 Director: Corporate Services (A De Beer)
 Director: Infrastructure (S Chandaka)
 Director: Planning and Economic Development (A Barnes)
 Chief Audit Executive (F Hoosain)
 Senior Administration Officer (T Samuels)

1.	OPENING AND WELCOME
----	----------------------------

The Speaker, Cllr Q Smit welcomed all at the 10th Council meeting.

2.	MAYORAL ADDRESS
----	------------------------

- STAGE 6 LOADSHEDDING PUTS PRESSURE ON WATER SUPPLY OPERATIONS

Eskom's stage 6 load shedding puts severe pressure on our ability to ensure that we meet the regular water demand in our municipal area.

An average of 9 – 11 hours of electricity downtime on a day, means that our water supply operations are being affected, despite contingency measures we have in place.

Reservoirs do not always have enough time to refill to appropriate levels and this may lead to low water pressure or an interruption in supply.

An appeal is herewith made to reduce water usage to mitigate the effects of load shedding.

This can be done by:

- adopting a general water-wise lifestyle
- taking shorter showers, instead of baths
- not irrigating gardens with municipal water
- using greywater or borehole water where possible
- limiting toilet flushes

We all can do our part to save water for the most essential purposes during load shedding time.

- SCAM ALERT

It has come to our attention that there are individuals posing as cashiers or security officers at some nature areas and reserves, demanding that visitors pay for access.

Please take note that access to the Jan Marais Nature Reserve, Papegaaiberg Nature Reserve and Paradyskloof, Botmaskop, and Ida's Valley Nature Areas are free and that no payment is required for general access.

General Access includes:

- Individual walkers
- Individual cyclists
- Individual park walks
- Utilisation of the outdoor gym

- CONTROL ROOM

Our control room is proving it's worth in the fight against crime and illegal activities. Our Control Room has live feeds to numerous CCTV cameras and 67 License Plate Recognition (LPR) cameras placed at various sites across the entire municipal area. These numbers will be increased in the months and years to come.

The facility also houses a specialised war room with state-of-the-art information and communication technology equipment in order to better facilitate our responses during times of crisis. There are currently 12 control room operators employed at the facility, working in shifts of 3 persons at a time to ensure 24-hour coverage, 7 days a week.

Members of the public can contact the control room when in need of any assistance. They are available 24/7 on 021 808 8999 or you can report any issue via the dedicated WhatsApp line on 079 622 4722.

DAVID HUGHES

Dave Hughes passed away peacefully on 6 February 2023. He was a local wine master and icon and contributed towards teaching South Africans about wine and instilling the love of wine. He also did a lot of charity work."

3.	COMMUNICATION BY THE SPEAKER
-----------	-------------------------------------

Opening and Welcome:

Ward Functionality report:

This report will serve at the March 2023 Council meeting.

Templates:

Standard template for Public and Ward Committee meetings. Template for proof of addresses also distributed.

Birthdays – February

Wilhelmina Petersen – 8 February

Alwyn Hanekom – 21 February

Previous Speaker, Councillor Donovan Joubert who celebrated his birthday on 21 February.

4.	COMMUNICATION BY THE MUNICIPAL MANAGER
-----------	---

- Welcome back to all our students. It's important to note that our roads and town are full and economic activities are blooming. With that comes traffic problems and loadshedding is not helping too much. I therefor am appealing to all members of the public to have patience on the roads, we are working on the situation.
- There are a couple of robots on the R44 that are not working, but it falls under Province's control. The municipality would like to take over from Province to give quicker attention to those robots and the public's patience are requested while the municipality is in contact with our Provincial counterparts to deal with the situation.
- Lent: It is a very sacred time for most Christians in preparation for Easter.
- The Mayoral Committee meeting scheduled for 8 March 2023 will be moved to 15 March 2023 because of a By-election that will take place on 8 March 2023. A formal communication in this regard will be distributed in due course.

1. **SUBJECT: FUTURE USE OF ERF 235, VAN DER STEL SPORT COMPLEX, STELLENBOSCH**
2. **PURPOSE**
To provide Council with a brief summarization of the comments/inputs received from the public regarding the future use of Van der Stel Sport Complex.
3. **DELEGATED AUTHORITY**
Council
4. **EXECUTIVE SUMMARY**
At the 29TH COUNCIL MEETING: 2019-07-24 a resolution was taken that Council notes that the Community Services Department will commence with the process to develop an alternative management model for the Van Der Stel Sport facility.
During the 8TH COUNCIL MEETING: 2022-10-26 OF STELLENBOSCH MUNICIPALITY, Council approved the information statement for public inputs in respect of Erf 235, known as VAN DER STEL SPORT COMPLEX, Stellenbosch.

11TH COUNCIL MEETING: 2023-02-22: ITEM 11.2.1**RESOLVED** (majority vote with abstentions)

- (a) that Council notes the comments/ inputs received from the community;
- (b) that Council identifies erf 235, is not needed to provide minimum services as required in terms of the asset transfer regulations;
- (c) that Council in principle resolve to lease erf 235 to a Management Company on a long-term lease of 30 years to manage the facility as a sports facility;
- (d) that the management company to be appointed through open supply chain process;
- (e) that the information statement be approved to invite public comments/inputs regarding the intention of Council to lease the property on a long-term lease (30 years); and
- (f) that this matter comes back to Council after the public participation process.

The following Councillors requested that their votes of dissent be minuted:

Cllrs J Andrews; RB Hendrikse; N Mkhontwana; Z Ndalasi; C Noble and M Van Stade.

11.3.1	POSSIBLE DISPOSAL OF ERF 4810 (3 SWAWELAAN) STELLENBOSCH
--------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance

15 February 2023

1. SUBJECT: POSSIBLE DISPOSAL OF ERF 4810 (3 SWAWELAAN) STELLENBOSCH

2. PURPOSE

To inform Council that the previous sale was not concluded and to request to consider the disposal of erf 4810, Stellenbosch again through an auction.

3. DELEGATED AUTHORITY

For decision by Municipal Council.

4. EXECUTIVE SUMMARY

In May 2021 three properties being erven 4810 and 4811 (3 and 3A Swawelaan) as well as 6 Tinkinkie Street) were sold on auction as per a decision made by the Municipal council. Before the auctions the properties were used as rental properties for council employees and were vacant for a long period. When the employment contracts of the previous lessees ended, it was resolved not to lease the properties again to employees before a new council policy on allocation of rental housing to employees has been approved.

Stellenbosch Municipality is currently the registered owner of the three erven. Erven 4811 and 4812 are currently in the process of being transferred to the purchasers from the auction. Before transfer can take place the subdivision of the other erf needs to be finalised. In terms of the Council resolution the buyers are responsible for the costs of subdivision and the transferring attorney of one of the buyers will be dealing with the subdivision registration with the assistance from the Municipality.

Erf 4810 was however not sold since the purchaser did not pay the deposit for the property.

The property not worth more than R10 million. The general valuation recorded in 2021 was R1, 926,000.00 (One million nine hundred and twenty-six thousand rand) and it was sold at the auction for R2, 150,000.00 (Two million one hundred and fifty thousand rand).

After the auction StellCare indicated that they are interested to purchase the property for an orphanage. They were contacted on more than one occasion to make an offer so that offer can be brought to council for consideration. After contacting them again in the beginning of February 2023, they indicated they do not have the funds available to purchase the property. The municipality must pay a security company to provide security and it no longer has any purchase for the Municipality.

The provisions of the Asset transfer regulations were followed before the first auction took place and there is no need to repeat the process. The municipality has in the meantime appointed a service provider on tender to do auctions for the municipality.

11TH COUNCIL MEETING: 2023-02-22: ITEM 11.3.1**RESOLVED** (majority vote with abstentions)

- (a) that Council confirms that the property erf 4810 is not needed to provide minimum services as required in terms of the asset transfer regulations;
- (b) that Council approves the disposal of the erf by public auction to the highest bidder at the auction at a market related price with a reserve set price determined not less than the price reached at the previous auction;
- (c) that the buyer be responsible for the payment of the costs for the transfer of the erf from the mother erf (3721);
- (d) that the municipality request a certificate of registered title as the property have not been registered as separate titles;
- (e) that the new buyer be requested to take occupation of the erven as soon as warranties have been provided, but not later than 30 days after the warranties was provided;
- (f) that the Municipal Manager be authorised to conclude the sale agreement after the auction provided that the sale price is not lower than the reserve price; and
- (g) that the risk be transferred to the buyer on taking occupation.

The following Councillors requested that their votes of dissent be minuted:

Cllrs J Andrews; RB Hendrikse; C Noble and M Van Stade.

11.7.1	IDAS VALLEY / BOTMASKOP NATURE AREA ENVIRONMENTAL MANAGEMENT PLAN (FEBRUARY 2023)
--------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance

15 February 2023 and 22 February 2023

1. SUBJECT: IDAS VALLEY / BOTMASKOP NATURE AREA ENVIRONMENTAL MANAGEMENT PLAN (FEBRUARY 2023)

2. PURPOSE

The Idas Valley / Botmaskop Nature Area¹ Environmental Management Plan (EMP) (February 2023) (**ANNEXURE A**) has been prepared to establish a distinct vision and overarching goal for the management of the subject area in context off, and giving effect to, the relevant legislation and associated regulations.

Following the Council resolution of August 2022 (included under section 6.6 below) a draft version of this document was advertised for public comment for a period of 21 days (**ANNEXURE B**). Comment received during this period (**ANNEXURE C**) has been considered (**ANNEXURE D**) resulting in the above document herewith presented to Council for approval.

3. DELEGATED AUTHORITY

For decision by the Council of Stellenbosch Municipality (the Municipality).

¹ A **nature area** has no formal environmental protection status or proclamation as opposed to a **nature reserve** that has been declared as such in terms of, for example, the National Environmental Management: Protected Areas Act, 57 of 2003.

4. EXECUTIVE SUMMARY

The Idas Valley / Botmaskop Nature Area (NA) is located on the north-western boundary of Stellenbosch town, above Idas Valley. The Idas Valley portion of the NA is located north of the Helshoogte pass on the way to Pniel. Botmaskop is located south of the road, against the mountain side, as one exists Stellenbosch driving up the Helshoogte pass. The NA covers an area of ±425 ha of which the Idas Valley area consist of 335 ha. The area is mainly bordered by farmland, the urban area of Idas Valley to the south-west and the mountainous natural landscape towards the Jonkershoek Mountains in the south. The relevant property is municipal owned land zoned for agricultural use. Most of the area has been used for forestry purposes at some point. The Idas Valley Dam(s), which provides Stellenbosch town with potable water, is located within the NA.

Because of the area's location (close proximity relative to Stellenbosch- and other towns as well as the City of Cape Town), its topography, scenic quality and past use it is currently utilized for a number of purposes. These include:

Outdoor recreation: Having been a forestry area in the past the NA consists of a network of old service roads. The Old Helshoogte pass also cuts through the area. This infrastructure and the attributes of the area mentioned above makes the Idas Valley / Botmaskop NA a popular destination for cyclers, runners and hikers.

Wood making: The NA is invaded, partly due to its use as forest area in the past, by a number of alien vegetation species ranging from plants to mature trees. This provides a resource to local contractors collect firewood. Each year a number of permits (issued as per the Council approved tariff structure) that allows this activity within the Idas Valley area are issued by the Municipality. In terms of these permits the felling of trees are prohibited. Fallen- or trees felled by the Municipality is allowed to be processed.

Cultural / Agricultural use: The NA have, over the past 10 – 15 years, accommodated a number of uses associated with cultural rituals, tribal initiations and agriculture or plot farming.

Events: The Idas Valley / Botmaskop NA is the subject of numerous event applications, mainly associated with mountain-biking or trail-running.

Filming: The Municipality, from time-to-time, receives applications for filming or photoshoots within its nature areas, including the Idas Valley / Botmaskop NA.

Water provision: In the centre of the area are two catchment dams and associated Municipal infrastructure that plays an important role in providing Stellenbosch town with potable water. The use and maintenance of this infrastructure is important to make sure that water service delivery to the relevant dependant areas is provided.

To date the Idas Valley / Botmaskop NA has been managed without a formally approved EMP in place. Because of the area's ecological value, its value as public resource and its vulnerability to degradation due to past and present use it is important that an overarching management plan for the area be put in place to ensure that the Idas Valley / Botmaskop NA is managed in a sustainable manner.

11TH COUNCIL MEETING: 2023-02-22: ITEM 11.7.1**RESOLVED** (majority vote with 1 abstention)

- a) that Council approves the Idas Valley / Botmaskop Nature Area Environmental Management Plan (February 2023) as the document to guide the management of the Idas Valley / Botmaskop Nature Area; and
- b) that the department ensure that a board that can advise council exists for this area

The following Councillors requested that their vote of dissent be minuted:

Cllrs J Andrews; M Danana; RB Hendrikse; N Mananga-Gugushe; E Masimini; N Mkhontwana; R Nalumango; Z Ndalasi; M Nkopane; C Noble; N Ntsunguzi; M Rataza; A Tomose and M Van Stade.

11.8	PLANNING :(PC: CLLR C VAN WYK)
11.8.1	REQUEST FOR THE APPOINTMENT OF THE NOMINATIONS TO SERVE ON THE STELLENBOSCH MUNICIPALITY CONSERVATION ADVISORY COMMITTEE ("CAC")

Collaborator No: 743921
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 15 February 2023 and 22 February 2023

1. SUBJECT: REQUEST FOR THE APPOINTMENT OF THE NOMINATIONS TO SERVE ON THE STELLENBOSCH MUNICIPALITY CONSERVATION ADVISORY COMMITTEE ("CAC")

2. PURPOSE

To provide Council with the pertinent factors to consider the appointment of the members of the Conservation Advisory Committee as stipulated in Section 249 of the Stellenbosch Municipality Zoning Scheme By-law, 2019.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The Stellenbosch Municipality Zoning Scheme requires the appointment of members to serve on the Stellenbosch Municipality Conservation Advisory Committee ("CAC") in terms of Section 249 of the said By-law.

Section 249(3) of the said bylaw required that the ordinary rules and procedures be prescribed, such rules were adopted by Council on 28 July 2021 at its 44th Council Meeting, copy attached as **APPENDIX 1**, where the Terms of Reference were duly adopted, which included the guidelines for appointment of the members of the CAC. The Terms of Reference required the appointment of seven (7) members to serve on the CAC.

The Department has per the resolution of Council, therefore undertook the process to appoint the members of the CAC for an initial period of 12-months from the date of appointment.

11TH COUNCIL MEETING: 2023-02-22: ITEM 11.8.1

RESOLVED (majority vote with abstentions)

- (a) that Council approves the appointment of the following nominations to serve on the Stellenbosch Municipality Conservation Advisory Committee ("CAC"):

- Petrus Jakobus Kruger Dekker (Stellenbosch)
- Johann Clemens Slee (Stellenbosch)
- Jan Raymond Dirk Bouma (Stellenbosch)
- Brian Henry Howard (Franschhoek)
- Piet Eduard Claassen (Stellenbosch)
- Rudia Pool-Stanvliet (Stellenbosch)
- Cornelia Hendrika Smart (Stellenbosch)

The applications of the nominees are attached as **APPENDIX 2** of this report.

MINUTES

11TH MEETING OF THE COUNCIL
OF STELLENBOSCH MUNICIPALITY

2023-02-22

-
- (b) that Council approves that the above listed nominees be appointed for an initial period of 12-months from the date of acceptance of the nomination;
- (c) that the nominees be remunerated at a rate of R1250.00 per nominee per hour for actual sitting with an estimated maximum 5 hours per sitting; and
- (d) that Council approves the Code of Conduct for the members of the Stellenbosch Municipality Conservation Advisory Committee ("CAC"), attached as **APPENDIX 3** of this report.

The following Councillors requested that their votes of dissent be minuted.

Cllrs J Andrews; M Danana; RB Hendrikse; N Mananga-Gugushe; E Masimini; N Mkhontwana; R Nalumango; Z Ndalasi; M Nkopane; C Noble; N Ntsunguzi; M Rataza; A Tomose and M Van Stade.

11.8.2	REQUEST TO UNDERTAKE THE PUBLIC PARTICIPATION PROCESS (“PPP”) IN RESPECT OF THE DRAFT STELLENBOSCH MUNICIPALITY INCLUSIONARY ZONING (HOUSING) POLICY
--------	---

Collaborator No: 743926
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 15 February 2023 and 22 February 2023

1. SUBJECT: REQUEST TO UNDERTAKE THE PUBLIC PARTICIPATION PROCESS (“PPP”) IN RESPECT OF THE DRAFT STELLENBOSCH MUNICIPALITY INCLUSIONARY ZONING (HOUSING) POLICY

2. PURPOSE

To provide Council with the pertinent facts in order to approve that the draft Stellenbosch Municipality Inclusionary Zoning Policy be advertised for a period of sixty (60) days to obtain public comment in respect of the subject draft policy.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The draft policy document aims to support Stellenbosch Municipality and other key role players in delivering more high-quality affordable housing (also referred to as inclusionary housing) in well-located and priority development areas, creating a mix of income groups across new and infill developments in Stellenbosch Municipality promoting social and economic integration.

To deliver affordable housing within the Stellenbosch Municipality, available municipal spatial planning; and land use planning systems and land-based financing mechanisms were investigated and identified. This will be used in leveraging and incentivizing land value gains in spatially targeted areas for the creation public good (i.e. affordable housing) and to enable well performing settlements (i.e. integrated, inclusive, resilient, efficient) in order to address current development challenges and historical spatial imbalances/inequalities.

The spatial compact as envisaged and approved in the Stellenbosch Municipal Spatial Development Framework, 2019 and the Adam Tas Corridor Local Spatial Development Framework and Development Guidelines, 2022 of enabling inclusive, efficient, and an effective municipality by providing a wide choice of quality affordable housing to meet the needs of the community, widening the opportunities for homeownership, and creating flexibility and choice of tenures and price ranges for those who rent and seek the security of tenures.

In addition to facilitate and grow a strong partnership with the private sector in terms of delivering more quality affordable housing.

11TH COUNCIL MEETING: 2023-02-22: ITEM 8.2**RESOLVED** (nem con)

- (a) that Council takes note of the draft Stellenbosch Municipality Inclusionary Zoning Policy, attached as **APPENDIX 1** to this report, and
- (b) that Council approves that the draft Stellenbosch Municipality Inclusionary Zoning Policy, be advertised for public comment for a period of sixty (60) days, whereafter same be resubmitted to Council for final consideration and subsequent approval in terms of the Local Government Municipal Systems Act No. 32 of 2000.

11.8.3	EXTENSION OF TERM OF OFFICE OF THE MEMBERS OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL (SMPT)
--------	--

Collaborator No: 743940
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 15 February 2023 and 22 February 2023

1. SUBJECT: EXTENSION OF TERM OF OFFICE OF THE MEMBERS OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL (SMPT)

2. PURPOSE

To extend the term of office of the Stellenbosch Municipal Planning Tribunal (SMPT) to permit the conclusion of the current recruitment process for the identification and appointment of new members and term of office.

3. DELEGATED AUTHORITY

The extension of the term of office of the serving Municipal Planning Tribunal (MPT): **Council** by virtue of Delegation LUP57 for the appointment of the members of the MPT.

4. EXECUTIVE SUMMARY

In accordance with the decision of Council vide Item 11.8.1 dated 27 July 2022, the term of office of the current MPT members was extended to the end of February 2023 to allow for a process to recruit and appoint new members for a new term of office of the MPT.

As the response to the advertisement for the recruitment process was not satisfactory, the Municipal Manager sanctioned a re-advertisement. As the interviews and selection process still needs to be concluded, and the uninterrupted operation of the MPT needs to continue, it is the purpose of this report to present for consideration the further extension of the current term of office of the MPT.

11TH COUNCIL MEETING: 2023-02-22: ITEM 11.8.3

RESOLVED (nem con)

That the term of office of the current serving Stellenbosch Municipal Planning Tribunal with the following serving members BE **EXTENDED** in terms of Section 73(1)(b) of the Stellenbosch Municipal Planning Bylaw (2015) for a period of three months or up until such time as the new term of office of the MPT is published, whichever comes first:

External Members:

- (a) Dr. D.J. Du Plessis (Chairperson)
- (b) Mrs. C. Havenga (Deputy Chairperson)
- (c) Mr. C. Rabie
- (d) Dr. R. Pool-Sanvliet

22 February 2023

1. **SUBJECT: PROPOSED DEVOLUTION OF RENTAL STOCK: WESTERN CAPE GOVERNMENT, DEPARTMENT OF HUMAN SETTLEMENTS**

2. **PURPOSE**

To inform Council about the developments after the Council resolution that the Municipality must take over the rental stock from the Department of Human Settlements and to determine the way forward.

3. **DELEGATED AUTHORITY**

Council

4. EXECUTIVE SUMMARY

Council resolved in 2018 to approve the request by the Department of Human Settlements to take over the La Coline flats from Provincial Government. A Quantity Surveyor was appointed to determine the cost involved for the upgrade maintenance on the flats before the takeover by the Municipality. A report from the Quantity Surveyor is attached as **APPENDIX C**. The Municipality have not been able to reach an agreement with the department on the cost. The department has written a letter to the Municipality following a discussion with the Municipality in which they question the municipality's viewpoint **APPENDIX B**. The Quantity Surveyor's report in our view contains necessary maintenance, none of which is just cosmetic.

The department also submitted a Donation Agreement **APPENDIX D**.

11TH COUNCIL MEETING: 2023-02-22: ITEM 13.1

RESOLVED (majority vote with 1 abstention)

- (a) that Council does not accept the current offer from the department of human settlement of R3.2 million as stipulated in your communication dated July 2022.
- (b) that the Municipal Manager be mandated to renegotiate the above offer, for an amount no less than R6.4 million.

8.1	ANNUAL REPORT OVERSIGHT REPORT 2021/22
-----	---

Collaborator No: 746217
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 22 March 2023 29 March 2023

1. SUBJECT: ANNUAL REPORT OVERSIGHT REPORT 2021/22

2. PURPOSE

To submit to Council, the Annual Report Oversight Report 2021/22 for **Adoption**.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The draft Annual Report 2021/22 was referred by the Council, on 30 January 2023, to the Municipal Public Accounts Committee (MPAC) which fulfilled the function of the Oversight Committee. The appointment and mandate of the MPAC / Oversight Committee were informed as per the MFMA Circular 32 of 2006.

The MPAC members, including the two co-opted members, scrutinised the draft Annual Report 2021/22 and requested, where necessary, responses from the relevant Directorates. The draft Annual Report 2021/22 was objectively reviewed by the MPAC members to ascertain whether the draft Annual Report 2021/22 is a true and accurate reflection of the municipality's performance for the 2021/22 financial year.

The public was invited to attend a public hearing and to submit any representations on the draft Annual Report 2021/22. All the councillors were also invited to attend the public hearing and to deliberate on the draft Annual Report 2021/22.

No members of the community attended the public hearing.

5. RECOMMENDATIONS

- (a) that the Council, having fully considered the Annual Report Oversight Report 2021/22 of the Stellenbosch Municipality, **ADOPTS** the Annual Report Oversight Report 2021/22;
- (b) that the Council, having fully considered the Annual Report 2021/22, attached as **ANNEXURE B** to the Annual Report Oversight Report 2021/22, **APPROVES** the Annual Report 2021/22 without any reservations;
- (c) that the Annual Report Oversight Report 2021/22 be made public in accordance with Section 129(3) of the MFMA, and;
- (d) that the Annual Report Oversight Report 2021/22 be submitted in accordance with Section 129(2) and 132(2) of the MFMA to the Auditor General of South Africa, Provincial Treasury: Western Cape, Department of Local Government: Western Cape and the Provincial Legislature: Western Cape.

6. DISCUSSION**6.1 Background**

The format of the Annual Report 2021/22 is guided Nationally by the MFMA Circular 63 of 2012, which seeks to establish uniform reporting by all municipalities. It is envisaged with this template that national and provincial governments can better benchmark municipalities when there is a single reporting framework.

The draft Annual Report 2021/22 was completed and submitted to the Council on 30 January 2023. As prescribed by the MFMA, the draft Annual Report 2021/22 was released for public comment on 02 February 2023. Comments on the draft Annual Report 2021/22 closed on 28 February 2023. No feedback from the community was received on or before 28 February 2023.

However, Provincial Treasury made a written submission to the municipality on 27 February 2023. This submission was presented to the MPAC on 03 March 2023.

All Directorates were presented with the opportunity to review their information and to provide feedback at the MPAC.

The MPAC's Annual Report Oversight Report 2021/22 is attached hereto as **ANNEXURE A**. Commentaries from the MPAC and responses from the Directorates are incorporated as **ANNEXURE A** of the MPAC's Annual Report Oversight Report 2021/22.

The Final Annual Report 2021/22 is attached to the MPAC's Annual Report Oversight Report 2021/22 as **ANNEXURE B**.

6.2 Financial Implications

There are no financial implications beyond that which has been provided for in the 2022/23 MTREF Budget.

6.3 Legal Implications

In terms of Section 129(1) of the MFMA:

"The council of a municipality must consider the annual report of the municipality and of any municipal entity under the municipality's sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council's comments on the annual report, which must include a statement whether the council has -

- (a) approved the annual report with or without reservations;*
- (b) rejected the annual report; or*
- (c) referred the annual report back for revision of those components that can be revised."*

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

1. INTRODUCTION

The annual report is one of the key instruments for transparent and accountable local governance and accountability. It is a post-financial year document that provides an overview of the financial and non-financial performance concerning the previous financial year, which in this instance relates to the 2021/22 financial year. The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) stipulates that the annual report must be tabled in and passed by the municipal council.

1.1 PURPOSE

The purpose of this report is to present to the Council for adoption the Annual Report 2021/22 as well as the Annual Report Oversight Report 2021/22, as required in terms of Section 129 of the MFMA.

2. ANNUAL REPORT 2021/22

2.1 LEGAL FRAMEWORK

Herewith is an extract from the key legislative requirements as per the MFMA relating to the annual report:-

121. Preparation and adoption of annual reports.

- (1) Every municipality and every municipal entity must for each financial year prepare an annual report in accordance with this Chapter. The council of a municipality must within nine months after the end of a financial year deal with the annual report of the municipality and of any municipal entity under the municipality's sole or shared control in accordance with section 129.
- (2) The purpose of an annual report is—
 - (a) to provide a record of the activities of the municipality or municipal entity during the financial year to which the report relates;
 - (b) to provide a report on performance against the budget of the municipality or municipal entity for that financial year; and
 - (c) to promote accountability to the local community for the decisions made throughout the year by the municipality or municipal entity.

127. Submission and tabling of annual reports

- (2) The mayor of a municipality must, within seven months after the end of a financial year, table in the municipal council the annual report of the municipality and of any municipal entity under the municipality's sole or shared control.

129. Oversight reports on annual reports.

- (1) The council of a municipality must consider the annual report of the municipality and of any municipal entity under the municipality's sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council's comments on the annual report, which must include a statement whether the council—
 - (a) has approved the annual report with or without reservations;
 - (b) has rejected the annual report; or
 - (c) has referred the annual report back for revision of those components that can be revised.

2.2 COMPONENTS OF THE ANNUAL REPORT

The format of the Annual Report 2021/22 is based on the annual report template issued by the National Treasury in terms of MFMA Circular 63 of 2012, which differs significantly from the Annual Report Guidelines (MFMA Circular 11) issued by the National Treasury in 2005.

The MFMA Circular 63 of 2012 has six (6) chapters and tries to cover everything that needs to be reported based on the MFMA and the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA).

3. ANNUAL REPORT 2021/22 CONSULTATION AND ADOPTION PROCESS

3.1 MUNICIPAL PUBLIC ACCOUNTS COMMITTEE (MPAC)

A Municipal Public Accounts Committee (MPAC) was set up under Section 79 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998). This was done through a Council resolution. The Terms of Reference task the MPAC with the responsibility to perform an oversight role over the process of preparing the Annual Report of the Council and to produce an Oversight Report based on its review of the Annual Report.

As required by the MFMA, the Municipal Manager attended the Council Meeting where the draft Annual Report 2021/22 was tabled (on 30 January 2023) to be released for public comment as well as the MPAC Meetings to answer questions posed by the MPAC Members and to respond to written and oral representations from the community. All the councillors were also invited to attend the public hearing and to deliberate on the draft Annual Report 2021/22.

No members of the community attended the public hearing.

The attendance of the MPAC members to review the draft Annual Report 2021/22 is recorded as follows:

TABLE 1: MPAC MEETINGS

MPAC Meetings

3.2 ADOPTION AND PUBLIC CONSULTATION PROCESS

The draft Annual Report 2021/22 was tabled in Council on 30 January 2023 as required per the MFMA, which requires under Section 127(2) that:

"The Mayor of a municipality must, within seven months after the end of a financial year, table in the municipal council the annual report of the municipality."

In terms of Section 121(3) of the MFMA, the Annual Report of a municipality or municipal entity must include the following core components. These core components are formally annexed to the draft Annual Report:

- a) The Annual Financial Statements as submitted to the AGSA (Section 121(3)(a));
- b) the AGSA's audit report in terms of section 126(3) on those financial statements (Section 121(3)(b));
- c) the annual performance report of the municipality prepared by the municipality in terms of Section 46 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) (Section 121(3)(c));
- d) the AGSA's audit report in terms of section 45(b) of the MSA (Section 121(3)(d)); and
- e) particulars of any corrective action taken or to be taken in response to issues raised in the audit reports referred to in paragraphs (b) and (d) in the MFMA (Section 121(3)(g)).

The draft Annual Report 2021/22 was made public on the municipal website within five (5) days and within seven (7) days in the local newspaper after it was approved by the Council on 30 January 2023. In addition, the draft Annual Report 2021/22 was also made available at all municipal libraries and other identified offices where the public could access the report.

Members of the community and other stakeholders were invited to submit written comments / inputs on the draft Annual Report 2021/22. The councillors, the community, and other stakeholders were also invited to attend the public hearing, which was held on **14 February 2023**, to present the MPAC with any oral or written input on the draft Annual Report 2021/22.

The draft Annual Report 2021/22 was furthermore submitted in terms of Section 127(5)(b) to the Auditor General of South Africa (AGSA), Provincial Treasury (Western Cape), and the Department of Local Government (Western Cape).

The closing date for public comments was **28 February 2023**. No written submissions from the public were received.

The Provincial Treasury: Western Cape submitted written comments on the draft Annual Report 2021/22 on 27 February 2023. These comments were tabled and considered by the MPAC on 03 March 2023.

3.3 HIGHLIGHTS IDENTIFIED IN THE DRAFT ANNUAL REPORT 2021/22

The MPAC noted and congratulated the Stellenbosch Municipality on the announcement by the AGSA that the municipality received a **clean audit outcome for the 2021/22 financial year**. Stellenbosch Municipality is once again able to report credible and reliable financial and performance results. The *clean* audit outcome reflects that the municipality maintained a healthy financial position and that all money spent is properly accounted for. The latest audit outcomes mark the 15th consecutive year of unqualified audit outcomes for the Stellenbosch Municipality.

Further highlights and words of gratitude were noted as outlined below:

1. MPAC members noted that the MPAC orientation session held on 09 February 2023 was very informative and insightful;
2. Great leadership was shown from the Executive Mayor, Municipal Manager, and administrative team as a result of the *clean* audit obtained for the Stellenbosch Municipality, despite the various challenges posed throughout the financial year; and
3. The Municipal Manager was commended for her outstanding leadership and strategic guidance during the year under review.

3.4 MPAC SITE VISITS

The draft Annual Report 2021/22 highlighted a number of projects that were either completed or in various stages of completion. The MPAC identified a number of projects and conducted site visits from 01 – 02 March 2023. The purpose of the visits was to verify the progress on the implementation of the projects against the reported information in the draft Annual Report 2021/22, which is outlined in the table below:

TABLE 2: MPAC SITE VISITS

Project name	Area verification of the project by MPAC	Status as per Annual Report 2021/22	Current status of the project	Remarks by MPAC
Visit the new primary and high schools in Klapmuts	Klapmuts	Complete. The need for a multi-language school in Klapmuts emanates from the community's needs. The Western Cape Provincial Department built the schools and anticipated building permanent structures on the school ground.	Complete	The MPAC was very impressed by the newly established schools.
Klapmuts Transfer Station	Klapmuts	Multi-Year Project.	Phase completed for the 2021/22 financial year.	The municipality should take note of the waste structure (wall) to be repaired as well as the repair of the fencing.
Wemmershoek WWTW	Wemmershoek	Phase 1 is complete.	Wemmershoek Phase 1: The project's objectives are to improve the existing infrastructure and to increase the sludge handling capacity of the WWTW to address operational challenges and improve the efficiency of the grit removal system. Future phases will be to increase the plant's capacity to cater for future developments. (Construction of phase 1 is at 98% complete, whilst phase 2 is awaiting additional funds before implementation.)	The MPAC commend the municipality on the progress made to the project since the last site visit in 2020/21.
Ida's Valley FLISP Erf 9445	Ida's Valley	Complete	Complete	The MPAC are proud to see that the houses were built and people have dignified living space.
La Motte	Franschhoek	The land is available for housing development as the per narrative in the draft Annual Report 2021/22.	In progress as per the draft Annual Report 2021/22.	The MPAC take note of the process and progress of the project.
Meerlust	Franschhoek	The land is available for	In progress as per the draft	

Project name	Area verification of the project by MPAC	Status as per Annual Report 2021/22	Current status of the project	Remarks by MPAC
		housing development as the per narrative in the draft Annual Report 2021/22.	Annual Report 2021/22.	
Kayamandi Watergang	Kayamandi	The land is available for housing development as the per narrative in the draft Annual Report 2021/22.	In progress as per the draft Annual Report 2021/22.	The MPAC take note of the planning but proposes that the process be sped up as the housing demand is very high.
Longlands Housing Project	Vlottenburg	All 98 houses were allocated to the beneficiaries.	Complete	The MPAC members were satisfied with the houses built for the people.

4. CONCLUSION

As MPAC, we are of the opinion that the Annual Report 2021/22 is a **true and accurate reflection** of the Stellenbosch Municipality's financial and non-financial performance for the 2021/22 financial year. MPAC indicated that the draft Annual Report 2021/22 was thoroughly unpacked and that the site visits were a true reflection of what is stated in the draft Annual Report 2021/22.

The oversight process for the Annual Report 2021/22 is herewith concluded, and as Chairperson of the MPAC, I would like to thank the MPAC Committee Members, the Executive Mayor and Mayoral Committee, the Municipal Manager, Directors, Senior Managers, as well as all the officials for their contribution to the development and finalisation of the draft Annual Report 2021/22. Their diligence and constructive commitment during this oversight period are noted and appreciated.

5. RECOMMENDED RESOLUTION TO BE ADOPTED BY THE COUNCIL

In accordance with Section 129(1) of the MFMA it is **RECOMMENDED** to the Council:-

1. That the Council, having fully considered the Annual Report Oversight Report 2021/22 of the Stellenbosch Municipality, **ADOPTS** the Annual Report Oversight Report 2021/22;
2. That the Council, having fully considered the Annual Report 2021/22, attached hereto as Annexure B, **APPROVES** the Annual Report 2021/22 without any reservations;
3. That the Annual Report Oversight Report 2021/22 be made public in accordance with Section 129(3) of the MFMA, and;
4. That the Annual Report Oversight Report 2021/22 be submitted in accordance with Section 129(2) and 132(2) of the MFMA to the Auditor General of South Africa, Provincial Treasury: Western Cape, Department of Local Government: Western Cape and the Provincial Legislature: Western Cape.

CLLR W. PETERSEN
CHAIRPERSON: MPAC

MPAC Site Visits

New Klapmuts Primary and High School

Klapmuts Transfer Station

Wemmershoek - WWTW

Ida's Valley FLISP ERF 9445

Longlands Housing Project

The housing projects namely the Franschhoek: Meerlust and La Motte as well the Northern Extension – Kayamandi Watergang were also visited. Officials showed the MPAC where the land is and what housing development will be earmarked for.

The maps (of housing projects) are listed in the draft Annual Report 2021/22.

212	Table 232: Total number of employees in the Section: Legal Services	What interventions are in place to fill vacancies in the Legal Section?	The admin position that is vacant will be filled as soon as it is evaluated. The Chief Legal Officer is currently filled and assists with all legal matters in collaboration with the Director.	HR
223	Table 241: Occupational Categories – Race	Is there a reason why the male targets are higher than the females?	These are not targets, but rather a snapshot of the workforce. Targets are set by StatsSA (EAP)	HR
224	Table 243: Vacancy rate per post and functional level	<ul style="list-style-type: none"> It is contradicting the filling of a critical post, and the challenges per department indicate there is a lack of staff to fulfill the services. Why is the band so high under," Skilled technical and academically qualified workers, junior management, supervisors, foremen, and superintendents" ...? Filled - 364 Vacant - 25 	<p>The 25 vacant posts are across the municipality. No funded post for electricity was advertised or filled during the year under review.</p> <p>Funded vacancies were: 96</p> <p>Additional vacancies fall under the funded band: Semi-skilled</p>	HR
		Clarify the new appointments and termination is the same total	<p>Engagement- 77</p> <p>Terminations- 82</p> <p>Turnover Rate thus: 7.19%</p>	HR
225	Table 245: Injuries per Directorate	Why are the IODs so high for Community and Protection Services	<p>Injuries in Operational Services are normally higher due to the nature of the work of Law enforcement officers such as defending themselves during violent incidents to attend to.</p> <p>And Traffic Officers are attacked by public members. They are experiencing public violence.</p>	HR

CORPORATE SERVICES				
Page no.	Table / Paragraph Graph	Comment/s	Response	Responsible Department
			The total refers to the entire Directorate and not Protection services.	
225	Table 246: Sick Leave	Clarify why the totals are so high for Corporate Services and Community and Protection Services and what plan is in place to monitor it.	<p>The high sick leave is being investigated by provided documents. Misused sick leave is being monitored. More than a third of it a year, actions were captured towards the employees.</p> <p>The municipality indicated that the percentage indicates that there was a decrease of sick leave from the previous financial year.</p>	HR
226	Table 247: Approved Policies for the year under review	Are the policies and plans discussed at the LLF?	Only policies and not strategies and plans (No operational plans) are discussed at LLF.	HR
	Table 248: Policies still to be developed	The work-from-home policy – does the municipality receive input for this policy which will be determined thereof?	<p>The policy depends on the nature of work to be able to work from home.</p> <p>The trade unions have a say in the process and refer it back to management for further discussion and approval.</p>	HR
	Table 249: Skills Matrix	Clarify why the officials who received training are lower than identified.	Either training did not go ahead or people were not present who were identified due to operational reasons. The municipality requires the identified officials to sign an agreement that they will work the value back of the training.	HR
		Can the type of training also be presented?	The WSP already reflects the type of training needed under the personal development plan	HR

3. Directorate: Financial Services

The questions raised at the MPAC meeting, were addressed by the CFO. The finance department will supply the MPAC with all financial tables as there were calculation errors identified. The variances should be recalculated and addressed in the updated Annual Report 2021/22.

The CFO explained to MPAC the technicalities of how the Annual Financial Statements (AFS) were calculated as well that the AFS cannot be changed, but take note of the grammar errors identified.

The Annual Report can be updated but not the AFS as the Auditor General already concluded the audit for the year under review.

4. Directorate: Infrastructure Services

TABLE 3: FEEDBACK- DIRECTORATE: INFRASTRUCTURE SERVICES

INFRASTRUCTURE SERVICES				
Page no.	Table / Paragraph Graph	Comment/s	Response	Responsible Department
32	Table 21: Key Basic Service Delivery Highlights - Network upgrades, Langrug	Confirm if the 20 connections were done for the entire financial year under review	The municipality confirmed that the, 20 connections were done in Langrug during 2021/22 financial year. Major electrical infrastructure upgrade was necessary before more connections can be realised. The network upgrades have been concluded and more connections will be made going forward.	Electrical Services
32		It is noted from the previous Annual Report that a lack of staff is a critical issue.	The municipality confirmed that it is critical, especially with the added responsibility of loadshedding, maintenance of streetlights in Eskom areas of supply as well as alternative energy initiative projects. Recruitment and Selection of staff to be expedited. Implement the Staff Attraction and Retention Policy.	Electrical Services
34		What can be done to address the shortage of electrical staff?	The Electricity Act is clear in terms of what type of qualification the employee must obtain to work on what type of electrical infrastructure. The municipality struggles to compete with the City of Cape Town's salary scale. Exemptions only apply to Section 56 Managers.	Electrical Services
34	Table 22: Key Basic Service Challenges - Electrical Streetlights	Proposed that the municipality ask for an exemption from the Government in order to obtain the necessary qualified electrical or any specialised staff	The municipality indicated that the exemption has been refused by the National Minister. However, the municipality is working with the LGSETA to get the staff trained as electricians.	Electrical Services
34		Confirm if the assessment will be for the entire WC024.	The municipality confirmed that it will be for the entire WC024, especially the areas where streetlights were handed over to the municipality by Eskom.	Electrical Services
34		Indicate the areas of streetlight infrastructure that are in a dilapidated state.	Klapmuts, La Motte, Wemmershoek, Vlothenburg / Digtebij.	Electrical Services
101	Under heading 3.4 Water Provision: Ninth paragraph, "118 reservoirs /	Indicate the total of tanks / sumps / water towers as per the network and infrastructure.	The municipality indicated that no new water tanks / reservoirs were completed in the 2021/22 financial year.	Water and Waste Water Services

INFRASTRUCTURE SERVICES				
Page no.	Table / Paragraph Graph	Comment/s	Response	Responsible Department
	holding tanks / sumps and water towers, 69 water pump stations, 41 pressure-reducing valve installations and 704 kilometres of pipeline. The system is fully controlled and operated by a telemetry system...."		The total of 118 storage facilities for water comprises of reservoirs / sumps and towers. Impossible to break this further down.	
101	The first paragraph, "The non-revenue water for the 2021/22 financial year is 21.9% which is below the target set of 25%. The real physical network losses are at 12.7% which is below the best practice value of 15%."	Explain why losses were so high for the year under review.	The municipality confirmed that the losses were within the norm. There is a Water Service Delivery Plan which will capture the issues and measure how to address them.	Water and Waste Water Services
105	Table 133: Water service delivery levels	Was the WSDP approved? The levels are not consistent	The municipality confirmed that the appointment of the consultant was only done on 01 July 2022. The WSDP was thus completed in the 2022/23 financial year.	Water and Waste Water Services
110	Heading 3.8.1 Waste Management	Confirm the date of approval of the Waste Management License Variation Application from the Provincial Department of Environmental Affairs and Development Planning	The municipality indicated that the Department of Environmental Affairs and Development Planning decided that they were no longer going to vary the Waste Management License (WML) but would rather issue a new WML for the site. This new WML was issued on 31 January 2023 – License number 19/2/5/1/B4/45/WL0182/22	Waste Management
112	Figure 11: Example of the streets cleaning by the Section Area Cleaning in Franschoek	Why were the skips removed in Cloeteville?	The municipality indicated that the area became an illegal dumping site with large volumes of waste being dumped next to the skip and was attracting many users from outside of the Cloeteville area. The skip was becoming a nuisance and a health hazard to the residents / households of Cloeteville.	Waste Management
114	Figure 12: Wheelie bin distribution	Investigate the stealing / vandalism of wheelie bins. What measures are in place?	The municipality indicated that the stolen wheelie bins must be reported to the South African Police Service for further investigation. The Municipal By-Law does prevent wheelie bins from being used for other purposes.	Waste Management
116	Door-to-door recycling collection	Confirm if the door-to-door recycling collection commenced in all the municipal areas	The municipality indicated that the door-to-door recycling service started initially as a pilot project within the municipality and has grown over the years. Areas are being added over time to this programme.	Waste Management
		List the areas which were serviced.	The municipality confirmed that the areas currently being serviced are: <ul style="list-style-type: none"> • Uniepark • Karindal • Rozendal • Mostertsdrift • Simonswyk • Universiteitsoord • Die Boord • Brandwacht 	Waste Management

INFRASTRUCTURE SERVICES

			<ul style="list-style-type: none"> • Krigeville • Onder Papegaaiberg • Devon Valley • Kleinvallei • La Colline • Die Rand • Die Laan • Dalsig • Bo-Dalsig • Paradyskloof • Ida's Valley • Lindida, Raithby • Techno Park • Cloeterville • La Colline, Uitsig • Kylemore • Jamestown • Pniël • Franschoek <p>Additional areas will be added in the future, to eventually service all areas.</p>	
117	Heading B: Disposal: Stellenbosch Landfill, Paragraph 9	Indicate which contractor was appointed to conduct gas monitoring activities as per legislative requirements	The municipality indicated that the gas monitoring at the Stellenbosch Landfill Site is being done by Levego Environmental Services (Pty) Ltd, appointed by the municipality, B/SM 40/21.	Waste Management
157	Heading 3.12.3.3: Non-Motorised Transport Plan	There was a notion to undertake a study to determine whether the CBD can be a vehicle-free area. Is there any update on the notion?	The municipality indicated previously the community were not in favour that the Municipality prohibiting vehicles from the CBD. The municipality's strategy is to reduce the number of vehicles in the CBD. The municipality is currently busy with programmes to consolidate and upgrade parking areas in the CBD, to ultimately reduce the amount of on-street parking, providing for better non-motorised transport facilities. These projects will have an impact within the next 2-8 years.	Roads and Transport
157	Heading 3.12.3.5: Parking	Confirm if there is a parking policy in place.	The municipality confirmed that a Parking - By-law was approved by the Council on 2021/04/28.	Roads, Transport and Stormwater
160	Heading 3.13.1 : PMU	Which departments / sections are vested in the department, PMU and what type of projects are they working on?	The municipality noted that the Department: PMU undertake various projects for the respective directorates within the municipality.	PMU
161-167	All images	Place better-quality images in the Draft Annual Report. Soften the edges – enlarge the legends	The municipality take note and will update the Annual Report with clear images, where possible.	PMU

5. Directorate: Planning and Economic Development

TABLE 4: FEEDBACK- DIRECTORATE: PLANNING AND ECONOMIC DEVELOPMENT

PLANNING AND ECONOMIC DEVELOPMENT SERVICES				
Page no.	Table / Paragraph Graph	Comment/s	Response	Responsible Department
34-35	Third paragraph: "Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives..."	Does the municipality have any business relationships / partnerships with businesses in Stellenbosch?	<p>The municipality has established the Planning and Development Forum through which quarterly meetings are held with businesses regarding development within Stellenbosch municipal area.</p> <p>Other organisations that the municipality is in partnership with are Ranyaka NPC and Stellenbosch Network. They work with an extensive number of SMMEs to which they mentor and offer training too.</p> <p>The municipality indicated that various forums are held with businesses where economic prospects are discussed and to network.</p>	LED
		Indicate which jobs are for the town of Stellenbosch to curb unemployment.	<p>Stellenbosch Municipality as part of the Expanded Public Works Programme (EPWP) has created 952 job opportunities for Stellenbosch Towns and Kayamandi.</p> <p>The Constitution places great responsibility on municipalities to facilitate economic development, and therefore not directly responsible for creating jobs, but rather to create an enabling environment for employment opportunities.</p>	LED
30	Heading C: Unemployment	List all types of employment strategies that involve youth employment	<p>Stellenbosch Municipality has developed a JobSeekers Database which is aimed at creating a database of all job-seeking residents within the municipal area. The database makes provision for skilled and unskilled labour, and currently, the EPWP participants are drawn from the JobSeekers Database.</p> <p>The municipality has further allocated funding for the Training of Small Micro and Medium Enterprises (SMMEs) and also to develop a database of all SMMEs. The purpose of the training and the database is to link the SMME within the municipality with Department: Supply Chain Management SCM Policy to ensure that local procurement of goods and services occurs.</p>	LED
		Do the strategies entail solutions on how to create work for the youth?	The target groups for the EPWP are women, youth and the disabled.	LED
32-33	Table 21: Erf 7001, Cloetesville ("Soekmekaar")	Confirm when the consultation took place and did the project was implemented and what is intended to be established in the area.	<p>An official notice was published in the newspaper (Die Burger) on 30 October 2020 and on the municipal website to solicit public inputs / objections regarding Erf 7001, Cloetesville. Considering the inputs from the community, the Council resolved that a medium to high-gap housing development ranging from R500 000 to R1.2 million, be developed.</p>	Housing Development

			Further public participation will take place when obtaining development rights. The preferred layout will serve at the Council for approval to appoint an implementing agent.	
		Are there projects that will range in a lower income criteria	As mentioned above, it is the combined income that determines the qualification.	Housing Development
		How will the high volume of informal settlements, water supply, and servitudes influence the project as per the area?	A professional team was appointed to overlook risks into consideration. The housing pipeline gives a bigger picture to address certain projects.	Housing Development
33	Table 21: Jamestown (Phases 2, 3 and 4)	The project was in previous Annual Reports and stated that it will be finalised over two years. Indicate why the project taking so long for implementation.	The previous tender was cancelled due to legal matters and had to be re-advertised in June 2021. A service provider was appointed in June 2022 to obtain development rights. The service provider had submitted a subdivisinal application for Phases 2 and 3 and if approved, implementation for the project could be implemented during the 2023/24 financial year.	Housing Development
33	Table 21: Erf 64, Kylemore	Is there a clear plan in place to address Erf 64, Kylemore?	Yes, there is a clear plan, but it can only be finalised through a public participation process. The Housing Development Agency has been appointed by the municipality to manage the transfer of the land from the National Department of Public Works as well as to obtain development rights on Erf 64, Kylemore.	Housing Development
33	Table 21: Housing support and demand	Provide the list of the 98 beneficiaries that were approved for the Longlands housing project.	According to the POPI Act, personal information cannot be made public without the consent of a person.	Housing Administration
124	Heading 3.9.2.3: Erf 7001, Cloetessville – Paragraph: " This is in line with feasibility studies that have been conducted for the GAP housing market in Stellenbosch."	<p>The housing is only focused on high-gap development and not low and middle-class housing.</p> <p>What interventions does the municipality have by engaging the Government to implement and or address the matter?</p>	<p>The development is earmarked for medium to high-gap housing opportunities between the ranges from R500 000 to R1.2 million.</p> <p>It has been found that one of the programmes most suitable to assist families that earn more than R3 501 is Social Housing. Social Housing provides affordable rental hence the municipality is in the process to implement Social Housing on Farms 81/2 and 81/9, Stellenbosch to address the need for low to medium-income categories. The Inclusionary Zoning Policy is currently in the process to look at affordable housing provisions but does not apply to "all zoning matters"</p>	Housing Development
126	Heading 3.9.2.5: Kayamandi Town Centre	Does the current mSDF make provision for agriculture and reinforce the outer urban edges to be inclusive of the current urban edges? If not then the mSDF should be revisited and reviewed as the projects listed in Annual Report said it has a lot of restrictions on the	<p>The current mSDF urban edges give the outline of the envisaged urban development. Agricultural areas outside of the urban edge are discouraged by urban growth areas over the medium to long term.</p> <p>The municipality indicated that developers need to apply when developing outside the urban edge.</p>	Development Planning

		urban edges where development takes place.		
127	Heading 3.9.2.6 Northern Extension, Stellenbosch	When will the project start?	The process that must be followed is to rezone agricultural land to residential. The appointed service provider has completed most of the studies and thereafter the application for development rights will be submitted to National, Provincial departments for comments as well as the Land Use Planning Department at the municipality. Project to be completed during 2023/24 financial years.	Housing Development
139	Table 5: Survey backyard dwellers in Klapmuts	What was done with the backyard dwellers as stated in the survey? Was anything built to address the backyard dwellers as 94% residing in the same structure and the high amount that were interviewed?	Stellenbosch Municipality built more than 2 000 dwelling units in Klapmuts since the early 2000s specifically to address amongst others backyarding and to attempt to eradicate backyarding. However, the property owners do not break down the structures as agreed and in fact, take on new backyarders in the same structure. Moreover, the municipality constructed the last ±800 units in the 2017/2018 financial year, which should have addressed the existing backyarders, excluding the non-qualifiers. However, many of the backyarders interviewed in the survey were found at the back of these properties. 94% were found in the same structure. The municipality has been actively busy with attempts to procure land in the Klapmuts area to deal with a variety of housing typologies which would include households that do not qualify for the BNG housing subsidy.	Informal Settlements
143	Table 158: Housing waiting list as at 30 June 2022	When will the backlog be addressed	Address the backlog of housing opportunities in the WC024 is an extremely complex matter, and the following must be taken into consideration: <ul style="list-style-type: none"> • Funding made available from National and Provincial governments; • Bulk and linked capacity for each project and subsequent budgeting thereof; and • The number of housing opportunities created on the housing pipeline is ±16 685. If taken all of the factors into account and especially the funding constraints, the current state fiscus is tremendously limited and therefore it could be between 20 – 30 years to address the current housing needs.	Informal Settlements
145- 146	Heading 3.9.7.3: Administration of public rental stock	Rental stock: Who's responsibility is it when the structure is damaged? Such as tabs, door handles etc.	Housing consumer education is being rolled out to educate the tenants in rental stock on issues around anti-social behaviour in public rental flats and how to address it. A lease agreement that is signed by tenants clearly stipulates the	Housing Administration

			responsibilities of the lessor and the lessee. Coupled with that Housing Consumer Education programmes are rolled out as and when a need arises concerning any rental stock issues.	
		Was there consideration to give the tenants ownership of the rental stock?	No, this is housing stock for rental purposes.	Housing Administration
147	Heading 3.9.7.5: Maintenance of rental stock	Does the municipality gain any profit from the rental stock?	This is a public stock and rental is affordable to accommodate different income groupings.	Housing Administration
173-174	Heading C: Future settlements along the Baden Powell Drive Adam Tas – R304 corridor	Is there a forum with agriculture and the municipality to discuss agricultural development which can then be taken forward to the Provincial forums to discuss the broader possibility of future developments?	There is no formal forum with the Department of Agriculture although officials have a good working relationship. The municipality has an open-door policy to discuss development interventions.	Development Planning
		Will the Inclusionary Zoning policy require only developers from the Stellenbosch area to comply and to what extent will it be enforceable?	The Inclusionary Zoning Policy, once adopted by the Council, will apply to all new development seeking land use approval. As part of the planning permissions process conditions of approval related to inclusionary housing, will be imposed.	Development Planning

6. Directorate: Community and Protection Services

TABLE 5: FEEDBACK- DIRECTORATE: COMMUNITY AND PROTECTION SERVICES

COMMUNITY AND PROTECTION SERVICES				
Page no.	Table / Paragraph Graph	Comment/s	Response	Responsible Department
34	<ul style="list-style-type: none"> Table 22: Illegal Dumping 	<p>This is a by-law transgression and law enforcement matter. What measures will the municipality put in place to monitor illegal dumping?</p> <ul style="list-style-type: none"> Clarify what the role of the Environmental Youth Coordinator is. 	Law Enforcement responds to complaints related to illegal dumping and also follows up on information provided by Waste Management.	Protection Services
61	<ul style="list-style-type: none"> Heading: Intergovernmental Relations, F: Community and Protection Services 	<ul style="list-style-type: none"> Indicate the outcome of the engagements with RTIA, RTMC, and the Director of Public Prosecutions relating to the AARTO Act. 	In January 2022, Pretoria High Court ruled AARTO to be unconstitutional. November 2022 Constitutional Court reserved judgment in the application against AARTO's constitutionality.	Protection Services
183	<ul style="list-style-type: none"> Heading: Libraries 	<ul style="list-style-type: none"> Libraries are not a municipal function. Indicate if the municipality claims the funds back from the Province for running the libraries. 	Library Services is an underfunded service. Funding is provided by the Province, but because it is an underfunded mandate, the resulting consequence is that the municipality must make funding available for this function.	Library Services
188	<ul style="list-style-type: none"> Heading: Cemeteries, paragraph 1 	<ul style="list-style-type: none"> How far is the completion for the Kylemore cemetery? Is it a municipal property or private as the municipality built a road and put up gates If not, will Province transfer the property to the Municipality? 	The property does belong to Stellenbosch Municipality. The matter did serve before the MPT. A decision with requirements has been taken by the MPT. The department is currently in the process of rezoning the erven so that they can be used for cemetery purposes.	Cemeteries and Parks
195	<ul style="list-style-type: none"> Heading: Air Quality and Pollution Control 	<ul style="list-style-type: none"> Does the municipality have the capacity for Air quality and noise pollution? 	Community Services have a dedicated section that deals with air quality and noise pollution.	Community Services
206	<ul style="list-style-type: none"> Heading: Community Halls and Facilities 	<ul style="list-style-type: none"> Indicate why the project was signed off at the community hall in Cloetessville if the electrical plugs and lights do not work. 	<p>The municipality indicated that there were no defects when the project was signed off.</p> <p>All maintenance should be reported to the relevant department.</p>	Corporate / Community Services

ANNUAL REPORT 2021/22

STELLENBOSCH
STELLENBOSCH • PNIEL • FRANSCHHOEK
MUNISIPALITEIT • UMASIPALA • MUNICIPALITY

ANNUAL REPORT 2021/22

The Draft Annual Report is compiled in terms of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003)

List of Abbreviations

Abbreviation	Description
ABS	Access to Basic Services
ACDP	African Christian Democratic Party
AGSA	Auditor-General of South Africa
AH	Agri-Hub
AMEU	Association of Municipal Electricity Utilities
ANC	African National Congress
ANPR	Automatic Number Plate Recognition System
APAC	Audit and Performance Audit Committee
ATC	Adam Tas Corridor
BAC	Bid Adjudication Committee
BBBEE	Broad-Based Black Economic Empowerment
BEC	Bid Evaluation Committee
BICLS	Bulk Infrastructure Development Contribution Levies
BPAMS	Building Plan Approval Management System
CAC	Civic Amenity Centre
CAPEX	Capital Expenditure
CBD	Central Business District
CBP	Community-Based Planning
CCTV	Closed Circuit Television
CDW	Community-Development Worker
CEB	Compressed Earth Block
CEO	Chief Executive Officer
CFO	Chief Financial Officer
CGI	Compliance and Governance Index
CIGFARO	Chartered Institute of Government Finance, Audit and Risk Officers
CITP	Comprehensive Integrated Transport Plan
CoCT	City of Cape Town
COGTA	Cooperative Governance and Traditional Affairs
COPE	Congress of the People
CRSES	Centre for Renewable Energy Studies
CWDM	Cape Winelands District Municipality
DA	Democratic Alliance
DAG	Development Action Group
DC	Development Cost
DCAS	Department of Cultural Affairs and Sport
DEA and DP	Department of Environmental Affairs and Development Planning
DEDAT	Department of Economic Development and Tourism
DEFF	Department of Environment, Forestry And Fisheries
DOE	Department of Education
DORA	Division of Revenue Act
DSD	Department of Social Development
DWS	Department of Water and Sanitation
ECD	Early Childhood Development

Abbreviation	Description
EE	Employment Equity
EHP	Emergency Housing Policy
EIA	Environmental Impact Assessment
EPWP	Expanded Public Works Programme
ESTA	Extension of Security of Tenure Act

WTP	Water Treatment Plan
WWF	World Wildlife Fund

TABLE OF CONTENTS

CHAPTER 1: EXECUTIVE MAYOR'S FOREWORD AND EXECUTIVE SUMMARY	1
COMPONENT A: EXECUTIVE MAYOR'S FOREWORD.....	1
COMPONENT B: MUNICIPAL MANAGER'S OVERVIEW.....	3
COMPONENT C: EXECUTIVE SUMMARY AND MUNICIPAL OVERVIEW.....	5
1.1 INTRODUCTION.....	5
1.2 STRATEGIC FOCUS AREAS	8
1.3 CORE PRINCIPLES IN EXECUTING THE STRATEGY	9
1.4 ALIGNMENT WITH INSTITUTIONAL STRUCTURES AND PROCESSES	10
1.5 THE TOOLS OF GOVERNANCE.....	10
1.6 DEMOGRAPHICAL OVERVIEW OF THE GREATER STELLENBOSCH AT A GLANCE	12
1.7 STATE OF THE GREATER STELLENBOSCH.....	13
1.8 WARD DEMARCATION	15
1.9 SOCIO-ECONOMIC CONTEXT.....	17
1.9.1 Population Growth.....	18
1.9.2 Sex Ratio	18
1.9.3 Age Cohorts	18
1.9.4 Household sizes.....	19
1.9.5 Population density.....	19
1.9.6 Education	20
1.9.7 The learner enrollment, learner-teacher ratio and learner retention rate.....	20
1.9.8 Education Infrastructure, Number of schools and no-fee schools	21
1.9.9 Schools with libraries and media centres.....	21
1.9.10 Education Outcomes (Matric Pass Rates).....	22
1.9.11 Health.....	22
1.9.12 Emergency Medical Services.....	23
1.9.13 HIV / AIDS and TB.....	23
1.9.14 Child Health	23
1.9.15 Maternal Health.....	24
1.9.16 Poverty	24
1.9.17 Basic Service Delivery	26
1.9.18 Safety and Security	27
1.9.19 Economy and Labour Market Performance.....	29
1.10 BASIC SERVICE DELIVERY HIGHLIGHTS AND CHALLENGES	32
1.10.1 Key Basic Services Delivery Highlights	32
1.10.2 Key Basic Services Challenges	34
1.11 PROPORTION OF HOUSEHOLDS WITH MINIMUM ACCESS TO BASIC SERVICES	35
1.12 FINANCIAL VIABILITY HIGHLIGHTS	35
1.13 FINANCIAL VIABILITY CHALLENGES	36
1.14 FINANCIAL OVERVIEW	36
1.14.1 Operating Ratios	36
1.14.2 Total Capital Expenditure	36
1.15 MUNICIPAL STANDARD CHART OF ACCOUNTS	37
1.16 ORGANISATIONAL DEVELOPMENT OVERVIEW	37
1.17 MFMA COMPETENCIES	37
1.18 AUDITOR GENERAL OF SOUTH AFRICA'S REPORT	38
CHAPTER 2: GOOD GOVERNANCE AND PUBLIC PARTICIPATION	40
2.1 INTRODUCTION.....	40
2.2 NATIONAL KEY PERFORMANCE INDICATORS - GOOD GOVERNANCE AND PUBLIC PARTICIPATION	40
2.3 PERFORMANCE HIGHLIGHTS - GOOD GOVERNANCE AND PUBLIC PARTICIPATION	40
2.4 CHALLENGES - GOOD GOVERNANCE AND PUBLIC PARTICIPATION	41

2.5	PUBLIC SATISFACTION WITH MUNICIPAL SERVICES	41
	COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE	42
2.6	POLITICAL GOVERNANCE STRUCTURE.....	42
2.7	COUNCIL – 01 JULY 2021 TO 30 JUNE 2022	42
2.8	EXECUTIVE MAYORAL COMMITTEE	45
2.8.1	Portfolio Committees	46
2.8.2	Section 79 Committees	54

CHAPTER 4: ORGANISATIONAL DEVELOPMENT PERFORMANCE.....223

4.1	INTRODUCTION TO THE MUNICIPAL WORKFORCE	223
4.2	EMPLOYMENT EQUITY	223
4.3	OCCUPATIONAL CATEGORIES - RACE.....	224
4.4	DIRECTORATES BY RACE	224
4.5	VACANCY RATE.....	224
4.6	TURNOVER RATE	225
4.7	MANAGING THE MUNICIPAL WORKFORCE	225
4.8	SICK LEAVE.....	226
4.9	HUMAN RESOURCES POLICIES AND PLANS.....	226
4.10	CAPACITY BUILDING OF THE MUNICIPAL WORKFORCE.....	227
4.11	SKILLS MATRIX.....	227
4.12	SKILLS DEVELOPMENT – TRAINING PROVIDED AND BUDGET ALLOCATION.....	228
4.13	MANAGING THE MUNICIPAL WORKFORCE EXPENDITURE	228
4.13.1	Personnel Expenditure	228

CHAPTER 5: FINANCIAL PERFORMANCE230

	COMPONENT A: STATEMENTS OF FINANCIAL PERFORMANCE	230
5.1	FINANCIAL SUMMARY.....	230
5.2	REVENUE COLLECTION BY VOTE.....	232
5.3	REVENUE COLLECTION BY SOURCE	232
5.4	OPERATIONAL SERVICES PERFORMANCE	233
5.5	FINANCIAL PERFORMANCE PER MUNICIPAL FUNCTION	234
5.5.1	Water Services	234
5.5.2	Sanitation Services	235
5.5.3	Electricity Services	235
5.5.4	Waste Management Services (Refuse collections, Waste disposal and Recycling)	236
5.5.5	Integrated Human Development.....	236
5.5.6	Roads and Stormwater	237
5.5.7	Town and Spatial Planning	237
5.5.8	Local Economic Development (LED)	238
5.5.9	Libraries	238
5.5.10	Community Development.....	239
5.5.11	Cemeteries.....	239
5.5.12	Traffic Services and Law Enforcement.....	240
5.5.13	Fire Services and Disaster Management	240
5.5.14	Holiday Resorts and Campsites	241
5.5.15	Sport grounds, Parks and Swimming Pools.....	241
5.5.16	Community Halls and Thusong Centres.....	242

5.5.17	Office of the Municipal Manager.....	242
5.5.18	Human Resource Services	243
5.5.19	Information and Communication Technology (ICT) Services.....	243
5.5.20	Legal Services	244
5.5.21	Property Management	244
5.5.22	Financial Services	245
5.5.23	Internal Audit.....	245
5.5.24	Administration	246
5.6	GRANTS.....	246
5.6.1	Grant Performance.....	246
5.6.2	Level of Reliance on Grants and Subsidies	247
5.7	ASSET MANAGEMENT	247
5.8	REPAIRS AND MAINTENANCE	248
5.9	FINANCIAL RATIOS BASED ON KEY PERFORMANCE INDICATORS	248
5.10	IDP REGULATION FINANCIAL VIABILITY INDICATORS	248
5.11	BORROWING MANAGEMENT	248
5.12	EMPLOYEE COSTS	248
	COMPONENT B: SPENDING AGAINST CAPITAL BUDGET	249
5.13	CAPITAL EXPENDITURE	249
5.13.1	Capital Expenditure by Assets Programme	249
5.13.2	Sources of Finance.....	251
5.13.3	Capital Spending On 5 Largest Projects.....	252
5.13.4	Basic Services and infrastructure backlogs - Overview	252
5.13.5	Integrated Urban Development Grant (IUDG)	253
5.14	CASH FLOW	254
5.15	GROSS OUTSTANDING DEBTORS PER SERVICE	255
5.16	DEBTORS AGE ANALYSIS.....	255
5.17	BORROWING AND INVESTMENTS	256
5.18	ACTUAL BORROWINGS.....	256
5.19	MUNICIPAL INVESTMENTS	256
	CHAPTER 6: AUDITOR GENERAL OF SOUTH AFRICA AUDIT FINDINGS.....	257
2.1	INTRODUCTION.....	257
	COMPONENT A: AUDITOR-GENERAL OF SOUTH AFRICA OPINION 2020/21	257
2.2	AUDITOR GENERAL OF SOUTH AFRICA REPORT 2020/21	257
	COMPONENT B: AUDITOR-GENERAL OPINION 2021/22	258
2.3	AUDITOR GENERAL OF SOUTH AFRICA REPORT 2021/22.....	258
	ANNEXURE A: ANNUAL FINANCIAL STATEMENTS 2021/22	259
	ANNEXURE B: ANNUAL PERFORMANCE REPORT 2021/22	260
	ANNEXURE C: AUDIT AND PERFORMANCE AUDIT COMMITTEE ANNUAL REPORT 2021/22	261
	ANNEXURE D: REPORT OF THE AUDITOR GENERAL OF SOUTH AFRICA 2021/22	262

CHAPTER 1: EXECUTIVE MAYOR'S FOREWORD AND EXECUTIVE SUMMARY

COMPONENT A: EXECUTIVE MAYOR'S FOREWORD

It is an honour to present the Annual Report of Stellenbosch Municipality for the 2021/22 financial year. This report builds on the municipality's reporting in previous years and aligns as far as possible with the recommendations of the 2016 King Report on Corporate Governance for South Africa (or King IV) as well as internationally accepted standards for integrated reporting.

In my capacity as Executive Mayor over the past financial year, I have been hugely impressed by how not only the municipality's employees, but also most residents have embraced our vision of becoming a true Valley of Opportunity and Innovation.

Our municipality, with all its unique towns, stands as a shining example to the rest of South Africa of what can be achieved when people work together towards a shared vision of a better future.

Thank you to all the residents, stakeholders, investors, and visitors for always keeping us on our toes and for supporting us in our efforts to achieve our goals. Based on the achievements of the past financial year, in many instances in the face of significant challenges, I have every confidence that, together, we will continue to make steady progress in the years to come. At a management and a political level, our organisation stands strong, and it is from this firm foundation that we can focus all efforts on improving lives and livelihoods.

This report provides information about the municipality's financial, operational, social, and environmental performance over the past 12 months under review, namely the period from 01 July 2021 to 30 June 2022. It also reflects on the progress made towards reaching our objectives as set out in the Integrated Development Plan (IDP).

The Annual Report will show that the Stellenbosch Municipality is in a very stable position, with excellent financial controls in place. We are committed to good governance practices, and our zero-tolerance approach to misconduct and corruption ensures that every cent of public money is spent on the people.

The maintenance, upgrade, and development of our infrastructure remained key priorities for Council. During the period under review, special attention was given to the upgrading of bulk infrastructure and the maintenance of critical infrastructure to ensure that service delivery can continue on a sustainable basis.

Team Stellenbosch has shown incredible resilience and an ability to pull together as a government and as residents. Thank you to every municipal employee who is working to make excellent service delivery happen and to ensure that this great municipality becomes even better. This report must

inspire all of us to work even harder to position Stellenbosch firmly as one of the best-run and financially stable municipalities in the country.

The content of this report is linked to various material issues in the municipality's IDP and other sector plans. These are issues that we intend to address as part of delivering our service mandate in the context of our five strategic focus areas and long-term vision.

I believe that the 2021/22 Annual Report will provide you with a fair and accurate overview of the administration's financial, operational, social, and environmental performance for the 12 months under review.

ADV GESIE VAN DEVENTER
EXECUTIVE MAYOR

COMPONENT B: MUNICIPAL MANAGER'S OVERVIEW

In reflecting on the 2021/22 financial year, I am pleased to report that the Stellenbosch Municipality has performed well concerning service delivery, governance, and financial management.

The past year has been both challenging and rewarding. During this period, Stellenbosch lived through loadshedding as well as the Covid-19 pandemic. Both tested the resilience and the very fabric of our residents, officials, management team and stakeholders. Despite these events, we have collectively emerged stronger.

This report provides information on the municipality's performance for the 12 months

under review and will show that we have weathered the COVID-19 storm and delays caused by the lockdown as best as we could.

There were unavoidable delays in construction on projects due to the lockdown period, which impacted negatively on the timely completion of some projects, but essential municipal service delivery and emergency services continued uninterrupted. We had a local government election during the year under review and the transition between the two councils was seamless, which is a credit to the maturity of our organisation and its leadership.

I am proud of the clean audit opinion we once again received from the Auditor General of South Africa (AGSA). A clean audit demonstrates good management, effective control measures, and compliance with audit requirements. My sincere appreciation to my management team, all our officials, and the Council for your dedication towards achieving our clean audit status.

The Annual Report 2021/22 will show that the Stellenbosch Municipality is fiscally healthy, with all senior management positions filled and all municipal departments fully operational, albeit with some capacity constraints within our planning department.

As a caring local government guided by our values of innovation, integrity, accountability, and transformation, we have continued to invest heavily in infrastructure upgrades, development, and maintenance, as this report will demonstrate. Key priorities of the municipality remain safety and security, ensuring dignified living opportunities, and creating an environment conducive to economic growth and opportunities.

The municipality is not in the business of making promises. Commitments are monitored and reported on, but if not fulfilled, action is taken. We are an outcomes-based organisation that is open to the scrutiny of residents. Thank you to all municipal employees, management, and executives for your diligence, passion, and hard work over the past year. It is an honour to be part of a municipality that is so determined to make a positive difference in the lives of those it serves.

We live in a difficult economic climate characterised by higher-than-usual inflation, supply chain management disruptions due to global shocks, a growing climate change impact and ongoing energy security challenges. Stellenbosch is determined to overcome these challenges in the areas we can control and to collaborate with our stakeholders to build resilience.

I extend my sincere appreciation to the Executive Mayor and Mayoral Committee, the entire Council, the Audit and Performance Audit Committee (APAC), my management team, and all our officials for their contribution to delivering on our vision of becoming a true Valley of Opportunity and Innovation for all.

Let this Annual Report reflect on the past year's challenges and achievements and motivate us to do even better as we head into the future together.

MS GERALDINE METTLER
MUNICIPAL MANAGER

COMPONENT C: EXECUTIVE SUMMARY AND MUNICIPAL OVERVIEW

1.1 Introduction

This Annual Report 2021/22 addresses the performance of the Stellenbosch Municipality, in the Western Cape, South Africa, in respect of its core legislative obligations. Local government must create a participatory framework that defines and enhances the relationship between elected leaders and their communities. This requires that the municipal councils provide regular and predictable reporting on programme performance and the general state of affairs in their locality.

The report reflects on the performance of the Stellenbosch Municipality for the period of 01 July 2021 to 30 June 2022. The layout of the annual report is prepared in terms of Section 121(1) of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), in terms of which the municipality must prepare for each financial year.

The Annual Report comprises six chapters with the following broad overview:

- Chapter 1:** An overview of the municipality's overarching strategy, accountability processes, social and demographic profile, and key highlights and challenges regarding finance, institutional transformation, and key basic service delivery.
- Chapter 2:** Details about the governmental workings of the municipality and addressing the key aspects of good governance.
- Chapter 3:** Highlights the municipality's performance for the year, with a focus on service delivery and the municipality's predetermined objectives.
- Chapter 4:** Provides insight into the municipality's human resources and organisational management areas, focussing on organisational structure and legislation.
- Chapter 5:** An overview of the municipality's financial performance, reflecting on the municipality's financial position, assets, cash flow, and intergovernmental grants received by the municipality.
- Chapter 6:** An overview of the audit key findings as per the Auditor-General of South Africa.

The purpose is to establish a transformed and well-governed municipal environment that remains robust and will continue to stimulate the growth and well-being of the constituents of the Stellenbosch municipal areas.

VISION AND MISSION STATEMENT

THE STELLENBOSCH MUNICIPALITY HAS COMMITTED ITSELF TO THE
FOLLOWING VISION AND MISSION:

Vision

“An Integrated Valley of Opportunity and Innovation”

Mission

**Our mission is to deliver services in an enabling environment through sustainable,
cost-effective and accountable services for our community**

**IN ALL OUR WORK AND ENGAGEMENTS WITH THE COMMUNITY AND OTHER STAKEHOLDERS, WE
SUBSCRIBE TO THE FOLLOWING**

Integrity:

As servants of the public, we undertake to perform the functions and operations of the municipality in an honest and ethical manner.

Accountability:

As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Transformation:

We, as custodians of hope, will work tirelessly at transforming our municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Innovation:

We will continuously review our systems, procedures and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence:

As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness:

The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

values

1.2 Strategic Focus Areas

The strategic focus areas within a municipality are the building blocks of the Council's strategy. The focus areas as depicted in the diagram below illustrate the expansion of the vision statement and create structure around how the municipality will achieve its strategic goals. The Service Delivery and Budget Implementation Plan (SDBIP) is developed in a more detailed way to indicate the deliverables against the activities that should be met in a certain timeframe.

Figure 1: Strategic focus areas

1.3 Core Principles in Executing the Strategy

This section refers to the linkage between political leadership, the administration and the community. The diagram below illustrates the three components a municipality should encompass:

Figure 2: Core principles in executing strategy

For sustainable municipal management, political leadership and the administration must work together. Ultimately, democratically-elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of its poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critic or passive bystander. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 22 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. These plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. These plans also help to fast-track the implementation of the IDP. This ensures that the focus areas of the IDP become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs and all other stakeholders in the greater Stellenbosch.

Participatory processes present an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the ward priorities.

1.4 Alignment with Institutional Structures and Processes

The municipality focuses on prudent arrangements that provide internal and external alignment to its organisational strategies. This best supports the execution of the long-term goals and purposes, which require all stakeholder engagements, both external and internal, to be aligned with and committed to achieving the vision of the organisation.

The administration strongly focuses on action against deliverables, which in turn creates effectiveness and efficiency in decision-making as well as delivering services to all citizens.

Planning techniques are used to bridge the gap between local experiential knowledge, the technical needs of strategy development, and the demand for strategic frameworks to be ready to cope with rapid decision-making to reduce the risk of unforeseen issues. Through extensive, organised information-sharing and planning workshops, this procedure aims to establish a starting position about how to guide the development and administration of the town. The first plan is drafted, and provisions are created for influencing today's decisions and the character of future work in a way that supports the strategy. The strategy becomes the overarching strategic framework, which is then built on with technical work.

1.5 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: the process of directing, constraining, and potentially rewarding (potentially) the behaviour of various actors in society (in the best interests of all citizens).

Fiscal measures: service fees, charges, and taxes used to raise government revenue and direct action in support of policy and legislation (via fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policies and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the "positive" and "negative" positions taken by the government on issues. This could be through the media, public meetings / engagements events, and so on.

To ensure alignment between Council's strategic processes is adhered to, the municipal accountability cycle needs to be implemented:

Figure 3: Accountability Process flow

1.6 Demographical Overview of the Greater Stellenbosch at a Glance

Table 1: Socio-economic summary

Population Estimates, 2022				Actual households, 2021		
	Population 199 325				Households 50 792

¹ According the Quarterly Labour Force Survey (QLFS) – Q1: 2022, the official unemployment rate was 34.5% in the first quarter of 2022.

1.7 State of the Greater Stellenbosch

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West / Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland.

In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town harbour, the shipping portal to both the Atlantic and the Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km².

The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural communities such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Languedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vloottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, varying from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound and the area is the home of the very first Wine Route in South Africa.

A variety of sport facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The Municipal area is surrounded by arts and culture characters such as the Adam Small Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre and dance), Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street at Theatre and Aan de Braak Theatre.

The following municipalities share their borders with Stellenbosch Municipality:

- The City of Cape Town (South);
- Drakenstein Municipality, (North);
- Breede Valley Municipality, (North-east); and
- Theewaterskloof Municipality, (South-west).

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 1: Locality map of municipal boundaries

1.8 Ward Demarcation

The ward demarcation was structured according to the election outcomes on 01 November 2021 which increased from 22 to 23 wards for the year under review.

Table 2: Municipal Ward Demarcation

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Langquedoc, Wemmershoek to La Motte Wine Farm and Leopard Leap Wine Farm
4	Kylemore, Johannesburg, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan (Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms, Kelsey Farm
7	Mostersdrift, Karindal, Rozendal, Uniepark, Simanswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Oliehouth Street, Banghoek Rd, Acedemia, Bosman Street, Smuts Rd, Joubert Street, De Beer Rd, De Villiers Rd from Ryneveld Street to Cluver Rd on the left-hand side
11	Boundaries of the ward are: Kridge Rd, Herte Street, Skone Uitsig Rd onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Rd onto George Blake Street, Mark Street, Distillery Rd, Santhagen Rd, Swawel Avenue, Kanarie Rd, Tarentaal Rd, Bokmakierie Rd, Fisant Rd, Devon Valley Rd, Kiewiet Rd, Dagbreek Rd, Pelikaan Street, Patrys Rd, Hammerkop Rd, Loerie Rd, Muldersvlei Landgoed, and all areas in Onder Papegaaienberg and businesses
12	Kayamandi: Zone A, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang, Smarties (Mgabadel Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4 th and 5 th Avenue, 10 th , 12 th and 14 th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Rd, Long streets, Crombi Rd to the end of Gabriels Rd. Asalea Rd, 2nd Road, Noble Rd, Bailey Rd, Eike Street, Curry Street, Hoop Rd, Pansy Rd, West Rd, Laai Rd, Anthony Rd, Carriem Rd, Archilles Rd, Bergstedt Rd, Davidse Rd, Cupido Rd, Pearce Rd, Robyn Rd, Gonzalves Rd, Hercules Rd, Chippendale Rd, Afrika Rd, Arnolds Rd, September Rd, Jakaranda Street, Short Rd, Quarry Rd, Middle Rd, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetessville (Lakay Rd towards Langstraat -Suid Rd, Kloof Street, Fir Street, Fontein Rd, Williams R towards Gabriels Rd towards February Rd, Valentyn Rd, Pool Rd, Raziet Rd, Ortell Rd, Rhode Rd, King Rd, Hine Rd, Hendrikse Rd, Rhode Rd), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Rd, Belladonna Street, Wildeklaar Welgevonden Boulevard, Olive Rd, Sonnedou Rd, Mountain Silver Rd, Silver Oak Rd, Froetang Rd, Katbos Rd, Everlasting, Fynbos Street, Sourfig Street, Scarlet Crescent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate.) The borders of the ward are the R44 Klappmuts road and Long streets.
18	Klappmuts Town Centre, Bennitsville, Weltevrede Park, Klappmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klappmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spiritis Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klappmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultry / Mariendahl, De Hoop, Nootgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch

Ward	Areas
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Streets, Schroder Rd, Die Braak, Bird Street from Dorp Street, Denniseg area, Muller Rd, Banghoek Road, Reyneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

Source: Statistics South Africa

Below is a map of the Cape Winelands District in relation to the provincial district boundaries:

Map 2: Locality of Cape Winelands in relation to Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km². The province spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands and West Coast) and 24 local municipalities.

Below is a map of the municipalities of the Cape Winelands District:

Map 3: Locality map of Stellenbosch Municipality in relation to Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg and Witzenberg local municipalities.

1.9 Socio-Economic Context

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2022. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer and Quantec.

1.9.1 Population Growth

The current population of Stellenbosch in 2022 are 199 325 persons, which is the most populated municipal area in the Cape Winelands District (CWD). This total is  expected to grow to 215 456 by 2026, equating to an average annual growth rate of 2.0 per cent for the period.

The estimated population growth rate of Stellenbosch is therefore 0.3 percentage and points higher than the estimated average annual population growth rate of the Cape Winelands District which is 1.7 per cent.

The table below depicts the population growth from 2022 to 2026:

Table 3: Population Growth

Area	2022	2023	2024	2025	2026
%					
Stellenbosch	3.3	2.3	2.0	2.0	1.6
Cape Winelands	2.7	1.8	1.6	1.6	1.6
Western Cape	2.9	1.8	1.7	1.7	1.6

1.9.2 Sex Ratio

The overall sex ratio depicts the number of males per 100 females in the population. The data indicates that as of 2022, there are more females than males in the Stellenbosch municipal area with a ratio of 51.1 per cent (females) to 48.9 per cent (males).

The sex ratio is therefore 96, meaning that for every 100 women there are 96 men. The ratio increases slightly towards 2023 and remains unchanged from 2023 to 2026. This could be attributed to a wide range of factors such as an increase in female mortality rates as well as the potential inflow of working males to the municipal area.

The table below depicts the sex ratio within the Stellenbosch municipal area.

Table 4: Sex Ratio

Year	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2022	98.0	108.9	97.6	95.7	93.9	96.1
2023	98.7	110.0	98.4	96.2	94.4	96.9
2024	98.8	110.3	98.5	96.3	94.4	97.0
2025	98.9	110.6	98.6	96.3	94.3	97.1
2026	99.0	110.3	98.9	96.3	94.3	97.4

1.9.3 Age Cohorts

The age cohorts are composed according to the population of Stellenbosch. These groupings are expressed as a dependency ratio which indicates those who are part of the workforce (Aged 15 – 64) and those who are dependent on them (children or senior citizens). A higher dependency ratio implies greater pressure on social systems and the delivery of basic services.

Between 2022 and 2026, the largest population growth projection was recorded in the 65+ age cohort at 2.7 per cent. This reflects possible improvements in life expectancy (an ageing population) or that more people are choosing the Stellenbosch municipal area as a retirement destination. Notable growth is also expected in the working age cohort, which results in an overall decrease in the dependency ratio towards 2026.

The table below depicts the age cohorts between 2022 and 2026.

Table 5: Age Cohorts

Year	Children: 0 – 14 Years	Working Age: 15 – 65 Years	Aged: 65 +	Dependency Ratio
2022	43 801	144 203	11 321	38.2
2024	45 272	150 716	11 932	38.0
2026	76 765	156 091	12 600	38.0
Growth	1.7%	2.0%	2.7%	-

1.9.4 Household sizes

Household size refers to the number of people per household. The average size of households is expected to remain constant at 3.6 people per household from 2022 to 2026. The trend of the constant average household size could be attributed to a wide range of factors but are not limited to, lower fertility rates, ageing population, divorce, cultural patterns surrounding intergenerational co-residence, as well as socioeconomic factors that shape trends in employment, education, and housing markets.

The table below depicts the household sizes in 2022.

Table 6: Household Sizes

Year	2022
Household Size	3.6

1.9.5 Population density

Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health and service delivery risks. In 2022, the population density of the Cape Winelands District was 45 persons per square kilometer. In order of highest to lowest, the various local municipal areas compare as follows:

Stellenbosch	240 people/km ² ;
Drakenstein	194 people/km ² ;
Breede Valley	51 people/km ² ;
Langeberg	27 people/km ² ; and
Witzenberg	14 people/km ² .

According to the above comparison, Stellenbosch has the highest density in the Cape Winelands District. This is helped a lot by the fact that the municipal Spatial Development Framework (mSDF) says that urban development should stay within the limits of the urban edge.

1.9.6 Education

Education and training improve access to employment opportunities and help sustain and accelerate overall development. Quality Education is the 4th Sustainable Development Goal, while the National Development Plan (NDP) emphasises the link between education and employment as well as the significant contribution it makes to the development of the capabilities and well-being of the population.

1.9.7 The learner enrollment, learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch increased from 27 491 enrolments in 2019 to 28 594 in 2021 (more than 1 104 learners were enrolled compared to 2019).

The graphics below depict the learner enrollments, learner-teacher ratio and learner retention from 2019 to 2021.

Graph 1: Learner enrollment

Source: Western Cape, Socio-Economic Profile 2022

Graph 2: Learner-teacher ratio

Source: Western Cape, Socio-Economic Profile 2021

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior.

The inverse of the learner-retention rate is commonly referred to as the drop-out rate. The learner retention rates are influenced by a wide array of factors, including low socio-economic background, student attitudes towards education, overcrowded classrooms, critical thinking skills, study skills and other personal circumstances which can make it difficult for the learner to focus on education.

Although the learner retention rate in the Stellenbosch municipal area improved from 75.5 per cent in 2020 to 79.1 per cent in 2021, more than 20 per cent of the learners did not complete their studies.

Graph 3: Learner retention rate

Source: Western Cape, Socio-Economic Profile 2022

1.9.8 Education Infrastructure, Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area is recorded at 39 in 2021. A total of R90 million will be spent in the Stellenbosch municipal area across the MTREF. This allocation will be used for upgrading and additions as well as new and replacement infrastructure in the following schools; Aviation, Elsenburg Agri School, Klappmuts Primary School and HS, and New Stellenbosch Primary School.

The No-fee Schools Policy abolishes school fees in the poorest 40 per cent of schools nationally for learners from Grade R to Grade 9. As per the policy, schools that do not charge fees will be allocated a larger amount of funding from the national budget per learner to make up for the fees that would have been charged.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 64.1 per cent in 2021.

1.9.9 Schools with libraries and media centres

The Stellenbosch municipal area consist of 39 schools in 2021 of which 27 (69 per cent) were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information which is in turn directly linked to improved education outcomes.

1.9.10 Education Outcomes (Matric Pass Rates)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. Stellenbosch's matric pass rate improved from 85.1 per cent in 2020 to 87.9 per cent in 2021; recording the highest matric pass rate in the district in both 2020 and 2021 in the Cape Winelands District.

The graph below depicts the Matric pass rates from 2020 to 2021.

Graph 4: Matric pass rate

Source: Western Cape, Socio-Economic Profile 2022

1.9.11 Health

According to the LGSEP 2022, in 2021, the Stellenbosch municipal area had 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites and 10 TB clinics. The municipal area has 14 (17.9 per cent) out of the 78 primary healthcare facilities within the Cape Winelands district.

The table depicts the total healthcare facilities.

Table 7: Healthcare facilities

Area	PHC facilities (Fixed clinics, CHCs and CDCs)		Community Health Centres ²	Community Day Centres ³	Hospitals		Treatment Sites	
	PHC Clinics (Fixed)	PHC Clinics (Satellite and Mobile)			District	Regional	ART Clinics	TB Clinics
Stellenbosch	7	6	0	1	1	0	9	10
Cape Winelands District	40	33	0	5	4	2	49	100

Source: Western Cape, Socio-Economic Profile 2022

² **Community Health Centre:** A facility that normally provides primary health care services, 24 hour maternity, accident and emergency services and beds where health care users can be observed for a maximum of 48 hours and which normally has a procedure room but not an operating theatre.

³ **Community Day Centre:** A health facility that provides a comprehensive health care services during day hours, including mother and child health, chronic diseases care, women's health, HIV and TB care, men's health, acute services, physio therapy, mental health services and oral health care.

1.9.12 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage of emergency medical services. The Stellenbosch municipal area had a total of 6 ambulances servicing the region, which translates to 0.3 ambulances per 10 000 people in 2021. This number only refers to Provincial ambulances and excludes all private service providers and remained unchanged between 2020/21 and 2021/22.

1.9.13 HIV / AIDS and TB

The number of clients (patients) that remain committed to their antiretroviral treatment (ART) plan in the Stellenbosch municipal area increased by one patient between 2020/21 and 2021/22. In total, 6 915 registered patients received antiretroviral treatment in the Stellenbosch municipal area in 2021/22. In turn, the number of new patients receiving ART also increased from 460 in 2020/21 to 481 in 2021/22. There has been an average annual increase of 3.65 per cent between 2020/21 (849) and 2021/22 (880) in the number of registered patients receiving TB treatment in the Stellenbosch municipal area.

Table 8: HIV/AIDS Management

Area	Registered patients receiving ART		Number of new ART patients	
	2020/21	2021/22	2020/21	2021/22
Stellenbosch	6 914	6 919	460	481
Cape Winelands District	32 949	32 719	2 825	3 780

Source: Western Cape, Socio-Economic Profile 2022

1.9.14 Child Health

The immunisation coverage rate for children under the age of one in the municipal area improved slightly from 52.7 per cent in 2020/21 to 55.8 per cent in 2021/22. The overall CWD rate increased from 60.6 per cent to 62.2 per cent across the same period. The number of malnourished children under five years of age (severe acute malnutrition) per 100 000 people in the municipal area increased notably from 0.9 in 2020/21 to 1.5 in 2021/22.

The CWD also increased from 1.8 per cent to 2.2 per cent while the provincial average changed from 0.9 to 1.3 per cent. The neonatal mortality rate (deaths per 1 000 live births before 28 days of life) for the municipal area declined from 6.3 in 2020/21 to 3.1 in 2021/22. The rate was still notably below the CWD average of 8.0. A total of 9.8 per cent of all babies born in a facility in the municipal area in 2021/22 weighed less than 2 500 grams, indicating possible challenges with long-term maternal malnutrition and poor health care during pregnancy.

Table 9: Child Health

Area	Low Birth Rate		Neonatal Mortality Rate per 1000		Acute Malnutrition Rate (Under 5) per 100 000		Immunisation Rate (Under 1)	
	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22
Stellenbosch	8,5	9,8	6,3	3,1	0,9	1,5	52,7	55,8
Cape Winelands District	15,5	16,0	10,7	8,0	1,8	2,2	60,6	62,2

Source: Western Cape, Socio-Economic Profile 2022

1.9.15 Maternal Health

In 2020/21, the Stellenbosch municipal area recorded the lowest number of maternal deaths (57.3) and teenage pregnancies (11.4 per cent) in the CWD, however, this increased to 61.1 per cent (maternal deaths) and 13.2 per cent (teenage pregnancies) in 2021/22. However, the termination of pregnancy rate (0.6 per cent) remained unchanged across this period.

Table 10: Maternal Health

Area	Maternal Mortality Rate		The delivery rate of women under 20 years		Termination of pregnancy rate	
	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22
Stellenbosch	57.3	61,1	11.4	13,2	0.6	0,6
Cape Winelands District	118.3	120,1	13.6	14,0	0.7	0,7

Source: Western Cape, Socio-Economic Profile 2022

1.9.16 Poverty

a) GDPR Per Capita

An increase in the real regional gross domestic product (GDPR) per capita, i.e., GDPR per person, is experienced only if the real economic growth rate exceeds the population growth rate. Even though real GDPR per capita reflects changes in the overall well-being of the population, not everyone within an economy will earn the same amount of money as estimated by the real GDPR per capita indicator.

An increase in GDPR per capita, i.e., GDPR per person, is experienced only if the economic growth rate exceeds the population growth rate. At R67 798 in 2021, the Cape Winelands District's real GDPR per capita is below that of the Western Cape's figure of R81 650 for the same period. However, Stellenbosch has outperformed both the District and the Province by recording a per capita income figure of R84 325 in 2021.

Cape Winelands District recorded the highest figure across 2021. While the 2021 figure has regressed moderately for the period 2015 – 2021, the robust economic potential of the municipality is highlighted by its persistent high level of per capita incomes recorded, despite the recent recessionary economic environment coupled with the COVID-19 pandemic which restricted economic activity both regionally and globally.

Graph 5: GDPR Per Capita

Source: Western Cape, Socio-Economic Profile 2022

b) Income Inequality

South Africa suffers among the highest levels of inequality in the world when measured by the commonly used Gini index. Inequality manifests itself through a skewed income distribution, unequal access to opportunities, and regional disparities.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. Income inequality has increased in Cape Winelands District between 2015 (0.59) and 2021 (0.62). These disparities in income are certain to worsen across the ensuing MTREF given the potential aftereffects of the COVID-19 pandemic. Stellenbosch has displayed a similar trend to that of the District's trajectory with inequality levels worsening from 0.62 in 2015 to 0.63 in 2021.

Graph 6: Income Inequality

Source: Western Cape, Socio-Economic Profile 2022

c) Poverty Line⁴

The Upper Bound Poverty Line⁵ (UBPL) headcount ratio is the proportion of the population living below the UBPL i.e., that cannot afford to purchase adequate levels of food and non-food items. The UBPL in South Africa is R1 227 (in April 2019 prices) per person per month.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment and poor living conditions. The NDP aims to eliminate poverty by 2030.

In 2021, 58.91 per cent of Stellenbosch's population fell below the UBPL. This figure improved marginally from the 60.62 per cent and 60.76 per cent recorded for the periods 2015 and 2018, respectively. Stellenbosch along with Drakenstein (61.96 per cent in 2021) represent the highest proportion of people living in poverty across the Cape Winelands District, while the Stellenbosch figure of 58.91 per cent is marginally above that of the District figure (57.26 per cent) recorded in 2021.

⁴ This refers to the amount of money that an individual will need to afford the minimum required daily energy intake. This is also commonly referred to as the "extreme" poverty line. Source- STATSASA, Statistical Release, 2019. P0310.1

⁵ This refers to the food poverty line plus the average amount derived from non-food items of households whose food expenditure is equal to the food poverty line. Source- STATSASA, Statistical Release, 2019. P0310.1

Graph 7: Poverty Line

Source: Western Cape, Socio-Economic Profile 2022

1.9.17 Basic Service Delivery

The Constitution stipulates that every citizen has the right to access adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to services such as potable water, basic sanitation, safe energy sources and refuse removal services, to ensure that households enjoy a decent standard of living.

