CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:-

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

13. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.

1. INTRODUCTION

Liquid aluminium sulphate is used for the removal of humic and other dissolved and suspended materials in the raw water at the Stellenbosch Municipality's Paradyskloof WTW. This tender caters for the supply of liquid aluminium sulphate for the treatment of water at this site. It must be clearly understood that the tendered prices must include the cost of all arrangements necessary for the actual delivery of the goods to the relevant site, including the cost of transportation, if applicable.

Humic removal is an important element of the water treatment process, ensuring that water leaving the treatment works is safe and its purity meets the needs of the consumers and complies with legislated standards.

2. SAMPLING AND ANALYSIS

In cases of dispute, sampling and analysis shall be in accordance with the Stellenbosch Municipality's practices.

3. DELIVERY CONSTRAINTS

Suppliers are to familiarize themselves with the Paradyskloof WTW and access to the plant in order that satisfactory delivery by road tankers can be confirmed. Confirmation of this must be noted in the tender covering letter.

- 3.1 Prior to filling any bulk tank or tanker with Aluminium Sulphate liquid destined for the Paradyskloof WTW a Cleanliness Certificate for the tank or tanker and piping, pumps and valves used must be issued, signed off and filed for audit purposes, so as to eliminate the risk of contamination of the Aluminium Sulphate liquid.
- 3.2 After filling of the tanker is complete and before the tanker leaves the manufacturing plant, the inlet hatch and the outlet caps on the tanker are to be sealed. The seals are only to be broken once the tanker is ready for off-loading and there is an appointed Council official in attendance to witness the breaking of the seals.
- 3.3 Delivery tankers are to have drip and leak free self-powered transfer pumps
- 3.4 Delivery tankers are to be equipped with "Dry-break" couplings to match the couplings at the treatment plant. No spillage at the transfer points will be tolerated.

- 3.5 Tankers used for delivering liquid aluminium sulphate should preferably be dedicated to the supply of aluminium sulphate to prevent contamination. If a non-dedicated tanker is used, then a Cleanliness Certificate must be provided with each delivery of aluminium sulphate, certifying the fact that the tanker has been inspected after it has been thoroughly cleaned to remove any trace of the previous contents.
- 3.6 Provision for week-end deliveries should be made but would only be utilized in the case of operational emergencies.
- 3.7. While delivering and transferring the aluminium sulphate, the supplier and his transport sub-contractor are to comply with the appropriate safety regulations, which will be rigorously enforced at the treatment plant.
- 3.8. Under normal routine operation, the supplier must be able to make deliveries to the respective plant within 5 days after receipt of an order. In the case of emergencies, which will be rare, the supplier must be able to make emergency deliveries (1 tanker load) within 1 day of receipt of request/order.
- 3.9. Water demand in the Stellenbosch Municipality area varies significantly with the seasons and therefore so does the requirement for aluminium sulphate.

4. QUALITY

The liquid aluminium sulphate must be suitable for use in drinking water treatment and meet the requirements of the Stellenbosch Municipality specification as well as SABS 1241 – 2002 Standard Specification for Aluminium Sulphate: Grade 1 (no iron content).

- 4.1 In the event of contaminated or sub-specification product being delivered to the plant, the supplier will bear the cost of removing the liquid aluminium sulphate from Council property and disposing of the solution. Verifiable documented evidence of the legally compliant and environmentally safe disposal of the nonconforming product must be submitted to the Treatment Plant Superintendent. All consequential costs as a result of the off-loading of the contaminated product will also be for the supplier's account.
- 4.2 In the event of contaminated or sub-specification product being delivered the treatment plant the supplier will also bear the cost of flushing, cleaning, repairing, replacing (at the Stellenbosch Municipality's discretion) and re-commissioning all pipelines, pumps and equipment, flow and mass measuring systems and/or other valves and appurtenances.
- 4.3 The liquid aluminium sulphate provided shall conform to as well as SABS 1241 – 2002 Standard Specification for Aluminium Sulphate: Grade 1 (no iron content).

