- **Prioritizing infrastructure demand:** The fifth and final objective is to determine and apply a prioritisation framework to the infrastructure demand, taking into consideration the intent of the MSDF and the financial limitations of the LTFP. This helps to prioritise infrastructure projects based on their importance and affordability, ensuring that resources are allocated in the most effective way possible.

1.5 Structure of this Capital Expenditure Framework

This Capital Expenditure Framework is structured based on the adaptive version of the guidelines issues by COGTA.¹

Table 1-1: Structure of this Capital Expenditure Framework

Document Reference	Adapted CEF Structure Reference	Adapted CEF Structure Aim
Part 1: Introduction	Not included	To provide a contextualisation to the Capital Expenditure Framework.
Part 2: Functional and Priority Development Areas	Phase 2a	This part introduces functional areas for priority investment which are defined and mapped to indicate the spatial strategy depicted in the MSDF (linked to the MSDF proposals). The identified functional areas are used to determine the future population, housing, and land demand based on existing socio-economic and related data.
Part 3: Infrastructure demand	Phase 1 Phase 2b	This part compiles a list of projects (budgeted and unbudgeted), sourced from various documents such as master plans, community needs, and sector plans, that are required to meet the infrastructure demand for the next 10 years. It also determines the investment requirements for each functional area, including operational and maintenance costs per asset class. The goal is to compare the optimal infrastructure requirements scenario with the known infrastructure demand based on current planning frameworks.
Part 4: Affordability Envelope	Phase 3	This part is a reflection of the municipality's financial health and long-term financial plan. Primarily it includes the results of the re-application of the long-term financial plan to determine the appropriate affordability envelope.
Part 5: Prioritisation and Budget Scenario	Phase 4	This part has a prioritisation framework that considers spatial, engineering, and financial factors to calculate a composite score indicating each project's relative importance in the pipeline. It also applies this framework to the budget fit process to determine how to allocate capital within the affordability envelope per project for the next 10 years.
Part 6: Capital Expenditure Programme	Phase 5	This part is a breakdown of the 10-year capital expenditure framework. Essentially, it analyses the fitted project pipeline in terms of spatial alignment, asset type alignment, and other attributes to ultimately verify that the 10-year capital expenditure framework is in line with the strategic intent of the prioritisation framework and the MSDF objectives.
Part 7: Institutional Arrangements	Not included	As a concluding chapter to the CEF, this part aims to identify areas of enhancement that will render the CEF not only as a compliance document but to solidify institutional change around the alignment of planning, engineering, and financial practices – with the ultimate aim to improve service delivery.

¹ Methodologies used to complete each part of this document are constantly under refinement, enhancement and improvement.

Figure 1-4: Overview of the Adapted CEF Methodology

Part 2

Functional and Priority Area Profiling

2 Part 2: Functional and Priority Area Profiling

2.1 Relationship between Functional Areas and the Spatial Development Framework

There is a direct relationship between an SDF and functional areas. The SDF seeks to understand the spatial environment and along with the spatial vision addresses issues. The SDF has several focus areas often referred to as “priority areas” or “priority development areas”. These areas then need to be identified in terms of functional areas. The purpose of this is to have a wall-to-wall coverage of the municipality and ensure no area is left out. The purpose of this is to pack out the SDF in terms of functional areas. The purpose of this is to be able to identify and quantify the population growth across functional areas. This enables the municipality to quantify land requirements and economic growth opportunities within the municipality.

2.2 What is a Functional Area

COGTA's Guide to preparing a Capital Expenditure Framework expresses a functional area with similar characteristics in terms of service and developmental needs. A functional area can thus be defined as a delineated area with similar characteristics that require similar development and services. An example is demarcating rural and urban areas separately because of each area's unique aspects and needs, leading to a unique development approach. The functional areas must account for the total population and subsequent population growth over a 10-year period. The functional area also accounts for the capex awarded for a 10-year period towards infrastructure investments that fall within the affordability envelope.

2.3 What is a Priority Area

Priority areas can be defined as areas where the municipality aims to focus investment to achieve the goals of the Spatial Development Framework or other lower-order plans. Priority areas are often referred to as focus areas and are defined in terms of functional areas. For this reason, functional areas can include specific priority areas such as specific nodes focusing on servicing rural areas. There is a direct relationship between functional areas and priority areas. Entire functional areas can be recognised as a priority areas or one functional area can include several priority areas.

2.4 Functional Area Delineation

The following shows the functional areas of Stellenbosch Local Municipality and explains what the three different functional areas and the total area they occupy within the municipality. Figure 2-1 visually showcases the delineated functional areas of the municipality. There are three main categories of functional areas within Stellenbosch: urban nodes, rural nodes, and rural areas.

Figure 2-1: Functional Areas

Urban Node: Areas that are considered urban in nature and include the urban core, urban centre and general urban areas. These areas have the greatest variety of uses such as commercial uses, office space, and public transport routes. Densification is often seen in urban nodes and this does include having accommodation for students as seen in Stellenbosch. The urban node is associated with larger towns and cities and serves as the main service centre to all surrounding smaller towns within the municipality. The urban node is approximately 1 076 ha or 1,29% of the area of the municipality. This indicates that the municipality has a small area that is devoted to being an urban node functional area.

Rural Node: These areas are mainly residential in nature but can serve the purpose of accommodating light industrial, office or retail uses. The rural node is also suburban in nature and is connected to more prominent urban nodes through transport networks or higher-order roads. Rural nodes also function as service nodes to rural areas and serve as the residency of many agricultural workers. The rural nodes cover approximately 3 726 ha or 4,48% of the municipality.

Rural: The most predominant area in the municipality is the rural functional area. As a result of the agricultural activities within the municipality, the rural functional area occupies approximately 94,23% of the municipality. As the name suggests this functional area includes several activities relating to agriculture and this is seen in the many wine estates present throughout the municipality. The rural functional area also includes several areas categorised as natural. These areas are areas with unfavourable development conditions or protected areas.

2.5 Functional Area Profiles

This section shows the demographic, socio-economic and spatial characteristics for the municipal area. The spatial and socio-economic profile of the municipality drives future demand and hence capital and operating investment and expenditure.

The aim of this analysis is to obtain an in-depth understanding of the demographic and socio-economic characteristics of the population that are being served in each FA of the municipality. This assessment typically includes access to infrastructure and social services and amenities, as well as the level of service of these services and amenities. The purpose of the municipal profiling is, therefore, twofold:

- Firstly, to identify the population within the municipality and FAs in order to determine the base unit of needs estimation as input to the infrastructure modelling and financial modelling, and;
- Secondly, to understand the status quo of services within the municipality.

These two basic elements can be used to quantify and project growth, which in turn will unlock the ability to project infrastructure provision demand over the planning horizon of 10-years. Understanding the socio-economic and spatial profile of the municipality enables the municipality to make more accurate and informed decisions regarding capital investment going forward.

Social profiling is usually presented in the SDF, however, given the lack of quantification in the existing SDFs across local governments nation-wide, municipal and FA profiling is deemed as a necessary step by the CEF guidelines as a prerequisite to evidence-based planning.

It is challenging to show all the required detail in the maps in this report. Therefore, each map in this section is linked to a URL. By clicking on the map, the map will open in the user's default browser. When in the browser, one can zoom in and out and change the selection of background maps. Use the legend on the map in the report as a reference for the colours on the map in the browser.

2.5.1 Data Sources

It is vital to consider as many as possible data sources in determining future population and household numbers. The following data and datasets informed the do estimates of future population and household levels.

- Official data sources:
 - Census data from StatsSA. This data covers 1996, 2001 and 2011;
 - Community Surveys from StatsSA for 2007 and 2016;
 - Mid-year population estimates from StatsSA, and;
 - Local housing data from the municipality.
- Commercial data sources:
 - Quantec that provides times series data per annum since 1993. This data is only available at the municipal level, and;
 - GeoTerralimage provides advanced demographic data at sub-municipal data. Their 2018 data release was used.

Data represented in the following tables potentially differ from previous CEF's completed due to the fact that the demarcation boundary of the municipality changed. Compared to 2016 data, a total of 480ha is added to the Stellenbosch jurisdiction. Through spatial analysis tools, particularly data partitioning protocols, population figures are assigned to the analysis areas factoring in the change in total area and demarcation and consequently represent a change in absolute data numbers. This is best seen in the Community Survey data of 2016.

2.5.2 Demographic Profile

A range of factors impacts the demographic profile of the municipality. These factors interact horizontally and, importantly, have a hierarchical relationship with national, provincial and regional demographics. The analysis of variables is therefore done on a comparative basis and by also exploring relationships

between demographic variables as well as the relationship that the demographics have with economic development. The factors considered are:

- Population size, household numbers and size and the expected change in these numbers;
- Age, language, and education;
- The impact of HIV and AIDS on population growth expectations, and;
- Migration

2.5.3 Population Characteristics

2.5.3.1 Population Structure, Age, and Gender

The total population is the starting point. For any planning assessment, the total population is fundamental to the current and long-term demand for services and facilities. The table below shows the population, with a gender split, for the three census periods, Community Survey 2016 and WoldPop. From the time-related figures, inferences can be drawn about population growth or decline. Gender splits, if appropriate under local conditions, also serves as a proxy for migrant labour. Generally speaking, male absenteeism indicates that an area is shedding workers while surplus males show the area is attracting migrant labour based on expectations of economic growth and job creation.

Table 2-1 below shows that the region has always had a nearly equal split of gender in the population. As explained above, indications are that migrant labour is not a factor to consider.

Table 2-1: Population and Gender

	1996	2001	2011	2016	2020
Males	51,208	57,862	76,133	89,929	99,717
Females	53,392	61,138	79,508	92,956	100,581
Population density (persons/ha)	1.14	1.39	1.82	2.14	2.35
Total Population	104,600	119,001	155,641	182,886	200,642

Source: Census 1996, 2001, 2011, Community survey 2016, /SDSA (MapAble 2023) /WoldPop2020

Age groups are significant in any demographic assessment. The population's age structure provides a clear indication of the expected long-term demand for community and social services, housing, and infrastructure services. The table below only reflects on four age categories. The first category is the preschool population; the second category is the extent of the school population, the third category is the economically active population, and the last group is the elderly population.

The age structure of the study area has remained relatively unchanged over all the age groups. Interestingly, over 63% of the population falls within the economically active group of 20 to 65 years of age, as reported in the 2016 community survey figures. This percentage has also increased from just over 50% in 1996. The two following maps (Figure 2-2 and Figure 2-3) show the percentage population below 19 years and the working-age group population. Figure 2-2 emphasises the high percentage of people within the working-age group in the municipality.

Table 2-2: Age Groups

	1996		2001		2011		2016	
	Male	Female	Male	Female	Male	Female	Male	Female
<5	5,679	5,527	8,008	7,858	5,735	5,812	7,318	7,754
5 to 20	15,403	16,104	19,802	20,730	17,528	18,213	23,169	22,224
20 to 65	27,777	28,708	45,413	46,874	32,522	34,303	56,073	58,595
>65	1,636	2,411	2,910	4,047	2,078	2,811	3,368	4,383
Unspecified	714	642	0		0		0	
Total	51,208	53,392	57,862	61,138	76,133	79,508	89,929	92,956
	104,600		119,001		155,641		182,886

2.5.3.2 The Differences in Population Groups

Population groups need not be a central issue in development analysis. However, looking at the local population's composition might help explain current dynamics based on historical population settlement patterns.

Table 2-3 below shows the populations at various geographic levels in 2021. The population figures show structural differences in composition between the various scales and racial groups. The coloured population is the dominant group in the Stellenbosch municipality and accounts for more than half the population. The second-largest group is the black group with the white and Asian groups accounting for less than 15% of the population. This pattern is relatively similar in the larger district and the province. Compared to the national population structure, a clear difference is evident.

Table 2-3: Comparative Population Numbers by Population Group 2021

2021	South Africa		Western Cape		Cape Winelands		Stellenbosch	
	Total	%	Total	%	Total	%	Total	%
Black population	48 734 600	81,42%	2 701 985	38,23%	266 260	28,09%	60 140	32,67%
Coloured population	5 232 220	8,74%	3 372 083	47,72%	585 015	61,72%	98 024	53,25%
Asian population	1 472 856	2,46%	79 376	1,12%	3 545	0,37%	656	0,36%
White population	4 412 519	7,37%	913 657	12,93%	93 034	9,82%	25 256	13,72%
Population total	59 852 195	100,00%	7 067 100	100,00%	947 855	100,00%	184 076	100,00%

Source: Quantec 2023

Table 2-4 below shows the population in the municipality as it has changed over the last 26 years. The figures indicate substantial growth in the Black and Coloured populations while the other population groups declined.

Table 2-4: Population Groups

	1995	2000	2005	2010	2015	2021
Black	20 038	27 294	34 409	43 098	50 459	60 140
White	62 573	67 819	72 782	80 926	88 854	98 024
Coloured	258	299	362	468	556	656
Indian	25 694	26 055	26 945	27 757	26 130	25 256
Total	108 563	121 467	134 499	152 249	166 000	184 076

Source: Quantec 2023

Figure 2-4 below illustrates these changes. The growth in the Black and Coloured population groups seems to be consistent over the assessed period. The white population group shows an increase in the population until 2010, whereafter there is a strong decline in numbers. The Asian population group has also increased, but from a small base.

Figure 2-4: Population Growth 1993 to 2021

Source: Quantec 2023

Figure 2-5 below shows the rate of change of the population between different groups. All the population groups, except for whites, show a similar trend. The figures show a real decline in the number of whites since 2011.

Figure 2-5: Population Growth Rates by Population Group

Source: Quantec 2023

The spatial distribution of the dominant population group in the municipality is shown in Figure 2-6 below.

Figure 2-6: Population Majority 2011

Source: Census 2011 / MapAble 2023

2.5.3.3 The Spatial Dynamics of the Population

The sections above dealt with the profile for the municipality. However, with the CEF aim to do spatial targeting, it is essential to give a perspective of where people are located and where changes occurred overtime throughout the municipality.

The table illustrates how spatial variances occur and why it is vital to consider population change's spatial dynamics. The next three maps show where changes occurred. The first essential element is the fact that population growth occurred in very specific localities. It is mainly associated with the more critical nodal points and then also with specific new developments.

The second important aspect is that most of the rural areas increase in population in small numbers. Most of the depopulation found within the municipality is in the areas surrounding the existing towns and settlements, such as Stellenbosch and Franschhoek.

Table 2-5: Population change from 1996 to 2020

Population and households	
Population (1996):	104 600
Population (2020):	200 642
Population Change	96 042
Average annual population growth rate	2.8%
Population Density (People/Ha):	2.35

Figure 2-9: Nett Population Changes Between 1996 and 2020

Source: SDSA (MapAble 2023)

2.5.3.4 Population Change and Growth

Assessing population change in a municipal area is challenging for several reasons:

- Municipalities function in an integrated environment where changes at a national, provincial, and neighbouring areas directly impact local growth.
- Data sources differ in terms of baseline data used and hence in outcomes which complicate comparative assessments.
- Municipal population figures are, with a few exceptions, a disaggregation of higher-order data. Between censuses, mid-year population estimates at the district level are the only available sources. Most data sets use StatsSA's mid-year population estimates as a benchmark.
- Long-term projections (ten years and longer) are subject to high uncertainty levels because many factors drive local development.
- Interventionistic policies from the government are often unpredictable and focus on deliberately change historical trends. This increases the level of uncertainty in outcomes.

Notwithstanding these challenges, it remains essential to project and estimate future population and household numbers. Population and household changes are the drivers of the long-term demand for land and services.

The historical perspective on population and household changes are essential. It is also the basis for determining future household and population levels. However, countless factors impact population and household growth. Long-term estimates and the scale of a municipality remains challenging due to the open nature of the development systems and the free movement of people and access to goods and services across municipal boundaries. Any long-term projection must only be regarded as indicative, and changes need to be monitored continuously. Population and household growth ultimately determine the services demand in the municipality.

The next series of graphs show how the different available data sets relate. The approach is to build from the known official data and then add the commercial datasets after using trend analysis to reach a workable scenario.

Figure 2-10, below starts by looking at the main StatsSA data sources. These include the census data for 1996, 2001, and 2011 as well as the 2007 and 2016 Community Surveys. One can immediately see some questionable results, especially from the 2007 Community Survey where a figure of 200 524 people seems out of place compared to the other results. Applying a trend line to the Census data a near perfect correlation between the data occurs. Following this growth path, one sees an expected increase in the municipality's future population, reaching over 250 000 people by 2043.

Figure 2-10: Census and Community Survey Outcomes

The next graph shows the results when the Population estimates of StatsSA in Stellenbosch local municipality comes into play. This data was prepared for the Stellenbosch local municipality by StatsSA. The trendline also shows near-perfect correlation but unlike the census data is shows a predicted slowing down of the population growth rate over time. In this case, the expected future population by 2040 is below 250 000.

Figure 2-11: Projections Based on StatsSA Data

Figure 2-11 above shows the results when the mid-year population estimates of StatsSA. The trendlines of the mid-year estimates and the Stellenbosch StatsSA data show a similar trend and a strong correlation. Based on this, one can assume that a future estimate based only on the three census figures might present inaccurate results. The complication with these three data sets from Statistics South Africa is apparent.

Figure 2-12: Projections Based on StatsSA Data

The chart below shows the Quantec data, a GTI data point for 2017 and a WorldPop data point of 2020. The Quantec data provides the most extended set of historical data. It is interesting to note the different trends between the data sets and that the Quantec data correlates with the results of StatsSA's mid-year population estimates. This is to be expected as the Quantec data benchmarks on the mid-year population estimates. GTI's data can be empirically verified, and it might point to an undercount of about 22.5% in the population. An undercount of this extent can have serious implication for planning in the municipality. Similarly, households show a 33.7% undercount based on the mid-year population estimates.

Figure 2-13: Quantec and GTI Population Data

When one uses the Quantec data and applies Microsoft Excel's forecast function, the following forecast shows the population levels until 2040 within a 95% confidence limit. The figure below shows the results.

Figure 2-14: Forecasting Population using Quantec Data

The forecast indicates that the expected population in 2043 is 249 146. Although this is statistically within 95% confidence levels, the upper and lower confidence bounds are different but possible. The variation in a 95% confidence between the upper and lower limits highlights the importance of closely monitoring population continuously.

Table 2-6 below shows the projected population figures. The Quantec and mid-year population estimate trends show growth in the expected population in 2043 at 249 146 and 256 272, respectively. At the same time, the Census forecast is higher than both previously mentioned indicators with the 2043 predicted population at 265 199. This is a difference of about 10 000 people in the estimated population of 2043 between the different data sets. There are various challenges with midyear population estimates and StatsSA did not realise updated estimates at the municipal level for 2021.

Table 2-6: Projected Population Numbers

	2021	2025	2030	2035	2040	2043
Quantec forecast	184 076	195 961	210 734	225 508	240 282	249 146
Census Trend	189 499	203 263	220 467	237 672	254 876	265 199
Mid-year population estimates trends (Stellenbosch working figures)	196 145	211 565	228 921	243 085	252 921	256 272

2.5.4 Household Characteristics

Households are usually assessed in the context of the total population. This gives rise to density ratios and household size. The total number of households is always an important factor in determining the overall demand for infrastructure services and housing. Household density is an important indicator of settlement efficiency and plays an important role in urban planning and development strategies. Household size has an impact on the extent of consumption of goods and services. One should note that housing support strategies have affected household formation to the extent that there are often different rates of change between households and population. The basic household profile for the assessment area is shown in Table 2-7 below. Table 2-8 shows the number of households per population group.

Table 2-7: Total Households, Size and Density

	1996	2001	2011	2016
Total households	26,147	35,170	43,322	55,338
Household density (households/ha)	0.29	0.41	0.51	0.65

	1996	2001	2011	2016
Ave household size	4.00	3.38	3.59	3.30

Source: Census 1996, 2001, 2011/MapAble 2023

Table 2-8: Number of Households by Group

	1995	2000	2005	2010	2015	2021
Black Households	5 712	7 949	10 342	13 445	16 207	19 752
Coloured households	13 359	14 537	15 580	17 261	18 884	20 758
Asian households	74	84	97	118	134	152
White households	11 182	11 945	12 228	12 130	10 956	10 130
Households total	30 327	34 516	38 248	42 954	46 181	50 792

Source: Quantec 2023

2.5.4.1 Historical Household Growth Trends

As shown in Figure 2-15 below, the trends for households are broadly the same as for population. This is also true for the next graph showing the growth rates (Figure 2-16: Comparative Household Growth Rates from 1993 to 20). However, the change dynamics in population and households are not precisely the same, and when the two data sets are used to show household sizes and the changes in household size, several important aspects emerge.

The number of black households has grown significantly between 1993 to 2021 and still shows the most robust growth of all population groups. Coloured households also show strong growth but not at the rate of black households. White households show an interesting pattern. There was a decline in white households since 2009, and by 2021 white households numbers decreased to below the 1993 level.

Figure 2-15: Household Growth from 1993 to 2021

Source: Quantec 2023

The corresponding growth rates are shown in the figure below. The graph shows a similar trend for the country, province, district, and the municipality. It is interesting to note that the household growth rate in the Stellenbosch Local Municipality has been below that of the district, province and national rates since 2012.

Figure 2-16: Comparative Household Growth Rates from 1993 to 2021

Source: Quantec 2023

The figure below confirms the declining growth rates and compares the household growth rates per population group in the municipality. The household growth rates for the black and Asian population groups have generally been above the municipality's total. The coloured population group follows a very similar trend that the total. This is to be expected as the coloured population group accounts for the majority of the population. The white population group is below the total for the municipality and is continuously declining. Since 2010 the household growth rate for the white population group has been negative.

Figure 2-17: Household growth rates in Stellenbosch Local Municipality 1993 to 2021

Source: Quantec 2023

Figure 2-18 below shows household densities in the municipality at a 2km kernel density. As can be expected, the overall densities follow a similar pattern to the population's spatial distribution. The highest

densities are in and around Stellenbosch with some lower densities being recorded in Franschhoek, Klapmuts and the area around Pniel, Langedoc and Kleymore.

Figure 2-18: Household Densities - Dwelling Units per km² (2km Kernel)

Source: MapAble 2023

2.5.4.2 Household Size

Household size is an important indicator. In demographic terms, it relates to the stages of the demographic cycle, and decreasing household sizes is also an indicator of improving socio-economic conditions. However, increasing household sizes may also indicate economic stress leading to overcrowding and bigger households. Decreasing household sizes might also result from government housing programs that, in effect, encourage large family units to split up to access subsidised housing.

Table 2-9 below and the graph show that overall household sizes have relatively stable in the assessed period. The Coloured population's household size remains the same, while the Asian and White populations' households size increased.

Table 2-9: Household Size from 1993 to 2021

	1995	2000	2005	2010	2015	2021
Black population	3,5	3,4	3,3	3,2	3,1	3,0
Coloured population	4,7	4,7	4,7	4,7	4,7	4,7
Asian population	3,5	3,6	3,7	4,0	4,2	4,3
White population	2,3	2,2	2,2	2,3	2,4	2,5
Average HH Size	3,6	3,5	3,5	3,5	3,6	3,6

2.5.4.3 Household Change and Growth Forecasts

Households and household change are one of the most critical aspects of long-term planning in any area. The number of households translates into customer units, and households usually represent more than 95% of the customers in a municipality.

Except for the outdated censuses and community surveys, all official statistics used at a municipal or sub-municipal level are all derived from the mid-year population estimates of StatsSA. Both Quantec and GTI use the midyear estimates to calculate and calibrate their household figures. However, GTI also uses their building-based land use (BBLU) data derived from satellite imagery, to aggregate statistics and then to calibrate using mid-year population estimates.

The differences in sources of base year figures are noticeable, and when these figures are projected for planning purposes, small variations in number translates into big differences over a twenty-year planning horizon.

The necessity to do forecasts is important since it becomes the basis for all planning activities. Housing programmes, service delivery planning and budgets are all dependent on estimating and forecasting the long-term customer profiles of the service providers. As a previous section highlighted the challenges with population forecasts, housing units' forecasts are even more challenging. This does not imply that one should not do household forecasts, but it is important to continuously monitor changes and patterns. Underlying any planning implementation systems is a data and information monitoring system.

The following graphs highlight the implications of current household data sources for different forecast scenarios.

StatsSA shows household data in the censuses for 1996, 2001 and 2011, community surveys for 2016 and the mid-year estimates. The data points are shown in the figure below. The trendlines show very good correlation coefficient of 0.99 on the mid-year estimates and census points. The trend lines show about 74 845 and 60 402 households by 2043, respectively.

Figure 2-20: Household Trends Based on StatsSA Data

Figure 2-21 below shows Quantec data, benchmarked to mid-year population estimates, and also the GTI figure for 2017. The GTI figure is substantially higher, but it is verifiable as it is based on observed structures. There are 59 078 physically observed housing structures compared to the 48 595 households according to the Quantec data based on the StatsSA baseline. It implies a substantial undercount as indicated in Figure 2-21.