This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2021. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

a) Housing and Household Services

With a total of 50 792 households in the Stellenbosch municipal area, 74.5 per cent had access to formal housing. This is lower than the Cape Winelands District average of 82.4 per cent. The area also had a substantially higher proportion of informal dwellings, a total of 24.7 per cent compared with the District's total of 16.9 per cent.

Service access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water inside the dwelling / yard or communal / neighbour's tap at 99.3 per cent, access to a flush or chemical toilet at 96.4 per cent, access to electricity (including a generator) for lighting at 96.8 per cent and the removal of refuse at least weekly by the local authority at 82.1 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

b) Free basic services

Municipalities also provide a package of free basic services to households that are financially vulnerable and struggle to pay for services. The number of households receiving free basic services in the Stellenbosch municipal area has declined sharply in 2020. The stressed economic conditions are expected to exert additional pressure on household income, which will likely increase the demand for free basic services and in turn the number of indigent households. However, this is area specific and dependent on the qualifying criteria which are used.

1.9.18 Safety and Security

Murder is defined as the unlawful and intentional killing of another person.

Within the Stellenbosch area, the number of murders increased from 67 in 2019/20 to 70 in 2020/21, increasing further to 87 in 2021/22. The Stellenbosch municipal area's murder rate (per 100 000 people) increased from 36 in 2020/21 to 44 in 2021/22, and the murder rate (per 100 000 people) for the Cape Winelands District also increased from 42 to 43 for the same period.

Table 11: Murder cases per 100 000

Area	Actual Number			Per 100 000		
	2019/20	2020/21	2021/22	2019/20	2020/21	2021/22
Stellenbosch	67	70	87	36	36	44
Cape Winelands District	381	394	414	41	42	43

Source: Western Cape, Socio-Economic Profile 2022

a) Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency and human trafficking.

In 2022, there were 226 sexual offences in the Stellenbosch area compared to 806 reported cases in the Cape Winelands District. The incidence of sexual offences (per 100 000 people) in the Stellenbosch municipal area (115) was higher than that of the District (84) in 2021/22.

Table 12: Sexual Offences per 100 000

Area	Actual Number			Per 100 000

Cape Winelands District	885	969	752	96	103	79

Source: Western Cape, Socio-Economic Profile 2022

b) Drug-related Offences

Drug-related crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.

Drug-related crime within the Stellenbosch area decreased from 1 589 cases in 2020/21 to 1 125 cases in 2021/22. The Cape Winelands District's drug-related offences decreased sharply from 5 903 in 2020/21 to 5 729 in 2021/22. When considering the rate per 100 000 people, with 575 drug-related offences per 100 000 people in 2021/22, the Stellenbosch area's rate is below the District's 600 per 100 000 population.

Table 13: Drug-Related Offenses per 100 000

Area	Actual Number			Per 100 000		
	2019/20	2020/21	2021/22	2019/20	2020/21	2021/22

Cape Winelands District	7 933	5 903	5 729	859	628	600

Source: Western Cape, Socio-Economic Profile 2022

c) Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area increased from 153 in 2020/21 to 252 in 2021/22. This translates into a rate of 128 per 100 000 people in 2021/22, which is above the District's 86 per 100 000 people.

Table 14: DUI Offenses

Area	Actual Number			Per 100 000

Cape Winelands District	980	495	819	106	53	86

Source: Western Cape, Socio-Economic Profile 2022

d) Road user fatalities

The type of road user that died in or during a crash i.e. driver, cyclist, passengers, pedestrians.

The number of road user fatalities in the Stellenbosch area increased from 35 in 2020/21 to 39 in 2021/22. While the number of fatal crashes decreased from 34 to 31 for the same reference period.

Table 15: Road user fatalities

Fatal Crashes	34	34	31
Road User Fatalities	37	35	39

Source: Western Cape, Socio-Economic Profile 2022

e) Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

The number of residential burglaries in the Stellenbosch area decreased from 971 in 2020/21 to 958 in 2021/22. Stellenbosch municipal area's rate of 489 per 100 000 population is above the District's 448 for 2021/22.

Table 16: Residential Burglaries per 100 000

Area	Actual Number			Per 100 000		
	2019/20	2020/21	2021/22	2019/20	2020/21	2021/22

Source: Western Cape, Socio-Economic Profile 2022

1.9.19 Economy and Labour Market Performance

a) Sectoral Overview

In 2020, the economy of Stellenbosch was valued at R18 625.6 billion (current prices) and employed 71 911 people. Historical trends between 2016 and 2020 indicate that the municipal area realised an average annual growth rate of -0.7 per cent. The 2020 recession made a substantial dent in the average growth rate over the period, but load shedding and the drought within the Province also played a major role in prior years.

Estimates for 2021 however indicate a marked recovery in growth (4.6 per cent) from the effects of the COVID-19-related restrictions on economic activity in 2020. It was largely driven by growth in the wholesale and retail trade, catering and accommodation (7.8 per cent) as tourism activity resumed; as well as the finance, insurance, real estate and business services (3.5 per cent); and manufacturing (5.0 per cent) sectors. The mining and quarrying (-14.2 per cent), construction (-1.0 per cent) and general government (-0.9 per cent) sectors were the only sectors that experienced a further economic decline after the easing of restrictions.

Despite the economic recovery experienced in 2021, the economy continued to shed jobs, with an estimated 2 435 net jobs lost. This was largely driven by job losses in the wholesale and retail trade, catering and accommodation (-945 jobs); manufacturing (-338 jobs); and agriculture, forestry and fishing (-328) sectors, reflecting that employment creation is lagging behind the improved GDP. Only the general government sector was able to create jobs during the year.

b) Formal and Informal Employment

It is estimated that Stellenbosch's total employed will in 2021 amount to 69 476 workers, of which 55 435 (79.8 per cent) are employed in the formal sector and 14 041 (20.2 per cent) are informally employed. Employment in the formal sector had an annual average increase of only 0.2 per cent from 2016 to 2020 while the informal sector suffered an annual average decline of 5.9 per cent over this period. The informal economy was responsible for the majority of the job losses in 2021. This is a concern as the informal economy should be able to act as a buffer during times of economic recession.

Most of the formally employed consisted of semi-skilled (42 per cent) and low-skilled (32 per cent) workers. The skilled category only contributed 25.8 per cent to total formal employment. The skilled and semi-skilled categories grew at a pace of 0.7 per cent per annum from 2016 to 2020 and notably outpaced low-skilled employment which shed 0.9 per cent of jobs per annum. The growth in the skilled categories reflects the increasing market demand for skilled labour and the need for skills development initiatives, especially with the growing tertiary sector in the Stellenbosch municipal area.

c) Unemployment

To protect South African citizens from the COVID-19 pandemic, the government announced a national lockdown in March 2020 that brought about a shutdown of the economy, which in turn resulted in a shock in the labour market and a big change in the way people went about doing their work.

According to the Quarterly Labour Force Survey (StatsSA, 2021), The number of unemployed persons decreased by 60 000 to 7,9 million in the 1st quarter of 2022 compared to the previous quarter. The number of discouraged jobseekers decreased by 54 000 (1,4%) and the number of people who were not economically active for reasons other than discouragement decreased by 112 000 (0,8%) between the two quarters resulting in a net decrease of 166 000 not economically active population.

The above changes in employment and unemployment resulted in the official unemployment rate decreasing by 0,8 of a percentage point from 35,3% in the fourth quarter of 2021 to 34,5% in the first quarter of 2022.

The unemployment rate according to the expanded definition of unemployment also decreased by 0,7 of a percentage point to 45,5 % between April and June 2022 compared to January to March 2022.

The biggest job gains were recorded in community and social services (281 000), manufacturing (263 000) and trade (98 000). However, there were job losses in private households (186 000), finance (72 000), construction (60 000) and agriculture (23 000). The total number of persons employed was 14,9 million in the first quarter of 2022.

The table below indicates the economic sector overview:

Table 17: Economic Sector Overview

SECTOR	GDPR			
	R million (2020)	%	Trend (2016 – 2020)	Real GDPR growth 2021e

1.10 Basic Service Delivery Highlights and Challenges

1.10.1 Key Basic Services Delivery Highlights

The following key basic services areas were achieved by the municipality:

Table 21: Key Basic Service Delivery Highlights

Service Area	Highlight	Description
Roads and Transport	Rehabilitation and resealing of roads	<p>During the period under review, 12km of municipal roads were resealed in the following areas:</p> <ul style="list-style-type: none"> • Cloetesville; • Ida's Valley; • Die Boord; • Noordwal; • Mostertsdrif; • Kayamandi; • Dalsig; and • Jamestown.
Water	Water Losses	Maintain water losses under the norm of 15%. The actual water losses accounted for 12.7%.
Electricity	Installation of Rooftop Photovoltaic	Stellenbosch Municipality has embarked on a Rooftop Solar Photovoltaic project where five municipal buildings were identified, and rooftop PV has been installed. The combined capacity of the five plants amounts to 710 kWp. There are other renewable energy projects planned to be implemented in the 2022/23 financial year.
	Network upgrades in Langrug	Network upgrades in Langrug were effected to realise 20 electrical connections.
	Electrification of Enkanini	The municipality constructed an electricity network in Enkanini to cater for 1 000 connections in 2020/21. In 2021/22 the Kayamandi Bulk Infrastructure Project was initiated to strengthen the bulk infrastructure to provide for the remaining backlogs in Enkanini.
	Refurbishment of Klein Mooiwater electricity infrastructure	Klein Mooiwater electricity infrastructure that was vandalised, was rehabilitated: Seven (7) households were supplied with electricity.
Refuse removal	Street Bins	Additional street bins were procured and delivered in February 2022.
	Builders' rubble diverted	Total builders' rubble diverted = 17 667 tons.
	Garden rubble waste diverted	Total garden waste diverted = 5 460 tons.
	Appointments of Area Cleaning Operators / Supervisors	Nine (9) operators / supervisors were appointed to enhance service delivery within the WC024.
	Recycling	Recyclable waste is now also being collected via a door-to-door service rendered by an appointed contractor. 39 tons of recyclable waste was collected during the 2021/22 financial year.
Integrated Human Settlements	Erf 7001, Cloetesville ("Soek-mekaar")	<p>The goal of this development is the delivery of houses to the medium to upper (GAP) housing market and not aimed at BNG housing units (free houses).</p> <p>A new tender was advertised and closed on 26 July 2021. A service provider was appointed to undertake a Broad Conceptual Urban Design framework for Erf 7001, Cloetesville to</p>

Service Area	Highlight	Description
		obtain town planning and development rights. The project is ongoing.
	Jamestown (Phases 2, 3 and 4)	The municipality appointed a service provider to undertake a Broad Conceptual Urban Design framework and to obtain town planning and development rights. The process and timeframe for Phases 2 and 3 will be concluded over a period of two (2) years. The project is ongoing.
	Erf 64, Kylemore	The Housing Development Agency (HDA) has been appointed to assist with the transfer of land from the National Department of Public Works (NDPW) to the Stellenbosch Municipality. The HDA must also further attend to the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General and the relevant applications to the Provincial Department of Human Settlements (PDoHS). On 15 November 2021, the NDPW issued a Power of Attorney for the municipality to develop the property.
	Housing Pipeline (annual review for the MTREF period of 2022 – 2025)	The Council approved unanimously on 25 May 2022, the annual review of the Stellenbosch Municipality Housing Pipeline for the MTREF period of 2022 – 2025. The Housing Pipeline indicates the planning and implementation of the different housing projects over a particular period for the greater Stellenbosch area.
	Rental stock	The Section: Housing Administration is implementing programmes within the budget constraints, to address this challenge. Contract management regarding allocations and legalisation in line with the appropriate policies is 50.
	Housing support and demand	Successful handover of 90 Title Deeds to beneficiaries in the following areas: Klipmuts (47), Pniël (2), Jamestown (4), Kayamandi (22), Kylemore (2), Cloeteville (7) and Ida's Valley (6).
		The PDoHS approved subsidies for 98 beneficiaries in the Longlands housing project. The appointment of two Conveyancing Attorney firms for a period of three years was effected to finalise the transfer of subsidised houses to their beneficiaries.
	Papplaas relocation	Eleven (11) families were successfully relocated from the dumping site to a safer location.
	Enkanini 1 000 electrical connections	Surveyed all the beneficiaries, created space for installation of the service and facilitated excellent cooperation between the municipality and community.

The detailed highlights and challenges will be discussed in Chapter 3 under each respective service.

1.10.2 Key Basic Services Challenges

Despite the highlights, challenges were experienced by the municipality as outlined below, however, actions were put in place to address these challenges:

Table 22: Key Basic Service Challenges

Department	Service Area	Challenge	Actions to address
Electricity	Staff Shortages	Pniël Network took over without any additional staff identified to render the service under the distribution license conditions.	Motivations for the identified vacancies to be filled have been submitted.
	Eskom streetlights	Eskom has without any formal handover stopped maintenance of streetlights in the WC024 for which Eskom was responsible. Although a thorough assessment is still required, it has been observed that the streetlight infrastructure is in a dilapidated state. This is also evident from the number of streetlight complaints received from the public.	Motivation for the filling of vacancies is being compiled. The exercise to determine the cost saving from the maintenance fee paid to Eskom has been conducted, which revealed that the municipality would incur a larger expenditure than savings to move and maintain the infrastructure to acceptable standards.
	Lack of Preventative Maintenance	Due to staff shortages, the preventative maintenance of electricity infrastructure is requiring attention.	The municipality is currently conducting internal investigations on the prioritisation of the filling of critical vacancies and budget considerations.
Waste Management	Lack of staff	Absence of a Youth Environmental Coordinator (YCOP) to assist with social engagement and awareness.	The municipality will explore filling the position within the department to undertake social engagement and awareness activities.
		Staff Constraints	Optimal recruitment and selection process.
	Illegal dumping	Increase in illegal dumping	Appointment of Youth Environmental Coordinator (YCOP) to assist with social engagement and awareness activities.
Integrated Human Settlements	Langrug, Franschhoek	The density in the number of structures impeded the implementation of these planning interventions. Land invasions at Langrug exacerbated the implementation of these projects. To implement the in-situ upgrading projects, a decanting site is required to relocate households to create enough space for upgrading.	To commence with the re-blocking of Langrug, a decanting site on Erf 3229, Mooiwater, Franschhoek is being developed (basic services), the process of which is currently underway. The Section: PMU to go out on tender to appoint a service provider to finalise detailed planning for the rehabilitation of the freshwater dam and implement an in-situ upgrading project.
	La Motte, Franschhoek	The property that the housing projects are earmarked on belongs to the National Department of Public Works and Infrastructure (NDPW&I). The development rights can only be obtained when the property is transferred to the municipality or a Power of Attorney (PoA) is provided.	The HDA submitted a new request for the State Land Release for the subject properties by DPW&I to HDA through Power of Attorney. The target timeframe for releasing land is in the 2022/23 and 2023/24 financial years, respectively. The HDA is to submit a Project Feasibility Report (PFR) requesting funding for land use rights for these projects.
	Meerlust, Franschhoek		
	Jonkershoek		

Department	Service Area	Challenge	Actions to address
	Rental stock Watergang Informal Settlement	Experiencing uncooperative and unruly tenants with disregard for the law and the lease agreement with the municipality.	Housing Consumer Education (HCE) is about anti-social behaviour on a daily. Interviews and warning letters are sent to transgressors.
		Insufficient funds to provide security services for vulnerable tenants.	The Section: Housing Administration is implementing programmes within the budget constraints, to address this challenge.
		Township establishment matters which have not been finalised are delaying the transfer of the erven within subsidised housing projects.	The appointment of a consultant (in terms of a tender) responsible for the submission of the necessary Land Use Planning applications for processing and a decision, was done by the Section: Housing Development.
		Structures in the way to install services.	Negotiations with the structure owners to create space for ablution facilities are ongoing.

1.11 Proportion of Households with Minimum Access to Basic Services

The source of the information below indicates municipal statistics:

Table 23: Households with a minimum level of Basic Services

The proportion of Households with a minimum level of Basic services	2019/20	2020/21	2021/22
Electricity Connections (% Share of HHS)	32 967	33 708	35 402
Water - available within 200 m of the dwelling	42 615	52 220	52 220
Sanitation - Households with at least VIP service	42 615	44 909	44 909
Waste collection - kerbside collection once a week	38 990	49 300	52 374

1.12 Financial Viability Highlights

Table 24: Municipal Viability Highlights

Highlight	Description
Long-Term Financial Plan	The municipality developed a long-term financial planning tool, that can be updated regularly for strategic planning.
Current ratio	The municipality maintained a very good current ratio of 1.68:1. This compares well with the norm of 1.5 to 2:1.
Collection rate	The municipality maintained a good collection rate for service debtors of 96% which is above the norm of 95%. This indicates that the municipality creditor control and debt collection processes are in place and the revenue is managed effectively.
Finance Charges	Finance charges represent 2.30% of the total operational expenditure. This compares favourably with the norm of 6% to 8%.
Liability Management	Capital Cost (Interest Paid and Redemption) represent 3.37% of total operating expenditure. This indicates that the municipality can take on additional financing from borrowing to invest in infrastructure projects.
mSCOA Specimen Financial Statements	The municipality implemented the National Treasury mSCOA specimen annual financial statements preparation template, where the financial statements are compiled utilising the data strings extracted from the financial system.
Debt Management	The municipality's total debt represents 13% of the total operational expenditure. This compares favourably with the norm of 45% and is an indication that the municipality can take on additional financing from borrowings.

1.13 Financial Viability Challenges

Table 25: Financial Viability Challenges

Challenge	Description
Financial Viability	The traceability of all debtors poses a challenge to the debt collection process. Low economic growth, increase in unemployment and above-inflation increases of the cost of water impacts on affordability of municipal accounts.
Revenue Leakage	An integrated revenue enhancement approach was followed to combat revenue leakages.

1.14 Financial Overview

Table 26: Financial Viability and Management Financial Overview (000')

Details	Original budget	Adjustment Budget	Actual
	R'000		
Income			
Grants (Operating and Capital)	309 867	337 576	289 060
Taxes, Levies and Tariffs	1 561 765	1 560 236	1 490 856
Other	236 008	229 250	248 370
Sub-Total	2 107 640	2 127 062	2 028 286
Less Expenditure	2 017 459	1 977 679	1 925 898
Net surplus / (deficit)	90 181	149 383	102 388

1.14.1 Operating Ratios

Table 27: Operating Ratios

Detail	Expected norm	Actual	Variance
Employee Cost	35%-40%	29%	-(6%-11%)
Repairs and Maintenance	15%	3.34%	-11,6%
Finance Charges	15%	2.30%	-12.7%

Employee cost is below the national norm of between 35% to 40%, representing a positive outcome, Repairs and maintenance are below the norm, which indicates that expenditure on repairs and maintenance would have to be increased in future budgets to properly maintain the Council's assets. Finance charges are 12.7% lower than the norm of 15%, this can be attributed mainly to the municipality's ability to fund its capital programmes to some extent from its resources (CRR) and not external finance.

1.14.2 Total Capital Expenditure

Table 28: Total Capital Expenditure (000')

Detail	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22

Adjustment Budget	437 183	482 580	499 855	563 550	577 905	453 880	403 508
Actual	348 861	410 562	433 682	493 303	405 931	392 941	347 610

1.15 Municipal Standard Chart of Accounts

MFMA Circular No. 80: Municipal Financial Systems and Processes requirements in support of the Municipal Standard Chart of Accounts (mSCOA) issued in terms of the Local Government: Municipal Finance Management, 2003 (Act No. 56 of 2003) (MFMA). In the MFMA SCOA Circular 1, it was indicated that mSCOA is a business reform rather than a mere financial reform and requires a multi-dimensional relationship.

The mSCOA was implemented in Stellenbosch Municipality on 01 July 2017. The municipality is in continuous engagement with the service provider, National Treasury and other municipalities through various working groups as well as online platforms to improve mSCOA compliance and functionality.

1.16 Organisational Development Overview

The municipality regarding municipal transformation and organisational development achieved the following highlights:

Table 29: Organisational development highlights

Highlight	Description
Filling of critical posts	Critical posts are filled as and when required with the availability of funds.
Organisational Stability	All staff placements were made in terms of the new organisational structure.

1.17 MFMA Competencies

In terms of section 83(1) of the MFMA, the accounting officer, senior managers, chief financial officer, non-financial managers and other financial officials of a municipality must meet the prescribed financial management competency levels that are key to the successful implementation of the MFMA. National Treasury prescribed such financial management competencies in Government Notice 493, dated 15 June 2007.

To assist the aforementioned officials in acquiring the prescribed financial competencies, National Treasury, with the collaboration of various stakeholders and role players in the local government sphere, developed an outcome-based NQF Level 6 qualification in municipal finance management. In terms of the Government Notice 493 of 15 June 2007, "(1) No municipality or municipal entity may, with effect, as of 1 January 2013 (exempted until 30 September 2015 as per Government Notice 179 of 14 March 2014), employ a person as a financial official if that person does not meet the competency levels prescribed for the relevant position in terms of these Regulations."

The table below provides details of the financial competency development progress as required by the regulation (Government Notice 493 of 15 June 2007):

Table 30: Financial Competency Development: Progress Report

Description	A Total number of officials employed by municipality (Regulation 14(4)(a) and (c))	B Total number of officials employed by municipal entities (Regulation 14(4)(a) and (c))	Consolidated: Total of A and B	Consolidated: Competency assessments completed (Regulation 14(4)(b) and (d))	Consolidated: Total number of officials whose performance agreements comply with Regulation 16 (Regulation 14(4)(f))	Consolidated: Total number of officials that meet prescribed competency levels (Regulation 14(4)(e))
Financial Officials						
Accounting Officer	1	0	1	1	1	1

Supply Chain Management Officials						
Heads of supply chain management units	1	0	1	1	1	1
Supply chain management senior managers	2	0	2	2	2	1
Total	10	0	10	10	10	9

1.18 Auditor General of South Africa's Report

The Auditor-General of South Africa has a constitutional mandate and, as the Supreme Audit Institution (SAI) of South Africa, exists to strengthen the country's democracy by enabling oversight, accountability and governance in the public sector through auditing, thereby building public confidence. In short, the Auditor-General checks the spending of public money by looking at whether it has been used ideally and for the purposes intended. This process is concluded by annually checking all government spending.

The diagram below indicates the audit outcome progress from 2019/20 to 2021/22.

Figure 4: Audit outcomes from 2019/20 - 2021/22

The audit outcomes of a municipality are based on the fair presentation and absence of significant misstatements in financial statements; performance information for predetermined objectives that was reliable and credible and all financial / non-financial information that complied with laws and regulations.

CHAPTER 2: GOOD GOVERNANCE AND PUBLIC PARTICIPATION

2.1 Introduction

Good Governance is an approach of government that is committed to creating a system founded on strengthening democracy, promoting transparency, building public administrative capacity, responding to public needs, and respecting human rights. It is measured by eight factors **namely participation, rule of law, transparency, responsiveness, consensus-oriented countability, effectiveness and efficiency, equitability, and inclusivity**. Within the context of good governance, corruption is minimised, the views of minorities are considered and the voices of the most vulnerable in society are heard in decision-making. It is also responsive to the present and future needs of society.

2.2 National Key Performance Indicators - Good Governance and Public Participation

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations 796 of 2001 and section 43 of the MSA. This key performance indicator is linked to the National Key Performance Area - Good Governance and Public Participation.

Table 31: National KPI - Good Governance and Public Participation

KPA and Indicators	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan.	85.08%	86.5%	87.5%	70.25%	86.57%	84.29%

2.3 Performance Highlights - Good Governance and Public Participation

Table 32: Highlights of Good Governance and Public Participation

Highlight	Description
Council	A new Council was established and remained stable and well-functioned throughout the 2021/22 financial year.
Audit Outcomes	Clean Audit for three consecutive years.
MSA Sections 79 and 80 Committees of Council	The establishment of functional S.80 and S.79 Committees of the Council and held meetings regularly.
Public Participation	The new Council had the opportunity to participate in the IDP sessions held in January 2022 and April 2022 with all 23 wards. The public participation processes were successfully done via online platforms and hybrid spaces. Interested and affected parties were encouraged to participate online and provide feedback on the IDP and Budget through the Stellenbosch Citizen App and email.
Communication	The municipality stays abreast with communication trends. Public participation has been rolled out via online streaming at satellite offices.
Compliance	The municipality adhered to all laws and regulations in terms of compliance.

2.4 Challenges - Good Governance and Public Participation

Table 33: Challenges of Good Governance and Public Participation

Description	Actions to address
Fraud and Corruption Management	Through the fraud hotline, direct calls received and walk-ins, active reporting has been ongoing. Unfortunately, it has become apparent that the fraud hotline and in particular the Regulations for Senior Managers (Misconduct and Financial Misconduct) are being abused to unfairly target individuals and management.

2.5 Public satisfaction with municipal services

No formal community surveys were developed – the community makes use of the social space to state their satisfaction or dissatisfaction with services and the municipality will try its utmost best to address the needs of the public.

COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE

2.6 Political Governance Structure

The Council performs both legislative and executive functions. It focuses on legislative, oversight and participatory roles, and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, Councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows from the previous Council and the newly elected Council:

2.7 Council – 01 July 2021 to 30 June 2022

Below is a table that categorises the councillors within their specific political parties and wards.

Table 34: Council for the period 01 July 2021 to 31 October 2021

Name of Councillor	Capacity	Political Party	Ward Councillor and Proportional (PR)

25 May 2022	17	100%	-
22 June 2022	19	100%	-

2.8 Executive Mayoral Committee

The Executive Mayor of the municipality, assisted by the Mayoral Committee, heads the political executive arm of the municipality. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the executive mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition, delegated powers by the Council were assigned.

Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

The Executive Mayoral Committee positions were occupied as follows.

Table 37: Executive Mayoral Committee

Executive Mayoral Committee 1 July 2021 – 31 October 2021		Executive Mayoral Committee 01 November 2021 – 30 June 2022	
Name of member	Portfolio	Name of member	Portfolio

23 March 2022	23
19 April 2022	10
18 May 2022	12
08 June 2022	9

2.8.1 Portfolio Committees

In terms of Section 80 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), if a council has an executive committee, it may, in terms of Section 79, appoint committees of councillors to assist the executive committee or executive mayor. Section 80 stipulates that committees are permanent committees that specialise in a specific functional area of the municipality and, in some instances, may make decisions on specific functional issues. They advise the executive committee on policy matters and make recommendations to the council.

The tables below show a comparison of the portfolio committees and meeting dates from 01 July 2021 until 31 October 2021 and the newly elected mayoral committee from 01 November 2021 until 30 June 2022.

2.9 Strategic Governance Structure

The Municipal Manager is the Chief Accounting Officer of the municipality and the head of the administration and serves as chief custodian of service delivery and implementation of political priorities. The municipal manager is assisted by the directors, which constitute the Management Team, whose structure is outlined in the diagram below. All the executive team have signed performance agreements for the year under review.

Figure 5: Top Management Structure

Figure 6: Macro Structure

COMPONENT B: PUBLIC ACCOUNTABILITY

MSA section 15(b) requires a municipality to establish and organise its administration to facilitate a culture of accountability amongst its staff. Section 16(i) states that a municipality must develop a system of municipal governance that complements formal representative governance with a system of participatory governance. Section 18(i)(d) requires a municipality to supply its community with information concerning municipal governance, management and development.

The participation outlined above is required in terms of the:

- ✦ preparation, implementation and review of the IDP;
- ✦ establishment, implementation and review of the performance management system;
- ✦ monitoring and review of performance, including the outcomes and impact of such performance; and
- ✦ preparation of the municipal budget.

2.10 Intergovernmental Relations

2.10.1 National Intergovernmental Structures

The National Forum, i.e. The Municipal Managers Forum, facilitated by the Department of Cooperative Government and Traditional Affairs (COGTA) meets twice per annum. New legislation and its implications, as well as challenges for local government, e.g. financial sustainability, professionalism and oversight structures, are discussed.

The Directorate: Infrastructure Services represented by the Director: Infrastructure Services as a member of the national WRC / SALGA Municipal Benchmarking Initiative in Water Services, which collaborates in a national programme towards the improvement of water services, co-driven by SALGA and the Water Research Commission (WRC) and in collaboration with eThekweni Municipality, MILE (Municipal Institute of Learning), representatives of other municipalities, the Institute of Municipal Engineers (IMESA) and the Department of Water and Sanitation (DWS).

2.10.2 Provincial Intergovernmental Structures

a) Office of the Municipal Manager

The Stellenbosch Municipality is a keen participant in joint intergovernmental planning initiatives of the Provincial Government. MinMay (Provincial Ministers, Provincial Heads of Departments, Mayors and Municipal Managers) and the Premier's Coordinating Forum are provincial forums for fruitful interaction regarding local government cooperation and challenges. These meetings are held bi-annually. The Provincial Municipal Managers Forum meets quarterly.

Chief Audit Executive and Chief Risk Officer fora are held quarterly in conjunction with Provincial Treasury where all municipalities share best practices and consult on areas of improvement.

Stellenbosch is represented on the Provincial IDP Managers Forum, and the Provincial Public Participation and Communication Forum, all of which are facilitated by the Provincial Department of Local Government.

b) Financial and Corporate Services

The Directorate: Financial Services participates in several provincial fora quarterly. The fora include the Supply Chain Management Forum, the Municipal Property Rates Act Forum, the Management Accountants Forum as well as the Chief Financial Officer Forum.

The Municipal Court is in full operation and collaborates with the Department of Justice regularly.

c) Planning and Economic Development

The municipality is represented by the Manager: Spatial Planning on the task team set up by DEA&DP to revise the Provincial Spatial Development Framework (PSDF). Through this inter-governmental process, Stellenbosch Municipality can provide input into the format and substance of this document that will have a legal bearing on all local municipalities in the Western Cape.

The DEA&DP and the municipality established a working group to consult monthly or more regularly as the need arises about environmental authorisation applications and land use (spatial planning) matters. Slow response times to applications by developers, entrepreneurs, farmers, service providers (Eskom, Telkom, cellular operators, etc.), waste management bodies, mining operators and road authorities, cause delayed investment and infrastructure provisions. This has negative effects on the economy, hence the working group was established to increase the speed with which the applications are administered.

The working group consists of the technical role players and it is overseen by the portfolio councillors of the municipality. This structure ensures prior commitment to and understanding of matters to be reported to the relevant portfolio committees or council. The working group is administered by the DEA&DP and meetings are in liaison with the Directorate: Planning and Economic Development, which must invite and ensure attendance by affected internal role players.

Monthly Technical Meetings between the PDoHS and Stellenbosch Municipality:

- a) The PDoHS and the municipality meet monthly to discuss all Housing Development policies and budget-related matters in housing delivery. During the meeting, the overall performance of each municipality is discussed in detail as mitigating options if the need arises.
- b) Applications of new and existing projects are also discussed with the PDoHS. The municipality receives information relating to beneficiary administration, outstanding approvals, informal settlement challenges, title deed transfers, farmworker evictions and other matters concerning housing delivery. Legislation and court rulings are also discussed to ensure that senior officials are aware of any new implementation programmes, circulars and legal precedents.
- c) The Section: Informal Settlements also represents the municipality at the bi-monthly Informal Settlements Support Programme (ISSP) meetings of the Provincial Settlements (PDoHS). The latter programme aims to interpret National and Provincial guidelines concerning the upgrading of informal settlements. The purpose of these monthly meetings is to discuss best practices in informal settlements within the Cape Winelands region; and
- d) The Section: Informal Settlements furthermore collaborates between various municipal departments and Stats SA. The collaboration is aimed at regularising the municipality's data collection efforts into a format that is acceptable to Stats SA and that the collected data eventually will meet the standards as required by Stats SA.

e) Infrastructure Services

The Directorate participates in the Stellenbosch River Collaborative Steering Committee to develop a multi-stakeholder collaborative governance process within which to deal with issues of water quality and pollution in the Stellenbosch rivers. The participants include the Winelands Water Users Association, Stellenbosch Municipality, Department of Water Affairs, the Department of Environmental Affairs, Cape Nature, WWF, Wildlands and key stakeholders in the wine industry such as Spier and the Distell group.

The 3rd Generation Integrated Waste Management Plan (IWMP), gives direction regarding Waste-to-Energy, Alternate Waste Management options and Waste Management project proposals. This innovative approach was recognised by the DEA&DP when the municipality was requested to assist three other local municipalities in taking this approach. The municipalities of Beaufort West, Prins Albert and Laingsburg were assisted in this manner by the visit of the Waste Management Department team, who trained their local officials as well as assisted with the first data collection exercise.

Stellenbosch Municipality is represented at the quarterly Waste Management Officers Forums; where best practices, changing legislation, feedback from national and provincial government policy changes, etc. are discussed to keep all municipalities in the Western Cape abreast of all issues about waste management. The Western Cape Recycling Action Group (RAG) quarterly forums, although more geared at private-sector contributions to waste minimisation, also provide the platform for municipalities to engage with each other and the private sector for waste minimisation opportunities.

The Department: Electrical Services is extensively involved with other local municipalities' electricity departments through the Association of Municipal Electricity Utilities (AMEU). The AMEU promotes quality of service and management excellence amongst its members in the field of electricity supply and facilitates communication between its members and between members and the technical, economic and political environment, to influence that environment.

f) Community and Protection Services

Traffic Services liaises with Western Cape Government: Department Transport and Public Works continuously on matters related to transport administration and licensing, traffic law administration (motor-vehicle licensing) and issuing of learner and driving licenses.

The department further engages with RTIA, RTMC, the Director of Public Prosecutions and the Department of Justice regarding legislative requirements and adherence.

To execute the Safely Home Programme, the department interacts with various engineering entities such as provincial engineers and Cape Winelands District Council. The Western Cape Government developed the Provincial Strategic Plan (PSP) which gave rise to policies, programmes and projects forming partnerships among government, citizens, civil society and business. Various spheres of government are being engaged to co-create a culture of wellness and safety in the workplace and to promote wellness and safety through integrated service delivery models to address the social determinants of health through interaction with the Department of Education (DoE), the Department of Health Department and SAPS.

The municipality engages in numerous partnerships to facilitate service delivery.

Table 81: Municipal Partnerships

Name of Partner / Partnership	Purpose
Mayor / Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the university's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television in the interest of the security of the town and the campus with a view to a crime-free university town.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Integrated Development Committee (IPC)	A partnership with the university and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and university.
Department of Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focussing on common issues within WC024.
SALGA Municipal Benchmarking Initiative	The partnership is aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing and iterative performance improvements.
Bergriver Improvement Programme	The partnership was formed to improve the quality of the stormwater run-off from the Langrug Informal Settlement. The project entails the implementation of biomimicry, waste recycling and a Sustainable Urban Drainage lab.
LTAB	The partnership was formed between political leaders to discuss Land Transport-related matters that affect transport in the area.
Transport Working Group	The Transport Working Group was established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role players.
IPC	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha, Overstrand, Theewaterskloof, and Drakenstein Municipality that discuss all transport-related matters to effectively promote regional planning
NMT Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consist of NMT users, officials, representatives from the university and the disabled fraternity.
Drought Steering Committee	This is a committee consisting of a panel of role players in the drought intervention plan including consultants to discuss, plan, manage and action the Drought Intervention strategies that culminated from various source documents including WCWDM strategies, WSDP, Audit Reports and various Master Plans and processes. It also oversees the SCM and construction phase of the plans.
GreenCape	The GreenCape partnership represents cooperation with the province's 110% green initiatives, focussing on alternative waste management initiatives and energy efficiency.
CSIR	The partnership is aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
General	Municipal Partnerships.
District Intergovernmental Structures	
District Coordinating Forum	This forum meets quarterly and seeks to promote and facilitate intergovernmental relations between the district municipality and the local municipalities in the district. The Stellenbosch Municipality participates in this forum and the Cape Winelands District Municipal Managers Forum and benefits from this involvement by being exposed to good practices in other municipalities and strengthening the relationship with the district municipality in forging joint partnerships in the interest of good governance and service delivery. The Cape Winelands District Municipality supports community development and uses indigenous sports to create social cohesion amongst communities in the district. Special focus and attention were given to communities in rural areas. The Stellenbosch, Drakenstein and Breede Valley Municipalities have participated in various indigenous games which were hosted by the Cape Winelands Municipality. The

Name of Partner / Partnership	Purpose
	<p>relationship between Stellenbosch Municipality and the district municipality has improved and the Department: Community Services have managed to exceed all expectations. A targeted approach was followed and sports were used as a catalyst to cement this relationship with the district.</p> <p>The areas that the Department of Community Services targeted were communication, sharing of resources, capacity building and financial resources. The improved relationship between the district municipality and Stellenbosch Municipality enabled the communities to also participate in the Provincial and National Indigenous Games.</p>

2.10.3 Ward Committees

Stellenbosch Municipality has a Ward Committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the Council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 7: Duties of ward committees

The dawn of democracy in 1994 brought about a new democratic local governance system that promotes certain basic values and principles. Such values and principles include transparency, accountability and an open and inclusive system of governance through community involvement in governance, and planning and democratisation of development. This certainly placed South Africa on par with other democratic governments throughout the world and positioned it as a reputable reference for an effective decentralised system of government.

The view of participation remains a key pillar of good governance and constitutes an integral component in the policymaking process, development planning and budgeting. Section 152 of the Constitution, places the participation of communities at the centre of service delivery and other matters of Local Government. Correspondingly, the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998) and the MSA provides the legislative framework for the establishment of Ward Committees by municipalities.

Section 42 of the MSA stipulates that a municipality, through appropriate mechanisms, processes and procedures established in terms of Chapter 4 of said Act, must involve the local community in

the development, implementation and review of the municipality's performance management system and, in particular, allow the community to participate in the setting of appropriate key performance indicators and performance targets for the municipality.

A general understanding has emerged that a ward committee is an area-based committee whose boundaries coincide with ward boundaries.

Ward committees should be elected by the community they serve. A ward committee may not have more than 10 members and women should be well represented. The ward councillor serves on the ward committee and acts as the chairperson. Although ward committees have no formal powers, they advise the ward councillor, who makes specific submissions directly to the council. These committees play a critical role in the development and annual revision of the integrated development plan of the area.

The ward committee supports the ward councillor, who receives reports on development, participates in development planning processes and facilitates wider community participation. The municipality constantly strives to ensure that all ward committees function optimally in terms of the provision of community information, convening meetings, ward planning, service delivery, IDP input and performance feedback to communities.

On 1 November 2021, the South African local government elections were held to elect councils for all district, metropolitan and local municipalities in all nine provinces. For Stellenbosch Municipality the number of wards increased from 22 to 23 wards, with new demarcation for some of the wards. This also meant that new ward committees had to be established for all wards within the municipality.

In terms of section 73 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998) and Regulations, ward committees must be established for each ward within the municipal area within 120 days after the election.

The system of delegations of the Stellenbosch Municipality (S6 and S7) designates the Speaker of Stellenbosch Municipality to facilitate the establishment of ward committees in line with the provisions and stipulations of the Municipal Structures Act and Council's policy for the establishment of ward committees.

At the meeting of 23 November 2021, the Council resolved that ward committees must be established for each ward and that the Speaker must facilitate the establishment of ward committees in line with the provisions and institutions of the Municipal Structures Act and the Council's policy for the Establishment of Ward Committees taking into consideration the COVID-19 protocol as outlined in paragraphs 22(3) and 30(4) of the Council's Policy and Procedures for Ward Committees. Ward councillors were commissioned to on or before 30 November 2021 submit to the Office of the Speaker a lay-out of their geographic and / or sectors for their respective wards.

After this, an advertisement was placed on the municipal website, various social media platforms and the local newspapers in December 2021 and January 2022 inviting nominations from registered voters with the cut-off date for nominations on 17 January 2022.

Stellenbosch Municipality rolled out the establishment of the 23 ward committees from 24 January to 23 February 2022. Insufficient nominations for wards 3 and 4 prompted the Speaker to allow an extension for said wards to submit nominations at a later stage. Further to this a total of four ward committee establishment meetings adjourned without electing ward committee members and each reconvened at a later stage with ward committee members duly elected.

The tables specify the comparison of ward committees before the election and newly established ward committees:

Ward 1: Franschhoek town, Bo-Hoek Farms, Mooiwater

2.10.3.1 Functionality of Ward Committees

The purpose of a ward committee is to:

- ✚ create formal communication channels between the community and Council;
- ✚ advise the Ward Councillor in identifying the needs and concerns of the community;
- ✚ support the Ward Councillor in informing the community about their rights and responsibilities; and
- ✚ support the Ward Councillor in consulting and providing feedback to the community.

The COVID-19 pandemic has undoubtedly brought about a dramatic change in the world prompting governments including local governments to be responsive to the plight of their citizens specifically marginalised individuals and vulnerable groups.

To limit the spread of the COVID-19 pandemic, large gatherings were banned including all public meetings, ward meetings at the local government level and other invited or created spaces of engagement. The rapid transmission of the pandemic with various variants thereof across the globe caused panic and its prevention became the number one priority to be addressed.

The biggest casualty of the COVID-19 pandemic is public participation. The local government has the responsibility to provide the platforms / tools thereby enabling people to be part of the public participation activities that local governments embark upon.

Public participation is crucial in the collective response to the COVID-19 pandemic from adherence to the regulations to the steps needed to be taken on easing the restrictions imposed by National Government.

Ward committees need to find new ways of conducting business inter alia through platforms such as virtual meetings, MS Teams meetings, etc which produce various challenges for some constituencies. All 22 wards and 23 were successfully established.

The table below provides a comparison of the information on the establishment of Ward Committees and their functionality from the 2020/21 to 2021/22 financial years.

Table 105: Ward Committees and their functionality

Ward Number	Number of reports submitted to the Speakers / IDP Office		Number of Public meetings		Meeting dates of ward committees		Committee functioning effectively

COMPONENT C: CORPORATE GOVERNANCE

Corporate governance is the set of processes, practices, policies, laws and stakeholders affecting the way an institution is directed, administered or controlled. Corporate governance also includes the relationships among the many stakeholders involved and the goals for which the institution is governed.

2.11 Risk Management

Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient and transparent systems of financial and risk management and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

This responsibility was delegated to the Chief Risk Officer. During the year under review, the following was done:

- continuous awareness raising throughout the municipality;
- the Risk Management Committee was established to facilitate and govern the risk management process, with a term of reference, and has been operational since January 2013;
- the Chief Audit Executive has a seat on the Risk Management Committee where all risk and fraud management-related activities are reported;
- the Risk Management Committee reports to the APAC;
- risk registers have also been completed at an operational level;
- the previous year's strategic registers were revisited and an acceptable risk appetite was determined;
- the revised risk register was adopted by the Council; and
- risks were also identified which could prevent the achievement of the predetermined objectives and were noted in the SDBIP.

Although the Chief Risk Officer is responsible for coordinating and facilitating risk management at all levels within the municipality, the municipal manager and management are the drivers of risk management and the mitigation of risk exposure in the municipality.

During the latter part of 2021, the COVID-19 pandemic started to lose momentum and as more and more individuals were vaccinated the legislation and stringent regulations were gradually phased out as society was now accustomed to the so-called new normal.

At the beginning of 2022, views, comments and predictions started to surface globally as the possible conflict in Europe started to become a reality. A Russian invasion of Ukraine dominated in February 2022 and immediately the impact of the said had to be rated, assessed, and discussed. Thus, risk no 7 was developed to monitor the ongoing situation.

As municipalities entered the new financial year, the electricity and energy generating crisis started to raise red flags again as the pandemic started to be less of a threat and focus started to shift. The availability and cost of electricity then again was assessed as the number 1 risk for the municipality.

In March 2022 a new risk policy, as well as enterprise risk management framework, was approved by the Council. The Strategic and Operational Risk Register was also approved In March 2022.

The top 5 risks identified for 2021/22 are as follows:

Figure 8: The top 5 risks identified for 2021/22

a) Likelihood rating scale

Table 106: Risk likelihood rating scale

Impact and Likelihood Rating		
Likelihood Grading		
10	Certain	91% - 100% chance of occurring
9	Almost Certain	81% - 90% chance of occurring
8	Expected	71% - 80% chance of occurring
7	Probable	61% - 70% chance of occurring
6	Possible	51% - 60% chance of occurring
5	Potential	41% - 50% chance of occurring
4	Occasional	31% - 40% chance of occurring
3	Remote	21% - 30% chance of occurring
2	Improbable	11% - 20% chance of occurring
1	Rare	0% - 10% chance of occurring
Impact Grading		
10	Catastrophic	A critical event resulting in the long-term cessation of the majority or all core organisational activities. Inability to achieve the municipality's strategy and objectives. Requires external support.
9	Critical	A critical event resulting in the long-term cessation of several core organisational activities. Drastically reduced ability to achieve the municipality's strategy and inability to achieve the majority of the objectives. Requires intervention from the Council.
8	Major	A major event resulting in the long-term cessation of a core organisational activity. Severely reduced ability to achieve the municipality's strategy and inability to achieve certain objectives. The material at the organisational level.

Impact and Likelihood Rating		
Likelihood Grading		
		Requires intervention from the Municipal Manager and Audit Committee involvement.
7	Significant	Significant long-term disruption of services. Significantly reduced ability to achieve the municipality's strategy and objectives. Requires intervention from the Director.
6	Moderate	Short / medium-term disruption of services. Reduced ability to achieve the municipality's strategy and objectives. Requires intervention from the Head of the Department.
5	Marginal	Disruption of normal operations / services. Limited effect on the achievement of the municipality's strategy and objectives. Requires intervention from the Line Manager.
4	Immaterial	Irritation in rendering or receiving services. No material impact on the achievement of the municipality's strategy and objectives. Can be dealt with by senior staff.
3	Minor	The impact will be coped with in short term through normal operational processes performed by staff
2	Insignificant	The impact of adverse events is minimal.
1	Negligible	The impact of the adverse event has little (if any) impact on services.

The rating determines the risk exposure. Through this management gets to understand the extent to which potential events might impact their objectives on a scale from 1 as a minimum and 100 as a maximum.

b) Inherent risk exposure

Table 107: Inherent risk exposure grid

Inherent Risk Exposure: the inherent risk exposure is determined by comparing the inherent risk rating against the risk appetite		
Inherent Risk Exposure		
Inherent Risk	Magnitude	Definition
0 -25	Low Risk	Level of inherent risk is within the risk appetite – Low level of a control intervention required if any.
26 -50	Moderate Risk	Unacceptable level of risk – Moderate level of control intervention is required to achieve an acceptable level of residual risk.
51 – 75	High Risk	Unacceptable level of risk – High level of control intervention is required to achieve an acceptable level of residual risk.
76 – 100	Extreme Risk	The extreme level of risk – Immediate level of control. Intervention is required to achieve an acceptable level of residual risk.

The strategic risk register below indicates all the focus areas, risks and mitigation measures taken to address these identified risks within the organisation.

2.11.1 Strategic Risks Identified

Table 108: Risk register

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate
1	Availability and cost of electricity	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements i.e. EIA applications and approvals etc.	Green and Sustainable Valley, Dignified Living	10	10	Directorate: Infrastructure Services
2	Increased risk of a land invasion	Legal precedents are set under disaster management declaration limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities.	Dignified Living, Safe Valley, Financial Sustainability, Good Governance and Compliance	10	10	All Directorates
3	COVID-9 Pandemic	Manage the COVID-19 pandemic within the context of the prescribed regulations, taking the possible 4 th wave and intensity of new infections into account.	Safe Valley, Dignified Living	10	8	All Directorates
4	Scarcity of landfill space	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements i.e. EIA applications and approvals etc.	Green and Sustainable Valley	10	8	Directorate: Infrastructure Services
5	Economic downturn due to civil unrest and crime	Increase in criminal activities, civil unrest, and reputational risk due to perceived increase in the said activities.	Dignified Living, Safe Valley	10	8	Directorate: Community and Protection Services
Operational Risks						
1	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	8	8	Directorate: Community and Protection Services
2	Timeous Capital Spending	A steady increase in budget allocation; growing population and demand for services; demand management.	Good Governance and Compliance	10	4	Directorate: Financial Services
3	Business Continuity	Disasters, electricity outages; hacking of systems.	Good Governance and Compliance	8	4	Directorate: Corporate Services
4	Climate Change	Changing weather patterns, unpredictable rainfall, flash floods, drought natural disasters, fires (seasonal and other).	Green and Sustainable Valley; Safe Valley	8	4	Office of the Municipal Manager
5	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery need to be provided by all departments.	Good Governance and Compliance	8	4	Directorate: Corporate Services

2.11.2 Anti-Corruption and Anti-Fraud

Section 83(c) of the MSA refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption, while the MFMA, section 112(1)(m) (i), identifies supply chain measures to be enforced to combat fraud and corruption, favouritism and unfair and irregular practices. Section 115(1) of the MFMA states that the accounting officer must take steps to ensure mechanisms are put in place and the separation of duties in a supply chain management system to minimise the likelihood of corruption and fraud.

Management and Council have taken ownership of combatting fraud and corruption throughout the municipality.

The Anti-Fraud and Corruption Prevention Policy was consulted with key internal stakeholders and the Audit and Audit Performance Committee. The policy intends to strengthen fraud and corruption prevention at all levels within the municipality and re-invest the management of fraud and corruption management at all levels.

The fraud hotline or tip-off line is also fully functional and managed by an independent service provider. A toll-free number and e-mail service are available to members of the public to report any suspected fraudulent or corrupt activities.

2.12 Functions of the Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee's objectives and functions are based on Section 166(2) (a-e) of the MFMA, further supplemented by the Local Government: Municipal Planning and Performance Management Regulation, as well as the approved Audit and Performance Audit Committee Charter approved on 28 March 2018 by the Council.

The objectives of the APAC of the Stellenbosch Municipality are to:

- ✦ Assist the Council in discharging its duties relating to the safeguarding of the Council's assets;
- ✦ Develop and oversee the operation of an adequate internal process and control system;
- ✦ Oversee the preparation of accurate financial reporting and statements in compliance with all applicable legal requirements, corporate governance and accounting standards;
- ✦ Provide support to the Council on the risk profile and risk management of the Council; and
- ✦ Ensure that there is an internal audit function in place and that the roles of the internal and external audit functions are coordinated.

The APAC is responsible for the oversight of internal controls, financial reporting and compliance with regulatory matters and mainly makes recommendations to management.

The responsibilities of the APAC are further to review the:

- ✦ Effectiveness of the Council's system of internal control and risk management;
- ✦ Financial reporting and financial statements;
- ✦ Internal Audit function;
- ✦ AGSA's report;
- ✦ Council's compliance with legislation and regulation;
- ✦ Compliance with the Council's Code of Conduct and ethics; and
- ✦ Performance Management System to make recommendations in this regard to the Council.

The APAC members are as follows:

Table 109: Members of the Audit and Performance Audit Committee

Period 01 July 2021 – 29 March 2022		Period 28 June 2022 – 30 June 2022	
Name of representative	Capacity	Name of representative	Capacity
Dr NL Mortimer	Chairperson (re-appointed for a second term 1 April 2019 – term ended 31 March 2022)	LC Nene	Chairperson (appointed 1 May 2022)
VJ Botto	Member (appointed 1 September 2017)	VJ Botto	Member (appointed 1 September 2017)

J Williams (Ms)	Member (appointed 1 April 2019)	J Williams (Ms)	Member (appointed 1 April 2019)

Table 110: APAC meetings held from 01 July 2021 to 30 June 2022

Period 01 July 2021 – 30 June 2022
Meeting dates
27 August 2021
14 December 2021
20 January 2022
29 March 2022
28 June 2022

The APAC advises the Council, political office-bearers, the Accounting Officer and management of the municipality on the matters about duties as described in the Audit and Performance Audit Committee Charter.

The APAC is also accountable to identify major risks to which the Council is exposed and to determine the extent to which risks have been mitigated.

2.13 Internal Auditing

Section 165(2)(a), (b) and (c) of the MFMA requires that:

The internal audit unit of a municipality must: –

- a. prepare a risk-based audit plan and an internal audit programme for each financial year; and
- b. advise the accounting officer and report to the Audit Committee on the implementation of the internal audit plan and matters relating to:
 - ✦ internal audit;
 - ✦ internal controls;
 - ✦ accounting procedures and practices;
 - ✦ risk and risk management;
 - ✦ performance management;
 - ✦ loss control; and
 - ✦ compliance with this Act, the annual Division of Revenue Act and other applicable legislation.

c. perform such other duties as may be assigned to it by the Accounting Officer.

Stellenbosch Municipality's Internal Audit function is performed by in-house staff. The main focus areas were compliance with applicable laws, regulations, policies and procedures which resulted in both assurances as well as consulting work. During the year under review, the internal audit activity was able to effectively execute 87% of the initially adopted risk-based audit plan.

In addition, process flowcharts for all identified audit areas have been documented, highlighting the key controls and / or control gaps for process owners / line managers to consider and implement. Follow-up reviews were conducted relating to previously reported matters during the previous financial year.

Legend					
No coverage					
High-risk (Annual audit of a business process)					
Medium risk					
Low risk					
Compliance (Statutory requirement)					

Risk assessment updates were performed during the 2021/22 financial year and all relevant risks were populated into an updated Risk Register for the municipality. This Risk Assessment Plan forms the basis of the 2021/22 financial year's Risk-Based Audit Plan. New updates to the Stellenbosch Municipality's risk profile were captured during 2021/22 in consultation with the Risk Management Committee. This will ensure that adequate audit coverage is obtained from Internal Audit in consultation with the AGSA and management.

2.13.2 Annual Risk-Based Audit Plan

The Risk-Based Audit Plan 2021/22 was implemented with the available resources. The table below provides detail on audits completed.

Table 112: Annual Risk-Based Audit Plan

Audit Activity	Status

2.13.3 PMS Audits

The actual performance was subjected to an internal audit review the and results of their findings were submitted to the APAC. Quarterly audits were performed and reported to the APAC.

2.14 Supply Chain Management

The Supply Chain Management (SCM) Policy applicable to the 2021/22 financial year was revised and adopted by the Council on 26 May 2021 (as Appendix 17 of the budget-related policies, in the Council item) in terms of section 17(1) – (3) of the MFMA.

The changes referred to above will ensure that the Department: Supply Chain Management (SCM) has the required legislative mandate to further streamline procedures and processes to promote more efficient and effective service delivery to all internal and external stakeholders.

2.14.1 Competitive bids over R200 000

The following table details the number of Bid Committee meetings held for the 2021/22 financial year:

Table 113: Bid Committee Meetings

Bid Specification Committee	Bid Evaluation Committee	Bid Adjudication Committee
46	220	64

The attendance figures of members of the Bid Specification Committee are as follows:

Table 114: Attendance of Members of the Bid Specification Committee

Member	% Attendance
Supply Chain Management Representative	100%
Relevant technical expert responsible for a function	100%

The attendance figures of members of the Bid Evaluation Committee are as follows:

Table 115: Attendance of Members of the Bid Evaluation Committee

Member	% Attendance
Supply Chain Management Representative	100%
Relevant technical expert responsible for a function	100%

The attendance figures of members of the Bid Adjudication Committee are as follows:

Table 116: Attendance of Members of Bid Adjudication Committee

Member	% attendance
Chief Financial Officer (Chairperson)	100%
Director Planning and Economic Development	100%
Director: Infrastructure Services	100%
Director: Community and Protection Services	100%
Director: Corporate Services	100%

The percentages indicated above include the attendance by those officials acting in the position of a bid committee member and / or chairperson.

2.14.2 Awards made by the Bid Adjudication Committee

The Bid Adjudication Committee awarded 77 bids with a value of R 285 588 974.13, excluding annual tenders awarded based on approved rates. The ten highest bids awarded by the bid adjudication committee are as follows:

Table 117: Ten Highest Bids Awarded by Bid Adjudication Committee

Bid Number	Title of bid	Directorate and Section	Successful Bidder	Value of bid awarded
B/SM 82/21	Refurbishment of Rozendal Reservoir.	Infrastructure Services	Empa Structures	R 9 491 272.75
B/SM 24/22	Upgrading / Maintenance of Heritage Buildings: Voorgelegen, Rhenish and Bergzicht until 30 June 2024.	Corporate Services	Xiqombe	R 9 232 053.53
B/SM 12/22	Implementation of 11kV Network Upgrades in the Pniël area of Stellenbosch: Period ending 30 June 2024.	Infrastructure Services	VE Reticulation (Pty) Ltd	R 8 891 414.71
B/SM 62/22	Underwriting and Management of Short-Term Insurance Portfolio, for a contract period, ending 30 June 2023.	Financial Services	Kunene Makopo Risk Solutions	R 8 558 580.62
B/SM 110/21	Refurbishment of 11kv Substation Buildings and Installation of Switchgear Supplied by Stellenbosch Municipality for the period ending 30 June 2024.	Infrastructure Services	VE Reticulation (Pty) Ltd	R 7 949 721.12
B/SM 111/21	Jan Marais Substation Upgrade (Civil, Electrical and Structural Works).	Infrastructure Services	Leafy Space (Pty)Ltd	R 6 599 175.57
B/SM 22/22	The Enabling Works for the Construction of a Local Economic Development Hub and Transport Facility at Bird Street, Stellenbosch.	Planning and Economic Development	Raycon Properties	R 5 079 053.43

Bid Number	Title of bid	Directorate and Section	Successful Bidder	Value of bid awarded
B/SM 06/22	Upgrading of Kayamandi Tourism and Economic Corridor	Corporate Services	Bambana Management Services	R 4 724 787.65
B/SM 19/22	Supply and Delivery of a Multi-Purpose Armoured Personnel Carrier Vehicle (Nyala)	Community and Protection Services	TFM Industries (Pty)Ltd	R 4 222 306.65
B/SM 115/21	A Professional Service Provider to Assemble a Multi-Disciplinary Team of Professionals	Planning and Economic Development	Zutari (Pty)Ltd	R 3 819 344.19

2.14.3 Awards made by the Accounting Officer

In terms of paragraph 5.2 of the Council's Supply Chain Management policy, only the Accounting Officer may award a bid which is over R 10 million. The authority to make such an award may not be sub-delegated by the Accounting Officer.

The table below indicates the bids awarded by the Accounting Officer are as follows:

Table 118: Awards made by the Accounting Officer

Bid Number	Title of bid	Directorate and Section	Value of bid awarded
B/SM 25/22	THE CONSTRUCTION OF THE POLKADRAAI WATER SUPPLY SCHEME	Infrastructure Services	R 103 410 198.46
B/SM 79/21	CONSTRUCTION OF NEW DISTILLERY ROAD BRIDGE, REHABILITATION, ROADWAYS AND ANCILLARY WORKS	Infrastructure Services	R 29 750 000
B/SM 40/22	INTERNAL REFURBISHMENT OF THE NPK BUILDING ON ERF 1852, STELLENBOSCH FOR ADMINISTRATIVE OFFICES FOR STELLENBOSCH MUNICIPALITY.	Corporate Services	R 23 957 544.77
B/SM 23/22	IMPLEMENTATION OF MEDIUM VOLTAGE NETWORK UPGRADES IN KAYAMANDI, STELLENBOSCH	Infrastructure Services	R 14 014 568.89
B/SM 21/22	ENGINEERING, PROCUREMENT AND CONSTRUCTION OF GRID-TIED ROOFTOP PV SYSTEMS AT VARIOUS MUNICIPAL BUILDINGS IN STELLENBOSCH	Infrastructure Services	R 12 482 222.16
B/SM 123/21	EVALUATION OF TENDER FOR ZONE O, KAYAMANDI, HOUSING PROJECT: CONSTRUCTION OF INTERNAL CIVIL ENGINEERING SERVICES – PHASE 3	Infrastructure Services	R 12 120 851.13

2.14.4 Objections Lodged

The table below indicates the total objections lodged during the year under review.

Table 119: Objections Lodged

Tender Nr	Description	Date of finalisation of the appeal
B/SM 92/21	Khauleza IT solutions	22-Sep-22
B/SM 61/21	Lewendal Attorneys	23-Sep-22
B/SM 33/21	Blackbird	6-Oct-22
B/SM 100/21	VINLAB	21-Oct-21
B/SM 67/21	Contour	6-Dec-21
B/SM 114/21	Elexpert	11-Feb-22
B/SM 17/21	Timber City / Julobyte	4-Nov-22
B/SM 41/21	Xmoore Transport	14-Jun-22
B/SM 32/21	Language Teaching Centre	13-Oct-21

Tender Nr	Description	Date of finalisation of the appeal
B/SM 32/21	Sharons Driving School	15-Oct-21
B/SM 73/21	FB Protection Services	17-Nov-21
B/SM 69/21	Beatrice Nina	18-Jan-22
B/SM 73/21	Securitem	18-Feb-22
B/SM 19/21	OTT	11-Apr-22

The municipality also had eight (8) appeals which were resolved together with six (6) objections which were also dealt with.

2.14.5 Formal Quotations (above R30 000 and below R200 000) Procurement Processes

The number of formal quotations approved by the Snr. Manager: Supply Chain Management for the year under review follows:

Table 120: Formal Quotations (above R 30 000 and below R 200 000)

Description	Financial Years				
	2017/18	2018/19	2019/20	2020/21	2021/22
Number of Awarded Formal Quotations	206	203	145	122	89
Total Formal Quotations advertised	264	249	159	139	131
Percentage awarded	78.03%	81.53%	91.19%	88%	67.94%

2.14.6 Deviation from normal Procurement Processes

Paragraph 4.36 of the Council's Supply Chain Management Policy allows the Accounting Officer to dispense with the official procurement process. The following table indicates the number of certificates of emergencies and deviations approved in terms of section 4.36 of the SCM Policy.

Table 121: Deviation from Normal Procurement Process

Description	Financial Years			
	2018/19	2019/20	2020/21	2021/22
<u>Certificate of Emergencies:</u> Approved by the Directors i.t.o. Section 4.36.4 of the SCM Policy	0	0	0	0
<u>Deviations:</u> Approved by the Accounting Officer i.t.o. Section 4.36.1 of the SCM Policy	42	32	19	12
TOTAL	42	32	19	12

Deviations from the normal procurement processes have been monitored closely to mitigate the risk associated with them.

2.14.7 Disposal Management

The system of disposal management envisages the following:

- ✦ immovable property is sold only at market-related prices except when the public interest or the plight of the poor demands otherwise;
- ✦ movable assets are sold either by way of written price quotations, a competitive bidding process, auction or at market-related prices, whichever is the most advantageous;
- ✦ firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;
- ✦ immovable property is let at market-related rates, except when the public plight of the poor demands otherwise;
- ✦ all fees, charges, rates, tariffs, scales of fees or other charges relating to the letting of immovable property are annually reviewed;
- ✦ where assets are traded in for other assets, the highest possible trade-in price is negotiated; and
- ✦ in the case of the free disposal of computer equipment, the Provincial Department of Education is first approached to indicate within 30 days whether any of the local schools are interested in the equipment.

The municipality complies with section 14 of the MFMA which deals with the disposal of capital assets as well as with the Asset Transfer Regulations.

2.14.8 Supply Chain Management Performance Management

The SCM Policy requires that an internal monitoring system be established and implemented to determine, based on retrospective analysis, whether the SCM processes were followed and whether the objectives of the SCM policy were achieved.

Monitoring of internal processes is an ongoing process. Procedure manuals for various SCM processes have been developed, approved and are being implemented

2.14.9 Service Providers Strategic Performance

Section 76(b) of the MSA states that KPIs should inform the indicators set for every municipal entity and service provider with whom the municipality has entered into a service delivery agreement. According to the AGSA's office:

- a) Service provider means a person or institution or any combination of persons and institutions that provide a municipal service;
- b) External service provider means an external mechanism referred to in section 76(b) that provides a municipal service for a municipality; and
- c) Service delivery agreement means an agreement between a municipality and an institution or person mentioned in section 76(b) in terms of which a municipal service is provided by that institution or person, either for its account or on behalf of the municipality.

Section 121(b) of the MFMA and section 46 of the MSA further state that a municipality should include the following aspects related to service providers in its annual report:

- ✦ The performance of each service provider;
- ✦ A comparison of the performance with targets set for and performance in the previous financial year; and

Measures are taken to improve performance.

2.14.10 B-BBEE Compliance Performance Information

Section 121(3)(k) of the MFMA indicates that the annual report of a municipality should include any other information as may be prescribed. The Broad-Based Black Economic Empowerment (B-BBEE) Act (Act 53 of 2003; as amended by Act 46 of 2013) read in conjunction with the B-BEE Regulations of 2016 states in Section 13G(1) that all spheres of government, public entities and organs of state must report on their compliance with broad-based black economic empowerment in their Annual Financial Statements and Annual Reports. Under the explanatory notice (Notice 1 of 2018) issued by the B-BBEE Commission, the following table provide details on the municipality's compliance concerning broad-based black economic empowerment which only focuses on the organisational aspect of the compliance reform: It should be noted that a consultant is currently in process to do an in-depth rating of the BBEE compliance in terms of supply chain and socio-economic activities.

a) Management Control

Table 122: B-BBEE Compliance Performance Information - Management Control

Category	% for each category	Race Classification			Gender		Disability
		A	C	W	F	M	
Directors	4 / 6 = 66.67%	0	4	2	2	4	0
Senior Management	18 / 25 = 72%	3	15	7	4	21	0

b) Skills Development

Table 123: B-BBEE Compliance Performance Information- Skills Development

Category	% for each category	Race Classification		Gender		Disability	Total amount spend
		Category	Total	Category	Total		
Black Employees	278	A	996	F	79	None	Total Spent: R3 267 622 R3 071 564.68 (94% of the total spent)
		C	179				
		I	0	M	199		
Non-Black employees	19	W	19	F	2	None	R196 057.32 (6% of the total spent)
				M	17

Black people absorbed at end of learnership, internship and apprenticeship	0	0	0	0	0	None	0

2.15 By-Laws and Policies

Section 11 of the MSA gives municipal councils the executive and legislative authority to pass and implement by-laws and policies.

Budget-related policies reviewed in the 2021/22 financial year are listed below.

Table 124: Budget-Related Policies Reviewed

Policies Revised	Date Adopted
Traffic Calming Policy	24.08.2020
Land Use Enforcement Policy for Stellenbosch Municipality, March 2019	24.08.2020

Property Rates By-law	25.05.2021
By-Law on Stormwater	26.05.2021

2.16 Municipal Website

The municipal website is an integral part of a municipality's communication infrastructure and strategy. It serves as a tool for community participation, improves stakeholder involvement and facilitates stakeholder monitoring and evaluation of municipal performance. Section 75 of the MFMA requires that municipalities place key documents and information on their website, including the IDP, the annual budget, adjustments budgets and budget-related documents and policies.

Below is a website checklist to indicate compliance with Section 75 of the MFMA.

Table 126: Municipal Website Checklist

Documents Published on the Stellenbosch Municipality's Website	Yes / No	Publishing Date
Current annual and adjustments budgets and all budget-related documents	Yes	Within legislated period
All current budget-related policies	Yes	Within legislated period
Current annual and adjustment budgets and all budget-related documents	Yes	Within legislated period
All current budget-related policies	Yes	Within legislated period
The annual report for 2021/22	-	Pending
All current performance agreements required in terms of section 57(1)(b) of the Municipal Systems Act for 2021/22	Yes	Within legislated period
All service delivery agreements for 2021/22	Yes	Within legislated period
All long-term borrowing contracts for 2021/22	Yes	Within legislated period
All supply chain management contracts above a prescribed value for 2021/22	Yes	Within legislated period
An information statement containing a list of assets over a prescribed value that have been disposed of in terms of section 14(2) or (4) during 2021/22	Yes	Within legislated period

2.17 Communication

Local government has a statutory obligation and a political responsibility to ensure regular and effective communication with the community. The Constitution of the Republic of South Africa Act 1996, section 152(1)(e), in setting out the objectives of local government, states that municipalities must "encourage the involvement of communities and community organisations in the matters of local government". Section 160(7) of the Constitution further says that "a municipal council must openly conduct its business, and may close its sittings, or its committees, only when it is reasonable to do so".

The MSA, section 4, encourages the involvement of communities in the affairs of their municipalities. As a local government, the municipality must act with high levels of transparency, accountability, openness, participatory democracy and direct communication with communities to improve the lives of residents. At the heart of the Communication Policy, adopted by the Council in July 2020, lies the notion of improved communication that facilitates public participation.

Communication platforms played a vital role during the year under review and as the country was hit by the COVID-19 pandemic. It was the municipality's duty to inform the greater Stellenbosch of all newsworthy information. Ensuring that the right messages reach the intended audiences on the most appropriate platforms and continuously facilitating conversations through the various communication platforms, contributes to the strengthening of the municipality's corporate identity and brand. The relationship with the media became crucial and also the vehicle to steer the communication to all stakeholders. Comprehensive responses were prepared to all media enquiries from the community, and local, regional and national publications / broadcasters every week. Positive news stories are being disseminated through the proactive release of media statements. These statements and positive news stories are also amplified to reach audiences online by sharing them on the municipal website and other social media platforms. The communication informed the community of the COVID-19 pandemic and how to practice social distancing and good health as well as to educate and encourage the residents to stay safe by vaccinating. Daily statistics are still being broadcast on all communication platforms.

Members of the public can report faults or refer enquiries through an e-mail link on the website to the contact.stellenbosch@stellenbosch.gov.za mailbox. This mailbox is monitored daily and enquiries, compliments and complaints are forwarded to the relevant departments daily. The municipal website is updated with new and official notices, formal quotations, tenders, news stories, vacancies and as well as meeting agendas and minutes on an ongoing basis. The website is increasingly made more user-friendly and plans are already in place to simplify navigation and increase overall customer satisfaction by restructuring the website.

The municipal Facebook page and the Twitter account have been growing steadily and now reach a much larger, ever-growing audience. Apart from being used to publicise municipal news stories, photos and videos, social media platforms are used to broadcast important alerts and notices. Traffic is also diverted to the website through the municipality's social media platforms. Municipal advertisements are regularly placed in the community and regional newspapers and contribute to building the municipality's brand. The Executive Mayor's monthly newsletter, pamphlets, posters, notice boards and regular IDP / Ward meetings provide the municipality with additional platforms for communicating with residents and other stakeholders.

To improve internal communication within the organisation, the interdepartmental communication forum has been established and meetings of this forum have proved to be invaluable. The interdepartmental communication forum meets at least quarterly. Improved internal communication is further achieved through the newsletter of the Municipal Manager, internal memos, notice boards, a bulk SMS system and regular staff meetings.

Below is a communication checklist for compliance with the communication requirements.

Table 127: Communication Activities

Communication activities	Yes / No
Communication Unit	Yes
Communication Strategy	Yes
Communication Policy	Yes
Customer satisfaction surveys	No
Functional complaint management systems	Yes
Newsletters distributed at least quarterly	Yes

The image below illustrates the volume of visitors to the municipality's social media platforms.

Figure 9: Social Space Statistics

CHAPTER 3: SERVICE DELIVERY PERFORMANCE

3.1 Overview of performance within the organisation

This section provides an overview of the key service achievements of the municipality that came to completion during the 2021/22 financial year in terms of the deliverables achieved compared to the key performance objectives and indicators in the IDP.

To improve performance planning, implementation, measurement and reporting, the municipality implemented the following actions:

- ✦ Departmental operational plans were developed for monitoring and reporting operational programmes. An electronic performance management system is operational within the municipality. The same system forms the basis of performance evaluations of the Directors and the Municipal Manager; and
- ✦ The municipality endeavoured during the development of the TL SDBIP as well as with the development of the Departmental SDBIP that the "SMART" principle be adhered to in the setting of indicators and objectives. Emphasis was placed on ensuring that targets were specific and time-bound, thus making them measurable.

COMPONENT A: BASIC SERVICES

This component includes the municipal functions, basic service delivery highlights and challenges, details of services provided for water, wastewater (sanitation), electricity, waste management, housing services and a summary of free basic services.

3.2 Municipal Functions

3.2.1 Analysis of Functions

The municipal functional areas are indicated below.

Table 128: Municipal Functional Areas i.t.o. the Constitution

Municipal Function	Yes / No
Constitution Schedule 4, Part B functions:	
Air pollution	Yes
Building regulations	Yes
Childcare facilities	Yes
Electricity and gas reticulation	Yes
Firefighting services	Yes
Local tourism	Yes
Municipal airports	No
Air pollution	Yes
Building regulations	Yes
Municipal planning	Yes
Municipal health services	No
Municipal public transport	Yes
Municipal public works only in respect of the needs of municipalities in the discharge of their responsibilities to administer functions specifically assigned to them under this Constitution or any other law	No

Municipal Function	Yes / No
Constitution Schedule 4, Part B functions:	
Pontoons, ferries, jetties, piers and harbours, excluding the regulation of international and national shipping and matters related thereto	No
Stormwater management systems in built-up areas	Yes
Trading regulations	Yes
Water and sanitation services are limited to potable water supply systems and domestic wastewater and sewage disposal systems	Yes
Beaches and amusement facilities	Yes
Billboards and the display of advertisements in public places	Yes
Cemeteries, funeral parlours and crematoria	Yes
Cleansing	Yes
Control of public nuisances	Yes
Control of undertakings that sell liquor to the public	Yes from 2013
Facilities for the accommodation, care and burial of animals	Yes
Fencing and fences	Yes
Licensing of dogs	No
Licensing and control of undertakings that sell food to the public	No
Local amenities	Yes
Local sport facilities	Yes
Markets	Yes
Municipal abattoirs	No
Municipal parks and recreation	Yes
Municipal roads	Yes
Pounds	Yes
Public places	Yes
Refuse removal, refuse dumps and solid waste disposal	Yes
Street trading	Yes
Street lighting	Yes
Traffic and parking	Yes

3.3 National Key Performance Indicators – Basic Service Delivery

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations of 2001 and section 43 of the MSA. These key performance indicators are linked to the following two National Key Performance Areas: Basic Service Delivery and Local Economic Development.

Table 129: Basic Service Delivery

KPA and Indicators	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
Basic Service Delivery*							
The percentage of households earning less than R6 500 per month with access to free basic services (In the case of Stellenbosch Municipality- several registered Indigent households are being reported)	100%	100%	100%	100%	100%	100%	100%
Service for water, sanitation and refuse removal (Average)	7 042	5 686	6 453	6 813	6 666	7 283	4 681

**The data emanates from the Indigent Register of the Stellenbosch Municipality*

3.4 Water Provision

Water is the most fundamental and indispensable of available natural resources – fundamental to life, the environment, food production, hygiene and power generation.

Poverty reduction / alleviation and improved water management are closely linked. Schedule 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

Basic water is defined as 25 litres of potable water per day supplied within 200 meters of a household.

After the drought disaster and better rainfall seasons during 2020 and 2021, the municipalities in the Western Cape lifted water restrictions. Stellenbosch Municipality had no water restriction in place during the year under review. The municipality supplies water to the consumers in their area of jurisdiction through the following six water supply systems:

- ⚙ Stellenbosch: Eerste River treated at Ida's Valley WTP – (Own source);
- ⚙ Stellenbosch: DWS allocation from Western Cape Water Supply Scheme (WCMSS) via the tunnel treated at Paradyskloof WTP – (Theewaterskloof Dam);
- ⚙ Franschhoek: Du Toits River treated at Franschhoek WTP – (Own source);
- ⚙ Dwarsrivier and rest of Franschhoek: Potable water purchased from CoCT (Wemmershoek Line);
- ⚙ Raithby, Klipmuts, Koelenhof, etc.: Potable water purchased from CoCT (Blackheath WTP, Faure WTP and Wemmershoek Line); and
- ⚙ Boreholes BH1: Die Braak, BH2: Meerlust and BH3: Van der Stel, treated in Containerised Package Plants. This system was not utilised in the 2021/22 financial year.

Water is also supplied to a fairly extensive industrial area as well.

The municipality manages three water treatment works, namely Ida's Valley, Paradyskloof and Franschhoek, which is a micro water treatment plant. The potable water supply from these works amounted to 20.27 MI/d and a further 8.93 MI/d was obtained from the City of Cape Town (CoCT) during the 2021/22 financial year, ensuring a supply of approximately 29.21 MI/d to the municipality's area of responsibility.

Areas supplied by the Wemmershoek Dam and water treatment works include half of Franschhoek town, La Motte, Wemmershoek, Priël, Boschendal, Johannesburg, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier and Vlottenburg.

Areas supplied by Faure water treatment works (from Steenbras Dam – CoCT) are Faure, Jamestown, De Zalze, Raithby and Lynedoch. Although this treatment works fall within the sphere of responsibility of the City of Cape Town, their impact concerning water quality and quantity needs to be monitored and considered by Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 118 reservoirs / holding tanks / sumps and water towers, 69 water pump stations, 41 pressure-reducing valve installations and 704 kilometres of pipeline. The system is fully controlled and operated by a telemetry system.

The total bulk water input into the water network for the 2021/22 financial year was 10 661 MI, with an annual average daily demand of 29 208 kl/day. 41.5% of the water supplied is purified from the municipality's water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the CoCT (30.6%) and from the treatment of raw water at Paradyskloof WTP as supplied by the Department of Water and Sanitation (27.9%). Potable water supplied by the CoCT is analysed monthly.

Ida's Valley and Paradyskloof water treatment works are equipped with some analytical capabilities and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. Maintenance of equipment for all three plants is outsourced to external contractors.

Based on the municipality's IWA Water Balance sheet for the 2021/22 financial year under review, the municipality recorded 21.9% for "non-revenue" water, which is an increase of 3.8% from the previous financial year and 12.7% for Real Network Losses. Refer to the municipality's International Water Association (IWA) Water Balance Sheet.

System input volume: July 2021 to June 2022 ; kl *				10 660 846	100%
(water demand in reticulation system)					
Potable water system	Authorised consumption 81,3%	Revenue water 78,1%	Billed metered	7 807 027	73,2%
			Billed unmetered	521 538	4,9%
	Non-revenue water 21,9%		Un-billed metered	319 825	3,0%
			Un-billed unmetered	21 322	0,2%
			Commercial losses	639 651	6,0%
			Physical losses	1 351 483	12,7%
	Water losses 18,7%				
Revenue water (Sales) kl				8 328 565	
Non-revenue water (NRW) ; kl				2 332 281	21,9%
Real network losses ; kl				1 351 483	12,7%

The non-revenue water for the 2021/22 financial year is 21.9% which is below the target set of 25%. The real physical network losses are at 12.7% which is below the best practice value of 15%.

The table above is the International Water Association table to compute the water balance and is also accepted in the DWS reporting structure. This forms the basis of the information needed and what is currently used to calculate water losses. This is combined with monitoring systems installed on all bulk water supply points to determine and ensure accurate data on the water provided. The consumption data for all water users are drawn from the SAMRAS system with a regular data download to determine the total water sold. The figure above is used as far as possible to reflect the water balance and water losses in the water systems. The water readings of all areas are also sent to the DWS on a three-monthly basis to monitor and control water usage and allocations of water.

The municipality has developed a comprehensive Water Conservation and Water Demand Management (WC&WDM) strategy, which includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC&WDM and will ensure ongoing planning, management, monitoring and an enabling environment. The WC&WDM initiatives include a water pipe replacement programme, indigent domestic leak repair and meter replacement programme, Stellenbosch water meter audit and Stellenbosch in-house water services operations and maintenance.

The municipality implemented level 6 B water restrictions from 19 February 2018 – 31 October 2020 which were lifted with effect from 01 November 2020. The City of Cape Town is currently not implementing water restrictions. Stellenbosch Municipality is also currently not implementing water restrictions, but the public should be aware of the current predictions on future drought situations.

The following table reflects the current status of the dam levels supplying the WCWSS with water and the status of Stellenbosch's dam levels.

Table 130: Western Cape Dams

Major dams	2020	2021	2022
	(%)	(%)	(%)
Berg River	81.2	100.8	87.9
Steenbras Lower	49.9	89.9	78.6
Steenbras Upper	99.6	84.6	85.8
Theewaterskloof	55.8	101.9	76.1
Voëlvlei	54.5	88.1	63.2
Wemmershoek	43.3	97.7	65.5
Total Stored (MI)	540 023	879 173	679 794
% Storage	59.7	97.4	75.2

The table below depicts the Stellenbosch dams and overall water usage trends in the region (from CoCT Dam Levels Report, August 2022):

Stellenbosch's own Dams

Table 131: Stellenbosch dams

Ida's Valley 1	100	100	80
Ida's Valley 2	100	100	100

Overall Water Usage Trend (2010 - Present)

WCWSS means Western Cape Water Supply System
MLD means million litres per day
More information on Water Saving and Restrictions is available on the City of Cape Town's 'ThinkWater' website

WCWSS Comparative Storage Graph

Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Accumulated Monthly Rainfall at Wemmershoek

Note: Wemmershoek station used due to long record and mountainous location

3.4.1 Service Statistics – Water Services

The table below outlines water usage totals per category:

Table 132: Total Use of Water

Total Use of Water (Mℓ)					
Year	Total Water into the System (Mℓ)	Total Water Sold (Mℓ)	Non-Revenue Water	% Non-Revenue Water	% Physical Water Loss
2014/15	14 876	11 556	3 320	22.3%	10.3%
2015/16	13 889	10 498	3 391	24.4%	12.4%
2016/17	12 220	9 572	2 648	21.8%	9.7%
2017/18	8 661	6 779	1 882	21.7%	8.2%
2018/19	8 058	6 380	1 676	20.8%	6.9%
2019/20	8 015	6 374	1 640	20.5%	6.5%
2020/21	10 003	7 701	1 815	18.1%	9.9%
2021/22	10 080	8 174	1 906	18.9%	9.7%

3.4.2 Water Service Delivery Levels

As a priority, it is the responsibility of Stellenbosch Municipality to ensure that adequate and appropriate investments are made to ensure the progressive realisation of the rights of all people in its area of jurisdiction to receive at least a basic level of water and sanitation service. While the provision of basic water services is the most important and immediate priority, Water Services Authorities are expected to provide intermediate and higher levels of services (for example water on site) if it is practical and provided it is financially viable and sustainable to do so.

All water services provided by Stellenbosch Municipality to consumers within its borders are linked to the municipality's Tariff Policy and Tariff By-laws, and poor households are incorporated through the municipality's Indigent Policy.

A large number of residents in the lowest income groups (living in informal areas) pose a major challenge to the municipality to provide suitable housing. Stellenbosch Municipality strives towards providing all households in the towns with a water connection inside the house and connecting all households to a waterborne sanitation system.

All the formal households in the urban areas of Stellenbosch Municipality's Management Area are provided with water connections and waterborne sanitation facilities inside households (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. The municipality is aware of the fact that communal standpipes represent in all likelihood the weakest part of a network's water supply services, and constantly repairs and monitors the system of operation and maintenance thereof.

The table below specifies the different water service delivery levels per household:

Table 133: Water Service Delivery Levels

Description	2015/16 (audited)	2016/17 (audited)	2017/18	2018/19	2019/20	2020/21	2021/22
Household							
Water: (above minimum level)							
Piped water inside	37 902	37 989	38 027	40 321	42 615	38 120	38 120

Description	2015/16 (audited)	2016/17 (audited)	2017/18	2018/19	2019/20	2020/21	2021/22

Water Conservation and amp; Demand Management	3 000	2 673	10.88
Waterpipe Replacement	7 555	7 132	5.59
Only the 5 largest capital projects are listed			

The Section: Water Services has spent, 77% of the capital budget for the financial year.

3.5 Wastewater (Sanitation) Provision

The main focus for the 2021/22 financial year was to implement the demands of the Stellenbosch Municipality's masterplan, fulfilling the development needs for the Stellenbosch Municipality's vision, part of the demand was to complete the upgrade of the **Pniël Wastewater Treatment Works** and identifying and resolving operational issues at the **new Wemmershoek Wastewater Treatment Works**.

The construction of the 4.5 Ml/day Pniël WWTW upgrade commenced within the 2019/20 financial year. Delays caused by Eskom pushed the completion date into the next financial year (completion February 2023). The upgrade of the Wemmershoek WWTW Phase 1 commenced in the

2021/22 financial year and should be completed by 30 November 2022. The Phase 2 design may require a redesign given the budget availability for Phase 2.

The table below specifies the different sanitation service delivery levels per household for the financial years 2015/16 – 2021/22.

Table 135: Sanitation service delivery levels

Description	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
Household							
Sanitation / sewerage: (above minimum level)

**Information based on 2020/21. Awaiting the finalisation of the Water Services Development Plan (WSDP)

The table below indicates the capital expenditure for the Section: Sanitation Services at 30 June 2022.

Table 136: Capital expenditure as at 30 June 2021: Section: Sanitation Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Bulk Sewer Outfall: Jamestown	8 928	10 437	-16.90
Sewer pipe Replacement	2 275	2 468	-8.50
Stellenbosch WWTW	989	524	47
Upgrade of WWTW Wemmershoek	27 500	22 023	19.92
Upgrade of WWTW: Pniël and amp; Decommissioning of Franschoek	31	31	-0

Only the 5 largest capital projects are listed

The Section: Sanitation Services has spent 96% of the capital budget for the financial year.

The table below indicates all major projects implemented by the Department: Water and Wastewater Services.

Table 137: Number of employees in the Department: Water and Wastewater Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	0	1	100%
14 – 17	4	3	1	25%
9 – 13	37	35	2	5.4%
4 – 8	59	55	4	6.7%
3 – 0	115	111	4	3.47%
Total	216	204	12	5.6%

3.6 Major projects implemented

The table below indicates all major projects implemented for Department: Water and Wastewater Services.

Table 138: Major projects implemented

Project Name	Scope	Project Cost	Benefits, Impacts and Goals achieved	Other Comments
Water Conservation and Water Demand Management (Wc/Wdm) Initiatives				
Water Treatment Works Ida's Valley	Upgrading of the existing works to increase the current treatment capacity as well as to introduce colour removal.	R100M	Various upgrades and modifications to treatment works processes are to be made to increase treatment capacity.	The consultant stopped after the concept design due to funding being not available.
New Wemmershoek (Franschhoek Valley) WWTW	The New Nereda Wemmershoek WWTW is unable to reliably produce compliant Effluent and needs to be upgraded with tertiary treatment processes and increase treatment capacity.	R29M	Ensure allowance for future demand and economic growth and development of the greater Franschhoek and surrounding areas. Increase capacity from 3ML/day to 7ML/day in phases to eradicate Franschhoek WWTW challenges.	Construction of Phase 1 started in August 2021 and will reach completion in November 2022. Staff is constantly trained to mitigate operational issues.
Upgrade of Pniël WWTW	The upgrade of existing WWTW.	R164M	Capacity increased to 4.5ML/day.	Activated sludge process with Belt press and new UV disinfection system. Completion is delayed to February 2023.
Polkadraai Reservoir and Pipeline	Construct 2 reservoirs and upgrade the pipeline.	R103M	Form part of the Blackheath Augmentation system to allow water transfer from CoCT to Stellenbosch and also the use of own source during winter for Polkadraai area.	Project design and SCM processes completed for the appointment of the Contractor. The contractor was appointed on 17 August 2022 for a 60-week construction period.

3.7 Electricity

Load shedding continues to be experienced due to Eskom's challenges with its power stations. As in the previous financial years, Stellenbosch Municipality continues to contribute to Eskom's electricity supply stability, mainly via the following projects:

a) The Demand-Side Management

The municipality continued with the Energy and Demand Management project, to replace energy-inefficient streetlight fittings with energy-efficient (LED) fittings.

b) Hot Water Load Control Project

The municipality has continued to install hot water load control devices in the Franschhoek area, which will enable the shedding of all geysers during peak times, hence realising an energy-saving at the end of the month. A total of 9 223 load control devices were installed across Stellenbosch and Franschhoek. In addition, all new developments are being issued with load control devices to help manage the energy demand.

c) Alternative Energy

The current regulatory reforms include amendments to the Electricity Regulation Act on new generation capacity to enable municipalities to pursue their generation options.

The Minister of Mineral Resources and Energy, on 16 October 2020, gazetted amendments to the Electricity Regulations on New Generation Capacity. The amendments now enable municipalities in good financial standing to develop their power generation projects themselves or in collaboration with Independent Power Producers (IPPs).

Stellenbosch Municipality is now exploring least-cost electricity pathways that are accessible to mitigate against load shedding amongst other aspirations.

The Municipality has also embarked on a Rooftop Solar Photovoltaic (PV) project where five municipal buildings were identified, and rooftop PV has been installed. The combined capacity of the five plants amounts to 710 kWp. There are other renewable energy projects planned to be implemented.

d) Electrification of Informal Settlements

Through the Integrated National Electrification Programme (INEP) grant received, the municipality managed to construct an electricity network in Enkanini to cater for 1 000 connections in 2020/21. In 2021/22 the Kayamandi Bulk Infrastructure Project was initiated to strengthen the bulk infrastructure to provide for the remaining backlogs in Enkanini. The contractor is on-site implementing the project. During the 2022/23 financial year, 1 300 connections are planned, and we are in the process of appointing consultants for this project.

In Langrug, planning is underway to upgrade the network to cater for additional connections. Planning includes arrangements that need to be made to enable the new infrastructure.

e) Pniël take-over

The municipality continued with network upgrading in the 2021/22 financial year.

Each financial year, the municipality prioritises projects identified from the network assessment report by starting / addressing the critical infrastructure first. An electrical contractor has been appointed to continue with the network upgrading in the 2022/23 financial year.

3.7.1 The Electricity Service Delivery Statistics

Stellenbosch Municipality has four intake points, as indicated in the table below.

Table 139: Stellenbosch Municipality notified demand per intake point

Major Towns	Notified Maximum Demand (NMD)	Maximum Demand Growth (NMD)	Maximum Demand Peak (NMD)
Stellenbosch	60 MVA	0	51.205 MVA
Franschhoek	10 MVA	0	9.43 MVA
Cloetesville	16 MVA	0	12.23 MVA
Pniël	9 MVA	0	6.91 MVA (Peak from July 2021 to May 2022)

3.7.2 Electricity Losses

The electricity losses as at 30 June 2021 were 9.60%.

The table below specifies the different electricity service delivery levels per household.

Table 140: Access to basic electricity

Description	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
Household Prepaid							
<u>Energy: (above minimum level)</u>							
Electricity (at least minimum service level) (No. of conventional meters)	6 486	6 486	6 453	4 715	4 601	4 429	4 326
Electricity - prepaid (minimum service level) (No. of prepaid meters)	17 504	17 504	25 946	27 825	28 366	29 279	31 076
Minimum Service Level and Above Sub-Total	23 990	23 990	32 399	32 540	32 967	33 708	35 402
Minimum Service Level and Above Percentage	79.67	86.7	80.08	85.51	86.04	86.86	87.78
<u>Energy: (below minimum level)</u>							
Electricity (< minimum service level)	0	0	0	0	0	0	
Electricity - prepaid (< min. service level)	4 460	4 460	6 453	0	0	4 429	0
Other energy sources	N/A	N/A	N/A	N/A	N/A	N/A	
Below Minimum Service Level Sub-Total	4 460	4 460	6 453	0	0	4 429	0
Below Minimum Service Level Percentage	13.27	13.27	12.32	0	0	0	
Total Number of Households	48 002	48 002	52 374	32 540	32 967	33 708	35 402

The table below indicates the capital expenditure for the Department: Electricity Services at 30 June 2022.

Table 141: Capital expenditure as at 30 June 2021: Department: Electricity Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Alternative Energy	15 710	13 217	15.87
General Systems Improvements - Stellenbosch	6 774	6 698	1.12
Integrated National Electrification Programme (Enkanini)	27 401	17 741	35.26
Jan Marais Upgrade: Remove Existing and replace with 20MVA units	10 814	9 350	13.54

Only the 5 largest capital projects are listed			

The Department: Electricity Services has spent 80% of the capital budget for the financial year.

The table below indicates the total number of employees in the Department: Electricity Services.

Table 142: Total number of employees in the Department: Electricity Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	3	3	0	0
9 – 13	25	22	3	12%
4 – 8	40	38	2	5%
3 – 0	12	11	1	8.3%
Total	81	75	6	7.4%

3.8 Waste Management, Refuse Collections, Waste Disposal and Recycling

3.8.1 Waste Management

The Department: Waste Management's key responsibility is to keep the municipal area clean of waste, removal of illegal dumping, to provide a refuse collection and waste disposal service for all residents. The department also encourages waste minimisation through waste treatment, recovery and recycling solutions.

One of the highlights of the department was the hosting of various municipalities from the Eastern Cape to highlight good waste management practices which have resulted in real improvements in managing waste in the communities.

Some challenges within the department are the landfill has reached capacity and the design of a new landfill cell is complete. Thus, waste is currently being hauled and disposed of at a private landfill in Vissershok in Cape Town at an increased expense. The municipality is expecting approval of the Waste Management Licence Variation Application from the provincial Department of

Environmental Affairs and Development Planning.

Illegal dumping also poses a major challenge to the municipality's operations and budget.

3.8.2 Area Cleaning

The Section: Area Cleaning provides a service through a contractor, who is responsible for the cleaning of Stellenbosch CBD, and the use of EPWP personnel in other areas. Area cleaning is an essential service and all teams have worked throughout all the different lockdown levels. This section employed temporary workers from local communities that were sourced from the municipal unemployment database to perform cleaning services in the streets, open spaces and around waste removal skips.

Where the municipality faces huge volumes of illegal dumping, it uses its plant machinery (digger loader and tipper truck) to clean such areas.

The Section: Area Cleaning has recorded an increase in the illegal dumping of builder's rubble and green waste within specific areas.

The services rendered by the Section: Area Cleaning include but are not limited to street cleaning and emptying of litter bins.

Additional street bins were procured and delivered in February 2022. The specifications of these bins were amended to render a more robust bin with a small opening on top which makes it difficult for people to open the bin and remove items.

Figure 10: Executive Mayor at the unveiling of the new street bins

Figure 11: Example of the streets cleaning by the Section: Area Cleaning in Franschhoek

Before

After

EPWP Employment opportunities 2021/22 financial year

Staffing

Nine new operators were appointed in the Section: Area Cleaning in April 2022.

Table 143: EPWP employment opportunities

July 21	Aug 21	Sept 21	Oct 21	Nov 21	Dec 21	Jan 22	Feb 22	Mar 22	Apr 22	May 22	June 22
387	461	463	442	436	190	239	242	239	197	203	314

3.8.3 Refuse Collection

Refuse collection is rendered according to a weekly schedule for formal households, commercial properties and industries. The municipality supplies 240 wheelie bins to all service points but that excludes informal settlements where communal skips are provided and collected. This service is provided 7 days a week.

Wheelie 240 litre bins

The following information is drawn from the available data regarding wheelie bin distribution in the 2021/22 financial year :

Table 144: Refuse bins distribution

Bins	Total
Broken bins	88
New bins	218
Stolen bins	324
Extra bins	44
Total	674

The financial loss for the year for stolen bins amounted to R236 844.

Figure 12: Wheelie bins distributions

3.8.4 Waste Disposal and Waste

The Stellenbosch Materials Recovery Facility (MRF) has been operational since 01 April 2021. Volumes of recyclable waste, collected using a door-to-door collection service, varied from 88,92 tons in the first month, to a peak of 167,51 tons in November 2021. The monthly average is 116,53 tons.

The facility also features a public drop-off area, which allows residents to dispose of garbage and recyclable waste responsibly.

Figure 13: Inside of the MRF during operations

Figure 14: Bins in Public Drop-Off area

Green Waste is being chipped on-site at the Stellenbosch Landfill Site by an appointed contractor. Green waste is accepted at the Landfill Site, Franschhoek Drop Off, and now also at the Klapmuts Transfer Station. Green Waste from the respective sites is all transported to the Landfill Site where it is chipped. Annual volumes of green waste received is 5 961 Tons, with 4 179 Tons chipped and beneficiated.

