---|---|---------------|--------------------|--|
| Risk Item | Risk Description | Risk Background | Strategic Focus Areas | Impact Rating | Likelihood Ratings | Directorate |
| SR 1 | Scarcity of landfill space | Unavailability of suitable land | Green and Sustainable Valley | 4 | 4 | Infrastructure Services |
| | | Costs of SLA's and alternative waste disposal | | | | |
| | | Legislative requirements i.e EIA applications and approvals etc. | | | | |
| SR 2 | Increased community unrest in the run up to the elections. | Illegal invasions and landgrabs | Safe Valley | 4 | 5 | Municipal Manager/All Directorates |
| | | Job creation/opportunities | | | | |
| | | Housing backlogs | | | | |
| | | Safety of ward Councillors | | | | |
| SR 3 | Growth in demand for housing exceeds the resources available for development and growing asset management constraints | Lack of bulk infrastructure | Dignified Living | 4 | 5 | Planning and Economic Development |
| | | Lack of identified and suitable land, unrealistic eviction judgments | | | | |
| | | Aging infrastructure as a result of poor maintenance of existing infrastructure | | | | |
| | | Insufficient resources for new infrastructure | | | | |
| SR 4 | Electricity Supply Constraints | Recurrence of load-shedding | Valley of Possibility | 4 | 5 | Infrastructure Services, Community Protection Services, Financial Services |
| | | Possible further constraints to Eskom electricity supply | | | | |
| SR 5 | Financial Sustainability | Debt management | Good governance and Compliance, Green and Sustainable Valley | 5 | 4 | Financial Services |
| | | Cash-flow | | | | |
| | | Changes patterns in revenue | | | | |
| SR 6 | Loss of credibility and reputation due to perceived fraud and corruption | Abuse of legislation. | Good Governance and Compliance | 4 | 5 | All Directorates |
| | | Reputational risk and credibility | | | | |
| | | Incorrect media statements and role of social media in incorrect negative reports etc. | | | | |
| SR 7 | Material Misstatements in the AFS | System errors | Good Governance and Compliance | 5 | 3 | Financial Services |
| | | Transactions and events not recognised as they occur and accordingly nor recorded in the financial period it occurred | | | | |
| SR 8 | Urbanisation and growth | Comprehensive understanding of the developmental needs in the greater Stellenbosch area housing pipeline; | Valley of Possibility | 4 | 3 | Infrastructure Services |
| | | Rapid and continued urbanisation | | | | |
| | | Changes in the needs of the community; master plans; housing pipeline | | | | |
| | | IDP and SDF alignment | | | | |
| SR 9 | Losing the historic status of Stellenbosch w.r.t environment (trees, biodiversity, buildings, rivers, etc.) | Keeping the balance - development and the historic status | Dignified Living; Valley of Possibility; Green and Sustainable Valley | 4 | 3 | All Directorates |
| | | Occurrence of natural disasters | | | | |

| Revised Strategic Risks | | | | | | |
|---------------------------|---|--|---|---------------|--------------------|--|
| Risk Item | Risk Description | Risk Background | Strategic Focus Areas | Impact Rating | Likelihood Ratings | Directorate |
| Revised Operational Risks | | | | | | |
| OR 1 | Lack of integrated Information and Communication Technology | Disparate systems | Good Governance and Compliance | 4 | 3 | All Directorates |
| OR 2 | Water Scarcity | Limited sustainable water sources | Dignified Living; Valley of possibility; Green and Sustainable Valley | 5 | 2 | Infrastructure Services |
| | | Growing population with increase in demand | | | | |
| | | Pollution of sources | | | | |
| OR 3 | Insufficient burial space in the greater Stellenbosch | Planning and funding | Dignified Living | 2 | 5 | Infrastructure Services |
| | | Land availability | | | | |
| OR5 | Timeous Capital Spending | Steady increase in budget allocation | | 5 | 2 | Financial Services |
| | | Growing population and demand for services | Good Governance and Compliance | | | |
| | | Demand Management | | | | |
| Revised Emerging Risks | | | | | | |
| ER 1 | Climate Change | Changing weather patterns | Green and Sustainable Valley; Safe Valley | 4 | 3 | Office of the Municipal Manager; Community and Protection Services |
| | | Unpredictable rainfall/flash floods | | | | |
| | | Natural disasters e.g. drought, fires (seasonal and other) | | | | |

2.4.3 ANTI-CORRUPTION AND ANTI-FRAUD

Section 83(c) of the MSA refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption, while the MFMA, section 112(1)(m) (i), identifies supply chain measures to be enforced to combat fraud and corruption, favouritism and unfair and irregular practices. Section 115(1) of the MFMA states that the accounting officer must take steps to ensure mechanisms are put in place and separation of duties in a supply chain management system to minimise the likelihood of corruption and fraud.

As with risk management the Municipal Manager, Management and Council have taken ownership of combatting fraud and corruption throughout the municipality.

The new Anti-Fraud and Corruption Prevention Policy underwent a process of consultation with key internal stakeholders and the Audit and Audit Performance Committee. The intention of the new policy is to strengthen fraud and corruption prevention at all levels within the municipality and re-invest the management of fraud and corruption management to management at all levels. The new Anti-Fraud and Corruption Prevention Policy was adopted by Council in May 2018.

The fraud hotline or tip-off line is also fully functional and managed by an independent service provider. A toll free number and e-mail service are available to members of the public to report any suspected fraudulent or corrupt activities.

2.4.4 AUDIT AND PERFORMANCE AUDIT COMMITTEE

Section 166(2) of the MFMA states that an audit committee is an independent advisory body which must – (a) advise the Municipal Council, the political office-bearers, the Accounting Officer and the management staff of the municipality, on matters relating to:

- internal financial control and internal audit;
- risk management;
- accounting policies;
- the adequacy, reliability and accuracy of financial reporting information;
- performance management;
- effective governance;
- compliance with this Act, the annual Division of Revenue Act and any other applicable legislation;
- performance evaluation; and
- any other issues referred to it by the municipality.

2.4.5 FUNCTIONS OF THE AUDIT AND PERFORMANCE AUDIT COMMITTEE

The Municipal Audit and Performance Audit Committee's objectives and functions are based on Section 166(2) (a-e) of the MFMA, further supplemented by the Local Government: Municipal Planning and Performance Management Regulation, as well as the approved Audit and Performance Audit Committee Charter approved 28 March 2018 by Council.

The objectives of the Audit and Performance Audit Committee (APAC) of the Stellenbosch Municipality are to:

- Assist the Council in discharging its duties relating to the safeguarding of Council's assets;
- Develop and oversee the operation of an adequate internal process and control system;
- Oversee the preparation of accurate financial reporting and statements in compliance with all applicable legal requirements, corporate governance and accounting standards;
- Provide support to the Council on the risk profile and risk management of the Council; and
- Ensure that there is an internal audit function in place and that the roles of the internal and external audit functions are coordinated.

The APAC is responsible for the oversight of internal controls, financial reporting and compliance with regulatory matters and mainly make recommendations to management.

The responsibilities of the APAC are further to review the:

- Effectiveness of the Council's system of internal control and risk management;
- Financial reporting and financial statements;
- Internal Audit function;
- Auditor General's report;
- Council's compliance with legislation and regulation;
- Compliance with the Council's Code of Conduct and ethics; and
- Performance Management System to make recommendations in this regard to Council.

The committee members are as follows:

Table 2:66: Members of the Audit and Performance Audit Committee

| Name of representative | Capacity | Meeting dates |
|------------------------------|---|--|
| Dr Nimrod Llewellyn Mortimer | Chairperson (re-appointed for a second term 1 April 2019) | 27 August 2019
27 November 2019
19 February 2020
29 June 2020 |
| Jeremy Fairbairn | Member (appointed 30 March 2016, re-appointed for a second term 1 April 2019, resigned 18 March 2020) | |
| Vincent James Botto | Member (appointed 1 September 2017) | |
| Tsepo Walter Lesihla | Member (appointed 1 September 2017) | |
| June Williams | Member (appointed 1 April 2019) | |
| June Williams | New Member (appointed 1 April 2019) | |

The APAC advises Council, political office-bearers, the Accounting Officer and management of the municipality on the matters pertaining to duties as described in the Audit and Performance Audit Committee Charter.

The APAC is also accountable to identify major risks to which Council is exposed and determine the extent to which risks have been mitigated.

2.4.6 INTERNAL AUDITING

Section 165(2)(a), (b) and (c) of the MFMA requires that:

The internal audit unit of a municipality must: –

- a. prepare a risk based audit plan and an internal audit programme for each financial year; and
- b. advise the accounting officer and report to the Audit Committee on the implementation on the internal audit plan and matters relating to:
 - internal audit;
 - internal controls;
 - accounting procedures and practices;
 - risk and risk management;
 - performance management;
 - loss control; and
 - compliance with this Act, the annual Division of Revenue Act and another applicable legislation.
- c. perform such other duties as may be assigned to it by the Accounting Officer.

Stellenbosch Municipality's Internal Audit function comprised of in-house staff. The main focus areas were compliance to applicable laws, regulations, policies and procedures which resulted in both assurance as well as consulting work. During the year under review, the internal audit activity was able to effectively execute 87% of the initial adopted risk-based audit plan.

In addition, process flowcharts for all identified audit areas have been documented, highlighting the key controls and / or control gaps for process owners' / line managers to consider and implement. Follow-up reviews were conducted relating to previously reported matters during the previous financial year.

2.4.6.1 Risk Register and three-year Strategic Plan

Table 2:67: Risk Register and Three-Year Strategic Plan

| Audit Activity | 2017/18 | 2018/19 | 2019/20 |

✓ Confirms audit activity completed in the financial year

Risk assessment updates were performed during the 2019/20 financial year and all relevant risks were populated into an updated Risk Register for the municipality. This Risk Assessment Plan forms the basis of the 2019/20 financial year's Risk-Based Audit Plan. New updates to the Stellenbosch Municipality's risk profile were captured during 2019/20 in consultation with the Risk Management Committee. This will ensure that adequate audit coverage be obtained from Internal Audit in consultation with the Auditor General and management.

2.4.6.2 Annual Risk Based Audit Plan

Risk-Based Audit Plan for 2019/20 was implemented with available resources. The table below provides detail on audits completed:

Table 2:68: Annual Risk-Based Audit Plan

| Audit Activity | Total Hours budgeted | Actual hours | Timing |
|----------------------|----------------------|--------------|---|
| DoRA Compliance | 120 | | Scheduled for August 2020 |
| Risk Management | 400 | 365 | Final report |
| MGRO 1 and 2 (MGAP) | 200 | 84.5 | Submission to Province done – awaiting feedback |
| IA follow up review: | 400 | | |

| Audit Activity | Total Hours budgeted | Actual hours | Timing |
|---|----------------------|----------------|---|
| • PMS | | 89 | Final report |
| • SCM | | 87 | Final report |
| AG follow up review | 720 | 84 | In progress |
| Quarterly Key Control reviews (SORR): | 480 | | |
| • Quarter 4 | | | AG to set up SORR with IA |
| • Quarter 1 | | 180 | |
| • Quarter 2 | | | |
| • Quarter 3 | | | |
| Performance Management: | | | |

| • Quarter 3 | | 180 | Final Report submitted |
| Performance Management System | 300 | 261 | In progress |
| Performance Reviews: MM and Directors (mid-year and annual assessments) | 720 | 148 | Final Report submitted |
| Supply Chain Management | 720 | | Request APAC to approve roll over |
| Information Technology: | | | |
| • ITGC, Applications review and support services equipment | 720 | | Request APAC to approve roll over |
| • Review of Cobit compliance | 720 | | Request APAC to approve roll over |
| MSCOA | 480 | | Request APAC to approve roll over |
| Building plans and applications for re-zoning: | 720 | | |
| Applications for Building Plans | | 684 | Final Report submitted |
| Applications for re-zoning | | 977 | Final Report submitted |
| Biannual stores stock take | 120 | 74 | IA provided direct assistance to the AG(SA) |
| COVID-19: Compliance questionnaire preparation and assessment | | 168 | Questionnaire finalised |
| Total | 7 540 | 3 907.5 | |

2.4.6.3 PMS Audits

Actual performance was subjected to an internal audit review and results of their findings submitted to the Performance Audit Committee. Quarterly audits were performed and reported to the Audit Committee.

2.4.7 SUPPLY CHAIN MANAGEMENT

The Supply Chain Management Policy applicable to the 2019/20 financial year was revised and adopted by Council on 29 May 2019 (as APPENDIX 29 of the budget-related policies) in terms of section 17(1) – (3) of the MFMA.

The changes alluded to above will ensure that the Supply Chain Management Unit (SCMU) has the required legislative mandate to further streamline procedures and processes in order to promote more efficient and effective service delivery to all our internal and external stakeholders.

2.4.7.1 Competitive bids in excess of R200 000

Bid Committee Meetings

The following table details the number of Bid Committee meetings held for the 2019/20 financial year:

Table 2:69: Bid Committee Meetings

| Bid Specification Committee | Bid Evaluation Committee | Bid Adjudication Committee |
|-----------------------------|--------------------------|----------------------------|
| 41 | 139 | 43 |

The attendance figures of members of the Bid Specification Committee are as follows:

Table 2:70: Attendance of Members of Bid Specification Committee

| Member | % Attendance |
|--|--------------|
| Supply Chain Management Representative | 100 |
| Relevant technical expert responsible for a function | 100 |

The attendance figures of members of the Bid Evaluation Committee are as follows:

Table 2:71: Attendance of Members of Bid Evaluation Committee

| Member | % Attendance |
|--|--------------|
| Senior Accountant: SCM or SCM Practitioner | 100 |
| Relevant technical expert responsible for a function | 100 |

The attendance figures of members of the Bid Adjudication Committee are as follows:

Table 2:72: Attendance of Members of Bid Adjudication Committee

| Member | % attendance |
|---|--------------|
| Director Financial Services (Chairperson) | 100% |
| Director Planning and Economic Development | 82.93% |
| Director: Infrastructure Services | 97.56% |
| Director: Community and Protection Services | 92.68% |
| Director: Corporate Services | 90.24% |

The percentages indicated above include the attendance by those officials acting in the position of a bid committee member and / or chairperson.

2.4.7.2 Awards made by the Bid Adjudication Committee

The Bid Adjudication Committee awarded 66 bids with a value of R 224 283 067.49, excluding annual tenders awarded on the basis of approved rates. The ten highest bids awarded by the bid adjudication committee are as follows:

Table 2:73: Ten Highest Bids Awarded by Bid Adjudication Committee

| Bid number | Title of bid | Directorate and section | Successful Bidder | Value of bid awarded |
|------------|---|--------------------------------|----------------------------------|----------------------|
| BSM 30/19 | The upgrade and extension of the Pniel wastewater treatment works: mechanical and electrical installation | Infrastructure Services | Inenzo Water (Pty) Ltd Option 1. | R63 909 796 |
| BSM 29/19 | The upgrade and extension of the Pniel wastewater treatment works: civil works | Infrastructure Services | CSV Mazarin JV Option 1. | R61 871 692 |
| BSM 16/20 | The steps / Orlean lounge, Cloetesville, Stellenbosch: rectification of 161 houses | Human and informal settlements | Tops Construction cc. | R17 045 724 |

| Bid number | Title of bid | Directorate and section | Successful Bidder | Value of bid awarded |
|------------|---|---------------------------------------|---|----------------------|
| BSM 18/20 | Maintenance and operation of public ablution facilities at Stellenbosch and Jamestown informal settlements: period ending 30 June 2022. | Infrastructure Services | Ibhunga Cleaning and Bricks Paving. | R10 022 338 |
| BSM 17/20 | Upgrading of Stellenbosch Municipality fire station. | Community Services | Ilitha Painters and Decorators t/a The Construction co. | R87 64 666 |
| BSM 07/20 | Supply and Delivery of Major 4 X 4 Rescue Pumper with CAFS Pump and Medium 4 X 4 Pumper / RIV. | Community Services | Marce Projects - MAJOR 4X4 Rescue Pumper CAFS (Compress Air Foam System) PUMP option 2. | R5 165 305 |
| | | | Marce Projects - MAJOR 4X4 Rescue Pumper CAFS (Compress Air Foam System). | R1 868 972 |
| BSM 13/20 | Maintenance and operation of public ablution facilities at Franschoek and Klipmuts informal settlements: period ending 30 June 2022. | Infrastructure Services | Primaj Construction Works (PTY) Ltd. | R5 819 556 |
| BSM 38/20 | Emergency supply, fit and maintenance of tyres for solid waste management, as and when required for the period ending 30 June 2022. | Infrastructure Services / Solid Waste | BBBEE Tyres Holdings Pty Ltd. | R5 355 425 |
| BSM 58/20 | Upgrading of Eikestad Hall, Cloeteville. | Corporate Services | Ismail Davids and Associates. | R4 733 195 |
| BSM 39/20 | Construction of a new clubhouse at La Motte, Stellenbosch. | Corporate Services | LJA Construction. | R4 550 539 |

2.4.7.3 Awards made by the Accounting Officer

In terms of paragraph 2.4 of Council's Supply Chain Management policy, only the Accounting Officer may award a bid which is in excess of R 10 million. The authority to make such an award may not be sub-delegated by the Accounting Officer. The bids awarded by the Accounting Officer are as follows:

Table 2:74: Awards made by the Accounting Officer

| Bid number | Title of bid | Directorate and section | Value of bid awarded |
|------------|--|--------------------------------|----------------------|
| BSM 30/19 | The upgrade and extension of the Pniel wastewater treatment works: mechanical and electrical installation. | Infrastructure Services | R63 909 796 |
| BSM 29/19 | The upgrade and extension of the Pniel wastewater treatment works: civil works. | Infrastructure Services | R61 871 692 |
| BSM 16/20 | The steps / Orlean lounge, Cloeteville, Stellenbosch: rectification of 161 houses. | Human and informal settlements | R17 045 724 |
| BSM 18/20 | Maintenance and operation of public ablution facilities at Stellenbosch and Jamestown informal settlements: period ending 30 June 2022. | Infrastructure Services | R10 022 338 |
| BSM 47/20 | Provision of licensed and compliant waste disposal facilities to receive and dispose of general waste and asbestos from the Stellenbosch Municipal Area. | Infrastructure Services | Rates |

2.4.7.4 Objections lodged

The municipality received sixteen (16) general enquiries pertaining to the awarding of bids.

The municipality also had eighteen (18) appeals which were resolved together with two (2) objections which were also dealt with.

2.4.7.5 Formal quotations (above R 30 000 and below R 200 000) procurement processes

The number of formal quotations approved by the Head: Supply Chain Management for the year under review follows:

Formal Quotations (above R 30 000 and below R 200 000)

| Description | Financial Years | | | | | Increase/
Decrease
2016/17 –
2017/18 | Increase /
Decrease
2017/18 –
2019/20 |
|-------------------------------------|-----------------|---------|---------|---------|---------|---|--|
| | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 | | |
| Number of Awarded Formal Quotations | 246 | 274 | 206 | 203 | 145 | -33.01% | -40% |
| Total Formal Quotations advertised | 322 | 378 | 264 | 249 | 159 | -43.18% | -56.60% |
| Percentage awarded | 76.40 | 72.49 | 78.03 | 81.53 | 91.19% | +7.1% | +10.59% |

2.4.7.6 Deviation from normal procurement processes

Paragraph 4.36 of Council's Supply Chain Management Policy allows the Accounting Officer to dispense with the official procurement process. The following table indicates the number of certificates of emergencies and deviations approved in terms of section 4.36 of the SCM Policy.

Table 2:75: Deviation from Normal Procurement Process

| Description | Financial Years | | | | | | | Increase /
Decrease
2016/17 –
2017/18 | Increase /
Decrease
2017/18 –
2019/20 |
|---|-----------------|------------|-----------|-----------|-----------|-----------|-----------|--|--|
| | 2013/14 | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 | | |
| <u>Certificate of Emergencies:</u>
Approved by the Directors i.t.o. Section 4.36.4 of the SCM Policy | 58 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| <u>Deviations:</u>
Approved by the Accounting Officer i.t.o. Section 4.36.1 of the SCM Policy | 97 | 68 | 26 | 54 | 54 | 42 | 32 | 0% | -31.25% |
| TOTAL | 173 | 155 | 68 | 26 | 54 | 54 | 32 | 0% | -31.25% |

Deviations from the normal procurement processes have been monitored closely to mitigate the risk associated with it.

2.4.7.7 Disposal Management

The system of disposal management envisages the following:

- immovable property is sold only at market related prices except when the public interest or the plight of the poor demands otherwise;
- movable assets are sold either by way of written price quotations, a competitive bidding process, auction or at market related prices, whichever is the most advantageous;
- firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;
- immovable property is let at market related rates, except when the public plight of the poor demands otherwise;
- all fees, charges, rates, tariffs, scales of fees or other charges relating to the letting of immovable property are annually reviewed;
- where assets are traded in for other assets, the highest possible trade-in price is negotiated; and
- in the case of the free disposal of computer equipment, the provincial department of education is first approached to indicate within 30 days whether any of the local schools are interested in the equipment.

The municipality complies with section 14 of the MFMA which deals with the disposal of capital assets as well as with the Asset Transfer Regulations.

2.4.7.8 Supply Chain Management Performance Management

The SCM policy requires that an internal monitoring system be established and implemented in order to determine, on the basis of retrospective analysis, whether the SCM processes were followed and whether the objectives of the SCM policy were achieved.

Monitoring of internal processes is an on-going process. Procedure manuals for various SCM processes have been developed, approved and are being implemented.

2.4.8 BY-LAWS AND POLICIES

Section 11 of the MSA gives municipal councils the executive and legislative authority to pass and implement by-laws and policies.

Budget related policies reviewed in the 2018/19 financial year are listed below.

Table 2:76: Budget Related Policies Reviewed

| Policies Revised | Date Adopted | Public Participation Conducted Prior to Adoption of Policy |
|---|--------------|--|
| | | Yes / No |
| Inventory Management Policy | 29 May 2019 | Yes |
| Preferential Procurement Policy | 29 May 2019 | Yes |

| Ward Allocation Policy | 29 May 2019 | Yes |
| Asset Management Policy | 28 May 2018 | Yes |

2.4.9 WEBSITE

The municipal website is an integral part of a municipality's communication infrastructure and strategy. It serves as a tool for community participation, improves stakeholder involvement and facilitates stakeholder monitoring and evaluation of municipal performance. Section 75 of the MFMA requires that municipalities place key documents and information on their website, including the IDP, the annual budget, adjustments budgets and budget related documents and policies.

Below is a website checklist to indicate the compliance to Section 75 of the MFMA:

Table 2:77: Website Checklist

| Documents Published on the Stellenbosch Municipality's Website | Yes / No | Publishing Date |
|---|----------|--------------------------|
| Current annual and adjustments budgets and all budget-related documents | Yes | Within legislated period |
| All current budget-related policies | Yes | Within legislated period |
| Current annual and adjustment budgets and all budget-related documents | Yes | Within legislated period |
| All current budget-related policies | Yes | Within legislated period |
| The annual report for 2019/20 | Yes | Within legislated period |
| All current performance agreements required in terms of section 57(1)(b) of the Municipal Systems Act for 2019/20 | Yes | Within legislated period |
| All service delivery agreements for 2019/20 | Yes | Within legislated period |

| Documents Published on the Stellenbosch Municipality's Website | Yes / No | Publishing Date |
|---|----------|--------------------------|
| All long-term borrowing contracts for 2019/20 | Yes | Within legislated period |
| All supply chain management contracts above a prescribed value for 2019/20 | Yes | Within legislated period |
| An information statement containing a list of assets over a prescribed value that have been disposed of in terms of section 14(2) or (4) during 2019/20 | Yes | Within legislated period |

2.4.10 COMMUNICATION

Local government has a legal obligation and a political responsibility to ensure regular and effective communication with the community. The Constitution of the Republic of South Africa Act 1996, section 152 (1)(e), in setting out the objectives of local government, states that municipalities must "encourage the involvement of communities and community organisations in the matters of local government". Section 160(7) of the Constitution further says that "a municipal council must conduct its business in an open manner, and may close its sittings, or its committees, only when it is reasonable to do so".

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) MSA, section 4, encourages the involvement of communities in the affairs of their municipalities. As a local government, we have an obligation to act with high levels of transparency, accountability, openness, participatory democracy and direct communication with communities to improve the lives of residents.

At the heart of our Communication Policy, adopted by Council in July 2018, lies the notion of improved communication that facilitates public participation. The municipality has made steady improvements in its attempts to streamline and improve its communications with residents, businesses, the media as well as other external stakeholders. Ensuring that the right messages reach the intended audiences on the most appropriate platforms and continuously facilitating conversations through our communication platforms, contributes to the strengthening of our corporate identity and brand.

Communication with the media has improved significantly. Comprehensive responses are prepared to all media enquiries from community, local, regional and national publications / broadcasters on a weekly basis. Positive news stories are being broadcasted through the proactive release of media statements. These statements and positive news stories are also amplified to reach audiences online by sharing it on the municipal website and social media platforms.

Members of the public can report faults or refer enquiries through an e-mail link on the website to the contact.stellenbosch@stellenbosch.gov.za mailbox. This mailbox is regularly monitored and enquiries, compliments and complaints are forwarded to the relevant departments on a daily basis. The municipal website is updated with new official notices, formal quotations, tenders, news stories, vacancies as well as meeting agendas and minutes on an ongoing basis. The website is increasingly made more user-friendly and plans are already in place to simplify navigation and increase overall customer satisfaction by restructuring the website.

Communication through our social media platforms has increased significantly. The municipal Facebook page and Twitter account has been growing steadily and now reaches a much larger, ever-growing audience. Apart from being used to publicise municipal news stories, photos and videos, the social media platforms are used to broadcast important alerts and notices. Traffic is also diverted to the website through our social media platforms.

Municipal advertisements are regularly placed in community and regional newspapers and contribute to building the municipality's brand. The Executive Mayor's monthly newsletter, pamphlets, posters,

notice boards and regular IDP / Ward meetings provides us with additional platforms for communicating with residents and other stakeholders.

In an effort to improve internal communication within the organisation, the interdepartmental communication forum has been established and meetings of this forum have proved to be invaluable. The interdepartmental communication forum meets at least quarterly. Improved internal communication is further achieved through the newsletter of the Municipal Manager, internal memos, notice boards, a bulk SMS system and regular staff meetings.

2.4.11 COMMUNITY SATISFACTION SURVEY

No community satisfaction surveys were completed during the 2019/20 financial year.

2.4.12 PUBLIC SATISFACTION ON MUNICIPAL SERVICES

Below is a communication checklist of the compliance to the communication requirements:

Table 2:78: Communication Activities

| Communication activities | Yes / No |
|--|----------|
| Communication Unit | Yes |
| Communication Strategy | Yes |
| Communication Policy | Yes |
| Customer satisfaction surveys | No |
| Functional complaint management systems | Yes |
| Newsletters distributed at least quarterly | Yes |

3 CHAPTER 3: SERVICE DELIVERY PERFORMANCE

3.1 OVERVIEW OF PERFORMANCE WITHIN THE ORGANISATION

Performance management is a process that measures the implementation of the organisation's strategy as captured within the Integrated Development Plan (IDP). It is also a management tool to plan, monitor, measure and review performance indicators to ensure efficiency, effectiveness and the impact of service delivery by the municipality.

At local government level, performance management is institutionalised through the legislative requirements of the performance management process. Performance management provides the mechanism to measure whether targets are met in line with strategic goals as set by the organisation.

Section 152 of the Constitution of the Republic of South Africa, 1996, deals with the objectives of local government and paves the way for performance management. The idea of an accountable government is important to meet the needs of Stellenbosch. The democratic values and principles in terms of section 195(1) are also linked with the concept of performance management, with reference to the principles of the following, among others to:

- promote the efficient, economic and effective use of resources,
- ensure accountable public administration,
- be transparent by providing information,
- be responsive to the needs of the community, and
- facilitate a culture of public service and accountability amongst staff.

The MSA requires municipalities to establish a performance management system. Further, the MSA and the MFMA require the Integrated Development Plan (IDP) to be aligned to the municipal budget. The monitoring of organisational performance of the budget must be done against the IDP on a quarterly basis via the Service Delivery and Budget Implementation Plan (SDBIP). The report is made public after the council has been informed of the quarterly progress against set targets.

In addition, Regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations of 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determining the roles of the different role players". Performance management is not only relevant to the organisation as a whole, but also to the individuals employed in the organisation, as well as the external service providers and the municipal entities. This framework, *inter alia*, reflects the linkage between the IDP, the Budget and the SDBIP.

3.2 LEGISLATIVE REQUIREMENTS

In terms of section 46(1)(a) of the MSA, a municipality must prepare a performance report for each financial year that reflects the municipality's and any service provider's performance during the financial year. The report must furthermore indicate the development and service delivery priorities and the performance targets set by the municipality for the following financial year, and measures that were or are to be taken to improve performance.

3.3 ORGANISATIONAL PERFORMANCE

Strategic performance assessment indicates how well the municipality is meeting its objectives and which policies and processes are working. All government institutions must report on strategic performance to ensure that service delivery is efficient, effective and economical. Municipalities must develop strategic plans and allocate resources for their implementation. The implementation must be monitored on an ongoing basis and the results must be reported on during the financial year to various role players to enable them to implement corrective measures timeously where required.

This report highlights the strategic performance in terms of the municipality's Top-Layer Service Delivery and Budget Implementation Plan (SDBIP), high-level performance in terms of the strategic objectives of the municipality and performance on the National Key Performance Indicators prescribed in terms of Section 43 of the MSA.

3.4 ADOPTION OF A PERFORMANCE MANAGEMENT POLICY FRAMEWORK

The Performance Management Policy 2019/20 was reviewed and submitted to Council for approval in July 2019.

3.5 GOVERNANCE FRAMEWORK FOR THE IDP, BUDGET AND PERFORMANCE MANAGEMENT

The draft review of the 4th Generation IDP was tabled in March 2019 and was advertised for public comment thereafter. Stellenbosch Municipal Council adopted the reviewed Fourth Generation IDP (2017/18 – 2021/22) together with the 2019/20 MTREF Budget in May 2019.

The IDP is the principal planning instrument that guides and informs the municipal budget. The MSA requires each municipality in South Africa to prepare such a strategic plan to guide all development and management within the municipal area. The IDP sets out the development priorities of Stellenbosch Municipality over the next five years. The IDP must guide and determine municipal planning and project implementation. The 2019/20 budget was based on the IDP and other spheres of government and service providers.

The IDP for the period July 2017 to June 2022 gives expression to the political mandate that have been received from residents in the August 2016 local government election. The MSA requires municipalities to consult with their residents and the broader institutions, which elicited a positive reaction and involvement from the public.

The IDP is a strategic tool that guides all the activities of local government in consultation with residents and stakeholders. In keeping with the more evolved and strategic approach to this IDP, the implementation plan focuses on only the key strategic programmes, projects and initiatives that will support the achievement of the priorities during the five-year term of office. Its focus is on development in the broader sense and it is a structured plan that informs budget priorities, decision making and the allocation of resources.

The focus of the IDP is varied, and includes the provision of basic municipal services, measures for building and transforming municipal capacity, measures to assist in expanded livelihood opportunities for citizens, enterprise development, building dignified and safe living environments, and,

crucially, exploring new ways of working and living together. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The three-year budget sets out the revenue raising and expenditure plan of the municipality for approval by Council in accordance with the MFMA. The allocation of funds needs to be aligned with the priorities in the IDP.

The IDP must be reflected in the performance agreements of the relevant staff and through the budget, in the service delivery and budget implementation plan (SDBIP). The key performance management instrument of the municipality is the SDBIP. Linked to the IDP, the SDBIP forms the basis of the performance contracts of directors and quarterly, mid-year and annual performance reviews of senior management, directorates and the municipality.

3.6 SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN

The organisational performance is evaluated by means of a municipal scorecard (Top-Layer SDBIP). Performance objectives, as reflected in the municipal scorecard, are required to be practical, measurable and based in the key performance indicators.

The SDBIP is a tool that converts the IDP and budget into measurable criteria of how, where and when the strategies, objectives and normal business processes of the municipality are implemented.

It also allocates responsibility to directorates to deliver the services in terms of the IDP and the budget.

MFMA Circular No. 13 is a clarification of the Municipal Budget and Reporting Regulations, Schedule A 1, GenN 393 in GG32141 of 2009 and prescribes that the:

- IDP and budget must be aligned;
- budget must address the strategic priorities;
- SDBIP should indicate what the municipality is going to do during the next 12 months; and
- SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

The Top-Layer SDBIP 2019/20 was approved by the Executive Mayor, Cllr Adv Gesie Van Deventer on the 26 June 2019 in terms of section 53(1)(c)(ii) of the MFMA.

3.6.1 THE MUNICIPAL SCORECARD (TOP-LAYER SDBIP)

The municipal scorecard (Top-Layer SDBIP) consolidates service delivery targets set by Council / senior management and provides an overall picture of the performance of the municipality as a whole, reflecting performance in its strategic priorities for the 2019/20 financial year. The scorecard is the performance evaluation tool and is used during the informal and formal performance assessment of senior managers.

Components of the Top-Layer SDBIP include:

One-year detailed plan with the following components:

- Monthly projections of revenue to be collected for each source;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Ward information for expenditure and service delivery; and
- Detailed capital works plan broken down by ward over three years.

Top-Layer KPIs were prepared based on the following:

- Key performance indicators (KPIs) for the programmes / activities identified to address the strategic objectives as documented in the IDP in co-operation with the community who identifies developmental priorities;
- KPIs identified during the IDP and KPIs that need to be reported to key municipal stakeholders; and
- KPIs to address the required national minimum reporting requirements.

3.6.2 AMENDMENT OF THE TOP-LAYER SDBIP

The TL SDBIP 2019/20 was reviewed once during the 2019/20 financial year and submitted to Council for approval on 29 January 2020.

3.6.3 ACTUAL PERFORMANCE

The municipality utilises an electronic web-based, real time performance-based system on which KPI owners update actual performance on a monthly basis. KPI owners report on the results of the KPI by documenting the following information on the performance system:

- The actual result in terms of the target set;
- A performance comment; and
- Actions to improve the performance by the submission of corrective measures to meet the set target for the reporting interval in question, if the target was not achieved.

It is the responsibility of every KPI owner to maintain a portfolio of evidence to support actual performance results updated and provide it to the Internal Auditor and Auditor General upon request during the quarterly and annual audit testing.

3.6.4 MONITORING OF THE SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN

Municipal performance is measured as follows:

- a) **Mid-year assessment and submission of the mid-year report to the Mayor in terms of section 72(1)(a).** In terms of section 72(1)(a) of the MFMA, the Accounting Officer must by 25 January of each year assess the performance of the municipality during the first half of the financial year. A report on such an assessment must, in terms of Section 72(1)(b) of the MFMA, be submitted to the Mayor, Provincial and National Treasury. Once the Mayor has considered the report, it must be submitted to Council by 31 January in terms of Section 54 of the MFMA.
- b) **Quarterly assessment i.t.o. section 52(d) of the MFMA** to assess the performance of the municipality during the first half of the financial year.

The Executive Mayor, who must provide general political guidance over the fiscal and financial affairs of the municipality, is required by Section 52(d) of the MFMA to submit a report on the implementation of the budget and the financial state of affairs of the municipality, to the Council within 30 days after end of each quarter.

Actual performance was audited by the Internal Audit Department and the results of their findings were submitted to the Audit and Performance Audit Committee (APAC).

- Quarter 1 (July to September 2019);
- Quarter 2 (October to December 2019);
- Quarter 3 (January to March 2020); and
- Quarter 4 (April to June 2020).

Municipal Manager and Managers directly accountable to the Municipal Manager

The MSA prescribes that the municipality must enter into performance based agreements with the Municipal Manager and managers directly reporting to the Municipal Manager i.t.o. section 56. Performance agreements must be reviewed annually and are published for public interest. This process and the format are further regulated by Regulation 805 (August 2006), MSA.

The performance agreements for the Municipal Manager and section 56 appointments for the 2019/20 financial year were signed on 30 July 2019 as prescribed. They include performance agreements for the:

- Municipal Manager;
- Chief Financial Officer;
- Director: Corporate Services;
- Director: Planning and Local Economic Development;
- Director: Community and Protection Services; and
- Director: Infrastructure Services.

The appraisal of the actual performance in terms of the signed agreements takes place twice per annum as regulated. The 2018/19 annual - and 2019/20 mid-year performance assessment for senior managers took place on 09 March 2020. The appraisals were done by an evaluation panel in terms of Regulation 805.

The panel consisted of the following:

- Adv. Gesie van Deventer; Executive Mayor (for the evaluation of the Municipal Manager only);
- Mr. Roy van Rooyen, Ward Committee Member nominated by the Executive Mayor (for the evaluation of the Municipal Manager only);
- Geraldine Mettler, Municipal Manager of Stellenbosch Municipality;
- Mr. Henry Prins, Municipal Manager of Cape Winelands District Municipality;
- Cllr. Nyaniso Jindela, Deputy Executive Mayor and Chairperson on Human Settlements Portfolio;
- Cllr. Quintin Smit;
- Cllr. Patricia Crawley;
- Cllr. Xoliswa Mdemka;
- Cllr. Aldrigde Frazenburg;
- Cllr. Esther Groenewald;
- Dr Len Mortimer, Audit and Performance Audit Committee Chairperson of Stellenbosch Municipality.

Other Municipal Personnel

The municipality has implemented individual performance to employees on the three highest levels of management.

3.6.5 SERVICE DELIVERY PERFORMANCE

3.6.5.1 Introduction

This section provides an overview of the key service achievements of the municipality that came to completion during 2019/20 in terms of the deliverables achieved compared to the key performance objectives and indicators in the IDP.

In order to improve on performance planning, implementation, measurement and reporting, the municipality implemented the following actions;

Departmental operational plans were developed for monitoring and reporting operational programmes. An electronic performance management system is operational within the municipality. The same system forms the basis of performance evaluations of the Directors and the Municipal Manager; and the municipality endeavoured during the development of the TL SDBIP as well as with the development of the Departmental SDBIP that the "SMART" principle be adhered to in the setting of indicators and objectives. Emphasis was placed on ensuring that targets were specific and time bound, thus making it measurable.

Table 3:1: Performance Management System Checklist

| | Performance Management Policy | All MSA s57/56 Performance contracts signed | Audit Committee | Municipal Public Accounts Committee (MPAC) | Quarterly Performance Reporting to Council | Annual Performance Reporting to Council |
|-----------|-------------------------------|---|-----------------|--|--|---|
| In place? | √ | √ | √ | √ | √ | √ |

3.6.5.2 Service Delivery and Budget Implementation Plan (Top-Layer)

The purpose of performance reporting is to report specifically on the implementation and achievement of IDP outcomes. This section should provide an overview on the achievement of a municipality in terms of the strategic intent and deliverables achieved as stated in the IDP. The Top-Layer (strategic) SDBIP is the municipality's strategic plan and shows the strategic alignment between the different documents (IDP, Budget and Performance Agreements).

The organisational performance is evaluated by means of a Municipal Scorecard (TL SDBIP) at organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators on how, where and when the strategies, objectives and normal business processes of the municipality are implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and Budget.

The MFMA Circular No.13 prescribes that:

- The IDP and budget must be aligned;
- The budget must address the strategic priorities;
- The SDBIP should indicate what the municipality is going to do during next the 12 months; and

- The SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

The TL SDBIP was prepared as described in the paragraphs below and approved by the Executive Mayor on 26 June 2019. However, the TL SDBIP 2019/20 was revised in January 2020. These revisions were made in line with the adjustment budget, internal audit findings and recommendations made by the Auditor General of South Africa (AGSA).

In the paragraphs below, the performance achieved is illustrated against the Top-Layer SDBIP according to the IDP strategic objectives. The following table explains the method by which the overall assessment of actual performance against targets set for the key performance indicators (KPI's) of the SDBIP is measured:

Table 3:2: Performance Assessment Criteria

| Color | Category | Explanation |
|-------|------------------------|--|
| | KPI Not Yet Measured | KPIs with no targets or actual results for the selected period |
| | KPI Not Met | Actual vs. target less than 75% |
| | KPI Almost Met | Actual vs. target between 75% and 100% |
| | KPI Met | Actual vs. target 100% achieved |
| | KPI Well Met | Actual vs. target more than 100% and less than 150% achieved |
| | KPI Extremely Well Met | Actual vs. target more than 150% achieved |

The TL SDBIP (the Municipal Scorecard) consolidate service delivery targets set by Council / Senior Management and provide an overall picture of performance for the municipality as a whole, reflecting performance on its strategic priorities. The TL SDBIP is a detailed one-year plan and the necessary components should include:

Monthly projections of revenue to be collected for each source;

- Expected revenue to be collected not billed;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Non-financial measurable performance objectives in the form of targets and indicators; and
- Detailed capital project plan broken down by ward over three years.

3.6.5.3 Overall performance per Municipal Strategic Focus Area

The following graph and table illustrates the municipality's overall performance per Municipal Strategic Focus Area (SFA).

| Stellenbosch Municipality | | Municipal Strategic Focus Areas (SFAs) | | | | |
|---------------------------|-------------|--|--------------------------------------|---------------------|--------------------------|--|
| | | SFA 1 - Valley of Possibility | SFA 2 - Green and Sustainable Valley | SFA 3 - Safe Valley | SFA 4 - Dignified Living | SFA 5 - Good Governance and Compliance |
| KPI Not Yet Measured | - | - | - | - | - | - |
| KPI Not Met | 7 (16.67%) | 1 (25%) | 1 (16.67%) | - | - | 5 (29.41%) |
| KPI Almost Met | 3 (7.14%) | - | 2 (33.33%) | - | - | 1 (5.88%) |
| KPI Met | 20 (47.62%) | 2 (50%) | 3 (50%) | 3 (100%) | 3 (25%) | 9 (52.94%) |
| KPI Well Met | 8 (19.05%) | 1 (25%) | - | - | 6 (50%) | 1 (5.88%) |
| KPI Extremely Well Met | 4 (9.52%) | - | - | - | 3 (25%) | 1 (5.88%) |
| Total: | 42 | 4 | 6 | 3 | 12 | 17 |
| | 100% | 9.52% | 14.29% | 7.14% | 28.57% | 40.48% |

3.7 SERVICE PROVIDERS STRATEGIC PERFORMANCE

Section 76(b) of the MSA states that KPIs should inform the indicators set for every municipal entity and service provider with whom the municipality has entered into a service delivery agreement. According to the AG's office:

- Service provider means a person or institution or any combination of persons and institutions that provide a municipal service.
- External service provider means an external mechanism referred to in section 76(b) that provides a municipal service for a municipality.

- c) Service delivery agreement means an agreement between a municipality and an institution or person mentioned in section 76(b) in terms of which a municipal service is provided by that institution or person, either for its own account or on behalf of the municipality.

Section 121(b) of the MFMA and section 46 of the MSA further state that a municipality should include the following aspects related to service providers in its annual report:

- The performance of each service provider;
- A comparison of the performance with targets set for and performance in the previous financial year; and
- Measures taken to improve performance.

3.8 MUNICIPAL FUNCTIONS

3.8.1.1 Analysis of Functions

The municipal functional areas are as indicated below:

Table 3:4: Municipal Functional Areas i.t.o. the Constitution

| Municipal Function | Yes / No |
|---|---------------|
| Constitution Schedule 4, Part B functions: | |
| Air pollution | Yes |
| Building regulations | Yes |
| Childcare facilities | Yes |
| Electricity and gas reticulation | Yes |
| Firefighting services | Yes |
| Local tourism | Yes |
| Municipal airports | No |
| Air pollution | Yes |
| Building regulations | Yes |
| Municipal planning | Yes |
| Municipal health services | No |
| Municipal public transport | Yes |
| Constitution Schedule 4, Part B functions: | |
| Municipal public works only in respect of the needs of municipalities in the discharge of their responsibilities to administer functions specifically assigned to them under this Constitution or any other law | No |
| Pontoons, ferries, jetties, piers and harbours, excluding the regulation of international and national shipping and matters related thereto | No |
| Storm water management systems in built-up areas | Yes |
| Trading regulations | Yes |
| Water and sanitation services limited to potable water supply systems and domestic waste water and sewage disposal systems | Yes |
| Constitution Schedule 5, Part B functions: | |
| Beaches and amusement facilities | Yes |
| Billboards and the display of advertisements in public places | Yes |
| Cemeteries, funeral parlours and crematoria | Yes |
| Cleansing | Yes |
| Control of public nuisances | Yes |
| Control of undertakings that sell liquor to the public | Yes from 2013 |

| Municipal Function | Yes / No |
|--|----------|
| Constitution Schedule 4, Part B functions: | |
| Facilities for the accommodation, care and burial of animals | Yes |
| Fencing and fences | Yes |
| Licensing of dogs | No |
| Licensing and control of undertakings that sell food to the public | No |
| Local amenities | Yes |
| Local sport facilities | Yes |
| Markets | Yes |
| Municipal abattoirs | No |
| Municipal parks and recreation | Yes |
| Municipal roads | Yes |
| Pounds | Yes |
| Public places | Yes |
| Refuse removal, refuse dumps and solid waste disposal | Yes |
| Street trading | Yes |
| Street lighting | Yes |
| Traffic and parking | Yes |

This component includes basic service delivery highlights and challenges, details of services provided for water, waste water (sanitation), electricity, waste management, housing services and a summary of free basic services.

3.8.2 NATIONAL KEY PERFORMANCE INDICATORS – BASIC SERVICE DELIVERY AND LOCAL ECONOMIC DEVELOPMENT

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations of 2001 and section 43 of the MSA. These key performance indicators are linked to the following two National Key Performance Areas: Basic Service Delivery and Local Economic Development.

Table 3:5: Basic Service Delivery

| KPA and Indicators | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|---|---------|---------|---------|---------|---------|
| Basic Service Delivery | | | | | |
| The percentage of households earning less than R6,500 per month with access to free basic services
(In the case of Stellenbosch Municipality- number of registered Indigent households are being reported) | 6 486 | 5 686 | 6 453 | 6 813 | 7 011 |
| Service for water, sanitation and refuse removal (Average) | 7 042 | 5 686 | 6 453 | 6 813 | 7 011 |

3.8.3 WATER PROVISION

Water is the most fundamental and indispensable of available natural resources – fundamental to life, the environment, food production, hygiene and for power generation.

Poverty reduction and improved water management are closely linked. Section 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic waste water and sewerage disposal systems, as a local government function.

Basic water is defined as 25 litres of potable water per day supplied within 200 meters of a household.

Due to on-going drought and very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality supplies water to the consumers in their area of jurisdiction through the following six water supply systems:

- Stellenbosch (Ida's Valley - Own sources, DWS allocation and Paradyskloof WTW – Theewaterskloof Dam
- WCWSS [Western Cape Water Supply Scheme] via tunnel);
- Franschhoek (Du Toits River-Own resources, Wemmershoek Dam WTW - CoCT);
- Dwarsrivier (Wemmershoek Dam WTW- CoCT);
- CoCT agreement (Blackheath WTW, Faure WTW and Wemmershoek WTW); and
- Boreholes BH1: Die Braak, BH2: Meerlust and BH3: Van der Stel.

The total population supplied with water in the Stellenbosch Municipal area amount to approximately 192 879 people. Water is also supplied to a fairly extensive industrial area.

Stellenbosch Local Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof and Franschhoek, which is a micro water treatment plant. The potable water supply from these works amounted to 14.832 Ml/d and a further 7.126 Ml/d was obtained from the City of Cape Town (CoCT) during the 2019/20 financial year, ensuring a supply of approximately 21.9 Ml/d to the municipality's area of responsibility.

Areas supplied from the Wemmershoek Dam and water treatment works include half of Franschhoek town, La Motte, Wemmershoek, Pniel, Boschendal, Johannesburg, Kylemore, Lanquedoc, Klappmuts, Koelenhof, Elsenburg, Devon Valley and Muldersvlei. Areas supplied from Blackheath water treatment works include Polkadraai, Spier and Vlothenburg.

Areas supplied from Faure water treatment works (supplied from Steenbras Dam – CoCT) are Faure, Jamestown, De Zalze, Raithby and Lyndoc. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact with regard to water quality and quantity needs to be monitored and considered by Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 56 reservoirs / holding tanks and water towers, 36 water pump stations, 41 pressure reducing valve installations, 667 kilometres of pipeline and 79 water supply zones. The system is fully controlled and operated by a telemetry system.

The total bulk water input into the water network for the 2019/20 financial year was 8,01 Ml, with an annual average daily demand of 21,9 kl/day. 40% of the water supplied are purified from the municipality's own water sources at the Ida's Valley and Franschhoek water treatment plants. The

Stellenbosch Municipality implemented level 1 water restrictions from the 1st of November 2015 to achieve a 10% water consumption decrease. This was due to low supply dam levels and low rainfall figures during the rainy season. This was followed with the implementation of Level 2 restrictions from March 2016 due to extreme heat conditions and even lower supply dam levels in Stellenbosch and City of Cape Town. The Level 2 restrictions included the increased tariffs for water consumption to achieve a 22% savings on the water consumption.

City of Cape Town is currently on Level 1 water restrictions. Fortunately, the municipality was in a position to lower the water restrictions but will have to encourage low water usage for the time being. Stellenbosch Municipality is on Level 2 water restrictions due to the fact that own water sources contribute a large percentage of the water input volume into the WC024 area.

3.8.3.1 Dam Levels

The following table reflect the current status of the dam levels supplying the WCWSS with water and status of Stellenbosch own dam levels.

Table 3.6: Western Cape Dams

| Major dams | 2020 | Previous week | 2019 |
|--------------------------|----------------|----------------|----------------|
| | (%) | (%) | (%) |
| Berg River | 81.2 | 73.8 | 74.6 |
| Steenbras Lower | 49.9 | 49.9 | 38.9 |
| Steenbras Upper | 99.6 | 99.2 | 88.4 |
| Theewaterskloof | 55.8 | 55.2 | 41.6 |
| Voëlvlei | 54.5 | 53.7 | 55.0 |
| Wemmershoek | 43.3 | 43.6 | 40.3 |
| Total Stored (MI) | 723 706 | 689 767 | 723 706 |
| % Storage | 58.8 | 58.2 | 49.5 |

Stellenbosch own Dams

| | | | |
|----------------|-----|-----|-----|
| Ida's Valley 1 | 100 | 100 | 100 |
| Ida's Valley 2 | 100 | 100 | 103 |

Figure 3:3: WCWSS Storage Record (2008 – Present)

WCWSS Storage Record (2008 - Present)

The photos below represent the Ida's Valley Dams 1 and 2 at 100% full.

Figure 3:4: Ida's Valley Dams

W024 Bulk Water Input and Sales dramatically came down from values that reached a highest value in 2015 to June 2020.

Figure 3:6: Water system water input

Figure 3:5: Water consumption volume

Figure 3:8: Water requirements scenario and reconciliation options

Figure 3:7: Non-revenue water

Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

3.8.3.2 Service Statistics – Water Services

The table below outlines water usage totals per category:

Table 3:7: Total Use of Water (Mℓ)

| Total Use of Water (Mℓ) | | | | | |
|-------------------------|----------------------------------|-----------------------|-------------------|---------------------|-----------------------|
| Year | Total Water into the System (Mℓ) | Total Water Sold (Mℓ) | Non-Revenue Water | % Non-Revenue Water | % Physical Water Loss |
| 2014/15 | 14 876 | 11 556 | 3 320 | 22.3% | 10.3% |
| 2015/16 | 13 889 | 10 498 | 3 391 | 24.4% | 12.4% |
| 2016/17 | 12 220 | 9 572 | 2 648 | 21.8% | 9.7% |
| 2017/18 | 8 661 | 6 779 | 1 882 | 21.7% | 8.2% |
| 2018/19 | 8 058 | 6 380 | 1 676 | 20.8% | 6.9% |
| 2019/20 | 8 015 | 6 374 | 1 640 | 20.5% | 6.5% |

Figure 3:11: Water system input volume

3.8.3.3 Water Service Delivery Levels

As a priority it is the responsibility of Stellenbosch Municipality to ensure that adequate and appropriate investments are made to ensure the progressive realisation of the rights of all people in its area of jurisdiction to receive at least a basic level of water and sanitation services. While the provision of basic water services is the most important and immediate priority, Water Services Authorities are expected to provide intermediate and higher levels of services (for example water on site) wherever it is practical, provided it is financially viable and sustainable to do so.

All water services provided by Stellenbosch Municipality to consumers within its Municipal Management Area are linked to the municipality's Tariff Policy and Tariff By-laws, and poor households are incorporated through the municipality's Indigent Policy.

The large number of residents in the lowest income groups (living in informal areas) poses a major challenge to the municipality to provide suitable housing. Stellenbosch Municipality strives towards providing all households in the towns with a water connection inside the house and connecting all households to a waterborne sanitation system.

All the formal households in the urban areas of Stellenbosch Municipality's Management Area are provided with water connections and waterborne sanitation facilities inside households (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. The municipality has become aware of the fact that communal standpipes represent in all likelihood the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and in some instances abuse) and are often neglected in terms of operation and maintenance, with negative effects on the quality of the water supply.

Communal standpipes are also used by poor households who normally do not pay for water.

Below is a table that specifies the different water service delivery levels per households:

Table 3:8: Water Service Delivery Levels

| Description | 2015/16
(audited) | 2016/17
(audited) | 2017/18 | 2018/19 | 2019/20 |
|---|----------------------|----------------------|----------------|----------------|----------------|
| Household | | | | | |
| <u>Water: (above minimum level)</u> | | | | | |
| Piped water inside dwelling | 37 902 | 37 989** | 38 027** | 40 321 | 42 615 |
| Piped water inside yard (but not in dwelling) | 3 596 | 3 596 | 3 596 | 3 596 | 3 596 |
| Using public tap (within 200m from dwelling) | 8 491 | 9 238 | 9 699 | 11 327 | 12 955 |
| Other water supply (within 200m) | Not applicable | Not applicable | Not applicable | Not applicable | Not applicable |
| Minimum Service Level and Above Sub-Total | 49 989 | 50 823 | 51 323 | 55 244 | 59 166 |
| Minimum Service Level and Above Percentage | 99.75 | 99.75 | 99.75 | 99% | 98,93% |
| <u>Water: (below minimum level)</u> | | | | | |
| Using public tap (more than 200m from dwelling) | Not applicable | Not applicable | Not applicable | Not applicable | Not applicable |
| Other water supply (more than 200m from dwelling) | 125 | Not applicable | Not applicable | Not applicable | Not applicable |
| No water supply | 405 | Not applicable | Not applicable | Not applicable | Not applicable |
| Below Minimum Service Level Sub-Total | 530 | 0 | 0 | 581 | 632 |
| Below Minimum Service Level Percentage | 1.06 | 0 | 0 | 1% | 1,07% |
| Total Number Of Households (formal and informal) | 48 002 | 48 002 | 52 374 | 55 825 | 59 798 |

* Metered Properties ** Household

3.8.3.4 Capital Expenditure – Water Services

Table 3:9: Capital Expenditure as at 30 June 2019: Water Services

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| New Reservoir: Polkadraai | 7 000 000 | 3 573 589 | -48.95% |
| Relocation / Upgrading main water supply line | 6 693 710 | 3 170 678 | -52.63% |
| Bulk water supply Klapmuts | 7 420 489 | 1 748 843 | -76.43% |
| Vehicles | 6 594 068 | 1 087 324 | -83.51% |
| Water Conservation and Demand Management | 5 000 000 | 1 560 827 | -68.78% |
| Only the 5 largest capital projects are listed | | | |

Water Services have spent, **46.68%** of the capital budget for the financial year.

3.8.3.5 Total employees – Water and sanitation

The Water and Sanitation Services Department is understaffed; within context of the approved new organogram, this department has a 39.40% vacancy rate.

Table 3:10: Total Employees – Water Services

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|---|------------|------------|-----------------------------------|-----------------------------------|
| | Number | | | |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 41 | 15 | 26 | 5.45% |
| 12 – 10 | 52 | 36 | 16 | 3.14% |
| 9 – 7 | 48 | 8 | 39 | 7.96% |
| 6 – 4 | 335 | 224 | 111 | 22.85% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 477 | 284 | 192 | 39.40% |
| * Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings. | | | | |

3.8.4 WASTE WATER (SANITATION) PROVISION

The main focus for the 2019/20 financial year was to implement the demands of the Stellenbosch Municipality's masterplan, fulfilling the needs of development for the greater Stellenbosch Municipality's vision, part of the demand was to complete the upgrade of the existing Stellenbosch Wastewater Treatment Works (WWTW), upgrade of the Pniel Wastewater Treatment Works, identify and resolve operational issues of the new Wemmershoek Wastewater Treatment Works.

The extension of the Stellenbosch WWTW from a 20MI/day to a 35MI/day plant commenced in April 2015 and was carried through to the 2019/20 financial year. This completed plant made use of Membrane Bioreactor Technology to ensure that current and future demand flows meet the highest standards in effluent quality. The total construction value is estimated at R479 million. The project is funded by the Stellenbosch Municipality and Department of Water and Sanitation (DWS) through its Regional Bulk Infrastructure Grant (RBIG) initiative. Phase 1 of the project is completed and is fully operational. New challenges occurred during phase 1, which lead to phase 2 and 3 of the project.

The construction work of the 4.5 Ml/day Pniel WWTW upgrade has commenced within the 2019/20 financial year and should be completed within 2021/22 financial year.

3.8.4.1 Sanitation Service Delivery Levels

The table below specifies the different sanitation service delivery levels per households for the financial years 2015/16 – 2019/20:

Table 3:11: Sanitation Service Delivery Levels

| Description | 2015/16
(audited) | 2016/17
(audited) | 2017/18 | 2018/19 | 2019/20 |
|--|----------------------|----------------------|---------------|---------------|---------------|
| <u>Household</u> | | | | | |
| <u>Sanitation/sewerage: (above minimum level)</u> | | | | | |
| Flush toilet (connected to sewerage) | 37 902 | 37 939 | 38 027 | 40 321 | 42 615 |
| Flush toilet (with septic tank) | 1 079 | 1 079 | 1079 | 1079 | 1079 |
| Chemical toilet | 321 | 114 | 94 | 94 | 139 |
| Pit toilet (ventilated) | 209 | 0 | 0 | 0 | 0 |
| Other toilet provisions (above minimum service level) | 1 038 | 0 | 0 | 2 336 | 2 386 |
| Minimum Service Level and Above Sub-Total | 40 549 | 39 132 | 39 252 | 44 595 | 49 938 |
| Minimum Service Level and Above Percentage | 94.86 | 97.51 | 97.01% | 92.0% | 98.14% |
| <u>Sanitation / sewerage: (below minimum level)</u> | | | | | |
| Bucket toilet | 125 | 0 | 0 | 0 | 0 |
| Other toilet provisions (below minimum service level) | 1 038 | 0 | 0 | 0 | 0 |
| No toilet provisions | 1 035 | 0 | 0 | 0 | 0 |
| Below Minimum Service Level Sub-Total | 2 198 | 1 193 | 1 173 | 1 050 | 972 |
| Below Minimum Service Level Percentage | 5.14 | 2.49 | 0 | 1.88% | 2.11% |
| Total Number of Households | 42 747 | 40 325 | 52 374 | 55 825 | 59 276 |

3.8.4.2 Capital Expenditure – Sanitation Services

Table 3:12: Capital Expenditure as at 30 June 2019: Sanitation Services

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Upgrade of WWTW: Pniel and Decommissioning of Franschoek | 32 751 232 | 17 461 469 | -46.68% |
| Bulk Sewer Outfall: Jamestown | 31 578 466 | 29 913 525 | -5.27% |
| New Plankenburg Main Outfall Sewer | 22 347 744 | 18 295 000 | -18.13% |
| Ida's Valley Merriman Outfall Sewer | 9 884 648 | 9 458 117 | -4.32% |
| Sewerpipe Replacement: Dorp Street | 6 000 000 | 1 826 025 | -69.57% |
| Only the 5 largest capital projects are listed | | | |

Sanitation Services have spent, **84.07%** of the capital budget for the financial year.

3.8.4.3 Major projects implemented

Table 3:13: Major projects implemented

| Project Name | Scope | Project Cost | Benefit, Impacts and Goals achieved | Other Comments |
|--|---|--------------|--|---|
| Water Conservation and Water Demand Management (Wc/Wdm) Initiatives | | | | |
| Water Treatment Works Ida's Valley | Upgrading of the existing works to increase the current treatment capacity as well introducing colour removal. | R90M | Various upgrades and modifications to treatment works processes to be made in order to increase treatment capacity. | Consultant was appointed and the project is currently in the inception phase. |
| Extension of the Stellenbosch Waste Water Treatment Works (SWWTW). | The extension of the Stellenbosch Waste Water Treatment Works (SWWTW) is one of the largest projects in Stellenbosch history. | R480M | Increased Treatment capacity to 35 MI/day
Resolves the critical need for present and future WWT demand in the area.
Enable economic development in the area
Support the housing provision pipeline. | Phase 1 consist of constructing new 27MI/day MBR lane.
Phase 2 the existing plant will be upgraded to BNR (Biological Nutrient Removal) system with capacity of 8MI/day. Project has reached 100% completion. With further investigation into a tanker discharge facility. |
| New Wemmershoek (Franschhoek Valley) WWTW | The New Nereda Wemmershoek WWTW is at the forefront of technological innovation and construction was completed in April 2015 (Nereda © technology). | R29M | Ensure allowance for future demand and economic growth and development of the greater Franschhoek and surrounding areas.
Increase capacity from 1.8ML/day to 7ML/day in phases to eradicate Franschhoek WWTW challenges.
Allow decommissioning of existing Franschhoek WWTW. | Consultant was appointed to design phase 1 of the new CAS plant.
Staff is constantly trained to operate this plant which is highly technical. |
| Upgrade of Pniel WWTW | The upgrade of existing WWTW . | R144M | Capacity increased to 4.5MI/day. | Activated sludge process with Belt press and new UV disinfection system. |

3.8.5 ELECTRICITY

Load shedding continues being experienced due to the Eskom challenges with their power stations. As in the previous financial years of 2017/18 and 2018/19 Stellenbosch Municipality continues to contribute to Eskom's electricity supply stability, mainly with the following projects:

The Demand Side Management

The municipality continued with the Energy and Demand Management project which started in 2009, to replace inefficient street light fittings with energy efficient (LED) fittings.

Hot Water Load Control Project

The municipality has continued to install hot water load control device in the Franschhoek area, which will enable shedding of all geysers during peak times, hence making an energy saving at the end of the month. A total of 9 223 load control device have been installed in Stellenbosch area and Franschhoek. All new developments are being issued with load control devices to manage demand.

Electrification of Informal Settlements

Through the INEP grant received the municipality managed to electrify informal settlement structures that are in the areas where electricity services are available. All the structures that are electrified received free basic electricity (100 kWh).

Pniel take-over

Stellenbosch Municipality finally took over from Drakenstein Municipality the electrical network at Pniel, Hollandsche Molen, Johannesdal and the surrounding farms with effect from 15 February 2019. However, the network proved to have been unkept judging by the number of infrastructure failures and the state the infrastructure is found in, when attending to such outages. The municipality, as a result of these huge number of infrastructure failures, instituted an investigation which revealed that a number of the infrastructure either need to be replaced or refurbished and in some instances a complete new engineering arrangement to be made.

With the limited financial resources, funding is made available as and when to realise the projects, as per the report, in order to ensure some degree of electricity stability in Pniël.

3.8.5.1 Electricity Service Delivery Statistics

Table 3:14: Electricity Notified Maximum Demand

| Major Towns | Notified Maximum Demand (NMD) | Maximum Demand Growth (NMD) | Maximum Demand Peak (NMD) |
|--------------|-------------------------------|-----------------------------|---------------------------|
| Stellenbosch | 60 MVA | 0.6 MVA | 56.3MVA |
| Franschhoek | 10 MVA | 0.48 MVA | 10.25 MVA |
| Cloetesville | 16 MVA | 1.58MVA | 16.03MVA |
| Pniël | 9 MVA | N/A | 7.883MVA |

The electricity losses as at 30 June 2020 were 7.31% which is still within the acceptable industry standard of 11%, however there was an increase in losses as compared to last financial years of (2017/18) and (2018/19). The reason for that is increase of illegal connections and the new network Stellenbosch Municipality took over from Drakenstein Municipality in February 2019 has an effect on the losses.

An alarming 48% in losses was discovered by investigation conducted on the Pniël network. Due to this high number, which is abnormal, it is unlikely that these were only the losses, rather an indication of either a faulty metering equipment of meters that were not transferred over by Drakenstein to Stellenbosch and as such, maybe still continue to pay the consumption to Drakenstein. The municipality is urgently looking for a solution to address this.

The issue of severe staff shortage continues being a challenge and difficulty in attracting suitably qualified and competent persons continues being experienced. It is vital for the effective functioning of electricity services to be able to attract competent, skilled and sufficiently experienced personnel. Resolving the staff shortages will improve the current working conditions of staff.

3.8.5.2 Electricity Service Delivery Levels

Electricity Service Delivery Levels

| Description | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|--|----------------|----------------|----------------|------------------|------------------|
| <u>Household Prepaid</u> | <u>audited</u> | <u>audited</u> | <u>audited</u> | <u>unaudited</u> | <u>unaudited</u> |
| Energy: (above minimum level) | | | | | |
| Electricity (at least minimum service level)
(No. of conventional meters) | 6 486 | 6 486 | 6 453 | 4 715 | 4 601 |
| Electricity - prepaid (minimum service level)
(No. of prepaid meters) | 17 504 | 17 504 | 25 946 | 27 825 | 28 366 |
| Minimum Service Level and Above Sub-Total | 23 990 | 23 990 | 32 399 | 32 540 | 32 967 |
| Minimum Service Level and Above Percentage | 79.67 | 86.7 | 80.08 | 85.51 | 86.04 |
| Energy: (below minimum level) | | | | | |
| Electricity (< minimum service level) | 0 | 0 | 0 | 0 | 0 |
| Electricity - prepaid (< min. service level) | 4 460 | 4 460 | 6 453 | 0 | 0 |
| Other energy sources | N/A | N/A | N/A | N/A | N/A |
| Below Minimum Service Level Sub-Total | 4 460 | 4 460 | 6 453 | 0 | 0 |
| Below Minimum Service Level Percentage | 13.27 | 13.27 | 12.32 | 0 | 0 |
| Total Number Of Households | 48 002 | 48 002 | 52 374 | 32 540 | |

During the 2019/20 financial year the municipality continued with the programme of the renewal and upgrading of old equipment reaching the end of its life cycle.

The replacement of old low voltage overhead networks has been completed in la Collinne and some parts of Cloetesville. The municipality will continue in the next financial year with the replacement in Cloetesville.

