CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids[1] invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).[2] Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

   a. take all reasonable steps to prevent such abuse;
   b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
   c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:-

[1] Includes price quotations, advertised competitive bids, limited bids and proposals.
[2] Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

PART C: TECHNICAL SPECIFICATIONS AND PRICING SCHEDULE

The following minimum specifications are applicable and must be complied with.

NB:	Service providers are required to read and study the specification, its general condition of contract, as well as the instructions to them very carefully before submitting their offers.

All tenders received will be evaluated in terms of the Municipal Supply Chain Management Regulations, PPPFA, the Stellenbosch Municipality Supply Chain Management Policy and relevant specifications.

Appointment of a service provider to implement the swop shop recycling service in low income areas within the Stellenbosch Municipal area.

1. **Background:**

The National Waste Management Strategy (2020) sets targets for separation of waste at source (S@S), which enables the diversion of recyclables from landfill for recycling, recovery and re-use. The National Environmental Management: Waste Act of 2008 (as amended), the associated Extended Producer Responsibility Regulations and the Stellenbosch Municipality Integrated Waste Management By-Law, all promote the need to prioritize waste minimization, which includes separation at source (S@S) programs like composting and recycling.

Besides the strategic legislative framework, Stellenbosch Municipality's landfill site has reached its capacity.

Initiatives in place whereby waste is diverted from the landfill, are:

Garden Waste being chipped;

Builder's Rubble being screened and crushed;

Kerbside Recycling Collection service being rendered.

However, it was found that implementing traditional kerbside recycling collection services in low income areas has not been successful in the past, as these residents did not donate their recyclables. These residents often prefer to receive an incentive such as money or goods in exchange for their recyclables.

At present, most of the low income S@S initiatives, usually in the form of buy back centres (BBC's) that purchase recyclables for cash, are spearheaded and carried out by the private sector. Many of these are limited mainly to the industrial areas due to the zoning restrictions and nuisance risks associated with sorting and stockpiling recyclables at fixed premises. The placement of these buy back centres in industrial areas is often too far away for the general public (especially in a low income context) to access for selling their own recyclables.

By means of this advertised swop shop service, the Stellenbosch Municipality, as part of its S@S expansion plan, wishes to progressively provide this service to as many low incomes areas as possible.

The swop shop will be a mobile point where the community voluntarily hands in recyclables in return for some form of a reward (vouchers) linked to the needs of that community/target group.

2. **Scope of work:**

1. The service provider (SP) is expected to launch and operate a mobile swop shop in low income areas identified during consultation with Stellenbosch Municipality (SM).

2. This service calls for the SP to implement the mobile swop shop methodology, as per these specifications, in areas listed below, but also to add additional areas, as a minimum weekly service to each area:
   Klapmuts
   Enkanini
   All other additional areas identified within the Stellenbosch Municipal Area (WC024)

3. Service to be rendered in line with the following:
   (a) **Period:** Estimated period of 12 months from commencement date
   (b) **Frequency of service:** A minimum of once a month in identified areas
   (c) **The SP to provide:**
      1. Own licenced vehicle with a tow bar, if making use if the option to use SM's Swop Shop Trailer; ***or***
      2. SP's own trailer/ mobile unit

   (d) The SP, using SM trailer will be required to:
      1. Collect the trailer from the Beltana Municipal Yard in Helshoogte Street, Stellenbosch and then either return it there after each operational day for safe storage OR park it at an alternate secure municipal premises - provided or as directed by the Municipality.
      2. Onsite and once the SP runs the operation, the SP must ensure that they maintain the SM Trailer and its equipment in a clean, sound condition and ensure that it is kept in full working order, and returned at the end of the contract.
      3. If it is deemed that the appointed SP has been reckless and irresponsible in the manner in which it is managing the swop shop trailer, it will be regarded as breach of contract, and failure to remedy such breach will result in cancellation of the Contract.
      4. Annual licensing of the swop shop trailer servicing
      Please note that when the Municipality is required to service/repair the Swop Shop trailer, it will result in the swop shop trailer not being available to the appointed SP during that period. The SP will therefore have to make alternate arrangements until such time that the trailer is returned again. The Municipality will aim to return the trailer as expeditiously as possible.