Figure 15: Area allocated for chipping of Green Waste on Stellenbosch Landfill Site

a) Door-to-door recycling collection

This service is outsourced and is effectively rendered by the same contractor that manages and operates the MRF. The total volume collected for the financial year was 1083,15 Tons.

Figure 16: Stellenbosch Landfill Site

b) Disposal: Stellenbosch Landfill

The Stellenbosch Landfill situated on Devon Valley Road is in the care and maintenance phase and receives limited waste. Cell three has filled up since August 2019. Work is currently underway to license a new cell at the site.

Based on the most recent survey, the landfill is nearly overfilled but could be partly corrected by shaping the site to the final design levels and slopes.

Due to the lack of landfill airspace in Stellenbosch, the transfer of all general waste to the private landfill situated in the City of Cape Town area at the Vissershok Waste Management Facility (VHWMF) commenced in August 2019 and is still ongoing.

All waste received at the Stellenbosch Landfill Site, other than heavy bulky waste is transferred from the Klapmuts Transfer Station to VHWMF for disposal. Volumes of waste accepted at the site as indicated in the table below.

The extract below shows the Landfill statistics for waste in tons for the 2021/22 financial year.

Figure 17: Stellenbosch Landfill Site tonnages of waste

Landfill statistics for incoming waste in Tons													
Waste Description:	Jul-21	Aug-21	Sep-21	Oct-21	Nov-21	Dec-21	Jan-22	Feb-22	Mar-22	Apr-22	May-22	Jun-22	TOTAL

TOTAL	576	609	333	245	951	1229	272	3477	2263	911	1692	5501	18058

The table above refers only to incoming waste which was captured over the weighbridge as incoming loads and the waste removed, or beneficiated, for the 2021/22 financial year.

Only municipal waste is landfilled, and all other waste types are either beneficiated, stockpiled or used in another way on-site, e.g., soil as cover material and builders' rubble for the building of a road on site.

Figure 18: Crushing of builder's rubble done on site

Crushing is also being done, as part of the tender awarded to the current contractor who operates and manages the landfill site. A total volume of 13 437 Tons of crushed material was removed off-site for beneficiation.

Gas monitoring has been identified as a need
A total of 13 gas monitoring wells have been installed.

The installations of these wells formed part of the service rendered by an appointed contractor who is also tasked to conduct gas monitoring activities as per legislative requirements, and this is being conducted.

Water monitoring is also being done on this site as part of the service rendered at the Landfill, MRF and Klapmuts Transfer Station by an appointed service provider. After the most recent sampling, the groundwater quality was stable and has only experienced gentle, natural fluctuations in parameters.

c) Klapmuts Transfer Station

The Klapmuts Refuse Transfer Station (RTS) has a design capacity of 150 tons per day transfer capacity. Since August 2019 the Klapmuts RTS has been utilised at near capacity to transfer waste to VHWMF. Waste from all areas is transported in collection vehicles to the site and is transferred into open-top 30m³ bins for onward transport using three containers at a time, via bulk transport to VHWMF by an appointed contractor that renders this service.

The filling of bins is undertaken using two TLB machines, and a hook lift truck replaces the filled bins in the bays with empty bins. Filled bins are then placed in a designated area, pending removal by the appointed contractor.

The transfer of waste to and through Klapmuts RTS commenced in August 2019 and for the period from 01 July 2021 to 30 June 2022 a total of 38 878 tons of general waste was transferred.

d) Franschhoek drop off

The Franschhoek Drop-off facility continued to provide a free service to the residents of Franschhoek and its surroundings to dispose of garden waste and bulky goods. A contractor is appointed to transport garden waste to Stellenbosch Landfill and bulky waste to Vissershok Private Landfill. A contractor was appointed to explore the possibility of converting and re-designing the existing drop-off into a mini MRF and creating another drop-off where the builder's rubble and green waste can be chipped.

e) Relocation of Eskom Power Lines

The Stellenbosch landfill situated on Devon Valley Road is traversed by two high-voltage Eskom power lines. The presence of these power lines prevents the municipality from engineering and operating the area located between cells 1, 2 and 3 as waste disposal cells. This has resulted in the premature filling up of the facility which was put into care and maintenance mode with limited waste acceptance since August 2019.

This project is still ongoing and final agreements with Eskom have been signed for construction to commence.

f) Development of additional waste disposal cells project

The Stellenbosch landfill reached capacity in August 2019. All Stellenbosch waste is now being transferred to the private Vissershok Landfill. This represents a huge additional expense for the municipality. Thus, the project to design and construct the new cells is a high-priority project.

The municipality has appointed consulting engineers for the design, contract administration and construction supervision of the project. The Landfill Design Report was completed and submitted to the Department of Water and Sanitation and the Department of Environmental Affairs and Development Planning for approval. Once the designs are approved, construction can commence.

g) Projects continued in the 2021/22 financial year but initiated in the previous financial year(s):

i. Landfill gas extraction, flaring and electricity generation

Several investigations into the use of the landfill for harvesting and beneficial utilisation of landfill gas have been undertaken. The most recent study document in a report recommended that an active landfill gas extraction and the flaring system could still be considered for the Stellenbosch Landfill, mainly to reduce anthropogenic emissions from the landfill site. Should a full-scale project of this nature be implemented, revenue to support the project could be derived from prevailing emission reduction markets, and factual operational data would provide further evidence upon which to accurately evaluate the potential for a power generation project component.

The municipality has appointed a service provider to investigate and design a landfill gas extraction and management infrastructure. The investigation will also determine if electricity generation will be feasible.

h) Compliance

i. Internal audits

For disposal facilities (landfills and transfer stations) to be operated in compliance with the relevant legislation, all landfills must be licenced and managed according to the conditions in the licence. Internal audits form part of these legal requirements. Audits were conducted quarterly in the months of September, December, March, and June by Head Office waste management staff. Audits were conducted at the Landfill Site, Klappmuts Transfer Station and the MRF.

ii. External audits

Management practices at all sites must also be compliant with the Norms and Standards in terms of the National Environmental Management Waste Act (NEMWA) as well as with certain sections of Minimum Requirements for Waste Disposal by Landfill (DWAF, 1998), and other relevant regulations.

To be able to assess whether waste management practices are according to all stated conditions, landfill owners must, regularly (at least once per annum), obtain the services of an external auditor to undertake an independent landfill compliance audit.

To ensure compliance, external audits have been undertaken by an independent specialist consultant at the Stellenbosch Landfill and the Klappmuts Transfer Station, in terms of the waste management licence conditions. Six months later a review of the audit finding to ascertain improvements has been carried out. The independent auditor reported back to the municipality as well as to the Monitoring Committee.

iii. Monitoring Committee

All landfills are established and operated in terms of a waste management license (WML) issued by either the national or Provincial Department of Environmental Affairs. In terms of the WML, landfills are required to establish a Monitoring Committee. The objective of the Monitoring Committee is to provide a forum to enable the community to effectively participate in and monitor the operation, rehabilitation, closure and ongoing monitoring of a landfill.

The Stellenbosch Landfill has an active monitoring committee which is chaired by a representative of the community and minutes are prepared by the municipality. Monitoring Committee meetings are attended by DEA&DP officials as well as officials of various municipal departments as and when required. The independent external auditor also attends the meeting as and when required to

report on the findings of the annual external as well as the review audit. Meetings were held in September and December 2021 and in March and June 2022.

i) Waste Managers Officers Forum

The Waste Management Officer (WMO) for the Stellenbosch Municipality is the Senior Manager: Waste Management. Quarterly meetings of the Provincial Waste Managers Officers forum take place at various venues across the Province. The WMO attends the meeting and reports back on activities within the municipality – this also provides a forum to receive information from Provincial officials and for networking with WMOs from other municipalities within the province.

These forums are also held on a district level where municipal representatives from the Cape Winelands represent the waste-related matter within the district.

j) Social Engagement and Environmental clean-ups

The Department of Environment, Forestry and Fisheries (DEFF) provided the municipality with a Youth Environmental Coordinator (YCOP) to assist with social engagement and awareness. Unfortunately, during the financial year, this YCOP's contract expired, and no further social engagement and awareness activities were undertaken. The municipality will in future explore the possibility of filling a position within the department to undertake these social engagement and awareness activities, budget permitting.

The table below specifies the different waste management service delivery levels per household:

Table 145: Service delivery levels of waste management

Description	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
Household							
Refuse Removal: (Minimum level)							
Removed at least once a week	40 264	37 207	49 072	48 988	37 926	49 300	49 649
Minimum Service Level and Above Sub-Total	40 264	37 207	49 072	52 374	37 926	49 300	49 649
Minimum Service Level and Above Percentage	90.2	78.7	93.7	93.5	100%	100%	100%
Refuse Removal: (Below minimum level)							
Removed less frequently than once a week	1 064	1 064	1 064	1 064	1 064	N/A	N/A
Using a communal refuse collection	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Using own refuse dump	2 058	5 358	6 453	2 323	N/A	N/A	N/A
Other rubbish disposals	766	766	N/A	N/A	N/A	N/A	N/A
No rubbish disposal	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Below Minimum Service Level Sub-Total	3 888	7 188	7 517	3 387	N/A	N/A	N/A
Below Minimum Service Level Percentage	8.81	8.80	11.66	6.5	N/A	N/A	N/A
Total Number of Households	44 152	44 493	52 374	52 375	38 990	49 300	49 649

The table below indicates the capital expenditure for Department: Waste Management Services as at 30 June 2022.

Table 146: Capital expenditure as at 30 June 2021: Department: Waste Management Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Expansion of the landfill site (New cells) N/A	2 275	2 275	0.00
Landfill Gas to Energy	1 937	1 302	32.79
Street Refuse Bins	688	427	38.00
Transfer Station: Stellenbosch Planning and Design	961	932	3.02
Upgrade Refuse disposal site (Existing Cell)- Rehab	769	769	0.00
Only the 5 largest capital projects are listed			

The Department: Waste Management Services has spent 87% of the capital budget for the financial year.

The table below indicates the total number of employees in the Department: Waste Management Services.

Table 147: Total number of employees in the Department: Waste Management Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	2	2	0	0
9 – 13	5	3	2	40%
4 – 8	19	19	0	0
3 – 0	42	39	3	7.14%
Total	69	64	5	7.2

3.9 Integrated Human Settlements

3.9.1 Housing Development

The municipality has an important responsibility to plan for Integrated Human Settlements by ensuring that all its citizens reside in developable, formalised, safe and sustainable human settlements. This is accomplished by providing dignified living through National and Provincial funding within closer proximity to employment opportunities thereby improving the quality of life of all citizens.

The Section: Housing Development managed a capital expenditure budget of R8 140 068 from the allocated amount of R40 349 000 by the Department: Human Settlements.

Communication from the PDoHS on 27 January 2022 indicated the adjusted targets and funding allocation of the approved 2021/22 Human Settlement Development Grant (HSDG) and Informal Settlements Upgrade Partnership (ISUP) Grant Business Plans.

The list of projects, targets and budget for the Stellenbosch Municipality for the 2021/22 financial year are stipulated in the below tables as extracted from the said letter.

3.9.1.1 Human Settlement Development Grant (HSDG)

Table 148: Human Settlement Development Grant (HSDG)

Stellenbosch Municipality	2021/22 Planned		
	Sites	Units	Funding R'000
Kayamandi Watergang Northern Extension (2000)	0	0	5 900
Stellenbosch Ida's Valley (166) FLISP	166	0	14 556
Stellenbosch Ida's Valley (204)			4 654
Vlottenburg Longlands (106 incr to 144) IRDP	0	106	14 040
Stellenbosch Jamestown Phase 2 (133) IRDP	0		1 199
TOTAL	166	106	40 349

3.9.1.2 Informal Settlements Upgrade Partnership (ISUPG)

Table 149: Informal Settlements Upgrade Partnership (ISUPG)

Stellenbosch Municipality	2021/22 Planned		
	Sites	Units	Funding R'000
Kayamandi Watergang Basic Services	0	0	6 500
ISSP Kayamandi Town Centre (1 000) UISP	0	0	3 500

ISSP Kayamandi Enkanini NGO	0	0	2 954
Franschhoek Mooiwater Dam Rehab and Basic Services	0	0	2 500
TOTAL	78	0	21 304

3.9.2 Housing multi-year projects

The Section: Housing Development whose main function is to plan for future housing developments, by the Housing Pipeline is currently focusing on the following multi-year projects:

3.9.2.1 Erven 412, 217 and 284 Groendal, Franschhoek

The Section: Housing Development together with the Section: Property Management undertook a process to formulate a Call for Proposals in line with the approved Council agenda item.

A service provider was appointed to draft different site development options for the Council to consider for approval, where after the procurement process will continue.

An agenda item has been drafted and circulated to the relevant departments for input / comments. Additional input on the layout was received from the Department: Roads, Transport, Stormwater and Traffic Engineering Services, therefore the item was submitted to MayCo in May 2022. The item was removed to allow for further inputs from the affected Ward Councillors and Ward Committees.

Figure 19: Aerial image

A meeting was held with the Deputy Executive Mayor, Councillor Petersen, Councillor Pheiffer and relevant officials from the Section: Housing Development on 2 June 2022 to discuss the different layout options. The Ward Councillors will liaise with the Ward Committee and will provide feedback by 31 August 2022.

3.9.2.2 Farms 81/2 and 81/9, Stellenbosch

In terms of the implementation of Social Housing Programmes, the Stellenbosch Municipality has identified Portions 2 and 9 of Farm No 81 Stellenbosch. This site is located between the Cloetesville and Kayamandi settlements.

Its boundary is framed by the R304 to the west and the railway line to the east. The Plankenburg River traverses the site along the eastern boundary. The southern boundary of the property includes portions of the Kayamandi Tourism Centre, as well as a bridge over the railway line. The northern boundary is framed by the Mount Simon residential development.

The Section: Housing Development liaised with the PDoHS, Social Housing Regulation Authority (SHRA) and National Association of Social Housing Organisations (NASHO) to obtain inputs in the finalisation of the specifications and criteria for a Call for Proposal.

Service providers have been appointed during the 2020/21 financial year to undertake a geotechnical investigation, flood line study and a traffic impact assessment on the site.

In terms of the flood line study, it is evident from the 1:100-year flood line that most of the land on the west side of the Plankenburg river is above the flood level and would be suitable for residential development.

The Traffic Impact Assessment (TIA) report concludes in support of a proposed Residential Development (3 – 4 storeys walk-up flats) on Erven 81/2 and 81/9, Stellenbosch.

The user department is currently drafting a Request for Proposal (RFP) to invite delivery agents that can access SHRA Capital grants (SHIs and ODAs), to submit a Concept Proposal to develop Social Housing on Farm 81/2 and Farm 81/9, Stellenbosch.

Meetings were held with the Section: of Land Use Planning and Engineering to discuss the incentives in terms of parking requirements and Development Cost (DC) reductions. Both departments are positive with the input provided.

Several engagements were held with the officials of the City of Cape Town and NASHO during November 2021 on how to assist the Stellenbosch Municipality given the challenge the administration is currently facing under normal procurement processes, services and goods based on a 90/10 or 80/20 process.

The tender has been advertised in June 2022 and the closing date is 4 July 2022. On request from the bidders (during the compulsory clarification meeting which was held on 15 June 2022) due to the short period to submit their bids, Bid Specification Committee approved an extension of the closing date to 8 August 2022.

3.9.2.3 Erf 7001, Cloeteville

The goal of this development is the delivery of medium to upper (GAP) housing market and not aimed at BNG housing units (free houses). There is an urgent need for the property to be developed to create an integrated urban development (Cloeteville), providing housing.

Stellenbosch Municipality is essentially making the land available (via the ATR processes) to a developer to develop housing opportunities in the GAP market.

This is in line with feasibility studies that have been conducted for the GAP housing market in Stellenbosch. The proposal is also in line with the Stellenbosch IDP and mSDF which designates this property for future GAP housing purposes.

The town planning and design principles are to incorporate aspects of integration, designing for community safety, accessibility, and dignified spaces.

The site is sloped and constraints numerous pine trees. The site contains a water retention / water tower facility and buffers associated with this facility will need to be investigated. Water supply lines will also need to be determined.

A new tender was advertised and closed on 26 July 2021 to appoint a service provider to undertake a Broad Conceptual Urban Design framework for Erf 7001, Cloeteville to obtain town planning and development rights.

Figure 20: Aerial image of Erf 7001, Cloeteville

The technical evaluations of bids have been concluded. The technical evaluation report served at Bid Adjudication Committee and was approved on 21 October 2021 pending the finalisation of project funding for the MTREF period.

The PDoHS approved the funding for the outer years after the Business Plan has been Gazetted in March 2022. Therefore, the user department could only appoint a service provider in May 2022 and the Service Level Agreement is in process to be concluded.

3.9.2.4 Farm 527, Jamestown (Phases 2, 3 and 4)

The subject property is located on the southern edge of the suburb of Jamestown, east of the R44 between Stellenbosch and Somerset West. It is flanked by an existing cemetery on its western boundary and a sports field located centrally on its northern edge.

The site falls within an area characterised by medium to high-density residential as well as non-residential uses that serve the local community of Jamestown.

Portion 4 of Farm 527 has been rezoned for residential purposes allowing for a mix of residential types. Phase 1 of the development consisting of 162 subsidised housing opportunities was completed in November 2016.

It is therefore proposed that Phases 2 and 3 of Portion 7 of Farm 527 (site and service, 2-storey walk-ups, GAP housing, high-income housing and public open space) be made available simultaneously for development in the short to medium term.

The municipality went out on a procurement process seeking the services of a multidisciplinary team of professionals to undertake a Broad Conceptual Urban Design framework and to obtain town planning and development rights.

The process and timeframe for Phases 2 and 3 will be concluded over a period of two (2) years.

The PDoHS approved the funding for the outer years after the Business Plan has been Gazetted in March 2022. Therefore, the user department could only appoint a service provider during June 2022 and the Service Level Agreement is in the process to be concluded.

Figure 21: Location plan of Farm 527, Jamestown

Figure 22: Proposed development opportunities

3.9.2.5 Kayamandi Town Centre

A service provider with the necessary multi-disciplinary team of professional consultants was appointed to conduct a feasibility study to assess the redevelopment of the town centre of Kayamandi to provide a holistic development picture of Kayamandi. The latter resulted in a framework for possible future development opportunities in Kayamandi and its environs.

The proposed typology mix is such that it will enhance the beauty and character of the Kayamandi Town Centre in that it will provide a mix of typologies to accommodate the old and the young. The proposal for walk-up units is also to provide maximum densification within the available limited space.

The proposed town planning layout consists of $\pm 1\,800$ housing opportunities (2 to 3-storey BNG walk-ups). The development parameters will include a mix of housing typologies, business units and community facilities. This design methodology was utilised to suit the demand and the needs of the affected community.

The community must agree upon a relocation strategy to effectively address the challenges facing Kayamandi Town Centre.

Figure 23: Parameters of the project

The aim would be to unpack the developmental opportunities of Kayamandi and recommend a relocation strategy for the families moving to the temporary units / site that has been earmarked for this process (Northern Extension).

Conceptual urban design proposals were presented and submitted by the service provider in November 2021 to Section: Spatial Planning for inputs.

A new Urban Design concept has been proposed to deal with the multi-storey upgrading (3-storey walk-up units) of the Kayamandi Town Centre. This new Urban Design concept has been presented on 23 May 2022 to the Deputy Mayor and Director: Planning and Economic Developments for comments and inputs.

The planning application process is anticipated to be completed during the 2022/23 financial year.

3.9.2.6 Northern Extension, Stellenbosch

The Northern Extension of Stellenbosch is situated north of Kayamandi, adjacent to Cloeteville and the Welgevonden Estate. The sites are located on the western side of the R304 (the main arterial from the North) to Stellenbosch.

A service provider was appointed by Stellenbosch Municipality to appoint the necessary multidisciplinary team of professional consultants to conduct a due diligence assessment to assess whether it is suitable for the expansion of a mixed-use development to the north of the town.

The specific site has been earmarked by the Stellenbosch Municipality for the northward extension of the urban area of Stellenbosch. The intention is to provide a multiple-use development that could yield ±5 000 – 6 000 residential opportunities to address the housing need experienced in Cloeteville, Ida's Valley and Kayamandi.

It should be noted that a portion of the development of the northern extension has been identified as a possible relocation area for the redevelopment of the Kayamandi Town Centre and other related projects.

All specialist studies have been completed. The draft Market Analyst study that was undertaken by DEA&DP was concluded in May 2022 and will be incorporated in the drafting of the conceptual design layouts. The different conceptual design layout options were workshopped with various internal departments during June 2022.

It is envisaged that the development rights could be obtained during the 2022/23 financial year.

Figure 24: Location of the proposed development of the Northern Extension

3.9.2.7 Erf 64, Kylemore

The identified property is 15.5ha in extent of which the municipality requires ± 8 ha for residential purposes.

Various meetings were held with the National Department of Public Work and Infrastructure (NDoPW&I) and it was indicated that the Directorate: Investment Analysis will conduct a feasibility study as part of the relevant business process of the Department of Public Works and Infrastructure (DoPW&I). Upon completion of the feasibility study, the relevant report and recommendations have been submitted to the Directorate: Disposals (Land Reform and Human Settlements) to inform their submission for Ministerial approval.

The feasibility study was completed during the 2019/20 financial year and is awaiting the transfer of Erf 64, Kylemore to the municipality.

It should be noted that pre-feasibility studies were conducted more than 10 years ago and need to be reviewed and amended where necessary.

The HDA has been appointed to assist with the transfer of land from the National Department of Public Works (NDPW) to the Stellenbosch Municipality and to further attend to the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General and the relevant applications to the PDoHS.

A project programme to outline the deliverables and timeframes for the transfer and application for planning applications was provided by the HDA.

Figure 25: Site layout of Erf 64, Kylemore

The summary of the progress achieved to date:

- i. The HDA went out on a procurement process to appoint a team of professionals to finalise detailed planning studies for the preferred development option and to obtain development rights;
- ii. The HDA is to submit a Project Initiation Document (PID) funding application to the municipality; and
- iii. The PID funding application is with PDoHS for comments, the PID funding application will be finalised and submitted in August 2022.

3.9.2.8 Langrug, Franschhoek

Various projects and interventions have been identified for planning and eventual implementation to upgrade Langrug incrementally and improve the delivery of basic services.

Hereunder is a summary of the medium to long-term projects:

- ✚ The construction of phase 2 emergency access road and the installation of underground services;
- ✚ Re-blocking of sections to improve access and basic services;
- ✚ Upgrading of the bus route;
- ✚ Relocation and subsequent rehabilitation of the dam area;
- ✚ To commence with the re-blocking of Langrug, a decanting site on Erf 3229, Mooiwater, Franschhoek is being developed (basic services), the process of which is currently underway; and
- ✚ Cancellation of the existing General Plan and consolidation to create one land unit.

3.9.2.9 Erf 3229, Mooiwater, Franschhoek

Erf 3229 at Mooiwater has been identified as a relocation site to accommodate families impacted by the rehabilitation of the dam wall at Langrug informal settlement. The subject property is currently vacant and is being used for illegal dumping.

A professional team was appointed to undertake planning, studies, investigations, and assessments to establish a temporary relocation site on the property. Specialist studies and investigations that were undertaken include:

- ✦ Environmental Screen;
- ✦ Geotechnical Investigations;
- ✦ Assessment of Land Contamination;
- ✦ Geohydrological and Assessment of Gases and Leachate; and
- ✦ Freshwater assessments and determination of 1:100-year flood line.

The above-mentioned studies were utilised to provide input into the final proposals for the development of the property, in terms of the proposed layout plan and civil services. The statutory approvals mentioned hereunder have been obtained for the proposed development:

- ✦ Environmental Authorisation;
- ✦ Land use approval; and
- ✦ Approval of civil designs.

A tender to appoint a contractor for site works and construction of bulk earthworks was advertised by the Department: Project Management Unit (PMU). The municipality received various bids which were evaluated, and a technical report was submitted to SCM. The Section: PMU finalised the appointment of a contractor. The contractor is expected to establish on-site in August 2022 to commence with site works.

The Section: PMU is finalising funding applications for emergency housing, which will be submitted to the National Department of Human Settlement (NDoHS) for consideration. Furthermore, the Department: PMU is compiling funding applications for the implementation of basic services, which will be submitted to the PDoHS for consideration.

3.9.2.10 La Motte, Franschhoek

La Motte is a former Bosbou Hamlet situated approximately 3.5 km northwest of Franschhoek town, on the Robertsville Road, close to where it intersects the R45. Originally built to house forestry workers, the village is made up of the original dwellings and a range of community facilities. During the construction phase of the Berg River Water Scheme, new houses were built adjacent to the existing settlement to temporarily house the construction workers; these houses have been transferred to identified beneficiaries.

The Stellenbosch Municipality and the community of Franschhoek have been proactive in addressing the need for affordable and subsidised housing and several initiatives have successfully been implemented.

Through a tender process, a service provider was appointed, and a feasibility study has been concluded.

The Department of Public Works and Infrastructure, as custodians of the relevant portions of land, has been engaged to start the necessary procedures that would lead to the transfer of the subject properties into the name of Stellenbosch Municipality, for housing purposes.

Figure 26: Identified portions of land

The municipality is currently awaiting feedback from the National Department of Public Works. The HDA has been appointed via an Implementation Protocol agreement to assist with the transfer of land from the National Department of Public Works (NDPW) to the Stellenbosch Municipality and to further attend to the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General and the relevant applications to the PDoHS.

The HDA submitted a new request for the State Land Release for the subject property by DPW&I to HDA through Power of Attorney. The target timeframe for the release of the land is the end of the 2022/23 financial year.

The HDA to submit a Project Feasibility Report (PFR) requesting funding for land use rights for the project on the release of the property has been completed and is ready for submission to PDoHS to allow funding flow for the 2023/24 financial year.

3.9.2.11 Meerlust, Franschhoek

Portion 1 of the Farm Meerlust No 1006, in the Franschhoek Valley known as Meerlust has been identified for residential purposes. Ownership of the property currently vests with the National Department of Public Works (NDPW). The site is located on the southern edge of the R45 close to the intersection of the R45 and the R310 and lies between Werda in the northwest and Allee Bleue, Lekkerwyn and the Pickstones to the east.

A portion of this land currently accommodates the Meerlust Forestry Village (home to around 34 households) and the upgrade / redevelopment of this village is an integral part of this Call for Proposals. Portion 1 of the Farm Meerlust No 1006 included in this Proposed Development Concept is zoned Agriculture and application therefore still needs to be made to obtain development rights for urban / residential development. The development of this area is therefore only possible in the medium to long term as also indicated in the Stellenbosch Municipality Housing Pipeline (Annual Review 2017 – 2020). It will therefore be required of the prospective developer to do the necessary

detailed feasibility studies (in addition to those already completed) and obtain the relevant planning and other approvals to enable township establishment for the proposed development.

The municipality has appointed the HDA via an Implementation Protocol Agreement (IPA) to assist with formulating a sustainable development solution for the Meerlust Project, considering the needs of the community while considering the long-term financial sustainability of the municipality. The role of NDoPW&I is also critical, especially in understanding what is permissible within their mandate. Above anything else, the task of HDA is to mainly provide technical guidance for the best possible development option, and mediate engagements with all stakeholders who have different and sometimes conflicting interests.

The Department of Public Works and Infrastructure (DoPW&I), as custodians of the relevant portions of land, has been engaged to commence with the necessary procedures that would lead to the transfer of the subject properties into the name of Stellenbosch Municipality, for housing development purposes.

The summary of the progress achieved to date:

- Development options have been completed and are ready for presentation to the Stellenbosch Municipality;
- Detailed costing to be undertaken for the preferred development option;
- The HDA is assisting the municipality to facilitate the release of land by DPW&I to HDA through Power of Attorney; and
- The HDA is to request funding for land use rights for the project once the release of the property has been completed and is ready for submission to PDHS.

3.9.2.12 Erf 2183, La Rochelle, Klapmuts

Erf 2183, Klapmuts is located along Gomas Street, Klapmuts, approximately 1.5km off the R310 that links Stellenbosch to the N1. The site is located on the south-eastern edge of the town of Klapmuts and is bordered by vacant land to its southern and eastern boundaries, with a proposed new housing development on the western and northern boundaries towards Mandela City, Klapmuts. To provide for the dire housing need in the Klapmuts area, especially for current backyarders, this property was identified as a possible option for a "site-and-service" housing project.

A tender has been advertised and a service provider has been appointed to undertake a subdivision application and registration of the diagrams in the Surveyor General's Office for Erf 2183, La Rochelle, Klapmuts.

Figure 27: Aerial image of the site

The service provider drafted conceptual sub-divisional layouts and obtain comments / inputs from Directorate Infrastructure Services. The service provider had a pre-consultation meeting with the Section: Land Use Planning in March 2022. The Section: Land Use Planning requested the service provider, according to the Street Naming Policy, that three street names be submitted with the layout plans to advertise the application.

3.9.2.13 Five housing projects in Kayamandi, Stellenbosch

From the period 1984 to 2015 the planning approval processes for the re-development of the old Kayamandi township area and the 18.5 ha extension area vested with the Provincial Government Western Cape: Department Community Services and the Department of Land Affairs. The planning approval function was later done by the Department of Housing, Local Government and Planning: Provincial Government Western Cape. Aspects about land development and the establishment of development boards were done in terms of the Black Communities Development Act, 1984 (Act 4 of 1984) and the Less Township Establishment Act, 1991 (Act 113 of 1991).

The said provisions applied to the following projects:

a) Project 4 A (Erven 1080 to 1112, Kayamandi) (Ward 12)

The 146 units were developed as rental stock units. The relevant statutory approvals (consolidation of land units) are required to enable the registration of the sectional title scheme on the consolidated properties.

A service provider is appointed to entail the amendment of the approved General Plan.

Figure 28: Locality map of Project 4A

b) Project 4 B (Red Bricks Hostels - Erven 112, 114, 115, 116) (Ward13)

The project formed part of the hostel upgrading programme for Kayamandi and was implemented and constructed in 2004. It comprised the consolidation of erven 112, 114, 115 and 116 as registered in terms of the General Plan.

The project entails the rezoning and subdivision of the property into 51 units and 5 public open spaces.

Figure 29: Locality map of Project 4B

c) Project 5 A (175 Units - Erven 1123 – 1154) (Ward 15)

The project entailed the consolidation of Erven 1123 and 1152 as well as Erven 1113 and 1122 as registered in terms of the General Plan. The said erven formed part of the 18,5-ha development area that comprised Erven 707 and 1071 as approved in terms of Act 4 of 1984.

The project entails the subdivision of the property into 175 higher-density units and public open spaces.

Although the General Plan (Erven 1982 – 2165) was submitted to the Provincial Government of the Western Cape, the registration of the plan was not done to date because Erf 1120 (a public place) was not closed.

Figure 30: Locality map of Project 5A

d) Project 5 B (137 Units – Erven 513-522, 67 and 69 and a portion of Erf 523) (Ward 12 and 15)

Project 5B formed part of the Kayamandi Town Centre urban renewal project as funded in terms of the overall hostel project upgrading programme. The development made provision for 137 higher-density units, a new road and several open spaces.

Figure 31: Locality map of Project 5B

The development entails the consolidation of Erven 67, 69, a portion of Erf 523 and Erven 513-522 and the re-subdivision thereof into individual higher-density units. The project was implemented and constructed in 2004. The project was partially completed due to the construction of informal structures on the remainder of the property. A total of 42 units have been built. It is recommended that the amendments of the General Plans (149/1987 and 290/1989) be done.

e) Project 8 (Mpelazwe – Remainder Erf 288 Kayamandi - 65 units) (Ward 13)

Mpelazwe is one of the oldest parts of Kayamandi town and was identified as a priority project in light of its historic character and response from the community.

Figure 32: Locality map of Project 8

The development forms part of the hostel upgrading programme and comprised the development of 54 residential units.

Although approval was previously granted for the relay out of the area it still forms part of Remainder Erf 288 as per General Plan.

Although erf numbers (Erven 2392-2446) have been allocated, the formal rezoning and subdivision and closure of public roads have not been completed to date.

A service provider has been appointed to finalise township establishment by obtaining the necessary land use rights for each of the five projects situated in Kayamandi, Stellenbosch as well as submission of all diagrams in the Surveyor-General's office for registration and approval.

A Notification of Intent to Develop (NID) application was submitted and no objections were received from the Heritage Department and were approved accordingly. Awaiting feedback from DEA&DP concerning NEMA.

A draft letter was submitted to Land Use Planning Department to apply for exemption from the Publication and Serving of Notices (Sections 43 and 44 of LUPA, Act 3 of 2014) for all five (5) completed projects, in terms of Section 60 of the Western Cape Land Use Planning Act (Act 3 of 2014).

The Western Cape Minister of Local Government, Environmental Affairs and Development Planning approved (in terms of Section 60 of LUPA) that the municipality is exempted from the provisions of Sections 43, 44 and 47 of LUPA in October 2021.

The service provider was instructed that the Kayamandi Project 5B Land Use Application which was submitted on 28 April 2022, be put on hold as Erf 66 which is part of this project is currently private-owned property. The municipality's legal department is currently busy with legal action to expropriate Erf 66. To process Kayamandi Project 5B, a Power of Attorney needs to be concluded and submitted with the application for approval.

3.9.2.14 Maasdorp Village

The residents of Maasdorp are either employees of the Department of Forestry or the descendants of employees of this Department, who were afforded homes / tenancy on a large tract of land, constituting Portions 27 and 28 of Farm La Motte No 1041 Paarl, Franschhoek. It is the intention of this project to assist the Department of Forestry (who in turn has given Stellenbosch Municipality the authority) with the subdivision of the subject properties constituting Maasdorp Forest Village into smaller residential properties for township establishment.

The intention is also to transfer these proposed properties (and homes) to the residents of Maasdorp and as may further be determined. It was originally intended that this project is meant to benefit only the residents currently living in Maasdorp Forest Village who have either been employed by or whose parents were employed by the Department of Forestry. The beneficiaries to be accommodated by this development depends on the outcome of envisioned community engagements and the updated socio-economic study to still be undertaken.

The lengthy process of the project is due to multiple challenges throughout the project. Firstly, there were delays at the commencement of the project due to the initial socio-economic survey which was not done by the service provider, and which was required as a crucial element to effectively continue with the process from the service provider's stance. The initial socio-economic survey took a long because the residents were either not timeously sensitised to the dates of the survey or blatantly refused engagement, or, residents were not home when the survey was being completed. There was thus a time delay in getting all the relevant information from all the residents.

The survey process with the community and the collation of survey data has been completed. The outcome of the survey has been presented to the Department: Housing Development in September 2021 and factored into the Land Use Planning Application which was submitted to the Department: Land Use Planning in June 2022. The project is ongoing.

3.9.3 Strategic document: Integrated Human Settlement Plan for Stellenbosch Municipality

It is a municipal priority that the Stellenbosch Municipality's Integrated Human Settlement Plan (IHSP) be compiled in line with the PDoHS.

It is furthermore a requirement that the above IHSP be aligned with the Stellenbosch Municipality's approved IDP and mSDF.

A service provider was appointed to compile an Integrated Human Settlement Plan for Stellenbosch Municipality.

The draft revised Integrated Human Settlement Plan was submitted in March 2022 for scrutinising. The final draft Integrated Human Settlement Plan will be submitted by 31 December 2022 for the Council to approve. Thereafter a public participation process will follow and Council will consider inputs from the public if any are received.

3.9.4 Informal Settlements

According to the most recent surveys undertaken by the Section: Informal Settlements and independent service providers, the population of informal settlement dwellers is approximately 19 710 residents. This is approximately one-sixth (1/6) of the municipal population of approximately 153 000 residents (Census 2011).

3.9.4.1 Survey of backyard dwellers in Kayamandi

The tables below are a reflection of the municipal data:

Table 150: Survey backyard dwellers in Kayamandi

Type	Results
Area	Kayamandi
Survey period	April to May 2021
Number of stands / plots	1 953
Number of backyard structures	5185 (residential, carports, storages, shelters etc)
Average structures per stand	2.65
% structures used for residential	38.3%
Number of households (residential)	1 981 minimum
Households interviewed	1 629
Structures / stands that were not surveyed	482 (refuse to partake mostly foreign renters, no access, no backyard dweller)
Average household size	1.52
Head of household income	59% earn R4 000 or less per month
Type of structures	76% shack
Ownership of structure	75%
Structure occupation	73% single-person occupation
Respondent's previous area of residence	72% in the same area
Registered on housing demand database	11%
All household members residing in the same structure	69%
Households receiving grants	18%
Age of head of household	45% between 26 and 35 years
Gender of the head of household	52% female
Preferred mode of transport	41% other (taxi), 37% walk
Employment status	48% employed
Access to water on the property	93%
Access to electricity	98%
Access to sanitation	97%
Access to waste removal	94%

3.9.4.2 Survey of backyard dwellers in Klapmuts

Table 151: Survey backyard dwellers in Klapmuts

Type	Results
Area	Klapmuts
Survey period	April to May 2021
Number of stands	2 110
Number of backyard structures	4123 (residential, carports, storages, shelters etc)
Average structures per stand	1.95
% structures used for residential	39.4%
Number of households (residential)	1 626 minimum
Households interviewed	1 094
Structures / stands that were not surveyed	534 (refuse to partake mostly foreign renters, no access, no backyard dweller)
Average household size	2.30
Type of structures	50% shack, 45% wendy house
Ownership of structure	98%
Structure occupation	41% single-person occupation
Respondents' previous area of residence	72% in the same area
Registered on housing demand database	29%
All household members residing in the same structure	94%
Households receiving grants	23%
Age of head of household	41% between 26 and 35 years
Gender of the head of household	62% female
Preferred mode of transport	30% walk, 22% train, 21% staff transport
Employment status	46% employed
Access to water on the property	97%
Access to electricity	96%
Access to sanitation	98%
Access to waste removal	92%

The project yielded employment opportunities for unemployed youth from both areas:

Table 152: Opportunities created

Surveys (Backyard Dwellers)	The actual number of jobs proposed	Proposed number of jobs to be created per ward	Number of people employed
Kayamandi	25	7	21
Klapmuts	25	18	18

A service provider is to be appointed to undertake a demographic survey of backyard dwellers in Groendal and Mooiwater, Franschhoek. The service provider will be appointed to conduct the survey during the 2022/23 financial year.

Electrification of portions of Enkanini

The municipality is currently in the process of making 1 000 electricity connections in Enkanini. The project commenced on 27 January 2021 and is ongoing.

The progress to date with this project is as follows:

- ✚ Project commenced: 27 January 2021;
- ✚ Verification of Sections F, G, H and I have been completed and the lists have been distributed except for Section F which has been excluded from the project by the Electrical Department due to costs;
- ✚ Section H beneficiaries have received electricity connection to their structures and power has been switched on for usage;
- ✚ Most of the illegal electricity connections have been removed. There are reports of some minor infringements on this matter, however, the project team is dealing with this matter on a case-by-case basis; and
- ✚ Health and safety are a concern during construction.

3.9.4.3 Watergang Informal Settlements – provision of basic services

The Section: Informal Settlements undertook community facilitation processes to assist the Section: Project Management with the implementation of the project.

The progress to date with this project is as follows:

- ✚ Project commenced: 17 January 2022 planned to be completed by 30 June 2022; and
- ✚ Phase 1-3 has commenced with 7 ablution blocks constructed with a total of 36 toilets and 21 taps out of the initial 100 toilets and 50 taps budgeted for. The reduction in the number of toilets and taps is due to the community not being willing to cooperate with the municipality's plans to relocate structures identified to make space for the project.

The images below depict the Implementation of ablution blocks in Watergang Informal Settlements

Table 153: Informal Settlements for the period July 2021 – June 2022

Item	Number of ablution facilities provided by the Council	Number of taps provided by the Council	Informal settlements with grid electricity	Number of Informal Settlements	Informal settlements without grid electricity	Performance comment
Number of informal settlements recognised by the Council	1 027	549	22	29	6	A portion of Enkanini is receiving electricity
Number of informal settlements recognised by the Council	0	0	0	2 (Klapmuts Farm and Lanquedoc COVID-19 Campaign)	0	Settlement not recognised, land initially used for live-stock farming with 18 structures. Over time 14 households erected structures. Total 32 structures
Number of structures	0	0	0	10 402	0	

3.9.4.4 Relocations (for the period 01 July 2021 – 30 June 2022)

Table 154: Relocations statistics

Areas where relocations are planned	Proposed number of households to be relocated	Number of households relocated to date	Remaining number of households to be relocated	Performance comment
Kayamandi (Zone O)	55	0	55	Project at initial stages, engagements with the community have commenced
Longlands	77	0	76	Relocation to commence in July of the 2022/23 financial year.
Papplaas	11	11	0	Completed
Relocation as a result of evictions	6	6	0	Completed
Meerlust	23	23	0	Completed
Total Number of Households	172	40	131	

3.9.4.5 Disaster Management (for the period July 2021 – June 2022)

Table 155: Total number of structures impacted by incidents in all areas

Incidents reported in	The number of fires and winds verified	Number of backyard structures affected by fire	Number of formal structures affected by fire	Number of structures affected by floods or Wind	Performance comment
Formal settlements	18	27	-	0	All verifications completed within 48 hours
Informal settlements	30	-	530	0	All verifications completed within 48 hours
Total number of structures impacted by incidents in all areas	48	27	530	0	

3.9.4.6 Evictions (for the period July 2021 – June 2022)

Table 156: Number of evictions as at 30 June 2022

Notices of evictions received	Number of meaningful engagements held	Number of agreements signed	Court orders issued
11	3	0	0

3.9.4.7 Informal Settlements population

According to the most recent surveys undertaken by Section: Informal Settlements and independent service providers, the population of informal settlement dwellers is approximately 19 710 residents. This is approximately one-sixth (1/6) of the municipal population of approximately 199 325 residents (Socio-Economic Profile: Stellenbosch 2022).

3.9.4.8 Development proposals / strategy

The Section: Informal Settlements developed a development strategy for every informal settlement within the municipal area. The full respective strategies are included under Cluster 1 to Cluster 5.

The strategy is premised on 3 pillars:

- i) a synopsis of existing basic services. This synopsis includes an analysis of the shortfalls in service provision;
- ii) Cryptic demographic information of the head of households, as well as a desktop risk analysis of the settlement; and
- iii) the third pillar / component consists of development proposals. These proposals are aligned with 3 strategic documents, i.e. the IDP, SDF and the Housing Pipeline.

The development proposals are furthermore aligned with the budget cycle of the municipality, as well as the Housing Pipeline which is aligned amongst others with the provincial budgeting cycle.

3.9.4.9 Emergencies

The Section: Informal Settlements assists the Section: Disaster Management in emergencies by verifying the data that is collected about the disaster victims against the data obtained during period surveys. These emergencies are mostly fire incidents in informal settlements and / or in the backyards of formal housing units. These incidents to a lesser extent also include flooding incidents and excessively strong winds.

3.9.4.10 Housing Statistics

Table 157: Households with Access to Basic Housing - Source StatsSA 2011

Year	Total households (including formal and informal settlements)	Households in formal settlements	Percentage of households in formal settlements
2017/18	52 374	26 506	50.60%
2018/19	52 374	34 071	65.10%
2019/20	52 374	34 071	65.10%
2020/21	52 374	36 017	65.10%
2021/22	49 332	36 214	73.40%

The following table shows an **increase** in the number of people on the housing waiting list. There are currently approximately **17 852** applicants on the waiting list.

Table 158: Housing waiting list as at 30 June 2022

Year	No. of people on the Housing Waiting List	% Housing waiting list increase
2014/15	18 833	0.6% (Decrease due to sanitisation of the waiting list data).
2015/16	18 791	0.2% (Decrease due to sanitation of the waiting list data).
2016/17	18 953	7.7% (Increase based on the previous year's "sanitised" figures. This is as a result of new applications received).
2017/18	16 482	13.04% (Decrease due to sanitisation of the waiting list data).
2018/19	16 231	The department rolled out an update of the waiting list programme which resulted in all the deceased applicants being removed and duplicate applications being removed and this has resulted in a decrease in the total number of active applicants on the waiting list.
2019/20	16 590	2.21% (Increase due to new applications received).
2020/21	17 652	6% (increase) is due to the drive by the municipality which targeted farm dwellers and those who never registered their names on the housing demand database.
2021/22	17 852	Minimal increase due to families not responding timeously to calls to register on the housing demand database.

3.9.5 Basic Service Delivery Performance Highlights

Table 159: Basic Service Delivery Performance Highlights

Highlight	Description
Papplaas relocation	Successfully relocated families from the dumping site to a safer location.
Enkanini 1 000 electrical connections	Surveyed all the beneficiaries, created space for installation of the service and excellent cooperation between the municipality and community.

3.9.6 Basic services delivery challenges

Table 160: Basic Service Delivery Challenges

Service Area	Challenge	Actions to address
Watergang Informal Settlement	Structures in the way of the service.	Negotiated with the structure owners to create space for ablution facilities.
WC024	Long and tedious negotiations to obtain buy-in from various communities.	Commence with communication earlier in the process.

3.9.7 Housing Administration

3.9.7.1 Transfer of housing stock

During the period under review, the municipality continued with the process to deal with the historic backlog and transfer of properties to beneficiaries of state-subsidised houses. A process action plan was devised in terms of which administrative procedures would be streamlined. A panel of attorneys were appointed to transfer identified properties. A total of 259 title deeds were transferred for the 2020/21 financial year. The transfers were completed in the following areas:

Table 161: Transfer of housing stock

Area	Total
Cloetesville	5
Kayamandi	49
Klapmuts	25
Kylemore	2
Pniël	2
Total	83

The Section: Housing Administration is conducting continuous HCE Programmes with affected beneficiaries and addressing issues around title deeds. The municipality also appointed temporary field workers to assist with beneficiary administration which includes tracing beneficiaries and conducting occupation surveys to ensure that title deeds are registered correctly.

The municipality partnered with an NGO which assists municipalities to deal with the historic backlog in terms of the transfer of properties. The NGO provides funding for the temporary appointment of staff to enhance capacity and also provides funding to the municipality of R500 per title deed registered. The donation is used to appoint field workers to assist with the beneficiary administration of the transfer processes.

Table 162: Total properties registered at the deeds office (during 2021/22)

Total properties registered at deeds office (during 2021/22)	
Historical project title deeds registered	83
New project title deeds registered*	0
Total erven	83

* Funding for the title deeds was provided through the Title Deed Restoration Programme. It is only given for houses of subsidies approved.

Funding for the title deeds was provided through the Title Deed Restoration Programme. It is only given for houses of subsidies approved.

3.9.7.2 Waiting list administration

The municipality continues with the “data-cleaning” process of applications that appear on the waiting list where vital information is outstanding. An area-based approach was used where staff members went out to the various areas and invited applicants to workshops during which the applicant's information was updated. The entire Stellenbosch municipal area was covered during this programme.

The agreement with the PDoHS to assist with the data clean-up of the Stellenbosch municipal waiting list continues. The waiting list is updated and verified regularly by the PDoHS Settlements to ensure that the number of people deemed to be on a “waiting status” is a true reflection of those persons who still require housing assistance within the greater Stellenbosch area.

This new online database system and mobile app were launched in August 2019. The mobile app makes it easier for applicants to use their smartphones to submit housing applications in the comfort of their own homes on the Housing Demand Database. The Housing Demand Database System is being updated regularly to ensure that Council has credible data for planning for future housing projects to be implemented.

3.9.7.3 Administration of public rental stock

On 25 June 2014, Council adopted a Policy for the Administration of Public Rental Stock. This document was the culmination of a collaboration between stakeholder departments within the municipality. The purpose of the policy is to ensure effective management and well-maintained assets that will improve the quality of life for residents. The Section: Housing Administration is busy with the review of the Human Settlements Administration and Allocation Policy, which will include

the allocation and management of the Public Rental Stock. This policy will be referred to Council for adoption after due public participation processes have been completed.

A caretaker programme was implemented in all public rental stock to deal with the increase in anti-social behavioural problems. This programme was implemented to ensure that communities "take" their neighbourhoods back into their hands and also to improve the communication between the municipality and the tenants. The total number of caretakers appointed for all the public rental flats was eleven (11).

3.9.7.4 Housing Consumer Education (HCE)

A total of thirteen (13) workshops were held with mainly tenants in municipal rental stock. The HCE workshops are also used to address issues around anti-social behaviour in public rental flats. The HCE programmes were also held for beneficiaries of houses that were built between 1994 and 2010. These are houses that form part of the Title Deeds Restoration Programme. These beneficiaries are advised about the security of tenure, issues of inheritance and drafting of a Will. The HCE workshops were also held with beneficiaries of the Ida's Valley Housing Project during the 2020/21 financial year to educate them about homeownership, writing of a Will and By-laws governing properties. HCE workshops will be concluded for the Longlands Housing Project beneficiaries during the 2021/22 financial year.

The HCE programmes were also held for beneficiaries of houses that were built between 1994 and 2010. These are houses that form part of the Title Deeds Restoration Programme. These beneficiaries are advised about the security of tenure, issues of inheritance and drafting of a Will. The HCE workshops were also held with beneficiaries of both the housing development projects in Ida's Valley and Longlands to educate them about homeownership, writing of a Will and By-laws governing properties. A total of sixteen (16) HCE workshops were held during the 2021/22 financial year inclusive of those held before formal title deed handovers, outreaches for the signing of Deeds of Sale and completion of subsidy applications for the Longlands Housing Project, which total excludes those HCE sessions held with individual recipients of title deeds.

Figure 33: HCE and Public Participation

The Section: Housing Administration completed an audit of all its rentals stock. Both staff and public rental units, with regards to the occupancy of the unit. For the Section: Housing Administration to update its records where necessary, interviews were conducted with affected households and resulted in concluding lease agreements with the next of kin of deceased tenants. The Section: Housing Administration compared the findings of the surveys with regards to legal occupancy of the rental units with existing information obtained from the records of the

Finance Department. Interviews were conducted with occupants of flats where there appeared to be discrepancies and detailed questionnaires were completed in respect of every household. This enabled the Section: Housing Administration to evaluate whether or not the illegal occupants qualified for legalisation in terms of the criteria as set out in the approved policy on the Unlawful Occupation of Municipal Rental Stock.

3.9.7.5 Maintenance of Rental Stock

The Section: Housing Administration integrated the complaints system of the Council and all complaints of rental stock can now be monitored. Maintenance of all municipal stock resorted under the Directorate: Corporate Services. It was decided that the Section: Housing Administration is henceforth responsible for all maintenance at rental stock and Directorate: Corporate Services were responsible for all maintenance of municipal buildings.

Budgetary constraints were many a time the main reason why maintenance issues at rental stock could not be resolved. However, it should be mentioned that the Section: Housing Administration is now capacitated with a budget to resolve the backlog on maintenance.

3.9.7.6 TRA Management

The municipality is mandated in respect of various pieces of legislation to effectively and professionally administer all matters relating to informal settlements.

The Department: Housing Administration in conjunction with informal settlements effectively manages and controls 7 TRAs in the greater WC024 to furnish every informal settler with a potential home.

The number of households in TRAs:

Table 163: TRA Statistics

Area	Number of households
Mandela City, Klapmuts	120
La Rochelle, Klapmuts	32
Devon Valley	20
Longlands, Vlottenburg	76
Mountainview, Jamestown	241
Watergang TRA 1, Kayamandi	262
Watergang TRA 2, Kayamandi	180
Meerlust Bosbou, Franschhoek	24

The Section: Housing Administration facilitates evictions, surveys, all levies and services assistance by channelling complaints to the correct user departments and all types of assistance until relocation to a project.

3.9.7.7 Job creation

A job creation programme was initiated via the EPWP project and as a result, 25 job opportunities were created listed below:

- ✦ Thirteen (13) EPWP workers were appointed to assist with the cleaning of the rental units and this resulted in a decrease in complaints received from tenants as properties are in a neater state;
- ✦ Six (6) temporary field workers were also appointed to assist with the surveys in rental stock, Temporary Residential Areas and Emergency housing. This was to ensure that the correct tenants occupied the flats and to identify issues like sub-letting or illegal activities; and
- ✦ Eight (8) Title Deeds Restoration Programme were also appointed to assist with the transfer of state-subsidised houses and to eradicate the historic backlog in terms of the transfer of these houses.

The table below indicates the capital expenditure for the Sections: Housing Administration and Housing Development as at 30 June 2022.

Table 164: Capital Expenditure as at 30 June 2022: Section: Housing Administration

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Furniture, Tools and Equipment: Housing Administration	135	125	-7,65
Only the capital projects are listed			

The Section: Housing Administration has spent 93% of the capital budget for the financial year.

Table 165: Capital Expenditure as at 30 June 2022: Section: Housing Development

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000

3.10 Property Management

This section is also responsible for the maintenance of all Council-owned buildings and the construction / project management of all upgrading and or new facilities. Some of the highlights of the past financial year include the following:

- ✚ Completion of new public ablution facility in Franschoek;
- ✚ Completion of new sport clubhouse in La Motte;
- ✚ Upgrade / conversion of the residential unit into office space in Simonsbergweg / Stellenbosch;
- ✚ Completion of the upgrade / structural maintenance of the Kayamandi Library;
- ✚ New concrete roofs at Groendal Cemetery;
- ✚ Ablution Facilities and Groendal Park;
- ✚ Various air-conditioning projects; and
- ✚ Various fencing projects.

The planning phase of the following projects was finalised or started with:

- ✚ Upgrade of Kayamandi Corridor;
- ✚ Upgrading of Dorp Street Flats;
- ✚ Upgrading of various heritage buildings, incl. Voorgelegen, Rhenish Complex and Bergzicht buildings;
- ✚ Upgrading of Makapula Hall;
- ✚ Upgrading of van der Stel Complex;
- ✚ Structural Upgrading of Plein Street Complex;
- ✚ Structural upgrade to Jamestown Ward Office / Library; and
- ✚ Structural upgrade of the Ida's Valley Pavilion.

Various projects / acquisitions were processed under the following term tenders:

- ✚ Furniture, tools and equipment;
- ✚ Hygienic services;
- ✚ Maintenance and replacement of air conditioners;
- ✚ New term tender for the rental of indoor plants; and
- ✚ New term tender furniture, tools and equipment.

The following term tenders were awarded:

- ✚ Pest control;
- ✚ Fencing; and
- ✚ Maintenance of lifts: Plein Street.

The table below indicates the service data statistics from the 2016/17 to 2021/22 financial years:

Table 170: Service Data Statistics – Property Management

3.11 Free Basic Services and Indigent Support

a) Access to Free Basic Services

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total indigent households exclude all informal households and include formal households that have been registered as indigent households. The total i.t.o. free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. It also does not include the totals where the electricity distribution is conducted by ESKOM.

Per the approved Indigent Policy of the municipality, all households earning less than R6 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

The table below indicates the number of households receiving free basic services.

Table 173: Access to Free Basic Services

Year	Number of Households								
	Total no. of HH	Free Basic Water		Free Basic Sanitation		Free Basic Electricity		Free Basic Refuse Removal	
		Access	%	Access	%	Access	%	Access	%
2018/19	52 374	6 813	13.01	6 813	13.01	4 833	9.23	6 813	13.01
2019/20	52 374	6 666	100%	6 666	100%	4 932	100%	6 666	100%
2020/21	50 328	7 283	100%	7 283	100%	5 189	100%	7283	100%
2021/22	50 328	4 681	100%	4 681	100%	4 982	84,25%	4 681	100%

The percentage is based on indigent household access compared to a total of 50 328 households.

Services subsidised are:

- ⚡ Water - basic charge + 6 kl;
- ⚡ Electricity - basic charge + 100 kWh;
- ⚡ Sanitation - based on a 250m² erf; and
- ⚡ Refuse - one removal per week.

Free Basic Services per basic service

The provision of free basic services is summarised in the tables below.

Table 174: Free basic electricity to indigent HH

Financial year	Electricity		
	Indigent Households		
	No. of HH	Unit per HH (kwh)	Value R'000
2017/18	6 453	100	6 216
2018/19	6 813	100	8 415
2019/20	4 932**	100	6 888
2020/21	5 198	100	7 711
2021/22	4 982	100	6 134
*Average for the year			
**Only Indigent consumers who claimed free units

COMPONENT B: ROADS, TRANSPORT AND STORMWATER

3.12 Roads

This component includes roads, transport, traffic engineering and wastewater (stormwater drainage).

3.12.1 Transportation Planning and Traffic Engineering

3.12.1.1 Comprehensive Integrated Transport Plan

The 2022 – 2026 review of the Comprehensive Integrated Transport Plan (CITP) is currently being compiled.

CITPs present the municipality's long-term transport vision and objectives, as well as provide annual action plans and projects that would enable the municipality to realise its transport vision. The CITP will be synchronised with the annual updating of the Integrated Development Plan.

A current review (2022 – 2026) of the CITP represents the 5-yearly overhaul of the plan, and requires inter alia that;

- ✚ Every aspect of the previous CITP must be re-examined to see if it is still up to date;
- ✚ The previous CITP is revised and updated where necessary and relevant new aspects are added,
- ✚ A new Transport Register be prepared;
- ✚ Reflect new revisions of the municipality's SDF, Roads Master Plan and NMT Master Plan;
- ✚ Provide a revised Public Transport Plan dealing with the restructuring of the public transport network of services; and
- ✚ Provide an update on progress made with previously proposed action plans and projects and propose additional plans and projects.

3.12.2 Master Planning

The municipality has compiled its Draft Non-Motorised Transport (NMT) Master Plan and Policy. The Draft NMT Master Plan and Policy is a review consolidation, and update of the NMT policy and master plans which were compiled in 2015.

The NMT Master Plan and Policy strives to promote and encourage alternative modes of transport such as walking and cycling. They also aim to analyse the capacity of the current network, identify current and future NMT needs, and recommend improvements that will ensure an effective NMT network.

The NMT Master Plan and Policy further strive to position NMT as a consistent long-term municipal priority. The strategic objective of the NMT Master Plan is the implementation of a coherent, logical and integrated NMT network for Stellenbosch by 2024.

The main road networks through Stellenbosch currently operate at capacity and at times beyond capacity, resulting in traffic congestion. Analysis of the road networks and assessments of the public transport operations and facilities are periodically carried out to identify shortcomings and opportunities for improvements. The municipality has compiled its Draft Road Master Plan (RMP),

which analyses the capacity of the current network, and current and future needs and recommends infrastructure improvements that will aid in establishing an effective road network.

Extensive investigations, assessments and analyses are undertaken when compiling master plans. The outputs of Master Planning are used to inform Strategic Plans such as the SDF, the IDP and the CIP. Outputs from master plans also aid other municipal decision-making processes.

3.12.3 Traffic Signals

Stellenbosch Municipality, in collaboration with Stellenbosch University, continues with research and development to establish a real-time traffic signal control system for Stellenbosch. This research project will assist in addressing everyday congestion through the application of Smart Transportation Technology namely Traffic-Adaptive-Signal-Control (TASC). TASC refers to the real-time control of signalised intersections and enables the real-time adjustment of traffic signal timing to increase vehicle flows through the intersection thereby reducing congestion.

3.12.3.1 Road Construction and Intersection Upgrades

To reduce the effects of congestion, improve traffic flow and increase traffic safety at intersections within Stellenbosch, various intersections were upgraded by the municipality through the Intersection Improvement Programme that commenced about 10 years ago.

The following has been completed in the 2021/22 financial year:

- ✦ Phase 1 of the upgrading of the R44 / Helshoogte Intersection;
- ✦ Upgrading of the Oude Libertas Road and Adam Tas Road Intersections;
- ✦ Upgrading of Vredenberg Road and Adam Tas Road Intersection; and
- ✦ Realignment of Devon Valley Road and upgrading of the Devon Valley and Adam Tas Road Intersections.

The following road and intersections upgrades are currently in various stages of planning and design:

1. Lower Dorp Street and its intersection with Strand Road (R44) and Adam Tas (R310);
2. Adam Tas and R44 / Alexander;
3. Adam Tas and R44 / Merriman;
4. Phase 2: R44 / Helshoogte;
5. Resealing Bird Street between R44 and Kayamandi;
6. Extension of Wildebosch Road to Trumali; and
7. Techno-Park and Adam Tas Link Road.

3.12.3.2 Road Rehabilitation

During the 2021/22 financial year, the municipality resealed the following roads in WC024:

Table 178: Road Rehabilitation

Location	Name	Length(m)	Width (m)	Area (m2)
Franschhoek	Lambrechts Road	668,6	9.7	6 485.42
Franschhoek	Reservoir Road	268	6.4	1 715.2
Stellenbosch	Alexander Street	165	3.5	577.5
Stellenbosch	La Colline Street	353	8.4	2 965.2

Location	Name	Length(m)	Width (m)	Area (m2)
Stellenbosch	Piet Retief 1	250.6	8.6	2 155.16
Stellenbosch	Ryneveld	80	18.6	1 488
Stellenbosch	Mount Albert	97	5.5	533.5
Stellenbosch	Taylor Street	179	6.8	1 217.2
Stellenbosch	Hammanshand Road	826	7.4	6 112.4
Stellenbosch	Noordwal wes	614.1	7.5	4 605.75
Stellenbosch	Piet Retief 2	514	11	5 654
Ida's Valley	Bloekom Road	591	7	4 137
Stellenbosch	R44 / Helshoogte intersection	310	10.5	3 255
Stellenbosch	Koch Street	546	7.7	4 204.2
Stellenbosch	Endler Road	105	7	735
Stellenbosch	Morkel Road	193	7	1 351
Stellenbosch	Van der Stel Road	110	8.4	924

Kayamandi	Tata Mandela	405	5.7	2 308.5
Kayamandi	Luyolo	609	6.5	3 958.5
Stellenbosch	44-strand Road	1 187	7.7	9 139.9
Cloeteville	Tennant Road	500	6	3 000
Total: (meters)			11 87.25	
Total: (Kilometres)			11 87 525	

3.12.3.3 Non-Motorised Transport (NMT)

In line with the municipality's NMT Master Plan, NMT infrastructure was rolled out and implemented to ensure continuous expansion of the NMT network.

During the 2021/22 financial year, sidewalks were constructed along the following roads:

- ✦ Stellenbosch: Oude Libertas Road; Paradyskloof Road; Merriman; Martinson; Van Riebeeck; Van Reede; Ryneveld; Church; Drostdy; De Laan;
- ✦ Cloetesville: Fontein; Primrose; Pine and Raziet;
- ✦ Ida's Valley: Hillside Village; Lelie Street and Kahler; and
- ✦ Franschhoek: River Path North (Groendal) and Reservoir.

3.12.3.4 Public Transport

To facilitate and improve the local public transport services, the municipality commissioned the construction of a new Taxi rank in Groendal, Franschhoek and the upgrading of existing taxi ranks in Kayamandi.

The following taxi ranks were completed in the 2021/22 financial year:

- ✦ Groendal Taxi Rank; and
- ✦ Kayamandi Taxi Rank.

3.12.3.5 Parking

The municipality embarked upon several interventions to improve the provision of parking in Stellenbosch CBD and Franschhoek. These interventions comprise the following:

- ✦ Reviewing and improving on the parking management model;
- ✦ Construction and upgrading of parking areas in Stellenbosch and Franschhoek; and
- ✦ Feasibility studies and associated works for the establishment of possible Public Private Partnership (PPP) projects to implement and manage bulk parking facilities in Stellenbosch.

3.12.3.6 Bridges

The Distillery Road Bridge is the only access road into Bosman's Crossing, a small mixed-development area within Stellenbosch comprising various commercial developments and apartment complexes. Planning, designs and procurement processes have been completed, and all necessary approvals attained. Construction for the upgrading of the bridge commenced early in 2022 with completion set for January 2023.

Planning and design had commenced for the construction of a pedestrian bridge that would link Kayamandi with Cloetesville. The proposed bridge would create a safe passage for pedestrians between the two communities, crossing the R304, the railway line and the Plankenbrug River. Designs for the bridge are complete and the necessary approvals for the construction of the pedestrian bridge have been attained. Implementation will commence once the procurement processes (for the appointment of a contractor) are concluded.

3.12.4 Roads Statistics

The following graphs provide an overview of the total kilometres of roads maintained and / or new roads tarred during 2021-22: *Tarred (Asphalted) and Gravel Roads*.

Figure 36: Tarred Roads

Figure 37: Gravel Road Infrastructure

3.12.5 Stormwater Infrastructure

The graph below shows the total kilometres of stormwater infrastructure maintained and upgraded as well as the kilometres of new stormwater pipes installed.

Figure 38: Stormwater Infrastructure

The table below indicates the capital expenditure for the Section: Roads, Transport and Stormwater Services as at 30 June 2022.

Table 179: Capital Expenditure as at 30 June 2022: RTS

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Adhoc Reconstruction of Roads (WC024)	26 390	26 390	0
Bridge Construction	12 696	12 697	0
Non-Motorised Transport Implementation	4 000	3 999	0,01
Taxi Rank - Franschhoek	5 373	5 373	0
Taxi Rank - Kayamandi	7 289	7 289	0

Only the 5 largest capital projects are listed

The Section: Roads and Stormwater has spent 100% of the capital budget for the financial year.

The table below indicates the total number of employees in the Department: Roads, Stormwater, Transport and Traffic Engineering as at 30 June 2022.

Table 180: Total number of employees in the Department: Roads, Stormwater, Transport and Traffic Engineering

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	3	3	0	0
9 – 13	10	7	3	30%
4 – 8	25	24	1	4%
3 – 0	68	66	2	2.9%
Total	107	101	6	5.6

3.13 Development Services and Project Management Development Services, Asset Management and Systems and Project Management Unit (PMU)

The Department: Asset Management and Systems, Development Services and Project Management Unit (PMU) are responsible for Technical Information Management, Asset Management, Wayleave Management, Development Services and Project / Programme Management in the Directorate: Infrastructure Services.

During the 2021/22 financial year, the department successfully facilitated the implementation of Development Contribution projects to the value of R5.5 million. The department continued to provide operational services in terms of wayleave applications, building plan assessments, land use applications and project management.

3.13.1 Project Management Unit (PMU)

The Project Management Unit (PMU) is a unit within the municipality that is dedicated to managing infrastructure (capital) projects. The unit is responsible to provide support to municipal departments to manage capital projects during the implementation, planning and construction phase of new housing, informal settlements, infrastructure and municipal facilities projects, including:

- ✦ Develop and maintain project management systems, procedures and processes for the life cycle of implementing infrastructure projects;
- ✦ Render life cycle project management services for all types of infrastructure projects;
- ✦ Manage cross-functional projects in conjunction with relevant departments;
- ✦ Engage with departments in the medium to long terms planning and budgeting of capital projects;
- ✦ Compile long-term budget for the Directorate;
- ✦ Manage and report on infrastructure implementation projects; and
- ✦ Management of Grant Funding programmes (CAPEX / RBIG / IUDG).

During the 2021/22 financial year, the PMU managed a capital expenditure budget of R 37.7 million (of which R23.7 million was an allocation from the Human Settlement Development Grant (HSDG) and Informal Settlements Upgrading Partnership Grant (ISUPG)). The PMU achieved a capital expenditure of R28.0 million (74.3%) at the end of the 2021/22 financial year.

The PMU managed the implementation of in-house multi-year capital projects during the 2021/22

financial year which are indicated below.

a) Rehabilitation of Erf 3229, Franschoek

Figure 34: Site rehabilitation and construction of bulk earthworks

b) Installation of civil services Longlands Housing Project

Figure 35: Longlands Housing Development Project

c) Kayamandi: Zone O, Housing Development

Figure 36: The upgrade of Zone O informal settlement

d) Installation of Basic Services Kayamandi Watergang

Figure 37: Construction of basic services, Watergang Informal Settlement

e) Installation of services to 166 sites ERF 9445, Ida's Valley

Figure 38: Ida's Valley Housing Development Project

f) Upgrading of The Steps / Orlean Lounge

Figure 39: Upgrade of houses (before)

Figure 40: Upgrade of houses (after)

In the 2021/22 financial year, the Project Management Unit (PMU) provided project / programme management support to municipal departments during the planning and implementation stages of capital projects mentioned below.

g) Upgrading of New Office Space: Ryneveld Street

Figure 41: Upgrading of the NPK Building

h) Calcutta Bos Memorial Park (Directorate: Community and Protection Services)

j) **Jamestown Cemeteries – Directorate: Community and Protection Services.**

Figure 44: The upgrade of Jamestown Cemetery

Integrated National Electrification Programme – Department: Electrical Services

Figure 45: Electrification of Enkanini informal settlement

Further to the above, the Project Management Unit is responsible for the management and administration of the Integrated Urban Development Grant (IUDG). The Integrated Urban Development Framework (IUDF) marks a new deal for South Africa's cities and towns. It sets a policy framework to guide the development of inclusive, resilient and liveable urban settlements while addressing the unique conditions and challenges of integration facing South Africa's cities and towns. The key outcomes of the IUDF are spatial transformation and the creation of a growth model of compact, connected, coordinated and integrated cities and towns.

Within the IUDF's Intermediate City Municipality (ICM) programme, which targets 39 municipalities, support is provided for the municipalities in the middle size and density range of the continuum. The purpose of the ICM's support strategy is to help translate IUDF policy into practical programmes of action in the ICM's. Stellenbosch Municipality achieved **100%** IUDG expenditure (**an allocation of R56,9 million**) for the 2021/22 financial year.

3.13.2 Asset Management and Systems

Maximising municipal infrastructure management supports the current Strategic Focus Area 5: Good Governance and Compliance. As one of the largest economies nationally, the greater Stellenbosch area and municipality is a significant deliverer of services. Deciding what to do, when, where, and for whose benefit, is the difficult task that Infrastructure Asset Management addresses. Enhanced infrastructure capabilities also augment the achievement of the other four Strategic Focus Areas, i.e. 1: Valley of Possibility, 2: Green and Sustainable Valley, 3: Safe Valley and 4: Dignified Living.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To deliver on the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects that have been correctly prioritised, and that value for money is achieved. The range of services to be provided is vast in scope, and citizens' and enterprises' needs vary significantly. Given the depth of needs in many communities and limited resources, tough choices have to be made. An Asset

Management System is required to support the information that will aid this type of decision-making.

The municipality is currently investigating adopting an Asset Management System, which will be built on ArcGIS technology. The web GIS-centric platform can help to streamline the care and maintenance of infrastructure assets. An ArcGIS system offers a system of record, a system of engagement, and a system of insight for asset management. Additionally, once asset data is verified and established as correct, Stellenbosch Municipality can begin to understand its infrastructure's health.

Wayleave Management also falls under this section. The collective value of services infrastructure contained within the Public Road Reserve and the road itself amounts to a considerable value. This infrastructure needs to be maintained, periodically rehabilitated and replaced from time to time. Such activities can result in considerable delays, inconvenience, danger and additional costs to the road users and the municipality itself if not well planned and coordinated. This activity is coordinated through the wayleave management function.

The monthly and annual applications are summarised in the table below, Wayleave Applications.

Table 181: Wayleave Applications

Activity	2021/22												Total
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	
Wayleave Applications - Received	15	18	19	20	32	2	23	24	27	15	32	13	240
Wayleave Applications - Commented on	28	10	25	15	10	11	6	23	36	13	27	9	213
% completion to date:													88.8 %

3.13.3 Development Services

The Section: Development is a section within the municipality that is responsible to manage the approval of engineering services and the implementation stages of all new developments in the municipality, to ensure that the impact on municipal services and the environment is adequately and responsibly mitigated. Additionally, this section is required to facilitate development to promote economic growth, stimulate job creation, expand the municipal revenue stream (DCs and new property rates), and ensure development contributes to the achievement of the strategic goals of the municipality, using the following activities:

- ✦ The approval of new developments and monitoring and control of engineering projects implemented by developers;
- ✦ Provides ongoing technical support and guidance to ensure responsible and successful development;
- ✦ Plan, organise, coordinate and control the activities, procedures and outcomes associated with the evaluation and approval of land use and building plan applications, as well as the calculation and coordination of Bulk Infrastructure Development Charges;
- ✦ Plan, organise, coordinate and control the activities, procedures and outcomes associated with the engineering side of the rates clearance applications;
- ✦ Manages the implementation of specific developments and DC-linked infrastructure projects to ensure capacity for new developments; and

- Develops and provides input into strategic documents, policies and guidelines related to the engineering aspects of development.

During the 2021/22 financial year, the Section: Development managed DC projects expenditure of R5.5 million and achieved a DC income of R 30.1 million.

To provide more perspective to the above, the monthly and annual applications are summarised in the table below:

Table 182: Land-use Applications

Activity	2021/2022												Total
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun

COMPONENT C: PLANNING AND ECONOMIC DEVELOPMENT

3.14 Town- and Spatial Planning

a) Stellenbosch and an appropriate approach to spatial development and management

The *mSDF* is a core component of, and part of the Integrated Development Plan as stipulated in Section 26(e) of the MSA and Section 20(2) of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA). The spatial planning system in the Republic of South Africa consists of the following components:

- ✦ Spatial development frameworks to be prepared and adopted by national, provincial and municipal spheres of government;
- ✦ Development principles, norms and standards that must guide spatial planning, land use management and land development;
- ✦ The management and facilitation of land use through the mechanisms of land use schemes, i.e. zoning scheme bylaws; and
- ✦ Procedures and processes for the preparation, submission and consideration of land development applications and related processes.

Section 8 of SPLUMA stipulates that the norms and standards must, amongst others:

- ✦ Promote social inclusion, spatial equity, desirable settlement patterns, rural revitalisation, urban regeneration and sustainable development;
- ✦ Ensure that land development and land use management processes, including applications, procedures and timeframes are efficient and effective;
- ✦ Include: -
 - (i) A report on analysis of existing land use patterns;
 - (ii) A framework for desired land use patterns;
 - (iii) Existing and future land use plans, programmes and projects relative to key sectors of the economy; and
 - (iv) Mechanisms for identifying strategically located vacant or under-utilised land and for providing access to, and the use of land.

Based on the above it is clear that the *mSDF* is not just a technical document, but the strategic spatial representation of the IDP, and also should inform a capital expenditure framework ("CEF") for the municipality's development programmes, depicted spatially. The *mSDF* "as part of" and "a core component of" the IDP further "*must include sectoral requirements, including budgets and resources for implementation*", thereby guiding the municipal infrastructure and development budget. We present the critical underlying narrative here and argue that adhering to it, through numerous individual actions and decisions – across sectors of society – is at the core of managing the development and land use in Stellenbosch better, at the heart of a better future for all.

"Stellenbosch Municipality is a special place; all of it ... its various settlements, its nature areas, farms, education institutions, its innovative corporations, small businesses, its places to visit, its places to live, its festivals, its history ... its people. In terms of its space – activities in space, landscapes, urban places, streets, and buildings – Stellenbosch Municipality continue to impress and bring opportunity, joy, and contentment; in different ways, to visitors and residents alike. Many would love to live here, work here, or visit more often. Stellenbosch Municipality has been judged as a place of high opportunity. Numerous factors combine to a recognition that this place can contribute more

to growing societal needs, in its region and our country. If one lives here, the chances are that one can make a good livelihood. Stellenbosch Municipality is truly a place of opportunity.

Many who live within the municipal area do not have adequate shelter, or the opportunity to work. Many study here, but cannot enjoy university life to its full extent, because there is a limited residential opportunities for students. Then again, many struggle in traffic every day, on congested roads, wasting time and money for fuel, even if privileged enough to own a private vehicle.

Stellenbosch Municipality's challenges increasingly impact on all, albeit in different ways. Citizens respond to challenges differently. Many owners of agricultural land have indicated a desire to develop their land for other, predominantly urban activities. These thoughts already involve a large land area, comparable to the size of Stellenbosch town. Others, tired of waiting for a housing opportunity here or elsewhere – and government support – invade land, staking a claim, the right to a place to live, on virgin land, even if the land is not suitable for development because of its agricultural and / or environmental value, is prone to risk, or allocated to someone else. Some, with the necessary material means, elect to close themselves off, to obtain a place to live in gated communities, secure from perceived threat to body and property.

The Stellenbosch Municipal Area grows, both naturally, and because more people are attracted here. Those drawn include the poor, middle- to higher-income groups, and large corporations. Stellenbosch Municipality has a special quality of accommodating hope, good opportunities, and a better life; the perception is that your needs can be met faster, your children can get access to a school promptly, or, your journey to work will be less cumbersome.

In terms of how we manage development and space, we know what direction to take. We know that we should adopt a more precautionary approach to nature and agricultural land, we know that we should contain and compact settlements, we know that we should provide more choice in shelter and housing opportunities, and that we should focus on public and non-motorised transport.

This knowledge is also embedded in policy, from global conventions to national, provincial and local frameworks, including the Stellenbosch Municipal Integrated Development Plan that include the Stellenbosch Municipality Spatial Development Framework, 2019, the legal plan which directs the municipal budget and resource allocation. It requires new ways of thinking, acting, living and doing. Higher densities, leaving the car, more interaction between groups of society sharing public space, more partnership in unlocking development opportunity, and so on.

The potential of Klipmuts to accommodate enterprises, dependent on good intra- and inter-regional logistic networks is acknowledged. Landowners realise that overcoming the resource constraints, infrastructure constraints, and the cross-subsidisation required for more inclusive development – the extent of energy needed – necessitates joint work, joint planning, and implementation of a scale and nature not yet experienced in Stellenbosch. Corporations realise that they have broader responsibility – not only in contributing to good causes concerning nature, education, or the arts, but in actively constructing better living environments. We realise that we have to forge, establish and maintain active working partnerships to make our towns better. We also have the benefit of history. In times past, we have, as Stellenbosch Municipality, changed our destiny, did things for the better. Starting with an individual idea, a thought, often through an individual, great things were done. With such ideas and actions, the town established a university, saved historic buildings and places, launched cultural celebrations with broad reach, safeguarded unique nature areas, provided families with homes, begun corporations with global reach. When a fire destroyed homes, they were rebuilt promptly with collective energy and purpose. When children needed schooling, and government could not provide, some established schools.

Often, these initiatives started outside of government, albeit assisted by the government. They were started by those who thought beyond current challenges, without necessarily being able to project outcomes over time in full. They just understood that one step might lead to another. Not all the technical detail was resolved, not everything understood in its entirety. They merely acted in terms of core principles. As matters unfolded and new challenges emerged, the principles guided them.

The mSDF, 2019 recognises that the spatial decisions and actions of many make what settlements are. It asks us to understand that plans cannot do everything, predict everything. It asks all to consider action with a few core beliefs, principles, or concepts, geared towards the common good.

b) Specifically, it asks us to consider seven principles:

1. First, maintain and grow the assets of Stellenbosch Municipality's natural environment and farming areas.

Humanity depends on nature for physical and spiritual sustenance, livelihoods, and survival. Ecosystems provide numerous benefits or ecosystem services that underpin economic development and support human well-being. They include provisioning services such as food, freshwater, and fuel as well as an array of regulating services such as water purification, pollination, and climate regulation. Healthy ecosystems are a prerequisite to sustaining economic development and mitigating and adapting to climate change. The plan provides for activities enabling access to nature and for diversifying farm income in a manner which does not detract from the functionality and integrity of nature and farming areas and landscapes.

2. Second, respect and grow our cultural heritage, the legacy of physical artefacts and intangible attributes of society inherited from past generations maintained in the present and preserved for the benefit of future generations.

Cultural heritage underpins aspects of the economy and differentiates places. Culture is a dynamic construct; forever emerging in response to new challenges, new interactions and opportunity, and new interpretations. Spatially, we must organise Stellenbosch in a manner which also sets the stage for new expressions of culture.

3. Third, within developable areas – areas not set aside for limited development owing to its natural or cultural significance – allow future opportunities to build on existing infrastructure investment, on the opportunity inherent in these systems when reconfigured, augmented or expanded.

Infrastructure represents significant public investment over generations, not readily replicated over the short term. It represents substantial assets for enabling individual and communal development opportunities of different kinds. From a spatial perspective, movement systems are particularly significant. Elements of the movement system, and how they interconnect, have a fundamental impact on accessibility, and therefore economic and social opportunity. Specifically, important is places of intersection between movement systems – places which focus human energy, where movement flows merge – and where people on foot can readily engage with public transport.

4. Fourth, clarify and respect the different roles and potentials of existing settlements.

All settlements are not the same. Some are large, supported by significant economic and social infrastructure, offer a range of opportunities, and can accommodate growth and change. Others are small and the chance to provide for growth or change is minimal. Generally, the potential of settlements to help change and growth relates directly to their relationship with natural assets, cultural assets, and infrastructure. We must accommodate change and growth where existing assets will be impacted on the least or lend itself to generating new opportunities.

5. Fifth, address human needs – for housing, infrastructure, and facilities – clearly in terms of the constraints and opportunities related to natural assets, cultural assets, infrastructure, and the role of settlements.

We must meet human need in areas where the assets of nature will not be degraded, where cultural assets can be best respected and expanded, and where current infrastructure and settlement agglomeration offers the greatest opportunity. Generally, we can help human needs in two ways. The first is through infill and redevelopment of existing settled areas. The second is through new green-field development. We need to focus on both while restricting the spatial footprint of settlements outside existing urban areas as far as possible.

6. Sixth, pursue balanced communities. All settlements should be balanced.

That means they should provide for all groups, and dependent on size, a range of services and opportunities for residents. It also says they should provide for walking and cycling, not only cars.

7. Finally, focus energy on a few catalytic areas that offer extensive opportunity and address present risk.

Planning cannot attempt to treat all areas equally. Some areas offer more opportunities for more people than others. We need to focus on the areas and actions where a significant number of people will benefit, and where we will meet their needs. There is also a need to focus on areas of 'deep' need, notwithstanding location, where limited opportunity poses a risk to livelihoods. Some informal settlements and poorer areas may not be located to offer the best chance for inhabitants, yet services need to be provided and maintained here. However, significant new development should not occur in these places, exacerbating undesirable impacts or further limiting the opportunity for people to pursue sustainable livelihoods. Spatial plans are 'partial' frameworks for action. They deal with space. Command of space is not enough to develop or manage a settlement in the interest of all. Each spatial principle, each concept, requires parallel actions in other sectors, including how we form institutions for execution, how we transport people, how we fund things, where we focus resources, and so on. The spatial principles must help us to think through these implications, action by action, decision by decision."

c) Future settlement along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, over the longer term, Muldersvlei / Koelenhof and Vloottenburg along the Baden Powell-Adam Tas-R304 corridor could possibly accommodate more growth, and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical pre-conditions for significant development include:

- ✦ The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);

- ✦ Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- ✦ Understanding to what extent settlements can provide local employment, in this way minimising the need for transport to other settlements.

d) Other local planning initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the *mSDF* in more detail. The priority for LSDFs should be determined by the position and role of settlements in the SM settlement hierarchy but should start with the Adam Tas Corridor Development Area and Klapmuts.

e) Institutional Arrangements

The Stellenbosch Municipality has limited staffing resources within the Directorate: Planning and Economic Development, which include the departments of Development Management (Land Use Management and Building Development Management); Development Planning (Spatial Planning, Economic Development and Tourism, Development Information ("GIS") and Heritage Resource Management) and Integrated Human Settlements (Housing Development, Informal Settlements and Housing Administration).

Although, the municipality appointed two (2) Senior Managers in the position for Development Management and Development Planning in 2020, the position of the Senior Manager: Integrated Human Settlements is an unfunded post and remains vacant. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act).

The Planning and Economic Development Directorate will facilitate the implementation of the *mSDF* in terms of institutional alignment, including:

- ✦ The extent to which the main argument and strategies of the *mSDF* are incorporated into annual reports, annual IDP reviews, future municipal IDPs, and so on;
- ✦ The annual review of the *mSDF* as part of the IDP review process;
- ✦ The extent to which the main argument and strategies of the *mSDF* inform sector planning and resource allocation;
- ✦ The extent to which the main argument and strategies of the *mSDF* inform land use management decision-making;
- ✦ Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- ✦ The mutual responsiveness of the *mSDF* and national, provincial and regional plans, programmes and actions (including the extent to which *mSDF* implementation can benefit from national and provincial programmes and funding). Over and above institutional arrangements in place, it appears that two aspects require specific focus in support of the *mSDF*.

f) Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the *mSDF*, SM (and other adjoining municipalities) appears to experience increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges

of Stellenbosch Municipality through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation, or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for “both sides” of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule).

However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

g) Private sector joint planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- ✦ The municipal human and financial resource base is simply too small to achieve the vision of the *mSDF* or implement associated strategies and plans;
- ✦ Many matters critical to implementing the *mSDF* fall outside the direct control or core business of the municipality, for example, the municipality does not necessarily own the land associated with projects critical to achieving the *mSDF* objectives;
- ✦ It is increasingly evident that individual landowners are finding it difficult to develop – to make the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- ✦ Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- ✦ The municipality's focus is often – and understandably so – on the “immediate”, or shorter-term challenges. Much of what is needed to implement the *mSDF* or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas Corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel Complex, Die Braak and Rhenish complex – in a manner which contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, University, and investors work together, including undertaking joint planning, the “pooling” of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

h) Land Use Management

Continually ensure timeous consideration of land-use applications to streamline development processes. Municipality to strengthen integrated development planning, spatial planning and economic planning. The Department: Development Management has made significant strides in addressing and reducing the backlog i.r.o. the processing of land use applications. The number of

land use applications classified as backlog applications has been reduced significantly, which in turn has the resultant impact of creating economic development opportunities within the Stellenbosch Municipality.

The table below indicates the capital expenditure for the Department: Planning and Development Services as at 30 June 2022.

Table 183: Capital Expenditure as at 30 June 2022: Department: Planning and Development

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Furniture, Tools and Equipment: Building Development	187	168	9.81
Furniture, Tools and Equipment	243	184	24.25
Furniture, Tools and Equipment	143	143	0
Furniture, Tools and Equipment	124	107	13.43

The Departments: Planning and Development have spent 87% of the capital budget for the financial year.

The table below indicates the total number of employees in the Department: Development Planning as at 30 June 2022.

Table 184: Total number of employees in the Department: Development Planning

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	2	2	0	0
9 – 13	6	6	0	0
4 – 8	5	5	0	0
3 – 0	0	0	0	0
Total	14	14	0	0

The table below indicates the highlights and challenges experienced within the department as at 30 June 2022.

Table 185: Performance Highlights- Department: Development Planning

Highlight	Description
Local Spatial Development Framework for the Adam Tas Corridor	SM commenced the process to prepare a local spatial development for the Adam Tas Corridor (ATC LSDF) at the start of 2021, which is a catalytic project listed in the mSDF. The ATC LSDF was completed in September 2021 and went through a rigorous public participation process and be submitted to the Council for approval in October 2022.
Adam Tas Overlay Zone	The preparation of the ATC LSDF included drafting a concept overlay zone. The draft overlay zone will be submitted to the Council for adoption by 31 March 2023.
Correction to the mSDF (2019)	Following a legal challenge to an application that was refused based on the strength of the approved mSDF, anomalies were detected in the mSDF. These anomalies refer to the written text and certain tables in the mSDF which were discussed in Council with the consideration of the mSDF but not recorded in certain tables in the mSDF. The mSDF with the correction to the tables, as instructed by the Council in 2019 was, again approved by the Council in May 2022.
Amendments to the mSDF	The department embarked on a process to ensure a better alignment of the strategic and higher-order plans of the municipality with the approved mSDF which may require the review and / or amendment of the mSDF. Council approved the process plan for the revision of the mSDF on 29 November 2021 and 30 March 2022.
Inclusionary Zoning (Housing) Policy	The approved mSDF proposed that an Inclusionary Zoning (Housing) policy be drafted through which the delivery of more affordable housing within new developments and/ or targeted areas

Highlight	Description
	can be delivered. The drafting of the Inclusionary Zoning Policy is undertaken in-house. A draft report was prepared and submitted to the Municipal Manager. The Inclusionary Zoning policy is being drafted with the assistance of DEA&DP and the Development Action Group (DAG) with input from a peer-review group from the Lincoln Institute. The Inclusionary Zoning policy will be submitted to the Council for approval to advertise by the latter part of 2022.
Housing Market Study	As part of the prerequisites of drafting an Inclusionary Zoning Policy, a housing market study was undertaken with the funding and assistance of DEA&DP and DHS to analyse the housing market in Stellenbosch town. A better understanding of the housing market is required to feed into and inform the Inclusionary Zoning Policy to enable the municipality to target the correct sector in the market to ensure the delivery of new affordable housing in the income bands where the need is the greatest.
Feasibility studies for land / building acquisition	Two studies for a property that potentially can be obtained by the Council, one that identified land in Klapmuts and the other a key property and building in the historical core of Stellenbosch, were completed and submitted to management for consideration. Both studies were completed in the first semester of 2022.
Precinct plan for the Rhenish complex	The Section: Spatial Planning prepared an urban design study and precinct plan for the Rhenish Complex in Stellenbosch setting out the potential measures to preserve, develop and activate the Rhenish Complex. The studies were completed in the last quarter of 2021 and will be taken through the public participation process, as soon as Council approves the draft to be advertised.
Intergovernmental relations	DEA&DP took the initiative to arrange for quarterly Intergovernmental Relations meetings for municipalities falling within the Greater Cape Metropole. The meetings have the mandate to discuss common issues and cross-boundary matters. The meetings are attended by all senior staff in the department.

3.15 Performance Challenges

Table 186: Performance Challenges- Department: Development Planning

Challenge	Actions to address
Approval of the ATC Overlay zone	The public participation process and ultimate approval of the ATC Overlay zone will be challenging. Landowners and developers are anticipating the approval of the overlay zone as this can and will be a major incentive towards activating the development of the ATC.
Approval of the Inclusionary Housing Zoning Policy	Stellenbosch will be the first town (except Johannesburg) to approve an Inclusionary Zoning Policy. The policy will require that developers must contribute a certain percentage of the housing delivery to a specific income band (affordable) in exchange for offset incentives (i.e. Up-zoning, density bonus, etc.). There is a real risk that developers will view this requirement as a penalty and considerable opposition can be expected from some developments. The process of obtaining Council approval with the support of developers will be challenging and may be challenged in a court of law.
Capacity	The total staff component of the Section: Spatial Planning amounts to four (4) officials, consisting of a Manager, a Senior Planner, and a Spatial and Administrative Officer. With the increase in projects undertaken in-house, as well as the need to develop LSDFs for each smaller town, as well as for the "Bosdorp", and also to facilitate and lead the implementation of the mSDF. Catalytic projects and the LSDF are currently placing the department under severe pressure. The Department: Development Planning notes that the organogram approved in 2017 does not meet the requirements to successfully fulfil the functions and mandate required by the Section, and must be urgently reviewed and amended.
COVID-19	The impact of the COVID-19 pandemic on the performance of the department posed a challenge that had to be dealt with. As many engagements with clients and colleagues were in-person in the past the department had to adapt to online meetings in general. Public participation can be particularly difficult if undertaken online due to difficulty with connection problems, load shedding and access to computers – particularly amongst the less affluent communities. Working from home was one of the measures that were implemented with varying success.
Load shedding	Load shedding created havoc in the workplace as the office of the department is not equipped with electricity-generating support.

3.16 Local Economic Development (LED)

The table below indicates the highlights within the Section: LED and Tourism.

Table 187: LED Achievements

Achievement / Highlight	Description	Financial years			2021/22
		2018/19	2019/20	2020/21	
Business Interventions	Business registrations	37	37	29	n/a
	Municipal Jobseekers Database Registrations	27	n/a	181	1 767
	Advice to walk-ins	1 795	n/a	334	19
	Workshops	12	15	1	0
	Business Licences	13	2	22	19
Informal Trading	<p>The Section: Economic Development and Tourism have several informal trading sites that were completed in the 2021/22 financial year.</p> <p>The completed sites are:</p> <ul style="list-style-type: none"> • Cloetesville; • Kayamandi; and • Klapmuts. <p>The only site not operational yet is Groendal, but this will be operational within the new financial year.</p>	n/a	n/a	n/a	3
Enterprise Development and Support	<p>Training for Stellenbosch - based entrepreneurs did exceptionally well in the 2021/22 financial year.</p> <p>The municipality partnered with Ranyaka and Stellenbosch Network and provided eleven (11) SMME training and mentoring workshops during the 2021/22 financial year. The types of training and mentorship programmes delivered were as follows:</p> <ul style="list-style-type: none"> • SALGA training: Rural Entrepreneurship Development Programme; • Construction Information Session; • SARS Workshop; • 5 x Google Workshops; • Canva Training; • Costing and Pricing Workshop; and • Marketing Workshop. <p>The Unit has also been very active with the processing of informal trading permits ensuring an active micro business trading in Stellenbosch.</p>	n/a	n/a	3	11
Vacant Agricultural Property	<p>Two (2) vacant land that was advertised during November / December 2020 is currently being evaluated in line with the Policy on the Management of Municipal Agricultural Land.</p> <p>The Municipal Council in July 2021 approved the re-establishment of the Operational Committee and will assist with the evaluation of the applications received to provide recommendations to the Council for the allocation of the land parcels.</p> <p>Land parcels will only be awarded in the 22/23 financial year.</p>	n/a	n/a	2	n/a

3.16.1 Economic Development and Tourism Challenges

The table below gives a brief description of all the challenges within the Section: Economic Development and Tourism during 2021/22.

Table 188: LED Challenges

Description	Actions to address
Human Resources are insufficient to drive an effective economic development and tourism programme.	<p>The current organogram for the Directorate: Planning and Economic Development remains a huge challenge, coupled with the high vacancy rate, especially within the Section: Economic Development and Tourism. This high vacancy rate makes it extremely challenging for the section to perform its function to create and coordinate the creation of an enabling environment within the economy of the Stellenbosch Municipality.</p> <p>The department has submitted its job descriptions as per the current organogram, and the outcomes were appealed by the department.</p> <p>The department has noted that a review of the organogram is required and that the job descriptions must be drafted and evaluated under the New Staffing Regulations.</p> <p>The department has advertised the funded vacant posts and it was found that the current salary offering does not lure the required experienced, qualified and well-trained staff to enable the Section to perform its functions.</p>
Implementation of Infrastructure Projects	<p>The section is currently partnering with the Project Management Unit of the municipality to implement the Kayamandi Taxi Rank.</p> <p>The Section does not implement any further infrastructure projects as this is not the constitutional mandate of the section.</p>

3.16.2 EPWP Job Creation 2021/22

The Expanded Public Works Programme (EPWP) met the expected target of 1 300 as planned for the year 2021/22 with an actual of **1 439** job opportunities created.

The table below illustrates the job creation through the EPWP for the 2021/22 financial year.

3.16.3 Tourism

a) Aim and function of the Tourism Section:

- ✚ Contextualise the strategic goals of tourism promotion and development funding;
- ✚ Regularise the operational functioning of external bodies appointed or supported by the municipality in its constitutional mandate toward both tourism and economic development;
- ✚ Ensure coordination of the activities of the funded entities;

- ✦ Ensure efficient oversight of funding and outcomes;
- ✦ Acknowledge and leverage private sector and independent initiatives;
- ✦ Develop sustainable tourism events and brands;
- ✦ Enable sponsorship opportunities for the commercialisation of events, brands and other opportunities;
- ✦ Smooth cyclical tourism numbers by establishing developing and implementing off-peak tourism products and initiatives;
- ✦ Develop and package opportunities and venues for business tourism;
- ✦ Enable market participation for local businesses;
- ✦ Enable training, mentorship and employment opportunities for local citizens; and
- ✦ Quantify return on investment into events and funded entities.

b) Highlights:

- ✦ The impact the Support Stellenbosch Campaign had on keeping the tourism sector afloat during the COVID-19 pandemic, which primarily focuses on domestic tourism and ensuring the patrons visit Stellenbosch was hugely successful in comparison to other tourist destinations within the Cape Winelands District;
- ✦ Visit Stellenbosch partnered with the municipality to improve the tourism experiences and attributes within the Dwarsrivier Valley, which involved engagement with the major tourism and events stakeholders within the Dwarsrivier; and
- ✦ A Memorandum of Agreement was signed with Visit Stellenbosch and Franschhoek Wine Valley Tourism based on the policy for funding organisations rendering a municipal function with the condition to integrate the sector and ensure new entrances into this sector are supported and developed.