3.8.5.3 Capital Expenditure – Electricity Services

Table 3:15: Capital Expenditure as at 30 June: Electricity Services

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Stand-by Generator | 9 355 144 | 8 107 426 | -13.34% |
| General Systems Improvements - Stellenbosch | 4 908 238 | 4 753 823 | -3.15% |
| Integrated National Electrification Programme | 11 160 000 | 10 734 688 | -3.81% |
| Integrated National Electrification Programme (Enkanini) | 4 480 000 | 4 428 126 | -1.16% |
| Energy Efficiency and Demand Side Management | 2 000 000 | 1 999 711 | -0.01% |
| Specialised Vehicles | 2 000 000 | 1 984 402 | -0.78% |
| Network Cable Replace 11 Kv | 2 000 000 | 820 676 | -58.97% |
| Only the 7 largest capital projects are listed | | | |

Electricity Services have spent, **91.42%** of the capital budget for the financial year.

3.8.5.4 Total employees – Electricity

Total Employees – Electricity

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|------------|------------|-----------------------------------|-----------------------------------|
| | Number | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 12 | 8 | 4 | 3.03% |
| 12 – 10 | 36 | 8 | 28 | 19.7% |
| 9 – 7 | 44 | 32 | 12 | 9.09% |
| 6 – 4 | 39 | 11 | 28 | 5.45% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 132 | 60 | 72 | 37.27% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.8.6 WASTE MANAGEMENT, REFUSE COLLECTIONS, WASTE DISPOSAL AND RECYCLING

3.8.6.1 Solid Waste Management

The Waste Management Department's key responsibility is to keep the municipal area clean and free of illegal dumping and to provide a sustainable waste collection and disposal service for all residents. The municipality also focuses on several ways to enhance waste reduction as well as the implementation of treatment, recovery and recycling systems for various waste streams.

The 2019/20 financial year was challenging year for the Waste Management Department as the Stellenbosch Landfill site reached its capacity and the municipality had to divert all domestic waste to Vissershok Landfill site in Cape Town. The department was also hard hit by the COVID-19 pandemic which resulted in the refuse collection depot being closed thrice in space of two months because of staff contracting the virus.

The municipality has made progress in the waste minimisation efforts with the start of construction of the Waste Material Recovery Facility (MRF) which will include a public waste drop-off. This will bring waste disposal services closer to the public and allow for waste and unwanted items to be brought to this facility for safe disposal or to be recycled. This facility should also contribute to minimise the illegal dumping, by providing a place for waste to be disposed of.

The municipality has also commenced with the finalisation of certain strategic documents in the 2019/20 financial year such as Section 78(3) report, Integrated Waste By-Law and Integrated Waste Management Plan (IWMP). All these reports will be tabled at Council in the new financial year (2020/21). These strategic documents will provide the blueprint on various service delivery mechanisms, by-laws and the IWMP which forms part of the Integrated Development Plan.

During the financial year, waste volumes were relatively consistent however the disposal of waste to landfill was significant lower during level 5 and 4 national lockdown. This could mainly be contributed to the University and businesses being closed over these periods. There was however a gradual increase

as the lockdown levels were lifted.

Progress has been made with the expansion of the landfill with the environmental impact assessment for the moving of the powerlines at the landfill site being finalised for the authorities to approve. Once all approvals are in place the construction related activities will commence.

Challenges within this department were the number of vacancies, particularly in the Area Cleaning and Waste Disposal and Minimisation branches that needs to be filled, the Senior Manager of the department resigned within the financial year leaving a vacancy on management level, the diversion of waste to Vissershoeck in Cape Town, the archaic Task-to-finish practise which is hampering the refuse collection service, the longer time-frames to procure goods and services as a result of implementation of measures by Supply Chain Management to reduce unauthorised/irregular expenditure.

3.8.6.2 COVID-19

The 2019/20 financial year will go down in the history books as the year in which the COVID-19 pandemic affected the way in which we all live and deliver services. During the early stages of the complete lockdown, essential services needed to be maintained. Waste services, including washing down and sanitising of public areas were implemented. Staff were trained on measures to guarantee their own as well as others safety. Personal Protection Equipment (PPE) was rolled out and the wearing of masks were made mandatory for all staff. A "new normal" service delivery strategy was put in place.

Department of Environmental Affairs and Development Planning (DEA&DP) initiated a weekly meeting of all municipalities from around the Province to report on COVID-19 difficulties and solutions used to enable service delivery to continue.

3.8.6.3 Area Cleaning- Franschhoek

All teams worked through the lockdown and the municipality was fortunate not to have any positive cases. Employees were informed of the rules and regulations regarding COVID-19 and everyone applied the rules to their daily routine.

Staff received their PPE, masks, sanitiser or hand wash as well as gloves during the levels of lockdown on a daily basis.

Three new skips were placed inside the Lanquedoc residential area and 6 skips were placed in Klappmuts.

10 street bins were placed in the Franschhoek CBD area.

A total of 166 EPWP workers were employed during the 2019/20 financial year.

The first semester from 01 July 2019 to 31 December 2019 a total 101 EPWP workers were recruited and employed from the unemployment database. The second semester from 01 January 2020 to 30 June 2020 a total of 50 EPWP workers were employed, and from February 2020 until June 2020 a group of 15 people were employed.

A total of 9 530 bags were distributed during the 2019/20 financial year – during the lockdown period no bags were handed out door-to-door.

Teams were requested to clean inside a dam area where people erected illegal shacks. This is an ongoing problem.

Illegal dumping clearing in Franschoek by Area Cleaning

Area Cleaning in Pniel

3.8.6.4 Area Cleaning- Stellenbosch

A total of 334 EPWP employment opportunities were created in the 2019/20 financial year.

All teams worked through the lockdown. Employees were informed of the rules and regulations regarding COVID-19 and everyone applied the rules to their daily routine.

Staff received their PPE, masks, sanitiser or hand wash as well as gloves during the levels of lockdown on a daily basis.

12 skips were placed in Stellenbosch for the financial year, Kayamandi, MESCO farm, Cloetesville and Jamestown.

170 street bins were placed in the following areas:

- Stellenbosch CBD;
- Onder Papegaaiberg;
- Ida's Valley;
- Taxi Rank CBD;
- Taxi Rank Kayamandi;
- Paradyskloof;
- Ida's Valley;
- Cloetesville; and
- Plankenbrug.

An average of 70 000 blue bags were used on a monthly basis to clean areas / replace bins and for the door-to-door service in Enkanini.

Area Cleaning has no permanent staff, only consists of an Assistant Superintendent and 300 EPWP employees.

Enkanini Pig Farm

Cloeteville illegal dumping - before and after

Area Cleaning staff briefing and ready for river cleaning

3.8.6.5 Refuse Collection

Wheelie 240 litre bins

During the 2019/20 financial year, 1 220 wheelie bins were distributed in total. These were made up as follows: 606 new applications received and bins distributed, 71 additional bins provided, 176 broken bins were replaced and 367 stolen bins replaced.

Area Cleaning – before and after

Acquisition of new assets

Table 3:16: New Waste Management Vehicles

| Reg no | Year | Descriptions | Delivered | Value |
|----------|------|--------------------|-----------|-------------|
| CL 22049 | 2019 | MST Digger Loader | Jul-19 | R 1 065 632 |
| CL 10783 | 2019 | UD 16 Ton Hooklift | Aug-19 | R1 363 889 |

The municipality procured **220** street bins which were a combination of plastic and cement bins which were placed in various location within the CBD and residential areas.

In addition, the municipality also procured **41** skips which were and place at illegal dumping hotspots and informal settlements.

3.8.6.6 Waste Disposal and Waste Minimisation

Construction of new MRF and Drop-Off

The construction phase of the new Material Recovery Facility (MRF) and associated Public Drop-off Facility commenced during 2019/20 financial year. The facility, once completed, will comprise a waste reception area (with a weighbridge), MRF building (with fixed plant comprising conveyors and sorting line and two baling machines) public drop off (for small loads of waste) and staff facilities. Completion is due in November 2020.

New MRF building under construction

Green waste chipping

Green waste is being received at Franschhoek Drop Off and Stellenbosch Landfill. As the landfill site is where all the green waste is gathered, the appointed contractor to provide a chipping service such waste.

Door to door recycling collection

Recycling collections and operations are managed by Stellenbosch Municipality with the help of various contractors that supply vehicles in order to do door to door collections. Recyclables are collected in clear plastic bags made with recycled materials on every day of the week around the Stellenbosch Municipal area as well on farms and businesses in the surrounding area. Upon collection new clear bags are provided for each bag collected in order to ensure that all residents are able to recycle on a weekly basis.

The pre-mature ending of services of an appointed contractor in the last quarter of the financial year; offered challenges in rendering this service, and a resultant decline in recycling initiatives. With the completion of a MRF located in WC024 (by end 2020) the education and awareness activities should be mobilised to support minimisation of waste in all areas of WC024.

Disposal

Stellenbosch landfill

The Stellenbosch landfill situated in Devon Valley Road is essentially in care and maintenance phase and receives limited waste. Cell three has filled up since August 2019. Work is currently under way to license a new cell at the site (see details below).

Due to the lack of landfill airspace in Stellenbosch, the transfer of all general waste to the private landfill situated in the City of Cape Town area at Vissershok commenced during August 2019.

A tender process was followed for waste disposal facilities and this was awarded to the Vissershok Waste Management facility (VWMF).

All waste that was delivered by either SM owned municipal vehicles or by way of a sub-contractors working for SM as well as private users was transferred from Klappmuts transfer station to VHWMF for disposal.

Photo: Stellenbosch landfill entrance

Stellenbosch Landfill rubble crushing and landfill side slope rehabilitation

Klapmuts Transfer Station

The Klapmuts Refuse Transfer Station has a design capacity of 150 tons per day transfer capacity. Since August 2019 this facility has been utilised at near capacity to transfer waste to VHWMF. Waste from all areas will be transported in collection vehicles and will be transferred into open top 30m³ bins for onward transport using 3 containers at a time by way of bulk transport to Vissershok Waste Management Facility.

The transfer of waste to and through Klapmuts RTS commenced during August 2019 and for the period up to 30 June 2020 a total of 31 260 ton of general waste was transferred.

Klapmuts Transfer Station waste reception apron

Franschhoek drop off

The Franschhoek Drop-off facility continued to provide a service to the residents of Franschhoek and surrounds to dispose of the garden waste and bulky goods. A contractor is appointed to transport garden waste to Stellenbosch Landfill and bulky waste to Vissershok Private Landfill.

Relocation of Eskom Power Lines

The Stellenbosch landfill situated on the Devon Valley is transversed by two high voltage Eskom power lines. The presence of these power lines prevents the municipality from engineering and operating the area located between cells 1, 2 and 3 as waste disposal cells. This has resulted in the premature filling up of the facility which was put into care and maintenance phase with limited waste acceptance since August 2019.

In order to relocate the two sets of power lines an appointment was made of an environmental assessment practitioner (EAP) to undertake a Basic Assessment (BA) process that would lead to an application for an environmental authorisation allowing Eskom to proceed with the relocation project. This project commenced during the previous financial year making use of an existing panel tender. The project commenced during June 2019 and the Final Basic Assessment Report was submitted to national Department of Environment as planned during June 2020.

As Eskom is an organ of state and the project deals with the generation and transmission of electricity, the competent authority for this project is the National Department of Environment, Forestry and Fisheries (DEFF).

It is anticipated that the Environmental Authorisation as well as the Water Use License will be issued by the end of November 2020.

Photo: Two sets of high voltage power lines to be relocated from the Stellenbosch Landfill

Waste Management Licence project

The Stellenbosch landfill has reached capacity. The landfill comprises completed cells (cell 1 and 2) as well as an operating cell (cell 3). Cell 3 is separated from cells 1 and 2 by an area on the landfill property footprint that is used for access roads, entrance area and weighbridge, green waste chipping and rubble crushing and stockpiling activities. This area has been unused as it is transferred by two high voltage Eskom power lines which are to be removed and repositioned. This area has been identified as

possibly suitable for the establishment through design and construction of engineered cells to be operated for the acceptance for disposal of residual general waste which has not been recycled or recovered for energy purposes, this will add some 20 to 30 years of landfill airspace.

The appointment of an EAP was made using the existing panel tender in terms of which a request for technical proposal was requested and an appointment was made of a specialist environmental consultant to successfully carry out all required environmental processes including relevant specialist studies by way of a comprehensive BA process to successfully obtain the Waste Management License that will allow the municipality to proceed with the planning, design, construction and operation of further waste management cells. In addition, the appointed professional service provider must also review and do the necessary work if required for the updating of the Water Use License of the site (WULA). The project was initiated during June 2019 and it is anticipated in spite of delays experienced due to the lack of boreholes and the national COVID-19 lock down the BAR will be completed ready for public participation by end of December 2020. The final BAR will be submitted early in 2021 and the WML and WUL should be issued early in the second semester of the 2020/21 financial year.

A series of new boreholes were drilled to ensure that the design report to be completed, this included boreholes for the new cell 4 as well as additional boreholes for the monitoring of the closed cells 1 and 2 as well as cell 3.

Photos: borehole being drilled as well as completed borehole

The Devon Valley Landfill Site received the following quantities of waste which was recorded by the weighbridge at the site:

Table 3:17: Landfill statistics for incoming waste in tons for 2019/20 financial year

| Total Waste at Dvls Per Month | Jul-19 | Aug-19 | Sep-19 | Oct-19 | Nov-19 | Dec-19 | Jan-20 | Feb-20 | Mar-20 | Apr-20 | May-20 | Jun-20 |
|--|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|
| | 17 852 | 10 063 | 21 200 | 6 448 | 6 844 | 4 483 | 5 630 | 4 721 | 5 310 | 412 | 2 909 | 6 710 |
| Waste Received at DVL Per Month | | | | | | | | | | | | |
| | Jul-19 | Aug-19 | Sep-19 | Oct-19 | Nov-19 | Dec-19 | Jan-20 | Feb-20 | Mar-20 | Apr-20 | May-20 | Jun-20 |
| Building Rubble | 2 613 | 2 155 | 2 071 | 2 791 | 2 899 | 3 339 | 3 324 | 2 892 | 3043 | 21 | 988 | 3 019 |
| Garden Waste | 392 | 234 | 14 829 | 362 | 379 | 239 | 578 | 554 | 495 | 23 | 274 | 863 |
| Clean Cover | 8 171 | 2 854 | 982 | 1 762 | 2 777 | 438 | 968 | 599 | 770 | 0 | 444 | 1 352 |
| Area Cleaning | 510 | 781 | 650 | 652 | 441 | 227 | 264 | 418 | 618 | 325 | 1 055 | 1 240 |
| Domestic Refuse | 4 123 | 2 885 | 1 621 | 364 | 154 | 131 | 272 | 106 | 157 | 29 | 76 | 1 |
| Industrial Refuse | 481 | 720 | 459 | 368 | 195 | 110 | 161 | 152 | 130 | 12 | 67 | 111 |
| Waste Removed and / or Beneficiated | | | | | | | | | | | | |
| | Jul-19 | Aug-19 | Sep-19 | Oct-19 | Nov-19 | Dec-19 | Jan-20 | Feb-20 | Mar-20 | Apr-20 | May-20 | Jun-20 |
| Green Waste | 392 | 234 | 14 829 | 362 | 379 | 239 | 578 | 554 | 495 | 23 | 274 | 863 |
| Recyclables Out | 75 | 90 | 82 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Bricks Out | 0 | 0 | 3 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

The table above refers only to incoming waste which was captured over the weighbridge as incoming loads and waste removed, or beneficiated, for the 2019/20 financial year.

The total waste received at the landfill site was 92 582 tons, compared to the corresponding period a year ago, which was 219 896 tons. This indicates a decrease of 58%.

The main reason for this is the limitation in airspace at the landfill, and thus from August 2019 general waste was being re-directed to Klapmuts Transfer Station and then transported and disposed of at Vissershok Private Landfill. This changed the composition of waste material on site to the extent that recyclables were no longer available to informal waste pickers on site.

The other fluctuation in waste volumes is due to economic activities that were limited during lockdown. It is interesting to note that area cleaning / illegal dumping has increased dramatically. The high rate of unemployment and more people / families are at home and waste generated is not disposed of responsibly, may be a reason for this.

Projects continued in the 2019/20 financial year but initiated in previous financial year(s):

Landfill gas extraction, flaring and electricity generation:

Previous investigations into landfill gas showed that it is feasible to harvest landfill gas from the closed and active cells and convert this to electricity. Carbon offset projects are a way in reducing the carbon footprint of a municipality, thus there are benefits in investing in carbon reduction projects, which can assist in making a town carbon neutral.

Many of the carbon offset projects may provide additional benefits such as biodiversity, education, jobs, food security, as well as much needed income for developing countries.

A Clean Development Mechanism (CDM) project undertaken with registration under the United Nations Framework Convention on Climate Change (UNFCCC) could unlock CDM income for the Stellenbosch Municipality through the sale of certified carbon credits measured as Certified Emission Reduction credits (CERs). These CERs can be traded and sold, and used by industrialised countries to meet a part of their emission reduction targets under the Kyoto Protocol. In addition, South Africa has established a system that allows subsidies for green energy projects in return for tax incentives (carbon tax) for investor companies including municipalities.

The Department of Minerals and Energy has established a renewable energy finance and subsidy office (REPSO) to assist developers.

Investigations into the best mechanism to take this project forward have been undertaken. Starting from scratch is both expensive and time consuming, so the most financially viable way ahead with the Stellenbosch Municipal landfill gas to electricity project will be to link into the City of Cape Town's UNFCCC approved Programme of Activities (POA). Being part of an established POA will have many benefits, including financial and time, for the Stellenbosch Municipality.

A letter seeking permission was sent from the Municipal Manager's office to the City Manager in this regard. A positive response was received and the Stellenbosch Municipality will embark in the 2020/21 financial year on the viability and eligibility study to make certain that the project is viable and that the benefits of linking with the POA can be realised.

Compliance

Internal audits

Internal audits are due to be conducted quarterly in the months of March, June, September and December by Head Office waste management staff. This is a regulatory requirement. However due to the fact that the Senior Manager: Waste Management left the municipality, two internal audits were not finalised and written up. One was carried out in May 2020.

External audits

For disposal facilities (landfills and transfer stations) to be operated in compliance with the relevant legislation, all landfills must be licenced and managed according to the conditions in the licence. These management practices must also be compliant with the Norms and Standards in terms of the National Environmental Management Waste Act (NEMWA) as well as with certain sections of Minimum Requirements for Waste Disposal by Landfill (DWAF, 1998), and other relevant regulations.

To be able to assess whether waste management practices are according to all stated conditions, landfill owners must, on a regular basis (at least once per annum), obtain the services of an external auditor to do an independent landfill compliance audit.

To ensure compliance, external audits have been undertaken by an independent specialist consultant, at the Stellenbosch landfill and at the Klapmuts Transfer Station, in accordance with waste management licence conditions. Six months later a review of the audit finding to ascertain improvements have been carried out. The independent auditor reported back to the municipality as well as to the Monitoring Committee. Most of the permit conditions are compliant, with the exception of storm water monitoring, groundwater monitoring and gas monitoring. All of the non-compliances are being addressed with establishment of a new borehole monitoring network as well as appointments for ground water and landfill gas monitoring. All required boreholes were implemented in the 2019/20

financial year as part of the specialist studies undertaken, and gas monitoring will be incorporated with the methane extraction project also listed in the 2020/21 financial year.

Monitoring Committee

All landfills are established and operated in terms of a waste management license (WML) issued by either the national or Provincial Department of the Environment. In terms of the WML landfills are required to establish a Monitoring Committee. The objective of the Monitoring Committee is to provide a forum to enable the community to effectively participate in and monitor the operation, rehabilitation, closure and on-going monitoring of a landfill.

The Stellenbosch landfill has an active monitoring Committee that meets every three months. The committee is chaired by a representative of the community and minutes are prepared by the municipality. Monitoring Committee meetings are attended by DEA&DP officials as well as officials of various Municipal Departments as and when required. The independent external auditor also attends the meeting as and when required to report on the findings of the annual external as well as the review audit.

Waste Managers Officers Forum

The Waste Management Officer (WMO) for the Stellenbosch Municipality is the Senior Manager: Waste Management. Quarterly meetings of the Provincial Waste Managers Officers forum take place at various venues across the Province. The WMO attends the meeting and reports back on activities within the municipality – this also provides a forum to receive information from Provincial officials and for networking with WMOs from other municipalities within the province.

Studies and strategies

Waste Characterisation study

In order to understand the Stellenbosch waste stream and make decisions based on recent data and composition, a comprehensive waste characterisation study was undertaken. This was completed during 2019/20 financial year.

Outcomes of waste characterisation study – broad categories data

Outcomes of waste characterisation study – detailed data

Review of IWMP

A comprehensive review and updating of the Integrated Waste Management Plan of the municipality was initiated during 2019/20. This will be completed in the next financial year and submitted for approval to Council.

MSA Section 78(3) report

A section 78(3) investigation was undertaken as mandated under the MSA.

This investigation is undertaken to inform Council of the outcome of the process followed in terms of the Section 78(1) and (2) study and subsequent Council resolution into the preferred service delivery mechanism for the various activities undertaken by the Solid Waste Management department thereby enabling Council to make an informed resolution and a Section 78(4) decision.

The report was finalised during 2019/20 financial year and will be reported to Council during 2020/21.

Social Engagement and environmental clean-ups

The Department of Environment, Forestry and Fisheries (DEFF) provided the municipality with a Youth Environmental Coordinator (YCOP) to assist with social engagement and awareness.

On the 10th of April 2019, Solid Waste Senior Manager, YCOP, Stellenbosch Water Institute Project Manager, Amanzi Yimpilo youth ambassadors and engineers, Environmental Management unit manager conducted site visit to all the polluted areas highlighted by the community, involved a walk-through ED and H sections of Enkanini, and an investigation of the three rivulets in Enkanini. The aim of the site visit was both to verify the community concerns and obtain a sense of the extent of the problems that the community had identified.

Involvement with professional and Educational Institutions:

During the financial year the department conducted environmental awareness with regards to recycling and illegal dumping. Environmental awareness was conducted by the YCOP at the following schools:

List of visited schools:

1. Groendal Primary School;
2. Dalubuhle Primary School;
3. Kayamandi Primary School;
4. Ikaya Primary School;
5. Ida's Valley Primary School;
6. Webergedenk Primary School;
7. Kayamandi High School Pniel Primary School;
8. PC. Petersen Primary School;
9. Makupula High School;
10. Stellenzicht High School;
11. Luckhoff High School;
12. Laerskool Cloetesville;
13. A.F Louw;
14. ST. Vincent PC Primary;
15. Rhenish Primary;
16. Laerskool Eikestad; and
17. Devonvallei Primary School.

3.8.6.7 Refuse Removal (Solid Waste) Service Delivery Levels

The table below indicates the different refuse removal service delivery level standards within the urban edge area of the municipality:

Table 3:18: Refuse removal service delivery level standards

| Description | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|---|---------------|---------------|---------------|---------------|---------------|
| Household | audited | audited | audited | unaudited | |
| Refuse Removal: (Minimum level) | | | | | |
| Removed at least once a week | 40 264 | 37 207 | 49 072 | 48 988 | 49 300 |
| Minimum Service Level and Above Sub-Total | 40 264 | 37 207 | 49 072 | 52 374 | 52 374 |
| Minimum Service Level and Above Percentage | 90.2 | 78.7 | 93.7 | 93.5 | 94.1 |
| Refuse Removal: (Below minimum level) | | | | | |
| Removed less frequently than once a week | 1 064 | 1 064 | 1 064 | 1 064 | 1 064 |
| Using communal refuse dump | N/A | N/A | N/A | N/A | N/A |
| Using own refuse dump | 2 058 | 5 358 | 6 453 | 2 323 | 2 323 |
| Other rubbish disposal | 766 | 766 | N/A | N/A | N/A |
| No rubbish disposal | N/A | N/A | N/A | N/A | N/A |
| Below Minimum Service Level Sub-Total | 3 888 | 7 188 | 7 517 | 3 387 | 3 387 |
| Below Minimum Service Level Percentage | 8.81 | 8.80 | 11.66 | 6.5 | 6.5 |
| Total Number of Households | 44 152 | 44 493 | 52 374 | 52 374 | 52 374 |

3.8.6.8 Capital Expenditure – Waste Management Services

Table 3:19: Capital Expenditure as at 30 June: Waste Management Services

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|---|-------------------|--------------------|---------------------------------|
| | R | | |
| Stellenbosch WC024 Material Recovery Facility | 25 669 337 | 19 509 850 | -24.00% |
| Vehicles | 5 879 824 | 5 043 827 | -14.22% |
| Expansion of the landfill site (New cells) | 2 000 000 | 1 371 514 | -31.42% |
| Upgrade Refuse disposal site (Existing Cell)- Rehab | 1 000 000 | 370 035 | -63.00% |
| Skips (5,5KI) | 776 240 | 724 354 | -6.68% |
| Only the 5 largest capital projects are listed | | | |

Waste Management Services have spent, **75.56%** of the capital budget for the financial year

3.8.6.9 Total employees – Waste Management

Table 3:20: Total Employees – Waste Management

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|------------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 24 | 0 | 24 | 15.58% |
| 12 – 10 | 4 | 1 | 3 | 1.94% |
| 9 – 7 | 22 | 0 | 22 | 14.28% |
| 6 – 4 | 103 | 36 | 67 | 43.5% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 154 | 38 | 116 | 75.32% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.8.7 HOUSING

3.8.7.1 New Housing

The municipality has an important responsibility to plan for integrated human settlements by ensuring that all its citizens reside in developable, formalised, safe and sustainable human settlements. This is accomplished by providing dignified living through National and Provincial funding within closer proximity to employment opportunities, if thereby improves the quality of life of all citizens.

The Department: Housing Development, in accordance with the Housing Pipeline planned the following projects for 2019/20 financial year:

a) Erf 7001, Cloetesville

Stellenbosch Municipality have been proactive and strategic in identifying vacant portions of land to assist in addressing poor living conditions, and in particular the need for housing provision, in Cloetesville, located 4km to the north of the Stellenbosch CBD. The municipality has therefore initiated a study aimed at exploring the development potential within Cloetesville and to respond to the development needs and challenges within Cloetesville, in particular.

Stellenbosch Municipality has therefore decided to follow a Call for Proposals process to focus on Erf 7001 and that the required cost benefit analyses be completed for the identified property (Erf 7001) as part of submissions by bidders.

It should be noted, that a previous Call for Proposal was advertised during 2018/19 financial year and was cancelled due to non-responsive bidders.

A new tender was re-advertise and the closing date of this Call for Proposal was 20 March 2020. Bids were received and Stage 1 of the Call for Proposal has been completed.

This Call for Proposal has 2 (two) stages and Stage 2 is currently in progress. The different stages are explained below:

- **Stage 1: Concept Proposal and Functionality (ability to deliver on project requirements)**

The proposals will be scrutinised and assessed on the concept proposal and ability of Bidders to deliver on project requirements by a Bid Evaluation Committee (BEC). Only those Bidders whose bids are assessed as having achieved the minimum required score (70%) will be considered responsive and will proceed to Stage 2 evaluation. Following this functionality evaluation, the Bidders will be informed in writing of the outcome pertaining to stage 1.

- **Stage 2: Financial Proposal and Feasibility**

The financial feasibility evaluation of proposals submitted is there for a critical element in the decision-making process for Stellenbosch Municipality.

Figure 3:19: Location Plan: Erf 7001, Cloetesville

Bidders that have been shortlisted following the functionality evaluation in stage 1 will be provided with a pricing schedule that must be completed in a prescribed timeframe. Bidders will then be required to submit their financial proposals and feasibility analyses to support their development proposals and that examines the implications, strengths and weaknesses of their proposals. The shortlisted bidders will be invited to present their development proposals in more detail to the Evaluation Panel and clarify any issues that may need to be elaborated upon.

The appointment for a successful service provider will be appointed after the Stage 2 evaluation.

b) Possible sites for mix-used development in Cloetesville (Infill housing development)

During 2018/19 financial year, a status quo assessment report was concluded by a service provider whereby the study contains the possibility for other various vacant erven in Cloetesville.

During October 2019, Council resolved that two desktop studies in order to determine the suitability of Municipal owned vacant erven in Cloetesville for further infill development. The studies will determine the different housing typologies in order to address the challenges communities are facing in the Cloetesville area.

A technical proposal was advertised during March 2020, requesting consultants to undertake a feasibility study of various sites within the Cloetesville area for possible Infill Housing Development. Due to the National Lock Down as instructed by The President, the municipality decided to extend the closing date to April 2020.

The successful service provider was appointed during June 2020 and will commence with work to assemble a multi-disciplinary team of professionals in order to complete the study for Cloetesville, Stellenbosch during the 2020/21 financial year.

c) Farm 527, Jamestown (Phase 2, 3 and 4)

In accordance with the housing need, Stellenbosch Municipality has identified a portion of land in Jamestown for residential purposes. The site is located on the southern edge of the suburb of Jamestown, east of the R44 between Stellenbosch and Somerset West, flanked by an existing cemetery on its western boundary and a sports field located centrally on its northern edge. The area characterised by medium to high-density residential as well as non-residential uses that serve the local community of Jamestown.

A portion of this land (Phase 1 - 3.9317ha) was completed in November 2016 and therefore excluded from this proposed development concept / framework.

A tender was advertised for a Call for Proposal for Phases 2, 3 and 4 for the delivery of additional state subsidised housing units, serviced sites for affordable housing (plot and plan), GAP housing units, high density units and high income housing for sale on the open market. Specific preferences will be given

Figure 3:20: Location Plan: Farm 527, Jamestown (Phase 2,3 and 4)

to purchasers meeting the criteria, pricing and subjected to confirmed conditions as stipulated by the municipality.

Development rights have been obtained for Phases 2 and 3 on Portion 7 of Farm 527 (site and service, 2-storey walk-ups, GAP housing, high income housing and public open space) and it is proposed that these two phases be made available simultaneously for development in the short to medium term. The portion of Remainder Farm No 527 included in this Proposed Development Concept is zoned Agriculture and application therefore still needs to be made to obtain development rights for urban / residential development.

The development of this area (the new Phase 4) is only possible in the medium to long term (as also indicated in the Stellenbosch Municipality Housing Pipeline annual review). It will therefore be required of the prospective developer to do the necessary detailed feasibility studies and obtain the relevant planning and other approvals to enable township establishment for this phase of the development.

The town planning and design principles will be incorporate such as access and movement, landscaping, a safe community, permeability and street linkages, integration, continuity, active street interface, local economic development, integration of public spaces with community facilities, dignified space concept and linkages between public spaces.

Figure 3:21: Approved Development Plan

The Call for Proposal has followed a 2-stage approach to appoint a suitable developer (Stage 1: Concept Proposal and Functionality (ability to deliver on project requirements) and Stage 2: Financial Proposal and Feasibility). The proposals for Stage 1 have been scrutinised and assessed on the concept proposal and ability of Bidders to deliver on project requirements. Only those Bidders whose bids are assessed as having achieved the minimum required score (70%) will be considered responsive. The responsive bidders will proceed to Stage 2 evaluation which will be assessed during 2020/21 financial year.

d) Kayamandi Town Centre

A service provider with the necessary multi-disciplinary team of professional consultants were appointed to conduct a feasibility study to assess the redevelopment of the town centre of Kayamandi.

The specific area has been discussed and subsequently approved by the Stellenbosch Municipality for the redevelopment of the town centre of Kayamandi, Stellenbosch.

During March 2017, Stellenbosch extended the scope to conduct a feasibility study for the Kayamandi Town Centre to consider the options to formalise this area. Subsequent to this, Stellenbosch Municipality extended the appointment for detailed planning for the formalisation of the Kayamandi Town Centre

Redevelopment. Kayamandi Town Centre redevelopment should be seen as an integrated and holistic development, a mega project, for planning and implementation.

The feasibility study was completed during December 2017 and Council approved the feasibility on 28 March 2018.

The proposed typology mix is of such that it will enhance the beauty and character of the Kayamandi Town Centre in that it will provide for a mix of typologies to accommodate the old and the young. The proposal for walk up units is also to provide maximum densification within the available limited space.

The proposed town planning layout consists of ± 700 BNG and ± 1000 walk up units (total ± 1700 units with erf sizes of between 80m^2 and 124m^2). All designs to accommodate a mix of housing typologies and business units. This design methodology was done to suit the demand and the needs of the affected community. Semi-detached double storey top structure units are proposed at a density of 174 units per hectare. The house typologies or layouts such as “blocks of flats” or units’ representative of the “Joe Slovo” model developed as part of the N2 Gateway project.

The relocation strategy the community agreed upon was that a “block approach” must be followed to effectively address the challenges facing Kayamandi.

Figure 3:22: Conceptual layout

The aim would be to unpack the developmental opportunities of Kayamandi and recommend a relocation strategy for the families moving to the temporary units/site that has been earmarked for this process (Northern Extension).

Following extensive public participation leading up to a site visit to the N2 Gateway Project in Langa, Cape Town on 19 February 2020, the participants which derived from Kayamandi Town Centre (Ward Councillors, community leaders and members, and Stellenbosch Municipal officials including the Deputy Mayor and the consultant). This visit yielded positive results and most of the attendees supported this concept.

The proposed land uses in the feasibility study / urban design concept can be accommodated within this zoning. It is therefore proposed that this zoning is used when the study is rezoned during the land use planning application processes.

The proposed land use concept takes into consideration the following issues:

- The general slope of the area – the gradient is such that it has an impact on the number of opportunities;
- The safety concerns with regards to the communal living; and
- The impact of the COVID-19 pandemic – social distancing requirements.

The Planning Application process is anticipated to be completed within a period of nine to twelve months during the 2020/21 financial year.

e) Langrug, Franschhoek

Langrug informal settlement is situated on approximately ±13-hectare site on the relatively steep slopes of the Wemmershoek Mountains in Franschhoek. It is located some 3km to the north west of the Franschhoek CBD. It is bordered by the Wemmershoek Mountains to the north west; the Mooiwater Township to the east; the Groendal Township to the south and the Dennegeur Farm to the west as shown in the locality plan in figure 5 below:

Figure 3:23: Locations of business opportunities identified

Figure 3:24: Locality plan

The living conditions at informal settlements are typically poor with residents facing a range of basic livelihood challenges, such as poor access to basic sanitation, water supply, electricity provision and solid waste accumulation in the street, frequent shack fires, safety and security risks. Langrug informal settlement is no exception to these deplorable living conditions described above.

Furthermore, and due to the growing number of shacks and population in the settlement and unavailability of land for housing in the Franschhoek area, there is a growing need at the Langrug informal settlement to:

- Increase the level of basics services and amenities (roads, water, sanitation, electricity etc.);
- Manage grey and black water emanating from households;
- Develop a healthy and safe living environment; and
- Develop a housing project in the settlement.

In light of the above developmental challenges, there are various upgrading programmes that have been identified for planning and eventual implementation at the informal settlement. The aim of these projects is to incrementally upgrade Langrug and to some certain extent formalise existing development patterns and improve the accessibility (movement networks) and the delivery of basic services.

Hereunder is a summary of the planned projects which will commence in the 2020/21 financial year:

- Basic services and layout planning premised on in-situ upgrading principles;
- The construction of phase 2 emergency access road and the installation of water and sanitation;
- Rehabilitation of the dam wall to accommodate light weight structures; and
- Re-blocking of section C and G to improve access and basic services.

f) Northern Extension, Kayamandi

The Northern Extension of Stellenbosch, is situated north of Kayamandi, adjacent to Cloetesville and Welgevonden Estate, within the Stellenbosch Municipal area. The sites are located on the western side of the R304 (main arterial from the North) to Stellenbosch.

Figure 3:25: Locality plan

The specific site has been suggested by the Stellenbosch Municipality for the northward extension of the urban area of Stellenbosch.

The municipality is aiming to facilitate the development of $\pm 4\,000$ to $\pm 6\,000$ residential opportunities, as well as providing the required social amenities and public facilities required. The feasibility study includes identifying developable land within the study area (different farm land identified).

The Department: Housing Development is in the process to obtain planning approval and development rights.

It should be noted, that a portion of the development of the northern extension has been identified as a possible relocation area for redevelopment of the Kayamandi Town Centre.

g) Zone O, Kayamandi

Figure 3:26: Approved development plan

The Land Use Planning Authorisation (LUPA) application was submitted to the Department: Planning and Economic Development.

The MPT approved the development proposal and layout, the project is in the process of becoming implementation ready and the civil drawings will be finalised by the Directorate: Infrastructure Services.

As soon as the funding application for implementation is approved by the PDohS, the Department: Project Management Unit (PMU) will commence with the project in 2020/21 financial year.

h) Erf 64, Kylemore

Erf 64, Kylemore is 15.5ha in extent of which the municipality requires ± 8 ha for residential purposes.

A meeting was held between Department of Public work and it was indicated that the Directorate: Investment Analysis will conduct a feasibility study as part of the relevant business process of the Department Public Works and Infrastructure (DPWI). Upon completion of the feasibility study, the relevant report and recommendations have been submitted to the Directorate: Disposals (Land Reform and Human Settlements) to inform their submission for Ministerial approval.

Figure 3:27: Locality plan- Erf 64, Kylemore

The feasibility study was completed during 2019/20 financial year. The studies are a pre-requisition for funding by the PDoHS and it confirmed that the land may be used for residential purposes.

Engagements are currently underway between the municipality and the National Department of Public Works (NDoPW) regarding the transfer of Erf 64, Kylemore to the municipality. Several letters were submitted to the NDoPW requesting the transfer of the land to Stellenbosch Municipality.

The municipality is currently awaiting feedback from the National Department of Public Works.

i) La Motte, Franschhoek

La Motte, set in the Franschhoek Valley amongst plantations, is a former Bosbou Hamlet. It is situated 5 km to the west of Franschhoek, on the Robertsvalei Road, close to where it intersects the R45. Originally built to house forestry workers, the village is made up of the original dwellings and a range of community facilities. During the construction phase of the Berg River Water Scheme, new houses were built adjacent to the existing settlement to temporarily house the construction workers, these houses are now in the process of being transferred to identified beneficiaries.

Figure 3:28: Locality plan of erven, La Motte, Franschhoek

The Stellenbosch Municipality and the community of Franschhoek have been pro-active in addressing the need for affordable and subsidised housing and a number of initiatives have successfully been implemented.

By means of a tender process, a service provider was appointed by the municipality to complete a feasibility study on the proposed sites. This will enable Council to make an informed decision regarding the land acquisition from The Department of Public Works (DOPW), the registered owner of the property. The feasibility study has been concluded.

The Department of Public Works, as custodians of the relevant portions of land, has been engaged in order to start the necessary procedures that would lead to the transfer of the subject properties into the name of Stellenbosch Municipality, for housing purposes.

Several letters were submitted to the National Department of Public Works, requesting the transfer of the land to Stellenbosch Municipality. The municipality is currently awaiting feedback from the National Department of Public Works.

j) De Novo

The De Novo site is located within the Stellenbosch Municipal area and falls under the jurisdiction of this local municipality. The site is located approximately 14.5km from Stellenbosch, 11km from Klapmuts and 2.3km from the existing Bloekombos residential area in Cape Town.

The Provincial Department of Human Settlements (PDoHS) are the custodian / implementers of this project.

A Project Steering Committee (PSC) has been created, consisting of residents, whom represent the interests of the De Novo community about the De Novo Human Settlement Project. The residents residing on the site are renting these residential structures from the Department of Transport and Public Works (WC), and this department is responsible for the maintenance of these structures at present.

A few older dilapidated buildings are located at the centre of the De Novo site, that appears to be illegally occupied. These buildings and their residents will require a detailed investigation to be effectively addressed. It is proposed that the inhabitants of these dilapidated buildings should be registered on the Stellenbosch Municipal Housing Demand List and then be accommodated in future municipal human settlement projects.

During October 2017 the Stellenbosch Municipality undertook a survey of the residents located on De Novo. The following is the results of this survey, namely:

- Total population residing on De Novo was 501 individuals as of October 2017;
- 312 people were residing in the 77 formal rental houses on site; and
- 189 people were residing in backyards or in the dilapidated old hospital building on site.

Figure 3:29: Locality plan, De Novo

The Provincial Department of Human Settlements appointed a professional service provider and a Project Initiation Document (PID) was submitted for PDoHS for approval. A draft Project Feasibility Report (PFR) was submitted to PDoHS for approval in November 2019 and is currently being reviewed by Stellenbosch Municipality for approval and sign-off.

The original project programme planned to have all development rights in place for the De Novo Project by end of August 2020. Due to the COVID-19 Pandemic and the delays caused by the National Lockdown the project end date can no longer be August 2020. Delays of approximately six months have been experienced meaning that a conservative estimated project completion date will be March 2021.

The following mentioned projects were in pre-planning phase during 2019/20 financial year:

k) Social Housing (rental initiatives)

Stellenbosch Municipality, was identified by the Western Cape Provincial Administration as one of "Leader Towns" in the Province that have the requisite constituents to partake in the Social Housing Programme. Consequent to this, the municipality adopted an Affordable Rental Housing Strategy and Plan in 2016. The municipality also underwent a rigorous process of identifying and approving Restructuring Zones for the development of Social Housing. Stellenbosch Restructuring Zone areas were subsequently endorsed by the National Housing Ministry and have been published as such in the Government Gazette dated 27 April 2017 (No. 40815).

Council commenced with a process of granting long-term use rights to qualifying accredited entities (SHIs and / or ODAs) on land identified and approved for the purpose of developing Social Housing estates.

In principle a Land Availability Agreements (long-term use rights) will be entered into with Social Housing Institutions (SHIs) and / or Other Development Agencies (ODAs), subject to certain conditions.

Against this background, Stellenbosch Municipality is desirous to commence with a project that could address the housing needs of residents that reside primarily in the backyards of privately owned properties.

Council approved the first Social Housing Initiative to commence on Erf 81/2 and Erf 81/9 (this specific site is illustrated with a circle in the figure below) and the development must be sensitive to the general built and landscaping vernacular of the Stellenbosch area.

Figure 3:30: Locality plan

The Department: Housing Development is in progress with feasibility studies for the following projects:

I) Adam Tas Corridor

Adam Tas Corridor which includes proposed projects such as the development of the Droë Dyke precinct, the Adam Tas precinct and the Northern Extension.

The Adam Tas Corridor focusses on the development of a mix of uses where buildings and services cater to the pedestrian accessing the area via alternate modes of transportation. This type of development typically incorporates compact development and dense activity centres within easy walking distance of transit stops and generally includes a mix of residential, employment and shopping opportunities designed for transit riders, cyclists, and pedestrians.

Figure 3:31: Adam Tas Corridor concept as approved per Spatial Development Framework by Council on 11 November 2019

Specific areas identified for this development include the Stellenbosch and Du Toit Rail Stations, PRASA land holdings along the R44 corridor, George Blake Road, the Van der Stel Sports Complex, the Bergzicht Taxi Rank and Informal Traders Area and Open Space parcels around R44 / Adam Tas Road.

The Spatial Planning Department will advertise for a professional team to compile a local spatial development framework.

m) Farm 34, Vaaldraai, Elsenburg

In May 2019, Council resolved that a feasibility study must be undertaken for farm 34, Vaaldraai currently managed by Provincial Government. The study was requested to determine how developable land is, before a final decision is made to transferring the land Stellenbosch Municipality to manage.

During August 2019, a site inspection was done in order to prepare specification to appoint a service provider. The extent of the property in collaboration with Provincial Department of Public Works (PDoPW) is paramount for an accurate feasibility study.

The tender was awarded and the service provider concluded the brief. A feasibility study was submitted to Council for approval on 24 April 2020. Further discussions with Provincial Department of Public Works will now commence, given the fact that the said area is outside the urban edge.

Figure 3:32: Locality plan, Farm 34, Vaaldraai- Elsenburg

Construction

In terms of the approved organogram, the Department: Project Management Unit under the Directorate: Infrastructure Services is responsible for all installation of services and the building of top structures for Municipal Housing projects.

In accordance with the approved Housing Pipeline, the following projects for the 2019/20 financial year have commenced as follows:

a) Ida's Valley Housing Project

Ida's Valley is a well-established traditional community and has been protected as a heritage site since 1976. During 1980, Council developed 'treintjiesdorp' in Newman Street for the poor community of Ida's Valley. Thereafter the development of Lindida was implemented to make provision for the middle income families in Ida's Valley. This development started in 1990 whereby families had an opportunity to buy properties in the Garden Cities development.

The municipality has tried for the past 25 years to get a new project started in Ida's Valley. The municipality went to tender in 2009 with an idea to create a development that will offer a range of housing options from subsidy to affordable housing, and which will be aesthetically pleasing.

Figure 3:33: Figure 17: Work in progress on Erf 11330, Ida's Valley with the construction of GAP houses.

The civil infrastructure for Erf 11330 also known as Hillside Village was completed in September 2019. This includes civil engineering services for 89 subsidy units as well as for the apartment site, bulk earthworks and storm water mitigation across the site, removal of all unsuitable material and resultant remedial action and the installation of retaining walls.

Another challenge was, during the construction phase of the GAP and subsidy housing, the COVID-19 pandemic brought all construction work to a halt for 2 months, thereby extending the anticipated construction period.

The marketing of the bonded houses commenced in January 2019 and 110 units on Hillside Village have been sold.

The construction of 113 affordable houses are at an advance stage and will be handed over to the successful buyers when completed.

The subsidy houses commenced in November 2019, and the first units will be handed over to the qualifying beneficiaries in September 2020. Eighty-seven (87) units should be completed and handed over before the December 2020 Builders Holiday.

b) Erf 2181, Klampmuts (Upgrading of Mandela City, Klampmuts)

The Mandela City informal settlement is situated on Erf 2181, Klampmuts. Mandela City informal settlement consisted of approximately 500 informal structures on commencement of the project.

Figure 3:34: Site layout plan Erf 2181, Klampmuts (Upgrading of Mandela City, Klampmuts)

A service provider was appointed for the installation of services via a competitive bidding process. The construction of 20m² housing units constructed by means of Alternative Building Technology (ABT) were conducted by an appointed service provider

The project is being implemented in three phases as per approved site development plan. The first phase of the development has been completed.

It must be noted that the Mandela City project is an in-situ upgrade which requires households to be relocated in order to create space for construction.

Table 3:21: Construction progress

| Area | Yield | Completed | Remaining |
|--------------|------------|------------|------------|
| Phase 1 | 197 | 183 | 14 |
| Phase 2 | 187 | 38 | 149 |
| Total | 384 | 221 | 163 |

The contractors are currently on site, constructing 76 units in phase 2.

Delays

The project has been affected by several major delays. The completion of the project is currently delayed by 7 months and can be attributed to the following:

(i) Community related delays

The Mandela City community has expressed discontent with the initial designs for phase 1. The municipality had extensive engagements with the community and amended the designs to suit the beneficiaries' needs. The process of amending the designs and obtaining the community buy-in caused delays on construction progress.

(ii) Contractor Repudiation / Non-performance

A service provider was appointed for the construction of the ABT housing units. At the commencement of phase 2, the service provider requested a price increase which was deemed to be unreasonable by the municipality. Subsequent to several negotiations, the municipality and the service provider could not reach consensus on the price increase.

Another service provider was then appointed to complete the ABT housing units in phase 2. The re-appointment of another service provider caused major delays on progress.

(iii) National Lockdown due to COVID-19

The project was further delayed due to the National Lockdown to prevent the spread of COVID-19. The contractors were unable to work for approximately two months.

Challenges

The construction area is currently occupied by informal structures. The installation of services in Mandela City is dependent on the relocation of these informal structures in order to create space for construction. There are no available land parcels, at this stage that can be used as temporary relocation areas. This also adds to the delays on progress.

3.8.7.2 Title Deeds

Faire Donne Estate, Franschhoek

In accordance with a Council decision, the municipality embarked on a marketing strategy for the Medium Cost Housing development.

Herewith below an extract of the approved Council Resolution:

"(b) that the new proposed criteria outlined below, be approved;

- (i) potential beneficiaries must reside or work in the Franschhoek Valley or be in the service of Stellenbosch Municipality for at least for 3 years;*
- (ii) preferential treatment will be given to First Time Home Owners;*
- (iii) preferential treatment will begin to previously disadvantaged individuals in the allocation process, if they qualify in terms of 3.3.1; and*
- (iv) should the need (people who qualify) outweigh the demand, then the criteria listed above will be*

converted into a point system in determining the final list of qualifying beneficiary."

Thereafter, the Department: Housing Development received a number of 136 applications of which only 50 vacant plots were available. In accordance with the Sales Agreements, the potential beneficiary has two (2) months to secure the necessary funding.

Table 3:22: Title Deeds status as at 30 June 2020

| | |
|---|----|
| Total erven re-allocated (round 1, 2 and 3) | 48 |
| Vacant properties | 8 |
| Total erven | 56 |

3.8.7.3 Informal Settlements

The Department: Informal Settlements is tasked with the monitoring of informal settlements in general, and obtaining demographic information of informal settlement and backyard dwellers and maintaining data registers of these groups by applying data management practices.

The Department: Informal Settlements also has vital role to play in community facilitation and to administer programmes and projects that has a direct bearing on the informal settlement inhabitants. This interaction can be expressed in figure below.

Figure 3:35: Informal Settlements value chain

Access to Basic Services Programme (ABS)

The Department: Informal Settlements ensures that all the informal settlements have access to basic services i.e. water, sanitation and where possible electricity. The Department undertakes regular site visits to the various informal settlements in order to report the relevant Departments on the status of the respective services. It is imperative to the Department that a level of service is maintained that either meets the national criteria or is quite close to the national criteria.

Emergencies

The Department: Informal Settlements assists the Department Disaster Management in emergencies by verifying the data that is collected about the victims of the emergency. These emergencies are usually fire incidents in the informal settlements or flooding incidents and excessively strong winds.

Table 3:23: Disaster relief provided

| Fires reported in | Number of fires / flooding incidents verified | Number of informal new structures affected by fire (including backyard) | Number of formal structures affected by fire (Brick) | Number of structure affected by flooding | Performance comment |
|---|---|---|--|--|---|
| Formal settlements | 11 | 13 | 11 | 0 | All verifications completed within 48 hours |
| Informal settlements | 13 | 53 | 0 | 28 | All verifications completed within 48 hours |
| Total number of structures impacted by fires / flooding | 24 | 66 | 11 | 28 | 129 |

Demographic Surveys

The Department: Informal Settlements undertake regular surveys of the various informal settlements as well as backyard dwellers in order to update and maintain a demographic register and profile. The register is quarterly submitted to the Directorate: Financial Services.

Figure 3:36: Demographic survey being conducted

Upgrading Projects

The Department: Informal Settlements has is involved in all upgrading projects in informal settlements. The Department plays a role in community facilitation and to administer programmes and projects that has a direct bearing on the informal settlement inhabitants.

Table 3:24: Total properties registered at deeds office (during 2019/20)

| Total properties registered at deeds office (during 2019/20) | |
|--|----|
| Historical project title deeds registered | 50 |
| New project title deeds registered* | 15 |
| Beneficiaries that could not secure the necessary funding | 15 |
| Total erven | 65 |

* Funding for the title deeds was provided through the Title Deed Restoration Programme. It is only given for houses of subsidies approved.

3.8.7.4 Capital Expenditure – New Housing

Table 3:25: Capital Expenditure as at 30 June: New Housing

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Kayamandi Town Centre - Civil Infrastructure | 1 960 000 | 665 571 | -66.04% |
| Jamestown: Housing | 600 000 | 23 000 | -96.17% |
| Langrug Dam | 500 000 | - | -100% |
| Cloetesville IRDP Planning | 260 000 | - | -100% |
| Northern Extension: Feasibility | 200 000 | - | -100% |
| Only the 5 largest capital projects are listed | | | |

New Housing spent, **23%** of the capital budget for the financial year.

3.8.7.5 Total employees – New Housing

Table 3:26: New Housing Employee Totals

| Job Level* | Posts* | Employees* | Vacancies (fulltime equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 0 | 1 | 3.12% |
| 15 – 13 | 2 | 1 | 1 | 3.12% |
| 12 – 10 | 10 | 7 | 3 | 6.25% |
| 9 – 7 | 3 | 0 | 3 | 6.25% |
| 6 – 4 | 16 | 14 | 2 | 3.12% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 32 | 22 | 10 | 21.1% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.8.7.6 Housing statistics

Table 3:27: Households with Access to Basic Housing

| Year | Total households (including formal and informal settlements) | Households in formal settlements | Percentage of households in formal settlements |
|---------|--|----------------------------------|--|
| 2013/14 | 43 420 | 24 554 | 65.3% |
| 2014/15 | 46 003 | 15 000 | 32 % |
| 2015/16 | 49 904 | 16 112 | 37 % |
| 2016/17 | 37 554 | 24 554 | 65.3% |
| 2017/18 | 52 374* | 26 506 | 50.60% |
| 2018/19 | 52 374* | 34 071 | 65.1% |
| 2019/20 | 52 374* | 34 071 | 65.1% |

*Data obtained from STATSA

The following table shows the **Increase** in the number of people on the housing waiting list. There are currently approximately **16 590** applicants on the waiting list.

Table 3:28: Housing waiting list as at 30 June

| Year | No. of people on Housing waiting list | % Housing waiting list increase |
|---------|---------------------------------------|--|
| 2014/15 | 18 833 | 0.6% (Decrease due to sanitisation of the waiting list data). |
| 2015/16 | 18 791 | 0.2% (Decrease due to sanitation of the waiting list data). |
| 2016/17 | 18 953 | 7.7% (Increase based on the previous year's "sanitised" figures. This is as a result of new applications received). |
| 2017/18 | 16 482 | 13.04% (Decrease due to sanitisation of the waiting list data). |
| 2018/19 | 16 231 | The Department rolled out an updating of the waiting list programme which resulted in all the deceased applicants being removed and duplicate applications removed and this has resulted in the decrease of the total number of active applicants on the waiting list. |
| 2019/20 | 16 590 | 2.21% (Increase due to new applications received). |

3.8.7.7 Housing Administration

Transfer of housing stock

During the period under review the municipality continued with the process to deal with historic backlog and transfer properties to beneficiaries of state subsidised houses. A process action plan was devised in terms of which administrative procedures would be streamlined. Panel attorneys were appointed to transfer the properties identified. A total of 109 title deeds were transferred for the period of the financial year. The transfers were in the following areas:

Table 3:29: Transfer of housing stock

| Area | Total |
|--------------|------------|
| Cloetesville | 2 |
| Kayamandi | 73 |
| Franschhoek | 2 |
| Klapmuts | 10 |
| Kylemore | 6 |
| Pniel | 16 |
| Total | 109 |

The municipality partnered with an NGO called Free Market Foundation which assists municipalities to deal with the historic backlog in terms of transfer of properties. The NGO provides funding for the temporary appointment of staff to enhance capacity and also provides funding to the municipality of R500 per title deed registered.

3.8.7.8 Waiting list administration

The municipality continues with the “data-cleaning” process pertaining to applications that appear on the waiting list where vital information is outstanding. The area-based approach which was used where staff members went out to the various areas and invited applicants to workshops during the course of which the applicant’s information was updated. The whole of Stellenbosch Municipal Area was covered during this programme of the updating of the housing demand database.

The agreement with the Western Cape Department of Human Settlements to assist with the data clean-up of the Stellenbosch Municipal Waiting list continues. The waiting list is being updated and verified on a regular basis by the Western Cape Department of Human Settlements to ensure that the number of people deemed to be on a “waiting status” are a true reflection of those persons who still require housing assistance within the Greater Stellenbosch Area.

There are a total of **16 590** applicants in the system, there is an increase due to new application received and captured on the system.

The municipality continues to make use of the online housing demand database system which has a mobile app so that people can be able to submit applications via their smartphones in the comfort of their own homes. This new online database system and the mobile app was launched in August 2019. The App makes it easier for applicants to use their smartphones to submit applications to be placed on the Housing Demand Database and the Housing Demand Database System is being updated regularly to ensure that Council has credible data for planning for future housing projects to be implemented.

Administration of public rental stock

On 25th June 2014, Council adopted a Policy for the Administration of Public Rental Stock. This document was the culmination of collaboration between stakeholder departments within the municipality. The purpose of the policy is to ensure effective management of well-maintained assets that will improve the quality of life for residents. The Department is currently busy with the review of the Human Settlements Administration and Allocation Policy which will include the allocation and management of the Public Rental Stock and will be adopted in 2020/21 financial year by Council after due public participation processes have been completed to solicit comments from the public.

Housing consumer education (HCE)

A total of thirteen (13) workshops were held with mainly tenants in our rental stock. The HCE workshops are also used to address issues around anti-social behaviour in the public rental flats. HCE programmes were also held for beneficiaries of houses that were built between 1994 and 2010. These are houses that form part of the Title Deeds Restoration Programme. These beneficiaries are advised about security of tenure, issues of inheritance and drafting of a Will. HCE workshops were also held with beneficiaries of the Ida’s Valley Housing Project to educate them about homeownership, writing of a Will and By-laws governing properties.

Job Creation

Housing Administration started the roll out of a job creation programme via the EPWP project. The

purpose of the project is:

Creation of 47 job opportunities:

- 18 EPWP workers appointed to assist with cleaning of the rental units and this resulted in the decrease in complaints received from tenants as our grounds are in a neater state;
- 26 temporary field Workers were also appointed to assist with the transfer of state subsidised houses and to eradicate the historic backlog in terms of transfer of these houses. The Field Workers assisted with beneficiary verification processes and occupancy verification due to the fact that the properties that we are currently busy transferring are historic and have many issues which some of these is missing beneficiaries and deceased estates; and
- 3 Registration clerks were also appointed to assist with electronic filling of all documentation in the department.

3.8.7.9 Total employees – Housing Administration

Table 3:30: Employee totals: Housing Administration

| Job Level | Posts | Employees | Vacancies (fulltime equivalents) | Vacancies (as a % of total posts) |
|--------------|----------|-----------|----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 0 | 1 | 14.28% |
| 15 – 13 | 2 | 1 | 1 | 14.28% |
| 12 – 10 | 3 | 0 | 3 | 42.85% |
| 9 – 7 | 0 | 0 | 0 | 0% |
| 6 – 4 | 1 | 1 | 0 | 0% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 7 | 2 | 5 | 71.42% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.8.7.10 Total employees – Informal Settlements

Table 3:31: Employee totals: Informal Human Settlements

| Job Level* | Posts* | Employees* | Vacancies (fulltime equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 0 | 1 | 5.26% |
| 15 – 13 | 1 | 1 | 0 | 0% |
| 12 – 10 | 7 | 0 | 7 | 36.84% |
| 9 – 7 | 9 | 6 | 3 | 15.78% |
| 6 – 4 | 1 | 1 | 0 | 0% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 19 | 8 | 11 | 57.89% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.8.8 PROPERTY MANAGEMENT

This Department is responsible for the management of municipal-owned land and buildings, i.e. acquisition, awarding of rights and disposal thereof, excluding any housing rental stock and housing projects. The management of office accommodation is also done by this department.

During the course of this financial year this Department was instrumental in facilitating the following transactions:

- Disposal of Erf 718, Kayamandi to the Provincial Government for the purposes of extending the clinic;
- Exchange of land, i.e offering of alternative site (Erf 523 to the Seventh Day Adventist Church in Kayamandi in exchange for erf 718, to enable the above transaction;
- Disposal of erf 111 Kayamandi to the United Reform Church of South Africa;
- Renewal of various Lease Agreements;
- Acquisition NPK Building; and
- Acquisition of Erf 9194, Technopark.

3.8.8.1 Facilities Management – Property Management

This Department is also responsible for the maintenance of all Council-owned buildings and the construction / project management of all upgrading and or new facilities. Some of the highlights of the past financial year include the following:

- Completion of phase two of Cloetesville Flats (multi-year project valued at R10.8m);
- Upgrade of La Motte Community Hall;
- The planning phase of the following projects were finalised or started with:
 - New public ablution facilities in Franschhoek;
 - New sport Clubhouse in La Motte;
 - Upgrade of Cloetesville Hall;
 - Upgrade of Stellenbosch Townhall;
 - Hard and Soft landscaping at Klappmuts MPC;

- Redevelopment of ex Kleine Libertas precinct;
- Upgrade of Traffic offices; and
- Upgrade / conversion of residential unit into office space in Simonsberg weg / Stellenbosch.

Table 3:32: Service Data Statistics – Property Management

| Details | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|-----------------------------------|---------|---------|---------|---------|---------|
| Encroachment Agreements: New | 23 | 22 | 16 | 2 | 0 |
| Encroachment Agreements: Renewals | 7 | 5 | 0 | 0 | 0 |
| Lease Agreements: New | 4 | 1 | 0 | 1 | 1 |
| Lease Agreements: Renewals | - | 2 | 2 | 0 | 1 |
| Sales Agreements | 2 | 3 | 0 | 0 | 3 |
| Servitudes | 29 | - | 0 | 5 | 2 |
| Poster applications | 81 | 30 | 25 | 35 | 8 |

3.8.8.2 Capital Expenditure – Property Management

Table 3:33: Capital Expenditure as at 30 June: Property Management

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Purchasing of land | 112 750 000 | 66 320 561 | -41.18% |
| La Motte Clubhouse | 3 200 000 | 948 960 | -70.35% |
| Flats: Interior Upgrading | 3 000 000 | 2 936 683 | -2.11% |
| Upgrading Fencing | 1 748 730 | 1 330 670 | -23.91% |
| Structural Upgrading: Community Hall La Motte | 1 700 000 | 1 487 160 | -12.52% |
| Only the 5 largest capital projects are listed | | | |

Property Management have spent, **57.48%** of the capital budget for the financial year.

3.8.8.3 Total employees – Property Management

Table 3:34: Employee Totals: Property Management

| Job Level* | Posts* | Employees* | Vacancies (fulltime equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 2 | 0 | 2 | 7.47% |
| 12 – 10 | 10 | 6 | 4 | 14.81% |
| 9 – 7 | 0 | 0 | 0 | 0% |
| 6 – 4 | 14 | 10 | 4 | 14.81% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 27 | 17 | 10 | 37.03% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.8.9 FREE BASIC SERVICES AND INDIGENT SUPPORT

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total indigent households exclude all informal households and include formal households that have been registered as indigent households. The total i.t.o. free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. It also does not include the totals where the electricity distribution is conducted by ESKOM. In accordance with the approved indigent policy of the municipality, all households earning less than R6 500 per month will receive the free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

3.8.9.1 Access to Free Basic Services

Table 3:35: Access to Free Basic Services

| Year | Number of Households | | | | | | | | |
|---|----------------------|------------------|-------|-----------------------|-------|------------------------|-------|---------------------------|-------|
| | Total no. of HH | Free Basic Water | | Free Basic Sanitation | | Free Basic Electricity | | Free Basic Refuse Removal | |
| | | Access | % | Access | % | Access | % | Access | % |
| 2013/14 | 33 974* | 5 095* | 26.20 | 5 117* | 26.20 | 5 117* | 12.07 | 5 095* | 26.20 |
| 2014/15 | 43 420* | 5 757 | 13.26 | 5 757 | 13.26 | 5 757 | 13.26 | 5 757 | 13.26 |
| 2015/16 | 48 008 | 6 486 | 13.51 | 6 486 | 13.51 | 7 042 | 14.66 | 6 486 | 13.51 |
| 2016/17 | 48 008# | 5 686 | 11.84 | 5 686 | 11.84 | 3 801 | 7.92 | 5 686 | 11.84 |
| 2017/18 | 52 374 | 6 453 | 12.32 | 6 453 | 12.32 | 6 453 | 12.32 | 6 453 | 12.32 |
| 2018/19 | 52 374* | 6 813 | 13.01 | 6 813 | 13.01 | 4 833 | 9.23 | 6 813 | 13.01 |
| 2019/20 | 52 374 | 7 012 | 13.38 | 7 012 | 13.38 | 4 932** | 9.42 | 7 012 | 13.38 |
| *Average for the year | | | | | | | | | |
| # Calculations made for households earning less than R 6 000 per month during 2018/19 | | | | | | | | | |
| **Refer to formal Indigent consumers who claimed free basic units, excluding Eskom | | | | | | | | | |

The percentage is based on indigent household access compared to a total of 52 374 households.

Services subsidised are:

- Water - basic charge + 6 kl
- Electricity - basic charge + 100 kWh;
- Sanitation - based on a 250m² erf; and
- Refuse - one removal per week.

Free Basic Services per basic service

The access to free basic services is summarised into the different services as specified in the following table:

Table 3:36: Free basic Electricity Services to Indigent Households

| Electricity | | | |
|--|---------------------|-------------------|-------------|
| Financial year | Indigent Households | | |
| | No. of HH | Unit per HH (kwh) | Value R'000 |
| 2013/14 | 5 117* | 60 | 2 759 |
| 2014/15 | 5 757 | 60 | 3 218 |
| 2015/16 | 7 042 | 60 | 3 818 |

3.9 COMPONENT A: ROADS AND TRANSPORT

This component includes: roads, transport, traffic engineering and waste water (storm water drainage).

3.9.1 ROADS

This component includes: roads, transport, traffic engineering and waste water (storm water drainage).

a) Transportation Planning and Traffic Engineering

The main road networks through Stellenbosch currently operates at capacity and at times beyond capacity, resulting in traffic congestion.

Analysis on the road networks and assessments of the public transport operations and facilities are periodically carried out to identify shortcomings and opportunities for improvements.

Through the compilation of the Draft Road Master Plan, analysis of the road networks was carried out (2019), shortcomings were identified and options for improvements to the road network is proposed.

The 2019/20 update of the Comprehensive Integrated Transport Plan (CITP updated every year and reviewed every five years) focused on better defining the Strategic Transport Framework for Stellenbosch, namely; towards car free living, promoting sustainable transport travel demand management, infrastructure and operational enhancements and optimal land use. International case studies of similar University towns were carried out. Bus and Taxi operations were analysed and assessed and recommendations has been made for improvements to public transport systems.

Traffic congestion remains a major challenge on main road intersections within Stellenbosch. To assist with the alleviation of congestion, Stellenbosch Municipality, in collaboration with Stellenbosch University, had commenced with research to develop and establish a real-time traffic control system for Stellenbosch. The research project will assist in addressing everyday congestion through the application of Smart Transportation technology namely Traffic-Adaptive-Signal-Control (TASC). TASC refers to the real-time control of signalised intersections and enables the real-time adjustment of traffic signal timing in order to increase vehicle flows through intersection and reduce congestion.

b) Road Construction and Intersection Upgrades

To improve traffic flow and increase traffic safety at intersections within Stellenbosch, numerous intersections were upgraded by the municipality through the intersection improvement programme that had commenced about 8 years ago.