Figure 2-21: Household Trends Based on Quantec Data

The Quantec household figures, mid-year estimates, and the current number of dwelling units per GeoTerralImage data are not within acceptable margins from each other as largest difference is 14 000 households. Establishing long trends remains a challenge.

The following household numbers support the identified trends.

Table 2-10: Projected household numbers

	2021	2025	2030	2035	2040	2043
Quantec forecast	50 792	54 326	58 329	62 333	66 336	68 738
Census trend	50 285	52 440	54 898	57 146	59 224	60 402
Mid-year population estimates trends (Figures adopted by Stellenbosch)	53 077	57 472	62 797	67 815	72 382	74 845

However, uncertainty is high and requires continuous growth monitoring.

2.6 Functional Area Summary

The following sections are summary profiles for the various functional areas identified within Stellenbosch Local Municipality. These areas are identified as follows:

- Urban nodes,
- Rural nodes, and
- Rural area

The profiles are broken in to separate tables for each functional area that showcase different data sets. These data sets include the following:

- Total area in hectares,
- Population and household numbers,
- Social and community facilities,
- Non-urban land cover,
- Urban land cover,
- Levels of Services,
- Points of interest, and

- Road types.

2.6.1 Functional Area 1: Urban Node Profile

The urban node profiles provide an overview of pertinent available socio-economic data and include the areas defined as urban nodes in the Stellenbosch Municipality Spatial Development Framework. These urban nodes are Stellenbosch, Franschhoek and Klapmuts.

2.6.1.1 The Extent of Urban Nodes

Table 2-11 below, shows the extent of the three urban nodes in hectare. Of the three urban nodes under investigation, the Stellenbosch node is the most extensive, comprising 2 868 hectares, while Franschhoek and Klapmuts are relatively similar in size, measuring 484 and 450 hectares, respectively.

Table 2-11: Total Area of Urban Nodes

Area	Stellenbosch	Franschhoek	Klapmuts	Total
Area (ha)	2 868	484	450	3 802

Source: Census / MapAble 2023

2.6.1.2 Population and Households

Table 2-12 provides an overview of pertinent population and household figures for the three urban nodes of Stellenbosch, Franschhoek and Klapmuts. Population and household figures are derived from StatsSA census data (1996, 2002, 2011) and WorldPop2020. Other third-party data are not considered as the data must be presented at a sub-municipal level. Most other data sources only provide figures for the municipal area. In all three areas, the population increased considerably between 2001 and 2011. However, the rate of growth declined between 2011 and 2020. Despite this, the population growth in the urban nodes is still growing at an average of 4% per annum and saw a total increase of 33%.

Population densities in the three urban nodes are similar to population growth. Franschhoek has the highest density (39.2 people/ha), shortly followed by Stellenbosch (36.7 people/ha), while Klapmuts has the lowest relative density (22.9 people/ha).

The growth in the number of households shows a more pronounced increase than the number of people. The data shows that in all three urban nodes, the number of households grew by 7% per annum between 2001 and 2011. Unfortunately, more recent data is not available to calculate current growth trends in household growth.

As with the relationship between population numbers and population densities, household figures also follow a similar growth trend. The average household size is expected to decline in all three urban nodes as household figures grow faster than compared to the population. This is confirmed in the figures. Franschhoek showed the most significant decline between 2001 and 2011 at 26%, while in Stellenbosch, the average household size declined by 15%. The average household size in Klapmuts only decreased by 7%. Overall the average annual household size in all three urban nodes decreased by 2%.

Table 2-12: Population and Household Numbers of Urban Nodes

Population and households	Year	Stellenbosch	Franschhoek	Klapmuts	Total
Total Population	1996	54 467	5 692	1 576	61 735
	2001	56 723	7 909	4 176	68 808
	2011	78 635	14 521	7 814	100 970
	2020	105 292	18 982	10 293	134 567
Population density (persons/ha)	1996	18,50	11,75	1,61	16,24
	2001	19,78	16,33	9,29	18,10
	2011	27,42	29,98	17,37	26,56

Population and households	Year	Stellenbosch	Franschhoek	Klapmuts	Total
	2020	36,71	39,22	22,87	35,39
Total households	1996	14 311	1 322	341	15 974
	2001	14 598	1 928	972	17 498
	2011	23 743	4 785	1 966	30 494
Household density (households/ha)	1996	4,86	2,73	0,35	4,20
	2001	5,09	3,98	2,16	4,60
	2011	8,28	9,88	4,37	8,02

	2011	3,31	3,03	3,98	3,31

Source: Census / MapAble 2023

2.6.1.3 Social and Community Facilities

The dominance of Stellenbosch is again highlighted in the prevalence of social and community facilities as seen in Table 2-13 below. There is a total of 30 education facilities located in the urban nodes, 23 health care facilities, four SAPS stations and one lower court.

Table 2-13: Social and Community Facilities Numbers of Urban Nodes

Social and community facilities	Stellenbosch	Franschhoek	Klapmuts	Total
Primary schools	14	3	1	18
Secondary school	10	1	0	11
Intermediate school	0	0	0	0
Combined school	0	1	0	1
Public health	9	2	1	12
Private health	1	0	0	1
SAPS stations	2	1	1	4
Lower courts	1	0	0	1

Source: Department of Basic Education 2016 / Department of Health 2015 / South African Police Services 2015 / MapAble 2023

2.6.1.4 Land Cover

Because the areas under assessment are urban nodes, one would not expect extensive land cover related to non-urban activities. Table 2-14 below depicts the changes in Land Cover related to non-urban uses between 1990 and 2014. Land cover data for 2018 is available from the Department of Environmental Affairs - Directorate Geospatial Information Management. However, the 2018 data had been reclassified, making direct comparisons between the different timeframes difficult.

From the table below, the only significant changes to note are those related to Cultivated commercial fields, Cultivated commercial pivots, and Cultivated orchards and vines in the Stellenbosch Urban Node. All these categories have seen a slight decrease and can potentially result from urban expansion.

Table 2-14: Non-urban Land Cover in Hectares of Urban Nodes

Land cover non-urban	Year	Stellenbosch	Franschhoek	Klapmuts	Total
Cultivated commercial fields	1990	43,6	2,9	63,8	110,3
	2014	30,4	2,6	66,4	99,3
Cultivated commercial pivot	1990	0,0	0,0	0,0	0,0
	2014	0,0	0,0	0,0	0,0
Cultivated orchards and vines	1990	229,7	89,8	43,3	362,8
	2014	166,3	88,9	42,2	297,4

Land cover non-urban	Year	Stellenbosch	Franschhoek	Klapmuts	Total
Sugarcane	1990	0,0	0,0	0,0	0,0
	2014	0,0	0,0	0,0	0,0
Subsistence farming	1990	0,0	0,0	0,0	0,0
	2014	0,0	0,0	0,0	0,0
Forests & Plantations	1990	160,2	7,7	0,0	167,9
	2014	42,9	1,1	0,0	44,0
Mining	1990	0,0	0,0	0,0	0,0
	2014	0,0	0,0	0,0	0,0

Source: Department of Environmental Affairs / MapAble 2023

Regarding the urban-related land cover, most of the categories in all three urban nodes show a slight increase or decrease of 1% - 2%. The most significant change occurred in the urban informal category. The Stellenbosch urban node saw an increase of 111%. Franschhoek's informal category grew from 0 hectares in 1990 to 12.5 hectares in 2014. The urban informal category grew by a staggering 152% per annum between 1990 and 2014.

Table 2-15: Urban Land Cover in Hectares of Urban Nodes

Land cover Urban	Year	Stellenbosch	Franschhoek	Klapmuts	Total
Urban built-up	1990	0,0	0,0	1,6	1,6
	2014	15,7	0,0	3,8	19,5
Urban commercial	1990	277,4	7,9	1,3	286,6
	2014	300,3	5,3	0,5	306,1
Urban industrial	1990	158,5	4,6	3,2	166,3
	2014	139,4	3,8	1,8	145,1

	2014	65,6	3,8	0,0	69,4

Source: Department of Environmental Affairs / MapAble 2023

2.6.1.5 Zoning and Vacant Land

An assessment of the zoning of the urban nodes is presented in Table 2-16 below. In the Stellenbosch urban node, the conventional residential zone (21%) and public roads and parking zone (15%) dominate. Despite the urban nature of the node, the largest zoning category is the agriculture and rural zone (25%). A similar pattern is also evident in Franschhoek but differs in that private open space is the largest category (25%). Klapmuts, despite being categorised as an urban node, still shows a largely rural nature based on prevalent zoning based on the fact that 54% of the node is zoned as agriculture and the rural

zone. The conventional residential zone makes up 9% of the Klapmuts area, with a variety of other zoning mainly in the range of 1% – 4%.

Table 2-16: Zoning

Zoning Category	Stellenbosch	Franschhoek	Klapmuts	Total
Agriculture and Rural Zone	713.22	78.40	246.12	1 037.73
Community Zone	39.39	13.16	5.66	58.21
Conventional Residential Zone	606.89	99.09	41.80	747.78
Education Zone	181.56	13.26	5.37	200.18
Industrial Zone	104.05	5.01	2.42	111.48
Less Formal Residential Zone	62.98	17.39	12.46	92.84
Limited Use Zone	0.89	5.18	3.33	9.39
Local Business Zone	14.69	0.92	7.31	22.92
Mixed Use Zone	123.42	12.47	7.39	143.28
Multi-unit Residential Zone	93.09	7.57	15.34	116.00
Natural Environment Zone	0	0	0	0
Private Open Space Zone	267.85	120.31	8.44	396.61
Public Open Space Zone	105.95	16.90	5.95	128.80
Public Roads and Parking Zone	421.81	46.12	31.86	499.78
Subdivisional Area	3.60	6.92	5.27	15.79
Transport Facility Zone	13.76	0.00	16.20	29.96
Utility Services Zone	33.82	2.46	16.25	52.52
Other	108.51	27.29	27.86	163.66
Total	2 895.48	472.46	459.02	3 826.96

Source: Stellenbosch Municipality

The data presented in Table 2-17 below shows that 437 hectares (15%) in Stellenbosch are indicated as vacant. In Franschhoek and Klapmuts 128 hectares (27%) and 300 hectares (65%) of the node are shown as vacant, respectively.

Table 2-17: Vacant Land

	Stellenbosch	Franschhoek	Klapmuts	Total
Vacant Land	437.5	128.7	300.2	866.3

Source: Stellenbosch Municipality

2.6.1.6 Access to Services

Water services have been a very high priority in service delivery strategies over the past two decades. One of the critical Millennium Goals adopted in 2000 stated that countries should aim to halve people's proportion without access to safe drinking water and basic sanitation by 2015. At least 50% of households should have access to at least basic services according to these goals. Table 2-18 below show the percentage of households that have access to full, intermediate, basic and below basic levels of services for water. The Stellenbosch urban node has maintained good service levels, with most of the population receiving water services above the basic standard. Franschhoek showed a drastic decline in the percentage of households that had access to full services between 1996 and 2001. This can potentially be explained by the increase in population during that time. One must also consider the increase in land cover in the urban informal category to explain this decline. In general, over time, the urban nodes show a recovery in water services provision.

Table 2-18: % Access to Water Services of Urban Nodes

Access to water services	LOS	Stellenbosch	Franschhoek	Klapmuts	Total
1996	Full	77,9%	76,3%	19,2%	76,5%
	Intermediate	6,5%	5,9%	25,4%	6,8%
	Basic	15,0%	17,0%	41,3%	15,7%
	Below Basic	0,2%	0,6%	11,5%	0,5%
	None	0,4%	0,3%	2,6%	0,4%
2001	Full	71,3%	25,9%	50,0%	65,1%
	Intermediate	10,4%	11,6%	21,7%	11,1%

	Below Basic	5,3%	7,7%	0,2%	5,3%
	None	0,6%	1,7%	0,7%	0,8%

Source: Census / MapAble 2023

Access to appropriate sanitation services is a very high health priority. Table 2-19 below shows that despite the increase in population, the municipality has been able to keep up with the demand for sanitation services.

Table 2-19: % Access to Sanitation Services of Urban Nodes

Access to sanitation services	LOS	Stellenbosch	Franschhoek	Klapmuts	Total
1996	Full	92,1%	63,9%	21,3%	88,3%

	None	1,0%	1,3%	1,7%	1,1%

Source: Census / MapAble 2023

Although electricity does not have the same implications for health as water and sanitation, access to electricity is essential for general development, especially education. Access to electricity was, therefore, always a high priority. Table 2-21 below shows how access to electricity has changed since 1996. This table is based on access to lighting as a proxy for access to electricity. Stellenbosch and Klapmuts show good access to electricity since 1996, while Franschhoek has improved over time.

Table 2-21: % Access to Electricity Services of Urban Nodes

Access to electricity services	LOS	Stellenbosch	Franschhoek	Klapmuts	Total
1996	Full access	95,3%	56,3%	74,9%	91,6%
	No access	4,8%	43,7%	25,1%	8,4%
2001	Full access	97,7%	38,2%	71,8%	89,7%
	No access	2,3%	61,9%	28,3%	10,3%
2011	Full access	93,9%	88,8%	96,2%	93,2%
	No access	6,1%	11,2%	3,8%	6,8%

Source: Census / MapAble 2023

2.6.1.7 Points of Interest

The points of interest information are derived from a third-party data source (MapIT). Table 2-22 shows the number of points of interest, summarised into six (6) categories. As would be expected in urban nodes, there is a high concentration of Offices, Retail, Entertainment and Commercial activities, especially in the Stellenbosch Urban Node. Klapmuts, with its much smaller population, has much fewer points of interest to consider.

Table 2-22: Points of Interest in Urban Nodes

Points Of Interest	Stellenbosch	Franschhoek	Klapmuts	Total
Primary economic activities	4	3	0	7
Offices, Retail, entertainment and commercial	1220	159	25	1404
Multiple residential	112	8	0	120
Community and social facilities	228	39	4	271
Government, Infrastructure and Transport	95	11	3	109
Tourism, recreation, accommodation and natural features	189	84	5	278

Source: MapIT / MapAble 2023

2.6.1.8 Road types

Table 2-23 below shows the road types in each of the urban nodes. It also distinguishes between the length of paved and unpaved roads. In the Stellenbosch urban node, 95% of the roads are paved. This is mainly made up of main roads and residential roads, while the unpaved roads are related to informal road types. 85% of the roads in the Franschhoek urban node are paved, with suburban roads comprising the majority of these. 74% of roads in Klapmuts are paved, with Main roads (4.6km) and suburban roads (18.4km) accounting for the majority of paved road types.

Table 2-23: Road Types in Urban Nodes

Road type		Stellenbosch	Franschhoek	Klapmuts	Total
Major road	Paved road (km)	0,0	0,0	0,0	0,0
	Unpaved road (km)	N/A	N/A	N/A	0,0
Main road	Paved road (km)	47,7	3,3	4,6	55,6
	Unpaved road (km)	0,0	0,0	0,0	0,0
Secondary road	Paved road (km)	0,0	0,0	0,0	0,0
	Unpaved road (km)	0,0	0,0	0,0	0,0
Suburban road	Paved road (km)	252,4	43,6	18,4	314,5
	Unpaved road (km)	2,2	3,2	5,1	10,6
Informal roads	Paved road (km)	13,4	0,2	0,7	14,3
	Unpaved road (km)	13,9	5,1	3,4	22,4
Tracks	Paved road (km)	0,0	N/A	N/A	0,0
	Unpaved road (km)	N/A	N/A	N/A	0,0
Trails	Paved road (km)	N/A	N/A	N/A	0,0
	Unpaved road (km)	N/A	N/A	N/A	0,0

	Unpaved road (km)	16,2	8,3	8,5	33,0

Source: MapIT / MapAble 2023

2.6.2 Functional Area 2: Rural Node Profile

The rural node profiles provide an overview of pertinent available socio-economic data and include the areas defined as rural nodes in the Stellenbosch Municipality Spatial Development Framework. These rural nodes are Muldersvlei, Koelhof, Vlottenburg, Lynedoch, Raithby, Kylemore, Pniel, Groot Drakenstein, Wemmershoek and La Motte.

2.6.2.1 The Extent of Rural Nodes

Table 2-24 below shows the extent of the rural nodes in the Stellenbosch Municipality. The largest of these nodes, in terms of area in hectares, is Kylemore (184 ha), Koelhof (182 ha) and Vlottenburg (153 ha). The smallest rural nodes are Raithby (45 ha), Wemmershoek (66 ha), and La Motte (69 ha). The average size of a rural node is 110 ha.

Table 2-24: Total area of Rural Nodes

Area	Muldersvlei	Koelhof	Vlottenburg	Lynedoch	Raithby	Kylemore	Pniel	Groot Drakenstein	Wemmershoek	La Motte	Total

2.6.2.2 Population and Households

The rural nodes in the Stellenbosch Municipality have all seen a sharp increase in population. When looking at these figures in terms of percentages, one must also consider that this growth has taken place from a small base. Overall, between 1996 and 2020, the rural nodes showed total increase of 286% or 12% per annum. In terms of numbers, Kylemore has seen the most significant growth adding 8 990 people between 1996 and 2020. Pniel, Wemmershoek and La Motte have also shown sharp increases in recent years but not to the extent of Kylemore. These increases can also be because of new housing projects that make it difficult to assess trends effectively.

With the increase in population, one can expect an increase in population density. Most rural nodes remain sparsely populated, with Muldersvlei, Koelhof, Vlottenburg, Lynedoch, and Groot Drakenstein having a population density below six (6) person/ha. Interestingly Kylemore has the highest population density (57 persons/ha) of any node in the municipal area.

Household growth shows a similar pattern as population growth. Where the data differs from the data in the urban nodes is in the average household sizes. The smaller rural nodes have shown an increase in the average household size, while the most prominent rural nodes have shown a decrease in household sizes but not to the extent that it happened in the urban nodes.

Table 2-25: Population and Household Numbers of Rural Nodes

Population and households	Year	Muldersvlei	Koelhof	Vlottenburg	Lynedoch	Raithby	Kylemore	Pniel	Groot Drakenstein	Wemmershoek	La Motte	Total

2.6.2.3 Social and Community Facilities

Social and community services are limited in rural nodes, with most rural nodes only consisting of a single primary school. Only Kylemore and Groot Drakenstein have a public health facility. A SAPS is located in Groot Drakenstein.

Table 2-26: Social and Community Facilities Numbers of Rural Nodes

2.6.2.4 Land Cover

Non-urban land uses have remained relatively the same for most rural nodes. The most prevalent non-urban land cover category is cultivated orchards and vines, located mainly in Vlottenburg and Lynedoch.

Table 2-27: Non-urban land cover in hectares of Rural Nodes

Land cover non-urban	Year	Muldersvlei	Koelhof	Vlottenburg	Lynedoch	Raithby	Kylemore	Pniel	Groot Drakenstein	Wemmershoek	La Motte	Total

Source: Department of Environmental Affairs / MapAble 2023

As with the non-urban land cover, the urban land cover also shows small changes. The most prominent category is indicated as urban townships. This category also showed the most considerable growth. This is most significant in Kylemore, where an additional 16.7 hectares of urban townships is indicated. This relates to or can be explained by the increase in population in this node.

Table 2-28: Urban Land Cover in Hectares of Rural Nodes

2.6.2.5 Zoning and Vacant Land

An assessment of the zoning of the rural nodes is presented in Table 2-29 below. Most of the rural nodes, 63% in total, are zoned as Agricultural and Rural Zone. Another 14% is zoned as Conventional Residential Zone.

Table 2-29: Zoning

Zoning Category	Muldersvlei	Koelhof	Vlottenburg	Lynedoch	Raithby	Kylemore	Pniel	Groot Drakenstein	Wemmershoek	La Motte	Total

2.6.2.6 Access to Services

Table 2-31 to Table 2-34 below show access to services concerning water, sanitation, refuse removal and electricity. In general, the pattern between these different services is the same. Muldersvlei, Koelhof,

Vlottenburg and Lynedoch all show limited access to full services for the various service categories. However, by 2011 most of the households in these areas were served with full services across the service spectrum. Raithby, Kylemore, Pniel, Groot Drakenstein, Wemmershoek and La Motte shows that full services have been available to almost all households since 1996.

Table 2-31: % Access to Water Services of Rural Nodes

2.6.2.7 Points of Interest

Table 2-35 below provides a breakdown of points of interest in each rural node. In general, one can deduce that most of the nodes serve a local function. Muldersvlei and Koelhof show a more significant concentration of offices, retail, entertainment and commercial points. In contrast, the points of interest in other nodes primarily relate to community or tourism-related activities.

Table 2-35: Points of Interest in Rural Nodes

Points Of Interest	Muldersvlei	Koelhof	Vlottenburg	Lynedoch	Raithby	Kylemore	Pniel	Groot Drakenstein	Wemmershoek	La Motte	Total

2.6.2.8 Road Types

Most roads in the rural nodes are categorised as suburban roads. These roads make up 54% of all roads. 17% of roads are informal and unpaved, while 11% are classified as main roads.

Table 2-36: Road Types in Rural Nodes

Road type		Muldersvlei	Koelhof	Vlottenburg	Lynedoch	Raithby	Kylemore	Pniel	Groot Drakenstein	Wemmershoek	La Motte	Total

2.6.3 Combined Functional Areas Profiles

The combined functional area profiles provide an overview of crucial socio-economic data for the sum of the urban and rural nodes, and the remaining municipality termed the rural functional area.

2.6.3.1 The Extent of Functional Areas

The urban nodes cover 4% of the municipality's total area, while the rural nodes cover only 1% of the total area. Most of the municipality (94%) is classified as rural.

Table 2-37: Total Area of Functional areas

Area	Urban Node	Rural Node	Rural Area	Total
Area (ha)	3 802	1 099	80 458	85 359

Source: Census / MapAble 2023

2.6.3.2 Population and Households

In total, the Stellenbosch Municipality grew by an estimated 95 979 people between 1996 and 2020. 76% of that growth occurred within the urban nodes, while the larger rural area accounts for 8%. The municipality grew by 92% between 1996 and 2020, or 3.8% per annum. This is more than the national average of 1.7% and the western cape provincial average of 2.7% between the same periods. As indicated, most of that growth occurred in the urban nodes. However, when comparing growth rates, rural areas have grown the fastest at 11.9% per annum.

The growth in population in the urban and rural nodes has seen a marked increase in the population densities of these nodes. Overall densities increased by 210% in urban and 286% in rural nodes. The densities in rural areas are, as to be expected, much lower increasing by 22% over the period assessed. The municipality's densities have increased by 106% between 1996 and 2020, or 4.4% per annum.

Household growth shows similar trends to population growth. Household growth in the urban nodes has been prominent, accounting for 85% of all new households in the municipality since 1996. But as with the population, the growth rate in the rural nodes has been far more pronounced. Overall, household growth has occurred at 4.4% per annum for the municipality between 1996 and 2011 or 66%.

Overall, household growth took place at a faster rate than population growth. This means that the average household size in the municipality has decreased. The average household size reduced by 10% for the municipality, and decreased by 19% in the urban and 11% in the rural nodes. This decrease is often related to migrant labour, where males move in search of economic opportunities.

Table 2-38: Population and Household Numbers of Functional areas

Population and households	Year	Urban Node	Rural Node	Rural Area	Total
Total Population	1996	61 735	5 259	37 325	104 319
	2001	68 808	7 013	43 178	118 999

2.6.3.3 Social and Community Facilities

Regarding social facilities, most education (61%) and health facilities (87%) are located within urban nodes. There are 12 education facilities in the rural area, compared to the 7 in the rural nodes.

Table 2-39: Social and Community Facilities Numbers of Functional areas

Social and community facilities		Urban Node	Rural Node	Rural Area	Total
Primary schools		18	7	5	30
Secondary school		11	0	2	13

2.6.3.4 Land Cover

Non-urban land uses have decreased from 31 923 hectares to 26 584 hectares. This is a reduction of 16.7%. A similar reduction took place in the rural nodes, where the non-urban land cover was reduced by 13%. The urban nodes saw non-urban land cover reduced by 200 hectares from 640 ha to 440 ha. This is a 31% reduction and can be due to new development in these areas.

Table 2-40: Non-Urban Land Cover in Hectares of Functional areas

Land cover non-urban	Year	Urban Node	Rural Node	Rural Area	Total
Cultivated commercial fields	1990	110,3	26,5	4 078,5	4 215,3

	2014	0,0	17,1	44,6	61,6

Source: Department of Environmental Affairs / MapAble 2023

Table 2-41 below shows the land cover changes related to urban activities for the urban nodes, rural nodes, and rural areas. Urban land cover grew by 375 hectares in the municipal area. 55% of that change occurred within the urban nodes, while the rural area's urban footprint increased from 796 ha to 960 ha or 43%. Changes in the Rural nodes were small, where the urban footprint increased by six (6) ha.

In the urban nodes, the residential category is the largest, but the informal category saw the most growth, from 1.3 ha to 48 ha. In the rural nodes, the informal category covers the most area and saw the most significant increase. Industrial land cover is the largest urban-related category in the rural area but did decline somewhat. Smallholdings saw the most growth, increasing by 135% from 23 ha to 339 ha.