   (e) **Staff required:**
      1. Driver/supervisor responsible for driving the vehicle that will pull the trailer, this driver must have a minimum code EB licence, proof of such must be attached to this bid submission.
      2. A minimum of 2 additional General Worker staff to manage the exchange process and clients/people during operation.
      3. Project Manager that will be the primary contact person for this contract.

   (f) **On the days of operation:**
      1. The Mobile Swop Shop / Trailer must be parked on an accessible and authorized location close the relevant community on a pre-determined day.
      2. Residents in the area must voluntarily hand in their recyclables at the mobile Swop Shop/Trailer.
      3. SP to assess the value of the recyclables handed in and offer the pre-determined reward/payment in return for it.
      4. Exchange of recyclables for money will not be allowed. This should be clearly stated / made known, to eliminate the expectation to be paid in monetary form.
      5. SP to ensure that no waste is left in the area where the Swop Shop was operational on any given day.

(g) Additional areas to be identified and serviced, only as agreed upon by the SP and SM.

(h) SP to register on the database in line with Stellenbosch Municipality's Integrated Waste Management By-Law.

(i) The SP must select and form an independent written agreement with an accredited recycling logistics partner who will solely be responsible for transporting the collected recyclable materials at their own cost, and the SP should negotiate directly with this partner re: acceptable rates per recyclable material and contractual obligations for both parties. A copy of logistics partner's accreditation (according to the Municipality's Integrated Waste Management By-Law) must be submitted together with the first monthly report.

(j) The SP (through the accredited recycling partner) sells the recyclable materials to a recycling buyer or market, the revenue of this sale is for the appointed SP.

(k) Delivery slips of where the collected recyclables were taken to, must be provided to SM.

(l) Communications and awareness:
All public communications designed by the SP MUST be circulated to the waste management department for input /approval before it goes out to the public. Communication methodologies may include, but is not limited to:
- Public announcement using PA system (loudhailer)
- Face to face engagement supported by information leaflets.

(m) It is up to the SP to decide if they wish to approach schools or other organizations to provide the swop shop service to them by bringing the swop shop trailer to their premises.

(n) Stock up the relevant items of value/vouchers and manage the use of it to ensure availability of it at all times.

(o) Ensure compliance with Covid19 Regulations at all times.

(p) The SP is expected to ensure safe crowd control and litter management on operational days.

(q) The SP ensures all required insurances are in place.

(r) Note: It is the Municipality's hope that participants from these very poor areas are not exploited economically, by providing vouchers / items / goods valued below the market rate for the recyclables swopped, therefore the service provider must openly advertise its commodity prices and share market prices via email with the to SM (minimum monthly). The Municipality may do spot evaluations to ensure exploitation does not happen.

(s) The SP must submit a draft service level agreement/ memorandum of understanding, for consideration and finalization by SM

(t) The SP must ensure that effective communication, on various platforms, and in relation to logistics, is in place for this contract.

(u) Sustainability considerations:
This methodology fulfills the Municipality's mandate to raise awareness recycling as well as the need to reduce waste to landfill sites, and offer a financial incentive to S@S.
Financial incentive for SP:
- The sale of the recyclable waste by the SP, as well as;
- Goods to be exchanged in the shop, were received through the SP's supporting networks, such as sponsorships from other Private entities/retailers.
- Option to make use of SM Swop Shop Trailer for Free for the duration of the contract.
- It is expected of tenderers, to engage /approach the Producer Responsibility Organizations (PRO's) for support, so that the financial load of diverting packaging materials / waste is borne by PRO's and not the Municipality as per the Extended Producer Responsibility Regulations (2020).

(v) Monthly deliverables:
Diversion data by the 5th day of each month, as per the detail below:
- Monthly recycling data (in electronic format)
- Monthly scanned copies of the weighbridge/delivery slips.
- Pictoral evidence of service rendered at specific sites during that month.

(w) The Municipality will assist by printing awareness and education leaflets (B/W A5 prints) for distribution by the SP. The Municipality will also broadcast the commencement of the service, as well as new areas added to the service, on social media on an Ad-hoc basis, with instructions for communities to contact the SP directly.