The following has been completed in the 2019/20 financial year:

- Upgrading of the R44 and Trumali Street intersection including the construction of additional turning lanes on the R44 and widening of Trumali Street;
- The following Roads and Intersection upgrades are at construction phase;
- Upgrading of Technopark Access Road;
- Upgrading of Technopark Intersection with R44;
- The following Roads and Intersection Upgrades are currently at planning and design phase;
- Upgrading of R44 / Helshoogte;
- Safety improvements at R45 / Le Roux Street; and

- Modification of R44 / Paradyskloof and extension of Skuilplaats Road.

c) Gravel Road Upgrading

The municipality had previously commenced with a gravel Road Upgrading Programme where gravel roads in the municipality's residential settlements are being upgraded to permanent asphalt standards. In the previous financial year Roads were upgraded in Kylemore, Pniel and Klapmuts. During 2019/20 financial year, the municipality has completed the upgrading of the following roads in Wemmershoek and La Motte.

Wemmershoek:

Prins Afrika; Wilger; Sonneblom; Adahlia; Leeubekkie; Skool; Gousblom; Lelie; Jakaranda; Petunia; Protea; Vygie; Angelier.

Lamotte:

Akkerhout North; Akkerhout South; Geelhout; Olienhout; Ysterhout.

d) NMT

During the 2019/20 financial year, sidewalks have been constructed in the following areas, namely Stellenbosch CDB and Noordwal Oos Street, Paradyskloof, Ida's valley and Onderpapagaai Berg. In line with our NMT Master Plan, NMT Infrastructure is annually rolled out and implemented to ensure continues expansion of the NMT Network.

e) Public Transport

Planning and Design and procurement processes are underway for a new Taxi Rank in Groendal (Franschhoek). Planning and Designs and procurement processes are underway for the installation of top structures at Klapmuts Taxi Rank and Kayamandi Taxi Rank. Improvements were also made at the Kayamandi Long Distance Taxi Stop.

f) Storm Water

The municipality's Storm Water Master Plan was updated in the 2018/2019 financial year. Improvements as identified in the Master Plan are implemented annually, and the system is periodically maintained to ensure preparedness for the winter season.

g) Bridges

Planning for the priority rehabilitation interventions are proposed for the existing bridge on Distillery Road in Stellenbosch is in process. The Distillery Road Bridge is the only access road into Bosman's Crossing, a small mixed development area within Stellenbosch comprising of various commercial developments and apartment complexes.

Planning and design are in process for the designs of a pedestrian bridge that would link Kayamandi with Cloetesville. The proposed bridge would create a safe passage for pedestrians between the two communities, crossing the R304, the railway line and the Plankenbrug River.

Planning and designs have been completed for the Lanquedoc Access Road and Bridge with implementation scheduled for the short term. It is proposed that the existing bridge be retained and will

function as a NMT facility, a new vehicular bridge will be constructed adjacent to the existing bridge, with the access road being aligned to tie-into the new bridge.

3.9.1.1 Roads Statistics

The following tables give an overview of the total kilometres of roads maintained and new roads tarred:

Table 3:40: Tarred (Asphalted) Roads

| Financial year | Total km tarred roads | Km of new tar and paved roads | Km existing tar roads re-tarred | Km existing tar roads re-sheeted | Km tar roads maintained |
|----------------|-----------------------|-------------------------------|---------------------------------|----------------------------------|-------------------------|
| 2012/13 | 328 | 0 | 9 | 0 | 319* |
| 2013/14 | 328 | 8 | 14 | 0 | 322* |
| 2014/15 | 336 | 2 | 18 | 0 | 320* |
| 2015/16 | 337 | 2 | 10 | 0 | 325* |
| 2016/17 | 341 | 3 | 10 | 0 | 328* |
| 2017/18 | 345 | 1 | 12 | 0 | 332* |
| 2018/19 | 347 | 2 | 7 | 0 | 338* |
| 2019/20 | 349 | 1 | 5 | 0 | 343* |

*Note: * Total network maintained, maintenance carried out where required*

Table 3:41: Gravelled Roads

| Financial year | Total km gravel roads | Km new gravel roads constructed | Km gravel roads upgraded to tar / block paving | Km gravel roads graded / maintained |
|----------------|-----------------------|---------------------------------|--|-------------------------------------|
| 2012/13 | 30 | 0 | 0 | 30 |
| 2013/14 | 30 | 0 | 0 | 30 |
| 2014/15 | 30 | 0 | 1.5 | 28.5 |
| 2015/16 | 21.5 | 0 | 1.8 | 20 |
| 2016/17 | 19.7 | 0 | 1.2 | 18.5 |
| 2017/18 | 18.5 | 0 | 1 | 17 |
| 2018/19 | 17 | 0 | 2.5 | 14 |
| 2019/20 | 14 | 0 | 4 | 9 |

3.9.1.2 Capital expenditure: Roads and Storm Water

Table 3:42: Capital Expenditure as at 30 June: Roads and Storm water

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|---|-------------------|--------------------|---------------------------------|
| | R | | |
| Adhoc Reconstruction of Roads (WC024) | 8 370 906 | 7 754 256 | -7.37% |
| Upgrade Gravel Roads - Lamotte & Franschoek | 7 819 993 | 8 341 818 | 6.67% |
| Technopark Access Road | 7 267 651 | 8 473 911 | 16.60% |
| R44 Access Upgrades | 5 000 000 | 4 999 811 | 0.00% |
| Specialised Vehicle | 2 878 321 | 865 098 | -69.94% |

Only the 5 largest capital projects are listed

Roads and Storm water spent **97.03%** of the capital budget for the financial year.

3.9.1.3 Storm Water Infrastructure

The table below shows the total kilometres of storm water infrastructure maintained and upgraded as well as the kilometres of new storm water pipes installed:

Table 3:43: Storm water Infrastructure

| Financial year | Total km storm water infrastructure | Km new storm-water infrastructure | Km storm water infrastructure upgraded | Km storm water infrastructure maintained |
|-------------------------------------|-------------------------------------|-----------------------------------|--|--|
| 2013/14 | 128.1 | 6.1 | 0.01 | 128.1 |
| 2014/15 | 134.2 | 0 | 0 | 134.2 |
| 2015/16 | 134.2 | 2 | 0 | 136.2 |
| 2016/17 | 136.2 | 1 | 0 | 136.2 |
| 2017/18 | 137.2 | 0 | 0 | 137.2 |
| 2018/19 | 296* | 1 | 0 | 296 |
| 2019/20 | 297 | 1 | 0 | 297 |
| *km increase following reassessment | | | | |

3.9.1.4 Total employees – Roads and Storm water

Table 3:44: Total Employees – Roads and Storm water

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|---|------------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 9 | 7 | 2 | 0.63% |
| 12 – 10 | 26 | 14 | 12 | 7.54% |
| 9 – 7 | 15 | 12 | 3 | 1.88% |
| 6 – 4 | 108 | 70 | 38 | 23.89% |
| 3 – 0 | 0 | 12 | 0 | 0% |
| Total | 159 | 104 | 55 | 33.94% |
| * Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings. | | | | |

3.9.2 DEVELOPMENT SERVICES AND PROJECT MANAGEMENT DEVELOPMENT SERVICES, ASSET MANAGEMENT AND SYSTEMS AND PROJECT MANAGEMENT UNIT (PMU)

The Development Services, Asset Management and Systems and Project Management Unit (PMU) is the newly established department responsible for Technical Information Management, Asset Management, Wayleave Management, Development Services and Project / Programme Management in the Infrastructure Services Directorate.

With the appointment of the *Senior Manager: Development Services, Asset Management and Systems and Project Management Unit (PMU)* – which took place in 2018/19 financial year – both the Infrastructure Asset Management and PMU Office were established in July 2019.

3.9.2.1 Project Management Unit (PMU)

Though the *Manager: Infrastructure Asset Management and Systems* post is still vacant, the *Manager: PMU* was occupied in July 2019 together with four dedicated project managers. Over the 2019/20 financial year, the PMU managed a capital expenditure budget of R30.5M. Their 2020/21 capital expenditure budget is forecast at R29.2M. The PMU is also responsible for the administration of the newly established Integrated Urban Development Grant.

In April 2016 cabinet adopted the Integrated Urban Development Framework (IUDF) as the official national urban policy of government under the custodianship of the Department of Cooperative Governance (CoGTA). The IUDF marks a new deal for South Africa's cities and towns. It sets a policy framework to guide the development of inclusive, resilient and liveable urban settlements while addressing the unique conditions and challenges facing South Africa's cities and towns. The key outcome of the IUDF is spatial transformation and to create a growth model of compact, connected and coordinated cities and towns.

Within the IUDF the Intermediate City Municipality (ICM) programme, targeting 39 municipalities, support is provided for the municipalities in the middle size and density range of the continuum. The purpose of the ICMs support strategy is to help translate IUDF policy into practical programmes of action in the ICMs. Stellenbosch Municipality qualified for the 2019/20 Integrated Urban Development Grant (IUDG) and Intermediate City Municipality (ICM) programme in terms of which the municipality achieved 100% IUDG expenditure in the first year of the Integrated Development Grant's existence.

3.9.2.2 Asset Management and Systems

Infrastructure impacts the quality of the living environment and opportunities to prosper. The municipality is required to be effective at a strategic, tactical and operational level. The manner in which the municipality discharges its responsibilities as a public entity is also important. It is required to demonstrate sound stewardship over the significant inter-generational investment made in infrastructure and custodianship to care for current users appropriately. The processes adopted must be efficient, sustainable, and effectively communicated to internal and external stakeholders.

Key themes of national legislation relating to municipal infrastructure management include:

- Long-term sustainability and risk management;
- Service delivery efficiency and improvement;
- Performance monitoring and accountability;
- Community interaction and transparent processes;
- Priority development of minimum basic services for all; and
- The provision of financial support from central government in addressing the needs of the poor.
- Maximising municipal infrastructure management supports the current Strategic Focus Areas as well. Foremost is in Strategic Focus Area 5: Good Governance and Compliance. As the 13th largest economy nationally, the greater Stellenbosch area and the municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where, and whose benefit it is the difficult task that infrastructure asset management addresses. Enhanced infrastructure capabilities also augment the achievement of the other four Strategic Focus Areas, i.e. 1: Valley of Possibility, 2: Green and Sustainable Valley, 3: Safe Valley and 4: Dignified Living.

In support of these objectives, the Cape Winelands District Municipality appointed Aurecon to perform Asset Management Maturity Assessments for its seven Local Municipalities. The kick-off meeting for Stellenbosch Municipality was held on 12 November 2019 and 36 Interviews with management (across

all Directorates) were subsequently completed in January and February 2020. The report was delayed by the National Lockdown and a draft Stellenbosch Municipality Asset Management Maturity Assessment report was received in June 2020. The report detailed six improvement projects recommended for implementation over the next three years. The report is due to be tabled at Director's meeting in the 2020/21 financial year.

Wayleave Management also falls under this section. The collective value of services infrastructure contained within the Public Road Reserve and the road itself amounts to a considerable value. This infrastructure needs to be maintained, periodically rehabilitated and replaced from time to time. Such activities can result in considerable delays, inconvenience, danger and additional costs to the road users and municipality itself if not well planned and coordinated. This activity is coordinated through the wayleave management function. Unfortunately, most of the posts in this function are vacant. This function is performed by staff seconded partially or entirely from within the Department. The monthly and annual applications are summarised in the Wayleave Applications table below.

Table 3:45: Wayleave Applications

| Activity | 2019/20 | | | | | | | | | | | | Total |
|--------------------------------------|---------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-------|
| | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar | Apr | May | Jun | |
| Wayleave Applications - Received | 18 | 13 | 37 | 28 | 28 | 4 | 19 | 19 | 21 | 0 | 18 | 11 | 216 |
| Wayleave Applications - Commented on | 10 | 12 | 6 | 14 | 10 | 13 | 3 | 5 | 21 | 4 | 0 | 35 | 133 |
| % completion to date: | | | | | | | | | | | | | 61.6% |

3.9.2.3 Development Services

The *Manager: Development Services* comments on behalf of the Directorate: Infrastructure Services on all land-use applications, submitted to Council in terms of the Stellenbosch Land-Use Planning Bylaw of 2015. Land-use applications include land-use changes such as rezonings, subdivisions, consent uses, increase in bulk and departures and normally leads to further development of a property.

The approval of proposed land-use changes is evaluated in terms of the availability of bulk services. Should Council be in a position to supply such services, an application is supported. If not, then an application for a land-use change will not be supported by the Directorate: Infrastructure Services. It is essential that any planned development be brought under the attention of Development services to determine if bulk services will be available and if not by when the budget will allow for such bulk infrastructure to be implemented.

To give perspective to the above the figures for the different functions for the 2019/20 financial year are outlined in the table below.

Table 3:46: Land-use Applications

| Activity | 2019/20 | | | | | | | | | | | | Total |
|--|---------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|--------------|
| | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar | Apr | May | Jun | |
| Building Plans- Received | 22 | 124 | 210 | 257 | 394 | 158 | 162 | 111 | 111 | 13 | 0 | 2 | 1 564 |
| Building Plans- Commented on | 22 | 124 | 199 | 173 | 299 | 151 | 25 | 85 | 83 | 12 | 0 | 0 | 1 175 |
| | | | | | | | | | | | | | |
| Land-use Applications - Received | 11 | 13 | 24 | 12 | 7 | 21 | 6 | 8 | 12 | 15 | 0 | 0 | 211 |
| Land-use Applications - Commented on | 1 | 6 | 12 | 6 | 1 | 8 | 3 | 4 | 6 | 13 | 0 | 0 | 99 |
| DCs received for completed developments | Excluding VAT - R6 396 623. 93 | | | | | | | | | | | | |
| Total of aforementioned requests received | | | | | | | | | | | | | 1 775 |
| Total of aforementioned requests commented on | | | | | | | | | | | | | 1274 |
| % completion to date: | | | | | | | | | | | | | 71.8% |

The Development Services Section is responsible to co-ordinate and approve the final handover of newly serviced stands through the approval of engineering services clearance certificates. This section also performs a project management function by ensuring that developer created infrastructure is done according to Engineering standards and guidelines.

Additionally, Development Charges (DCs) are calculated by this Department and set as a development condition for new developments. Social and economic development has a positive impact on the municipality's finances as it increases revenue from property rates, fees, service charges and tariffs by expanding the base of ratepayers. However, development associated with this economic growth has an impact on the demand for municipal infrastructure services as well as social infrastructure services such as clinics, schools and other public amenities. Therefore, infrastructure is needed to support sustainable social and economic development in Stellenbosch.

Development charges are a more targeted and more equitable way of ensuring that the main beneficiaries of infrastructure make an appropriate and fair contribution to that cost, without unduly burdening the municipality's ratepayers. Development Charges are thus an important form of capital contribution raised by the municipality to pay for infrastructure upgrades required in support of new developments. A summary of the annual DCs management in 2019/20 is:

- DCs Calculated: R238,7M (representing a 227% increase on 2018/19);
- DCs paid in: R6,4M;
- Assets created in lieu of DCs: R10,5M; and
- Total value created for the municipality in 2019/20: R16,9M.

3.10 COMPONENT B: PLANNING AND DEVELOPMENT

3.10.1 TOWN- AND SPATIAL PLANNING

Stellenbosch and an appropriate approach to spatial development and management

The Municipal Spatial development framework is a core component of, and part of the Integrated Development Plan as stipulated in Section 26(e) of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) and Section 20(2) of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013). The spatial planning system in the Republic of South Africa consists of the following components:

- Spatial development frameworks to be prepared and adopted by national, provincial and municipal spheres of government;
- Development principles, norms and standards that must guide spatial planning, land use management and land development;
- The management and facilitation of land use through the mechanisms of land use schemes, i.e. zoning scheme bylaws; and
- Procedures and processes for the preparation, submission and consideration of land development applications and related process.

Section 8 of SPLUMA stipulate that the norms and standards must, but are not limited:

- Promote social inclusion, spatial equity, desirable settlement patterns, rural revitalisation, urban regeneration and sustainable development;
- Ensure that land development and land use management processes, including applications, procedures and timeframes are efficient and effective;
- Include: -
 - (i) A report on and on analysis of existing land use patterns;
 - (ii) A framework for desired land use patterns;
 - (iii) Existing and future land use plans, programmes and projects relative to key sectors of the economy; and
 - (iv) Mechanisms for identifying strategically located vacant or under-utilised land and for providing access to and the use of land.

Based on the above it is clear that the Municipal SDF is not just mostly a technical document-, but in fact the strategic spatial representation of the IDP, and also must determine a capital expenditure framework ("CEF") for the municipality's development programmes, depicted spatially. The Municipal SDF "as part of" and "a core component of" the IDP further "*must include sectoral requirements, including budgets and resources for implementation*", thereby guiding the municipal infrastructure and development budget. We present the critical underlying narrative here and argue that adhering to it, through numerous individual actions and decisions – across sectors of society – is at the core of managing development and land use in Stellenbosch better, at the heart of a better future for all.

"Stellenbosch Municipality is a special place; all of it ... its various settlements, its nature areas, farms, education institutions, its innovative corporations, small businesses, its places to visit, its places to live, its festivals, its history ... its people. In terms of its space – activities in space, landscapes, urban places, streets, and buildings – Stellenbosch Municipality continue to impress and bring opportunity, joy, and contentment; in different ways, to visitors and residents alike. Many would love to live here, work here, or visit more often. Stellenbosch Municipality has been judged as a place of high opportunity. Numerous

factors combine to a recognition that this place can contribute more to growing societal needs, in its region, and our country. If one lives here, the chances are that you can make a good livelihood. Stellenbosch Municipality is truly a place of opportunity.

Many who live within the municipal area do not have adequate shelter, or the opportunity to work. Others feel that the time has come to depart from farms, to give up farming. Many study here, but cannot enjoy university life to its full extent, because there is limited residential opportunity for students. Then again, many struggle in traffic every day, on congested roads, wasting time and money for fuel, even if privileged enough to own a private vehicle.

Stellenbosch Municipality's challenges increasingly impact on all, albeit in different ways. Citizens respond to challenges differently. Many owners of agricultural land have indicated a desire to develop their land for other, predominantly urban activities. These thoughts already involve a large land area, comparable to the size of Stellenbosch town. Others, tired of waiting for a housing opportunity here or elsewhere – and government support – invade land, staking a claim, the right to a place to live, on virgin land, even if the land is not suitable for development because of its agricultural and / or environmental value, is prone to risk, or allocated to someone else. Some, with the necessary material means, elect to close themselves off, to obtain a place to live in gated communities, secure from perceived threat to body and property.

The Stellenbosch Municipal Area grows, both naturally, and because more people are attracted here. Those drawn include the poor, middle- to higher income groups, and large corporations. Stellenbosch Municipality has a special quality of accommodating hope, good opportunities, and a better life; the perception is that your needs can be met faster, your children can get access to a school promptly, or, your journey to work will be less cumbersome.

However, Stellenbosch Municipality grows on top of unfinished business. It grows on top of ways of a past that had not been fixed, the separation of people, the focus on some as opposed to all; needs not met, exclusion. It also grows on top of limited public resources. While the municipality and other spheres of government collect and allocate funds for service delivery, it is not enough to address backlogs, fix the mistakes of the past, prepare for unexpected crisis (for example, in the form of fires), or meet anticipated future needs.

As Stellenbosch Municipality grows, things get worse. In terms of how we manage development and space, we know what direction to take. We know that we should adopt a precautionary approach to nature and agricultural land, we know that we should contain and compact settlements, we know that we should provide more choice in shelter and housing opportunity, and that we should focus on public and non-motorised transport.

This knowledge is also embedded in policy, from global conventions to national, provincial and local frameworks, including the Stellenbosch Municipal Integrated Development Plan that include the Stellenbosch Municipality Spatial Development Framework, 2019, the legal plan which directs the municipal budget and resource allocation. The issue is that we have not implemented what we believe the appropriate policy direction is well. We should ask why. We can answer that achieving in terms of new policy is not easy. It requires new ways of thinking, acting, living and doing. Higher densities, leaving the car, more interaction between groups of society sharing public space, more partnership in unlocking development opportunity, and so on.

Even if difficult, it is a matter of now or never. We cannot behave and live like before. We cannot afford to lose more nature and agricultural land, develop at low densities, and prioritise building roads for private cars more than public transport. If we do that, the system will fail. Despite difficulties, it appears

as if our approach is shifting. Land previously occupied by manufacturing enterprises in critical locations in the municipality have slowly become available for reuse. The potential of Klapmuts to accommodate enterprises, dependent on good intra- and inter-regional logistic networks is acknowledged. Landowners realise that overcoming the resource constraints, infrastructure constraints, and the cross-subsidisation required for more inclusive development – the extent of energy needed – necessitates joint work, joint planning, and implementation of a scale and nature not yet experienced in Stellenbosch. Corporations realise that they have broader responsibility – not only in contributing to good causes concerning nature, education, or the arts, but in actively constructing better living environments. We realise that we have to forge, establish and maintain active working partnerships to make our towns better. We also have the benefit of history. In times past, we have, as Stellenbosch Municipality, changed our destiny, did things for the better. Starting with an individual idea, a thought, often through an individual, great things were done. With such ideas and actions, the town established a university, saved historic buildings and places, launched cultural celebrations with broad reach, safeguarded unique nature areas, provided families with homes, begun corporations with global reach. When a fire destroyed homes, they were rebuilt promptly with collective energy and purpose. When children needed schooling, and government could not provide, some established schools.

Often, these initiatives started outside of government, albeit assisted by the government. They were started by those who thought beyond current challenges, without necessarily being able to project outcomes over time in full. They just understood that one step might lead to another. Not all the technical detail was resolved, not everything understood in its entirety. They merely acted in terms of core principles. As matters unfolded and new challenges emerged, the principles guided them.

The Municipal Spatial Development Framework, 2019 recognises that the spatial decisions and actions of many make what settlements are. It asks us to understand that plans cannot do everything, predict everything. It asks all to consider action with a few core beliefs, principles, or concepts, geared towards the common good.

Specifically, it asks us to consider seven principles:

1. First, maintain and grow the assets of Stellenbosch Municipality's natural environment and farming areas.

Humanity depends on nature for physical and spiritual sustenance, livelihoods, and survival. Ecosystems provide numerous benefits or ecosystem services that underpin economic development and support human well-being. They include provisioning services such as food, freshwater, and fuel as well as an array of regulating services such as water purification, pollination, and climate regulation. Healthy ecosystems are a prerequisite to sustaining economic development and mitigating and adapting to climate change. The plan provides for activities enabling access to nature and for diversifying farm income in a manner which does not detract from the functionality and integrity of nature and farming areas and landscapes.

2. Second, respect and grow our cultural heritage, the legacy of physical artefacts and intangible attributes of society inherited from past generations maintained in the present and preserved for the benefit of future generations.

Cultural heritage underpins aspects of the economy and differentiates places. Culture is a dynamic construct; forever emerging in response to new challenges, new interactions and opportunity, and new interpretations. Spatially, we must organise Stellenbosch in a manner which also sets the stage for new expressions of culture.

3. Third, within developable areas – areas not set aside for limited development owing to its natural or cultural significance – allow future opportunity to build on existing infrastructure investment, on the opportunity inherent in these systems when reconfigured, augmented or expanded.

Infrastructure represents significant public investment over generations, not readily replicated over the short term. It represents substantial assets for enabling individual and communal development opportunity of different kinds. From a spatial perspective, movement systems are particularly significant. Elements of the movement system, and how they interconnect, have a fundamental impact on accessibility, and therefore economic and social opportunity. Specifically, important is places of intersection between movement systems – places which focus human energy, where movement flows merge – and where people on foot can readily engage with public transport.

4. Fourth, clarify and respect the different roles and potentials of existing settlements.

All settlements are not the same. Some are large, supported by significant economic and social infrastructure, offer a range of opportunity, and can accommodate growth and change. Others are small and the chance to provide for growth or change is minimal. Generally, the potential of settlements to help change and growth relates directly to their relationship with natural assets, cultural assets, and infrastructure. We must accommodate change and growth where existing assets will be impacted on the least or lend itself to generating new opportunity.

5. Fifth, address human needs – for housing, infrastructure, and facilities – clearly in terms of the constraints and opportunity related to natural assets, cultural assets, infrastructure, and the role of settlements.

We must meet human need in areas where the assets of nature will not be degraded, where cultural assets can be best respected and expanded, and where current infrastructure and settlement agglomeration offers the greatest opportunity. Generally, we can help human need in two ways. The first is through infill and redevelopment of existing settled areas. The second is through new green-field development. We need to focus on both while restricting the spatial footprint of settlements outside existing urban areas as far as possible.

6. Sixth, pursue balanced communities. All settlements should be balanced.

That means they should provide for all groups, and dependent on size, a range of services and opportunities for residents. It also says they should provide for walking and cycling, not only cars.

7. Finally, focus energy on a few catalytic areas that offer extensive opportunity and address present risk.

Planning cannot attempt to treat all areas equally. Some areas offer more opportunity for more people than others. We need to focus on the areas and actions where a significant number of people will benefit, where we will meet their needs. There is also a need to focus on areas of 'deep' need, notwithstanding location, where limited opportunity poses a risk to livelihoods. Some informal settlements and poorer areas may not be located to offer the best chance for inhabitants, yet services need to be provided and maintained here. However, significant new development should not occur in these places, exacerbating undesirable impacts or further limiting the opportunity for people to pursue sustainable livelihoods. Spatial plans are 'partial' frameworks for action. They deal with space. Command of space is not enough to develop or manage a settlement in the interest of all. Each spatial principle, each concept, requires parallel actions in other sectors, including how we form institutions for execution, how we transport people, how we fund things, where we focus resources, and so on. The

spatial principles must help us to think through these implications, action by action, decision by decision."

Future settlement along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, over the longer term, Muldersvlei / Koelenhof and Vloottenburg along the Baden Powell-Adam Tas-R304 corridor could possibly accommodate more growth, and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical pre-conditions for significant development include:

- The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- Understanding to what extent settlements can provide local employment, in this way minimising the need for transport to other settlements.

Other local planning initiatives

Ideally, each of the settlements in SM should have a LSDF, applying the principles of the MSDF in more detail. The priority for LSDFs should be determined by the position and role of settlements in the SM settlement hierarchy, but should start with the Adam Tas Corridor Development Area and Klappmuts.

Institutional Arrangements

The SM has limited staffing resources within the Directorate: Planning and Economic Development, which include the departments of Development Management (Land Use Management and Building Development Management); Development Planning (Spatial Planning, Economic Development and Tourism, Development Information ("GIS") and Heritage Resource Management) and Integrated Human Settlements (Housing Development, Informal Settlements and Housing Administration) SM have appointed two (2) Senior Managers in the position for Development Management and Development Planning, and the position of the Senior Manager: Integrated Human Settlements is an unfunded post and remains vacant. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act).

The Planning and Economic Development Directorate will facilitate implementation of the *mSDF* in terms of institutional alignment, including:

- The extent to which the main argument and strategies of the MSDF are incorporated into Annual Reports, annual IDP Reviews, future municipal IDPs, and so on;
- The annual review of the MSDF as part of the IDP review process;
- The extent to which the main argument and strategies of the MSDF inform sector planning and resource allocation;
- The extent to which the main argument and strategies of the MSDF inform land use management decision-making;
- Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- The mutual responsiveness of the *mSDF* and national, provincial and regional plans, programmes and actions (including the extent to which MSDF implementation can benefit from national and

provincial programmes and funding). Over and above institutional arrangements in place, it appears that two aspects require specific focus in support of the MSDF.

Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the MSDF, SM (and other adjoining municipalities) appears to experience increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch Municipality through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation, or both higher and lower income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for “both sides” of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be agreement to redevelop existing settlement footprints rather than enabling further greenfields development (as a general rule).

However, the municipality’s increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

Private sector joint planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for a number of reasons:

- The municipal human and financial resource base is simply too small to achieve the vision of the mSDF or implement associated strategies and plans;
- Many matters critical to implementing the MSDF fall outside the direct control or core business of the municipality, for example, the municipality does not necessarily own the land associated with projects critical to achieve MSDF objectives;
- It is increasingly evident that individual land owners are finding it difficult to develop – to make the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- Individual land owners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunity for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- The municipality’s focus is often – and understandably so – on the “immediate”, or shorter-term challenges. Much what is needed to implement the MSDF or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel Complex, Die Braak and Rhenish complex – in a manner which contributes to agreed objectives for developing Stellenbosch town – is only possible if various land owners, the municipality, University, and investors work together, including undertaking joint planning, the “pooling” of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply do not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

Land Use Management

Continually ensure timeous consideration of land-use applications in order to streamline development processes. Municipality to strengthen integrated development planning, spatial planning and economic planning. The Department: Development Management has made significant strides in addressing and reducing the backlog i.r.o. the processing of land use applications. The number of land use applications classified as backlog applications have been reduced significantly, which in turn as the resultant impact of creating economic development opportunities within the Stellenbosch Municipality.

3.10.1.1 Capital Expenditure – Planning and Development

Table 3:47: Planning and Development

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|------------------|-------------------|--------------------|---------------------------------|
| | R | | |
| Informal Traders | 200 548 | 153 085 | -23.67% |

Planning and Development have spent, **76.33%** of the capital budget for the financial year.

3.10.1.2 Total employees – Planning

Table 3:48: Total Employees – Planning

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 4 | 2 | 2 | 3.27% |
| 15 – 13 | 5 | 3 | 2 | 3.27% |
| 12 – 10 | % | 29 | 17 | 27.86% |
| 9 – 7 | 3 | 2 | 1 | 0% |
| 6 – 4 | 3 | 2 | 1 | 0% |
| 3 – 0 | 0 | 0 | 0 | 0 |
| Total | 61 | 38 | 23 | 34.4% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.10.2 LOCAL ECONOMIC DEVELOPMENT (LED)

Table 3:49: Achievements within Local Economic Development

| Achievement / Highlight | Description |
|------------------------------------|--|
| Business Interventions | Number of business interventions for the financial year: |
| | 2017/18 2018/19 2019/20 |
| | Business registrations 24 37 29 |
| | Municipal Database Registrations 19 27 N/A |
| | Advice to walk-ins 387 1795 N/A |
| | Workshops 12 15 1 |
| | Business Licences 13 2 22 |
| | Liquor licences applications received 209 216 107 |
| | Comments forwarded to the Liquor Board 193 166 22 |
| Mentorship | No mentorship activities were completed for the first two quarters of the financial year, as it was planned for the latter part of the financial year, however this could not happen because of the pandemic and lockdown regulation that was in place. |
| Tendering Process Training | This was planned for the third quarter of the financial year; however, this could not take place due to the pandemic. |
| Informal Trading | The Unit has implemented various informal trading sites that will be completed in the new financial year including Cloetesville, Kayamandi, Klappmuts and a process to advertise for the sites to be occupied will be followed.
The Informal trading by-law is in the process of being drafted and will be circulated for public comment in the new financial year for public comment. |
| Enterprise Development and Support | Training for Stellenbosch-based entrepreneurs has been hampered because of the pandemic however, virtual meeting was held with various sectors of the economy including tourism and agriculture to ascertain the impact of the pandemic on these sectors. Assistance was provided to SMME with PPE to ensure compliance with health protocols during the pandemic. The Unit has been very active with the processing of trading permits during the lockdown to ensure that these micro businesses could trade. |
| Vacant Agricultural Property | The vacant land that were advertised during the previous financial year be allocated in line with the Policy on the Management of Municipal Agricultural Land. An information session was held for all interested small farmers to receive all relevant information for them to complete their applications. 90 individuals attended the briefing. |

3.10.2.1 LED Challenges

The table below gives a brief description of all the challenges within local economic development during 2019/20:

Table 3:50: Challenges within Local Economic Development

| Description | Actions to address |
|---|--|
| Human Resources insufficient to drive a effective economic development and tourism programme. | Fill all vacant post at an appropriate level to recruit competent professional people and review the organogram within the Directorate: Planning and Economic Development. |
| Slow processing of land use applications impacts negatively on new investments and economic growth in the municipal area. | Appointment of the Senior Manager: Development Management has resulted in a significant reduction of the amount of land use applications classified as backlog applications. |
| Non-permanency of EPWP administrative staff. | A number critical positions within the Section are vacant, also the Section has been tasked with implementing infrastructure development projects, which the section is not geared to undertake. |
| Current entrepreneurship development initiatives shows to minimal or minor impact on new venture creation. | Establish partnerships with the private sector to ensure uptake of new entrance into the mainstream of the economy. The municipality's procurement must also be used to ensure local business are given opportunities to partner with big business to nurture and grow new businesses. |

3.10.2.2 EPWP job creation 2019/20

The Expanded Public Works Programme grew in leaps and bounds of the last few year and the Stellenbosch Municipality consistently is one of the top 3 performers in the Western Capes. Below are the projects and number of jobs that have been created through EPWP.

Table 3:51: Job Creation through EPWP* Projects

| EPWP Projects | | Number of jobs created | |
|---|--|------------------------|-----|
| External EPWP Grant Projects | | | |
| LED | | 25 | |
| IG: Ward Office | | 20 | |
| IG: Cemeteries | | 8 | |
| IG: School Safety | | 10 | |
| IG: Community Development | | 8 | |
| IG: Stellenbosch Trail Fund Guiding Academy | | 2 | |
| IG: Cleaning and Greening | | 13 | |
| IG: Fire and Disaster | | 9 | |
| IG: Picnic Site | | 1 | |
| : Cleaning of Halls | | 8 | |

| Total Projects | Total Jobs | 761 |
| Total Projects Overall | Total Projects Overall | 910 |

3.10.2.3 Total employees – LED

Table 3:52: Total Employees – LED

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 5 | 1 | 4 | 40% |
| 12 – 10 | 2 | 1 | 1 | 10% |
| 9 – 7 | 0 | 0 | 0 | 0% |
| 6 – 4 | 2 | 1 | 1 | 10% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 10 | 4 | 6 | 60% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.10.2.4 Tourism

Aim and function of Tourism Section

- Contextualise the strategic goals of tourism promotion and development funding.
- Regularise the operational functioning of external bodies appointed or supported by the municipality in its Constitutional mandate toward both tourism, and economic and social development.
- Ensure co-ordination of the activities of the funded entities.

- Ensure efficient oversight of funding and outcomes.
- Acknowledge and leverage private sector and independent initiatives.
- Develop own of sustainable tourism events and brands.
- Enable sponsorship opportunities for commercialisation of events, brands and other opportunities.
- Smooth cyclical tourism numbers by establishing developing and implementing off-peak tourism products and initiatives.
- Develop and package opportunities and venues for business tourism.
- Enable market participation for local business.
- Enable training, mentorship and employment opportunities for local citizens.
- A transparent ability to quantify return on investment into events and funded entities.

Highlights:

- The establishment of a new destination marketing organisation, Visit Stellenbosch, after Wine Routes (SWR) and Stellenbosch 360 (S360) agreed on a bold and ambitious plan to bring stakeholders together and grow the tourism and experience economy in Stellenbosch.
- Visit Stellenbosch unite all tourism stakeholders under a joint destination brand and a unified destination vision with a long-term tourism plan. Centralising the operational functions and resources of various tourism role-players, Visit Stellenbosch will enable stakeholders to invest more to improve service excellence, drive tourism innovation and enhance place product experiences.
- Memorandum of Agreements was signed with Visit Stellenbosch and Franschhoek Wines based on the policy to for funding of organisation rendering a municipal function with condition to integrate the sector and ensure new entrance into this sector are supported and developed.

Challenges: Tourism

- Impact of COVID-19 on the tourism industry has had a severe negative impact on the sector, especially as international travelling was to a large extent prohibited since the start of the lockdown on 23 April 2020.

3.10.2.5 Capital Expenditure – Local Economic Development and Tourism

Table 3:53: Capital Expenditure as at 30 June: Local Economic Development and Tourism

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Establishment of Informal Trading Sites: Kayamandi | 5 337 505 | 2 543 827 | -52.34% |
| Establishment of Informal Trading Sites: Groendal | 3 467 117 | 2 189 882 | -36.84% |
| Establishment of Informal Trading Sites: Klapmuts | 2 085 015 | 1 559 303 | -25.21% |
| Establishment of informal trading markets Cloetesville | 649 948 | 468 526 | -27.91% |
| Establishment of Informal Trading Markets: Franschhoek | 404 409 | 389 235 | -3.75% |
| Only the 5 largest capital projects are listed | | | |

Local Economic Development and Tourism have spent, **59.65%** of the capital budget for the financial year.

3.11 COMPONENT C: COMMUNITY AND SOCIAL SERVICES

3.11.1 LIBRARIES

Looking back at what we have accomplished over the last year seems strange. The global pandemic has forced the libraries department to re-look the way we work and the services we offer. It has also forced the municipality to re-evaluate priorities, and set in motion many new responses to access literacy programmes, recreational reading and educational information.

Unlike pre-20th century libraries, libraries are now more than just storage spaces for books, they are the important community hubs that serve as centres of learning, professional development, healthcare, and now, “idea labs”.

Libraries are free public spaces that allow everyone to feel safe and to find opportunities. They offer free educational and recreational resources to everyone. It is a truly remarkable place where socioeconomic status is immaterial. It offers resources free of charge including books, internet access and educational, self-development and professional training programmes. Libraries are safe refuges for the homeless and underserved populations. Homeless men, women, and children visit the libraries every day, and most of the time all day, to take advantage of the resources the library has to offer. For the homeless or the very poor, libraries provide them with access to the internet for job searches, books for educational and job training, and essential programmes designed to bring them out of poverty.

Libraries have helped to boost local economies. Because libraries are not a revenue generating department of the municipality free for patrons, its vital role in developing the economy is overlooked. Libraries play a key role in financially strengthening local community.

They provide a work space for telecommuters, supply free internet access for people looking for employment opportunities, help individual community members financially succeed in their lives and small businesses, libraries also help entire communities succeed at boosting their economy and growing their local wealth. More so than a community centre, town hall, or public park ever could.

Libraries connect their communities in a way that benefits everyone. “They pool local resources and put them all under one welcoming roof for everyone to share”.

Libraries truly are remarkable places, and in today's world, cannot afford to underplay its importance to the educational, social and economic wellbeing of our citizens and communities. We cannot afford to ignore the fact that they are “opportunity institutions” opening its doors to and for the disenfranchised. No other department in the municipality reaches out to as many peoples in our communities who have been left behind in today's economy, those who are in the schooling system, or those just trying to find their way in an extremely demanding and harsh world. Delays in maintenance of Library buildings and the moratorium placed on filling staff vacancies have placed a huge strain on existing staff effectiveness and efficiency in the workplace. The upskilling and training of staff is a vital component if we are to remain relevant and deliver the service our communities have become used to receiving.

It is against this background that the Stellenbosch Public Libraries find themselves struggling to meet the demands placed on them by their communities.

We believe that we have grown and still continue to grow our libraries as the social hubs of our communities. We also believe that we are at the cusp of a very exciting new chapter of social development.

3.11.1.1 Libraries future

As the Province and the country begin to ease into Level 1, libraries are trying to find ways to safely serve their communities again especially amidst the threat of an ongoing pandemic in which person-to-person transmission is riskiest in indoor spaces where people linger for a long time. We believe that we will be faced with a new set of challenges i.e. extended school closures and massive unemployment which will mean that communities will depend on their local libraries now more than ever for internet access, e-books and assistance in job searches. Students will need increased access to online resources. This means libraries will have to prioritise their resources, adapt existing programmes to what people need most and possibly even cut the ones that benefit the community the least. The moratorium placed on filling staff vacancies only serves to exacerbate the current library staff shortage situation. More partnerships will have to be developed, increased sponsorships will have to be sought and budgets increased if we are to increase literacy levels in the WCO2 Area. Budgets will have to be reviewed considering that we, especially libraries are on the brink of the 4IR and access to information is moving in this direction.

3.11.1.2 Service Statistics – Libraries

Table 3:54: Service Statistics: Libraries

| Type of service | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|--|---------|---------|---------|---------|---------|---------|
| Libraries | | | | | | |
| Number of libraries | 9 | 9 | 9 | 9 | 9 | 11 |
| Library members | 14 710 | 311 832 | 547 250 | 323 651 | 142 616 | 26 293 |
| Books circulated | 331 018 | 311 832 | 336 864 | 305 275 | 323 200 | 192 503 |

| Primary and Secondary Book Education sessions | N/A | N/A | N/A | N/A | N/A | 25 |

The following graph displays registered users per library:

Figure 3:44: The following graph displays registered users per library

3.11.1.3 Libraries partnerships

The Libraries Department over the last year have formed many public, private partnerships with the communities within the WCO2 Area.

Table 3:55: Libraries partnerships

| Cloeteville | | |
|--|----------|--|
| Chennels Day care | Day Care | Teaching the children from an early stage the importance of libraries by presenting story hours, handcrafts, DVD shows and ECD programmes. |
| Little builders Crèche | Crèche | Assist the children to develop and grow by introducing them to books and other ECD activities |
| Kayamandi | | |
| Signa Academy | | Students taking academic practical at our Library for the period of six months. |
| Loxtion Foundation | | Loxtion Foundation showcases and celebrates life in the townships surrounding Stellenbosch through Sport and Performing Arts. They create opportunities to discover talent amongst township youth and to give them a platform to grow. |
| Pniël | | |
| Dwarsrivier Tourism | | Partnering to bring services to the community of Dwarsrivier. Hosting the event to enrich the community. |
| Community development | | Partnership aimed at bringing various services to the community of Dwarsrivier. Hosting the event to enrich the lives of the community. |
| Groendal Library 01 July 2019 – 30 June 2020 | | |

| | | |
|---|--|--|
| Inceba Trust | Mother and Child Book sharing | Focus on training illiterate parents to do book sharing with their children / grandchildren by looking at the pictures and telling the story. |
| Inceba Trust | Training of ECD employees | Inceba Trust is responsible for the training, whilst Groendal library assist with storytelling and recommending books per theme. |
| Adopt-A-Crèche | Outreach to underprivileged children from an informal settlement | Teaching children, the basic hygiene, literacy and numeracy skills by exposing them to ECD / crèche activities. Inceba train the parent's w.r.t. the Parent and Child Book sharing programme. |
| Inceba Trust Toy Library | ECD Toy Library | Aim is to incorporate the Toys into the ECD section at Groendal Library. As part of this initiative, free training will be presented to Stellenbosch Library staff i.t.o. ECD programmes / activities and the usage of educational toys. |
| ECD / Crèches | Wemmershoek, La Motte, Groendal , Langrug, Bosbou areas | 17 crèches are receiving block loans for books linked to their weekly theme. 2 visits per month for block loans and 1 storytelling / outreach per month is presented at each crèche. |
| CWP Community Work Programme | Unemployed people employed through CWP initiative | The Community Work Programme (CWP) is a government programme aimed at alleviating poverty and curbing unemployment.
The work rendered by the CWP workers includes the cleaning of the Library, tidying of shelves, assist with preparing new library material (covering of books, tattle-tape etc.). The garden and outside areas are also maintained and cleaned by the workers. |
| Youth Book Week | Black Box Trolley project | The Black Box Trolley contains 10 books each with their own package (activity sheet, quiz, books etc.). The purpose of the trolley is to assist aftercare / schools centers to use the trolley with literacy projects. The books are in different categories as per reader level. Puppet shows. |
| Youth Book Week | Phendulani Reading Quiz | Seven (7) primary schools within the greater Franschhoek area compete against each other to be crowned as the winner. The team will consist of six Gr 7 learners, whom each will have to read 12 books and answer questions about these books. |
| Franschhoek Literacy Festival / Nali'Bali | Storytelling workshop | Workshop is aimed at exchanging ideas / guidelines for pre-school and primary educators / librarians.
Nali'Bali and Librarians do storytelling at primary schools. (In 2019 we visited 18 classes and reached more than 1000 children). |
| Nali'Bali | Storytelling | Groendal Library registered as a FUNDA reader leader to promote storytelling and books. We make use of the Nali'Bali website to download activities and books. Groendal participate in the national membership drive for children. |
| Score Multi-Purpose Community Centre – Groendal | Seniors / Housebound adults | Aim is to combine outreach programmes / activities as we are both working with Seniors in the community. |
| ECD / Crèches | ECD area at Library: Educational toys, books etc. | ECD Centres / Crèches are invited to make use of the educational toys / books at the Groendal Library |
| Bridge House Private School | Community practical work | Assist Grade 7's with their community outreach project. Exposing them to the Library and the work done in a Library (holiday programmes, storytelling, spelling competitions etc.). |
| First Step Community Project | Unemployed youth | Students from "First Step Programme for Unemployed Youth" doing their practical work at the Library. In service training (library related work). |
| DCAS | Oral History Project | On hold due to COVID19 legislation.
The aim is to keep the history of Groendal alive for the youth by means of oral history. Members of the community have been identified to participate in the oral history |

| | | |
|---|---|---|
| | | project – by telling the history of Groendal and capture it on DVD. |
| Groendal Housebound members | Book exchanges to housebound / elderly patrons | Bringing the Library to the community. Visits are done twice a month to deliver library material to the housebound. Visit new potential members to form part of the outreach. |
| Collaboration with Local / Provincial departments | PGWC: Environmental Affairs, community Safety
Stellenbosch Municipality: Parks Dept. | Display and brochures to have an informed community. Combined Inter departmental activity effort for Arbor Week. |
| Community of Groendal | Friends of the Library | Currently in process of establishment: "Friends of the Groendal Library" |
| Maker-space | Children Gr R – Gr 12 | Items have been procured. Currently in process of identifying taring for library staff.
The focus will be on S.T.E.M (Science, technology, Electronics, Mathematics). The idea is to expose the children to science, mathematics, technology and electronics. The programme will be linked to the school curriculum. |
| Bongo Flepu (artist, Kayamandi) | Wall mural | Wall art for Groendal Library with the faces of people who made a positive contribution in the world. Finalisation of the mural will be the painting of the quote. Partnership with an artist from Kayamandi. |
| Hospice Stellenbosch | | Partnering to bring services to the community of Dwarsrivier. Hosting activity events to enrich the lives of the Hospice community. |
| Stellenbosch Traffic Department | | Partnership with traffic department to teach young children about the importance of road safety. |
| Read to rise | | Partnering with Read to rise organisation to promote reading in young children. |
| Franschhoek | | |
| Dennegeur Agri Village | Crèche | Bringing the Library to the farm children. Storytelling and activity are done 2 x month. |
| Franschhoek Museum | Combined programmes | Combined effort to do outreach and literacy programmes. |

3.11.1.4 Capital Expenditure – Libraries

Table 3:56: Capital Expenditure as at 30 June: Libraries

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--------------------------|-------------------|--------------------|---------------------------------|
| | R | | |
| Libraries: CCTV | 200 000 | - | -100.00% |
| Library Books | 150 000 | 110 989 | -26.01% |
| Libraries: Small Capital | 75 000 | 32 743 | -56.34% |

Libraries Services have spent, **34.45%** of the capital budget for the financial year.

3.11.1.5 Total employees – Libraries

Table 3:57: Total employees- Libraries

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 0 | 0 | 0 | 0% |
| 15 – 13 | 2 | 2 | 0 | 0% |
| 12 – 10 | 10 | 7 | 3 | 6.83% |
| 9 – 7 | 22 | 18 | 4 | 9.09% |
| 6 – 4 | 10 | 7 | 3 | 4.54% |
| 3 – 0 | 0 | 0 | 0 | 0 |
| Total | 44 | 34 | 10 | 20.4% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.f.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.11.1.6 Cemeteries

Stellenbosch Municipality is responsible for the maintenance and management of six cemeteries in the greater Stellenbosch. Jamestown, Pniel and Groendal have reached its capacity, whilst Wemmershoek and Franschoek South and North are fully operational. Onder Papegaaiberg Cemetery is also to capacity [only reserved graves available]. A new cemetery at Kylemore is currently being established.

Consultants have been appointed (3-year project) during 2016 to assist Stellenbosch Municipality with the identification and planning of two regional cemetery sites to address the critical need for burial space within the municipality. This project is at an advanced stage of acquiring the required environmental-, water and land use approvals.

The objective of the cemeteries department is to provide adequate burial space and ensure a dignified burial service. A Notice of Intent to Develop has been lodged with the Department of Environmental Affairs and Development Planning during October 2017 with the pre-application public participation process to commence December 2017 / January 2018.

Our challenges remain to be:

- the shortage of burial space;
- to convert burial records to electronic soft copies (in progress as per the five-year plan); and
- to promote alternative burial methods such as cremations amongst various religious groups.

3.11.1.7 Service Statistics - Cemeteries

Table 3:58: Cemeteries Service Statistics

| Type of service | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|-----------------|---------|---------|---------|---------|---------|---------|
| Pauper Burials | 3 | 0 | 2 | 0 | 6 | 15 |

3.11.1.8 Income – Cemeteries

Table 3:59: Cemeteries Service – Income

| Gravesite locations | 2017/18 | | 2018/19 | | 2019/20 | |
|----------------------------|-------------------|----------|-------------------|----------|-------------------|-----------|
| | Number of Burials | Income | Number of Burials | Income | Number of Burials | Income |
| Onder Papegaaiberg | 74 | R33291 | 24 | R50 389 | 103 | R87 791 |
| Jamestown | 527 | R775 831 | 356 | R900 294 | 478 | R132 1781 |
| Pniel | 15 | R9 615 | 11 | R7 855 | 17 | R13 676 |
| Wemmershoek | 17 | R15 633 | 9 | R7 650 | 26 | R27 219 |
| Franschhoek North Groendal | 161 | R105 489 | 38 | R40 710 | 39 | R11 052 |
| Franschhoek South | 16 | R21 010 | 54 | R45 580 | 140 | R80 172 |

3.11.1.9 Capital Expenditure – Cemeteries

Table 3:60: Capital Expenditure as at 30 June: Cemeteries

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--------------------------|-------------------|--------------------|---------------------------------|
| | R | | |
| Libraries: CCTV | 200 000 | - | -100.00% |
| Library Books | 150 000 | 110 989 | -26.01% |
| Libraries: Small Capital | 75 000 | 32 743 | -56.34% |

Cemeteries have spent, **34.45%** of the capital budget for the financial year.

3.11.1.10 Total employees – Cemeteries

Table 3:61: Total Employees – Cemeteries

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 1 | 1 | 0 | 0% |
| 12 – 10 | 3 | 2 | 1 | 5% |
| 9 – 7 | 0 | 0 | 0 | 0% |
| 6 – 4 | 15 | 11 | 4 | 20% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 20 | 15 | 5 | 25% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.11.2 CHILD CARE; AGED CARE; SOCIAL PROGRAMMES– COMMUNITY DEVELOPMENT

3.11.2.1 Service Statistics – Child Care, Aged Care, Social Programmes

Table 3:62: Community Development

| Type of service | | |
|---|--|---|
| Early Childhood Development Services / Children | <p>ECD Policy</p> <p>Capacity Building of ECD Practitioners</p> <p>Initiatives in awareness programmes (ECD children)</p> <p>ECD Registration Compliance</p> <p>Strengthening and Establishing ECD Forums</p> <p>Transversal committees / Adhoc committees</p> <p>Grant in Aid to ECDs</p> | <p>ECD GIS Database updates:</p> <ul style="list-style-type: none"> 99 ECD Facilities contact and registration status information were updated. <p>Capacity Building of ECD Practitioners</p> <ul style="list-style-type: none"> Capacity Building and access to information related to ECD registration in collaboration with DSD and TEEC. Working on Fire training was provided to 30 practitioners in Kayamandi Collaboration with Ranyaka and Nedbank focusing on registration requirements. 20 local ECD's are now being mentored and supported. 21 ECD practitioners received training on alcohol abuse and the manifestation thereof in ECD. 19 Unregistered ECD's participated in a training workshop on the writing of internal policies governing the facilities. Strengthening of ECD forums of namely Kayamandi, Klapmuts, Stellenbosch and Franschhoek in order to tackle challenges and uplift one another as a unit. This included preparation from opening up again, understanding the COVID-19 regulations and DSD requirements for safely opening up the sector again. <p>Awareness programmes for children</p> <ul style="list-style-type: none"> Universal Children Day at Klapmuts Stadium for the Greater Stellenbosch ECD Forum reaching 2000 children awareness through sports. Preparing and informing ECD centres on COVID-19 and the regulations necessitating closure during lockdown. 150 ECDs. <p>Transversal / Adhoc programmes</p> <ul style="list-style-type: none"> Various holiday programmes are supported by the department in different communities. 300 Children participated in a spelling Bee competition in Kayamandi. Building families: Foster family support project. A one day "camp" for 30 youth from Ikaya Primary was conducted in collaboration with Inkuthazo Yesizwe to focus on self-discipline and responsibility. |
| Persons with Disabilities | <p>Awareness programmes</p> <p>Universal Access</p> <p>Grant in Aid Donations</p> | <p>International Day of Persons with Disabilities: 23 November 2019</p> <p>Theme: WALK WITH DISABILITY</p> <ul style="list-style-type: none"> Focus was social inclusion and emphasis for everyone to walk with people with disabilities. A march was organised by the Stellenbosch Disability Network with supporting organisations and the municipality. A memorandum was handed to Cllr Pietersen which focused on universal access for persons with disabilities. |

3.12 COMPONENT D: ENVIRONMENTAL PROTECTION

3.12.1 POLLUTION CONTROL, BIO-DIVERSITY, LANDSCAPE, OPEN SPACES, PARKS

Stellenbosch Municipality is continually developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned. To this effect Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework, a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives. This document was adopted by Council during its June 2019 meeting.

Stellenbosch Municipality, through the Department Community Services is in the process of compiling dedicated Environmental Management Plans (EMPs) for all its declared nature reserves and nature areas. Papegaaiberg Nature Reserve has an approved EMP, currently under review along with Jan Marais Park's EMP. A first draft EMP for Mont Rochelle Nature Reserve has been completed and is ready for public input before being submitted to Council. The Paradyskloof Nature Area was accepted by Council during its May 2019 meeting. Stellenbosch Municipality has also completed an Invasive Alien Plant Management Plan, as required in terms of the National Environmental Management: Biodiversity Act (10 of 2004) and an Integrated Fire Management Plan to assist in the management of large vacant nature areas under the management of Council.

An Air Quality Control By-Law as well as a Noise Control Policy has been developed and adopted by Council. The latter is implemented by a dedicated Air Quality / Noise Control Officer appointed within the Department: Community Services.

Stellenbosch Municipality works closely with the Department of Environmental Affairs and Development Planning in reporting on illegal activities, as well as administering the rehabilitation action of Section 30 (National Environmental Management Act, 107 of 1998) Emergency Incidents.

Re: Noise complaints received and dealt with in 2018 and 2019 respectively:

Please note, complaints are captured on a central database and dealt with within the required timeframes. The statistics included both air quality related matters and noise complaints. All noise complaints are investigated in terms of The Western Cape Noise Control Regulations PN200/2013.

Table 3:64: Air Quality Complaints 2018

| 2018 Complaints | 1 st Quarter | 2 nd Quarter | 3 rd Quarter | 4 th Quarter |
|--------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| Fumes | 2 | 2 | 3 | 3 |
| Smoke | 2 | 0 | 3 | 2 |
| Dust | 3 | 4 | 3 | 3 |
| Burning of waste / tyres | 0 | 0 | 0 | 0 |
| Farm land burning | 0 | 0 | 0 | 0 |
| Crop spraying | 0 | 0 | 0 | 0 |
| Offensive Odor's | 0 | 2 | 3 | 2 |
| Unlicensed Facilities | 0 | 0 | 0 | 0 |
| Noise | 34 | 45 | 47 | 40 |
| Other | 1 | 0 | 0 | 0 |
| Total | 42 | 53 | 59 | 50 |

Table 3:65: Air Quality Complaints 2019

| 2019 Complaints | 1 st Quarter | 2 nd Quarter | 3 rd Quarter | 4 th Quarter |
|--------------------------|-------------------------|-------------------------|-------------------------|-------------------------|
| Fumes | 3 | 4 | 2 | 4 |
| Smoke | 2 | 3 | 4 | 4 |
| Dust | 5 | 4 | 3 | 5 |
| Burning of waste / tyres | 0 | 0 | 0 | 2 |
| Farm land burning | 2 | 2 | 3 | 3 |
| Crop spraying | 0 | 0 | 0 | 2 |
| Offensive Odor's | 2 | 2 | 3 | 3 |
| Unlicensed Facilities | 0 | 0 | 0 | 0 |
| Noise | 40 | 45 | 48 | 45 |
| Other | 2 | 0 | 0 | 1 |
| Total | 56 | 60 | 59 | 63 |

- Total noise complaints for 2018 = **166**
- Total noise complaints for 2019 = **178**

3.12.1.1 Environmental Implementation

Table 3:66: Visitors Statistics – Environmental Implementation

| Type of service | 2019/20 |
|--|---------|

| Urban Forestry Cleaning and Greening Project | 11 |

3.12.1.2 Urban Forestry

Stellenbosch Municipality is responsible for the management of all municipal street trees in the greater Stellenbosch jurisdiction. The aim of the Urban Forestry Sub-section is to facilitate the planting, protection, blanking, maintenance and long term management of all trees located on municipal property through tree management (arboricultural) practices, thus promoting a sustainable development approach. This approach is geared towards making WC024 the greenest municipality in South Africa through Urban Forestry practices which guides investors towards future sustainable development.

Table 3:68: Management of trees in WC024 – Urban Forestry

| Type of service | 2019/20 |
|----------------------------------|---------|
| Management Trees In WC024 | |
| Trees planting Programme | 60 |
| Pruning of trees | 129 |
| Felling of trees | 16 |
| Stump grinding of trees | 5 |
| Spraying of oak trees | 3 |
| Root barrier Management | 6 |
| Wayleaves | 65 |

3.13 COMPONENT E: SECURITY AND SAFETY

3.13.1 LAW ENFORCEMENT

Stellenbosch Municipality has a Control Room that is operational 24/7. Besides the function of call taking and dispatch, the Control Room is a fully fledged operational centre where CCTV/ LPR (Licence Plate Recognition) cameras are monitored daily. These cameras have been strategically placed to monitor hotspot areas for criminality within the WC024 area. The LPR cameras are linked to a cloud and send alerts of suspect vehicles or stolen vehicles which has been loaded and verified by SAPS to key role players such as the Control Room, law enforcement agencies and the local SAPS. The LPR cameras have in the past resulted in the successful arrest of wanted criminals by SAPS. It has also proven to be an effective crime deterrent.

Stellenbosch has an approved comprehensive safety plan that addresses all the aspects of safety, from road safety and crime, to dealing with disasters and fires. The safety plan was compiled with the input from the community and the respective safety disciplines. The plan is reviewed on an annual basis. Safety is the responsibility of all residents of Stellenbosch. The socio-economic challenges of inequality, poverty and unemployment are major contributors to unsafe environments in WC024.

With this Safety Plan the Stellenbosch Municipality, all the relevant role-players as well as the residents of the Greater Stellenbosch, commit themselves to maintain and promote a zero-tolerance approach to crime and safety, through the Stellenbosch Safety Initiative (SSI). The SSI consists of operational members from SAPS, Traffic, Fire, Law Enforcement and Security partners.

Stellenbosch Municipality was also aided by the Department of Community Safety with the training and deployment of 18 Peace Officers in Stellenbosch and Franschhoek on a three-month contract.

Highlights:

- SSI task team members which meet weekly to plan and execute joint operations with SAPS as key role-player.
- Special Operations Unit established in terms of Safety Plan.
- Centralised Control Room and CCTV monitoring at Fire Station (Phase 1 completed).
- The expansion of the Control Room is in progress (Phase 2).
- The LPR camera project (entrances and exits to Stellenbosch and Franschhoek) completed with LPR camera installations.

Challenges:

- To render a 24/7 Law Enforcement patrol service.
- Provide appropriate security of assets and facilities.
- Increase and maintain surveillance of key places.
- Prevent land invasions.
- Insufficient staff to fulfil operational requirements.
- Insufficient vehicle fleet to fulfil its mandate for a safer environment.
- Insufficient office space to accommodate departmental staff.

Law Enforcement attended to the following incidents:

Table 3:69: Law enforcement incidents responded to

| | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar | Apr | May | Jun | Total |
|-------------------------------|-----|-----|-----|-----|-----|-------|-----|-----|-----|-----|-----|-----|-------|

3.13.1.1 Capital Expenditure – Law Enforcement

Table 3:70: Capital Expenditure as at 30 June: Law Enforcement

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Law Enforcement: Vehicle Fleet | 2 135 000 | 1 912 008 | -10.44% |
| Install and Upgrade CCTV Cameras In WC024 | 1 000 000 | 119 379 | -88.06% |
| Install Computerised Access Security Systems and CCTV Cameras at Municipal Buildings | 1 000 000 | 474 937 | -52.51% |
| Law Enforcement Tools and Equipment | 600 000 | 532 528 | -11.25% |
| Furniture Tools and Equipment | 350 000 | 294 838 | -15.76% |
| Only the 5 largest capital projects are listed | | | |

Law Enforcement have spent, **63.08%** of the capital budget for the financial year.

3.13.2 TRAFFIC LAW ENFORCEMENT

Traffic Services is performing its functions as guided by the National Road Safety Strategy which its main objectives being to achieve traffic safety on municipal roads including the functions as defined in the municipality's Integrated Development Plan.

The National Road Safety Strategy provides all year-round road safety initiatives. The department has increased its enforcement strategy in collaboration with stakeholders and affected parties. Operations like Automatic Number-plate Recognition operations are conducted to improve compliance with and payment of traffic fines.

On-going objectives are to improve road user behaviour; reduce the incidence of traffic offences; including speeding; drunk-driving and driving under the influence of Narcotics; dangerous overtaking; the removal of unfit road users from traffic; roadworthiness of vehicles; public transport compliance with regard to vehicles and drivers; provide sufficient and coordinated regulation of traffic on strategic roads; pedestrian education and compliance, eradication of corruption; administrative compliance and overall improvement of enforcement systems.

The out- break of COVID-19 during the period of March 2020 caused the whole country to go into lockdown as from 23 March 2020, which affected normal operations negatively. As a result, our administrative activities were not operational for more than 2 months. Since the implementation of the lockdown especially during levels 4 and 5, the Law Enforcement agencies were very much focussed on the task as laid down by the restrictions and were very effective. The working relationship improved as all security / policing / law enforcement role-players worked together under difficult conditions whereby good results were achieved. The Outbreak of COVID-19 did expose our challenges in terms of limited staff resources.

3.13.2.1 Highlights for Traffic Law Enforcement

The new approach in terms of Traffic Law Enforcement strategies has managed to yield good results; for example, in this financial year a total number of roadblocks held increased from 205 to 267 the previous year. In terms of accidents reported, fewer casualties in terms of fatal accidents reported 15 versus 33, while the total number of culpable homicide cases reported during this this year came to 9, down from 18 recorded in the previous year.

This is achieved as a result of lockdown regulations that required coordinated deployment of law enforcement agencies to enforce lock down regulations that has put a total ban on the sale of alcohol during level 5 and level 4 and with declining restrictions on other levels. The curfew regulations further assisted by reducing movement of people on our roads and we managed to achieve good results. The improvement of Visible Crime Prevention and joint operations between enforcement agencies managed to deliver excellent results, for example during this period a total number of 16 993 moving violations was issued as compared to 1369 on the previous financial year. Cognisance need to be taken that these include COVID-19 transgressions.

Stop and check done for the period 2019/20 = 943, during COVID- 19 the lockdown period our stop and c heck operations were increased for compliance purpose's. As result of that a high number of stop and checks is observed.

Awareness initiatives on Public Safety done for the period = 30.

A total number of 8 pedestrians' fatalities was recorded as compared to 11 in the previous financial year.

A total number of 19 vehicle fatal accidents was reported, a marginal decrease as compared to a total of 33 fatal accidents reported during the period 2018/19.

It is observed that due to lockdown regulations accidents statistics did decreased during the disaster period on our roads.

3.13.2.2 Service Statistics – Traffic Services

Table 3:71: Service Data for Traffic Services

| Details | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|---|------------|------------|------------|------------|

3.13.2.3 Capital Expenditure – Traffic Services

Table 3:73: Capital Expenditure as at 30 June: Traffic Services

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--------------------------------|-------------------|--------------------|---------------------------------|
| | R | | |
| Replacement of Patrol Vehicles | 927 293 | 968 434 | 4.44% |
| Furniture, Tools and Equipment | 300 000 | 151 795 | -49.40% |
| Mobile Radios | 200 000 | 146 429 | -26.79% |

Traffic Services have spent, **88.75%** of the capital budget for the financial year.

3.13.2.4 Total employees – Traffic and Law Enforcement Services

Table 3:74: Total Employees – Traffic and Law Enforcement

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|------------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 19 | 8 | 11 | 5.04% |
| 12 – 10 | 102 | 76 | 26 | 11.92% |
| 9 – 7 | 54 | 34 | 20 | 7.79% |
| 6 – 4 | 42 | 25 | 17 | 7.79% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 218 | 144 | 74 | 32.54% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.13.3 FIRE AND DISASTER MANAGEMENT

"Fire Services is a vital public service. It is part of the fabric of all our communities. The service it provides is essential in preventing fires from starting in the first place and in responding quickly and effectively to those incidents with which it has to deal. Increasingly, it is now developing a wider role. That role involves tackling new threats which we are now facing, including terrorism and threats such as flooding and other environmental disasters" (Prescott, Deputy prime minister, United Kingdom, 2003)

Stellenbosch also welcomes and endorses the vision for fire services in terms of the new White Paper on Fire Services –

A fire service that is proactive in preventing fires and other risks rather than simply reacting to fires through:

- Acting in support of the wider developmental agenda as outlined in the NDP;
- Establishing sound institutional and administrative capabilities
- Demonstrating good governance and administration;
- Adopting community-based approaches;
- Putting people and their concerns first; and
- Professionalisation of the function.

Disaster Management and its objectives:

- Building of institutional capacity within the Stellenbosch Municipality;
- Perform disaster risk reduction initiatives to ensure safer and resilient communities;
- Ensure implementation of community safety programmes and campaigns to promote safe resilient sustainable communities;
- Establishing of efficient early warning systems;
- Improving emergency preparedness in vulnerable communities; and
- Ensure appropriate response by relevant services to emergencies and disasters within the Stellenbosch Municipality.

Highlights:

- Launch of the new hydraulic ladder platform fire truck.
- Acceptance of a fully geared new rapid response 4x4 fire truck.
- Replacement of fire gear (helmets, bunker gear and boots) for all fire personnel.
- Upgrading of centralised control centre at Stellenbosch fire station approved.
- Establishment of dedicated COVID-19 sanitising team.

Challenges:

- a) Rapid expansion / density of informal settlements.

The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.14 COMPONENT F: SPORT AND RECREATION

3.14.1 HOLIDAY RESORTS AND CAMP SITES

The Stellenbosch Municipality is responsible for the management and maintenance of one picnic site. The Jonkershoek Picnic Site is situated in the Jonkershoek Valley on the banks of the Eerste River. The picnic site attracts up to 15 840 visitors per annum due to its natural beauty and tranquillity set at the foothills of the Jonkershoek mountains. The site provides outdoor leisure for visitors, catering for braai and picnics alongside the river course.