Table 2-41: Urban Land Cover in Hectares of Functional Areas

Land cover Urban	Year	Urban Node	Rural Node	Rural Area	Total

2.6.3.5 Zoning and Vacant Land

According to the data presented in Table 2-42 below 89% of the municipality is zoned as Agriculture and Rural. In the rural area that number is higher at 93% and 63% in the rural nodes. This highlights the rural nature of the municipality. In the urban nodes this category is far less and only constitutes 27% of all zonings. In the urban nodes the Conventional Residential Zone (20%), Public Roads and Parking Zone (13%), and the Private Open Space Zone (10%) also features prominently.

Table 2-42: Zoning

Zoning Category	Urban Node	Rural Node	Rural Area	Total
Agriculture and Rural Zone	1 037.73	723.59	74 943.32	76 705.54
Community Zone	58.21	5.50	20.78	84.51

Utility Services Zone	52.52	14.56	105.59	172.69
Other	163.66	103.32	3 301.01	3 568.13
Total	3 826.96	1 156.95	81 002.32	85 988.23

Source: Stellenbosch Municipality

In terms of vacant land 23% of the urban node category is indicated as being vacant, while 10% and 11% are shown as vacant in the rural node and rural area categories respectively. In terms of vacant land as it relates to the total area of the municipality only 1% of vacant land is located within the urban node and 11.6% in the rural areas. The rural nodes only contain 0.1% of all vacant land in the municipality.

Table 2-43: Vacant land

	Urban Node	Rural Node	Rural Area	Total
Vacant Land	866.29	112.76	9 035.61	10 014.67

Source: Stellenbosch Municipality

2.6.3.6 Access to Services

Table 2-44 to Table 2-47 below show access to services concerning water, sanitation, refuse removal and electricity. The figures show that households are well served in most service categories, with almost all households having access to full-service levels. It is only in terms of refuse removal in rural areas where people have less access. This is to be expected as refuse removal is usually not provided in these areas.

Table 2-44: % Access to Water Services in Functional Areas

Table 2-47: % Access to Electricity Services in Functional Areas

Access to electricity services	LOS	Urban Node	Rural Node	Rural Area	Total
1996	Full access	94,7%	97,0%	80,9%	90,0%
	No access	5,3%	3,0%	19,1%	10,0%
2001	Full access	98,9%	98,6%	76,2%	91,0%
	No access	1,1%	1,4%	23,8%	9,1%
2011	Full access	98,5%	99,2%	73,9%	93,0%

Access to electricity services	LOS	Urban Node	Rural Node	Rural Area	Total
	No access	1,5%	0,8%	26,1%	7,0%

Source: Census / MapAble 2023

2.6.3.7 Points of Interest

The allocation of points of interest per each functional area is presented in Table 2-48 below. 60% of all points of interest are located within the urban nodes and 37% in the rural area. The rural nodes have limited access to these points of interest and only account for 3% of the total points. As one would expect, activities related to primary economic activities are primarily found in rural areas. In contrast, Offices, Retail, entertainment, commercial, community facilities, government, infrastructure and transport activities are concentrated within the urban nodes.

Table 2-48: Points of interest in Functional Areas

Points Of Interest	Urban Node	Rural Node	Rural Area	Total
Primary economic activities	7	3	65	75
Offices, Retail, entertainment and commercial	1404	62	661	2127
Multiple residential	120	4	33	157
Community and social facilities	271	24	57	352
Government, Infrastructure and Transport	109	7	42	158
Tourism, recreation, accommodation and natural features	278	20	497	795

Source: Census / MapAble 2023

2.6.3.8 Road Types

Table 2-49 below shows the road types and the length of paved or unpaved roads within the different functional areas as they relate to the three main functional area categories. 92% of all roads in the urban nodes are paved, with the suburban road category accounting for 75% or 315 km of that total. In the rural nodes, 72% (57 km) of the roads are paved, while only 33% (403 km) of roads in the rural areas are paved. Of the 1 710 km of road in the municipality, 49% are paved, and 51% are unpaved. Suburban roads account for most of the paved surfaces in total, while informal roads are generally unpaved.

Table 2-49: Road Types in Functional areas

Road type		Urban Node	Rural Node	Rural Area	Total
Major road	Paved road (km)	0,0	0,0	25,2	25,2
	Unpaved road (km)	N/A	N/A	N/A	N/A
Main road	Paved road (km)	55,6	11,3	125,8	192,6
	Unpaved road (km)	0,0	0,0	0,0	0,0
Secondary road	Paved road (km)	0,0	1,6	18,2	19,8
	Unpaved road (km)	0,0	0,4	4,8	5,2
Suburban road	Paved road (km)	314,5	43,2	226,8	584,4
	Unpaved road (km)	10,6	4,5	27,3	42,4
Informal roads	Paved road (km)	14,3	0,7	3,2	18,2
	Unpaved road (km)	22,4	17,6	778,4	818,4
Tracks	Paved road (km)	N/A	N/A	N/A	N/A
	Unpaved road (km)	N/A	N/A	N/A	N/A

Road type		Urban Node	Rural Node	Rural Area	Total
Trails	Paved road (km)	N/A	N/A	N/A	N/A
	Unpaved road (km)	N/A	N/A	N/A	N/A
Totals	Paved road (km)	361,2	56,7	426,40	844,34
	Unpaved road (km)	33,0	22,6	810,4	866,0

Source: Census / MapAble 2023

2.6.4 Summary and Conclusions of the Functional Area Profiles

2.6.4.1 Urban Nodes

- The population growth in the urban nodes is still growing at an average of 4% per annum and saw a total increase of 33%;
- In terms of densities, Franschhoek has the highest density (39.2 people/ha), shortly followed by Stellenbosch (36.7 people/ha), while Klapmuts has the lowest relative density (22.9 people/ha);
- Households in Franschhoek showed the most significant decline between 2001 and 2011 at 26%, while in Stellenbosch, the average household size declined by 15%. The average household size in Klapmuts only decreased by 7%. Overall the average annual household size in all three urban nodes decreased by 2%;
- The Stellenbosch urban node saw an increase of 111% in urban informal settlement growth. Franschhoek's informal category grew from 0 hectares in 1990 to 12.5 hectares in 2014. The urban informal category grew by a staggering 152% per annum between 1990 and 2014;
- By zoning, in the Stellenbosch urban node, the conventional residential zone (21%) and public roads and parking zone (15%) dominate. Despite the urban nature of the node, the largest zoning category is the agriculture and rural zone (25%). A similar pattern is also evident in Franschhoek but differs in that private open space is the largest category (25%). Klapmuts, despite being categorised as an urban node, still shows a largely rural nature based on prevalent zoning based on the fact that 54% of the node is zoned as agriculture and rural zone;
- In Stellenbosch 437 hectares (15%) are indicated as vacant. In Franschhoek and Klapmuts 128 hectares (27%) and 300 hectares (65%) of the node are shown as vacant, respectively, and;
- The Stellenbosch urban node has maintained good service levels, with most of the population receiving water services above the basic standard. Franschhoek showed a drastic decline in the percentage of households that had access to full services between 1996 and 2001. This can potentially be explained by the increase in population during that time. One must also consider the increase in land cover in the urban informal category to explain this decline. In general, over time, the urban nodes show a recovery in water services provision.

2.6.4.2 Rural Nodes

- Between 1996 and 2020, the rural nodes showed a total population increase of 286% or 12% per annum. Kleymore has seen the most significant growth adding 8 990 people between 1996 and 2020. Pniel, Wemmershoek and La Motte have also shown sharp increases in recent years but not to the extent of Kleymore;
- With urban landcover, the most prominent category is indicated as urban townships. This category also showed the most considerable growth. This is most significant in Kleymore, where an additional 16.7 hectares of urban townships is indicated. This relates to or can be explained by the increase in population in this node;

- In the assessment of the zoning of the rural nodes, 63% in total are zoned as Agricultural and Rural Zone. Another 14% is zoned as Conventional Residential Zone;
- Within the rural nodes 112 hectares are indicated as vacant land. 95 hectares are allocated in Kleymore and the other 17 hectares is located in Pniel, and;
- Muldersvlei, Koelhof, Vlotenburg and Lynedoch all show limited access to full services for the various service categories. However, by 2011 most of the households in these areas were served with full services across the service spectrum. Raithby, Kylemore, Pniel, Groot Drakenstein, Wemmershoek and La Motte show that full services have been available to almost all households since 1996.

2.6.4.3 Combined Functional Areas

- The urban nodes cover 4% of the municipality's total area, while the rural nodes cover only 1% of the total area. Most of the municipality (94%) is classified as rural;
- In total, the Stellenbosch Municipality grew by an estimated 95 979 people between 1996 and 2020. 76% of that growth occurred within the urban nodes, while the larger rural area accounts for 8%. The municipality grew by 92% between 1996 and 2020, or 3.8% per annum. This is more than the national average of 1.7% and the western cape provincial average of 2.7% between the same periods. However, when comparing growth rates, rural areas have grown the fastest at 11.9% per annum;
- Overall densities increased by 210% in urban and 286% in rural nodes. The densities in rural areas are, as to be expected, much lower only increasing by 22% over the period assessed. The municipality's densities have increased by 106% between 1996 and 2020, or 4.4% per annum;
- Household growth shows similar trends to population growth. Household growth in the urban nodes has been prominent, accounting for 85% of all new households in the municipality since 1996. But as with the population, the growth rate in the rural nodes has been far more pronounced. Overall, household growth has occurred at 4.4% per annum for the municipality between 1996 and 2011 or 66%;
- The average household size reduced by 10% for the municipality, and decreased by 19% in the urban and 11% in the rural nodes;
- Regarding social facilities, most education (61%) and health facilities (87%) are located within urban nodes. There are 12 education facilities in the rural area, compared to the 7 in the rural nodes;
- Non-urban land uses have decreased from 31 923 hectares to 26 584 hectares. This is a reduction of 16.7%. A similar reduction took place in the rural nodes, where the non-urban land cover was reduced by 13%. The urban nodes saw non-urban land cover reduce by 200 hectares from 640 ha to 440 ha (31% reduction);
- Urban land cover grew by 375 hectares in the municipal area. 55% of that change occurred within the urban nodes, while the rural area's urban footprint increased from 796 ha to 960 ha or by 43%. Changes in the Rural nodes were small, where the urban footprint increased by only six (6) ha;
- In the urban nodes, the residential category is the largest, but the informal category saw the most growth, from 1.3 ha to 48 ha. In the rural nodes, the informal category covers the most area and saw the most significant increase. Industrial land cover is the largest urban-related category in the rural area but did decline somewhat. Smallholdings saw the most growth, increasing by 135% from 23 ha to 339 ha;
- 89% of the municipality is zoned as Agriculture and Rural. In the rural area that number is higher at 93% and 63% in the rural nodes. This highlights the rural nature of the municipality. In the urban nodes this category is far less and only constitutes 27% of all zonings. In the urban nodes the

Conventional Residential Zone (20%), Public Roads and Parking Zone (13%), and the Private Open Space Zone (10%) also features prominently;

- In terms of vacant land 23% of the urban node category is indicated as being vacant, while 10% and 11% are shown as vacant in the rural node and rural area categories respectively. In terms of vacant land as it relates to the total area of the municipality only 1% of vacant land is located within the urban node and 11.6% in the rural areas. The rural nodes only contain 0.1% of all vacant land in the municipality;
- Households are well served in most service categories, with almost all households having access to full-service levels. It is only in terms of refuse removal in rural areas where people have less access. This is to be expected as refuse removal is usually not provided in these areas;
- 60% of all points of interest are located within the urban nodes and 37% in the rural area. The rural nodes have limited access to these points of interest and only account for 3% of the total points, and;
- 92% of all roads in the urban nodes are paved, with the suburban road category accounting for 75% or 315 km of that total. In the rural nodes, 72% (57 km) of the roads are paved, while only 33% (403 km) of roads in the rural areas are paved. Of the 1 710 km of road in the municipality, 49% are paved, and 51% are unpaved. Suburban roads account for most of the paved surfaces in total, while informal roads are generally unpaved.

2.7 Functional Area Investment Priority

The bid-rent model is an economic model that attempts to explain the relationship between the price of land and its location. The model is based on the concept that the highest price that someone is willing to pay for a particular piece of land, based on the land's location and the potential revenue that can be generated from it – usually directly correlated to accessibility to various activities.

According to the bid-rent model, as you move away from the central business areas of a city, the land becomes less valuable, and the bid rent decreases. This is because the further away you get from the central business area, the lower the potential revenue from the land.

The bid-rent model can be represented graphically as a downward-sloping curve, with the bid rent declining as you move away from the central business areas of a city. This relationship between land value and location is important from a capital expenditure point of view, as the bid-rent model is indirectly proportionally related to the cost of services. Services, are more expensive the further away it is from central business areas as the service per person delivered per Rand invested increase as distance increases.

Figure 2-22: Bid-Rent Model vs Cost of Services

It is based on the fundamental principles of the relationship between the two models above, that the priority assessment as expressed in Table 2-50, indicate the municipality's investment priorities.

Table 2-50: Functional Areas and Their Investment Priority

Summary	Spatial Areas	Function	Priority
FA 1 Urban Node	<ul style="list-style-type: none"> Stellenbosch Kayamandi Klamputs Jamestown Franschhoek 	<ul style="list-style-type: none"> Function as urban areas and main service centre Variety of uses Densification in certain urban nodes 	Primary Investment Node

Part 3

Infrastructure Demand Quantification

3 Part 3: Infrastructure Demand Quantification

The infrastructure demand quantification section aims to understand the specific infrastructure demand that a municipality has. This section will look at all the masterplans provided by the municipality and consolidate these masterplans into one project 'wish list'. These master plans will be unpacked to ensure we understand the demand identified in all the master plans. The demand will be quantified per functional areas that were identified in part 2. The infrastructure demand quantification chapter aims to compare the Quantified Demand and master plans can be compared to identify differences.

3.1 Summary of Masterplans

Table 3-1 provides a summary of all the municipality's master plans that are required to meet the infrastructure demand over the planning horizons. This table summarizes infrastructure master plans by examining their update year, planning horizon, timespan, and whether they contain project-specific information.

Table 3-1: Master Plan Register

Service Type	Master Plan	Update By	Update Year	Planning Horizon	Timespan	Project Specific Detail
Roads	Comprehensive Integrated Transport Plan	PGWC SLM CWDM	2011	2015	5 years	Yes
Water	River Management Plan Update	Jeffares & Green (Pty) Ltd	2011	-	-	Yes
Electricity	Electrical Infrastructure Master Plan	Royal HaskoningDHV (Pty) Ltd	2015	2034	20 years	Yes
Roads	The Development and Implementation of a Stormwater Management System	V&V Consulting Engineers	2018	2047	20 years	Partial
Waste Management	Integrated Waste Management Plan	JCPE (Pty) Ltd	2020	2024	5 years	Yes
Water	Stellenbosch Municipality Bulk Water Resources: Water Resilience Master Planning for The Stellenbosch System	GLS	2021	2030	5 years & 10 Years	Yes
Roads	Roads Master Plan 2022 Update	WSP	2022	2040	5 years, 10 years, 15 years & 20 years	Yes

Table 3-1 highlights key observations that can be made from the array of masterplans. These masterplans have long-term planning horizons but some master plans such as the Comprehensive Integrated Transport Plan and River Management Plan Update have planning horizons that are in the past and require updating. Most of the master plans have project-specific detail with the only exception being the River Management Plan Update that only has partial project detail listed in terms of listing the upgrades that need to be implemented. Many of the master plans have 20-year or 10-year planning horizons and indicating the longer-term planning vision within these master plans.

3.1.1 Water

3.1.1.1 River Management Plan Update

The River Management Plan evaluates the three rivers in the Stellenbosch municipality and the associated legal framework. It conducts a status quo analysis of the rivers and surrounding areas, identifies issues

affecting the river corridors, and provides maintenance planning interventions based on identified problem areas.

The main objective of the River Management Plan is to assess the condition of the rivers and identify issues within the municipality. Subsequently, this information is used to develop a plan that addresses these issues effectively. The process is done to receive environmental authorisation in order to tackle remedial work within the municipality. The River Management Plan identifies 20 key projects to resolve issues identified in river corridors.

3.1.1.2 Stellenbosch Municipality Bulk Water Resources: Water Resilience Master Planning for The Stellenbosch System

The Bulk Water Resources master plan analyses the bulk water demand and resources of the towns and cities within the municipality. The master plan aims to enhance Stellenbosch's water resilience by improving its understanding of water demand. In order to understand this the masterplan must be read in conjunction with the *Water Master Plan 2019* and *Bulk Water Resources: Drought Intervention Projects*. This provides a perspective and ensures understanding of the implemented projects that will improve water resilience.

The main objective of the Bulk Water Resources master plan is to analyse water demand in order to improve the operation of bulk water systems. The master plan identifies necessary projects for improving bulk water resources over 5- and 10-year periods. Lastly, the master plan identifies future resources that need to be monitored, to reach future demand and ensure more resilience in periods of drought.

3.1.2 Electricity

3.1.2.1 Electrical Infrastructure Master Plan

The Electrical Master Plan focuses on providing a 20-year plan to maintain electrical infrastructure in good condition while meeting the demands of the municipality. The master plan begins with an examination of the load forecast of certain areas and their subsequent substations. Thereafter, it evaluates the current condition of the infrastructure. The Electrical Master Plan further examines the network development projects that are needed for the growth estimated by 2034. Costs are estimated for these projects and the report concludes by giving recommendations and considerations.

The main objective of the Electrical Master Plan is to provide the municipality with a long-term plan for the development and renewal of the current electrical infrastructure. The master plan provides a 20-year timeline for numerous projects relating to the upgrading and renewal of electrical infrastructure.

3.1.3 Roads

3.1.3.1 Comprehensive Integrated Transport Plan

The Comprehensive Integrated Transport Plan is a 5-year integrated transport plan that aims to comprehend public transport, and travel demand. The plan creates a shared vision for integrating different forms of transport. The Transport Plan aims to understand legislation, which guides a vision and several goals. Different aspects of transport are observed such as transport needs assessment, public transport, transport infrastructure, travel demand and freight transport strategy. This facilitates the determination of a strategy and subsequent discussion of a funding plan. The Comprehensive Integrated Transport Plan discusses numerous projects related to transport over a 5-year timeline.

The main objective of the Comprehensive Integrated Transport Plan is to develop a public transport network that is sustainable and accessible to all. The Comprehensive Integrated Transport Plan aims to boost the economy by connecting citizens and visitors in Stellenbosch through offering affordable options of different forms of transport.

3.1.3.2 The Development and Implementation of a Stormwater Management System

The Development and Implementation of a Stormwater Management System consists of two parts: the As-Built Report and the Hydro Report. These reports combine to form the master plan for the Stormwater Management System of Stellenbosch. The purpose of these reports is to identify problem areas, give management actions, estimate costs and propose remedial measures. The master plan estimates the costs of repairing key stormwater infrastructure through 2-year and 20-year proposals.

The main objective of the master plan is to provide guidance on what the best practices are for the implementation of new and upgrading infrastructure in underdeveloped areas. The master plan is a guideline that offers budget proposals and upgrade plans.

3.1.3.3 Roads Master Plan 2022 Update

The 2022 Roads Master Plan is an update of the 2012 Roads Master Plan. This master plan integrates and coordinates the planning of future road infrastructure. The roads master plan identifies roads and plans them in the short, medium and long-term timeline. The roads master plan is an effective planning tool that allocates funds for road projects to improve road infrastructure and overall public transport. The roads master plan aids strategic plans such as IDPs and SDFs.

The roads master plan aims to assist Stellenbosch Municipality, and other organisations such as the South African National Roads Agency Ltd (SANRAL) and the Western Cape Provincial Government in effective planning and coordinating of road infrastructure. The roads master plan identifies and quantifies several road projects within the municipality, and serves as a tool to assist in the allocation of funds for these projects.

3.1.4 Waste Management

3.1.4.1 Integrated Waste Management Plan

The Integrated Waste Management Plan is a statutory requirement of the National Environmental Management: Waste Act, 2008. The development of an IWMP is an important tool that investigates the current state of the solid waste removal system and identifies the current needs to sustain waste management practices. An evaluation of the status quo identifies gaps in the waste management system, and implementation items are identified at an authority level to improve it.

The overall aim of the IWMP is to integrate and optimise the waste management system. This is done to reduce the environmental and financial impacts of waste management. The plan underlines the principles of the National Waste Management Strategy:

- The prevention of waste generation;
- The recovery of waste of which the generation cannot be prevented, and
- The safe disposal of waste that cannot be recovered.

3.2 Single Infrastructure Projects Portfolio

The Single Infrastructure Profile combines all projects from different masterplans into one project wish list. The benefit of having one infrastructure project portfolio includes centralising the area of needs and identifying service areas that have specific requirements. A project portfolio assists in monitoring the status of projects, making monitoring easier. Annexure A comprises of a single infrastructure project portfolio that includes all projects from the master plans, which are subdivided based on their service type. Based on this, we can make the following observations:

- There are approximately 344 projects, and;
- These projects are divided according to the following service types:
 - Electricity: 25 projects;

- Roads and Stormwater: 241 projects;
- Waste management: 18 projects, and;
- Water: 60 projects.

The following table outlines the completeness of data found in the single infrastructure project portfolio:

Table 3-2: Breakdown of the Completeness of Data in Annexure A

Service Type	Project Name		Budget		Project Description		Project Location		Funding Source	
	Yes	No	Yes	No	Yes	No	Yes	No	Yes	No
Electricity	25	0	25	0	25	0	0	25	0	25
Roads and Stormwater	258	16	226	48	83	191	0	274	131	143
Waste Management	18	0	18	0	0	18	0	18	18	0
Water	60	0	21	39	0	60	27	33	60	0
Total	361	16	290	87	108	269	27	350	209	168
% Total	95,76%	4,24%	76,92%	23,08%	28,65%	71,35%	7,16%	92,84%	55,44%	44,56%

Table 3-2 confirms that 331 of 341 (96,22%) of projects have a project name and confirms that 67,73% of the projects have a budget or demand over time. This high number suggests that most projects have a budget captured and price estimation. The project description, location and funding source have very low numbers when compared to the rest of the data. In conclusion, it is indicated that the project name and budget is the most frequent captured information in the infrastructure portfolio.

3.2.1 Unpacking The Infrastructure Projects Portfolio

Unpacking the infrastructure projects portfolio allows us to make numerous observations regarding the total project cost of the different service types. In this section, we will explore the nuances of the data by unpacking it per directorate and department; asset class and sub-class; and action and sub-action, in relation to the total cost of projects. By doing this, we can observe specific details of the infrastructure projects portfolio.

The complete Infrastructure Projects Portfolio can be found in the Annexure at the end of the document.

3.2.2 Unpacking Projects per Directorate and Department

Figure 3-1 and Table 3-3 reveal that the infrastructure projects portfolio has been unpacked per directorate and department. This view allows us to see which specific directorates and departments have more projects or projects with a higher total cost.

Figure 3-1: Total Project Demand per Department

Table 3-3: Total Project Demand per Directorate and Department

Directorate	Department	Sum of Total Project Demand	Total %
Infrastructure Services	Roads and Stormwater	R4 568 546 380,31	90,24%
Infrastructure Services	Electrical Services	R329 301 049,00	6,50%
Infrastructure Services	Traffic Engineering	R76 724 300,00	1,52%
Infrastructure Services	Waste Management: Solid Waste Management	R75 735 000,00	1,50%
Infrastructure Services	Transport Planning	R12 390 000,00	0,24%
Infrastructure Services	Water and Wastewater Services: Water	R-	0,00%
Total			R5 062 696 729,31

What is immediately evident from Figure 3-1: Total Project Demand per Department is the large total project demand for the Department of Roads and Stormwater. The reason for this can be attributed to the three master plan documents that comprise all projects linked to this department – Comprehensive Infrastructure Plan, Roads Master Plan 2022 and The Development and Implementation of a Stormwater Management System. The two projects with the largest total project demand are from these master plans. The 6810 Conduits to be upgraded in Stellenbosch, Rehabilitation and improvements to MR168 between MR159 and MR177 in the Stellenbosch Area. These master plans have a comprehensive and long-term focus which results in a large amount of project costs such as the Conduits Upgrade project in Stellenbosch that has a 20-year project timeline. Table 3-3 provides the exact amounts and reveals that 90,24% of the total project demand in the infrastructure is attributed to roads and stormwater projects. The table also highlights that all projects within the portfolio are from the same directorate – Infrastructure Services, which indicates the need of projects to address infrastructure concerns.

3.2.3 Unpacking Projects per Asset Class and Sub-Class

Asset class and sub-class indicates which assets have more demand within the infrastructure project portfolio. Unpacking the projects in this manner enables us to analyse the departments in greater detail and shifts our focus to the asset level. By using this method we can see which asset types are more prevalent in the infrastructure projects portfolio.