Furthermore, the liquid aluminium sulphate must also comply with the following:

- | | |
|-------------------------|--|
| 4.3.1 Concentration: | 7.00% to 7.30% as Al_2O_3 (m/m). |
| 4.3.2 Iron content: | 0.07 m/m maximum as Fe |
| 4.3.3 Density: | 1.27 – 1.30 g/cm |
| 4.3.4 Viscosity: | 50-100 Centipoise |
| 4.3.5 Insoluble matter: | 0.10% m/m |
| 4.3.6 pH: | 2.4-2.8 |
| 4.3.7 Vapour pressure: | < 15.7 kPa |

- 4.4 The liquid aluminium sulphate shall not contain any toxic or other substance that could taint, contaminate or detrimentally alter in any way the water treated at the plants. The presence of detectable taste and/or odour inducing contaminants in the liquid aluminium sulphate supplied may result in the Council refusing to accept further shipments until such problems are rectified and that the purging of the on-site installation/s be effected at the successful supplier's own cost.
- 4.5. A Certificate of Analysis must accompany each and every tanker load delivered. (Not to be confused with a Certificate of Conformance).
- 4.6 The successful Tenderer shall give timeous advice to the Superintendent Water Treatment of any expected variations in the quality of his product.

5 FACILITIES

The Water Treatment Section must be able to inspect and audit the supplier's Manufacturing, Batching and Storage facilities, as well as the Transporter's facilities. Details of the Record keeping, Quality Control, Safety, Health, Risk and Environmental Protection Controls are needed. Documentation and proof will be required.

6 COMPLIANCE

To ensure that international standards are maintained, the Stellenbosch Municipality together with its suppliers must, amongst other things, concentrate on the following points:

- quality assurance must be closely monitored
 - inspection and testing must be carried out on all raw materials, work-in-progress and at final completion
 - quality records must be maintained for reference by any credible external body
 - standards for packaging, storage and handling of products to be maintained
 - products to be identifiable and traceable
 - controlling and disposing of non-conformed products to be defined
 - settling of disputes and claims arising from non-conforming products received and supplied to be defined
 - authorisation of product released to be clear
 - letters of compliance to be submitted with products when requested or when necessary
 - Pre-arranged site surveys of suppliers premises to be conducted at regular intervals.
- Tenderers are to carefully consider the above points, many of which may already be strictly adhere to and others may need your attention. Kindly comment in this regard in the covering letter. If the tenderer is already ISO 9001 certified, these points will obviously be part of your system. Indicate under the Pricing Schedule, whether or not you are ISO 9001 certified.

7 SAFETY

- 7.1 Offloading personnel should always wear appropriate PPE prescribed by the MSDS for the specific chemicals.
- 7.2 While delivering the liquid aluminium sulphate, the tenderer and his transport sub-contractor are to comply with the appropriate safety regulations, which will be rigorously enforced at the treatment plant.
- 7.3 The tenderer must describe, in the covering letter, the resources available to him to support himself, the Council and the local community in the event of spillage from the delivery vehicle's load, *en route* to, or at the treatment plants. (eg. Emergency HAZCHEM response)

- 7.4 The tenderer is required to provide appropriate safety notices, describing the agreed safe procedure to be adopted at the off-loading points as well as HAZCHEM safety information.
- 7.5 An emergency service dedicated to serve the Stellenbosch Municipal area, must be available at all times. This emergency service should incorporate a fully trained team with equipment designed to effectively deal with potential aluminium sulphate emergency situations at any of the Council's installations and which should be available at all times. The cost of such a service must be included in the price of the product.
- 7.6 A Safety Plan covering the Transport, Handling, Emergency Procedures, Security of Supply Contingency Measures, Safe Disposal of non-compliant product and other relevant information such as officials' names and contact numbers must be provided to the Council for acceptance within one month of the commencement of the tender. Once accepted, copies of the Safety Plan must be supplied to the Paradyskloof WTW.
- 7.7 The tender sample will be used throughout the tender period as the reference quality standard for the quality and manufacturing source of the liquid aluminium sulphate. Any deviation from the reference quality standard will not be allowed without written approval from the Stellenbosch Municipality. For the sake of clarity, this means that if the tenderer is not the manufacturer, the tenderer is not at liberty to change manufacturers or sources of the liquid aluminium sulphate during the contract period.
- 7.8 A 6-monthly safety audit/ assessment must be carried out at each site where your product is used to ensure safety compliance.
- 7.9 Material Safety Data Sheets (MSDS) must be provided prior to delivery to the site.