The Stellenbosch Municipality is responsible for the management and maintenance of seventeen sports grounds in its municipal area. These grounds are surrounded by the scenic beauty of the Stellenbosch Mountains. Ten are located in the urban areas and seven in the rural areas.

It is the Municipality's goal to create active, healthy communities and to provide a sporting hub for all its residents and visitors by offering a wide range of well-maintained and well-managed sporting facilities.

Stellenbosch Municipality manages and maintains one swimming pool in the greater Stellenbosch area. The swimming pool is situated in Cloetesville and can accommodate two hundred and seventy-five (275) people at any time per day. The existing facility can host swimming galas and aims to further sports development and recreation.

3.14.1.2 Service Statistics Sport - Grounds and Swimming Pools

Table 3:79: Service Statistics Sport Grounds and Swimming Pool

| Type of service | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |

The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings. | | | | |

3.14.1.5 Community Halls and Facilities

Stellenbosch is the proud owner of two top-class town halls and nine community facilities that cater for local residents and national and international visitors.

The facilities are available throughout the year (365 days per annum) and can be booked for events such as meetings, weddings, training sessions, conferences and community and social events.

Table 3:82: Total functions: Community Halls and Facilities

| Type of service | 2019/20 |
|---|---------|
| Total functions at municipal halls | |

| Total | 165 | 99 | 66 | 36,92% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.15.2 HUMAN RESOURCE SERVICES

Stellenbosch Municipality views the Human Resources Management component as the governance of the organisation's employees. More commonly, human resources per se refers to the people or human capital appointed or employed by the organisation whose skills are used to reduce risk and maximise return on investment. The vision of the Human Resources Department is undoubtedly to build partnerships with management at all levels of the organisation, to create a culture or working environment where employees are valued or appreciated and to ensure a diverse, qualified, healthy and highly motivated workforce focused on achieving the critical outcomes, through the development and administration of cost-effective and results-oriented human resources. Accordingly, the mission of the Human Resources Management Department is to address and achieve the goals and challenges of Stellenbosch Municipality by providing services that promote a work environment that is characterised by fair treatment of staff, open communications, personal accountability, trust and mutual respect. We will seek and provide solutions to workplace issues that support and optimise the operating principles of the organisation.

The Human Resources Management Department objectives for Stellenbosch Municipality include but are not limited to:

- Helping the organisation achieve its goals;
- Ensuring effective utilisation and maximum development of human resources;
- Ensuring respect for human beings;
- Identifying and satisfying the needs of individuals;
- Ensuring reconciliation of individual goals with those of the organisation;
- Achieving and maintaining high morale among employees;
- Providing the organisation with well-trained and well-motivated employees;
- Increasing employee's job satisfaction and self-actualisation;
- Developing and maintaining quality of work life;
- Being ethically and socially responsive to the needs of the community;
- Developing overall personality of each employee in its multidimensional aspect;
- Enhancing employee's capabilities to perform the present job; and
- Ensuring service excellence for the broader Stellenbosch community.

The Human Resources services include:

- Strategic Human Resources Management,
- Labour Relations;
- Recruitment and Selection;
- Training and Development;
- Employee Assistance;
- Occupational Health and Safety;
- Employment Equity; and
- All Human Resources Administration.

Each director, manager, departmental head, superintendent, assistant superintendent and foreman are responsible for setting objectives, delegating responsibilities and tasks, motivating staff, disciplining staff, developing skills and career paths, measuring performance and generally guiding their staff. In these endeavours, management and line management are assisted by the Human Resource Department, who provides policies, guidelines, support, systems and specialised inputs.

Main focus priorities for HR Services in 2019/20 were:

- Implementation of the biometric time and attendance system:
The system was implemented from November 2018 and most workplaces has a finger device installed where employees log in. The system worked and accurate records of movement and attendance could be monitored. However, due to the COVID-19 pandemic the system was disabled in March 2020 until further notice. Other options in terms of alternative registering methods is currently under investigation and consideration.
- Finalisation of Human Resources management policies;

The following policies was approved during 2019/20:

- a) Measures to Recover Arrear Monies from Employees owing on their municipal accounts to Stellenbosch Municipality for a period of 90 plus – 01 August 2019.
 - Implementation of the TASK Job Evaluation System:
The policy was adopted and concluded and currently job descriptions are forwarded for evaluation to the CWJEU.
 - Finalisation of historical human resources issues:
The placement of permanent staff and some contract staff has been completed and the employees in the pool are currently being resolved.

The highlights for the Human Resources Department in 2019/20 were the following:

- 230 employees were trained;
- 1st online / virtual training for the Finance Department;
- 14 employees sent for Municipal Minimum Competency Level Training;
- During 2019/20 only 5 out of 19 SALGBC arbitrations were ruled against the Municipality;
- OHS Training were provided to 55 Health and Safety Representatives, 23 First Aider Training and 13 Fire Warden;
- 6 directorate specific recruitment email addresses for emailed job applications were created;
- Virtual shortlisting discussions were conducted via MS Teams;
- Virtual interviews and assessments were conducted via MS Teams; and
- Virtual induction sessions were conducted via Zoom and MS Teams.

The challenges for the Human Resources Department in 2019/20 were the following:

- Shortage of conducive training venues;
- The provision of staff wellness services to the employees of Stellenbosch Municipality; and
- Suitably qualified / trained Chairpersons and Initiators within the Stellenbosch Municipality.

The following was submitted within the 2019/20 year and is under consideration at the LLF:

- a) Measures to recover arrear monies from employees;
- b) TASK Evaluation policy; and
- c) Employee Parking Policy.

3.15.2.1 Total employees – HR

Table 3:87: Total Employees – HR

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 2 | 1 | 1 | 4.55% |
| 15 – 13 | 6 | 4 | 2 | 9.09% |
| 12 – 10 | 9 | 5 | 4 | 18.18% |
| 9 – 7 | 1 | 0 | 1 | 4.55% |
| 6 – 4 | 4 | 1 | 3 | 9.09% |
| 3 – 0 | 0 | 0 | 0 | 0 |
| Total | 22 | 11 | 11 | 45.46% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.15.2.2 Information and Communication Technology (ICT) Services

The ICT department committed its time in the 2019/20 financial year to purchasing and replacing computer software and hardware to improve the efficiency of the various municipal business units.

Highlights:

- Firewall Project was extended by way of procuring 2 additional firewall hardware devices for our DR site located at TERACO. These newly procured items will act as secondary firewalls synchronising with the main firewall at our Data Centre, that was implemented during the 2019/20 financial year.
- The municipality's Data Storage for ICT systems was further capacitated by procuring an additional Tintri VMstore T850 hybrid-flash solution. Tintri's VMware storage speeds performance 6x to save us time and packs storage 10x more densely to save us money.
- Telephony Voice Services was successfully moved from Liquid Telecom to Telkom / BCX with the aim of further reducing our monthly costs. This procurement included redundancy by way of making available a redundant service at our Traffic services that can provide a service in the event the main building service fails.
- High Site wireless hardware links were procured and delivered during this time with the plan to upgrade our network to the outer laying areas under the WC024 area. These are the larger high end wireless devices that will be installed at our high sites on the different mountain ranges where we have towers installed.
- The team further spent time on taking over the network support of the camera infrastructure by way of extending the Avalon contract to cover this critical service. This has reduced the cost of this service as the ICT network has been able to incorporate the camera Infrastructure. This has in turn saved the municipality and the public money in providing this critical service.
- The newly commissioned Server room saw us add additional server storage hardware to accommodate for the other law and enforcement and traffic services moving into the server room. This included flexible high speed storage which is easily shared as and when required. Additional storage cabinets (x2) were further procured to accommodate for future growth in this space.
- The ICT Department spent a large amount of its effort on once again reducing costs by way of procuring printers via the National treasury RT3-2018 contract. Our costs for replacing toners had

skyrocketed during the year and this change needed to happen soonest. This contract saw us reduce our printer footprint and begin to centrally manage usage across printers. The many office printers were replaced with shared departmental printers further assisting in reducing costs.

- Successfully implemented the Housing Database System VOIS for Human Settlement.
- Software Audit Financial Year 2019/20 was conducted, and the report was submitted to the ICT Steering Committee.
- The upgrade of the Backup Infrastructure to accommodate and include all critical systems to ensure sustainability of the ICT services.
- A Geospatial Forum was established.
- Biometric project was revived and municipal officials are clocking in. The system ensured effective monitoring of staff attendance and movement but had to be disabled when lockdown was announced. We are currently investigation other options of electronic measurements.
- Biometric Morph software was upgraded to version 14 and is currently stable. There were 28 more clocks which were added at various municipal sites. Biometrics reports are currently distributed monthly to all departments.
- Microsoft System Center Configuration Manager (SCCM) was deployed to assist with Microsoft 365 upgrade.
- ICT developed an Enterprise Architecture Framework to show the view of the current ICT environment with regards to High-level business processes, ICT Governance, ICT Processes, Application and Data Architecture, Infrastructure Architecture and ICT Resources and Skill
- All existing ICT Policies were reviewed, and new ICT Policies were developed and approved by the ICT Steering Committee.
- ICT Governance, Risk and Compliance Management Framework was developed to institutionalise the Corporate Governance of ICT and ICT Risk Management as an integral part of corporate governance within municipalities in a uniform and coordinated manner.
- The Disaster Recovery and Colocation Services project including WAN and Internet Services were successfully implemented by First Technology and will remain in place till the 30 June 2022. The DR site is at TERACO in Claremont and meets all the AG requirements.

Challenges:

- ICT structure does not align to best practices and thus cannot be agile enough to support the municipality.
- Lack of system integration.
- After hours' system maintenance resources to ensure continued service provision, especially after load shedding / power failure.

3.15.2.3 Service Statistics – Information and Communication Technology (ICT) Services

Table 3:88: Service Statistics – ICT

| Details | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|---|---------|---------|---------|---------|---------|---------|
| | % | | | | | |
| Ensure the availability of the network to ensure effective ICT systems for municipal processes | 98 | 98 | 99.9 | 99.9 | 99 | 99 |
| Provide ICT support to all municipal departments by attending to requests within 4 working days | 97 | 98 | 98 | 98 | 98 | 98 |
| Connecting all municipal sites to the ICT network | 100 | 100 | 100 | 100 | 100 | 100 |

3.15.2.4 Capital Expenditure – Information and Communication Technology (ICT) Services

Table 3:89: Capital Expenditure as at 30 June 2019: ICT Services

| Capital Projects | Adjustment Budget | Actual Expenditure | Variance from Adjustment Budget |
|--|-------------------|--------------------|---------------------------------|
| | R | | |
| Upgrade and Expansion of IT Infrastructure Platforms | 8 439 969 | 8 343 315 | -1.15% |
| Purchase and Replacement of Computer / software and Peripheral devices | 1 230 230 | 534 915 | -56.52% |
| Public WI-FI Network | 548 400 | 547 658 | -0.14% |

ICT have spent, **92.24%** of the capital budget for the financial year.

3.15.2.5 Total employees – Information and Communication Technology (ICT) Services

Table 3:90: Total Employees – ICT

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|-----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 3 | 3 | 0 | 0% |
| 15 – 13 | 1 | 1 | 0 | 0% |
| 12 – 10 | 11 | 11 | 0 | 0% |
| 9 – 7 | 0 | 0 | 0 | 0% |
| 6 – 4 | 0 | 0 | 0 | 0% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 15 | 15 | 0 | 0% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.f.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.15.3 LEGAL SERVICES

The Legal Services Department in conjunction with user departments ensures and manages the implementation, monitoring, evaluation and reporting on sequences of outcomes associated with programmes designed to accomplish key service delivery objectives with respect to Legal Services.

The main objectives are the following:

- Advice and manage litigations instituted by the municipality and against it;
- Provide legal advice, opinions and input on policies, contracts, agreements, memorandums, legislation, by-laws and authorities;
- Advising Council on items submitted to meetings;
- To ensure by-laws are promulgated after consultation with user departments and approval by Council; and
- Attend to new legislation and proclamations for comment as and when required.

Challenges:

- To deal with urgent requests for legal input to Portfolio and Council Committees.
- Lack of skilled administrative support to chief legal advisor.
- Availability of well-maintained legal library and reference resources.

3.15.3.1 Total employees – Legal Services**Table 3:91: Total Employees – Legal Services**

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 1 | 0 | 0% |
| 15 – 13 | 0 | 0 | 0 | 0% |
| 12 – 10 | 0 | 0 | 0 | 0% |
| 9 – 7 | 0 | 0 | 0 | 0% |
| 6 – 4 | 0 | 0 | 0 | 0% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 1 | 1 | 0 | 0% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.t.o. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

3.15.3.2 Municipal Court – Additional Court - Stellenbosch

The Municipal Court is responsible for the following Prosecutions:

- Traffic by-laws;
- Provincial Traffic by-laws;
- SAPS by-laws;
- Law Enforcement by-laws;
- Fire by-laws;
- Building and Land Use Regulations, and all other By- Law contraventions;
- Electrical By-laws; and
- Noise pollution.

Mission Statement

Our aim is to: -

- promote Justice and service delivery;
- enhance revenue to invest in our community;
- "let Justice be seen to be done"; and
- minimise crime and have a safer Stellenbosch.

The Municipal Court was established to:

- Support and secure good governance;
- Ease the burden on regular courts;
- Increase the speed of services;
- Allow for more successful prosecutions by applying specialist knowledge;

- Improve communications between the by-law prosecutors and enforcers;
- Support by-law enforcement;
- Ensure a user friendly court; and
- Keeps members of the public who committed a minor crime (such as a traffic offence) away from hardened criminals.

Our revenue for the past financial year amounted to a healthy R3 957 980 with a number of 13,859 cases on our court role.

We are also looking into having an Ad Hoc Court in Franschhoek / Klapmuts in the near future. This could be another boost for our Municipal Court service to the community. Prosecuting some of our cases in the Paarl Magistrate's Court is also currently being considered.

The introduction of the Additional Municipal Court has definitely been an essential, strategic implementation that will benefit the whole community of Stellenbosch.

3.15.3.3 Statistical Report – Case Load

Table 3:92: Statistical Report Case load

| Months: | Jul | Aug | Sep | Oct | Nov | Dec | Jan | Feb | Mar | Apr | May | June |
|----------------------------|-----|-------|------|-------|-------|-----|-------|-----|-----|-----|-----|-------|
| Cases on the role | 656 | 1 255 | 1096 | 1 096 | 1 297 | 823 | 1 693 | 577 | 457 | 21 | 894 | 1 058 |
| Withdrawn | 6 | 0 | 0 | 10 | 4 | 1 | 6 | 8 | 2 | 0 | 0 | 38 |
| Struck of the role | 30 | 48 | 69 | 31 | 33 | 63 | 68 | 11 | 21 | 0 | 2 | 0 |
| Warrants authorised | 576 | 1 110 | 965 | 986 | 1 197 | 748 | 1 589 | 547 | 410 | 0 | 885 | 991 |
| Deferment | 0 | 14 | 7 | 4 | 29 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| Payments | 40 | 73 | 53 | 65 | 34 | 10 | 5 | 2 | 20 | 0 | 4 | 1 |
| Postponed | 4 | 5 | 0 | 0 | 0 | 1 | 25 | 9 | 4 | 21 | 3 | 28 |
| Mediations | 0 | 5 | 2 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

3.15.3.4 Financial Report

Table 3:93: Financial Report of the Municipal Court

| | Traffic Fines | Saps Fines | Law Enforcement Fines | Contempt of Court Fines | Provincial Fines | Electricity | Building | Total Amount |

3.15.3.5 Total employees – Municipal Court

Table 3:94: Total Employees – Municipal Court

| Job Level* | Posts* | Employees* | Vacancies (full time equivalents) | Vacancies (as a % of total posts) |
|--------------|----------|------------|-----------------------------------|-----------------------------------|
| Number | | | | % |
| 18 – 16 | 1 | 0 | 0 | 0% |
| 15 – 13 | 1 | 1 | 1 | 16.7% |
| 12 – 10 | 0 | 0 | 0 | 0% |
| 9 – 7 | 1 | 1 | 0 | 0% |
| 6 – 4 | 3 | 3 | 0 | 0% |
| 3 – 0 | 0 | 0 | 0 | 0% |
| Total | 6 | 5 | 1 | 16.7% |

* Employee statistics will be imprecise due to the implementation of the 2017 structure, the TASK gradings of 2015 and the revised TASK gradings currently used by the Human Resources Department which are based on actual evaluations or benchmarking against industry norms. The difference between gradings implemented up to 2015 and the new gradings on the municipality's payroll system creates some anomalies i.e. accurate figures on job and occupation levels. The municipality is busy rectifying these anomalies through the implementation of the new structure and with the implementation of standard industry norms and TASK gradings.

CHAPTER 4: ORGANISATIONAL DEVELOPMENT PERFORMANCE

4.1 NATIONAL KEY PERFORMANCE INDICATORS – MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations of 2001 and section 43 of the MSA. These key performance indicators are linked to the National Key Performance Area – Municipal Transformation and Organisational Development.

Table 4.1: National KPIs – Municipal Transformation and Organisational Development

| KPA and Indicators | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|---|---------|---------|---------|---------|----------|--|
| The number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan | 4 | 13 | 4 | 50%* | 33%* | 66.67% |
| The percentage of a municipality's budget actually spent on implementing its workplace skills plan | 0.83% | 0.97% | 0.94% | 72%** | 94.56%** | R2 262 082.24 / R1 778 283 844 x 100 = 0.13% |
| <p>*The unit of measurement changed from number to percentage for the employment equity target.</p> <p>** Percentage was calculated using the total personnel budget as in terms of the Skills Development Act. The aforementioned percentage for the 2018/19 financial year is based on the Total Annual Payroll as depicted in the SDBIP.</p> | | | | | | |

4.2 INTRODUCTION TO THE MUNICIPAL WORKFORCE

Stellenbosch Municipality, as at 30 June 2020, employed **1 158** officials (excl. Councillors) (excluding non-permanent positions), who individually and collectively contribute to the achievement of the municipality's objectives. The primary objective of Human Resource Management is to render an innovative HR service that addresses both skills development and an administrative function.

4.2.1 EMPLOYMENT EQUITY

The Employment Equity Act (1998), Chapter 3, section 15 (1), states that affirmative action measures are measures designed to ensure that suitable qualified people from designated groups have equal employment opportunities and are equitably represented in all occupational categories and levels in the workforce of a designated employer. The national performance indicator also refers to the "number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan" The following table provides clarity on the employment equity status as at 30 September 2020.

Table 4.2: EE Targets/Actual by Racial Classification

| | African | | | Coloured | | | Indian | | | White | | |
|---------|-------------|-------------|----------------|-------------|-------------|----------------|-------------|-------------|----------------|-------------|-------------|----------------|
| | Target June | Actual June | Target reached | Target June | Actual June | Target reached | Target June | Actual June | Target reached | Target June | Actual June | Target reached |
| 2015/16 | 334 | 361 | 92.52% | 497 | 676 | 73.52% | 28 | 3 | 9.33% | 83 | 111 | 74.77% |
| 2016/17 | 334 | 368 | 90.76% | 497 | 671 | 74.06% | 23 | 5 | 4.60% | 75 | 103 | 72.81% |
| 2017/18 | 334 | 378 | 113% | 497 | 671 | 74.06% | 23 | 4 | 17% | 75 | 110 | 146% |
| 2018/19 | 334 | 372 | 111.4% | 497 | 651 | 131% | 23 | 4 | 17% | 75 | 94 | 125.3% |
| 2019/20 | 334 | 383 | 111.4% | 497 | 680 | 137% | 23 | 4 | 17% | 75 | 96 | 128% |

Table 4.3: Targets/Actual by Gender Classification

| | Male | | | Female | | | Disability | | |
|---------|-------------|-------------|----------------|-------------|-------------|----------------|-------------|-------------|----------------|
| | Target June | Actual June | Target reached | Target June | Actual June | Target reached | Target June | Actual June | Target reached |
| 2015/16 | 425 | 783 | 54.27% | 518 | 368 | 71.04% | 0 | 0 | n/a |
| 2016/17 | 681 | 782 | 78.87% | 670 | 363 | 54.18% | 0 | 10 | n/a |
| 2017/18 | 681 | 785 | 115% | 670 | 378 | 56% | 10 | 10 | 100% |
| 2018/19 | 681 | 750 | 110.1% | 670 | 371 | 55.3% | 10 | 10 | 100% |
| 2019/20 | 681 | 760 | 111.6% | 670 | 398 | 59.4% | 10 | 10 | 100% |

4.2.1.1 Occupational categories - Race

The table below categorises the number of employees by race within the occupational levels:

Table 4.4: Occupational Categories – Race

| Occupational Levels | Male | | | | Female | | | | Total |
|---|------------|------------|----------|-----------|------------|------------|----------|-----------|--------------|
| | A | C | I | W | A | C | I | W | |
| Top Management and Councillors | 4 | 16 | 0 | 6 | 5 | 9 | 0 | 7 | 47 |
| Senior management | 2 | 11 | 0 | 9 | 1 | 3 | 0 | 0 | 26 |
| Professionally qualified and experienced specialists and mid-management | 9 | 25 | 2 | 11 | 9 | 15 | 1 | 9 | 81 |
| Skilled technical and academically qualified workers, junior management, supervisors, foremen and superintendents | 52 | 155 | 1 | 31 | 72 | 120 | 0 | 23 | 454 |
| Semi-skilled and discretionary decision making | 82 | 125 | 0 | 3 | 28 | 60 | 0 | 3 | 301 |
| Unskilled and defined decision making | 103 | 135 | 0 | 0 | 25 | 27 | 0 | 0 | 290 |
| Total permanent | 252 | 467 | 3 | 60 | 140 | 234 | 1 | 42 | 1 199 |
| Non- permanent employees (incl. EPWP, Conditional Grants, Provincial Grants) | 12 | 20 | 0 | 2 | 14 | 29 | 0 | 2 | 79 |
| Grand total | 264 | 487 | 3 | 62 | 154 | 248 | 1 | 44 | 1 278 |

4.2.1.2 Directorates by Race

The following table categorises the number of employees by race within the different Directorates:

Table 4:5: Directorates by Race

| Directorate | Male | | | | Female | | | | Total |
|---|------------|------------|----------|-----------|------------|------------|----------|-----------|--------------|
| | A | C | I | W | A | C | I | W | |
| Office of the Mayor | 4 | 13 | 0 | 5 | 5 | 8 | 0 | 6 | 41 |
| Office of the Municipal Manager | 0 | 2 | 0 | 1 | 3 | 5 | 0 | 2 | 13 |
| Financial Services | 7 | 31 | 1 | 3 | 21 | 48 | 0 | 6 | 117 |
| Planning and Economic Development | 7 | 26 | 0 | 6 | 15 | 19 | 0 | 6 | 79 |
| Corporate Services | 10 | 30 | 1 | 2 | 13 | 22 | 0 | 5 | 83 |
| Community and Protection Services | 81 | 128 | 1 | 25 | 62 | 99 | 1 | 13 | 410 |
| Infrastructure Services | 143 | 237 | 0 | 18 | 21 | 33 | 0 | 4 | 456 |
| Total permanent | 252 | 467 | 3 | 60 | 140 | 234 | 1 | 42 | 1 199 |
| Non-permanent (incl. EPWP, Conditional Grants, Provincial Grants) | 12 | 20 | 0 | 2 | 14 | 29 | 0 | 2 | 79 |
| Grand total | 264 | 487 | 3 | 62 | 154 | 248 | 1 | 44 | 1 278 |

4.2.2 VACANCY RATE

The approved organogram for the Municipality had **1 120** (funded) posts based on the 2017/18 financial year. On 1 July 2018 the approved organogram of 25th October 2017 was implemented which brought about a total post compliment of 1 873 posts and was further reviewed and revised with another 123 posts which made the total post compliment 1 996 posts on 27 February 2019. The actual positions filled in the 2019/20, financial year are indicated in the tables below by post level and by functional level. A total of 838 posts were vacant at the end of 2019/20, resulting in a vacancy rate of **41.98%**. Below is a table that indicates the vacancies within the municipality:

Table 4:6: Vacancy rate per post and functional level

| Per Post Level | | |
|---|-------------------------------------|------------|
| Post level | Filled | Vacant |
| Top Management (MM and MSA section 57 Managers) | 6 | 0 |
| Senior Management | 26 | 6 |
| Middle management | 81 | 21 |
| Skilled technical and academically qualified workers, junior management, supervisors, foremen and superintendents | 454 | 289 |
| Semi-skilled | 301 | 522 |
| Unskilled and defined decision making | 290 | 0 |
| Total | (Excluding Councillors) 1158 | 838 |
| Per Functional Level | | |
| Functional area | Filled | Vacant |
| Office of the Mayor | 41 | 0 |
| Office of the Municipal Manager | 13 | 12 |
| Financial Services | 117 | 60 |
| Planning and Economic Development | 79 | 55 |
| Corporate | 83 | 80 |
| Community and Protection Services | 410 | 205 |

| Per Post Level | | |
|-------------------------|-------------------------------------|------------|
| Post level | Filled | Vacant |
| Infrastructure Services | 456 | 426 |
| Total | (Including Councillors) 1158 | 838 |

4.2.3 TURNOVER RATE

A high turnover may be costly to a municipality and might negatively affect productivity, service delivery and institutional memory / organisational knowledge. Below is a table that shows the turnover rate in the municipality.

The table below indicates the turn-over rate over the last five years:

Table 4:7: Turn-over Rate

| Financial year | Total no appointments at the end of each Financial Year | New appointments | Number of terminations during the year | Turn-over Rate |
|----------------|---|------------------|--|----------------|
| 2015/16 | 1 110 | 136 | 71 | 6.4% |
| 2016/17 | 1 144 | 100 | 36 | 3.14% |
| 2017/18 | 1 120 | 42 | 69 | 6.16% |
| 2018/19 | 1 121 | 55 | 39 | 3.47% |
| 2019/20 | 1 158 | 60 | 51 | 4.40% |

4.2.4 MANAGING THE MUNICIPAL WORKFORCE

Managing the municipal workforce refers to analysing and coordinating employee behaviour.

4.2.4.1 Injuries

An occupational injury is a personal injury, disease or death resulting from an occupational accident. Compensation claims for such occupational injuries are calculated according to the seriousness of the injury/disease and can be costly to a municipality. An occupational injury will influence the loss of man hours and therefore financial and productivity performance.

The injury rate shows an increase for the 2019/20 financial year from 86 employees in 2018/19 to 96 employees in the 2019/20 financial year. The table below indicates the total number of injuries within the different directorates:

Table 4:8: Injuries as at 30 June

| Directorates | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|--|------------|------------|------------|-----------|-----------|
| Office of the Municipal Manager | 2 | 1 | 1 | 0 | 0 |
| Financial Services | 2 | 3 | 0 | 0 | 2 |
| Planning and Economic Development Services | 0 | 0 | 3 | 3 | 2 |
| Corporate Services | 2 | 1 | 1 | 1 | 7 |
| Community and Protection Services | 40 | 54 | 73 | 49 | 36 |
| Infrastructure Services | 86 | 64 | 42 | 32 | 42 |
| Human Settlements and Property Management | 4 | 7 | 5 | 1 | 3 |
| Total | 136 | 130 | 120 | 86 | 92 |

Injuries in the Operational Services are normally higher due to the nature of work and the constant handling of equipment and machinery.

4.2.4.2 Sick Leave

The number of days' sick leave taken by employees has service delivery and cost implications. The monitoring of sick leave identifies certain patterns or trends. Once these patterns are identified, corrective action can be taken.

The total number of employees that have taken sick leave during the 2019/20 financial year shows an decrease of 1 524 working days when comparing it to the 2018/19 financial year.

The table below indicates the total number of sick leave days taken within the different directorates:

Table 4:9: Sick Leave as at 30 June

| Department | 2015/16 | 2016/17 | 2017/18 | 2018/19 | 2019/20 |
|--|------------------|-----------------|--------------|--------------|-----------------|
| Office of the Municipal Manager | 342 | 96 | 66 | 89 | 83.5 |
| Financial Services | 1 339.5 | 908.50 | 631 | 692 | 679 |
| Planning and Economic Development | 1 244.5 | 501 | 267 | 393 | 425 |
| Corporate Services | 808.43 | 727 | 410 | 493 | 593.87 |
| Community and Protection Services | 3 758.5 | 2 726 | 1 562 | 2 958 | 1803.19 |
| Infrastructure Services | 5 230 | 3 633 | 2 730 | 2 765 | 2646 |
| Human Settlements and Property Management* | 8 | 455 | 444 | 364 | - |
| Total | 12 730.93 | 9 046.50 | 6 110 | 7 754 | 6 230.56 |

Note: These Sections' figures will be incorporated in the Planning and Economic Development and Corporate Services Directorates respectively for the 2019/20 financial year. The Human Resources System will be modified to effect these organogram changes.

4.2.4.3 Human Resources Policies and Plans

Policies and plans provide guidance for fair and consistent staff treatment and a consistent approach to the managing of staff.

The table below shows the status of the Human Resources policies and plans:

Table 4:10: Approved Policies

| Name of policy | Date approved / revised |
|---|-------------------------|
| Guidelines for Official Parking | August 2008 |
| Staff Attraction and Retention Policy | August 2008 |
| Smoking Policy | August 2008 |
| Skills Development Policy | August 2008 |
| Minimum Service Level Agreement on Essential Services | August 2008 |
| Recruitment and Selection | 29 November 2012 |
| Leave Policy Guideline and Procedures | 29 November 2012 |
| Overtime and Standby Policy Guidelines and Procedures | 29 November 2012 |
| Occupational Health and Safety Policy | 29 November 2012 |
| HIV AIDS Policy | 29 November 2012 |
| Employee Assistance Programme | 25 February 2015 |
| Education, Training, Development Policy | 25 February 2015 |
| Attendance and Punctuality Policy | 25 February 2015 |

| Name of policy | Date approved / revised |
|--|-------------------------|
| Evaluation of Probationary Periods Policy | 25 February 2015 |
| Whistleblowing Policy | 25 February 2015 |
| New Occupational Health and Safety Policy | 25 February 2015 |
| Substance Abuse Policy | 25 February 2015 |
| Succession Planning and Career Patching Policy | 25 February 2015 |
| Unpaid leave policy | 25 February 2015 |
| Work Related Functions Policy | 25 February 2015 |
| Nepotism Policy | 25 February 2015 |
| External Bursary Aid Policy | 25 February 2015 |
| Smoking Policy (Review) | 25 October 2017 |
| Communication Policy | 25 July 2018 |
| Guidelines on Flexi-time | 25 July 2018 |
| Time and Attendance | 26 September 2018 |
| Employee Bursary Policy (Internal) | 26 September 2018 |
| Proposal on Appointment of Certain Temporary Employees during the Restructuring Process | 26 September 2018 |
| Firearms Policy | 28 November 2018 |
| Acting Allowance Policy | 28 November 2018 |
| Motor Vehicle Allowance Policy | 28 November 2018 |
| Guidelines on Negotiation in regard to Remuneration (Within the National Negotiated Framework) for the Retention and Attraction of Staff | 24 April 2019 |
| Additional Allowance Responsibility Policy | 24 April 2019 |
| MS;A: Essential Services | 04 June 2019 |
| TASK Implementation Policy | 26 February 2020 |

Table 4:11: Policies still to be developed

| Policies still to be developed | |
|---|--|
| Name of policy | Proposed date of approval |
| Measures to Recover Arrear Monies from Employees owing on their municipal accounts to Stellenbosch Municipality for a period of 90 days plus. | 1 August 2019
(this policy was delegated for approval by the Municipal Manager) |
| HIV AIDS Policy (Review). | 30 June 2021 |
| New Recruitment and Selection Policy. | 30 June 2021
(policy currently at HR Sub-Committee for discussion). |
| Staff Parking Policy. | To be tabled at the October 2020 Council meeting for approval. |
| Consequence Management Policy. | To be tabled at the November 2020 Council meeting for approval. |

The Human Resources Department submits policies to the Local Labour Forum on a regular basis for review purposes.

4.2.5 CAPACITY BUILDING OF THE MUNICIPAL WORKFORCE

Section 68(1) of the MSA states that a municipality must develop its human resource capacity to a level that enables it to perform its functions and exercise its powers in an economical, effective, efficient and accountable way. For this purpose, the human resource capacity of a municipality must comply with the Skills Development Act (SDA), 1998 (Act No. 81 of 1998), and the Skills Development Levies Act, 1999 (Act No. 28 of 1999).

4.2.5.1 Skills Matrix

The table below indicates the number of employees that received training in the year under review:

Table 4:12: Skills Matrix

| Management level | Gender | Number of employees identified for training at start of the year | Number of employees that received training |
|--|---------------|--|--|
| MM and S57 | Female | 0 | 0 |
| | Male | 0 | 0 |
| Legislators, senior officials and managers | Female | 1 | 3 |
| | Male | 15 | 15 |
| Professionals | Female | 13 | 1 |
| | Male | 10 | 1 |
| Associate professionals and Technicians | Female | 15 | 3 |
| | Male | 72 | 23 |
| Community and Personal Services | Female | 0 | 0 |
| | Male | 0 | 0 |
| Clerks | Female | 75 | 6 |
| | Male | 10 | 2 |
| Service and sales workers | Female | 53 | 73 |
| | Male | 81 | 130 |
| Plant and machine operators and assemblers | Female | 0 | 0 |
| | Male | 17 | 17 |
| Elementary occupations | Female | 26 | 15 |
| | Male | 167 | 90 |
| Sub-total | Female | 183 | 101 |
| | Male | 372 | 278 |
| Total | | 555 | 379 |

4.2.5.2 Skills Development – Training provided

The Skills Development Act, 1998 (Act No. 97 of 1998) and the MSA, require that employers supply employees with the necessary training in order to develop its human resource capacity. Section 55(1)(f) states that as head of administration, the Municipal Manager is responsible for the management, utilisation and training of staff.

4.2.5.3 Skills Development - Budget allocation

The table below indicates that a total amount of **R 4 493 705** was allocated to the workplace skills plan and that **37.5%** of the total amount was spent in the 2019/20 financial year:

Table 4:13: Budget allocated and spent for skills development

| Year | Total personnel budget | Total Allocated | Total Spend | % Spent |
|---------|------------------------|-----------------|-------------|---------|
| | R | R | R | |
| 2013/14 | 280 637 485 | 2 450 170 | 1 776 397 | 73 |
| 2014/15 | 324 832 04 | 2 743 370 | 2 716 719 | 99 |
| 2015/16 | 416 062 658 | 3 420 000 | 3 406 325 | 99 |
| 2016/17 | 7 801 472 | 3 400 000 | 3 204 069 | 94 |
| 2017/18 | 444 578 881 | 4 919 000 | 3 541 680 | 72 |
| 2018/19 | 528 251 635 | 2 511 080 | 2 374 501 | 94 |
| 2019/20 | 577 204 284 | 4 493 705 | 1 686 233 | 37.5 |

4.2.6 MANAGING THE MUNICIPAL WORKFORCE EXPENDITURE

4.2.6.1 Personnel Expenditure

The percentage personnel expenditure is essential in the budgeting process as it reflects on current and future efficiency. The table below indicates the percentage of the municipal budget that was spent on salaries and allowance for the past three financial years and that the municipality is well below the national norm of between 35 to 40%:

Table 4:14: Personnel Expenditure as % of Total Operating Expenditure

| Financial year | Total expenditure salary and allowances | Total operating expenditure | Percentage |
|----------------|---|-----------------------------|------------|
| | R | | % |
| 2014/15 | 282 932 | 1 047 586 | 27% |
| 2015/16 | 313 819 | 1 150 240 | 27% |
| 2016/17 | 367 463 | 1 254 937 | 29% |
| 2017/18 | 407 801 | 1 307 335 | 31% |
| 2018/19 | 444 711 | 1 508 629 | 29% |
| 2019/20 | 481 583 | 1 661 441 | 29% |

Below is a summary of Councillor and staff benefits for the year under review:

Table 4:15: Councillor and staff benefits

| Financial year | 2018/19 | 2019/20 | 2019/20 | 2019/20 |
|--|----------------|-----------------|-----------------|----------------|
| Description | Actual | Original Budget | Adjusted Budget | Actual |
| Councillors (Political Office Bearers plus Other) | | | | |
| Salary | 11 509 | 11 322 | 12 934 | 12 263 |
| Pension Contributions | 557 | 132 | 800 | 559 |
| Medical Aid Contributions | 222 | 50 | 87 | 215 |
| Motor Vehicle Allowance | 4 136 | 4 139 | 4 667 | 4 331 |
| Cell Phone and Other Allowances | 1 849 | 1 740 | 1 263 | 1 754 |
| Sub-Total - Councillors | 18 272 | 17 384 | 19 751 | 19 121 |
| % Increase/(Decrease) on Actual | 8.44% | 9.11% | 9.11% | 4.64% |
| Other Municipal Staff | | | | |
| Basic Salaries and Wages | 300 678 | 301 814 | 323 631 | 322 143 |
| Pension and UIF Contributions | 45 559 | 47 734 | 60 625 | 48 803 |
| Medical Aid Contributions | 21 652 | 21 652 | 25 249 | 23 337 |
| Overtime | 37 414 | 44 111 | 51 545 | 31 607 |
| Performance Bonus | 710 | 591 | 0 | 591 |
| Motor Vehicle Allowance | 9 781 | 9 519 | 13 959 | 10 048 |
| Cellphone Allowance | 1 342 | 1 342 | 1 003 | 1 631 |
| Housing Allowances | 2 853 | 2 853 | 2 875 | 2 916 |
| Other benefits and allowances | 6 615 | 30 766 | 76 738 | 30 951 |
| Payments in lieu of leave | 5 321 | 858 | 2 007 | -1 |
| Long service awards | 4 840 | -6 | 66 | 4 109 |
| Post-retirement benefit obligations | 7946 | 421 | 34 | 5 448 |
| Sub-Total - Other Municipal Staff | 444 711 | 461 655 | 557 733 | 481 583 |
| % Increase/(Decrease) | 8.58% | 3.81% | 25.41% | 8.29% |
| Total Municipality | 462 984 | 626 465 | 580 988 | 500 745 |
| % Increase / (Decrease) | 8.77% | 35.31% | 25.49% | 8.16% |

5 CHAPTER 5: FINANCIAL PERFORMANCE

5.1 COMPONENT A: STATEMENTS OF FINANCIAL PERFORMANCE

The Statement of financial performance provides an overview of the financial performance of the municipality and focuses on the financial health of the municipality.

5.1.1 FINANCIAL SUMMARY

The table below indicates the summary of the financial performance for the 2019/20 financial year:

Table 5.1: Financial Performance

| Description | 2018/19 | 2019/20 | | | 2019/20 Variance | |
|---|-----------|-----------------|-------------------|-----------|------------------|-------------------|
| | Actual | Original Budget | Adjustment Budget | Actual | Original Budget | Adjustment Budget |
| | R'000 | | | | % | |
| Financial Performance | | | | | | |
| Property rates | 330 960 | 356 122 | 356 122 | 360 089 | 1.11 | 1.11 |

5.3 GRANTS

5.3.1 GRANT PERFORMANCE

The Municipality had a total amount of **R 172 million** for operational expenditure available that was received in the form of grants from the National and Provincial Governments during the 2019/20 financial year. The performance in the spending of these grants are summarised as follows:

Table 5:30: Grant Performance

5.3.2 LEVEL OF RELIANCE ON GRANTS AND SUBSIDIES

Table 5.31: Reliance on Grants

| Financial year | Total grants and subsidies received | Total Operating Revenue | Percentage |
|----------------|-------------------------------------|-------------------------|------------|
| | R'000 | | % |
| 2015/16 | 227 268 | 1 411 274 | 16.10 |
| 2016/17 | 227 752 | 1 534 354 | 14.84 |
| 2017/18 | 211 190 | 1 609 728 | 13.12 |
| 2018/19 | 233 433 | 1 541 685 | 15.14 |
| 2019/20 | 285 026 | 1 618 222 | 17.61 |

Developers contributions have been excluded from the grant item to express only allocations and not policy related revenue which NT allocates to capital revenue. It would distort the reliance on grant calculation if excluded from the above ratio.

5.4 ASSET MANAGEMENT

Asset management is practised within the organisation based on a comprehensive Asset Management Policy. The Asset Management Policy provides direction for the management, accounting and control of property, plant and equipment (assets) owned or controlled by the municipality to ensure the following:

Implementation of the approved Asset Management Policy as required in terms of section 63 of MFMA.

- Verify assets in possession of the Council annually, during the course of the financial year.
- Keep a complete and balanced record of all assets in possession of the Council.
- Report in writing all asset losses, where applicable, to Council.
- Those assets are valued and accounted for in accordance with a statement of GRAP.

5.5 REPAIRS AND MAINTENANCE

5.9 BASIC SERVICES AND INFRASTRUCTURE BACKLOGS - OVERVIEW

Out of the various Master Plans revised, various infrastructure backlogs and upgrades were identified which will be required to meet current and future development needs. Budgetary provision will be made accordingly.

The service level above minimum standard can be interpreted as the backlogs to upgrade current households above minimum standard to households supplied with water inside dwelling.

In terms of the definition for backlogs for the minimum standard water supply, Stellenbosch Municipality has zero (0) backlogs. Major backlogs exist in terms of dilapidated infrastructure and the bulk services to provide for future development and current provision of water and sanitation.

5.10 INTEGRATED URBAN DEVELOPMENT GRANT (IUDG)

Table 5:40: Integrated Urban Development Grant (IUDG)

| Details | Budget | Adjustment Budget | Actual | Variance Budgets |

6 CHAPTER 6: AUDITOR GENERAL AUDIT FINDINGS

6.1 INTRODUCTION

This chapter provides the details on the audit outcomes for the past two financial years with the correctives steps implemented.

6.2 COMPONENT A: AUDITOR-GENERAL OPINION 2018/19

6.2.1 AUDITOR GENERAL REPORT 2018/19

Table 6.1: Auditor General Report 2018/19

| 2018/19 | |
|---|--|
| Audit Report Status: | Unqualified with findings |
| 2018/19 | |
| Issue raised | Corrective step implemented |
| Emphasis of matter: | |
| Restatement of corresponding figures | |
| As disclosed in note 63 to the financial statements, the corresponding figures for 30 June 2018 were restated as a result of errors detected during the 2018-19 financial year in the financial statements of the Municipality at, and for the year ended, 30 June 2019. | The Municipality is allowed in terms of GRAP 3, to restate corresponding figures in the event of any misstatements being identified. The Municipality however is putting controls in place to identify the errors within the year they occur. |
| Material Impairments | |
| As disclosed in note 5 to the financial statements, the Municipality provided for the impairment of trade and other receivables from exchange transactions amounting to R125,5 million (2017-18: R104,7 million). | Writing off of irrecoverable debt is allowed in terms of GRAP 19 where the impairment will be utilised against the provision, also in terms of this standard. |
| As disclosed in note 6 to the financial statements, the Municipality provided for the impairment of trade and other receivables from non-exchange transactions amounting to R167,5 million (2017-18: R164,2 million). | The interpretation of the Standards of GRAP, IGRAP 1 became effective from the 2013/2014 financial year and the impact was that the Municipality had to account for all fines issued as revenue. As the payment rate of fines for the period was only 25%, the debt impairment for fines amounted to R142 321 642. |
| Material losses | |
| As disclosed in note 61 to the financial statements, material water losses of 28% (2017-18: 21,6%) were incurred. | The water losses are within the national norm of between 15% and 30%. The Municipality are implementing programmes to limit water losses. |
| Material Non-Compliance | |
| Annual financial statements | |
| The financial statements submitted for auditing were not prepared in all material respects in accordance with the requirements of section 122(1) of the MFMA. Material misstatements of non-current assets, current assets, liabilities, Revenue and disclosure items identified by the auditors in the submitted financial statements were subsequently corrected, resulting in the financial statements receiving an unqualified audit opinion. | The Municipality will compile Interim financial statements with a complete audit file for review by the AGSA.
The annual financial statements process plan will be reviewed to allow for sufficient time to adequately review the AFS before submission to the AG. |

6.2.2 COMPONENT B: AUDITOR-GENERAL OPINION 2019/20

At the time of compiling the Draft Annual Report 2019/20, the audit for the 2019/20 financial year was not completed. The outcome of the audit will be reported after conclusion of the audit by the AGSA.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

General Information

Legal form of entity

Stellenbosch municipality is a high-capacity, category B local authority established in terms of section 151 of the Constitution of the Republic of South Africa.

The principle activities of the municipality are to:

Provide democratic and accountable government to local communities;
Ensure sustainable service delivery to communities;
Promote social and economic development;
Promote a safe and healthy environment; and
Encourage the involvement of communities and community organisations in the matters of local government.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the unaudited annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the unaudited annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the unaudited annual financial statements and was given unrestricted access to all financial records and related data.

The unaudited annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The unaudited annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I acknowledge that I am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the unaudited annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

I am responsible for the preparation of these financial statements in terms of Section 126(1) of the Municipal Finance Management Act, 2003 (Act 56 of 2003) and signed the Annual Financial Statements on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors as disclosed in note 34 and 35 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

The external auditors are responsible for independently reviewing and reporting on the municipality's unaudited annual financial statements. The unaudited annual financial statements have been examined by the municipality's external auditors and their report is presented on page 5.

The unaudited annual financial statements have been prepared on the going concern basis, is hereby approved.

Accounting Officer
Geraldine Mettler

Stellenbosch Municipality

Accounting Policies

| Figures in Rand | Note(s) | 2020 | 2019 |
|-----------------|---------|------|------|
|-----------------|---------|------|------|

1. Presentation of Unaudited Annual Financial Statements

The unaudited annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These unaudited annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

1.1 Going concern assumption

These unaudited annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.3 Internal reserves

Capital replacement reserve (CRR)

In order to finance the acquisition of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of the Annual Budget. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

Self-insurance reserve

The municipality has a Self-insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self-insurance fund is invested in short-term investments.

Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.3 Internal reserves (continued)

Accumulated surplus

The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.

1.4 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.5 Significant judgements and sources of estimation uncertainty

In preparing the unaudited annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the unaudited annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are insignificant to the annual financial statements are set out below:

Sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Revenue recognition

Accounting Policy 1.16 on Revenue from Exchange Transactions and Accounting Policy 1.17 on Revenue from Nonexchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality.

In concluding judgement, management considered the detailed criteria for recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

Impairment of financial assets

Accounting Policy 1.11: Financial Instruments, referring to the paragraph on impairment of financial assets, describes the process followed to determine the value with which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments - Recognition and Measurement. The management of the municipality is satisfied that impairment of financial assets recorded during the year is appropriate. Details of the impairment loss calculation are provided in the applicable notes to the annual financial statements.

Useful lives of property, plant and equipment and intangible assets

As described in Accounting Policy 1.8 and 1.9 the municipality depreciates its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful life, which is determined when the assets are brought into use. The useful life and residual values of the assets are based on industry knowledge. The review of useful life and residual values of assets are only reviewed if one of the indicators of potential review is triggered.

Employee benefit obligations

The municipality obtains actuarial valuations of its employee benefit obligations. The employee benefit obligations of the municipality that were identified are post-retirement health benefit obligations and long-service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the applicable notes to the annual Financial Statements.

Impairment of non-financial assets

The recoverable amounts of cash-generating units have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The recoverable amounts of individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

It is reasonably possible that the assumptions may change which may then impact our estimations and would require a material adjustment to the carrying value of tangible assets.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.5 Significant judgements and sources of estimation uncertainty (continued)

Value in use of cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including economic factors such as inflation and interest.

Value in use of non-cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that the impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Allowance for slow moving, damaged and obsolete stock

An allowance for inventory to write inventory down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the surplus/deficit.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Provisions

Provisions are raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 20 - Provisions.

Effective interest rate

The municipality uses the best estimate of the costs at the reporting date with reference to the inflation rate.

Allowance for doubtful debts

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.5 Significant judgements and sources of estimation uncertainty (continued)

Impairment of statutory receivables

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures and impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, are reduced, either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

1.6 Biological assets that form part of an agricultural activity

The municipality recognises biological assets that form part of an agricultural activity or agricultural produce when, and only when:

- the entity controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity or agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of biological assets that form part of an agricultural activity is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable is used to determine fair value.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

The municipality classifies biological assets as consumables which consist of timber in the form of pine trees. All biological assets are held for sale.

| Item | Useful life |
|---|-------------|
| Trees in timber plantation - Consumable | indefinite |

1.7 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Depreciation is calculated at the straight line method over a period of 30 yearst

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.7 Investment property (continued)

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

| Item | Useful life |
|----------------------|-------------|
| Property - land | indefinite |
| Property - buildings | 30-99 years |

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

When classification is difficult, the criteria used to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of operations, including the nature or type of properties classified as held for strategic purposes, are as follows:

Transfers to, or from, investment property shall be made when, and only when, there is a change in use, evidenced by:

- commencement of owner-occupation, for a transfer from investment property to owner-occupied property;
- commencement of development with a view to sale, for a transfer from investment property to inventories;
- end of owner-occupation, for a transfer from owner-occupied property to investment property; or
- commencement of an operating lease (on a commercial basis) to another party, for a transfer from inventories to investment property.

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the unaudited annual financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the unaudited annual financial statements (see note 11).

1.8 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

Property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Measurement

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary cost of dismantling and removing the asset and restoring the site on which it is located.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.8 Financial instruments (continued)

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Incomplete construction work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is available for use.

Impairment

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable service amount, it is written down immediately to its recoverable service amount and an impairment loss is charged to the statement of financial performance.

Depreciation

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

| Item | Depreciation method | Average useful life |
|-------------------------------------|---------------------|---------------------|
| Land | Straight-line | indefinite |
| Machinery and equipment | Straight-line | 1-25 |
| Furniture and office equipment | Straight-line | 2-24 |
| Transport assets | Straight-line | 4-20 |
| Computer equipment | Straight-line | 5-23 |
| Community assets | Straight-line | 4-30 |
| Other property, plant and equipment | Straight-line | 6-99 |
| Capital restoration asset | Straight-line | 5-30 |
| Electrical infrastructure | Straight-line | 10-50 |
| Water supply infrastructure | Straight-line | 10-100 |
| Solid waste infrastructure | Straight-line | 10-30 |
| Roads infrastructure | Straight-line | 10-100 |

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.8 Financial instruments (continued)

| | | |
|--|---------------|--------|
| Information and communication infrastructure | Straight-line | 3-15 |
| Waste water network | Straight-line | 10-100 |
| Stormwater infrastructure | Straight-line | 10-50 |

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 10).

1.9 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.9 Intangible assets (continued)

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are initially measured at cost.

Subsequent to initial measurement Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets, on a straight-line basis, to their residual values as follows:

| Item | Depreciation method | Average useful life |
|---|---------------------|---------------------|
| Internally generated: Capital development | Straight-line | 5 - 7 years |
| Computer software | Straight-line | 3 - 30 years |
| Service operating and land rights | Straight-line | 5 - 30 years |

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset is the difference between the net disposal proceeds and the carrying amount and is included in surplus or deficit when the asset is derecognised.

1.10 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

The municipality separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (see note 14).

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 14 Heritage assets.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.10 Heritage assets (continued)

Subsequent measurement

Subsequent to initial measurement classes of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.11 Financial instruments

A financial instrument can broadly be defined as those contracts that results in a financial asset in one entity and a financial liability or residual interest in another entity. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.11 Financial instruments (continued)

A financial asset is:

- a residual interest of another entity; or
- a contractual right to:
 - receive cash or another financial asset from another entity; or
 - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the municipality.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the municipality.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the municipality had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the municipality designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
 - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.11 Financial instruments (continued)

Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

| Class | Category |
|--|--|
| Receivables from exchange transactions | Financial asset measured at amortised cost |
| Receivables from non-exchange transactions | Financial asset measured at amortised cost |
| Cash and cash equivalents | Financial asset measured at amortised cost |
| Other receivables from exchange transactions | Financial asset measured at amortised cost |
| Short term investments | Financial asset measured at amortised cost |
| Long term receivables | Financial asset measured at amortised cost |

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

| Class | Category |
|-------------------------------------|--|
| Payables from exchange transactions | Financial liability measured at amortised cost |
| Consumer deposits | Financial liability measured at amortised cost |
| Other financial liabilities | Financial liability measured at amortised cost |

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus, in the case of a financial asset or a liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The municipality first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the municipality analyses a concessionary loan into its component parts and accounts for each component separately. The municipality accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at amortised cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.11 Financial instruments (continued)

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the municipality uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data..

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Reclassification

The municipality does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the municipality cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the municipality reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.11 Financial instruments (continued)

Impairment and uncollectibility of financial assets

The municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

The calculation in respect of the impairment of fines receivable (receivables from non-exchange transactions) is based on an assessment of the past history of fines per category.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.11 Financial instruments (continued)

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with a maturity period of between three and twelve months and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried in the balance sheet at amortised cost. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and cash with bank, net of bank overdrafts.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another municipality by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Housing rental and instalments

Finance income from the sale of housing by way of instalment sales agreements or finance leases is recognised on a time proportion basis.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.12 Leases (continued)

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as revenue and the contractual payments are recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Any contingent rent are expensed in the period in which they are incurred.

1.13 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.14 Landfill site

Site restoration and dismantling cost - The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes:

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located;
- changes in the measurement of an existing decommissioning, restoration and similar liability that result from change in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in discount rate; and
- the obligation the municipality incurs for having used the items during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.15 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Management has judged all assets as non cash generating assets.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.15 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.16 Impairment of non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.16 Impairment of non-cash-generating assets (continued)

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.17 Employee benefits

Employee benefits are all forms of consideration given by the municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.17 Employee benefits (continued)

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from the municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognises the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Accrued leave pay

Liabilities for annual leave are recognised as they accrue to employees. Liability is based on the total accrued leave days owing to employees and is reviewed annually.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.17 Employee benefits (continued)

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Multi-employer plans

The municipality classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined contribution plan, the municipality accounts for in the same way as for any other defined contribution plan.

Where a plan is a defined benefit plan, the municipality account for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the municipality account for the plan as if it was a defined contribution plan.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the municipality during a reporting period, the municipality recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an municipality recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.17 Employee benefits (continued)

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The municipality measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The municipality determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the unaudited annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.17 Employee benefits (continued)

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, the municipality shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the municipality re-measure the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The municipality offsets an asset relating to one plan against a liability relating to another plan when the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.17 Employee benefits (continued)

Other long term employee benefits

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

Long term service awards is payable after 10 years of continuous service and after every 5 years thereafter to employees. Additional to this employees shall be entitled to a 14th cheque for continuous employment on their 30th and every 5th year onward. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover based on historical staff turnover. No other long service benefits are provided to employees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost, which shall all be recognised immediately; and
- the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

The municipality is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than 12 months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

1.18 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.18 Provisions and contingencies (continued)

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Provision for the rehabilitation of landfill sites

At year end a provision is raised for the rehabilitation of landfill sites. The provision is the net present value of the future cash flows to rehabilitate damaged land at year end.

As the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period;
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;
- if the adjustments result in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may be fully recoverable. If there is such an indication, the municipality tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in the accounting policy on impairment of cash-generating assets and/ or impairment of non-cash generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur.

Provision for constructive obligations

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of an activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.18 Provisions and contingencies (continued)

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingencies

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 53.

A contingent liability is a:

- possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality;
- present obligation that arises from past events but is not recognised because: it is not probable than an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; the amount of the obligation cannot be measured with sufficient reliability.

Grant-in-aid contributions

Provision is made for any constructive obligations of the municipality. A constructive obligation arises through an established pattern of past practice, published policies or a sufficiently specific current standard, whereby the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

The municipality transfers money to individuals, organisations and other sectors of government from time to time. When making these transfers, the municipality does not:

- receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- expect to be repaid in future; or
- expect a financial return, as would be expected from an investment.

1.19 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.19 Revenue from exchange transactions (continued)

Service charges

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the billings done during July and August. The billing and invoiced amounts done in July are recognised in total as an accrual as all billing in July pertains to services rendered prior to 30 June. An estimate is then made based on August billing pertaining to services rendered up until 30 June.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by surveys of work performed.

Pre-paid electricity

Revenue from the sale of electricity prepaid units is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.19 Revenue from exchange transactions (continued)

Interest earned

Interest earned on investments is recognised in the statement of financial performance on the time proportionate basis that takes into account the effective yield on the investment.

Dividends

Dividends are recognised on the date that the municipality becomes entitled to receive the dividend in accordance with the substance of the relevant agreement, where applicable.

Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant approved tariff. This includes the issuing of licences and permits.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Income from agency services

Income for agency services is recognised on a monthly basis once the income collected on behalf of principals has been quantified. The income recognised is in terms of the agency agreement.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.20 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs are recognised in the statement of financial performance in the period in which they become receivable.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Receivables that arise from statutory (non-contractual) arrangements are initially measured in accordance with this accounting policy, as well as the accounting policy on Statutory Receivables. The entity applies the accounting policy on Statutory Receivables for the subsequent measurement, derecognition, presentation and disclosure of statutory receivables.

Interest is recognised using the effective interest rate method for financial instruments, and using the nominal interest rate method for statutory receivables. Interest levied on transactions arising from exchange or non-exchange transactions is classified based on the nature of the underlying transaction.

Property rates

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.20 Revenue from non-exchange transactions (continued)

Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Debt forgiveness and assumption of liabilities

The municipality recognise revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Services in-kind that are significant to the municipality's operations and/or service delivery objectives are recognised as assets and the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality disclose the nature and type of services in-kind received during the reporting period.

Collection charges and penalties

Collection charges and penalty interest is recognised when:

- it is probable that the economic benefits or service potential associated with the transactions will flow to the municipality; and
 - the amount of revenue can be measured reliably; and
- to the extent that there has been compliance with the relevant legal requirements (if applicable).

1.21 Statutory receivables

Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Accrued interest

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, the entity applies the principles as stated in "Accrued interest" above, as well as the relevant policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers).

Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- Significant financial difficulty of the debtor, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- It is probable that the debtor will enter sequestration, liquidation or other financial re-organisation.
- A breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- Adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.21 Statutory receivables (continued)

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, either directly or through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

In estimating the future cash flows, an municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the entity discounts the estimated future cash flows using a rate that reflects the current risk-free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted either directly or by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.22 Accounting by principals and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.22 Accounting by principals and agents (continued)

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.23 Borrowing costs

Borrowing costs are interest and other expenses incurred by an entity in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

1.24 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 60 for detail.

1.25 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.26 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.27 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.28 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its unaudited annual financial statements.

1.29 Changes in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Accounting Policies

1.29 Changes in accounting policies, estimates and errors (continued)

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

1.30 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.31 Value Added Tax

The municipality accounts for Value Added Tax on the cash (receipt) basis.

1.32 Budget information

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019/07/01 to 2020/06/30.

The unaudited annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

1.33 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.34 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

2. New standards and interpretations

2.1 Standards and Interpretations early adopted

The municipality has not early adopted any GRAP standard that is not effective.

2.2 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2020 or later periods:

| Standard/ Interpretation: | Effective date:
Years beginning on or after | Expected impact: |
|---|--|--|
| • GRAP 34: Separate Financial Statements | 01 April 2020 | Unlikely there will be a material impact |
| • GRAP 35: Consolidated Financial Statements | 01 April 2020 | Unlikely there will be a material impact |
| • GRAP 36: Investments in Associates and Joint Ventures | 01 April 2020 | Unlikely there will be a material impact |
| • GRAP 37: Joint Arrangements | 01 April 2020 | Unlikely there will be a material impact |
| • GRAP 38: Disclosure of Interests in Other Entities | 01 April 2020 | Unlikely there will be a material impact |
| • GRAP 110 (as amended 2016): Living and Non-living Resources | 01 April 2020 | Unlikely there will be a material impact |
| • GRAP 18 (as amended 2016): Segment Reporting | 01 April 2020 | Not expected to impact results but may result in additional disclosure |

3. Cash and cash equivalents

Cash and cash equivalents consist of:

| | | |
|---------------------------|--------------------|--------------------|
| Cash on hand | 14 220 | 19 220 |
| Bank balances | 21 452 795 | 169 368 979 |
| Call accounts | 89 236 885 | - |
| Lamotte Trust | 435 848 | - |
| Trust and charitable bank | 62 097 | 102 334 |

Receivables from exchange transactions past due but not impaired

The Council regards receivables from exchange transactions to be due for outstanding amounts more than 30 days to be past due.

Debtors to the amount of R16 million have been ceded to the Development Bank of Southern Africa in providing security for a loan raised from them.

The water and electricity accrual is in respect of consumption between the last meter reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers. The estimate of the consumption are being recorded as revenue without being invoiced.

6. Receivables from non-exchange transactions

Grant receivables represent funding that Council is awaiting from external institutions for capital expenditure incurred and claimed, but not yet received at year-end.

The average credit period for capital receivables is dependent on the government department involved and the nature of the claim. No interest is charged on outstanding capital receivables. The subsidies are payable to the municipality resulting from allocations made in the DORA or based on agreements between the municipality and the relevant departments.

6. Receivables from non-exchange transactions (continued)

Statutory receivables general information

Transaction(s) arising from statute

Property rates related transactions arise in terms of the Municipal Property Rates Act, 6 of 2004, Municipal Finance Management Act, 56 of 2003, as well as the Property Rates Policy of the municipality approved by Council as part of the Budget Process.

Traffic fines arise from the National Road Traffic Act 93 of 1996, National Road Traffic Regulations 2000, National Land Transport Act 5 of 2009 and Criminal Procedure Act 51 of 1971. Prosecutor performs prosecutorial functions in terms of a general delegation awarded by the National Prosecuting Authority and is subject to the control of the Control Prosecutor at the Magistrate's Court in Stellenbosch.

VAT transactions arise from the Value Added Tax Act 89 of 1991. VAT is an indirect tax on the consumption of goods and services in the economy. VAT is levied on all goods and services subject to certain exemptions, exceptions, deductions and adjustments provided for in the Value Added Tax Act 89 of 1991.

Determination of transaction amount

Property rates transaction amounts are determined in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003.

The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables.

VAT transactions amounts are determined in line with the Value Added Tax Act 89 of 1991. VAT increased from 14% to 15% from 1 April 2018.

Interest or other charges levied/charged

Interest or other charges levied on Property rates balances are in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003.

"Interest" means a charge levied, on all arear accounts calculated at an interest rate which is one percent higher than the prime interest rate.

Traffic fines: Additional charges includes contempt of court fees / warrant of arrest fee determined in terms of the Criminal Procedure Act.

The rates and interest charges are determined by the Value Added Tax Act 89 of 1991.

Basis used to assess and test whether a statutory receivable is impaired

The basis used to assess Property Rates receivables is to look at the extent to which debtors on an individual basis defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

The basis used to assess Traffic fine receivables is to look at the extent to which debtors per group of fines (Municipal fines, Provincial fines) defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

No impairment on VAT Receivable, balance expected to be fully recoverable.

Discount rate applied to the estimated future cash flows

Interest is calculated using the nominal interest rate as stipulated in the municipal by-laws (Prime plus 1%). This rate is also considered an appropriate discount rate.

Main events and circumstances that led to the recognition or reversal of impairment losses on statutory receivables

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

6. Receivables from non-exchange transactions (continued)

Significant impairment losses recognised or reversed

Property Rates: Impairment Recognised: The national lockdown resulted in many employers and employees not being able to generate sufficient income to pay their municipal accounts for April to June 2020.

Traffic Fines: Impairment Recognised: Annually the outstanding receivables are assessed in terms of the value of fines issued in comparison to the receipts generated from such fines. The remaining balance is considered recoverable based on this payment percentage.

7. Other receivables from exchange transactions

| | | |
|----------------------------|-------------------|-------------------|
| Prepayments | 3 651 254 | 5 879 933 |
| Deposits | 1 589 255 | 1 182 720 |

| Water for distribution | 1 805 053 | 1 896 630 |
| Land inventory | 14 146 828 | 14 262 729 |
| Housing inventory | 11 550 000 | 12 250 000 |
| | 64 074 316 | 64 557 942 |

| | | |
|--|------------|------------|
| Inventories recognised as an expense during the year | 32 432 482 | 25 087 435 |
|--|------------|------------|

The amount of inventory reversed/ (written down) is R709 539 (2019: (R4 061 381)) and is recognised as an expense and a reduction in the carrying value of inventories. The circumstances relating to the write down is as a result of stock adjustments and shortages on general stock items as reported and approved accordingly.

No inventories were pledged as securities.

The comparative amounts were restated. Refer to note 61

9. VAT receivable

| | | |
|-----|------------|------------|
| VAT | 30 285 689 | 48 168 490 |
|-----|------------|------------|

The municipality is registered for VAT on the payment/ cash basis.

VAT meets the definition of a statutory receivable as per the accounting policy. For statutory receivable information regarding VAT refer to note 6.

|--|------------------|-------------------------|---------------------------------|------------------|
| Botmanskop plantation | 861 605 | - | - | 861 605 |
| Paradyskloof Plantation | 5 459 843 | - | - | 5 459 843 |
| | 6 321 448 | - | - | 6 321 448 |

The determination of fair value was as follow:

Principle:

Price determination: was done on the basis of current sale value of the tender for the current year i.e. R602.10/m³ excluding 15% VAT . This value was given to all trees as the estimated yield takes into consideration the age of the trees. The harvestable age starts from 20 years old where the minimum estimated yield would be 100m³/ha.

It must also be noted that this yield is based on optimum growing conditions and the existing microclimates, and thus the yield might vary per compartment. Refer to the Forestry Handbook p204 which can be obtained at the municipal offices.

Description of the Biological Assets

1. Botmanskop plantation (Block E)
Some compartments remain which can be harvested at a later stage due to the age of the trees.
2. Paradyskloof plantation (Block G)
Some compartments remain which can be harvested at a later stage due to the age of the trees.

Strategy to mitigate risks

The strategy to mitigate risks attached to this category of assets is to prevent the spread of runaway veld fires by maintaining fire breaks.

17.1 Post- retirement healthcare benefit liability

The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service) is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. The municipality operates an unfunded defined benefit plan for these qualifying employees. The plan is treated as a defined benefit plan under GRAP 25. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of the present value of the defined benefit obligation were carried out at 30 June 2020 by C Weiss, Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The members of the Post-employment Health Care Benefit Plan are made up as follows:

The members of the post-employment health care benefit plan are made up as follows:

| | | |
|---|------------|------------|
| In-service members (Employees) | 668 | 653 |
| Continuation members (Retirees, widow(ers) and orphans) | 162 | 171 |
| Total members | 830 | 824 |

The liability in respect of past service has been estimated as follows:

| | | |
|------------------------|--------------------|--------------------|
| In-service members | 63 812 000 | 74 392 000 |
| In-service non-members | 6 777 000 | - |
| Continuation members | 98 510 000 | 113 116 000 |
| Total liability | 169 099 000 | 187 508 000 |

The Non-member take up rate increased from previous estimate of 0% to 15%. This change was implemented after reviewing the actual trend of take up rate. The Non-member take up rate refers to the proportion of in-service non-members joining a scheme by retirement and continuing with the subsidy thereafter.