Figure 3-2: Total Project Demand per Asset Sub-Class

Table 3-4: Total Cost per Asset Class and Sub-Class

Class	Sub-Class	Sum of Total Project Demand	Total %
Roads Infrastructure		R3 778 497 300,00	74,63%
	Road Furniture	R16 150 000,00	0,32%
	Roads	R3 230 137 300,00	63,80%
	Roads Infrastructure	R12 310 000,00	0,24%
	Roads Structures	R519 900 000,00	10,27%
Storm water Infrastructure		R876 563 380,31	17,31%
	Storm water Conveyance	R27 090 000,00	0,54%
	Storm water drainage collection	R849 473 380,31	16,78%
Electrical Infrastructure		R329 301 049,00	6,50%
	Hv Substations	R137 700 000,00	2,72%
	Mv Networks	R26 407 075,00	0,52%
	Mv Substations	R165 193 974,00	3,26%
Solid Waste Infrastructure		R70 600 000,00	1,39%
	Waste Drop-off Points	R42 300 000,00	0,84%
	Waste processing facilities	R28 300 000,00	0,56%
Transport Assets	Transport Assets	R7 150 000,00	0,14%
Machinery and Equipment	Machinery and Equipment	R585 000,00	0,01%
Water Supply Infrastructure		R0,00	0,00%
	Distribution	R0,00	0,00%
	Pump Stations	R0,00	0,00%
Total		R 5 062 696 729,31	

What becomes evident when analysing Figure 3-2 is the two largest asset sub-classes contributing to total project cost – Roads and Storm water drainage collection. Table 3-4 confirms that Roads (74,63%) and Storm water infrastructure (17,31%) account for 91,85% of the total demand in the infrastructure projects portfolio. Roads (63,80%) and Storm Water Drainage (16,78%) are the asset sub-classes that contribute to 80,58% of the total demand of projects. These plans have a 20-year focus and explain the large project costs incurred within these master plans. From the top ten projects with the highest total project demand nine of the projects are projects that are from the asset class of Roads Infrastructure. This clarifies the high infrastructure demand that roads and stormwater projects have. Figure 3-3 visually illustrates the the proportion of total project demand each asset class and sub-class has.

Figure 3-3: Share of Total Project Demand per Asset Class and Sub-Class

3.2.4 Unpacking Projects per Action and Sub-Action

By examining projects per action and sub-action observations can be made regarding where the total demand of projects is. Is the demand higher in new projects, or is it focused on existing projects, specifically those concerning renewal or upgrading? Unpacking projects in this manner reveals the number of projects for each action and sub-action and their respective total demand.

Figure 3-4: Total Demand per Action and Sub-Action

Table 3-5: Total Demand per Action and Sub-Action

Action	Sub Action	Number of Projects	Sum of Total Project Demand	Total%
Existing	Upgrading	106	R2 464 744 891,31	48,68%
New	New	169	R1 574 806 129,00	31,11%
Existing	Renewal	92	R1 021 945 709,00	20,19%
Existing	Unassigned	2	R1 200 000,00	0,02%
Unassigned	Unassigned	8	R0,00	0,00%
Total			R5 062 696 729	100,00%

When observing Figure 3-4 and Table 3-5 what becomes evident is that projects relating to upgrading have the highest total project demand. The table confirms this by indicating that upgrading projects account for 48,68% of the total project demand, whilst new projects (31,11%) and renewal projects (20,19%) have the second and third-largest total project demand. The table indicates that most projects in the infrastructure projects portfolio are new projects (169), and that there are more upgrading projects (106) than renewal projects (92).

3.3 Investment Demand and Growth: The Infrastructure Planning Equation

Long-term customer growth is usually one of the biggest drivers of investment demand. The ability to address annual customer growth ensures, at a minimum, that increases in backlogs do not occur. However, it adds to operating expenditure and the maintenance burden of a service provider that must offset income and revenue streams through appropriate cost recovery processes.

below shows the relationship and components of infrastructure and service delivery. Within this framework, the demand for infrastructure services (investment programme) is the sum of existing backlogs and household growth plus service upgrading requirements and asset renewals. Capital expenditure funds the investment programme. The capital expenditure adds interest and redemption, operating and maintenance, and bulks purchases costs to the current or operating account of the Council. Capital subsidies and grants, connection and bulk service contributions, and borrowing funds the capital account.

Maintaining this equilibrium over the long term ensures financial sustainability. In terms of the CEF, the planning horizon is a minimum of ten years.

Figure 3-5: Infrastructure Investment Planning Equation²

Investment demand is a function of three core processes, namely:

- The investment required to address backlogs in services access;
- Investment to address the required renewal of assets and renewal backlogs, and;
- The investments to address the demand created through growth.

The quantification of investment requirements is a detailed and very complicated process. The assessment below addresses all the elements necessary for the CEF process. Within the scope and timeframes of the project, it was, for example, not possible to assess the impact of existing infrastructure capacity. Available capacities will lower investment demands.

3.3.1 Dealing with Infrastructure Backlogs

The drive behind government infrastructure and service policies since 1994 was to eradicate backlogs. Many factors do affect the extent of backlogs and also the ability of municipalities to address the matter. The project brief did not allow for a backlogs study to determine the current size of the backlogs. However, the assessment of backlogs was made and addressed as part of the demand for capital investment.

Determining the extent of the backlog is difficult. There are conflicting figures on backlogs that cannot be reconciled. The following were considered:

- Census 2011 was the last comprehensive dataset on service access and backlogs;
- Backlogs reflect the total position in the municipality irrespective of service areas or service server provider responsibilities;

² BC Gildenhuys, Creating a framework to develop revenue enhancement strategies and support asset management planning in a sustainable investment and service delivery environment (2018)

- Service areas differ for each service. The service area for water and sanitation is not the same as that for electricity or refuse removal services or the Council's responsibility for constructing and maintaining roads;
- The CEF addresses services in terms of the different functional areas, which implies no wall-to-wall service coverage; for example, the Council may not provide reticulated water and sanitation services to farms. Within the project's scope and the timeframes, it was not possible to further explore this matter, and;
- Policy decisions directly impact the extent of the backlog, such as a policy position on the acceptability of backyard shacks as a housing typology. There are an estimated 4 530 backyard shacks in Stellenbosch. If backyard shacks represent an acceptable housing typology, then they are not part of the backlog. However, as the provincial housing policy suggests, they are indeed part of the backlog, then it adds an estimated R380 million to the capital requirements of the Council. Policy decisions have a considerable impact on the Council's finances and impact on capital and operating expenditure.

The sections and tables below show the backlog situation as calculated from the different censuses. It was impossible to desegregate any 2016 Community Survey figures or other official data source at a sub-municipal level.

3.3.1.1 Access to Water Services

Table 3-6: Change in Access to Water Services per Functional Area per Census

Level of service	Census	Urban		Rural		Farms		Total Area	
		Total	% for census	Total	% for census	Total	% for census	Total	% for census
Full	1996	12 235	76%	947	83%	6 398	71%	19 580	75%
	2001	16 234	70%	1 414	87%	7 357	71%	25 005	71%
	2011	21 035	69%	2 606	83%	7 696	80%	31 337	72%
Intermediate	1996	1 100	7%	126	11%	1 569	17%	2 795	11%
	2001	2 134	9%	133	8%	1 799	17%	4 066	12%
	2011	2 192	7%	413	13%	916	10%	3 521	8%
Basic	1996	2 525	16%	6	1%	348	4%	2 879	11%
	2001	2 106	9%	23	1%	577	6%	2 706	8%
	2011	5 477	18%	75	2%	679	7%	6 231	14%
Below Basic	1996	82	1%	43	4%	535	6%	660	3%
	2001	2 578	11%	52	3%	513	5%	3 143	9%
	2011	1 628	5%	26	1%	181	2%	1 835	4%
None	1996	72	0%	24	2%	144	2%	240	1%
	2001	159	1%	3	0%	83	1%	245	1%
	2011	231	1%	23	1%	150	2%	404	1%

Table 3-6 shows the following:

- Farms and rural nodes generally have better higher levels of services than the municipality's urban component, and no access and access to less than basic services is also higher in the urban areas.
- The figures highlight the urban components' pressure, notwithstanding substantial increases in the number of households with service access.

The municipality reported the following figures to Statistic South Africa for the Non-Municipal Financial Census released in 2021.

Table 3-7: Number of Consumer Units Receiving Water Services

	Number of domestic consumer units served through a delivery point				Total number of non-domestic consumer units receiving water services	Total number of consumer units receiving water services
	Inside the yard	Less than 200m from a yard	More than 200m from a yard	Total number of domestic consumer units receiving water services		
2017	39 044	6 231	1830	47 105	903	48 008
2018	41 623	9 699	0	51 322	903	52 225
2019	41623	9699	0	51 322	903	52225
2020	41633	9699	0	51 332	903	52235

According to these figures, there are no service backlogs in the Municipal area and access to full services increased by more than 32% in 8 years. The figures show an increase from 31 337 households with access to full services in 2011 to 41 623 households in 2019. However, one should consider the fact that there are currently more than 15 000 informal and backyard structures in the municipal area.

3.3.1.2 Access to Sanitation Services

Access to sanitation follows a similar pattern to water services, and again, the pressure on the urban areas is evident. The number of households with below basic services is proportionally higher than in the urban areas. From the table, the policy to provide full services to all households is evident.

Table 3-8: Change in Access to Sanitation Services per Functional Area per Census

		Urban		Rural		Farms		Total Area	
		Total	%	Total	%	Total	%	Total	%
Full	1996	14 121	88%	968	84%	6 871	76%	21 960	84%
	2001	21 031	91%	1 456	90%	8 645	84%	31 132	89%
	2011	28 532	93%	2 760	88%	8 145	85%	39 437	91%

None	1996	1 306	8%	19	2%	521	6%	1 846	7%
	2001	1 737	7%	44	3%	476	5%	2 257	6%
	2011	587	2%	109	3%	339	4%	1 035	2%

The Statistic South Africa for the Non-Municipal Financial Census released in 2019 shows Table 3-9 figures. These figures confirm full services as the preferred service option. However, it shows only 40 373 households receiving services while the data on water services shows a total of 51 322 households in the municipal area. It is not possible to account for the more than 10 000 household discrepancy.

Table 3-9: Number of Consumer Units Receiving Sanitation Services

	Flush toilets connected to a public sewerage system	Flush toilets connected to septic tank	Bucket system	Ventilated improved pit latrines	Other	Total number of domestic consumer units receiving sanitation services	Total number of non-domestic consumer units receiving sanitation services	Total number of consumer units receiving sanitation services
2017	37 939	1079	0	0	1 193	40 211	1024	41 235
2018	38 027	1079	0	0	1 267	40 373	925	41 298
2019	38 027	1079	0	0	1267	40 373	925	41 298
2020	38 027	1079	0	0	1267	40 373	925	41 298

3.3.1.3 Access to Electricity Services

Access to electricity is generally with households without electricity remaining about 7% of total households. The non-financial census does not report on access to electricity. Even though the percentage access improved, the available data shows that more people are without electricity in real terms. The current position not be confirmed, and backlogs used for modelling purposes were estimated as the percentages of the current households per functional areas shown in Table 3-10.

Table 3-10: Change in Access to Electricity Services per Functional Area per Census

		Urban		Rural		Farms		Total Area	
		Total	%	Total	%	Total	%	Total	%

3.3.1.5 The Customer Base for Service Delivery

The previous sections provide available base profiles of service access in the municipality. The demand for services is a function of the municipality's existing customer base's current profile and characteristics. There is a distinction between the following customer categories:

- Residential or domestic customers. Domestic customers are entitled to a range of social and community services from the Council, irrespective of where they reside in the municipal area. However, the Council focus its housing support in particular areas, and generally, people living on farms are excluded from the Council delivered infrastructure and housing services. However, this does not absolve the Council from its Constitutional obligation to ensure that these households have access to essential services. However, practically, service delivery focuses on the urban and rural nodes in the municipality.
- Non-residential customers are all other customers that receive services from the municipality, and the focus of service delivery is again on the urban and rural nodes. However, this does not exclude service delivery outside these areas. The demand for services is a derivative of socio-economic growth and changes.

For modelling purposes, Table 3-12 shows the distinction in the residential customer base between a "service population" (those who uses social and community services) and a "housing population", which is representative of the number of households that fall within the housing mandate of the Council and Government. The next table shows the key numbers:

Table 3-12: Service Demand and Housing Demand Inputs to Model Demand

	Service demand	Housing demand
Average household size	3.07	3.07
Base year population	200 091	136 364
Population growth rate	1.62%	2.31%
Population estimate at end of programme	235 033	171 306
Households	65 176	44 418

The smaller number that constitutes the gross housing demand excludes the following:

- A total of 8 827 households in hostels and student residences;
- The 1 094 households were accommodated in institutions such as nursing homes, orphanages, etc. ;
- The 5 041 households residing of farms, and;
- 3 323 "other" formal households that live outside the urban and rural areas on farms.

The housing demand also excludes 2 473 households living in backyard shacks.

3.3.1.6 The Backlog Profile

It is not possible to provide an exact number for backlogs. The available data is irreconcilable, and the figures are estimates based on available information.

Table 3-13: Assignment of Levels of Services for Assessment Purposes

	Number of households	Comments
Water services		
House/building connection unlimited metered supply	25 924	This figure does not affect the outcomes of the assessment as they are fully serviced. Their impact reflects in asset renewal demand.
Communal standpipe less than 200m distance	9 699	It was assumed all informal structures in the urban and rural nodes have access to a communal standpipe within 200m of the residence
Waterpoint more than 200m distance	0	These are the informal structure outside the urban and rural nodes which the Council will have to accommodate.
No formal service	8 941	These are the households currently residing in backyards
Water total	44 418	
Sanitation services		
Waterborne sewerage to each stand 110mm connection	28 248	These are the total formal households in urban areas
Septic or conservancy tank with toilet structure	2 536	The households in rural nodes were assigned here.
Communal chemical toilet	1 193	The "other" category reported by the Council to StatsSA were assumed to be in this category
No formal service	12 441	This is the balance of the households.
Sanitation total	44 418	
Electricity services		
Electricity connections	35 171	The total of all formal households in the urban and rural nodes
No formal services	9 247	Households in the urban and rural nodes not included above
Electricity total	44 418	
Refuse		
Weekly kerbside waste removal	34 274	Assumed that all formal households receive a weekly refuse removal service
Communal waste collection point	8 258	All informal structures in the urban and rural nodes were included here.
No formal service	10 144	Households in the urban and rural nodes not included above
Refuse removal total	44 418	
Roads & stormwater		
Paved 6.5	3 998	These figures were derived from the data in the Council's Roads Asset Management Plan. The figures remain an estimate.
Paved 5.5	29 249	
Paved 4.5	4 886	
Gravel/graded	1 777	
No service	4 509	
Roads & stormwater total	44 418	

3.3.2 Asset Renewals and Renewal Backlog

Asset renewals and renewal backlogs should be calculated from asset registers. Asset registers for the main infrastructure services were not available, and the figures used came from the Council's unaudited financial statements for FY2122. The assets' valuation/cost was assumed to be equal to the current replacement cost (CRC), and carrying value is representative of the depreciated replacement cost (DRC) of the assets

The general rule is that asset renewals should more or less be equal to the annual depreciation on assets based on their Economic Useful Life (EUL). Renewal backlogs is a function of the condition of an asset

and renewal backlogs occur where an asset's Remaining Useful Life (RUL) is less than about 45% of its Current Replacement Cost (CRC).

Table 3-14: The Council's Asset Base

Asset group	Current replacement cost (CRC)	Depreciated replacement cost (DRC)	DRC as % of CRC	Renewal backlog	Renewal target years	% of CRC	CRC per serviced household	CRC per serviced household
	R'000	(R'000)		(R)	n.a		(R)	R'000
Water	1 845 786	1 377 472	74.6%	0	10	30.6%	27 329	52 027
Sanitation	1 283 713	1 051 417	81.9%	0	10	21.2%	19 007	40 145
Electricity	1 445 744	992 045	68.6%	0	10	23.9%	21 406	41 106
Roads & Stormwater	1 399 509	871 785	62.3%	0	10	23.2%	20 722	35 067
Refuse removal	66 824	52 195	78.1%	0	10	1.1%	989	1 950
	6 041 576	4 344 914	71.9%	0	0	100.0%	89 453	170 295

The Council has a substantial asset base that amounts to an average of about R89 453 per household for the five major infrastructure services. However, the average cost per serviced households is R170 295. The high cost per household reflects the high levels of services in the municipal area.

The figures show that the Council's assets are in excellent condition but that roads and stormwater may present challenges within the next few years if asset renewal is not addressed to the extent required. According to these figures, there are no renewal backlogs in the municipal area.

3.3.3 Demand Created Through Growth

- In the processes to determine the demand created through growth, four elements were addressed.
- Land demand created through growth expectations;
- Long-term capital requirements to meet the growing demand;
- Operating impact of capital expenditure, and;
- Consumption and use.

3.3.3.1 Land Demand

Land demand is determined by norms standards that were applied to various land uses. S explained earlier, a distinction was made between the demand for housing (residential demand) and demand for other land uses, including business, industrial, open space, community, and social facilities. Land demand for residential purposes was restricted to the urban and rural nodes, as shown in the report's previous section. It was assumed that the municipality would prioritise infrastructure services in these areas.

However, the land demand for the other uses is a function of thresholds to sustain them, and it was therefore calculated on the total growth demand in the municipal area. This is technically not 100% correct since the service function of these uses may exceed administrative boundaries. It gives recognition that factors outside its jurisdiction may determine development demand in a municipality. In this assessment, the long-term demand was only calculated based on growth expectations within the municipal area. It is not practical to separate Stellenbosch from it region.

3.3.3.2 Long-Term Capital Expenditure

Long-term capital expenditure is a function of land demand and the growth in customers. The results show the incremental cost for bulk and reticulated infrastructure. The point of departure is the assignment of appropriate service levels to each user or customer category. This is essentially a policy matter. For the purposes of assessment, the Council's current approach of providing a full level of service was adopted. This is one area where different approaches and policy options can be introduced to assess the impact

of service level approaches on demand for capital and the operating impact thereof. The capital cost per service for each of the land use categories was calculated.

3.3.3.3 The Operating Impact of Capital Expenditure

It is relatively easy to calculate capital demand. However, the critical aspects are the long-term operating impact of capital expenditure. Furthermore, an over-investment in services that do not address affordability may lead to structural impediments where the municipality will find it difficult to meet customers' operating obligations that cannot pay for services. This is usually one of the main contributors to cash flow constraints in municipalities. Operating cost is based on a life-cycle approach that considers both maintenance and operating costs. All costs are presented as marginal costs.

3.3.3.4 Consumption and Use

Since consumptions and use norms and standards are used to calculate operating costs, the same values are used to calculate the demand for water, wastewater discharge, electricity consumption, the roads required and the solid waste volume and tonnage. The results are also presented as annual increments to reflect the impact of growth.

3.4 Modelling Outcomes and Growth Impact Forecasts

A development cost model³ was used to model and forecast long-term investment demand.

3.4.1 Population Growth as the Basis for Modelling Investment Demand

As indicated earlier, the investment demand modelling is premised on population growth that translated into customer units. The first step was to do a population growth forecast. A forecast was done for the municipality. (See the section of the socio-economic profile of the municipality) This represents the growth of the service population. The housing population was calculated using the forecast for the whole municipality and factoring the household characteristics of the urban and rural nodes into the equation.

The issues and challenges with reliable population and household figures were highlighted in the previous section on the socio-economic characteristics of the municipal area. In being consistent with a conservative approach, low population growth was accepted where the population would increase at an average rate of 1.4% per annum. There is, however, the possibility that this may even be lower. The following projection were used for modelling purposes

Table 3-15: Population as the Basis for the Assessment

Year	Population increment	Residential customers	Non-residential customers	Total customers
2 023	3 892	1 095	31	1 126
2 024	3 828	1 145	41	1 186
2 025	3 754	1 114	46	1 160
2 026	3 672	1 143	42	1 185
2 027	3 581	1 017	37	1 054
2 028	3 480	1 050	45	1 095
2 029	3 371	1 007	34	1 041
2 030	3 252	994	36	1 030
2 031	3 125	908	36	944

³ The Development Cost Model V15 is propriety model develop and applied by BC Gildenhuys and Associates over the past 20 years to address the land use and capital expenditure demand and the operating consequences thereof in municipal service delivery.

Year	Population increment	Residential customers	Non-residential customers	Total customers
2 032	2 988	894	32	926
Total	40 650	10 364	380	10 744

3.4.2 Scenario Assessment

The scenario applied for assessment tried to emulate the current policy and strategy choices of the municipality as closely as possible. However, it is important to remember that this remains a modelling approach that crudely aims to replicate a very complicated system. It was, therefore, necessary to make some basic assumptions before the model was calibrated.

3.4.2.1 Assumptions and Inputs on Housing Variables

As described above, the model uses the growth in population to determine housing demand as well as ancillary uses. However, there several key inputs that need to be considered. They are:

- Residential typologies;
- The residential mix in terms of stand sizes, and;
- Stand sizes assigned to the different typologies.

Housing typologies for the CEF are configured around low, medium and high-density residential development that includes different housing typologies. Stand, and households sizes were linked to each of these typologies. Household sizes and cars per household were also considered in the model. Table 3-16 shows the input assumptions for housing typologies, stand sizes and household sizes.

Table 3-16: Assumptions on Housing Typologies, Mix Stand and Household Sizes

Residential types	Residential mix	Stand sizes	Household size
Single Residential: Low income	20.0%	250	4.11
Single Residential: Medium income	22.5%	500	3.75
Single Residential: High income	15.5%	850	3.00
Medium Density: Low income	15.0%	5 000	3.50
Medium Density: Medium income	7.0%	4 000	3.25
Medium Density: High income	5.0%	3 000	2.90
High Density: Low income	2.5%	5 000	3.00
High Density: Medium income	2.5%	4 000	2.50
High Density: High income	5.0%	3 000	2.10

Future backyard dwellers were included as part of the demand for capital expenditure in the equation. It was assumed that this would remain for the full assessment period although there are indications that household incomes have been decreasing.

3.4.2.2 Norms and Standards for Land Use Budgeting

The following land use norms and standards were used in the land use budgeting process.

Table 3-17: Land Use Budgeting Norms and Standards

Land use	Provision unit	Provision norm - persons/cars/ children	Ruling stand size m2
Residential			
Single Res: Low Inc	units per net ha (net)	40	250
Single Res: Med Inc	units per net ha (net)	20	500
Single Res: High Inc	units per net ha (net)	12	850
Medium Dens: Low Inc	units per net ha (net)	40	2 000

Land use	Provision unit	Provision norm - persons/cars/ children	Ruling stand size m2
Medium Dens: Med Inc	units per net ha (net)	30	3 000
Medium Dens: High Inc	units per net ha (net)	25	3 000
High Dens: Low Inc	units per net ha (net)	80	2 000
High Dens: Med Inc	units per net ha (net)	75	3 000
High Dens: High Inc	units per net ha (net)	60	3 000
Backyard dwellings	units per household	0	0
Business			
3rd Order commercial	m2 per capita	2.00	2 000
2nd Order Commercial	m2 per capita	3.00	5 000
1st Order Commercial	m2 per capita	6.00	25 000
Market/trading area	m2 per capita	7.00	5 000
Garages & filling stations	per 2500 cars	1	2 000
Industrial & commercial			
Light industrial	ha per 7500 people	3	3 000
Heavy industrial	ha per 5000 people	3	10 000
Commercial	ha per 5000 people	3	10 000
Public spaces: recreation			
Parks: public	ha per 1000 people	0.33	5 000
Parks: private	ha per 1000 people	1	10 000
Sports fields	per 1000 housing units	3.5	10 000
Stadiums	per 125000 people	1	50 000
Community facilities: municipal			
Municipal office	per 75000 people	1.00	3 000
Community hall	per 25000 people	1.00	3 000
Local library	per 50000 people	1.00	1 500
Primary health clinic	per 50000 people	1.00	3 000
Fire station & Ambulance	per 75000 people	1.00	7 500
Ambulance station	per 75000 people	1.00	3 000
Cemeteries	ha per 5500 people	1.00	20 000
Public parking areas	m2 per capita	0.20	3 000
Market/trading area	ha per 10000 people	1.00	7 500
Taxi ranks	m2 per capita	0.10	3 000
Community facilities: other			
Post office	per 20000 people	1.00	1 500
Lower Court	per 100000 people	1.00	2 000
Post collection point	per 3000 housing units	1.00	200
Police station	per 80000 people	1.00	5 000
District hospital	per 300000 people	1.00	50 000
Community health centre	per 100000 people	1.00	2 000
Hospice	per 50000 people	1.00	2 000
Old age home	per 50000 people	1.00	10 000
Children's homes	per 200000 people	1.00	5 000
Thusong centre	per 70000 people	1.00	10 000
Place of worship	per 1000 people	1.00	2 000
Crèche	per 2800 people	1.00	2 000

Land use	Provision unit	Provision norm - persons/cars/ children	Ruling stand size m2
Nursery school	per 5000 people	1.00	3 000
Primary school	per 6700 people	1.00	32 000
Secondary school	per 12400 people	1.00	45 000
After school centre	per 5000 people	1.00	2 000
ABET/Skills training	per 50000 people	1.00	50 000

The norms and standards were derived from different sources. The main sources were the cadastre from the office of the Surveyor General, the CSIR norms and standards for social and community facilities and then also calculated from the current land cover in the municipality. The approach was to calibrate the model on local data as far as possible.