The table below indicates the capital expenditure for the Section: Economic Development Tourism as at 30 June 2022.

Table 191: Capital Expenditure as at 30 June 2022: Section: Economic Development and Tourism

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Establishment of Informal Trading Sites: Kayamandi	6 593	1 411	78.61
Furniture Tools and Equipment	259	181	29.81
Only the 5 largest capital projects are listed			

The Section: Local Economic Development and Tourism has spent 23% of the capital budget for the financial year.

The table below indicates the total number of employees in the Section: Economic Development and Tourism as at 30 June 2022.

Table 192: Total number of employees in the Section: Section: Economic Development and Tourism

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	0	0	0	0
14 – 17	1	1	0	0
9 – 13	4	2	2	50%
4 – 8	3	2	1	33.3%
3 – 0	0	0	0	0
Total	8	5	3	37.5%

3.16.4 Heritage and Resource Management

The Section: Heritage Resources Management is mandated to enable, facilitate and manage cultural heritage development within the Stellenbosch municipal area through the formulation and implementation of long-term cultural heritage plans, strategies, policies and guidelines, which are appropriately integrated with the applicable sectoral plans of the municipality and aligned with the requirements of the National Heritage Resources Act, Act 25 of 1999.

Part of this work was to update the Stellenbosch Municipality Heritage Inventory, which was done in partnership with the Stellenbosch Heritage Foundation. The municipality intends to further expand on this partnership to ensure that the heritage inventory is continually updated.

The Section has also undertaken a process to review and amend the Stellenbosch Municipality Signage, Advertising and Poster Bylaw with the Directorate: Engineering Services. This bylaw will be adopted and promulgated during the 2022/23 financial year.

3.16.5 Geographic Information Systems (GIS)

The Section is responsible for managing, coordinating and controlling the professional and technical processes associated with Geographic Information Systems (GIS) in respect of the municipality, Management of Information Systems (MIS) through research and evaluation of best practices and cost-effective approaches and provides guidance and advice on the functionalities to internal departments to ensure that broader goals and service delivery objectives are accomplished and quality and professional standards maintained per agreed timeframes, budgets and appropriate legislation.

The Section has assisted the Directorate: Planning and Economic Development with the development of the electronic and online submission of building plans- and land use applications. Through this process, the Section have developed the Building Plan Application Management System ("BPAMS") and the Town Planning Application Management System ("TPAMS"). These systems will provide residents and potential developers to submit their development applications online, and also monitor the progress of their respective applications.

Currently, BPAMS is fully operational and will be launched with TPAMS during the next financial year.

COMPONENT D: COMMUNITY AND SOCIAL SERVICES

3.17 Libraries

Libraries are a significant aspect of society that without exception benefits a cross-section of communities. These not only include the local communities and students but also individual entrepreneurs and small business owners. Small businesses are a core ingredient to a thriving community with a strong economy. Libraries offer services to entrepreneurs that aim to provide both business support and a foundation to keep the talent and energy of these small business owners local.

Developing and expanding programmes and services for entrepreneurs' libraries boost and sustain the development of community economies. Economic, literacy and numeracy development is a priority of the country and locales. Post-COVID-19, the Stellenbosch libraries continue to innovate for 21st-century 4IR literacy and numeracy which would impact and develop the economy. Libraries continue to demonstrate their current and future relevance in a changing world.

Another important focus of the Section: Libraries over the last year was that of the Early Childhood Development Services and resources.

"The most effective way to mitigate the risk factors is to give children living in poverty access to essential early childhood services, such as early learning opportunities, during early childhood" (Berry, Biersteker and Dawes, 2013:26; Biersteker, 2012:53).

Sustainable Development Goal 4 speaks to quality Early childhood Development education. In the South, most pre-school children find themselves in impoverished situations. Families cannot afford to be the sole providers of play-based early learning opportunities. This has resulted in a very successful programme being rolled out at the Groendal Library.

The success of this programme has resulted in the nomination of the library by SAHA and DCAS to showcase the municipality's ECD programmes within the community, at the 2021/22 DUBAI EXPO in Dubai.

Municipal libraries were closed due to the COVID-19 pandemic and have still not recovered from the results of this closure. Libraries are continually repackaging and repurposing services and information. The Section: Libraries have embarked on a major marketing programme to bring "feet" back into the libraries again. The municipality has also considered requests from communities and with the assistance of DCAS have introduced an E-Book service to the public.

Library halls are once again being used by the public as well as for library-related marketing activities.

The graph below illustrates the membership statistics for the year under review.

Figure 46: Libraries membership statistics

The Section: Libraries has over the last year formed many public and private partnerships with the communities within the WCO2 Area.

Table 194: Libraries partnerships

Cloetesville		
Chennels Day care	Day Care	A partnership with the Day Care to create a love for books through literacy activities in the form of storytelling, puppet shows and song and dance activities.
Little builders Crèche	Crèche	Assist with the promotion of literacy and numeracy by introducing 3 – 5 years toddlers to books and other ECD activities such as puzzles, lego and storytelling.
Kayamandi		
Loxton Foundation		Loxton Foundation assists the Kayamandi community. They create opportunities to discover talent amongst township youth and give them a platform to grow.
Pniël		
Dwarsrivier Tourism		Partnering to bring services to the community of Dwarsrivier. Hosting the event to enrich the community.

Community development		The partnership aimed at bringing various services to the community of Dwarsrivier. Hosting the event to enrich the lives of the community.
Groendal Library		
Inceba Trust	Mother and Child Book sharing	Focus on training illiterate parents to do book sharing with their children / grandchildren by looking at the pictures and telling the story.
Inceba Trust	Training of ECD employees	Inceba Trust is responsible for the training, whilst Groendal library assists with storytelling and recommending books per theme.
Adopt-A-Crèche	Outreach to underprivileged children from an informal settlement	Teaching children, basic hygiene, literacy and numeracy skills by exposing them to ECD / crèche activities. Inceba train the parents w.r.t. the Parent and Child Book Sharing Programme.
Inceba Trust Toy Library	ECD Toy Library	The aim is to incorporate the Toys into the ECD section at Groendal Library. As part of this initiative, free training will be presented to Stellenbosch Library staff i.t.o. ECD programmes / activities and the usage of educational toys.
ECD / Crèches	Wemmershoek, La Motte, Groendal, Langrug, Bosbou areas	17 crèches are receiving block loans for books linked to their weekly theme. 2 visits per month for block loans and 1 storytelling / outreach per month are presented at each crèche.
CWP Community Work Programme	Unemployed people employed through the CWP initiative	The Community Work Programme (CWP) is a government programme aimed at alleviating poverty and curbing unemployment. The work rendered by the CWP workers includes cleaning the Library, tidying shelves, assist with preparing new library material (covering of books, tattle-tape etc.). The garden and outside areas are also maintained and cleaned by the workers.
READ-TO -LEAD	Literacy Project in Partnership with BED students: Stellenbosch University	A group of postgraduate Bachelor of Education students assist learners at schools to promote literacy and numeracy at schools.
Franschhoek Literacy Festival / Nali'Bali	Storytelling workshop	The workshop is aimed at exchanging ideas / guidelines for pre-school and primary educators / librarians and authors
ECD / Crèches	ECD creches in Groendal area: "Informal creches "	ECD Centres / Crèches are invited to make use of the educational toys / books at the Groendal Library.
Groendal Housebound members	Book exchanges to housebound / elderly patrons	Bringing the Library to the community. Visits are done twice a month to deliver library material to the housebound. Visit new potential members to form part of the outreach.
Community of Groendal	Friends of the Library	Currently in process of establishment: "Friends of the Groendal Library."
Maker-space	Children Gr R – Gr 12	Currently in Discussions with Groendal Primer and retired educators in the Groendal / Franschhoek area to assist with the rolling out of the "Makerspace" programme. The focus will be on S.T.E.M (Science, technology, Electronics, Mathematics). The idea is to expose the children to science, mathematics, technology and electronics. The Programme will be linked to the school curriculum.
Hospice Stellenbosch		Partnering to bring services to the community of Dwarsrivier. Hosting activity events to enrich the lives of the Hospice community. And promote wellness within the community.
Stellenbosch Traffic Department		Partnership with the traffic department to teach young children about the importance of road safety.
Read to rise		Partnering with Read to rise organisation to promote reading in young children.
Franschhoek		
Dennegeur Agri Village	Crèche	Bringing the Library to the farm children. Storytelling and activity are done 2 x a month.
Franschhoek Museum	Combined programmes	A combined effort to do outreach and literacy programmes.

Libraries partnerships

The table below indicates all the libraries and its partnerships within the Stellenbosch area.

Table 196: Libraries partnerships

Cloetesville		
Little Builders	Nora Tyers Crèche	Provision of support with story-time sessions and literacy activities.
Pniël		
Section: Community Development	Stellenbosch Municipality	The partnership involved hosting community outreach activities together. The target group was adults and the elderly. Held a Mental Health Wellness Day in March 2022 to highlight the effect of the COVID-19 pandemic on mental health. The library assisted the Section: Community Development with identifying speakers for the event as well as interested community members. The library provided the venue and the Section: Community Development created the programme and provided catering and gifts.
Ida's Valley		
E'Bosch Heritage Project	Existing partnership	New partnerships could not be formed due to the COVID-19 pandemic.
Groendal		
Mphozisi Qalekiso Arts Foundation	Existing Partnership	Worked together to celebrate Africa Day in Groendal.
Kayamandi		
Loxton Foundation	Existing Partnership	Partnership to encourage youth to read and write poetry.

Stellenbosch / Jamestown / Franschhoek / Klapmuts / Koelenhof / Kayamandi

READ TO LEAD

Challenges facing Libraries

The combination of severe budget cuts and a moratorium on filling staff vacancies are making it harder for public libraries to keep technology updated, provide basic library resources, fund new projects, repair and maintain library buildings or just keep the library service available for the public.

It is evident that more people are turning to digital resources like eBooks, podcasts and online databases for their information however this doesn't mean that libraries are becoming obsolete. The municipality finds itself repacking and repurposing information and resources. With the assistance of Provincial Library Services, the municipality can offer an e-book service to the patrons.

However, with community needs for change and the introduction of digital services, the municipality is faced with the challenge of qualified and skilled staff. Libraries are highly under-resourced in terms of qualified personnel, and physical and digital resources which ultimately results in low patronage of library facilities.

The move to digital and non-print technologies will ensure patron engagement with libraries way into the future.

The table below indicates the capital expenditure for the Section: Library Services as at 30 June 2022.

Table 197: Capital Expenditure as at 30 June 2022: Section: Library Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget
	R'000		
Cloetesville: Furniture, Tools and Equipment	34	12	64.95
Libraries: Small Capital	115	70	38.88

4 – 8	25	23	2	8%
3 – 0	0	0	0	0
Total	31	27	4	13.3

3.18 Cemeteries

Stellenbosch Municipality is responsible for the maintenance and management of six cemeteries in the greater Stellenbosch. Jamestown, Pniël and Groendal have reached their capacity, whilst Wemmershoek and Franschhoek South and North are fully operational. Onder-Papegaaiberg Cemetery is also to capacity [only reserved graves available]. A new cemetery in Kylemore is currently being established.

Consultants were appointed (3 years + project) to assist Stellenbosch Municipality with the identification and planning of two regional cemetery sites to address the critical need for burial space within the municipality. This project is at an advanced stage of acquiring the required environmental-, water and land use approvals. All licences have been received for the commencement of the new Stellenbosch Memorial Park situated alongside the R304 planned at the site known as the Calcutta bush.

The objective of the Section: Cemeteries is to provide adequate burial space and ensure a dignified burial.

Challenges:

- ✚ the shortage of burial space;
- ✚ to convert burial records to electronic soft copies (in progress as per the five-year plan); and
- ✚ to promote alternative burial methods such as e.g., Cremations amongst various religious groups.

3.18.1 Income – Cemeteries

The table below indicates the income generated from the financial years of 2018/19 – 2021/22.

Table 199: Cemeteries Income

Gravesite locations	2018/19		2019/20		2020/21		2021/22

3 – 0	10	10	0	0
Total	15	14	1	7.14%

3.19 Child Care; Aged Care; Social Programmes– Community Development

The Section: Community Development is thankful for having been able to reach out to communities again post the COVID-19 pandemic. During engagements in the past year, it also became evident to what extent communities were hungry for interaction and reaching out to each other – albeit hesitantly at the start and from behind masks.

This was also the first year for which a formal agreement in terms of service delivery was signed between the municipality and the Department of Social Development.

Table 202: Service Statistics – Child Care, Aged Care, Social Programmes

Focus area	Description	Ward	Activity
Early Childhood Development Services / Children	<ul style="list-style-type: none"> Capacity Building of ECD Practitioners; Initiatives in awareness programmes (ECD children); ECD Registration Compliance; Strengthening and Establishing ECD Forums; Transversal committees / Adhoc committees; Awareness Programmes 	All	↓ ECD Registration drive with 123 organisations in the ECD sector to identify and prioritise registration compliance obstacles experienced by ECDs and service organisations.
		12	↓ 12 ECDs assisted with Financial Management Training.
		ALL	↓ GIS plotting of 139 ECD Facilities
		18, 20	↓ Working on Fire training for 73 ECD facilities.
		3, 12-15, 18-19	↓ Holiday Programmes reaching 833 children.
		All	↓ Greater ECD Quarterly Engagement with 170 ECDs.
		1, 2, 12-15, 18	↓ 39 ECD Practitioners completed the Indaba Core Curriculum training by the Sustainable Institute.
		4, 6, 7, 16, 18, 19	↓ 27 ECD practitioners completed the Child Sexual Behaviour training
		2, 5, 12, 14, 16, 19	↓ 20 ECD practitioners completed the 3-year Cotlands training.
		7, 10, 12, 13	↓ Partial Care registration updates for 6 facilities.
		1, 2, 12-15, 18, 21	↓ Back to School programme reaching 685 children.
		18	↓ 25 Foster parents and children participated in the parenting training session with DSD.
		12-15	↓ Awareness session on fire safety, literacy and human trafficking with 150 children during library week.
		12-15	↓ 25 Gr 7 learners participated in the outreach programme Inkuthazo Yesizwe at Ikhaya Primary.
		All	↓ 1 278 children participated in the Child Protection Week activities.
Persons with Disabilities	Awareness and Wellness programmes Universal Access	1, 2, 12-17	↓ 69 persons with disabilities participated in the disabilities sport day.
		All	↓ The municipality participated in and published a link to the Disability Information Portal on the municipal website.
		5, 6, 12, 17, 20	↓ 62 youths from the community were trained in sign language.
		5, 6, 12, 13	↓ 100 persons were made aware of Epilepsy and how to deal with it in the community.
		5, 6, 12-15, 18	↓ 10 Inclusive Public Transport Surveys

Focus area	Description	Ward	Activity
			were completed.
		20	19 elderly persons attended the epilepsy awareness session.
Older Persons	Special Events and Awareness programmes	3, 4	35 elderly persons participated in a Heritage Day event.
		12-17	37 elderly and Persons with disabilities participated in a wellness programme.
		3	A session attended by 15 persons regarding the establishment of a local elderly forum.
		3-6, 12-17	8 Clubs participated in a follow-up capacity-building session.
		3-6, 10, 12-17	320 elderly persons participated in the regional golden games.
		1-6, 12-17, 20	165 elderly participated in the Elderly Abuse awareness day.
Gender	Special Events and Awareness programmes	18, 20	Women's Day with 60 women.
		1-2, 5, 12-15, 18, 21	Fatherhood Programme with 16 men 72 Men attended the father appreciation day.
		1, 2, 12-14, 18	186 widows participated in an empowerment programme.
		12-15	Wellness day attended by 23 diabetic persons.
		18	27 men and women participated in the breast cancer and men's health programme.
		12-15	Supported the Help a Girl Organisation to adopt 5 schools within which they will roll out their programmes.
		ALL	16 Days of Activism Launch attended by 118 persons. 16 Days of Activism community projects attended by 318 persons. 56 men participated in the 16 Days of Activism Summit. 19 Foster Care Parents completed the GBV training during 16 Days of Activism.
		All	Officials attended Roses on the River, World Aids Day commemoration of @heart.
		12-15	20 young ladies participated in the Girls Support group for GBV.
		12-15	38 boys participated in the becoming men's soccer tournament.
Youth	Youth Empowerment programmes Youth Capacity Building Transversal committees /	12, 13, 16, 17	Life Skills Training by National Youth Development Agency for 20 youths.
		1, 2	NPO registration of 9 Youth Organisations.

Focus area	Description	Ward	Activity
	Adhoc programmes	1, 2, 16-18	✚ Mobilising 21 youths to enrol in the Chrysalis Academy programme.
		5, 6, 12-15	✚ Accredited skills development for 12 youths as professional waiters
		1, 2	✚ 19 young fathers were trained in fatherhood skills.
		12-15	✚ Inkuthazo Yesizwe Sport Coaching summit by the university with 37 coaches to upskill them in working with young athletes.
		1-3, 5-6, 12-17	✚ Accredited training to 24 youths in 5-star table attendance. ✚ Accredited training to 12 youths in food handling. ✚ Accredited painting training was done with 13 youths.
		1-6, 10-21, 23	✚ 80 youths applied and participated in the learner and driver's licence programme.
		3, 5, 6, 16, 17, 20, 21	✚ 94 youth participated in the job-readiness programme in partnership with DSD.
		16, 17	✚ 60 youths participated in the Human Rights Day: Anti-bullying campaign.
		All	✚ Youth Day was celebrated by 165 youth.
		5, 6, 16, 17	✚ 11 youths completed the data literacy workshop conducted by Open-Up and the Cloetesville e-centre.
Vaccination registration	Assistance to the DoH with the mobilisation of persons for vaccination and with administration at the van der Stel Hall	All	✚ 350 ECD practitioners mobilised for vaccination. ✚ 1 293 persons assisted at various sites ✚ 54 homeless persons mobilised for vaccination.
Grant in aid	Donations to community organisations serving among others: youth, gender, ECDs, Old Age Homes, Health Organisations and Sport Clubs	All	✚ 1 Financial Management workshop with 8 organisations. ✚ 3 compulsory clarification workshops with 288 organisations. ✚ See the table below regarding the approved donations.
People on the street	Development, awareness raising through collaboration and services rendered	All	✚ Mandela Day: Motivation and marketing of the general public to support the Give Responsibly Campaign along with the NGOs associated with the campaign.
		1, 2, 4, 5, 7-11, 16, 20	✚ Mask-up campaign: distribution of masks to 153 persons and raising awareness on the necessity of wearing masks and keeping social distance.
		7-10	✚ Refer 6 persons through the Restorative Justice Programme. ✚ Assist churches with food provision to 25 homeless persons.
		All	✚ Give Responsibly marketing via

COMPONENT E: ENVIRONMENTAL PROTECTION

3.20 Pollution Control, Bio-Diversity, Beautification, Open Spaces and Parks

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned. To this effect, Stellenbosch Municipality developed the Stellenbosch Environmental Management Framework in 2018, administered by the Department: Community Services.

Stellenbosch Municipality is compiling dedicated Environmental Management Plans (EMPs) for all its declared nature reserves as well as nature areas. The Mont Rochelle Nature Reserve EMP was adopted by the Council in 2022. Papegaaiberg Nature Reserve has an approved EMP, currently under review along with Jan Marais Park's EMP. The Paradyskloof Nature Area was accepted by the Council in 2019. A first draft EMP has been completed for the Ida's Valley Dam- / Botmaskop area, which will be advertised for public input by 31 December 2022. Stellenbosch Municipality has also completed an Invasive Alien Plant Management Plan, as required in terms of the National Environmental Management: Biodiversity Act (10 of 2004) and an Integrated Fire Management Plan to assist in the management of large vacant nature areas under the management of Council.

An Air Quality Control By-Law, as well as a Noise Control Policy, has been developed and adopted by the Council. The latter is implemented by a dedicated Air Quality / Noise Control Officer appointed within the Department: Community Services.

Air quality- and noise complaints are captured on a central database and dealt with within the required timeframes. The following statistics included both air quality-related matters and noise complaints. All noise complaints are investigated in terms of The Western Cape Noise Control Regulations PN200/2013.

Table 205: Air Quality Complaints 2018

2018 Complaints	1 st Quarter	2 nd Quarter	3 rd Quarter	4 th Quarter

- ✚ Total noise complaints for 2022 = **122**

3.20.1 Environmental Implementation

Stellenbosch Municipality works closely with the Department of Environmental Affairs and Development Planning in reporting on illegal activities, as well as administering the rehabilitation action of Section 30 (National Environmental Management Act, 107 of 1998) Emergency Incidents.

3.20.2 Urban Forestry

The aim of the Urban Forestry Sub-section is to facilitate the planting, protection, blanking, maintenance and long-term management of all trees located on the municipal property through tree management (arboricultural) practices, thus promoting a sustainable development approach. This approach is geared towards making WC024 the greenest municipality in South Africa through Urban Forestry practices which guides investors towards future sustainable development.

Table 210: Management of trees in WC024 – Urban Forestry

Type of service	2019/20	2020/21	2021/22
Management Trees in WC024			
Tree planting programme	60	7	162

COMPONENT E: SECURITY AND SAFETY

3.21 Law Enforcement

The primary role of Law Enforcement is by-law enforcement and the protection of municipal assets and staff. The function includes the monitoring and prevention of municipal land- invasion of which the responsibility is shared between Community and Protection Services and the Section: Informal Settlements.

A 24/7 control room is in place as well as the monitoring of crime hot areas through CCTV cameras. Licence Plate Recognition Cameras (LPR) have been installed at all entrances / exits to Stellenbosch and Franschhoek towns with several LPR cameras installed on minor roads which are used regularly by thoroughfare traffic to avoid congested areas during peak times. This has proven to be very successful in the combatting of crime and crime prevention initiatives.

Highlights:

- 🚔 Weekly operational planning with key stakeholders (SAPS and other safety partners);
- 🚔 Revamp of control room concluded and operational to ensure more efficient service delivery; and
- 🚔 Purchased a multi-purpose armoured vehicle to effectively deal with land invasions.

Challenges:

- 🚔 To render a 24/7 Law Enforcement patrol service;
- 🚔 Increase and maintain surveillance of key places;
- 🚔 Prevent land invasions;
- 🚔 Insufficient staff to fulfil operational requirements; and
- 🚔 Insufficient office space to accommodate departmental staff.

Law Enforcement attended to the following from 01 July 2021 to 30 June 2022:

Table 212: Law Enforcement highlights

	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Total

Figure 47: Law Enforcement Statistics

3.21.1 Traffic Law Enforcement

Traffic Services is performing its functions as guided by the National Road Safety Strategy with its main objective being to achieve traffic safety on municipal roads including the functions as defined in the municipality's IDP.

The National Road Safety Strategy provides all-year-round road safety initiatives. The municipality has increased its enforcement strategy in collaboration with stakeholders and affected parties. Operations like Automatic Number-plate Recognition are conducted to improve compliance with - and payment of traffic fines.

Ongoing objectives are to improve road user behaviour; reduce the incidence of traffic offences; speeding; drunk-driving and driving under the influence of narcotics; dangerous overtaking; removal of unfit road users from traffic; roadworthiness of vehicles; public transport compliance concerning vehicles and drivers; provide sufficient and coordinated regulation of traffic on strategic roads; pedestrian education and compliance; eradication of corruption; administrative compliance and overall improvement of enforcement systems. This includes additional hours and Saturday operations at the Admin Section and a new approach to Law Enforcement strategies.

3.21.2 Highlights and challenges for Traffic Law Enforcement

Traffic Law Enforcement strategies have managed to yield good results;

In the 2021/22 financial year, Traffic Service has continued with the delivery of its Traffic and Pedestrian Safety Programme which entails a team of two traffic officers who focuses on the education of learners and farm workers regarding road safety issues. Lectures were presented at schools and training was provided in respect of correct bicycle etiquette and the registration, training, and monitoring of scholar patrols throughout the municipality. 86 awareness initiatives on public safety were held at targeted schools in the municipal area.

Another area of concern was the education of farm workers in the municipal area. The focus was on traffic rules for pedestrians, which included a safe crossing of the road, and the wearing of visible clothing, especially during winter, early in the mornings and late at night.

Jaywalking (which occurs when a pedestrian walks in or crosses a roadway that has traffic, other than at a suitable crossing point disregarding traffic rules) has been another intervention as many pedestrians are killed or injured while jaywalking.

a) Challenges:

- ✚ Limited human resources;
- ✚ The capacity of the DLTC – restricted the municipality to performing tests; and
- ✚ Vehicle Testing Station Infrastructure challenges and staff shortages.

It is observed that Stellenbosch is fast growing to be a choice of employment and business hub, however, the municipality's resources do not enable it to be on par with such development. This limitation may project a negative reflection on the municipality's core function.

b) Service Statistics – Traffic Services

Table 213: Service Data for Traffic Services

3.22 Fire and Disaster Management

Stellenbosch fire services aim to be a service that is proactive in preventing fires and other risks rather than simply reacting to fires through:

- ✚ Acting in support of the wider developmental agenda as outlined in the IDP;
- ✚ Establishing sound institutional and administrative capabilities that support its roles and purpose;
- ✚ Demonstrating good governance and administration;
- ✚ Adopting community-based approaches;
- ✚ Putting people and their concerns first; and
- ✚ Professionalisation of the function.

Disaster Management is one of several terms used to describe the same discipline. Others include emergency management, civil protection, crisis management, civil defence and disaster risk management. The aim is to bring disaster management closer to the community. Community-based disaster management and risk reduction planning process will assist in uniting the community's understanding of the risks and in preparedness, mitigation and prevention efforts, even if the members of the community have differing perceptions of disaster risk and even if they differ in age, gender, education and social class.

Based on the following elements:

The basic elements and features of Community-based Disaster Management are:

- ✦ People's participation - community members are the main actors and propellers. They also directly share in the benefits of disaster risk reduction and development;
- ✦ Priority for the most vulnerable groups, families, and people in the community – in urban areas the vulnerable sectors are generally the urban poor and informal sector while in rural areas, these are the subsistence farmers, fisherfolk and indigenous people; also vulnerable are the elderly, the differently-abled, children and women (because of their caregiving and social function roles). Risk reduction measures are community-specific and are identified after an analysis of the community's disaster risk (hazards, vulnerabilities and capacities and perceptions of disaster risk);
- ✦ Existing capacities and coping mechanisms are recognised – CBDM mitigation builds upon and strengthens existing capacities and coping strategies;
- ✦ The aim is to reduce vulnerabilities by strengthening capacities; the goal is to build disaster-resilient communities;
- ✦ Links disaster risk reduction with development - addresses vulnerable conditions and causes of vulnerabilities; and
- ✦ Outsiders have a support and facilitating role.

Highlights:

- ✦ Upgrading of Stellenbosch Fire Station: overnight quarters, roof, solar panels, control centre, mini disaster centre.
- ✦ Completion of the ward-based risk assessment.

Challenges:

- ✦ Rapid expanding informal settlements

COMPONENT F: SPORT AND RECREATION

3.23 Holiday resorts and campsites

The Stellenbosch Municipality is responsible for the management and maintenance of one picnic site, the Jonkershoek Picnic Site. This site is situated in the Jonkershoek Valley on the banks of the Eerste River. The picnic site attracts up to 15 840 visitors per annum due to its natural beauty and tranquillity set at the foothills of the Jonkershoek mountains and provides outdoor leisure for visitors, catering for braai and picnics along the river course.

3.23.1 Sports facilities and Swimming Pools

The Stellenbosch Municipality is responsible for the management and maintenance of seventeen (17) sports grounds in its municipal area. These grounds are surrounded by the scenic beauty of the Stellenbosch Mountains. Ten (10) are located in urban areas and seven are in rural areas.

It is the municipality's goal to create active, healthy communities and to provide a sporting hub for all its residents and visitors by offering a wide range of well-maintained and well-managed sporting facilities.

Stellenbosch Municipality manages and maintains one swimming pool in the greater Stellenbosch area. The swimming pool is situated in Cloetesville and can accommodate two hundred and seventy-five (275) people at any time per day. The existing facility can host swimming galas and aims to further sports development and recreation.

3.26 Human Resources Services

Stellenbosch Municipality views the Human Resources Management component as the governance of the organisation's employees. More commonly, human resources per se refer to the people or human capital appointed or employed by the organisation whose skills are used to reduce risk and maximise return on investment. The vision of the Department: Human Resources Management is undoubtedly to build partnerships with management at all levels of the organisation, to create a culture or working environment where employees are valued or appreciated and to ensure a diverse, qualified, healthy and highly motivated workforce focused on achieving the critical outcomes, through the development and administration of cost-effective and results-oriented human resources. Accordingly, the mission of the Department: Human Resources Management is to address and achieve the goals and challenges of Stellenbosch Municipality by providing services that promote a work environment that is characterised by fair treatment of staff, open communications, personal accountability, trust and mutual respect. The municipality will seek and provide solutions to workplace issues that support and optimise the operating principles of the organisation.

The Department: Human Resources Management objectives for Stellenbosch Municipality include but are not limited to:

- ✦ Helping the organisation achieve its goals;
- ✦ Ensuring effective utilisation and maximum development of human resources;
- ✦ Ensuring respect for human beings;
- ✦ Identifying and satisfying the needs of individuals;
- ✦ Ensuring reconciliation of individual goals with those of the organisation;
- ✦ Achieving and maintaining high morale among employees;
- ✦ Providing the organisation with well-trained and well-motivated employees;
- ✦ Increasing employees' job satisfaction and self-actualisation;

- ✦ Developing and maintaining the quality of work-life;
- ✦ Being ethically and socially responsive to the needs of the community;
- ✦ Developing the overall personality of each employee in its multidimensional aspect;
- ✦ Enhancing employee's capabilities to perform the present job; and
- ✦ Ensuring service excellence for the Stellenbosch municipal area.

Human resources services include:

- ✦ Strategic Human Resources Management;
- ✦ Labour Relations;
- ✦ Recruitment and Selection;
- ✦ Training and Development;
- ✦ Employee Assistance;
- ✦ Occupational Health and Safety;
- ✦ Employment Equity; and
- ✦ All Human Resources Administration.

Each director, manager, departmental head, superintendent, assistant superintendent and the foreman is responsible for setting objectives, delegating responsibilities and tasks, motivating staff, disciplining staff, developing skills and career paths, measuring performance and generally guiding their staff. In these endeavours, management and line management are assisted by the Department: Human Resources Management, which provides policies, guidelines, support, systems and specialised inputs.

The highlights for the Department: Human Resources Management in 2021/22 are the following:

- ✦ 278 employees were trained;
- ✦ 40 employees attended learnerships; and
- ✦ 6 employees completed their trade test in plumbing and were found competent.

The challenges for the Department: Human Resources Management in 2021/22 were the following:

- ✦ Shortage of conducive training venues; and
- ✦ Poor responses on Individual Skills Audit % Personal Development Forms.

The following was submitted within the 2021/22 year and is under consideration at the LLF:

- ✦ Measures to recover arrear monies from employees;
- ✦ TASK Evaluation Policy; and
- ✦ Employee Parking Policy.

The table below indicates the total number of employees in the Department: Human Resources Management:

Table 228: Total number of employees in the Department: Human Resources Management

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	3	3	0	0
9 – 13	10	9	1	10%
4 – 8	3	2	1	33.3%
3 – 0	0	0	0	0
Total	17	15	2	11.8%

3.27 Information and Communication Technology (ICT) Services

The Department: ICT committed its time in the 2021/22 financial year to purchase and replace computer software and hardware to improve the efficiency of the various municipal business units.

a) Highlights:

- ✦ High-site wireless hardware links were procured and delivered during this time with the plan to upgrade the municipal network to the outer-lying areas under the WC024 area. A rates tender for WAN infrastructure was approved to assist in shortening the municipality's turnaround time in commissioning new sites and improving current location services;
- ✦ The network support encompasses both the ICT and camera infrastructure by way of expanding the Avalon contract services to cover this critical service. The SLA was further been expanded to include labour support for network cabling as well as hardware support for the commissioning of new camera locations. This has reduced the cost of this service as the ICT network has been able to incorporate the camera infrastructure. This has, in turn, saved the municipality and the public money in providing this critical service;
- ✦ The Department: ICT spent a large amount of its effort on once again reducing costs by way of procuring printers via the National Treasury RT3-2018 contract. As a result of this contract, the municipality reduced its printer footprint and begin to centrally manage usage across printers. The many office printers were replaced with shared departmental printers further assisting in reducing costs;
- ✦ The Global Information System ESRI GIS was renewed for a further 3 years with the implementation of the BPAMS and TPAMS version 2 taking place;
- ✦ Supported the Section: Community Development in moving to the Simonsberg Street Offices by providing needed ICT infrastructure with battery backup power.
- ✦ The Mooiwater taxi rank offices were commissioned and included the installation of a high-speed satellite link and data and telephone points for the offices.
- ✦ The upgrade of the Backup Infrastructure to accommodate and include all critical systems to ensure the sustainability of the ICT services was also completed;
- ✦ ICT embarked on a Microsoft Office 365 and Windows 10 migration which is a project aimed at facilitating ease of access anywhere and anytime;
- ✦ The Disaster Recovery and Colocation Services project including WAN and internet services was successfully implemented by First Technology and will remain in place until 30 June 2023. The DR site is at TERACO in Claremont and meets all the AGSA's requirements;
- ✦ The municipality is currently implementing a cyber-security solution called F-Secure which will give the municipality better protection and is the best anti-malware, best Ransomware

defence security to protect from ransomware and prevent data encryption;

4 Quarterly GIS Forum meetings took place during the 2021/22 financial year; and

4 Quarterly ICT Steering Committee meetings took place during the 2021/22 financial year.

3.27.1 Service Statistics – Information and Communication Technology (ICT)

Table 229: Service Statistics – ICT

Details	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
	%							
Ensure the availability of the network to ensure effective ICT systems for municipal processes	98	98	99.9	99.9	99	99	99	99
Provide ICT support to all municipal departments by attending to requests within 4 working days	97	98	98	98	98	98	98	98
Connecting all municipal sites to the ICT network	100	100	100	100	100	100	100	100

The table below indicates the capital expenditure for the Department: ICT as at 30 June 2022.

Table 230: Capital expenditure - ICT services as at 30 June 2022

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from Adjustment Budget %
	R'000		
Public WI-Fi Network N/A Upgrade and Expansion of IT Infrastructure Platforms	591	591	-0
Purchase and Replacement of Computer / software and Peripheral devices N/A	4 199	4 149	1.19
Upgrade and Expansion of IT Infrastructure Platforms	4 563	3 522	22.81

The Department: ICT has spent 88% of the capital budget for the financial year.

The table below indicates the number of employees in the Department: ICT as at 30 June 2022.

3.28 Legal Services

The Section: Legal Services in conjunction with user departments ensures and manages the implementation, monitoring, evaluation and reporting on key service delivery objectives concerning Legal Services.

a) The main objectives are the following:

- ✚ Advise and manage litigations instituted by the municipality and against it;
- ✚ Provide legal advice, opinions and input on policies, contracts, agreements, memorandums, legislation, by-laws and authorities;
- ✚ Advising the Municipal Council on items submitted to meetings;
- ✚ Ensuring by-laws are promulgated after consultation with user departments and approved by the Council; and
- ✚ Attend to new legislation and proclamations for comment as and when required.

b) Challenges:

- ✚ To deal with urgent requests for legal input to the Portfolio and Council Committees;
- ✚ Lack of skilled administrative support for the Chief Legal Advisor; and
- ✚ Availability of well-maintained legal library and reference resources.

The table below indicates the total number of employees in the Section: Legal Services as at 30 June 2022.

Table 232: Total number of employees in the Section: Legal Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)

3.29 Municipal Court – Additional Court - Stellenbosch

The Municipal Court is responsible for the following prosecutions:

- ✚ Traffic by-laws;
- ✚ Provincial Traffic by-laws;
- ✚ SAPS by-laws;
- ✚ Law Enforcement by-laws;
- ✚ Fire by-laws;
- ✚ Building and Land Use Regulations, and all other By- Law contraventions;
- ✚ Electrical By-laws; and
- ✚ Noise pollution.

a) Mission Statement of the Municipal Court

The Municipal Court aim to: -

- ↓ promote justice and service delivery;
- ↓ enhance revenue to invest in the community;
- ↓ “let Justice be seen to be done”; and
- ↓ minimise crime and have a safer Stellenbosch.

The Municipal Court was established to:

- Support and secure good governance;
- Ease the burden on regular courts;
- Increase the speed of services;
- Allow for more successful prosecutions by applying specialist knowledge;
- Improve communications between the by-law prosecutors and enforcers;
- Support by-law enforcement;
- Ensure a user-friendly court; and
- Keeps members of the public who committed a minor crime (such as a traffic offence) away from hardened criminals.

The municipality is also looking into having an Ad Hoc Court in Franschhoek / Klipmuts in the near future. This could be another boost for the Municipal Court's service to the community. Prosecuting some of the cases in the Paarl Magistrate's Court is also currently being considered.

The introduction of the Municipal Court has been an essential, strategic implementation that will benefit the whole community of Stellenbosch.

COMPONENT H: ORGANISATIONAL PERFORMANCE SCORECARD

3.30 Performance Management

Performance management is a process that measures the implementation of the organisation's strategy as captured within the Integrated Development Plan (IDP). It is also a management tool to plan, monitor, measure and review performance indicators to ensure efficiency, effectiveness and the impact of service delivery by the municipality.

At a local government level, performance management is institutionalised through the legislative requirements of the performance management process. Performance management provides the mechanism to measure whether targets are met in line with strategic goals as set by the organisation.

Section 152 of the Constitution of the Republic of South Africa, 1996, deals with the objectives of local government and paves the way for performance management. The idea of an accountable government is important to meet the needs of Stellenbosch. The democratic values and principles in terms of section 195(1) are also linked with the concept of performance management, concerning the principles of the following, among others:

Figure 48: Performance Management Principles

It is a statutory requirement according to the MSA to establish a performance management system and an Integrated Development Plan (IDP) that must be aligned to the municipal budget. The monitoring of the organisational performance of the budget must be done against the IDP every quarter via the Service Delivery and Budget Implementation Plan (SDBIP). The report is made public after the council has been informed of the quarterly progress against set targets.

In addition, Regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations of 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be

conducted, organised and managed, including determining the roles of the different role players". Performance management is not only relevant to the organisation as a whole but also to the individuals employed in the organisation, as well as the external service providers and the municipal entities. This framework, *inter alia*, reflects the linkage between the IDP, the Budget and the SDBIP.

3.30.1 Legislative requirements

In terms of section 46(1)(a) of the MSA, a municipality must prepare a performance report for each financial year that reflects the municipality's and any service provider's performance during the financial year. The report must furthermore indicate the development and service delivery priorities and the performance targets set by the municipality for the following financial year, and measures that were or are to be taken to improve performance.

3.30.2 Organisational performance

Strategic performance assessment indicates how well the municipality is meeting its objectives and which policies and processes are working. All government institutions must report on strategic performance to ensure that service delivery is efficient, effective and economical. Municipalities must develop strategic plans and allocate resources for their implementation. The implementation must be monitored on an ongoing basis and the results must be reported on during the financial year to various role players to enable them to implement corrective measures timeously where required.

This report highlights the strategic performance in terms of the municipality's Top-Layer Service Delivery and Budget Implementation Plan (SDBIP), high-level performance in terms of the strategic objectives of the municipality and performance on the National Key Performance Indicators prescribed in terms of Section 43 of the MSA.

The Performance Management Policy 2021/22 is currently under review to be aligned with the new staff regulations 809.

3.30.3 Governance framework for the IDP, Budget and Performance Management

The draft review of the 4th Generation IDP was tabled in March 2021 and was advertised for public comment thereafter. Stellenbosch Municipal Council adopted the reviewed Fourth Generation IDP (2017/18 – 2021/22) together with the 2021/22 MTREF Budget on 23 June 2021.

The IDP is the principal planning instrument that guides and informs the municipal budget. The MSA requires each municipality in South Africa to prepare such a strategic plan to guide all development and management within the municipal area. The IDP sets out the development priorities of Stellenbosch Municipality over the next five years. The IDP must guide and determine municipal planning and project implementation. The 2021/22 budget was based on the IDP and other spheres of government and service providers.

The IDP for the period July 2017 to June 2022 gives expression to the political mandate that was received from residents in the August 2016 local government election. The MSA requires municipalities to consult with their residents and the broader institutions, which elicited a positive reaction and involvement from the public.

The IDP is a strategic tool that guides all the activities of local government in consultation with residents and stakeholders. In keeping with the more evolved and strategic approach to this IDP, the implementation plan focuses on only the key strategic programmes, projects and initiatives that will support the achievement of the priorities during the five-year term of office. Its focus is on development in the broader sense and it is a structured plan that informs budget priorities, decision making and the allocation of resources.

The focus of the IDP is varied and includes the provision of basic municipal services, measures for building and transforming municipal capacity, measures to assist in expanded livelihood opportunities for citizens, enterprise development, building dignified and safe living environments, and, crucially, exploring new ways of working and living together. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The three-year budget sets out the revenue-raising and expenditure plan of the municipality for approval by the Council under the MFMA. The allocation of funds needs to be aligned with the priorities in the IDP.

The IDP must be reflected in the performance agreements of the relevant staff and through the budget, in the service delivery and budget implementation plan (SDBIP). The key performance management instrument of the municipality is the SDBIP. Linked to the IDP, the SDBIP forms the basis of the performance contracts of directors and quarterly, mid-year and annual performance reviews of senior management, directorates and the municipality.

3.30.4 Service Delivery and Budget Implementation Plan

The organisational performance is evaluated using a municipal scorecard (Top-Layer SDBIP). Performance objectives, as reflected in the municipal scorecard, are required to be practical, measurable and based on the key performance indicators.

The SDBIP is a tool that converts the IDP and budget into measurable criteria of how, where and when the strategies, objectives and normal business processes of the municipality are implemented.

It also allocates responsibility to directorates to deliver the services in terms of the IDP and the budget.

The purpose of performance reporting is to report specifically on the implementation and achievement of IDP outcomes. This section should provide an overview of the achievement of a municipality in terms of the strategic intent and deliverables achieved as stated in the IDP. The Top-Layer (strategic) SDBIP is the municipality's strategic plan and shows the strategic alignment between the different documents (IDP, Budget and Performance Agreements).

The organisational performance is evaluated using a Municipal Scorecard (TL SDBIP) at an organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators of how, where and when the strategies, objectives and normal business processes of the municipality are

implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and Budget.

MFMA Circular No. 13 is a clarification of the Municipal Budget and Reporting Regulations, Schedule A 1, GenN 393 in GG32141 of 2009 and prescribes that the:

- ✦ IDP and budget must be aligned;
- ✦ budget must address the strategic priorities;
- ✦ SDBIP should indicate what the municipality is going to do during the next 12 months; and
- ✦ SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

3.30.5 The municipal scorecard (Top Layer SDBIP)

The municipal scorecard (Top-Layer SDBIP) consolidates service delivery targets set by the Council advised by the senior management and provides an overall picture of the performance of the municipality as a whole, reflecting performance in its strategic priorities for the 2021/22 financial year. The scorecard is the performance evaluation tool and is used during informal and formal performance reviews.

Components of the Top-Layer SDBIP include:

One-year detailed plan with the following components:

- ✦ Monthly projections of revenue to be collected from each source;
- ✦ Monthly projections of expenditure (operating and capital) and revenue for each vote;
- ✦ Quarterly projections of service delivery targets and performance indicators for each vote;
- ✦ Ward information for expenditure and service delivery; and
- ✦ Detailed capital works plan broken down by ward over three years.

Top-Layer KPIs were prepared based on the following:

- ✦ Key performance indicators (KPIs) for the programmes / activities identified to address the strategic objectives as documented in the IDP in co-operation with the community who identifies developmental priorities;
- ✦ KPIs identified during the IDP and KPIs that need to be reported to key municipal stakeholders; and
- ✦ KPIs to address the required national minimum reporting requirements.

3.30.6 Amendment of the Top Layer SDBIP

The TL SDBIP 2021/22 was reviewed once during the financial year under review and submitted to Council for approval on 06 June 2021 and revised on 23 February 2022.

The municipality utilises an electronic web-based, real-time performance-based system on which KPI owners update actual performance monthly. KPI owners report on the results of the KPI by documenting the following information on the performance system:

- ✦ The actual result in terms of the target set;
- ✦ A performance comment; and
- ✦ Actions to improve the performance by the submission of corrective measures to meet the set target for the reporting interval in question if the target was not achieved.

It is the responsibility of every KPI owner to maintain a portfolio of evidence to support actual performance results updated and provide it to the Internal Auditor and AGSA upon request during the quarterly and annual audit testing.

3.30.7 Monitoring of the Service Delivery and Budget Implementation Plan

Municipal performance is measured as follows:

The Executive Mayor, who must provide general political guidance over the fiscal and financial affairs of the municipality, is required by Section 52(d) of the MFMA to submit a report on the implementation of the budget and the financial state of affairs of the municipality, to the Council within 30 days after the end of each quarter.

The actual performance was audited by the Department: Internal Audit (IA) and the results of their findings were submitted to the APAC:

- Quarter 1 (July to September);
- Quarter 2 (October to December);
- Quarter 3 (January to March); and
- Quarter 4 (April to June).

Other Municipal Personnel

The municipality has implemented individual performance management of employees on the three highest levels of management.

Municipal Manager and Managers directly accountable to the Municipal Manager

The MSA prescribes that the municipality must enter into performance-based agreements with the Municipal Manager and managers directly reporting to the Municipal Manager i.t.o. section 56. Performance agreements must be reviewed annually and are published for public interest. This process and the format are further regulated by Regulation 805 (August 2006), MSA.

The revised (latest) performance plans for the Municipal Manager and section 56 appointments for the 2021/22 financial year were signed on 23 February 2022 as prescribed. They include performance agreements for the:

- Municipal Manager;
- Chief Financial Officer;
- Director: Corporate Services;
- Director: Planning and Local Economic Development;
- Director: Community and Protection Services; and
- Director: Infrastructure Services.

Table 236: Performance management governance

	Performance Management Policy	All MSA s57/56 Performance contracts signed	Audit Committee	Municipal Public Accounts Committee (MPAC)	Quarterly Performance Reporting to Council	Annual Performance Reporting to Council
In place?	√	√	√	√	√	√

In the paragraphs below, the performance achieved is illustrated against the Top-Layer SDBIP according to the IDP strategic objectives. The following table explains the method by which the overall assessment of actual performance against targets set for the key performance indicators (KPIs) of the SDBIP is measured:

Table 237: Performance Assessment Criteria

Colour	Category	Explanation
	KPI Not Yet Measured	KPIs with no targets or actual results for the selected period
	KPI Not Met	Actual vs. target less than 75%
	KPI Almost Met	Actual vs. target between 75% and 100%
	KPI Met	Actual vs. target 100% achieved
	KPI Well Met	Actual vs. target more than 100% and less than 150% achieved
	KPI Extremely Well Met	Actual vs. target of more than 150% achieved

The TL SDBIP (the Municipal Scorecard) consolidates service delivery targets set by the Council / Senior Management and provides an overall picture of performance for the municipality as a whole, reflecting performance on its strategic priorities.

3.30.8 Overall Performance per Municipal Strategic Focus Area

The following table illustrates the municipality's overall performance per Municipal Strategic Focus Area (SFA). The Annual Performance Report 2021/22 was submitted to the Stellenbosch Municipal Council as well the AGSA in terms of the MSA, Section 46(1) and (2).

The tables below give a clear indication of what was reported to the Council on the municipality's performance in terms of the five (5) National Government's Key Performance Areas for local government, which are (1) Basic Service Delivery; (2) Local Economic Development; (3) Municipal Institutional Transformation and Development; (4) Municipal Financial Viability and Management and (5) Good Governance and Public Participation.

Table 238: Performance summary per Municipal Strategic Focus Area (SFA)

Stellenbosch Municipality		Municipal Strategic Focus Areas (SFAs)				
		SFA 1 - Valley of Possibility	SFA 2 - Green and Sustainable Valley	SFA 3 - Safe Valley	SFA 4 - Dignified Living	SFA 5 - Good Governance and Compliance
KPI Not Yet Measured	-	-	-	-	-	-
KPI Not Met	3 (6.98%)	-	-	-	1 (8.33%)	2 (12.50%)
KPI Almost Met	6 (13.95%)	1 (16.67%)	2 (33.33%)	-	1 (8.33%)	2 (12.50%)
KPI Met	22 (51.16%)	3 (50%)	3 (50%)	3 (100%)	3 (25%)	10 (62.50%)
KPI Well Met	8 (18.60%)	1 (16.67%)	-	-	6 (50%)	1 (6.25%)
KPI Extremely Well Met	4 (9.30%)	1 (16.67%)	1 (16.67%)	-	1 (8.33%)	1 (6.25%)
Total:	43	6	6	3	12	16
	100%	13.95%	13.95%	6.98%	27.91%	37.21%

CHAPTER 4: ORGANISATIONAL DEVELOPMENT PERFORMANCE

4.1 Introduction to the Municipal Workforce

Stellenbosch Municipality, as of 30 June 2022, employed **1 142** officials (excl. Councillors and excluding non-permanent positions), who individually and collectively contribute to the achievement of the municipality's objectives. The primary objective of Human Resource Management is to render an innovative HR service that addresses both skills development and an administrative function.

4.2 Employment Equity

The Employment Equity Act (1998), Chapter 3, section 15 (1), states that affirmative action measures are measures designed to ensure that suitably qualified people from designated groups have equal employment opportunities and are equitably represented in all occupational categories and levels in the workforce of a designated employer. The national performance indicator also refers to the "number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan." The following table provides clarity on the employment equity status as at 30 September 2021.

Table 239: EE Targets / Actual by Racial Classification

Financial Year	African			Coloured			Indian			White		
	Target June	Actual June	Target reached	Target June	Actual June	Target reached	Target June	Actual June	Target reached	Target June	Actual June	Target reached

Grand total	273	471	3	59	188	264	1	40	1 299

4.5 Vacancy Rate

The approved organogram for the municipality had **1 120 (funded)** posts based on the 2017/18 financial year. On 01 July 2018, the approved organogram of 25th October 2017 was implemented which brought about a total post compliment of **1 873** posts and was further reviewed and revised with another **123** posts which made the total post compliment **1 996** posts on 27 February 2019. The actual positions filled in the 2021/22 financial year are indicated in the tables below by post level and by functional level.

A total of **96** posts were vacant and funded at the end of 2021/22, resulting in a vacancy rate of **8.42%**. Below is a table that indicates the vacancies within the municipality:

Table 243: Vacancy rate per post and functional level

Per Post Level		
Post Level	Filled	Vacant
Top Management (MM and MSA section 57 Managers)	5	1
Senior Management	10	7
Middle management	84	5
Skilled technical and academically qualified workers, junior management, supervisors, foremen and superintendents	364	25
Semi-skilled	399	34
Unskilled and defined decision making	274	24
Total	1 140	96
Per Functional Level		
Functional area	Filled	Vacant
Office of the Mayor	45	0
Office of the Municipal Manager	16	0
Financial Services	117	17
Planning and Economic Development	82	8
Corporate	75	8
Community and Protection Services	387	28
Infrastructure Services	463	35
Total	1 185	96

4.6 Turnover rate

A high turnover may be costly to a municipality and might negatively affect productivity, service delivery and institutional memory / organisational knowledge. Below is a table that shows the turnover rate in the municipality.

The table below indicates the turnover rate over the last four financial years.

Table 244: Turn-over Rate

Financial year	Total no appointments at the end of each Financial Year	New appointments	Number of terminations during the year	Turn-over Rate
2018/19	1 121	55	39	3.47%
2019/20	1 158	60	51	4.40%
2020/21	1 142	48	61	5.34%
2021/22	1 140	82	82	7.19%

4.7 Managing the Municipal Workforce

Managing the municipal workforce refers to analysing and coordinating employee behaviour.

An occupational injury is a personal injury, disease or death resulting from an occupational accident. Compensation claims for such occupational injuries are calculated according to the

seriousness of the injury / disease and can be costly to a municipality. An occupational injury will influence the loss of man-hours and therefore financial and productivity performance.

The injury rate shows a decrease from the previous financial year, 2020/21. The recorded IOD Claims submitted during the 2021/22 financial year were and it is less than the previous year. The table below indicates the total number of injuries within the different directorates.

Table 245: Injuries per Directorate

Directorates	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22
Office of the Municipal Manager	1	1	0	0	0	0
Financial Services	3	0	0	2	4	0
Planning and Economic Development Services	0	3	3	2	10	12
Corporate Services	1	1	1	7	9	5
Community and Protection Services	54	73	49	36	21	35
Infrastructure Services	64	42	32	42	77	57
Total	130	125	86	92	121	109

Injuries in operational services are normally higher due to the nature of work and the constant handling of equipment and machinery.

4.8 Sick Leave

The number of days of sick leave taken by employees has service delivery and cost implications. The monitoring of sick leave identifies certain patterns or trends. Once patterns of concern are identified, corrective actions are taken.

The total number of employees that have taken sick leave during the 2021/22 financial year shows a decrease of **3 657.14** working days when comparing it to the 2020/21 financial year.

The table below indicates the total number of sick leave days taken within the different directorates.

Table 246: Table 185: Sick Leave as at 30 June 2022

Directorate	2020/21	2020/21 (%)	2021/22	2021/22 (%)
Office of the Municipal Manager	150	35.16	129	30.23
Financial Services	1 351	41.52	812	26.25
Planning and Economic Development	671	31.06	436	20.19
Corporate Services	806.08	38.26	572.44	28.62
Community and Protection Services	3 598	33.40	2 386	23.12
Infrastructure Services	3 955	33.48	2 538.5	20.69
Total	10 531.08	34.49	6873.94	22.71

4.9 Human Resources Policies and Plans

Policies and plans guide fair and consistent staff treatment and a consistent approach to the management of staff.

The table below shows the status of the Human Resources policies and plans:

Table 247: Approved Policies for the year under review

Name of policy	Date approved / revised
Overtime and Standby Policy	22 June 2022
New Recruitment and Selection Policy	22 June 2022

Table 248: Policies still to be developed

Policies still to be developed	
Name of policy	Proposed date of approval
Employment Equity Policy.	In the 2022/23 financial year
HIV / AIDS Policy (review).	In the 2022/23 financial year
Work from Home Policy	In the 2022/23 financial year

The Department: Human Resources Management submits policies to the Local Labour Forum regularly for review purposes.

4.10 Capacity building of the Municipal Workforce

The Skills Development Act, 1998 (Act No. 97 of 1998) and the MSA require that employers supply employees with the necessary training to develop its human resource capacity. Section 55(1)(f) states that as head of administration, the Municipal Manager is responsible for the management, utilisation and training of staff.

4.11 Skills Matrix

The table below indicates the number of employees that received training in the year under review.

Table 249: Number of employees that received training

Management level	Gender	Number of employees identified for training at the start of the year	Number of employees that received training
MM and S57	Female	0	0
	Male	1	1
Legislators, senior officials and managers	Female	4	3
	Male	6	4
Professionals	Female	5	1
	Male	5	2
Associate professionals and Technicians	Female	18	17
	Male	59	34
Community and Personal Services	Female	0	0
	Male	0	0
Clerks	Female	45	20
	Male	12	08
Service and sales workers	Female	17	32
	Male	36	62
Plant and machine operators and assemblers	Female	0	0
	Male	20	13
Elementary occupations	Female	2	08
	Male	200	92
Sub-total	Female	111	81

Management level	Gender	Number of employees identified for training at the start of the year	Number of employees that received training
	Male	339	216
Total		450	297

4.12 Skills Development – Training Provided and Budget allocation

The Skills Development Act, 1998 (Act No. 97 of 1998) and the MSA, require that employers supply employees with the necessary training to develop its human resource capacity. Section 55(1)(f) states that as head of administration, the Municipal Manager is responsible for the management, utilisation and training of staff.

The table below indicates that a total amount of **R 3 267 622** was spent on the workplace skills plan. This represents **0.55%** when compared to the total salary budget of the municipality in the 2020/21 financial year.

Municipalities are required, in terms of the Skills Development Act, to spend at least 1% of its salary budget on its workplace skills plan.

Table 250: Budget allocated and spent for skills development

Year	Total personnel budget	Total Allocated	Total Spend	% Spent
	R	R	R	
2020/21	R 532 497 021	R 532 497 021	R 3 300 217	0.62%
2021/22	R 598 305 199	R 5 838 508	R 3 267 622	0.55%

4.13 Managing the Municipal Workforce Expenditure

4.13.1 Personnel Expenditure

The percentage of personnel expenditure is essential in the budgeting process as it reflects on current and future efficiency. The table below indicates the percentage of the municipal budget that was spent on salaries and allowances for the past five financial years and that the municipality is well below the national norm of between 35 to 40%.

Table 251: Personnel Expenditure as % of Total Operating Expenditure

Financial year	Total expenditure salary and allowances	Total operating expenditure	Percentage
	R		%
2017/18	407 801	1 307 335	31%
2018/19	444 711	1 508 629	29%
2019/20	481 583	1 661 441	29%
2020/21	544 391	1 809 977	30%
2021/22	550 719	1 925 898	29%

Below is a summary of Councillor and staff benefits for the year under review.

Table 252: Councillor and staff benefits

Financial year	2020/21	2021/22		2021/22

5.4 Operational Services Performance

The table below indicates the operational services performance for the 2021/22 financial year.

Table 257: Operational Services Performance: Expenditure

Description	2020/21	2021/22			2021/22 Variance	
	Actual	Original Budget	Adjustments Budget	Actual	Original Budget	Adjustment Budget
	R'000					%
Operating Cost						
Water	131 801	148 086	110 204	135 888	8.24	-23.31
Wastewater (Sanitation)	138 141	162 319	153 109	136 215	16.08	11.03
Electricity	522 700	604 990	617 762	627 110	-3.66	-1.51
Waste Management	118 389	145 504	136 780	131 189	9.84	4.09
Housing	33 977	39 351	30 915	23 144	41.19	25.14
Component A: sub-total	945 008	1 100 250	1 048 771	1 053 546	4.24	-0.46
Roads and Stormwater	114 333	108 034	113 183	108 786	-0.70	3.89
Component B: sub-total	114 333	108 034	113 183	108 786	-0.70	3.89
Town Planning and Spatial Planning	26 708	21 249	26 956	25 966	-22.20	3.67
Local Economic Development	10 175	15 189	12 757	14 518	4.42	-13.80
Component C: sub-total	36 883	36 438	39 713	40 484	-11.10	-1.94
Libraries	13 118	17 029	16 801	9 855	42.13	41.34
Cemeteries	6 254	5 908	6 428	4 779	19.11	25.65
Community development	11 238	9 748	12 914	12 930	-32.64	-0.13
Component D: sub-total	30 610	32 686	36 143	27 565	15.67	23.73
Environmental Protection	-	-	-	-	0	0
Component E: sub-total	0	0	0	0	0	0
Traffic services	233 793	197 967	208 895	218 992	-10.62	-4.83
Fire Services and Disaster Management	46 237	51 305	51 563	52 954	-3.21	-2.70
Component F: sub-total	280 030	249 272	260 457	271 946	-9.10	-4.41
Holiday Resorts and Campsites	434	534	560	539	-1.08	3.64
Sport grounds, parks, swimming pools	67 474	82 500	81 209	71 405	13.45	12.07
Community Halls, Facilities and Thusong Centres	3 579	1 164	4 970	4 753	-308.39	4.37
Component G: sub-total	71 487	84 198	86 739	76 697	8.91	11.58
Office of the MM	25 318	26 246	17 305	17 555	33.11	-1.45
Financial Services	110 661	223 156	239 309	93 037	58.31	61.12

Description	2020/21	2021/22			2021/22 Variance	
	Actual	Original Budget	Adjustments Budget	Actual	Original Budget	Adjustment Budget
	R'000					%
Administration	74 623	119 083	91 281	103 056	13,46	-12,90
Property and contract management	36 441	41 692	41 827	29 755	28.63	28.86
HR	18 7341	41 926	50 963	42 393	-1.11	16.82
IT	41 251	48 920	50 642	45 009	7.99	11.12
Internal Audit	11 389	13 425	11 805	9 335	30.47	20.92
Legal Services	13 210	13 511	8 660	6 735	50.15	22.23
Component H: sub-total	331 626	527 959	511 792	346 875	34.30	32.22
Total Expenditure	1 832 501	2 138 837	2 096 799	1 925 898	9.96	8.15

In this table, operational income is offset against operational expenditure leaving a net operational expenditure total for each service. Variances are calculated by dividing the difference between the actual and original / adjustments budget by the actual.

5.5 Financial Performance Per Municipal Function

The tables below indicate the financial performance per municipal function as at 30 June 2022.

5.5.1 Water Services

Table 258: Financial Performance: Water Services

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(155 113)	(172 558)	(173 377)	(159 914)	-7.77
Expenditure:					
Employees	30 923	36 924	33 744	35 941	-6.51
Repairs and Maintenance	6 226	7 015	4 815	2 842	40.98
Other	94 653	104 147	71 645	97 105	-35.54
Total Operational Expenditure	131 801	148 086	110 204	135 888	-23.31
Net Operational (Service)	(23 311)	(24 472)	(63 173)	(24 026)	61.97

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.2 Sanitation Services

Table 259: Financial Performance: Sanitation Services

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(126 641)	(150 230)	(142 206)	(142 904)	-0.49
Expenditure:					
Employees	44 390	51 571	44 112	39 179	11.18
Repairs and Maintenance	19 852	16 265	14 941	12 162	18.60
Other	73 899	94 483	94 056	84 874	9.76
Total Operational Expenditure	138 141	162 319	153 109	136 215	11.03
Net Operational (Service)	11 500	12 089	10 904	(6 689)	161.35
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.3 Electricity Services

Table 260: Financial Performance: Electricity Services

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(671 545)	(842 738)	(853 044)	(794 640)	6.85
Expenditure:					
Employees	31 428	19 980	30 267	30 486	-0.72
Repairs and Maintenance	9 969	11 156	9 001	5 552	38.32
Other	481 304	573 854	578 494	591 071	-2.17
Total Operational Expenditure	522 700	604 990	617 762	627 110	-1.51
Net Operational (Service)	(148 845)	(237 748)	(235 282)	(167 530)	28.80
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.4 Waste Management Services (Refuse collections, Waste disposal and Recycling)

Table 261: Financial Performance: Waste Management Services (Refuse Collections, Waste Disposal, and Recycling)

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(108 186)	(121 589)	(122 115)	(119 478)	2.16
Expenditure:					
Employees	31 138	43 679	31 729	26 551	16.32
Repairs and Maintenance	2 155	3 670	3 440	4 294	-24.82
Other	85 096	98 155	101 611	100 344	1.25
Total Operational Expenditure	118 389	145 504	136 780	131 189	4.09
Net Operational (Service)	10 204	23 916	14 665	11 711	20.15

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.5 Integrated Human Development

Table 262: Financial Performance: Integrated Human Settlement Personnel Expenditure

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(7 633)	(14 472)	(18 394)	(23 185)	-26.05
Expenditure:					
Employees	20 771	30 045	21 436	17 495	18.39
Repairs and Maintenance	700	1 161	1 261	916	27.31
Other	12 505	8 146	8 218	4 733	42.41
Total Operational Expenditure	33 977	39 351	30 915	23 144	25.14
Net Operational (Service)	26 344	24 879	12 521	-41	100.33

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.6 Roads and Stormwater

Table 263: Financial Performance: Roads and Stormwater

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(4 726)	(4 998)	(51 858)	(59 638)	-15
Expenditure:					
Employees	33 269	28 202	32 854	32 029	2.51
Repairs and Maintenance	19 794	22 096	21 609	18 875	12.65
Other	61 270	57 737	58 721	57 881	1.43
Total Operational Expenditure	114 333	108 034	113 183	108 786	3.89
Net Operational (Service)	109 607	103 036	61 325	49 148	19.86

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.7 Town and Spatial Planning

Table 264: Financial Performance: Town Planning and Spatial planning

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(35)	(29)	(29)	(23)	17.87
Expenditure:					
Employees	25 242	18 079	24 174	24 445	-1.12
Repairs and Maintenance	3	–	–	–	0
Other	1 463	3 170	2 782	1 521	45.32
Total Operational Expenditure	26 708	21 249	26 956	25 966	3.67
Net Operational (Service)	26 673	21 220	26 928	25 942	3.66

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.8 Local Economic Development (LED)

Table 265: Financial Performance: Local Economic Development (LED)

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(1 439)	(3 633)	(6 233)	(5 138)	17.56
Expenditure:					
Employees	3 980	7 088	4 592	6 963	-51.62
Repairs and Maintenance	-	-	100	63	36.85
Other	6 195	8 101	8 064	7 491	7.10
Total Operational Expenditure	10 175	15 189	12 757	14 518	-13.80
Net Operational (Service)	8 736	11 556	6 524	9 379	-43.77
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.9 Libraries

Table 266: Financial Performance: Libraries

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(10 761)	(11 434)	(16 989)	(9 969)	41.32
Expenditure:					
Employees	11 398	14 625	13 900	8 414	39.47
Repairs and Maintenance	23	181	881	151	82.92
Other	1 696	2 223	2 019	1 291	36.09

Net Operational (Service)	11 050	9 668	12 833	12 856	-1.18
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.11 Cemeteries

Table 268: Financial Performance: Cemeteries

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(1 016)	(3 542)	(1 342)	(1 205)	10.21
Expenditure:					
Employees	3 305	3 268	3 713	3 466	6.64
Repairs and Maintenance	2 000	1 815	1 418	333	76.54
Other	949	825	1 298	980	24.45
Total Operational Expenditure	6 254	5 908	6 428	4 779	25.65
Net Operational (Service)	5 238	2 366	5 086	3 574	29.72
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.12 Traffic Services and Law Enforcement

Table 269: Financial Performance: Traffic Services

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(128 709)	(171 602)	(149 743)	(150 633)	-0.59
Expenditure:					
Employees	69 553	64 222	71 969	65 680	8.74
Repairs and Maintenance	1 922	2 780	2 371	2 404	-1.38
Other	162 319	130 965	134 554	150 908	-12.15
Total Operational Expenditure	233 793	197 967	208 895	218 992	-4.83
Net Operational (Service)	105 084	26 365	59 151	68 359	-15.57

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.13 Fire Services and Disaster Management

Table 270: Financial Performance: Fire Services and Disaster Management Personnel Expenditure

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(756)	(1 164)	(1 164)	(761)	34.66
Expenditure:					
Employees	39 583	43 100	41 711	43 134	-3.41
Repairs and Maintenance	905	1 248	1 903	2 214	-16.33
Other	5 749	6 958	7 949	7 607	4.31
Total Operational Expenditure	46 237	51 305	51 563	52 954	-2.70
Net Operational (Service)	45 481	50 141	50 399	52 193	-3.56

Variances are calculated by dividing the difference between the actual and original budget by the actual.

5.5.14 Holiday Resorts and Campsites

Table 271: Financial Performance: Holiday Resorts and Campsites

Description	2020/21	2021/22			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget

5.6 Grants

5.6.1 Grant Performance

The municipality had a total amount of **R196 million** for operational expenditure available that was received in the form of grants from the National and Provincial Governments during the 2021/22 financial year. The performance in the spending of these grants is summarised as follows:

Table 282: Grant Performance

Description	2020/21	2021/22			2021/22 Variance	
	Actual	Budget	Adjustment Budget	Actual	Original Budget	Adjustment Budget
	R'000				%	
National Government:	178 568	168 531	168 531	168 531	0	100
Equitable Share	170 632	157 136	157 136	157 136	0	0

5.6.2 Level of Reliance on Grants and Subsidies

Table 283: Reliance on Grants

Financial year	Total grants and subsidies received	Total Operating Revenue	Percentage
	R'000		%
2016/17	227 752	1 534 354	14.84
2017/18	211 190	1 609 728	13.12
2018/19	233 433	1 541 685	15.14
2019/20	285 026	1 742 596	16.36
2020/21	264 637	1 805 680	14.66
2021/22	289 061	2 028 289	14.25

Developer's contributions have been excluded from the grant item to express only allocations and not policy-related revenue which NT allocates to capital revenue. It would distort the reliance on grant calculation if excluded from the above ratio.

5.7 Asset Management

Asset management is practised within the organisation based on a comprehensive Asset Management Policy. The Asset Management Policy provides direction for the management, accounting and control of property, plant and equipment (assets) owned or controlled by the municipality to ensure the following:

- ✦ Implementation of the approved Asset Management Policy as required in terms of section 63 of MFMA;
- ✦ Verify assets in possession of the Council annually, during the course of the financial year;
- ✦ Keep a complete and balanced record of all assets in possession of the Council;
- ✦ Report in writing all asset losses, where applicable, to the Council; and
- ✦ Those assets are valued and accounted for under a statement of GRAP.

5.13.4 Basic Services and infrastructure backlogs - Overview

Out of the various Master Plans revised, various infrastructure backlogs and upgrades were identified which will be required to meet current and future development needs. Budgetary provisions will be made accordingly.

The service level above the minimum standard can be interpreted as the backlogs to upgrade current households above minimum standard to households supplied with water inside the dwelling.

In terms of the definition of backlogs for the minimum standard water supply, Stellenbosch Municipality has zero (0) backlogs. Major backlogs exist in terms of dilapidated infrastructure and the bulk services to provide for future development and the current provision of water and sanitation.

CHAPTER 6: AUDITOR GENERAL OF SOUTH AFRICA AUDIT FINDINGS

2.1 Introduction

This chapter provides allowances details on the audit outcomes for the past two financial years with the corrective steps implemented.

COMPONENT A: AUDITOR-GENERAL OF SOUTH AFRICA OPINION 2020/21

2.2 Auditor General of South Africa Report 2020/21

Table 298: Auditor General of South Africa Report 2020/21

2020/21	
Audit Report Status:	Outstanding
2020/21	
Issue raised	Corrective step implemented
Emphasis of matter:	
Restatement of corresponding figures	
As disclosed in note 61 to the financial statements, the corresponding figures for 30 June 2020 were restated as a result of errors in the financial statements of the municipality at, and for the year ended, 30 June 2021.	None
Material Impairments	
As disclosed in note 5 to the financial statements, the municipality provided for the impairment of receivables from exchange transactions amounting to R167,1 million (2019-20: R151,4 million).	None
As disclosed in note 6 to the financial statements, the municipality provided for the impairment of receivables from non-exchange transactions amounting to R173,2 million (2019-20: R153,4 million).	None
Material losses	
None	
Material Non-Compliance	
The Auditor-General did not identify any material findings on compliance with the specific matters in key legislation set out in the general notice issued in terms of the PAA.	
Annual financial statements	
The Auditor General have audited the financial statements of the Stellenbosch Municipality set out on pages 5 to 134, which comprise the statement of financial position as at 30 June 2021, the statement of financial performance, statement of changes in net assets, cash flow statement and statement of comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.	None
In the opinion of the Auditor-General, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2020, and its financial performance and cash flows for the year then ended in accordance with the Standards of Generally	None

2020/21	
Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 16 of 2019 (Dora).	

COMPONENT B: AUDITOR-GENERAL OPINION 2021/22

At the time of compiling the Annual Report 2021/22, the audit for the 2021/22 financial year was not completed. The outcome of the audit will be reported after the conclusion of the audit by the AGSA.

2.3 Auditor General of South Africa Report 2021/22

Table 299: Auditor General of South Africa Report 2021/22

2021/22	
Audit Report Status:	Finalised (unqualified with no findings)
2021/22	
Issue raised	Corrective step implemented
Emphasis of matter:	
Restatement of corresponding figures	
As disclosed in note 63 to the financial statements, the corresponding figures for 30 June 2021 were restated as a result of errors in the financial statements of the municipality at, and for the year ended, 30 June 2022.	None
Material Impairments	
As disclosed in note 5 to the financial statements, the municipality provided for the impairment of receivables from exchange transactions of R204,3 million (2020-21: R167,1 million).	None
As disclosed in note 6 to the financial statements, the municipality provided for the impairment of receivables from non-exchange transactions of R187,6 million (2020-21: R173,2 million).	None
Material losses	
None	
Material Non-Compliance	
The Auditor-General did not identify any material findings on compliance with the specific matters in key legislation set out in the general notice issued in terms of the PAA.	
Annual financial statements	
I have audited the financial statements of the Stellenbosch Municipality set out on pages 7 to 131, which comprise the statement of financial position as at 30 June 2022, the statement of financial performance, statement of changes in net assets, cash flow statement and statement of comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.	None
In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2022 and its financial performance and cash flows for the year then ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 9 of 2021 (Dora).	None

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Officer's Responsibilities and Approval

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the Accounting Officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements were prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) as well as relevant interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I, as the Accounting Officer acknowledges that I am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable me to meet these responsibilities, I have set standards for internal control aimed at reducing the risk of error or deficit in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

Although, I am primarily responsible for the financial affairs of the municipality, this is supported by the municipality's external auditors.

I would like to bring the following material matters to your attention:

I certify that the salaries, allowances and benefits of councillors as disclosed in note 36 to these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act, Act 20 of 1998 and the Minister of Provincial and Local Government's determination in accordance with the Act.

The external auditors, being the Auditor-General of South Africa (AGSA), are responsible for independently reviewing and reporting on the municipality's annual financial statements.

The annual financial statements set out in terms of Section 126(1) of the Municipal Finance Management Act (Act 56 of 2003), which have been prepared on the going concern basis, I have signed on behalf of the municipality on 31 August 2022:

Accounting Officer
Geraldine Mettler

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

The annual financial statements of Stellenbosch Municipality for the year ended 30 June 2022 were authorised for issue by the Accounting Officer on 31 August 2022.

Basis of preparation

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

1. Summary of significant accounting policies

1.1 Going concern assumption

These annual financial statements were prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Housing development reserve

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.3 Capital replacement reserve (CRR)

In order to finance the acquisition of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of the Annual Budget. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

1.4 Self-insurance reserve

The municipality has a Self-insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self-insurance fund is invested in short-term investments. Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

1.5 Accumulated surplus

The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.

1.6 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.6 Materiality (continued)

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.7 Significant judgements and estimates

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are insignificant to the annual financial statements are set out below:

Sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Revenue recognition

Accounting Policy 1.23.1 on Revenue from Exchange Transactions and Accounting Policy 1.23.2 on Revenue from Non-exchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality

In concluding judgement, management considered the detailed criteria for recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate

The IGRAP 1 amendments did not have any impact on Traffic Fines revenue issued in terms of the current Criminal Proceedings Act system but will only have an effect on fines issued in terms of the Amended Act (AARTO) that is expected to become effective on 1 July 2021. As the legislation is new, the possible impact cannot at this stage be determined. The legislation itself will significantly increase Traffic Fines revenue based on higher fine amounts being pronounced in Schedule 3 of the Amendment Act.

The iGRAP 20 interpretation is not regarded as having an effect, as the principles of revising revenue (e.g., incorrect tariff or appeal) is already applied by the municipality.

Impairment of financial assets

Accounting Policy 1.13 Financial Instruments, referring to the paragraph on impairment of financial assets, describes the process followed to determine the value with which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments - Recognition and Measurement. The management of the municipality is satisfied that impairment of financial assets recorded during the year is appropriate. Details of the impairment loss calculation are provided in the applicable notes to the annual financial statements.

Useful lives of assets

As described in Accounting Policy 1.10 and 1.11 the municipality depreciates its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful life, which is determined when the assets are brought into use. The review of useful life and residual values of assets are only reviewed if one of the indicators of potential review is triggered.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.7 Significant judgements and estimates (continued)

Employee benefit obligation

The municipality obtains actuarial valuations of its employee benefit obligations. The employee benefit obligations of the municipality that were identified are post-retirement health benefit obligations and long-service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the applicable notes to the annual financial statements.

The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Impairment of non-financial assets

The recoverable amounts of cashgenerating units have been determined based on the higher of valueinuse calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The recoverable amounts of individual assets have been determined based on the higher of valueinuse calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

Value in use of cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including economic factors such as inflation and interest

Value in use of non-cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that the impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 22 - Provisions.

A qualified environmental engineer calculates the provision. The provision represents the best estimate or net present value of the expected future cash flows to rehabilitate the landfill site at yearend. The professional engineer determines the cost of rehabilitation and the remaining useful life of each site. Interest rates linked to prime were used to calculate the effect of the time value of money.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.7 Significant judgements and estimates (continued)

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Impairment of statutory receivables

If there is an indication that a statutory receivable, may be impaired, the municipality measures the impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, are reduced, either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows

Pre-paid electricity

Pre-paid electricity is only recognised as income once the electricity is consumed. The pre-paid electricity balance (included under payables) represents the best estimate of electricity sold at year-end, which is still unused.

1.8 Biological assets that form part of agricultural activity that form part of an agricultural activity

The municipality recognises biological assets that form part of an agricultural activity or agricultural produce when and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity or agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of a biological assets that form part of an agricultural activity, is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable, is used to determine fair value.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

The municipality classifies biological assets as consumables which consist of timber in the form of pine trees. All biological assets are held for sale.

Agricultural produce harvested from an entity's biological assets shall be measured at its fair value less costs to sell at the point of harvest. Such measurement is the cost at that date when applying GRAP 12 or another applicable Standard of GRAP.

Item	Useful life
Trees in plantation forest	indefinite

1.9 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or for
- Administrative purposes, or
- Sale in ordinary course of operations.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.9 Investment property (continued)

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that is associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Subsequent measurement – cost model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property-buildings	30-99 years
Property-Land	indefinite

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 10).

When classification is difficult, the criteria used to distinguish investment property from owner -occupied property and from property held for sale in the ordinary course of operations, are as follows:

All properties held to earn market-related rentals or for capital appreciation or both and that are not used for administrative purposes, and that will not be sold within the next 12 months are classified as Investment Properties

A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases

Transfers to, or from, investment property shall be made when, and only when, there is a change in use, evidenced by:

- (a) commencement of owner-occupation, for a transfer from investment property to owner-occupied property;
- (b) commencement of development with a view to sale, for a transfer from investment property to inventories;
- (c) end of owner-occupation, for a transfer from owner-occupied property to investment property; or
- (d) commencement of an operating lease (on a commercial basis) to another party, for a transfer from inventories to investment property.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.10 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period. The municipality elected the cost model for Property, plant and equipment.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if

- if it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and
- the cost or fair value of the item can be measured reliably.

Initial recognition and measurement

Property, plant and equipment are initially recognised at cost on its acquisition date. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised. Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Incomplete construction work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is available for use.

Impairment

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable service amount, it is written down immediately to its recoverable service amount and an impairment loss is charged to the statement of financial performance.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.10 Property, plant and equipment (continued)

Depreciation

Property, plant and equipment are depreciated on the straightline basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight-line	indefinite
Machinery and equipment	Straight-line	1-66
Furniture and office equipment	Straight-line	2-24
Transport assets	Straight-line	4-21
Computer equipment	Straight-line	5-23
Community assets	Straight-line	4-50
Other property, plant and equipment	Straight-line	6-99
Capital restoration asset	Straight-line	5-30
Electrical infrastructure	Straight-line	10-100
Water supply infrastructure	Straight-line	10-100
Solid waste infrastructure	Straight-line	10-50
Roads infrastructure	Straight-line	10-100
Information and communication infrastructure	Straight-line	3-15
Waste water network	Straight-line	10-100
Stormwater infrastructure	Straight-line	10-50

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 11).

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.11 Intangible assets

Initial recognition and measurement

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations. A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern. Such changes shall be accounted for as changes in accounting estimates in accordance with GRAP 3.

Subsequent measurement

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated goodwill, brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern. Such changes shall be accounted for as changes in accounting estimates in accordance with GRAP 3.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Internally generated: Capital development	Straight-line	5 - 7 years
Computer software	Straight-line	3 - 30 years
Service operating and land rights	Straight-line	5 - 30 years

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.11 Intangible assets (continued)

Derecognition

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset shall be included in surplus or deficit when the asset is derecognised.

1.12 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Initial recognition and measurement

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 14 Heritage assets.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Subsequent to initial measurement classes of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Reference to impairment paragraphs can be made to note 1.17, 1.18 and 1.19.

Compensation from third parties for heritage assets that have been impaired, lost or given up, shall be included in surplus or deficit when the compensation becomes receivable.

Dererecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.13 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity. Financial instruments are classified into three categories namely, financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost. The municipality determines the classification of its financial instruments at initial recognition.

1.13.1 Classification of financial instruments

Financial assets

A financial asset is any asset that is a cash or contractual right to receive cash. In accordance with GRAP 104 the Financial Assets of the municipality are classified as follows into the three categories allowed by this standard:

Financial asset at amortised cost being a non-derivative financial asset with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current assets.

Financial assets measured at fair value being financial assets that meet either of the following conditions:

- Derivatives;
- Combined instruments that are designated at fair value;
- Instruments held for trading;
- Non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; or
- Financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Financial assets measured at cost being investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

The municipality has the following types of financial assets as reflected on the face of the Statement of financial position or in the notes thereto:

Type of financial asset

Long-term receivables
Consumer debtors
Other debtors
Short-term investments
Bank balances and cash

Classification in terms of GRAP 104

Financial assets at amortised cost
Financial assets at amortised cost
Financial assets at amortised cost
Financial assets at amortised cost
Financial assets at amortised cost

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the Cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets at amortised cost.

Borrowings

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity.

The following main categories of borrowings and the classification determining how they are measured exist:

- Borrowings measured at amortised cost; or
- Borrowings measured at fair value.

The municipality has the following types of borrowings as reflected on the face of the Statement of financial position or in the notes thereto:

Type of financial liability

Long-term liabilities
Current portion of long-term liabilities
Payables from exchange transactions
Consumer Deposits

Classification in terms of GRAP 104

Financial liability at amortised cost
Financial liability at amortised cost
Financial liability at amortised cost
Financial liability at amortised cost

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.13 Financial instruments (continued)

1.13.2 Initial and subsequent measurement

Initial recognition and measurement

A financial instrument is recognised, when the municipality becomes a party to the contractual provisions of the instrument, and are initially measured at fair value. In the case of a financial instrument not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial instrument are added or deducted from the fair value, as appropriate on initial recognition.

Subsequent measurement – Financial assets

Financial assets consist of cash and cash equivalents, deposits, receivables and investments.

Receivables are subsequently measured at amortised cost using the effective interest rate method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate.

A provision for impairment of receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. Changes in the carrying amount of the provision is recognised in the Statement of financial performance. When a receivable is considered uncollectible, it is written off against the provision. Any gains or losses arising from the change in fair value of investments measured at fair value are recognised in the Statement of financial performance.

Trade and other receivables (excluding Value Added Taxation, prepayments and operating lease receivables), loans to municipal entities and loans that have fixed and determinable payments that are not quoted in an active market are classified as financial assets at amortised cost.

Financial assets measured at fair value are initially measured at fair value plus directly attributable transaction costs. They are subsequently measured at fair value with unrealised gains or losses recognised directly in equity until the investment is derecognised, at which time the cumulative gain or loss recorded in equity is recognised in the Statement of financial performance, or determined to be impaired, at which time the cumulative loss recorded in equity is recognised in the Statement of financial performance.

Subsequent measurement – Financial Liabilities

Financial liabilities consist of payables, interest bearing loans and bank overdrafts. These liabilities are subsequently measured at amortised cost, using the effective interest rate method. Finance costs are expensed in the Statement of financial performance in the period in which they are incurred except where stated otherwise (see accounting policy on borrowing costs).

Bank borrowings, consisting of interest-bearing short-term bank loans, repayable on demand and overdrafts are recorded at the proceeds received. Finance costs are accounted for using the accrual basis and are added to the carrying amount of the bank borrowing to the extent that they are not settled in the period that they arise.

Prepayments are carried at cost less any accumulated impairment losses.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.13 Financial instruments (continued)

1.13.3 Derecognition

Financial assets

The municipality derecognises financial assets only when the contractual rights to the cash flows from the asset expires or it transfers the financial assets and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of financial assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial assets, the municipality continues to recognise the financial assets and also recognises a collateralised borrowing for the proceeds received.

Borrowings

The municipality derecognises borrowings when, and only when, the municipality's obligations are discharged, cancelled or they expire.

An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as having extinguished the original financial liability, and a new financial liability recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a nonexchange transaction, are accounted for in accordance with GRAP 23.

1.13.4 Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instruments is not active, the municipality establishes fair value using a valuation technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs.

1.14 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately

Entity as lessee - operating leases

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight- line basis.

Any contingent rent is expensed in the period in which they are incurred.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.15 Inventory

Initial measurement:

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Inventories shall be recognised as an asset if, and only if:

- (a) it is probable that future economic benefits or service potential associated with the item will flow to the entity;
- (b) and the cost of the inventories can be measured reliably.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs. The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.16 Landfill site

Site restoration and dismantling cost - The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes:

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located;
- changes in the measurement of an existing decommissioning, restoration and similar liability that result from change in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in discount rate; and
- the obligation the municipality incurs for having used the items during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.17 Impairment of property, plant and equipment, investment property, intangible assets and heritage assets

The municipality classifies all assets held with the primary objective of generating a commercial return as cash-generating assets. A commercial return means that the return charged by the entity is commensurate with the risk associated with holding the asset and the asset is intended to generate positive cash inflows. All other assets are classified as non-cash-generating assets.

1.18 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity

Cash generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Management has judged all assets as non cash generating assets.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.18 Impairment of cash-generating assets (continued)

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.18 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

In assessing whether there is any indication that an asset may be impaired, the municipality will consider, as a minimum, the following indications:

External sources:

- (a) During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
- (b) Significant changes with an adverse effect on the entity have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which an asset is dedicated.
- (c) Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially

Internal sources:

- (d) Evidence is available of obsolescence or physical damage of an asset.
- (e) Significant changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite.
- (f) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (g) Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.19 Impairment of non-cash-generating assets

Non cash generating assets are assets other than cash generating assets

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information

- (a) Cessation, or near cessation, of the demand or need for services provided by the asset.
- (b) Significant long-term changes with an adverse effect on the entity have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the entity operates.

Internal sources of information

- (c) Evidence is available of obsolescence or physical damage of an asset.
- (d) Significant long-term changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date and reassessing the useful life of an asset as finite rather than indefinite.
- (e) A decision to halt the construction of the asset before it is complete or in a usable condition.
- (f) Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.19 Impairment of non-cash-generating assets (continued)

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.20 Employee benefits

Employee benefits are all forms of consideration given by a municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or

the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

a municipality's decision to terminate an employee's employment before the normal retirement date; or

an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Employee benefits (continued)

A constructive obligation is an obligation that derives from a municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

wages, salaries and social security contributions;

short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;

bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and

non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and

as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service.

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year-end is based on the bonus accrued at year-end for each employee.

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrues to Section 57 employees. Municipal entities' performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

Leave pay

Liabilities for annual leave are recognised as they accrue to employees. Liability is based on the total accrued leave days owing to employees and is reviewed annually.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans. In this aspect defined contribution plans can be considered as the pension fund.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Employee benefits (continued)

The entity determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the audited annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability)

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, a entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, a entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measure the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Employee benefits (continued)

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - Those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other long term employee benefit

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

Long term service awards is payable after 10 years of continuous service and after every 5 years thereafter to employees. Additional to this employees shall be entitled to a 14th cheque for continuous employment on their 30th and every 5th year onward. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover based on historical staff turnover. No other long service benefits are provided to employees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions are recognised in the Statement of financial performance in the period that it occurs. Interest cost on employee benefit obligation is recognised as part of employee related cost.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

the present value of the defined benefit obligation at the reporting date;

minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

current service cost;

interest cost;

the expected return on any plan assets and on any reimbursement right recognised as an asset;

actuarial gains and losses, which shall all be recognised immediately;

past service cost; and

the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

terminate the employment of an employee or group of employees before the normal retirement date; or

provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.20 Employee benefits (continued)

The municipality is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

the location, function, and approximate number of employees whose services are to be terminated;

the termination benefits for each job classification or function; and

the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than twelve months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

1.21 Provisions

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.21 Provisions (continued)

Environmental rehabilitation provisions

At year end a provision is raised for the rehabilitation of landfill sites. The provision is the net present value of the future cash flows to rehabilitate damaged land at year end.

As the related asset is measured using the cost model:

changes in the liability is added to, or deducted from, the cost of the related asset in the current period;

the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;

if the adjustments result in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may be fully recoverable. If there is such an indication, the municipality tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in the accounting policy on impairment of cash-generating assets and/or impairment of non-cash generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability are recognised in surplus or deficit as they occur.

1.22 Contingent assets and contingent liabilities

Contingent liabilities represent a possible obligation that arises from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability can also arise as a result of a present obligation that arises from past events but which is not recognised as a liability either because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets represent possible assets that arise from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the municipality.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.23 Revenue

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction

Recognition and measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

1.23.1 Revenue from exchange transactions

Service charges

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the billings done during July and August. The billing and invoiced amounts done in July are recognized in total as an accrual as all billing in July pertains to services rendered prior 30 June. An estimate is then made based on August billing pertaining to services rendered up until 30 June.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits or service potential associated with the transaction will flow to the entity
- (c) the stage of completion of the transaction at the reporting date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

interest is levied on outstanding debtors using the effective interest rate method.

Rentals on facilities and equipment are recognised on the straight-line basis over the term of the lease agreement

Pre-paid electricity

Revenue from the sale of electricity prepaid units is recognised when all the following conditions have been satisfied:

The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.

The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

The amount of revenue can be measured reliably.

It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.

The costs incurred or to be incurred in respect of the transaction can be measure reliably.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.23 Revenue (continued)

Interest earned and rentals received

Interest earned on investments is recognised in the statement of financial performance on the time proportionate basis that takes into account the effective yield on the investment.

Traffic charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

Income from agency services

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue recognition of unclaimed deposits

Unclaimed deposits older than three (3) years are recognised as revenue.

1.23.2 Revenue from non-exchange transactions

Rates and taxes

Other than services in-kind not recognised in terms of paragraph .99, an inflow of resources from a non-exchange transaction that meets the definition of an asset shall be recognised as an asset when, and only when:

- (a) it is probable that the future economic benefits or service potential associated with the asset will flow to the entity; and
- (b) the fair value of the asset can be measured reliably.

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources.

Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Rebates and discounts are offset against the revenue. As per iGRAP 1, there is no intention to collect this revenue

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.23 Revenue (continued)

Fines

Fines constitute both spot fines and camera fines. Fines are recognised when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. It is measured at the best estimate, based on past experience, of the amount of revenue the municipality is entitled to collect.

Subsequent to initial recognition and measurement, the municipality assess the collectability of the revenue and recognises a separate impairment loss where appropriate.

Donations and contributions

Donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Transfers and subsidies

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Unconditional grants

Equitable share allocations are recognised in revenue at the start of the financial year.

Conditional grants

Conditional grants recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Interest earned on grants received and invested is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of financial performance.

Interest earned on unspent grants and receipts

Interest earned on unspent grants and receipts is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of financial performance in accordance with GRAP 9.

Services received in-kind

Services in-kind that are significant to the municipality's operations and/or service delivery objectives are recognised as assets and the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.24 Statutory receivables

1.24.1 Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

In estimating the future cash flows, an entity considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, an entity discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

1.24.2 Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

1.24.3 Measurement

The municipality initially measures statutory receivables at their transaction amount.

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the accounting policy on Revenue from exchange transactions or the accounting policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled to levy additional charges in terms of legislation, supporting regulations, by-laws or similar means on overdue or unpaid amounts, these charges are accounted for in terms of the municipality's accounting policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (taxes and transfers).

1.24.4 Impairment

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.24 Statutory receivables (continued)

significant financial difficulty of the receivable, which may be evidenced by an application for debt counselling, business rescue or an equivalent.

it is probable that the receivable will enter sequestration, liquidation or other financial re-organisation.

a breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).

adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable, or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

1.24.5 Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers control of the statutory receivable and substantially all the risks and rewards of ownership of the asset to another entity; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
 - derecognise the receivable; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.25 Principal-agent arrangements

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.25 Impairment of cash-generating assets (continued)

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that it is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.26 Borrowing costs

Borrowing costs are interest and other expenses incurred by an municipality in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the Statement of financial performance in the period in which they are incurred.

1.27 Comparative of actual information to budgeted information

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 60 for detail.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.28 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.29 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the Statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the Statement of financial performance.

1.30 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.31 Related parties and related party transactions

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

An entity is related to the Municipality if any of the following conditions apply:

- the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others).
- one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member).
- both entities are joint ventures of the same third party.
- one entity is a joint venture of a third entity, and the other entity is an associate of the third entity.
- the entity is a post-employment benefit plan for the benefit of employees of either the Municipality or an entity related to the Municipality. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity.
- the entity is controlled or jointly controlled by a person identified in (a).
- a person identified in (a) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

A person is considered to be a close member of the family of another person if they:

- are married or live together in a relationship similar to a marriage or are separated by no more than two degrees of natural or legal consanguinity or affinity.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.31 Related parties and related party transactions (continued)

Management (formerly known as “Key Management”) includes all persons having the authority and responsibility for planning, directing and controlling the activities of the Municipality, including:

- all members of the governing body of the Municipality;
- a member of the governing body of an economic entity who has the authority and responsibility for planning, directing and controlling the activities of the Municipality;
- any key advisors of a member, or sub-committees, of the governing body who has the authority and responsibility for planning, directing and controlling the activities of the Municipality; and
- the senior management team of the Municipality, including the chief executive officer or permanent head of the Municipality, unless already included in (a).

Management personnel include:

- All directors or members of the governing body of the Municipality, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee. Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting Municipality being the Municipal Manager, Chief Financial Officer, and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Key management as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management are those persons responsible for planning, directing and controlling the activities of the municipality including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

1.32 Change in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

1.33 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.33 Commitments (continued)

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.34 Value Added Tax

The municipality accounts for Value Added Tax on the cash (receipt) basis.

1.35 Budget information

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2021/07/01 to 2022/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Material variances are determined in accordance with the municipalities materiality framework. These material differences will be explained in the financial statements under note for budget differences referenced to the statement of budget comparison.

1.36 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.37 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.38 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of subcontractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

1.39 Segment information

A segment is an activity of an entity:

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.39 Segment information (continued)

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Segmental information was based and identified on the MFMA S71 monthly budget statement/reports that are reviewed by senior management and council to make strategic decisions and in monitoring segment performance. The disclosure of information about segments in these reports is organised around the type of service delivered, in a standardised format, namely the C2 schedule.