The principal assumptions used for the purposes of the actuarial valuations were as follows:

i) Rates of Interest

| | | |
|---------------------------------|---------|--------|
| Discount rate | 10,22 % | 9,33 % |
| Health care cost inflation rate | 6,30 % | 6,79 % |
| Net effective discount rate | 3,69 % | 2,38 % |

ii) Normal retirement age

| | | |
|-----------------------------------|----|----|
| Expected retirement age - females | 62 | 63 |
| Expected retirement age - males | 62 | 63 |

The PA (90) ultimate mortality table was used by the actuaries

Pre-retirement: The SA 85-90 ultimate table, adjusted for female lives, was used.

Movements in the present value of the Defined Benefit Obligation were as follows:

| | | |
|--------------------------------------|-------------|-------------|
| Balance at the beginning of the year | 187 508 063 | 198 749 139 |
|--------------------------------------|-------------|-------------|

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

17. Employee benefit obligations (continued)**Movement in the present value of Long Service Awards were as follows:**

| | | |
|---|-------------------|-------------------|
| Opening balance | 26 153 883 | 29 621 885 |
| Current service cost | 2 088 254 | 2 388 150 |
| Interest cost | 2 014 792 | 2 457 580 |
| Actuarial (gains) losses | (644 043) | (5 877 479) |
| Benefits paid | (3 090 886) | (2 436 254) |
| Total included in employee related costs | 26 522 000 | 26 153 882 |

The amount recognised in the Statement of Financial Position are as follows:

| | | |
|--------------------------------------|------------|------------|
| Present value of long service awards | 26 522 000 | 26 153 882 |
|--------------------------------------|------------|------------|

The amount recognised in the Statement of Financial Performance are as follows:

| | | |
|--------------------------|------------------|--------------------|
| Current service cost | 2 088 254 | 2 388 150 |
| Interest cost | 2 014 792 | 2 457 580 |
| Actuarial gains (losses) | (644 043) | (5 877 479) |
| Closing balance | 3 459 003 | (1 031 749) |

Under the plan, a Long-service Award is payable after 10 years of continuous service and every 5 years thereafter to employees. Additional to this employees shall be entitled to a 14th cheque for continuous employment on their 30th and every 5th year onward. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover. No other long service benefits are provided to employees.

Key assumptions used

18. Operating lease liability

Operating Leases are recognised on the straight-line basis as per the requirement of GRAP 13. In respect of non-cancellable Operating Leases the following liabilities have been recognised:

| | | |
|-----------------------------------|------------------|------------------|
| Balance at beginning of year | 5 775 015 | 173 234 |
| Operating lease expenses recorded | (1 070 046) | (882 280) |
| Operating lease revenue realised | (40 195) | (133 039) |
| Operating lease payments effected | 293 570 | 6 617 100 |
| | 4 958 344 | 5 775 015 |

Leasing Arrangements

The Municipality as Lessee:

Operating Leases relate to Property, Plant and Equipment with lease terms not longer than 5 years, with an option to extend for a further period. All operating lease contracts contain market review clauses in the event that the municipality exercises its option to renew. The municipality does not have an option to purchase the leased asset at the expiry of the lease period.

Amounts Payable under Operating Leases

At the reporting date, the municipality had outstanding commitments under non-cancellable Operating Leases for Property, Plant and Equipment, which fall due as follows:

Buildings:

| | | |
|--------------|-------------------|-------------------|
| Up to 1 year | 5 751 175 | 4 098 225 |
| 2 to 5 years | 7 717 777 | 13 468 952 |
| | 13 468 952 | 17 567 177 |

The following payments have been recognised as an expense in the Statement of Financial Performance:

Total operating lease expenses

| | | |
|----------------------------------|------------|-----------|
| Lease rentals on operating lease | 11 837 555 | 2 666 984 |
|----------------------------------|------------|-----------|

The following amounts have been recognised as revenue in the Statement of Financial Performance:

Total operating lease income

| | | |
|----------------------|----------|-----------|
| Minimum lease income | (40 195) | (133 039) |
|----------------------|----------|-----------|

No restrictions have been imposed on the municipality in terms of the operating lease agreements.

The comparative figures were restated. Refer to note 61.10

19. Other financial liabilities

At amortised cost

| | | |
|---------------------------|-------------|-------------|
| Other financial liability | 292 930 439 | 318 800 147 |
|---------------------------|-------------|-------------|

Annuity loans from the Development Bank of South Africa have settlement periods of 14 to 15 years with fixed interest varying from 9.25% to 11.10% per annum.

The municipality entered into a loan agreement with Nedbank limited during the 2019 financial year for a period of 10 years at a fixed interest rate of 9.7%.

Non-current liabilities

| | | |
|-------------------|-------------|-------------|
| At amortised cost | 266 177 508 | 292 930 440 |
|-------------------|-------------|-------------|

| Current liabilities | | | - | 642 909 |
| | | | 121 305 978 | 102 344 476 |

Environmental rehabilitation provision

In terms of the licensing of the landfill refuse sites, the municipality will incur licensing and rehabilitation costs of R121 305 978 (2019: R102 344 476) to restore the site at the end of its useful life, estimated to be in the December 2020/ January 2021 financial year. Provision has been made for the best estimate of costs at the reporting date with reference to the inflation rate.

The unwinding of the provision for landfill site for the current year was R7 757 711 (2019: R6 174 066) was included in the finance cost in the statement of financial performance.

No expenditure was incurred for the year under review.

Cells 1 and 2 have reached full capacity and must be rehabilitated. Cell 3 has come into use at the end of 30 June 2013 financial year and is the current landfill site in use.

The provision has been determined based on an independent valuation performed by a firm of consulting engineers as at 30 June 2020

Key cost parameters:

- Estimated post closure rehabilitation time 3 years
- Inflation rate 4.8% (2019: 5.3%%)
- Discount rate 7.75% (2019: 7.58%)

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

23. Accumulated surplus**Ring-fenced internal funds and reserves within accumulated surplus - 2020**

| | Capital replacement reserve | Self insurance reserve | Housing development fund | Accumulated surplus | Total |
|---|-----------------------------|------------------------|--------------------------|----------------------|----------------------|
| Opening balance | 160 497 338 | 9 885 492 | (9 396 229) | 5 186 039 005 | 5 347 025 606 |
| Surplus for the year | - | - | - | 81 155 004 | 81 155 004 |
| Transfer to capital replacement reserve | 336 762 309 | - | - | (336 762 309) | - |
| Property, plant and equipment purchases | (247 535 390) | - | - | 247 535 390 | - |
| | 249 724 257 | 9 885 492 | (9 396 229) | 5 177 967 090 | 5 428 180 610 |

Ring-fenced internal funds and reserves within accumulated surplus - 2019

| | Capital replacement reserve | Insurance reserve | Housing development fund | Accumulated surplus | Total |
|---|-----------------------------|-------------------|--------------------------|----------------------|----------------------|
| Opening balance | 116 134 076 | 9 885 492 | (9 396 229) | 5 109 364 695 | 5 225 988 034 |
| Surplus for the year | - | - | - | 121 037 561 | 121 037 561 |
| Transfer to capital replacement reserve | 310 518 232 | - | - | (310 518 232) | - |
| Property, plant and equipment purchases | (266 154 970) | - | - | 266 154 970 | - |
| | 160 497 338 | 9 885 492 | (9 396 229) | 5 186 038 994 | 5 347 025 595 |

The capital replacement reserve is a reserve to finance future capital expenditure and is fully invested in ring-fenced Financial Instrument Investments.

The self insurance reserve is used to offset potential losses or claims of assets that cannot be insured externally.

The housing development fund is depleted. There is no cash or surplus generated from the fund. Therefore any additional cost must be carried by the municipality as part of its operations.

Refer to statement of changes in net assets for more detail and the movement on accumulated surplus.

24. Service charges

| | | |
|---------------------------------|--------------------|--------------------|
| Sale of electricity | 562 275 303 | 531 494 348 |
| Sale of water | 171 631 994 | 147 275 947 |
| Solid waste | 62 956 545 | 55 127 852 |
| Sewerage and sanitation charges | 83 261 986 | 83 861 916 |
| | 880 125 828 | 817 760 063 |

The amounts disclosed above for service charges are in respect of services rendered which are billed to the consumers on a monthly basis according to approved tariffs.

25. Construction revenue**Topstructure**

| | | |
|----------------------------|------------------|------------------|
| Idasvalley housing project | 5 317 560 | - |
| Watergang housing project | - | 1 044 546 |
| | 5 317 560 | 1 044 546 |

The comparative amounts were restated. Refer to note 61.12 .

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|----------------------------------|---------------------------|---------------------------|
| 32. Property rates | | |
| Rates received | | |
| Residential | 173 866 187 | 160 102 576 |
| Commercial | 164 553 707 | 149 669 221 |
| Agricultural | 21 669 383 | 21 187 884 |
| | <u>360 089 277</u> | <u>330 959 681</u> |
| Property rates - interest earned | 1 822 264 | 1 998 219 |
| | <u>361 911 541</u> | <u>332 957 900</u> |

Assessment Rates are levied on the value of land and improvements, which valuation is performed every four years. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions. The last valuation came into effect on 1 July 2017. With reference to S78 of the Municipal Property Rates Act four reviews have been finalised and one interim valuation was performed during the financial year and implemented accordingly.

The following assessment rates were charged for the period ending June 2020:

R 0.011175 - Non Residential (2019: R0.010493)

R 0.005080 - Residential (2019: R 0.004770)

R 0.001271 - Agricultural (2019: R 0.001193)

Rates are levied monthly on property owners and are payable the 7th of each month. Property owners can request that the full amount for the year be raised in July in which case the amount has to be paid by 7 October. Interest is levied as per council's Credit Control and Debt Collection Policy on outstanding rates amounts.

Valuations

Relief measures

The relief measures on property rates are generally described in paragraph 8 of the approved Rates Policy of the municipality. This includes the specific under mentioned relief measures:

| Rebate and gross monthly household income for Qualifying senior citizens and Disabled persons | Gross monthly household income | % Rebate |
|--|--------------------------------|----------|
| | Up to R8 000 | 100% |
| | From R8 001 to R 10 000 | 75% |
| | From R10 001 to R12 000 | 50% |
| | From R12 001 to R15 000 | 25% |

Municipal valuation threshold value

On qualifying residential properties, up to a maximum value of R200 000, which amount includes the R15 000 as per Section 17(1)(h) of the MPRA and the R185 000 reduction granted as per paragraph 8.2.1(ii) of the approved Rates policy. Paragraph 8.2.1 (ii) is only applicable on properties with valuations up to R5 000 000.

Stellenbosch special rebate

A rebate of 20% may be granted as per paragraph 8.6 of the approved Rates policy of the municipality.

Other rebates

Rebates have also been granted to qualifying non-profit organisations and to organisations who qualified for the rebate as defined in paragraph 8.11 of the approved Rates policy. Any other exclusions or exemptions have been granted in accordance with the Local Government Property Rates Act.

| Conditions met - transferred to revenue | (1 500 000) | - |
| | - | - |
| To implement and enhance programmes to interact with stakeholders and empower communities to partner with government in implementing socio-economic and urban upgrading programmes. | | |
| Title deeds development grant | | |
| Balance unspent at beginning of the year | 3 773 151 | 2 701 901 |
| Current-year receipts | - | 1 481 250 |
| Conditions met - transferred to revenue | (1 933 441) | (410 000) |
| | 1 839 710 | 3 773 151 |
| To provide funding for the eradication of the Pre-2014 title-deeds registration backlog and the professional fees associated with it, including beneficiary verification. Refer to note 22. | | |
| The municipality, as an agent, receives a grant from the Department of Human Settlements (principle) to register properties on behalf of the beneficiaries for low cost housing projects. | | |
| Title deeds development grant could not be fully spent due to the complexity of the programme. The grant funding provided is utilized for the registration of properties which were built before 2004 up to 2010. The municipality is grappling with deceased estates which take longer to register, missing beneficiaries, houses that were built but wrongly allocated on the subsidy system. The above obstacles encountered have been raised at the quarterly meetings with the Department of Human Settlements. | | |
| The municipality is not a custodian of any assets of the principle. | | |
| The municipality does not recognise any compensation for the services provided on behalf of the principle. | | |
| Local government financial management grant | | |
| Current-year receipts | 1 550 000 | 1 550 000 |
| Conditions met - transferred to revenue | (1 550 000) | (1 550 000) |
| | - | - |

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

33. Government grants and subsidies (continued)

To promote and support reforms in financial management by building capacity in municipalities to implement the Municipal Finance Management Act (MFMA).

Natural resource management grant

| | | |
|--|-------------|------------------|
| Balance unspent at beginning of the year | 2 088 828 | - |
| Current-year receipts | - | 2 359 500 |
| Conditions met - transferred to revenue | (90 870) | (270 672) |
| Other | (1 997 958) | - |
| | <u>-</u> | <u>2 088 828</u> |

Conditions still to be met - remain liabilities (see note 22).

To ensure that responsibilities relating to water resource management, biological diversity and the functioning of natural systems whilst ensuring meaningful livelihood opportunities are supported for those employed on these programmes.

The reason for unspent for 2018/19 comparative year is due to the grant agreement commencing in February 2019 and allocation runs in accordance with the transferee's financial year. The municipality has appointed EPWP workers as well as service providers for the clearing of the alien vegetation. The project will continue during the 2019/20 financial year.

Integrated national electrification programme grant

| | | |
|---|--------------|-------------|
| Current-year receipts | 15 640 000 | 5 000 000 |
| Conditions met - transferred to revenue | (15 640 000) | (5 000 000) |
| | <u>-</u> | <u>-</u> |

To implement the Integrated National Electrification Programme (INEP) by providing capital subsidies to municipalities to address the electrification backlog of all existing and planned residential dwellings (including upgrade of informal settlements, new, and normalisation), and the installation of relevant bulk infrastructure.

Integrated urban development grant

| | | |
|---|--------------|----------|
| Current-year receipts | 46 886 000 | - |
| Conditions met - transferred to revenue | (46 886 000) | - |
| | <u>-</u> | <u>-</u> |

To provide funding for public investment in infrastructure for the poor and to promote increased access to municipal own sources of capital finance in order to increase funding for public investment in economic infrastructure. To ensure that public investments are spatially aligned and to promote the sound management of the assets delivered.

Expanded public workers programme

| | | |
|---|-------------|-------------|
| Current-year receipts | 5 227 000 | 5 722 000 |
| Conditions met - transferred to revenue | (5 227 000) | (5 722 000) |
| | <u>-</u> | <u>-</u> |

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

33. Government grants and subsidies (continued)

To incentivise municipalities to expand work creation efforts through the use of labour intensive delivery methods in the following identified focus areas, in compliance with the EPWP Guidelines:

- road maintenance and the maintenance of buildings
- low traffic volume roads and rural roads
- basic services infrastructure, including water and sewer reticulation, sanitation, pipelines and dams (excluding bulk infrastructure)
- other economic and social infrastructure
- tourism and cultural industries
- waste management
- parks and beautification
- sustainable land-based livelihoods.

Municipal accreditation and capacity building grant

| | | |
|--|-----------|----------------|
| Balance unspent at beginning of the year | 167 980 | 224 000 |
| Conditions met - transferred to revenue | (167 980) | (56 020) |
| | - | 167 980 |

Conditions still to be met - remain liabilities (see note 22).

To fund the establishment of a human settlement unit within the accreditation priority municipality as well as enhancing the existing human settlements unit.

To finance the municipal institutional capacity requirements.

The reason for the unspent balance in 2018/19 is due to the capacity clerk who was appointed at Stellenbosch municipality for the period 1 April 2019 - 31 March 2020. Salary payments for 3 months were therefore expensed against the grant. The contract will continue during the 2019/20 financial year.

Municipal infrastructure grant

| | | |
|---|----------|--------------|
| Current-year receipts | - | 35 107 000 |
| Conditions met - transferred to revenue | - | (35 107 000) |
| | - | - |

To provide specific capital finance for basic municipal infrastructure backlogs for poor households, micro enterprises and social institutions servicing poor communities

National lottery

| | | |
|--|----------------|----------------|
| Balance unspent at beginning of the year | 458 775 | 658 775 |
| Conditions met - transferred to revenue | (151 414) | (200 000) |
| | 307 361 | 458 775 |

Conditions still to be met - remain liabilities (see note 22).

Provide support to be able to bring growth and change within impoverished communities.

Multi-year project for which the unutilized funding will be utilized during the 2020/21 financial year. The COVID 19 lock down regulations adversely affected the implementation of projects.

Other sources

| | | |
|--|---------|---------|
| Balance unspent at beginning of the year | 288 184 | 288 184 |
|--|---------|---------|

Conditions still to be met - remain liabilities (see note 22).

Stellenbosch Municipality

| | 433 752 | 520 590 |

Conditions still to be met - remain liabilities (see note 22).

Financial Management Capacity Building Grant: Stellenbosch Municipality advertised the bursaries as part of their Annual Mayoral Bursary to save advertisement cost in the 2016/2017 financial year. Unfortunately, the response was very poor and we could not find any applications that met the requirements. Consequently, we contacted various Universities during the 2016/2017 and 2017/2018 financial years to obtain CV's of students studying in the designated areas as specified in the circular. After 3 attempts, we obtained 6 CV's of students, 5 of which reside outside the municipal area. The challenge however was that the applicants did not meet all of the required minimum criteria and deviating from the conditions of the grant is not permissible. Stellenbosch municipality could not obtain a list of students from the faculties at the tertiary institutions and placed reliance on the administration officers to indicate possible candidates for the bursaries. A total of R139 410.30 was paid during the 2018/19 financial year which relates to the roll over of 2017/18. R100 589.70 will be repaid as it relates to a roll over of 2017/18. The R360 000 will be spent during the 2019/20 financial year.

Stellenbosch municipality has continuously contacted the tertiary institutions to obtain suitable candidates for the bursary campaign. The tertiary institutions are not willing to provide the list of enrolled student which prohibits the municipality from contacting all enrolled candidates therefore posing a challenge in obtaining suitable candidates whom reside within the municipal area. Stellenbosch municipality will continue liaising with the tertiary institutions to obtain possible candidates for the payment of bursaries. The municipality will also pursue the option of continuing the payment of bursary funding of the successful candidates which were availed bursaries during the 2019/20 financial year, as per the memorandum of agreement, once the new academic year of 2021 commences. A robust social media drive will be embarked upon to ensure that suitable candidates are identified in order to ensure spending of the grant.

With reference to 2018/19 unspent a student commenced employment on 1 May 2019 in terms of the Municipal Graduate Internship Programme Grant.

With reference to 2019/20 unspent an intern was appointed for the period 1 June 2020 – 31 May 2021. The unspent funding of the Local Government Graduate Internship grant will be utilised for the salary payment.

To provide financial assistance to municipalities in support of capacity building for the future by means of a graduate internship programme

To develop financial human capacity within municipal areas to enable a sustainable local financial skills pipeline that is responsive to municipalities' requirements to enable sound and sustainable financial management and good financial governance¹.

Libraries support grant

| | | |
|---|--------------|--------------|
| Current-year receipts | 12 454 000 | 12 210 000 |
| Conditions met - transferred to revenue | (12 454 000) | (12 210 000) |
| | - | - |

To transform urban and rural community library infrastructure, facilities and services (primarily targeting previously disadvantaged communities) through recapitalised programme at provincial level in support of local government and national initiatives.

Khaya Lam free market foundation

|-----------------|------|------|

33. Government grants and subsidies (continued)

Conditions still to be met - remain liabilities (see note 22).

To assist municipalities to issue freehold title deeds to registered tenants and recognised resident of municipal properties.

All administration costs for the basic salaries and wages for the title deeds restoration programme have been funded by the Title Deeds Restoration grant. The unutilised funding will be used during the 2020/21 financial year.

Housing consumer education

| | | |
|--|--------|--------|
| Balance unspent at beginning of the year | 68 010 | 68 010 |
|--|--------|--------|

Conditions still to be met - remain liabilities (see note 22).

To fund housing within municipalities that demonstrated capacity to plan and deliver housing rapidly, with emphasis on rural areas. The unutilised funding relates to prior year funding which have not been assigned to a current year project. The latter will be attended to during the 2020/21 financial year.

Community development support grant

| | | |
|---|---------------|----------|
| Current-year receipts | 56 000 | 56 000 |
| Conditions met - transferred to revenue | (18 704) | (56 000) |
| | 37 296 | - |

Conditions still to be met - remain liabilities (see note 22).

To provide financial assistance to municipalities to cover the operational costs pertaining to the line functions of the community development workers including regional coordinators.

Due to the Covid-19 lockdown regulations the activities as per the business plan could not be executed. Provisional concept approval for the activities listed above have been obtained from the transferring department.

Fire services capacity building grant

| | | |
|--|-------------|------------------|
| Balance unspent at beginning of the year | 3 003 000 | - |
| Current-year receipts | - | 3 003 000 |
| Conditions met - transferred to revenue | (3 003 000) | - |
| | - | 3 003 000 |

The grant has been fully committed by 30 June 2019. The specialized vehicle was handed over to the Municipality on 26 July 2019. Payment was done on 14 August 2019.

To provide financial assistance to municipalities to ensure functional emergency communication, mobilisation systems and fire services.

Local government financial management support grant

| | | |
|---|-----------|-----------|
| Current-year receipts | 255 000 | 255 000 |
| Conditions met - transferred to revenue | (255 000) | (255 000) |
| | - | - |

To provide financial assistance to municipalities to improve overall financial governance within municipalities inclusive of optimising and administration of revenue, improving credibility and responsiveness of municipal budgets, improving of municipal audit outcomes and addressing institutional challenges.

Pay@ (Agent) provides the Municipality with payment service solutions on behalf of the Municipality. Pay@ pays over the monies generated from the payment services to the Municipality. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the fee to be paid to Pay@ (as stipulated in the relevant service schedule or based on Pay@'s standard prevailing rates), is recognized as an expense.

EasyPay (Agent) is a payment platform used to collect municipal service payments from third parties. These payments are accepted by EasyPay on behalf of the Municipality (Principal), from third parties. A service charge is levied by EasyPay for collection of the payments. This fee is recognised as commissions paid.

SPS (Agent) collects parking tariffs from motorists on behalf of the Municipality. SPS pays over the tariffs collected to the Municipality, minus the service charge levied. The municipality recognises 100% of the tariff as revenue from exchange transactions and the service charges incurred to SPS is recognized as an expense.

Syntell (Agent) sells and collects money from the sale of prepaid electricity on behalf of the Municipality. SPS pays over the monies collected to the Municipality, minus the collection fee levied, determined at a rate specific in the Service Level Agreement. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the collection fee paid to Syntell (which includes costs incurred on debit or credit card electricity sales and cash handling fees incurred), is recognized as an expense.

|-----------------|------|------|

47. General expenses (continued)

TMT (Agent) manages the collection of traffic fines (both legacy fines issue before 1 July 2017 and fines issued after this date), on behalf of the Municipality. TMT pays over the monies collected to the Municipality. The municipality recognises 100% of the money's collected as revenue from non - exchange transactions and the fee incurred to TMT is recognized as an expense.

These arrangements are subject to standard terms and conditions upon termination.

None of the municipalities assets are under the custodianship of the agents.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

51. Risk management

Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amount disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

Risk from biological assets

The municipality is exposed to financial risks arising from changes in wood prices. The municipality does not anticipate that wood prices will decline significantly in the foreseeable future. The municipality has not entered into derivative contracts to manage the risk of a decline in wood prices. The municipality reviews its outlook for wood prices regularly in considering the need for active financial risk management.

Interest rate risk management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well-established financial institutions of high credit standing. No investment with a tenure exceeding twelve months shall be made without consultation with the councillor responsible for financial matters.

In the case of receivables whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term receivables and other debtors are individually evaluated annually at the reporting date for impairment or discounting. A report on the various categories of receivables are drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality is not exposed to interest rate risk as the municipality borrows funds at fixed interest rates.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

Interest Rate Sensitivity Analysis

The municipality had no variable rate long-term financial instruments at year-end requiring an Interest Rate Sensitivity Analysis.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

51. Risk management (continued)

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses other publicly available financial information and its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit risk consist mainly of long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its investment operations (financial assets that are neither past due nor impaired) by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction / exposure limits, which are included in the municipality's Investment Policy. These limits are reviewed annually by the Chief Financial Officer and authorised by the Council.

Receivables from exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from exchange transactions are presented net of the allowance for impairment.

Receivables from non-exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from exchange transactions are presented net of the allowance for impairment.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of receivables. Receivables are provided for based on estimated irrecoverable amounts, determined by reference to a non payment rate.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

Payment to accounts of consumer debtors who are unable to pay, are renegotiated as an ongoing customer relationship in response to an adverse change in the circumstances of the customer.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

There is no collateral held for security in respect of consumer debtors.

The impact of the Covid-19 pandemic was taken into account with the allowance for impairment calculation of consumer debtors.

The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:

| | | |
|--|--------------------|--------------------|
| Cash and cash equivalents | 111 201 845 | 169 490 533 |
| Short term investments | 306 637 342 | 398 163 664 |

|-----------------|------|------|
|-----------------|------|------|

51. Risk management (continued)

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

Other price risks

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

53. Contingencies

2019/2020 Contingent liabilities

State / Matanise CAS NR 98/03/2015/ Stellenbosch Municipality

A traffic officer made a U-turn on the R44 pursuant to obtaining an instruction from his superintendent that he need to attend to a complaint in Klapmuts. The claimant, alleged that he had to turn into another lane to prevent an accident to occur, losing control over the vehicle and overturning the vehicle in the process.

Management estimate of the financial exposure is R100 000 in respect of costs and disbursements.

Labour court review - MATUSA on behalf of an employee / Stellenbosch Municipality

MATUSA on behalf of an former employee obtained an arbitration award against Stellenbosch Municipality in terms of which the former employee was reinstated and certified the arbitration award in terms of section 143(3) of the LRA. They instructed the sheriff to attached the movable properties of the Municipality to be sold in execution.

The Municipality instituted review proceedings against the arbitration award and stay the execution of the arbitration award.

Managements estimate of the financial exposure is approximately R380 000 in respect of costs and disbursements including compensation of 12 months of approximately R230 000.00 if reinstatement is not granted.

Ricmal Green (Pty) Ltd & another / The unlawful occupiers and others

Ricmal Green (Pty) Ltd applied for an interdict that the National Minister of Agriculture, Deputy Minister of Agriculture and the National Government be interdicted and restrained from placing any third parties in occupation of the Property or in any way encouraging, promoting, supporting and or allowing any persons to come onto the farm to occupy the Property.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

That the persons attempting to occupy the Property be interdicted and restrained from entering onto or remaining on the Property and erecting or attempting to erect any form of structure, be it temporary, permanent or semi-permanent of nature on the Property.

Ricmal Green (Pty) Ltd also applied for an urgent eviction application in terms of rule 6(12) against all unlawful occupiers of the Property listed in Annexure A to be ordered to vacate the Property and should they fail/refuse that the Sheriff be ordered to evict them from the Property.

Stellenbosch Municipality is sited as Seventh Respondent to the matter. No relief is sought against the Municipality unless the Municipality oppose the application. The Municipality was joined as the Property is situated within its jurisdiction and its statutory and/or constitutional obligations as regards the occupiers.

The Municipality is supporting the application of the Applicants and filed an explanatory affidavit.

Managements estimate of the financial exposure is approximately R200 000 in respect of costs and disbursements

Anonymous Employee / Stellenbosch Municipality

An employee applied for default judgment against Stellenbosch Municipality for alleged unfair labour practice in relation to failure to promote and/or demotion and alleged that he/she is being unfairly discriminated against.

Managements estimate of the financial exposure is approximately R100 000 in respect of costs and disbursements

SPS / Stellenbosch Municipality

MZ Loghdey t/a Street Parking Solutions submitted a tender, which was awarded to him. The tender was implemented on or about 1 April 2019. A dispute arose between the parties around various issues in terms of the tender. Clause 27.1 of the GCC provides that if any dispute or difference of any kind whatsoever arises between the purchaser and the supplier in connection with or arising out of the contract, the parties shall make every effort to resolve amicably such dispute or difference by mutual consultation. Clause 27.2 provides further if, after thirty (30) days, the parties have failed to resolve their dispute or difference by such mutual consultation, then either the purchaser or the supplier may give notice to the other party of his intention to commence with mediation. No mediation in respect of this matter may be commenced unless such notice is given to the other party. Clause 27.3 provides that should it not be possible to settle a dispute by means of mediation, it may be settled in a South African court of law. Notwithstanding the above clause 27.4 provides that notwithstanding any reference to mediation and/or court proceedings herein the parties shall continue to perform their respective obligations under the contract unless they otherwise agree and the purchaser shall pay the supplier any monies due for goods delivered and/or services rendered according to the prescripts of the contract.

Both SPS and the Municipality alleged that certain conditions of the tender/contract was breached and that mediation is required to solve the dispute. A mediator was appointed and a date for the mediation need to be set to argue the matter.

Managements estimate of the financial exposure is approximately R100 000 in respect of costs and disbursements

Anonymous Employee / Stellenbosch Municipality

Review application instituted by Stellenbosch Municipality setting aside the Arbitration Award made under WCP121702 under the South African Local Bargaining Council to pay the employee compensation for additional work done.

Managements estimate of the financial exposure is R300 000. This amount represents the legal costs and disbursements that the municipality may be liable for in order to finalise the matter and the amount claimed should the employee be successful.

Former Employee / South African Local Government Bargaining council and others

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

Review application instituted by an former employee to have the arbitration award dated 18 July 2019 under case numbers WCP 071722 and 01719 reviewed and set aside and in the alternative should the court elect not to correct the award that the dispute be remitted and referred back to the Bargaining Council for adjudication before an arbitrator.

Managements estimate of financial exposure is approximately R200 000. This amount represents the legal costs and disbursements that the Municipality may be liable in order to finalise the matter.

Stellenbosch Municipality / Urlan Groenewaldt & Jacques Francois Swart

Motor vehicle collision in which the municipal traffic lights were damaged.

Managements estimate for financial exposure is approximately R50 000.00 in respect of costs and disbursements.

Stellenbosch Municipality / Sliyzama CP Constructions (Pty) Ltd

Stellenbosch Municipality have to institute eviction proceedings against the illegal occupiers of the property, which the Municipality is leasing to Kindersorg to operate a crèche in Kayamandi. The eviction application is pending.

The founding affidavit of the Municipality needs to be finalised, whereafter the municipality can proceed with the institution of the eviction application. The municipality has received the founding affidavit and is in the process of proposing amendments thereto.

Managements estimate of financial exposure is approximately R200 000 in respect of costs and disbursements.

Stellenbosch Municipality / Klappmuts mediation

Stellenbosch Municipality is under obligation to provide emergency housing to evictees of various eviction orders in Klappmuts. The Klappmuts community has threatened violence against evictees and destruction of property should the municipality proceed to utilise Klappmuts housing facilities for evictees rather than for members of the Klappmuts community. Independent expert mediator appointed to facilitate mediation which is currently pending. The mediator had meetings with the community and a committee was elected to discuss the matter and proposals made. The chairperson of the Committee was not available for a period to attend meetings and new proposed dates were arranged by the mediator for such meetings. The community still refuse the Municipality to implement emergency housing.

The mediation needs to be finalised to obtain the buy-in of the community to relocate evictees to Klappmuts.

Managements estimate of the financial exposure is approximately R250 000 in respect of costs and disbursements.

Stellenbosch Municipality / NE Properties (Pty) Ltd

Application to declare the dissolution of NE Industries void in terms of section 83(4) of the Companies Act and to direct the Companies and Intellectual Property Commission of South Africa to restore NE Industries' name to the register of companies. NE Industries was deregistered and its name was removed from the register of companies on 16 July 2010 due to its failure to file its annual returns. NE Industries is the single largest debtor on the Municipality's debtor's book. The Municipality wants to collect the outstanding amount due to it but established that NE Industries was deregistered as a result of its failure to file its annual returns and its name was removed from the register of companies.

Managements estimate of the financial exposure is approximately R200 000. This amount represents the legal costs and disbursements that the Municipality may be liable for in order to obtain the Final Court Order.

Stellenbosch Municipality / IMATU on behalf of Employee

Review application instituted against the arbitrator's award by Commissioner Der Vlieger-Seynhaeve including application for condonation and to oppose the application for contempt of court proceedings instituted by IMATU obo employee.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

Fusion Properties 233 CC / The Municipality of Stellenbosch

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

This matter involves a summons issued against the Municipality for alleged damages pursuant to the sale of certain immovable property belonging to the Municipality. The amount claimed is R32 115 000.00 together with interest calculated at the rate of 9% per annum from 28 July 2015. The Municipality is defending the action. Pleadings have now closed and the Plaintiff is in the process of applying for a court date.

The application that the Plaintiff has to provide security for costs was granted and the interlocutory application to strike out certain allegations was also successful. The Plaintiff made application for leave to appeal against the judgment, which application was refused with costs. The Plaintiff has delivered a petition to the Supreme Court of Appeal ("SCA") in terms of which it is now seeking leave to appeal either to the SCA or the full bench of the Western Cape Division of the High Court.

Should the litigation against the Municipality be successful, the estimate of financial exposure will be the R32 115 000.00 together with interest calculated at the rate of 9% per annum from 28 July 2015 including legal costs and disbursements of approximately R1 350 000.00.

Independent Schools Association of Southern Africa / Ethekwini Municipality / Stellenbosch Municipality & Others

This matter involves an application on behalf of the Municipality to be joined as co-applicant together with eThekweni Municipality in an application for the review and setting aside of the Amended Municipal Property Rates Regulations promulgated on 12 March 2010. The Municipality has been joined successfully as co-applicant.

The matter was set down and heard during the first week in June 2019. Judgment was granted against the Municipality with costs. The Municipality successfully sought leave to appeal the judgment and leave to appeal to the Supreme Court of Appeal ("SCA") was granted. The Municipality has lodged its notice of appeal and has also lodged the record of the proceedings, together with eThekweni Municipality as the first appellant. The appellants have also filed their heads of argument and now await the respondents' heads of argument. This matter does not involve any amounts claimed.

Managements estimate of the financial exposure is approximately R250 000. This amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

De Zalze Golf Club / Valuation Appeal Board for Stellenbosch Municipality

De Zalze Golf Club applied to have the Valuation Appeal Board for the Stellenbosch Municipality's decision dated 5 September 2018 to place a value of R26 500 000.00 on the leasehold rights in respect of remainder Erf 296 De Zalze reviewed and set aside and to replace the decision with an order valuing the property at R1 000.00 alternatively R4 900 000.00. In the alternative, and in the event that the Court is not prepared to grant the relief sought indicated above, remitting the matter to the Valuation Appeal Board and directing it, within a reasonable period and in accordance with the Court's directions, to make a fresh decision as to the value of the property. De Zalze Golf Club also applied that the Valuation Appeal Board and Stellenbosch Municipality pay De Zalze's costs jointly and severally, including the costs of two counsel (save that costs are only sought against Stellenbosch Municipality in the event of it opposing the application). The matter was heard on 13 August 2020 and judgment has been reserved. This matter does not involve any amounts claimed.

Managements estimate of the financial exposure is approximately R500 000. This amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is successful.

Stellenbosch Municipality / LJ Turnkey Investments (Pty) Ltd

The owner of Portion 9 of Farm 100 Stellenbosch ("the Property") applied for a declaratory order that the zoning of the Property is general residential and allows them to utilise the Property for student accommodation. The Municipality opposed the declaratory order and filed its answering affidavit.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

The Municipality is in the process of instituting a counter-application for, amongst others, a declaratory order regarding the zoning of the Property and interdictory relief regarding the utilisation of the Property for student and/or any other rental accommodation in contravention of the Municipality's Zoning Scheme By-law. This matter does not involve any amounts claimed.

Managements estimate of the financial exposure is approximately R250 000. This amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is successful.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

2018/2019 Contingent liabilities

Anonymous / Stellenbosch Municipality

A municipal employee instituted legal proceedings against Stellenbosch Municipality and a municipal employee for alleged sexual harassment and unfair discrimination in the Labour Court. The Municipality has filed its Statement of Response to the Plaintiff's Statement of Claim and awaits a court date to have the matter argued. At reporting date this matter is pending.

Management estimates financial exposure to approximately R200 000 in respect of costs and disbursements. The amount of the claim has not been included as the plaintiff's prospects of success are unlikely.

Stellenbosch Municipality / Herman Pheiffer

Monetary claim by the former Speaker, Herman Pheiffer against the Municipality. The Municipality defended the case successfully against Mr Pheiffer and obtained a cost order. At reporting date the matter is pending.

Management estimates financial exposure to amount to approximately R50 000 in respect of costs and disbursements. The amount of the claim has not been included as the plaintiff's prospects of success are unlikely.

Stellenbosch Municipality / Anonymous Employee

Review application instituted by Stellenbosch Municipality setting aside the Arbitration Award made under WCP121702 under the South African Local Government Bargaining Council to pay Thato compensation for additional work. At reporting date this matter is pending.

Management estimates financial exposure to amount to approximately R200 000 - this amount represents the legal costs and disbursements that the Municipality may be liable in order to finalize this matter.

Stellenbosch Municipality / Siyazama CP Constructions (Pty) Ltd

Stellenbosch Municipality is in the process of instituting eviction proceedings against illegal occupiers of the property, which the Municipality is leasing to Kindersorg to operate a creche in Kayamandi. The eviction application is pending. The founding affidavit of the Municipality needs to be finalised, where after the Municipality can proceed with the institution of the eviction application. The Municipality has received the founding affidavit and is in the process of proposing amendments thereto. At the reporting date the matter is pending.

Management estimates financial exposure to amount to be approximately R50 000 in respect of costs and disbursements.

Stellenbosch Municipality / Klappmuts Mediation

The Municipality has an obligation to provide emergency housing to evictees of various eviction orders in Klappmuts. The Klappmuts community has threatened violent action against evictees and destruction of property should the Municipality proceed to use Klappmuts housing facilities for evictees rather than for members of the Klappmuts community.

An independent expert mediator has been appointed to facilitate mediation which is currently pending. The mediator had meetings with the community and a committee was elected to discuss the matter and proposals made. The chairperson of the committee was not available for a period to attend meetings and new proposed dates were arranged by the mediator for such meetings. At reporting date this matter is pending. Reference: KVDBERG/S613.

Mediation needs to be finalised to obtain buy-in of the community to Klappmuts. Management estimates financial exposure to amount to approximately R250 000 in respect of costs and disbursements.

Franklin Adams/ The Speaker/ Stellenbosch Municipality

Councillor Adams instituted legal proceedings against the Speaker of the Municipality in the Equality Court. The Municipality served and filed its opposing affidavit in the matter. The matter was subsequently postponed to 9 July 2019 for the inter alia Councillor Franklin Adams to apply for legal assistance from Stellenbosch Municipality. The matter was postponed until 5 September 2019 to allow councillor Adams' attorney to come on record to attend to the directive hearing. Thus, at reporting date this matter is pending.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

Management estimates financial exposure to amount to approximately R50 000 in respect of costs and disbursements.

Stellenbosch Municipality/ E Ross & Others

Stellenbosch Municipality is in the process of instituting eviction proceedings against the Respondents of the property at 609 Lavanda Flats, Jan Cilliers Street, Stellenbosch, due to the Respondents actions. The respondents did not oppose the application within the required time, as a result the Municipality submitted a Chamberbook application to oblige the respondents to submit their opposing affidavit, which they neglected to do. The matter will be enrolled on the unopposed roll.

Management estimates financial exposure to amount to approximately R200 000 - this amount represents the legal costs and disbursements that the municipality may be liable to finalise this matter.

Stellenbosch Municipality / L Baily & Another

Stellenbosch Municipality is in the process instituting eviction proceedings against the Respondents of the property at 108 Aurora Flats, Jan Cilliers Street, Stellenbosch, due to the Respondents actions. The eviction application is still pending. Thus, at reporting date this matter is pending and the Municipality awaits for the Writ from the Registrar of the High Court

Management estimates financial exposure to amount to approximately R200 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to finalize this matter.

Stellenbosch Municipality / J Morgan & Others

Stellenbosch Municipality is in the process of instituting eviction proceeding against the Respondents of the property at 12 Weber Street, Idas Valley, Stellenbosch, due to the Respondents actions. The attorneys are currently in the process to finalise affidavit. At reporting date, the eviction application is still pending and the Municipality is in the process of finalising the affidavit.

Management estimates financial exposure to amount to approximately R200 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to finalize this matter.

Stellenbosch Municipality / A De Ruiter & Others

An eviction application was instituted by Stellenbosch Municipality to have the Respondents evicted from the property, Erf 5281 Cloeterville, due to the Respondents actions. At reporting date, the eviction application is still pending, and the Affidavit still needs to be signed by the Municipal Manager.

Management estimates financial exposure to amount to approximately R200 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to finalize this matter.

Stellenbosch Municipality / Franscois Jansen

An application has been instituted by the Stellenbosch Municipality for the eviction of unlawful occupants from municipal property. This matter is still pending at the reporting date.

Management estimates financial exposure to amount to approximately R50 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to obtain for the Final Court Order.

Stellenbosch Municipality / Tania Wasmuth & Others

An application for eviction of unlawful occupants from municipal property has been instituted by Stellenbosch Municipality. This matter is still pending at the reporting date.

Management estimates financial exposure to amount to approximately R50 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to obtain the Final Court Order.

Stellenbosch Municipality / Cobus Visagie

Approximately R684 000 was owed by Cobus Visagie for a tender to harvest wood. Summary judgement was obtained but the money still needs to be collected.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

Management estimates financial exposure to amount to approximately R50 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to obtain to Final Court Order.

Metro City Protection Services / Stellenbosch Municipality

Metro City Protection Services instituted legal proceedings against Stellenbosch Municipality, pursuant to them not being awarded the tender for the rendering of security services. They applied for the Municipality to be interdicted to implement the tender with Securitem (Pty) Ltd and applied to have the tender award reviewed and set aside.

The matter was argued and the interdict was denied. The Review application is currently pending and a timetable was agreed upon in terms of which the matter will be argued on 12 September 2019. The Municipality had to file its Rule 53 record on 27 May 2019. The Applicant must file its supplementary affidavit by 13 June 2019 and the Municipality must file its answering affidavit by 4 July 2019. The parties are in the process of settling the matter. At reporting date this matter is pending.

Management estimates financial exposure to amount to approximately R250 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for to obtain the final court order.

La Concorde South Africa (Pty) Ltd / The Stellenbosch Municipality & Others

La Concorde raised an objection to the constitutional validity of Section 24(1)(e) of the Stellenbosch Municipal Planning By-law, 2015 read with Section 61(2)(c) of the Western Cape Land Use Planning Act, 3 of 2014. La Concorde alleged that the Section 24 exempts an owner from applying for a subdivision in the circumstances listed therein, any reference in both the By-law and LUPA to "application" or "approval" cannot apply to a request to a municipality to issue an exemption certificate and the issuing of the exemption certificate is not an "approval" or a "decision" for the purposes of the By-law and LUPA. Pursuant to providing the information/documents requested in terms of La Concorde's Rule 30(1)(A) notice, La Concorde served another Rule 30(1)(A) notice requesting further additional information/documents. The Municipality provided the information, (except for the Planning Department) requested to our attorneys of record who is attending compiling the additional Rule 53 record. At year end this matter was still pending.

Management estimates financial exposure to amount to approximately R250 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for in order to obtain the final court order.

Stellenbosch Municipality / Stellenbosch Golf Club

Stellenbosch Municipality entered into a long term notarial lease agreement with Stellenbosch Golfklub ("the Golfklub") on or about 20 December 1994, which lease agreement was notarial registered under reference number K199/95L on 14 March 1995. In terms of clause 4.6 of the notarial lease agreement the Golfklub is responsible for payment of the rates and taxes levied by the Municipality. The Municipality is involved in a dispute with the Stellenbosch Golfklub regarding outstanding rates the municipality claims from the Golfklub. The Golfklub leases the property on which the golf course is situated from the Municipality and for that reason is alleging that they do not have to pay rates and taxes to the Municipality.

The Municipality has finalised amendments to the draft Arbitration agreement as well as its Heads of Arguments and have forwarded the same to Stellenbosch Golf Club's attorneys. Stellenbosch Golfklub indicated that they want to make amendments to the Arbitration Agreement and Statement of Case and as a result the scheduled arbitration could not proceed on 31 May 2019. We are still awaiting the proposed amendments from Stellenbosch Golfklub and new dates on which the arbitration can proceed. At year end this matter was still pending.

Management estimates financial exposure to amount to approximately R300 000 - this amount represents the legal costs and disbursements that the Municipality may be liable to finalize this matter.

Gerhard Schalk van Niekerk N.O and Others / Stellenbosch Municipality

Gerhard Schalk van Niekerk N.O & Others ("the Applicants") instituted review proceedings against Stellenbosch Municipality's resolution of 31 October 2018, which resolved the owners to be instructed to demolish all structures/boundary fences impeding public access to the Millstream, and to move all boundary fencing to their own ERF boundaries, within a period of 3 (three) months of receipt of the notice ("the Council resolution"), be reviewed and set aside.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

Furthermore, that the decision of the Municipality on or about 22 November 2018, alternatively on or about 14 May 2019, to issue notices pursuant to the Council's resolution to the First to Fourth Applicants and the Fifth to Seventh Applicants, respectively ("the decision to issue the notices"), be reviewed and set aside. One of the Applicants prayers is that the Municipality pay the Applicants costs of the application, including costs of two counsel.

The Applicants even, i.e. the Alabama Trust as registered owner of ERF 1629, Stellenbosch and the Gillomee Trust as registered owner of ERF 1726 Stellenbosch about ERF 1771 Stellenbosch of which Stellenbosch Municipality is the owner. ERF 1771 Stellenbosch is zoned as Public Open Space. The Applicants erected structures, which structures encroached on ERF 1771 Stellenbosch, without any prior approval of Stellenbosch Municipality. The Stellenbosch Municipal Council inter alia resolved on 31 October 2018 that the owners be given notices that any and all agreements that may exist with them in writing, or allowances made over the years, in regard to the use of land across the Millstream, is cancelled/revoked and that the owners be informed to demolish all structures/boundary fences not allowing public access to the Millstream and move any and all boundary fencing to their own erf boundaries within a period of 3 months of receipt of the notice.

Fusion Properties 233 CC / The Municipality Of Stellenbosch

This matter involves a summons issued against the Municipality for alleged damages pursuant to the sale of certain immovable property belonging to the Municipality. The Municipality is defending the action. The application that the Plaintiff has to provide security for costs was granted and the interlocutory application to strike out certain allegations was also successful. The Plaintiff made application for leave to appeal against the judgment, for which the application was refused with costs. At reporting date this matter is pending. : Reference RB Africa / S Kgomo / 3006430.

Should the litigation against the Municipality be successful, management estimates financial exposure will be the R32 115 000 together with interest calculated at the rate of 9% per annum from 28 July 2015 including legal costs and disbursements of approximately R1 350 000.00.

Independant Schools Association of Southern Africa / EThekweni Municipality / Stellenbosch Municipality & Others

This matter involves an application on behalf of the Municipality to be joined as co-applicant together with eThekweni Municipality in an application for the review and setting aside of the Amended Municipal Property Rates Regulations promulgated on 12 March 2010. The Municipality has been joined successfully as co-applicant.

The matter was argued in June 2019 and judgment was subsequently granted against the Municipality with a costs order. The Municipality submitted its leave to appeal against the judgment on 24 July 2019. The appeal was subsequently argued and leave to appeal was granted. This matter does not involve any amounts claimed. Reference: RB Africa / AE Esterhuizen / 2083835.

Management estimates financial exposure to amount to approximately R250 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

De Zalze Golf Club / Valuation Appeal Board Fof Stellenbosch Municipality

De Zalze Golf Club applied to have the Valuation Appeal Board for the Stellenbosch Municipality's decision dated 5 September 2018 to place a value of R26 500 000 on the leasehold rights in respect of remainder ERF 296 De Zalze reviewed and set aside. To replace the decision with an order valuing the property at R1000 alternatively R4 900 000. In the alternative, and in the event that the Court is not prepared to grant the relief sought indicated above, remitting the matter to the Valuation Appeal Board and directing it, within a reasonable period and in accordance with this Court's directions, to make a fresh decision as to the value of the property. De Zalze Golf Club also applied that the Valuation Appeal Board and Stellenbosch Municipality pay De Zalze's costs jointly and severally, including the costs of two counsel. Reference: AE Esterhuizen / SK Jacobs / 3032533.

The Municipality filed its Rule 53 record, where after De Zalze Golf Club served and filed its supplementary affidavit. The Municipality is in the process of finalising its answering affidavit and have arrange consultations for 15 July 2019 and 19 August 2019 respectively. At reporting date this matter is pending.

Management estimates financial exposure to amount to approximately R500 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

Stellenbosch Municipality/ Mandisi Parscal Jejane

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

53. Contingencies (continued)

The matter concerns the removal of an illegal structure which was erected without building plans, for which the occupants need to be evicted.

Management estimates financial exposure to amount to approximately R50 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

Stellenbosch/ Urian Groenewald & Jacques Francois Swart

The matter concerns a claim regarding a motor vehicle collision where the municipal traffic lights were damaged.

Management estimates financial exposure to amount to approximately R50 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

Stellenbosch Municipality/ The Municipal Manager/ Franklin Adams

The matter concerns a claim by Councillor Adams against the Speaker and Municipal Manager in the Equality Court.

The matter was withdrawn by Franklin Adams on 15 October 2019. Court judgement stated that each party is responsible for their own costs. The municipality is currently deciding whether an appeal will be launched.

Management estimates financial exposure to amount to approximately R50 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

Stellenbosch Municipality/ April & Another

The matter concerns the institution of eviction proceedings by the municipality against the respondents of the property.

Management estimates financial exposure to amount to approximately R200 000 - this amount represents the legal costs and disbursements that the Municipality may be liable for if the review application is unsuccessful.

54. Related parties

Loans granted to related parties

In terms of the MFMA, the municipality may not grant loans to its councillors, management, staff and public with effect from 01 July 2004. Loans, together with conditions thereof granted prior to this date are disclosed in note 15 in the annual financial statements.

Remuneration of management

Compensation of key management and personnel is set out in notes 34, 35 and 36 respectively in the annual financial statements.

All Councillors and Employees have disclosed their interest in related parties and no one has the ability to control or exercise significant influence over Council in making financial and operating decisions.

Water losses are calculated as 20.5% (2019: 28%). Water losses are within the industry norm.

60. Multi-employer retirement benefit information

The Municipality makes provision for post-retirement benefits to eligible Councillors and employees who belong to different pension schemes. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions.

The total expense recognised in the Statement of Financial Performance of **R48 802 560** (2019: **R 45 558 717**) represents contributions payable to these plans by the municipality at rates specified in the rules of the plans.

These schemes are subject to either a tri-annual, bi-annual or annual actuarial valuation, details which are provided below.

DEFINED BENEFIT SCHEMES

SALA Pension Fund

The SALA Pension Fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at 1 July 2016 revealed that the assets of the fund amounted to R13,700,300.00 (30 June 2015 : R13,231,200.00), with funding levels of 100% (30 June 2015: 100%). The highest contribution rate paid by the members was 7.92% and by Council 20.78%.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

60. Multi-employer retirement benefit information (continued)

It is the actuary's opinion that:

- They are satisfied with the investment strategy of the Fund;
- the nature of the assets is, in their opinion, suitable for the nature of the liabilities of the Fund as defined in the rules of the Fund;
- the matching of assets with the liabilities of the Fund is adequate; and
- the insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

LA retirement Fund (Previously Cape Joint Pension Fund)

The LA RETIREMENT FUND operates both as a defined benefit and defined contribution scheme.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

60. Multi-employer retirement benefit information (continued)

DEFINED CONTRIBUTION SCHEMES

LA Retirement Fund (Previously Cape Joint Pension Fund)

Defined benefit scheme

The contribution rate payable is under the defined benefit section is 27%, 9% by the members and 18% by their councils. The actuarial valuation report at 30 June 2019 disclosed an actuarial valuation amounting to R1,655,893,000 (30 June 2018 : R1,776,181,000), with a nett accumulated surplus of R63,423,000 (2017 : R46,989,000), with a funding level of 103.7% (30 June 2017 : 102.6%).

Defined contribution scheme

The actuarial valuation report at 30 June 2019 indicated that the defined contribution scheme of the fund is in a sound financial position, with a assets amounting to R1,960,090,000 (30 June 2018 : R2,018,237,000), net investment reserve of R0 (30 June 2018 : R0) and with a funding level of 100% (2018 : 100%).

The actuary concluded that:

- The Pensioner account has a funding level of 103.7% with n surplus of R63.4 million and is in a sound financial condition as at the valuation date.
- There is a surplus of R63.4 million in The DB Section excluding The surplus in The Pensioner Account. The surplus has been allocated to The Pensioner Account.
- The overall funding level in respect of the DB Section including the Pensioner Account is 101.7% with a surplus of R63.0 million.
- The Defined Contribution Section has a funding level of 100% and is in sound Financial condition.
- Overall the fund is in a sound financial condition with a surplus of R63.0 million and the overall funding level of 101.7%.
- The Trustees awarded a 3.22% pension increase effective 1 January 2019.

It is to be noted that:

- All the active members have now all been converted to the Defined Contribution Section.
- There is no longer any contribution rate shortfall as this only applied to 29 residual Defined Benefit Section active members, that have now also converted to the Defined Contribution Section and
- Both the Defined Contribution Section and the Defined Benefit Section were fully funded as at the valuation date.

The nature of the assets is suitable for the Fund, except that the proportion of direct property underlying the pensioner liabilities may represent an over-concentration of assets in this class. The assets are appropriately matched relative to the term and nature of the active member liabilities. The Fund's investment strategy is suitable. Finally the risk benefits are partially re-insured and this is appropriate for the size and nature of the Fund.

Cape Joint Retirement Fund

The last statutory valuation performed as at 30 June 2019 revealed that the assets of the fund amounted to R26,128,000,000 (30 June 2018: R23,318,184,000), with funding levels of 100.4% and 100% (30 June 2017 127.3% and 100%) for the Pensions Account and the Share Account respectively. The Presevation Pension Account showed a suplus of R0 and was 100% funded for both 2019 & 2018. The contribution rate paid by the members (7,50%) and the municipalities (7.50%/19.50%) is sufficient to fund the benefits accruing from the fund in the future. The actuary certified that the structure of the assets is appropriate relative to the nature of the liabilities, given normal circumstances and that the Fund is in a sound financial condition as at the valuation date.

SALA pension fund

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

60. Multi-employer retirement benefit information (continued)

The SALA Pension Fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at 1 July 2018 revealed that the assets of the fund amounted to R14,298,600.00 (30 June 2015 : R13,231,200.00), with funding levels of 96.0% (30 June 2015: 100%). Recommended that employers continue to contribute at the current rate of 19.18% of pensioners salaries.

It is the actuary's opinion that :

- They are satisfied with the investment strategy of the Fund;
- the nature of the assets is, in their opinion, suitable for the nature of the liabilities of the Fund as defined in the Rules of the Fund;
- the matching of assets with the liabilities of the Fund is adequate; and
- the insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

Municipal Councillors Pension Fund

The Municipal Councilors Pension Fund operates as a defined contribution scheme. The statutory valuation performed as at 30 June 2015 revealed that the assets of the fund amounted to R2,551,861,000 (30 June 2014 : R2,229,410,000), with funding levels of 101.08% (30 June 2014: 98.83%). The contribution rate paid by the members (13,75 %) and council (15 %) is sufficient to fund the benefits accruing from the fund in the future. The Actuary certified that the Fund was in a sound financial condition as at 30 June 2015, in that the assets of the fund were sufficient to cover the accrued service liabilities including the recommended contingency reserves in full.

The appointment of a Curator in terms of section 5(1) of the Financial Institutions (protection of funds) Act 2001 for the whole of the business of the Municipal Councillors Pension Fund was done in December 2017. Due to the provisional curatorship, a short moratorium has been placed on the payment of benefits to members/beneficiaries. In terms of the curatorship order, the Court ordered as follows: 1. The provisional Curatorship order of the 19th December 2017 is made a final; 2. The Curator shall furnish the Registrar of the Pension Fund with progress report; 3. The Curator must deliver a further progress report to the Court by no later than 31st October 2018 which report deals with the status of curatorship as at the 30th September 2018; on the curatorship once every two months

The Municipal Workers Retirement Fund (Previously South African Municipal Workers Union National Provident Fund)

The Municipal Workers Retirement Fund is a defined contribution scheme. Members contribute at a rate of not less than 7.5% of salaries, as required by the Rules. The employers contribute at a total rate of not less than 18%. From 1 July 2017, members and employers that fall under other bargaining councils or forums are not bound by the above minimum contribution rates. The statutory valuation performed as at 30 June 2017 revealed that the assets of the fund amounted to R7,720,948.000 (30 June 2014 : R6,574,75.00), with funding levels of 102.0% (30 June 2014: 111.7%). As a percentage of members' Fund Credits, the investment smoothing reserve has decreased from 5.6% to 4.9% over the valuation period. As a percentage of the market value of assets, it has decreased marginally from 4.6% to 4.4%. The Fund's assets are sufficient to cover the members' Fund Credits, the targeted levels of the risk benefits reserve and the data and processing error reserve, and an investment smoothing reserve of 4.9% of members' Fund Credits as at 30 June 2017. In addition, there is brought-forward surplus of some R152.8 million which has been allocated to former members and is awaiting payment. The Fund is therefore in a sound financial position.

National Fund for Municipal Workers

The fund operates as a defined contribution fund and in terms of the rules of the fund category A and category C members contribute at a rate as agreed upon by the Local Authority and the member, subject to an absolute minimum contribution of 2% and 5% of their remuneration respectively.

Category C-Members, appointed after 1 July 2012, who are not part of the Schedule shall make monthly contributions to the Fund equal to 7.5% of their Remuneration.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

60. Multi-employer retirement benefit information (continued)

The last statutory valuation performed as at 30 June 2018 revealed that the assets of the fund amounted to R15,393,671,000 (30 June 2015 : R10,050,029,000), with funding levels of 100.46% (30 June 2015: 100.42%). The actuary certified that the assets of the fund are sufficient to cover 100.46% of the members' liabilities, also that it can be expected that the funding level of a fund of this nature will fluctuate around 100%, for example due to timing differences in investment and receipt of monies, slight mismatching of assets and liabilities and processing errors.

Notes to the Unaudited Annual Financial Statements

61. Prior period errors and Reclassifications (continued)

61.1 Receivables from exchange transactions

| | |
|---|--------------------|
| Balance previously reported | 161 402 873 |
| Accumulated surplus | (15 680 831) |
| Contribution to allowance for doubtful debt | (1 584 254) |
| Rental of facilities and equipment | 3 366 585 |
| | 147 504 373 |

Accounting for the assets and liabilities transpiring from the agreement entered into between TCTA and Stellenbosch municipality, whereby 80 houses were donated to the municipality for the benefit of housing development within the specified area.

61.2 Other receivables from exchange transactions

| | |
|-----------------------------|-------------------|
| Balance previously reported | 10 155 967 |
| Operating lease liability | 5 754 000 |
| | 15 909 967 |

The receivable was recognised for the advance payment relating to the use of a municipal parking area, for a period of five years in terms of the signed agreement.

61.3 Inventories

| | |
|---|-------------------|
| Balance previously reported | 52 307 942 |
| Accumulated surplus (Housing inventory) | 12 250 000 |
| | 64 557 942 |

The municipality incorrectly accounted for capital spares that must be classified as property plant and equipment.

The VAT relating to store purchases were not accounted for correctly.

Additional text

61.4 VAT receivable

| | |
|-----------------------------|-------------------|
| Balance previously reported | 47 420 470 |
| Operating lease liability | 748 020 |
| | - |
| | 48 168 490 |

The municipality had to account for deferred VAT in terms of the parking agreement with the client.

61.5 Property, plant and equipment

| | |
|-----------------------------|----------------------|
| Balance previously reported | 5 057 061 065 |
| Depreciation | (16 310 625) |
| Accumulated surplus | 132 812 |
| Accumulated surplus | (8 158 160) |
| | 5 032 725 092 |

The work in progress previously reported was incorrect and included infrastructure that should have been commissioned and depreciation calculated accordingly.

The accumulated depreciation per asset class was not accounted for correctly.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

61. Prior period errors and Reclassifications (continued)

61.12 Construction contracts

| | |
|---------------------------------|------------------|
| Balance previously reported | - |
| Government grants and subsidies | 1 044 566 |
| | <u>1 044 566</u> |

Construction contracts in terms of GRAP 11 were incorrectly accounted for as revenue from non-exchange transactions.

61.13 Rental of facilities and equipment

| | |
|--|-------------------|
| Balance previously reported | 14 524 336 |
| Receivables from exchange transactions | 3 366 585 |
| | <u>17 890 921</u> |

Accounting for the assets and liabilities transpiring from the agreement entered into between TCTA and Stellenbosch municipality, whereby 80 houses were donated to the municipality for the benefit of housing development within the specified area.

61.14 Other Income

| | |
|-----------------------------|-------------------|
| Balance previously reported | 26 705 321 |
| Operating lease liability | 767 200 |
| Unspent conditional grants | 13 051 028 |
| | <u>40 523 549</u> |

Recognition of rental income for a period of eight months.

Development charges levied during the year under review was recognised as revenue.

61.15 Property rates

| | |
|---------------------------------|--------------------|
| Balance previously reported | 332 957 900 |
| Property rates- interest earned | (1 998 219) |
| | <u>330 959 681</u> |

Interest levied on transactions arising from non-exchange transactions was classified based on the nature of the underlying transaction.

61.16 Property rates - interest earned

| | |
|----------------|------------------|
| Property rates | <u>1 998 219</u> |
|----------------|------------------|

Interest levied on transactions arising from non-exchange transactions was classified based on the nature of the underlying transaction.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

61. Prior period errors and Reclassifications (continued)

61.17 Government grants & subsidies

| | |
|---|--------------------|
| Balance previously reported | 234 134 499 |
| Unspent conditional grants (Khaya Lam free market foundation) | 222 500 |
| Unspent conditional grants (Municipal accreditation grant) | 56 020 |
| Unspent conditional grants (National resource management grant) | (135 798) |
| Unspent conditional grants (National Lottery) | 200 000 |
| Construction contracts | (1 044 545) |
| | 233 432 676 |

Khaya Lam free market foundation - The municipality entered into an agreement with Khaya Lam (Free market foundation) during November 2016 to the effect that for each title deed transferred the Municipality will be availed R500 per transfer to be utilised for field workers within the title deeds program.

Municipal accreditation grant - Funds were gazetted for the 2019/20 financial year but received early during June 2019. The correction relates to the salary expenditure for the capacity clerk seconded from the Provincial Department of Human Settlements. The capacity clerk commenced operations at Stellenbosch municipality on 1 April 2019. Salary payments for three months therefore needs to be expensed against the grant.

National resource management grant - The management fees for the project was not claimed timeously and therefor had to be reversed.

National lottery - Correction of funding source for capital assets funded by the National Lottery funds but own municipal funding was used.

Construction contracts in terms of GRAP 11 were incorrectly accounted for as revenue from non-exchange transactions.

61.18 Employee related costs

| | |
|--|----------------------|
| Balance previously reported | (461 114 130) |
| Payables from exchange transactions | (903 594) |
| Contribution to employee benefits (reclassification) | 17 306 635 |
| | (444 711 089) |

Workmen compensation was not accrued for the previous reporting period.

Contribution to employee benefits were reclassified in terms of the nature of the expenditure and to ensure fair presentation of the financial statements.

61.19 Contribution to Employee benefits

| | |
|-----------------------------|--------------|
| Balance previously reported | (1 273 639) |
| Finance cost | 18 580 276 |
| Employee related costs | (17 306 637) |
| | - |

Contribution to employee benefits were reclassified in terms of the nature of the expenditure and to ensure fair presentation of the financial statements.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

61. Prior period errors and Reclassifications (continued)

61.20 Depreciation and amortisation

| | |
|-------------------------------|----------------------|
| Balance previously reported | (174 958 815) |
| Property, plant and equipment | (16 310 626) |
| Investment property | 118 635 |
| Property, plant and equipment | (2 637 828) |
| | (193 788 634) |

The work in progress previously reported was incorrect and included infrastructure that should have been commissioned and depreciation calculated accordingly. Assets with zero book values were correctly accounted for.

Reversal of depreciation relating to Investment Property. Asset was correctly classified as Housing inventory.

61.21 Finance costs

| | |
|-----------------------------------|---------------------|
| Balance previously reported | (23 207 266) |
| Contribution to employee benefits | (18 580 276) |
| | (41 787 542) |

Contribution to employee benefits were reclassified in terms of the nature of the expenditure and to ensure fair presentation of the financial statements.

61.22 Contribution to allowance for doubtful debt

| | |
|--|---------------------|
| Balance previously reported | (21 952 121) |
| Receivables from exchange transactions | (1 584 254) |
| | (23 536 375) |

Accounting for the assets and liabilities transpiring from the agreement entered into between TCTA and Stellenbosch municipality, whereby 80 houses were donated to the municipality for the benefit of housing development within the specified area.

61.23 Transfers and subsidies

| | |
|-----------------------------|--------------------|
| Balance previously reported | (8 990 039) |
| General expenses | (139 410) |
| | (9 129 449) |

The bursaries for non-employees were reclassified to transfers and subsidies.

61.24 Lease rentals on operating lease

| | |
|-----------------------------|--------------------|
| Balance previously reported | (2 933 062) |
| Operating lease liability | - |
| | (2 933 062) |

Correction of an accounting error relating to the Operating lease liability in the comparative year.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

61. Prior period errors and Reclassifications (continued)

61.25 General Expenses

| | |
|-----------------------------|----------------------|
| Balance previously reported | (121 828 999) |
| Transfers and subsidies | 139 410 |
| | <u>(121 689 589)</u> |

The bursaries for non-employees were reclassified to transfers and subsidies.

61.26 Work-in-progress

| | |
|-----------------------------|--------------------|
| Balance previously reported | 1 246 095 355 |
| Assets commissioned | (656 579 513) |
| | <u>589 515 842</u> |

The work in progress previously reported was incorrect and included infrastructure that should have been commissioned and depreciation calculated accordingly.

63. Budget differences

Material differences between budget and actual amounts

The materiality framework of the municipality informs the determining base ranges. The framework outlines all principles and guiding practices to allow management to enforce a consistent application of the framework's guidelines. With regard to reporting, the understandability and transparency to users of the financial statements was a determining factor when deciding on the base %.