3.4.2.3 Service Levels

Service levels relate to the technology used to supply a customer with a service. It should not be confused with a service standard which represents the qualitative aspects of service delivery.

The following describes the levels of services (LOS) available for the modelling process.

Table 3-18: Levels of Service Options for Water

Level of services	Description
LOS00	No formal service
LOS01	Water point more than 200m distance
LOS02	Communal standpipe less than 200m distance
LOS03	Yard tap connection (single tap) and or limited supply with a dry on-site system
LOS04	Yard tap connection (single tap) and or limited supply linked to waterborne sanitation
LOS05	House/building connection unlimited metered supply
LOS06	Supply volume. is limited to 100mm connection, peak flow limited, and on-site storage required
LOS07	All requirements met up to 150mm pipe, 150mm connection

Table 3-19: Levels of Service Options for Sanitation

Level of services	Description
LOS00	No formal service
LOS01	Bucket system
LOS02	Unventilated pit latrines and soakaways
LOS03	Ventilated improved pit (VIP)
LOS04	Dry composting toilet
LOS05	Communal chemical toilet
LOS06	Low flow (small bore) system with toilet structure
LOS07	Septic or conservancy tank with toilet structure
LOS08	Waterborne sewerage to each stand 110mm connection (no toilet structure)
LOS09	Waterborne sewerage to each stand 110mm connection, with toilet structure
LOS10	Waterborne sewer available, max connection size 150 mm or larger
LOS11	Waterborne sewerage, discharge load is above normal limits.

Table 3-20: Levels of Service Options for Electricity

Level of services	Description
LOS00	No electricity service
LOS01	None grid electricity service

Level of services	Description
LOS02	Grid-connected and metered - Single phase 230V up to 20A or 4.6 kVA
LOS03	Grid-connected and metered - Single phase 230V up to 60A or 13.8kVA
LOS04	Grid-connected and metered - Three phase / Multiphase 230/400V up to 150A or 100kVA
LOS05	Grid-connected and metered - Bulk higher than 230/400V - not exceeding 11kV (at least 25 kVA)
LOS06	Grid-connected and metered - Bulk - exceeding 11kV (at least 100 kVA)

Table 3-21: Levels of Service Options for Roads and Stormwater

Level of services	Description
LOS00	No service
LOS01	Tracks (Graded)
LOS02	Gravel within 500m
LOS03	Gravel
LOS04	Paved 4.5m
LOS05	Paved 5.5m
LOS06	Paved 6.5
LOS07	Paved heavy capacity of 7.5m

Table 3-22: Levels of Service Options for Refuse Removal Services

Level of services	Description
LOS00	None
LOS01	Communal waste collection point
LOS02	Weekly kerbside waste removal
LOS03	Bi-weekly kerbside waste removal
LOS04	Bi-weekly waste removal from site 1
LOS05	Daily waste removal from site 1
LOS06	Bi-weekly waste removal from site 2
LOS07	Daily waste removal from site 2

Based on the available service level options, the following levels of services were assigned to the land uses in the development cost model. Changes in the levels of service do have significant impacts on the demand for capital and also the operating position of the Council and hence its sustainability. The impact of different service level choices and resulting scenario were not tested as part of this report.

Table 3-23: Level of Service Assigned per Land Use

3.4.3 The Modelling Outcomes

This section documents the results of the modelling process. The outcomes are presented as a high-level summary. It is important to note that the tables show incremental quantities, which includes all service elements and components. It is currently impossible to model the impact of major interventions such as building a new wastewater treatment work or significant investment to reconfigure the management of solid waste. Those aspects must be discounted in the project prioritisation process.

Although the results link the demand to a specific year, it is still important to take note of budgeting processes and the extent of lead times before project implementation can commence. The figures are indicative, annual demands and the actual demands will be reflected in the project prioritisation process as part of the project outputs.

3.4.3.1 Land Use Demand

Table 3-24 shows the summary of land use demand which is a result of the growth forecasts.

Table 3-24: Land Use Demand for the Programme Period 2019 to 2028

	No of units	% of the total land	No of stand required	Area (ha) included
Residential	10 428	69.1%	5 912	422.1

The next set of figures summarises the total capex position per service.

Figure 3-6: Capex Position per Service

3.4.3.4 Summary of Operating Expenditure

One of the key elements that are often overlooked in capital investment planning is the operating consequences of capital investment. The next two tables show the forecasted operating and maintenance cost associated with the projected capital expenditure. It is an incremental cost and does not reflect on the revenue side and cost recovery strategies that the municipality may apply.

Table 3-29: Incremental Operating & Maintenance Expenditure: All Services per Annum (R'000)

3.4.3.5 Summary of Consumption and Use

Service delivery is about consumption and use. The next two tables show the expected demand for water and electricity. Also, the estimated wastewater and solid waste generated was calculated. These number can be used to assess the impact of future demand on the existing capacities of bulk facilities.

Table 3-31: Incremental Consumption and Usage

3.4.4 Issues to be Considered

The modelling was done against the backdrop of uncertainty and doubtful data critical to the process. The following should be considered:

- Conflicting population sources necessitated an estimate. The availability of data and an appropriate system to track and monitor change is a challenge and may directly impact the ability of the Council to quantify, measure and manage change and development.
- There are a range of policy options regarding service levels, the backlog eradication rate, backyard settlement, and other issues that need to be considered. This assessment gives a broad outline of the current approach and policies within the municipality.
- There is no detailed bulk services capacity assessment data available. As a result, the extent of current bulk capacities is not known and may impact capital expenditure estimates.
- The recent announcement regarding changes in housing policies of the national government will have to be considered. It might have an impact on settlement and urbanisation pattern that will have to be monitored.
- Many of the current issues may lead to long term structural problems resulting from a long history of investment in appropriate service levels and the impact it had and will continue to have on the operations of the Council.
- The current economic climate and the impact of government interventions may have a negative impact on the customer base and hence the ability to recover cost and sustain itself financially with the framework of current delivery policies. Measures are required to monitor the medium and long-term impact on the Council continuously.

Part 4

Affordability Envelope

4 Part 4: Affordability Envelope

4.1 What is an Affordability Envelope

The affordability envelope is the result of the Long-Term Financial Strategy. The aim of the Long-Term Financial Model is to define a set of parameters to which the municipality can roll out capital expenditure projects. The key parameter of interest for the budget scenario process to continue is the total capital expenditure that is deemed as affordable per year.

The purpose of this section is therefore to take the results of the Long-Term Financial Strategy and to indicate what should be actively used to guide capital investment.

4.2 10-Year Affordability Envelope

Figure 4-1: The Funding Mix of Affordable Capital Expenditure Over the Next 10 Years

provides a financial roadmap for the municipality, showing how it plans to finance its capital expenditure projects over the next decade. It is important to note that the actual amounts of funding and spending may vary based on a range of factors, including economic conditions, political priorities, and unforeseen events.

Table 4-1: Capital Expenditure

R'000	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033
Capital Expenditure	501,550	585,895	503,456	400,000	450,000	550,000	550,000	550,000	550,000	550,000

Capital Expenditure represents the total amount of capital that the municipality plans to spend on capital projects each year. The amounts for each year range from R501 million in 2024 to R550 million in 2033. This amount is the sum of the funding from all sources mentioned below, and it represents the maximum amount that the municipality can afford to spend on capital projects in each year. The capital expenditure represents the investment that the municipality will make in its infrastructure and facilities to support economic growth and improve the quality of life for its residents.

Table 4-2: Funding Mix of Planned Capital Expenditure

R'000	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033
-------	------	------	------	------	------	------	------	------	------	------

Transfers & Subsidies - Government	103,856	91,949	125,864	100,000	90,000	110,000	110,000	110,000	110,000	110,000
Borrowings	200,000	200,000	175,000	100,000	112,500	137,500	110,000	82,500		
Internal Generated Funds	197,694	293,946	202,592	200,000	247,500	302,500	330,000	357,500	440,000	440,000
Total	501,550	585,895	503,456	400,000	450,000	550,000	550,000	550,000	550,000	550,000

Table 4-3: Funding Mix as a Percentage of Capital Expenditure

Percentage	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033
Transfers & Subsidies - Government	21%	16%	25%	25%	20%	20%	20%	20%	20%	20%
Borrowings	40%	34%	35%	25%	25%	25%	20%	15%	0%	0%
Internal Generated Funds	39%	50%	40%	50%	55%	55%	60%	65%	80%	80%

Transfers & Subsidies - Government: This funding source represents the amount of money that the municipality expects to receive from the government in the form of transfers and subsidies. The amounts for each year range from R104 million in 2024 to R110 million in 2033. These funds are typically used to finance specific projects, such as infrastructure development or social programs.—The Transfers & Subsidies over the 10 years range between 16% and 25% of the municipality's total funding for capital expenditure. The municipality will not be able to continue with the implementation of grant funded projects unless it is critical for service delivery purposes and therefor the budget must be reprioritised.

Borrowings: This funding source represents the amount of money that the municipality plans to borrow from financial institutions to finance capital projects. The amounts for each year range from R200 million in 2024 to R82.5 million in 2031 with no borrowings for 2032 and 2033. Borrowings are typically used to finance large capital projects that require significant upfront investment, such as building a new facility or acquiring a major asset.

Internal Generated Funds: This funding source represents the amount of money that the municipality expects to generate from its own revenue streams, such as taxes, fees, and fines. The amounts for each year range from a minimum R198 million in 2024 to R440 million in 2033. Internal generated funds are typically used to finance ongoing capital projects, such as maintenance and upgrades to existing infrastructure and facilities.

4.3 Recommendations from LTFP

The long-term financial plan is a critical document that outlines the financial sustainability of the municipality over a 10-year period. It plays a significant role in determining the affordability envelope, which is the limit to which the municipality can commit to capital projects without compromising its financial stability. The plan is based on assumptions and historic financial results. The process involves testing the plan using various financial ratios and general principles of affordability to determine the affordable capital expenditure and funding mix.

The detail long term financial plan is included in Annexure of the financial report. This plan is essential for the municipality as it helps them to make informed financial decisions that align with their strategic objectives and long-term goals.

Part 5

Prioritisation

5 Part 5: Prioritisation

5.1 What Does Prioritisation Entail

Prioritisation in a capital expenditure framework refers to the process of ranking and selecting investment projects based on their relative importance, measured in terms of their strategic alignment. This is typically done in order to ultimately allocate limited resources to the most deserving projects, and ensure that the organization's goals and objectives are met in the most efficient and effective manner.

Multi-criteria assessment frameworks are often used in prioritization, as they provide a systematic and comprehensive approach to evaluating and comparing projects. These frameworks consider multiple dimensions or criteria that are relevant to the organization, such as financial performance, strategic alignment, risk, and impact.

In a multi-criteria assessment framework, each project is rated against each criterion using a set of predefined weights and scales. The ratings are then combined to generate an overall score or rank for each project, which can be used to determine its priority. The selection of criteria and their relative importance is determined based on the specific goals and objectives of the organization, as well as any relevant constraints or limitations.

Using a multi-criteria assessment framework can help organizations to make more informed and objective decisions about their capital expenditure priorities, by taking into account a wide range of factors and considering trade-offs between different criteria. This can lead to better alignment with strategic goals, improved allocation of resources, and increased return on investment.

Figure 5-1: Prioritisation Framework

5.2 Prioritisation Rationale

A prioritisation rationale is a written explanation that outlines the reasoning behind prioritising projects, initiatives, or investments. The criteria used in the prioritisation process and how each project was evaluated and ranked are detailed in the rationale. This document provides transparency and accountability in the decision-making process and allows stakeholders to understand why certain projects were given priority.

The prioritisation rationale is influenced by the strategic goals and objectives of the organization. It typically includes objectives, criteria, and weights associated to each. Having a clear Prioritisation rationale can help build trust and support among stakeholders and serve as a reference for future

decision-making. The rationale is an important tool for ensuring that resources are allocated in a way that aligns with the organization's goals and objectives.

5.2.1 Objectives

The Stellenbosch Prioritisation model is a framework used to evaluate and rank capital projects based on multiple criteria. The objectives of this model are as follows:

- **Strategic Focus Area Alignment:** This objective assesses how well a project aligns with the strategic focus areas identified by the organization. This helps ensure that resources are being allocated to initiatives that support the organization's overall goals and objectives.
- **Master Plan Alignment:** This objective evaluates how well a project aligns with the organization's master plan, which outlines its long-term vision for growth and development. Projects that are in line with the master plan are given priority, as they support the organization's overall direction.
- **Urban Edge Alignment:** This objective assesses how well a project aligns with the organization's vision for the urban edge, which refers to the physical and functional boundaries of the city. Projects that are consistent with the vision for the urban edge are given priority as they help shape the city's future.
- **Adam Tas Corridor Alignment:** This objective evaluates how well a project aligns with the Adam Tas Corridor, which is a key transportation and development corridor in the city. Projects that support the Adam Tas Corridor are given priority, as they help to improve connectivity and support economic growth.
- **Beneficial Area Alignment:** This objective assesses the potential benefits a project will bring to the community, including economic, social, and environmental benefits. Projects that are expected to have a positive impact on the community are given priority, as they support the overall well-being of the city.

Figure 5-2: Prioritisation Objectives

5.3 Prioritisation Criteria

5.3.1 Strategic Focus Area Alignment

The Strategic Focus Area Alignment branch evaluates to which of the IDP strategic Focus Areas each capital project aligns to. The Strategic focus areas of Stellenbosch includes:

- **Good Governance and Compliance:** This area focuses on ensuring that the municipality is run in a transparent and accountable manner, with processes and policies in place to ensure compliance

with local and national regulations. This could include areas such as financial management, ethics, and corruption, and ensuring that all decision-making is in the best interest of the community.

- **Green and Sustainable Valley:** This area focuses on promoting sustainability and environmental responsibility in the municipality. This could include initiatives to reduce the municipality's carbon footprint, protect natural resources, and promote sustainable development practices.
- **Dignified Living:** This area focuses on improving the quality of life for all residents in the municipality. This could include initiatives to address poverty and inequality, promote affordable housing, and ensure access to basic services such as healthcare, education, and employment.
- **Safe Valley:** This area focuses on improving safety and security for residents in the municipality. This could include initiatives to reduce crime and improve emergency response times, as well as promoting community engagement and public safety awareness programs.
- **Valley of Possibility:** This area focuses on promoting economic growth and development in the municipality. This could include initiatives to attract investment, create jobs, and support small businesses and entrepreneurs.

5.3.2 Master Plan Alignment

The Master Plan Alignment branch evaluates to which degree each capital project aligns to the various sector master plans. The sector master plans include:

- Comprehensive Integrated Transport Plan;
- River Management Plan Update;
- Electrical Infrastructure Master Plan;
- The Development and Implementation of a Stormwater Management System;
- Integrated Waste Management Plan;
- Stellenbosch Municipality Bulk Water Resources: Water Resilience Master Planning for The Stellenbosch System, and;
- Roads Master Plan 2022 Update.

By prioritising projects emanating from the sector Master Plans, the municipality aims to leverage from expertise encapsulated within each masterplan. This is to take into consideration the comprehensive understanding of the needs, challenges, and opportunities in each sector, such as transportation, water, or housing. This information is used to develop a vision and goals for the sector that align with the overall development objectives of the municipality. By prioritising projects within the sector master plans, the municipality can focus its investment in areas that will have the greatest impact in achieving the desired outcomes for that sector.

Prioritising projects within sector master plans provides a clear and transparent process for decision-making, providing technical backing and comfort during the decision-making process. The process of Prioritisation within the sector master plans involves considering the needs and constraints of the sector, as well as the available resources, and determining which projects should receive priority based on a set of criteria. This process helps to ensure that investments are made in a strategic and evidence-based manner, and that they are aligned with the overall goals and objectives of the municipality.

5.3.3 Urban Edge Alignment

Urban Edge alignment branch evaluates to which degree each capital project aligns to the spatial boundary of the Urban Edge. Focusing investment within the urban edge is an important strategy for cities seeking to promote sustainable and equitable development. By taking advantage of opportunities in these areas, cities can help to create vibrant, liveable communities that meet the needs of all residents. It is further regarded as an important prioritisation criteria as it:

- Firstly, helps to mitigate urban sprawl and promote compact, sustainable development patterns. By investing in and revitalizing areas along the urban edge, cities can encourage more efficient use of land, reduce the need for long commutes, and minimize the negative impacts of urbanization on the environment.
- Secondly, result in investing within in the urban edge which can help to create new job opportunities and support local economic development. By developing and improving commercial, retail, and industrial centres within the urban edge, cities can attract new businesses and workers, which can help to drive economic growth and improve overall quality of life.
- Thirdly, guide investment spatially that helps to address social and environmental challenges, such as poverty, crime, and environmental degradation. By improving housing, transportation, and other infrastructure in these areas, cities can create safer and more liveable communities, which can help to support the health and well-being of residents.

5.3.4 Adam Tas Corridor Alignment

Adam Tas Corridor alignment branch evaluates to which degree each capital project aligns to the spatial delineation of the Adam Tas Corridor. Projects within this area are prioritised more than projects not within this area. This is important for Stellenbosch, especially in terms of spatial planning, financial management and infrastructure delivery:

- **Spatial Planning:** The Adam Tas Corridor alignment helps in creating a cohesive and integrated spatial development plan for the area. By prioritising projects within the corridor, it ensures that development takes place in an orderly and planned manner. This helps in avoiding haphazard and piecemeal development that can result in land-use conflicts, degradation of the environment, and reduced effectiveness of infrastructure investments.
- **Financial Management:** Prioritising projects within the Adam Tas Corridor alignment can also lead to cost savings and more efficient use of resources. By focusing on the corridor, it becomes possible to optimize the use of existing infrastructure and services, and to leverage economies of scale in the development of new infrastructure. This leads to a more cost-effective and efficient use of public funds.
- **Infrastructure Delivery:** Focusing investment within the Adam Tas Corridor also helps to ensure that adequate infrastructure is in place to support development. This includes both hard infrastructure, such as roads and water supply systems, as well as soft infrastructure, such as health and education services. By prioritising the development of infrastructure in the corridor, it becomes possible to provide the necessary support for sustainable and equitable growth and development in the area. This helps to create an enabling environment for economic growth, and to improve the quality of life for residents and businesses in the area.

5.3.5 Beneficial Area Alignment

The alignment of capital projects in terms beneficial areas evaluates to which degree each capital project aligns to the various wards of the municipality. Wards are used to align capital investment based on the following three arguments:

- **Community Impact:** Wards are used to align capital projects to the beneficial area because they allow for a localized approach to identifying areas where the project will have the greatest impact on the community. This enables decision-makers to prioritise projects that are expected to bring significant benefits to the people living in a particular ward, improving their quality of life and supporting the overall well-being of the city.
- **Equity and Fairness:** By aligning capital projects with wards, the Prioritisation process ensures that investment is distributed equitably across the city. Projects that bring significant benefits to

underserved or marginalized communities are given priority, reducing disparities, and promoting a more equitable and just society.

- **Data-Driven Decision-Making:** Using ward-level data in the Prioritisation process allows for a more informed and data-driven decision-making approach. By considering the specific locational attributes of capital projects, and their alignment to each ward, decision-makers can make more informed and strategic investment decisions, leading to better outcomes for the community and the municipality.

5.4 Prioritisation Tool

An excel-based project prioritisation tool was developed based on the prioritisation rationale of the municipality and is represented in Figure 5-3. It is based on a multi-criteria assessment framework, incorporating financial, environmental, social, governance (ESG), economic, technical, strategic, and spatial metrics. The aim of the model is to apply all capital projects identified and provide a relative ranking that can be used in the budget scenario section. There are several benefits of using an excel based tool, some of which are listed below:

- **Centralised data storage:** the excel-based project prioritisation tool allows you to store all project-related information in one place, making it easier to access and update.
- **Accessible:** the excel-based project prioritisation tool will be accessible to all the municipalities employees to use without the need for extensive training.
- **Customizable:** the tool allows you to customize your project prioritisation tool to fit your municipality's strategic objectives and priorities.
- **Collaboration:** the excel-based project prioritisation tool allows multiple users to access and edit the project prioritisation tool simultaneously, making it easy for teams to collaborate on project prioritisation.

Overall, the excel-based project prioritisation tool helps municipalities to make more informed decisions about project priorities, leading to more successful outcomes and better use of resources.

Figure 5-3: Excel Based Prioritisation Tool

The screenshot shows the Excel interface for the 'Stellenbosch CEP 2023/24 Capital Prioritisation Tool'. The formula bar displays '=VLOOKUP(B78;Objective 1 Input!B:G;6;FALSE)'. The spreadsheet contains a table with the following columns: Project ID, Description, Ward, Strategic Priority, Environmental Priority, Social Priority, Governance Priority, Economic Priority, Technical Priority, Strategic Priority, Spatial Priority, and a final 'Score' column. The table lists numerous projects, such as 'Water Supply System Upgrade', 'Road Maintenance', and 'Waste Management', each with associated scores across the various priority categories. The bottom of the screen features a navigation bar with tabs for 'Objective 4 Input', 'Objective 5 Input', 'Lookups', 'Prioritisation Tool', 'Analysis', '1. Results per Alignment Branch', '2. Results per Directorate', '3. Results per Directorate', '4. Score Distribution', 'Budget Scenario', and 'Budget Requests'.

5.5 Output of the Prioritisation Application and Results

A multi-criteria assessment framework is a decision-making tool that helps in evaluating different options based on multiple criteria. It involves a step-by-step process that assigns scores to each alternative based on their performance against the criteria. The scores are then converted into points for each criterion and project. The weightage of each criterion is pre-determined using a points system, where a higher number indicates a greater level of importance.

By applying this framework, decision-makers can assess multiple options objectively, based on their performance against various criteria. It helps in identifying the most suitable option that meets the needs of the organisation or project. This approach also ensures transparency in the decision-making process, as the criteria and weightage assigned to each criterion are clearly defined beforehand.

The outcome of a multi-criteria assessment framework is a set of scores or rankings for each alternative being evaluated, based on their performance against multiple criteria. The scores are typically presented as a set of numbers, where each number represents the performance of a specific alternative on a particular criterion.

5.6 How to determine prioritisation results

5.6.1 Step 1: Define The Relative Preferences for Each Goal That Was Set Out

Weights for relative preferences are best determined through consultative stakeholder debates to prioritise goals. In some cases, all goals may be given equal weight, indicating their equal importance.

5.6.2 Step 2: Define Relative Preferences for Each Objective That was Set Out

Objectives vary in their contribution to achieving a goal, with some being more important than others and contributing more to the project's score. This approach allows for prioritisation principles to become important discussion points, rather than individual project merits. Using this model allows for fair comparison of all projects, regardless of their origin or complexity.

5.6.3 Step 3: Set-Up Each Criterion to Evaluate Relative Importance

Objectives are evaluated using criteria that can be derived from a performance indicator framework or through spatial, qualitative, or quantitative measures. It is crucial to avoid any unfair discrimination, ensuring that each project has an equal opportunity to compete in the criterion's test. This is achieved by defining evaluation criteria for each project.

5.6.4 Step 4: Data Collection & Standardisation: Project Data

Availability of suitable data is crucial to measure each project. If the base data is not readily available, a proxy criterion can be used to address the main issue. Typical data required for Prioritisation include project name, implementing department, project scope, spatial details, project cost, and project duration.

5.6.5 Step 5: Calculate Score

After defining criteria, weights, evaluation criteria, and setting up a project portfolio, the projects are subjected to the multi-criteria assessment framework, which ranks them based on their attributes, providing a relative ranking of projects from most important to least important.

5.6.6 Step 6: Assess outcome

As with any model, this step enables the decision maker to calibrate the model to ensure that the model is reliable in its results, and provides justifiable validity to the outcome of the model.

5.7 Prioritisation Results

The Capital Prioritisation Model (CPM) is a critical tool used by municipalities to identify and rank capital projects based on their potential impact and benefit to the community. Prioritising capital projects is a critical process that involves identifying and ranking impactful projects for government investment. This helps allocate resources and focus efforts on the municipality's strategic overview. The next section will discuss the relative ranking resulting from the CPM.

5.7.1 Project Scores

A cluster analysis is a statistical technique used to group data points that share similar characteristics or features. In the context of the Capital Prioritisation Model, the cluster analysis can be used to group projects based on similarities in their objectives, resource requirements, or potential impact. This can be illustrated through the number of project scores which relates to the different branch alignments as shown in Figure 5-4.