The municipality manages its assets and liability as a whole and is not reviewed on a segregated basis for each town. Segment reporting per geographical area is not deemed relevant.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.40 Offsetting

Financial assets and liabilities are offset and the net amount reported on the Statement of financial position only when there is a legally enforceable right to set off the recognised amount, and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

1.41 Current year comparatives

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are also reclassified and restated, unless such comparative reclassification and / or restatement is not required by a Standard of GRAP. The nature and reason for such reclassifications and restatements are also disclosed.

Where material accounting errors, which relate to prior periods, have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

The presentation and classification of items in the current year is consistent with prior periods.

1.42 Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried at amortised cost. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are carried at amortised cost.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.42 Cash and cash equivalents (continued)

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts.

1.43 Housing arrangements

The Accounting Standards Board issued the guideline on Accounting for Arrangements Undertaken in terms of the National Housing Programme.

Where the municipality acts as a project manager in a housing arrangement, it is regarded as an agent in terms of the principles of GRAP 109 - Accounting by Principals and Agents.

Where the municipality is regarded as an agent, costs related to the construction of top structures and the related recovery thereof (revenue) is not be recognised in the Statement of financial performance of the municipality.

Where the municipality is identified as a project developer, the construction of the houses is performed by the municipality or by the appointment of a sub-contractor to undertake the construction on the municipality's behalf. The municipality applies the GRAP 11, Construction Contracts to account for these construction activities.

Where the municipality is regarded as the project developer and if the outcome of the construction contract can be estimated reliably, then contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed with reference to surveys of work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable. Contract revenue will be in the form of a grant from the Department of Human settlements and presented and disclosed under transfers and subsidies in the Statement of financial performance.

Contract costs are recognised as an expense in the period in which they are incurred. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Contract revenue shall comprise: (a) the initial amount of revenue agreed in the contract; and (b) variations in contract work, claims and incentive payments to the extent that: (i) it is probable that they will result in revenue; and (ii) they are capable of being reliably measured.

Contract costs shall comprise: (a) costs that relate directly to the specific contract; (b) costs that are attributable to contract activity in general and can be allocated to the contract on a systematic and rational basis; and (c) such other costs as are specifically chargeable to the customer under the terms of the contract.

An expected deficit on a construction contract to which paragraph .49 applies shall be recognised as an expense immediately in accordance with paragraph .49.

1.44 Grants-in-aid

The municipality transfers money to individuals, organizations and other sectors of government from time to time. When making these transfers, the municipality does not:

- Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or
- Expect a financial return, as would be expected from an investment.

These transfers are recognised in the annual financial statements as expenses in the period that the events giving rise to the transfer occurred.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Accounting Policies

1.45 Consumer deposits

The municipality recognises consumer deposits as a current liability when the municipality becomes a party to the contract i.e. when the deposit is made. The consumer deposit is recognised as a liability as the municipality has an obligation to pay the money back to the consumer once the consumer account is closed. As the timing of when a consumer will close their account is unknown, the consumer deposits are classified as a current liability.

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

Carrying amount is the amount at which an asset is recognised in the statement of financial position.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of this Standard) for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

1.46 Unspent conditional grants

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent where the obligations have not been met, a liability is recognised.

Property rental debtors		728,555	625,332
Total receivables from exchange transactions		169,893,585	153,119,572

The amount disclosed in this note is net of impairment. Refer to note 5.1 & 5.2 for the amount before the provision (gross) and the actual value of the provision.

5.1 Consumer receivables

The average credit period for consumer receivables is 30 days. No interest is charged on trade receivables for the first 30 days from the date of the invoice. Thereafter interest is charged at the prime rate per annum on the outstanding balance. The municipality strictly enforces its approved credit control policy to ensure the recovery of consumer receivables.

The management of the municipality is of the opinion that the carrying value of consumer receivables approximate their fair values.

The fair value of consumer receivables was determined after considering the standard terms and conditions of agreements entered into between the municipality and consumer receivables as well as the current payment ratio's of the municipality's consumer receivables.

The Council regards receivables from exchange transactions to be due for outstanding amounts more than 30 days to be past due.

The water and electricity accrual is in respect of consumption between the last meter reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers. The estimate of the consumption are being recorded as revenue without being invoiced.

Statutory receivables general information

Transaction(s) arising from statute

Property rates related transactions arise in terms of the Municipal Property Rates Act, 6 of 2004, Municipal Finance Management Act, 56 of 2003, as well as the Property Rates Policy of the municipality approved by Council as part of the Budget Process.

Traffic fines arise from the National Road Traffic Act 93 of 1996, National Road Traffic Regulations 2000, National Land Transport Act 5 of 2009 and Criminal Procedure Act 51 of 1971. Prosecutor performs prosecutorial functions in terms of a general delegation awarded by the National Prosecuting Authority and is subject to the control of the Control Prosecutor at the Magistrate's Court in Stellenbosch.

VAT transactions arise from the Value Added Tax Act 89 of 1991. VAT is an indirect tax on the consumption of goods and services in the economy. VAT is levied on all goods and services subject to certain exemptions, exceptions, deductions and adjustments provided for in the Value Added Tax Act 89 of 1991.

Determination of transaction amount

Property rates transaction amounts are determined in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003.

The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables.

VAT transactions amounts are determined in line with the Value Added Tax Act 89 of 1991. VAT increased from 14% to 15% from 1 April 2018.

Interest or other charges levied/charged

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
--	-----------	-----------

6. Receivables from non-exchange transactions (continued)

Interest or other charges levied on Property rates balances are in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003. "Interest" means a charge levied, on all arear accounts calculated at an interest rate which is one percent higher than the prime interest rate.

Traffic fines: Additional charges includes contempt of court fees / warrant of arrest fee determined in terms of the Criminal Procedure Act.

The rates and interest charges are determined by the Value Added Tax Act 89 of 1991.

Basis used to assess and test whether a statutory receivable is impaired

The basis used to assess Property Rates receivables is to look at the extent to which debtors on an individual basis defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

The basis used to assess Traffic fine receivables is to look at the extent to which debtors per group of fines (Municipal fines, Provincial fines) defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

No impairment on VAT Receivable, balance expected to be fully recoverable

Discount rate applied to the estimated future cash flows

Interest is calculated using the nominal interest rate as stipulated in the municipal by-laws (Prime plus 1%). This rate is also considered an appropriate discount rate.

Main events and circumstances that led to the recognition or reversal of impairment losses on statutory receivables

Significant impairment losses recognised or reversed

Property Rates: Impairment Recognised: The national lockdown and ongoing global pandemic relating to covid-19 resulted in many employers and employees not being able to generate sufficient income to pay their municipal accounts for April to June 2021.

Traffic Fines: Impairment Recognised: Annually the outstanding receivables are assessed in terms of the value of fines issued in comparison to the receipts generated from such fines. The remaining balance is considered recoverable based on this payment percentage.

7. Inventories

Consumables	799,798	576,732
Materials and supplies	2,918,628	27,059,728
Water	1,889,813	1,906,891
Housing stock	9,275,000	9,625,000
Land	14,146,828	14,146,828
Total Inventories	29,030,067	53,315,179

R 44,872,633 (2021: R 34,628,654) of total inventory was recognised as an expense in the current year.

The amount of write-down of inventories recognised as an expense and a reduction in inventory carrying value is R 115,859 (2021: R 18,583). The circumstances relating to the write down is as a result of stock adjustments and shortages on general stock items as reported and approved accordingly.

No inventories were pledged as securities.

2022 - Nature and quantities of each biological asset	Opening Balance	Decrease due to harvest	Fair value movement	Total
Botmanskop Plantation	293,463	-	-	293,463
Paradyskloof Plantation	4,849,313	-	-	4,849,313
	5,142,776	-	-	5,142,776

2021 - Nature and quantities of each biological asset	Opening Balance	Decrease due to harvest	Fair value movement	Total
Botmanskop plantation	293,463	-	-	293,463
Paradyskloof Plantation	4,849,313	-	-	4,849,313
	5,142,776	-	-	5,142,776

The determination of fair value was as follows:

Principle:

Price determination was done on the basis of current sale value of the tender for the current year i.e. R602.10/m³ excluding 15% VAT. This value was given to all trees as the estimated yield takes into consideration the age of the trees. The harvestable age starts from 20 years old where the minimum estimated yield would be 100m³/ha.

It must also be noted that this yield is based on optimum growing conditions and the existing microclimates, and thus the yield might vary per compartment. Refer to the Forestry Handbook p204 which can be obtained at the municipal offices.

Description of the Biological Assets

Botmanskop plantation (Block E)

Some compartments remain which can be harvested at a later stage due to the age of the trees.

Paradyskloof plantation (Block G)

Some compartments remain which can be harvested at a later stage due to the age of the trees.

Strategy to mitigate risks

The strategy to mitigate risks attached to this category of assets is to prevent the spread of runaway veld fires by maintaining fire breaks.

Pledged as security

There were no items of biological assets pledged as security in the current financial year.

Total employee benefits		264,851,580	256,915,347

17.1 Post employment health care benefits

The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service) is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. The municipality operates an unfunded defined benefit plan for these qualifying employees. The plan is treated as a defined benefit plan under GRAP 25. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2022 by C Weiss of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The members of the Post-employment Health Care Benefit Plan are made up as follows:

	Number	Number
In-service members (Employees)	673	679
Continuation members (Retirees)	472	171
In service employees (Non-members)	175	461
Total members	1,320	1,311

The liability in respect of past service has been estimated as follow:

In-service members (Employees)	69,788,001	67,805,000
In-service non-members (Employees)	8,309,000	7,922,000
Continuation members (Retirees)	111,061,000	109,993,000
Total liability	189,158,001	185,720,000
Non-current	179,494,000	177,057,000
Current	9,664,001	8,663,000
Total liability	189,158,001	185,720,000

The Future-service cost for the ensuing year is estimated to be R 5,820,000 whereas the Interest Cost is estimated to be R 21,656,000.

The principal assumptions used for the purposes of the actuarial valuations were as follow:

Rates of interest

Discount rate	11.74%	9.91 %
Health care cost inflation rate	8.37%	6.68%
Net effective discount rate	3.11%	3.03 %

Pre-retirement: The SA 85-90 ultimate table adjusted for female lives, was used.

Continuation of Membership

With the appointment of ARCH Actuarial Consulting for the year ending 30 June 2022.

17.2 Long-service awards benefits

Provision for long-service awards	17.2.1	29,040,163	26,870,278
Less: Transfer to current portion		(4,433,446)	(3,483,278)
Total non-current benefit		24,606,717	23,387,000
Non-current		24,606,717	23,387,000
Current		4,433,446	3,483,278
Total liability		29,040,163	26,870,278

Long-service awards

The municipality operates a funded defined benefit plan for all its employees. Under the plan, a Long Service Award is payable after 10 years of continuous service and every 5 years thereafter to employees. The provision is an estimate of the long-service based on historical staff turnover. No other long-service benefits are provided to employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2022 by Arch consulting. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

At year end 1145 (2021: 1140) employees were eligible for Long Services Awards.

The principal assumptions used for the purposes of the actuarial valuations were as follow:

Discount rate	11.12%	9.35 %
General Salary inflation	7.3%	5.81 %
Net effective discount rate	3.56%	3.35 %

GRAP 25 defines the determination of the Discount Rate Assumption to be used as follow:

The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve.

Leasing arrangements

The municipality as a lessee

Operating Leases relate to Property, Plant and Equipment with lease terms not longer than 5 years, with an option to extend for a further period. All operating lease contracts contain market review clauses in the event that the municipality exercises its option to renew. The municipality does not have an option to purchase the leased asset at the expiry of the lease period.

Amounts Payable under Operating Leases

At the reporting date, the municipality had outstanding commitments under non-cancellable Operating Leases for Property, Plant and Equipment, which fall due as follows:

18.2 Operating lease payable

Non-current		160,533,093	141,497,317
22.1 Landfill sites			
Opening Balance		141,497,318	121,305,978
Increases		9,130,963	10,790,126
Increases (Passage of Time/Discounted Rate)		9,904,812	9,401,213
Closing balance		160,533,093	141,497,317

Landfill site provision

The municipality has a present obligation to rehabilitate the landfill site which stems from licensing agreements 16/2/7/G203/D16/Z1/P331) issued in terms of the Environmental Conservation Act, 1989 (Act 73 of 1989)

In terms of the licensing of the landfill refuse sites, the municipality will incur licensing and rehabilitation costs of R160 533 093 (2021: 141 497 317) to restore the site at the end of its useful life.

The unwinding of the provision for landfill site for the current year was R9 904 8123 (2021: R9 401 213) was included in the finance cost in the statement of financial performance.

No expenditure was incurred for the year under review.

Cells 1 and 2 have reached full capacity and must be rehabilitated. The expected future cash outflows for cells 1 and 2 is July 2024 and June 2026. Cell 3 has come into use at the end of 30 June 2013 financial year and is the current landfill site in use. The expected future cash outflows is between July 2046 and July 2048 for cell 3.

The provision has been determined based on an independent valuation performed by a firm of consulting engineers as at 30 June 2022

Key cost parameters:

- Estimated post closure rehabilitation time 3 years
- Inflation rate 7.4% (2021: 5%)
- Discount rate 7.5% (2021: 7%)

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
23. Property rates		
Agricultural property	18,490,474	16,871,168
Business and commercial properties	166,626,428	174,169,626
Other categories	3,952,269	2,788,387
Public benefit organisations	24,424	22,289
Public service infrastructure properties	9,290,588	86,959
Residential properties	216,061,713	193,118,248
Total	414,445,896	387,056,677

Assessment Rates are levied on the value of land and improvements, which valuation is performed every four years. Interim valuations are processed on an annual basis to consider any changes in individual property values, due to amendments. The current Valuation Roll came into effect on 01 July 2021. With reference to Section 78 of the Local Government: Municipal Property Rates Act, No. 6,2004, four reviews have been finalised and two supplementary valuations have been performed during the financial year and implemented accordingly.

The following assessment rates were charged for the period ending June 2022:

Residential Property – R 0.004481

Business and Commercial Property – R 0.009410

Agricultural Property – R 0.001120

Public Service Purposes – R 0.009410

Public Service Infrastructure – R 0.001120

Public Benefit Organization – R 0.001120

Vacant Residential – R 0.008962

Vacant other – R 0.017924

Property Rates are levied monthly on property owners' accounts and are payable the 7th of each month. Property owners may request to pay their Rates annually, which amount will be levied in July and must be paid by the 7th of October annually. Interest on outstanding accounts for Property Rates is levied as per Council's Credit Control and Debt Collection Policy.

Relief Measures

The relief measures on property rates are generally described in paragraph 8 of the approved Property Rates Policy of the Municipality. This includes the specific under mentioned relief measures:

Rebate and gross monthly household income for Qualifying senior citizens and Disabled persons:

Gross monthly household income %

Up to R8 000 - 100%

From R8 001 to R 10 000 - 75%

From R10 001 to R12 000 - 50%

From R12 001 to R15 000 - 25%

Municipal valuation threshold value

On qualifying residential properties, property owners will receive a rebate up to a maximum value of R250 000, which amount includes a value of R15 000 as per Section 17(1)(h) of the Local Government: Municipal Property Rates Act, No. 6, 2004, and an additional value of R235 000 reduction granted as per paragraph 8.2.1(ii) of the approved Property Rates Policy.

Paragraph 8.2.1 (ii) is only applicable on properties with valuations up to R5 000 000

Stellenbosch Municipality

Total	113,472,212	112,848,487

The following principle agent arrangements were in place in relation to the expenditure as contained in note 44 to the annual financial statements:

Pay@ (Agent) provides the Municipality with payment service solutions on behalf of the Municipality. Pay@ pays over the monies generated from the payment services to the Municipality. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the fee to be paid to Pay@ (as stipulated in the relevant service schedule or based on Pay@'s standard prevailing rates), is recognized as an expense.

EasyPay (Agent) is a payment platform used to collect municipal service payments from third parties. These payments are accepted by EasyPay on behalf of the Municipality (Principal), from third parties. A service charge is levied by EasyPay for collection of the payments. This fee is recognised as commissions paid.

SPS (Agent) collects parking tariffs from motorists on behalf of the Municipality. SPS pays over the tariffs collected to the Municipality, minus the service charge levied. The municipality recognises 100% of the tariff as revenue from exchange transactions and the service charges incurred to SPS is recognized as an expense.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
44. Operational Cost (continued)		
<p>Syntell (Agent) sells and collects money from the sale of prepaid electricity on behalf of the Municipality. SPS pays over the monies collected to the Municipality, minus the collection fee levied, determined at a rate specific in the Service Level Agreement. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the collection fee paid to Syntell (which includes costs incurred on debit or credit card electricity sales and cash handling fees incurred), is recognized as an expense.</p> <p>TMT (Agent) manages the collection of traffic fines (both legacy fines issue before 1 July 2017 and fines issued after this date), on behalf of the Municipality. TMT pays over the monies collected to the Municipality. The municipality recognises 100% of the money's collected as revenue from non - exchange transactions and the fee incurred to TMT is recognized as an expense.</p> <p>These arrangements are subject to standard terms and conditions upon termination.</p> <p>None of the municipalities assets are under the custodianship of the agents.</p>

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
--	-----------	-----------

51. Risk management

Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amount disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2022	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Consumer deposits	22,160,472	-	-	-
Borrowings	51,902,261	50,857,888	165,591,871	210,383,932
Payables from exchange transactions	241,129,880	-	-	-
At 30 June 2021	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Consumer deposits	21,007,822	-	-	-
Borrowings	34,223,894	37,636,221	132,581,088	164,515,816
Payables from exchange transactions	267,972,840	-	-	-

Risk from biological assets

The municipality is exposed to financial risks arising from changes in wood prices. The municipality does not anticipate that wood prices will decline significantly in the foreseeable future. The municipality has not entered into derivative contracts to manage the risk of a decline in wood prices. The municipality reviews its outlook for wood prices regularly in considering the need for active financial risk management.

Interest rate risk management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well-established financial institutions of high credit standing. No investment with a tenure exceeding twelve months shall be made without consultation with the councillor responsible for financial matters.

In the case of receivables whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term receivables and other debtors are individually evaluated annually at the reporting date for impairment or discounting. A report on the various categories of receivables are drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality is not exposed to interest rate risk as the municipality borrows funds at fixed interest rates.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

Interest Rate Sensitivity Analysis

The municipality had no variable rate long-term financial instruments at year-end requiring an Interest Rate Sensitivity Analysis.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
51. Risk management (continued)		
Credit risk		
<p>Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses other publicly available financial information and its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.</p>		
<p>Potential concentrations of credit rate risk consist mainly of long-term receivables, consumer debtors, other debtors, bank and cash balances.</p>		
<p>The municipality limits its counterparty exposures from its investment operations (financial assets that are neither past due nor impaired) by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction / exposure limits, which are included in the municipality's Investment Policy. These limits are reviewed annually by the Chief Financial Officer and authorised by the Council.</p>		
<p>Receivables from exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from exchange transactions are presented net of the allowance for impairment.</p>		
<p>Receivables from non-exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from exchange transactions are presented net of the allowance for impairment.</p>		
<p>The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of receivables. Receivables are provided for based on estimated irrecoverable amounts, determined by reference to a non payment rate.</p>		
<p>In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.</p>		
<p>Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.</p>		
<p>Payment to accounts of consumer debtors who are unable to pay, are renegotiated as an ongoing customer relationship in response to an adverse change in the circumstances of the customer.</p>		
<p>The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.</p>		
<p>There is no collateral held for security in respect of consumer debtors.</p>		
<p>The impact of the Covid-19 pandemic was taken into account with the allowance for impairment calculation of consumer debtors.</p>		
<p>The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:</p>		
Cash and cash equivalents	137,877,710	111,649,771
Short term investments	305,522,446	222,433,620
Receivables from exchange transactions	169,893,585	153,119,571
Other receivables from exchange transactions	5,852,606	8,870,840
Receivables from non-exchange transactions	18,645,756	14,582,189
Long term receivable	8,683,792	7,880,673

Foreign currency risk management

--	-----------	-----------

51. Risk management (continued)

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

Other price risks

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

52. Commitments

Authorised capital expenditure

Already contracted for but not provided for

• Property, plant and equipment - Infrastructure assets	174,098,225	232,568,077
• Property, plant and equipment - other assets	17,449,135	24,592,349
	191,547,360	257,160,426

Total capital commitments

Already contracted for but not provided for	191,547,360	257,160,426
---	-------------	-------------

This committed expenditure relates to property, plant and equipment and will be financed by available bank facilities, retained surpluses, existing cash resources, funds internally generated.

The amounts as disclosed are VAT inclusive.

The comparative year contains an error in relation to the prior year audited financial statements. The effects of this is represented as follows:

Commitments

Amount previous reported - Property, plant and equipment (Infrastructure)	- 253,046,178
Correction made - Property, plant and equipment (Infrastructure)	- (20,478,101)
Amount previous reported - Property, plant and equipment (Other)	- 25,469,651
Correction made - Property, plant and equipment (Other)	- (877,302)
	- 257,160,426

53. Related party disclosures

Loans granted to related parties

In terms of the MFMA, the municipality may not grant loans to its councillors, management, staff and public with effect from 01 July 2004. Loans, together with conditions thereof granted prior to this date are disclosed in note 15 in the annual financial statements.

Remuneration of management

Compensation of key management and personnel is set out in notes 35 and 36 respectively in the annual financial statements.

All Councillors and Employees have disclosed their interest in related parties and no one has the ability to control or exercise significant influence over Council in making financial and operating decisions.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
55. Unauthorised, irregular, fruitless and wasteful expenditure		
55.1 Unauthorised expenditure		
The municipality incurred no unauthorised expenditure in both the current and previous financial year.		
55.2 Irregular expenditure		
Opening balance as previously reported	99,389,541	63,605,870
Add: Irregular expenditure - current	42,119,538	89,762,828
Add: Irregular expenditure – prior period	2,974,982	-
Less: Amounts written-off – current	(118,081,987)	(53,979,157)
Closing balance	26,402,074	99,389,541
Incidents/cases identified in the current year include those listed below:		
Irregular expenditure was identified as it breached the procurement process in terms of the Supply Chain Management Policy.	3,505,672	608,406
The Auditor-General, in its findings during the 2019/2020 financial year, identified that the Municipality awarded that does not comply with Preferential Procurement Regulations 2017.	41,588,848	72,799,452
The Auditor-General, in its findings during the 2017/2018 financial year, identified that the Municipality did not include a specific condition that local production and content is applicable when inviting bidders to tender (advertisement). Furthermore the Municipality also did not include the local production and content in the bid documents (MBD 6.2) and the suppliers declared accordingly. The Auditor-General concluded that the tender award does not comply with Preferential Procurement Regulations 2017.	-	13,118,325
Irregular expenditure identified related to the approval of tenders where the Bid Adjudication Committee was not constituted in terms Municipal Supply Chain Management Regulations by four senior managers. This award pertained to a multi year contract.	-	1,952,711
Irregular expenditure identified was due to the bid specifications that were drafted in a manner that is not fair, equitable, transparent and competitive as it was found that the specifications made reference to a specific brand/model. This is a multi-year contract and irregular expenditure will be disclosed on a yearly basis until contract ends.	-	1,283,934
Total	45,094,520	89,762,828
55.3 Fruitless and wasteful expenditure		
Opening balance as previously reported	-	-
Add: Fruitless and wasteful expenditure – current	2,568,654	-
Add: Fruitless and wasteful expenditure – prior period	1,698,299	-
Closing balance	4,266,953	-

The municipality incurred fruitless and wasteful expenditure in relation to information and communication technology procurement.

--	-----------	-----------

56. Additional disclosure in terms of Municipal Finance Management Act (continued)

Councillors' arrear consumer accounts

There were no councillor arrear accounts more than 90 days as at 30 June 2022.

Distribution Losses

In terms of section 125(2)(d)(i) of the Municipal Finance Management Act, the municipality experienced the following distribution losses for the year under review.

Electrical distribution losses (KW)

System Input	393,194,417	365,664,272
Sales	(355,429,150)	(333,260,467)
	37,765,267	32,403,805

Electricity losses are calculated as 9.6% (2021: 8.86%). Electricity losses are within the industry norm.

Water distribution losses (KL)

System Input	10,660,846	10,003,874
Sales	(8,669,713)	(8,188,560)
	1,991,133	1,815,314

Water losses are calculated as 18.7% (2021: 18.1%). Water losses are within the industry norm.

57. Retirement benefit information

The municipality makes provision for post-retirement benefits to eligible Councillors and employees who belong to different pension schemes. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councilors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions.

These schemes are subject to a tri-annual, bi-annual or annual actuarial valuation as set out hereunder.

SALA Pension fund

The SALA Pension Fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at 1 July 2018 stated that the net assets of the fund amounted to R14 298 600 (30 June 2015: R13 231 200), with funding levels of 96.0% (30 June 2015: 100%). The actuary recommended that employers continue to contribute at the current rate of 19.18% of pensionable salary.

It is the actuary's opinion that:

They are satisfied with the investment strategy of the Fund;

The nature of the assets is, in their opinion, suitable for the nature of the liabilities of the Fund as defined in the rules of the fund;

The matching of assets with the liabilities of the Fund is adequate; and

The insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
--	-----------	-----------

57. Retirement benefit information (continued)

LA retirement Fund (Previously Cape Joint Pension Fund)

The LA RETIREMENT FUND operates both as a defined benefit and defined contribution scheme.

Defined benefit scheme

The contribution rate of the defined benefit scheme is 27%; 9% by the members and 18% by their councils. The actuarial valuation report at 30 June 2021 disclosed an actuarial valuation amounting to R1 486 110 000 (30 June 2020: R1 420 856 000), with a net accumulated surplus of R44 335 000 (2020: R22 251 000), with a funding level of 104.9% (30 June 2020: 100%).

Defined contribution scheme

The actuarial valuation report at 30 June 2021 indicated that the defined contribution scheme of the fund is in a sound financial position, with net assets amounting to R2 082 488 000 (30 June 2020: R1 891 631 000), net investment reserve of Rnil (30 June 2020: Rnil) and with a funding level of 100% (2020: 100%).

Cape Joint Retirement Fund (CRF)

The most recent statutory valuation performed as at 30 June 2021 revealed that the assets of the fund amounted to R34 148 000 000 (30 June 2019: R26 128 000 000), with funding levels of 133% and 100.5% (30 June 2020: 132.2% and 100.5%) for the Pensions Account and the Share Account respectively. The contribution rate paid by the members (7.50%/9%) and the municipalities (19.50%/18%) is sufficient to fund the benefits accruing from the fund in the future. The actuary certified that the structure of the assets is appropriate relative to the nature of the liabilities, given normal circumstances and that the Fund is in a sound financial condition as at the valuation date.

Municipal Councillors Pension Fund

The Municipal Councillors Pension Fund operates as a defined contribution scheme. The statutory valuation performed as at 30 June 2018 stated that the net assets of the fund amounted to R1 798 030 000 (30 June 2017: R1 480 549 000), with funding levels of 103.26% (30 June 2017: 101.31%). The contribution rate paid by the members (13.75 %) and council (15 %) is sufficient to fund the benefits accruing from the fund in the future. The Actuary certified that the Fund was in a sound financial condition as at 30 June 2018, in that the assets of the fund were sufficient to cover the accrued service liabilities including the recommended Contingency Reserves in full.

The Municipal Workers Retirement Fund (Previously South African Municipal Workers Union National Provident Fund)

The Municipal Workers Retirement Fund is a defined contribution scheme. Members contribute at a rate of not less than 7.5% of salaries, as required by the Rules. The employers contribute at a total rate of not less than 18%. From 1 July 2017, members and employers that fall under other bargaining councils or forums are not bound by the above minimum contribution rates. The statutory valuation performed as at 30 June 2017 stated that the assets of the fund amounted to R7 720 948 000 (30 June 2014: R6 574 750 000), with funding levels of 102.0% (30 June 2014: 111.7%). As a percentage of members' Fund Credits, the investment smoothing reserve has decreased from 5.6% to 4.9% over the valuation period. As a percentage of the market value of assets, it has decreased marginally from 4.6% to 4.4%. The Fund's assets are sufficient to cover the members' Fund Credits, the targeted levels of the Risk Benefits Reserve and the data and processing error reserve, and an Investment Smoothing Reserve of 4.9% of members' Fund Credits as at 30 June 2017. In addition, there is brought-forward surplus of R152.8 million which has been allocated to former members and is awaiting payment. The Fund is therefore in a sound financial position.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022	2021
R	R

57. Retirement benefit information (continued)

National Fund for Municipal Workers

The fund operates as a defined contribution fund and in terms of the rules of the fund category A and category C members contribute at a rate as agreed upon by the Local Authority and the member, subject to an absolute minimum contribution of 2% and 5% of their remuneration respectively. Category C-Members, appointed after 1 July 2012, who are not part of the Schedule shall make monthly contributions to the Fund equal to 7.5% of their pensionable salary.

The most recent statutory valuation performed as at 30 June 2019 stated that the net assets of the fund amounted to R17 107 067 000 (30 June 2018: R15 393 671 000), with funding levels of 100.40% (30 June 2018: 100.46%). The actuary certified that the assets of the fund are sufficient to cover 100.40% of the members' liabilities, also that it can be expected that the funding level of a fund of this nature will fluctuate around 100%, for example due to timing differences in investment and receipt of monies, slight mismatching of assets and liabilities and processing errors.

The Local Authority must contribute in respect of category A and category C members such an amount as agreed between the Local Authority and the fund, subject to a minimum contribution rate of 2% and 5% of their remuneration respectively. Category B members are members who belong to both category A and C and the Local Authority must, on behalf of such members, not contribute less than 7% of their remuneration. The contribution rates stipulated above include the amount payable towards the insured risk benefits policy.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
--	-----------	-----------

58. Going concern

We draw attention to the fact that at 30 June 2022, the municipality had an accumulated surplus (deficit) of R 5,504,546,525.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The Covid 19 pandemic has affected various aspects of the municipality during the 2021/2022 financial year. However due to the fact that the municipality's cash forecast performed, budget process and other considerations the municipality is still of the opinion that the pandemic and the restrictions it has placed on certain operations will not affect the municipality's ability to operate as a going concern.

59. Deviations from SCM regulations - SCM Regulation 36

In terms of section 36 of the municipality SCM regulations, any deviations from SCM policy needs to be approved by the accounting officer and noted by Council. The awards listed below have been approved by the accounting officer and noted by Council.

All deviations considered by the accounting officer are processed in terms of the SCM regulations and the municipality's SCM

policy. This process entails being assessed by the SCM Bid Adjudication Committee in terms of the stipulated criteria for emergency procurements and circumstances where it is impractical or not possible to follow the official procedure.

Deviation from, and ratification of minor breaches of, the procurement processes

In terms of section 36(2) of the Supply Chain Management Policy approved by Council it is stipulated that bids where the formal procurement processes could not be followed, must be noted in the annual financial statements.

SGM paragraph

--	-----------	-----------

60. Budget information

The budget has been prepared on the accrual basis of accounting in accordance with the prescripts of the Municipal budget regulations as well as MFMA budget circulars. In accordance with the Municipal budget regulations, the classification basis the municipality presents its budget is per economic as well as per functional classification (per Vote (Department) and GFS classification). It should be noted that minor budget differences between the basis the budget is prepared (accrual basis and prescripts of NT guidance) and actual financial results (accrual basis in accordance with GRAP) exists, mainly related to technical GRAP adjustments required. These differences are not material and as the basis of preparation is the same (accrual basis) no restatements have been made to the financial information compared to the budgeted amounts, but where found to be material is explained below:

Explanation of variances between approved and final budget amounts

The materiality framework of the municipality informs the determining base ranges. The framework outlines all principles and guiding practices to allow management to enforce a consistent application of the framework's guidelines. With regard to reporting, the understandability and transparency to users of the financial statements was a determining factor when deciding on the base %.

60.1. Statement of financial position

Current assets

The determining base was 1% of total assets and 5% of accumulated surplus.

- **Cash and cash equivalents (BD6)**

Variance on Cash (Increased cash available) due to variance on Trade and Other Payables

- **Short Term Investments (BD7)**

Variance due to access cash being invested

Non-current assets

- **Property Plant and Equipment (BD8)**

The variance relates to underspending on the capital budget.

Non-current Liabilities

- **Provisions (BD11)**

Variance is attributed to the change in estimated Post Employment Medical Aid liability.

Current liabilities

- **Payables from exchange transactions (BD9)**

Variance is attributed to unspent conditional grants (under spending on Operational- and Capital Budget funded from Grants) and year-end accruals raised for Trade & other payables.

- **Provisions (BD10)**

Variance is attributed to the change in estimated Post Employment Medical Aid liability

Net assets

- **Accumulated surplus/Reserves (BD12)**

Variance is due to the budgeted opening balance for Accumulated surplus which is based on the previous audited Financial Statements, further variances are due to corrections of errors.

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

2022 R	2021 R
-----------	-----------

60. Budget information (continued)

60.2. Statement of financial performance

Revenue

The determining base range used was 1 % of total revenue.

- **Service charges - electricity (BD1)**

Electricity revenue realized was less than anticipated due to ESKOM Loadshedding and the after effects of the Covid-19 pandemic on the economy and households.

- **Other revenue (BD2)**

Actual Development Charges to the value of R30mil is reflected under "Other Revenue", however the budget is reflected under Transfers & Subsidies - Capital. Development charges received was more than anticipated during the budget process.

Revenue from non-exchange transactions

- **Transfers and subsidies - capital (monetary allocations) (National / Provincial and District) (BD5)**

Revenue Recognition of Grants was not done due to non-spending of Grants on Capital Expenditure Projects

Expenditure

The determining base range was 2% of total expenditure.

- **Bulk purchases (BD3)**

The variance between Bulk Purchases Electricity budget and actuals is due to a decrease in electricity consumption (See explanation provided for Service Charges - electricity variance). Bulk purchases water is budgeted under inventory consumed.

- **Contracted services (BD4)**

Savings realized on contracted services

Cash Flow statement

Suppliers and employees (CF1)

Bulk purchases which are bought by the municipality are based on the consumption of the community have decreased compared to the prior year.

Short term Investments (CF2)

Economic recovery has allowed the municipality to invest more funds.

Consumer deposits (CF3)

Covid-19 had a slow down in new developments.

Borrowings (CF4)

The external loan was taken up towards the end of the financial year.

61. Contingent liabilities (continued)		
Stellenbosch Municipality / Klampmuts mediation	250,000	250,000
<p>Stellenbosch Municipality is under obligation to provide emergency housing to evictees of various eviction orders in Klampmuts. The Klampmuts community has threatened violence against evictees and destruction of property should the municipality proceed to utilise Klampmuts housing facilities for evictees rather than for members of the Klampmuts community. Independent expert mediator appointed to facilitate mediation which is currently pending. The mediator had meetings with the community and a committee was elected to discuss the matter and proposals made. The chairperson of the Committee was not available for a period to attend meetings and new proposed dates were arranged by the mediator for such meetings. The community still refuse the Municipality to implement emergency housing. The mediation needs to be finalised to obtain the buy-in of the community to relocate evictees to Klampmuts.</p>		
Stellenbosch Municipality / NE Properties (Pty) LTD	200,000	200,000
<p>Application to declare the dissolution of NE Industries void in terms of section 83(4) of the Companies Act and to direct the Companies and Intellectual Property Commission of South Africa to restore NE Industries' name to the register of companies. NE Industries was deregistered and its name was removed from the register of companies on 16 July 2010 due to its failure to file its annual returns. NE Industries is the single largest debtor on the Municipality's debtor's book. The Municipality wants to collect the outstanding amount due to it but established that NE Industries was deregistered as a result of its failure to file its annual returns and its name was removed from the register of companies.</p>		
Stellenbosch Municipality / IMATU on behalf of employee	200,000	200,000
<p>Review application instituted against the arbitrator's award by Commissioner Der Vlieger-Seynhaeve including application for condonation and to oppose the application for contempt of court proceedings instituted by IMATU obo employee.</p>		
Stellenbosch Municipality / E Ross and others	-	200,000
<p>Stellenbosch Municipality have to institute eviction proceedings against Respondents of the property at 609 Lavanda Flats, Jan Cillier Street, Stellenbosch due to the Respondents actions. The eviction application is still pending.</p>		
Stellenbosch Municipality / L Bailey and another	-	200,000
<p>Stellenbosch Municipality is in the process instituting eviction proceedings against the Respondents of the property at 108 Aurora Flats, Jan Cilliers Street, Stellenbosch, due to the Respondents actions. The eviction application is still pending.</p>		
Stellenbosch Municipality / A de Ruiter	-	200,000
<p>Stellenbosch Municipality have to institute eviction proceedings against the Respondents of Erf 5281 Cloetessville, due to the Respondents actions.</p>

61. Contingent liabilities (continued)		
Fusion Properties 233 CC / The Municipality of Stellenbosch	33,465,000	33,465,000
<p>This matter involves a summons issued against the Municipality for alleged damages pursuant to the sale of certain immovable property belonging to the Municipality. The amount claimed is R32 115 000.00 together with interest calculated at the rate of 9% per annum from 28 July 2015. The Municipality is defending the action. Pleadings have now closed and the Plaintiff is in the process of applying for a court date.</p> <p>The application that the Plaintiff has to provide security for costs was granted and the interlocutory application to strike out certain allegations was also successful. The Plaintiff made application for leave to appeal against the judgment, which application was refused with costs. The Plaintiff has delivered a petition to the Supreme Court of Appeal ("SCA") in terms of which it is now seeking leave to appeal either to the SCA or the full bench of the Western Cape Division of the High Court.</p> <p>Should the litigation against the Municipality be successful, the estimate of financial exposure will be the R32 115 000.00 together with interest calculated at the rate of 9% per annum from 28 July 2015 including legal costs and disbursements of approximately R1 350 000.00.</p>		
Independent Schools Association of Southern Africa / Ethekewini Municipality / Stellenbosch Municipality & Others	250,000	250,000
<p>This matter involves an application on behalf of the Municipality to be joined as co-applicant together with eThekweni Municipality in an application for the review and setting aside of the Amended Municipal Property Rates Regulations promulgated on 12 March 2010. The Municipality has been joined successfully as co-applicant.</p> <p>This matter involves an application on behalf of the Municipality to be joined as co-applicant together with eThekweni Municipality in an application for the review and setting aside of the Amended Municipal Property Rates Regulations promulgated on 12 March 2010. The Municipality has been joined successfully as co-applicant.</p>		
Stellenbosch Municipality / LJ Turnkey Investments (Pty) Ltd	250,000	250,000
<p>The owner of Portion 9 of Farm 100 Stellenbosch ("the Property") applied for a declaratory order that the zoning of the Property is general residential and allows them to utilise the Property for student accommodation. The Municipality opposed the declaratory order and filed its answering affidavit.</p> <p>The Municipality is in the process of instituting a counter-application for, amongst others, a declaratory order regarding the zoning of the Property and interdictory relief regarding the utilisation of the Property for student and/or any other rental accommodation in contravention of the Municipality's Zoning Scheme By-law. This matter does not involve any amounts claimed</p>		
Stellenbosch Municipality / Former Employee	200,000	200,000
<p>Review Application instituted in the Labour Court against the disciplinary sanction of the chairperson in the disciplinary hearing of Leon Lourens. Leon Lourens was found guilty on three charges, which involves dishonesty but was not dismissed by the chairperson. The Municipality has served and filed its founding affidavit to have the ruling of the chairperson set aside and replace for a dismissal. The Municipality is in the process of transcribing the recordings of the hearing whereafter Leon Lourens will provide its answering affidavit in the matter.</p>		

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

	2022 R	2021 R
61. Contingent liabilities (continued)		
WS SMIT N.O & OTHERS /STELLENBOSCH MUNICIPALITY	200,000	200,000
Community members illegally occupied Portion 5 of Farm 183 Stellenbosch also known as Watergang. An eviction application was subsequently instituted and Acting Judge Martin granted an eviction order against the illegal occupiers. The illegal occupiers filed an appeal against the eviction order granted by Acting Judge Martin which appeal is still pending. The appeal, or any proceedings before the Supreme Court or Higher Court should leave to appeal be granted and any other actions flowing from the Interdict need to be oppose.		
STELLENBOSCH MUNICIPALITY / OSCAN INVESTMENTS ENTERPRISE (PTY)LTD	485,200	485,200
Property owner of Erf 1727 Stellenbosch erected a fence which encroach on municipal public open space. The Municipality needs to apply for a demolition order if the owner refuse/fail to remove the illegal wooden fence. Notice was served on the property owner to address the issues highlighted in the letter of refusal of the building plan and to resubmit the building plan together with the requested information and documents required alternatively to have the illegal fence removed. Should the property owner not comply with the notice served, the Municipality will proceed with the demolition application of the illegal fence.		
FORMER EMPLOYEE / STELLENBOSCH MUNICIPALITY	200,000	200,000
Application instituted by Elizabeth Rhoda against Stellenbosch Municipality to have her reinstated retrospectively with accumulated benefits and salary or adjustments and that the Municipality pay compensation to her in the amount of 12 months' salary including the cost of suit as well as a condonation application for the late submission of her application. The application was opposed by the Municipality and the Municipality is in the process to serve and file its Statement of Defence		
STELLENBOSCH MUNICIPALITY/ THATO RUBUSHA	300,000	300,000
Review application instituted by Stellenbosch Municipality setting aside the Arbitration Award made under WCP121702 under the South African Local Government Bargaining Council to pay her compensation for additional work done.		
STELLENBOSCH MUNICIPALITY / THE CHILDREN MR BESS AND ILLEGALOCCUPIERS	100,000	100,000
Eviction application against the children of Mr Johnny Bess, who was employed by Stellenbosch Municipality and retired from the employ of the Municipality on or about 31 July 2006. Mr Bess passed on and his children continued to occupy the house. There are various complaints from community members that the children who are currently occupying the house are involved in alleged drug dealing and anti-social behaviour. The house is vandalised and not maintained. The surrounding homeowners handed in a petition demanding that the children be evicted from the house due to an increase in illegal activities from the house, which is making living with them unbearable.		
STELLENBOSCH MUNICIPALITY / ILLEGAL OCCUPIERS OF ERF 290 RAITHBY ALSO KNOWN AS PORTION C (TRANSPORT ZONE II – PUBLIC ROAD)	100,000	-
Erf 150 Raithby was subdivided in terms of section 25 of the Land Use Planning Ordinance, 15 of 1985 ("LUPO") into three portions namely, Portion A, Portion B, Portion C and Remainder Portion. Portion C will be utilized for road purposes. Erf 150 Raithby was divided into Erf 288 Raithby, Erf 289 Raithby, Remainder Erf 150 Raithby and Erf 290 Raithby the zoning which is Transport Zone II for a public road. The Municipality is in the process of instituting eviction and demolition proceedings against the illegal occupiers.

STELLENBOSCH MUNICIPALITY / ISAYA NKUKUMANA	200,000	400,000
Opinion and Review application against decision of the Chairperson in the disciplinary hearing of Isaya Nkunkumana to have the ruling on the sanction issued against Isaya Nkunkumana reviewed and set aside. Review application with condonation application was finalised and served on the respective parties.		
SURREY HOLMES (PTY) LTD / STELLENBOSCH MUNICIPALITY	600,000	400,000
Surrey Holmes instituted a review application against Stellenbosch Municipality for its alleged failure to make a decision in terms of section 6(2) (g) of the Promotion of Administrative Justice Act 3 of 2000 (PAJA) and directing the Municipality to perform its duties and exercise its powers by; accepting and considering the amended ceiling height of the Attic Room. The review application was opposed by the Municipality. The Municipality is in the process to provide the Rule 53 records.		
STELLENBOSCH MUNICIPALITY / LEELYN MANAGEMENT CC	200,000	400,000
Opinion and institution of Monetary claim against Leelyn Management CC for alleged parking revenue collected on behalf of the Municipality which was not paid over by Leelyn Management CC to the Municipality.		
STELLENBOSCH MUNICIPALITY / CHOISY –LE-ROI OWNERS (PTY) LTD	200,000	200,000
Review application instituted by the owner of Erf 13500 Technopark, Stellenbosch against the appeal judgment of the Executive Mayor. The Municipality served and filed notice of opposition against the application. Rule 53 record was subsequently filed at court. Choisy-le-Roi supplemented their application and the Municipality served and filed its answering affidavit. A court date needs to be obtained to argue the matter.		
DEON GARDEN & CONSTRUCTION CC / STELLENBOSCH MUNICIPALITY	200,000	200,000
Monetary claim in the amount of R4 374 192.67 including interest at a rate of 7.75% per annum for alleged damages suffered by Deon Garden & Construction CC. The Municipality defended the claim instituted and is in the process of finalising its plea in the matter.		
SECURITEM (PTY) LTD/ STELLENBOSCH MUNICIPALITY	200,000	200,000
Securitem instituted legal action against the Municipality to pay VAT on top of their tender price. The Municipality is of the view that VAT was included in the tender price submitted by SECURITEM and opposed the application.		
STELLENBOSCH MUN / MOFFAT & OTHERS	100,000	100,000
Eviction application against the Moffat family who illegally occupy the Eikestad Hall. The Municipality provided temporary accommodation to the Moffat family pursuant to the Moffat family wendy house being destroyed by a fire. The intension was that the Moffat family should occupy the Eikestad Hall temporarily and to relocate to Mountain View. The Municipality provided emergency accommodation at Mountain View, Jamestown, but the Moffat family refused to relocate. The Moffat's was given notice to vacate the Eikestad Hall and eviction proceedings is being instituted. The draft affidavit to institute eviction proceedings is being circulated for comment.

	2022 R	2021 R
61. Contingent liabilities (continued)		
SHAHIEDA JACOBS / STELLENBOSCH MUNICIPALITY	200,000	200,000
Shahieda Jacobs instituted legal proceedings against Stellenbosch Municipality and a municipal official for alleged sexual harassment and unfair discrimination in the Labour Court. The Municipality filed its Statement of Response to the Plaintiff's Statement of Claim. The Special Plea on Shahieda's new Statement of Claim will be determined on 29 July 2020 on the papers before the Judge.		
THAPELO MBASA SMITH AND OTHERS/ STELLENBOSCH MUNICIPALITY	200,000	200,000
Thapelo Mbasa Smith & Others applied for an interim interdict against Stellenbosch Municipality & Others pending the determination of the final relief sought in Part B of the Notice of Motion. The Municipality did not oppose the interim interdict but opposed the Review application instituted by Thapelo Mbasa Smith & Others against the Municipality declaring inter alia the Municipality's decision taken on 13 November 2020, to acquire, or accept the donation of, the Property from the Trust, to be unlawful and invalid. The Municipality subsequently filed its answering affidavit in the matter.		
Van der Westhuizen K/Stellenbosch Municipality	50,000	50,000
Kyla van der Westhuizen issued summons against the Municipality for damages to her vehicle, VW Polo Cross 2015 model for allegedly colliding with a pothole. The Municipality defended the matter and filed its plea in the matter. Discovery affidavit was served and filed and a court date needs to be obtained to argue the matter.		
Mhlenze, N R / Stellenbosch Municipality	325,469	325,469
Nomzi Renee Mlenze (Mlenze) is applying to the Labour Court for condonation of the non-compliance with the time periods envisaged by the Labour Court in terms of the applicable Rules. Mlenze is employed at Stellenbosch Municipality as Senior Clerk: Accounts in the Finance Department. She earns a salary of R8033.00 per month. In 2013 she raised a number of grievances relating to the fact that she was not being remunerated the same as other Senior Clerks who were performing same task as her. Despite the fact that her Head of the Department agreed that her post will be evaluated on a urgent basis her job was not evaluated. She submitted an appeal on 22 April 2016, which was submitted to the Municipal Manager. She subsequently referred the matter to the Labour Court for adjudication. Mlenze did not file the court papers within the 90-day period allowed, is out of time, and applied for condonation to the Labour Court to grant her permission to proceed with the matter. The application for condonation need to be opposed. The Municipality filed its exception to Mlenze's Statement of Claim and will file a condonation application for the late filing of the Municipality's opposition against the application instituted by Mlenze.		
SIPHO DYIDI / STELLENBOSCH MUNICIPALITY	200,000	-
Sipho Dyidi is employed as Superintendent: Collections in the Department: Infrastructure Services who instituted legal proceedings against Stellenbosch Municipality in the Labour Court for overtime work in the amount of 111 hours, but the Municipality allegedly did not log or capture his overtime.		
OCTOFIN COMMERCIAL (PTY) LTD / TURN AROUND INVESTMENTS 22 (PTY) LTD AND STELLENBOSCH MUNICIPALITY	200,000	-
Octofin Commercial (Pty) Ltd instituted legal action against Turn Around Investments 22 (Pty) Ltd and Stellenbosch Municipality and applied for an order reviewing and setting aside the decision of the Municipality taken on 9 June 2020 to grant a permanent departure of the building line applicable to Turn Around Investment property, i.e Erf 15713 Stellenbosch.

LABOUR COURT REVIEW - MATUSA OBO REVONAH ANTHONY ("ANTHONY") /STELLENBOSCH MUNICIPALITY- STE10/031	150,000	150,000
MATUSA obo Revona Anthony obtained an arbitration award against Stellenbosch Municipality in terms of which she was reinstated and certified the arbitration award in terms of section 143(3) of the LRA. They instructed the sheriff to attached the movable properties of the Municipality to be sold in execution. The Municipality instituted review proceedings against the arbitration award and stay the execution of the arbitration award.		
RICMAL GREEN (PTY) LTD & ANOTHER / THE UNLAWFUL OCCUPIERS &OTHERS	200,000	200,000
Ricmal Green (Pty) Ltd applied for an interdict that the National Minister of Agriculture, Deputy Minister of Agriculture and the National Government be interdicted and restrained from placing any third parties in occupation of the Property or in any way encouraging, promoting, supporting and or allowing any persons to come onto the farm to occupy the Property. That the persons attempting to occupy the Property be interdicted and restrained from entering onto or remaining on the Property and erecting or attempting to erect any form of structure, be it temporary, permanent or semi-permanent of nature on the Property. Ricmal Green (Pty) Ltd also applied for an urgent eviction application in terms of rule 6(12) against all unlawful occupiers of the Property listed in Annexure A to be ordered to vacate the Property and should they fail/refuse that the Sheriff be ordered to evict them from the Property. Stellenbosch Municipality is sited as Seventh Respondent to the matter. No relief is sought against the Municipality unless the Municipality oppose the application. The Municipality was joined as the Property is situated within its jurisdiction and its statutory and/or constitutional obligations as regards the occupiers. The Municipality is supporting the application of the Applicants and filed an explanatory affidavit.		
ANGELA ADELINE MOGOLEGENG / STELLENBOSCH MUNICIPALITY	100,000	100,000
Angela Adeline Mogolegeng applied for Default Judgment against Stellenbosch Municipality for alleged unfair labour practice in relation to failure to promote and/or demotion and alleged that she is being unfairly discriminated against		
SPS / STELLENBOSCH MUNICIPALITY	100,000	100,000
MZ Loghdey t/a Street Parking Solutions submitted a tender, which was awarded to him. The tender was implemented on or about 1 April 2019. A dispute arose between the parties around various issues in terms of the tender. Clause 27.1 of the GCC provides that if any dispute or difference of any kind whatsoever arises between the purchaser and the supplier in connection with or arising out of the contract, the parties shall make every effort to resolve amicably such dispute or difference by mutual consultation. Clause 27.2 provides further if, after thirty (30) days, the parties have failed to resolve their dispute or difference by such mutual consultation, then either the purchaser or the supplier may give notice to the other party of his intention to commence with mediation. No mediation in respect of this matter may be commenced unless such notice is given to the other party. Clause 27.3 provides that should it not be possible to settle a dispute by means of mediation, it may be settled in a South African court of law. Notwithstanding the above clause 27.4 provides that notwithstanding any reference to mediation and/or court proceedings herein the parties shall continue to perform their respective obligations under the contract unless they otherwise agree and the purchaser shall pay the supplier any monies due for goods delivered and/or services rendered according to the prescripts of the contract. Both SPS and the Municipality alleged that certain conditions of the tender/contract was breached and that mediation is required to solve the dispute. A mediator was appointed and a date for the mediation need to be set to argue the matter.

61. Contingent liabilities (continued)		
STELLENBOSCH MUNICIPALITY LANDFILL SITE	-	-

The municipality has a present obligation to rehabilitate the landfill site which stems from licensing agreements 16/2/7/G203/D16/Z1/P331) issued in terms of the Environmental Conservation Act, 1989 (Act 73 of 1989), E13/2/10/7-B4/37-WL0077/11 issued in terms of the National Environmental Management: Waste Act, 2008 (Act no. 59 of 2008) (NEMWA) and license number 19/2/5/1/B4/46/WL0118/14 issued in terms of NEMWA. The obligation is immediately enforceable upon closure of the landfill site. As part of these licensing obligations, the municipality is responsible for post-closure obligations namely, ground water monitoring, decommissioning, monitoring committee and gas monitoring. The duration of the time for the cost to be incurred is contingent on the decision making of the regional director as stipulated in the licence conditions. At 30 June 2021, a decision has not been made by the regional director on the post-closure obligations for the municipality as per the licence agreements, as a result thereof, a reliable estimate of the costs to be incurred cannot be reliably estimated due to the uncertainty of the key events contained within the licencing conditions. .

General information

Identification of segments

The municipality is organised and reports to management on the basis of four major functional areas. These four functional segments are governance and administration, community and public safety, economic and environmental services as well as trading services. The segments were organised around the type of service delivered and the target market.

Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

Reportable segments are identified based on activities performed of the municipality that generates economic benefits or service potential including internal services that contribute to achieving the municipality's objectives without necessarily generating net cash inflows.

Management has only identified segment information for which data is reported on and reviewed during the decision making process of the municipality. Aspects relating to GRAP 18 paragraph 21 (a) - (j) which does not form part of the review process of the management reports will not form part of the segment information.

Segmental reporting was based and identified on the MFMA S71 monthly budget statements/reports that are reviewed by senior management and council to make strategic decisions and in monitoring segment performance. The disclosure of information about segments in these reports are organised around the type of service delivered, in a standardised format namely the C2 schedule. This is considered appropriate for external reporting purposes to achieve the objectives of GRAP 18.

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services
Community and public safety	Primary services providing community safety, crime prevention and law enforcement.
Governance and administration	Primary services in relation to financial management, financial and governance decision making.
Economic and environmental services	Urban and developmental planning in accordance with the relevant laws and regulations. Environmental planning and protection for long term sustainability.
Trading services	Primary basic service provision including water, electricity, sanitation and refuse.

Measurement of segment surplus or deficit, assets and liabilities

Basis of accounting for transactions between reportable segments

The accounting policies of the segments are the same as those described in the summary of significant accounting policies..

Information about geographical areas

All the municipality's operations are located in the Republic of South Africa in the Cape Winelands area. Information to report on different geographical areas is not available would be expensive and impractical to develop.:

63. Prior period error and reclassification

The municipality has changed its template in preparing the annual financial statements this financial year in accordance with the precripts issued by national treasury. In doing so multiple naming conventions has changed and consequently reclassifications have been passed in terms of GRAP 1 para 49. No other reclassifications took place in the current financial year.

The Municipal Regulations on Standard Chart of Accounts (mSCOA) came into effect on 1 July 2017. The municipality has been in compliance with the mSCOA ever since adoption but this year it also adopted voluntarily the NT mSCOA AFS Template, which aligns the item segment as per mSCOA to the AFS of a municipality. This did not result in the municipality changing any accounting policies, accounting estimates or the correction of prior period errors but did give rise to a process of reclassification and re-naming of items in the financial statements in terms of mSCOA item classification, as per the NT mSCOA Template. The reclassification of 2021 audited amounts is summaries in the reclassification column below.

The following restatements and adjustments occurred which are set out below:

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

63. Prior period error and reclassification (continued)

63.3 Correction of errors

The following prior period errors adjustments occurred:

Cash and cash equivalents

An item relating to short term investments was incorrectly mapped to cash and cash equivalents. Cash and cash equivalents is consequently restated with the same amount.

Cash and cash equivalents

Amount previously reported	- 111,896,629
Correction of error	- (246,858)
	- 111,649,771

Other receivables from exchange transactions

An item relating to deposits paid in advance to eskom was incorrectly capitalised in the prior year.

Other receivables from exchange transactions

Amount previously reported	- 11,973,032
Correction of error	- 12,553,900
Reclassification	- 1,758,898
	- 26,285,830

Agency services

An amount of R1584926 was incorrectly mapped to agency services in the prior year. Agency services is consequently restated with the same amount.

Agency services

Amount previously reported	- 4,833,132
Correction of error	- (1,593,976)
	- 3,239,156

Property, plant and equipment

Errors in relation to calculations occurred in the prior year. Separately disclosed as follows:

Property, plant and equipment

Amount as previously reported	- 5,452,746,752
Depreciation error	- (19,629,262)
Unbundling of infrastructure correction	- 994,220
Review of useful life correction	- 2,807,408
Eskom prepayment correction	- (10,307,818)
Assets disposed of in prior year	- (312,513)
	- 5,426,298,787

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

63. Prior period error and reclassification (continued)

Payables from non-exchange transactions

This error relates to an error of which a payment was erroneously made in relation to development charges that was claimed back. This amount claimed back should therefore form part of the unspent grants.

Payables from non-exchange transactions

Amount previously recorded	-	14,695,527
Correction of error	-	808,049
	-	15,503,576

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

63. Prior period error and reclassification (continued)

63.4 Reclassification

The reclassifications as presented below are as a result of a template change to bring into effect the changes as proposed by National Treasury in the Mscoa chart. These changes do not constitute a change in accounting policy or a change in the manner in which the transactions occur, but is merely changing the naming conventions. The accounting treatment is consistent with prior years. No other reclassifications according to GRAP3 has occurred.

The following reclassifications adjustment occurred in terms of GRAP 1 para 49:

Non-Exchange Revenue

Transfers and subsidies

Government grants and subsidies has been changed to transfers and subsidies in the current financial year per the Mscoa chart. Donated assets has been reclassified from donated assets to transfers and subsidies to the amount of R140 541.

Fines, penalties and forfeits

Per the mSCOA template building plan fines has been reclassified from operational revenue to fines, penalties and forfeits to the amount of R34 609. Consequently this has now been reclassified from exchange revenue to non-exchange revenue.

Exchange Revenue

Service charges

Per the mSCOA template, service charges have been split per individual service and not as a collective item. The total effect of this split is R932 616 341.

Rental

The Rentals line item no longer contains encroachment, interest on rentals and market porters have been reclassified to the required Mscoa line items. These lines items have respectively been reclassified to sale of goods and services, interest from receivables and licences and permits.

Interest on receivables

This interest has been reclassified to interest, dividend and rent on Land

Operational revenue/other income

The mSCOA template has split the previously disclosed line item "other income" into both operational revenue and sales of goods and services. The nature of the previously reported line items has not been changed. The total amount reclassified to sale of goods and services from operational revenue (Other income) amounts to R35 409 882. An amount of R46 126 642 has been reclassified to Sales of goods and rendering of services.

Construction contracts

Construction contracts has been reclassified to sale of goods and rendering of service. The effect of this name change is to the value of R7 570 000.

Expenditure

Employee Related cost

Entertainment cost and workmans compensation have been reclassified as operational cost.

Finance cost

The discounting of financial instruments had been reclassified to finance cost. This was previously under fair value adjustments

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2022

Notes to the Annual Financial Statements

63. Prior period error and reclassification (continued)

Inventory consumed

Inventory consumed had previously been disclosed with general expenditure. This line item is now disclosed separately on the face of the statement of financial performance as per the Mscoa chart. The cost of housing sold has also been reclassified to this line item.

Operational cost

Operational cost was previously named general expenditure. Inventory consumed was reclassified and is presented on the face of the statement of financial performance.

64. Additional disclosure in terms of the Broad-Based Black Economic Empowerment Act

Information on compliance with the Broad-Based Black Economic Empowerment Act (B-BBEE) is included in the Annual Report under the section titled Employment Equity.

65. Events after the reporting date

The outbreak of COVID-19 has resulted in authorities implementing numerous measures to try contain the virus, such as travel bans and restrictions both within Republic of South Africa and around the world. These measures have not only negatively impacted consumer and business spending habits, they have adversely impacted and may further impact our operations and operations of our consumers. These measures may remain in place for a significant period of time and they are likely to continue to adversely affect our service delivery and financial condition. We do not yet know the full extent of the impact on the municipality or our consumers or the economy as a whole. However, the effects could have a material impact on our operations and we will continue to monitor the COVID-19 situation closely.

Currently there are no events after the reporting date to report on.

1. PURPOSE

The Annual Performance Report 2021/22 is hereby submitted to the Stellenbosch Municipal Council in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), Section 46(1) and (2). The report covers the municipality's performance information from 01 July 2021 to 30 June 2022 and focuses on the implementation of the Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2021/22, concerning the objectives as encapsulated in the municipality's Integrated Development Plan (IDP) for the year under review.

The format of the report will reflect the Stellenbosch Municipality's Key Performance Indicators (KPIs) per Strategic Focus Area (SFA).

This report will also endeavour to report to Council on the municipality's performance in terms of the five (5) National Government's Key Performance Areas for local government, which are (1) Basic Service Delivery; (2) Local Economic Development; (3) Municipal Institutional Transformation and Development; (4) Municipal Financial Viability and Management and (5) Good Governance and Public Participation.

2. LEGISLATIVE REQUIREMENTS

This Annual Performance Report has been compiled in compliance with the requirements of Section 46(1) of the MSA, which stipulates that:

- (1) A municipality must prepare for each financial year a performance report reflecting—
 - (a) the performance of the municipality and each external service provider during that financial year;
 - (b) a comparison of the performance referred to in paragraph (a) with targets set for performance in the previous financial year; and
 - (c) measures taken to improve performance.

In addition, regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations, 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting and improvement will be conducted, organised and managed, including determining the roles of the different role players." Performance management is not only relevant to the organisation as a whole but is also applicable to the individuals employed in the organisation as well as the external service providers.

3. MUNICIPAL OVERVIEW

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in that year. Today, the area has become primarily known for its extraordinary wines, fruit, world-renowned cultural landscapes and exceptional scenic quality. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their rich heritage and traditions, but also the divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch, Boland College, sports and culinary institutions and several prestigious schools. It has a strong business sector, varying from major South African businesses and corporations, to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. The area's numerous wine farms and cellars are very popular and the area is the home of the very first wine route in South Africa.

The town boasts a variety of sport facilities. Coetzenburg, with its athletics and rugby stadiums, has hosted star performances over many generations while the Danie Craven Stadium is the home of Maties rugby, the largest rugby club in the world. The municipal area has several theatres, which include the University's HB Thom Theatre, Spier Amphitheatre, Dorpstraat Theatre, Aan de Braak Theatre, and Oude Libertas Amphitheatre – well-known for its summer season of music, theatre and dance.

Limited municipal resources require an increase in multi-sectoral partnerships to address the broad spectrum of needs in the community. The municipality cannot address the challenges of Stellenbosch on its own, not only because of limited resources but also because it does not control all the variables impacting on growth and development of the town. Welfare and community organisations play a leading role in assisting to meet the needs of previously neglected communities. The business sector also plays a key role in shaping the economic development of the municipal area.

4. PERFORMANCE MANAGEMENT OVERVIEW

To improve on performance planning, implementation, measurement and reporting, the municipality implemented the following actions:

- Departmental operational plans were developed for monitoring and reporting operational programmes;
- An electronic performance management system is operational within the municipality. The same system forms the basis of performance evaluations of the Directors and the Municipal Manager; and
- The municipality endeavoured during the development of the TL SDBIP as well as with the development of the Departmental SDBIP that the "SMART" principle be adhered to in the setting of indicators and targets. Emphasis was placed on ensuring that indicators and targets were specific and time-bound, thus making it measurable.

	Performance Management Policy	All MSA s57/56 Performance contracts signed	Audit Committee	Municipal Public Accounts Committee (MPAC)	Quarterly Performance Reporting to Council	Annual Performance Reporting to Council
In place?	√	√	√	√	√	√

4.1 Top Layer Service Delivery and Budget Implementation Plan

The organisational performance is evaluated using a Municipal Scorecard (the TL SDBIP) at the organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at the directorate and departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators of how, where and when the municipality's strategies, objectives and normal business processes are implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and Budget.

The MFMA Circular No.13 prescribes that:

- The IDP and budget must be aligned;
- The budget must address the strategic priorities;
- The SDBIP should indicate what the municipality is going to do during next the 12 months; and
- The SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

The TL SDBIP was prepared as described in the paragraphs below and approved by the Executive Mayor on 23 June 2021.

The approved TL SDBIP 2021/22 was revised in February 2022. These revisions were made in line with the adjustment budget, internal audit findings and (if any) recommendations made by the Auditor General of South Africa (AGSA).

The overall assessment of actual performance against targets set for the Key Performance Indicators as documented in the SDBIP is illustrated in terms of the following assessment methodology:

Table 5: Performance Assessment Criteria

Colour	Category	Explanation
N/A	KPI Not Yet Measured	KPIs with no targets or actual results for the selected period
R	KPI Not Met	Actual vs. target less than 75%
O	KPI Almost Met	Actual vs. target between 75% and 100%
G	KPI Met	Actual vs. target 100% achieved
G2	KPI Well Met	Actual vs. target more than 100% and less than 150% achieved
B	KPI Extremely Well Met	Actual vs. target more than 150% achieved

The TL SDBIP (the Municipal Scorecard) consolidate service delivery targets set by Council / Senior Management and provides an overall picture of performance for the municipality as a whole, reflecting performance on its strategic priorities. The TL SDBIP is a detailed one-year plan and the necessary components should include:

- Monthly projections of revenue to be collected for each source;
- Expected revenue to be collected not billed;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Non-financial measurable performance objectives in the form of targets and indicators; and
- Detailed capital project plan broken down by ward over three years.

4.2 Departmental Service Delivery and Budget Implementation Plan

The Departmental Service Delivery and Budget Implementation Plan (the detailed SDBIP) captures each Directorate's performance. Unlike the TL SDBIP, which reflects on the strategic performance of the municipality, the Departmental SDBIP 2021/22 provides a comprehensive picture of the performance per Directorate, Department and Section. It was compiled by the Directors and Senior Managers for their respective Departments and Sections and consists of objectives, indicators and targets derived from the approved TL SDBIP 2021/22.

5. PLANNED TARGETS VS ACTUAL RESULTS FOR THE 2021/22 FINANCIAL YEAR

This section of the Annual Performance Report 2021/22 will report on the municipality's actual performance against the planned targets as derived from the municipality's IDP. Because the municipality has developed five (5) Strategic Focus Areas (SFAs), the performance reporting will follow these themes.

5.1 Municipal performance per National Key Performance Indicator

5.1.1 Municipal Transformation and Institutional Development

Table 6: NKPA- Municipal Transformation and Institutional Development

INDICATOR	MUNICIPAL ACHIEVEMENT 2020/21	MUNICIPAL ACHIEVEMENT 2021/22
The number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan	5	3
The percentage of a municipality's budget actually spent on implementing its workplace skills plan	R2 831 705 / R1 779 347 338 =0.16%	R2 567 666 / R598 305 199 x 100 = 0.43%

5.1.2 Basic Service Delivery

Table 7: NKPA- Basic Service Delivery

INDICATOR	MUNICIPAL ACHIEVEMENT 2020/21*	MUNICIPAL ACHIEVEMENT 2021/22*
The percentage of households earning less than R6,500 per month with access to free basic services (In the case of Stellenbosch Municipality- the percentage of registered Indigent households are being reported)	100%	100%
The percentage of households with access to basic level of water	100%	100%
The percentage of households with access to basic level of sanitation	100%	100%
The percentage of households with access to basic level of electricity	71%	84%
The percentage of households with access to basic level of solid waste removal	100%	100%

* The percentage of households with access to basic level of water, sanitation, electricity and solid waste services is based on formal households only. The information on informal households and backyard dwellings was not taken into account.

5.1.3 Local Economic Development

Table 8: NKPA- Local Economic Development

INDICATOR	MUNICIPAL ACHIEVEMENT 2020/21	MUNICIPAL ACHIEVEMENT 2021/22
The number of jobs created through the municipality's local economic development initiatives including capital projects	1 129	1 439

5.1.4 Municipal Financial Viability and Management

Table 9: NKPA- Municipal Financial Viability and Management

INDICATOR	MUNICIPAL ACHIEVEMENT 2020/21	MUNICIPAL ACHIEVEMENT 2021/22
Debt coverage ((Total operating revenue - operating grants received) / Debt service payments due within the year)	29.06%	17.55%
Service debtors to revenue (Total outstanding service debtors / Annual revenue received for services)	8.86%	15.56%
Cost coverage ((Available cash + investments) / Monthly fixed operating expenditure)	2.08	3

5.1.5 Good Governance and Public Participation

Table 10: NKPA- Good Governance and Public Participation

INDICATOR	MUNICIPAL ACHIEVEMENT 2020/21	MUNICIPAL ACHIEVEMENT 2021/22
The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan	86.54%	84.29%

5.2 Overall performance per Municipal Strategic Focus Area

The following graph and table illustrate the Municipality's overall performance per Municipal Strategic Focus Area (SFA).

Stellenbosch Municipality		Municipal Strategic Focus Areas (SFAs)				
		SFA 1 - Valley of Possibility	SFA 2 - Green and Sustainable Valley	SFA 3 - Safe Valley	SFA 4 - Dignified Living	SFA 5 - Good Governance and Compliance

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

Report of the Audit and Performance Audit Committee

This report of the Audit and Performance Audit Committee of Stellenbosch Municipality is in respect of the 2021/2022 financial year. The Audit and Performance Audit Committee has complied with its responsibilities in terms of Section 166 of the MFMA and applicable Treasury Regulations. The Committee has also regulated its affairs and discharged its responsibilities concordant to the approved Audit Committee Charter. The Committee's operation is guided by the MFMA, the King IV report on Corporate Governance and International Institute of Internal Auditor's Standards.

The Committee consists of four independent members, elected by the Council: Linda Nene (Chairperson), Tsepo Lesihla, Vincent Botto and June Williams. The Council appointed the Chairperson of the Committee, an independent member. The Municipal Manager, Chief Financial Officer, Directors, Chief Audit Executive, Senior Manager Governance, Chief Risk Officer, MPAC Chairperson, and External Auditors are permanent invitees to the Committee meetings.

Execution of Functions

The Audit and Performance Audit Committee has executed its duties and responsibilities during the financial year in accordance with its terms of reference as they relate to the Council's accounting, external and internal auditing processes, internal control, governance, predetermined objectives and performance monitoring, compliance with laws and regulations, risk management, combined assurance and information technology governance and financial reporting practices.

During the year under review, the Committee, amongst other matters,

1.1 In respect of the External Auditors and the External Audit

- i. Approved the External Auditors' (Auditor-General of RSA) terms of engagement and strategy, the audit plan and budgeted audit fees payable;
- ii. Engaged and interrogated extensively the Audit report and management report of the Auditor General at the Audit and Performance Audit Committee meeting dated 29th November 2022;
- iii. Considered the audit outcome of the Municipality extensively and communicated the Audit and Performance Audit Committee's satisfaction and congratulated the Accounting Officer and Management on the Clean Audit Outcome;
- iv. Based on the audit outcome recommendations were made by the Audit and Performance Audit Committee on the other important matters as well as control deficiencies identified in the Auditor-Generals' management report;

- v. Management have been requested by the Audit and Performance Audit Committee to improve business processes impacting the annual financial statements compilation and reconciliations of transactions, more specially to limit repeat findings of which there were 2 findings relating to errors on the AFS;
- vi. Management are urged to strengthen controls to adequately monitor non-compliance with laws and regulations on a timely basis;
- vii. Management were requested to concentrate on accurate presentation and review of the annual financial statements submitted to the Auditor General for audit;
- viii. The supervision and review process needs to be interrogated to prevent, detect and correct misstatements on a timely basis and the controls designed to monitor compliance with regulations that are not always able to prevent or report the instances of non-compliance in a timely manner to allow for corrective action; and
- ix. The quality of submitted financial statements can still be improved on; thus, management is encouraged to develop action plans early to allow for the improvement in the next reporting cycle.

1.2 In respect of the Annual Financial Statements (AFS)

- i. Confirmed the going concern as the basis of preparation of the annual financial statements;
- ii. Examined, reviewed and interrogated the annual financial statements, performance report as well as financial information disclosed to the public prior to submission and approval by Council;
- iii. Reviewed reports on the adequacy of the portfolio and specific impairments and impairment of other assets;
- iv. Ensured that the annual financial statements fairly represented the financial position of the Stellenbosch Municipality as at the end of the financial year in accordance with South African Standards of GRAP and in the manner required by the MFMA and DORA;
- v. Considered the appropriateness of accounting treatments, significant unusual transactions and management accounting judgements;
- vi. Considered the appropriateness of the accounting policies adopted by Management and changes thereto;
- vii. Through the Chairperson, met separately over the course of the year with the Chief Audit Executive, the Municipal Manager and the External Auditors (Auditor-General of RSA);
- viii. Reviewed any significant legal and tax matters that could have a material impact on the financial statements; and
- ix. Noted that there were no material reports or complaints received concerning accounting practices, internal financial controls, content of annual financial statements, internal controls and related matters.

1.3 In respect of Internal Control and Internal Audit

- i. Reviewed and approved the internal audit mandate, annual and three-year rolling audit plans and evaluated the independence, effectiveness and performance of the Internal Audit Department and compliance with its mandate;
- ii. Considered reports of the Internal and external auditors on Council's system of internal control, including internal financial controls and maintenance of effective internal control systems;
- iii. Reviewed significant issues raised by the internal audit process and the adequacy of corrective action in response to such findings;
- iv. Reviewed significant differences of opinion between the internal audit function and Management and noted that there were no material issues of difference raised and all matters were addressed and resolved;
- v. Assessed the adequacy of the performance of the internal audit function and found it to be effective in providing assurance;

- vi. Reviewed and monitored the quality assurance and improvement plan submitted by internal audit as required by the IIA Standards;
- vii. Assessed the adequacy and sufficiency of available internal audit resources and found these to be limited, as more resources would be required to evaluate the control weaknesses and high-risk areas identified in both the corporate strategic risk, external audit and the audit universe;
- viii. Received limited assurance that proper and adequate accounting records were maintained and that systems safeguarded the assets against unauthorised use or the disposal thereof;
- ix. Based on the above, the Committee's opinion at the date of this report is that there were some breakdowns in internal control, including internal financial controls, for the year under review in the following areas (it is noted that management are in the process of addressing these concerns):
 - Performance management system (PMS)
 - Allowances (Overtime, Standby and Scarce Skills)
 - Development Contributions (Infrastructure Services)
 - Key Controls (Asset Management)
 - Pre-determined objectives
 - Monthly or regular reconciliations of assets, debtors, and creditors
 - Compilation of mid-year or interim AFS
- x. In addition, the Committee noted Management's improved responses to conclude on internal findings from the prior and current year as reported in the internal audit follow up reports.

1.4 In respect of Legal and Compliance with Laws and Regulations

- i. Reviewed with management matters that could have a material impact on Council;
- ii. Monitored compliance with the MFMA and other key legislation applicable to the Municipality, requirements of National and Provincial Treasury, Council's policies, and all other applicable legislation and codes of good governance;
- iii. Reviewed reports from the internal and external auditors detailing the extent of compliance.

1.5 In respect of Risk Management, Combined Assurance and Information Technology

During the period under review, Management presented Strategic and Operational Risk profiles for the Municipality to the Audit and Performance Audit Committee who :

- i. Considered and reviewed reports from Management on risk management, including fraud risks and information technology risks as they pertain to financial reporting and the going concern assessment;
- ii. In respect of the coordination of assurance activities, the Committee reviewed the plans and work outcomes of the external and internal auditors and concluded that these were adequate to address all significant financial, operational and compliance risks facing the Municipality;
- iii. Noted the progress made in terms of Combined Assurance and the co-ordination between assurance providers to mitigate the top 10 strategic risks facing the Municipality as well as the emerging risks;
- iv. The Audit and Performance Audit Committee took cognisance that Information Technology and IT systems controls needing some improvement in the Auditor General's Management report. Member Tsepo Lesihla, ICT expert, has been appointed to the ICT committee to support management in this respect.

1.6 In respect of Pre-Determined Objectives (PDO's)

The Audit and Performance Audit Committee:

- i. The quality of submitted performance information in the Management report is indicated as satisfactory. There were no material findings reported on performance information by the Auditor General and Internal Audit, respectively.
- ii. Internal audit has also provided the Audit and Performance Audit Committee with reports on performance on a quarterly basis and no critical findings have been raised.

1.7 In respect of the Finance Function

The Audit and Performance Audit Committee:

- i. Considered the existing expertise, resources and experience of the organisation-wide finance functional capacity and has noted that the improvement year on year on the quality of the annual financial statements submitted to the Committee and the AGSA. The number of misstatements corrected on the annual financial statements are noted and impact of external factors recognised. Management intend to report on an action plan in this respect.
- ii. The Chief Financial Officer should continue to ensure appropriate measures are in place for the accurate and timeous submission of information to the Office of the Auditor-General.
- iii. Noted that there were no findings on Supply Chain Management (SCM) and commends the CFO and his team for this.

1.8 Independence of the External Auditors

The Audit and Performance Audit Committee is satisfied that the Audit General of RSA (AGSA) were independent of the Council. This conclusion was arrived at, inter alia, after taking into account the following factors:

- i. The presentations made by the Auditor-General to the Audit and Performance Audit Committee;
- ii. The Auditors' independence was not impaired by any consultancy, advisory or other work undertaken by the auditors; and

1.9 General

- i. The Audit and Performance Audit Committee has monitored quarterly the Municipality's implementation plan for audit issues raised in the prior year and are satisfied that the matters have been adequately addressed and resolved. Of all the matters raised in the 2021/2022 audit outcome, two (2) have been repeat findings. The Audit and Performance Committee has raised its concern around the repeat findings and the other important matters raised in the Auditor-General's Management Report. The Municipal Manager has given assurance that all of these will be addressed as urgent and tracked for the 2022/2023 financial year.
- ii. The Audit and Performance Audit Committee concurs and accepts the conclusions of the External Auditor on the annual financial statements and is of the opinion that the audited annual financial statements be accepted and read together with the report of the Auditor-General.

Stellenbosch Municipality has increasingly been stable in the areas of second and third levels of assurance and governance over a three-year period. There has also been stability in the leadership over the past five financial years. The areas for concern, and where attention is required are highlighted above. The Audit and Performance Committee has made recommendations in these areas which management have committed to.

1.10 Conclusion

I am extremely grateful to the members of the Committee for their dedication and high levels of professionalism and diligence in their duties, as well as their flexibility in accommodating last-minute calls to duty. We are fortunate to have the diversity of skills and expertise available to the Municipality. It would be amiss not to convey on behalf of the Committee our appreciation to the Mayor, the entire Council and its Committees for the leadership, support and oversight they have provided during the year.

Finally, the Audit and Performance Audit Committee would like to express its appreciation to Management, Internal Audit, Risk Management and the Auditor General for the support and co-operation extended during the financial year and for providing the relevant information to enable the Audit and Performance Audit Committee to compile this report. This past year was again challenging and Stellenbosch Municipality should be proud of its elected and appointed leaders for taking control and driving an agenda of sustainability and service delivery and improving its audit results in the process, during a time of great fluidity.

On behalf of the Audit and Performance Audit Committee.

A handwritten signature in black ink, appearing to read 'Linda C. Nene', with a long, sweeping horizontal stroke extending to the right.

Mr Linda C. Nene FIIA (SA), CCSA, CRMA, CPrac (SA)
Chairperson Audit and Performance Audit Committee
17 January 2023

**ANNEXURE D: REPORT OF THE AUDITOR GENERAL OF SOUTH
AFRICA 2021/22**

Report of the auditor-general to the Western Cape Provincial Parliament and council on the Stellenbosch Municipality

Report on the audit of the financial statements

Opinion

1. I have audited the financial statements of the Stellenbosch Municipality set out on pages 7 to 131, which comprise the statement of financial position as at 30 June 2022, the statement of financial performance, statement of changes in net assets, cash flow statement and statement of comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies
2. In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2022 and its financial performance and cash flows for the year then ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 9 of 2021 (Dora).

Basis for opinion

3. I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the auditor-general's responsibilities for the audit of the financial statements section of my report.
4. I am independent of the municipality in accordance with the International Ethics Standards Board for Accountants' *International code of ethics for professional accountants (including International Independence Standards)* (IESBA code) as well as other ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA code.
5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Emphasis of matters

6. I draw attention to the matters below. My opinion is not modified in respect of these matters.

Restatement of corresponding figures

7. As disclosed in note 63 to the financial statements, the corresponding figures for 30 June 2021 were restated as a result of errors in the financial statements of the municipality at, and for the year ended, 30 June 2022.

Material impairments

8. As disclosed in note 5 to the financial statements, the municipality provided for the impairment of receivables from exchange transactions of R204,3 million (2020-21: R167,1 million).
9. As disclosed in note 6 to the financial statements, the municipality provided for the impairment of receivables from non-exchange transactions of R187,6 million (2020-21: R173,2 million).

Other matter

10. I draw attention to the matter below. My opinion is not modified in respect of this matter.

Unaudited disclosure notes

11. In terms of section 125(2)(e) of the MFMA, the municipality is required to disclose particulars of non-compliance with the MFMA in the financial statements. This disclosure requirement did not form part of the audit of the financial statements and, accordingly, I do not express an opinion on it.

Responsibilities of the accounting officer for the financial statements

12. The accounting officer is responsible for the preparation and fair presentation of the financial statements in accordance with GRAP and the requirements of the MFMA and Dora, and for such internal control as the accounting officer determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.
13. In preparing the financial statements, the accounting officer is responsible for assessing the municipality's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the appropriate governance structure either intends to liquidate the municipality or to cease operations, or has no realistic alternative but to do so.

Auditor-general's responsibilities for the audit of the financial statements

14. My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
15. A further description of my responsibilities for the audit of the financial statements is included in the annexure to this auditor's report.

Report on the audit of the annual performance report

Introduction and scope

16. In accordance with the Public Audit Act 25 of 2004 (PAA) and the general notice issued in terms thereof, I have a responsibility to report on the usefulness and reliability of the reported performance information against predetermined objectives for the selected strategic focus area presented in the annual performance report. I performed procedures to identify material findings but not to gather evidence to express assurance.
17. My procedures address the usefulness and reliability of the reported performance information, which must be based on the municipality's approved performance planning documents. I have not evaluated the completeness and appropriateness of the performance indicators included in the planning documents. My procedures do not examine whether the actions taken by the municipality enabled service delivery. My procedures do not extend to any disclosures or assertions relating to the extent of achievements in the current year or planned performance strategies and information in respect of future periods that may be included as part of the reported performance information. Accordingly, my findings do not extend to these matters.
18. I evaluated the usefulness and reliability of the reported performance information in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected strategic focus area presented in the municipality's annual performance report for the year ended 30 June 2022:

Strategic focus area	Pages in the annual performance report
Strategic focus area 4 – dignified living	15 to 17

19. I performed procedures to determine whether the reported performance information was properly presented and whether performance was consistent with the approved performance planning documents. I performed further procedures to determine whether the indicators and related targets were measurable and relevant, and assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.
20. I did not identify any material findings on the usefulness and reliability of the reported performance information for this strategic focus area.

Other matters

21. I draw attention to the matters below.

Achievement of planned targets

22. Refer to the annual performance report on pages 15 to 17 for information on the achievement of planned targets for the year.

Adjustment of material misstatement

23. I identified a material misstatement in the annual performance report submitted for auditing. This material misstatement was on the reported performance information of strategic focus area 4 – dignified living. As management subsequently corrected the misstatement, I did not raise any material findings on the usefulness and reliability of the reported performance information.

Report on the audit of compliance with legislation

Introduction and scope

24. In accordance with the PAA and the general notice issued in terms thereof, I have a responsibility to report material findings on the municipality's compliance with specific matters in key legislation. I performed procedures to identify findings but not to gather evidence to express assurance.
25. I did not identify any material findings on compliance with the specific matters in key legislation set out in the general notice issued in terms of the PAA.

Other information

26. The accounting officer is responsible for the other information. The other information comprises the information included in the annual report. The other information does not include the financial statements, the auditor's report and the selected strategic focus area presented in the annual performance report that have been specifically reported in this auditor's report.
27. My opinion on the financial statements and findings on the reported performance information and compliance with legislation do not cover the other information and I do not express an audit opinion or any form of assurance conclusion on it.
28. In connection with my audit, my responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements and the selected strategic focus area presented in the annual performance report, or my knowledge obtained in the audit, or otherwise appears to be materially misstated.
29. I did not receive the other information prior to the date of this auditor's report. When I do receive and read this information, and if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the other information be corrected. If the other information is not corrected, I may have to retract this auditor's report and re-issue an amended report as appropriate. However, if it is corrected this will not be necessary.

Internal control deficiencies

30. I considered internal control relevant to my audit of the financial statements, reported performance information and compliance with applicable legislation; however, my objective was not to express any form of assurance on it. I did not identify any significant deficiencies in internal control.

Other reports

31. I draw attention to the following engagement conducted by various parties which had, or could have, an impact on the matters reported in the municipality's financial statements, reported performance information, compliance with applicable legislation and other related matters. These reports did not form part of my opinion on the financial statements or my findings on the reported performance information or compliance with legislation.
32. During the year under review the public protector investigated allegations of improper conduct and maladministration at the Stellenbosch Municipality. These allegations related to irregularities in the appointment of two senior officials at the municipality. The public protector's report was submitted to the municipality on 30 March 2022. On 21 June 2022, the municipality submitted a response to the public protector and pursued a review application. The review application was heard by a high court on 28 November 2022. At the date of this report the process had not yet been concluded.
33. On 18 October 2022 the municipality appointed a service provider to investigate instances of irregular and fruitless and wasteful expenditure included in notes 55.2 and 55.3 to the financial statements. This expenditure was on information technology licences procured from various service providers. The investigation was to determine whether unauthorised, irregular and/or fruitless and wasteful expenditure was incurred as a result of the software upgrades of licences purchased, whether legislated procurement processes were followed with the respective service providers and whether evidence of misconduct by officials for the appointment of the service providers exist. At the time of this report the investigation had not yet been concluded.

Auditor - General

Cape Town

2 December 2022

Annexure – Auditor-general’s responsibility for the audit

1. As part of an audit in accordance with the ISAs, I exercise professional judgement and maintain professional scepticism throughout my audit of the financial statements and the procedures performed on reported performance information for the selected strategic focus area and on the municipality’s compliance with respect to the selected subject matters.

Financial statements

2. In addition to my responsibility for the audit of the financial statements as described in this auditor’s report, I also:
 - identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error; design and perform audit procedures responsive to those risks; and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control
 - obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the municipality’s internal control
 - evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the accounting officer
 - conclude on the appropriateness of the accounting officer’s use of the going concern basis of accounting in the preparation of the financial statements. I also conclude, based on the audit evidence obtained, whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the ability of the Stellenbosch Municipality to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor’s report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify my opinion on the financial statements. My conclusions are based on the information available to me at the date of this auditor’s report. However, future events or conditions may cause a municipality to cease operating as a going concern
 - evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and determine whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

Communication with those charged with governance

3. I communicate with the accounting officer regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.
4. I also provide the accounting officer with a statement that I have complied with relevant ethical requirements regarding independence, and communicate all relationships and other matters that may reasonably be thought to bear on my independence and, where applicable, actions taken to eliminate threats or safeguards applied

8.2	DRAFT 1st REVIEW OF THE 5th GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027 AND THE IDP AND BUDGET PUBLIC PARTICIPATION MEETING SCHEDULE FOR APRIL 2023
-----	---

Collaborator No: 746216
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 22 March 2023

1. SUBJECT: DRAFT 1st REVIEW OF THE 5th GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027 AND THE IDP AND BUDGET PUBLIC PARTICIPATION MEETING SCHEDULE FOR APRIL 2023

2. PURPOSE

To table to the Council for consideration:

- (a) The draft 1st Review of the 5th Generation IDP 2022 – 2027, attached as **ANNEXURE A**, to be released for public comment/s; and
- (b) The IDP and Budget Public Participation Meeting Schedule, April 2023, attached as **ANNEXURE B**.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

In terms of Section 34(a)(i)(ii) of the Local Government: Municipal Systems Act, 2000 (Act. No. 32 of 2000) (MSA), each municipal council must review its Integrated Development Plan annually in accordance with an assessment of its performance measurements in terms of Section 41 of MSA and to the extent the changing circumstances so demand. Therefore, taking into account the changing circumstances in the municipal environment, including the community's needs and priorities.

The draft 1st Review of the 5th Generation IDP 2022 – 2027 informs the budget of the municipality and also details the municipality's actions to address the vision, mission, strategic objectives and needs of the community.

The municipal IDP must be reviewed annually to ensure that:

- municipalities and communities keep track of the progress in implementing development projects and the spending of the municipal budget; and
- communities are provided with an opportunity to review their needs and to make possible revisions to the priorities listed in the municipality's IDP.

The Council should take note that the Safety and Security Plan information will be updated in the final IDP document, which will be presented to the Council in May 2023.

A once-off close-out report on the 4th Generation IDP 2017 – 2022 is attached as an annexure to the draft 1st Review of the 5th Generation IDP 2022 – 2027 to provide the Council with a summary of the IDP deliverables achieved during the 4th Generation IDP period of 2017 – 2022. The report also contains multi-year projects and programmes that are scheduled for completion during the 5th Generation IDP 2022 - 2027 period.

At an all-ward councillor meeting on Friday, 10 February 2023 it was resolved that the Stellenbosch Municipality will return to the traditional public participation approach for April 2023. Therefore, area-based physical meetings will be held in the respective areas of Stellenbosch, see attached **ANNEXURE B** for the IDP and Budget public participation meeting schedule.

The public participation period will comprise the period Monday, 3 April – Monday, 24 April 2023, to allow members of the community and stakeholders ample time to provide written inputs and or comments on the draft 1st Review of the 5th Generation IDP 2022 – 2027. The area-based public participation meetings will be held from Wednesday, 12 April to Tuesday, 18 April 2023 in the respective areas with a central venue. The municipality will provide transportation, with pick-up points specified on the meeting schedule.

The listed platforms below will be made available for the community and stakeholders to provide input and comments on the draft 1st Review of the 5th Generation IDP 2022 – 2027:

- A link to an electronic submission form will be active from Monday, 3 April – Monday, 24 April 2023 on the municipal website: www.stellenbosch.gov.za;
- The link to the electronic form will be broadcast via WhatsApp and Email and published on Facebook, Twitter and Stellenbosch Citizen App;
- ‘Have your Say’ boxes will be placed at ward offices and libraries; and
- Submissions may be done via:
 - Email: idp@stellenbosch.gov.za;
 - WhatsApp: 067 427 1556;
 - Stellenbosch Citizen App: Download from Google Play Store, iStore, Windows Store and Java.

5. RECOMMENDATIONS

- (a) that the Draft 1st Review of the 5th Generation IDP 2022 – 2027 of Stellenbosch Municipality be approved in terms of Section 34 (a)(i)(ii) of the MSA for the purpose of obtaining public inputs and comments, attached as **ANNEXURE A**;
- (b) that an advertisement be placed on the official website of the municipality and the local newspaper notifying the public that the Draft 1st Review of the 5th Generation IDP 2022 – 2027 is open for public inputs and comments for a period of 21 days;
- (c) that the Draft 1st Review of the 5th Generation IDP 2022 – 2027 be submitted to the Western Cape: Department of Local Government, Western Cape: Provincial Treasury, National Treasury and the Cape Winelands District Municipality; and
- (d) that the IDP and Budget Public Participation Meeting Schedule for April 2023 be noted, attached as **ANNEXURE B**.

6. DISCUSSION**6.1 Background**

In terms of the provisions of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), each Council must review its Integrated Development Plan in accordance with an assessment of its performance measurements in terms of Section 41 of MSA and to the extent the changing circumstances so demand.

The key dates for the IDP review process form part of the integrated SDF / IDP / Budget Time Schedule approved by the Council in August 2022 to guide the planning and development of the 1st Review of the 5th Generation IDP 2017 – 2022.

The following processes were followed in accordance with the time schedule:

Date	Action(s)
July / August 2022	- Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24.
September 2022 – November 2022	- The IDP public participation period was from 07 – 28 September 2022 . - The hybrid public participation meetings were held from 19 – 22 September 2022 . - The online stakeholder engagement was held on 27 September 2022 . - An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1 st Review of the 5 th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp and the Stellenbosch Citizen App. - Hard copies of the submission form were also made available at all libraries and ward offices. - An all-ward councillor session was held on 7 October 2022 , for the reprioritisation of ward priorities for the 2023/24 financial year taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 - February 2023	- Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. - An Indaba 2 Engagement was attended on 7 February 2023 to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. - Management held a strategic session on 15 – 16 February 2023 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).

6.2 Financial Implications

There are no financial implications beyond that which was approved in the 2022/23 MTREF Budget.

6.3 Legal Implications

The recommendations in this report comply with all applicable legislation.

Section 25(1):

The municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the municipality which—

- (a) links, integrates and co-ordinates plans and takes into account proposals for the development of the municipality;
- (b) aligns the resources and capacity of the municipality with the implementation of the plan;
- (c) forms the policy framework and general basis on which annual budgets must be based;
- (d) complies with the provisions of this Chapter; and
- (e) is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

Section 26:

An integrated development plan must reflect—

- (a) the municipal council's vision for the long-term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;
- (b) an assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
- (c) the council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
- (d) the council's development strategies which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
- (e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;
- (f) the council's operational strategies;
- (g) applicable disaster management plans;
- (h) a financial plan, which must include a budget projection for at least the next three years; and
- (i) the key performance indicators and performance targets determined in terms of section 41.

Section 34:**“Annual review and amendment of the integrated development plan**

A municipal council-

(a) must review its integrated development plan-

- (i) annually in accordance with an assessment of its performance measurements in terms of Section 41; and
- (ii) to the extent that changing circumstances so demand; and

-
- (a) may amend its integrated development plan in accordance with a prescribed process.”

Section 35(1):

An integrated development plan adopted by the council of a municipality—

- (a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;
- (b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality’s integrated development plan and national or provincial legislation, in which case such legislation prevails; and
- (c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

Section 36:

A municipality must give effect to its integrated development plan and conduct its affairs in a manner that is consistent with its integrated development plan.

The 2nd Review of the 5th Generation IDP 2022 – 2027 will be compiled during the 2023/24 financial year.

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

This report has no direct risk implications for the municipality.

6.6 Previous / Relevant Council Resolutions

None.

Integrated Development Plan for 2022 – 2027

Compiled in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)

The Integrated Development Plan is the municipality's principal five-year strategic plan that deals with the most critical development needs of the municipal area (external focus) and the organisation's most critical governance needs (internal focus).

The Integrated Development Plan –

- ✦ is adopted by the council within one year after a municipal election and remains in force for the council's elected term (five years);
- ✦ is drafted and reviewed annually in consultation with the local community as well as interested organs of state and other role players;
- ✦ guides and informs all planning and development, and all decisions concerning planning, management and development;
- ✦ forms the framework and basis for the municipality's medium-term expenditure framework, annual budgets and performance management system; and
- ✦ seeks to promote integration by balancing the economic, ecological and social pillars of sustainability without compromising the institutional capacity required in the implementation, and by coordinating actions across sectors and spheres of government.

STRATEGIC OVERVIEW

Vision, Mission and Values

Foreword by the Executive Mayor

Cllr Adv Gesie van Deventer
Executive Mayor

DRAFT: This 1st review of the 5th Generation Integrated Development Plan (IDP) covers the Stellenbosch Municipality's plans for the new five-year term and an evaluation of where we are at and what still needs to be done. The past few years have seen the municipality achieve and, in many instances, exceed its goals and targets, overcoming many challenges in the process.