Statement of Financial Performance

Revenue

The determining base range used was 1 % of total revenue.

Service charges (BD1)

The projection was based on the prior period's collection and also as a result of the reversal of the electricity and water income estimate accrual that was substantially higher in the comparative year.

Rental of facilities and equipment (BD2)

The revenue for rental of facilities and equipment declined due to factors such as social change, which is a cultural and economic change.

Interest earned - outstanding receivables (BD3)

The budget projection increase was based on historic performance.

Agency services (BD3)

The projected collection was based on historic performance.

Other income (BD4)

The decrease is due to the national lockdown, as a result of the covid-19 pandemic.

Government grants & subsidies (BD5)

Delays were experienced with the implementation of capital projects due to the national lockdown enforced, as a result of the covid-19 pandemic.

Fines, Penalties and Forfeits (BD6)

The budget projection for fines was based on previous performance.

Expenditure

The determining base range was 2% of total expenditure.

Contribution to / from provisions (BD7)

The variance emanates from the rehabilitation of the landfill site which is calculated based on information as at year end and subject to certain unpredictable assumptions. This information is not available when the budget is drafted.

Employee related costs (BD8)

The municipality reclassified the Contribution to Employee Benefits that was separately disclosed on the face of the financial statements to Employee related cost.

Finance costs (BD11)

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

63. Budget differences (continued)

The variance pertains to the unwinding of the interest of the provision for landfill sites.

The municipality reclassified the Contribution to Employee Benefits that was separately disclosed on the face of the financial statements to Employee related cost.

Depreciation and amortisation (BD9)

The capital projects that were expected to be completed in the financial year was impacted due to the national lockdown, as a result of the Covid-19 pandemic.

Impairment loss/ Reversal of impairments (BD10)

No assets were impaired/ reversed for impairment during the year.

Debt Impairment (BD12)

The projection was based on historical data.

Contribution to allowance for doubtful debt (BD13)

The projection was based on historic performance of debtors'accounts

Contracted Services (BD14)

The variance is as a result of the COVID-19 lockdown regulations that had an adverse impact the expenditure.

General Expenses (BD15)

The variance is as a result of the COVID-19 lockdown regulations that had an adverse impact the expenditure.

Fair value adjustments (BD16)

These adjustments are based on estimates that cannot be budgeted for.

Gain on biological assets and agricultural assets

The gain is based on the growth of the biological assets and cannot be calculated before hand for budget purposes.

Inventories (losses/write downs) (BD18)

The write downs are based on specific activities during the period, for example stock take and can thus not be budgeted for.

Statement of Financial Position

Assets

The determining base was 1% of total assets and 5% of accumulated surplus.

Cash and cash equivalents (BD19)

Due to unspent conditional grants, there was more cash to invest on a short-term basis.

Receivables from exchange transactions (BD20)

The variance is as a result of the economic conditions of consumers in the municipal area and further impacted by the national lockdown due to the covid-19 pandemic.

Other receivables from exchange transactions (BD21)

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

63. Budget differences (continued)

The income estimate for water and electricity formed part of the other receivables budget, but was reclassified due to the nature of the receivable.

VAT receivable (BD23)

Management did not anticipate a VAT receivable at year end.

Long term receivable (BD24)

This includes arrangement debtors. Defaulting on the arrangement entered into with the municipality is the main reason for the variance.

Intangible Assets (BD25)

The municipality had planned to procure more software systems.

Biological assets that form part of an agricultural activity (BD26)

The budgeted amount is based on the previous fair value model which has since been changed to cost model

Heritage assets (BD27)

The budgeted amount is based on the previous fair value model which has since been changed to cost model.

Liabilities

The determining base was 2% of total liabilities.

Consumer deposits (BD28)

Growth in our community/ client base resulting in increase deposits.

Employee benefit obligation (BD29)

The difference emanates from the post-retirement benefits and long service awards which is calculated based on information as at year end and subject to certain unpredictable assumptions ie. discount rate, expected rate of return, retirement age, etc. This information is not available when the budget is drafted.

Operating lease liability (BD30)

Operating lease liability is included in other financial liabilities

Other financial liabilities (BD31)

The external loan was taken up towards the end of the financial year.

Provisions (BD32)

Provisions are based on experts' work as at the end of the financial year using information that is not available during the budget. The budget is based on historic amounts.

Payables from exchange transactions (BD33)

This was mainly due to late contractor appointments, delays in projects which led to more invoices not being paid at year end.

Unspent conditional grants and receipts (BD34)

Due to unforeseen circumstances, late contractor appointments, delays in projects, etc, conditions of some grants could not be met at year end.

Stellenbosch Municipality

Unaudited Annual Financial Statements for the year ended 30 June 2020

Notes to the Unaudited Annual Financial Statements

| Figures in Rand | 2020 | 2019 |
|-----------------|------|------|
|-----------------|------|------|

63. Budget differences (continued)

Cash Flow Statement

Grants (CF 1)

The equitable share allocated per the Division of Revenue Act (DoRA) increased to accommodate the increase in active housing projects.

Interest income (CF 2)

Capital projects were funded from Capital Replacements Reserves (CRR) instead of an external loans.

Payments

Suppliers and employee costs (CF3)

Bulk purchases which are bought by the municipality are based on the consumption of the community have increased compared to the prior year.

Employee related cost decrease due to vacancies not filled and posts becoming vacant during the financial year.

Transfers and grants (CF4)

Management anticipated to spend the allocated funds, but due to unforeseen circumstances it did not materialise as planned.

Cash flow from investing activities

Purchase of PPE (CF5)

The variance relates to the underspending on the capital budget.

Purchase of intangible assets (CF6)

The municipality had undertaken a feasibility into new software for cemeteries.

Movement in investments (CF7)

The municipality invested excess funds for periods more than 3 months but up to 12 months, these investments are classified as short term investments in the statement of financial position.

Cash flow from financing activities

64. BBBEE Performance

Information on compliance with the B-BBEE Act is included in the annual report under the section titled B-BBEE Compliance Performance Information.

1. PURPOSE

The Annual Performance Report 2019/20 is hereby submitted to the Stellenbosch Municipal Council in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), Section 46(1) and (2). The report covers the performance information from 01 July 2019 to 30 June 2020 and focuses on the implementation of the Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP), in relation to the objectives as encapsulated in the Municipality's Integrated Development Plan (IDP) for the year under review.

The format of the report will reflect the Stellenbosch Municipality's Key Performance Indicators (KPIs) per Strategic Focus Area (SFA).

This report will also endeavour to report to Council on the Municipality's performance in terms of the five (5) National Government's Key Performance Areas for local government, which are (1) Basic Service Delivery; (2) Local Economic Development; (3) Municipal Institutional Transformation and Development; (4) Municipal Financial Viability and Management and (5) Good Governance and Public Participation.

2. LEGISLATIVE REQUIREMENTS

This Annual Performance Report has been compiled in compliance with the requirements of Section 46(1) of the MSA, which stipulates as follows:

- (1) A municipality must prepare for each financial year a performance report reflecting—
 - (a) the performance of the municipality and each external service provider during that financial year;
 - (b) a comparison of the performance referred to in paragraph (a) with targets set for performance in the previous financial year; and
 - (c) measures taken to improve performance.

In addition, regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations, 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determining the roles of the different role players." Performance management is not only relevant to the organisation as a whole, but is also applicable to the individuals employed in the organisation as well as the external service providers.

3. MUNICIPAL OVERVIEW

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in that year. Today, the area has become primarily known for its extraordinary wines, fruit, world renowned cultural landscapes and exceptional scenic quality. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their rich heritage and traditions, but also the divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch, Boland College, sports and culinary institutions and a number of prestigious schools. It has a strong business sector, varying from major South African businesses and corporations, to smaller

enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. The area's numerous wine farms and cellars are very popular and the area is the home of the very first wine route in South Africa.

The town boasts a variety of sport facilities. Coetzenburg, with its athletics and rugby stadiums, has hosted star performances over many generations while the Danie Craven Stadium is the home of Maties rugby, the largest rugby club in the world. The municipal area has a number of theatres, which include the University's HB Thom Theatre, Spier Amphitheatre, Dorpstraat Theatre, Aan de Braak Theatre, and Oude Libertas Amphitheatre – well-known for its summer season of music, theatre and dance.

Limited municipal resources require an increase in multi-sectoral partnerships to address the broad spectrum of needs in the community. The Municipality cannot address the challenges of Stellenbosch on its own, not only because of limited resources, but also because it does not control all the variables impacting on growth and development of the town. Welfare and community organisations play a leading role in assisting to meet the needs of previously neglected communities. The business sector also plays a key role in shaping the economic development of the municipal area.

4. PERFORMANCE MANAGEMENT OVERVIEW

In order to improve on performance planning, implementation, measurement and reporting, the Municipality implemented the following actions;

- Departmental operational plans were developed for monitoring and reporting operational programmes;
- An electronic performance management system is operational within the Municipality. The same system forms the basis of performance evaluations of the Directors and the Municipal Manager; and
- The Municipality endeavoured during the development of the TL SDBIP as well as with the development of the Departmental SDBIP that the "SMART" principle be adhered to in the setting of indicators and objectives. Emphasis was placed on ensuring that targets were specific and time bound, thus making it measurable.

Table 4: Performance Management System Checklist

| | Performance Management Policy | All MSA s57/56 Performance contracts signed | Audit Committee | Municipal Public Accounts Committee (MPAC) | Quarterly Performance Reporting to Council | Annual Performance Reporting to Council |
|-----------|-------------------------------|---|-----------------|--|--|---|
| In place? | √ | √ | √ | √ | √ | √ |

4.1 Top Layer Service Delivery and Budget Implementation Plan

The organisational performance is evaluated by means of a Municipal Scorecard (TL SDBIP) at organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators on how, where and when the strategies, objectives and normal business processes of the Municipality are implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and Budget.

The MFMA Circular No.13 prescribes that:

- The IDP and budget must be aligned;
- The budget must address the strategic priorities;
- The SDBIP should indicate what the municipality is going to do during next the 12 months; and
- The SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

The TL SDBIP was prepared as described in the paragraphs below and approved by the Executive Mayor on 26 June 2019.

The approved TL SDBIP 2019/20 was revised in January 2020. These revisions were made in line with the adjustment budget, internal audit findings and recommendations made by the Auditor General of South Africa (AGSA).

The overall assessment of actual performance against targets set for the Key Performance Indicators as documented in the SDBIP is illustrated in terms of the following assessment methodology:

Table 5: Performance Assessment Criteria

| Color | Category | Explanation |
|-------|------------------------|--|
| | KPI Not Yet Measured | KPIs with no targets or actual results for the selected period |
| | KPI Not Met | Actual vs. target less than 75% |
| | KPI Almost Met | Actual vs. target between 75% and 100% |
| | KPI Met | Actual vs. target 100% achieved |
| | KPI Well Met | Actual vs. target more than 100% and less than 150% achieved |
| | KPI Extremely Well Met | Actual vs. target more than 150% achieved |

The TL SDBIP (the Municipal Scorecard) consolidate service delivery targets set by Council / Senior Management and provide an overall picture of performance for the Municipality as a whole, reflecting performance on its strategic priorities. The TL SDBIP is a detailed one-year plan and the necessary components should include:

- Monthly projections of revenue to be collected for each source;
- Expected revenue to be collected not billed;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Non-financial measurable performance objectives in the form of targets and indicators; and
- Detailed capital project plan broken down by ward over three years.

4.2 Departmental Service Delivery and Budget Implementation Plan

The Departmental Service Delivery and Budget Implementation Plan (the detailed SDBIP) capture the performance of each Directorate. Unlike the TL SDBIP, which reflects on the strategic performance of the Municipality, the Departmental SDBIP 2019/20 provides a comprehensive picture of the performance per Directorate, Department and Section. It was compiled by the Directors and Senior Managers for their respective Departments and Sections and consists of objectives, indicators and targets derived from the approved TL SDBIP 2019/20.

5. PLANNED TARGETS VS ACTUAL RESULTS FOR THE 2019/20 FINANCIAL YEAR

This section of the Annual Performance Report 2019/20 will report on the Municipality's actual performance against the planned targets as derived from the Municipality's IDP. Due to the fact that the Municipality has developed five (5) Strategic Focus Areas (SFAs) the performance reporting will follow these themes.

5.1 Municipal performance per National Key Performance Indicator

5.1.1 Municipal Transformation and Institutional Development

Table 6: NKPA- Municipal Transformation and Institutional Development

| INDICATOR | MUNICIPAL ACHIEVEMENT 2018/19 | MUNICIPAL ACHIEVEMENT 2019/20 |
|--|---|--|
| The number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan | 2* | 4** |
| The percentage of a municipality's budget actually spent on implementing its workplace skills plan | R2 374 502 / R1 719 104 450 x 100 = 0.14% | R2 262 082.24/ R1 778 283 844 x100 = 0.13% |

*EE appointments made within the 2018/19 financial year.

**EE appointments made within the 2019/20 financial year.

5.1.2 Basic Service Delivery

Table 7: NKPA- Basic Service Delivery

| INDICATOR | MUNICIPAL ACHIEVEMENT 2018/19* | MUNICIPAL ACHIEVEMENT 2019/20 |
|---|--------------------------------|-------------------------------|
| The percentage of households earning less than R6,500 per month with access to free basic services
(In the case of Stellenbosch Municipality- percentage of registered Indigent households are being reported) | 100% | 100% |
| The percentage of households with access to basic level of water | 100% | 100% |
| The percentage of households with access to basic level of sanitation | 100% | 100% |
| The percentage of households with access to basic level of electricity | 71% | 74.4% |
| The percentage of households with access to basic level of solid waste removal | 100% | 100% |

* The percentage of households with access to basic level of water, sanitation, electricity and solid waste services is based on formal households only. The information on informal households and backyard dwellings were not taken into account.

5.1.3 Local Economic Development

Table 8: NKPA- Local Economic Development

| INDICATOR | MUNICIPAL ACHIEVEMENT 2018/19 | MUNICIPAL ACHIEVEMENT 2019/20 |
|---|-------------------------------|-------------------------------|
| The number of jobs created through municipality's local economic development initiatives including capital projects | 153.10 | 1 656 |

5.1.4 Municipal Financial Viability and Management

Table 9: NKPA- Municipal Financial Viability and Management

| INDICATOR | MUNICIPAL ACHIEVEMENT 2018/19 | MUNICIPAL ACHIEVEMENT 2019/20 |
|---|-------------------------------|-------------------------------|
| Debt coverage ((Total operating revenue - operating grants received) / Debt service payments due within the year) | 55.20% | 59.13% |
| Service debtors to revenue (Total outstanding service debtors / Annual revenue received for services) | 17.83% | 12.38% |
| Cost coverage ((Available cash + investments) / Monthly fixed operating expenditure) | 4.70 | 2.43 |

5.1.5 Good Governance and Public Participation

Table 10: NKPA- Good Governance and Public Participation

| INDICATOR | MUNICIPAL ACHIEVEMENT 2018/19 | MUNICIPAL ACHIEVEMENT 2019/20 |
|--|-------------------------------|-------------------------------|
| The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan | 87.53% | 70.80% |

5.2 Overall performance per Municipal Strategic Focus Area

The following graph and table illustrates the Municipality's overall performance per Municipal Strategic Focus Area (SFA).

| Stellenbosch Municipality | | Municipal Strategic Focus Areas (SFAs) | | | | |
|---------------------------|-------------|--|--------------------------------------|---------------------|--------------------------|--|
| | | SFA 1 - Valley of Possibility | SFA 2 - Green and Sustainable Valley | SFA 3 - Safe Valley | SFA 4 - Dignified Living | SFA 5 - Good Governance and Compliance |

5.3 Supplier performance

Looking at the applicable legislation, specifically s46(1)(a) of the MSA - A municipality must prepare for each financial year an annual report consisting of –

(a) a performance report reflecting— (i) the municipality's, and any service provider's, performance during that financial year, also in comparison with targets of and with performance in the previous financial year.

In consideration of this legislative requirement, we consider the definition prescribed to a service provider, as well as a municipal service and a service delivery agreement in terms of the MSA.

A "service provider" in terms of section 76(b) of the MSA constitutes a person or institution, or combination thereof, which provide to or for the benefit of a local community. Whereas, an "external service provider" is considered to be an external mechanism (as referred to in section 76(b)) which provides a municipal service for a municipality.

It is necessary to further consider the meaning prescribed to a "service delivery agreement", as in terms of section 76(b), this is considered to be an agreement between a municipality and an institution or person mentioned in section 76(b) in terms of which a municipal service is provided by the institution or person, either for its own account or on behalf of the municipality. Finally, the MSA defines a "municipal service" as necessary to ensure an acceptable and reasonable quality of life and, if not provided, would endanger public health or safety of the environment.

In consideration of the year under review, as well as the legislative interpretations detailed above, the Municipality asserts that no service delivery agreements were entered into with service providers who provided a municipal service to or for the benefit of the local community on behalf of the Municipality. However, in the table below we provide an overview of the number of SCM awards made throughout the year.

GERALDINE METTLER
MUNICIPAL MANAGER
DATE: 30 October 2020

ANNEXURE C

Municipal Manager
Stellenbosch Municipality
PO Box 17
Stellenbosch
7599

20 August 2020

Dear Ms Mettler

DELAYED SUBMISSION OF THE 2019-20 MFMA AUDIT REPORT

The President of the Republic of South Africa (President) declared a national lockdown with effect from 00h00 on 26 March 2020 due to the coronavirus pandemic. In response to the national lockdown declared by the President and the impact on the financial management functions of auditees governed by the Public Finance Management Act, 1999 (Act No. 1 of 1999) (PFMA) the Minister of Finance on 31 March 2020 issued Government Gazette No. 43188 in terms of the PFMA which exempted functionaries and institutions from complying with the relevant deadlines contained in sections 8(1)(b), 8(5), 19(1)(b), 19(5), 40(1)(c), 40(1)(d), 55(1)(c), 55(1)(d) and 65(2) of the PFMA. As a result, the deadline for submission of Annual Financial Statements (AFS) was extended for auditees governed by the PFMA from 31 May 2020 to 31 July 2020.

For the same reason as outlined above the Minister of Finance subsequently issued Government Gazette No. 43582 which exempts municipalities and municipal entities from complying with the deadlines in sections 126(1) and (2), 127(1) and (2), 129(1) and 133(2) of the Local Government Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA).

The two-month extension granted to auditees governed in terms of the PFMA resulted in the deadline for the issuing of audit reports by the Auditor-General of South Africa (AGSA) to accounting officers to also be extended by a two-month period. The audit reports are scheduled to be submitted to the Accounting Officers on 30 September 2020. The audit teams are currently fully engaged with the PFMA audits which impacts the AGSA's capacity to proceed with any audits subject to the Local Government Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) before this date.

As a result of the extension of the PFMA timelines and its related impact on AGSA resourcing, we hereby wish to inform you that the AGSA has resolved for the date of the audit report submission to the accounting officers of MFMA auditees to be extended from 30 November 2020 (31 December 2020 for consolidations) to 28 February 2021 (31 March 2021 for consolidations) to allow for the application of the required diligence and care during the audit process.

Please do not hesitate to contact my office should you require any further information.

Yours sincerely

| 8.5 | MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR FEBRUARY 2021 |
|-----|--|

Collaborator No: 8/1
 BUDGET KPA Ref No: Good Governance and Compliance
 Meeting Date: 31 March 2021

1. SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR FEBRUARY 2021

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2020/2021 to report the deviations to Council.

3. DELEGATED AUTHORITY

Council

FOR NOTING.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2020/2021) stipulate that SCM deviations be reported to Council. In compliance thereto, this report presents to Council the SCM deviations that occurred during February 2021.

5. RECOMMENDATIONS

that Council notes the deviations as listed for the month of February 2021.

6. DISCUSSION / CONTENTS

6.1 Background/Legislative Framework

The regulation applicable is as follows:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations

Deviation from and ratification of minor breaches of, procurement processes

36. (1) A supply chain management policy may **allow the accounting officer—**
 (a) To **dispense with the official procurement processes** established by the policy and to procure any required goods or services through any convenient process, which may include direct negotiations, but only—
 (i) in an emergency;
 (ii) if such goods or services are produced or available from a single provider only;
 (iii) for the acquisition of special works of art or historical objects where specifications are difficult to compile;
 (iv) acquisition of animals for zoos; or
 (v) in any other exceptional case where it is impractical or impossible to follow the official procurement processes; and
 (b) to ratify any minor breaches of the procurement processes by an official or committee acting in terms of delegated powers or duties which are purely of a technical nature.

(2) The accounting officer must record the reasons for any deviations in terms of sub regulation (1) (a) and (b) and **report them to the next meeting of the council**, or board of directors in the case of a municipal entity, and include as a note to the annual financial statements.

6.2 Discussion

Reporting the deviations as approved by the Accounting Officer for February 2021:

The following deviations were approved with the reasons as indicated below:

| DEVIATION NUMBER | CONTRACT DATE | NAME OF CONTRACTOR | CONTRACT DESCRIPTION | REASON | SUBSTANTIATION WHY SCM PROCESS COULD NOT BE FOLLOWED | TOTAL CONTRACT PRICE R |
|------------------|------------------|--------------------|---|--|---|--------------------------|
| D/SM 10/21 | 20 February 2021 | TMT Services | Provision of Traffic Law Enforcement equipment, back office system and related services | Exceptional case and it is impossible to follow the official procurement process | <p>The tender for the provision of traffic law enforcement equipment, back office system and related services was approved subject to negotiations with the preferred service provider. The lead negotiator and the negotiation team was appointed by the Accounting Officer. The negotiations commenced in January 2021, however the process is still not finalised.</p> <p>Therefore it is impractical to follow the official procurement process as the service has to continue without interruption to ensure that the municipality does not incur a substantial loss of revenue.</p> | Rates: R121.49 per fine. |
| D/SM 11/21 | 26 February 2021 | Mazars | Forensic Investigation after Allegations of tender irregularities | Exceptional case and it is impossible to follow the official procurement process | <p>Mazars was appointed to perform a forensic investigation into the Drought Project.</p> <p>The investigation is at a stage where disciplinary actions are being instituted. The forensic expert need to testify and the cost was not included in the initial scope of the contract as we did not know the outcome of the investigation.</p> | R92 000 excluding VAT |

| | | | | | | |
|--|--|--|--|--|---|--|
| | | | | | In this instance Mazars are the only service provider that can deliver the services of testifying in regard to the investigation. | |
|--|--|--|--|--|---|--|

6.3 Financial Implications

As per table above.

6.4 Legal Implications

The regulation applicable is:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations: Deviations from and ratification of minor breaches of, procurement processes.

6.5 Staff Implications

No staff implications.

6.6 Previous / Relevant Council Resolutions

None

6.7 Risk Implications

That the market may not be tested.

The measures in place to deal with deviations mitigate the risk to an acceptable level.
The auditor general also audit the deviations during the yearly audit.

6.8 Comments from Senior Management

The item was not circulated for comment except to Municipal Manager.

6.8.1 Municipal Manager

Supports the recommendations.

| 10.1 | REPORT/S BY THE EXECUTIVE MAYOR |
| 10.1.1 | REPORT ON THE DECISIONS TAKEN BY THE EXECUTIVE MAYOR FOR THE QUARTER: OCTOBER 2020 TO DECEMBER 2020 |

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance

24 February 2021

1. **SUBJECT: REPORT ON THE DECISIONS TAKEN BY THE EXECUTIVE MAYOR FOR THE QUARTER: OCTOBER 2020 TO DECEMBER 2020**

2. **PURPOSE**

To inform Council of the decisions taken by the Executive Mayor from April 2020 to September 2020 (see **APPENDIX 1**).

3. **DELEGATED AUTHORITY**

As per the delegations from Council and powers vested in the Executive Mayor by legislation.

For Notification

4. **EXECUTIVE SUMMARY**

In terms of the Municipal Structures Act 117 of 1998 Section 56 (5) it is stated that:

"An Executive Mayor must report to the municipal council on all decisions taken by the Executive Mayor."

5. **RECOMMENDATIONS**

that Council take note of the decisions by the Executive Mayor.

6. **DISCUSSION / CONTENTS**

6.1 **Background**

In terms of the Municipal Structures Act 117 of 1998 Section 56 (5) it is stated that:

"An Executive Mayor must report to the municipal council on all decisions taken by the Executive Mayor."

6.2 **Discussion**

Council approved delegations to the Executive Mayor and legislation also contains powers that are vested in the Executive Mayor on which reports are made for notification.

6.3 **Financial Implications**

Dealt with in terms of the approved budget.

6.4 Legal Implications

The decisions are in line with approved delegations or powers vesting in the Executive Mayor.

6.5 Staff Implications

This report has no additional staff implications to the Municipality.

6.6 Previous / Relevant Council Resolutions

Item 10.1.1 – Council meeting: 2020-10-28

6.7 Risk Implications

Risk implications are mitigated when decisions taken are in line with approved powers and functions.

6.8 Comments from Senior Management:

The report was not circulated for comment. The Executive Mayor discusses relevant issues with the Municipal Manager who takes up actions with the Directors directly.

ANNEXURES

Annexure 1: Decisions taken by the Executive Mayor in the period October to December 2020.

NOTICE OF DECISION OF APPEAL AUTHORITY

APPEAL LODGED IN TERMS OF SECTION 79(2) OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW (2015) AGAINST THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL TO APPROVE THE APPLICATION FOR A CONSENT USE IN ORDER TO ESTABLISH A GUEST HOUSE, ON ERF 660 FRANSCHHOEK

DECISION OF APPEAL AUTHORITY:

The Appeal Authority hereby, in terms of Section 81 (7) of the Stellenbosch Municipal Land Use Planning By-law 2015:

Tick the appropriate box:

| | | | | | |
|---|----------|-------------|--|---------------|--|
| CONFIRM | X | VARY | | REVOKE | |
| THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL, ON THE 25th OF OCTOBER, TO APPROVE IN TERMS OF SECTION 60 OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW DATED 20 OCTOBER 2015, THE APPLICATION FOR A CONSENT USE IN ORDER TO ESTABLISH A GUEST HOUSE, ON ERF 660 FRANSCHHOEK | | | | | |
| <ol style="list-style-type: none"> 1. The abovementioned appeal refers. 2. The Municipal Planning Tribunal, on the 25th of October 2019, approved in whole, in terms of Section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015, the application the application for a consent use in order to establish a guest house, on Erf 660 Franschhoek. 3. The application was approved subject to a number of conditions imposed in terms of Section 66 of the Stellenbosch Municipality Land Use Planning By-Law (2015). 4. Mr Gysbert Nicolaas Van Zyl from BvZ Plan Consultants lodged an appeal in terms of Section 79(2) of the By-Law, with the Municipality on the 05th of December 2019, against the decision of the Stellenbosch Municipal Planning Tribunal. | | | | | |

5. The appeal assessment report was drafted based on all documentation provided.
6. In order to comply section 81(6) of the Stellenbosch Municipality Land Use Planning By-Law (2015), an inspection of the documents must be held before the handover to the Appeal Authority for consideration and decision making, however as the report was completed during the National Lockdown period, the report was forwarded electronically to the appellant and affected parties on the 06th of August 2020.
7. Ms. NM van der Linde submitted comments relating to the appeal assessment report, on the 12th of August 2020.
8. An oral hearing was held on the on the 26th of November 2020 where the interested and affected parties were afforded the opportunity to make further submissions to the Appeal Authority.
9. After careful consideration of the written appeal, as well as all relevant documents, information and submissions made to me as Appeal Authority, I have decided, in terms of Section 81(7)(b) of the By-Law to **CONFIRM** the decision of the Stellenbosch Municipal Planning Tribunal:

REASONS FOR THE DECISION

1. By reducing the number of guest bedrooms to six, the remainder of the house can still be used for residential purposes by the family of the manager or owner.
2. A six-bedroom guest house will have a minimal impact on the existing residential character of the property and surrounding area.
3. A smaller scale guesthouse would be more compatible with the residential nature of the surrounding land uses.

4. The property is well located for its use as a guest house, having good access and being located close to the historic town and business centre of Franschhoek.
5. Adequate number of parking bays for six guest bedrooms, can be provided on-site, as prescribed by Franschhoek Town Planning Scheme Regulation, 1985.
6. The subject property is located within the approved urban edge of Franschhoek town in terms of the approved MSDF. The proposed use promotes infill development and limit urban sprawl.
7. The increase in traffic will be minimal and as such it will not create nuisance to the neighborhood.

NOTICE OF DECISION OF APPEAL AUTHORITY

NOTICE OF DECISION OF APPEAL AUTHORITY

APPEAL LODGED IN TERMS OF SECTION 79(2) OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW (2015) AGAINST THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL TO APPROVE THE APPLICATION FOR REMOVAL OF RESTRICTIVE TITLE DEED CONDITIONS, REZONING, CONSOLIDATION AND PERMANENT DEPARTURES: ERF 139 AND 140, STELLENBOSCH

DECISION OF APPEAL AUTHORITY:

The Appeal Authority hereby, in terms of Section 81(7) of the Stellenbosch Municipal Land Use Planning By-law 2015:

Tick the appropriate box:

| CONFIRM | | VARY | X | REVOKE | |
|--|--|------|---|--------|--|
| THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL, ON THE 31 st OF JANUARY 2020, TO APPROVE IN TERMS OF SECTION 60 OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW DATED 20 OCTOBER 2015, THE APPLICATION FOR REMOVAL OF RESTRICTIVE TITLE DEED CONDITIONS, REZONING, CONSOLIDATION AND PERMANENT DEPARTURES: ERF 139 AND 140, STELLENBOSCH | | | | | |

1. The abovementioned appeal refers.
2. The Municipal Planning Tribunal, on 31 January 2020, **approved, in whole**, in terms of section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015, the applications for the removal of restrictive title deed restrictions, Rezoning, Consolidation and Permanent Departures on Erven 139 and 140, Stellenbosch.

3. The application was approved subject to a number of conditions imposed in terms of Section 66 of the Stellenbosch Municipality Land Use Planning By-Law (2015).
4. A valid Appeal was submitted in terms of Section 79(2) of the By-Law by Meglis (PYT) Ltd on behalf of the owner of Erven 139 and 140, Stellenbosch, against the decision of the Stellenbosch Municipal Planning Tribunal.
5. The appeal assessment report was duly drafted based on all documentation provided and available.
6. In terms section 81(6) of the Stellenbosch Municipality Land Use Planning By-Law (2015), the Appeal assessment report and all relevant documentation to which the Appeal Authority proposes to have regard in reaching a decision in the appeal proceeding, was presented to the Appellant and all affected parties for inspection and to which submissions from such parties were received and duly considered before reaching the decision.
7. In accordance with Section 81(b) & (3), an oral hearing was held on the 26th of November 2020 where the interested and affected parties were afforded the opportunity to make further submissions to the Appeal Authority.
8. After having independently considered and weighted all the relevant information, reports and submissions, it is decided that the appeals submitted against the decision on the subject applications on Erven 139 and 140, Stellenbosch, **BE PARTIALLY DISMISSED** and **PARTIALLY UPHELD** that the decision by the Stellenbosch Municipal Planning Tribunal **BE VARIED** in terms

of section 81(7) (b) of the Stellenbosch Municipal Land Use Planning By-law, 2015.

9.1 The reason(s) to confirm the decision of the Stellenbosch Municipal Planning Tribunal in terms of section 81(7) (c) of the said By-law relating to **densification**, are as follows:

9.1.1 This appeal is considered a wide appeal; hence all relevant information should be taken into account by the Appeal Authority. The Dennesig area was identified in the Stellenbosch Municipal Integrated Development Plan (IDP) and the Spatial Development Framework (SDF) as an area of well-located land to be targeted for redevelopment, densification and optimisation.

9.1.2 Duty of care was duly exercised in the processing of the application and considered and decided on in accordance with the prescripts of the prevailing Stellenbosch Municipal Planning Bylaw, 2015.

The Covid-19 situation impacted on the easy flow of communication and as the appellants and applicants remarked on this in the appeal process, the Appeal Authority invited all applicants and appellants in terms of the applicable by-law, to make oral representations to the appeal authority.

This was done to ensure that all parties have every opportunity to present their case to the appeal authority.

Without dealing with all the arguments raised to the appeal authority, the impact of the Dennesig Urban Design Guidelines has been fully argued and its applicable status needs consideration.

It was inter alia the contention of the appellant that the Dennesig Urban Design Guidelines ("the Guidelines") should be formally adopted as a statutory document or tool like an overlay zone as alluded to in the Guidelines.

Statutory tools and processes like the IDP and MSDF determine what must be done and non-statutory tools and processes like guidelines assist with how it should be done (implemented).

The redevelopment and objectives for Dennesig was already decided on and dictated in the IDP and MSDF, i.e. its densification to optimize the potential of well-located land, its role and purpose in the bigger development of Stellenbosch as a critical corridor link to the Adam Tas development, and the associated importance of non-motorised transport and safe places by ensuring a public interface between developments and the street scape.

Guidelines have a specific purpose to inform responsible decision making on the implementation (how to do things) of law and policies (which determines what should be done).

The Guidelines were developed to assist with the consistent and responsible implementation of the developments to ensure that the overall objectives as stated in the MSDF are achieved. These informants relate to matters of design, aesthetics, and functionality to achieve and compliment the overall development strategy of densification and the priority of non-motorized transport and a pedestrian interface of functional areas.

Guidelines do not dictate and decide on statutory processes to establish land use rights and should therefore not be elevated to statutory status and should also not be binding on a decision maker to dictate the outcome of any development.

It was furthermore *inter alia* the contention of the appellant that the process to draft the guidelines was undertaken by the current applicants for their purposes and that such process was closed to other parties and notably other developers and land owners of the Dennesig area and that reasonable participation and inputs was not allowed during the process. The applicants also appointed, paid and managed the service provider to draft the guidelines and that it was done purely to benefit their own interest.

The process to draft the guidelines was initiated, managed, and approved by the municipality. Due to capacity constraints at the municipality and for the sake of progress, the applicants facilitated the process and provided the upfront financing for the study. The Municipality however has remained the custodians of the study and its outcome and application. Consequently, the municipality dictated and approved the terms of reference for the study, approved the appointment of the consultants, managed their outcomes and approved the resulting guidelines. The payment of the study will be offset from the development contributions.

During the process to draft the guidelines properties under consideration, all the landowners and developers who had an interest in the Dennesig properties were invited to participate in the process.

During the process a significant team of a wide array of professionals participated and contributed towards the study to produce a credible outcome to assist in responsible decision making. It has to be noted that, in terms of the scope of interested and affected parties, the extent and grounds for objections is very limited.

Furthermore, it was inter alia the contention of the appellant that the Stellenbosch Municipal Planning Bylaw does not make provision on Section 65 that Guidelines is a relevant consideration to be taken into account when deciding on land use and land development applications. Section 65 only refers to "Provincial" guidelines, which the Dennesig Guidelines are clearly not.

Section 65 of the Bylaw only refers to those matters which MUST be taken into account when considering a land use and land development application. It is by no means aimed at being an exhaustive list and to suggest that only those matters may be taken into account, is ludicrous and petition against Section 6(2) (e) (iii) of PAJA which prescribes that ALL relevant considerations (unqualified insofar as they are not deemed irrelevant considerations) should be taken into account when a decision maker makes a decision. It is common cause that development guidelines form an integral and relevant part in land use and land development decisions. To suggest otherwise will result in a flawed argument and will result in a procedural error to disregard such guidelines.

It was furthermore inter alia the contention of the appellant, that the amended applications that followed on its alignment with the subject

development guidelines was material and ought to have been re-advertised.

The amendments which were required to the original applications to align them with the outcome of the development guidelines mostly related to the design and aesthetical features and which involved building lines, with the lowering of proposed buildings (less floors) in some instances. All changes were to adhere to the required design features to ensure an active public interface between the developments and the street scape.

Section 52(3) and 53(2) requires that a municipality must cause that the publishing or serving of a notice be re-undertaken if material changes are made to an application. The decision to re-advertise is however a discretionary and not a mandatory requirement. The municipality consequently did consider the need and used its discretion to not undertake any additional publishing or serving of notices due to the non-material nature of the changes to the land use applications.

The municipality consequently did exercise duty of care to consider and decide on the matter on rational grounds.

It was furthermore inter alia the contention of the appellant, that the guidelines have no status and should be discarded for the purpose of deciding on the subject land use applications.

The development objectives adopted in the MSDF for Dennesig included inter-alia to re-develop the Dennesig neighborhood as an important corridor link with the Adam Tas development area, to

densify the Dennesig neighborhood to optimize the development potential of this well located area, to promote non-motorized transport, mixed use development and to enhance community integration and safety by providing an active interface between the developments and street scape.

The Dennesig Development Guidelines was developed to provide coherent guidance for the implementation and achievement of these development objectives. The decisions to support these applications was thus based on the basis of rational grounds to achieve these development objectives. If the guidelines are not applied to ensure that these development objectives are met, it would in fact undermine the MSDF and result in ad-hoc developments with a baseless rationale for its redevelopment.

- 9.1.3 The Dennesig Urban Design Guidelines ("the Guidelines") was duly drafted to fulfil a specific purpose and serves as a relevant consideration to inform consistent and responsible decisions in the implementation of the IDP and SDF objectives regarding the redevelopment of the Dennesig area.
- 9.1.4 By not considering the Guidelines would constitute relevant considerations not been taken into account and would result therein that the IDP and SDF objectives are undermined with ad-hoc developments with a baseless rationale for its redevelopment.
- 9.1.5 No justifiable alternative rationale for the specific development proposal or the objective for the redevelopment of the Dennesig area was provided in the appeals submitted.

9.1.6 The decision by the Stellenbosch Municipal Planning Tribunal re: densification, are consequently considered to be rationally connected to the relevant information that was considered and the reasons that was provided by the Stellenbosch Municipal Planning Tribunal for its decision to approve the subject application.

9.2 The reason(s) to vary the decision of the Stellenbosch Municipal Planning Tribunal in terms of section 81(7) (c) of the said By-law relating to **parking**, are as follows:

The following synopsis of the rationale for the provision of parking in Dennesig derives from the provisions of the Stellenbosch MSDF, and more specifically Section 6.6.2 that deals with "Movement"

The point of departure in the provision of parking in the redevelopment of Dennesig, is not the perceived shortage of parking in Stellenbosch, but the fact that there are too many motor vehicles. Providing more parking space will therefore only address the symptoms of the problem to some degree. It will however not address the problem of too many vehicles. The continuous upgrading and provision of additional infrastructure to accommodate a motor-priority mode of transport is also not sustainable and will continue to impact negatively on the rural and productive landscape due to ongoing urban sprawl as a result of prioritizing motor vehicle mode of transport.

The long-term solution is rather to progressively limit the number of motor vehicles through a comprehensive strategy of public and non-motorised transport. To progressively limit the provision of parking is an inherent aspect to inhibit the ownership and use of private motor vehicles, as well as to ultimately make public transport viable and sustainable.

Such approach can however not be implemented on a blanket approach but requires a targeted approach for well-located land which lends itself for the required densification that will support viable public and non-motorised public transport.

The redevelopment of Dennesig through appropriate densification for the needed critical mass is such prime targeted area due to being well located in close proximity to the central business district, the university campus, and its role as a corridor link with the redevelopment of the Adam Tas corridor.

The development objectives for such redevelopment requires an urban landscape which favors non-motorised transport, and for which purpose the provision of off-street parking should also be avoided at all cost. Motor vehicles in off street parking as well as in dedicated parking areas sterilizes the street scape and public places and may in some instance contribute to anti-social behavior. This is also the prime consideration to allow the building line departures to permit that the buildings are build right on the street and public places, in order to give priority to inter-active public spaces rather than creating dead spaces that does not prioritize pedestrian priority spaces.

The concept of pedestrian and non-motorised transport and the prior knowledge of the limitation on parking is still to be developed in Stellenbosch. Sufficient public transport and safe walkways have not been developed yet. In a society where students and young people who will potentially be the residents in the proposed development, will have to walk at night in unsafe conditions or park their cars off-street. Until such time as more definite parameters for the development of non-

motorized transport are implemented, it is not desirable to limit parking opportunities and to approve the decision of the Municipal Planning Tribunal (MPT).

10. After having independently considered and weighted all the relevant information, reports and submissions, it is decided that the appeals submitted against the decision on the subject applications on Erf 184, Stellenbosch, **BE PARTIALLY DISMISSED** and **PARTIALLY VARIED** that the decision by the Stellenbosch Municipal Planning Tribunal **BE VARIED** in terms of section 81(7) (b) of the Stellenbosch Municipal Land Use Planning By-law, 2015:

1. The Municipal Planning Tribunal, on 31 January 2020, **approved, in whole**, in terms of section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015, the applications for the following:

2.1 **Removal of the Title Deed Restrictions** from the Title Deed T28075/1996 for Erf 139 and Title Deed T54174/2012 for Erf 140 which reads as follows:

The Title Deed T28075/1996 for Erf 139

- 1.1.1 Clause B: "Not entitled as a result of condition (a) in paragraph C hereunder to the benefit of the reservation of water rights but otherwise entitled to the benefit of the conditions as referred to in the two notes dated 2 June 1939 and 5 June 1939 on deed of Transfer No T7492/1932 which reads as follows:

"Deur die ondergenoemde Aktes van Transport van erwe in die Kromme Rivier C Dorp is deur die eienaar en sy opvolgers in titel van die restant van die eiendomme paras. 1, 2, 3, en 4 van hierdie Akte al sy bestaande regte as oewereienaar uitgehou en die grond deur die gesegde Aktes oorgedra is onderhewig ten gunste van die gemelde eiendomme hieronder gehou en sekere regte wat betref die bedryf van sekere besighede en verkoop van sterk drank, soos meer volledig sal blyk uit transportakte Nrs. 5594 gedateer 2.6.1939; 9842 gedateer 8.9.1939; 536 gedateer 25.1.1940; Nr 4379 gedateer 9.5.1940;"

1.1.2 Clause C (a) "dat die bogenoemde erf nie geregtig sal wees op die gebruik van enige water uit die Kromme Rivier vir huishoudelike of enige ander doeleindes die Transportgewer behou vir homself as eienaar van die grond nog in sy naam geregistreer onder die gemelde Akte van Transport gedateer 10 Desember 1970 nr. 7492 en sy opvolgers in titel al sy teenwoordige bestaande regte as oewereienaar op sulke regte"

1.1.3 Clause C(b): "Geen bottelstoor, kantien of plek waar sterk drank kan verkry word sal op die hierbogemelde grond opgerig word nog sal enige hotel, slagter, algemene handelaar of andere besigheid van sulke aard gedryf of gedoen word daarop."

1.1.4 Clause D(a): "Die erf moet uitsluitlik vir woning doeleindes gebruik word."

1.1.5 Clause D(b): "Dat die erf nie verdeel sal word nie."

1.1.6 Cause D(c): "Dat nie meer as een woonhuis met die nodige buitegeboue en toebehoorsels op die erf gebou sal word nie en dat nie meer as een helfte van die oppervlakte van die erf op gebou word nie."

1.1.7 Clause D(d): "Dat geen gebou binne 5,67 meter van enige straatlyn wat die grens van die erf is, moet opgerig word nie."

1.1.8 Clause E (3): "Dat die eienaar van elke erf en die namalige eienare daarvan verplig sal wees om die rioleering en rioolstelsel van enige erf of erwe oor sodanige erf te laat neem indien nodig geag deur die Munisipaliteit redelik vereis word."

Title Deed T54174/2012 for Erf 140:

1.1.9 Clause B (a): "dat die bogenoemde erf nie geregtig sal wees op die gebruik van enige water uit die Kromme Rivier vir huishoudelike of enige ander doeleindes die Transportgewer behou vir homself as eienaar van die grond nog op 23 Augustus 1932 in sy naam geregistreer onder die gemelde Sertifikaat van gegistreerde Titel gedateer 15 Oktober 1888 en Sertifikaat van geregistreerde Titel gedateer 16 September 1932 nr. 7492 en sy opvolgers in titel al sy teenwoordige bestaande regte as oewereienaar op sulke regte"

1.1.10 Clause B(b): "Geen bottelstoor, kantien of plek waar sterk drank kan verkry word sal op die hierbogemelde grond opgerig word nog sal enige hotel, slagter, algemene handelaar of andere besigheid van sulke aard gedryf of gedoen word daarop."

1.1.11 Clause C(a): "die erf moet uitsluitelik vir wonings doeleindes gebruik word. Geen winkel of hotel en geen handel of industriële besigheid van enige aard sal daarop gedryf word nie."

1.1.12 Clause C(b): "dat die erf nie sal verdeel word nie".

1.1.13 Cause C(c): "Dat nie meer as een woonhuis met die nodige buitegeboue en toebehoorsels op die erf gebou sal word nie en dat nie meer as een helfte van die oppervlakte van die erf op gebou word nie."

1.1.14 Clause C(d): "Dat geen gebou binne 18 voet van enige straatlyn wat die grens van die erf is moet opgerig word nie."

1.1.15 Clause D (3): "Dat die eienaar van elke erf en die namalige eienare daarvan verplig sal wees om die rioleering en rioolstelsel van enige erf of erwe oor sodanige erf te laat neem indien nodig geag deur die Munisipaliteit redelike vereis word."

1.2 **Consolidation** of erf 139 and erf 140 into a single, consolidated unregistered property;

- 1.3 **Rezoning** of the consolidated unregistered property from Single Residential to General Residential;
- 1.4 **Permanent** departures to allow for the relaxation of the following building lines:
 - 1.4.1 Street boundary building line (R44) from 7.6m to 5.0m for the basement parking;
 - 1.4.2 Street boundary building line (R44) from 7.6m to 1.620m for the basement parking area;
 - 1.4.3 Street boundary building line (R44) from 7.6m to 5.35m for the building;
 - 1.4.4 Street boundary building line (Paul Kruger Road) from 7.6m to 1.62m for the basement parking area;
 - 1.4.5 Street boundary building line (Paul Kruger Road) from 7.6m to 1.1m on Ground Floor and 0m on Floors 1- 3;
 - 1.4.6 Common boundary building line (Erf 141) from 4.6m to 0m for the parking area on ground floor and the basement parking area;
 - 1.4.7 Common boundary building line (Erf 141) from 4.6m to 0m on Floors 1 – 4 (only on front 4-storey section of building);
 - 1.4.8 Common boundary building line (rear -Erf 16399 and 163) from 4.6m to 4.2m on Floors 1 – 4.
- 1.5 **Permanent departures** to allow for:
 - 1.5.1 Relaxation of permissible **coverage** from 25% to 60%;
 - 1.5.2 Relaxation of permitted **floor factor** from 0.5 to 1.6;

- 1.5.3 Relaxation of **height restrictions** to allow for a five-storey building in lieu of a 3 storey building;
 - 1.5.4 To permit 99 parking bays (which would include parking provision for 66 bicycles, 77 standardized motorized vehicles and 11 tandem bays.
2. The above approvals granted are subject to the following conditions in terms of Section 66 of the above-mentioned by-law;
3. The approval applies only to the application under consideration and shall not be construed as authority to depart from any other legal prescriptions or requirements from Council;
- 3.1 The conditions of approval as imposed by the Manager: Development (Infrastructure Services) in its memo dated 30 January 2020, condition C & D of the memo be adhered to (**Annexure H**);
- 3.2 The applicant submits an electronic copy (shp,dwg,dxf) of the consolidation diagram which was preliminary approved by the SG indicating the newly allocated Erf Number, Co-ordinates and Survey Dimensions;
- 3.3 The development be undertaken generally in accordance with the approved site development plan as attached in **Annexure B**, The Edge, Rev 12, dated 28 October 2019;
- 3.4 Building plans be submitted to the Municipality for approval prior to any building work taking place on the property;

3.5 A landscaping plan be submitted for approval and implemented prior to an occupation certificate being issued;

3.6 An occupation certificate only be issued once the title deed has been endorsed and registered in the deed office;

3.7 The landscaping plan for the subject property is to tie in with the Master Landscaping Plan for Dennesig to ensure that the Dennesig areas landscaping is a cohesive project and to ensure continuity for all communal areas located on the sidewalk of the subject property and the sidewalk area located within the road reserve;

3.8 Inclusionary housing component be included to expand housing opportunity for a broader range of income groups.

NOTICE OF DECISION OF APPEAL AUTHORITY

APPEAL LODGED IN TERMS OF SECTION 79(2) OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW (2015) AGAINST THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL TO APPROVE THE APPLICATION FOR THE CONSOLIDATION, REZONING, DEPARTURE, SITE DEVELOPMENT PLAN, REMOVAL OF RESTRICTIVE TITLE CONDITIONS: ERF 141 & 142, 163-165, STELLENBOSCH

DECISION OF APPEAL AUTHORITY:

The Appeal Authority hereby, in terms of Section 81(7) of the Stellenbosch Municipal Land Use Planning By-law 2015:

Tick the appropriate box:

| CONFIRM | | VARY | X | REVOKE | |
|---|--|-------------|----------|---------------|--|
| THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL, ON THE 31st OF JANUARY 2020, TO APPROVE IN TERMS OF SECTION 60 OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW DATED 20 OCTOBER 2015, THE APPLICATION FOR THE CONSOLIDATION, REZONING, DEPARTURE, SITE DEVELOPMENT PLAN, REMOVAL OF RESTRICTIVE TITLE CONDITIONS: ERF 141 & 142, 163-165, STELLENBOSCH | | | | | |

1. The abovementioned appeal refers.
2. The Municipal Planning Tribunal, on 31 January 2020, approved, in whole, in terms of section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015, the application the Consolidation, Rezoning, Departure, Site Development Plan, Removal of Restrictive Title Conditions: Erven 141 & 142, 163-165, Stellenbosch.

3. The application was approved subject to a number of conditions imposed in terms of Section 66 of the Stellenbosch Municipality Land Use Planning By-Law (2015).
4. Two valid appeals were submitted in terms of Section 79(2) of the By-Law against the decision of the Municipal Planning Tribunal by appellants Meglis (PTY) Ltd on behalf of the owner of Erven 132, 133 & 134 (Consolidated Erf 17274), Stellenbosch as well as Mr. Andries Hamman.
5. The appeal assessment reports were duly drafted based on all documentation provided and available.
6. In terms section 81(6) of the Stellenbosch Municipality Land Use Planning By-Law (2015), the Appeal assessment report and all relevant documentation to which the Appeal Authority proposes to have regard in reaching a decision in the appeal proceeding, was presented to the Appellants and all affected parties for inspection and to which submissions from such parties were received and duly considered before reaching the decision.
7. In accordance with Section 81(b) & (3), an oral hearing was held on the 26th of November 2020 where the interested and affected parties were afforded the opportunity to make further submissions to the Appeal Authority.
8. After having independently considered and weighed all the relevant information, reports and submissions, it is decided that the appeals submitted against the decision on the subject applications on Erven 141 & 142, 163-165, Stellenbosch, **BE PARTIALLY DISMISSED** and **PARTIALLY UPHELD** that the

decision by the Stellenbosch Municipal Planning Tribunal **BE VARIED** in terms of section 81 (7) (b) of the Stellenbosch Municipal Land Use Planning By-law, 2015:

9.1 The reason(s) to confirm the decision of the Stellenbosch Municipal Planning Tribunal in terms of section 81 (7) (c) of the said By-law relating to **densification**, are as follows:

9.1.1 This appeal is considered a wide appeal; hence all relevant information should be taken into account by the Appeal Authority. The Dennesig area was identified in the Stellenbosch Municipal Integrated Development Plan (IDP) and the Spatial Development Framework (SDF) as an area of well-located land to be targeted for redevelopment, densification and optimisation.

9.1.2 Duty of care was duly exercised in the processing of the application and considered and decided on in accordance with the prescripts of the prevailing Stellenbosch Municipal Planning Bylaw, 2015.

The covid-19 situation impacted on the easy flow of communication and as the appellants and applicants remarked on this in the appeal process, the appeal authority invited all applicants and appellants in terms of the applicable by-law, to make oral representations to the appeal authority.

This was done to ensure that all parties have every opportunity to present their case to the appeal authority.

Without dealing with all the arguments raised to the appeal authority, the impact of the Dennesig Urban Design Guidelines has been fully argued and its applicable status needs consideration.

It was inter alia the contention of the appellant that the Dennesig Urban Design Guidelines ("the Guidelines") should be formally adopted as a statutory document or tool like an overlay zone as alluded to in the Guidelines.

Statutory tools and processes like the IDP and MSDF determine what must be done and non-statutory tools and processes like guidelines assist with how it should be done (implemented).

The redevelopment and objectives for Dennesig was already decided on and dictated in the IDP and MSDF, i.e. its densification to optimize the potential of well-located land, its role and purpose in the bigger development of Stellenbosch as a critical corridor link to the Adam Tas development, and the associated importance of non-motorised transport and safe places by ensuring a public interface between developments and the street scape.

Guidelines have a specific purpose to inform responsible decision making on the implementation (how to do things) of law and policies (which determines what should be done).

The Guidelines was developed to assist with the consistent and responsible implementation of the developments to ensure that the overall objectives as stated in the MSDF are achieved. These informants relate to matters of design, aesthetics, and functionality to achieve and compliment the overall development strategy of

densification and the priority of non-motorized transport and a pedestrian interface of functional areas.

Guidelines do not dictate and decide on statutory processes to establish land use rights and should therefore not be elevated to statutory status and should also not be binding on a decision maker to dictate the outcome of any development.

It was furthermore inter alia the contention of the appellant that the process to draft the guidelines was undertaken by the current applicants for their purposes and that such process was closed to other parties and notably other developers and land owners of the Dennesig area and that reasonable participation and inputs was not allowed during the process. The applicants also appointed, paid and managed the service provider to draft the guidelines and that it was done purely to benefit their own interest.

The process to draft the guidelines was initiated, managed, and approved by the municipality. Due to capacity constraints at the municipality and for the sake of progress, the applicants facilitated the process and provided the upfront financing for the study. The Municipality however has remained the custodians of the study and its outcome and application. Consequently, the municipality dictated and approved the terms of reference for the study, approved the appointment of the consultants, managed their outcomes and approved the resulting guidelines. The payment of the study will be offset from the development contributions.

During the process to draft the guidelines properties under consideration, all the landowners and developers who had an interest in the Dennesig properties were invited to participate in the process.

During the process a significant team of a wide array of professionals participated and contributed towards the study to produce a credible outcome to assist in responsible decision making. It has to be noted that, in terms of the scope of interested and affected parties, the extent and grounds for objections is very limited.

Furthermore, it was inter alia the contention of the appellant that the Stellenbosch Municipal Planning Bylaw does not make provision on Section 65 that Guidelines is a relevant consideration to be taken into account when deciding on land use and land development applications. Section 65 only refers to "Provincial" guidelines, which the Dennesig Guidelines are clearly not.

Section 65 of the Bylaw only refers to those matters which MUST be taken into account when considering a land use and land development application. It is by no means aimed at being an exhaustive list and to suggest that only those matters may be taken into account, is ludicrous and petition against Section 6(2) (e) (iii) of PAJA which prescribes that ALL relevant considerations (unqualified insofar as they are not deemed irrelevant considerations) should be taken into account when a decision maker makes a decision. It is common cause that development guidelines form an integral and relevant part in land use and land development decisions. To suggest otherwise will result in a flawed argument and will result in a procedural error to disregard such guidelines.

It was furthermore inter alia the contention of the appellant, that the amended applications that followed on its alignment with the subject development guidelines was material and ought to have been re-advertised.

The amendments which were required to the original applications to align them with the outcome of the development guidelines mostly related to the design and aesthetical features and which involved building lines, with the lowering of proposed buildings (less floors) in some instances. All changes were to adhere to the required design features to ensure an active public interface between the developments and the street scape.

Section 52(3) and (53(2) requires that a municipality must cause that the publishing or serving of a notice be re-undertaken if material changes are made to an application. The decision to re-advertise is however a discretionary and not a mandatory requirement. The municipality consequently did consider the need and used its discretion to not undertake any additional publishing or serving of notices due to the non-material nature of the changes to the land use applications.

The municipality consequently did exercise duty of care to consider and decide on the matter on rational grounds.

It was furthermore inter alia the contention of the appellant, that the guidelines have no status and should be discarded for the purpose of deciding on the subject land use applications.

The development objectives adopted in the MSDF for Dennesig included inter-alia to re-develop the Dennesig neighborhood as an important corridor link with the Adam Tas development area, to densify the Dennesig neighborhood to optimize the development potential of this well located area, to promote non-motorized transport, mixed use development and to enhance community integration and safety by providing an active interface between the developments and street scape.

The Dennesig Development Guidelines was developed to provide coherent guidance for the implementation and achievement of these development objectives. The decisions to support these applications was thus based on the basis of rational grounds to achieve these development objectives. If the guidelines are not applied to ensure that these development objectives are met, it would in fact undermine the MSDF and result in ad-hoc developments with a baseless rational for its redevelopment.

9.1.3 The Dennesig Urban Design Guidelines ("the Guidelines") was duly drafted to fulfil a specific purpose and serves as a relevant consideration to inform consistent and responsible decisions in the implementation of the IDP and SDF objectives regarding the redevelopment of the Dennesig area.

9.1.4 By not considering the Guidelines would constitute relevant considerations not been taken into account and would result therein that the IDP and SDF objectives are undermined with ad-hoc developments with a baseless rationale for its redevelopment.

9.1.5 No justifiable alternative rationale for the specific development proposal or the objective for the redevelopment of the Dennesig area was provided in the appeals submitted.

9.1.6 The decision by the Stellenbosch Municipal Planning Tribunal re: densification, are consequently considered to be rationally connected to the relevant information that was considered and the reasons that was provided by the Stellenbosch Municipal Planning Tribunal for its decision to approve the subject application.

9.2 The reason(s) to **vary** the decision of the Stellenbosch Municipal Planning Tribunal in terms of section 81 (7) (c) of the said By-law relating to parking, are as follows:

The following synopsis of the rationale for the provision of parking in Dennesig derives from the provisions of the Stellenbosch MSDF, and more specifically Section 6.6.2 that deals with "Movement"

The point of departure in the provision of parking in the redevelopment of Dennesig, is not the perceived shortage of parking in Stellenbosch, but the fact that there are too many motor vehicles. Providing more parking space will therefore only address the symptoms of the problem to some degree. It will however not address the problem of too many vehicles. The continuous upgrading and provision of additional infrastructure to accommodate a motor-priority mode of transport is also not sustainable and will continue to impact negatively on the rural and productive landscape due to ongoing urban sprawl as a result of prioritizing motor vehicle mode of transport.

The long-term solution is rather to progressively limit the number of motor vehicles through a comprehensive strategy of public and non-motorised transport. To

progressively limit the provision of parking is an inherent aspect to inhibit the ownership and use of private motor vehicles, as well as to ultimately make public transport viable and sustainable.

Such approach can however not be implemented on a blanket approach but requires a targeted approach for well-located land which lends itself for the required densification that will support viable public and non-motorised public transport.

The redevelopment of Dennesig through appropriate densification for the needed critical mass is such prime targeted area due to being well located in close proximity to the central business district, the university campus, and its role as a corridor link with the redevelopment of the Adam Tas corridor.

The development objectives for such redevelopment requires an urban landscape which favors non-motorised transport, and for which purpose the provision of off-street parking should also be avoided at all cost. Motor vehicles in off street parking as well as in dedicated parking areas sterilizes the street scape and public places and may in some instance contribute to anti-social behavior. This is also the prime consideration to allow the building line departures to permit that the buildings are build right on the street and public places, in order to give priority to inter-active public spaces rather than creating dead spaces that does not prioritize pedestrian priority spaces.

The concept of pedestrian and non-motorised transport and the prior knowledge of the limitation on parking is still to be developed in Stellenbosch. Sufficient public transport and safe walkways have not been developed yet. In a society where students and young people who will potentially be the residents in the proposed development, will have to walk at night in unsafe conditions or park their cars off-

street. Until such time as more definite parameters for the development of non-motorized transport are implemented, it is not desirable to limit parking opportunities and to approve the decision of the Municipal Planning Tribunal (MPT).

10. After having independently considered and weighed all the relevant information, reports and submissions, it is decided that the appeals submitted against the decision on the subject applications on Erven 141 & 142, 163-165, Stellenbosch, **BE PARTIALLY DISMISSED** and **PARTIALLY UPHELD** that the decision by the Stellenbosch Municipal Planning Tribunal **BE VARIED** in terms of section 81(7) (b) of the Stellenbosch Municipal Land Use Planning By-law, 2015.

1. The Municipal Planning Tribunal, on 31 January 2020, **approved, in whole**, in terms of section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015, the applications for the following:

2.1 The consolidation of erven 141, 142, 163, 164 and 165, Stellenbosch.

2.2 The removal of the restrictive title conditions applicable to each property as listed below:

2.2.1 **Erf 141, Stellenbosch**

T148892/1998 Conditions B(c)

T105912/1998 Conditions B(c)

T72846/1997 Condition (b)3

T16275/2017 Condition B3

T88203/2001 Condition B (3)

No bottle store, canteen, or place for obtaining strong drink shall be erected on the above land, nor shall any hotel, butcher, general or other business of a like nature be carried on or conducted thereon.

2.2.2 Erf 142, Stellenbosch

T148892/1998 Conditions C(a)

T105912/1998 Conditions C(a)

T72846/1997 Condition (d)(b)

T16275/2017 Condition C(b)

T88203/2001 Condition D(b)

That the lots be used for residential purposes only.

2.2.3 Erf 163, Stellenbosch

T148892/1998 Conditions C(b)

T105912/1998 Conditions C(b)

T72846/1997 Condition (d)(c)

T16275/2017 Condition C(c)

T88203/2001 Condition D(c)

That the lots be not subdivided without the approval of the Administrator.

2.2.4 Erf 164, Stellenbosch

T148892/1998 Conditions C(c)

T105912/1998 Conditions C(c)

T72846/1997 Condition (d)(d)

T16275/2017 Condition C(d)

T88203/2001 Condition D(d)

That not more than one dwelling house be erected on any lot, and that not more than one-third of the area of any one lot be built upon.

2.2.5 Erf 165, Stellenbosch

T148892/1998 Conditions C(d)

T105912/1998 Conditions C(d)

T72846/1997 Condition (d)(f)

T16275/2017 Condition C(f)

T88203/2001 Condition D(f)

That all buildings to be erected on this property shall stand back not less than 5.67m (T148892) / 18 feet (T105912) / 10 feet (T72846) / 3.15m (T16275 & T88203) from the line of any street or avenue on which the lots may abut. Such spaces may be used as gardens but shall not be built upon.

2.3 Rezoning of the unregistered consolidated property from Single Residential to General Residential to develop 176 residential units within a 5 storey building;

2.4 Relaxation of the street building line (Dennesig & Paul Kruger Roads) from 7.6m to 0.0m.

2.5 The relaxation of the lateral building lines adjacent to erven 140, 162 & 166 from 4.6m to 0.0m for the main building;

2.6 Relaxation of the lateral building line adjacent to erven 140, 143, 162 & 166 from 4.6m to 0.0m for the semi-basement and parking structure.

2.7 Departure to exceed the permitted coverage from 25% to 79.4%.

2.8 Departure to exceed the permitted floor factor from 0.75 to 1.6.

2.9 Departure to relax the required recreational space from 25% to 20%.

2.10 Permit 204 parking bays.

2.11 Departure to exceed the number of storeys from four storeys to five storeys.

2.12 Site Development Plan.

2. The above approvals granted are subject to the following conditions in terms of Section 66 of the above-mentioned by-law;

3.1 The approval only applies to the proposed development in question, as indicated on Drawing Nos. P001 dated 15 May 2018, SDP001 dated 24 October 2018, 201-207 dated 23 October 2019 and 301 dated 23 October 2019, drawn by Dennis Moss Partnership, and shall not be construed as authority to depart from any other legal prescriptions or requirements from Council;

3.2 Building plans be substantially in accordance with the approved SDP;

3.3 No building plan be submitted for approval prior to the applicable conditions of approval being adhered to;

- 3.4 All landscaping be implemented as indicated on the Site and Landscape Development Plan (Drawing No. SDP001 dated 24 October 2019) before any occupational certificates be issued.
- 3.5 The conditions imposed by the Director: Engineering Services in its memo dated 30 January 2020 be adhered to attached as **Annexure H**;
- 3.6 The conditions imposed by the Manager: Electrical Engineering in its memo dated 7 August 2018 be adhered to;
- 3.7 The conditions imposed by the Manager: Community Services in its memo dated 6 September 2018 be adhered to;
- 3.8 The landscaping plan for the subject property is to tie in with the Master Landscaping Plan for Dennesig to ensure that the Dennesig areas landscaping is a cohesive project and to ensure continuity for all communal areas located on the sidewalk of the subject property and the sidewalk area located within the road reserve;
- 3.9 Inclusionary housing component be included to expand housing opportunity for a broader range of income groups.

SIGNATURE: _____

Adv. Gesie van Deventer

DATE: 22 December 2020

NOTICE OF DECISION OF APPEAL AUTHORITY

APPLICATION FOR REZONING AND PERMANENT DEPARTURES: ERF 184, STELLENBOSCH

DECISION OF APPEAL AUTHORITY:

The Appeal Authority hereby, in terms of Section 81 (7) of the Stellenbosch Municipal Land Use Planning By-law 2015:

Tick the appropriate box:

| CONFIRM | | VARY | X | REVOKE | |
|---|--|------|---|--------|--|
| THE DECISION OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL, ON THE 31 st OF JANUARY 2020, TO APPROVE IN TERMS OF SECTION 60 OF THE STELLENBOSCH MUNICIPAL LAND USE PLANNING BY-LAW DATED 20 OCTOBER 2015, APPLICATION FOR REZONING AND PERMANENT DEPARTURES: ERF 184, STELLENBOSCH | | | | | |

1. The abovementioned appeal refers.
2. The Municipal Planning Tribunal, on 31 January 2020, **approved, in whole**, in terms of section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015, the Application for Rezoning and Permanent Departures: Erf 184, Stellenbosch.
3. The application was approved subject to a number of conditions imposed in terms of Section 66 of the Stellenbosch Municipality Land Use Planning By-Law (2015).