Figure 5-4: Average Score per Prioritisation Branch

From Figure 5-4, the following are noted:

- Objective 1 has majority of the project scores which is the Strategic Area criteria of the model. This could be attributed to the data completeness of the capital project's information – mainly leveraging from the details regarding each project's strategic alignment. By prioritising each capital project in terms of its alignment with these strategic focus areas, the municipality can ensure that its resources are being used in the most effective and efficient way possible.
- Objective 3 that evaluates the degree to which capital projects align with the spatial boundary of the urban edge has the second highest alignment, which is indicative of promoting sustainable and equitable development. This prioritisation criterion helps to mitigate urban sprawl, promote compact and sustainable development patterns, create new job opportunities, support local economic development, whilst addressing social and environmental challenges.

- The branch of the model related to Objective 2 and 4 contributes least to total project scores signifying that either more information or criteria is required or that more effective planning is required in terms project budgeting.

Having this kind of view over the data allows the municipality to gain insights into the alignment of different projects with the prioritisation model and its criteria. This information can then be used to make informed decisions about which projects to prioritise and allocate resources towards, based on their alignment with the specific objectives and goals of the model. For example, the municipality can use this information to identify gaps in project alignment and adjust their planning and budgeting accordingly. They can also identify areas where more emphasis is needed in terms of financial alignment or locational analysis to improve project outcomes and maximize their impact. Overall, having a comprehensive understanding of project alignment to each branch or theme can help the municipality make more informed decisions about how to either enhance the prioritisation criteria, or to support specific directorates within the municipality.

5.7.2 Score Distribution

When comparing project scores within Stellenbosch Municipality, it can help identify which projects are more strategically aligned with the municipality's strategic goals and rationale. Looking at the overall scores of the projects within the municipality is illustrated in the box and whisker diagram shown in Figure 5-5. A box and whisker diagram is a visual tool that helps to summarise a range of data points. It shows the median score of a unit, the minimum and maximum scores, and the distribution of scores between the 25th and 75th percentile. The average score of the unit is depicted by the "x". the ends of the whiskers are the maximum and minimum scores. Projects scoring between the minimum value and the 25th percentile are arranged along the bottom whisker, and projects scoring between the maximum value and the 75th percentile are arranged along the top whisker and the box.

Figure 5-5: Score Distribution per Directorate

The results show the following:

- Outliers: Infrastructure Services is the only directorate that are represented by outliers. This means that some of their projects performs exceptionally worst compared to all the other projects.
- Skewness: The size and position of each block per organisation is indicative of skewness in data. For instance, directorates such as Planning and Development Services and Infrastructure Services,

is relatively balanced compared to all other organisations, which shows a skewness to the lower end of the scoring range.

- Grouping: Directorates such as Municipal Manager and Financial Services scores are all relatively grouped around the same score range indicating misalignment with the priorities encapsulated in this model.

This analysis can further be useful in:

- Identify areas of misalignment in municipal planning and budgeting processes. Specifically, it can help the municipality to target resources and support towards specific directorates that may be struggling to align their projects with the strategic objectives of the model, and;
- By identifying outliers and skewness in the data, the municipality can also gain insights into which directorates are performing exceptionally well or poorly in their planning practices and use that information to inform resource allocation and support strategies.

Overall, this analysis can help the municipality to make more informed decisions about how to support directorates with their planning and budgeting processes, ultimately leading to more effective and aligned project implementation across the province.

5.7.3 Project Score Analysis per Directorate

The prioritisation model is used to rank projects in order of importance. To validate the model, the distribution of scores of projects must be considered. A fair score distribution should show a gradual increase in the number of projects with respect to the score. A clustered distribution of scores could indicate bias within the model, or an under representation of data attributes. For example, if most projects do not have a location, or a budget, then majority of projects will score low resulting in a clustered distribution – even if the model is well calibrated.

Figure 5-6: Score per Project for All Directorates

The following observations can be noted from Figure 5-6:

- A gradual increase in project scores indicating an unbiased model.
- Directorates such as Infrastructure Services, Planning & Development Services and Community & Protection Services represent a wide range of scores, potentially because of the number of projects as well as the data completeness of the said projects.
- Conversely, Financial Services and Municipal Manager directorates do not represent a wide spread of scores by projects, neither are they representative of high scores, indicating that these directorates are not aligned or responsive in terms of the prioritisation model.

This is useful to understand for various reasons. Firstly, to verify that the model is not representative of an unfairly biased outcome and secondly, because of the limited variability in scores in some organisations, it could be suggested that additional criteria should be applied.

5.7.4 Project Distribution per Project

Score distribution is an important tool for visualising and analysing prioritised projects. By looking at the distribution of scores, we can identify trends and patterns in the data, and determine whether there are any gaps or biases that need to be addressed. One measure of distribution is skewness, which indicates the extent to which the data is asymmetrical. A perfectly symmetrical distribution has a skewness of zero, while a positive skewness indicates that the data is skewed to the right, with a longer tail on the positive

side of the axis. In the context of project scores, a positive skewness indicates that there are a greater number of projects with lower scores and fewer projects with higher scores. This could suggest:

- that there is a need for standardisation of data collection, to ensure that all projects are evaluated using the same criteria, and;
- a need for an additional criterion to enhance the prioritisation process.

Overall, understanding the skewness of the score distribution can help the municipality improve their project planning practices and ensure that resources are allocated effectively.

Figure 5-7: Score Distribution

From Figure 5-7 a positive skewness can be identified, implying that several projects either may not have all attributes in place to participate in the scoring process, or do have attributes, but do not score well with respect to the prioritisation model. If the projects in the lower end of the range is ignored, then an approximation towards a normal distribution can be observed. The effect of the positive skewness is useful to observe as it indicates that from the vast number of projects, there are projects scoring very well – understanding why, could lead to alternative project preparation and planning practices for other projects.

In summary, understanding the score distribution of prioritised projects is a crucial step in ensuring that resources are allocated effectively and equitably. Skewness is one measure of distribution that can help decision-makers to identify patterns and gaps in the data, and to make informed decisions about which projects to fund and how to improve the prioritisation process.

5.7.5 Spatial Alignment

The prioritisation tool provides a significant advantage in that it allows for both alphanumeric and spatial data analytics. This means that spatial inputs can be used to prioritise projects, allowing for a more targeted approach. This is not only a requirement under SPLUMA, but it is also an important policy objective under the IUDF. Spatially based prioritisation ensures that projects are aligned with spatial strategy and are targeted towards the areas that need them the most from a spatial equity, spatial sustainability, spatial governance, and spatial planning perspective.

This approach enables public sector to make more informed decisions about where to allocate resources and can lead to better outcomes for the community. Ultimately, the use of spatial data analytics in the prioritisation process helps to ensure that resources are allocated efficiently and effectively, resulting in more equitable and sustainable development. Figure 5-8 represents the concentration of scores of projects spatially.

Figure 5-8: Spatial Representation of Project Scores

From Figure 5-8 respectively, the following can be explained:

- **Spatial Concentration:** majority of projects is located in and around the urban centres of Stellenbosch and Franschhoek which indicates that investment is aligned in accordance with the current spatial structure of Stellenbosch. Prioritising projects in urban centres leads to stronger economic growth and sustainable development as these areas typically have better access to services, amenities and infrastructure which attracts business and investors.
- Projects scoring average to medium, are in areas like Jamestown, Klapmuts and south of Kylemore. This indicates that the municipality is prioritising spatial equity and development beyond the typical urban centres.

5.8 What is the difference between Prioritisation and a Budget Scenario

Prioritisation and budget scenarios are related but distinct concepts in the local government space. Prioritisation involves identifying and ranking the most important projects that a municipality should undertake based on their level of strategic importance and impact on the community. Prioritisation is typically done during the planning process, before the budget is developed, and involves determining which initiatives should receive the most attention and resources.

Budget scenario, on the other hand, involves allocating resources to the initiatives that have been prioritised. It involves creating a financial plan that outlines how much money will be allocated to each

initiative, and how it will be spent. Budget scenarios are developed based on various factors, such as a municipality's financial resources, priorities, and objectives.

It is important to understand that just because an initiative is prioritised and deemed strategically important, it does not necessarily mean that it will be allocated funds in the current budget cycle. Budgets are developed based on available resources, and some priorities may have to be deferred or delayed until a municipality has sufficient funds to allocate to them.

The use of software/tools to facilitate the prioritisation and budget scenario process in local government can bring several benefits that can help streamline and optimize the decision-making process.

5.8.1 Budget Scenario Methodology

Developing a budget scenario is a systematic approach that builds on the annual capital planning process to determine which projects should be included in the 10-year capital expenditure framework and annual draft budget based on pre-defined rules and scenario parameters. The main objectives of this section include defining the budget determination process, modelling demand, planning capital expenditure, and ensuring affordability. The Stellenbosch Local Municipality uses the budget scenario methodology annually to determine the draft Medium Term Revenue and Expenditure Framework (MTREF) capital budget. To prepare for this, they assess the outcomes of the demand quantification process, prepare an integrated infrastructure investment framework, align the Long-Term Financial Model (LTFM) to budget scenario parameters, ensure a balanced funding mix, and determine a relative ranking of importance for projects. This is done by incorporating the outcomes of the Stellenbosch Capital Prioritisation Model (CPM) into the budget scenario preparation process.

An excel-based tool was developed to sequence and fit the prioritised projects to the available/affordable funding over the analysis period and is represented in Figure 5-9. Where the previous phases determined the capital needs (demand), and the available funds (supply), this tool enabled the municipality to determine which demand will be met, by the available supply (in line with the LTFM outputs provided by the municipality). It must be noted that the first three years output of the budget fit process represents the MTREF budget and therefore develops a MTREF budget for consideration by the municipality.

Figure 5-9: Excel-Based Budget Scenario Tool

The screenshot shows the Microsoft Excel interface for the 'Excel-Based Budget Scenario Tool'. The ribbon at the top includes 'Home', 'Insert', 'Draw', 'Page Layout', 'Formulas', 'Data', 'Review', 'View', 'Automate', and 'Tell me'. The main workspace contains a large table with columns for project information, such as 'Project Name', 'Description', and various financial metrics. The bottom status bar shows the active sheet is 'Budget Scenario'.

5.8.2 Preparing for a Budget Scenario

To initiate the process of applying a budget scenario, several input variables should be prepared. These variables provide the content of the budget scenario and how the budget scenario parameters are applied, to achieve a draft capital budget. These input variables include the project status and relative project score.

5.8.2.1 Project Status

During the budget scenario process, project status is given priority. This status is determined by considering projects that are Assets Under Construction (AUCs), committed projects from previous budgets, and projects that are ready for implementation.

5.8.2.2 Relative Project Score

The CPM is a methodology to rank projects based on their alignment to the municipality's objectives. It derives a numerical value to determine a project's priority. During budget scenario preparation, the CPM is applied to obtain an order of importance for projects and capital demand. The relative importance determines budget allocation within the scenario's parameters.

5.8.3 Budget Scenario Set Up

To create a budget scenario template, parameters are used to set rules for planned capital expenditure. The template determines the available capital budget for the MTREF and is distributed based on grant allocations in the DoRA. The LTFM determines a 10-year affordability envelope.

5.8.3.1 Applying a Budget Scenario

Projects and requested capital budgets are assigned a status and fitted into the budget scenario template using a predefined routine. This routine determines the sequence of project allocation and corresponding financial year. The status of projects in the draft capital budget is assigned in the following order:

- Committed projects have top priority due to contractual commitments, followed by provisioned-in projects. Provisioned-in projects are fitted without delay if there is available budget but cannot exceed the allocated budget.
- Projects fitted with delay are assigned to the first available financial year due to unavailability in the budget scenario template.
- Projects fitted are allocated a budget based on their relative project score, provided there is available budget, and cannot exceed the total allocated budget within the template. Projects fitted with delay are assigned a delay to the first year with available funds due to insufficient budget allocation in the template.

5.8.3.2 Negotiated Adjustments

Once a draft capital budget has been developed using the budget scenario process, the portfolio of projects which make up the draft capital budget needs to undergo several municipal approvals.

It is inconceivable that any portfolio of capital projects, which has been prepared in a complex multi-disciplinary collaborative framework will meet all the expectations. Therefore, a negotiated adjustment process is accommodated in the budget scenario process whereby projects can be added or removed from the portfolio of capital projects based on motivations and representations made during budget forums.

The next part of this document unpacks the results of the budget scenario.

Part 6

Capital Expenditure Programme

6 Part 6: Capital Expenditure Programme

6.1 What is the Capital Expenditure Programme

A Capital Expenditure Programme (CEP) refers to a detailed programme that outlines the municipality's list of projects that is required to be implemented over a multi-year period. This program is the municipality's list of projects that are prioritised according to the strategic prioritisation process in which projects were given a ranking. Using the budget scenario tool, these projects were allocated resources efficiently whilst ensuring that their capital spending aligns with the affordability envelope and demand quantification of the municipality.

There are multiple benefits of having this overview, some of which are listed below:

- Improved service delivery: A Capital Expenditure Programme identifies the most essential projects required to improve service delivery in the municipality. It allows for more effective planning and allocation of resources to meet the needs of the population.
- Strategic planning: A Capital Expenditure Programme enables the municipality with a strategic plan, based on an understanding of the projects that are necessary to meet the needs of the municipality. It allows for a long-term vision to be developed that is aligned with the goals of the municipality.
- Increased efficiency: By understanding the projects that are essential, the municipality can ensure that resources are used efficiently. Projects are already prioritised based on their importance, and resources have been allocated accordingly.
- Attraction of investment: A comprehensive overview of necessary projects can help attract investment to the municipality. It provides potential investors with a clear understanding of the opportunities that exist in the area and the projects that are necessary to support growth and development.
- Attraction and retention of residents: By addressing the needs of the population through these essential projects, the municipality can attract new residents whilst retaining the current population. This can lead to increased economic activity and a higher quality of life for those living in the region.

In essence, the CEP furnishes the municipality with a comprehensive perspective on the essential undertakings it must carry out to fulfil its service delivery responsibilities, while concurrently enticing investment, commerce, and inhabitants from throughout the province.

6.2 Budget Scenario Results

As municipalities strive to deliver basic infrastructure services and meet the needs of their communities, budgeting is a critical process. Budget scenarios help municipalities assess the financial impact of various decisions and align resources with their strategic priorities. In this section of the report, we present the results of the budget scenario results using different perspectives, detailing the proposed expenditure and revenue for each area over the MTTEF and 10-year horizon. This section aims to provide insight into how the municipality intends to allocate its resources to meet its objectives. Understanding the budget scenario results can help stakeholders assess the municipality's financial performance and ensure that resources are being used effectively and efficiently to serve the community.

6.2.1 Planned Capital Expenditure Review

Understanding the planned capital expenditure over the next 10 years in a municipality is crucial for effective long-term planning. A clear understanding of the planned capital expenditure enables municipalities to prioritise the right capital projects, allocate resources accordingly, and ensure that funds are available to complete critical projects. This understanding can also support infrastructure maintenance and improvement, economic growth, and development, and promote transparency and accountability in government. In this section, we will explore the importance of understanding the planned capital expenditure for 10 years in a municipality.

The overall planned capital expenditure is estimated at R5 302 851 329 across the planning period, after the second capital demand capturing cycle. Table 6-1: Planned Capital Expenditure and Affordable Capital Expenditure outlines the total planned capital expenditure per annum for the next 10 years.

Table 6-1: Planned Capital Expenditure and Affordable Capital Expenditure

Year	Total	Percentage
2023/24	R498 549 865	9%
2024/25	R581 895 464	11%
2025/26	R494 955 975	9%
2026/27	R543 177 234	10%
2027/28	R505 342 841	10%
2028/29	R538 642 233	10%
2029/30	R549 981 481	10%
2030/31	R549 951 619	10%
2031/32	R540 202 163	10%
2032/33	R500 152 455	9%
Total	R5 302 851 329	100%

Having this view of the long-term capital planning is vital for municipalities as it enables them to allocate resources appropriately and prioritise the right capital projects. By allocating capital expenditures over time, municipalities can maintain fiscal responsibility and avoid compromising essential services such as housing, public safety or education.

6.3 Budget Scenario Analysis per Directorate

In this section of the report, we will examine the budget scenario per directorate in a municipality, detailing the proposed expenditure and revenue for each directorate. Figure 6-1 illustrates how much money is allocated to each directorate, from which we can gain insight into the municipality's priorities and how it intends to allocate its resources to serve the community.

Figure 6-1: Budget Scenario per Directorate

As depicted in Figure 6-1, the municipality has allocated most of its funds to both Infrastructure Services and Planning and Development Services over the 10-year planned capital expenditure, which suggests that the municipality recognises the importance of investing in these areas for the long-term benefit of the municipality:

- Allocating funds to Infrastructure Services can help ensure the proper maintenance and improvement of the municipality's infrastructure, including roads, bridges, and water supply systems. This investment can lead to improved safety, reduced maintenance costs, and increased economic activity by making the municipality more attractive to businesses and residents.
- Allocating funds to Planning and Development Services can facilitate economic growth and development by investing in transportation infrastructure, public spaces, or cultural facilities. This investment can attract new businesses and residents, leading to increased economic activity and job creation.
- Directorates such as Community and Protection Services and Corporate Services, also have funds allocated to it however, it is not as large as the others.

Overall, allocating funds to both these directorates over the 10-year planned capital expenditure demonstrates the municipality's commitment to meeting the needs of its municipality by investing in critical areas for sustainable growth and development.

6.4 Budget Scenario Analysis per Objective 1: Strategic Alignment

By evaluating the budget in relation to its conformity with the municipality's strategic focus areas, the allocation of resources can be directed towards capital projects that support the municipality's overall objectives and priorities. This is exemplified in Figure 6-2.

Figure 6-2: Budget Scenario per Objective 1

Upon analysing Figure 6.2, it becomes apparent that the municipality has prioritised both social and economic development by allocating funds towards the strategic objectives of Dignified Living and Valley of Possibility over the 10-year planned capital expenditure:

- Allocating funds to Dignified Living helps to ensure that the municipality is investing in capital projects that improve the quality of life for its residents. By addressing poverty and inequality, promoting affordable housing, and ensuring access to basic services such as healthcare, education, and employment, the municipality can create a more inclusive and equitable community over the 10-year horizon.
- Allocating funds to Valley of Possibility facilitates economic growth and development by investing in capital projects to attract investment, create jobs, and support small businesses and entrepreneurs. Over the 10-year horizon, this can lead to increased economic activity, job creation, and an overall improvement in the municipality's economic health.
- A limited amount of money is allocated to the strategic objective of Good Governance and Compliance over the complete 10-years, which could mean that the municipality may face challenges in maintaining good governance and compliance over the long term. Good governance and compliance require sustained efforts and resources to ensure that policies and processes are regularly reviewed and updated, and that staff members are trained and supported in their roles. If there is a limited budget associated to this objective, there is a risk that the municipality may regress to previous, ineffective, or non-conforming practices.

Allocating funds to the strategic objectives of Dignified Living and Valley of Possibility over the 10-year planned capital expenditure demonstrates the municipality's commitment to both social and economic development. However, it is important ensure sufficient funding is allocated to the other objectives as well, particularly Good Governance and Compliance.

6.5 Budget Scenario Analysis per Objective 2: Master Plan Alignment

Master Plan Alignment involves assessing the degree to which capital projects align with the municipality's sector master plans. This process leverages the expertise and understanding within each plan, including sector-specific challenges and opportunities. By prioritizing and budgeting for projects within the sector master plans, the municipality can focus its investment on areas with the greatest impact on achieving desired outcomes. Figure 6-3 illustrates the allocated funds per masterplan over the next 10-years in the municipality.

Figure 6-3: Budget Scenario per Objective 2

The 10-year capital expenditure allocation for each masterplan significantly impacts the municipality's development. Key points to note include:

- Majority of the allocated budget goes towards the Electrical Infrastructure Master Plan, which indicates that the municipality is prioritising the development and improvement of its electrical infrastructure. This may be due to the increased demand for electricity as the population grows or due to an outdated or insufficient electrical infrastructure.
- The allocation to the Human Settlements Plan and Water Distribution Plan indicates that the municipality is committed to addressing housing needs and providing adequate housing for its residents, as well as recognizing the importance of ensuring that its residents have access to clean and reliable water.
- The portion of projects that will be funded originating to the "Undetermined" category is a matter of concern as many capital projects are not assigned to any of the municipality's masterplans. This lack of clarity has the potential to create concern and uncertainty, which may affect decision-making and implementation processes.
- The allocation to the Integrated Waste Management Plan and to the Sewer Master Plan raises concerns about the municipality's commitment to environmental sustainability and sanitation. These areas are crucial for the health and well-being of the municipality's residents and require sustained investment to ensure their continued operation and improvement.

6.6 Budget Scenario Analysis per Objective 3: Urban Edge

Investing in areas within the urban edge is necessary to promote sustainable and equitable development. By taking advantage of opportunities within these areas, cities can create vibrant and liveable communities that meet the needs of all residents. Therefore, in this analysis, we will examine the results of the budget scenario through the lens of the urban edge, evaluating the degree to which each capital project aligns with the spatial boundary of the urban edge. Figure 6-4 provides insight into how the budget has been allocated to projects within the Urban Edge.

Figure 6-4: Budget Scenario per Objective 3

From Figure 6-4, it appears that the majority of the capital expenditure is allocated to capital projects within the urban edge over the 10-year horizon. This is a significant proportion of the budget, indicating a strong commitment to promoting sustainable and equitable development in the municipality. Over the course of the 10-year period, this investment in urban edge capital projects is likely to have a number of positive impacts on the municipality. By promoting more compact, walkable communities, the investment could help to reduce traffic congestion and air pollution, while also making it easier for residents to access the services and amenities they need.

6.7 Budget Scenario Analysis per Objective 4: Adam Tas Corridor

The allocation of funding for capital projects based on their alignment with the Adam Tas Corridor can have significant benefits for the municipality in terms of spatial planning, financial management, and infrastructure delivery. Funding projects within the Adam Tas Corridor alignment can help the municipality to develop in a sustainable, equitable, and efficient way. Figure 6-5 illustrates the capital projects within the Adam Tas Corridor.

Figure 6-5: Budget Scenario per Objective 4

Majority of the allocated budget is directed towards capital projects within the Adam Tas Corridor alignment indicates that the municipality is prioritising the development of this area over other areas. This suggests that the municipality recognizes the importance of developing the corridor in a cohesive and sustainable manner. By funding projects within the corridor, the municipality can ensure that development takes place in an orderly and planned manner. This means that there will be less conflict in land use and the negative impact on the environment will be minimized. By having a clear plan for the development of the corridor, Stellenbosch municipality can ensure that infrastructure investments are well-coordinated and that development is sustainable in the long term.

6.8 Budget Scenario Analysis per Objective 5: Beneficial Area

Aligning capital projects with specific wards in the municipality can have a significant impact on community engagement and support. Prioritising projects that benefit specific wards can build stronger relationships between the municipality and its residents, promoting a sense of ownership and pride. This analysis evaluates the allocation of funding for capital projects aligned with beneficial areas, examining the degree to which each ward is funded and the potential benefits and challenges. See Figure 6-6 for further details on this.

Figure 6-6: Budget Scenario per Objective 5

From the Figure 6-6 above, it is evident that the WC024 (City Wide) receives the highest allocation of funds for capital projects over the next ten years. This prioritisation brings significant benefits to the overall municipality including improved infrastructure, increased economic opportunities, and a better quality of life. However, it is important to note that other wards with lower allocations of funds may face challenges in terms of development and growth, highlighting the need for ongoing evaluation and monitoring of the allocation of capital projects.

Ward 1, 11, 18 have been allocated a higher percentage of the budget – potentially due to their higher population density. Higher population density can create greater demand for infrastructure, public services, and amenities, such as transportation, housing, and recreational spaces. Overall, the allocation of a higher percentage of funds these wards indicates that the municipality is taking a targeted approach to allocating its funds and aims to address the unique needs and priorities of each ward. By prioritising investment in areas with higher population density, the municipality can improve the quality of life for residents, promote economic growth, and build stronger relationships with the community.

6.9 Project List

Table 6-2: List of Projects

Directorate	Department	Project Name	Funding Source	Score	Fit Status	2023/24	2024/25	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	2031/32	2032/33	Total

Part 7

Institutional Arrangements

7 Part 7: Institutional Arrangements

7.1 Functional Area Determination

It is recommended that a Development Potential Index are used to determine the Functional Areas. The Development Potential Index is a standardised spatial multi-criteria assessment framework based on hexagon modelling units, which takes into consideration factors related to morphology, demographics, socio-economics, land uses, accessibility and connectivity, social facilities and more. This result in the identification of homogenous zones – ideal for infrastructure demand calculations. This approach will ensure that the investment in infrastructure is aligned with the development potential of the area, leading to better use of resources.

7.2 Infrastructure Demand

After review of key masterplan documents, it was found that several masterplans are outdated. Of the masterplans reviewed, it was not clear what the infrastructure projects are that is required to invest in for the respective services. It was also found that the asset management framework of the municipality is under review. It is recommended that through the capital planning forum, several key masterplan documents are updated to clearly express, per capital project, what is required from an investment perspective over the next 20-50 years. This will provide a clear understanding of the infrastructure demands and ensure that investments are made based on updated and accurate information.