Our strategy is to implement practical solutions, deliver excellent services to all our residents, focus on economic and social development, and further strengthen our track record of good governance practices and sound financial management.

For me, this IDP is personal. It is not just a document. It is not just a report. It goes to the heart of what the Stellenbosch Council and the municipality is planning, doing, and achieving. It describes in detail what we as a government are planning and practically implementing to ensure that we create a clean, safe, and stable environment that attracts investment and jobs, stimulates economic growth, and lifts people out of poverty.

Local government remains the closest government body to our residents and communities, and as councillors, we were elected to serve the needs of our various communities, or the so-called 14 "dorpies". For me, it is vitally important that we aim to serve all our communities from all of these "dorpies" equitably and sustainably.

The importance of public participation in the IDP and Budget processes cannot be overstated. We are fortunate in Stellenbosch that our residents have used this platform to engage the municipality on their relevant needs and priorities. This greatly assists the municipality in planning accordingly and ensuring sustainable growth throughout the municipal area (WC024).

It further allows us, as a municipality, to continuously plan ahead, work diligently, and deliver the services we are responsible for. The IDP creates the framework for the municipality to fulfil its mandate and apply its budget.

Here are some of the IDP deliverables planned and linked to my Mayoral Outcomes for the 2023/24 financial year:

- ✦ The payment of 90% of SMMEs invoices within 14 days after receipt of an invoice;
- ✦ The installation of standpipes in informal settlements and the construction of ablution facilities;
- ✦ The review of the Economic Development Strategy;
- ✦ The Review the Tourism Development Policy;
- ✦ Review the Municipal Agricultural Land Policy ;
- ✦ The further allocation of two municipal agricultural land units to emerging farmers per financial year;
- ✦ To obtain development rights on Erf 7001, Cloetessville to establish GAP housing;
- ✦ Finalisation of the sub-division plans for Jamestown (Phases 2 and 3);
- ✦ Obtain development rights for mixed-use development for Jamestown Phase 4;
- ✦ To obtain development rights for Kayamandi Town Centre upgrades;

- ✦ To obtain development rights for township establishment for Erf 64, Kylemore and spend 90% of the allocated annual capital budget;
- ✦ Transferring approximately 300 title deeds to approved beneficiaries;
- ✦ Review the Integrated Zoning Scheme By-Law;
- ✦ Development of 2 out of 10 Local Spatial Development Frameworks out of the 10 small towns for the 2023/24 financial year;
- ✦ Conduct Transport Studies for the Adam Tas Corridor (ATC);
- ✦ Facilitation of 23 ward-based community safety engagements;
- ✦ Spending of the annual allocated Capital Budget on CCTV cameras and equipment for the Traffic and Law Enforcement Departments;
- ✦ Spend 90% of the Registered Neighbourhood Watches' annual budget
- ✦ Establish a new cell at the Stellenbosch Landfill Site.

Of course, there are many other key priorities identified for this term. These include, as always, ensuring an efficient and effective local government service that is accountable and responsive. We have a zero-tolerance approach to corruption and have proven over and over that we will always act when the need arises.

Running a clean and transparent government where we ensure that every cent of public funds is spent on improving services, maintenance, upgrades, and development is also non-negotiable.

We are making good progress on our plans to co-generate electricity to protect our communities from the terrible effects of load shedding. Solar panels have been put up on city property, a record number of private small-scale embedded generation (SSEG) applications are being received and approved every week, and our scientific feasibility study will soon be presented to the Council. This co-generating plan will be open for public participation, and I encourage all stakeholders to provide input.

The burning issue of housing for our residents in all categories remains of utmost importance. All categories, from rental stock to BNG and GAP housing to upgrades of informal settlements and mixed-use developments, continue to receive attention. Although housing is not a municipal competency and we rely on the budget provided to us by the national and provincial governments, we will continue to provide as many housing opportunities as possible with limited resources.

I want to thank the Deputy Mayor, Councillor Jeremy Fasser; the members of my Mayoral Committee; all our Councillors; and the Municipal Manager and Administration, who have drafted this updated roadmap for the future. We are, as always, committed to sticking to this roadmap in realising our vision of becoming a Valley of Opportunity and Innovation for all who live here.

We remain committed to doing everything we can to create opportunities for all our residents, and this document is a meaningful symbol of that.

CLLR ADV GESIE VAN DEVENTER
EXECUTIVE MAYOR

Overview by the Municipal Manager

Geraldine Mettler
Municipal Manager

DRAFT: As a local government, I am proud that the Stellenbosch Municipality has continued to deliver basic services even under immense pressure and uncertainty. We have shown that we can adapt and respond to new realities in an ever-changing, dynamic world. We have learned valuable lessons that will serve us well in the future. We have proven to be a resilient organisation and a capable local government that can deliver on our mandate even under the most trying circumstances.

This plan provides a focussed set of objectives to ensure that public funds are channelled to the programmes and projects that deliver the most benefit for the public as equitably as possible. It is for this reason that the inputs we receive from our communities form the backbone of the entire IDP and budgeting processes, and as such, new and innovative ways of communicating with our residents are always needed.

Residents have many ways to talk to us about the IDP and what is important to them in their ward. The Stellenbosch Citizen App, interactive pages on our municipal website, emails, a dedicated WhatsApp line, social media platforms, and traditional written submissions became important tools to engage with communities. These tools, together with community meetings across the entire municipal area, provided residents with ample opportunity to be part of the IDP and Budget processes.

The IDP is our roadmap for where we are and where we want to be. It helps us to evaluate community needs, identify ward priorities, and recommit to our strategic objectives. The IDP in turn informs the municipal budget. If we can't identify a need and provide a practical plan to address it, we simply cannot budget for it. It is therefore critical for us to reach as many residents as possible. We are serious when we say we want people to be part of the decision-making process by having their say! The projects, programmes, and initiatives outlined in this document will be executed with effective performance management and dedicated leadership.

There are various key priorities that I have highlighted for the Administration to focus on as part of the 5th Generation IDP. These include:

- 🏠 E-governance (SMART CITY);
- 🏠 Bulk infrastructure upgrades to ensure sufficient bulk capacity, critically important for economic development;
- 🏠 Critical road infrastructure upgrades from a safety and development point of view;
- 🏠 Clean, green electricity generation to ensure economic sustainability;
- 🏠 Financial viability and sustainability through long-term financial planning and prudent financial management;
- 🏠 A zero-tolerance approach to corruption;
- 🏠 Focus on social and gap housing to help backyarders and to give as many people as possible the chance to live in a dignified way;
- 🏠 Finalising the Inclusionary Housing Policy to enable developers to assist with housing provision, especially in the gap market;
- 🏠 Continuing with wealth creation through our title deed programme;
- 🏠 The Adam Tas Corridor development - an excellent private-public partnership for sustainable urban development and inclusive growth;

- Improvements to business processes in our Planning Department;
- Establishment of a land invasion unit; and
- Continuing to improve a safer environment, through adding to our existing cameras and surveillance networks as well as supporting and creating more neighbourhood watches.

What we have achieved in the municipality is because of our commitment to working together, good governance practices, transparency, and organisational stability. The fiscal discipline, operational restraint, and sound corporate governance have positioned the municipality to be able to resiliently weather any storm.

Our ability to partner effectively with industry, investors, residents, and community organisations continues to strengthen. I thank all our partners and stakeholders for the role they have played in recent times. I know that the opportunities for stronger partnerships and more collaboration during the period of implementation of this new IDP will grow.

I want to thank our Executive Mayor, Mayoral Committee, Councillors, and my Directors for guiding this ship and for their immense contributions to making our administration work better for all residents of our municipal area.

Together with the residents and stakeholders of the Stellenbosch Municipality, we can make our towns a place of excellence and opportunity for all.

GERALDINE METTLER
MUNICIPAL MANAGER

CHAPTER 1:

Governance and Institutional Arrangements

1.1 Integrated Development Planning

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) mandates South African municipalities to formulate a five-year Integrated Development Plan (IDP) to inform the municipal budget and guide all development within the municipal area. The IDP is considered the municipality's principal strategic plan that deals with the most critical development needs of the municipal area as well as the most critical governance needs of the organisation.

As the principal planning instrument that guides and informs the municipal budget, the planning process has to provide a forum for identifying, unpacking and resolving the real issues that face the residents of Stellenbosch Municipality. Identifying these issues in consultation with communities makes it possible for the municipality to propose realistic and workable solutions that can be budgeted for, implemented and monitored in a controlled environment. These issues may be over-arching issues that affect the whole municipality or may only affect specific communities. It is therefore crucially important that the IDP be developed after the completion of a public participation process in which community stakeholders were thoroughly consulted. The plan is also developed in partnership with the provincial and national governments as well as the district municipality.

At the heart of the IDP lies the improvement in the provision of basic municipal services and expanding livelihood opportunities for the people of the Stellenbosch Municipality. The IDP also focuses on expanding and transforming municipal capacity, enterprise development and crucially, exploring new ways of working and living together. This is especially relevant in an ever-changing environment.

1.2 Compilation and Legal Status of the 5th Generation IDP 2022 – 2027

SECTION 35(1) OF THE MSA

An IDP is adopted by the council of a municipality;

- (a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;
- (b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and
- (c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

CHAPTER 5 AND SECTION 26 OF THE MSA

Core components of IDPs: An integrated development plan must reflect-

- (a) The municipal council's vision for the long-term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;
- (b) An assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
- (c) The council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
- (d) The council's development strategies which must be aligned with any national and provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
- (e) A spatial development framework which must include the provision of basic guidelines for a land-use management system for the municipality;
- (f) The council's operational strategies;
- (g) Applicable disaster management plans;
- (h) A financial plan, which must include a budget projection for at least the next three years; and
- (i) The key performance indicators and performance targets determined in terms of section 41.

The IDP is informed by a leadership agenda – as contained in national and provincial policy documents – as well as the needs of local citizens and public, private and community organisations. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The 1st Review of the 5th Generation IDP 2022 – 2027 outlines the following chapters:

- Chapter 1: Governance and Institutional Arrangements;
- Chapter 2: State of the Greater Stellenbosch Area;
- Chapter 3: The Strategic Policy Context;
- Chapter 4: Spatial Development Framework;
- Chapter 5: Performance Summary of the 5th Generation IDP 2022 – 2027;
- Chapter 6: One Plan: Service Delivery, Budget, Programme and Projects;
- Chapter 7: Sector Planning and Implementation;
- Chapter 8: Council Term Projects 2022 – 2027;
- Chapter 9: Public Interest and Expression of Needs (Community Participation);
- Chapter 10: Financial Plan;
- Chapter 11: Organisational Scorecard (5 Years); and
- Chapter 12: Implementation, Monitoring and Review (1- year).

1.3 Relationship between the IDP, Budget, Performance management and Risk Management

The IDP Process, together with the performance management process, should be seamlessly integrated, where the IDP ensures that the planning stage for performance management occurs and performance management fulfils the implementation, monitoring and evaluation of the IDP process. This is prescribed according to the Performance Management Guide for Municipalities, DPLG, 2001.

The role of the Budget is to attach money to the objectives that are contained in the IDP and the Budget gets monitored through the Service Delivery Budget Implementation Plan (SDBIP). The IDP, therefore, provides the strategic direction for the municipality, whereas the Budget should ensure the implementation of the IDP.

Risk Management is one of management's core responsibilities according to section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate and address risks continuously before such risks can impact negatively the service delivery capacity of the Stellenbosch Municipality. Risk management provides reasonable assurance that the institution will be successful in achieving its goals and objectives.

1.4 Relationship between the IDP and One Plan

The One Plan does not replace the Integrated Development Plan (IDP) of the municipality as the "single, inclusive and strategic plan for the development of the municipality". It is envisaged that the One Plan will strengthen and enhance the IDP and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDP. During the development of the One Plan, the IDP informed the One Plan. However, after approval of the One Plan, the IDP will be directed by the strategies and priorities outlined in the One Plan. In this regard, the IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Figure 1: Relationship between One Plan and IDP

1.5 The IDP and Ward Plans

The **twenty - three (23)** ward plans, include:

- A consensus on priorities for the relevant ward(s);
- An implementation plan; and
- The capital budget is available for the relevant wards, including the small capital budget.

Ward plans help to ensure that the IDP is more targeted and relevant to addressing the priorities of all groups, including the most vulnerable. These plans provide Ward Committees with a systematic planning and implementation tool to perform their roles and responsibilities. They form the basis for dialogue between the municipality and Ward Committees regarding the identification of priorities and budget requests and will also be used by Ward Committees for ongoing monitoring and evaluation throughout the year. The information is however on a detail level and not duplicated in the IDP, but a detailed Ward Plan is available on request.

1.6 The IDP Planning Process (five-year cycle)

According to the MSA, every new council that comes into office after the local government elections have to prepare its IDP that will guide them for the five years that they are in office. The IDP is, therefore, linked to the five-year term of office of Councillors. This does, however, not restrict all proposals in the IDP to five years. The strategic goals that are part of the municipality's strategy all have a longer than five-year horizon, similar to the Spatial Development Framework (SDF) of the municipality.

A clear distinction must also be made between the main IDP which is compiled every five years (or if a new council comes into power within the five-year period and does not accept the previous council's IDP) and the annual review of the IDP. The annual review is not a replacement for the five-year IDP, and its purpose is not to interfere with the long-term strategic orientation of the municipality. The annual review reflects and reports on progress made concerning the five-year strategy (and strategic goals) and proposes adjustments to the strategy, if necessary, because of changing internal and external circumstances that impact the appropriateness of the IDP.

Figure 2: Five-Year IDP Development and review cycle

1.7 Review of the Integrated Development Plan

Section 34 of the MSA prescribes that a municipality -

- a) must review its integrated development plan –
 - (i) annually following an assessment of its performance measurement in terms of section 41; and
 - (ii) to the extent that changing circumstances so demand;

The review process serves as an institutional monitoring process where stakeholders can meet to discuss the successes and progress of the previous financial year. It is not designed to interfere with the long-term strategic objectives of the municipality. The review process is a strategic process to ensure the institution remains in touch with its intentions, informed of the varying needs of residents and up to date with the changing environment within which it functions.

The Stellenbosch Municipality, in collaboration with all relevant stakeholders and following the completion of the IDP public participation engagements during September 2022, must now review its IDP.

This is the first review to occur since the adoption of the 5th Generation IDP 2022 – 2027 in May 2022.

Importantly, this review does not seek to replace or rewrite the IDP that was adopted by the Council on 25 May 2022. The purpose of this review, as instructed by the MSA, is to examine the progress made on the implementation of the IDP and assess the municipality's strategic objectives and targets as set out in the IDP.

The priorities and key performance deliverables identified in this review of the IDP will seek to better inform the municipality's budget, and sector plans and streamline service delivery initiatives. This will ensure that the Stellenbosch Municipality remains on course to attain its strategic objectives.

1.8 Roles and Responsibilities

Section 53 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) stipulates inter alia that the respective roles and areas of responsibility of each political structure and political office bearer of the municipality and the Municipal Manager must be defined.

Figure 3: Roles and Responsibilities

Executive Mayor and Municipal Council	Proportional Councillors, Ward Councillors and Ward Committee Members	Municipal Manager and Management Team
<p>In terms of the MSA and the MFMA, the Executive Mayor must:</p> <ul style="list-style-type: none"> Manage the drafting of the IDP; Assign responsibilities in this regard to the Municipal Manager; Submit the draft plan to the municipal council for adoption; and Co-ordinate the annual revision of the IDP and determine how the IDP taken into account or revised for the purposes of the Budget. <p>The Municipal Council</p> <ul style="list-style-type: none"> The Council is the ultimate decision-making authority. Decisions to approve or amend the municipality's IDP may not be delegated and have to be taken by the full Council. 	<ul style="list-style-type: none"> Assist with public participation process. Assist the ward councillor (who is the chairperson) in identifying challenges and needs of residents. Provide a mechanism for discussion and negotiation between different stakeholders in the ward; Interact with other forums and organisations on matters affecting the ward; Draw up a ward plan that offers suggestions on how to improve service delivery in the particular ward; Disseminate information in the ward; and Monitor the implementation process concerning its area 	<ul style="list-style-type: none"> Provide technical / sector expertise and information; Provide inputs related to the various planning steps; Summarise / digest / process inputs from the participation process; Discuss and comment on inputs from specialists; and Address inputs from and give feedback to the community.

1.9 Municipal Council

The Council performs both legislative and executive functions. It focuses on legislative, oversight and participatory roles, and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows:

Table 1: Council Political Representation

Political Party	Number of Councillors
Democratic Alliance (DA)	28
African National Congress (ANC)	8
GOOD	3
Economic Freedom Fighters (EFF)	2
African Christian Democratic Party (ACDP)	1
People's Democratic Movement (PDM)	1
Patriotic Alliance (PA)	1
Vryheidsfront Plus (VF)	1
Total	45

Below is a table that categorises the councillors within their respective political parties and wards.

Table 2: Ward Councillors and Proportional Councillors

44.	J Andrews (Mr)	Part-time	PA	PR
45.	I De Taillefer (Ms)	Part-time	VF Plus	PR

1.9.1 Executive Mayor and Mayoral Committee (MayCo)

The Executive Mayor of the municipality, assisted by the Mayoral Committee, heads the political executive arm of the municipality. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the executive mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition, delegated powers by the Council were assigned. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

Table 3: Executive Mayor and Mayoral Committee (MayCo)

Name of member	Portfolio
Alderman G van Deventer	Executive Mayor
Cllr J Fasser	Deputy Executive Mayor, including Integrated Human Settlements
Cllr P Johnson	MayCo member: Financial Services
Cllr Z Dalling	MayCo member: Infrastructure Services
Vacant	MayCo member: Protection Services
Cllr L Nkamisa	MayCo member: Corporate Services
Cllr R Adams	MayCo member: Youth, Sport and Culture
Cllr J Williams	MayCo member: Rural Management
Cllr R du Toit	MayCo member: Local Economic Development and Tourism
Cllr J Joon	MayCo member: Community Development (Parks, Open Spaces and Environment)
Cllr C van Wyk	MayCo member: Planning

Figure 4: Executive Mayoral Committee

MayCo Members

1.9.2 The Administration

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily has to serve as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team that reports directly to the Municipal Manager. The structure of the Management Team is outlined in the diagram below:

Figure 5: Municipal Management Team

1.10 First-Year Process Followed

The table below reflects the preparation for the 5th Generation Integrated Development Plan 2022 – 2027.

Table 4: Preparation for the first year of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2021	<ul style="list-style-type: none"> Approval of the mSDF / IDP / Budget Process Plan / Time Schedule. Cape Winelands District Municipality hosted a discussion session on the Section 27 Framework.
September 2021 – November 2021	<ul style="list-style-type: none"> With the Local Government Elections completed in November 2021, it was critical for the municipality to carefully manage the process to ensure compliance with legislation and the successful development of the 5th Generation IDP 2022 – 2027, therefore an Amended mSDF / IDP / Budget Process Plan / Time Schedule was submitted to Council on 23 November 2021 for consideration and approval. The IDP public participation period started on 29 November 2021 and ended on 12 January 2022. A link to access IDP pre-recorded videos was published on the municipal Youtube Channel, shared via Facebook, Twitter, WhatsApp, Stellenbosch Citizen App and on the municipal website. Feedback was also provided on the implementation of projects per ward. An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the development of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp and the Stellenbosch Citizen App. Hard copies of the submission form were also made available at all libraries and ward offices.
December 2021 – February 2022	<ul style="list-style-type: none"> An Online Sector Engagement was held on 11 January 2022 to determine the sector needs and collectively devise plans to address the needs. MayCo and management had a strategic session from 13 – 14 January 2022 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions). Departmental sessions were held with all departments to set their 5-year implementation plans for the 5th Generation IDP 2022 – 2027.
March 2022 – April 2022	<ul style="list-style-type: none"> The Process Plan for 2022 – 2027 to guide the planning, drafting, adoption and review of the 5th Generation IDP 2022 – 2027 was approved by the Council on 30 March 2022, for public comment for 21 days. A second revision of the SDF / IDP / Budget Time Schedule for 2022/23 was submitted to the Council on 30 March 2022 for consideration and approval, which in effect moved the adoption of the Process Plan to May 2022. This was done to ensure compliance and alignment between the MSA Section 27 Framework of the CWDM and the Process Plan for 2022 – 2027 of the Stellenbosch Municipality. The draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 for Stellenbosch Municipality was submitted to the Council on 30 March 2022 for consideration and approval to be released for public comments. The IDP and Budget public participation process within the Stellenbosch Municipal area commenced on 04 – 28 April 2022. Inputs and comments on the draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 will be compiled and distributed to the directorates for consideration in finalising the IDP and Budget.
May – June 2022	<ul style="list-style-type: none"> Adoption of the final IDP and Budget, Tariffs and Budget-related policies. Submit adopted IDP to Cape Winelands District Municipality, Provincial Government and National Treasury. Approval of SDBIP by the Executive Mayor within 28 days after adoption of the IDP and Budget.

1.11 Second-Year Process Followed

The table below reflects the preparation for the 1st review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2023/24 financial year.

Table 5: Preparation for the second year for the 1st Review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2022	<ul style="list-style-type: none"> Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24
September 2022 – November 2022	<ul style="list-style-type: none"> The IDP public participation period was open from 07 – 28 September 2022. The hybrid public participation meetings were held from 19 – 22 September 2022. The online stakeholder engagement was held on 27 September 2022. An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1st Review of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp and the Stellenbosch Citizen App. Hard copies of the “Have Your Say” submission form were also made available at all libraries and ward offices. An all-ward councillor session was held on 7 October 2022, for the reprioritisation of ward priorities for the 2023/24 financial year taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 – February 2023	<ul style="list-style-type: none"> Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. An Indaba 2 Engagement was attended on 7 February 2023 to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. Management strategic session on 15 and 16 February 2023 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).

1.12 Corporate Governance

Corporate governance is the set of processes, practices, policies, laws and stakeholders affecting the way an institution is directed, administered and controlled. Corporate governance also encompasses the relationships among the many stakeholders involved and the goals for which the institution is governed.

1.13 Risk Management

Section 62 of the MFMA, states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient and transparent systems of financial and **risk management** and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

Certain risks have also been revised to ensure that the municipality can appropriately respond to the impact of these risks on municipal service delivery taking into account the changing external and internal factors. Provision was also made for ineffective service delivery due to geopolitical instability and the impact of Ukraine and the Russian war on global commodities, particularly fuel.

The top **5 strategic** risks identified include:

- R** | **01** Availability and cost of electricity
- I** | **02** Increased risk of land invasion
- S** | **03** Economic downturn due to civil unrest and crime
- K** | **04** Scarcity of landfill space
- S** | **05** Increase in community unrest since growth in demand for housing exceeds the resources available for development

The municipal risks have been aligned to the Integrated Development Plan (IDP) through linkages to the Strategic Focus Areas (SFAs). The following table depicts these linkages:

Table 6: Risk and IDP Alignment

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate
1	Availability and cost of electricity	Continuous and persistent load-shedding; sustainability of the national power supplier	Green and Sustainable Valley Dignified Living	10	10	Directorate: Infrastructure Services
2	Increased risk of land invasion	Legal precedents are set under disaster management declaration limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities	Dignified Living Safe Valley Good Governance and Compliance	9	10	Office of the Municipal Manager All Directorates
3	Economic downturn due to civil unrest, crime and continuous load shedding	Increase in criminal activities, civil unrest, and reputational risk due to perceived increase in the said activities. Impact of prolonged load shedding - not sufficient light at night as street lights, CCTV cameras and traffic lights not functioning can lead to more criminal activities.	Safe Valley Dignified Living	10	8	Directorate: Community and Protection Services
4	Scarcity of landfill space	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements i.e., EIA applications and approvals etc.	Green and Sustainable Valley	8	8	Directorate: Infrastructure Services
5	Increase in community unrest since the growth in demand for housing exceeds the resources available for development	Lack of bulk infrastructure; lack of identified and suitable land, unrealistic eviction judgements, housing backlogs, migration.	Dignified Living Safe Valley	8	8	Office of the Municipal Manager Directorate Planning and Economic Development Directorate: Community and Protection Services
Operational Risks						
1	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	8	8	Directorate: Community and Protection Services
2	Timeous Capital Spending	A steady increase in budget allocation; growing population and demand for services; demand management.	Good Governance and Compliance	10	4	Directorate: Financial Services
3	COVID-19 Pandemic	Manage the COVID-19 pandemic within the context of the prescribed regulations, taking the possible 4 th wave and intensity of new infections into	Safe Valley Dignified Living	8	4	All Directorates

Strategic Risks						
Risk Item	Risk Description	Risk Background	Strategic Focus Areas	Impact Rating	Likelihood Ratings	Directorate
		account.				
4	Climate Change	Changing weather patterns, unpredictable rainfall, flash floods, drought natural disasters, fires (seasonal and other).	Green and Sustainable Valley Safe Valley	8	4	Office of the Municipal Manager
5	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery need to be provided by all departments.	Good Governance and Compliance	8	4	Directorate: Corporate Services

1.14 Anti-Corruption and Anti-Fraud

SECTION 83(C) OF THE MSA

Refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption.

SECTION 115(1) OF THE MFMA

States that the accounting officer must take reasonable steps to ensure that mechanisms and separation of duties in a supply chain management system are in place to minimise the likelihood of corruption and fraud.

SECTION 62(1) OF THE MFMA

States the following "the accounting officer of a municipality is responsible for managing the financial administration of the municipality, and must for this purpose take all reasonable steps to ensure: –

- (a) That the resources of the municipality are used affectively, efficiently and economically;
- (b) That the full and proper records of the financial affairs are kept in accordance with any prescribed norms and standards;
- (c) That the municipality has and maintains effective, efficient and transparent systems –
 - (i) Of financial and risk management and internal control;
 - (ii) Of internal audit operating in accordance with any prescribed norms and standards;
- (d) That unauthorised, irregular or fruitless and wasteful expenditure and other losses are prevented; and
- (e) That disciplinary or, when appropriate, criminal proceedings are instituted against any official of the municipality who has allegedly committed an act of financial or an offence in terms of Chapter 15."

1.15 Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee (APAC) (refer to Table below for members of the Audit Committee), appointed in terms of section 166 of the MFMA, has also been appointed as the Performance Audit Committee. Section 166(2) of the MFMA states that an audit committee is an independent advisory body that must:

- (a) advise the municipal council, the political office-bearers, the accounting officer and the management staff of the municipality, on matters relating to: –

- internal financial control and internal audit;
- risk management;
- accounting policies;
- the adequacy, reliability and accuracy of financial reporting information;
- performance management;
- effective governance;
- compliance with this Act, the annual Division of Revenue Act, 2013 (Act No. 2 of 2013) and any other applicable legislation;
- performance evaluation; and
- any other issues referred to it by the municipality.

Table 7: Members of the Audit Committee

Name of representative	Capacity
LC Nene (Mr)	Chairperson
J Williams (Ms)	Member
V Botto (Mr)	Member
TW Lesihla (Mr)	Member

1.16 Ward Committees

Stellenbosch Municipality has a ward committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 6: Main duties of the Ward Committee

1.17 Stakeholders

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective inter-governmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of all spheres of government in the setting of priorities, resource allocation and development planning.

The demonstration of the importance of partnerships for the municipality is illustrated in the table below.

Table 8: Key Stakeholders

Name of Partner	Purpose of MOU / MOA
@ Heart	The @heart partnership is a long-standing relationship built on experience with youth work and HCT testing from a municipal facility.
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote and implement:  platforms to share knowledge;  disaster risk reduction initiatives;  community safety programmes; and  campaigns to promote safe resilient sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness and resilience at all levels through knowledge, innovation and education.
Department Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the University's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television in the interest of the security of the town and the campus with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the Province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay at the night shelter, a blanket or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people living on the street.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, Waste and Electricity Generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Infrastructure Innovation Committee (IIC)	A partnership with the University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with the University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and University.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discuss all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.
LTAB (Land Transport Advisory Board)	A partnership was formed between political leaders to discuss Land Transport related matters that affect transport in the area.

Name of Partner	Purpose of MOU / MOA
NMT (Non-motorised Transport) Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the University and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation and maintenance of effective services within its area of jurisdiction.
Provincial Waste Management Officer's Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.)
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods and communities.
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learners' license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sport Development at the Indoor Sport Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, Council for Scientific and Industrial Research, Western Cape Government and the municipality to investigate the generation of alternate electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing Social Housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug river.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the University, whereby students provide: <ul style="list-style-type: none"> 🚒 relief aid (clothing, food); 🚒 placement of students to assist during incidents / disasters; and 🚒 awareness programmes.
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.
Western Cape Government Department of Environmental Affairs and Development Planning.	A Partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.

Name of Partner	Purpose of MOU / MOA
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Western Cape Department of Public Works, Roads and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly Meetings (meetings involving the private sector, industries and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

CHAPTER 2:

State of the Greater Stellenbosch Area

2.1 Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town harbour, the shipping portal to both the Atlantic and the Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesburg, Languedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlothenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, varying from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound and the area is the home of the very first Wine Route in South Africa. A variety of sport facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The Municipal area has a variety of theatres which include the Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre and dance), Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street at Theatre and Aan de Braak Theatre.

2.2 Ward Demarcation

The Stellenbosch Municipality is currently structured into the following **23** wards:

Table 9: Municipal ward demarcation

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopard Leap Wine Farm
4	Kylemore, Johannesdal, Priël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan (Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms, Kelsey Farm
7	Mostersdrift, Karindal, Rozendal, Uniepark, Simanswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Oliehout Street, Banghoek Rd, Acedemia, Bosman Street, Smuts Rd, Joubert Street, De Beer Rd, De Villiers Rd from Ryneveld Street to Cluver Rd on the left-hand side
11	Boundaries of the ward are: Kridge Rd, Herte Street, Skone Uitsig Rd onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Rd onto George Blake Street, Mark Street, Distillery Rd, Santhagen Rd, Swawel Avenue, Kanarie Rd, Tarentaal Rd, Bokmakierie Rd, Fisant Rd, Devon Valley Rd, Kiewiet Rd, Dagbreek Rd, Pelikaan Street, Patrys Rd, Hammerkop Rd, Loerie Rd, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4 th and 5 th Avenue, 10 th , 12 th and 14 th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Rd, Long streets, Crombi Rd to the end of Gabriels Rd. Asalea Rd, 2nd Road, Noble Rd, Bailey Rd, Eike Street, Curry Street, Hoop Rd, Pansy Rd, West Rd, Laai Rd, Anthony Rd, Carriem Rd, Archilles Rd, Bergstedt Rd, Davidse Rd, Cupido Rd, Pearce Rd, Robyn Rd, Gonzalves Rd, Hercules Rd, Chippendale Rd, Afrika Rd, Arnolds Rd, September Rd, Jakaranda Street, Short Rd, Quarry Rd, Middle Rd, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetessville (Lakay Rd towards Langstraat -Suid Rd, Kloof Street, Fir Street, Fontein Rd, Williams R towards Gabriels Rd towards February Rd, Valentyn Rd, Pool Rd, Raziet Rd, Ortell Rd, Rhode Rd, King Rd, Hine Rd, Hendrikse Rd, Rhode Rd), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Rd, Belladonna Street, Wildeklaar Welgevonden Boulevard, Olive Rd, Sonnedou Rd, Mountain Silver Rd, Silver Oak Rd, Froetang Rd, Katbos Rd, Everlasting, Fynbos Street, Sourfig Street, Scarlet Crescent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts road and Long streets.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirit Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraci, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poulterey / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raitby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm

Ward	Areas
23	Dorp Street, Krige, Hamman Streets, Schroder Rd, Die Braak, Bird Street from Dorp Street, Denniseg area, Muller Rd, Banghoek Road, Reyneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

Below is a map of the Cape Winelands District concerning the provincial district boundaries:

Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km². The province spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands and West Coast) and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:

Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country and a comprehensive road and rail network. This gives the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. As a local authority, Stellenbosch Municipality governs the towns of Stellenbosch, Pniël, Klappmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi and Vlotenburg, and the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein and Theewaterskloof Municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch and Franschoek, and Klappmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlotenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living, yet near city life. This has placed the municipal area under constant development pressure.

2.3 Stellenbosch Municipality at a Glance

Table 10: Stellenbosch Municipality - Summarised Statistics

Population Estimates, 2022				Actual households, 2021		
	Population 199 325				Households 50 792	
Education		2021	Poverty		2021	
	Matric Pass Rate	87.9%		Gini-Coefficient	0.63	
	Learner Retention Rate	79.1%		Poverty Head Count Ratio (UBPL)	58.91	
	Learner-Teacher Ratio	27.2				
Health						2021/22
	Primary Health Care Facilities	Immunisation Rate	Maternal Mortality Ratio (per 100 000 live births)	Teenage Pregnancies – Delivery rate to women U/18		
	8 (excl. mobile / satellite)	55.8%	61.1	13.2%		
Safety and Security			The annual number of reported cases in 2021/22			
	Residential Burglaries	DUI	Drug-related Crimes	Murder	Sexual Offences	
	958	252	1125	87	226	
Access to Basic Service Delivery			Percentage of households with access to basic services, 2021/22			
Water	Refuse Removal	Electricity	Sanitation	Housing		
99.3% 	82.1% 	96.8% 	96.4% 	74.5% 		
Road Safety 2021/22		Labour, 2021/22 ¹	Socio-economic Risks			
Fatal Crashes	31	Unemployment Rate	Risk 1	Job Losses		
Road User Fatalities	39	(narrow definition)	Risk 2	Informal Sector Expansion		
		34.5%	Risk 3	Low skills base (Labour)		
Largest 3 sectors			Contribution to GDP, 2020			
Finance, insurance, real estate and business services		Wholesale and retail trade, catering and accommodation		Manufacturing		
26.5% 		17.5% 		16.3% 		

Source: Western Cape, Social-Economic Profile 2022

¹ According to the Quarterly Labour Force Survey (QLFS) – Q1: 2022, the official unemployment rate was 34.5% in the first quarter of 2022.

2.4 Socio – Economic Context

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2022. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer and Quantec.

2.4.1 Population Growth

The current population of Stellenbosch in 2022 are 199 325 persons, which is the most populated municipal area in the Cape Winelands District (CWD). This total is expected to grow to 215 456 by 2026, equating to an average annual growth rate of 2.0 per cent for the period.

The estimated population growth rate of Stellenbosch is therefore 0.3 percentage and points higher than the estimated average annual population growth rate of the Cape Winelands District which is 1.7 per cent.

The table below depicts the population growth from 2022 to 2026:

Table 11: Population Growth

Area	2022	2023	2024	2025	2026
Estimated Population					
%					
Stellenbosch	3.3	2.3	2.0	2.0	1.6
Cape Winelands	2.7	1.8	1.6	1.6	1.6
Western Cape	2.9	1.8	1.7	1.7	1.6

Source: Western Cape, Social-Economic Profile 2022

2.4.2 Sex Ratio

The overall sex ratio depicts the number of males per 100 females in the population. The data indicates that as of 2022, there are more females than males in the Stellenbosch municipal area with a ratio of 51.1 per cent (females) to 48.9 per cent (males).

The sex ratio is therefore 96, meaning that for every 100 women there are 96 men. The ratio increases slightly towards 2023 and remains unchanged from 2023 to 2026. This could be attributed to a wide range of factors such as an increase in female mortality rates as well as the potential inflow of working males to the municipal area.

The table below depicts the sex ratio within the Stellenbosch municipal area.

Table 12: Sex Ratio

Year	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2022	98.0	108.9	97.6	95.7	93.9	96.1
2023	98.7	110.0	98.4	96.2	94.4	96.9
2024	98.8	110.3	98.5	96.3	94.4	97.0
2025	98.9	110.6	98.6	96.3	94.3	97.1
2026	99.0	110.3	98.9	96.3	94.3	97.4

Source: Western Cape, Social-Economic Profile 2022

2.4.3 Age Cohorts

The age cohorts are composed according to the population of Stellenbosch. These groupings are expressed as a dependency ratio which indicates those who are part of the workforce (Aged 15 – 64) and those who are dependent on them (children or senior citizens). A higher dependency ratio implies greater pressure on social systems and the delivery of basic services.

Between 2022 and 2026, the largest population growth projection was recorded in the 65+ age cohort at 2.7 per cent. This reflects possible improvements in life expectancy (an ageing population) or that more people are choosing the Stellenbosch municipal area as a retirement destination. Notable growth is also expected in the working age cohort, which results in an overall decrease in the dependency ratio towards 2026.

The table below depicts the age cohorts between 2022 and 2026.

Table 13: Age Cohorts

Year	Children: 0 – 14 Years	Working Age: 15 – 65 Years	Aged: 65 +	Dependency Ratio
2022	43 801	144 203	11 321	38.2
2024	45 272	150 716	11 932	38.0
2026	76 765	156 091	12 600	38.0
Growth	1.7%	2.0%	2.7%	-

Source: Western Cape, Social-Economic Profile 2022

2.4.4 Household Size

Household size refers to the number of people per household. The average size of households is expected to remain constant at 3.6 people per household from 2022 to 2026. The trend of the constant average household size could be attributed to a wide range of factors but are not limited to, lower fertility rates, ageing population, divorce, cultural patterns surrounding intergenerational co-residence, as well as socioeconomic factors that shape trends in employment, education, and housing markets.

The table below depicts the household sizes from 2022 to 2026:

Figure 7: Household size

Source: Western Cape, Social-Economic Profile 2022

2.4.5 Population Density

Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health and service delivery risks. In 2022, the population density of the Cape Winelands District was 45 persons per square kilometer. In order of highest to lowest, the various local municipal areas compare as follows:

In order of highest to lowest, the various local municipal areas compare as follows:

↓	Stellenbosch	240 people/km ² ;
↓	Drakenstein	194 people/km ² ;
↓	Breede Valley	51 people/km ² ;
↓	Langeberg	27 people/km ² ; and
↓	Witzenberg	14 people/km ² .

According to the above comparison, Stellenbosch has the **highest density** in the Cape Winelands District. This is helped a lot by the fact that the municipal Spatial Development Framework (mSDF) says that urban development should stay within the limits of the urban edge.

Table 14: Population growth

	2022	2023	2024	2025	2026
Stellenbosch	3.3	2.3	2.0	2.0	1.6
Cape Winelands	2.7	1.8	1.6	1.6	1.6
Western Cape	2.9	1.8	1.7	1.7	1.6

Source: Western Cape, Social-Economic Profile 2022

2.5 Education

Education and training improve access to employment opportunities and help sustain and accelerate overall development. Quality Education is the 4th Sustainable Development Goal, while the National Development Plan (NDP) emphasises the link between education and employment as well as the significant contribution it makes to the development of the capabilities and well-being of the population.

2.5.1 Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch increased from 27 491 enrolments in 2019 to 28 594 in 2021 (more than 1 104 learners were enrolled compared to 2019).

The graphics below depict the learner enrollments, learner-teacher ratio and learner retention from 2019 to 2021.

Graph 1: Learner enrolment

Source: Western Cape, Social-Economic Profile 2022

Graph 2: Learner-Teacher Ratio

Source: Western Cape, Social-Economic Profile 2022

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior.

The inverse of the learner-retention rate is commonly referred to as the drop-out rate. The learner retention rates are influenced by a wide array of factors, including low socio-economic background, student attitudes towards education, overcrowded classrooms, critical thinking skills, study skills and other personal circumstances which can make it difficult for the learner to focus on education.

Although the learner retention rate in the Stellenbosch municipal area improved from 75.5 per cent in 2020 to 79.1 per cent in 2021, more than 20 per cent of the learners did not complete their studies.

Graph 3: Learner retention

Source: Western Cape, Social-Economic Profile 2022

2.5.2 Number of schools and no-fee schools

Figure 8: Number of schools and no-fee schools

The number of schools within the Stellenbosch municipal area is recorded at 39 in 2021. A total of R90 million will be spent in the Stellenbosch municipal area across the MTREF. This allocation will be used for upgrading and additions as well as new and replacement infrastructure in the following schools; Aviation, Elsenburg Agri School, New Klapmuts PS and HS, and New Stellenbosch PS.

The No-fee Schools Policy abolishes school fees in the poorest 40 per cent of schools nationally for learners from Grade R to Grade 9. As per the policy, schools that do not charge fees will be allocated a larger amount of funding from the national budget per learner to make up for the fees that would have been charged.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 64.1 per cent in 2021.

Source: Western Cape, Social-Economic Profile 2021

2.5.3 Schools with libraries / media centres

The Stellenbosch municipal area consist of 39 schools in 2021 of which 27 (69 per cent) were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information which is in turn directly linked to improved education outcomes.

2.5.4 Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. Stellenbosch's matric pass rate improved from 85.1 per cent

in 2020 to 87.9 per cent in 2021; recording the highest matric pass rate in the district in both 2020 and 2021 in the Cape Winelands District.

Graph 4: Education outcomes (matric pass rate)

Source: Western Cape, Social-Economic Profile 2022

2.6 Health

2.6.1 Health Facilities

According to the LGSEP 2022, in 2021, the Stellenbosch municipal area had 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites and 10 TB clinics. The municipal area has 14 (17.9 per cent) out of the 78 primary healthcare facilities within the Cape Winelands district.

The table depicts the total healthcare facilities.

Table 15: Health facilities

Area	Community Health Centres ²	Community Day Centres ³	Regional hospitals	District Hospitals	PHC Clinics (Satellite and Mobile)	PHC Clinics (Fixed)

2.6.2 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage of emergency medical services. The Stellenbosch municipal area had a total of 6 ambulances servicing the region, which translates to 0.3 ambulances per 10 000 people in 2021. This number only refers to Provincial ambulances and excludes all private service providers and remained unchanged between 2020/21 and 2021/22.

² **Community Health Centre:** A facility that normally provides primary health care services, 24 hour maternity, accident and emergency services and beds where health care users can be observed for a maximum of 48 hours and which normally has a procedure room but not an operating theatre.

³ **Community Day Centre:** A health facility that provides a comprehensive health care services during day hours, including mother and child health, chronic diseases care, women's health, HIV and TB care, men's health, acute services, physio therapy, mental health services and oral health care.

2.6.3 HIV / AIDS and Tuberculosis

The number of clients (patients) that remain committed to their antiretroviral treatment (ART) plan in the Stellenbosch municipal area increased by one patient between 2020/21 and 2021/22. In total, 6 915 registered patients received antiretroviral treatment in the Stellenbosch municipal area in 2021/22. In turn, the number of new patients receiving ART also increased from 460 in 2020/21 to 481 in 2021/22. There has been an average annual increase of 3.65 per cent between 2020/21 (849) and 2021/22 (880) in the number of registered patients receiving TB treatment in the Stellenbosch municipal area.

Table 16: HIV/AIDS Management

Graph 5: Tuberculosis

Source: Western Cape, Social-Economic Profile 2022

2.6.4 Child Health

The immunisation coverage rate for children under the age of one in the municipal area improved slightly from 52.7 per cent in 2020/21 to 55.8 per cent in 2021/22. The overall CWD rate increased from 60.6 per cent to 62.2 per cent across the same period. The number of malnourished children under five years of age (severe acute malnutrition) per 100 000 people in the municipal area increased notably from 0.9 in 2020/21 to 1.5 in 2021/22.

The CWD also increased from 1.8 per cent to 2.2 per cent while the provincial average changed from 0.9 to 1.3 per cent. The neonatal mortality rate (deaths per 1 000 live births before 28 days of life) for the municipal area declined from 6.3 in 2020/21 to 3.1 in 2021/22. The rate was still notably below the CWD average of 8.0. A total of 9.8 per cent of all babies born in a facility in the municipal area in 2021/22 weighed less than 2 500 grams, indicating possible challenges with long-term maternal malnutrition and poor health care during pregnancy.

Table 17: Child Health

Area	Low Birth Rate		Neonatal Mortality Rate per 1000		Acute Malnutrition Rate (Under 5) per 100 000		Immunisation Rate (Under 1)	
	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22

Cape Winelands District	15,5	16,0	10,7	8,0	1,8	2,2	60,6	62,2

Source: Western Cape, Social-Economic Profile 2022

2.6.5 Maternal Health

In 2020/21, the Stellenbosch municipal area recorded the lowest number of maternal deaths (57.3) and teenage pregnancies (11.4 per cent) in the CWD, however, this increased to 61.1 per cent (maternal deaths) and 13.2 per cent (teenage pregnancies) in 2021/22. However, the termination of pregnancy rate (0.6 per cent) remained unchanged across this period.

Table 18: Maternal Health

Area	Maternal Mortality Rate		The delivery rate of women under 20 years		Termination of pregnancy rate

2.7 Poverty

2.7.1 GDPR Per Capita

An increase in the real regional gross domestic product (GDPR) per capita, i.e., GDPR per person, is experienced only if the real economic growth rate exceeds the population growth rate. Even though real GDPR per capita reflects changes in the overall well-being of the population, not everyone within an economy will earn the same amount of money as estimated by the real GDPR per capita indicator.

An increase in GDPR per capita, i.e., GDPR per person, is experienced only if the economic growth rate exceeds the population growth rate. At R67 798 in 2021, the Cape Winelands District's real GDPR per capita is below that of the Western Cape's figure of R81 650 for the same period. However, Stellenbosch has outperformed both the District and the Province by recording a per capita income figure of R84 325 in 2021.

Cape Winelands District recorded the highest figure across 2021. While the 2021 figure has regressed moderately for the period 2015 – 2021, the robust economic potential of the municipality is highlighted by its persistent high level of per capita incomes recorded, despite the recent recessionary economic environment coupled with the COVID-19 pandemic which restricted economic activity both regionally and globally.

Graph 6: GDP Per Capita

Source: Western Cape, Social-Economic Profile 2022

2.7.2 Income Inequality

South Africa suffers among the highest levels of inequality in the world when measured by the commonly used Gini index. Inequality manifests itself through a skewed income distribution, unequal access to opportunities, and regional disparities.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. Income inequality has increased in Cape Winelands District between 2015 (0.59) and 2021 (0.62). These disparities in income are certain to worsen across the ensuing MTREF given the potential aftereffects of the COVID-19 pandemic. Stellenbosch has displayed a similar trend to that of the District's trajectory with inequality levels worsening from 0.62 in 2015 to 0.63 in 2021.

Graph 7: Income Inequality

Source: Western Cape, Social-Economic Profile 2022

2.7.3 Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL i.e., that cannot afford to purchase adequate levels of food and non-food items. The UBPL in South Africa is R1 227 (in April 2019 prices) per person per month.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment and poor living conditions. The NDP aims to eliminate poverty by 2030.

In 2021, 58.91 per cent of Stellenbosch's population fell below the UBPL. This figure improved marginally from the 60.62 per cent and 60.76 per cent recorded for the periods 2015 and 2018, respectively. Stellenbosch along with Drakenstein (61.96 per cent in 2021) represent the highest proportion of people living in poverty across the Cape Winelands District, while the Stellenbosch figure of 58.91 per cent is marginally above that of the District figure (57.26 per cent) recorded in 2021.

Table 20: Poverty Line

Source: Western Cape, Social-Economic Profile 2022

2.8 Basic Service Delivery

The Constitution stipulates that every citizen has the right to access adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to services such as potable water, basic sanitation, safe energy sources and refuse removal services, to ensure that households enjoy a decent standard of living.

This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2021. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

2.8.1 Housing and household services

With a total of 50 792 households in the Stellenbosch municipal area, 74.5 per cent had access to formal housing. This is lower than the Cape Winelands District average of 82.4 per cent. The area also had a substantially higher proportion of informal dwellings, a total of 24.7 per cent compared with the District's total of 16.9 per cent.

Service access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water inside the dwelling / yard or communal / neighbours tap at 99.3 per cent, access to a flush or chemical toilet at 96.4 per cent, access to electricity (including a

generator) for lighting at 96.8 per cent and the removal of refuse at least weekly by the local authority at 82.1 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

2.8.2 Free Basic Services

Municipalities also provide a package of free basic services to households that are financially vulnerable and struggle to pay for services. The number of households receiving free basic services in the Stellenbosch municipal area has declined sharply in 2020. The stressed economic conditions are expected to exert additional pressure on household income, which will likely increase the demand for free basic services and in turn the number of indigent households. However, this is area specific and dependent on the qualifying criteria which are used.

Figure 9: Basic Service

Source: Western Cape, Social-Economic Profile 2022

2.9 Safety and Security

2.9.1 Murder

Murder is defined as the unlawful and intentional killing of another person.

Within the Stellenbosch area, the number of murders increased from 67 in 2019/20 to 70 in 2020/21, increasing further to 87 in 2021/22. The Stellenbosch municipal area's murder rate (per 100 000 people) increased from 36 in 2020/21 to 44 in 2021/22, and the murder rate (per 100 000 people) for the Cape Winelands District also increased from 42 to 43 for the same period.

Graph 8: Murder Statistics

Source: Western Cape, Social-Economic Profile 2022

2.9.2 Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency and human trafficking.

In 2022, there were 226 sexual offences in the Stellenbosch area compared to 806 reported cases in the Cape Winelands District. The incidence of sexual offences (per 100 000 people) in the Stellenbosch municipal area (115) was higher than that of the District (84) in 2021/22.

Graph 9: Sexual Offences per 100 000

Source: Western Cape, Social-Economic Profile 2022

2.9.3 Drug-Related Offences

Drug-related crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.

Drug-related crime within the Stellenbosch area decreased from 1 589 cases in 2020/21 to 1 125 cases in 2021/22. The Cape Winelands District's drug-related offences decreased sharply from 5 903 in 2020/21 to 5 729 in 2021/22. When considering the rate per 100 000 people, with 575 drug-related offences per 100 000 people in 2021/22, the Stellenbosch area's rate is below the District's 600 per 100 000 population.

Graph 10: Drug-related Offences per 100 000

Source: Western Cape, Social-Economic Profile 2022

2.9.4 Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area increased from 153 in 2020/21 to 252 in 2021/22. This translates into a rate of 128 per 100 000 people in 2021/22, which is above the District's 86 per 100 000 people.

Graph 11: Driving under the influence

Source: Western Cape, Social-Economic Profile 2022

The type of road user that died in or during a crash i.e. driver, cyclist, passengers, pedestrians.

The number of road user fatalities in the Stellenbosch area increased from 35 in 2020/21 to 39 in 2021/22. While the number of fatal crashes decreased from 34 to 31 for the same reference period.

Graph 12: Fatal Crashes and Road User Fatalities

Source: Western Cape, Social-Economic Profile 2022

2.9.5 Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

The number of residential burglaries in the Stellenbosch area decreased from 971 in 2020/21 to 958 in 2021/22. Stellenbosch municipal area's rate of 489 per 100 000 population is above the District's 448 for 2021/22.

Graph 13: Residential Burglaries

Source: Western Cape, Social-Economic Profile 2022

2.10 Economy and Labour Market Performance

2.10.1 Sectoral Overview

In 2020, the economy of Stellenbosch was valued at R18 625.6 billion (current prices) and employed 71 911 people. Historical trends between 2016 and 2020 indicate that the municipal area realised an average annual growth rate of -0.7 per cent. The 2020 recession made a substantial dent in the average growth rate over the period, but load shedding and the drought within the Province also played a major role in prior years.

Estimates for 2021 however indicate a marked recovery in growth (4.6 per cent) from the effects of the COVID-19-related restrictions on economic activity in 2020. It was largely driven by growth in the wholesale and retail trade, catering and accommodation (7.8 per cent) as tourism activity resumed; as well as the finance, insurance, real estate and business services (3.5 per cent); and manufacturing

(5.0 per cent) sectors. The mining and quarrying (-14.2 per cent), construction (-1.0 per cent) and general government (-0.9 per cent) sectors were the only sectors that experienced a further economic decline after the easing of restrictions.

Despite the economic recovery experienced in 2021, the economy continued to shed jobs, with an estimated 2 435 net jobs lost. This was largely driven by job losses in the wholesale and retail trade, catering and accommodation (-945 jobs); manufacturing (-338 jobs); and agriculture, forestry and fishing (-328) sectors, reflecting that employment creation is lagging behind the improved GDP. Only the general government sector was able to create jobs during the year.

Table 21: Economic Sector Overview

	SECTOR	GDP			Employment		
		R Million value 2019	Trend 2015 – 2019	Real GDP growth 2020e	Number of jobs in 2019	Average annual change 2015 - 2019	Net change 2020e
PS	Primary Sector	R1 059.7	(5.7%)	0.5	6.7	R1 059.7	(5.7%)
	Agriculture, forestry and fishing	R1 022.6	5.5%	0.5	7.2	R1 022.6	5.5%

Source: Western Cape, Social-Economic Profile 2022

2.10.2 Formal and Informal Employment

It is estimated that Stellenbosch's total employed will in 2021 amount to 69 476 workers, of which 55 435 (79.8 per cent) are employed in the formal sector and 14 041 (20.2 per cent) are informally employed. Employment in the formal sector had an annual average increase of only 0.2 per cent from 2016 to 2020 while the informal sector suffered an annual average decline of 5.9 per cent over this period. The informal economy was responsible for the majority of the job losses in 2021. This is a concern as the informal economy should be able to act as a buffer during times of economic recession.

Most of the formally employed consisted of semi-skilled (42 per cent) and low-skilled (32 per cent) workers. The skilled category only contributed 25.8 per cent to total formal employment. The skilled and semi-skilled categories grew at a pace of 0.7 per cent per annum from 2016 to 2020 and notably outpaced low-skilled employment which shed 0.9 per cent of jobs per annum. The growth in the skilled

categories reflects the increasing market demand for skilled labour and the need for skills development initiatives, especially with the growing tertiary sector in the Stellenbosch municipal area.

Table 22: Skills Levels Formal Employment

Skill Levels Formal employment	Skill Level Contribution 2020 (%)	Average growth (%) 2016 - 2020	Number of jobs	
			2020	2021
Skilled	32.0	- 0.9	14 305	14 433
Semi-skilled	42.2	0.7	23 353	23 327
Low-skilled	25.8	0.7	17 688	17 675

2.10.3 Unemployment

To protect South African citizens from the COVID-19 pandemic, the government announced a national lockdown in March 2020 that brought about a shutdown of the economy, which in turn resulted in a shock in the labour market and a big change in the way people went about doing their work.

According to the Quarterly Labour Force Survey (StatsSA, 2021), The number of unemployed persons decreased by 60 000 to 7,9 million in the 1st quarter of 2022 compared to the previous quarter. The number of discouraged jobseekers decreased by 54 000 (1,4%) and the number of people who were not economically active for reasons other than discouragement decreased by 112 000 (0,8%) between the two quarters resulting in a net decrease of 166 000 not economically active population. The above changes in employment and unemployment resulted in the official unemployment rate decreasing by 0,8 of a percentage point from 35,3% in the fourth quarter of 2021 to 34,5% in the first quarter of 2022. The unemployment rate according to the expanded definition of unemployment also decreased by 0,7 percentage points to 45,5 % between April and June 2022 compared to January to March 2022.

The biggest job gains were recorded in community and social services (281 000), manufacturing (263 000) and trade (98 000). However, there were job losses in private households (186 000), finance (72 000), construction (60 000) and agriculture (23 000). The total number of persons employed was 14,9 million in the first quarter of 2022. The expanded unemployment rate⁴ in South Africa increased by 2,2 percentage points to 46,6 per cent (12.5 million people) from July 2021 to September 2021, because people were available for work, but did not actively look for work during the national lockdown.

⁴ Definition: Expanded unemployment rate (aged 15–64 years): were not employed in the reference week; and were available to work but did not look for work either because they are discouraged from looking for work .

CHAPTER 3:

Strategic Policy Context

3.1 Municipal Vision and Strategy

Figure 10: Municipal Vision and Strategy

OUR MISSION: To deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

OUR VALUES: In all of our work and engagements, we subscribe to the following values:

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Integrity: As servants of the public, we undertake to perform the functions and operations of the Municipality in an honest and ethical manner.

Innovation: We will continuously review our systems, procedures and processes to make them more responsive to customer needs. In partnership with our stakeholders we will seek innovative solutions to complex problems. We will encourage and reward initiatives which show creativity and ingenuity.

Transformation: We, as custodians of hope, will work tirelessly at transforming our Municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Responsiveness: The municipality to be a responsive municipal entity with zero tolerance for corruption and illegal actions.

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the **“An Integrated Valley of Opportunity and Innovation”**

MISSION

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality honestly and ethically.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Transformation: We, as custodians of hope, will work tirelessly at transforming our municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness: The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

3.2 Strategic Focus Areas (SFAs)

3.2.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunity for enterprise, creativity and business development in our cities, towns and villages are an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that address these challenges: The first relates to the provision of services to citizens, and how these services can assist them to facilitate development and job creation. The second relates to the internal working of the municipality and how municipal procurement of services aids in fostering opportunities for enterprise development and creativity. The third dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens and also enable enterprise and business development. Without appropriate, well-maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work and learning.

3.2.2 Strategic Focus Area 2: Green and Sustainable Valley

Several dimensions of the environment underpinned its importance for the greater Stellenbosch area and the people living within it. The first is an ecological dimension, which recognises that the natural environment and its processes provide the setting in which and the basic resources with which, human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins vitally important tourism and agricultural economy. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place, and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, peoples' activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why the spatial direction is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impacts people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts disposable income, work productivity and transport infrastructure provision. Secondly, the Municipal strategy has over the last decade taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has assisted to hide spatial inequity in our settlements. Thirdly, the municipal government has considerable influence over the space economy of settlements. Under its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts economic success through the provision and maintenance of infrastructure and how activities are organised in space.

3.2.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law-abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunities and sound financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure greater Stellenbosch area is thus not only a functional necessity but underpins elements of economic and social development strategies.

3.2.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life, we mean, inter alia, access to shelter, ethical administration of municipal housing, and sufficient choice in housing opportunities for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women and the elderly is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

3.2.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services.

Deciding what to do, when, where and to whose benefit it is, however, is a difficult task. The range of services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy- and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also ensure synergy between the work of the political and administrative spheres of the municipality, their work and that of other spheres of government, civil society and the business sector. Municipalities should communicate well, and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, external and internal to the organisation, needs to be recognised and built upon.

We cannot serve the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given the rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure the best use of public resources, regular performance management is essential. The information must be readily available, and contact between citizens and the municipality should be responsive and as efficient as possible.

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To deliver on the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensure the integrity of the municipality. It is most important that the use of municipal resources supports agreed-upon objectives; in other words, the municipal budget and ongoing expenditure must be strategy-led.

3.3 Strategic Objectives and Predetermined Objectives

Figure 11: Strategic Focus Areas and Predetermined Objectives

3.4 Core Principles in Executing Strategy

The municipality comprises three core components:

- Democratically elected political leadership;
- The administration, comprising officials; and
- Citizens, as individuals, interest groups and organisations (public, community-based and private).

For sustainable municipal management, political leadership and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critics or passive bystanders. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

3.4.1 Alignment with institutional structures and processes

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the “now” – the need to guide decisions today. For municipalities, the “now” has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is “under preparation” is used as an excuse for inaction or even poor decision-making. The arm’s length approach also appears to neglect local experiential knowledge – what people know through working with services issues daily. With this in mind, we have provided for regular, informal but structured engagements between the MayCo and Director’s Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct the development and management of the municipality. Written up as an initial strategy, provision is made for influencing the

decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

3.4.2 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: elaborating on behaviour outlined in legislation through guidelines, standards, and so on.

Fiscal measures: fees, charges and taxes for services as a means for raising government revenue, and directing action in support of policy and legislation (through fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities and programmes to support spatial and sectoral or functional area policy and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the positions that government take on issues, "positive" and "negative". This could be through the media, public meetings / engagements, events, and so on.

3.5 Global Policy Direction

The Stellenbosch Municipality's strategic planning does not occur within a vacuum. Various key policy directives are being employed that range from a global reach to more specific directives applicable to the municipality and its neighbouring municipalities. All these directives are considered when framing future strategic planning and resource allocation. The sections below outline key policy directives considered when framing Stellenbosch Municipality's 1st Review of the 5th Generation IDP 2022 – 2027.

3.5.1 Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs), officially known as *Transforming our world: the 2030 Agenda for Sustainable Development* is a set of seventeen aspirational "Global Goals" with 169 targets between them. The Agenda is an action plan for people, the planet, and prosperity, with a focus on strengthening peace and partnerships. The SDGs are integrated and indivisible and balance the three dimensions of sustainable development: the **economic**, **social** and **environmental**. The Goals are the following:

Sustainable Development Goals (SDGs) 2030

- 🚩 Goal 1: End poverty in all its forms everywhere.
- 🚩 Goal 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.
- 🚩 Goal 3: Ensure healthy lives and promote well-being for all ages.
- 🚩 Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.
- 🚩 Goal 5: Achieve gender equality and empower all women and girls.
- 🚩 Goal 6: Ensure availability and sustainable management of water and sanitation for all.
- 🚩 Goal 7: Ensure access to affordable, reliable, sustainable, and modern energy for all.
- 🚩 Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.
- 🚩 Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation.
- 🚩 Goal 10: Reduce inequality within and among countries.
- 🚩 Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable.
- 🚩 Goal 12: Ensure sustainable consumption and production patterns.
- 🚩 Goal 13: Take urgent action to combat climate change and its impacts.
- 🚩 Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development.
- 🚩 Goal 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat deforestation, halt and reverse land degradation, and halt biodiversity loss.
- 🚩 Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable and inclusive institutions at all levels.
- 🚩 Goal 17: Strengthen the means of implementation and revitalise the global partnership for sustainable development.

Figure 12: Sustainable Development Goals (SDGs)

3.6 National Policy Direction

Based on the National Government's election manifesto and Medium-Term Strategic Framework, a set of twelve outcomes were developed through extensive consultation and discussion at both Ministerial and administrative levels. These outcomes reflect the desired development impacts sought nationally, given the government's policy priorities indicated below:

National Strategic Outcomes

- 🚩 Goal 1: Improved quality of basic education.
- 🚩 Goal 2: A long, healthy life for all South Africans.

- Goal 3: All people in SA are and feel safe.
- Goal 4: Decent employment through inclusive economic growth.
- Goal 5: A skilled and capable workforce to support an inclusive growth path.
- Goal 6: An efficient, competitive and responsive economic infrastructure network.
- Goal 7: Vibrant, equitable and sustainable rural communities with food security for all.
- Goal 8: Sustainable human settlements and improved quality of household life.
- Goal 9: A responsive, accountable, effective and efficient local government system.
- Goal 10: Environmental assets and natural resources that are well protected and continually enhanced.
- Goal 11: Create a better SA and contribute to a better and safer Africa and World.
- Goal 12: An efficient, effective and development-oriented public service and an empowered, fair and inclusive citizenship.

3.6.1 National Development Plan (NDP) – 2030

The President appointed a National Planning Commission in May 2010 to draft a vision and plan for the country. On 9 June 2011, the Commission released a diagnostic document and elements of a vision statement. On 11 November 2011, the vision statement and the plan were released for consideration. The Commission consulted widely on the draft plan. The National Development Plan was adopted by Cabinet in September 2012.

An approach to change

The graphic below demonstrates the close link between capabilities, opportunities and employment on social and living conditions. It shows how leadership, an active citizenry and effective government can help drive development in a socially cohesive environment.

Figure 13: National Development Plan – An approach to change

The plan focuses on the critical capabilities needed to transform the economy and society. Achieving these capabilities is not automatic, nor will they emerge if the country continues on its present trajectory. Rising levels of frustration and impatience suggest that time is of the essence: failure to act will threaten democratic gains. In particular, South Africa must find ways to urgently reduce alarming levels of youth unemployment and provide young people with broader opportunities.

Progress over the next two decades means doing things differently. Given the complexity of national development, the plan sets out six interlinked priorities:

- ✚ Uniting all South Africans around a common programme to achieve prosperity and equity.
- ✚ Promoting active citizenry to strengthen development, democracy and accountability;
- ✚ Bringing about faster economic growth, higher investment and greater labour absorption;
- ✚ Focusing on key capabilities of people and the state;
- ✚ Building a capable and developmental state; and
- ✚ Encouraging strong leadership throughout society to work together to solve problems.

The Plan in brief

By 2030

- ✚ Eliminate income poverty – Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39% to zero; and
- ✚ Reduce inequality – The Gini coefficient should fall from 0.69 to 0.6.

Enabling milestones

- ✚ Increase employment from 13 million in 2010 to 24 million in 2030.
- ✚ Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- ✚ Increase the share of national income of the bottom 40% from 6% to 10%.
- ✚ Establish a competitive base of infrastructure, human resources and regulatory frameworks.
- ✚ Ensure that skilled, technical, professional and managerial posts better reflect the country's racial, gender and disability makeup.
- ✚ Broaden ownership of assets to historically disadvantaged groups.
- ✚ Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- ✚ Provide affordable access to quality health care while promoting health and well-being.
- ✚ Establish effective, safe and affordable public transport.
- ✚ Produce sufficient energy to support the industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- ✚ Ensure that all South Africans have access to clean running water in their homes.
- ✚ Make high-speed broadband internet universally available at competitive prices.
- ✚ Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- ✚ Ensure household food and nutrition security.
- ✚ Entrench a social security system covering all working people, with social protection for the poor and other groups in need, such as children and people with disabilities.
- ✚ Realise a developmental, capable and ethical state that treats citizens with dignity.
- ✚ Ensure that all people live safely, with an independent and fair criminal justice system.
- ✚ Broaden social cohesion and unity while redressing the inequities of the past.
- ✚ Play a leading role in continental development, economic integration and human rights.

3.6.2 Medium-Term Strategic Framework 2019 – 2024 (MTSF)

The MTSF is a high-level strategic document to guide the five-year implementation and monitoring of the National Development Plan (NDP) 2030. It identifies the priorities to be undertaken during the 2019 – 2024 period to put the country on a positive trajectory towards the achievement of the 2030 vision. It sets targets for the implementation of the priorities and interventions for the five years and states the outcomes and indicators to be monitored.

The implementation of the MTSF 2019-2024 was however disrupted by the outbreak of the COVID-19 pandemic and the declaration of a National State of Disaster on 15 March 2020. The government had to reprioritise its plans and budgets in response to the pandemic, which has had a devastating impact on the health, social and economic aspects of the lives of South Africans. The President launched the Economic Reconstruction and Recovery Plan (ERRP) on 15 October 2020, which sought

to restore much-needed economic growth and employment. The combination of all these factors has meant that the MTSF 2019-2024 had to be revised to include critical interventions that are part of the government's relief and recovery efforts.

The Revised MTSF 2019 – 2024 also prioritises government commitments to prevail over the coronavirus pandemic and to work towards recovery. These commitments are to defeat the coronavirus pandemic, accelerate our economic recovery and implement economic reforms to create sustainable jobs and drive inclusive growth and lastly fight corruption and strengthen the capacity of the state. These commitments are included in the Revised MTSF 2019-2024 and will provide the focus for annual and strategic plans.

The MTSF 2019 – 2024 aims to address the challenges of **unemployment**, **inequality**, and **poverty** through the three pillars of the NDP.

Figure 14: Three NDP Pillars

The priorities, which will be achieved through more focused implementation, coordination and integration by the various levels of government including state-owned enterprises, the private sector and civil society, are as follows:

- Priority 1:** A capable, ethical and developmental state;
- Priority 2:** Economic transformation and job creation;
- Priority 3:** Education, skills and health;
- Priority 4:** Consolidating the social wage through reliable and quality basic services;
- Priority 5:** Spatial integration, human settlements and local government;
- Priority 6:** Social cohesion and safe communities; and
- Priority 7:** A better Africa and world.

3.6.3 National District Development Model and One Plan

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way to speed up service delivery to ensure that municipalities are properly supported and adequately resourced. The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting and implementation over multi-year planning and electoral cycles. Although each sphere, sector or entity has its distinct constitutional powers, functions and responsibilities, they cooperate and undertake collaborative planning, budgeting and implementation processes converging developmental efforts at the district / metropolitan level.

The objectives of the DDM are to:

- solve the silos at a horizontal and vertical level;

- ✦ maximise impact and align plans and resources at our disposal through the development of “One District, One Plan and One Budget”;
- ✦ narrow the distance between people and government by strengthening the coordination role and capacities at the district level;
- ✦ ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level;
- ✦ build government capacity to support municipalities;
- ✦ strengthen monitoring and evaluation at district and local levels;
- ✦ implement a balanced approach towards development between urban and rural areas;
- ✦ ensure sustainable development whilst accelerating initiatives to promote poverty eradication, employment and equality; and
- ✦ exercise oversight over budgets and projects in an accountable and transparent manner.

Nationally, the DDM is expressed through the development of a One Plan. The One Plan is defined as an intergovernmental plan setting out a 25-30 years long-term strategic framework (consisting of short, medium and long-term actions) to guide investment and delivery about each of the districts and metropolitan spaces. This plan for each space is to be jointly developed and agreed to by all three spheres of government.

3.6.4 Integrated Urban Development Framework (IUDF)

The National Development Plan (NPD) indicated that by 2030 South Africa should observe meaningful and measurable progress in creating more functionally integrated, balanced and vibrant urban settlements. To attain this goal, the Department of Cooperative Governance, working in collaboration with other national departments and other role-players, developed the Integrated Urban Development Framework (IUDF) to transform and restructure South Africa's urban spaces.

The IUDF aims to guide the development of **inclusive, resilient** and **liveable urban settlements**, while directly addressing the unique conditions and challenges facing South Africa's cities and towns.

To achieve the transformation vision, four (4) overall strategic goals were introduced:

Figure 15: IUDF Strategic Goals and Levers

Source: Integrated Urban Development Framework

The above IUDF strategic goals give rise to nine (9) policy levers, the implementation of which depends on its integration into municipal development planning tools such as the Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

3.7 Provincial Policy Direction

3.7.1 The Western Cape Government Provincial Strategic Plan 2019 – 2024

The Western Cape Provincial Government (WCG) committed itself, through its recently adopted Vision Inspired Priorities (VIPs), to building a values-based competent state that enables opportunity and promotes responsibility in a safer Western Cape.

The VIPs are as follows:

1. Safe and Cohesive Communities (VIP 1);
2. Growth and Jobs (VIP 2);
3. Empowering People (VIP 3);
4. Mobility and Spatial Transformation (VIP4); and
5. Innovation and Culture (VIP 5).

Figure 16: WCG: Vision Inspired Priorities (VIPs)

3.8 The Cape Winelands District Municipality (CWDM) Strategic Focus

The Cape Winelands District Municipality has set the following strategic objectives for their District:

Table 24: CWDM Strategic Objective 2022 – 2027

SOs	Strategic Objective 2022 – 2027
SO 1	Creating an environment and forging partnerships that ensure social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SO 2	Promoting sustainable infrastructure services and a transport system which fosters social and economic opportunities.
SO 3	Providing effective and efficient financial and strategic support services to the Cape Winelands District Municipality.

3.9 Local Policy Direction

3.9.1 Stellenbosch Municipality

The intent of the Strategic goals for the 1st Review of the 5th Generation IDP 2022 – 2027 will remain the same as the strategic goals of the 5th Generation IDP 2017 – 2022.

The table below indicates how the municipality's Strategic Focus Areas are aligned with National, Provincial and District Plans.

Table 25: Horizontal Alignment Matrix

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	National Strategic Outcomes	Medium-Term Strategic Framework	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 1 - Valley of Possibility	Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all (8)	Ensuring decent employment through inclusive economic growth (4)	Economic transformation and job creation (2)	Growth and Jobs (VIP 2)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 2 - Green and Sustainable Valley	Take urgent action to combat climate change (13) Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss (15)	Ensuring that the environmental assets and natural resources are well protected and continually enhanced (10)	Social cohesion and safe communities (6) Spatial integration, human settlements and local government (5)	Empowering People (VIP 3)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District through economic, environmental and social infrastructure investment.
	Make cities and human settlements inclusive, safe, resilient and sustainable (11)	Ensuring vibrant, equitable and sustainable rural communities with food security for all (7) Promoting sustainable human settlements and improved quality of household life (8)	Social cohesion and safe communities (6)	Mobility and Spatial Transformation (VIP 4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 3 - Safe Valley	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels (16)	Ensuring all people in South Africa are and feel safe (3)	Social cohesion and safe communities (6)	Safe and Cohesive Communities (VIP 1)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District.

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	National Strategic Outcomes	Medium-Term Strategic Framework	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 4- Dignified Living	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4) Ensure healthy lives and promote well-being for all at all ages (3)	Providing improved quality of basic education (1) Enabling a long, healthy life for all South Africans (2)	Education, skills and health (3)	Growth and Jobs (VIP 2)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
	Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation (9)	Setting up an efficient, competitive and responsive economic infrastructure network (6)	A capable, ethical and developmental state (1)	Empowering People (VIP 3)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 5- Good Governance and Compliance	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels (16)	Achieving an accountable, effective and efficient local government system (9) Creating a better South Africa and a better and safer Africa and the world (11) Building an efficient, effective and development-oriented public service and an empowered fair and inclusive citizenship (12)	A capable, ethical and developmental state (1) Education, skills and health (3) Social cohesion and safe communities (6)	Innovation and Culture (VIP 5)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
		Achieving a responsive, accountable, effective and efficient local government system (9)	A capable, ethical and developmental state (1)	Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

CHAPTER 4:

Spatial Development Framework

4.1 The Purpose of the Spatial Development Framework

Spatial Development Frameworks (SDFs) serve to provide strategic direction and align the efforts of all government spheres as they apply within the municipal area. The SDF serves to give a coherent spatial direction to the municipal Integrated Development Plan (IDP), and provide a planned and integrated approach to achieve the shared spatial development vision, goals, and objectives for sector plans of government over a short-term (5 years), as well as over a strategically longer-term (10 – 20 years), to achieve the desired spatial growth and development pattern of the municipality. Most importantly, the SDF outlines the municipality's spatial agenda to its service departments, ensuring that their sector plans, programmes, and projects are grounded in sound and common spatial logic.

In essence, the SDF is a spatial contract between all spheres of government, as well as the private sector, which is binding and must assist in integrating, coordinating, aligning, and expressing development efforts and should be actively supported through the specific arrangement of prioritising, mobilising, sequencing, and implementing of investment in priority spatial structuring areas to achieve the legislated development principles of sustainable development. Therefore, the SDF and the Capital Expenditure Framework (CEF) indicate where and how the municipality intends to channel public investment, influence, and other resources at its disposal. In broad terms, this includes where infrastructure and public facility investment will be prioritised, where private sector partners will be sought in development, and how the municipality will view development applications through its spatial planning and land use management system.

4.2 The relationship between the IDP and SDF

Figure 17: Relationship: IDP and SDF

At its core, SDFs deal with the art and science of shaping places at different scales (or areas of influence, from large regions to municipal jurisdictions or neighbourhood precincts). The SDF aims to:

- ✚ Enable a long-term spatial vision for the future of regions and places to be best developed over time that is based on evidence, local distinctiveness and community-derived objectives;
- ✚ Translate this vision into a set of strategic municipal planning, policies, priorities, programmes,

and land allocations together with the public-sector resources (budget) to deliver them;

- ✚ Create a framework for private investment and regeneration that promotes economic, environmental and social well-being for a specific region or area i.e. the Adam Tas Corridor Local Areas Spatial Development Framework and Development Guidelines (October 2022); and
- ✚ Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation through its CEF (medium-term) and IDP (short-term).

In the case of Stellenbosch Municipality, the SDF, CEF, and IDP must answer the following questions: "How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place, where will it take place, and who will be responsible for what aspect of the development?"

4.3 The Legislative Framework of Municipal SDFs

With the enactment of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), a new planning regime was introduced in South Africa. The coherent legislative system has been designed to spatially transform the country in its democratic era. In broad terms, SPLUMA differentiates between two components of the planning system:

- ✚ Spatial Development Frameworks; and
- ✚ The Land Use Management System (LUMS).

Section 12(1) of SPLUMA sets out general provisions which apply to the preparation of all scales of SDFs. These provisions require that all SDFs must:

- ✚ Interpret and represent the spatial development vision of the responsible sphere of government and competent authority;
- ✚ Be informed by a long-term spatial development vision;
- ✚ Represent the integration and trade-off of all relevant sector policies and plans;
- ✚ Guide planning and development decisions across all sectors of government;
- ✚ Guide a provincial department or municipality in taking any decision or exercising any discretion in terms of this Act or any other law relating to spatial planning and land use management systems;
- ✚ Contribute to a coherent, planned approach to spatial development in the national, provincial and municipal spheres;
- ✚ Provide clear and accessible information to the public and private sectors and provide direction for investment purposes;
- ✚ Include previously disadvantaged areas, areas under traditional leadership, rural areas, informal settlements, slums and land holdings of state-owned enterprises and government agencies and address their inclusion and integration into the spatial, economic, social and environmental objectives of the relevant sphere;
- ✚ Address historical spatial imbalances in development;
- ✚ Identify the long-term risks of spatial patterns of growth and development and the policies and strategies necessary to mitigate those risks;
- ✚ Provide direction for strategic developments, and infrastructure investment, promote efficient, sustainable and planned investments by all sectors and indicate priority areas for investment in land development;
- ✚ Promote a rational and predictable land development environment to create trust and stimulate investment;
- ✚ Take cognisance of any environmental management instrument adopted by the relevant environmental management authority;
- ✚ Give effect to national legislation and policies on mineral resources and sustainable utilisation and protection of agricultural resources; and
- ✚ Consider and, where necessary, incorporate the outcomes of substantial public engagement,

including direct participation in the process through public meetings, public exhibitions, public debates and discourses in the media and any other forum or mechanisms that promote such direct involvement.

Chapter 2 of SPLUMA sets out the development principles that must guide the preparation, adoption and implementation of any SDF, policy or by-law concerning spatial planning and the development or use of land. The table below summarises the five SPLUMA principles and what they mean.

Table 28: SPLUMA and Development Principles

Principle	Meaning
Spatial justice	<ul style="list-style-type: none"> Past spatial and other development imbalances must be redressed through improved access to and use of land. SDFs (and associated policies) must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements, and areas characterised by widespread poverty and deprivation. Spatial planning mechanisms, including zoning scheme by-laws, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons. Land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas and informal settlements. Land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas. In considering an application, a Municipal Planning Tribunal may not impede or restrict the exercise of its discretion solely because the value of land or property is affected by the outcome of the application.
Spatial sustainability	<ul style="list-style-type: none"> Promote land development that is within the fiscal, institutional and administrative means of government. Give special consideration to the protection of prime and unique agricultural land. Uphold consistency of land use measures under environmental management instruments. Promote and stimulate the effective and equitable functioning of land markets. Consider all current and future costs to all parties for the provision of infrastructure and social services in land developments. Promote land development in sustainable locations, limit urban sprawl, and result in viable communities.
Efficiency	<ul style="list-style-type: none"> Land development must optimise the use of existing resources and infrastructure. Decision-making procedures must be designed to minimise negative financial, social, economic or environmental impacts. Development application procedures must be efficient, and streamlined, and timeframes adhered to by all parties.
Spatial resilience	<ul style="list-style-type: none"> The flexibility of spatial plans, policies and land use management systems accommodate to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.
Good administration	<ul style="list-style-type: none"> All spheres of government must ensure an integrated approach to land use and land development, guided by spatial planning and land use management systems. All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of SDFs. The requirements of any law relating to land development and land use must be met timeously. Transparent processes of public participation are incorporated within the preparation and amendment of spatial plans, policies, land use schemes and development applications to allow all parties to provide inputs on matters affecting them. Policies, legislation and procedures must be set to inform and empower members of the public.

At the municipal sphere of government, aligned with SPLUMA, and the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), the Stellenbosch Municipal Land Use Planning By-law (dated 1 December 2015) further outlines minimum standards for SDFs, both in the preparation process and content. In support of SPLUMA, the Department of Rural Development and Land Reform (now known as the Department of Agriculture, Land Reform, and Rural Development) prepared a detailed process and content “Guidelines for the Development of Provincial, Regional and Municipal Spatial Development Frameworks and Precinct Plans”. The Stellenbosch Municipality follows these legislative frameworks and guidelines in its work on the municipal and local SDFs, which is subject to an extensive review every five years, with less comprehensive reviews annually.

4.4 Stellenbosch Municipality's work on its SDF

The Stellenbosch Municipality's work on the longer-term SDF has taken place with the input and oversight of an Intergovernmental Steering Committee (ISC), as prescribed in LUPA, and comprising representatives across spheres of government and sectors. Further, it should be noted that the approved longer-term SDF (dated November 2019), as well as specific sector documents and area studies, sought inputs from various organisations and individuals as part of public participation processes undertaken during various stages of preparing these studies. The extensive review of the SDF as part of the IDP process, as noted in the previous section is currently underway through the legislated project committee process in terms of LUPA and the Stellenbosch Municipal Land Use Planning By-law, which will produce a five-year spatial development plan, which will not detract from the longer-term spatial development vision contained in the adopted and approved SDF.

The sections below provide an overview of the spatial challenges, opportunities, strategies and programmes as reflected in the SDF over the longer term.

4.5 The Spatial Challenges and Opportunities identified in the SDF

The Stellenbosch Municipality SDF attempts to address the spatial dimensions of varied challenges, documented in this IDP and numerous studies and documents produced to date, and dealing with spatial and non-spatial matters.

Framed as a question, the key challenge revolves around how to achieve, through managing the spatial distribution and form of development – primarily land use activities and associated structures, both new and existing – shared and inclusive growth, increased access to opportunities (particularly for disadvantaged citizens), improved sustainability by minimising ecological footprints, and maintenance of the unique sense of place of the settlements and surrounding lands which constitute the municipality.

In addressing these challenges, the SDF has two tasks. The first relates to how activities should be organised and accommodated in space to best address challenges. The second is to guide how other sectors, services, or functional areas, should adjust their focus and work to support the recommended organisation and accommodation of activities in space.

Without re-stating the varied challenges of the municipality outlined in full in the IDP and sector documents, the table below lists specific spatial challenges addressed by the SDF, following the broad themes contained in the SDF Guidelines.

Table 29: Spatial Challenges

Theme	Spatial Challenges
Biophysical context	<ul style="list-style-type: none"> ⬆️ The degradation of key ecological assets and loss of productive agricultural land has been ongoing. ⬆️ The condition of the river systems within the municipality has deteriorated. ⬆️ Climate change is likely to have a significant impact on the natural resource base of the municipal area, which will include a reduction in water, increased temperatures, increased fire risks, and increased incidences of extreme weather events. This in turn will impact agricultural production, scenic landscapes, the liveability of urban areas and the ability to provide basic services such as water and sewerage treatment.
Socio-economic context	<ul style="list-style-type: none"> ⬆️ The population in the municipality will continue to grow above the average provincial rate, and urbanisation rates will increase with settlements absorbing the bulk of growth. ⬆️ The ability of the economy to absorb growth, particularly concerning job creation, is concerning. ⬆️ The informal sector will continue to provide livelihoods to a significant proportion of residents. ⬆️ The growing youthful population, large student population, and the seasonal influx of labour are likely to increase the municipality's dependency ratio, in addition to a smaller base from which the municipality can collect revenue to provide services and opportunities that will improve the lives of the poor. ⬆️ Inequality in the municipal area, and particularly in historic towns such as Stellenbosch and Franschhoek, remains significant and current development patterns are not addressing the issue. ⬆️ Crime rates remain high and the market response i.e. private security provision for those who can afford it, is likely to exacerbate inequality.

Theme	Spatial Challenges
	<p>⬆️ Upgrading and provision of basic services and housing will remain the focus of the municipality, including other government agencies for the foreseeable future. The focus on these priority areas can lead to foregoing investment in other areas that would likely have more socio-economic spin-offs and result in improved place-making.</p> <p>⬆️ The municipality's inability to provide basic services (e.g. refuse removal) leads to dumping, environmental degradation and resulting health-related problems.</p>
Built environment context	<p>⬆️ Infrastructure backlogs – especially in poor areas – and essential municipal infrastructure requires significant investment and maintenance. This applies to all basic services (electricity, water supply, wastewater management and solid waste disposal).</p> <p>⬆️ The need for housing and shelter – both for the lower-income groups and those with employment – has not been adequately met. The existing housing pipeline will not meet the need of those requiring state assistance, and little is built which is affordable to ordinary workers. A pattern of intermittent land invasions and associated responsive basic infrastructure provision, as well as daily inward commuting of ordinary workers and students, is likely to continue.</p> <p>⬆️ Property and land are inordinately expensive in the municipality, locking out both the poor and lower / middle-income workers from the property market. Without significant intervention in the property market, this situation is likely to worsen.</p> <p>⬆️ Inequality in the municipality is particularly evident in the structure of settlements, with low-density development accommodating the wealthy, while the poor are accommodated in high-density, poor-quality peripheral areas. Significant numbers of people live in informal shelters. Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, amongst other inefficiencies.</p> <p>⬆️ New high-density development mostly focuses on the student market, and target groups using private vehicles.</p> <p>⬆️ Numerous heritage resources located within the settlements are assets of immense value. Many of these, are underutilised and have the potential to become vehicles for innovative development that can contribute to creating a more inclusive economy.</p> <p>⬆️ The existing industrial / manufacturing operations and land holdings in the centre of Stellenbosch town impede large-scale restructuring of the settlement.</p> <p>⬆️ The planned move of Distell – occupying large tracts of strategic land in Stellenbosch town – to Klapmuts presents very significant opportunities for the future development of Stellenbosch, Klapmuts, and the broader regional space economy. If not rigorously managed as a shared initiative between the public and private sectors, the opportunity may be lost. The municipality should focus maximum effort on utilising the opportunity presented to address the needs of the town.</p> <p>⬆️ Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns.</p> <p>⬆️ This regional mobility and growth approach's focus has very high financial, economic, social, and environmental costs, as it is unsustainable and exclusionary to most of the population. The regional focus on private vehicle growth has an adverse consequence on managing transport at the localised level where trips are generated.</p> <p>⬆️ The provision of public transport, non-motorised modes and travel demand management programmes are generally considered local municipal functions, and not a core responsibility or competency of the Province. Given the extent of transport issues in the municipality, the municipality has limited institutional capacity and funding for the management of transport issues. As a result, sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions.</p> <p>⬆️ The municipality continuously updates the online housing demand database and associated mobile applications to provide a valuable source for planning and delivery.</p>
Institutional context	<p>⬆️ The limited capital budget of the municipality, given the extent and depth of community needs.</p> <p>⬆️ Limited funds to address critical issues especially related to infrastructure augmentation and maintenance places the municipality in a tenuous position to reverse backlogs or negative trends in shelter or infrastructure needs.</p> <p>⬆️ Private sector investment is not structured to contribute to the long-term maintenance of common assets or address the developmental needs of the municipal area.</p> <p>⬆️ The growth in rates of income will largely be used to maintain existing infrastructure and services and will likely not focus on new productive investments.</p> <p>⬆️ The limited professional resources of the municipality, specifically concerning the rigorous and dedicated full-time management of large-scale projects.</p> <p>⬆️ Sector planning remains fragmented, and most developments follow a business-as-usual pattern.</p>

4.6 The Spatial Proposals of the SDF

4.6.1 Spatial development 20 -year vision statement

In line with the SM's vision as the "valley of opportunity and innovation" (as contained in the IDP), the vision for spatial development and management is described as follows:

"We envisage a municipal area even more special than it is today; a place of natural beauty, rich in the way it preserves and exposes elements of history and culture, its produce from the land, the quality of its institutions, and the mindfulness and innovations of its people."

It is a future Stellenbosch municipal area that remains familiar; it has retained what differentiates the municipality from other places, its landscapes, historic buildings and settlement patterns, and the specialness of its institutions. It is resilient; it has adapted to the needs of today without losing what is special from the past. It is inclusive; it has accommodated the needs of citizens from all walks of life without fear. It is diverse and therefore productive. Adapting to new needs, and accommodating new people, it becomes the stage for new expressions of culture, new businesses, and new ways of doing.

In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape, the reach and extent of its public institutions, and the capacity and opportunity of its infrastructure. Each provides for a range of citizens from all walks of life, with significant choice in place of residence."

4.6.2 Strategic Focus and Spatial Alignment between the IDP and SDF

The table below illustrates how work on the SDF relates – in terms of its focus and contribution – to achieving the five municipal strategic focus areas as contained in the IDP.

Table 30: IDP Strategic Focus Areas and the SDF

IDP Strategic Focus Area	Related concerns of the SDF	SDF Strategic Direction
SFA1: Valley of Possibility	The way settlements, nature and agriculture are spatially developed and managed to enhance individual and collective livelihood opportunities and enterprise development, and overcome inequity and exclusion.	 Containment of settlements to protect nature / agricultural areas and enable public and non-motorised transport and movement.  A focus on public and non-motorised transport and movement.
SFA2: Green and Sustainable Valley	The way settlements, nature and agricultural areas are spatially developed and managed to maintain and enhance natural resources and ensure a future balance between human settlement and its use of natural resources and opportunity.	Protection of natural areas, agricultural areas, and river corridors.
SFA3: Safe Valley	The way settlements, nature and agricultural areas are spatially developed and managed to ensure individual and collective safety in living, in movement, at work, institutions, and play.	Denser settlements with diverse activity to ensure surveillance.
SFA4: Dignified Living	The way settlements, nature and agricultural areas are spatially developed and managed to ensure equal access to shelter, facilities and services, notwithstanding material wealth, age, gender, or physical ability.	A specific focus is on the needs of "ordinary" citizens, experiencing limited access to opportunity because of restricted available material resources.
SFA5: Good Governance and Compliance	The way settlements, nature and agricultural areas are spatially developed and managed to ensure individual and collective participation – based on accessible information and open processes – in matters related to spatial planning and land use management.	Presenting information, including opportunities and choices in a manner that assists its internalisation by all.

4.6.3 Spatial Proposals and Structuring elements of the SDF

The conceptual framework extracted from the SDF shows the expression of the seven key principles, which include:

Maintain and grow the assets of Stellenbosch's natural environment and farming areas

- ✦ The spatial policies that relate to this principle, focus on protective actions or called urban management.
- ✦ The intent is to protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality.
- ✦ Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives (including settlement hierarchy), and rural guidelines.
- ✦ Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.

Respect, preserve and grow our cultural heritage

- ✦ The spatial policies that relate to this principle, focus on protective actions around specific spatial elements e.g. scenic landscapes, scenic routes, and special places of arrival, whilst also focusing on improving the landscape and public amenities associated with these cultural assets.
- ✦ The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.
- ✦ As far as possible, protect cultural landscape assets – including undeveloped ridgelines, view corridors, scenic routes, and vistas – from development.

Direct growth to areas of lesser natural and cultural significance as well as movement opportunity

- ✦ The spatial policies that relate to this principle, focus on protective actions around specific spatial elements e.g. maintaining the urban edge and following the defined settlement hierarchy.
- ✦ In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include, informal settlement upgrading; residential densification and infill development; mixed land use and improved economic opportunity; improved access and mobility; improved access to community facilities; and improved landscaping and public amenities.

The spatial policies are spatially targeted in priority development areas and include Baden Powell Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts. Clarify and respect the different roles and functions of existing settlements

- ✦ The spatial policies that relate to this principle, focus on protective actions around specific spatial elements e.g. maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected, whilst ensuring that the capacity of existing infrastructure can accommodate change and growth.
- ✦ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements focus on new growth and development primarily in larger settlements (as referenced in principle 3 above), to:
 - a) Minimise associated impacts on the environment, agricultural land, and natural resources.
 - b) Maximise the livelihood opportunity (also referred to as quality of life) by building on the

- availability of existing public facilities and commercial opportunities.
- c) Maximise the sustainability of new facilities and commercial opportunities.
- d) Enable the provision of infrastructure most efficiently and cost-effectively.
- e) Minimise the need for inter-settlement movement.
- f) Maximise opportunity for and use of non-motorised and public transport.
- g) Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
- h) Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.

Clarify and respect the roles and functions of different elements of the movement structure

- ✚ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensure a balanced approach to transport in the municipality, that appropriately serves regional mobility needs and local-level accessibility improvements.
- ✚ The spatial policies actively promote compact, dense, mixed-use development, which reduces and promotes non-motorised and public transport.

Ensure balanced, sustainable communities

- ✚ The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge), work towards and maintain - for each settlement - a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- ✚ Adopting a conservative view towards the extension of existing urban edges over the SDF period.
- ✚ Actively support infill development and adaptive reuse of existing structures.
- ✚ Support increased densities in new, infill, and redevelopment projects.
- ✚ Rationalise space standards - especially for social facilities - and release surplus land for other uses, specifically housing.
- ✚ Support the general upgrading and transformation of existing informal settlements.
- ✚ Expand housing opportunities for a broader range of groups - including lower-income groups and students - particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.
- ✚ Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- ✚ Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- ✚ Ensure work and commercial opportunities are accessible through public transport and NMT to all communities and provide opportunities to emerging and small entrepreneurs.
- ✚ Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, walkability, and so on.

Focus collective energy on a few catalytic areas that offer extensive opportunity and address present risk

- ✚ The spatial policies focussed on major development efforts concerning new mixed-use, industrial, residential and significant changes in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klapmuts.

Figure 18: Consolidated Concept for the Municipal Area (Approved November 2019)

4.7 SDF and CEF Implementation Frameworks

The SPLUMA guidelines require, as part of the mSDF, a high-level Implementation Framework setting out the required measures that will support the adoption of the SDF proposals while aligning the capital investment and budgeting process moving forward. The SDF, and CEF Implementation Framework comprises the following sections:

A proposed settlement hierarchy.

- A proposed settlement hierarchy to inform and guide the investment rationale.
- Priority development areas and themes.
- A policy framework (linked to strategies).
- Guidelines, studies, and information supporting the policies.
- Implications for sector planning and specific development themes, including:
 - Movement;
 - Housing; and
 - Local economic development.
- Implications for inter-municipal planning
- Land use management and regulations.
- Catalytic initiatives.
- Further planning work.
- Institutional arrangements.
- Checklists in support of decision-making.
- A municipal leadership and advocacy agenda related to spatial development and management.

4.7.1 Settlement hierarchy, priority development areas and themes

In terms of the SDF concept, prioritisation of development – at a broad level – is done through two main spatial structuring elements. The first is spatial and targeted at significant future growth in functional and priority development areas. The second is sectoral or thematic, focused on the kind of development to be prioritised.

The functional and priority development areas are categorised into urban and rural nodes and are depicted in figure 19 below, with the detailed description provided in the table:

The spatial areas for priority development over the SDF planning period are:

- Stellenbosch Town;
- Klapmuts; and
- Franschhoek (maintenance).

In terms of sectoral or thematic focus, the spatial development priority in all settlements should be to:

- Upgrade the servicing and transformation of informal settlements;
- Provide housing for lower-income groups in well-located areas (specifically through infill of vacant and underutilised land or redevelopment of existing building footprints);
- Expand and improve public and NMT routes;
- Improve public and community facilities and places (e.g. through clustering, framing them with infill development to improve edges and surveillance, prioritisation for landscaping, and so on); and
- Expand the recognition, restoration, and exposure of historically and culturally significant precincts and places (both in the form and use of precincts and places).

Figure 19: Functional and priority development areas (CEF, March 2021)

The proposed settlement hierarchy for SM, supporting the spatial plan and proposals for the settlement as a whole, is outlined in the table below.