4. Appeals were submitted in terms of Section 79(2) of the By-Law against the decision of the Municipal Planning Tribunal, by appellants Meglis (PTY) Ltd on behalf of the owner of Erven 132, 133 & 134 (Consolidated Erf 17274), Stellenbosch as well as Mr. Andries Hamman.
5. The appeal assessment reports were duly drafted based on all documentation provided and available.
6. In terms section 81(6) of the Stellenbosch Municipality Land Use Planning By-Law (2015), the Appeal assessment report and all relevant documentation to which the Appeal Authority proposes to have regard in reaching a decision in the appeal proceeding, was presented to the Appellant and all affected parties for inspection and to which submissions from such parties were received and duly considered before reaching the decision.
7. In accordance with Section 81(b) & (3), an oral hearing was held on the 26th of November 2020 where the interested and affected parties were afforded the opportunity to make further submissions to the Appeal Authority.
8. After having independently considered and weighed all the relevant information, reports and submissions, it is decided that the appeals submitted against the decision on the subject applications on Erf 184, Stellenbosch, **BE PARTIALLY DISMISSED** and **PARTIALLY UPHELD** that the decision by the Stellenbosch Municipal Planning Tribunal **BE VARIED** in terms of section 81(7) (b) of the Stellenbosch Municipal Land Use Planning By-law, 2015.

9. 1 The reason(s) to confirm the decision of the Stellenbosch Municipal Planning Tribunal in terms of section 81(7) (c) of the said By-law relating to **densification**, are as follows:

9.1.1 This appeal is considered a wide appeal; hence all relevant information should be taken into account by the Appeal Authority. The Dennesig area was identified in the Stellenbosch Municipal Integrated Development Plan (IDP) and the Spatial Development Framework (SDF) as an area of well-located land to be targeted for redevelopment, densification and optimisation.

9.1.2 Duty of care was duly exercised in the processing of the application and considered and decided on in accordance with the prescripts of the prevailing Stellenbosch Municipal Planning Bylaw, 2015.

The Covid-19 situation impacted on the easy flow of communication and as the appellants and applicants remarked on this in the appeal process, the Appeal Authority invited all applicants and appellants in terms of the applicable by-law, to make oral representations to the Appeal Authority.

This was done to ensure that all parties have every opportunity to present their case to the appeal authority.

Without dealing with all the arguments raised to the Appeal Authority, the impact of the Dennesig Urban Design Guidelines has been fully argued and its applicable status needs consideration.

It was inter alia the contention of the appellant that the Dennesig Urban Design Guidelines ("the Guidelines") should be formally

adopted as a statutory document or tool like an overlay zone as alluded to in the Guidelines.

Statutory tools and processes like the IDP and MSDF determine what must be done and non-statutory tools and processes like guidelines assist with how it should be done (implemented).

The redevelopment and objectives for Dennesig was already decided on and dictated in the IDP and MSDF, i.e. its densification to optimize the potential of well-located land, its role and purpose in the bigger development of Stellenbosch as a critical corridor link to the Adam Tas development, and the associated importance of non-motorised transport and safe places by ensuring a public interface between developments and the street scape.

Guidelines have a specific purpose to inform responsible decision making on the implementation (how to do things) of law and policies (which determines what should be done).

The Guidelines were developed to assist with the consistent and responsible implementation of the developments to ensure that the overall objectives as stated in the MSDF are achieved. These informants relate to matters of design, aesthetics, and functionality to achieve and compliment the overall development strategy of densification and the priority of non-motorized transport and a pedestrian interface of functional areas.

Guidelines do not dictate and decide on statutory processes to establish land use rights and should therefore not be elevated to

statutory status and should also not be binding on a decision maker to dictate the outcome of any development.

It was furthermore inter alia the contention of the appellant that the process to draft the guidelines was undertaken by the current applicants for their purposes and that such process was closed to other parties and notably other developers and land owners of the Dennesig area and that reasonable participation and inputs was not allowed during the process. The applicants also appointed, paid and managed the service provider to draft the guidelines and that it was done purely to benefit their own interest.

The process to draft the guidelines was initiated, managed, and approved by the municipality. Due to capacity constraints at the municipality and for the sake of progress, the applicants facilitated the process and provided the upfront financing for the study. The Municipality however has remained the custodians of the study and its outcome and application. Consequently, the municipality dictated and approved the terms of reference for the study, approved the appointment of the consultants, managed their outcomes and approved the resulting guidelines. The payment of the study will be offset from the development contributions.

During the process to draft the guidelines properties under consideration, all the landowners and developers who had an interest in the Dennesig properties were invited to participate in the process.

During the process a significant team of a wide array of professionals participated and contributed towards the study to produce a

credible outcome to assist in responsible decision making. It has to be noted that, in terms of the scope of interested and affected parties, the extent and grounds for objections is very limited.

Furthermore, it was inter alia the contention of the appellant that the Stellenbosch Municipal Planning Bylaw does not make provision on Section 65 that Guidelines are a relevant consideration to be taken into account when deciding on land use and land development applications. Section 65 only refers to "Provincial" guidelines, which the Dennesig Guidelines are clearly not.

Section 65 of the Bylaw only refers to those matters which MUST be taken into account when considering a land use and land development application. It is by no means aimed at being an exhaustive list and to suggest that only those matters may be taken into account, is ludicrous and petition against Section 6(2) (e) (iii) of PAJA which prescribes that ALL relevant considerations (unqualified insofar as they are not deemed irrelevant considerations) should be taken into account when a decision maker makes a decision. It is common cause that development guidelines form an integral and relevant part in land use and land development decisions. To suggest otherwise will result in a flawed argument and will result in a procedural error to disregard such guidelines.

It was furthermore inter alia the contention of the appellant, that the amended applications that followed on its alignment with the subject development guidelines was material and ought to have been re-advertised.

The amendments which were required to the original applications to align them with the outcome of the development guidelines mostly related to the design and aesthetical features and which involved building lines, with the lowering of proposed buildings (less floors) in some instances. All changes were to adhere to the required design features to ensure an active public interface between the developments and the street scape.

Section 52(3) and 53(2) requires that a municipality must cause that the publishing or serving of a notice be re-undertaken if material changes are made to an application. The decision to re-advertise is however a discretionary and not a mandatory requirement. The municipality consequently did consider the need and used its discretion to not undertake any additional publishing or serving of notices due to the non-material nature of the changes to the land use applications.

The municipality consequently did exercise duty of care to consider and decide on the matter on rational grounds.

It was furthermore inter alia the contention of the appellant, that the guidelines have no status and should be discarded for the purpose of deciding on the subject land use applications.

The development objectives adopted in the MSDF for Dennesig included inter-alia to re-develop the Dennesig neighborhood as an important corridor link with the Adam Tas development area, to densify the Dennesig neighborhood to optimise the development potential of this well located area, to promote non-motorised

transport, mixed use development and to enhance community integration and safety by providing an active interface between the developments and street scape.

The Dennesig Development Guidelines was developed to provide coherent guidance for the implementation and achievement of these development objectives. The decisions to support these applications was thus based on the basis of rational grounds to achieve these development objectives. If the guidelines are not applied to ensure that these development objectives are met, it would in fact undermine the MSDF and result in ad-hoc developments with a baseless rationale for its redevelopment.

9.1.3 The Dennesig Urban Design Guidelines (" the Guidelines") was duly drafted to fulfil a specific purpose and serves as a relevant consideration to inform consistent and responsible decisions in the implementation of the IDP and SDF objectives regarding the redevelopment of the Dennesig area.

9.1.4 By not considering the Guidelines would constitute relevant considerations not been taken into account and would result therein that the IDP and SDF objectives are undermined with ad-hoc developments with a baseless rationale for its redevelopment.

9.1.5 No justifiable alternative rationale for the specific development proposal or the objective for the redevelopment of the Dennesig area was provided in the appeals submitted.

9.1.6 The decision by the Stellenbosch Municipal Planning Tribunal re: densification, are consequently considered to be rationally

connected to the relevant information that was considered and the reasons that was provided by the Stellenbosch Municipal Planning Tribunal for its decision to approve the subject application.

- 9.2 The reason(s) to **vary** the decision of the Stellenbosch Municipal Planning Tribunal in terms of section 81 (7) (c) of the said By-law relating to parking, are as follows:

The following synopsis of the rationale for the provision of parking in Dennesig derives from the provisions of the Stellenbosch MSDF, and more specifically Section 6.6.2 that deals with "Movement"

The point of departure in the provision of parking in the redevelopment of Dennesig, is not the perceived shortage of parking in Stellenbosch, but the fact that there are too many motor vehicles. Providing more parking space will therefore only address the symptoms of the problem to some degree. It will however not address the problem of too many vehicles. The continuous upgrading and provision of additional infrastructure to accommodate a motor-priority mode of transport is also not sustainable and will continue to impact negatively on the rural and productive landscape due to ongoing urban sprawl as a result of prioritizing motor vehicle mode of transport.

The long-term solution is rather to progressively limit the number of motor vehicles through a comprehensive strategy of public and non-motorised transport. To progressively limit the provision of parking is an inherent aspect to inhibit the ownership and use of private motor vehicles, as well as to ultimately make public transport viable and sustainable.

Such approach can however not be implemented on a blanket approach but requires a targeted approach for well-located land which lends itself for

the required densification that will support viable public and non-motorised public transport.

The redevelopment of Dennesig through appropriate densification for the needed critical mass is such prime targeted area due to being well located in close proximity to the central business district, the university campus, and its role as a corridor link with the redevelopment of the Adam Tas corridor. The development objectives for such redevelopment requires an urban landscape which favors non-motorised transport, and for which purpose the provision of off-street parking should also be avoided at all cost. Motor vehicles in off street parking as well as in dedicated parking areas sterilizes the street scape and public places and may in some instance contribute to anti-social behavior. This is also the prime consideration to allow the building line departures to permit that the buildings are build right on the street and public places, in order to give priority to inter-active public spaces rather than creating dead spaces that does not prioritize pedestrian priority spaces.

The concept of pedestrian and non-motorised transport and the prior knowledge of the limitation on parking is still to be developed in Stellenbosch. Sufficient public transport and safe walkways have not been developed yet. In a society where students and young people who will potentially be the residents in the proposed development, will have to walk at night in unsafe conditions or park their cars off-street. Until such time as more definite parameters for the development of non-motorized transport are implemented, it is not desirable to limit parking opportunities and to approve the decision of the Municipal Planning Tribunal (MPT).

10. After having independently considered and weighed all the relevant information, reports and submissions, it is decided that the appeals submitted against the decision on the subject applications on Erf 184, Stellenbosch, **BE PARTIALLY DISMISSED** and that the decision by the Stellenbosch Municipal Planning Tribunal **BE VARIED** in terms of section 81 (7) (b) of the Stellenbosch Municipal Land Use Planning By-law, 2015:

The Municipal Planning Tribunal, on 31 January 2020, **approved, in whole**, in terms of section 60 of the Stellenbosch Municipal Land Use Planning By-law, promulgated by Notice no 354/2015 dated 20 October 2015. The varied decision of the Appeal Authority is as follows:

- 1.1 **Rezoning** of Erf 184 from Single Residential to Specific Business Zone, in terms of the Stellenbosch Municipality Zoning Scheme Regulations, 1996 to develop 86m² of commercial space and 50 residential units in a 5-storey building.
- 1.2 **Permanent departures** for the following:
 - 1.2.1 **Street Building Line** (Dennesig) of 0.0m in lieu of 7.6m on Floors 1 – 4;
 - 1.2.2 **Street Building Line** (Hofman) of 0.0m for a portion of the building and 1.7m for the remainder of the building in lieu of 7.6m on Floors 1 – 4;
 - 1.2.3 **Common boundary** (Erf 155) 0.0m for a portion of the building on Ground and Floors 1 – 4 in lieu of 3.0m on ground and 4.6m on Floors 1- 4;
 - 1.2.4 **Common boundary** (Erf 4683) 0.0m on Ground Floor to allow for the stairwell and 0.0m (stairwell) and 1.7 (remainder building) on Floors 1 – 4 in lieu of 3m (ground floor) and 4.6m on Floors 1-4;

- 1.2.5 **Coverage** of 76% in lieu 50% for the residential component of the building on Floors 1-3;
 - 1.2.6 **Height** of the building to be 5 storeys in lieu of 4;
 - 1.2.7 **Provision** of 10.6% of the site for communal open space, in lieu of 25%;
 - 1.2.8 **Provision** of 74 parking bays (which would include parking for standard motorised vehicles, 12 motorcycles, and 50 bicycle bays).
2. The above approvals granted are subject to the following conditions in terms of Section 66 of the above-mentioned by-law;
 3. The approval applies only to the application under consideration and shall not be construed as authority to depart from any other legal prescriptions or requirements from Council;
 - 3.1 The conditions of approval as imposed by the Manager: Development (Infrastructure Services) in its memo dated 30 January 2020, condition C & D of the memo be adhered to (**Annexure H**);
 - 3.2 The development be undertaken in general accordance with the Site Development Plan as attached in **Annexure B**, drawings 3618/C/101-108 rev 8 dated 2019-10-23;
 - 3.3 Building plans be submitted to the Municipality for approval prior to any building work taking place on the property;
 - 3.4 A revised SDP and landscaping plan be submitted for approval by the Director: Planning and Economic Development with the building plans and implemented prior to an occupation certificate being issued;
 - 3.5 The commercial portion of the building only be used for convenience retail purposes;

- 3.6 The landscaping plan for the subject property as well as the sidewalk areas within the sidewalk must tie in with the Master Landscaping Plan for the Dennesig area to ensure that the landscaping for the areas is a cohesive project and that there is continuity for all communal areas;
- 3.7 Inclusionary housing component be included to expand housing opportunity for a broader range of income groups.

IDP KPA Ref No: Good Governance
Meeting Date: 24 March 2021

1. SUBJECT: LEASE PORTIONS 528A AND 529CC: MOUNTAIN BREEZE CARAVAN PARK

2. PURPOSE

To inform Council that the current lease agreement comes to an end on 31 March 2021. Council has to resolve on a way forward.

3. DELEGATED AUTHORITY

The Municipal Council must consider the matter. The property is worth more than 10 Million Rand.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality and Stellenbosch Caravan Park cc (Malan) concluded a long term Lease Agreement during 1992 for a period of 30 years (1 April 1991-31 March 2021)

This Lease Agreement was later ceded to the Mountain Breeze Caravan Park cc (Visser).

The lease Agreement will expire on 31 March 2021. The current Lessee send a letter attached as **APPENDIX 6** expressing her interest to continue with a lease provided that it is a 10 year period to get some returns on investment.

A letter and email was also received from a one of the persons occupying a stand on a long term basis requesting to rent the land from Council – **APPENDIX 7**.

Council must now decide on how to deal with this property, i.e. whether to dispose of it, or enter into a further rental agreement with the current lessee or someone else or use the property for another purpose. A decision also needs to be taken on the short term process (after March 2021) until a final decision has been reached.

The item was discussed at the January 2021 Mayco meeting and further information was requested and the item referred back.

Attached hereto please find **APPENDIX 8**, a further letter from Me Sonnekus, writer of appendix 7, is also attached providing some information on the people living on the land. **APPENDIX 9** is an email response received from the current lessee on the questions raised in Mayco. The rates are paid up and we could find no approval of building plans. We therefore have to deduct that the structures were not approved by the Building plan section. Proof of the current members of the close corporation is attached as **APPENDIX 10**. The Executive Mayor requested the Municipal Manager to provide a report categorising all council properties by December 2021 to enable the Council to make a determination on how the different categories of properties should be dealt with.

5. RECOMMENDATION

For Consideration

6. DISCUSSION / CONTENT

6.1 Background

6.1.1 Existing Lease Agreement

Stellenbosch Municipality and Stellenbosch Caravan Park cc (C.P Malan) concluded a long-term Lease Agreement on 18 May 1992 for the period 1 April 1991 to 31 March 2021.

This Lease Agreement, however, was later ceded to the Mountain Breeze Caravan Park cc (R.P. Visser) during 1995.

Copies of the Lease Agreement, as well as the Cession and Assignment Agreement are attached as **APPENDICES 1** and **2**, respectively.

6.1.2 Current Lessee

The current Lessee, Mrs Visser, she indicated that she would be interested in a further lease period.

The long term residents in the park has also expressed an interest to rent the properties they currently occupy.

Council must now decide on the most appropriate use of the property and should Council consider the disposal or awarding of long term rights (lease agreement). See paragraph 6.2.9 for a more detailed discussion on the various options.

6.2 Discussion

6.2.1 Locality and context

Mountain Breeze Caravan Park is situated on Lease Portions 528 and 529C, measuring 20.3ha in size, as indicated on Fig 1 and 2 below.

Fig 1: Location and regional context

Fig 2: Extent of property(s)

6.2.2 Ownership

The ownership of the two properties vests in Stellenbosch Municipality by virtue of Title Deeds STFH-891 and STFH6-4/1890, respectively. See Windeed records attached as **APPENDICES 3** and **4** respectively.

6.2.3 Access

Access to the property is *via* a registered servitude access off the R44, over a portion of Farm 1166, Stellenbosch as shown on Fig 3, below.

Fig 3: Access road

The servitude was registered at the Surveyor General in 1985, see copy of LG Diagram 8786/83 hereto attached as **APPENDIX 5**.

6.2.4 Access to services

The property has access to irrigation water (Theewaterskloof) and is getting drinking water from a borehole situated on the neighbouring farm 1166.

Electricity is supplied by Eskom.

6.2.5 Improvements

The following buildings were constructed by the Lessee during the lease period:

6.2.5.1 Temporary structures

6.2.5.1 .18 x Nutec Houses

Although the houses differ in size, the average size is about 150m². The Reception Area is part of 1 of the houses. See figures 4-12 below.

Fig 4: Reception (part of house 1)

Fig 9: House 5

Fig 10: House 6

Fig 11: House 7

Fig 12: House no 8

6.2.5.1.2 4 x Wood/Nutec Bungalows

These units are 38m² each. See Fig 13-14

Fig 13: Units 1 and 2

Fig 14: Units 3 and 4

6.2.5.1.3:2 x Big Nutec Bungalows

These units are 57m² each. See Fig 15.

Fig 15: Units 1 and 2

6.2.5.1.4: 2 x Plett. Caravans

These units are 52m² each. See Fig 16.

Fig 16: Units 1 and 2

6.2.5.1.5 1 x Nutec Hall

This facility is 860m² in size. See Fig 17.

Fig 17

6.2.5.2 Permanent Structures**6.2.5.2.1 1 x Swimming pool with ablutions facilities**

The swimming pool is 104m², whilst the ablution facilities are 102m². See Fig 18.

Fig 18: Swimming pool and ablution facilities

6.2.5.2.2 1 x Ablution facility

This facility is 189m² in size. See fig 19 below.

Fig 19: Main ablution facilities

6.2.5.2.3 6 X Chalets

These units (2x3) are 80m² each. See Fig 20 and 21

Fig 20: Units 1 and 2

Fig 21: Units 3 and 4

Fig 22: Units 5 and 6

6.2.5.2.4 2 x Staff houses

These units are 45m² and 130m² respectively. See fig 23 below.

Fig 23: Units 1 and 2

6.2.5.3 Temporary Structures put up by tenants

There are 9 temporary units that were put up by tenants. See Fig 24-32

Fig 24: Unit 1

Fig 28: Unit 5

Fig 29: Unit 6

Fig 30: Unit 7

Fig 31: Unit 8

Fig 32: Unit 9

6.2.5.4 Caravan/Camping stands

A total of 60 sites have been developed with electrical points and shared water points.
See fig 33 below.

Fig 33: Camping sites

6.2.6 Number of staff working at facility

There are 4 permanent staff members, being the maintenance Manager and his wife, working at Reception and two labourers.

All the staff members are currently residing on the property.

6.2.7 Current rental payable

The current rental payable is R47 873.59 per annum.

6.2.8 Legal requirements

Depending on whether Council is considering the disposal of the asset or whether to award long term rights various sections/regulations of the Municipal Finance Act, No 56 of 2003, (MFMA), the Asset Transfer Regulations (ATR) and the Municipality's Policy on the Management of Council owned property, will apply.

6.2.8.1 Disposal of fix properties**6.2.8.1.1 Municipal Finance Management Act (MFMA)**

In terms of the Section 14 of the MFMA,

"A municipality may not transfer ownership as a result of a sale or other transaction or otherwise permanently dispose of a capital asset needed to provide the minimum level of basic municipal services.

(2) A municipality may transfer ownership or otherwise dispose of a capital asset other than one contemplated in subsection (1), but only after the municipal council, in a meeting open to the public—

(a) has decided on reasonable grounds that the asset is not needed to provide the minimum level of basic municipal services; and

(b) has considered the fair market value of the asset and the economic and community value to be received in exchange for the asset.

(3) A decision by a municipal council that a specific capital asset is not needed to provide the minimum level of basic municipal services, may not be reversed by the municipality after that asset has been sold, transferred or otherwise disposed of.

(4) Municipal council may delegate to the accounting officer of the municipality its power to make the determinations referred to in subsection (2)(a) and (b) in respect of movable capital assets below a value determined by the council.

(5) Any transfer of ownership of a capital asset in terms of subsection (2) or (4) must be fair, equitable, transparent, competitive and consistent with the supply chain management policy which the municipality must have and maintain in terms of section 111".

6.2.8.1.2 Asset Transfer Regulations (ATR)

In terms of Regulation 5 of the ATR

"(1) A municipality may transfer or dispose of a non-exempted capital asset only after—

(a) the accounting officer has in terms of regulation 6 conducted a public participation process to facilitate the determinations a municipal council must make in terms of section 14(2)(a) and (b) of the Act; and

(b) the municipal council—

(i) has made the determinations required by section 14(2)(a) and (b) and

(ii) has as a consequence of those determinations approved in principle that the capital asset may be transferred or disposed of.

(2) Sub regulation (1)(a) must be complied with only if the capital asset proposed to be transferred or disposed of is a high value capital asset" (i.e. in excess of R50M)".

6.2.8.1.3 Policy on the Management of Council owned property

In terms of paragraph 7.2.3 (general principles pertaining to the disposal of immovable property), of the policy;

"Before alienating Immoveable property or rights in Immoveable property the Municipality shall be satisfied that alienation is the appropriate methodology and that reasonable economic, environmental and social return cannot be derived whilst ownership of the Immoveable property or Property rights is retained by the Municipality".

Further in terms of paragraph 8 of the policy:

- "8.1 Before an Immoveable property is declared as surplus, and earmarked for disposal or the awarding of rights, it must first be assessed for its most appropriate use.*
- 8.2 The most appropriate use for a surplus property is one which achieves an optimum balance between the following three key elements of sustainable development:*
 - (a) the protection of ecological processes and natural systems;*
 - (b) the optimum financial return to and economic development of the municipal area; and*
 - (c) the enhancement of the cultural, economic, physical and social wellbeing of people and communities.*
- 8.3 The three elements of sustainability will apply to all surplus Immoveable Properties, however their significance and the relationships between them will vary for individual Immoveable Properties.*
- 8.4 In determining the most appropriate use of surplus properties, regard should be given to:*
 - (a) Spatial development framework(s);*
 - (b) Regional plans;*
 - (c) Sectoral studies/plans;*
 - (d) Government policies;*
 - (e) Relevant legislation; and*
 - (f) The views of interested and affected parties.*
- 8.5 Where appropriate, opportunities should be provided for community involvement in the assessment process".*

Further, Subsequent to determining the most appropriate use of a property and after the Municipality has decided that the Immoveable property could be disposed of, or that rights may be awarded, the method of disposal or method of awarding rights should be determined".

In terms of paragraph 9.1 the Municipality may use any of the following methods, depending on the circumstances pertaining the specific Immoveable property:

Tender process

- a) Auction*
- b) Call for proposals (will include a tender process)*

6.2.8.2 Granting of rights to use, Control or Manage a Capital asset**6.2.8.2.1 Asset Transfer Regulations (ATR)**

In terms of Regulation 34, a municipality may grant a right to use, control or manage a capital asset only after:

- "1)a) The accounting officer has, in terms of Regulation 35, concluded a public participation process regarding the proposed granting of the right; and*
- b) The municipal Council has approved in principle that the right may be granted.*
- 2) Sub-regulation (1)(a) must be complied with only if:*
 - a) the capital asset in respect of which the proposed right is to be granted has a value in excess of R10m; and*
 - b) a long-term right is proposed".*

In considering options Council must treat the property as a property that falls within this category valued in excess of R10M.

- "3)a) Only a Municipal Council may authorise the public participation process referred to in sub-regulation (a)*
- b) a request to the Municipal Council for the authorisation of a public participation process must be accompanied by an Information Statement*, stating:*
 - i) the reason for the proposal to grant a long term right to use, control or manage the relevant capital asset;*
 - ii) any expected benefit to the municipality that may result from the granting of the right;*
 - iii) any expected proceeds to be received by the municipality from the granting of the right; and*
 - iv) any expected gain or loss that will be realised or incurred by the municipality arising from the granting of the right".*

Council must consider its options and decide on the future use of the property. Only after Council had decided on a way forward, an Information Statement will be prepared and submitted with a further item.

6.2.8.2.2 Policy on the Management of Council owned property

In terms of paragraph 7.2.1, *"unless otherwise provided for in the policy, the disposal of viable immovable property shall be affected by means of a process of public competition".*

In terms of paragraph 9.1.1 of the Policy,

"The type of a formal tender may vary, depending on the nature of the transaction:

- i) **Outright tender** may be appropriate where the Immoveable property ownership is not complex, and the Municipality is seeking obligations to be placed on the successful tenderer which are clear and capable of specification in advance.*

ii) **Qualified tenders/call for proposals** will be appropriate where the Immovable property ownership position is complex or the development proposals for the Immovable property are insufficiently identified or otherwise incapable of detailed specification at the pre-tender stage.

iii) **Call for proposals on a build-operate transfer (B.O.T) basis** will be used if a developer is required to undertake the construction, including the financing, of a facility on Municipal-owned land, and the operation and maintenance thereof. The developer operates the facility over a fixed term during which it is allowed to charge facility users appropriate fees, rentals and charges not exceeding those proposed in its bid or as negotiated and incorporated in the contract, to enable the developer to recover its investment and operating and maintenance expenses in the project. The developer transfers the facility to the municipality at the end of the fixed term.

Such a process may, depending on the nature of the transaction, include a two-stage or two-envelope bidding process (proposal call) in terms of which only those bidders that meet the pre-qualification criteria specified in the first stage are entitled to participate in the second

Council may also decide to deal with any other competitive process like an auction.

In terms of paragraph 9.2.2 of the Policy, "the Municipal Council may dispense with the prescribed, competitive process, and may enter into a private treaty agreement through any convenient process, which may include direct negotiations, but only in specific circumstances, and only after having advertised Council's intention so to act. Should any objections be received as a consequence of such a notice, such objections first be considered before a final decision is taken to dispense with the competitive process established in this policy.

Here under a list of circumstances where Council dispense with a competitive process.

- a) Due to **specific circumstances** peculiar to the property under consideration, it can only be utilized by the one person/organisation wishing to enter into the Property Transaction;
- (e) in **exceptional cases** where the Municipal Council is of the opinion the public competition would not serve a useful purpose or that it is in the interest of the community and the Municipality. In such cases reasons for preferring such out of hand sale or lease to those by public competition must be recorded".
- l) **lease contracts with existing tenants** of immovable properties, not exceeding ten (10) years, may be renegotiated where the Executive Mayor is of the opinion that public competition would not serve a useful purpose or that renewal is aligned with the Municipality's strategic objectives and in the interest of the Community, subject to such renewal being advertised calling for public comment. The existing tenant shall give notice of the intention to renegotiate the lease at least six months before the date of termination;

The reasons for any such deviation from the competitive disposal process must be recorded".

From the above it is clear the Council may, under the circumstances described above, decide to dispose with a competitive (tender) process.

6.2.9 Consideration of options

From the above it is clear that Council may consider any of the following options:

6.1.1.1 Disposal of property

Should Council decide to dispose of the properties, then the legal provisions set out in paragraph 6.2.8 (*supra*) will apply. Council's attention is specifically drawn to paragraph 8 of the Policy on the Management of Council-owned property, requiring the Council to first assess the properties for its "*most appropriate use*" before declaring the property as surplus.

6.1.1.2 Awarding of rights: Long term Lease

Should Council decide to grant a right to use (Lease agreement) or manage the properties to a third party, then the legal provisions set out in paragraph 6.2.8.2 (ATR and Policy) will apply.

Under this option, Council must first consider whether to enter into a **private treaty agreement** with the existing Lessee (i.e. without following a tender process) or to follow a **public tender process**.

If Council decides to follow a public tender process, then it must decide on the type of process to be followed, i.e.:

- Outright tender;
- Qualified tender/Call for proposals, or
- Call for proposals on a Built-Operate-Transfer basis.

6.3 Financial Implications

The possible financial implications can only be determined after Council has decided which route to follow.

6.4 Legal Implications

The recommendations in this report comply with the Council's policies and applicable legislation.

6.5 Staff Implications

This report has no staff implications to the Municipality;

6.6 Previous / Relevant Council Resolutions

None

6.7 Risk Implications

The risks are addressed in the item.

6.8 Comments from Senior Management

Will be obtained when Council has indicated its preference on the way forward.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2021-03-24: ITEM 7.2.2

- (a) that lease portions 528a and 529cc, known as Mountain Breeze Caravan Park, be identified as land not needed for own use during the period for which such rights are to be granted, as provided for in Regulation 36 of the Asset Transfer Regulations;
- (b) that the lease agreement be extended on a month-to-month basis until a property register has been compiled and considered by Council to determine the future of Council properties per category;
- (c) that the lessee be informed to strictly adhere to the conditions of the lease agreement;
- (d) that the Caravan Park pay their municipal account and that the Municipal Manager be mandated to determine the lease amount;
- (e) that the Municipal Manager be mandated to take the necessary steps to ensure the drafting and finalisation of the property register and submit it to Council by not later than December 2021; and
- (f) that the item be brought back to Council as soon as the property register has been adopted by Council.

2. Die **VERHUURDER** onderneem om alles te doen, of te laat doen, om 2 ha van die **EIENDOM**, of sodanige gedeelte wat goedgekeur mag word, soos uitgewys tussen die partye, kragtens die ooreenkoms van nywerheidswater te laat voorsien.

3. Die **HURDER** sal geregtig wees om gedurende die huurtermyn in klousule 1 bepaal die water wat as gevolg van sodanige ooreenkoms verkry word ten opsigte van die verhuurde eiendom, op die verhuurde eiendom aan te wend op sodanige wyse soos goedgekeur deur die **VERHUURDER** en onderhewig aan alle terme en voorwaardes kragtens die bepalinge van **DIE OOREENKOMS**, of andersins bepaal, welke terme en voorwaardes aan die **HURDER** bekend is.

4. HURGELD, KOSTE VAN WATER, MUNISIPALE BELASTING

4.1 Die **HURDER** betaal eenmalig voor of op die 30ste dag van April 1992 by die kantoor van die Stadstesourier die bedrag van **R12 486,01** (welke bedrag bereken is vir die tydperk vanaf die datum waarop die ooreenkoms 'n aanvang neem tot die 31ste dag van

2.3

Maart 1993. Die **HUURDER** betaal daarna jaarliks voor of op die 31ste dag van Maart van elke daaropvolgende jaar die basiese huurgeld plus verhoging plus addisionele huurpremie soos bereken volgens die voorwaardes wat as Bylae B hierby aangeheg is.

4.2 Die **HUURDER** sal verder aanspreeklik wees om op aanvraag deur die **VERHUURDER** die volgende bedrae aan die **VERHUURDER**, of sy genomineerde, te betaal, naamlik:

4.2.1 enige en alle belastings en vorderings gehef te word deur die Helderberg Besproeiingsraad wat jurisdiksie het oor die verhuurde eiendom. Die Departement van Waterwese en Bosbou, of enige ander owerheidsliggaam, vir of ten opsigte van, maar nie uitsluitend nie -

4.2.1.1 basiese bydrae vir rente en delging van die beoogde nywerheidswatervoorsiening;

4.2.1.2 administratiewe koste;

4.2.1.3 verpligte bydraes ten opsigte van 'n reserwefonds;

4.2.1.4 verpligte bydraes tot die Watervorsingsraad;

4.2.1.5 koste van die gelewerde water soos deur die Besproeiingsraad en bereken teen die aankoopkoste van water soos van tyd tot tyd deur die Departement van Waterwese bepaal.

4.2.1.6 enige en alle belastings of ander heffings of vorderings, van welke aard en omvang ookal gehef deur voormelde liggame.

4.2.2 voorlopige uitgawes en tussentydse heffings wat deur die Besproeiingsraad of die Departement van Waterwese en Bosbou opgelê word.

4.3 Die **VERHUURDER** beskou die voorlegging van 'n rekening van die Besproeiingsraad en/of die Departement van Waterwese en Bosbou as afdoende stawende bewys van die bedrag wat deur die **HUURDER** verskuldig is, opvallende foute en weglatings uitgesluit.

4.4 Enige huurgeld of gelde verskuldig kragtens klousule 4.1 en 4.2 wat na die vervaldatum deur die **HUURDER** aangebied word ten opsigte van enige jaar, indien die **VERHUURDER** dit aanvaar, is onderworpe aan 'n rente wat maandeliks vooruit bereken sal word teen die standaardrentekoers, soos deur die Munisipale Ordonnansie, Ordonnansie

2.4

nr 20 van 1974, of enige vervanging of wysiging daarvan of enige ander toepaslike Ordonnansie van tyd tot tyd bepaal ten opsigte van elke maand of gedeelte daarvan.

4.5 Dit is 'n spesiale voorwaarde van hierdie ooreenkoms dat die **VERHUURDER** die reg voorbehou om hierdie ooreenkoms summier te kanselleer, sonder enige voorafgaande skriftelike kennisgewing, indien die **HUURDER** sou versuim om enige verskuldigde huurgeld of gelde verskuldig kragtens klousule 4.1. en 4.2 binne sewe dae vanaf die vervaldatum te vereffen, en so 'n kansellering affekteer generwyse die reg van die **VERHUURDER** om enige bedrag wat die **HUURDER** skuld of verskuldig aan word, geregtelik van hom te vorder nie.

4.6 Die **HUURDER** sal aanspreeklik wees om enige wetlike verpligte heffing sowel as die eiendomsbelastings en/of diensgelde deur die Stadsraad op die **EIENDOM** gehef te betaal, onderworpe aan die voorwaardes en vereistes soos bepaal mag word in terme van die toepaslike wetgewing of die Munisipale Ordonnansie, Ordonnansie nr 20 van 1974, of enige vervanging of wysiging daarvan, of enige ander toepaslike Ordonnansie.

5. STREEKSDIENSTERAADHEFFING

Die **HUURDER** onderneem om alle heffings wat deur die Streeksdiensteraad op die **EIENDOM** gehef word, regstreeks aan daardie owerheid te betaal.

6. MYN- EN ANDER REGTE

Die **VERHUURDER** behou voor alle regte op metale, minerale, steenkool, klip van alle soorte, klei en gruis, met inbegrip van die reg van toegang tot die eiendom te alle tye om sodanige metale, minerale of steenkool te myn of om klei, gruis en klip te verwyder, onderworpe aan 'n vermindering van die huurgeld in verhouding tot die oppervlakte wat deur die **VERHUURDER** vir sodanige mynwerk of verwydering teruggeneem word.

7. BESKERMING VAN BOME

7.1 Alle bome, wingerde of dergelike verbeteringe op die verhuurde perseel bly die eiendom van die **VERHUURDER** en mag nie deur die **HUURDER** beskadig of verwyder word nie.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left, a circled signature in the center, and several smaller initials and signatures on the right.

2.5

7.2 Die **HUURDER** moet die geskrewe toestemming van die **VERHUURDER** vooraf verkry vir die verwydering van enige bome, wingerde en dergelike verbeteringe op 'n terrein wat hy vir verbouing nodig het, en as sodanige toestemming verleen word, behou die **VERHUURDER** die reg voor om oor die hout vir sy eie voordeel te beskik.

7.3 Die **VERHUURDER** behou die reg oor om deur sy amptenare periodieke inspeksies van bome, en ander verbeteringe op die eiendom uit te voer en om sodanige stappe ter beskerming daarvan te doen as wat hy nodig mag ag.

7.4 Die **VERHUURDER** behou die reg voor om self enige bome op die eiendom wat nie deur die **HUURDER** aangeplant is nie, te kap en te verwyder, en hiervoor het hy vrye toegang tot die eiendom.

8. **WATERBRONNE**

8.1 Die **VERHUURDER** waarborg geen voorraad van oppervlakte- of ondergrondse water nie.

8.2 Die **HUURDER** onderneem om nie met fonteine of met die natuurlike vloei van oppervlakte afloopwater in te meng nie deur kanale, vore of damme te bou of om enige ander werke uit te voer sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie, en vir die toepassing van hierdie subklousule is 'n opinie van die betrokke Staatsdepartemente en/of onderafdelings daarvan bindend en finaal.

8.3 Die **VERHUURDER** behou die reg voor om water op die **EIENDOM** op te gaar of om die gebruik van water uit fonteine of strome te beperk, indien sodanige opgaring of beperking na sy mening noodsaaklik is ter beskerming van die regte van derde partye.

8.4 Die **HUURDER** onderneem om alle strome, fonteine of opgaardamme teen besoedeling te beskerm, en om sodanige instruksies uit te voer as wat die **VERHUURDER** periodiek te dien einde mag uitreik.

8.5 'n Serwituut is ten gunste van die **EIENDOM** op die boorgat gemerk A en pyplyn gemerk AB op die aangehegde diagram no 8743/87 geregistreer.

Handwritten signatures and initials at the bottom of the page. From left to right: a large stylized signature, a circular stamp containing the word 'STIP' and the number '12', the initials 'BFC', a large circular signature, and a final stylized signature.

2.6

9. GRONDBEWARING

- 9.1 Die **HURDER** onderneem om die **EIENDOM** op 'n versigtige en sorgsame wyse, te gebruik en ook om verswakking van die natuurlike vrugbaarheid en kwaliteit van die grond teen te werk.
- 9.2 Die **HURDER** onderneem om gronderosie teen te werk en om stiptelik uitvoering te gee aan die bepalinge van enige grondbewaringskema wat volgens wet op die **EIENDOM** van toepassing mag wees, en te dien einde behou die **VERHUURDER** die reg voor om periodieke instruksies uit te reik.
- 9.3 Die **VERHUURDER** behou die reg voor om sodanige werke uit te voer as wat hy nodig mag ag vir die bestryding van gronderosie, en wel op die koste van die **HURDER** as laasgenoemde versuim om dit op die **VERHUURDER** se versoek te doen.
- 9.4 Die **HURDER** onderneem om geen sand, grond, gruis, klip of ander grondstof vanaf die **EIENDOM** vir verkoping of gebruik elders te verwyder nie.
- 9.5 Die **HURDER** onderneem om toe te sien dat geen vullis, rommel of afval op die **EIENDOM** gestort word nie.

10. SKADELIKE GEWASSE

- 10.1 Die **HURDER** onderneem om die **EIENDOM** van skadelike gewasse skoon te hou.
- 10.2 Die **VERHUURDER** behou die reg voor om sodanige stappe as wat hy dienlik mag ag, te doen ter verwydering van dergelike geproklameerde onkruid, en wel op die koste van die **HURDER** ingeval laasgenoemde versuim om dit op die **VERHUURDER** se versoek te doen.

11. BRANDBESTRYDING

- 11.1 Die **HURDER** onderneem om die uiterste sorg uit te oefen ter beskerming van die **EIENDOM** teen veldbrande, en die **VERHUURDER** kan vereis dat die **HURDER** op sy eie koste sodanige brandpaaie bou as wat die **VERHUURDER** nodig mag ag.
- 11.2 Die **HURDER** is aanspreeklik vir vergoeding aan die **VERHUURDER** vir enige uitgawe aangegaan om brande te voorkom of te blus. Brandskade aan bome of ander plante

Handwritten signatures and initials at the bottom of the page, including a large signature on the left and several smaller initials and signatures on the right, some enclosed in circles.

2.6

9. GRONDBEWARING

- 9.1 Die **HURDER** onderneem om die **EIENDOM** op 'n versigtige en sorgsame wyse, te gebruik en ook om verswakking van die natuurlike vrugbaarheid en kwaliteit van die grond teen te werk.
- 9.2 Die **HURDER** onderneem om gronderosie teen te werk en om stiptelik uitvoering te gee aan die bepalings van enige grondbewaringskema wat volgens wet op die **EIENDOM** van toepassing mag wees, en te dien einde behou die **VERHUURDER** die reg voor om periodieke instruksies uit te reik.
- 9.3 Die **VERHUURDER** behou die reg voor om sodanige werke uit te voer as wat hy nodig mag ag vir die bestryding van gronderosie, en wel op die koste van die **HURDER** as laasgenoemde versuim om dit op die **VERHUURDER** se versoek te doen.
- 9.4 Die **HURDER** onderneem om geen sand, grond, gruis, klip of ander grondstof vanaf die **EIENDOM** vir verkoping of gebruik elders te verwyder nie.
- 9.5 Die **HURDER** onderneem om toe te sien dat geen vullis, rommel of afval op die **EIENDOM** gestort word nie.

10. SKADELIKE GEWASSE

- 10.1 Die **HURDER** onderneem om die **EIENDOM** van skadelike gewasse skoon te hou.
- 10.2 Die **VERHUURDER** behou die reg voor om sodanige stappe as wat hy dienlik mag ag, te doen ter verwydering van dergelike geproklameerde onkruid, en wel op die koste van die **HURDER** ingeval laasgenoemde versuim om dit op die **VERHUURDER** se versoek te doen.

11. BRANDBESTRYDING

- 11.1 Die **HURDER** onderneem om die uiterste sorg uit te oefen ter beskerming van die **EIENDOM** teen veldbrande, en die **VERHUURDER** kan vereis dat die **HURDER** op sy eie koste sodanige brandpaaie bou as wat die **VERHUURDER** nodig mag ag.
- 11.2 Die **HURDER** is aanspreeklik vir vergoeding aan die **VERHUURDER** vir enige uitgawe aangaan om brande te voorkom of te blus. Brandskade aan bome of ander plante

Handwritten signatures and initials at the bottom of the page. There are several distinct marks, including what appears to be a large 'V' or checkmark on the left, and various scribbles and initials on the right, possibly including 'EJP' and 'HD'.

op die **EIENDOM** wat aan die **VERHUURDER** behoort word deur 'n taksateur wat deur die **VERHUURDER** aangestel en wie se bevinding bindend is, aangeslaan, en aan die **VERHUURDER** deur die **HUURDER** vergoed.

12. OMHEINING

12.1 Die **HUURDER** is verantwoordelik vir die oprigting en koste van enige omheining wat hy vir die beskerming van sy onderneming op die **EIENDOM** nodig mag ag. Geen motorvoertuighek mag op die grens, aangedui as Kabode op die aangehegte kaart aangebring word nie.

12.2 Omheining wat deur die **HUURDER** opgerig word, kan binne een maand na die afloop van die huurooreenkoms verwyder word, maar die **VERHUURDER** kan uitstel vir sodanige verwydering verleen totdat die **EIENDOM** weer verhuur is om onderhandeling met die opvolger vir die verkoping of oordrag daarvan moontlik te maak, met dien verstande dat die **VERHUURDER** eienaar van sodanige omheining word indien geen finale reëlins binne sestig dae vanaf die datum van herverhuring deur die **HUURDER** getref is nie, en in so 'n geval is die **HUURDER** nie geregtig tot enige vergoeding vir die omheining wat aldus deur hom verbeur is nie.

13. ONDERVERHURINGS, SESSIES OF OORDRAGTE, ENS

13.1 Die **HUURDER** sal nie hierdie huurooreenkoms seeder of oordra nie, en onderverhuur nie die **EIENDOM** of enige deel daarvan sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie.

13.2 Die **VERHUURDER** kan 'n sertifikaat as bewys vereis dat die maatskappy wat 'n **HUURDER** is, wel as 'n maatskappy geregistreer is.

13.3 By verandering van die beherende aandeelhouding of belange in 'n maatskappy of beslote korporasie wat 'n **HUURDER** is of by verandering van direkteure of by likwidasie van die maatskappy of beslote korporasie of ingeval die maatskappy onder geregtelike bestuur geplaas word, bly die oorspronklike borge ten behoeve van die maatskappy of beslote korporasie gesamentlik en afsonderlik en as mede-hoofskuldenaars teenoor die **VERHUURDER** aanspreeklik, tensy die **VERHUURDER** op skriftelike aansoek van die **HUURDER** toestem tot vervanging van sodanige borge.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left, a circular stamp with initials in the center, and several other smaller signatures and initials on the right.

2.7

op die **EIENDOM** wat aan die **VERHUURDER** behoort word deur 'n taksateur wat deur die **VERHUURDER** aangestel en wie se bevinding bindend is, aangeslaan, en aan die **VERHUURDER** deur die **HURDER** vergoed.

12. **OMHEINING**

12.1 Die **HURDER** is verantwoordelik vir die oprigting en koste van enige omheining wat hy vir die beskerming van sy onderneming op die **EIENDOM** nodig mag ag. Geen motorvoertuighek mag op die grens, aangedui as Kabode op die aangehegte kaart aangebring word nie.

12.2 Omheining wat deur die **HURDER** opgerig word, kan binne een maand na die afloop van die huurooreenkoms verwyder word, maar die **VERHUURDER** kan uitstel vir sodanige verwydering verleen totdat die **EIENDOM** weer verhuur is om onderhandelinge met die opvolger vir die verkoping of oordrag daarvan moontlik te maak, met dien verstande dat die **VERHUURDER** eienaar van sodanige omheining word indien geen finale reëlins binne sestig dae vanaf die datum van hervrhuring deur die **HURDER** getref is nie, en in so 'n geval is die **HURDER** nie geregtig tot enige vergoeding vir die omheining wat aldus deur hom verbeur is nie.

13. **ONDERVERHURINGS, SESSIES OF OORDRAGTE, ENS**

13.1 Die **HURDER** sal nie hierdie huurooreenkoms seeder of oordra nie, en onderverhuur nie die **EIENDOM** of enige deel daarvan sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie.

13.2 Die **VERHUURDER** kan 'n sertifikaat as bewys vereis dat die maatskappy wat 'n **HURDER** is, wel as 'n maatskappy geregistreer is.

13.3 By verandering van die beherende aandeelhouding of belange in 'n maatskappy of beslote korporasie wat 'n **HURDER** is of by verandering van direkteure of by likwidasie van die maatskappy of beslote korporasie of ingeval die maatskappy onder geregtelike bestuur geplaas word, bly die oorspronklike borge ten behoeve van die maatskappy of beslote korporasie gesamentlik en afsonderlik en as mede-hoofskuldenaars teenoor die **VERHUURDER** aanspreeklik, tensy die **VERHUURDER** op skriftelike aansoek van die **HURDER** toestem tot vervanging van sodanige borge.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left, a circled signature in the center, and several smaller initials and marks on the right.

2.8

- 13.4 Verandering van die beherende aandeelhouding of verandering van ledebelang, direkteure of Trustees vir 'n Maatskappy, Beslote Korporasie of 'n Trust wat 'n **HURDER** is, word geag 'n onderverhuring te wees.

14. **GEBoue EN STRUKTURELE VERBETERINGE**

- 14.1 Enige gebou of strukturele verbeteringe wat op die **EIENDOM** by die aanvang van die huurooreenkoms bestaan, of mettertyd gedurende die huurtermyn opgerig mag word, sal deur die **HURDER** op sy eie koste hetsy binne of buite in 'n goeie toestand gehou word en wel tot die bevrediging van die **VERHUURDER** en indien die **HURDER** versuim om dit te doen kan die **VERHUURDER** sodanige reparasies as wat hy nodig mag ag, laat aanbring terwyl die **HURDER** vir die uitgawe aanspreeklik bly.
- 14.2 Geen nuwe gebou, struktuur of ander permanente verbetering sal op die **EIENDOM** aangebring, opgerig of uitgevoer word sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie, en sonder dat bouplanne ten opsigte van sodanige verbeteringe vooraf deur die **VERHUURDER** goedgekeur is nie en laasgenoemde kan gelas dat sodanige gebou, struktuur of verbetering wat inderdaad sonder sy skriftelike goedkeuring en toestemming opgerig, aangebring of gebou is deur die **HURDER** op sy eie koste verwyder word.
- 14.3 Goedgekeurde verbeteringe van 'n permanente aard sal deur die **HURDER** op sy eie risiko aangebring of opgerig word.
- 14.4 Die **VERHUURDER** sal enige geboue of ander verbeteringe wat by die aanvang van die huurtermyn op die **EIENDOM** is teen skade verseker en sodanige versekering instand hou, met dien verstande dat die **HURDER** verantwoordelik sal wees vir die volle kostes verbonde aan sodanige versekering, en die **VERHUURDER** sal derhalwe die premies direk van die **HURDER** vorder.
- 14.5 Indien die **VERHUURDER** kontant van 'n versekeringsmaatskappy sou ontvang ter vergoeding van 'n eis ten opsigte van skade aan enige verbetering op die **EIENDOM** soos in subklousule 14.4 van hierdie ooreenkoms genoem, kan hy die verbetering herstel of die kontant hou, na gelang hy dit dienlik ag.
- 14.6 Behuising kan, met behoud van die bepalinge van subklousules 14.1, 14.2, 14.3 en 14.4 van hierdie ooreenkoms aan werkers wat die **HURDER** op die **EIENDOM** in diens het, met inbegrip van hul onmiddellike afhanklikes, op die **EIENDOM** voorsien word, onderworpe aan die voorafverkreë skriftelike toestemming van die **VERHUURDER**, en

Handwritten signatures and initials are present at the bottom of the page, including a large signature on the left, a circled '22' in the center, and several other initials and marks on the right.

2.9

die stiptelike nakoming van die bepalings en vereistes van die toepaslike wetgewing met betrekking tot behuising.

Enige plakkery op die **EIENDOM** is ten strengste verbode.

14.7 Die **HURDER** sal geen reg of aanspraak hê of vergoeding kan eis ten opsigte van verbeteringe, met inbegrip van landboukundige verbeteringe wat tydens die huurtermyn op die **EIENDOM** aangebring is nie, en die **VERHUURDER** behou die reg voor om, by beëindiging van hierdie ooreenkoms ingevolge die bepalings van klousule 3, subklousules 4.4, 20.1.1, 20.1.2 en 20.2 of andersins volgens sy eie diskresie en goeëdunke te besluit of die **VERHUURDER** bereid is om die **HURDER** enigsins te vergoed vir sodanige verbeteringe. Voorts kan die **VERHUURDER** in die alternatief toestem tot die verwydering van enige verbetering binne 'n tydperk soos deur die **VERHUURDER** voorgeskryf, by gebreke waarvan die **HURDER** enige reg op verwydering van sodanige verbeteringe of enige verdere aanspraak van watter aard ookal sal verbeur, ten gevolge waarvan die betrokke verbeteringe sonder enige aard van vergoeding die **EIENDOM** van die **VERHUURDER** word. NB

14.8 Die **EIENDOM** sal bo-en-behalwe die bepalings van hierdie ooreenkoms, ook onderhewig wees en voldoen aan die bepalings van die **VERHUURDER** se Verordening insake parke vir woonwaens en mobiele wonings.

14.9 Die uitlegplan waarvolgens die **EIENDOM** as park ontwikkel sal word, sal op koste van die **HURDER** deur 'n gekwalifiseerde Stadsbeplanner gedoen word en sodanige plan sal onderworpe wees aan die goedkeuring van die **VERHUURDER**,

14.10 Op 'n maksimum van 10 % van die ontwikkelde persele mag permanente okkupasie toegelaat word van welke 10 % permanente okkupasie minstens 50 % in woonwaens moet geskied. Hierdie laasgenoemde persentasie kan egter by skriftelike kennisgewing van die **VERHUURDER** aan die **HURDER**, gewysig word.

14.11 Die beplanning en voorsiening van siviele en elektriese dienste op die eiendom moet volgens die voorskrifte van die **VERHUURDER** op koste van die **HURDER** geskied.

14.12 Minstens 50 % van die ontwikkelde persele moet elk oor 'n 220 V elektriese kragpuntaansluiting beskik.

14.13 Op 'n gedeelte van die **EIENDOM**, gemerk CDEFGHJKjhgfC op die aangehegte kaart, mag geen persele ontwikkel word nie. Gemelde gedeelte moet gebruik word vir die huisvesting van personeel werksaam op die eiendom en voorts vir doeleindes van buitelugontspanning deur dag besoekers.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left and several smaller ones on the right.

2.10

15. **BAKENS**

15.1 Deur die huurooreenkoms te onderteken erken die **HUURDER** dat hy bewus is van die werklike ligging van alle bakens wat die **EIENDOM** se grense bepaal en enige onkunde of misverstand aan sy kant in hierdie verband raak nie die geldigheid van die huurooreenkoms of maak hom nie geregtig tot 'n vermindering van die huurgeld of tot kompensasië en enige vorm nie.

15.2 Indien enige baken wat die grense van die **EIENDOM** bepaal na ondertekening van hierdie ooreenkoms nie gevind kan word nie, is die **HUURDER** aanspreeklik vir alle opmetings- en ander kostes verbonde aan die herplasing van sodanige bakens.

16. **PAAIE**

16.1 Die **HUURDER** onderneem om alle bestaande paaie op die **EIENDOM** in 'n goeie toestand te hou, en voorts om geen verdere paaie te bou of oop te maak sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie.

16.2 'n Ewigdurende reg van weg soos aangedui as ABCDEFGHIJKLMNOPQRS op die aangehegte diagram no 4534/85, is ten gunste van die **EIENDOM** geregistreer.

17. **INSPEKSIES**

Die gemagtigde amptenare van die **VERHUURDER** kan te eniger tyd die **EIENDOM** betree om sodanige inspeksies as wat hulle nodig mag ag, uit te voer en om vas te stel of die voorwaardes en bepalings van die huurooreenkoms stiptelik nagekom word.

18. **ADVERTENSIE TEKENS**

Die **HUURDER** sal geen advertensietekens hoegenaamd op die **EIENDOM** oprig nie, en sal ook nie toelaat dat sulke tekens opgerig word sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie.

2.10

15. **BAKENS**

- 15.1 Deur die huurooreenkoms te onderteken erken die **HURDER** dat hy bewus is van die werklike ligging van alle bakens wat die **EIENDOM** se grense bepaal en enige onkunde of misverstand aan sy kant in hierdie verband raak nie die geldigheid van die huurooreenkoms of maak hom nie geregtig tot 'n vermindering van die huurgeld of tot kompensasie en enige vorm nie.
- 15.2 Indien enige baken wat die grense van die **EIENDOM** bepaal na ondertekening van hierdie ooreenkoms nie gevind kan word nie, is die **HURDER** aanspreeklik vir alle opmetings- en ander kostes verbonde aan die herplasing van sodanige bakens.

16. **PAAIE**

- 16.1 Die **HURDER** onderneem om alle bestaande paaie op die **EIENDOM** in 'n goeie toestand te hou, en voorts om geen verdere paaie te bou of oop te maak sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie.
- 16.2 'n Ewigdurende reg van weg soos aangedui as ABCDEFGHIJKLMNOPQRS op die aangehegte diagram no 4534/85, is ten gunste van die **EIENDOM** geregistreer.

17. **INSPEKSIES**

Die gemagtigde amptenare van die **VERHUURDER** kan te eniger tyd die **EIENDOM** betree om sodanige inspeksies as wat hulle nodig mag ag, uit te voer en om vas te stel of die voorwaardes en bepalings van die huurooreenkoms stiptelik nagekom word.

18. **ADVERTENSIE TEKENS**

Die **HURDER** sal geen advertensietekens hoegenaamd op die **EIENDOM** oprig nie, en sal ook nie toelaat dat sulke tekens opgerig word sonder die voorafverkreë skriftelike toestemming van die **VERHUURDER** nie.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left, a circular stamp with 'Rd' inside, and several other initials and marks on the right.

19. ERFDIENSBAARHEID EN VERJARING

19.1 Die huur is onderworpe aan enige erfdiensbaarheid wat aan die **EIENDOM** kleef, en as dit te eniger tyd sou blyk dat die **VERHUURDER** nie daartoe geregtig was om die **EIENDOM** of enige deel daarvan te verhuur nie, het die **HURDER** geen eis vir skadevergoeding behalwe dat die huurgeld *pro rata* verminder word ten opsigte van daardie deel van die **EIENDOM** wat nie vir okkupasie of gebruik deur die **HURDER** beskikbaar is nie.

19.2 Die **HURDER** erken hiermee dat hy geen aanspraak op eiendomsreg by wyse van verjaring ten opsigte van die **EIENDOM** wat verhuur word sal verkry nie.

20. OPSEGGING EN BEÏNDIGING VAN HUUROOREENKOMS

20.1 Die **VERHUURDER** kan, sonder om afbreuk te doen aan enige bepaling of vereistes van hierdie ooreenkoms, met spesifieke verwysing na die bepalings van klousule 4 hiervan, en nadat 'n skriftelike kennisgewing op die **HURDER** gedien is, hierdie ooreenkoms beëindig -

20.1.1 indien die **HURDER** versuim om enige voorwaarde of bepaling ten opsigte van hierdie ooreenkoms na te kom; of

20.1.2 indien die **VERHUURDER** daarvan oortuig is dat die **HURDER** die grond en op onbehoorlike of onverantwoordelike wyse benut; of

20.1.3 indien die **VERHUURDER** daarvan oortuig is dat die **HURDER** deur sy handelinge op die **EIENDOM** 'n oorlas vir ander uitmaak; of

20.1.4 indien die **HURDER** teenstrydig met enige bepaling van die Dorpsaanlegskemaregulasies van die Munisipaliteit van Stellenbosch afgekondig by PK 73 van 1979-07-20, soos gewysig, optree; of

20.1.5 indien die **EIENDOM** in sy geheel of gedeeltelik vir *bona fide* munisipale doeleindes, waarby dorpsstigting ingesluit is, benodig word:

met dien verstande dat 'n grasiëperiode van hoogstens een (1) jaar in die gevalle soos in subklousules 20.1.1; 20.1.2; 20.1.3; 20.1.4 en 20.1.5 genoem aan die **HURDER** verleen word, op voorwaarde dat die **HURDER** gedurende die grasiëperiode aan al die bepalings en vereistes van hierdie ooreenkoms, of ander voorwaardes wat die **VERHUURDER** in hierdie verband mag stel moet voldoen, by gebreke waarvan die toegestane grasiëperiode sonder verdere kennisgewing deur die **VERHUURDER** in heroorgeweging geneem sal word.

Handwritten signatures and initials are present at the bottom of the page, including a large signature on the left, a circular stamp with initials in the center, and several other initials and marks on the right.

2.12

20.2 die **HURDER** kan, sonder om afbreuk te doen aan enige bepaling of vereiste van hierdie ooreenkoms en nadat 'n skriftelike kennisgewing van ses (6) maande deur die **HURDER** aan die **VERHUURDER** gegee is, hierdie ooreenkoms beëindig.

20.3 Wanneer subklousule 20.1.5 toegepas word sal die **HURDER** kwytgeskeld word van alle oorblywende verpligtinge soos in paragraaf 4.2.1 bepaal word en geregtig wees op vergoeding van die koste van die gepaardgaande noodsaaklike infrastruktuur, wat as 'n direkte gevolg van die voorsiening van die nywerheidswater aangebring is (pypleiding, kleppe, krane en meters), wat soos volg vanaf vestigings- tot huuropseggingsdatum bereken word:

bedrag betaalbaar ten opsigte van infrastruktuur is gelyk aan die historiese vestigingskoste - volgens die gemiddelde waardasie van twee onafhanklike buitestaanders wat vir die **VERHUURDER** aanvaarbaar is - minus die waardevermindering wat in gelyke paalemente oor twintig (20) jaar bereken is. Koste vir voorlegging ter staving van eise deur **HURDER** en alle uitgawe verbonde aan die aanstelling van buitestaanders berus by die **HURDER**.

21. SKADELOOSSTELLING

Die **HURDER** onderneem hierby om die **VERHUURDER** te vrywaar en gevrywaar te hou teen alle gedinge, stappe, eise, vorderings, koste, skadevergoeding en uitgawes wat gehef, gebring of gemaak mag word teen die **VERHUURDER** of wat die **VERHUURDER** mag betaal, opdoen of aangaan as gevolg van enige handeling aan die kant van die **HURDER**, sy werknemers of persone wat onder sy beheer handel.

22. KOSTE VAN OOREENKOMS

Alle kostes wat deur die **VERHUURDER** aangegaan is vir die voorbereiding en opstel van hierdie ooreenkoms, plus die koste van die verhuringsadvertensie, opmetingskoste en ander toevallige uitgawes sal deur die **HURDER** gedra word, en die **HURDER** kan nie die korrektheid van die bedrag wat deur die **VERHUURDER** in hierdie verband geëis word, betwis nie. Die Huurooreenkoms sal slegs op die uitdruklike versoek van die **HURDER** en op sy koste notarieël verly en in die Aktekantoor geregistreer word. Die **HURDER** moet in sodanige geval 'n deposito betaal soos deur die **VERHUURDER** bepaal ten opsigte van die kostes hierbo vermeld.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left and several smaller initials and signatures on the right, some enclosed in circles.

2.13

23. **ARBITRASIE**

23.1 Enige geskil wat te eniger tyd tussen die partye mag ontstaan in verband met enige aangeleentheid voortspruitende uit hierdie ooreenkoms, sal onderwerp word aan en besleg word deur arbitrasie.

23.2 Iedere sodanige arbitrasie moet plaasvind

23.2.1 te Stellenbosch;

23.2.2 op 'n informele summiere wyse sonder enige pleitstukke of blootlegging van dokumente en sonder die noodsaaklikheid om aan die strenge reëls van die bewysreg te voldoen;

23.2.3 onverwyld, met die oog daarop om dit af te handel binne drie (3) maande vanaf die datum waarop die geskil na arbitrasie verwys is; en

23.2.4 onderworpe aan die bepalings van die Wet op Arbitrasie, No 42 van 1986, of sodanige ander Arbitrasiewette as wat van tyd tot tyd mag geld, behalwe waar die bepalings van hierdie klousule anders voorskryf.

23.3 Die arbiter moet 'n persoon wees op wie deur die partye onderling ooreengekom is en by onstentenis van 'n ooreenkoms, een aangestel deur die diensdoenende President van die Wetsgenootskap van die Kaap die Goeie Hoop.

23.4 Die partye kom hiermee onherroeplik ooreen dat die beslissing van die arbiter in sodanige arbitrasieverrigtinge finaal en bindend op hulle sal wees.

24. **INVORDERINGSKOSTE**

Indien die **VERHUURDER** opdrag aan sy prokureurs sou gee om enige gelde wat kragtens hierdie ooreenkoms betaalbaar is, op die **HUURDER** te verhaal, is die **HUURDER** aanspreeklik vir die betaling van alle koste deur die **VERHUURDER** in hierdie verband aangegaan, bereken op 'n prokureur/kliëntbasis, insluitende sodanige heffings wat betaalbaar is kragtens Regulasie 62 van die Wet op Prokureursordes nr 41 van 1975, of enige vervanging of wysiging daarvan, of enige soortgelyke heffings.

Handwritten signatures and initials at the bottom of the page, including a large signature on the left, a circular stamp with 'ETP' in the center, and several other initials and marks on the right.

(#SKLUB/KONTRAK/mc)

BELEID EN TOEPASSING VAN DIE HUURGELDBEREKENING

1. (a) Vir die doeleindes van hierdie ooreenkoms word die huurgeld gebaseer op die onverbeterde waarde van die Landbougrond in welke geval die volgende woordbepaling van toepassing sal wees:

"Onverbeterde grond" - beteken grond soos in sy natuurlike staat, met of sonder natuurlike plantegroei, waarop geen spesifieke struik of gewasse voorkom en verbou word met die doel om dit te oes nie;

1. (b) die waarde van die onverbeterde Landbougrond sal deur die KWV bepaal word; en

1. (c) vir die jaar 1989 word die waarde van die grond vasgestel op R7 200,00 per hektaar waarop die Stadsraad 'n opbrengs van 5 % verwag.

2. **Huurgeld betaalbaar in eerste termyn van vyf (5) jaar**

- (a) Die jaarlikse basiese huurgeld ingevolge klousule 4.1 van die huurooreenkoms betaalbaar, is die som van R360,00 per hektaar per jaar;
- (b) die basiese huurgeld sal jaarliks met 70 % van die styging van die amptelike verbruikersprysindeks soos op 31 Desember van die vorige jaar eskaleer.

3. **Aangepaste huurgeld na vyf (5) jaar**

Die basis van die huurgeld sowel as die persentasie aanpassing soos beskryf in paragrawe 1 en 2 sal elke vyf (5) jaar herbepaal word ooreenkomstig die basis beskryf in par. 1 of op 'n ander basis waarop onderling ooreengekom word. Indien die partye nie konsensus kan bereik oor die huurgeld nie, sal sodanige kwessie verwys word vir arbitrasie ingevolge klousule 23 van die hoofooreenkoms.

CESSION AND ASSIGNMENT OF LEASE BY LESSEE

MEMORANDUM OF AGREEMENT ENTERED INTO BY AND BETWEEN

THE MUNICIPALITY OF STELLENBOSCH

(herein represented by JACOBUS PETRUS RETIEF in his capacity as Town Clerk/Executive Officer and hereinafter referred to as "the Lessor")

and

STELLENBOSCH CARAVAN PARK CC

(herein represented by CARL PHILIP MALAN in his capacity as duly authorised member and hereinafter referred to as "the Lessee")

and

MOUNTAIN BREEZE CARAVAN PARK CC

(herein represented by RUDOLPH PHILIPPUS VISSER, duly authorised thereto and hereinafter referred to as "the Cessionary")

WHEREAS the Lessor and the Lessee did on the 18th day of May 1992 at Stellenbosch enter in a Lease Agreement, a copy of which is annexed hereto marked Annexure "A"; and

WHEREAS the Lessee is desirous of ceding his rights and delegating his obligations in terms of the aforesaid agreement to the Cessionary; and

WHEREAS the Cessionary is prepared to take cession of the Lessee's rights and assignment of the Lessee's obligations under the agreement; and

Handwritten signatures and initials are present at the bottom right of the page. There are several distinct signatures, including one that appears to be 'R. P. Visser' and others that are less legible. The signatures are written in dark ink.

- 2 -

WHEREAS the Lessor has consented to the cession and assignment of the Lease Agreement by the Lessee to the Cessionary;

NOW THEREFORE it is agreed as follows:

1. INTERPRETATION

In this agreement, except in a context indicating the contrary,

- 1.1 "the Effective date" shall mean 18th December 1995; and
- 1.2 "the Lease" shall the agreement entered into by and between the Lessor and the Lessee, dated at Stellenbosch on the 18th day of May 1992; and
- 1.3 "the parties" shall mean the parties to this agreement; and

2. CESSION & DELEGATION

- 2.1 Regardless of the date of signing hereof, the Lessee hereby cedes to the Cessionary all the Lessee's rights, title and interest under, in and to the Lease, and delegates to the Cessionary all its obligations under the Lease.
- 2.2 The Cessionary hereby accepts the cession and delegation in terms of clause 2.1 above.
- 2.3 The Lessor hereby consents to the cession and delegation in terms of clause 3.1 above.