7.3 Prioritisation Rationale

Currently, the municipality considers five key objectives when it comes to differentiating between capital projects vying for capital investment over the analysis period. To determine an even more representative score, it is recommended that the municipality investigate the usage of more criteria when evaluating projects. It is further recommended that the data used to determine the adherence to the said criteria, is verifiable, otherwise put, that the data utilised to determine the strategic alignment of each capital project is evidence based leading to a more objective prioritisation process.

7.4 Budget Scenario Tool

The budget scenario tool used to develop the 10-year capital expenditure framework encapsulated in this document, is configured in a MS-word application, MS Excel. This does pose limitations in flexibility when it comes to scenario testing and require significant input to conduct a budget scenario. It is recommended that the municipality consider applications that are integrated with the entire capital planning process, to facilitate scenario-based decision making in optimising investment towards capital investment.

7.5 Capital Planning Forum

It is recommended that the Capital Planning Forum is continued as a vehicle to enable stakeholder engagement relevant to the planning and prioritisation process of infrastructure investment. A Terms of Reference for the Capital Planning Forum is appended as an annexure.

Roads and Stormwater	Roads Master Plan	2018	SRMP001	Western byss	New road between R310 heading north to link with the R304 to tie into the existing intersection with Welgevonden Boulevard. The route runs east of the Stellenbosch land-fill and joins Devon Valley Road for a portion before deviating to ss over the hill	-	PGWC	R1 840 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP002	Western byss	New road rallel to existing Techno Avenue from the R44 to R3R44 and R310 will be grade-serated intersections. The road will have limited intersections with a 2nd access to Techno rk linking into Neutron Road. The route crosses the Eerste river (new bridge) and sses to the west of Van Ryn's Distillery before crossing the railway line (new bridge) and intersecting with Adam Tas. Detailed planning and investigation of route alternatives will be required and an EIA process due to potentially environmentally sensitive areas	-	PGWC	R100 000,00

Service Type	Master Plan	Year	Project ID	Project Name	Project Description	Project Location	Funding Source	Demand over time
Roads and Stormwater	Roads Master Plan	2018	SRMP003	Western byss	New north-south link road between Annandale Road and Adam Tas running to the east of the airport and De Zalze Estate. The route will cross the Eerste River (new bridge) and sses to the west of Van Ryn's Distillery before crossing the railway line (new bridge) and intersecting with Adam Tas. Detailed planning and investigation of route alternatives will be required and an EIA process due to potentially environmentally sensitive areas.	-	PGWC	R300 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP004	Kromme Rhee Road	Upgrade to dual carriageway with shoulders replacement of level crossing at Koelenhof Station with road over rail bridge.	-	PGWC	R450 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP005	R44	Provide a left turn slip along van Reede Road. Extend existing right turn lane along R44 northbound.	-	Internal	R145 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP006	R44	Extend the existing right turn lane along the R44 northbound and widen the carriageway. Provide left turn slip and acceleration lane for left turning traffic on Merriman Street. Provide a left-turning slip and additional lane from Dennesig to Merriman southbound.	-	Internal	R600 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP007	Bottelary Road	Upgrade Bottelary Rd to dual carriageway between Devonvale Road and R30New roundabout proposed at intersection with Devonvale Road.	-	PGWC	R3 000 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP008	R44/R310	Provide a left turn slip lane on the R44 southbound and upgrade Helshoogte westbound to left turn through and double right turn lanes.	-	Internal	R800 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP009	Adam Tas	Realign Alexander Road to form the 4th leg opposite Adam Tas Road southbound.	-	PGWC	R0,00
Roads and Stormwater	Roads Master Plan	2018	SRMP010	R44	Grade Seration of intersection with free flow on the R44	-	PGWC	R1 500 000,00
Roads and Stormwater	Roads Master Plan	2018	SRMP011	R44	Grade Seration of intersection with free flow on the R44	-	PGWC	R600 000,00

Annexure B: Long-Term Financial Plan

8 Purpose and Scope

The purpose of this Long-Term Financial Plan (LTFP) is to provide a comprehensive financial roadmap that supports the Municipality's strategic objectives and service delivery mandate over a ten-year period. The LTFP outlines the financial implications of the Municipality's operating and capital expenditure requirements, the funding mix, and the potential impact on rates and taxes.

The LTFP covers the period from 2024 to 2033 and is intended to be a living document that is updated annually to reflect any changes in the Municipality's financial position, priorities, or strategic objectives. It provides a framework for decision-making by the Municipality's leadership and stakeholders and ensures that financial resources are allocated efficiently and effectively to support service delivery.

The LTFP incorporates historic financial data, assumptions, and key performance indicators to model the Municipality's future financial position. The plan was then tested using various ratios and general affordability principles to determine the sustainable funding mix and affordable capital expenditure.

8.1 Assumptions

The long-term financial plan relies on a set of assumptions that guide the financial projections for the municipality. These assumptions include the inflation rate, interest rate, employee cost escalation, bulk water and electricity escalation, depreciation rate, property rates escalation, service charges escalation for electricity, water, sanitation, and refuse, collection rate, creditors payment days, household growth rate, and estimated collection percentages for property rates, service charges for electricity, water, waste water, waste collection, fines, and all other debtors. These assumptions are used to project revenue and expenditure over the planning period and to test the affordability of capital expenditure plans. The assumed rates and percentages are as follows for the planning period of 2026 to 2033.

Table 8-1: LTFP Assumptions

Description	Unit	2027	2028	2029	2030	2031	2032	2033
Inflation Rate	%	4.70	4.70	4.70	4.70	4.70	4.70	4.70
Interest Rate	%	9.75	9.75	9.75	9.75	9.75	9.75	9.75
Employee Cost Escalation	%	4.70	4.70	6.00	6.50	6.00	8.00	8.00
Bulk Water Escalation	%	6.00	6.00	6.00	6.00	6.00	6.00	6.00
Bulk Electricity Escalation	%	4.70	4.70	4.70	4.70	4.70	4.70	4.70
Depreciation Rate	%	3.44	3.44	3.44	3.44	3.44	3.44	3.44
Property Rates Escalation	%	15.00	4.70	4.70	4.70	4.70	4.70	4.70
Service Charges Escalation - Electricity	%	4.70	4.70	4.70	4.70	4.70	4.70	4.70
Service charges Escalation - Water	%	6.00	6.00	6.00	6.00	6.00	6.00	6.00
Service charges Escalation - Sanitation	%	6.00	6.00	6.00	6.00	6.00	6.00	6.00
Service charges Escalation - Refuse	%	6.00	6.00	6.00	6.00	6.00	6.00	6.00
Creditors Payment Days	%	45.00	45.00	45.00	45.00	45.00	45.00	45.00
Household Growth Rate	%	2.00	2.00	2.00	2.00	2.00	2.00	2.00
Property Rates Collection	%	96.00	96.00	96.00	96.00	96.00	96.00	96.00
Services Charges - Electricity Collection	%	97.00	97.00	97.00	97.00	97.00	97.00	97.00
Services Charges - Water Collection	%	96.00	96.00	96.00	96.00	96.00	96.00	96.00
Services Charges - Waste Water Collection	%	96.00	96.00	96.00	96.00	96.00	96.00	96.00
Services Charges - Waste Collection	%	96.00	96.00	96.00	96.00	96.00	96.00	96.00
Fines Collection	%	25.00	25.00	25.00	25.00	25.00	25.00	25.00
All other debtors - not specified collection	%	100.00	100.00	100.00	100.00	100.00	100.00	100.00

The assumptions used to generate the LTFP (Long Term Financial Plan) are as follows:

- **Inflation Rate:** The inflation rate is assumed to be constant at 4.70% for all years from 2027 to 2033. This assumption is based on National Treasury Budget Guidelines.
- **Interest Rate:** The interest rate is also assumed to be constant at 9.75% for all years from 2027 to 2033. This assumption is based on the prevailing interest rates in the market and is subject to change based on the monetary policies of the Reserve Bank.
- **Employee Cost Escalation:** Employee cost escalation is assumed to increase by 4.70% in 2027 and 2028, and then increase to 6.00% in 2029 and 6.50% in 2030, and then increase to 8.00% in 2032 and remain constant at that rate in 2033. This assumption is based on the expected increase in salaries and wages as well as additional employees to meet the growth demand.
- **Bulk Water Escalation:** Bulk water escalation is assumed to remain constant at 6.00% for all years from 2027 to 2033. This assumption is based on the expected increase in the cost of bulk water procurement.
- **Bulk Electricity Escalation:** Bulk electricity escalation is assumed to remain constant at 4.70% for all years from 2027 to 2033. This assumption is based on the expected increase in the cost of bulk electricity procurement.
- **Depreciation Rate:** Depreciation rate is assumed to increase from 3.44% in 2027 and 2028 to 4.00% in 2029 and remain constant at that rate to 2033. This assumption is based on the planned capital expenditure.
- **Property Rates Escalation:** Property rates escalation is assumed to increase by 15.00% in 2027 and then remain constant at 4.70% for all years from 2028 to 2033. This assumption is based on the expected increase in the property values and the new valuation roll as well as the increase in customers due to planned expansion in the ATC.
- **Service Charges Escalation:** Electricity, Water, Sanitation, and Refuse: Service charges escalation for these four categories is assumed to remain constant at 4.70% and 6.00% for all years from 2027 to 2033, respectively. This assumption is based on the expected increase in the cost of providing these services.
- **Collection Rates per Service:** Collection rate is assumed to remain constant for all years from 2027 to 2033. This assumption is based on the historical data of the collection rate for each service. Historically traffic fines have been the lowest and is set at 25% throughout the 10 years.
- **Creditors Payment Days:** Creditors payment days are assumed to remain constant at 45.00 days for all years from 2027 to 2033. This assumption is based on the expected payment terms with suppliers. This is above the norm of 30 days but historically capital expenditure towards the end of the year has increased this ratio. It is expected the trend will continue.
- **Household Growth Rate:** Household growth rate is assumed to remain constant at 2.00% for all years from 2027 to 2033. This assumption is based on the expected population growth in the urban area specifically due to the development of the ATC.

8.2 Financial Ratios

Table 8-2: LTFP Financial Ratios

		YEAR 1 - 3			YEAR 4 - 10						
Ratio	Norm	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033
Asset Management/ Utilisation											
Capital Expenditure to Total Expenditure	10-20%	18.06	19.27	15.70	12.34	13.03	14.75	14.03	13.37	12.69	12.07

Revenue Growth	>= 5%	8.02	8.51	8.71	7.54	6.13	7.04	6.47	6.42	6.44	6.47
Revenue Growth (Excluding capital grants)	>= 5%	9.23	9.42	9.14	7.39	6.68	6.60	6.69	6.62	6.63	6.64
Expenditure Management											
Creditors Payment Period (Trade Creditors)	<= 30 days	45.00	45.00	45.00	45.00	45.00	45.00	45.00	45.00	45.00	45.00
Remuneration as % of Total Operating Expenditure	25-40%	28.40	28.40	25.87	25.77	25.53	25.56	25.66	25.71	26.13	26.63
Contracted Services % of Total Operating Expenditure	2-5%	12.80	12.70	10.80	10.05	9.96	9.85	9.73	9.63	9.50	9.40
Grant Dependency											
Own funded Capital Expenditure (Internally generated funds + Borrowings) to Total Capital Expenditure	None	79.29	84.31	75.00	75.00	80.00	80.00	80.00	80.00	80.00	80.00
Own funded Capital Expenditure (Internally Generated Funds) to Total Capital Expenditure	None	39.42	50.17	40.24	50.00	55.00	55.00	60.00	65.00	80.00	80.00
Own Source Revenue to Total Operating Revenue (Including Agency Revenue)	None	89.63	90.28	89.74	90.00	90.18	90.36	90.54	90.71	90.88	91.04

Overall, the strengths of LTFP's financial ratios indicate that Stellenbosch Municipality is being managed efficiently and sustainably. Some notes regarding the LTFP and calculated financial ratios:

- Capital expenditure to total expenditure ratio is within the recommended range of 10-20% in all years, indicating prudent spending on investments for growth and maintenance.

- Collection rate of service charges is consistently above the recommended level of $\geq 95\%$, indicating efficient debtors' management.
- Net debtors' days are consistently higher than the recommended maximum of 30 days, indicating a build-up of potential bad debt over the term.
- Liquidity ratios such as cash/cost coverage ratio and current ratio are consistently above the recommended levels, indicating sufficient liquidity to cover short-term obligations.
- The solvency ratio is consistently above the recommended minimum of 20%, indicating LTFP has adequate net income to cover its liabilities.
- Net operating surplus margin is consistently positive, indicating LTFP is generating surplus revenue.
- Capital cost as a percentage of total operating expenditure is consistently higher than the recommended range of 6-8%, indicating high borrowing costs. However, the debt to revenue ratio is remains below the recommended maximum of 45%, indicating that borrowings remain within the norm.
- Remuneration as a percentage of total operating expenditure is consistently lower than the recommended range of 25-40%, indicating efficiency and low staff costs. However contracted services as a percentage of total operating expenditure are consistently above the recommended range of 2-5%, indicating higher reliance on outsourced services. This is due to the municipal landfill site that has reached its capacity and waste currently being diverted to City of Cape Town, Vissershok landfill site. This is an interim measure whilst the municipality is expanding the existing landfill site by adding a new cell.
- Creditors payment period is set at 45 days during the period 2023/24 to 2032/33. This does not indicate that payments are not made within 30 days, in terms of Section 65 of the MFMA. Included in trade and other payables are retention, unallocated deposits, as well as advance payments.
- Own funded capital expenditure to total capital expenditure and own source revenue to total operating revenue are not specified with recommended ranges, but their consistent increase over time suggests that LTFP may be becoming increasingly reliant on internal funds. Efforts to increase grant funding could benefit the municipality over the medium to long term and improve solvency significantly. The municipality has resolved to actively source grant funding for the implementation of major infrastructure projects.

8.3 Long-term Financial Plan

Financial Performance

Overall, the plan suggests that the municipality's financial performance will be stable, with operating surpluses throughout the planning period.

Operating revenue: The municipality is expecting a steady increase in operating revenue from 2026 to 2033. However, the rate of increase is slowing down in the later years. Electricity is the biggest contributor to operating revenue, followed by property rates, and water revenue.

Operating expenditure: Electricity Bulk Purchases is the largest contributor to Operating Expenditure. Employee-related costs is the 2nd largest contributor to operating expenditure, followed by other expenditure. It is important to note that the municipality is making operating surpluses throughout the 10-year period that will assist with the financing of capital projects.

Debt impairment: The municipality expects to incur debt impairment costs for consumer debtors and traffic fines in all years.

Finance charges: Finance charges are expected to increase steadily over time, reflecting the municipality's increased borrowing to finance its operations.

Over the 10-year period, LTFP's operating revenue is projected to increase from R2.82 billion in 2024 to R4.3 billion in 2033, representing an annual compounded growth rate of 7.3%. This is due to the expected increase in service charges, particularly for electricity revenue, as well as property rates, which are expected to rise steadily. LTFP's operating expenditure is projected to increase from R2.26 billion in 2024 to R4.02 billion in 2033, representing an annual compounded growth rate of 6.6%. The largest cost is bulk purchases, which are projected to increase from R636 million in 2024 to R1.5 billion in 2033. Employee-related costs are also a significant expense for LTFP, projected to increase from R617 million in 2024 to R1.03 billion in 2033.

Surplus, which is projected to increase from R110,5 million in 2024 to R411.5 million in 2033, represents an annual compounded growth rate of 15.72%.

Assets: The calculated total asset book value of the municipality is R9.1 billion at the end of the 2033 financial year. The largest asset category is property, plant, and equipment, which makes up 81% of the total assets compared to 84% in 2024.

Liabilities: The total liabilities of the municipality are R2.5 billion. The largest liability category is financial liabilities, which makes up 75% of the total liabilities. This suggests that the municipality has borrowed a significant amount of money to fund its capital expenditures. This is expected as long-term debt can provide the necessary funding for projects, as long as it remains affordable.

Equity: The equity of the municipality is R8 billion at the end of LTFP, indicating a strong financial position. Since equity represents the residual interest in the assets of the municipality after deducting its liabilities, a higher equity value suggests that the municipality has fewer liabilities to pay off. This implies that the municipality's LTFP has sufficient revenue to cover its expenses and debts and investing in infrastructure. A strong equity position provides comfort with regards to sustainable future as it indicates the municipality's ability to withstand financial shocks and continue operating in the long term.

Overall, the balance sheet provides useful insights into the financial position of the municipality. While the municipality has a significant amount of assets, it also has a significant amount of long-term debt, which will need to be managed carefully to maintain a strong financial position.

NET CASH FROM/(USED) FINANCING ACTIVITIES	150,589	129,220	84,051	(8,753)	35,070	21,145	(24,147)	(55,466)	(168,214)	(164,450)
NET INCREASE/ (DECREASE) IN CASH HELD	56,484	(18,238)	(31,665)	52,238	69,909	22,843	18,586	36,188	(37,522)	16,468
Cash/cash equivalents at the year begin:	208,950	265,434	247,197	215,532	267,770	337,679	360,522	379,108	415,296	377,775
Cash/cash equivalents at the year end:	265,434	247,197	215,532	267,770	337,679	360,522	379,108	415,296	377,775	394,242

Net cash generated or used by operating activities: This is a key metric used to evaluate financial performance and in the case of the LTFP we see a gradual upward trend (positive) In the cash flows from operations, even when accounting for anticipated inflation at 4.7%. It is important to adjust the values for inflation to determine the real growth and trend of net cash from operating activities. Inflation reduces the purchasing power of money over time, so if net cash from operating activities grows at a rate lower than the inflation rate, it points to sustainability issues.

Net cash used by investing activities: LTFP Indicates that the municipality Intends to spend between R500 million and R579 million on assets amounting to R5.3 billion over the 10 year planning period. Borrowings of R1.1 billion over the same period represents 20% gearing ratio on new assets.

Net cash from financing activities: Initial borrowings in the first 8 years of the LTFP with net repayment in 2032 and 2033. Overall, the cash flows from financing activities is supporting the improvement in solvency.

Capital Expenditure Framework

2023/24

8.4	MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK 2023/2024-2025/2026
-----	--

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance and Compliance

22 March 2023 & 29 March 2023

1. SUBJECT: MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK 2023/2024-2025/2026

2. PURPOSE

The purpose of this report is as follows:

- a) The Executive Mayor to table the Medium-Term Revenue and Expenditure Framework (inclusive of property rates charges and taxes, tariffs and service charges), annexures and proposed amendments to the budget related policies and other policies to Council for approval in terms of Section 16(2) of the Municipal Finance Management Act, (Act 56 of 2003).
- b) That Council specifically note and consider the need to take up external loans to fund critically needed refurbishment of infrastructure to the amount of R560 million of which over the MTREF R200 million will be required in year one, R200 million in year two and R160 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirms draft approval of same in order for the Chief Financial Officer to attend to the necessary legislative requirements.

3. DELEGATED AUTHORITY

FOR APPROVAL BY MUNICIPAL COUNCIL

EXECUTIVE SUMMARY

BUDGET

Attached as **APPENDIX 1** is an executive summary by the Accounting Officer.

4. RECOMMENDATIONS

- (a) that the Draft High Level Budget Summary, as set out in APPENDIX 1 – PART 1 – SECTION C; be approved for public release;
- (b) that the Draft Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in **APPENDIX 1** – PART 1 – SECTION D, be approved for public release;
- (c) that the proposed Grants-In-Aid allocations as set out in **APPENDIX 1** – PART 2 – SECTION J, be approved for public release;
- (d) that the three-year Capital Budget for 2023/2024, 2024/2025 and 2025/2026, as set out in **APPENDIX 1** – PART 2 – SECTION N, be approved for public release;
- (e) that the proposed draft rates on properties in WCO24, tariffs, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in **APPENDIX 3**, be approved for public release;
- (f) that the proposed amendments to existing budget related policies and other policies as set out in **APPENDICES 5 - 34**, be approved for public release.

-
- (g) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R560 millions of which R200 million will be required in year one, R200 million in year two and R160 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;
 - (h) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially; and
 - (i) that Council takes note of MFMA circulars 122 and 123 that was published to guide the MTREF for 2023/2024 to 2025/2026 as set out in APPENDICES 35 – 36.

5. DISCUSSION / CONTENTS

5.1 Background/ Legislative Framework

Section 16 of the MFMA states that:

- (1) The council of a municipality must for each financial year approve an annual budget for the municipality before the start of that financial year.
- (2) In order for a municipality to comply with subsection (1), the mayor of the municipality must table the annual budget at a council meeting at least 90 days before the start of the budget year.

Furthermore, section 17 of the MFMA states that:

- (1) An annual budget of a municipality must be a schedule in the prescribed format-
 - a) setting out realistically anticipated revenue for the budget year from each revenue source;
 - b) appropriating expenditure for the budget year under the different votes of the municipality;
 - c) setting out indicative revenue per revenue source and projected expenditure by vote for the two financial years following the budget year;
 - d) setting out-
 - i. estimated revenue and expenditure by vote for the current year;
 - ii. actual revenue and expenditure by vote for the financial year preceding the current year.

5.2 Discussion

This MTREF budget is being tabled during a difficult domestic and global economic environment. Domestically, load-shedding has become more persistent and prolonged, impacting on service delivery and threatening the survival of many businesses. Households are under pressure from the rising cost of living, and unemployment remains stubbornly high.

The Finance Minister, in the *Medium-Term Budget Policy Statement* (MTBPS), indicated South Africa is prioritising stable and clear policies that promote economic growth and fiscal health in the midst of an uncertain outlook.

The pursuit of higher growth remains anchored on the following three pillars:

- Firstly, ensuring a stable macroeconomic framework to create a conducive environment for savings, investment and growth.
- Secondly, implementing growth-enhancing reforms in key sectors, particularly in energy and transport.
- And thirdly, strengthening the capacity of the state to deliver quality public services, invest in infrastructure and fight crime and corruption.

Fiscal Strategy

The 2023 Medium Term Budget Policy Statement (MTBPS) sets the course for a fiscal consolidation strategy consisting of the following measures:

- Reduction in fiscal deficit without resorting to tax increases or further cuts in the social wage and infrastructure;
- Achieving a primary fiscal surplus in the current financial year, and maintaining it over the medium term;
- Considering a consolidated position, which includes debt-service costs.
- The consolidated fiscal deficit is projected at 4.2 per cent of GDP for 2022/23, and this will reach 3.2 per cent in 2025/26. (These figures include the impact of the partial take-over of Eskom debt amounting to R254 billion)
- Due to this Eskom debt relief, government debt will stabilise at a higher level of 73.6 per cent of GDP and in 2025/26.
- Government debt is high and as such the debt-service costs as a per cent of main budget revenue will increase from 18 per cent in 2022/23 to 19.8 per cent in 2025/26. The gross debt stock is projected to increase from R4.73 trillion in 2022/23 to R5.84 trillion in 2025/26. Debt-service costs are projected to average R366.8 billion annually over the medium term, reaching R397.1 billion in 2025/26.

The risks to the fiscal outlook include a worsening of the economic outlook, a further weakening of the finances of state-owned companies, and an unaffordable public-service wage agreement. Difficult budgeting trade-offs must therefore be made as government continues exercising fiscal restraint.

Accordingly, government non-interest spending will be kept below the level of revenue into the future and will continue targeting the stabilisation of debt.

Economic Growth & Domestic Outlook

Since the 2022 Budget, global growth estimates for 2023 have been revised lower.

The International Monetary Fund projects global growth to slow from an estimated 3.4 per cent in 2022 to 2.9 per cent in 2023.

South Africa is expected to register better-than-expected GDP growth of 2.5 per cent in 2022, largely due to higher-than-expected agriculture and services sector growth in the third quarter.

Real GDP growth is now projected to average 1.4 per cent from 2023 to 2025, compared with 1.6 per cent in the 2022 MTBPS, as a result of persistent structural constraints especially power cuts, and a less supportive global environment.

Although output has recovered to pre-pandemic levels, the persistent scarring impact of the pandemic on employment and investment decisions continues to weigh on the recovery.

Risks to the global outlook include:

- Weaker-than-expected global growth, including the effects of monetary policy tightening in major economies.
- Further disruptions to global supply chains, renewed inflationary pressures, and constrained food and energy supplies stemming from the war in Ukraine.
- A sustained period of lower growth and elevated borrowing costs, which poses a threat to highly indebted countries.

The domestic outlook faces a range of risks, and include:

- Continued power cuts and a deterioration in port and rail infrastructure.
- Slow implementation of structural reforms could lower business confidence and deter new investment.
- Widespread criminal activity poses a threat to economic growth and national security.
- A deterioration of the fiscal outlook due to unfunded spending pressures or the materialisation of contingent liabilities could increase borrowing costs, and crowd out both private and public investment.