Table 31: Proposed settlement hierarchy for the Stellenbosch Municipality

Settlement	Role	Development and Land Use Management Focus
Primary urban settlements		
Stellenbosch town (Urban node - A)	A significant centre comprising extensive education, commercial and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities.	<ul style="list-style-type: none"> Broadening of residential opportunity for lower-income groups, students, and the lower to middle housing market segments. Upgrade of informal settlements. Retention of University functions in the town. Enablement of the Adam Tas Corridor. Sensitive residential infill and compaction. Drive to established "balanced" precincts. Public transport development, travel demand management, parking controls, and NMT improvements.
Klapmuts (Urban node - B)	Focus on economic development (utilising a favourable location for manufacturing, logistics, and warehousing enterprises) and associated residential opportunities	<ul style="list-style-type: none"> Support for the development of RE / Farm 736 as a lever to economic development utilising a favourable location for manufacturing, logistics, and warehousing enterprises. Balanced housing provision in Klapmuts South, focused on those who can benefit from employment provision through unlocking Klapmuts North. Establishing the Klapmuts town centre. NMT improvements.
Franschhoek (Urban node - C)	Secondary service centre, significant tourist destination, and place of residence.	<ul style="list-style-type: none"> Upgrade of informal settlements. NMT improvements. Sensitive infill within urban edge providing inclusive housing and extended commercial opportunity (also for small and emerging entrepreneurs). Retention of historic character.
Secondary urban settlements		
La Motte (Rural node – 11)	Contained rural settlement.	<ul style="list-style-type: none"> Diversification of existing activities to curtail the need for movement. Sensitive location of diversified uses closer to the R45. Limited further housing development.
Wemmershoek (Rural node – 10)	Contained rural settlement.	<ul style="list-style-type: none"> Possible extension of residential opportunity linked to re-use of the saw-mill site and local employment opportunity.
Groot Drakenstein (Rural node – 7)	Contained rural settlement.	<ul style="list-style-type: none"> Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Dwars River Valley (Rural nodes – 8 and 9)	Contained historic rural settlements.	<ul style="list-style-type: none"> Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Jonkershoek (Rural node)	Contained, but a dispersed collection of institutional, recreational and residential uses.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
Muldersvlei (Rural node – 1)	Contained rural settlement.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
Koelenhof (Rural node – 2)	Contained rural settlement.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail / bus.
Vlottenburg (Rural node – 3)	Contained rural settlement.	<ul style="list-style-type: none"> Gradual expansion of a unique development model based focused on sustainable living and education.
Lynedoch (Rural node – 5)	Contained village and institutional clusters.	<ul style="list-style-type: none"> Containment and limited expansion of existing offerings.
Spier (Rural node – 4)	Contained tourism and cultural centre.	<ul style="list-style-type: none"> Protection of unique historic settlement structure and form.
Raithby (Rural node – 6)	Contained historic rural settlement.	<ul style="list-style-type: none"> Potential future consolidated, inclusive settlement linked to rail/ bus.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg / Lynedoch along the Baden Powell-Adam Tas-R304 could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing opportunity for a range of income groups) and integration with the corridor in terms of public transport. They are therefore not prioritised for

significant development over the *SDF* period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments), and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

The focus on Stellenbosch town and Klapmuts does not exclude all development focus in Franschhoek and the smaller settlements. Rather, it is argued that these settlements should not accommodate significant growth as the pre-conditions for accommodating such growth do not exist to the same extent as in Stellenbosch town and Klapmuts.

What should be emphasised in Franschhoek and smaller settlements are improving conditions for existing residents and natural growth within a context of retaining what is uniquely special in each (from the perspective of history, settlement structure and form, relationship with nature and agriculture, and so on).

4.7.2 Policy Framework

The table below sets out specific spatial policies to support the *SDF* concept and settlement plans. In using the policy framework, it is important to note that one specific policy or guideline should not be highlighted or used exclusively to support a specific initiative. Rather, each policy supports the other; each “frames” the other. Thus, initiatives or proposals should be evaluated in terms of the policy framework as a whole.

Further, the successful implementation of spatial policy and guidelines is often dependent on related, supportive, non-spatial policy. This implies policy alignment across municipal functional areas and services.

The table also includes specific work guidelines which begin to frame the work to be undertaken – or continued – in support of proposed policies.

The table also includes specific work guidelines which begin to frame the work to be undertaken – or continued – in support of proposed policies.

Table 32: Specific work guidelines

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
1.	Maintain and grow the assets of SM's natural environment.	<ul style="list-style-type: none"> As far as possible, protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality. Resist the subdivision of viable agricultural land unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the <i>mSDF</i> objectives, an agri-village in line with provincial policy for the settlement of farmworkers, or the formalisation of the “urban” component of existing forestry settlements (for example Jonkershoek and La Motte). Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form 	<ul style="list-style-type: none"> Proactively maintain and upgrade municipal infrastructure services to limit / mitigate risk to ecological services. Support initiatives to protect water resources, rehabilitate degraded aquatic systems, retrofit or implement water demand management systems, and mainstream water conservation. Support energy diversification and energy efficiency initiatives to enable a transition to a low-carbon, sustainable energy future. Support initiatives to extend public access to natural assets without compromising the integrity of natural areas or ecological services. Support initiatives by the private sector to extend environmental stewardship. Assist in initiatives to diversify, strengthen, and open up new opportunities and jobs in the rural economy, including the identification of strategically located land for land reform purposes. Support initiatives to utilise municipally-owned agricultural 	<ul style="list-style-type: none"> Prepare and implement management plans for municipal nature reserves and other ecological assets. Prepare and implement invasive species control plans for municipal properties. Prepare and implement initiatives for the rehabilitation of rivers and wetlands in urban areas. Develop resource-efficient strategies for all municipal services and land and building development (e.g. compulsory green energy installations in building development, greywater circulation, sustainable urban drainage, etc.). Utilise and contribute to municipal and provincial mapping and planning initiatives that inform land-use decision-making supportive of

		cultural, and settlement characteristics of different settlements.		
5.	Ensure a balanced approach to transport in SM, that appropriately serves regional mobility needs and local-level accessibility improvements.	<ul style="list-style-type: none"> Actively promote compact, dense, mixed-use development which reduces car dependence and enables and promotes the use of public and NMT. 	<ul style="list-style-type: none"> Shift municipal resources to include a greater focus on non-motorised, shared vehicle travel, and public transport solutions. Establish measures to ensure that there is inter-service agreement on the settlement hierarchy, settlement roles, associated functions, modes of transport to be carried out, and development / management approach to be followed concerning different sections of the municipal movement network. Work with the provincial and national government to affirm the proposed categorisation of movement forms, and associated infrastructure and management needs in Stellenbosch. Proactively seek management of travel demand among key stakeholders in SM, in a manner that significantly higher passenger volumes are gradually achieved from existing transport infrastructure. Proactively allocate resources to improve NMT in the municipal area. Strengthen the role played by rail-based public transport, including advocating for a new, lighter, frequent rail service on the Eerste River / Klapmuts rail line as the backbone of transport movement along the Baden Powell-Adam Tas-R304 corridor. 	<ul style="list-style-type: none"> Assess future transport development / improvements concerning the impact on the complete settlement system. Guard against needed / required vehicular routes of necessity resulting in the development of undeveloped land traversed by the route.
6.	Develop all settlements as balanced, inclusive, appropriately serviced, communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land.	<ul style="list-style-type: none"> Work towards and maintain – for each settlement in the municipality – a compact form and structure to achieve better efficiency in service delivery and resource use, the viability of public and NMT, and facilitate inclusion, integration, and entrepreneurship development. Adopt a conservative view towards the extension of existing urban edges over the mSDF period. Actively support infill development and the adaptive reuse of existing structures. Support increased densities in new, infill, and redevelopment projects. Rationalise space standards – especially for social facilities – and 	<ul style="list-style-type: none"> Proactively drive transport demand management programmes (specifically in and around Stellenbosch town) to curtail private vehicle use. Shift more transport resources to the development and operation of effective public transport services and comprehensive provision of NMT. 	<ul style="list-style-type: none"> Review the delineation of restructuring zones to support the mSDF objectives Support development which emphasises public transport / NMT as opposed to private vehicular use. Integrate spatial planning, transport planning (emphasis on public and NMT), and social facilities planning. Move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use. Actively engage – continuously – with adjoining municipalities and provincial

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		release surplus land for other uses, specifically housing.		government to ensure that the integrity of SM's settlements as contained, and balanced communities are maintained (specifically about land use management in adjoining municipal areas).
	Support the general upgrading and transformation of existing informal settlements.		<ul style="list-style-type: none"> • Prioritise basic residential services for poor households, specifically in informal settlements, backyard dwellings, and a minimum level of basic services to marginalised rural settlements. • Resist existing informal settlements being the only viable settlement option for poor households by supporting the identification and servicing of alternative areas for settlement. • Ensure that asset management best practice is followed to maintain existing infrastructure investment and prevent greater replacement cost in future. • Reinforce basic service delivery with good quality urban management to support household and economic asset development. 	<ul style="list-style-type: none"> • Put in place an inter-governmental portfolio of land (existing and earmarked for purchase), an agreed land preparation programme, and a release strategy, for publicly assisted, lower-income housing (including the BNG, FLISP, social / rental, and GAP markets). • Identify alternative settlement locations for poor households, over and above existing informal settlements. • To assist the municipality in housing provision, and support initiatives to house farmworkers on farms (in a manner which secures tenure).
	Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.		<ul style="list-style-type: none"> • The planning of infrastructure and social facilities should accommodate the likelihood of back-yarding and its contribution to livelihood strategies. 	<ul style="list-style-type: none"> • Develop an inclusionary housing policy and guidelines. • Prioritise infill housing opportunities on public land for the BNG, FLISP, social / rental, and GAP markets. • Where possible, proactively plan for back-yarding opportunities in lower-income housing projects. • Actively support the development of student housing in Stellenbosch town.
	Provide and maintain a system of accessible social facilities, integrated with public space and public and NMT routes.		<ul style="list-style-type: none"> • Reinforce social facilities with good quality urban management to ensure service excellence and sustainability. • Focus on fewer but better social facilities. 	<ul style="list-style-type: none"> • Cluster social facilities. • Locate facilities in association with public space and public and NMT routes.
	Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets (e.g. river corridors).		<ul style="list-style-type: none"> • Prioritise open / public space development in poor and denser neighbourhoods of the municipality. • Reinforce open / public space with good quality urban management to ensure use and safety. 	Ensure that the edges between building development and open spaces promote activity and passive surveillance.
	Ensure work and commercial opportunities are accessible through public and NMT to all communities and provide opportunities for emerging and small entrepreneurs.			<ul style="list-style-type: none"> • Avoid large retail malls and office parks in peripheral locations reliant on private vehicular access and which detract from the viability of established commercial and work

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
				areas, and lock out small entrepreneurs.
7.	Actively seek conditions to enable the private and community sectors to align their resources and initiatives with the mSDF principles and proposals.	Conscious of public resource constraints, actively seek and support private and community sector partnerships to expand livelihood opportunities, settlement opportunities for ordinary citizens, and the national imperative to expand participation in the economy.	Develop an incentives package to support private and community sector partnerships in achieving the mSDF principles and proposals.	<ul style="list-style-type: none"> • Enable private and community sector participation by making known the municipality's spatial principles and intent in user-friendly communicate and guidelines. • Require private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on.
8.	Focus major development energy in SM on a few catalytic development areas that offer extensive, inclusive opportunities.	Focus major development effort in SM on: <ul style="list-style-type: none"> • Unlocking development in Klapmuts North. • The Adam Tas Corridor (in Stellenbosch Town). 	<ul style="list-style-type: none"> • Communicate municipal objectives and principles – across functional areas and services – for development and urban management in catalytic areas. • Seek landowner, provincial government, and national government support to develop catalytic areas in the best public interest. • Support the establishment of institutional arrangements solely dedicated to enabling the development of catalytic areas and proceed with work to detail the broader plan and activity programme. • Align municipal infrastructure and social services planning to support development in catalytic areas. • Use municipal and government-owned land assets to support development in catalytic areas. 	<ul style="list-style-type: none"> • Ensure that catalytic areas be developed as inclusive, appropriately serviced communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land. • Prepare land use management measures to enable development in catalytic areas. • Define catalytic areas as "restructuring" or other special-measure areas to enable benefit from national and provincial support and incentives.

4.8 Catalytic Initiatives - Adam Tas Corridor (ATC) Local Areas Spatial Development Framework, Development Guidelines (October 2022) and overlay zone

The most strategically located land in Stellenbosch town comprises large industrial spaces, including land previously occupied by Cape Sawmills and Distell facilities. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces – at scale – can contribute meaningfully to meeting existing challenges and SDF objectives.

In simple terms, the concept is to launch a process of re-imagining and re-purposing the land around Adam Tas Road within Stellenbosch town to enable the maximum potential of this space. This will entail the redevelopment of the Adam Tas Corridor which includes, the area stretching along the R310 and R44 along the foot of Papegaaiberg, from the dis-used Cape Sawmills site to the west of Kayamandi and Cloetesville along the north part of this corridor.

It forms the western edge of the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier/severance effect of the R44 and the railway line. Much of the area was

historically utilised for light industrial and manufacturing purposes. It includes the dis-used Sawmill site, the government-owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, Bergkelder complex, Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloetesville. Under-utilised and disused land in the area measures more than 300ha.

Conceptually, a linear new district within Stellenbosch is envisaged adjacent to and straddling (in places) Adam Tas Road, the R44, and the railway line. Overall, development should be residentially led with a strong mixed-use basis, and high density and should favour non-motorised ("NMT") access to the centre of Stellenbosch Town. It is estimated that Adam Tas Corridor through a preliminary development conceptual framework that the ATC will produce approximately 3 million square metres of bulk within a 293ha area, with 69% earmarked for residential usage.

A central movement system (with an emphasis on public transport and NMT) forms the spine of the area and is linked to adjacent districts south and west of the corridor. The corridor retains west-east and north-south vehicular movement (both destined for Stellenbosch town and through movement) as well as the rail line. Remote parking facilities will enable ease of access within the corridor concept, with passengers transferring via public transport, cycling and walking to reach destinations within the town of Stellenbosch.

The corridor is not envisaged as homogenous along its length, with uses and built forms responding to existing conditions and its relationship with surrounding areas. Conceptually, three (3) areas could be defined, each linked through a sub-district.

- ✚ Grow Stellenbosch town – and accommodate existing demand – in a manner which prevents sprawl, and creates conditions for efficient, creative living and working;
- ✚ Stimulate and act as a catalyst for the development of improved public transport and NMT;
- ✚ Rethink and reconstruct infrastructure, particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development;
- ✚ Integrate Kayamandi and Stellenbosch town seamlessly;
- ✚ Shift new development focus to the west of town, with Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- ✚ Investigating options for alternative parking provision initiatives in and around the town whilst the corridor provides for and promotes a greater focus -on non-motorised transport;
- ✚ Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, also assisting in establishing a compact, less sprawling town, public transport, and NMT; and
- ✚ Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Along the corridor as a whole – depending on local conditions – significant re-use of existing buildings is envisaged. This is seen as a fundamental prerequisite for diversity, in-built character and activity (as re-purpose offers the opportunity for great a variety of spaces). Aspects of the industrial history of the area should remain visible. A range of housing typologies accommodates different income groups and family types.

Redevelopment in terms of the concept offers the opportunity to:

- ✚ Re-imagine the future use of the land encompassed in the ATC;
- ✚ Grow Stellenbosch town – and accommodate existing demand – in a manner which prevents sprawl, and creates conditions for efficient, creative living and working;
- ✚ Stimulate and act as a catalyst for the development of improved public transport and NMT;
- ✚ Reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east

and west of town and releasing land for development;

- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift new development focus to the west of town, with Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- Investigate options for alternative parking provision initiatives in and around the town whilst the corridor provides for and promotes a greater focus on non-motorised transport; and
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, also assisting in establishing a compact, less sprawling town, public transport, and NMT.

Existing manufacturing enterprises can gradually relocate to the north, closer to the N1 logistics corridor (as planned by Distell for their operations).

A Local Spatial Development Framework ("LSDF") for the Adam Tas Corridor as well as comprehensive development guidelines were formally approved by the Council in October 2022 and will be used as the enabling planning framework to realise the implementation of the Adam Tas Corridor over the next 3 – 20 years. This LSDF includes an Implementation Framework that will guide in respect of the following:

- Most appropriate Land Use Strategy;
- Action Areas / Catalytic Projects;
- Framework for Investment; and
- Other enabling Interventions.

Following the implementation framework, the drafting of an overlay zone for the Adam Tas Corridor is currently being prepared and will be included as a special zone in the Stellenbosch Municipality Land Use Planning Bylaw. The purpose of the overlay -zone is to award the zoning rights envisaged by the Adam Tas Corridor LSDF to the individual land portions together with the conditions applicable to each property for the land owner to take up these rights.

Institutional arrangements are critical, which include all spheres of government, private stakeholder involvement and established partnerships. It would include a broad agreement between landowners and the municipality to pursue the corridor development concepts.

To assist Stellenbosch Municipality in coordinating the implementation of the Adam Tas Corridor LSDF and development guidelines, a project management unit is envisaged to be created to coordinate, plan and assist with the implementation of development along the corridor. The project management unit will be formed on an equal basis between the municipality and the private sector involved with the Adam Tas corridor. The purpose of the project management unit is to provide additional capacity and expertise to manage and implement the vision of the Adam Tas corridor.

The Adam Tas Corridor is the start of Stellenbosch's emerging urban transformation district and the vision is to create an integrated urban development corridor that is liveable, safe, resource-efficient, socially integrated, economically inclusive and globally competitive, in which all citizens can actively participate. The Adam Tas Corridor concept will require sustained, committed work over a prolonged period, trade-offs, and a departure from current norms, i.e. investigation of overlay zones e.g. Urban Development Zones ("UDZ"), Special Rating Areas ("SRA"), etc., to be included within the Stellenbosch Municipality Zoning Scheme By-law, 2019.

The emerging objectives for the Adam Tas Corridor are as follows:

- Re-purposing and transforming Stellenbosch Town, using existing under-utilised assets in a manner to benefit all and address critical needs;
- Establishing a process and plan which gives certainty and sufficient flexibility to accommodate the unknown while enabling a *"starting through sharing, learning by doing and using small steps to inform the next methodology"*;
- Broadening opportunity for a range of stakeholders, while accommodating varying degrees of

readiness and material means; and

- To place Stellenbosch in the heart of the most important urban development project in the province.

Figure 20: Adam Tas Corridor Local Areas SDF (October 2022)

4.8.1 Development of Klapmutz

The Greater Cape Metro Regional Spatial Implementation Framework (RSIF) contains very specific policy directives related to Klapmuts, aimed at addressing pressing sub-regional and local space economy issues. Key policy objectives include:

- Using infrastructure assets (e.g. key movement routes) as "drivers" of economic development and job creation;
- Recognition that existing infrastructure in the area (i.e. N1, R101, R44 and the Paarl-Bellville railway line and station) dictate the location of certain transport, modal change or break-of-bulk land uses;
- Recognition of the Klapmuts area as a significant new regional economic node within the metropolitan area and spatial target for developing a "consolidated platform the for export of processed agri-food products (e.g. inland packaging and containerisation port)" and "an inter-municipal growth management priority";
- The consolidation of and support for existing and emerging regional economic nodes as they offer the best prospects to generate jobs and stimulate innovation;
- The clustering of economic infrastructure and facilities along public transport routes;
- Maintaining valuable agricultural and natural assets; and
- Providing work opportunities in proximity to living areas.

There is no doubt that Klapmuts is a potentially significant centre for economic activity and residence

within the metropolitan region and SM, located as it is on the N1 transport corridor which carries 93% of metropolitan freight traffic. To date, the settlement is characterised by residential use and limited commercial and work-related activity.

Public sector resource constraints have prevented the infrastructure investment required to enable and unlock the full potential of the area for private sector economic development as envisaged in the GCM RSIF.

The decision by Distell Limited to relocate to and consolidate its operations in Klapmuts is critical to commence more balanced development of the settlement. Distell Limited proposes to develop a beverage production, bottling, warehousing and distribution facility on Paarl Farm 736/RE, located north of the N1, consolidating certain existing cellars, processing plants, and distribution centres in the Greater Cape Town area. The farm measures some 200 ha in extent. The beverage production, bottling, warehousing and distribution facility will take up approximately 53 ha.

The project proposal includes commercial and mixed-use development on the remainder of the site which is not environmentally sensitive to provide opportunities both for Distell's suppliers to co-locate and for other business development in the Klapmuts North area. The site does not have municipal services, and the proposed development will therefore require the installation of bulk service infrastructure, including water, wastewater treatment, stormwater electricity, and internal roads.

Significant progress has been made in planning for an "Innovation Precinct" or "Smart City" district west of but contiguous to Klapmuts south. This includes a land agreement with the University of Stellenbosch to possibly establish university-related activities in this area. The urban edge has been adjusted in recognition of the opportunity associated with this initiative (see figure 21 below for the concept Development Framework).

Figure 21: Concept Development Framework

Figure 56. The proposed Klapmuts "Innovation Precinct" Concept (Osmond Lange Architects and Planners)

Several issues require specific care in managing the development of Klapmuts over the short to medium term.

- ✚ The first is speculative applications for land use change on the back of the proposed Distell development. Already, a draft local plan prepared by DM has indicated very extensive development east of Farm 736/RE. Distell will not fund the extensive infrastructure required to unlock development here, and arguably, land use change to the east of Farm 736/RE could detract from the opportunity inherent in Farm 736/RE;
- ✚ The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road and a possible NMT crossing over the N1 linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunity enabled north of the N1; and
- ✚ The third is a speculative higher-income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.

Given that management of Klapmuts is split between DM and SM (respectively responsible for the area north and south of the N1), special arrangements will be required to ensure that the settlement as a whole develops responsibly, in a manner which ensures thoughtful prioritisation, infrastructure investment, and opportunity for a range of income groups.

Arguably, recent LSDF planning work commissioned by DM for the area east of Farm 736/RE begins to illustrate the problem of insufficient coordinated planning. The LSDF envisages a very significant extent of development for Klapmuts North. Specifically, in terms of a 20-year growth trajectory, Commercial Office development of 912 354m² is envisaged, Commercial Retail development of 187 839m², and General Light Industrial Development of 370 120m². Several issues emerge:

Firstly, the realism of these land use projections within the context of the regional economy is questioned. To illustrate:

- ✚ Considering the envisaged Commercial Office allocation, it is noted that Cape Town CBD currently has some 940 000m² of office space, Sandton in Gauteng is larger at over 1,2m m² of Commercial Office space, Midrand at some 640 000m², and Century City (some 20 years in the making) at some 340 000m²;
- ✚ Concerning commercial retail space, it is noted that more of this use is envisaged for Klapmuts North than Century City's current 140 000m²;
- ✚ While 370 120m² is provided for General Light Industrial Development, the proposed Distell distribution centre alone will comprise 125 000m², and many new logistic centres recently completed in the Kraaifontein / Brackenfell area range in size between 45 000m² and 120 000m². The master plan prepared as part of the acquisition process of Farm 736/RE foresees a significantly lighter industrial floor area than the 370 120m² indicated in the LSDF.

Secondly, these land use allocations need to be viewed against the policy context, which sees Klapmuts as a regional freight/ logistics hub – with a focus on job creation – and establishing a balanced community. It would appear that the LSDF over-emphasises commercial office and retail development, “exploiting” the areas' access to regional vehicular routes, and private vehicular access, at the expense of job creation at scale – and establishing a regional light industrial hub – serving an existing poorer community in proximity to a freight movement corridor.

Thirdly, it is maintained that the infrastructure service requirements – and affordability – of the projected land use allocations are understated. For example, it is known that any development north of the N1 over and above the proposed Distell distribution centre of 125 000m² will involve very costly reconfiguration and augmentation of intersections with the N1. It would be irresponsible to create expectations around land use without these associated requirements being resolved to a fair degree

of detail.

Finally, Farm 736/RE is remarkably unique; comprising some of the least valuable agricultural lands within the Paarl / Stellenbosch area. It would appear that the LSDF, given the development process for Farm 736/RE, assumes that adjacent land to the east, of higher agricultural value, should also be developed.

4.8.2 Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, it is critical, both for the Adam Tas Corridor and the broader Baden Powell-Adam Tas-R304 development corridor to explore the feasibility of introducing a more frequent and reliable rail service along the Eerste River-Stellenbosch-Muldersvlei-Klapmuts rail line. The aim should be to have a more frequent passenger service along the corridor, connecting larger and smaller settlements. Lighter rail stock – possibly in the form of a “tram” system has been suggested - offering the advantage of safe at grade crossing of the rail line and other modes of transport, in turn, enabling “lighter” infrastructure support for settlement development and concomitant cost savings. Alternatively, the viability of regular bus service along this route should be explored. The SM should commence engagements with PRASA in this regard.

As argued elsewhere in this document, Stellenbosch town and Klapmuts should be the focus for significant settlement growth. It is here, by settlement location concerning broader regional networks and existing opportunities within settlements, that the needs of most people can be met, in a compact settlement form while protecting the municipality's natural and agricultural assets.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth, and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing opportunity for a range of income groups) and integration with the corridor in terms of public transport.

The smaller settlements are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups, and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

4.9 Institutional Arrangements

The SM has dedicated staff resources for spatial planning, land use management, and environmental management organised as the Planning and Economic Development Directorate. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act, 1998 (Act No. 107 of 1998)).

The Planning and Economic Development Directorate will facilitate the implementation of the SDF in terms of institutional alignment, including:

- ✦ The extent to which the main argument and strategies of the SDF are incorporated into the Capital Expenditure Framework, Annual Reports, annual IDP Reviews, future municipal IDPs, and so on;
- ✦ The annual review of the SDF as part of the IDP review process.
- ✦ The extent to which the main argument and strategies of the SDF inform sector planning and resource allocation;
- ✦ The extent to which the main argument and strategies of the SDF inform land use management decision-making;

- ✚ Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- ✚ The mutual responsiveness of the SDF and national, provincial and regional plans, programmes and actions (including the extent to which SDF implementation can benefit from national and provincial programmes and funding).

Over and above institutional arrangements in place, it appears that two aspects require specific focus in support of the *mSDF*.

4.9.1 Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the *SDF*, SM (and other adjoining municipalities) appears to experience increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation, or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for "both sides" of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule). However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed. These challenges and opportunities.

4.9.2 Private Sector Joint Planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- ✚ The municipal human and financial resource base is simply too small to achieve the vision of the *SDF* or implement associated strategies and plans;
- ✚ Many matters critical to implementing the *SDF* fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving *SDF* objectives;
- ✚ It is increasingly evident that individual landowners are finding it difficult to develop – to make the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- ✚ Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- ✚ The municipality's focus is often – and understandably so – on the "immediate", or shorter-term challenges. Much of what is needed to implement the *SDF* or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak and Rhenish complex – in a manner which contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, University, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied

demands in different locations – to lead the work and investment involved.

4.9.3 Further Planning Work

As indicated above, over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth, and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical pre-conditions for significant development include:

- ✦ The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- ✦ Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- ✦ Understanding to what extent settlements can provide local employment, in this way minimising the need for transport to other settlements.

4.9.4 Other local planning initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the *SDF* in more detail. The priority for LSDFs should be determined by the position and role of settlements in the SM settlement hierarchy.

4.9.5 Checklists in Support of Decision-Making

To further assist in aligning day-to-day land use and building development management decision-making and detailed planning – public and private – with the *SDF*, it is proposed that a “checklist” of questions be employed.

If the initiators of development proposals, applicants, officials, and decision-makers all, in general terms, address the same questions in the conceptualisation, assessment, and decision-making related to proposals, a common, shared “culture” could be established where key tenets of the *SDF* is considered and followed continuously.

Although focused on the location, nature, and form of activities in space, the checklist incorporates questions addressing issues beyond space, including matters of resource management, finance, institutional sustainability, and so on.

It is not envisaged that the checklist is followed slavishly in considering every development proposal. Yet, its use is important in ensuring that relevant issues be addressed and discussed to enable decision-making in line with the *SDF* and broader provincial and national planning policy. If, in assessing a proposal or project, posing a question result in a negative answer, the proposal probably requires very careful consideration, further work, or change.

The checklist should not be viewed as static. Rather, it should be reviewed periodically and in parallel with the *SDF* review – perhaps under the leadership of the Municipal Planning Tribunal and with input from all stakeholders – to reflect the municipal spatial planning agenda and challenges.

It is proposed that the questions – together with the SPLUMA principles, and the key *SDF* strategies and policies – are packaged in an easy-to-use and accessible form to facilitate wide usage.

4.9.6 Partnerships

Arguably, the municipal budget is simply too small to achieve the vision of the *SDFs* or implement associated strategies and plans. Also, many matters critical to implementing the *SDF*, fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving *SDF* objectives.

Even if the municipal budget is increased ten-fold, or its staff resources significantly enhanced, it would

still not have the control to do what is needed for the capacity to drive critical projects. The municipality's focus is often – and understandably so – on the “immediate”, or the shorter-term challenges. Much of what is needed requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. It is increasingly evident that individual landowners are finding it increasingly difficult to develop – to make the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak and Rhenish complex – in a manner which contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, University, and investors work together, including undertaking joint planning, the “pooling” of land resources, sharing of professional costs, infrastructure investment, and so on.

The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

There appears to be an opportunity to establish a new partnership with businesses, to the side of the municipality, to drive major integrated projects, specifically the Adam Tas Corridor. Fortunately, Stellenbosch has established (private sector) institutions with an astounding track record in achieving urban development / management objectives (e.g. Historiese Huise). Their work can be expanded, to assist in meeting new challenges, in partnership with the municipality.

CHAPTER 5:

Performance Summary of the 5th Generation IDP 2022 – 2027

5.1 Introduction

The performance reporting on the IDP deliverables for the financial year 2022/23 relating to the first-year implementation of the 5th Generation IDP 2022 – 2027 covers the period from 01 July 2022 to 28 February 2023. The complete performance report until 30 June 2023, will form part of the 2nd Review of the 5th Generation IDP 2022 – 2027.

The reporting focus on the implementation of the Municipal Manager, Mayoral, Mayoral Portfolio and Sector Plans priorities encapsulated throughout the various sections in the IDP document, and the format reflects the IDP deliverables per priority area. The IDP deliverables were revised in January / February 2022 to allow for adequate planning and implementation in the 2023/24 financial year.

The overall assessment of actual performance against targets set for the IDP deliverables as documented in the various sections of the IDP document is illustrated below:

5.2 IDP Performance Reporting: Municipal Manager IDP Priorities for 2022/23

Nine (9) IDP deliverables linked to the Municipal Manager's Priorities across directorates were measured during the 2022/23 financial year. Of the nine (9) IDP deliverables, 4 (44 per cent) were achieved while 5 (56 per cent) are in progress. The IDP deliverables in progress are expected to be completed by 30 June 2023.

Figure 22: Number of Municipal Manager Priorities achieved in the 2022/23 financial year

Figure 23: Percentage achieved: Municipal Manager Priorities- 2022/23

5.3 IDP Performance Reporting: Executive Mayor Priorities for 2022/23

The **Executive Mayoral** 5 – year plan has a total of 58 IDP deliverables linked to nine mayoral outcomes which are applicable for the 5th Generation IDP 2022 – 2027. Of the 58 IDP deliverables which are being measured in the 2022/23 financial year, 4 (7 per cent) were achieved as at 28 February 2023, while 54 (93 per cent) are in progress. The Mayoral IDP deliverables in progress are expected to be completed by 30 June 2023. The actual results of these deliverables will be reported in the 2nd review of the 5th Generation IDP 2022 – 2027.

Executive Mayor IDP Deliverables: 2022/23

Figure 24: Percentage of Mayoral Priorities achieved for the 2022/23 financial year

5.4 IDP Performance Reporting: Mayoral Portfolios for 2022/23

The (nine) 9 **Mayoral Portfolio's** each have a 5 – year plan with specific IDP deliverables and targets applicable for the 2022/23 financial year. A total of 89 IDP deliverables are linked to nine (9) mayoral portfolios which were applicable for the 2022/23 financial year. Of the 89 IDP deliverables with applicable targets for 2022/23, 11 (12 per cent) were achieved while 29 (33 per cent) are in progress. The mayoral portfolio IDP deliverables in progress are expected to be completed in this financial year 2022/23 and 49 (55 per cent) out of the 89 mayoral portfolio IDP deliverables will only be reported on by 30 June 2023.

Figure 25: Mayoral Portfolio IDP Deliverables: 2022/23

Figure 26: Percentage of the Mayoral Portfolios Priorities achieved for the 2022/23 financial year

5.5 IDP Performance Reporting: Sector Plans Implementation for 2022/23

A total of 50 IDP deliverables are linked to the **nine (9) Sector Plans** for the 2022/23 financial year. Of the 50 IDP deliverables with applicable targets for 2022/23, 12 (24 per cent) were achieved while 35 (70 per cent) are in progress. The Sector Plan IDP deliverables that are currently in progress are expected to be completed in 2022/23 and 3 (6 per cent) out of the 50 IDP deliverables will only be reported on by 30 June 2023.

Figure 27: Sector Plans IDP deliverables: 2022/23

Figure 28: Percentage of Sector Plan IDP deliverables for 2022/23

CHAPTER 6:

One Plan: Service delivery, budget, programmes and projects

6.1 Introduction

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way, where there is higher performance and accountability for coherent and effective service delivery and development outcomes.

The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting and implementation over multi-year planning and electoral cycles. Although each sphere, sector or entity has its distinct constitutional powers, functions and responsibilities, they cooperate and undertake collaborative planning, budgeting and implementation processes converging developmental efforts at the district / metropolitan level.

It is acknowledged that the DDM introduces a new planning instrument in the form of the **One Plan**. This process comes into a planning environment where there are existing planning instruments at local, provincial, and national levels of government. However, the One Plan is not meant to replace any of the existing prescribed development, departmental strategic and annual performance plans that each sphere, department and state entity is responsible for or required to develop. The One Plan is rather informed by these plans and once in place, it will guide the review of these plans and budgets.

The Western Cape Government-specific approach to the DDM is called the **Joint District and Metro Approach (JDMA)**. The JDMA envisages the three spheres of government to converge, using Intergovernmental (IGR) engagements, to develop similar Western Cape strategic, development and planning priorities with aligned budgets and accelerated implementation for service delivery.

The **Joint District and Metro Approach (JDMA)** -

- ✚ is a geographical (district) and team-based and citizen-focused approach;
- ✚ has the output of a single implementation plan to provide planning and strategic priorities, developmental initiatives, service delivery and capacity building;
- ✚ has the desired outcome of improving the living conditions (lives) of citizens;
- ✚ has a horizontal interface (between provincial departments) and a vertical interface (national, provincial and local government spheres);
- ✚ does not exclude local municipalities;
- ✚ is not a functions and power debate; and
- ✚ promotes collaboration using the District Coordinating Forum as the governance instrument for co-planning, co-budgeting, and co-implementation to strengthen service delivery to communities.

This chapter will provide details from all three spheres of government to give effect to the objectives and strategies contained in the 5th Generation Integrated Development Plan.

6.2 Relationship between the One Plan and Integrated Development Plan (IDP)

The One Plan does not replace the Integrated Development Plans of municipalities as the “single, inclusive and strategic plan for the development of the municipality” but is meant to strengthen and enhance the IDPs and other plans of the municipalities. It is foreseen to provide greater certainty and

direction for the IDPs. The IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Below is a comparative analysis of the One Plan and IDP:

Figure 29: Comparative analysis of the One Plan and IDP

6.3 National and Provincial Government Priorities

6.3.1 State of the Nation Address (SONA) 2023

President Cyril Ramaphosa presented the State of the Nation Address (SONA) on 09 February 2023.

The following are key highlights from the SONA:

Load shedding

- Minister of Cooperative Governance and Traditional Affairs Nkosazana Dlamini Zuma had gazetted the declaration of the State of Disaster.
 - The state of disaster will enable the government to provide practical measures that are needed to support businesses in the food production, storage and retail supply chain, including the rollout of generators, solar panels and uninterrupted power supply;
 - It will enable the government to exempt critical infrastructure such as hospitals and water treatment plants from load shedding, if technically possible; and
 - It will enable the government to accelerate energy projects and limit regulatory requirements while also maintaining rigorous environmental protections, procurement principles and technical standards.
- Ensuring the Electricity Regulation Amendment Bill is passed to transform the energy sector and establish a competitive electricity market.

Unemployment

- Implementation of several programmes aimed at ensuring that young people were introduced to the world of work.

Poverty and the rising cost of living

- The National Treasury was considering the feasibility of urgent measures to mitigate the impact of load shedding on food prices.

Crime and Corruption

- Significantly more funding would be made available for the police, the National Prosecuting Authority and the Special Investigation Unit.

6.3.2 State of the Province Address (SOPA) 2023

Premier Alan Winde presented the State of the Province Address (SOPA) on 16 February 2023.

The following are key highlights from the SOPA:

The Energy Crisis

- An Energy Council has been established to focus on both the short-term crisis but also the longer-term;
- Development of an energy plan for the province that informs our short-term responses;
- Responding to the short-term impact of load shedding now on government services;
- Securing diesel to keep essential public services running during load shedding;
- Helping buffer schools from load shedding;
- Providing poorer households with "power packs" that help reduce the impact of load shedding on daily tasks;
- Assisting SMMEs in assessing and implementing alternative energy options.

Water and Health:

- Emergency funding will be made available to municipalities to ensure safe drinking water and working sewage infrastructure during rolling blackouts.
- Funding to be used to purchase backup generators for the treatment and supply of water services.

WiFi and Connectivity:

- Ensuring citizens have access to information.

Renewable Energy / Green Economy

- The Western Cape government is on a drive to increase energy resilience, not only to mitigate the effects of load shedding and the resulting economic damage but also to highlight the immense potential the power generation sector, specifically the green economy, has in being able to stimulate growth, attract investment and create employment.

Municipal Energy Resilience

- Key intervention of the Western Cape Government in addressing the power crisis is the Municipal Energy Resilience (MER) plan, a local government-level programme that develops, supports and builds capacity at municipalities across our province to implement renewable energy projects.
- The municipalities part of the programme is the City of Cape Town, George, Mosselbay, Stellenbosch and Saldanha.
- Stellenbosch is working towards procuring energy from Independent Power Producers.

Infrastructure Development

- The aim is to prioritise the importance of developing and maintaining critical infrastructure in the province, both as a means to ensure roads, bridges, sewerage systems, and other development projects, are of high quality and safe to use.

Education Infrastructure

- The Western Cape Government will continue to expand the province's schooling environment.

Social Housing

- ✦ The province has committed to creating 9395 housing opportunities.

Health Infrastructure

- ✦ The province government will continuously be expanding health services to meet the needs of a growing population.

Growth For Jobs

- ✦ "Our Growth For Jobs" strategy gives expression to the government's radical drive to drastically reduce unemployment, achieve breakout growth and offer residents meaningful opportunities to prosper.
- ✦ The strategy sets out a comprehensive and ambitious goal for the Western Cape of growing the provincial economy by between 4 and 6% by 2035.
- ✦ The goal is to fuel and stimulate economic growth to achieve an R1 trillion provincial GDP target by 2035. This would require an annual average growth of 3.8% until 2035, translating into 600 000 new jobs.

Youth Interventions

- ✦ The Western Cape's employment figures are better than the rest of the country, more must be done to enable job growth.

Agriculture

- ✦ In the new financial year, the WCG is to support 3 000 household food gardens each year over the medium-term, as well as 85 community and school food gardens out of an annual budget of R32 million.

6.4 Status Quo on Public Infrastructure Spend

This section reflects on provincial and municipal infrastructure priorities within the Stellenbosch area for 2021/22.

6.4.1 Social Infrastructure

Spending on social infrastructure aids in social development and has the spill-over effect of enabling economic growth. A total of 41.1 per cent of the total WCG infrastructure allocation towards the Stellenbosch municipal area will be spent on social infrastructure. As displayed in the pie chart, the WCG will be spending 10.2 per cent (R17.0 million) of the total infrastructure budget in the municipal area on the Education function. Spending on education is crucial as it can serve to improve education outcomes and skills levels within a community, and more importantly, alleviate poverty through increased long-term income for individuals. A healthy and resilient community increases productivity and reduces pressures on government resources.

The WCG will in 2021/22 spend R344 000 on Health-related infrastructure within the municipal area. An allocation has also been made by the WCG towards the Housing function (R51.4 million; 25.1 per cent) to improve the quality of life of individuals within the municipal area. The municipality allocated R9.9 million towards the Housing function.

Community safety is a cornerstone of the Western Cape Economic Recovery Plan. Crime has a negative impact on the quality of life of individuals, but also on the economy by deterring private investment and causing business losses. It further creates a burden on government resources in terms of justice system costs, victim assistance and replacement of assets. The municipality has as such allocated R15.6 million (3.3 per cent) of its capital budget towards the Public Safety function.

Figure 30: Provincial Infrastructure Spend

Source: Western Cape, Social-Economic Profile 2021

6.4.2 Economic Infrastructure

Economic infrastructure is defined as infrastructure that promotes economic activity. Considering the sluggish economic growth throughout the country, spending on economic infrastructure is crucial to stimulating economic activity. The WCG will in 2020/21 spend R98.6 million on economic infrastructure, more specifically towards road transport and public works. Road transport infrastructure goes a long way towards unlocking the region's economic potential, especially due to it having the largest natural port in Africa and being a tourist destination.

The municipality assists in this regard with its contribution of R61.5 million (13.0 per cent of total municipal infrastructure spending) towards road transport.

Figure 31: Municipal Infrastructure Spend

Source: Western Cape, Social-Economic Profile 2021

6.4.3 Trading Services

Basic services are crucial to improving the living conditions of citizens within the municipal area and enabling economic activity for businesses via access to water, electricity, sanitation and refuse removal. The municipality will 2021/22 channel R283.2 million towards trading services to reduce backlogs, improve service delivery standards, provide for future residential developments and to roll out basic services to informal settlements.

The 2021/22 trading services budget is mostly focused on water (R100.0 million; 35.2 per cent), wastewater management (R96.1 million; 33.9 per cent) and electricity services (R79.5 million; 28.1 per cent). A smaller allocation of R7.9 million (2.8 per cent) has been made towards the solid waste management function.

Figure 32: Trading Services

Source: Western Cape, Social-Economic Profile 2021

6.5 Intergovernmental Budgetary Allocation

The infrastructure projects and related capital projects listed below are in various stages of implementation, with certain projects being in the planning phases, others in implementation with construction in progress and some in the close-up phase of the project.

Table 33: Provincial Infrastructure Projects and Programmes MTEF period 2023/24 – 2025/26

IDP Ref No	Provincial Department	Number of Projects	Value (all amounts rounded to R'000)						MTREF Totals (R'000)

6.6 Cape Winelands District (CWD) JDMA Implementation Plan

A **CWDM JDMA profile** was developed in 2020 and updated in November 2021. The Cape Winelands District Profile - 2020 Perspective is a first-generation knowledge product to provide information and evidence to government stakeholders and also to:

- ✚ Provide an information source that at a glance highlights what needs to be maintained, the strengths and challenges facing the Cape Winelands District (i.e. set the context and provide the government with an intergovernmental understanding of key development trends and patterns within the District); and
- ✚ Assist in informing catalytic or strategic projects for the Joint District and Metro Approach Implementation Plan for the longer-term development of this geographical area that is both focused and targeted, but also implementation-ready, resilient, coordinated and integrated.

Given the above, the following Strategic Priorities have been identified for inclusion in the CWD JDMA Implementation Plan and approved by the District Coordinating Forum (DCF).

- ✚ Waste minimisation and management solutions
 - Regional Landfill
 - Waste Diversion Strategies
 - Integrated Waste Management Plan
 - Waste Conference
- ✚ Resource Resilience
 - Climate Change, Water Management and Wildfire Urban Interphase Risks
 - **Municipal Energy Resilience Programme**
- ✚ Infrastructure management and development
 - N1 Eastern by-pass
 - ESKOM Infrastructure delays (Witzenberg)
 - Provision of Basic Services for Prioritised Informal Settlements (Drakenstein)
- ✚ Economic Recovery, long-term unemployment and its consequences
- ✚ Urbanisation
 - Mega Human Settlements monitoring (TRANSHEX, Vlakkeland and Vredebes)
 - Land invasions – Kluitjieskraal
- ✚ Community Safety, Risk Reduction and improved Disaster Response
 - District Plan
 - Area-based Plan (Witzenberg)
 - SANTAM support
- ✚ Municipal Business Sustainability
 - Research on Financial Sustainability:
 - Shared Service Model development
 - Revenue Collection: ESKOM (Witzenberg)
 - External Stakeholder involvement
 - Communication and IGR
 - Data Governance and Profile update
 - Operational Support

6.6.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations

The Municipal Energy Resilience (MER) Project was developed following an amendment to Schedule 2 of the Electricity Regulation Act in 2020, allowing municipalities to generate electricity. The key objectives of the MER Project are development, support, and capacity building to implement renewable energy projects in municipalities across the province for municipalities, businesses, and households to generate, procure and sell electricity. The project aims to secure reliable electricity supplies for the province and increase economic resilience. The project includes four approaches: creating space for small-scale embedded generation (SSEG), providing assistance in procurement processes for municipalities to source energy from independent power producers (IPPs), building a business case for utility-scale to-power generation, and finally, reforming the sector. The Stellenbosch Municipality and five other candidate municipalities are participating in the first phase of the MER Project.

This project will look at several innovative renewable energy technologies and scales, as well as cost options, the size of the investment needed, location issues, risks, municipal readiness needs, infrastructure needs, timelines for getting capacity onto the grid, transaction and procurement mechanisms, and regulatory issues.

SSEG enables solar photovoltaic (PV) systems to be grid-tied and feed in any excess electricity generated. Registering a feed-in system allows one to export excess electricity to the grid and receive credit based on the SSEG tariff. This is structured to support PV system owners while covering the cost of their electricity services.

6.6.2 Cape Winelands District Joint District Approach

The following Strategic Projects apply to the Stellenbosch municipal area:

Figure 33: Cape Winelands District Joint District Approach

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH					
Municipal Priority	Key Initiative (s)	Municipalities Involved	Project	Project lead and team ((link to existing technical structures and / or projects)	Action/s
Provincial Priority (Vision Inspired Priority 2) – Growth and Jobs					
Waste minimisation and management solutions (priority project)	Integrated Waste Management Plan	All municipalities	Review of Integrated Waste Management Plan	CWDM, DEA, PT, DLG and DEDAT	<ul style="list-style-type: none"> Update the JDMA Implementation Plan in terms of DEADP lead on Waste. Western Cape Provincial Government to assist with Supply Chain Management challenges. Waste Management Conference will be arranged as soon as the new Council is fully functional.
Waste minimisation and management solutions (priority project)	Establishment of a Regional Waste Management Facility	All municipalities	Regional Waste Management Facility: Conduct a section 78 investigation and implement the recommendations		
Resource Resilience	Water Governance and Water Service Development Plan Joint Strategy: Bulk Storage Facilities (to provide for drought) Local Economic Development / Growth and Development Strategy (for the District to address risks associated with Climate Change / Water Security)	All municipalities	Municipal Energy Resilience Programme	DEDAT, Stellenbosch Municipality and Drakenstein Municipality	<ul style="list-style-type: none"> Specific pioneering projects for Drakenstein and Stellenbosch were identified. DEDAT did a proxy to cost supply studies required by NERSA. The next step is to compile a roadmap on the pioneering projects and the implementation thereof. DEDAT to establish an MER Fund, to assist municipalities to prepare for the studies and enable them to look at new generation capacity specifically for Renewable energy. Wheeling support for individual municipalities is in process of being finalised.
Economic Recovery, long term unemployment and its consequences (priority project)	Address factors associated with Youth unemployment	All municipalities	Economic Recovery Plan	CWDM, DLG, DEDAT, LED officials in local municipalities: Drakenstein, BVW, Witzenberg, Langeberg, Stellenbosch and provincial officials and associated institutions	Further offline discussions will be held regarding unemployment.

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH

Municipal Priority	Key Initiative (s)	Municipalities Involved	Project	Project lead and team ((link to existing technical structures and / or projects)	Action/s
Provincial Priority (Vision Inspired Priority 2) – Growth and Jobs					
				Sub team further proposed to ensure that skills development and socioeconomic challenges are addressed in long-term DHET, DRDLR, DoTP, DoA, LGSETA, DoE, DLG, DEA&DP, DLG CWD, DLG Training, DEDAT, DSD, DoH, DTPW, CWDM SDF, Community Safety and PT	
Municipal Business Sustainability (priority project)	Saving costs across certain functions	All municipalities	Shared Service Model Development	CWDM, DLG and all local municipalities	Follow up on progress with the appointed service provider.
Data Governance and JDMA Profile	Towards developing a Dynamic Profile and sharing data	All municipalities	Data Governance and JDMA Profile	CWDM, DLG, DoTP, DEA&DP, PT, DSD, STATS SA, CWDM, Drakenstein Municipality, Stellenbosch Municipality, Breede Valley Municipality, Witzenberg Municipality	<p>↓ Data Governance is a transversal JDMA Project.</p> <p>↓ CEI is busy drawing up a Memorandum of Understanding (MOU) for Metros and non-Metros.</p> <p>↓ Provincial governance structures are being set up and aligned with local government in the Western Cape. This is being done with support from the Department of the Premier and will address monitoring and evaluation,</p>

6.7 Agricultural Interventions

In support of the Western Cape Department of Agriculture Strategic Plan, the municipality has identified two priority interventions on which the municipality will embark in the **period 2022 – 2027**.

Table 35: Agricultural Interventions for 2022 – 2027

Project Rating					
	Project completed.		Project in progress.		Not completed / No budget available / District Function / Provincial Function

Table 36: Agricultural Interventions

Proposed Municipal Actions in Support of the Strategic Focus Areas of the Western Cape Department of Agriculture					Target and Progress Rating					Performance Comment
Priority Area	Desired Municipal Deliverable	Status Quo within Municipality	Proposed Local Intervention (appropriate municipal action)	Timeframe to deliver (Short / medium / long term or ongoing)	2022/23	2023/24	2024/25	2025/26	2026/27	
Farmer Support	Lease agreement for use of commonage land (e.g. Terms of the lease, roles and responsibilities of each party, preference for individual agreements, and need for longer leases)	In 2020, two (2) land parcels were identified and advertised for emerging farmers. The process is to be finalised.	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers	Medium / long term	2	2	2	2	2	Sixteen (16) farming applications have been received.
						n/a	n/a	n/a	n/a	Assessment of farming applications has been completed. Four applications have been shortlisted for potential allocation on the two portions of available land.
Market Access	Infrastructural development that supports agriculture development value chain and market access	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers.	Ensuring vibrant, equitable and sustainable rural communities with food security for all	Medium / long term	2	2	2	2	2	An item will be prepared for Council for the approval of the allocation of land.
						n/a	n/a	n/a	n/a	

6.8 Stellenbosch Municipality Operational Support Plan

The projects listed in the table below were identified as projects / programmes / initiatives that would require assistance and funding from other spheres of government:

Table 37: Stellenbosch Municipality Operational Support Plan

Project / Programme/ Initiative	Responsible Internal Department/ Agency	Action/s	Estimated Funds
Climate Change Adaptation Strategy (Alien Clearing, River Management and Wildfire Management)	Department Community Service	Implementation of Alien Clearing, River Management and Wildfire Management Plans.	R2 000 000
Mega-human settlement project monitoring	Department: Housing Development	Kayamandi Town Centre: To obtain development rights/township establishment.	R2 000 000
		Jamestown: Housing (Phase 2, 3 and 4): To obtain development rights / township establishment.	R1 500 000
		Erf 7001 and other possible sites for mix-used development in Cloeteville: To obtain development rights/township establishment.	R1 000 000
Stellenbosch Municipality: Resource Resilience: Municipal Energy Resilience	Municipality / DLG / Water Services	Financial support is required for the development of pico hydropower units.	n/a
Stellenbosch Municipality: Resource Management Resilience: Water Management Resilience	Stellenbosch Municipality and DLG	Financial support is required for the development of real-time management control centres.	n/a
Improvements to public transport facilities in rural and semi-rural areas within the Stellenbosch Municipal area	Department: Roads, Stormwater and Transport	Upgrading and implementing new Taxi and Bus stops in rural and semi-rural areas within the Stellenbosch municipal area.	n/a
Improvements to the NMT network in rural and semi- rural residential settlements located within the Stellenbosch Municipal area	Department: Roads, Stormwater and Transport	Construction of Sidewalks and NMT facilities in rural and semi-rural residential settlements located within the Stellenbosch Municipal area.	n/a
Compilation of the Adam Tas Corridor Local Spatial Development Framework	Department: Development Planning (Spatial Planning)	Compilation of a Local SDF for the Adam Tas Corridor Study Area. The Compilation of a Land Use Framework to develop a Development Incentive Overlay Zone (Urban Development Zone).	n/a
Compilation of a Klapmuts Local Spatial Development Framework	Department: Development Planning (Spatial Planning)	Inclusion of Klapmuts within the Cape Metro Regional Spatial Implementation Framework ("RSIF") in partnership with WCG; CoCT; Cape Winelands District and Drakenstein Municipality which focuses on the following themes: <ul style="list-style-type: none"> Smart City Concept; Economic Development and Job Creation; and Cost-effective Services 	n/a
Other Projects, policies, frameworks, programmes and housing pipeline projects outside of the priority areas	Department: Development Planning (Spatial Planning)	Draft Economic Development Strategy (an Approach to Stimulate Economic Growth). <ul style="list-style-type: none"> Inclusionary Housing Policy. Jamestown Housing Project. De Novo. Vaaldradi. Jonkershoek. Erf 7001, Stellenbosch (Soekmekaar). 	n/a

6.9 Gender Mainstreaming

Gender mainstreaming is the process of assessing the impact on women and men of any planned development projects, including policies and programmes. It is a strategy for making women's as well as men's concerns and experiences an integral dimension in the planning, implementation, monitoring, and evaluation of projects and programmes in all areas of governance, economics, basic services, and social spheres. The ultimate goal of gender mainstreaming in the municipality is to achieve gender equality at all levels of service delivery. The United Nations Organisation defines gender equality as equal rights, responsibilities, and opportunities for women and men. It implies that the interests, needs, and priorities of both women and men are taken into consideration in the planning, decision-making, and performance of organisational functions.

Gender mainstreaming is one of the SDGs and District Development Model (DDM) objectives. The SDG (Goal 5) and DDM advocate that the government should aim for gender equality, empower all women and girls, and ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level. In support of the SDG and DDM objectives, the Stellenbosch Municipality aims to establish an environment that encourages gender mainstreaming interventions at the municipal level. Although priority issues identified by the different segments of the community cannot be addressed at once due to sufficient resources, the municipality is implementing interventions as a start to address gender and gender mainstreaming.

Gender mainstreaming will require the municipality to shift in organisational cultures and ways of thinking, as well as in the goals, structures, and allocation of resources. Through the IDP and in support of the SDG and DDM objectives, the Stellenbosch Municipality will make an effort to incorporate gender into each phase of planning. As a stepping stone to incorporating gender in municipal planning, it will take the form of identifying key gender indicators linked to the projects and programmes encapsulated in the 5th Generation IDP 2022 – 2027. The table below on the gender matrix will be revised during the 2nd Review of the 5th Generation IDP 2022 – 2027 to allow directorates the opportunity to shift to a level of implementing projects, programmes, and policies that take into account the principles of gender mainstreaming as stipulated below:

- ✦ Gender-sensitive language;
- ✦ Gender-specific data collection and analysis;
- ✦ Equal access to and utilisation of services;
- ✦ Women and men are equally involved in decision-making; and
- ✦ Equal treatment is integrated into steering processes.

The benefits of incorporating gender outcomes into the IDP will be:

- ✦ Positive impact on individuals, organisations, and at a societal level;
- ✦ Acceleration of implementation of Sustainable Development Goals (SDGs);
- ✦ Higher rate of growth and development;
- ✦ Improved resource management;
- ✦ Improved productivity; and
- ✦ By examining the overall situation of women and men across municipalities, a stronger analysis could provide a basis for identifying their specific needs and assessing whether certain groups of women and men could be adversely affected by development programmes and projects.

6.9.1 Gender Interventions

In terms of integrated planning and streamlining governance processes, the Department: Community Development and the provincial Department: Social Development signed an MOU to collectively focus on various programmes with gender as one of the focal points. This includes the implementation of empowering programmes for women, reaching out to single mothers, hosting the 16 Days of Activism / Gender-Based Violence, and establishing a Gender-Based Violence Forum.

The implementation of gender-specific programmes is depicted in the table below:

Table 38: Gender-Based Interventions

Key Activity / Project / Programme / Initiative (measurable action)	Description of Unit of Measurement	Performance Comment
Establishment of the Greater Stellenbosch GBV Forum	Number of Greater Stellenbosch GBV Forums established by 30 June 2024	The provincial Department: Social Development will be the driver of this structure. To be included in the 2023/24 implementation plan of the MOU between the two government entities.
Hosting of 16 days of activism event	Number of 16 days of activism events hosted by 30 November	<p>The 16 days of activism event will be taking each financial year for the period 2022 – 2027.</p> <p>This programme is linked to the Mayoral Outcome, to create safer environments for communities. Implementation and monitoring of the programme will be on a departmental level.</p>

6.9.2 Gender Disaggregated Matrix⁵

Disaggregating information by gender, count males and females separately when gathering information on projects and programmes. Gender-disaggregated data is important because it will assist the municipality to see whether an initiative is successful at targeting and benefiting women and men. The indicators specify that all data about target groups and beneficiaries will be gender disaggregated.

Table 39: Gender Disaggregated Matrix

Directorate	Department		Indicator Description	5-Year Target 2022 – 2027		Target 2022/23		Target 2023/24		Target 2024/25		Target 2025/26		Target 2026/27

Note: All residents, regardless of gender, benefit from the installation of ablution facilities and water points in an informal settlement. The facilities are gender-neutral and hence 100% beneficial to all genders.

CHAPTER 7:

Sector Plans and Implementation

7.1 Introduction

The municipality has several medium- and longer-term sector plans that direct the implementation of the different functional areas. These plans form an integral part of the Integrated Development Plan (IDP).

Although the time periods for sector plans and the IDP differ (e.g., the *mSDF* has a 20-year horizon, IDP has a 5-year horizon and sector plans can be revised annually), the IDP and sector plans inform each other mutually. Like the IDP, sector plans are subject to periodic review. Alignment between sector plans and the IDP allows for more effective budgeting integration.

Other service delivery implementation processes include:

Figure 34: Service Delivery Implementation Plans

The sections below expand on key sector plans of the Stellenbosch Municipality.

7.2 The relationship between the Sector Plans and Strategies

Sector plans need to support and reinforce each other to have meaning and assist in the sustainable development of the municipal area. The table below illustrates how different key sector plans inform and direct each other.

Table 40: The relationship between sector plans

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
Municipal Spatial Development Framework (mSDF)		<ul style="list-style-type: none"> Identifies areas for the satisfaction of human settlement needs Designates areas for developmental needs Indicates areas desirable for specific nature and form of urban development Indicates areas desirable for conservation Spatially reflects the distribution of community facilities Identifies areas to be protected from the settlement (e.g. heritage, agriculture and natural) Designates housing priority / restructuring areas Integrates settlement patterns with infrastructure plans 	<ul style="list-style-type: none"> Identifies areas for the satisfaction of human settlement needs Indicates areas desirable for conservation Spatially reflects the distribution of community facilities Identifies areas to be protected from the settlement (e.g. heritage, agriculture and natural) Designates housing priority / restructuring areas Indicates areas desirable for densification / specific land use / integrated networks Spatially reflects the Council's approved nature and form of urban development 	<ul style="list-style-type: none"> Identifies municipal growth direction Identifies areas to be protected from development (e.g. heritage, agriculture and natural) Identifies priority development areas Identifies infrastructure priority areas
Human Settlements Plan	<ul style="list-style-type: none"> Identifies current settlements and interventions that should be accommodated in future planning Determines settlement needs Quantifies the extent of demand for various housing typologies 		<ul style="list-style-type: none"> Identifies current settlements and interventions that should be accommodated in future planning Determines settlement needs Quantifies the extent of demand for various housing typologies 	<ul style="list-style-type: none"> Identifies current settlements and interventions which should be accommodated in future planning Determines settlement infrastructure needs Quantifies the extent of demand for services according to various housing typologies
Integrated Transport Plan	<ul style="list-style-type: none"> Determines most efficient responses to transport challenges. Identifies transport and traffic priority areas. 	<ul style="list-style-type: none"> Identifies transport and road priority areas. Determines development parameters, e.g. parking ratios, access and standards 		<ul style="list-style-type: none"> Determines most efficient responses to transport challenges. Identifies transport and traffic priority areas.

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
	<ul style="list-style-type: none"> Shapes future planning according to the most appropriate modal changes and challenges. Identifies the need for services not provided by the municipality, e.g. SANRAL, Provincial Roads, PRASA, Transnet. 	<ul style="list-style-type: none"> Shapes settlement planning according to the most appropriate modal changes and challenges. 		<ul style="list-style-type: none"> Shapes future planning according to the most appropriate modal changes and challenges.
Infrastructure Master Plans	<ul style="list-style-type: none"> Identifies existing infrastructure capacity / constraints. Identifies interventions required to support growth / infill. Identifies interventions required to support growth / infill. Provides for services not provided by the municipality, e.g. SANRAL, Provincial Roads, PRASA, Transnet. 	

7.3 Sector Plans and Implementation Strategies

7.3.1 Air Quality Management Plan

Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) has been approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018.

7.3.1.1 Vision, Mission and Goals

Aligned with the Cape Winelands District Municipality (CWDM) vision for air quality management the vision for the Stellenbosch Municipality, as defined in the AQMP is: Air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is co-operatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.

The goals to achieve the mission of the AQMP are listed below and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The three goals for the Stellenbosch Municipality AQMP are:

- ⚡ **Goal 1:** Air quality governance meets requirements to effectively implement the AQMP: This goal addresses the regulatory framework and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'Ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'Effective air quality management;
- ⚡ **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the Provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDMAQMP goal of 'Effective air quality management through an 'Emission reduction strategy; and
- ⚡ **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the Provincial AQMP goal 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal to develop an AQMS. An AQMS is a fundamental unit towards the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the Provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning Air Quality Management.
- ⚡ **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such impact.

7.3.1.2 Time frames

The timeframes defined for the Implementation of the AQMP are:

Figure 35: AQMP Time frames

The following immediate items were included in the AQMP:

Table 41: Items in AQMP

Objective	Activity	Responsibility
Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law.	Air Quality Officer, Council
Emissions from waste burning are reduced.	Enforcement of the by-law.	Air Quality Officer
An Air Quality Management System exists in Stellenbosch Municipality including an emission inventory, ambient air quality monitoring and reporting.	Prepare an annual report on progress with AQMP implementation and state of air quality including emissions and ambient data and complaints.	Air Quality Officer
Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g. EIA, SDF, SEMF).	Air Quality Officer
Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

7.3.2 Environmental Management Plan

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned.

To this effect, Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF) approved by the Council as a sector plan for the Municipal Spatial Development Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No.10 of 2004), completed during the 2017/18 financial year. This document has been reviewed and adopted by the Council in 2022.

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated to be conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park (Nature Reserve) and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all of these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- ⚡ Mont Rochelle Nature Reserve: Approved by the Council in 2022 and will be reviewed in 2026;
- ⚡ Papegaaiberg Nature Reserve: Approved EMP is in place, currently up for 5-year review;
- ⚡ Jan Marais Nature Reserve: Final draft EMP prepared, to be advertised for public input;
- ⚡ Paradyskloof Nature Area: Approved by the Council in 2019 and will be reviewed in 2024; and
- ⚡ Ida's Valley / Botmaskop Nature Area: The first draft was advertised for public input in 2022.

7.3.3 Integrated Human Settlement Plan

7.3.3.1 Overview

An Integrated Human Settlement Plan (IHSP) is the road map for the provision of all forms of housing within a municipal area. This plan is closely linked to the municipal IDP and the Municipal SDF.

Accordingly, Stellenbosch Municipality developed an IHSP to be aligned with the IDP and the mSDF. Stellenbosch Municipality originally approved an IHSP in 2008. A service provider was appointed to develop and align the new IHSP with the long-term vision as envisaged in the IDP and the mSDF, which will be concluded in the 5th Generation IDP 2022 – 2027. A key component of the IHSP is the Housing Pipeline. The Housing Pipeline has a dual function i.e.

- (i) it is the roadmap for all Council's housing-related projects; and
- (ii) it is the official communication document between the Provincial Department of Human Settlements (PDoHS) and the municipality.

The IHSP and the Housing Pipeline have a ten (10) year development horizon. Notwithstanding this, the Housing Pipeline must be reviewed and approved annually by the Municipal Council.

In the absence of an approved IHSP, the Housing Pipeline serves as the housing implementation strategy for the municipality.

7.3.3.2 Housing Pipeline

The PDoHS requires that every municipality must have a Housing Pipeline. The Housing Pipeline is premised on a **ten-year horizon** and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each municipality's Housing Pipeline is an integral component of the Department of Human Settlements' Business Plan.

It is required that the Housing Pipeline must be annually reviewed. The latest review of the Housing Pipeline was approved by the Council in May 2022. This revision includes the following:

Figure 36: Housing Pipeline Time Frame, Objective and Estimate Cost

The objective of the Housing Pipeline is to provide more emphasis on the following housing types or programmes:

- Social housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in November 2016);
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Upgrading of Informal settlements; and

- Mixed-use housing (formalised homeownership employer housing - especially farmworker housing).

The estimated cost of this programme will be approximately **R9.6 billion** over **10 years**.

- Upgrading of informal settlements, (La Rochelle, Klapmuts, Langrug and Franschhoek);
- Access to basic services (ABS);
- Jamestown, Farm 527 (phases 2, 3 and 4);
- Longlands Development;
- Upgrading of Zone O;
- Ida's Valley (Erf 9445 also known as Oak Tree Village) - A key aspect of this project was to utilise municipal land provided at a reduced cost for formal home ownership to cross-subsidise other housing types;
- Enumeration of people on farms and backyarders;
- Rectification of Cloetesville subsidy houses at The Steps and Orlean Lounge;
- Erf 7001, Cloetesville (known as "Soek-mekaar");
- Upgrade of the Kayamandi CBD; and
- Northern extension.

7.3.3.3 Upgrading of Informal Settlements

The municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- In-situ upgrading of informal settlements;
- Upgrade informal settlements by the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

7.3.3.4 Informal backyard dwellings

The municipality through the Housing Pipeline is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database and hopefully, this will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious and the chance of actually obtaining a formal house is very slim. Therefore, Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes.

7.3.3.5 Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017, by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the municipality and the latter culminated in a Council decision instructing the administration to attract Social Housing Institutions (SHIs) and / or Other Development Agency (ODAs) to effect the municipality's social housing programme.

This programme aims to ensure improved quality of life for communities through a Rental housing programme. This process of integration speaks to the importance of:

- ⚡ Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium-density housing stock. etc.;
- ⚡ Social sustainability: social integration between various income groups, access to educational, recreational and health facilities, etc.; and
- ⚡ Ecological sustainability: conservation of scarce resources.

The figure below depicts areas that have been declared as **Restructuring Zones** for Stellenbosch Municipality.

Figure 37: Restructuring Zones as indicated in green

7.3.3.6 The Western Cape Housing Delivery Model

In 2020, the National Department of Human Settlements (NDoHS) issued a letter to the Provincial Department of Human Settlements (PDoHS) regarding the new directives for human settlements projects. The letter stated that the delivery of top structures was fiscally unsustainable and therefore there is a need to downscale the delivery of top structures to prioritise the delivery of enhanced service sites. The **four newly prioritised categories** for the top structure of the letter were:

- ⚡ The elderly;
- ⚡ Military veterans;
- ⚡ Persons with disabilities; and
- ⚡ Child-headed households.

In light of the correspondence received from the NDoHS, the PDoHS added to the above its **existing priority categories**:

- Backyard residents and
- Person, longest on the waiting list.

After consultation with the National Department, the PDoHS confirmed that all new projects application received from municipalities, which include top structures, must adhere to the above criteria. All the supporting applicable beneficiary approval information must be attached to the top structure project application.

Furthermore, the Provincial Department of Human Settlements informed the municipality they will be appointing a service provider in the 2022/23 financial year to undertake a study and develop the Housing Delivery Model for the Western Cape Province in line with the directives and strategic objectives of the National Department of Human Settlements.

7.3.3.7 Priority Human Settlements and Housing Development Areas (PDSHDA)

In 2020, the Minister of Human Settlements Gazetted the declaration of the Priority Human Settlements and Housing Development Areas (PHSHDAs). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households and overcome apartheid spatial patterns by fostering integrated urban forms.

The PHSHDAs are underpinned by the principles of the National Development Plan (NDP) and allied objectives of the National Spatial Development Framework (NSDF) and the Integrated Urban Development Framework (IUDF) which include:

- **Spatial Justice:** reversing segregated development and creation of poverty pockets in the peripheral areas, integrating previously excluded groups and resuscitating declining areas;
- **Spatial efficiency:** consolidating spaces and promoting densification and efficient communicating patterns;
- **Access to connectivity, economic and social infrastructure:** ensure the attainment of basic services, job opportunities, transport networks, education, recreation, health and welfare to facilitate and catalyse increased investment and productivity;
- **Access to adequate accommodation:** the emphasis is on the provision of affordable and fiscally sustainable shelter in areas of high need; and
- **Provision of quality housing options:** ensure that different housing typologies are delivered to attract different market segments of appropriate quality and innovation.

Emphasis is placed on synchronising national housing programmes in these priority human settlements and housing development areas namely:

- **Integrated Residential Development Programme** provides a tool to plan, fund and develop integrated settlements that include all the necessary land uses and housing types and price categories to create integrated communities. It provides for subsidised, as well as finance-linked housing, social and rental housing, and commercial, institutional and other land use to be developed.
- **Social Housing Programme in Restructuring Zones** provides for Social Housing located in specific, defined localities (mostly urban) which have been identified as areas of opportunity (largely economic) where the poor have limited or inadequate access to accommodation, and where the provision of social housing can contribute to redressing structural, economic, social and spatial dysfunctionalities. It is also aimed to improve and contribute to the overall functioning of

the housing sector and in particular, the rental sub-component thereof, especially insofar as social housing can contribute to widening the range of housing options available to the poor.

✚ **Informal Settlements Upgrading Programme** provides for the structured in situ upgrading of informal settlements to address the social and economic exclusion of communities. It remains evident that informal settlements provide new migrants and the urban poor an affordable point of access to towns and cities, although they are also associated with high degrees of physical and social vulnerability.

✚ **Finance Linked Individual Subsidy Programme** provides for the creation of an inclusive and vibrant residential property market which can provide state assistance to households who are unable to independently access housing credit to become upwardly mobile and progress up the housing ladder.

✚ **The Special Presidential Package (SPP) Programme on Revitalisation of Distressed Mining Communities** by developing and implementing human settlements spatial transformation plans for identified mining areas.

✚ **Enhanced People's Housing Process** provides for a process in which beneficiaries actively participate in decision-making over the housing process and housing product and make a contribution in such a way that:

- Beneficiaries are empowered individually and collectively;
- Various partnerships are created;
- Social capital is retained and expanded upon, and 4) housing is valued as an asset far beyond its monetary value; and
- Housing is valued as an asset far beyond its monetary value.

The current status of the PSHDA for Stellenbosch Municipality, namely:

✚ The "Stellenbosch Urban Core Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazette on 15 May 2020 (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi and Central Stellenbosch;

✚ To date the Housing Development Agency (HDA) with assistance from the Provincial Department of Human Settlements (PDoHS) has undertaken a Status Quo Analysis in preparation for the drafting of the Stellenbosch PSHDA Development Plan. The Status Quo Analysis has been completed and will inform the drafting of the Development Plan going forward; and

✚ The PDoHS, Stellenbosch Municipality and HDA will proceed with the drafting of the Stellenbosch PSHDA Development Plan shortly.

The figure below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

Figure 38: Priority Human Settlements and Housing Development Areas (PDSHDA)

The approved Housing Pipeline is available on request at the Directorate: Planning and Economic Development, on 021 808 8462 or via email at: lester.vanstavel@ Stellenbosch.gov.za.

7.3.4 Comprehensive Integrated Transport Plan

The National Land Transport Act, 2009 (Act No. 5 of 2009) (NLTA), requires "Type 1" planning authorities (the country's major cities and towns (including Stellenbosch Municipality), to prepare Comprehensive Integrated Transport Plan (CITP). Generally, a CITP is considered a mechanism by which planning authorities can plan for, develop, manage, integrate and provide for all modes of transport in their areas of jurisdiction.

The current (2016) CITP is valid for a period of at least five years. The latest update was compiled and adopted by the Council on 28 April 2021. The current CITP is valid until the new review / overhaul of the CITP has been approved by the Council. The new review / overhaul of the CITP will be valid from 2023 to 2027 and is in the process of being finalised.

Figure 39: Comprehensive Integrated Transport Plan (CITP)

7.3.4.1 Strategic Interventions

The following areas of strategic intervention have been highlighted:

- 📌 "Towards Car-Free Living" refers to strategies that encourage more effective modes of travel such as public transport, NMT and other mechanisms to increase the number of passengers per vehicle. The municipality in collaboration with the Provincial Transport Department is investigating strategies that would improve public transport services within and around Stellenbosch.
- 📌 "Travel Demand Management" refers to strategies that manage overall demand for travel during peak periods such as congestion pricing and parking management.
- 📌 "Infrastructure and Operational Enhancements" refer to capacity improvements to transport infrastructure but only as part of the overarching transport philosophy in Stellenbosch. The municipality continues to roll out its infrastructure enhancement initiatives such as the Main Road Intersection Improvement Programme, the Traffic Signal Optimisation Programme as well as the implementation of Public Transport Facility upgrades.
- 📌 "Optimal Land-Use and Interconnected nodes" refers to integrated land use and transport planning which supports and promotes transit-orientated development (ATC).

7.3.4.3 Integrated Waste Management Plan (IWMP)

This third-generation IWMP was developed in 2020. The development of the IWMP is necessary, as it is an integral tool to identify current needs and act as a guide towards sustainable waste management. With regular updates to this document, changing needs and progress in the waste management sector can be tracked, and strategies can be adjusted as needed.

Figure 40: Integrated Waste Management (IWMP) Purpose, Scope and Status Quo

7.3.4.4 Implementation Plan: Integrated Waste Management Plan (IWMP)

Based on the gaps and needs identified, the aligned goals of the IWMP, and planned projects by the municipality, the plan contains the objectives, timeline, and resources required for the implementation of the IWMP. The gaps and needs identified are linked to the main goals contained in the Western Cape Provincial IWMP.

7.3.5 Electrical Master Plan

With the approval of the SDF in November 2019, which was almost within the time that the Master Plan was due for an update, the review was not done. The complete update was planned for September 2020, but due to the COVID-19 pandemic, the updating of the Masterplan was delayed.

In October 2020, the Minister of DME announced that municipalities would be allowed to purchase electricity from other sources and also generate their electricity in the future. This drastically changed the whole concept of the Stellenbosch Municipality's Masterplan. Where the municipality previously had one supplier of electricity, it would have major intake points from this one supplier. As networks flow from these points to consumers, the size of the cables will depend on the demands of these consumers for electricity. Because the municipality may now receive electricity from multiple sources, the municipal network design will no longer be compatible with this new policy. The entire Masterplan must now change, as cables in certain areas may now be too big and in a few places too small. The whole system of intake points must first be established, and once that is known, the network itself must be redesigned with the knowledge of existing and future intake points and methods of energy acquisition.

To understand what the energy sources for electricity would look like, an **Energy Masterplan** has been launched and is currently being conducted by the Council for Scientific and Industrial Research (CSIR), which will form the basis for how electricity is likely to be generated or purchased. Once this Master Plan has been completed and the SDF has been updated, it would be the ideal time to draft an entirely new Electricity Master Plan. The following timetables are planned:

- Complete the **Energy Master Plan** by December 2022; and
- Complete the **Electricity Master Plan** by June 2023.

The plans aim to provide the Stellenbosch Municipality with a clear view and a long-term plan for the development of the electrical infrastructure required to support the envisaged demand growth in Stellenbosch and surrounding areas. The municipality also evaluated the long-term viability of existing infrastructure and the expansion and refurbishment requirements thereof, where new infrastructure should be located, and which components, either existing or new, will be required.

Apart from spatial changes, the **Electrical Master Plan** is to contain the following main elements:

- Documented assessments of primary equipment at all 66/11 kV substations and 11 kV switching substations within the municipal area;
- Site-specific assessments to provide a systematic estimate of the life remaining in substation facilities, and planning to extend the life of facilities to meet future needs;
- Development of a geographical load forecast based on regional demographic and historical load growth patterns, as informed by the SDF. (The anticipated long-term load forecast was directly used as input to the expansion plan.);
- Development of network strengthening and expansion options and technical evaluations to ensure that load and performance criteria are met over the short, medium and term (2028);
- Preparation of cost estimates for the technically viable expansion and strengthening options; and
- The Electrical Master Plan is updated every five years and is used in medium-term project planning, prioritisation and budgeting.

7.3.6 Water Services Development Plan

As a Water Services Authority (WSA), the Stellenbosch Municipality has a duty, in terms of sections 12 and 13 of the Water Services Act, 1997 (Act No. 108 of 1997) to prepare and maintain a Water Services Development Plan (WSDP). The municipality prepared a comprehensive WSDP in 2007, 2012, and 2019 that is valid for a period of five years. The revision and updating of the WSDP will commence in the 2022/23 financial year.

South Africa's water resources are looked after by the Department of Water and Sanitation. Stellenbosch Municipality's Water Services sees itself as an extension of this caretaking. Water Services is responsible for acting in line with the Water Services Act and the implementation of Municipal By-Laws, policies, and procedures.

As part of the WSDP package, the municipality maintains:

- Water and Sewer Master Plans;
- Water Resources Study;
- Annual water audit;
- A Water Safety Plan;
- A drinking water quality sampling programme;
- Water and sewer pipe replacement prioritisation programme; and
- A Water Demand Management (WDM) Strategy.

The Water Master Plan, Sanitation Master Plan, Bulk Water Resources / Drought Intervention Plan, Asset Register and Pipe Replacement Prioritised Programme were updated in 2019.

A brand-new Master Plan is envisaged to be commenced with and completed in 2023. Since water management has drastically changed with the advent of drought, the use of greywater, and the increasing cleansing of rivers, it is needed to be redone. It will also align the Water Master Plan with the latest changes to the SDF.

The Water Conservation and Water Demand Management (WC and WDM) strategy is a comprehensive study, which includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC and WDM and will ensure ongoing planning, management, monitoring and an enabling environment. The WC and WDM initiatives include a water pipe replacement programme, indigent domestic leak repair and meter replacement programme, Stellenbosch water meter audit and Stellenbosch in-house water services operation and maintenance.

Poverty reduction and improved water management are closely linked. Section 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

Access to basic water is defined as 25 liters of potable water per day supplied within 200 meters of a household.

Due to the severe drought experienced recently and very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions that were lifted in recent years.

Stellenbosch Municipality supplies water to its consumers through the following water supply systems:

- Stellenbosch (Jonkershoek and Theewaterskloof tunnel);
- Franschhoek;
- Wemmershoek (treated water imported from the City of Cape Town);
- Blackheath (treated water imported from the City of Cape Town);
- Faure (treated water imported from the City of Cape Town); and

Other own sources (Boreholes).

The total population supplied with water in the Stellenbosch Municipal area amount to approximately 213 710 people. Water is also supplied to a fairly extensive industrial area.

Emergency water is supplied to farm communities that do not get water from the farms that they stay on.

Stellenbosch Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof and Franschhoek. The potable water supply from these works amounts to 21.2 MI/d on average and a further 9.1 MI/d was obtained from the City of Cape Town during the financial year, ensuring a supply of approximately 30.4 MI/d to the municipal area.

Areas supplied by the Wemmershoek Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier and Vloffenburg. Areas supplied by the Faure Water Treatment Works are Faure, Jamestown, De Zalze, Raithby and Lynedoch. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact concerning water quality and quantity needs to be monitored and considered by Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 56 reservoirs / holding tanks and water towers, 41 water pump stations, 43 pressure-reducing valve installations, 729 kilometers of pipeline and 80 water supply zones. The network is fully controlled and operated by a telemetry system.

The bulk water input into the water network for 2021/2022 was 11 108 208 kl, with an annual average daily demand of 30 433 kl/day. About 42% of the water supplied is purified from its water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the City of Cape Town and the Paradyskloof Water Treatment Plant, where raw water supplied by the Department of Water and Sanitation is purified. Potable water supplied by the City of Cape Town is analysed every month by the City of Cape Town.

Figure 41: WCWSS Storage Record (2008 – present)

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. Maintenance of equipment is performed in-house and by specialist contractors.

7.3.6.1 Basic Services and Level of Services

- There is no basic water and sanitation services backlog in the urban areas of the municipality. A small number of households on farms are still without basic water and sanitation services.
- The clinics, hospitals and schools in the municipal area have adequate and safe water supply and sanitation services.
- All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.
- All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.
- A sustainable type of water and sanitation facility needs to be provided to the households on those farms with current services below the minimum service level standard. Stellenbosch Municipality is committed to supporting the private landowners as far as possible concerning addressing the current services backlog on farms, as identified through the Cape Winelands Rural Survey of Service Levels.
- From a water services perspective, the most significant challenges are the augmentation of the existing water sources, the replacement and upgrading of old infrastructure to accommodate development, the provision of sustainable basic services to informal settlements, and ensuring the provision of basic services to rural communities located on private farms.

7.3.6.2 Maintenance of Infrastructure

Both water infrastructure and sanitation infrastructure require serious remedial investment. About a third of the water supply infrastructure is in poor or very poor condition and the condition backlog is more than R300 million. The bulk of the backlog is made up of the old Asbestos Cement (AC) water reticulation pipeline assets. About 40% of the sanitation infrastructure is in poor or very poor condition and the condition backlog is in the order of R250 million. The bulk of the backlog consists of the old Asbestos Cement (AC) and Pic Fibre sewer reticulation assets in the Stellenbosch area.

Wastewater Treatment Works

An Infrastructure Asset Register is in place for all water and sanitation infrastructure. An Infrastructure Asset Management Plan must be developed and implemented, based on the principle of preventative maintenance to ensure that damage to assets is prevented before it occurs. Assets must be rehabilitated and / or replaced before the end of their economic life and the necessary capital funds must be allocated for this purpose. Maintenance activities have been increasingly focused on reactive maintenance as opposed to preventative maintenance.

7.3.6.4 Water Demand Management (WDM)

Stellenbosch Municipality is actively implementing their adopted WDM Strategy to reduce the current percentage of non-revenue water and to keep the future water demand as low as possible. The municipality has a block-step tariff system that discourages wasteful or inefficient use of water. The restriction of water use by indigent households and non-payers was prioritised with the implementation of the Leak Repair Programme which includes the repairs to private leaks and the installation of Water Demand Management Devices. These devices restrict users to 400 litres per day. More than 1 600 devices have been installed with savings of over 450 000 litres of water per day.

7.3.6.5 Climate Change

In terms of adapting to climate change, water systems will need to be more robust and newer or alternative sources of supply may need to be found. Increased skills will be required from water managers and long-term water projections are required. Although an overall decrease in rainfall is not generally forecast, increased variability in the climate and frequency of extreme events, as well as increased temperature and wind could have an impact on water sources, particularly surface waters. It is, therefore advisable for the municipality to maintain a conservative approach to the management of water sources, including the following actions:

- ✚ Establish assurance of supply levels of all water sources;
- ✚ Increase assurance of supply of water resources by ensuring that there is at least 10% additional capacity (headroom), when considering the maximum 24-hour demand on the peak month of the year;
- ✚ Do not undertake new developments unless a proper investigation of the implication on water sources and sustainability in the long term has been undertaken.
- ✚ Vigorous implementation of WDM measures, especially in terms of increased water efficiency, frequent monitoring of the water supply system from the sources to the consumers, and regular and adequate system maintenance and repairs; and
- ✚ IRIS monitoring system including the Blue Drop Awards system is active in the municipality and in the past with the Blue Drop system, SM was awarded for four of the municipality's five water supply systems. Three awards were received in conjunction with the City of Cape Town, which supplies water to these systems – from where Stellenbosch manages distribution to end-users. A further Blue Drop Award (the fourth consecutive award) recognised the Stellenbosch water supply system for water treated by the municipality's Ida's Valley and Paradyskloof water treatment plants. The Department of Water Affairs acknowledged this exceptional performance by awarding a silver award to Stellenbosch.

The municipality did not receive a Blue Drop Award for the Franschhoek water supply system which receives water from its own Franschhoek water treatment works. This was expected because of certain infrastructure challenges in this system. Projects have been initiated to address these issues.

7.3.6.6 Level of Service

In the rural area, the responsibility lies with the landowner to manage stormwater over his land. In the urban area, the responsibility lies with the local municipality. The objective in stormwater management is to be able to accommodate a 1:5-year storm in the residential areas and 1: 2 in the urban areas as contemplated in the Guideline for Human Settlements Planning and Design. The Water Act, 1998 (Act No. 36 of 1998) determines that flood lines should be indicated on development plans.

Flood line determination has been done in the past but this information is outdated. The municipality is currently busy compiling a hydrological model to determine the latest flood lines on the rivers in Stellenbosch and Franschhoek for the urban area. It is a development condition for all future developments to do a flood-line determination.

7.3.6.7 Risk Mitigation – COVID-19 Influence on Water Services

Household water supplies may fall victim to the COVID-19 pandemic – if users can no longer pay their bills, and municipalities' revenue streams dry up.

"In the short term, there will still be water for people to wash their hands. However, the long-term consequences could be devastating if municipalities are not able to fund their ongoing operations while funds for the President's Infrastructure Investment initiative will also be affected," says Mike Muller, Chair of the Technical Subcommittee for the Water Institute of Southern Africa (WISA).

As the lockdown impacts individuals and companies across the spectrum, prompting job losses and reduced working hours, the Water Institute of South Africa (WISA) warns that proactive interventions to address "the elephant in the room" are already overdue.

"If people are faced with the choice of paying their rates or feeding their children, they are going to choose the latter. And this non-payment, in a scenario already under serious financial pressure, could have a devastating effect on the general cash standing of municipalities," Dan Naidoo, WISA non-executive director, cautioned at a WISA Board meeting held online recently.

To clarify the depth of the negative knock-on effect, he points out that local government is the main driver of South Africa's economy.

"Service delivery, including the provision of water, is the cornerstone of all economies. Non-payment affects the entire value chain upstream, and if our five big metros are already reporting tough times, how can we expect the smaller, poorer municipalities to survive?"

*Water is a prime focus usually, and more so now as we battle the COVID-19 pandemic. But water is not free, and the country must be sure that it can fund and maintain this critical infrastructure into the future."*⁶

The infrastructure capital implementation is hampered by the pandemic which lowers the income from water and wastewater services due to the lockdown. The capital implementation programme is thus delayed.

7.3.6.8 Risk Mitigation – Drought Response Plan

Water is probably the most fundamental and indispensable of natural resources – fundamental to life, the environment, food production, hygiene and power generation.

Due to the threat of re-occurring droughts and very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality implemented water restrictions to lower water consumption.

The success of this initiative is largely dependent on the cooperation of the consumer taking ownership of the new smart meter. The use of the water demand management device (smart meter) has been implemented nationally with huge success and a reduction in water losses.

The project is currently underway and has received a positive reaction from the community.

The new Water Services By-Laws were also finalised and approved by the Council and promulgated. This will contribute to increasing the management and control of water and sanitation-related aspects within the municipality.

During the last official Blue Drop certification (2012), Stellenbosch Municipality achieved Blue Drop certifications for four of its five water supply systems, with a total **Blue Drop score of 95.56%.**

⁶ WISA, Jun 30, 2020

Stellenbosch Municipality's performed well concerning DWS's 2021 Blue Drop Progress Assessment (Drinking Water Process and Quality). The Blue Drop Risk Ratings for the five systems evaluated were 23.5%, 22.5%, 26.3%, 39.9% and 35.2%, which all fall in the low-risk category (<50%).

The municipality achieved a platinum award for the Stellenbosch Water Supply System for achieving Blue Drop accreditation three times, every year since the programme's inception in 2009.

The following planning documents are continuously updated to include the latest planning: the Water Master Plan, Drought Response Plan, Water Services Audit Report and the Pipe Replacement Study and Model and all projects and daily operations are done in line with the aforementioned studies and guidelines.

7.3.6.9 Backlogs in Water and Sanitation Services

A municipality as a Water Services Authority (WSA) has a duty to all its customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical and sustainable access to water and sanitation services to promote sustainable livelihoods and economic development. To ensure this it is important that the backlogs within the water and sanitation infrastructure should be addressed. Backlogs could be defined in three broad categories:

- ⚙️ Backlogs regarding access to basic water and sanitation services. (Basic water and sanitation services in terms of RDP standards);
- ⚙️ Conditional backlogs (lack of maintenance); and
- ⚙️ Capacity backlogs (increase in consumers).

7.3.6.10 Backlogs – Access to Basic Levels of Services

All indigent households receive free basic water (the first ten kilolitres of water) and sanitation services.

All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.

A sustainable type of water and sanitation facility needs to be provided to households with current service levels below RDP standards. Stellenbosch Municipality is committed to supporting the private landowners as far as possible in addressing the current services backlog on farms.

7.3.6.11 Conditional and Capacity Backlogs of Infrastructure

Resolving inequality and growing the economy will require access to water and sanitation services for the 20 000 new residential units proposed for Stellenbosch Municipality. This will require a doubling of infrastructural service points over the next 10 years.

Figure 42: Water supply and accommodating growth (Total for WCO24)

Updated growth in demand: 20-year planning horizon

Detailed water balance and future water demand projection models were developed as part of the WSDP process, to plan adequately for the augmentation of the existing water sources.

Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Based on the municipality's IWA Water Balance sheet for the 2020/21 financial year, the municipality recorded 29.7% for "non-revenue" water which is an increase of 2.3 % from the previous financial year and 14.6% for Real Network Losses.⁷ The no-revenue water for the financial year 2020/21 is 29.7% which is above the target set of 25%. The real physical network losses are at 14.6% which is below the best practice value of 15%.

⁷ Refer to the municipality's IWA Water Balance Sheet

7.3.7 Long-Term Water Conservation and Water Demand Management Strategy

A comprehensive Water Conservation and Water Demand Management (WC and WDM) Strategy which includes a 10-year financial plan has been developed. The strategy has two goals. The municipality will:

- Prioritise the implementation of WC and WDM Strategy; and
- Ensure ongoing planning, management, monitoring and enabling environment.

This long-term WC and WDM Strategy were approved by the Council on Tuesday, 25 February 2014 and was since been implemented. Water Conservation and Water Demand Management (WC/WDM) are more cost-effective and have a less environmental impact when compared with developing new sources of supply, provided there is scope for implementing WC / WDM measures. The payback period for the implementation of WC / WDM in this municipality is 3 years which is considerably less than the 20 years that one would expect with major infrastructure projects. The updating of the long-term plan is underway.

The results of the successful implementation of the strategy are evident with declining input volumes and lower water losses recorded since implementation started. The active Leak Repair Program, the installation of the Water Demand Management Device, the active replacement of faulty water meters and the replacement of asbestos cement pipelines all contributed to below-average Real Network Losses and Non-revenue Water Losses. It is, therefore, an effective way of delaying the development of infrastructure for new water resources and reducing the need to upgrade or construct new bulk water infrastructure.

WC / WDM involves measures which:

Figure 45: WC / WDM Measures

Figure 46: Stellenbosch Bulk Water input volumes

Figure 47: Stellenbosch Bulk Water Sales

The unrestricted growth in water demand versus the growth in water demand assuming WC and WDM is implemented as shown in the figure below.

Figure 48: Unrestricted versus WDM growth in demand

Figure 49: Unrestricted versus WDM growth in demand

Note that each town in the municipality has water supplies independent of each other. When implementing WC / WDM in the municipality it is critical to implement it in those towns where the existing supply will become inadequate for the demand the soonest. This will enable the municipality to delay the implementation of expensive infrastructure. The estimated budget required is about R80 million over 10 years.

The municipality embarked on a Drought Intervention Programme that accelerated and expanded some of the WC / WDM plans and programmes.

Figure 50: Updated growth in demand 20-year planning horizon

7.3.8 Safety and Security Strategy

Strengthening partnerships and using the platform of the Stellenbosch Safety Partnership (SSP) which was a re-brand from the old Stellenbosch Safety Initiative (SSI). The SSP forms the basis of the Stellenbosch Municipality Safety and Security Strategy. The breakdown of silos (between internal departments and private institutions with similar objectives) is of critical importance as no strategy from any role-player can succeed, unless a multi-disciplinary, integrated approach is embraced as part of the process. The SSP has become critical for successful crime prevention, and it is now envisaged that the SSP structure will include public, private, and community-based stakeholders in safety and security.

Extensive stakeholder consultation and participation is the foundation of the municipal Safety and Security Strategy recognising the important role that every stakeholder must play to make WC024 the safest municipality in South Africa. The Directorate: Community and Protection Services will be embarking on extensive safety and security meetings with all 23 wards in 2022.

To achieve this, the following role players have been identified as key stakeholders and partners for success:

- South African Police Services;
- Department of Community Safety (DOCS);
- Cape Winelands District Municipality;
- Neighbourhood watches and Farm Watches;
- Community Policing Forums (CPFs);
- Private and corporate businesses;
- Private security companies;
- Department of Correctional Services;
- Department of Justice;
- University of Stellenbosch (Campus Control); and
- Stellenbosch Municipality
 - Law Enforcement
 - Traffic Services
 - Fire and Rescue

- Disaster Management.

Building collaborative relationships with our community stakeholders and highlighting Council's commitment to maintaining strong partnerships with primary Law Enforcement Agencies remains the foundation of ensuring safety throughout the Greater Stellenbosch.

Communities are being mobilised and supported to establish neighbourhood watches and formalise their respective neighbourhood watches which will be issued with equipment from DOCS and the municipality to aid in their fight against crime and to be the eyes and ears on the ground. Training will also be provided by the municipality to enhance the training that neighbourhood watches receive from DOCS. Radios will be provided to enable communication with the municipality's Protection Services control room.

The municipality's control room and joint operations centre (JOC) is envisaged to house role-players from neighbourhood watches, security companies, SAPS, and Municipal Law Enforcement Officers from Protection Services with a link to the University of Stellenbosch control room and cameras which have been established and in place. The municipality created and launched a state-of-the-art central control room which will provide seating for representatives from all the key members of the SSP. The SSP is open to any registered entity which contributes toward safety and security initiatives within the boundaries of Stellenbosch. One dedicated emergency number will be provided to residents within the municipal boundaries which will enhance response to emergency services required. The number is **021 808 8999**. A WhatsApp number to report general and safety complaints within the municipal boundaries of Stellenbosch is also made available for reporting purposes. The number is **079 622 4722**.

Initiatives have been and will continue to be launched as it contributes and make communities aware in terms of crime prevention tips and other preventative tips for example fire safety, what to do in case of disasters etc. This will be a joint approach between role-players and supplemented based on crime patterns and situations experienced. Training will also be provided to enhance safety initiatives for example road safety (crossing of roads) etc.