3. SURETYSHIP

- 3.1 It is recorded that upon signing of the Lease, the members of the Lessee bound themselves in their personal capacity as sureties and co-principal debtors in favour of the Lessor for the due fulfilment of the Lessee obligations under the Lease. A copy of the relevant Deed of Suretyship is annexed hereto marked "Annexure B".
- 3.2 It is recorded that the Lessor hereby releases all the sureties reflected in Annexure B unconditionally with effect from the Effective date.
- 3.3 It is hereby further recorded that **RUDOLPH PHILIPPUS VISSER**, the sole member of the Cessionary, binds himself as surety and co-principal debtor in favour of the Lessor for the due fulfilment of the Cessionary's obligations under the Lease from the Effective date.

Handwritten signatures and initials at the bottom of the page, including a large signature on the right and several initials or smaller signatures on the left and center.

- 3 -

4. INDEMNITY

- 4.1 The Lessee indemnifies the Cessionary against all claims by the Lessor against the Cessionary in terms of the Lease on causes arising prior to the Effective date.
- 4.2 The Cessionary indemnifies the Lessee and all its members in their personal capacity against any claims by the Lessor against the Lessee or its members in their personal capacity on causes arising from the Effective date and thereafter.

5. SOLE MEMORIAL

It is recorded that this document and annexures thereto constitute the entire agreement between the parties and that no variation shall be of any legal force or effect unless reduced to writing and signed by the parties.

THUS DONE and SIGNED at Stellenbosch on this the 16th
day of March 1998.

Subject: [EX] Mountain Breeze Karavaan Park

Goeie môre Annalene en Aldridge

Ek het jul inligting by Rikus Badenhorst gekry,

Ek glo dat my e-pos wat ek vir hom gestuur het en sy antwoord terug aan my, waarin jul in gesluit is, sal kan help om vir my te help met die nodige inligting.

Ek sal baie graag wil voortgaan met 'n tydelike kontrak indien moontlik, of dalk met die nuwe Bestuur van die park wil saam werk ivm die toekoms van die permanente inwoners.

Ek het baie ondervinding in Gastehuse en Safari Lodges, bestuur asook die finansiële funksies.

Die ander inwoners maak om een of ander rede staat op my, om 'n antwoord/gerus te stel, aan hul te verskaf.

Byvoorbaat dank
Domé Sonnekus

Goeie môre Rikus

Ek het geen idee met wie moet ek kontak maak nie, maar hoop dat jy my kan leiding gee.

Dit is ivm die voortbestaan van Mountain Breeze Karavaan Park.

Die dame wat nou die kontrak het, het vir die 9 permanente inwoners, op 1 Augustus 2020 kennis gegee dat haar kontrak op 28 Feb 2021 klaar maak en ons moet ons huise afbreek en die perseel ontruim.

Ek het verskeie kere by haar (mev Visser) probeer uitvind wat gaan gebeur, maar sonder sukses.

Daar is van ons wat al 22 jaar plus daar woon en geniet die Bos baie. My eie huis het ek al 18 jaar.

Ons wil baie graag weet of daar al 'n tender uit is en/of 'n tender reeds aan iemand toegestaan is.

Ek is ook bereid om die park op 'n tydelike verlengde kontrak te bestuur (miskien vir 5 jaar).

Almal van ons wat permanent daar woon is langtermyn inwoners en nie 'fly by night' mense nie, aangesien dit ons keuse is om daar te woon.

Ek hoor graan van jou.

Vriendelike groete
Domé Sonnekus

Annalene,

Aangehegte korrespondensie het betrekking.

Soos jy weet verval die huurkontrak van die Mountain Breeze karavaanpark einde Maart, en het die agenda item wat die pad vorentoe moet bepaal, nog nie by die Raad gedien nie, niesteenstaande verskeie versoeke in die verband.

Kan ons asb dringend hierdie versoek bespreek. Alternatiewelik kan ek dit byvoeg by die bestaande agenda item, siodat die Raad een keer oor die saak kan besin.

Ek verwys ook na die versoek van die huidige huurder, waarin sy aansoek doen om die huur te verleng, wat in November aan jou gestuur is.

Ek verneem graag dringend van jou.

Piet

Goeie môre mnr Smit

Ek rig hierdie skrywe na aanleiding van verskeie gespreke met u ivm Mountain Breeze Karavaanpark.

Ilzamarie van Dreyer Prokureurs was reeds by u gedurende Oktober 2020 en Riaan Badenhorst het ook telefonies met u kontak gemaak.

Vind asb aangeheg 'n voorlegging asook 'n voorlopige begroting om moontlik die park te bestuur op 'n maand tot maand basis, totdat Die Raad, geleentheid het om te besluit wat die pad vorentoe gaan wees.

Laat weet asb indien nog inligting nodig word

Vriendelike groete
 Domé Sonnekus

 ns. Die Permanente Inwoners van Mountain Breeze Karavaanpark

Wie dit mag aangaan

1. Onderwerp

Huur van afdelings 528A en 529CC: Mountain Breeze Woonwapark te Stellenbosch.

2. Agtergrond

2.1 Met die oorneem van die huidige Huur Ooreenkoms, deur Mnr en Mev Visser, op 1 April 1991, was die 9 permanente woonhuis reeds opgerig.

2.2 Die huise is opgerig in die vorige huur periode, Stellenbosch Woonwapark CC (Malan)

2.3 Soos u bewus is, eindig die kontrak met huidige huurder op die laaste dag van Maart 2021 en het (Mev J Visser) geen voorneme om die kontrak te verleng nie.

3. Doel van aansoek

3.1 Hiermee word aansoek gedoen om aan die Permanente Inwoners Bestuur, die geleentheid te gee om namens die 9 permanente inwoners van Mountain Breeze Woonwapark, die oord op n maand tot maand basis te bestuur, tot die Raad n besluit geneem het tov Mountain Breeze Woonwapark.

4. Rede

4.1 Dit is vir die permanente inwoners belangrik om n antwoord te kry tov hul verblyf in hul eie huise, aangesien die huidige kontrak houer dreig om die elektrisiteit te laat afskakel op die laaste dag van Maart 2021.

4.2 Indien die Permanente Inwoners Bestuur, toestemming van Die Raad kry, sal dit moontlik wees om huidige Eskom rekening oor te neem.

4.3 Die Permanente Inwoners Bestuur, bestaande uit permanente inwoners, onderneem om die Woonwapark oop te hou en om huidige personeel in diens te hou sover moontlik.

- 4.4 Dit is noodsaaklik dat die park instand gehou word en sodoende te verhoed dat negatiewe elemente die huidige toestand van oord benadeel.
- 4.5 n Mondelike onderneming vanaf woonwagklubs is gekry waarin hul bevestig het om die park weer in die toekoms te ondersteun.
- 4.6 Die Permanente Inwoners Bestuur het reeds n Bankrekening geopen waarin enige inkomste van 1 April 2021 wat vanuit Mountain Breeze Woonwagpark gegenereer, inbetaal sal word en dus die Bestuur instaat sal stel om die finansies van die park asook ander uitgawes te betaal.

5. Pleidooi

- 5.1 Die permanente inwoners voel sterk tot hul posisie hier by Mountain Breeze Woonwagpark aangesien van die inwoners al **langer as 33 jaar** hier woonagtig is.
- 5.2 Die permanente inwoners het ook finansiële uitgawes aangegaan om hul wonings aan te koop en gereeld instand te hou.
- 5.3 Die permanente inwoners dien alreeds as 'n sekuriteit vir die oord dmv n sekuriteits whatsapp groep wat gebruik word om enige insident onmiddelik aan mekaar te rapporteer.
- 5.4 Die permanente inwoners bestaan ook 'n verskeidenheid van persone, nl. Blankes, Kleurlinge, pensioenarisse, gestremdes asook baie jong kinders en baba's.
- 5.5 Van die inwoners het geen ander heenkome nie.

D

Goeiedag Piet,

Ek vra om verskoning dat ek nou eers reageer - my internet het probleme gegee - gedink ek was gehack!

Jy moet onthou hierdie park kom al baie jare aan (tagtige jare) en ons het meeste van die huisies "ge erf" en die verblyf het net aangegaan.Ek aanvaar dat die vorige eienaar die nodige toestemming destyds van die Munisipaliteit ontvang het dat n sekere persentasie (10% +) van die persele wel deur langtermyn kampeerders beset kan word.

My man het baie jare terug planne indien vir die een of twee wat bygekom het, maar ek vermoed dat Mnr D Malan destyds die planne sekerlik ook ingedien het.

Julle amptenare kom ook jaarliks by ons aan om die perseel na te gaan vir enige aanbouings ens.

Ek weet vir n feit dat die afgelope 12 jaar geen nuwe huisies oppgerig is nie.

Ons het altyd gese ons kwota is reeds vol, al wou baie persone daar kom bly!

Daar word 'n maandlikse "site levy" gehef ..soos vir kamperders, die huisies is die individuele persone se eiendom...dit is n redelike los ooreenkoms en daar was nie werklik ernstig klem geplaas op n huurkontrak nie.

My man het destyds - in 2008 , vir elkeen wat daar gewoon het, n Ooreenkoms opgetrek om te teken , maar die inwoners wou nie die ooreenkoms teken nie - behalwe een, howewel elkeen een ontvang het....en daarin is genoem dat die huurtermyn van die grond op 31 Maart 2021 tot n einde kom.

Daar het wel drie nuwe inwoners bygekom, na my man se dood (2009) wat n bestaande houtkonstruksie by die vorige inwoner(s)oorgeneem het (nie n niwe een gebou het nie) en met hulle is daar wel n Ooreenkoms opgetrek en die is geteken.

Ons ontvang geen dienste van die Munisipaliteit nie.

Ek betaal wel Eiendomsbelasting jaarliks, wat opbetaal is , asook Grondhuur, wat opbetaal is tot 31 Maart 2021.

Jy het self met die betrokke amptenaar by die Rekening afdeling die reëling getref dat ek slegs betaal tot 31 Maart 2021.

Niemand kon my tot dusver inlig wat werklik daarna gebeur nie.

Ek noem weereens - dit is n uiters moeilike situasie vir my, die huidige langtermyn inwoners, asook die personeel (sommige woon en werk al tussen 20-30 jaar daar) weens die onsekerhede wat tans heers.

Mountain Breeze Karavaanpark is steeds n besige "ongoing concern" en nie iets wat net in n oogwink toegemaak kan word nie. My gereelde kliente wil ook weet wat aangaan en wat die toekoms van die kamplek is.

Jul begrypende betokkenheid word waardeer.

Vriendelike groete,

Jeanine Visser

More Piet

1. Wie het toestemming gegee dat die huise in die karavaanpark opgerig kan word?
2. Is daar planning permission verkry?
3. Is daar huurkontrakte met die persone wat in die huise bly?
4. Kan ons ab die afskrifte van die ooreenkomste kry ingevolge waarvan die persone toegelaat is om die huise te bewoon?
5. Het die munisipaliteit toestemming gegee vir die onderverhuring gegee?
6. Betaal die karavaanpark vir dienste en is die rekening op datum insluitend huurrekening?

Die item moet weer voorgelê word aan Mayco so ek het die inligting dringend nodig asb.

Kind regards,

| 11.5.1 | NEW WASTE MATERIAL RECOVERY FACILITY |
|--------|--------------------------------------|

Collaborator No: 702616
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 24 March 2021

1. SUBJECT: NEW WASTE MATERIAL RECOVERY FACILITY

2. PURPOSE

To note that the construction of our new waste Material Recovery Facility (MRF) has now been completed.

3. DELEGATED AUTHORITY

Municipal Council, however the Mayor may request the Portfolio Committee to render assistance in terms of Section 80 of the Local Government Municipal Structures Act, Act 117 of 1998, as amended.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality has completed the construction of its new MRF. This facility will allow the municipality to expand on its waste minimization initiatives, divert waste away from landfill and maximize the landfill lifespan.

The facility also includes a public drop off which will allow residents to bring all waste to be disposed of. This will assist in combating illegal dumping giving residents a responsible option of disposing their waste.

5. RECOMMENDATIONS

- (a) that the completion of the Material Recovery Facility (MRF), be noted;
- (b) that a formal opening ceremony be arranged; and
- (c) that communication be sent to the public informing them of the Material Recovery Facility (MRF) and the public drop-off.

6. DISCUSSION / CONTENTS**6.1 Background**

Inadequate landfill airspace has become a huge problem throughout South Africa. Stellenbosch Municipality is not immune to this problem as the town's population increases adding to the demand of a basic waste removal service.

In amidst all of this, Stellenbosch Municipality operates one landfill which has over time filled up and has resulted in waste being transported to Vissershok in Cape Town for disposal. The Municipality is currently in the planning phase to develop the last remaining portion of land in Devon Valley for landfilling. This new cell will be able to provide the municipality anything from 5 to 30 years of landfill airspace depending on how the residents of Stellenbosch minimize their waste.

To this end, the municipality has started with a recycling pilot program almost 10 years ago which entailed a door-to-door collecting of recyclable waste in clear bags and taking it to a facility in Kraaifontein, Cape Town. This pilot then evolved with the creation of a mini-MRF off Adam Tas Road that was able to handle 100 ton/ month. The collection areas also over time increased but did not include all areas of the WC 024.

The Municipality has now constructed a new waste Material Recovery Facility to the value of R29 million. This facility will have the capacity to handle 450 tons/ month with equipment such as:

- A bag breaker;
- 30 metre sorting conveyor belt, which will allow for 36 sorters;
- 2x waste bailers; and
- Weighbridge.

With these capabilities the Municipality will be able to grow its waste minimization efforts and move from a pilot to formal recyclable program targeting all areas of the WC 024. This facility will make it easier to rollout initiatives such as swap shops and buy back centers.

The MRF will also include a public waste drop off which will provide a facility for residents to bring all waste, recyclables and unwanted goods. This will help in combating illegal dumping which has been plaguing the Municipality in recent months. Vehicles with the capacity of 1.3 tons and below will be able to dispose of their waste free of charge. This will also provide residents with a responsible disposal option.

6.2 Financial Implications

Operational budget needs to be adjusted to make provision for the operation of the MRF

6.3 Legal Implications

Complies with all legal requirements in terms of legislation

6.4 Staff Implications

Staff budget for waste awareness and education needs to be funded.

6.5 Previous / Relevant Council Resolutions

None

6.6 Risk implications

None

RECOMMENDATIONS FROM INFRASTRUCTURE SERVICES COMMITTEE MEETING TO THE EXECUTIVE MAYOR: 2021-03-04: ITEM 5.1.4

- (a) that the completion of the Material Recovery Facility (MRF), be noted;
- (b) that a formal opening ceremony be arranged for Thursday, 25 March 2021 at 10h00 on the premises of the Material Recovery Facility, Devon Valley; and
- (c) that communication be sent to the public informing them of the Material Recovery Facility (MRF) and the public drop-off.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2021-03-24: ITEM 7.5.1

- (a) that the completion of the Material Recovery Facility (MRF), be noted;
- (b) that a formal opening ceremony be arranged for Thursday, 25 March 2021 at 10h00 on the premises of the Material Recovery Facility, Devon Valley; and
- (c) that communication be sent to the public informing them of the Material Recovery Facility (MRF) and the public drop-off.

|---------|--|

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance and Compliance

24 March 2021

1. SUBJECT: ESTABLISHMENT OF THE MUNICIPAL HONOURS AND MEDALS ADVISORY PANEL

2. PURPOSE

To establish the Municipal Honours and Medals Advisory Panel in terms of clause 5 of the Stellenbosch Municipal Honours By-Law of 2002.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The Stellenbosch Municipal Council in 2002 promulgated The Municipal Honours By-Law (**Annexure A**) in terms of which Council can recognise and consider persons for exceptional achievements or for rendering of exceptional, meritorious service in the interest of the municipality. The By-law requires that a Municipal Honours Advisory Panel should advise Council on the conferral of Municipal Honours. The Municipality has recently received such an application; the candidate is over 90 years of age and is in frail health. However, due to the fact that no advisory panel is currently approved by Council, the administration is unable to process the application.

5. RECOMMENDATIONS

- (a) that Council establishes the Municipal Honours and Medals Advisory Panel;
- (b) that Council appoints five (5) Councillors, broadly representative of the Council, to serve on the Municipal Honours and Medals Advisory Panel; and
- (c) that Council appoints five (5) people, broadly representative of the people of Stellenbosch Municipality, to serve on the Municipal Honours and Medals Advisory Panel.

6. DISCUSSION / CONTENTS**6.1 Background**

The Stellenbosch Municipal Council in 2002 promulgated The Municipal Honours By-Law (**Annexure A**) in terms of which Council can recognise and consider persons for exceptional achievements or for rendering of exceptional, meritorious service in the interest of the municipality. The By-law requires the Executive Mayor to obtain advice on the referral, annulment or restoration of Municipal honours from an advisory panel. The advisory panel shall meet at the request of the Executive Mayor. Furthermore, the advisory panel will make recommendations to the Executive Mayor. It is imperative to note that the Executive Mayor is the patron of the municipal honours, and may, after approval of Council, confer municipal honours on any person, and make a posthumous conferral of a municipal honour.

6.2 Discussion

The Municipality has recently received an application for Council's consideration for bestowing of municipal honours. However, due to the fact that no advisory panel is currently approved by Council, the administration is unable to process the application.

6.3 Financial Implications

Budget must be made available for the manufacturing of medals and for the hosting of ceremonial events.

6.4 Legal Implications

The recommendations are in line with the provisions of the Stellenbosch Municipal Honours By-law, 2002.

6.5 Staff Implications

None

6.6 Previous / Relevant Council Resolutions

None

6.7 Risk Implications

This report has no risk implications for the Municipality.

6.8 Comments from Senior Management

None required

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2021-03-24: ITEM 7.10.1

- (a) that Council establishes the Municipal Honours and Medals Advisory Panel;
- (b) that Council appoints five (5) Councillors, broadly representative of the Council, to serve on the Municipal Honours and Medals Advisory Panel; and
- (c) that Council appoints five (5) people, broadly representative of the people of Stellenbosch Municipality, to serve on the Municipal Honours and Medals Advisory Panel.

ANNEXURE A

STELLENBOSCH MUNICIPAL HONOURS BY-LAW**BY-LAW**

To provide for Municipal honours, the conferral thereof, the amendment of conferral, of Municipal honours, and to provide for matters incidental thereto.

PREAMBLE

WHEREAS section 156(5) of the Constitution of the Republic of South Africa, Act No 108 of 1996, in general authorise a municipality to exercise any power concerning a matter reasonably necessary for, or incidental to, the effective performance of its functions;

WHEREAS section 186(9) and (10) of the Municipal Ordinance 1974 (No 20 of 1974), in particular, authorise a municipality to confer the freedom of the municipality on a person or to present a medal, memento, address or other commemorative token to persons;

WHEREAS section 156(2) of the Constitution of the Republic of South Africa authorise a municipality to make by-laws for the effective administration of the matters which it has the right to administer;

WHEREAS it is desirable to take into consideration and recognise persons for exceptional achievements or the rendering of exceptionally meritorious service in the interest of the municipality; and

WHEREAS this needs to be done in an orderly manner;

Be it, therefore, enacted by the Council of the Stellenbosch Municipality.

1. DEFINITIONS

1. "*The Council*" means the political structure of Stellenbosch Municipality in terms of section (4) of the Establishment Notice (P.N. 489/2000) as contemplated in section 18 of the Municipal Structures Act.
2. "*Stellenbosch Municipality*" means the municipality established in terms of section (4) of the Establishment Notice (P.N. 489/2000).
3. "*Municipal Manager*" means the person that is the head of administration and also accounting officer for the municipality, appointed in terms of section 82 of the Municipal Structures Act, Act 117 of 1998.
4. "*Councilor*" means a member of the Municipal Council of Stellenbosch Municipality.
5. "*Municipality*" for the purposes of section 7 means:
 - (a) the Municipality of Stellenbosch established by Provincial Notice 489 of 2000 dated 22 September 2000;
 - (b) any municipality established under the provision of the Local Government Transition Act, 1993;
 - (c) any municipality established under the provisions of the Municipal Ordinance, 1974 or any previous ordinance providing for the establishment of a municipality;
 - (d) any council or committee established under the provisions of the Black Local Authorities Act, 1982;
 - (e) any management committee established under the provisions of Provincial Ordinance No 6 of 1963.
6. "*Employee*" means an employee of Stellenbosch Municipality and shall for the purposes of section 6(8) include commencement service at one of the following established municipalities:

Stellenbosch Municipality
 Franschhoek Municipality
 Pniel Local Council
 Boland District Municipality
 Winelands District Council
 Western Cape Metropool Council
 Stellenbosch Divisional Council.

2. MUNICIPAL HONOURS

2. (1) There are the following Municipal honours for Stellenbosch Municipality:
 - (a) freedom of the Municipality or freedom of the town of Stellenbosch, Franschhoek or Pniel;
 - (b) honorary citizenship of the Municipality of Stellenbosch;
 - (c) illuminated address of the Municipality or illuminated address of the town of Stellenbosch, Franschhoek or Pniel;
 - (d) Aldermanship certificate;
 - (e) a Council's commendation certificate;
 - (f) a Mayor's commendation certificate; and
 - (g) certificate for long or outstanding service with the Council.
2. (2) There are the following medal for the Stellenbosch Municipality:
 - (a) the Simonsberg medal (gold) for exceptional achievement or for performing an act of bravery within the Municipal area of Stellenbosch;
2. (3) The Mayor is the patron of the Municipal honours as described in section (1) and (2).

3. CONFERRAL OF MUNICIPAL HONOURS

3. (1) The Mayor, after of approval of Council may confer municipal honours on any person and may make a posthumous conferral of a municipal honour.

4. ANNULMENT OF CONFERRAL OF MUNICIPAL HONOURS AND MEDALS

4. (1) The Mayor, after approval of Council may annul the conferral of a Municipal honour if the holder of the honour has performed any action or has behaved in a manner which harmed the interest of the Municipality of Stellenbosch, or otherwise has become unworthy of the Municipal honour concerned.
4. (2) The Mayor shall, in annulling the conferral of a Municipal honour in terms of subsection (1), do so in accordance with the advice of the panel referred to in section 5.

5. MUNICIPAL HONOURS ADVISORY PANEL

5. (1) The Mayor must obtain advise on the conferral, annulment or restoration of Municipal honours from an advisory panel, consisting of:
 - (a) a maximum of five (5) councillors, broadly representative of the council, appointed by council; and
 - (b) a maximum of five (5) people, highly respected by and who are broadly representative of the people of Stellenbosch Municipality, appointed by Council, if Council so wishes.
5. (2) The advisory panel shall meet at the request of the Mayor.

6. CRITERIA FOR THE BESTOWING OF MUNICIPAL HONOURS

6. (1) The freedom of the Municipality or the freedom of the town of Stellenbosch, Franschhoek or Pniel will be conferred:
 - (a) a non-resident person or organisation, when such a person or organisation is worthy of such an honour in the opinion of Council;
 - (b) if approved by Council by way of a broad consensus. The freedom of the Municipality or of a town shall not be conferred on an active politician.
6. (2) Honorary citizenship of the Municipality of Stellenbosch will be conferred:
 - (a) on a person of national and/or international stature residing in Stellenbosch Municipality for a period of at least 25 years, when such person is worthy of such an honour in the opinion of Council;
 - (b) on such a person if unanimously approved by Council at a Special Council Meeting. Alternatively when approved by Council by way of a broad consensus.
 - (c) Honorary citizenship will not be conferred on an active politician.
6. (3) An illuminated address of the municipality or an illuminated address of the town of Stellenbosch, Franschhoek or Pniel will be conferred:
 - (a) on a person when such person is worthy of such an honour in the opinion of Council;
 - (b) if approved by Council by a two-thirds majority vote;
6. (4) Aldermanship will be conferred on a serving Councillor of Stellenbosch Municipality:
 - (a) who has served on one or more municipalities within the Republic of South Africa for a total period of 20 years. Such terms of office need not be consecutive;

- (b) upon the assumption of the office of Mayor. This criterium does not apply to acting Mayors or acting chairperson of Council. Such title shall be removed if such Councillor does not serve the Council for a full term of office as Mayor;
- (c) who obtains the minimum of 20 points on the following scale:
 - (i) one point for each completed year served as a Councillor on any municipality; plus
 - (ii) one additional point for each completed year service as a member of the executive of any municipality or as chairperson of a standing committee or portfolio committee of such municipality; plus
 - (iii) one additional point for each completed year service as a deputy mayor of a municipality; plus
 - (iv) two additional points for each completed year served as a mayor or chairperson of any municipality; plus
 - (v) two additional points for each completed year served as a member of the executive committee or chairperson of a standing committee of the Stellenbosch Municipality subsequent to 5 December 2000; plus
 - (vi) three additional points for each completed year served as deputy mayor or speaker of the Stellenbosch Council.
- 6. (5) Any current serving Councillor who is of the view that he/she qualifies for Aldermanship, should notify the Municipal Manager in writing, together with the necessary details to the satisfaction of the Municipal Manager. The Municipal Manager shall make a recommendation to Council, after having considered all the relevant details. The Municipal Manager shall for the purpose of this by-law create an appropriate database of all current serving councillors of the Council of Stellenbosch as from 5 December 2000.
- 6. (6) The Council's recommendation certificate will be conferred;
 - (a) a resident of Stellenbosch Municipality when such person is worthy of such an honour in the opinion of Council;
 - (b) if approved by Council;
- 6. (7) The Mayor's recommendation certificate will be conferred on:
 - (a) a resident of Stellenbosch Municipality; and
 - (b) in the sole discretion of the Mayor.
- 6. (8) A certificate for long outstanding service with the Council will be conferred on an employee:
 - (a) who has served the municipality for a period of 25 years, on condition that such an employee has not been found guilty of misconduct for a period of 10 years prior to his/her 35th year of service.
- 6. (9) A medal will be conferred on a resident of Stellenbosch Municipality when:
 - (a) such person is worthy of such an honour in the opinion of Council; and
 - (b) if approved by Council by way of a broad consensus.

7. WARRANTS

The Mayor together with the other members of Council may, by special Council decision and after publication thereof in the Provincial Gazette, issue warrants for the better carrying out of the objects of this by-law and in particular, but without prejudice to the generality of the foregoing, relating to:

- (a) the keeping and administering of the Municipal honours referred to in section 1;
- (b) the keeping of a register of Municipal honours conferred;
- (c) the replacement of lost or stolen Municipal honours and the charges, therefor;
- (d) the publication of an annual Municipal honours list;
- (e) the wearing of Municipal medals;
- (f) benefits and privileges of Alderman;
- (g) rules regarding the annulment and restoration of provincial honours;
- (h) the issuing of accompanying certificates;
- (i) the lay-out/description of Municipal honours/medals; and
- (j) the protocol regarding the handing over of Municipal honours.

8. SHORT TITLE

This by-law is called the Stellenbosch Municipal Honours By-law and takes effect on date of publication thereof.

Meeting Date:

Good Governance and Compliance

31 March 2021

1. SUBJECT: MORATORIUM ON FILLING OF VACANCIES ON WARD COMMITTEES

2. PURPOSE

To submit to Council a report to consider placing a moratorium on the filling of vacancies on ward committees.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality has opted for a Mayoral Committee System coupled with a Ward Participatory System. In terms of Section 73(1) of the Local Government: Municipal Structures Act, 117 of 1998:

"If a metro or local council establishes ward committees, it must establish a ward committee for each ward in the municipality"

Section 73(2) determines that a ward committee consists of –

"(a) the councillor representing that ward in the council who is the chairperson of the committee; and

(b) not more than 10 other persons".

Ward committee members were elected during January and February 2017 in line with the Policy and Procedures for Ward Committees. Vacancies that occurred during the term of this Council were filled through a process of co-option¹ as stipulated in paragraph 14 of said Policy.

¹ (3) The intention to fill a vacancy through a process of co-option must be placed on the ward committee's agenda beforehand, and the agenda must be circulated to members at least seven days before the meeting.

(4) The geographical area representation of the member who vacated his/her position must be taken into account when filling a vacancy.

(5) A person co-opted as a ward committee member must comply with the criteria stipulated in clause 6 above

Table I below provides a layout of the current number of ward committee members as well as the number of vacancies per ward. The filling of vacancies were discussed at the All Ward Councillors Meeting held on 01 March 2021. During deliberations the ward councillors concur with the idea of putting a moratorium on the filling of vacancies until after the upcoming local elections in October 2021 (predicted date). A representative from the Provincial Department of Public Participation also attended the meeting virtually and suggested that, should Council resolve to place a moratorium on the filling of vacancies the said Department be informed accordingly.

5. RECOMMENDATIONS

- (a) that a moratorium be placed on the filling of vacancies on ward committees for the remainder of Council term of office;
- (b) that, where the number of ward committee members drop below five members, such ward committee be allowed to co-opt a new member/s in line with the Policy and Procedures for Ward Committees until they have 5 members; and
- (c) that the Administration be commissioned to inform the Provincial Government Department of Public Participation of this decision.

6. DISCUSSION / CONTENTS

6.1 Background

Section 73(1) of the Municipal Structures Act, 117 of 1998 stipulates that if a municipality opt to establish ward committees, establishment must be done for all wards within the municipality.

According to Section 73(2) a ward committee consists of –

- “(a) the councillor representing that ward in the council who is the chairperson of the committee; and*
- (b) not more than 10 other persons”.*

There are a number of vacancies on most of the wards as indicated in **Table 1** below:

Table 1: Current ward committee members and number of vacancies on wards

| Ward | Current members | Number of vacancies |
|------|-----------------|---------------------|
| 1 | 8 | 2 |
| 2 | 8 | 2 |
| 3 | 7 | 3 |
| 4 | 8 | 3 |
| 5 | 7 | 3 |
| 6 | 10 | 0 |
| 7 | 7 | 3 |
| 8 | 6 | 4 |
| 9 | 9 | 1 |
| 10 | 6 | 4 |
| 11 | 7 | 3 |
| 12 | 9 | 1 |
| 13 | 10 | 0 |
| 14 | 10 | 0 |
| 15 | 9 | 1 |
| 16 | 7 | 3 |
| 17 | 8 | 2 |

| | | |
|---------------------------|----|----|
| 18 | 9 | 1 |
| 19 | 7 | 3 |
| 20 | 8 | 2 |
| 21 | 8 | 2 |
| 22 | 10 | 0 |
| Total number of vacancies | | 43 |

These vacancies exist due to resignations and deaths of members due to Covid-19.

6.2 Financial Implications

Ward Committee members are paid a stipend for their work related to the ward committee.

6.3 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.4 Staff Implications

It does not affect the work of the ward administrator.

6.5 Risk Implications

Where a ward committee's membership falls below 50% of the membership it will not be able to operate and have meetings as they need a quorum for the meetings. This risk is addressed in the item.

Ward committees are made up with geographical representation and where representatives are not replaced the risks exist that the information may not reach those communities.

6.6 Comments from Senior Management

6.6.1 Chief Financial Officer

Agree with the recommendations

6.6.2 Municipal Manager

Agree with the recommendations

1. SUBJECT: PAYMENT OF WARD COMMITTEE MEMBERS FEBRUARY 2021**2. PURPOSE**

To submit to Council a report to consider payment to be made to ward committee members for February 2021 as per schedule of meetings.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The coronavirus pandemic, is still prevalent in most countries around the world including South Africa. Since the declaration of a disaster in terms of the Disaster Management Act, 2002, the country has been placed under various alert levels.

The country experienced a second wave of the virus during December 2020 and January 2021. Stellenbosch Municipality was also badly hit by this wave and this subsequently prompted Management and the Speaker to engage in discussions surrounding the safety at ward offices. Management sent out a communication to ward councilors on 7th January stating that the ward offices will be closed effective from 08 January 2021. The closing of ward offices was prompted amongst other as a result of protective screens for ward offices not being installed by then. Ward administrators had instructions however to be available and attend to ward councillor and ward committee business. (See e-mail/s attached as **APPENDIX 1**).

The ward offices were closed until 12 February 2021 and re-opened on 15 February 2021. A communication in this regard is attached as **APPENDIX 2**. The notice of re-opening of ward offices to the public clearly emphasized the Covid-19 protocols that must be observed at all times.

Not all wards convened meetings during the time that the ward office were closed. Wards 7 and 22 convened virtual meetings on 27 and 20 January 2021 respectively. Over the past 4 years only a few wards convened meetings during January while all wards convened meetings during February of each year. It is therefore recommended that Council consider waiving the Policy and Procedures for Ward Committees to enable the Administration to make payment for February 2021 to ward committee members of all ward committees' as they continued with their assistance to the ward councilors and the work in the wards. The payment is not only for attending meetings.

Table 1: Schedule of ward committee meetings and indication of ward committees that held no meetings during February 2021

| Ward | Meeting as per schedule 2021 | | Actual date of February meeting |
|------|------------------------------|----------|---------------------------------|
| | January | February | |
| 1 | - | 25 | 21 |
| 2 | - | 18 | 20 |
| 3 | - | - | No meeting |
| 4 | - | - | No meeting |
| 5 | - | - | No meeting |
| 6 | - | 3 | 3 |
| 7 | 27 | 10 | No meeting |

| | | | |
|----|----|----|------------|
| 8 | - | 3 | 3 |
| 9 | - | 2 | 2 |
| 10 | - | 2 | No meeting |
| 11 | - | 9 | 9 |
| 12 | 27 | 10 | 16 |
| 13 | - | 2 | No meeting |
| 14 | - | 17 | 17 |
| 15 | - | 23 | 25 |
| 16 | - | 9 | 22 |
| 17 | - | 3 | No meeting |
| 18 | - | 18 | No meeting |
| 19 | 28 | 2 | 2 |
| 20 | - | 11 | No meeting |
| 21 | - | 2 | 9 |
| 22 | 20 | 3 | 2 |

5. RECOMMENDATIONS

- (a) that the following stipulations in Clause 25 (2) of the Policy outlining the payment of ward committee members where meetings did not take place, be waived:

“(1) Members of ward committees will be reimbursed for out-of-pocket expenses as contemplated in clause 25(2)(a)(i) below.

- (2) *The Municipality will annually budget for the reimbursement of:*

- (a) *out-of-pocket expenses for members of ward committees in respect of their participation in ward committees subject to the following criteria as approved by the Council on 20 June 2012 and revised by the Council on 28 October 2015:*

- (i) *that 14 ward committee meetings which will comprise one ward committee meeting every month and one open public meeting every semester (every six months) be identified and approved by the ward committee as paid meetings and that each serving member present at these meetings be paid an out-of-pocket allowance of R350.00 per meeting (R350 x 14 = R4 900.00). Payment of out-of-pocket allowances will be made quarterly.*

... (iii) that reimbursements only be paid on verification of the attendance register of meetings attended and that reimbursements only be electronically transferred to the bank account of the relevant ward committee members ...”

- (b) that this waiving of Clause 25 be applicable for the month of February 2021 for wards where meetings did not take place;
- (c) that the Administration be commissioned to make payments of R350.00 for February 2021 to active ward committee members for all wards; and
- (d) that it be noted that ward committee members continued their work in assisting the ward councillor and attending to their other duties as ward committee members.

6. DISCUSSION / CONTENTS

Clause 25 of the Policy *inter alia* stipulates:

“(1) Members of ward committees will be reimbursed for out-of-pocket expenses as contemplated in clause 25(2)(a)(i) below.

(2) *The Municipality will annually budget for the reimbursement of:*

(a) *out-of-pocket expenses for members of ward committees in respect of their participation in ward committees subject to the following criteria as approved by the Council on 20 June 2012 and revised by the Council on 28 October 2015:*

(i) *that 14 ward committee meetings which will comprise one ward committee meeting every month and one open public meeting every semester (every six months) be identified and approved by the ward committee as paid meetings and that each serving member present at these meetings be paid an out-of-pocket allowance of R350.00 per meeting (R350 x 14 = R4 900.00). Payment of out-of-pocket allowances will be made quarterly.*

... (iii) that reimbursements only be paid on verification of the attendance register of meetings attended and that reimbursements only be electronically transferred to the bank account of the relevant ward committee members ..."

The above-mentioned stipulations necessitate that Council consider waiving these stipulations to enable the Administration to effect payment to ward committee members of all wards for the month of February 2021.

6.1 Background

Council approved the Policy and Procedures for Ward Committees at a Council meeting on 2019-04-24. This policy makes provision for Ward Committee members to be reimbursed for out-of-pocket expenses for attending ward committee meetings. Item 25(2) stipulates that payment be made on verification of attendance registers of meetings held.

The country has been on various levels of lockdown since the Declaration of a disaster in terms of the Disaster Management Act, 2002 to be effective from 27 March 2020 as a result of the global Covid-19 pandemic.

The country experienced a second wave of the virus during December 2020 and January 2021. Stellenbosch Municipality was also badly hit by this wave and this subsequently prompted Management and the Speaker to engage in discussions surrounding the safety at ward offices. The closing of ward offices was prompted among other as a result of protective screens for ward offices not being installed by then.

With the exception of two ward committees (Wards 7 & 22) no other wards convened meetings during January 2021. During February 2021 a total of 12 wards - of which 5 held virtual meetings - convened meetings during February 2021. The other wards did not meet due to the closure of ward offices.

6.2 Financial Implications

Budgetary provision has been made in the 2020/2021 Budget for the payment of ward committee members.

6.3 Legal Implications

The recommendations is supported as although the policy states that it is out for pocket expenses for attendance of meetings the reality is that the ward committee members assist the ward councillor with their work and also performs the functions required of them outside the meetings even when those meetings do not take place.

6.4 Staff Implications

The ward administrators were paid at all times during Covid lockdown.

6.5 Risk Implications

The waiving of the provisions in the policy is addressed in the item.

6.6 Comments from Senior Management**6.6.1 Chief Financial Officer**

Supports the recommendations

6.6.2 Municipal Manager

Supports the recommendations

Good day councillors and ward administrators

Here's wishing you a Blessed New Year.

Please refer to the correspondence below from Director: Corporate Services. It is urgent and the arrangement must be adhered to.

Should the ward councillor want the ward administrator to come to the office to assist with work, then please liaise with the ward administrator on WhatsApp in order for there to be a record of communication.

Please read the dub-joined email below very carefully.

Be safe and look after yourselves.

MASK; SANITIZE; PHYSICAL DISTANCING; STAY HOME

Dear all

After discussions with the Municipal Manager I would like to inform all herewith that all ward offices will be closed from tomorrow, 8 January 2021 until further notice. The ward administrators will be on standby to attend to administrative work required by the ward councilor or for the ward committee. When attending to this work at the office, the ward office will however be closed and no members of the public will be received at these offices. All enquiries from members of the public must please be made telephonically either to the ward councilor or ward administrator.

Not all the screens for ward offices has been delivered and it is therefore not safe to have ward administrators working there if the public come to the office. Ward administrators are again reminded to adhere to covid regulations in terms of sanitizing, wearing masks and keeping social distances. When all screens has being delivered and installed we will reassess the opening of the ward offices and keep everybody informed.

Subject: OPENING OF WARD OFFICES - 15 FEBRAUARY 2021
Importance: High

Good day ward administrators

I trust you are all healthy. Please read the notice below from Director de Beer, as well as additional notes:

NOTICE OF RE-OPENING OF WARD OFFICES TO PUBLIC:

We are pleased to announce that we have installed protective screens at all our ward offices now and can now safely re-open the offices to the public residing in the different wards. All ward administrators that have not yet returned to their offices must return to their offices from Monday 15 February 2021 to work from their offices again. Please note that the Covid protocols must be observed and we request all residents visiting the offices to ensure that you follow the protocol:

1. *No mask no entry*
2. *Please wear the mask over the nose and mouth at all time when in contact with ward administrator or ward councillor or any other employee.*
3. *No children allowed in the offices*
4. *Residents are requested to sanitise before and after you leave the office*
5. *Only one client will be allowed in an office at a time*
6. *Please practice safe a safe distance – 1.5 meters in any queue*
7. *Please talk to the ward administrators /ward Councillors through the protective screens and if not possible observe 1,5 distance and masks must be worn over mouth and nose by personnel and clients*
8. *Ward administrators must wash their hands/sanitise before and after every client that was assisted and if pens were used sanitise the pen after each client.*

We request everybody's assistance and co-operation to ensure safe environment for the staff, ward Councillors and the clients.

We thank all residents for their patience during the time we could not be fully operational.

*Annalene de Beer
 Director Corporate Services.*

Please note ward offices are operational again form Monday, 15 February 2021. All the COVID protocols are still in place and **MUST** be adhered to, including:

- a strict and complete record of all visitors to your respective offices that is kept on a daily basis and filed electronically.
- No mask, no entry.
- Sanitising before and after appointments, as well as sanitising when the visitor enters and leaves the office.

- Maintaining physical distancing at all times.
- Wear your mask / protective visor at all times. Masks MUST cover your nose and mouth.
- Handle documents with care. Remember to sanitise the document before handling and leave in a separate space overnight.
- Your daily temperature reading must be submitted to Mr Ceaser before 08h15 on work days.

Re: Motion

I hereby submit the following Motion to serve at the March 2021 Council meeting.

Motion : The amendment of the Rules of Order by-law.

Motivation/background

1. I refer Council current Rules of Order by- law as adopted by the majority DA Councilors on 24 July 2019.
2. I also refer to the objection by DCNA dated 23 April against this draconian bylaw.
3. DNCA also on 9 October 2019 send the Speaker an email informing her of the intention to submit this motion to Council to consider the amendment of the bylaw which were voted off at November 2019 Council meeting by the DA .
4. DNCA is of the opinion that many parts of this bylaw are unconstitutional and were designed by the influence of the administration to stifle debate and violates the rights of certain opposition members and small parties.

5. Recommendation:

That Council hereby agrees to

1. Review and or to amend the current Rules of Order Bylaw.
2. Establish a committee consists of the Speaker, Chief whip and all party whips off Council and support by an internal Senior Legal Advisor.
3. That the committee report back to Council at the May 2021 Council meeting.

Cell: 0739667316
Phelisa Sitshoti

OFFICE OF THE CHIEF WHIP

02 March 2021

NOTICE OF MOTION: Councillor Christine Moses

I herewith submit the following motion in terms of the rules of order.

MOTION:

Request for urgently Maintenance/Repairs on low cost houses in Cloeteville: Orlean Lounge and Steps Housing.

MOTIVATION:

People residing in the above mentioned low cost houses have up to now not receive transfer deed for their houses. Because of that this houses should be treated like any other municipal rental stock. The Municipal flats in Cloeteville as well as Lavanda, Aurora and Phylaria are maintained by Council.

It come to our attention that any breakages that occurs in the Steps and Orleans Lounge low cost houses, i.e. electrical problems, the council officials say they must get private electricians to do the repairs because they are the owners of the houses, in our view this is unfair because the properties have not been transferred on their names.

Recommendations:

- That all low cost houses in the greater Stellenbosch be maintained by council until such time that transfer take place.
- That council budget for maintenance of the houses in a dedicated vote that is transparent
- That an annual tender with a pool of service providers from local small businesses be approved to do the maintenance
- That a dedicated office/official be tasked to log maintenance complaints and deal with it
- That a quarterly report be submitted to council to inform council of the process of the above.

Councillor Christine Moses

Re: Question.

I hereby submit the following question to serve at the March 2021 Council meeting.

Motivation/background

1. I refer Council to the agenda of 23 October 2019 with regard to the Investigation of Unauthorized and Irregular Expenditure (Sect. 32 of Act 56 of 2003) in terms of Contract Syntell and TMT.
2. The resolution (b) that after the investigation Council be informed of the outcome.

Question:

What is the Case No to the Hawks and what is the status of the investigation and why did Council not receive any report yet?

I request the mayor to answer this in writing.

TO : SPEAKER
FROM : MUNICIPAL MANAGER
DATE : 25 MARCH 2021
**RE : REPLY TO QUESTIONS IN TERMS OF SECTION 35 OF THE
STANDING RULES AND ORDER FOR THE MEETINGS OF COUNCIL**

Dear Speaker

With reference to the question received from the DNCA, Councillor F Adams submitted in terms of Section 35 of the Standing Rules and Order for the meetings of council, received by my office.

QUESTION

- a) "What is the Case No to the Hawks and what is the status of the investigation and why did Council not receive any report yet?"

RESPONSE

This matter was reported to the Hawks. A preliminary meeting was held between the Department of Local Government, Stellenbosch Municipality and the Hawks to provide the Hawks with all the base information and background in order to initiate an investigation. The report of the service provider who did the preliminary investigation was also submitted to the Hawks.

To this end, this matter has still not been concluded and we are awaiting feedback from the investigators. We will provide further feedback as soon as it becomes available.

Kind regards,

Geraldine Mettler
Municipal Manager

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 31 March 2021

1. **SUBJECT: REPORT BY THE DISCIPLINARY COMMITTEE REGARDING INVESTIGATION INTO AN ALLEGATION OF MISCONDUCT BY COUNCILLOR MD OLIPHANT: NON-ATTENDANCE OF THREE OR MORE CONSECUTIVE MEETINGS**

2. **PURPOSE**

To consider the report submitted by the Municipal Disciplinary Committee in regard to the disciplinary hearing of Cllr MD Oliphant as per the resolution taken by Council on 28/10/2020 for non-attendance of three consecutive meetings of Council by a Councillor.

3. **DELEGATED AUTHORITY**

Municipal Council.

4. **EXECUTIVE SUMMARY**

The Office of the Speaker received a formal complaint from the Single Whip against Cllr MD Oliphant, for being absent for three consecutive Council Virtual Meetings. The Office of the Speaker was requested to assist with the investigation into this allegation. A report was tabled in Council on 28 October 2020. Council considered the report on 28 October 2020 where it was resolved that the Municipal Disciplinary Committee investigates the matter and reports back to Council.

The Disciplinary Committee hearing was set for 22 February 2021 and Councillor Oliphant was informed of the hearing and also informed of his right to have a representative present. A copy of the notice is attached as **APPENDIX A**. Neither Councillor MD Oliphant nor his representative attended the disciplinary hearing held on 22nd February 2021.

The Minutes of the Disciplinary Committee hearing is attached as **APPENDIX B**.

5. RECOMMENDATION

that the MEC be requested to remove Councillor MD Oliphant from office.

6. DISCUSSION / CONTENTS**6.1 Background**

The Systems Act as per Schedule 1 of the Code of Conduct for Councillors determines the mechanism of accountability in fulfilling the role of a Councillor. The same act also makes provision for rules and procedures should councillors not adhere to the rules. The Stellenbosch Municipality's Standing Rules and Order By-law (40.1) determines that all councillors must punctually attend each meeting of Council unless leave of absence has been granted. In connection with Leave of Absence from any Council or committee meeting, the By-law stipulates that an Application for Leave of Absence must be submitted to the single whip for approval by the speaker. The application must be in writing and signed by the member applying for leave.

Rule 40.1 of the bylaw reads: Should any member of the Council or a committee of Council fail to attend three consecutive meetings of the relevant body without leave of absence having been granted as contemplated in rule 21, item 4 of the Code of Conduct (Schedule 1 to the Systems Act) applies.

Cllr MD Oliphant has been in **breach** of the requirement pertaining to the non-attendance by committee members for his absence of three meetings of Council, alternatively in non-compliance with the requirement to submit a formal Application for Leave of Absence on the three occasions as indicated in the Attendance Registers attached.

Hence, an appropriate sanction is applicable, in line with the Municipal Systems Act as per Schedule 1 of the Code of Conduct for Councillors rule 4.2 Sanctions for non-attendance which read: 4.2 A councillor who is absent from three or more consecutive meetings of a municipal council, or from three or more consecutive meetings of a committee, which that councillor is required to attend in terms of item 3, must be **removed** from office as a Councillor.

6.2 Discussion

It **must** be noted that Councillor MD Oliphant has not attended any committee or Council meetings from July 2020 till 24 February 2021. He has therefore been absent for seven (7) consecutive council meetings.

6.3 Financial Implications

Council is still remunerating the councillor despite him not fulfilling his duties to attend meetings.

6.4 Legal Implications

Municipal Systems Act, 2000 – Schedule 1: Code of Conduct for Councillors Section 13 and Section 14:

“Duty of chairpersons of municipal councils

13.1 If the chairperson of a municipal council, on reasonable suspicion, is of the opinion that a provision of this Code has been breached, the chairperson must-

a. authorise an investigation of the facts and circumstances of the alleged breach;

- b. give the councillor a reasonable opportunity to reply in writing regarding the alleged breach; and*
- c. report the matter to a meeting of the municipal council after paragraphs (a) and (b) have been complied with.*

13.2 A report in terms of sub item (1) (c) is open to the public.

13.3 The chairperson must report the outcome of the investigation to the MEC for local government in the province concerned.

13.4 The chairperson must ensure that each councillor when taking office is given a copy of this Code and that a copy of the Code is available in every room or place where the council meets.

Breaches of Code

14.1 A municipal council may-

- a. investigate and make a finding on any alleged breach of a provision of this Code; or*
- b. establish a special committees-*
 - i. to investigate and make a finding on any alleged breach of this Code; and*
 - ii. to make appropriate recommendations to the council.*

14.2 If the council or a special committee finds that a Councillor has breached a provision of this Code, the council may-

- a. issue a formal warning to the councillor;*
- b. reprimand the councillor;*
- c. request the MEC for local government in the province to suspend the councillor for a period;*
- d. fine the councillor; and*
- e. request the MEC to remove the councillor from office.*

14.3 a. Any councillor who has been warned, reprimanded or fined in terms of paragraph (a), (b) or (d) of sub item (2) may within 14 days of having been notified of the decision of council appeal to the MEC for local government in writing, setting out the reasons on which the appeal is based.

- b. A copy of the appeal must be provided to the council.*
- c. The council may within 14 days of receipt of the appeal referred to in paragraph (b) make any representation pertaining to the appeal to the MEC for local government in writing.*
- d. The MEC for local government may, after having considered the appeal, confirm, set aside or vary the decision of the council and inform the councillor and the council of the outcome of the appeal.*

14.4 The MEC for local government may appoint a person or a committee to investigate any alleged breach of a provision of this Code and to make a recommendation on whether the Councillor should be suspended or removed from office.

14.5 The Commissions Act, 1947 (Act No.8 of 1947), may be applied to an investigation in terms of sub item (3).

14.6 If the MEC is of the opinion that the councillor has breached a provision of this Code, and that such contravention warrants a suspension or removal from office, the MEC may-

a. suspend the councillor for a period and on conditions determined by the MEC; or

b. remove the councillor from office.

14.7 Any investigation in terms of this item must be in accordance with the rules of natural justice.

6.5 Staff Implications

The councillor is a PR councillor and therefore no staff implications.

6.6 Previous Council Resolution:

38TH COUNCIL MEETING: 2020-10-28: ITEM 17.2

RESOLVED (majority vote with abstentions)

- (a) that Council notes the absence without substantiated evidence of Cllr MD Oliphant from the respective three Council meetings dated Wednesday, 29 July 2020, Monday 24th August 2020 and Friday 11th September 2020;
- (b) that Council notes that the Councillor was requested to provide input by the Speaker's Office; and
- (c) that the matter be referred to the Disciplinary Committee for finalization of the process.

6.7 Risk Implications

The risks are addressed in the item.

6.8 Comments from Senior Management:

Not requested.

NOTICE OF DISCIPLINARY MEETING

TO: Councillor Mzolisi Oliphant
N22 6th Avenue
Kayamandi
7600

16 February 2021

Dear Sir

NOTICE OF MEETING: INVESTIGATION INTO ALLEGED BREACH OF THE CODE OF CONDUCT FOR COUNCILLORS

You are hereby given notice in terms of item 14 of the Code of Conduct for Councillors [Schedule 1 of the Municipal Systems Act 32 of 2000 – "the Code"] to attend a disciplinary hearing to answer to an alleged breach of the Code.

The alleged breach is contained in the attached charge sheet and it relates to your absenteeism at consecutive Council meetings in breach of the Code.

The hearing meeting will be held at the **Mayoral Boardroom, 2nd Floor, Main Building, Stellenbosch** on **Monday, 22nd February, 2021 at 10H00.**

You have the following rights:

- To be informed of the charges against you;
- To be present at the hearing.
- To be represented by a representative, of your choice at your own cost.
- To request additional information; from the disciplinary committee, that you may require to prepare for the hearing;
- To cross-examine the witnesses of the Council;
- To present your case and call witnesses to testify on your behalf. It is your responsibility to ensure that your witnesses are present at the disciplinary hearing.
- To present evidence in mitigation should you be found guilty of the charge(s)
- To be notified in writing of the decision and of the sanction/penalty imposed as well as the reasons therefor (if applicable); and

- To appeal to the MEC for Local Government against the imposition by the Council of a sanction of a warning, reprimand or fine, within 14 days of the notification of the decision of the Council (see item 14(3) of the code).

Please further note the following:

1. If you do not attend and cannot give reasonable grounds for failing to attend, the meeting will be held in your absence.
2. The charge sheet may be amended before the start of the hearing and should this take place, you will be informed accordingly in writing;

The attached documentation will serve as evidence before the disciplinary committee.

Yours faithfully

SPEAKER

Stellenbosch Municipality

W.C. Petersen

ACKNOWLEDGEMENT OF RECEIPT

I, **Mzolis Oliphant**, acknowledge receipt of this notice on (Date) 16/02/2021

| | NOTICE. | |

CHARGE SHEET

CHARGE 1.

It is alleged that you have transgressed item 3 of Schedule 1 (Code of conduct for Councillors) of the Local Government Act; Municipal Systems act 32 Of 2000 which reads as follows:

A Councillor must attend each meeting of the municipal council and of a committee of which the councillor is a member except when - :

- a) Leave of absence is granted in terms of an applicable law as determined by the rules of order of the council; or
- b) That councillor is required in terms of this Code to withdraw from the meeting.

The Stellenbosch Municipality: Standing Rules and Order for the Meetings of the Council and its Committees Bylaw published on 2 August 2019 determines that in rule 21:

21.1 All councillors must punctually attend and remain in attendance for the full duration of each meeting of Council or one of its committees, unless leave of absence has been granted or a matter serves before the meeting in which a councillor or committee member or their spouse, partner or business associate or close family member has any direct or indirect personal or private business interest and such councillor or committee member is required to withdraw under item 3(b) of the Code of Conduct.

21.2 Applications for leave of absence from any Council or committee meeting must be submitted to the single whip for approval by the speaker or the relevant chair. The application must be in writing and signed by the member applying for leave.

21.3 For any meeting other than an urgent special meeting, all applications for leave must be submitted at least 12 hours before the starting time of the meeting. In case of an urgent special meeting, the single whip must receive the application an hour before the meeting. In the case of extenuating circumstances, an application must be submitted as soon as is reasonably possible.

21.4 The speaker or chair may grant leave at their sole discretion, and the speaker or chair is at liberty to reject an application for leave of absence; except when such request is accompanied by a medical certificate prescribing a member's being absent. A medical certificate that is not attached to a request for absence must be submitted within three (3) working days after the meeting and must be dated at least on the date of the meeting.

It is alleged that you have been absent from consecutive Council meetings as is evident from the minutes of the meetings dated **Wednesday, 29 July 2020; Monday, 26th August 2020 and Friday, 11th September 2020**; without any leave of absence applied for or granted for any of the mentioned meetings.

Copies of the **minutes** is attached for ease of reference.

Item 4 of Schedule 1 ("the Code") provides as follows:

- (1) A municipal Council may impose a fine as determined by the Standard Rules of Order of the municipal Council on a Councillor for:
 - (a) Not attending a meeting which that Councillor is required to attend in terms of item 3; or
 - (b) Failing to remain in attendance of such meeting.
- (2) A Councillor who is absent for three or more consecutive meetings of a council, or from three or more consecutive meetings of a committee, which the Councillor is required to attend in terms of item 3, **must be removed from office as a Councillor.**

The Stellenbosch Municipality: Standing Rules and Order for the Meetings of the Council and its Committees Bylaw published on 2 August 2019 determines that in rule 40:

"40.1 Should any member of the Council or a committee of Council fail to attend three or more consecutive meetings of the relevant body without leave of absence? having been granted as contemplated in rule 21 above, item 4 of the Code of Conduct (Schedule 1 to the Systems Act) applies.

40.2 Members of Council or a committee who fail to attend a meeting of the relevant body without leave of absence having been granted as contemplated in rule 21 above may incur a fine of 10% of their monthly salary.

40.3 A committee consisting of the speaker, the single whip and two other party whips chosen on a rotational basis must investigate before a fine is imposed under rule 40.2, and report to Council on the transgression contemplated by rule 40.2 read with rule 21."

You are herewith given notice to present yourself to the Disciplinary committee with or without a representative to provide reasons why Council should not act in terms of Item 4(1) of the Code of Conduct for Councillors read with rule 40.1 and remove you from office as a councillor for transgressing item 3 of the Code of Conduct for Councillors read with rule 21 of the Stellenbosch Municipality's Rules of Order.

Signed at STELLENBOSCH on this¹⁶..... day of FEBRUARY 2021.

WC Petersen.

 Meeting Date: **22 February 2021**

1. SUBJECT: INVESTIGATION INTO AN ALLEGATION OF MISCONDUCT BY COUNCILLOR MD OLIPHANT RE NON-ATTENDANCE OF THREE OR MORE CONSECUTIVE MEETINGS.

2. PURPOSE

To provide the Chairperson of the Disciplinary Committee and the Disciplinary Committee with the information in regard to the disciplinary hearing of Cllr MD Oliphant as per the resolution taken by council on 28/10/2020 for non-attendance of three consecutive meetings of Council by a Councillor.

To investigate the alleged allegation of misconduct against Councillor MD Oliphant, and to report back to Council.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

The Office of the Speaker received a formal complaint from the Single Whip against Cllr MD Oliphant, for being absent for three consecutive Council meetings. The Office of the Speaker was requested to assist with the investigation into this allegation.

5. RECOMMENDATIONS

(a) that the Disciplinary Committee makes a factual finding on the evidence presented at the hearing; and

(b) that the Disciplinary Committee makes a recommendation to Council.

6. DISCUSSION / CONTENTS

6.1 Background

The Systems Act as per Schedule 1 of the Code of Conduct for Councillors determines the mechanism of accountability in fulfilling the role of a Councillor. The same act also makes provision for rules and procedures should councillors not adhere to the rules. The Stellenbosch Municipality's Standing Rules and Order By-law (40.1) determines that all councillors must punctually attend each meeting of Council unless leave of absence has been granted. In connection with Leave of Absence from any Council or committee meeting, the By-law stipulates that an Application for Leave of Absence must be submitted to the single whip for approval by the speaker. The application must be in writing and signed by the member applying for leave.

Rule 40.1 of the bylaw reads: Should any member of the Council or a committee of Council fail to attend three consecutive meetings of the relevant body without leave of absence having been granted as contemplated in rule 21, item 4 of the Code of Conduct (Schedule 1 to the Systems Act) applies.

Cllr MD Oliphant has been in **breach** of the requirement pertaining to the non-attendance by committee members for his absence of three meetings of Council, alternatively in non-compliance with the requirement to submit a formal Application for Leave of Absence on the three occasions as indicated in the Attendance Registers attached.

Hence, an appropriate sanction is applicable, in line with the Municipal Systems Act as per Schedule 1 of the Code of Conduct for Councillors rule 4.2 Sanctions for non-attendance which read: 4.2 A councillor who is absent from three or more consecutive meetings of a municipal council, or from three or more consecutive meetings of a committee, which that councillor is required to attend in terms of item 3, must be **removed** from office as a councillor.

6.2 Discussion

All documentation is attached.

6.3 Financial Implications

None

6.4 Legal Implications

Municipal Systems Act, 2000 – Schedule 1: Code of Conduct for Councillors Section 13 and Section 14:

“Duty of chairpersons of municipal councils

13.1 If the chairperson of a municipal council, on reasonable suspicion, is of the opinion that a provision of this Code has been breached, the chairperson must-

- a. authorise an investigation of the facts and circumstances of the alleged breach;*
- b. give the councillor a reasonable opportunity to reply in writing regarding the alleged breach; and*
- c. report the matter to a meeting of the municipal council after paragraphs (a) and (b) have been complied with.*

13.2 A report in terms of subitem (1)(c) is open to the public.

13.3 The chairperson must report the outcome of the investigation to the MEC for local government in the province concerned.

13.4 The chairperson must ensure that each councillor when taking office is given a copy of this Code and that a copy of the Code is available in every room or place where the council meets.

Breaches of Code

14.1 A municipal council may-

- a. *investigate and make a finding on any alleged breach of a provision of this Code; or*
- b. *establish a special committees-*
 - i. *to investigate and make a finding on any alleged breach of this Code; and*
 - ii. *to make appropriate recommendations to the council.*

14.2 *If the council or a special committee finds that a councillor has breached a provision of this Code, the council may-*

- a. *issue a formal warning to the councillor;*
- b. *reprimand the councillor;*
- c. *request the MEC for local government in the province to suspend the councillor for a period;*
- d. *fine the councillor; and*
- e. *request the MEC to remove the councillor from office.*

14.3 a. *Any councillor who has been warned, reprimanded or fined in terms of paragraph (a), (b) or (d) of subitem (2) may within 14 days of having been notified of the decision of council appeal to the MEC for local government in writing, setting out the reasons on which the appeal is based.*

- b. *A copy of the appeal must be provided to the council.*
- c. *The council may within 14 days of receipt of the appeal referred to in paragraph (b) make any representation pertaining to the appeal to the MEC for local government in writing.*
- d. *The MEC for local government may, after having considered the appeal, confirm, set aside or vary the decision of the council and inform the councillor and the council of the outcome of the appeal.*

14.4 *The MEC for local government may appoint a person or a committee to investigate any alleged breach of a provision of this Code and to make a recommendation on whether the councillor should be suspended or removed from office.*

14.5 *The Commissions Act, 1947 (Act No.8 of 1947), may be applied to an investigation in terms of subitem (3).*

14.6 *If the MEC is of the opinion that the councillor has breached a provision of this Code, and that such contravention warrants a suspension or removal from office, the MEC may-*

- a. *suspend the councillor for a period and on conditions determined by the MEC; or*
- b. *remove the councillor from office.*

14.7 *Any investigation in terms of this item must be in accordance with the rules of natural justice.*

- Appendix H: Extract of the Code of Conduct for Councillors

DISCIPLINARY COMMITTEE MEETING: 2021-02-22: ITEM 5.1**Summary of proceedings:**

The Chairperson provided the following synopsis of the legal imperatives and the legislative framework that apply to the matter at hand, namely that:

- The Systems Act -- as per Schedule 1 of the Code of Conduct for Councillors -- determines the mechanism of accountability in fulfilling the role of a Councillor. The same Act also makes provision for rules and procedures should councillors not adhere to the rules.
- The Stellenbosch Municipality's Standing Rules and Order By-law (Rule 40.1) determines that all councillors must punctually attend each meeting of Council unless leave of absence has been granted. In connection with Leave of Absence from any Council- or committee meeting, the By-law stipulates that an Application for Leave of Absence must be submitted to the single whip for approval by the speaker. The application must be in writing and signed by the member applying for leave. Rule 40.1 of the By-law reads: *"Should any member of the Council or a committee of Council fail to attend three consecutive meetings of the relevant body without leave of absence having been granted as contemplated in rule 21, item 4 of the Code of Conduct (Schedule 1 to the Systems Act) applies."*

The following pertinent information relating to the allegation of misconduct was then restated by the Chairperson, i.e.

- that Cllr MD Oliphant has been in breach of the Code on account of his absence from three consecutive meetings of Council, alternatively in non-compliance with the requirement to submit a formal Application for Leave of Absence on the three occasions as indicated in the Attendance Registers.

In terms of applicable sanctions for non-attendance of meetings, the Chairperson quoted as follows from the Systems Act, Schedule 1: Code of Conduct for Councillors, paragraph 4.2:

"A Councillor who is absent from three or more consecutive meetings of a municipal council, or from three or more consecutive meetings of a committee, which that councillor is required to attend in terms of item 3, must be removed from office as a councillor."

The Chairperson reiterated the importance that a disciplinary procedure must adhere to the principles of natural justice, key to which are the following:

1. The Speaker of the Municipal Council must authorize an investigation into the alleged breach of the Code of Conduct
2. If the investigation reveals *prima facie* evidence of a breach of the provisions of the Code of Conduct, the Municipal Council or a special Committee must investigate and make a finding on the alleged breach of the Code. The Disciplinary Committee must make a finding and submit such finding to the Municipal Council.

With reference to adherence to the procedural steps as outlined in item 14 of Schedule 1 of the Systems Act, the Chairperson drew the Committee's attention to the salient appendices marked A-H, as substantiation that all requisite steps were scrupulously adhered to, and that the Disciplinary Committee is forthwith required to make appropriate recommendations to Council, based on its findings.

The committee members individually confirmed that, in their respective view, the set of documents are comprehensive, and that the investigation was thorough and free of any irregularities. Councillor Groenewald observed that receipt of the documents addressed to the accused, Cllr MD Oliphant, was however signed for by one Z Oliphant. The Committee was at ease that the documents were hand-delivered to Cllr MD Oliphant's physical address, and that it is likely that a family member (Z Oliphant) signed the acknowledgement of receipt.

The Committee agreed that it is in its full right to deal with the allegation of breach of the Code of Conduct by Cllr MD Oliphant. Cognizance was taken of the stipulation that no new evidence or any other matter outside of the charge sheet, may be brought by the accused.

In continuing the hearing, the Chairperson requested that Cllr MD Oliphant, and/or his representative, be called into chambers to present his case. It transpired that neither Cllr MD Oliphant nor his representative had arrived for the scheduled hearing. As provided for in the Systems Act, the Committee proceeded to finalize the matter in the absence of the accused.

The Chairperson referred to paragraphs 13.1.b and c of the Code of Conduct to confirm that the accused has been given reasonable opportunity to reply both in writing and in person regarding the breach, and that the matter can now be finalized and reported to Council.

The Disciplinary Committee has considered all the evidence produced, and found the evidence adequate to allow for a finding and recommendation to Council.

Factual Finding:

Based on all the evidence submitted to the Disciplinary Committee and disciplinary processes followed as per the regulations provided, the Disciplinary Committee unanimously find Cllr Mzolisi Oliphant guilty of misconduct as per the rules of order of Council and as per the Code of Conduct for Councillors. As per the Municipal Systems Act No. 32 of 2000, Schedule 1 page 150, the Disciplinary Committee unanimously decided as follows: *"A councillor who is absent from three or more consecutive meetings of a municipal council, or from three or more consecutive meetings of a committee, which that councillor is required to attend in terms of item 3, must be removed from office as a councillor"*.

Recommendation:

The Disciplinary Committee therefore recommends to Council that Cllr Mzolisi Oliphant be removed from office as a Councillor as per Schedule 1 subsection 4 of the Municipal Systems Act nr 32 of 2000. (page 149).

RESOLVED

to recommend to Council:

that the MEC be requested to remove Councillor MD Oliphant from office.