The Community Safety Forum (CSF) was approved by the Council on 30 March 2022. The CSF is a multi-stakeholder forum that will address matters of community safety and security in the WC024. The purpose of CSF is to promote the development of communities in a safe environment and have access to high-quality services at the local government level, through multi-agency collaboration between the different spheres of government and communities. The CSF as a multi-sectoral structure would champion the coordination, integration, and implementation of crime and violence prevention community safety initiatives. The CSF will have three Clusters, namely: Law Enforcement, Social Cohesion and Crime Prevention through Environmental Design.

Fire Services

The Stellenbosch Municipal Fire and Rescue section is dedicated towards the provision of services that seek to safeguard the public against fire and other natural and man-made disasters and emergencies.

The role of the Fire and Rescue Services is to deal proactively and reactively with the following:

- The proactive provision of general fire safety guidance and assistance in respect of venues and their users;
- Protection and rescue of life and property from any threatening danger;
- Prevent the outbreak or spread of fire;
- Extinguish fire;
- Any other duties as stipulated in the Fire Brigade Services Act;
- Through the Department of Planning and Development and Building Department, consolidate

initial structural damage assessments from other departments, conduct evaluations of structures, and support efforts of property owners to address structural issues;

- ✚ Assist SAPS with inspections at licensed premises to combat illegal activities identified by crime intelligence;
- ✚ Determine slide (land) danger areas of informal settlements, oversee the direction, management and cordoning-off of identified slopes and stabilise;
- ✚ Activate the Disaster Management Unit in case of any life-threatening incident, for example, flooding, loss of residence due to fire, etc; and
- ✚ Conduct annual evacuation drills at designated buildings and premises.

Traffic Services

The traffic services operational response plan seek to address all the factors (human, vehicle, and roads / environment) that contribute to accidents (crashes) on the roads within the WC024 area. This approach is based on reliable research data which have been accumulated locally, nationally, and internationally. In analysing the data, the Section: Traffic Services can ascertain the frequency of accidents, where and when (time of day) it occurs and the severity (type) of accidents. Through this approach, the Section: Traffic Services can deploy resources more efficiently and effectively to mitigate the risk of fatalities on the roads within the boundaries of WCO24.

Stellenbosch Traffic Services has aligned itself with the national strategy of the Department of Transport to improve road safety and mitigate fatalities on South African roads. The municipality has identified ten goals which are being prioritised as municipal priorities:

- ✚ To achieve a measurable improvement in road user behaviour – including skill, safer decisions, and better regard for other road users.
- ✚ To reduce the incidence of traffic offences, including speeding, drunk driving, and drug-driving, dangerous overtaking, etc.
- ✚ To ensure that unfit road users are identified and appropriately sanctioned.
- ✚ To ensure that un-roadworthy (including overloaded) vehicles are appropriately sanctioned.
- ✚ To improve the safety level of public transport vehicles and drivers.
- ✚ To reduce the incidence of dangerous driving.
- ✚ To reduce the risk-taking behaviour of pedestrians.
- ✚ To develop education programmes for vehicle road users to enhance their road safety knowledge.
- ✚ Identify and address key vehicle road user crash sites on a rolling basis.
- ✚ Ensure that all road safety interventions are intelligence-led.

Law Enforcement

With the review of the Safety Strategy, the municipality has to adapt to the changing environment of crime in its area and actively pursued closer working relationships with SAPS, private security, and neighbourhood watches active in the WC024 area to be able to make an impact. It is common knowledge that criminals become smarter and migrate from neighbourhood municipalities which means that the municipality has to think smarter to always be one step ahead.

The municipality has completed all 3 phases of the action plan as identified during the previous review. This includes the installation of License Plate Recognition cameras (LPR) at all the main entrances and exits to Stellenbosch and Franschhoek towns. These LPR cameras are supplemented with additional LPR cameras within residential areas which make it possible to track the direction of suspect vehicles linked to crime picked up by these. The municipality continuously invests in CCTV to enhance safety.

The municipality also has a CCTV Master Plan which is a "living" document and is frequently updated based on needs identified concerning safety.

The focus of Law Enforcement

- Effective monitoring and surveillance of CCTV cameras;
- Zero tolerance approach towards petty crime - visible policing focusing on CBDs;
- Weekly operational planning with SAPS and safety partners;
- Amendment of the structure of Law Enforcement to accommodate identified needs;
- Provisions for the establishment of a Tactical Response Unit (TRU);
- Strengthening coordination of communication Strategies between neighbouring municipalities;
- Social Crime Prevention Strategies in conjunction with the Section: Community Development in terms of Council's Street People Policy and Social Justice SOP;
- Consult with the CWDM in terms of sharing resources and information flow;
- Use of innovative technology to improve enforcement strategies;
- Compiling a security and safety camera master plan for WC024;
- Completion of the municipal control room – Joint Operating Centre (JOC);
- Issuing of radios to all neighbourhood watches to be able to communicate with and through the Stellenbosch Municipality control room (JOC);
- Provide training to Neighbourhood watches;
- Implementation of the externally funded Law Enforcement (Rent-a-Cop) policy;
- Implementation of the Reservist policy;
- Establishing a training agreement with Stellenbosch University to train Peace Officers;
- Implementation of the Community Safety Forum; and
- Acquiring LEAP officers to support facility protection plans.

7.3.9 Disaster Management Plan

The National Disaster Management Centre (NDMC) provided a set of guidelines; developed in terms of section 19(a) of the Disaster Management Act, 2002 (Act No. 57 of 2002) (DMA) and section 3.6 of the National Disaster Management Framework, 2005 (NDMF) provides a uniform structure and checklist to organs of state to develop a Disaster Management Plan.

This plan confirms the arrangements for managing disaster risks and for preparing for – and responding to disasters within the Greater Stellenbosch Municipality as required by the Disaster Management Act, 2002 (Act 57 of 2002).

SECTION 53(1) DISASTER MANAGEMENT ACT, 2002 (ACT NO. 57 OF 2002)

- a) Prepare a disaster management plan for its area according to the circumstances prevailing in the area;
- b) Co - ordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and
- c) Regularly review and update its plan; and through appropriate mechanisms, processes and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) to consult the local community on the preparation or amendment of its plan.

7.3.9.1 The Key Outcome of the Disaster Management Plan

The Disaster Management Plan (DMP) seeks to achieve the following key outcomes:

- integration of Disaster Risk Management into the strategic and operational planning and project implementation of all line functions and role-players within the municipality;

- ✚ resilient communities; and
- ✚ an integrated, fast and efficient response to emergencies and disasters by all role-players.

7.3.9.2 Linkage to Stellenbosch Municipality's IDP

The MSA and the Disaster Management Act require the inclusion of the Disaster Management Plan into the Integrated Development Plan (IDP) of the Stellenbosch Municipality, as a core component of the IDP document. However, it is not practical to include the entire Disaster Management Plan with annexures within the IDP of the Stellenbosch Municipality. Therefore, a summary of the key points is encapsulated in the IDP.

7.3.9.3 Linkage to the Disaster Management Framework of the CWDM

The Stellenbosch Municipality must prepare and execute its Disaster Management Plan within the Disaster Management Framework of the Cape Winelands District Municipality. The National, Western Cape Provincial and Cape Winelands' frameworks guide the development of the municipal Disaster Management Plan and future versions of this plan.

7.3.9.4 Structure of the Disaster Management Plan

The municipal Disaster Management Plan of the Stellenbosch Municipality consists of the components as indicated in the figure below:

Figure 51: Structure of Disaster Management Plan

7.3.9.5 The purpose of the Stellenbosch Municipality Disaster Management

The purpose of Stellenbosch Municipality Disaster Management is to ensure coordination of multi-disciplinary and multi-sectorial risk reduction through the integrated institutional capacity for Disaster Risk Management, Risk Assessment, Response and Recovery and implementation of measures aimed at:

- ✚ Preventing or reducing the risk of disasters;
- ✚ Mitigating the severity or consequences of disasters;

- ⚠ Emergency preparedness;
- ⚠ Rapid and effective response to disasters; and
- ⚠ Post-disaster recovery and rehabilitation.

7.3.9.6 Risk assessment throughout WCO24

An all-ward-based Disaster Risk Assessment was conducted in collaboration with the Cape Winelands District Municipality to identify all possible hazards that could impact the community and environment of Greater Stellenbosch was undertaken and completed. As the environment is dynamic and constantly changing, so are the risks that affect our communities. In the period since the risk assessments took place, some of these risks would have been addressed by projects implemented by municipalities, however, new risks might have also emerged. Therefore, it is necessary to regularly review the risk assessments. Several risks were identified, however, six risks were identified to be high-priority risks.

High-priority risks identified that pose a risk to the WCO24 are listed in the table below.

Table 52: High-Priority Risks identified

High Priority Risks	Description of risks
A. Inability to control urbanisation	<ul style="list-style-type: none"> ⚠ "Urbanisation – the increase in the number of people living in towns and cities, resulting in the growth of urban populations." ⚠ Several disadvantages occur with rapid and unplanned urban growth. These disadvantages include but are not limited to, poor infrastructure / inadequate housing, water and sanitation, waste disposal and pollution, and transport and healthcare services.
B. Increased poverty and unemployment	<ul style="list-style-type: none"> ⚠ Poverty and unemployment directly correlate with the quality of life of the members of the community. ⚠ The risk is exacerbated by the expansion of the informal sector and a low skills base population.
C. Access to basic services	<ul style="list-style-type: none"> ⚠ The lack of basic services results in major personal and environmental health concerns. ⚠ Lack of formal electrical infrastructure results in structural fire risks within the informal settlements.
D. Safety and Security	<ul style="list-style-type: none"> ⚠ Human-induced hazards such as crime (which includes theft, robbery, rape, and murder), gangsterism, and alcohol and drug abuse remain one of the top hazards in most wards within the Stellenbosch municipal area.
E. Poor / no electricity	<ul style="list-style-type: none"> ⚠ Inadequate electricity supply is a result of cable theft, but also the continuing population growth – specifically within the informal settlements. ⚠ Increased population growth leads to the increased erection of informal structures that require electricity. ⚠ In most cases, electricity is obtained illegally through illegal electrical connections. ⚠ Cable theft is becoming more common in larger parts of South Africa and the Stellenbosch municipal area is not excluded from this phenomenon. This hinders the operations of businesses, households and transportation systems
F. Illegal dumping	<ul style="list-style-type: none"> ⚠ Illegal dumping poses great environmental health risks. Not only are these locations where infectious diseases spread, but they also attract unwanted pests such as cockroaches, mice and rats. In most cases, illegal dumping occurs in highly populated informal settlements due to a lack of proper and frequent waste disposal.

The figure below illustrates the types of disasters that pose the highest risks within the area of the Stellenbosch Municipality, the disaster risk reduction plans and stakeholders in the event of a disaster. The municipality engages at numerous platforms through partnering with stakeholders to gain access to new resources, information, expertise and skills to facilitate service delivery.

Figure 52: Highest Risk, Disaster Risk Reduction Plans and Stakeholders

7.3.10 Local Economic Development Strategy

Local Economic Development (LED) is not an explicit municipal function as defined in the Constitution of the Republic of South Africa, 1996. Instead, it is an obligation imposed on local government in terms of sections 152 and 153 of the Constitution that stipulates the objectives of local government are to promote social and economic development to strive, within its financial and administrative capacity.

Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction and should play the leading role in municipal sector planning.

The focus on individual economic sectors and spatial planning as the key focus areas, rather than on social and economic development results tends to delink economic growth benefits (increase in indicators like GDP, per capita income, etc.) into local economic development benefits (improvement in the life expectancy rate, infant mortality rate, literacy rate and poverty rate).

Local economic development is the means of systematic identification, development and utilisation of economic opportunity, to benefit local businesses and create opportunities for local communities to improve the lives of residents.

The growth of the informal economy reduces the demand for jobs while increasing the number of entrepreneurs and potential contributors to the private sector demand.

The health of the entire economy is important. The economy does not divide neatly into the 'formal sector' and the 'informal sector'. Rather, the different sectors, such as manufacturing, tourism, services, and construction, are on a continuum that has a more formal and a more informal end.

The great challenge to local government, in its support for economic development, is to enable job opportunities at different points along the continuum, while ensuring health and safety, orderly planning and management. All work, whether in the more formal or more informal ends of the continuum, has to be valued, especially when unemployment is high, and when there is a highly probable link between unemployment and crime. The number of people relying on the informal economy for work can and will increase and the formal economy struggles to grow and make meaningful progress in global markets.

Given the above, Local Economic Development is therefore a multi-stakeholder effort in support of creating economic opportunities for both the private sector and the local community.

7.3.10.1 Strategic approach

The strategic approach to LED in broad is to create economic opportunities for all citizens residing in the Stellenbosch Municipal area. However, the recent disruptive trends in the economy affected not only Stellenbosch but South Africa and the world as a whole. These economic shocks included the extended drought experienced and thereafter the COVID-19 pandemic. These events have highlighted the vulnerability of society, the municipality's systems to deal with it as well the revenue streams of the municipality. The municipality needs to think and approach LED differently and as the "new normal" is here to stay, hence, the municipality with all the role players in society must review its strategy going forward to ensure the municipality builds better resilience in its economy to deal with future shocks and ensure better livelihoods for all.

Lastly, technology changes especially connectivity become more important for businesses and government to do business, this was highlighted by the lockdown experience that forced the municipalities to work remotely.

The following ways of doing business must be seen within the context of the “new normal”:

- ✚ To maximise prospects of sustained economic growth, stakeholders must be permitted to strengthen their competitiveness and collaboration within the local business environment. Networking, local government responsiveness to business needs, effective service delivery and business-oriented organisational structuring will be used to address this aspect;
- ✚ New business development or investment and expansion of existing businesses will be actively promoted, as the consequence of increased investment more often than not resulting in new jobs and local economic growth. Spatial development framework planning, the Integrated Zoning Scheme, aligned municipal infrastructure services provision and municipal financial management tools will be used to address this aspect;
- ✚ It appears that the formal economy is rapidly becoming more informal, as seen in the increase in the number of occupational practices and businesses run from residential premises. The informal economy offers diverse opportunities for absorbing those who have lost their jobs, and for new entrants into the economy. The integrated zoning scheme, aligned municipal infrastructure services provision and municipal financial management tools will be used to address this aspect;
- ✚ Create an enabling environment. An enabling environment refers to “a set of policies, institutions, support services and other conditions that collectively improve or create a general business setting where enterprises and business activities can start, develop and thrive.” Spatial Development Framework planning, the integrated zoning scheme, aligned municipal infrastructure services provision and municipal financial management tools will be used to address this aspect; and
- ✚ The formal and informal parts of the economy are mutually interdependent. The good health of one depends on the good health of the other. It is difficult to promote the growth of smaller enterprises if the overall rate of economic growth is slow. Dedicated networking projects to create opportunities for the informal economy to contribute to the demands of the formal economy will be used to address this aspect.

7.3.11 Community Development Strategy

Moreover, Schedule 4b and 5b lists the functions of local government to include the following which has relevance to the community development functions:

- Child care facilities;
- Building regulations (concerning SANS 10400S);
- Municipal Planning (concerning ECD registration applications and provisions to be made for social infrastructure inclusive of education and health services);
- Municipal public works (accessibility);
- Local amenities (concerning the contribution to social development);
- Local sport fields (regarding the contribution to social development);
- Municipal parks and recreation (regarding the contribution to social development); and
- Municipal roads (accessibility).

INTERGOVERNMENTAL RELATIONS FRAMEWORK ACT, 2005 (ACT NO. 13 OF 2005) (IGRFA)

The IGRFA which defines the relationship between the three spheres of government and facilitates coordination in the implementation of policy and legislation, includes coherent government, effective provision of services, monitoring implementation of policy and legislation and realisation of national policies. Because these services are primarily provided by national and provincial spheres of government, but significantly affect local communities and residents, this department / function plays a pivotal role.

LOCAL GOVERNMENT: MUNICIPAL SYSTEMS ACT, 2000 (ACT NO. 32 OF 2000) (MSA)

The MSA further demonstrates in chapter 4 the mandate of the municipality to develop a culture of community participation (16(1)(b)) in order to contribute to building the capacity of— (i) the local community to enable it to participate in the affairs of the municipality (networks and forums) and must do so with specific emphasis on the inclusion of (17(2)) the specific needs of (a) people who cannot read or write; (b) people with disabilities; (c) women; and (d) other disadvantaged groups.

The White Paper on Local Government (1998:23-26) identifies four interrelated characteristics of the role and function of Local Government related to community development:

- Maximising social development and economic growth: The role and function of the Local Government are to promote the development of communities so that the basic needs of the poor and vulnerable are met. It involves regulation of service delivery. This means that the Local Government is not directly responsible for services, but rather takes steps (i.e. strategies) to encourage good service delivery that addresses the specific needs of the specific community. It could therefore be viewed as a facilitation role. Partnerships between organisations could be encouraged, training opportunities could be provided and facilities could be developed to support existing service providers in the community;
- Integrating and coordinating: Coordination should include national and provincial departments, trade unions, community groups and private sector institutions. "Developmental Local Government must provide a vision and leadership for all those who have a role to play in achieving local prosperity." An IDP could contribute to proper coordination;
- Democratising Development: Local Government practices should be aimed at the involvement of "...citizens and community groups in the design and delivery of municipal programmes".

Coordination should lead to democratic "...leadership, encouragement, practical support and resources for community action". Another key aspect is that democratic development should aim to involve all community groups; and

- Leading and learning: Community development should lead to networks, partnerships, and coalitions. To this extent, a Memorandum of Understanding (MOU) was signed with DSD.

- It includes training opportunities and awareness programmes. The ultimate aim is to empower communities and create opportunities for sustainable change and growth. The emphasis is therefore on capacity building within communities.

The above characteristics are aimed at the improvement of service delivery within the constraints of available resources. As mentioned before, partnerships with businesses and Non-profit Organisations (NGOs) become a key aspect of this developmental model (White Paper on Local Government, 1998:35). These services are aimed at specific vulnerable groups and social issues also highlighted in policy documents.

Further to the above, the department gives effect to the strategic goal of Dignified Living in the IDP of Stellenbosch Municipality through:

- The implementation of critical key performance areas and processes associated with the creation of a conducive environment for community / social development forging relations with national, provincial and local stakeholders and the generation of current social data; and

- The development of six vulnerable groups (youth, gender, children, elderly, people living on the street, and people living with disability) within the municipal area through strategy and policy development and monitoring and reporting on the intended goals of the department's key performance areas.

7.3.12 Human Resource Strategy

High quality and a responsive Stellenbosch Municipality, with a focus on skills identification, supply, demand, retention, employability and social mobility, is essential if the municipality is to realise its IDP ambitions. As such Stellenbosch Municipality needs to be pre-emptive in terms of its human resource requirements and more responsive to service delivery improvement and best practices. The strategic role of Human Resource Management and Development (HRM&D) is ultimately to facilitate performance improvement through people. The table below provides a clarification of roles and involves the following:

- Understanding the business environment within which HRM&D operates;
- Partnering with management in effective people practices;
- Enabling change and transition;
- Engaging constructively with internal and external stakeholders' groups; and
- Delivering service-level commitments.

Table 59: Clarifying the role of HRM&D vis-à-vis Manager and employees

HRM	Line Managers	Employees
<ul style="list-style-type: none"> • Develops HRM&D strategies, principles, policies and procedures in line with business requirements. • Ensures consistency and standardisation of processes and practices across the municipality. • Provides expert advisory services. • Ensure application of appropriate best practice HRM&D service. • Partners line management in effective people practices • Enables change and transition. • Facilitates assimilation of culture and values. • Build the capacity of line managers to effectively manage people. • Ensure good corporate governance around HRM&D practices. • Delivers on service level agreements. • Measures and reports on the effectiveness of HRM&D services within the municipality. • Interaction and negotiations with trade unions and feedback. 	<ul style="list-style-type: none"> • Partners with HRM&D in developing and implementing HRM&D strategies to achieve results. • Manage people according to HRM&D principles, policies and procedures. • Complies with HRM&D legal requirements. • Proactively engages and partners with HRM&D around business and people challenges and solutions. • Initiate and lead change. • Drives the organisational values. • Takes responsibility for being informed of HRM&D matters and building own people management skills. • Follows fair and procedural HRM&D practices and processes. • Ensures high performance through effective performance management and retention practices. • Communicates and gives feedback on service level expectations. • Tracks and measures the impact of HRM&D strategies in functional areas. • Measure and report on the effectiveness of people management within functional areas. 	<ul style="list-style-type: none"> • Partners with line and HRM&D to: • Remain relevant to local; government by taking responsibility for own performance development and career planning; • Taking advantage of appropriate opportunities for development; • Remain informed of HRM&D policy and procedure; • Discuss expectations; • Take personal accountability for and support change initiatives; • Live the organisational values; • Participate in HRM&D surveys and feedback mechanisms; and • Provides feedback to / and liaises with Unions and relevant employee forums.

This HRM&D Framework provides Stellenbosch Municipality with the structure to plan, implement, monitor and improve its HRM&D standards. This framework does not operate in isolation and will be central to all activities involving the human resources of Stellenbosch Municipality. It is, therefore, not an HR document but must be "owned" by the Council, management, staff and trade unions. Since the field of HR management is a dynamic discipline, it is envisaged that this framework will change and develop over time to reflect the realities of the municipality's environment.

Table 60: Key Strategies

Strategic Focus Area (SFA)	Key strategies	Alignment with HR Standards
SFA 1: Valley of Possibility	Ensuring that infrastructure and services planning and resourcing occur over the long term sustainably, and draw on the expertise of other service delivery agencies, the private sector, and the University.	 Strategic HR Management.
SFA 2: Green and Sustainable Valley	Focusing more strongly on the environmental planning and management function, including appropriate resourcing.	 Strategic HR Management.  Talent Management.  Learning and Development.
SFA3: Safe Valley	<p>Securing adequate permanently employed HR, facilities and equipment (specifically fleet) to undertake the specialist functions of traffic management, fire and rescue services, and disaster and event management on a 24/7 basis and to comply with legal standards.</p> <p>Establishing adequate, integrated Law Enforcement capacity, present in every ward of the municipality.</p>	 Strategic HR Management.  Learning and Development.
SFA 4: Dignified Living	Ensuring the delivery of a comprehensive range of services to vulnerable groups, and the coordinated cooperation of service providers at all levels in the delivery and management of services to these groups	 Learning and Development.
SFA 5: Good Governance and Compliance	<p>Ensuring that functional areas have the capacity and readiness to deliver services in terms of short-, medium- and longer-term objectives and targets.</p> <p>Ensuring that all staff has the opportunity for leadership development within their functional areas, and municipal management generally.</p> <p>Ensuring regular performance management of staff at all levels within the organisation.</p> <p>Undertaking strategic planning for the longer and shorter terms, the municipality as a whole, and local areas</p> <p>Implementing regular auditing of processes.</p> <p>Celebrating excellence in service delivery, external and internal to the municipality.</p> <p>Renewing intergovernmental efforts to establish a municipal court in Stellenbosch.</p>	 Strategic HR Management. 7.3.13 ICT Strategy

7.3.13.1 Background

Information and Communication Technology (ICT) Systems and Services are playing an ever-increasing role as a strategic enabler of organisational transformation and service delivery in the public sector. There is also a growing acknowledgement at the corporate governance level that ICT services and systems form an integral part of the municipal service delivery value chain.

The continuous alignment of ICT services and systems with the strategic goals and objectives of the municipality, as well as statements of direction from the National Government and the Western Cape Provincial Government impose major challenges on the Department: ICT and its resources.

This document aims to articulate and describe changes in the Stellenbosch Municipality's ICT Strategy with the view to ensure alignment with the Stellenbosch Municipality's Strategy. Emphasis is placed on identifying the municipality's new requirements and opportunities for Information and Communication Technology to move towards meeting the ICT-related requirements of the municipality and

management. The municipality intends to review and update the ICT Strategy for approval in the 2023/24 financial year.

The successful implementation of the municipality's IDP and the achievement of its strategic objectives are highly dependent on several critical enabling resources to be managed effectively to support the IDP, including finances, human resources and information technology.

The achievement of the strategic objectives of the municipality's IDP is indirectly dependent on various information technology services, without which the core and supporting functions of the municipality will not be able to operate. The vital ICT-related services include:

- ✦ Provisioning of Municipal Financial Management and Payroll Management software applications;
- ✦ Hosting of the Municipal website;
- ✦ E-mail and internet services;
- ✦ Data storage;
- ✦ Data recovery;
- ✦ ICT planning;
- ✦ Provisioning of the network, wireless networks and telephony services;
- ✦ End-user support for the ICT environment;
- ✦ Disaster Recovery Management;
- ✦ Business Continuity;
- ✦ ICT Risk Management;
- ✦ ICT Contract Management; and
- ✦ Public Wi-Fi.

7.3.13.2 The Mission and Vision of ICT

ICT's mission is to provide ICT infrastructure and ICT business systems solutions that will assist the Stellenbosch Municipality to deliver sustainable services that are operationally efficient and cost-effective to all its stakeholders and communities which includes:

- ✦ Cost-effective solutions;
- ✦ Quality Service Delivery;
- ✦ Ongoing performance monitoring; and
- ✦ Aligned to business processes.

The vision of the ICT Department is to be a trusted and reliable Information and Communication Technology partner to support the Stellenbosch Municipality management and end-users to achieve their objectives.

7.3.13.3 Success Factors to Adopt in getting closer to the community

The Department: ICT will continue to strive in achieving its goals to close the gap between the municipality and the community by improving services and engagement. These goals include:

- ✦ Understanding the needs of the community;
- ✦ Always deliver a consistent and quality service; and
- ✦ Manage the relationships with vendors and stakeholders providing a service to the public.

CHAPTER 8:

Council Term Projects 2022 – 2027

8.1 Smart City

As cities compete for global investment and talent, efficient cities with less red tape barriers, ICT competitiveness comes centre stage. A smart city is adaptable to change and demands that emanate from growth, and in response applies information and communication technologies to enhance performance and urban services to respond to demand whilst reducing consumption, waste and costs. Smart cities need to capitalise on digital technology to facilitate the speed of information to support more efficient delivery of goods and services and contribute to the greater vibrancy of cities.

A **smart city** is a municipality that uses information and communication technologies to increase operational efficiency, share information with the public and improve both the quality of government services and citizen welfare.

8.1.1 Guiding principles to create inclusive smart cities

For a smart city to be inclusive, it should adhere to six interdependent principles. The principles provide guidance when decisions have to be made regarding the identification, planning and implementation of smart initiatives and technologies.

Decisions on the nature and purpose of a smart initiative or technology should be guided by the following principles:

1. It should be smart for all;
2. It should use technology as an enabler rather than a driver;
3. It should be shaped by, and respond to, the local context;
4. It should be informed by the real needs of the community;
5. It should embrace innovation, partnership and collaboration; and
6. It should be sustainable, resilient and safe.

8.1.2 A smart city as a holistic ecosystem

Global best practices recommend three primary categories when determining the benefits and priorities for the design and implementation of the smart city roadmap. The smart city roadmap includes the following:

Smart Governance

Transform the institutional systems, processes and organisational structure to one of the high-performance organisations to effectively deliver basic services.

Smart Livelihood

Implementation and integration of innovative digital platforms to enable social upliftment.

Smart Economy

Grow and diversify the local economy through the attraction of new investment, skills development and facilitation of an enabling environment for small business growth and job creation.

8.1.3 The nature and purpose of a proposed smart city initiative

The implementation of smart city initiatives should be guided by a clear understanding of the nature and purpose of the proposed interventions. These initiatives could be focussed on benefitting different target services in municipal-driven smart city initiatives, addressing the needs of the entire city (municipal area). Smart City initiatives should be aimed at improving the lives of the people residing in the city, especially in the different services that are delivered to the residents in the municipal area.

Smart city initiatives can be placed within a specific smart city theme, the figure below indicates the different smart city themes:

Figure 53: Smart City components and initiatives

Source: A South African Smart Cities Framework

Realising the goal and implementation of smart city initiatives will need the collaboration of internal and external stakeholders. Within the next five years (2022 – 2027) Stellenbosch Municipality will emphasise on Smart Governance with a focus on E-governance. The aim is to formulate a Smart City Framework for approval by the Council in the 2023/24 financial year.

The purpose of the Smart City Framework will be to guide decision-making and provide internal stakeholders with a structured framework when identifying, planning and implementing the smart city initiatives which are appropriate to the theme of Smart Governance.

The legacy projects will be undertaken by the administration and political leadership, which will remain applicable for the duration of the political term under the leadership of the Executive Mayor and respective portfolios of the Mayoral Committee Members.

8.2 Political Leadership: Five-Year Plans

8.2.1 Executive Mayor

In developing the 1st Review of the 5th Generation IDP 2022 – 2027, the Stellenbosch Municipality ensured proper alignment and integration with the IDP, Budget, SDF and sector plans. There is no fundamental shift in the outstanding projects / programmes and initiatives that were planned in the 4th Generation IDP 2017 – 2022. All outstanding plans have been taken into consideration for the new strategic document.

The 1st Review of the 5th Generation IDP 2022 – 2027 will be the Municipality's road map for the next five years and track the progress on the implementation of projects / programmes and initiatives. It is an exciting journey in working together with the administration, communities, and other spheres of government in making greater Stellenbosch a valley of opportunity. For this to happen, the following mayoral outcomes for the period 2022 – 2027 have been set and are reviewed on an annual basis.

Mayoral Outcome 1: Clean, accountable and responsive local government;

Mayoral Outcome 2: Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area;

Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers;

Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements and mixed-use developments);

Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorps across the municipality area;

Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth;

Mayoral Outcome 7: To create safer environments in our communities;

Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation;

Mayoral Outcome 9: Alternative Energy.

8.3 Mayoral Portfolios

The mayoral portfolios are a tool for the Executive Mayor to use to reach the mayoral goals for 2022 – 2027. In support of the mayoral outcomes, each portfolio has set performance-based strategic priorities that are aligned and will give effect to the mayoral outcomes. The performance-based strategic priorities for the 1st Review of the 5th Generation IDP 2022 – 2027, have a focused approach on the implementation of the strategic projects / programmes and initiatives with set targets and time frames.

The following portfolio performance-based implementation plans are listed below:

1. Portfolio: Human Settlements;
2. Portfolio: Rural Management;
3. Portfolio: Youth, Sport and Culture;
4. Portfolio: Planning;
5. Portfolio: Local Economic Development;
6. Portfolio: Financial Services;
7. Portfolio: Protection Services;
8. Portfolio: Corporate Services;
9. Portfolio: Infrastructure Services; and
10. Portfolio: Community Development (Parks, Open Spaces and Environment).

CHAPTER 9:

Public Interest and Expression of Needs

9.1 Community Participation

Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) requires municipalities to create a culture of community participation. According to section 16(1)(a)(i) of the MSA, “A municipality must develop a culture of municipal governance that complements formal representative government with a system of participatory governance, and must for this purpose encourage, and create conditions for, the local community to participate in the affairs of the municipality, including in the preparation, implementation and review of its integrated development plan in terms of Chapter 5”. It is therefore essential to have effective public participation structures in place.

The SDF, IDP, Budget, Sector Plans as well as major municipal policies, by-laws and decisions should be engaged to ensure that they are designed and implemented for and with the community. This also adds to the credibility of the needs reflected in the IDP, the Budget calculated in addressing these needs and the SDBIP drafted in implementing programmes and projects which reflect the communities' needs.

The growing trend of mature and constructive discussions from the public, the level of complexity and the investment made in understanding the municipality's business are encouraging. The direct participation and involvement of the ward councillors, communities and stakeholders in the identification of ward-based priorities and their involvement in the public participation process have added great value to the maturity and quality of the discussions between the public and the municipality. Ward Councillors are a critical link in connecting the municipality with the public. As members of the Council, and recipients of all the decisions taken by the Council, it positions Councillors strategically to ensure that the municipality not only understands the needs of the community, better but also to provide the public with honest and accurate feedback on the municipality's initiatives. These endeavours are supported by well-functioning Ward Committees. Councillors are, however, encouraged to always adhere to the code of ethics for Councillors and to always act with the utmost integrity and accountability toward their constituents and the municipality, as this is the only way in which to form a responsible local government.

Public participation takes place through various means and platforms and is often tailored to suit a specific audience or community. Importantly, communities from different socio-economic backgrounds use different platforms to communicate. It is important to cater for all scenarios and to utilise all available platforms to their optimum potential, given that a certain degree of apathy exists in certain communities.

The maturity level that the public participation process has achieved during the COVID-19 pandemic, has reached new heights from both the community members and the administration. Further feedback will be provided on the comments captured on written submissions made via the various platforms created for public participation. To ensure that the public participation process is a two-way process, all comments have been carefully considered and discussed with internal departments.

9.2 Public Participation in the drafting of 1st Review of the 5th Generation IDP 2022 – 2027

Stellenbosch Municipality implemented a hybrid approach for public participation from **Wednesday, 7 September – Wednesday, 28 September 2022** during the analysis phase to determine the needs of the community in developing the 1st Review of the 5th Generation IDP 2022 – 2027.

A notice was published in the local newspaper and on the municipal website to announce the start of the public participation process for the development of the 1st Review of the 5th Generation IDP 2022 – 2027. At the start of the process, a link to an **electronic submission form** was made available on the municipal website, the Stellenbosch Citizen App, and broadcast via WhatsApp, Facebook, the municipal Youtube channel and email.

Members of the community and other interested and affected parties were encouraged to attend the online public participation meeting for their ward / area. Members of the community with no access to Wifi / data and or a device were encouraged to attend the online public participation meeting at a venue closest to their place of residence. The MS Teams links and meeting schedules to the **hybrid public participation meetings** were made available on the communication platforms as indicated in the figure below.

Figure 54: Communication Platforms

The electronic and verbal submissions made available on the various platforms created for public participation followed the process below:

Figure 55: Process Flow for electronic and verbal submissions

9.3 Public Participation Statistics: September 2022

The graphs below indicate the number of individual submissions received on the various communication platforms.

Graph 14: Total number of individual submissions per platform (Sept 2022)

As noted from the graph above, the electronic form which was made available on the municipal website, WhatsApp and the written 'Have your Say' was the most popular platform used by the community and stakeholders to submit their needs and priorities. A total of **335** electronic submissions were received via the electronic form on the municipal website, with 'Have Your Say' written submissions as the second most popular platform with **168** submissions.

The graph (dark red) below indicates that **Ward 13** and **Ward 21** have the highest number of line items / inputs per ward received and capture during the public participation period for September 2022.

Graph 15: Total number of Ward inputs per ward (Sept 2022).

9.4 Summary of Needs and Priorities

The graph below presents a summary of the key priorities and needs raised by communities during the public participation period from September 2022. It also depicts the **top 5 priorities** identified for WCO24 by community members and range as follows:

1. Safety and Security;
2. Roads, Transport and Stormwater;
3. Access to Housing;
4. Electrical Services; and
5. Water and Sanitation.

Graph 16: Number of community inputs per priority area

The table below indicates which priority areas were raised in the different wards:

TBC	Priority 1: Access to Land and Housing	Land and for RDP Housing and plots for low- and medium-income earners in Kayamandi.	Obtaining development rights for mixed-use development for the Northern Extension, Kayamandi	Percentage of the Northern Extension, Kayamandi Capital Budget actually spent 30 June	Planning and Economic Development	Integrated Human Settlements	Local	90%	90%	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The municipality has appointed a team of professionals to undertake a Broad Conceptual Urban Design Framework that will include ±2 000 housing typologies for low-income earners in the development of the Northern Extension as well as obtain town planning and development rights. Serviced plots will be part of the development options in this project.
		Land to provide space for 106 Local Business stalls to operate in Kayamandi.	Not Applicable	Not Applicable	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	Currently, the municipality is busy with the Kayamandi Town Centre and the construction of the Kayamandi Business Hub. The community can utilise the Kayamandi Corridor (renting space).
		Land for New Primary School in Kayamandi	Not Applicable	Not Applicable	Corporate Services	Properties Management and Municipal Building Maintenance	Provincial	n/a	n/a	n/a	n/a	n/a	⊗	n/a	n/a	n/a	n/a	This is not a municipal function. The priority to be referred to the Western Cape Department of Education.

TBC	Priority 2: Infrastructure Services	Electrify Nkanini and other areas	Electrification of informal structures in Nkanini	Number of informal structures in Nkanini electrified by 30 June	Infrastructure Services	Electrical Services	Local	n/a	1300	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a	Tender for the procurement of contractor closing on 12/12/2022. The project will commence after the appeal period and a contractor had been appointed. The project is planned to be completed by 30 June 2023. The other areas which require electrification will be discussed with the ward councillor.
		Fix Street Lights in the Decanting sites and Watergang area.	Maintenance of streetlights in the decanting site in the Watergang area	Number of streetlights in the decanting site in the Watergang area maintained by 30 June	Infrastructure Services	Electrical Services	Local	12	n/a	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a	Awaiting material tender to be awarded. The expected delivery date of material is in April 2023.
		Fixing of Drains in the Watergang area, Snake Valley and the rest of Ward 12.	Not Applicable	Not Applicable	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a	Complaints are attended to and regular maintenance is conducted on the stormwater network.
		Fix the existing toilets in Nkanini.	Not Applicable	Not Applicable	Infrastructure Services	Water and Wastewater Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a	The ablution facilities are maintained on a daily basis by an appointed local contractor. Materials needed for the repairs are provided by the municipality, and labour is provided by the contractor. The reason for the ongoing repairs is vandalism.
		Fix the Roads in Nkanini and Azania to make it accessible for trucks to go in into the areas.	Not Applicable	Not Applicable	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a	Complaints are attended to, and regular maintenance is conducted on the road network. For improved truck access, the area needs to be formalised.
		Rename or name unnamed the streets in Watergang area.	Not Applicable	Not Applicable	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The Department: RTS will investigate and provide feedback to the ward councillor by 28 February 2023.

		The streets of Watergang require speed humps.	Conduct an assessment to determine the feasibility for the construction speedhumps in Watergang.	Number of assessments conducted to determine feasibility for the construction of speedhumps in Watergang by 31 December	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	1	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	
		Put a speedhump in front of Kayamandi Primary school.	Conduct an assessment to determine the feasibility for the construction of a speedhump in front of the Kayamandi Primary School	Number of assessments conducted to determine feasibility for the construction of a speedhump in front of the Kayamandi Primary School 31 December	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	1	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	
TBC	Priority 3: Food Security	Space for Food Garden that can provide vegetables for child-headed families to help disadvantaged families. Identified spaces: Nkanini, G Section and TRA	Not Applicable	Not Applicable	Community and Protection Services	Community Development	Local	n/a	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a		Consultations with the councillors of Wards 12 and 13 resulted in the following: A food garden in Nkanini was supported with compost as per their request. A food garden at Kayamandi Primary School is supported with start-up equipment as per their request. Ward councillors are aware of the projects and were instrumental in the identification of a venue and beneficiaries (who are represented by both wards 12 and 13), and progress reports are provided to them regularly. Wards 14 and 15 councillors were also informed, and it was explained that the projects resulted from ward priorities and not from CDW programme identification.

		Provide soup kitchen to feed less privileged and disadvantaged families in ward 12.	Not Applicable	Not Applicable	Community and Protection Services	Community Development	Local	n/a	n/a	n/a	n/a	n/a	😊	n/a	n/a	n/a	n/a	Soup kitchens are operating in the community through NGOs. Grand-in-Aid is provided to NGOs that are running soup kitchens. A list of soup kitchens has been supplied to the councillor.
TBC	Priority 4: Area Cleaning	Employ more EPWP workers to clean Nkanini river and street of Nkanini, Azania and the rest of Ward 12.	Not Applicable	Not Applicable	Infrastructure Services	Waste Management	Local	n/a	n/a	n/a	n/a	n/a	😐	n/a	n/a	n/a	n/a	EPWP workers are employed twice a year to clean in Nkanini, Azania, and the rest of Ward 12.
		Install smoke detectors and fire extinguishers at Churches and ECD centres in Kayamandi.	Not Applicable	Not Applicable	Community and Protection Services	Protection Services	Local	n/a	n/a	n/a	n/a	n/a	😡	n/a	n/a	n/a	n/a	It is not within the municipal mandate to install smoke detectors in private entities.
TBC	Priority 5: Safety	Establishment of a Green Route with NHW in ward 12. A green route is a connected road / route that workers and scholars will use to get to their destinations and which is consistently patrolled for the safety of users, as it is and continues to be a common occurrence that workers and scholars get mugged on their way to work and school and back.	Not Applicable	Not Applicable	Community and Protection Services	Protection Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The Neighbourhood Watch Coordinator will address this with the NHW in Kayamandi and try to get more of the community involved.

TBC	Priority 1: Access to Housing and basic services	Investigation of social housing at farm 739 and 737 Klapmuts.	Not Applicable	Not Applicable	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	Social Housing can only be implemented if the National Minister of Human Settlements approved a Restructuring Zone (RZ). Klapmuts is currently not registered as a RZ for Social Housing. Land must first be identified for a Social Housing project and thereafter an application can be submitted to National and Provincial Government.
		Installation and upgrading of ablution facilities within the La Rochelle and Mandela City informal settlements to all residents	Not Applicable	Not Applicable	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The Department: Informal Settlements monitors and reports on these facilities on a regular basis.

		Upgrading of the electricity network capacity to provide electricity access for residents in La Rochelle informal settlements and whole of Klapmuts Town	Not Applicable	Not Applicable	Infrastructure Services	Electrical Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	<p>The area is an Eskom area of supply. The project must be implemented by Eskom.</p> <p>The department will forward the request to Eskom.</p>
		Municipality to provide funding to buy land in Klapmuts for 600 RDP housing development units. Various portions of land is available in Klapmuts to buy in Land adjacent Mandela City at Arra Farms and various other portions is available in order to supply Klapmuts Communities with residential units	Not Applicable	Not Applicable	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	<p>A desktop study was carried out to investigate for potential developable sites in the greater Klapmuts area for future housing developments. The Provincial Department of Human Settlements (PDoHS) is responsible to provide funding to acquire land for housing. When the study has been completed and Council approve the acquisition of a particular site, a funding application will be submitted to PDoHS.</p>
	Priority 2: Burial Land / Graveyard	There is currently no burial place for our deceased people in town – We note the municipalities proposal to a regional graveyard – The Klapmuts Community however, insisted to have a locally based graveyard. Land at old Refuse station has been identified by the Klapmuts Community for this purpose. Land is currently within Drakenstein area of jurisdiction. Liaise with Drakenstein Municipality	Not Applicable	Not Applicable	Community and Protection Services	Community Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	<p>Funding is only available for the new Stellenbosch Memorial Park and the residents of Klapmuts must make use on the Park once it is developed.</p>

TBC	Priority 3: Local Economic Development	Job creation projects in Klapmuts. EPWP workers / learnership should be made available to young people to be trained as firefighters in Klapmuts to sustain the need	Not Applicable	Not Applicable	Community and Protection Services	Protection Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	This is not an indicator. Interested persons can join the fire reservist project and from there they could become eligible to receive training as fire fighters depending on the availability of positions and training conducted by the district. The reservist process allows access to training. Learnership funding opportunities to be tabled with LED.
		No jobs currently for the Klapmuts Community. A structured method should be done to secure Klapmuts Community with permanent jobs as security workers at the sports field and EPWP to clean Mandela City and La Rochelle	Not Applicable	Not Applicable	Community and Protection Services	Protection Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	This is dependent on funding. However, the request is noted.
		Job creation projects - The buying / selling of refuse or Swap Shop idea should be introduced in Klapmuts	Not Applicable	Not Applicable	Infrastructure Services	Waste Management	Local	n/a	n/a	n/a	n/a	n/a	😬	n/a	n/a	n/a	n/a	n/a	Request for job opportunities to be referred to LED with assistance from Waste Management. The procurement process was conducted to obtain a service provider to operate a Swap Shop which was unsuccessful.

TBC	Priority 4: Safety and security	Cameras should be put at all strategic areas in the Ward to stop the flow of crime in the Ward 18. LPQ and 360 rotating cameras must be installed at the 2 robots on R44 and 1 camera on the N1 Bridge entrance, 1 camera Groenfontein road, 1 camera in Klapmuts Clubhouse and 1 camera Mandela City.	Not Applicable	Not Applicable	Community and Protection Services	Protection Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	This is dependent on funding. However, the request is noted.
		Installation of cameras on the R44 and inside the Klapmuts area to stop the highflyers coming in to rob the business sector of the town	Not Applicable	Not Applicable	Community and Protection Services	Protection Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	This is dependent on funding. However, the request is noted.
		Increase Law Enforcement personnel to render services in Klapmuts. 15 EPWP workers should be deployed as urgently possible to address this big shortcoming	Conduct sporadic crime prevention operations within the WCO24	Number of sporadic crime prevention operations conducted within the WCO24 by 30 June	Community and Protection Services	Protection Services	Local	n/a	92	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	
		Traffic calming measures at Groenfontein Street, Klapmuts. Two people has already died on this road within one year. Speed calming should be done urgently.	Not Applicable	Not Applicable	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	Due to road classification, it is not possible to construct traffic calming measures. Traffic enforcement to be increased.

TBC	Priority 5: Spatial Development Planning	The spatial development plan for Klapmuts needs to be updated for the town to be united – as the boundaries of the town is divided in two municipalities - Drakenstein and Stellenbosch. Ward base planning needs to be a continuous function in this area – as apartheid planning is still on in Klapmuts	Not Applicable	Not Applicable	Planning and Economic Development	Development Planning	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The application to the Municipal Demarcation Board ("MDB") for the re-alignment of the boundaries between Klapmuts North and South has been submitted end of March 2022. Municipality is still awaiting the outcome of the investigation by MDB.

CHAPTER 10:

Financial Plan

To achieve delivery on the 5th Generation IDP 2022 – 2027 strategic focus areas and objectives, it is essential to align the municipal budget with the strategy. The sections below expand on aspects of the Stellenbosch Municipality's medium-term financial planning and the extent to which it is possible to align the budget to all the priorities of the wards, given our financial constraints and the need to concentrate on basic service delivery.

10.1 Introduction

The long-term financial viability of municipalities depends largely on:

- the extent to which improved and sustainable revenue capacity can be achieved; and
- the sound **financial management of its resources**.

These imperatives necessitate proper multi-year financial planning. Future impacts of revenue and expenditure streams and the financial implications for the community (i.e. the potential influence on rates, tariffs and service charges) must be identified and assessed to determine the sustainability of planned interventions, programmes, projects and sundry service delivery actions.

10.2 Capital and Operating Budget Estimates

10.2.1 Budget Assumptions

The selected key assumptions relating to this budget are as follows:

- Government grants for the years 2023/24 to 2025/26 are as per the Division of Revenue Act and Provincial Gazette (capital and operational); and
- The inflation **rate has been estimated at 5.2% for 2023/24**.

10.2.2 Operating Budget Estimates

A municipality is a non-profit organisation and it should break even after contributing to the different funds and reserves and meeting normal operating expenses. With the structuring of rates and tariffs, both the user-pay principle and the full cost recovery principle are applied. It should be noted that the surplus is calculated in terms of the accrual principle and therefore is not 100% cash-backed.

Table 127: Operating Budget Estimates

10.3 Financial Management Arrangements

For the effective and efficient financial management of the municipality, all role-players, inclusive of the municipal councillors, must provide an environment conducive to good management. Local government legislation and National Treasury circulars articulate and provide regulatory structure. Council and officials define this environment by developing and accepting policy guidelines to govern financial decision-making and fiscal discipline.

The management arrangements of Stellenbosch Municipality are reflected in the policy documents listed in the table below:

Table 129: Management Arrangements

Document	Purpose	Status
Delegation Register	To provide for administrative, managerial and institutional arrangements in respect of the delegation of responsibilities.	In place
Credit Control and Debt Collection Policy	<ul style="list-style-type: none"> To establish consolidated, sound and practically executable credit control measures to be applied in respect of all property owners and consumers. To regulate the actions about arrear accounts, including extensions granted, written arrangements to pay off arrears, the monitoring thereof and legal actions associated with unpaid accounts. 	In place
Indigent Policy	To subsidise indigent households with a specified level of income enabling them to pay for a basic package of municipal services.	In place
Irrecoverable Debt Policy	To provide a framework for the writing off of irrecoverable debt, to ensure that Council is in a position where it is not carrying debt that has been prescribed or which is irrecoverable on its books.	In place
Tariff Policy	To provide a framework to determine rates and tariffs to finance expenditure.	In place
Rates Policy	To ensure that all the stipulations of the Municipal Property Rates Act are effected administratively and also layout and stipulate all the requirements for rebates for all qualifying property owners.	In place
Special Rating Areas Policy	To strike an appropriate balance between facilitating self / funded community initiatives that aim to improve and / or upgrade neighbourhoods.	In place
Supply Chain Management Policy	To provide a system of procurement that gives effect to the principles of: <ul style="list-style-type: none"> Fairness; Equity; Transparency; Competitiveness; and Cost-effectiveness. 	In place
Budget Implementation and Monitoring Policy	<ul style="list-style-type: none"> Sets out the budgeting principles that Stellenbosch Municipality will follow in preparing each annual budget. To give effect to the requirements and stipulations of the Municipal Finance Management Act (MFMA) and Municipal Budget and Reporting Framework in terms of the planning, preparation and approval of the annual and adjustments budgets. 	In place
Borrowing, Funding and Reserves Policy	To provide a framework to ensure that the annual budget of Stellenbosch Municipality is fully funded and that all funds and reserves are maintained at the required level to avoid future year non-cash-backed liabilities.	In place
Cash Management and Investment Policy	To regulate and provide directives in respect of the investment of funds and to maximise returns from authorised investments, consistent with the primary objective of minimising risk.	In place
Travel and Subsistence Policy	To set out the basis for the payment of subsistence, travel allowance, and hourly rate when applying for official travelling.	In place
Accounting Policy	To provide the accounting framework applicable to the finances of the municipality and is informed by the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003).	In place

Document	Purpose	Status
Grant-in-aid Policy	To provide the framework for grants-in-aid to NGOs, CBOs or NPOs and bodies that are used by the government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12 and 67 of the MFMA.	In place
Development Contributions for Bulk Engineering Services	<ul style="list-style-type: none"> Local government has the discretionary power when granting development approvals to impose conditions about the provision of engineering services and the payment of money that is directly related to requirements resulting from those approvals in respect of the provision of the necessary services to the land to be developed. To provide the framework for the calculation of these contributions. 	In place
Petty Cash Policy	To stipulate clear processes and procedures to ensure that all transactions are processed effectively and efficiently in a bid to ensure prudent financial control. All purchases below R2 000 are regulated by this policy.	In place
Asset Management Policy	The Municipal Manager as Accounting Officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.	In place
Liquidity Policy	The documented policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to ensure that its current and future liquidity position is managed prudently.	In place
Virement Policy	The policy sets out the virement principles and processes which the Stellenbosch Municipality will follow during a financial year. These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year.	In place

10.4 Financial Strategies and Programmes

The optimal use of available resources, the maximum raising of revenue and the sustainable delivery of services are the key elements to a successful financial strategy. The municipality has developed and implemented various strategies in this regard. The table below summarises the key strategies:

Table 130: Key Financial Strategies

Strategy	Currently in Place
Financial viability and sustainability through long-term financial planning	<ul style="list-style-type: none"> Long-term financial planning tool effective implementation and monitoring.
COVID-19 Policy Initiatives and Incentives to enhance vaccinations	<ul style="list-style-type: none"> Revise budget and related policies
Clean Audit	<ul style="list-style-type: none"> Audit Action Plan Annual Financial Statement compilation standard operating procedure Monthly Reconciliations Training Sessions Participation in Forums
Staffing	<ul style="list-style-type: none"> Revise Organogram Fill critical vacancies
Capital expenditure	<ul style="list-style-type: none"> Implementation of Project Management System including in-year reporting
Revenue Enhancement Strategy	<ul style="list-style-type: none"> Implementation of Revenue Enhancement Strategy Roll-out of WMD and Pre-payment Water Meters Data cleansing Validity of registered indigent households
Billing system enhancement	<ul style="list-style-type: none"> Web-based billing system Review Municipal Account Layout Investigate payment methods
Debt management	<ul style="list-style-type: none"> Debt Review Committee Quarterly Report on Debt and Possible Debt to be written off

10.5 Medium – Term Capital Expenditure per Strategic Focus Area

The proposed capital expenditure per strategic focus area over the medium term is illustrated in the table below:

Table 131: Capital Expenditure per Strategic Focus Area

Strategic Goal	2023/24	2024/25	2025/26
SFA 1 - Valley of Possibility	178 041 706	155 497 637	201 628 695
SFA 2 - Green and Sustainable Valley	62 400 000	89 549 985	39 642 500
SFA 3 - Safe Valley	42 168 307	44 218 490	61 968 764
SFA 4 - Dignified Living	185 249 880	240 125 378	146 516 698
SFA 5 - Good Governance and Compliance	33 689 972	56 503 974	53 699 318

Figure 56: Capital Expenditure per Strategic Focus Area

Source: Capital Budget 2023/24

The most capital-intensive strategic focus area is Dignified Living with an allocation of R185,2 million in the upcoming financial year, totaling R571,8 million over the MTREF. Water projects dominates this strategic objective receiving an investment of R59,1 million in 2022/23, and it is increasing over the outer years.

The second most capital-intensive strategic focus area is Valley of Possibility, with a total allocation of R535,1 million for the duration of the MTREF. Project highlights include:

- Bien don 66/11kV substation new;
- Electrification INEP;
- Kayamandi(Costa grounds)new substation 11 kV switching station;
- Bulk Water Supply Pipe and Reservoir: Kayamandi; and
- Bulk Water Supply Pipeline and Reservoir - Jamestown.

The Green and Sustainable Valley strategic focus area receives the 3rd highest capital investment

with the total MTREF budget amounting to R191,5 million. Solid Waste Management takes centre stage as part of the broader Green and Sustainable Valley Strategy, for the expansion of the landfill site.

The municipality is also making a concerted effort to improve ICT infrastructure platforms, allocating R31,8 million for this purpose over the multi-year budget period.

10.6 Medium – Term Operational Expenditure

The proposed Operational Expenditure per Strategic Focus Area over the medium term is illustrated in the table below.

Table 132: Operational Expenditure per Strategic Focus Area

Operational Expenditure	2023/24	2024/25	2025/26
SFA 1 - Valley of Possibility	139 926 190	142 655 184	104 175 806
SFA 2 - Green and Sustainable Valley	7 456 511	6 621 743	6 759 204
SFA 3 - Safe Valley	8 565 716	8 867 995	9 179 752

10.9 National and Provincial Investment

The following tables depict the National and Provincial allocations to the municipality over the MTREF period. It should be noted that the information is subject to change depending on fiscal constraints and the availability of resources.

The table below sets out the allocations by the national government for the MTREF period for Stellenbosch Municipality.

As indicated in the table below the total National allocation for Stellenbosch amounts to **R289 337** million for the 2023/24 financial year.

Table 140: National and Provincial Investment

CHAPTER 11:

Organisational Scorecard (5 – years)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between Council, administration and the community. It gives effect to the IDP and budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly and annual performance reports must also be submitted to Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one – year detailed implementation plan which gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis of measuring the performance in service delivery against end year targets and implementing budget.

Indicators developed for the Stellenbosch Municipality addresses the Strategic Focus Areas of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers of its service delivery mandate by indicating clear indicators and targets. These indicators also forms the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The five necessary components are:

1. Monthly projections of revenue to be collected for each month;
2. Monthly projections of expenditure (operating and capital) and revenue for each vote;
3. Quarterly projections of service delivery targets and performance indicators;
4. Ward information for expenditure and service delivery; and
5. Detailed capital works plan broken down by ward over three years.

11.1 Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP)

The SDBIP gives effect to the Integrated Development Plan (IDP) and is essentially the management and implementation tool setting out the quarterly service delivery targets.

The Top Layer SDBIP include the main service delivery indicators of the municipality. The following table reflects the 5 Year Implementation Plan of the Integrated Development Plan:

11.2 SFA 1 – Valley of Possibility

Note: The Five-year Municipal Scorecard will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP). The TL SDBIP must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget, to be tabled in Council during May.

CHAPTER 12:

Implementation, Monitoring and Review (1 – year)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between Council, administration and the community. It gives effect to the IDP and budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly and annual performance reports must also be submitted to Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one – year detailed implementation plan which gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis of measuring the performance in service delivery against end year targets and implementing budget.

Indicators developed for the Stellenbosch Municipality addresses the Strategic Focus Areas of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers of its service delivery mandate by indicating clear indicators and targets. These indicators also forms the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The **five** necessary components are:

- Monthly projections of revenue to be collected for each month;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators;
- Ward information for expenditure and service delivery; and
- Detailed capital works plan broken down by ward over three years.

Note: This Chapter, the one-year Municipal Scorecard, will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2023/24 during June 2023, and **is subject to change**. The TL SDBIP 2023/24 must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget to be tabled in Council in May 2023.

1. Strategic and Legacy Projects / Programmes

This Close-Out Report summarises the progress of the 4th Generation IDP 2017 – 2022 implementation. It is important to assess the state of implementation of the IDP deliverables over the previous five-year period for Stellenbosch Municipality to provide the community and stakeholders a true reflection of the successes of 4th Generation IDP 2022 – 2027.

The report will also provide a summary of the revenue and operating expenditure performance versus budgets as well as the 5 highest capital expenditure projects for the period 2017 – 2022.

This will be a once – off close – out report on the 4th Generation IDP 2017 – 2022 and will serve as an annexure to the 1st Review of the 5th Generation IDP 2022 – 2027.

1.1. Strategic Projects / Programmes Implemented Per Strategic Objective: 2017 – 2022

The graph below compares the number of strategic IDP deliverables achieved, in progress, and not achieved to the total number of strategic IDP deliverables implemented between 2017 and 2022. A total of **50** strategic IDP deliverables were identified for 2017-2022, with 39 completed, 10 in progress, and 1 not completed.

Graph 1: Number of Strategic IDP Deliverables for 2017 – 2022

Table 1: Strategic Projects / Programmes Implemented Per Strategic Objective: 2017 – 2022

Directorate	Department	Strategic IDP deliverable	Progress Report 2020 – 2021	Final Close – Out Status Report for 2021 - 2022 (4 th Generation IDP 2017 - 2022)	Rating
SFA 1: VALLEY OF POSSIBILITY					
Planning and Economic Development	Development Management	Development and implementation of the Integrated zoning scheme	Implementation of the Stellenbosch Zoning Scheme By-law, 2019. Preparation of a Report to the Council on the progress with implementation of the Zoning Scheme By-law. Report to be finalised and submitted to the Council in 2021/22 financial year.	Achieved.	😊
Planning and Economic Development	Development Planning	Develop local economic development hubs	The Franschhoek Informal Trading Site was successfully implemented and opened by the Executive Mayor.	Achieved.	😊
Planning and Economic Development	Development Planning	Develop local economic development hubs	Construction of the following markets has been completed and the request for traders has been advertised: <ul style="list-style-type: none"> ⬆ Klappmuts; ⬆ Cloeteville; ⬆ Groendal; and ⬆ Kayamandi. 	Achieved.	😊

Community and Protection Services	Community Development	Develop, facilitate and implement youth programmes in partnership with public and private institutions.	<p>Accredited Training Programmes:</p> <p>Number of youths trained in the 2020/21 financial year was 111 (26 Youths trained in Basic Plumbing Skills; 28 youths trained in Five Star Table Attendance; 13 youths attended the General Building Maintenance training; 24 youths participate in the Assistant Chef training; 20 youths participated in the learner license programme).</p>	<p>Accredited Training Programmes:</p> <ul style="list-style-type: none"> 12 youths as professional waiters; 24 youths in 5-star table attendance; 12 youths in food handling; painting training was done with 13 youths). <p>Life Skills Training by National Youth Development Agency for 20 youths.</p> <p>NPO registration of 9 Youth Organisations.</p> <p>Mobilising 21 youths to enrol in the Chrysalis Academy programme.</p> <p>19 young fathers were trained in fatherhood skills.</p> <p>Inkuthazo Yesizwe Sport Coaching summit by the university with 37 coaches to upskill them in working with young athletes.</p> <p>80 youth applied and participated in the learner and driver's licence programme.</p> <p>94 youths participated in the job-readiness programme in partnership with DSD.</p> <p>60 youths participated in the Human Rights Day: Anti-bullying campaign.</p> <p>Youth Day was celebrated by 165 youths.</p> <p>11 youths completed the data literacy workshop conducted by Open-Up and the Cloeteville E - centre.</p>	

Directorate	Department	Strategic IDP deliverable	Progress Report 2020 – 2021	Final Close – Out Status Report for 2021 - 2022 (4 th Generation IDP 2017 - 2022)	Rating
SFA 4: DIGNIFIED LIVING					
Planning and Economic Development	Integrated Human Settlements	Develop and implement a housing pipeline	The Housing Pipeline which will be tabled before Council in May 2021 will have to incorporate all the housing projects earmarked for the next 10 years, in a manner that conforms to the latest policy directive of NDoHS and PDoHS.	Housing Pipeline is approved and reviewed once per financial year.	
Planning and Economic Development	Integrated Human Settlements	Implement upgrading of informal settlements programme	Residents in Zone O, Enkanini, Kayamandi and Mandela City in Klapmuts have been relocated to the various TRAs as planned in the previous IDP cycles.	Zone O: Project at initial stages, engagements with the community have commenced.	
				Enkanini: Relocation completed. Mandela City: Relocation completed.	
Planning and Economic Development	Integrated Human Settlements	Implement upgrading of informal settlements programme	The Langrug project in Franschhoek consists of 4 sequential stages, i.e. the development of Erf 3229, as a decanting site, the relocation of inhabitants of the dam in Langrug to Erf 3229, the rehabilitation of the Langrug dam area and the relocation of the original inhabitants of the Langrug dam area.	To commence with the re-blocking of Langrug, a decanting site on Erf 3229, Mooiwater, Franschhoek is being developed (basic services), the process of which is currently underway. The Department: Housing Development will go out on tender to appoint a service provider to finalise detailed planning for the rehabilitation of the freshwater dam and implement an in-situ upgrading project. The implementation stage will be dealt by the Department: PMU.	
Planning and Economic Development	Integrated Human Settlements	Social Housing programme	In terms of its Social Housing Initiatives, Council approved Farms 81/2 and Erf 81/9 , Stellenbosch situated on the R304 as the first Social Housing project. In this regard, a Call for Proposals to appoint a suitable Social Housing Institution (SHIs) and / or Other Development Agency (ODA) is currently being prepared for advertisement.	The tender has been advertised in June 2022 and the closing date is 4 July 2022. On request from the bidders (during the compulsory clarification meeting which was held on 15 June 2022) due to the short period to submit their bids, the Bid Specification Committee approved an extension of the closing date. It should be noted that the tender was cancelled on 1 August 2022 due to a material change to the tender specifications and / or scope of works. The amended tender was re-advertised on 2 September 2022 and a compulsory clarification meeting was held on 15 September 2022. The closing date for the tender was on 3 October 2022. The SCM process to be finalised.	
Planning and Economic Development	Integrated Human Settlements	Housing Consumer Education	Consumer Education was undertaken on an individual basis and with strict COVID-19 protocols in respect of all Title Deed handovers	A total of thirteen (13) workshops were held with mainly tenants in municipal rental stock.	
Community and Protection Services	Community Services	Identify areas to establish new facilities for sports and recreation facilities	Reconsidered due to the drought disaster.	Reconsidered due to the drought disaster.	
Planning and Economic Development	Integrated Human Settlements	Housing consumer education sessions	Housing Consumer Education was undertaken on an individual basis and with strict COVID-19 protocols in respect of all Title Deed handovers (52), TRA (rental stock) recipients and RDP houses handed over (105 individuals).	A total of thirteen (13) workshops were held with mainly tenants in municipal rental stock.	

Directorate	Department	Strategic IDP deliverable	Progress Report 2020 – 2021	Final Close – Out Status Report for 2021 - 2022 (4 th Generation IDP 2017 - 2022)	Rating
			In Pniël, an almost 30-year quest for homeownership culminated in the handover of 16 Title Deeds to their respective owners.	The HCE programmes were also held for beneficiaries of houses that were built between 1994 and 2010. A total of sixteen (16) HCE workshops were held during the 2021/22 financial year inclusive of those held before formal title deed handovers, outreaches for the signing of Deeds of Sale and completion of subsidy applications for the Longlands Housing Project.	
Corporate Services	Property Management	Identify and upgrade facilities for multi-purpose usage	Two of the main halls, namely Eikestad and Stellenbosch Town Hall have been upgraded.	Upgrades completed.	
SFA 5: Good Governance and Compliance					
Financial Services	Financial Services Management	Implement MSCOA requirements on Information Systems	All financial systems are aligned with the mSCOA requirements.	mSCOA compliant.	
Financial Services	Financial Services Management	Update and implement the Asset Management Policy	The Asset Management Policy is in place and was reviewed with the Medium Revenue and Expenditure Framework (Budget).	Assessment Management Policy adopted on 26 May 2021.	
Financial Services		Effective billing systems	An effective billing system is in place and reporting occurs every month as a key revenue-raising strategy.	Implementation of billing systems completed.	
Financial Services		Effective credit control and debt collection processes	Effective credit control and debt collection processes are in place. The Debt Review Committee was established during the 2020/21 financial year.	A Revenue Enhancement Strategy was developed as well as a Debt Review Committee was established to monitor the progress of outstanding debt and deliberate on acceptable and reasonable arrangements for the settlements of arrear debts by all affected municipal debtors. These initiatives will continue to be implemented during the 2022/23 financial year.	
Office of the Municipal Manager	Governance	Implement the performance management plan	The Revised Performance Management Policy was adopted by Council on 30 September 2020 and is being implemented.	The Performance Management Policy 2021/22 is currently under review to be aligned with the new staff regulations 809.	
Office of the Municipal Manager	Governance	Regular compliance reporting to Council committees and other relevant oversight bodies	The Draft and Final Annual Report 2019/20 served before MPAC and was approved without any significant changes.	The Draft Annual Report 2020/21 served before MPAC and was approved without any significant changes.	
Corporate Services	Human Resource Management	Implement the Workplace Skills Plan	A Workplace Skills Plan is drawn up and implemented on annual basis.	A Workplace Skills Plan is drawn up and implemented on annual basis.	

1.2. Legacy Projects for the period 2017 – 2022

The graph below compares the number of Legacy Projects achieved, in progress, and not achieved to the total number of legacy projects implemented between 2017 and 2022. A total of **80** Legacy projects are listed in the 4th Generation 2017 – 2022, with 54 completed, 26 in progress, and no incomplete projects.

Graph 2: Number of Legacy Projects - IDP Deliverables for 2017 - 2022

Table 2: Number of Legacy Projects - IDP Deliverables for 2017 - 2022

Legacy Project/s	IDP deliverable (Specific Initiatives)	Progress 2020/21	Final Close-Out Status Report for 2021/22 (4th Generation IDP 2017 - 2022)	Rating
Municipal Spatial Development Framework (mSDF) amendment and review	mSDF Amendments and full review.	The amendment and review process includes developing a strategy for monitoring the performance of the Stellenbosch Municipality's SDF. This process will hopefully commence in the 4 th quarter of the 2020/21 financial year. A service provider has been appointed and commenced with the Compilation of the Adam Tas Corridor (ATC) Local Spatial Development Framework (LSDF). The draft LSDF for the ATC is scheduled to be submitted to Council by 31 August 2021 for adoption. The DEA&DP (WCG), Stellenbosch Municipality and Drakenstein Municipality are currently engaging in a process to develop a concept regional plan for the greater Klapmuts Area. This concept plan will guide evaluating and promoting of current and future land use applications / development within the area.	The ATC LSDF was completed in September 2021 and went through a rigorous public participation process and be submitted to the Council for approval in October 2022.	
Innovative system to streamline and expedite building plan approvals	Implementation of an electronic building plan application solution	BPAMS was partially implemented on 1 July 2020 due to delays caused by the COVID-19 pandemic. The implementation of the full BPAMS system was effected as of 1 January 2021 and has been fully operational since.	Implementation of BPAMS completed.	
Finalise land use management backlogs	50% reduction in backlog applications by 2020	Even though no operational (as opposed to management capacity) capacity interventions were ever introduced, the original backlog of 144 land use management applications was progressively reduced during 2020 to only 1 outstanding backlog land use management application at present (12 February 2021).	The backlog was successfully reduced.	
Local Economic Development	Agricultural Land Plan adopted by Council	A further ten (10) agricultural land parcels are currently being investigated to be advertised and allocated to emerging farmers. The final report on the additional agricultural land parcels is scheduled to be submitted to Council in April 2021.	Two (2) vacant land that was advertised during November / December 2020 is currently being evaluated in line with the Policy on the Management of Municipal Agricultural Land. The Municipal Council in July 2021 approved the re-establishment of the Operational Committee and will assist with the evaluation of the applications received to provide recommendations to the Council for the allocation of the land parcels. Land parcels will only be awarded in the 2022/23 financial year.	
	LED Hubs identified and constructed	Currently, building plans are in the process of being approved for the Old Clinic Site in Victoria Street, and the Land Use Management (LUM) Section is in the process of finalising the land use management application for the Triangle Site (Erf 230,) in Franschoek.	Achieved.	
	Informal Trading Sites identified and constructed	Groendal Informal Trading Site construction completed in February 2021.	The project is completed.	
	Audit of People on farms and back-yard dwellers	A survey of backyard structures in Klapmuts is currently underway. Ida's Valley's survey was completed in the previous financial year.	A survey of backyard dwellers in Klapmuts was completed during the period from April to May 2021.	

Legacy Project/s	IDP deliverable (Specific Initiatives)	Progress 2020/21	Final Close-Out Status Report for 2021/22 (4th Generation IDP 2017 - 2022)	Rating
Tourism Strategy	Electronic Tourism Boards (Stellenbosch CBD and Franschhoek)	The appointed service provider completed the draft Tourism Plan, which is currently being finalised by the acting Manager: Local Economic Development and Tourism for inclusion within the Economic Strategic Plan for Stellenbosch Municipality. Completion date 30 June 2021.	The municipality is currently reviewing and finalising the 1st draft Tourism Policy which will be completed by 31 March 2023.	☹️
Adopted Rural Management Plan	Rural Management Plan adopted by the Council by 30 June 2020	The Plan was indeed adopted by Council in 2018. In drafting the plan, intense public participation was held on a precinct-by-precinct basis with land workers and workers. It is not at this stage envisaged that a general public participation process for the Rural Area Plan specifically will be held as the RAP was included as a resource document in drafting the now-approved MSDF.	Rural Management Plan was adopted by the Council.	😊
Housing projects	Annual review of the 5-year Housing Pipeline	The review of the Housing Pipeline is scheduled to be tabled at the May 2021 Council meeting for consideration.	Revised Housing Pipeline (documents) was submitted to the MayCo by 31 May 2022.	😊
	Jamestown Housing (bulk sewer 408 opportunities)	The urban edge has been amended as per the Stellenbosch Municipal Spatial Development Framework 2019, which includes extended portions of land for Jamestown. This resulted in the need to review the vision and development proposals for the area. To ensure a broad development view, the Call for Proposals which was being finalised has been cancelled. The proposed housing development for Jamestown Phases 2 – 4 now includes the relevant portion of the Remainder, Portion 3 and a broader Portion of Portion 7 of Farm No 527 Stellenbosch, per the approved urban edge. New tender specifications are in the process to be drawn up for advertisement to proceed with the development proposals for Jamestown Phases 2 – 4.	The municipality appointed a service provider to undertake a Broad Conceptual Urban Design framework and to obtain town planning and development rights. The process and timeframe for Phases 2 and 3 will be concluded over a period of two (2) years. The project is ongoing.	☹️
	Longlands Housing Subsidy implemented	Approximately 80% of the internal services have been completed. A funding application for the top structures, with the Provincial Department of Human Settlements (PDoHS), is in its final stage. The PDoHS has made financial provisions on their 2021/22 financial year budget to build top structures.	The PDoHS approved subsidies for 98 beneficiaries in the Longlands housing project.	😊
	Zone O re-blocking	The funding application for the implementation of Zone O re-blocking (installation of civil services) was approved by PDoHS on 28 January 2021. The project is now in its implementation stage and the Department: Project Management Unit will oversee this project.	The project is in the initial stages, and engagements with the community have commenced.	☹️
	Ida's Valley housing projects implemented	Erf 11330 (Hillside) – The developer has completed 87 BNG houses for the low-income category and 113 GAP houses. All houses have been handed over and the contractor is currently busy with the snags following the retention period.	The project is completed.	😊
	Ida's Valley housing projects implemented	Erf 9445 (Oak Tree Village): Several 166 GAP housing opportunities will be created on Erf 9445. The PDoHS has made provision in their 2021/22 financial year for the installation of internal services.	The expected completion date is the end of 2023.	☹️
	Langrug upgrade concluded by June 2021	The Geotechnical Investigation was concluded. An instruction was issued to the consultant to prepare the procurement documents for the site rehabilitation. The design of the layout plan for the proposed development has been completed. A land use development application has been submitted to obtain development rights for a land use departure to enable the temporary use of the site as a Temporary Relocation Area. The checklist and screening report was submitted to the Department of Environmental Affairs and Development Planning (DEADP), to which the municipality was directed to undertake further specialist studies. The formal quotation process is currently underway to appoint	The density in the number of structures impeded the implementation of these planning interventions. Land invasions at Langrug exacerbated the implementation of these projects. To implement the in-situ upgrading projects, a decanting site is required to relocate households to create enough space for upgrading.	☹️

Legacy Project/s	IDP deliverable (Specific Initiatives)	Progress 2020/21	Final Close-Out Status Report for 2021/22 (4th Generation IDP 2017 - 2022)	Rating
		specialists to deal with the issues as indicated by DEADP. The civil designs have been revised and submitted for final approval on 17 March 2021. The appointment of an electrical engineer has been concluded and the preliminary design for the electrification of approximately 258 sites is due for submission.	To commence with the re-blocking of Langrug, a decanting site on Erf 3229, Mooiwater, Franschhoek is being developed (basic services), the process of which is currently underway. The Section: PMU to go out on tender to appoint a service provider to finalise detailed planning for the rehabilitation of the freshwater dam and implement an in-situ upgrading project.	
	Land for Housing Langrug Franschhoek identified	Stellenbosch Municipality is currently engaged with the Housing Development Agency (HDA) to facilitate the transfer of land in La Motte to the local authority as well as obtain the applicable land use development rights. An Implementation Protocol (IP) was completed by HDA to charter the way forward concerning roles and responsibilities, funding and obtaining development rights.	The HDA submitted a new request for the State Land Release for the subject properties by DPW&I to HDA through Power of Attorney. The target timeframe for releasing land is in the 2022/23 and 2023/24 financial years, respectively. The HDA is to submit a Project Feasibility Report (PFR) requesting funding for land use rights for these projects.	☹️
	Klapmuts upgrade of informal settlement	Phase 1 (187 units) and Phase 2 (76 units) of the project has been completed.	Completed.	😊
	Informal Settlement Strategy developed and implemented	The Informal Settlement Strategy has been reviewed to align with development (proposals and projects) as identified through the Municipal IDP and mSDF.	The Informal Settlement Strategy has been reviewed to align with development (proposals and projects) as identified through the Municipal IDP and mSDF.	😊
Upgrading of the Cloeteville flats	Upgrading of the Steps (Cloeteville)	The project has commenced, and the contractor is on site. Approximately 25% of the units have been completed. The transfer of the units will be programmed to coincide with the rectification programme.	The project is in the construction phase.	☹️
Erf 7001, Cloeteville (known as "Soekmekaar") development	GAP housing	During the public participation process, it was determined that the preferred development should accommodate housing typologies that range from mid to high GAP to conform to the surrounding neighbourhood. The proposed development aims to provide housing opportunities to those families that do not qualify for BNG housing due to their income but can be assisted with affordable GAP housing through the FLISP initiative. The Department: Housing Development is currently in the process of formulating new specifications for a Tender / Call for Proposal.	The goal of this development is the delivery of houses to the medium to upper (GAP) housing market and not aimed at BNG housing units (free houses). A new tender was advertised and closed on 26 July 2021. A service provider was appointed to undertake a Broad Conceptual Urban Design framework for Erf 7001, Cloeteville to obtain town planning and development rights.	☹️
Kayamandi CBD upgrade	Upgrading of the Kayamandi Town Centre	A funding application has been submitted to PDoHS in June 2020 and approved in May 2021. The planning layout has been approved by Council on 24 August 2020. A service provider is currently in the process to finalise all detailed planning and is in process of engaging with the Planning Section of the Stellenbosch Municipality and proceeding with further public participation processes. These planning applications will be submitted to obtain development rights.	The proposed town planning layout consists of ±1 800 housing opportunities (2 to 3-storey BNG walk-ups). The development parameters will include a mix of housing typologies, business units and community facilities. This design methodology was utilised to suit the demand and the needs of the affected community.	☹️

	TV Systems	All TV screens are connected to the network. Additional budget is needed to procure central control unit to display content. The latter previous unit was damaged by water leaks. Request for R200 000 will be requested on the 2022/23 budget.	All TV screens are connected to the network.	
Human Resources and Organisational Structure	HR Policies Review (Recruitment and Selection, Standby, Smoking, TASK, Essential User Scheme)	Recruitment and Selection Policy: New Recruitment and Selection Policy submitted for consultation in the 3 rd quarter of 2020. During consultations on the previous draft, it became clear that the previous draft was inadequate to deal with progressive recruitment practices. Consultation on the new draft is currently underway. Essential User Car Scheme Final agreement submitted to SALGA HR Workgroup for adoption by municipalities.	The Recruitment and Selection Policy was approved / revised on 22 June 2022.	
	Review System of Delegations	A further review in 2020 was approved. Delegations change from time to time as by-laws and policies are revised. The system is updated on yearly basis.	Delegations change from time to time as by-laws and policies are revised. The system is updated on yearly basis.	
	Re-evaluation of staff job descriptions by the Regional TASK Committee	In process Thus far 323 job descriptions (JDs) have been submitted for evaluation out of a total post compliment of 1 998 posts equating. Not all post needs evaluation as a lot of posts are generic and, in that situation, only one JD will be evaluated covering several posts. The municipality will endeavour to have all outstanding JDs submitted for evaluation by 30 June 2021.	The TASK Evaluation Policy was submitted within the 2021/22 year and is under consideration at the LLF.	

2. Service Delivery Implementation Overview: 2017 – 2022

2.1. Basic Services

The mandate of the Stellenbosch Municipality is to provide adequate basic services to its communities within reasonable legislative and within its available resources to achieve the progressive realisation of this right. These basic services include access to water, basic sanitation, safe energy sources and refuse removal services, to ensure that households live in a safe and dignified environment.

The graph below summarizes the extent to which Stellenbosch Municipality delivered basic services during the period of the 4th Generation 2017-2022.

Figure 1: Access to Basic Services for 2017 - 2022

2.2. Infrastructure: Roads, Transport and Stormwater

The figures below provide an overview of the total kilometers of roads maintained and / or new roads tarred in the period 2017 – 2022: *Tarred (Asphalted) and Gravel Roads*.

Figure 2: Total Kilometres of Roads and Gravel Roads Maintained for 2017 - 2022

The figure below shows the total kilometres of stormwater infrastructure maintained and upgraded as well as the kilometres of new stormwater pipes installed for the period 2017 – 2022.

Figure 3: Total km of Stormwater Infrastructure for 2017 – 2022

2.3. Human Settlements

Stellenbosch Municipality continues in their efforts in addressing the plight of the middle-income and disadvantaged through housing opportunities. The need for housing remains a major challenge as resources and allocations from the National and Provincial Governments remain limited and the backlog tremendous.

Whilst the municipality remains committed to exploring housing opportunities, the availability of land remains a burning issue, which is receiving constant attention.

Below is a list of housing projects in its planning phase (which are being dealt by the Department: Housing Development) and the implementation phase (which are being dealt by the Department: Project Management Unit (PMU)) during the period 2017 – 2022 with the status quo of the progress on each specific project within the period mentioned:

Table 3: List of housing projects identified / implemented during the period 2017 – 2022

Implementation Phase		
Project Name	Number of Housing Opportunities Delivered	Project Status by 30 June 2022
Stellenbosch Ida's Valley (286 opportunities on erf 11330)	113 affordable houses and 87 subsidised houses	Project completed.
Stellenbosch Ida's Valley (erf 9445)	166 Gap houses	Completion expected in the 2022/23 financial year.
Klapmuts: Erf 2181 (298 serviced sites)	298 Serviced sites	Project completed.
Klapmuts TRA (298 Nutec Structures)	298 Nutec Structures	Project completed.
Longlands, Vloottenburg (144 Serviced sites)	144	Completion expected in the 2022/23 financial year.
Cloeteville: Rectification of Smartie Town houses	106	Project completed.
Cloeteville: Rectification of The Steps/Orlean Lounge Houses - (Temporary units with toilets erected for temporary	161	This is a multi-year project, and the anticipated completion date is 30 June 2023.

Implementation Phase		
Project Name	Number of Housing Opportunities Delivered	Project Status by 30 June 2022
relocation of occupants during the rectification of units)		
Longlands, Vlothenburg (144 Serviced sites)	38 enhanced sites and 106 subsidy houses	<p>⬆ Completion expected in the 2022/23 financial year.</p>
Upgrading of Zone O in Kayamandi	711	<p>⬆ This project is at its initial stages, and engagements with the community have commenced.</p> <p>⬆ The construction period is estimated to be nine (9) months after the contractor has been established on-site. Site establishment is dependent on the successful relocation of the families residing currently on the site identified for construction.</p> <p>⬆ Phase 1 comprises 178 sites and it is envisaged that the installation of internal services will commence in the 2023/24 financial year.</p>
Erf 3229, Mooiwater, Franschhoek	<p>⬆ Erf 3229 at Mooiwater has been identified as a relocation site to accommodate families impacted by the rehabilitation of the dam wall at Langrug informal settlement.</p> <p>⬆ The Section: PMU is finalising funding applications for emergency housing, which will be submitted to the National Department of Human Settlement (NDoHS) for consideration. Furthermore, the Department: PMU is compiling funding applications for the implementation of basic services, which will be submitted to the PDoHS for consideration.</p>	

Planning Phase		
Number of Housing Opportunities Delivered	Number of Housing Opportunities Delivered	Number of Housing Opportunities Delivered
Cloetesville: Erf 7001	360 Gap housing	<p>⬆ The goal of this development is the delivery of houses to the medium to upper (GAP) housing market and not aimed at BNG housing units (free houses).</p> <p>⬆ A new tender was advertised and closed on 26 July 2021. A service provider was appointed to undertake a Broad Conceptual Urban Design framework for Erf 7001, Cloetesville to obtain town planning and development rights.</p>
Stellenbosch Jamestown Phases 2 and 3	±400 housing opportunities	<p>⬆ The municipality appointed a service provider to undertake a Broad Conceptual Urban Design framework and to obtain town planning and development rights.</p> <p>⬆ The process and timeframe for Phases 2 and 3 will be concluded over a period of two (2) years.</p> <p>⬆ The project is ongoing.</p> <p>⬆ Subdivision approval is expected in the 2022/23 financial year.</p> <p>⬆ The PDoHS approved the funding for the outer years after the Business Plan has been Gazetted in March 2022.</p>
Stellenbosch Jamestown Phase 4	To be determined from studies	<p>⬆ Specialist studies to be conducted before a LUPA application can be prepared which includes a public participation process. Housing opportunities can only be determined after the feasibility studies have been completed for this phase.</p> <p>⬆ LUPA approvals are expected in the 2025/26 financial year.</p>

Planning Phase		
Number of Housing Opportunities Delivered	Number of Housing Opportunities Delivered	Number of Housing Opportunities Delivered
Social Housing (affordable rental accommodation) on Farm 81/2 and 81/9, Stellenbosch	To be determined from studies	<ul style="list-style-type: none"> Portions 2 and 9 of Farm No 81 Stellenbosch. The tender has been advertised in June 2022 and the closing date was 8 August 2022.
Northern Extension: Kayamandi	±5 000 – 6 000 residential opportunities	<ul style="list-style-type: none"> Planning (mix-used development) It is envisaged that the development rights could be obtained during the 2022/23 financial year.
Kayamandi Town Centre	±1 800 (2 to 3 Storey BNG walk-ups)	<ul style="list-style-type: none"> Planning (mix-used development)
Erf 64 Kylemore	±171	<ul style="list-style-type: none"> The HDA went out on a procurement process to appoint a team of professionals to finalise detailed planning studies for the preferred development option and to obtain development rights; The HDA is to submit a Project Initiation Document (PID) funding application to the municipality; and The PID funding application is with PDoHS for comments, the PID funding application will be finalised and submitted in August 2022.
La Motte, Franschhoek	<ul style="list-style-type: none"> The HDA submitted a new request for the State Land Release for the subject property by DPW&I to HDA through Power of Attorney. The target timeframe for the release of the land is the end of the 2022/23 financial year. The HDA to submit a Project Feasibility Report (PFR) requesting funding for land use rights for the project on the release of the property has been completed and is ready for submission to PDoHS to allow funding flow for the 2023/24 financial year. 	
Meerlust, Franschhoek Portion 1 of the Farm Meerlust No 1006	<ul style="list-style-type: none"> Development options have been completed and are ready for presentation to the Stellenbosch Municipality; Detailed costing to be undertaken for the preferred development option; The HDA is assisting the municipality to facilitate the release of land by DPW&I to the Housing Development Agency (HAD) through Power of Attorney; and The HDA is to request funding for land use rights for the project once the release of the property has been completed and is ready for submission to PDHS. 	

2.4. Housing Administration

An intense focus on the handing over of title deeds to disadvantaged communities accelerated. As this is a step towards redressing the legacy of our past and bringing more of our residents into the economy. The handing over of title deeds to beneficiaries continued from 2017 to 2022.

A total of 1 503 title deeds were handed over to beneficiaries for the period 2017 – 2022.

Graph 3: Number of Title Deeds for 2017 - 2022

2.5. Development Services

The management of new developments in the municipal area is of utmost importance to ensure that the impact on municipal services and environment applications is adequately and responsibly mitigated. It is also important for the municipality to facilitate the promotion of economic growth, stimulate job creation, expand the municipal revenue stream (Development Contributions and new property rates), and ensure development contributes to the achievement of the strategic goals of the municipality. The graph below indicates the total of building plans, land use applications and wayleave applications received and commented on for the period 2017 – 2022. For the period 2017 – 2022, a total of **5 048** building plans were received and **3 883** were commented on. Concerning the land use applications received and commented on, a total of **981** were received and **595** were commented on.

In total, **1 150** wayleave applications were received between 2017 and 2022, with **891** comments submitted on these applications.

Graph 4: Total Number of Building Plans for 2017 – 2022

Graph 5: Total Number of Land Use Applications for 2017 – 2022**Graph 6: Total Number of Wayleave Applications for 2017 – 2022**

2.6. Job Creation: Expanded Public Works Programme

Job creation, though a serious concern at the local government level, is not a municipal mandate, however, the Stellenbosch Municipality continue to create an enabling environment for investment to contribute to job creation through economic development strategies and business development. The number of Expanded Public Works Programme (EPWP) Projects has been increased and additional funding provided to ensure that more job opportunities are created.

EPWP contracts are awarded in terms of the Memorandum of Agreement (MOA) between the municipality and National Public Works (NPW). The municipality will provide EPWP contracts for residents registered on the Municipal Jobseekers Database, and through the database, the municipality can accurately monitor the manner the contracts are allocated by each user department. The graph below indicates the total number of EPWP projects and jobs created in the timeframe of 2017 – 2022. A total of **364** EPWP projects were implemented between 1 July 2017 – 30 June 2022 and **5 580** jobs were created within this period. In the 2020/21 financial year more projects and jobs were created than in any other financial year.

Graph 7: Number of EPWP Projects and Jobs for 2017 - 2022

3. Financial Revenue, Operating and Capital Expenditure

The table below shows a summary of the revenue and operating expenditure performance against the budgets approved for the period 2017 – 2022.

Table 4: Revenue and Operating Expenditure Performance vs Budget

Financial Year	Revenue				Operating expenditure			
	Budget	Actual	Diff.	%	Budget	Actual	Diff.	%
	R'000				R'000			
2017/18	1 778 647	1 609 729	-168 918	-9.50%	1 575 255	1 363 953	211 302	13.41%
2018/19	1 738 394	1 629 667	-108 727	-6.25%	1 719 105	1 508 629	210 476	12.24%
2019/20	1 834 539	1 742 596	-91 943	-5.01%	1 778 284	1 661 441	116 843	6.57%
2020/21	1 930 252	1 805 680	-124 572	-6.45%	1 830 891	1 812 392	18 499	1.01%
2021/22	2 116 591	2 028 289	88 302	4,17%	1 977 679	1 925 898	51 781	2,62%

The below table shows the 5 highest capital expenditure projects per financial year for 2017 – 2022:

8.3	TABLING OF THE REVISED CAPITAL EXPENDITURE FRAMEWORK
------------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance and Compliance

22 March 2023 & 29 March 2023

1. SUBJECT: TABLING OF THE REVISED CAPITAL EXPENDITURE FRAMEWORK

2. PURPOSE

Is to obtain Council's approval of the Revised Capital Expenditure Framework (CEF).

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Integrated Urban Development Framework (IUDF) was approved by Cabinet in April 2016, which led to the Integrated Urban Development Grant (IUDG). The IUDG was introduced in the 2019/2020 Division of Revenue Act as a Consolidated Grant for Intermediate City Municipalities (ICMs). Stellenbosch Municipality was identified as one of the municipalities to benefit from this new grant, subject to specified criteria.

The purpose of the ICMs support strategy is to help translate IUDF policy into practical programmes of action in the ICMs.

The business plan for the IUDG is a three-year capital programme that is aligned with a long-term plan (CEF). With the revisions to the SDF and the implementation of the Adam Tas Corridor it required a review of the current Capital Expenditure Framework.

5. RECOMMENDATION

that council approve the revised Capital Expenditure Framework for public comment.

6. DISCUSSION / CONTENTS

According to section 21(n) of the Spatial Planning and Land Use Management Act (SPLUMA), Act No. 16 of 2013, the content of a municipal spatial development framework must determine a CEF for the municipality's development programmes. This means that the CEF is informed by the Spatial Development Framework i.e. stating the spatial vision of the municipality where the CEF states the financial vision of the municipality.

The Integrated Urban Development Framework (IUDF) was approved by Cabinet in April 2016, which led to the Integrated Urban Development Grant (IUDG). The IUDG was introduced in the 2019/2020 Division of Revenue Act as a Consolidated Grant for Intermediate City Municipalities (ICMs). Stellenbosch Municipality was identified as one of the municipalities to benefit from this new grant, subject to specified criteria. The purpose of the ICMs support strategy is to help translate IUDF policy into practical programmes of action in the ICMs.

The business plan for the IUDG is a three-year capital programme that is aligned with a long-term plan (CEF). With the revisions to the SDF and the implementation of the Adam Tas Corridor it required a review of the current Capital Expenditure Framework.

There are a number of key intentions in introducing the CEF as the basis for monitoring the IUDG:

- a) To ensure that priorities identified in the spatial development framework are translated into capital programmes;
- b) To promote long-term infrastructure planning;
- c) To promote infrastructure planning that is better integrated across sectors and spheres and within space; and
- d) To promote a more integrated approach to planning within municipalities that brings together technical, financial and planning expertise.

6.1. Financial Implications

The financial implications of this report will be dealt with Medium Term Revenue and Expenditure Framework (Budget).

6.2 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.3 Staff Implications

This report has no staff implications to the Municipality.

6.4 Previous / Relevant Council Resolutions:

None

6.5 Risk Implications

None

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-03-22: ITEM 6.3

that Council approve the revised Capital Expenditure Framework for public comment.

Annexure A: Revised Capital Expenditure Framework

Part 1

Introduction

1 Part 1: Introduction

1.1 What is a Capital Expenditure Framework

The Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) requires that a Municipal Spatial Development Framework (MSDF) “determine a Capital Expenditure Framework for the municipality’s development programmes, depicted spatially”. The intention of this regulation is to more effectively link the municipality’s development strategies spatially with the municipality’s budget, grounded in the existing and future infrastructure backlogs and demands, as well as the affordability envelope as defined by the Long Term Financial Plan, as illustrated in Figure 1-1.

Figure 1-1: The Capital Expenditure Framework within the built environment context

1.2 Aim of Capital Expenditure Framework

The intention of the CEF is to more effectively link the municipality’s spatial development strategies with the municipality’s budget and the budgets of other government stakeholders, grounded in the existing infrastructure backlogs and future demands, as well as the affordability envelope as defined by the Long Term Financial Plan.

From Figure 1-2 one can see the illustration that infrastructure investment need, expressed as projects, usually exceeds available capital finance, and therefore it is an imperative for municipalities to partake in a prioritisation process to determine which projects are best aligned with the strategy of the municipality, together with a budget scenario process to determine which projects are affordable and should be implemented when.

Figure 1-2: Relationship Between Infrastructure Investment Needs, Affordability Envelope, Prioritisation Process, and Budget Scenario Process

1.3 Role of the Capital Expenditure Framework as a Policy Instrument

One of the contributing factors to the lack of spatial transformation is that strategic policy seldom leads the implementation agenda of municipalities. Instead, the allocation and expenditure of funds are primarily concentrated on short-term objectives. This inclination is reinforced by the "term of office" political structure, outlined in the Integrated Development Plan, which sets a five-year program. Additionally, the Medium-Term Revenue and Expenditure Framework, which stipulates three-year budget cycles, further entrenches this pattern.

Ideally, the infrastructure and built environment programmes articulated in the 5-year Integrated Development Plan should align with the spatial objectives of the MSDF, which is a 20-year plan for the management of the physical growth and development of the municipality.

Annual assessments of municipal IDP's have generally shown a poor linkage between the spatial strategies and proposals articulated in MSDF's, and the proposed location of investment of budgeted infrastructure and built environment programmes within municipalities. This misalignment, while not apparent in all municipalities, is fundamentally problematic and must be addressed.

The problem lies not only with the IDP's content and process but also with the absence of clearly articulated infrastructure requirements to achieve the MSDF and the failure to integrate the MSDF as a strategic decision-making tool that impacts budgetary processes. This overwhelming misalignment between the three spheres shown in Figure 1-1 is thought to be improved through the formalisation of a CEF, but even more important, the collaboration required to compile one. Due to its effectiveness, this long-term planning horizon encourages decision-makers to adopt a long-term perspective.

A view that appreciates that decisions taken today are the foundation upon which the municipality's spatial form, infrastructure network and financial standing will be based in the years and decades ahead. The Capital Expenditure Framework (CEF) offers a mechanism through which the municipality's long-term strategic development vision truly directs infrastructure implementation whilst remaining conscious of the municipality's financial position and infrastructure planning needs.

Figure 1-3: The Relationship Between Policy Instruments Effecting the Spatial Form

1.4 Objectives of Capital Expenditure Framework

The objectives of a Capital Expenditure Framework includes:

- **Compiling a list of infrastructure projects:** The first objective is to compile a list of all infrastructure projects based on engineering master plans, which provides a comprehensive understanding of the municipality's infrastructure needs.
- **Quantifying MSDF proposals:** The second objective is to determine the resources needed to implement each project by quantifying the Municipal Spatial Development Framework (MSDF) proposals in terms of functional areas.
- **Consolidating infrastructure demand:** The third objective is to consolidate infrastructure projects into a comprehensive list of infrastructure demand, which provides a comprehensive overview of the municipality's infrastructure needs.
- **Contextualizing affordability:** The fourth objective is to contextualize the affordability envelope, as set out in the Long-Term Financial Plan (LTFP), which helps to understand the expected revenue, expenditure, and capital budget available over a 10-year period.