The key focus areas outlined in the Medium-Term Budget Policy Statement (MTBPS) is to enhance economic growth are as follows:

- Higher economic growth and a durable recovery in economic activity require a stable macroeconomic framework, complemented by rapid implementation of economic reforms and improved state capability;
- Government continues to provide a stable macroeconomic policy framework, underpinned by a flexible exchange rate, inflation targeting and sustainable fiscal policy, to encourage investment;
- Numerous reforms under way through Operation Vulindlela and the economic recovery plan. However, the most pressing reforms are required in electricity and freight rail
- Implementing urgent measures to reduce load shedding in the short term and transform the sector through market reforms to achieve long term energy security
National Energy Crisis Committee (NECOM) interventions include:
 - Improving Eskom's plant performance
 - Clearing regulatory obstacles by establishing a one stop shop to bring electricity onto the grid more rapidly. This will be supported by the Energy Security Bill, which removes regulatory impediments for independent power producers
 - Supporting the rollout of rooftop solar for households and businesses, including through tax incentives
 - Implementing a wheeling framework and grid capacity rules to provide certainty to private producers investing in energy projects.

-
- Several reforms are underway to support recovery in the transport sector, arrest the decline and increase the volume of freight rail. These include:
 - The Economic Regulation of Transport Bill, which will establish the transport regulator, has been tabled in Parliament and is now with the National Council of Provinces.
 - Software upgrades to increase efficiency through better signalling.
 - Steps to prevent theft and vandalism and resolving legal challenges in relation to locomotive procurement.
 - Granting third-party access to the rail network.
 - To facilitate competition and improve pricing, the operations and infrastructure management functions of Transnet Freight Rail are due to be separated by October 2023.
 - The 2023 Budget makes allocations towards infrastructure as well as crime and corruption, to ensure that public resources are used to lay the foundation for a more resilient economy.

The President of South Africa, in his State of the Nation Address (SONA), on the 9th February 2023 spoke about how our country has, for many months, endured a debilitating electricity shortage that has caused immense damage to our economy.

And for two years before that, our society was devastated by the COVID-19 pandemic that caused great loss of life and much hardship.

The pandemic worsened a situation of deep unemployment, as the country lost two million jobs. The pandemic negatively affected livelihoods and increased poverty. Now, persistent load-shedding is impeding our recovery from the effects of these events.

The most immediate task on the agenda for the year ahead is to drastically reduce the severity of loadshedding in the coming months, and ultimately end loadshedding altogether.

The President spoke about the issues concerning South Africa most is:

- Loadshedding;
- Unemployment;
- Poverty and rising cost of living; and
- Crime and corruption

The following focus areas were also highlighted, amongst others, during the State of Nation Address:

- National State of Disaster due to the electricity crises and its effects;
- Extreme weather events (drought, floods and wild fires);
- Climate change;
- Just Energy Transition Investment Plan (R1.5 trillion invested over 5-years into projects such as renewable energy, green hydrogen and electric vehicles);
- Major investments and developments in renewable energy which will create jobs and stimulate local economies;
- To conclude a social compact and work on a framework to enable joint action in key areas such as energy, transport and logistics, employment creation and skills development, investment and localization, social protection, crime and corruption;

-
- Covid-19 vaccinations;
 - Initiatives like the Solidarity Fund being mobilized to end gender-based violence and femicide, and to respond to the effects of climate change;
 - Develop master plans in sectors such as automotive, clothing and textiles, poultry, sugar, agriculture and global business services;
 - Reliable water supply (Department of Water and Sanitation is in the process of investing in major infrastructure projects);
 - Efficient transport and road infrastructure system;
 - National Rail policy to guide the modernization and reform of the rail sector, providing for third-party access to our rail network;
 - Challenges in the transportation of commuters on passenger rail;
 - A comprehensive turnaround plan is being implemented to streamline the process for water use license applications;
 - Building bridges;
 - Roll-out of 5G mobile networks and will reduce the cost of data;
 - Mobilising greater levels of investments;
 - Investment conference on 13 April 2023;
 - Unlocking investment in the hemp and cannabis sector;
 - Bounce-back loan scheme for companies that need finance to recover from the effects of the pandemic;
 - Employment Tax incentives has been expanded to address the challenge of youth unemployment;
 - Finalizing amendments to the business Act, 1991 (Act 71 of 1991) to reduce regulatory impediments for small, medium and micro enterprises (SMMEs) and co-operatives
 - Presidential Employment Stimulus in providing work and livelihood opportunities;
 - Rising cost of living that is deepening poverty and inequality;
 - Extension of the Social Relief of Distress (SRD) Grant;
 - Focus on eradicating the backlog in the processing of title deeds;
 - Strengthening the SAPS, improving the capacity of the NPA and courts to ensure perpetrators are brought to justice.

The President stated that poor performance of many local governments remain an area of concern. There are 163 out of 257 municipalities that are dysfunctional or in distress due to poor governance, ineffective and sometimes corrupt financial and administrative management and poor service delivery.

Government is implementing a number of interventions to address failures at local government level and improve basic service delivery.

Government interventions include:

- Enhancing the capacity of public representatives and officials;
- Maintaining and upgrading local infrastructure;
- Invoking the powers of national government to intervene where municipalities fail to meet their responsibilities;

- Integrity assessments will become a mandatory requirement for recruitment to the public service and entry exams will be introduced;
- Legislation will be amended to strengthen the role of the Public Service Commission to ensure that qualified people are appointed to senior management positions.

The Western Cape Premier in his State of the Province address, on 16th February 2023, reiterated the following sentiments highlighted during the State of the Nation Address, including but not limited to, the new National State of Disaster, the president to address the energy crises, establishing an oversight committee to monitor government expenditure related to the energy crises, economic growth recovery initiatives, unemployment / job creation (especially youth interventions), sustainable infrastructure development, educational infrastructure, health infrastructure, provision of housing (dignified living), agriculture, crime and safety, as well as campaigns against gender-based violence and femicide.

The Premiers' speech focused, amongst others, on the following areas:

- The new National State of Disaster due to the energy crises;
- Ensuring the citizens basic needs are protected (Water, Wifi and health);
- Renewable energy / green economy push
 - Drive to increase energy resilience, mitigate effects of loadshedding and potential of the power generation sector to stimulate growth and create employment opportunities.
- Municipal Energy Resilience plan
 - A local government-level programme that develops, supports and builds capacity at municipalities across our province to implement renewable energy projects.
 - Stellenbosch is working towards procuring energy from Independent Power Producers.
- Establishment of the Infrastructure Department
 - Aimed to further prioritise the importance of developing and maintaining critical infrastructure in the Western Cape
- Rapid School Build Programme (Education Infrastructure)
- Provision of housing opportunities
- Health infrastructure
- "Our Growth for Jobs" strategy
 - Radical drive to reduce unemployment
- Youth interventions
- Agriculture
- Crime & Safety
- SAPS Devolution
- Campaigns against Gender-based violence and femicide

Provincial treasury reiterated most of the challenges and focus areas highlighted in the Premier's State of the Province address, the SONA and the 2023 Budget Review.

National Treasury encourages municipalities to maintain tariff increases and adopt a tariff setting methodology at levels that reflects an appropriate balance between the affordability to poorer households and other customers, while ensuring the financial sustainability of the municipality. Municipalities must ensure that their budgets are funded from realistically anticipated revenues. This means that the municipality must refrain from assuming collection rates that are unrealistic and unattainable. The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. The municipalities must therefore generate sufficient revenue to fully recover their costs, deliver services to customers sustainably and invest in the infrastructure that promises local economic development.

The municipality's revenue is determined by setting a package of tariffs that is not only considered to be affordable to its ratepayers and the users of its services but deemed to be at fair and realistic levels.

Tariff increases by Eskom and Water Boards is above inflation and should be considered as such while determining cost reflective tariffs. In the instance of bulk tariff increases for electricity, municipalities are encouraged to apply for electricity tariff increases that reflect the total cost of providing the service, to ensure that they are working towards achieving fully cost-reflective tariffs that will assist them to achieve financial sustainability. Municipalities should consider the following facts during the tariff setting process, namely, the costs of bulk purchases and the fluctuation in the seasonal cost thereof; the consumption patterns to enable better demand planning and management; and in the event that municipalities have been under recovering costs, embark on a process to correct their tariff structures over a reasonable time period so that cost reflective tariffs are achieved, which in turn will result in financial sustainability.

Local government confronts tough fiscal choices in the face of financial and institutional problems that result in service-delivery breakdowns and unpaid bills. Municipalities can offset these trends by improving their own revenue collections, working more efficiently and implementing cost-containment measures. In order to maintain a funded budget, municipalities need to not only focus on tariff increases, but also focus on how to eliminate expenditure that is unnecessary. The Cost Containment Regulations were issued on 07 June 2019, as well as the municipality's Cost Containment Policy is embedded in the municipality's operations that assists in driving down costs, ensuring that value for money is achieved and resources of the municipality is used effectively, efficiently and economically.

Municipalities are required to consider the following during the compilation of the 2023/2024 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;
- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulation read with MFMA Circular No.82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates;
- Strictly control the use of costly water tankers and fix the water infrastructure to enable the sustainable provision of water;
- Priorities the filling of critical vacant posts, especially linked to the delivery of basic services; and
- Curbing consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

The aforementioned were taken into account during the compilation of the municipality's budget.

The application of sound financial management principles for the compilation of the Stellenbosch's financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities. The municipality's business and service delivery priorities were reviewed as part of this year's planning, through the Integrated Development Plan (IDP), and the annual budget process.

Funds were shifted from low to high priority programmes so as to maintain sound financial stewardship. A critical review was also undertaken on non-core and 'nice to have' items with regards to expenditure. The municipality has embarked on developing a revenue enhancement strategy to optimize revenue, including the collection of debt owed by consumers. Furthermore, the municipality has undertaken various customer care initiatives to ensure the municipality truly involves all citizens in the process of ensuring a people lead government.

The main challenges experienced during the compilation of the 2023/2024 MTREF can be summarized as follows:

- The on-going difficulties in the national and local economy;
- National State of Disaster – Electricity crises / Load shedding;
- Aging infrastructure;
- The need to reprioritise projects and expenditure within the existing resource envelope;
- The increased cost of bulk electricity and procuring water inventory, which is placing upward pressure on service tariffs to residents. Continuous high tariff increases are not sustainable - as there will be point where services will no-longer be affordable;
- Attracting economic investment;
- Water Conservation;
- Reductions in allocations of some of the National and Provincial grants due to a worsening fiscal outlook;
- Limited resources to deal with all key priorities;
- Decline in reserves available to fund capital programmes.

The following budget principles and guidelines directly informed the compilation of the 2023/2024 MTREF:

- Integrated Development Plan was used to inform the measurable objectives, targets and backlog eradication goals;
- Tariff and property rate increases should be as affordable as possible and should ideally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality. However, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- National, provincial and local priorities;
- Headline inflation forecasts; and
- Funding choices and modelling.

The Integrated Development Plan (IDP) were used as a guiding strategic document to inform the budget compilation. The challenge however is still to deliver services more efficiently and effectively with the tight financial envelope.

Stellenbosch municipality's revenue strategy was based on the following fundamentals, namely, tariff policies of the municipality, economic outlook and development for Stellenbosch and surrounding areas, National Treasury's guidelines and macroeconomic policy, National, Provincial and Regional fiscal growth rates and electricity tariffs as approved by National Electricity Regulator of South Africa (NERSA).

The financial resources to fund the Operational Budget will and must consist of realistically anticipated revenue generated from property taxes, service charges and other income. The municipality were mindful of the estimated headline inflation for 2023/2024 of between 3% to 6% forming the basis of the extensive income modelling exercise, but also taking into account the principles of economical services that are cost reflective, trading services generating surpluses, the effect of escalating salary costs and bulk purchases. Inflation is forecast to fluctuate around 5.2% over the medium term in line with moderating inflation expectations.

The national budget focuses on fiscal consolidation. This means that we as municipalities must ensure that we do not borrow beyond our ability to repay and we do not spend money we do not have, until we ignite growth and generate revenue, we have to be tough on ourselves.

It is expected that fuel prices will increase substantially in the next financial year and this will be provided for in the budget.

The total budget quantum for the 2023/2024 year is R2 777 816 062 of which R2 276 266 197 (82%), is allocated to the operating budget and R501 549 865 (18%) to capital investment.

Budget documentation in line with the budget and reporting regulations is attached as **APPENDIX 1 – PART 1**. The report serves as an overview of the budget as a whole, budget assumptions used to compile the budget, funding sources used to fund the capital budget, different income categories to fund priorities of the municipalities, as well as the different expenditure items, including non-cash items.

DRAFT CAPITAL BUDGET 2023/2024 – 2025/2026

The draft capital budget is infrastructure orientated and addresses the huge backlog and urgent need to upgrade/refurbish Council's infrastructure as addressed by the different master plans. It is directed by the IDP (Integrated Development Plan) and the needs of the community. It's also aligned to the strategic priority in the State of the Nation Address of Infrastructure investment and the "back to basics" approach. Council's attention is however drawn to the fact that not all needs identified by the community can realistically be funded by the municipality. Critical and committed programmes/projects were the focal point for the capital budget.

The main capital projects that the municipality will be investing in, include:

- Expansion of the landfill site (New cells)
- Landfill Gas To Energy
- Alternative Energy
- Bien don 66/11kV substation new
- Electricity Network: Pniel
- Electrification INEP
- General Systems Improvements - Stellenbosch
- Kayamandi(Costa grounds)new substation 11 kV switching station
- Laterra Substation

-
- Bulk Water Supply Pipe and Reservoir: Kayamandi
 - Bulk Water Supply Pipeline & Reservoir – Jamestown
 - New Reservoir & Pipeline: Vlottenburg
 - Upgrade of WWTW Wemmershoek
 - Upgrade of WWTW: Klapmuts
 - Lanquedoc Access road and Bridge
 - Khayamandi Pedestrian Bridge (R304, River and Railway Line)
 - Bird Street Dualling - Adam Tas to Kayamandi
 - Main Road Intersection Improvements: Franschoek
 - Adam Tas - Technopark Link Road

The detailed draft capital budgets for 2023/2024, 2024/2025 and 2025/2026 are attached as **APPENDIX 1**.

DRAFT OPERATING BUDGET 2023/2024 – 2025/2026

The basis of the operating budget is aligned to the principle of total potential income from all our services as well as a projection of total direct income. The extent, to which tariffs and levies are proposed to increase, is in the main influenced by:

- The increase in bulk purchases (electricity)
- Employee related costs, as per SALGBC wage agreement
- Councillor remuneration, as per SALGA upper limits
- Service delivery challenges
- Repairs and maintenance
- Operational projects impacting job creation and economic development
- Contractual commitments
- Day to day operational costs (fuel & oil, telephones, bank costs, etc)
- Finance costs, influenced by level of borrowing

Taking all of these issues into consideration and to ensure the sustainability of our operations from realistically anticipated income flows, the following tariff and property tax increases are proposed for 2023/2024:

Electricity	17.61%
Sanitation	6.50%
Refuse removal	9.10%
Water	5.50%
Rates	7.50%

The impact of the proposed tariff increases on the monthly services account for the various consumer categories is summarized in **APPENDIX 2**.

HIGH LEVEL CAPITAL AND OPERATING BUDGET FOR 2023/2024 – 2025/2026

The draft high level budget depicting the total budget is attached as **APPENDIX 1 – PART 1 – SECTION C**.

TARIFFS

Council's attention is further drawn to the fact that the Tariff List attached as **APPENDIX 3** includes Sundry Tariffs as a basket of services and charges, i.e. Land Use Management Fees, Development contributions, Technical Charges, etc. In this regard, the proposed tariff list must be consulted for the detail.

BUDGET RELATED POLICIES & BY-LAWS

A summary of changes to budget related policies is attached as **APPENDIX 4**

The following budget related policies are new:

Infrastructure Asset Unbundling Policy 2023-2024 (**APPENDIX 5**)

Pool Vehicle Policy 2023-2024 (**APPENDIX 6**)

The following budget related policies and by-laws were revised:

Borrowing, Funds and Reserves Policy (**APPENDIX 7**)

Budget Implementation and Monitoring Policy (**APPENDIX 8**)

Cash Management and Investment Policy (**APPENDIX 9**)

Credit Control and Debt Collection Policy (**APPENDIX 10**)

Development Charges Policy (**APPENDIX 11**)

Grants-In-Aid Policy (**APPENDIX 12**)

Indigent Policy (**APPENDIX 13**)

Irrecoverable Debt Policy (**APPENDIX 14**)

Rates Policy (**APPENDIX 15**)

Supply Chain Management Policy (**APPENDIX 16**)

Travel and Subsistancy Policy (**APPENDIX 17**)

Virementation Policy (**APPENDIX 18**)

Ward Allocation Policy (**APPENDIX 19**)

Unchanged Policies

Accounting Policy (**APPENDIX 20**)

Asset Management Policy (**APPENDIX 21**)

Cost Containment Policy (**APPENDIX 22**)

Inventory Management Policy (**APPENDIX 23**)

Liquidity Policy (**APPENDIX 24**)

Preferential Procurement Policy (**APPENDIX 25**)

Petty Cash Policy (**APPENDIX 26**)

Credit Control and Debt Collection By- Law (**APPENDIX 27**)

Special Ratings Area Policy (**APPENDIX 28**)

Special Ratings By-law (**APPENDIX 29**)

Tariff By-law (**APPENDIX 30**)

Tariff Policy (**APPENDIX 31**)

Rates By-Law (**APPENDIX 32**)

Financing of External Bodies performing municipal functions Policy (**APPENDIX 33**)

Wayleave Policy (**APPENDIX 34**)

OTHER SUPPORTING DOCUMENTATION

The additional information as prescribed by the budget and reporting regulations are attached as **APPENDIX 1 – PART 2 – SECTION P**.

5.3 Financial Implications

Financial impact already discussed above.

5.4 External Loan for 2023/2024

That Council specifically note and consider the need to take up external loans to fund critically needed refurbishment of infrastructure to the amount of R560 million of which over the MTREF R200 million will be required in year one, R200 million in year two and R160 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary).

5.5 Legal Implications**Legal Services**

The item at my disposal is compliant with the relevant legislative framework.

5.6 Staff Implications

None

5.7 Previous / Relevant Council Resolutions:**5.8 Risk Implications**

None

6. Comments from Senior Management:**6.1 Director: Infrastructure Services**

Noted

6.2 Director: Planning and Development Services

Noted

6.3 Director: Community and Protection Services:

Noted

6.4 Director: Corporate Services:

Noted

6.5 Chief Financial Officer:

Noted

6.6 Municipal Manager:

Noted.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-03-22: ITEM 6.4

- (a) that the Draft High Level Budget Summary, as set out in APPENDIX 1 – PART 1 – SECTION C; be approved for public release;
- (b) that the Draft Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in **APPENDIX 1 – PART 1 – SECTION D**, be approved for public release;
- (c) that the proposed Grants-In-Aid allocations as set out in **APPENDIX 1 – PART 2 – SECTION J**, be approved for public release;
- (d) that the three-year Capital Budget for 2023/2024, 2024/2025 and 2025/2026, as set out in **APPENDIX 1 – PART 2 – SECTION N**, be approved for public release;
- (e) that the proposed draft rates on properties in WCO24, tariffs, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in **APPENDIX 3**, be approved for public release;
- (f) that the proposed amendments to existing budget related policies and other policies as set out in **APPENDICES 5 - 34**, be approved for public release.
- (g) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R560 millions of which R200 million will be required in year one, R200 million in year two and R160 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;
- (h) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially; and
- (i) that Council takes note of MFMA circulars 122 and 123 that was published to guide the MTREF for 2023/2024 to 2025/2026 as set out in APPENDICES 35 – 36.

APPENDIX 1

STELLENBOSCH MUNICIPALITY

**MEDIUM TERM REVENUE AND
EXPENDITURE FRAMEWORK FOR THE
FINANCIAL PERIOD
2023/2024 TO 2025/2026**

Vision:

We describe the vision of where we want to be as a Municipality and the Greater Stellenbosch area as the

“An Integrated Valley of Opportunity and Innovation”

Mission:

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community.

Our Values

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the Municipality in an honest and ethical manner.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding to give an account of our actions to individuals, groups and organisations.

Transformation: We, as custodians of hope, will work tirelessly at transforming our Municipality, communities and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness: The municipality to be a responsive municipal entity with zero tolerance for corruption and illegal actions.

PART A

A: RESOLUTIONS

It is recommended to Council,

- a) that the Draft High Level Budget Summary, as set out in APPENDIX 1 – PART 1 – SECTION C; be approved for public release and comment;
- b) that the Draft Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in APPENDIX 1 – PART 1 – SECTION D, be approved for public release and comment;
- c) that the proposed Grants-In-Aid allocations as set out in APPENDIX 1 – PART 2 – SECTION J, be approved for public release and comment;
- d) that the three-year Capital Budget for 2023/2024, 2024/2025 and 2025/2026, as set out in APPENDIX 1 – PART 2 – SECTION N, be approved for public release and comment;
- e) that the proposed draft rates on properties in WCO24, tariffs, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in APPENDIX 3, be approved for public release and comment;
- f) that the proposed amendments to existing budget related policies and other policies as set out in APPENDICES 4 - 34, be approved for public release and comment.
- g) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R575 millions of which R200 million will be required in year one, R200 million in year two and R175 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;
- h) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially; and
- i) that Council takes note of MFMA circulars 122 and 123 that was published to guide the MTREF for 2023/2024 to 2025/2026 as set out in APPENDICES 35 – 36.

B: EXECUTIVE SUMMARY

This MTREF budget is being tabled during a difficult domestic and global economic environment. Domestically, load-shedding has become more persistent and prolonged, impacting on service delivery and threatening the survival of many businesses. Households are under pressure from the rising cost of living, and unemployment remains stubbornly high.

The Finance Minister, in the *Medium Term Budget Policy Statement* (MTBPS), indicated South Africa is prioritising stable and clear policies that promote economic growth and fiscal health in the midst of an uncertain outlook.

The pursuit of higher growth remains anchored on the following three pillars:

- Firstly, ensuring a stable macroeconomic framework to create a conducive environment for savings, investment and growth.
- Secondly, implementing growth-enhancing reforms in key sectors, particularly in energy and transport.
- And thirdly, strengthening the capacity of the state to deliver quality public services, invest in infrastructure and fight crime and corruption.

Fiscal Strategy

The 2023 Medium Term Budget Policy Statement (MTBPS) sets the course for a fiscal consolidation strategy consisting of the following measures:

- Reduction in fiscal deficit without resorting to tax increases or further cuts in the social wage and infrastructure;
- Achieving a primary fiscal surplus in the current financial year, and maintaining it over the medium term;
- Considering a consolidated position, which includes debt-service costs.
- The consolidated fiscal deficit is projected at 4.2 per cent of GDP for 2022/23, and this will reach 3.2 per cent in 2025/26. (These figures include the impact of the partial take-over of Eskom debt amounting to R254 billion)
- Due to this Eskom debt relief, government debt will stabilise at a higher level of 73.6 per cent of GDP and in 2025/26.
- Government debt is high and as such the debt-service costs as a per cent of main budget revenue will increase from 18 per cent in 2022/23 to 19.8per cent in 2025/26. The gross debt stock is projected to increase from R4.73 trillion in 2022/23 to R5.84 trillion in 2025/26. Debt-service costs are projected to average R366.8 billion annually over the medium term, reaching R397.1 billion in 2025/26.

The risks to the fiscal outlook include a worsening of the economic outlook, a further weakening of the finances of state-owned companies, and an unaffordable public-service wage agreement. Difficult budgeting trade-offs must therefore be made as government continues exercising fiscal restraint.

Accordingly, government non-interest spending will be kept below the level of revenue into the future, and will continue targeting the stabilisation of debt.

Economic Growth & Domestic Outlook

Since the 2022 Budget, global growth estimates for 2023 have been revised lower. The International Monetary Fund projects global growth to slow from an estimated 3.4 per cent in 2022 to 2.9 per cent in 2023. South Africa is expected to register better-than-expected GDP growth of 2.5 per cent in 2022, largely due to higher-than-expected agriculture and services sector growth in the third quarter.

Real GDP growth is now projected to average 1.4 per cent from 2023 to 2025, compared with 1.6 per cent in the 2022 MTBPS, as a result of persistent structural constraints especially power cuts, and a less supportive global environment.

Although output has recovered to pre-pandemic levels, the persistent scarring impact of the pandemic on employment and investment decisions continues to weigh on the recovery.

Risks to the global outlook include:

- Weaker-than-expected global growth, including the effects of monetary policy tightening in major economies.
- Further disruptions to global supply chains, renewed inflationary pressures, and constrained food and energy supplies stemming from the war in Ukraine.
- A sustained period of lower growth and elevated borrowing costs, which poses a threat to highly indebted countries.

The domestic outlook faces a range of risks, and include:

- Continued power cuts and a deterioration in port and rail infrastructure.
- Slow implementation of structural reforms could lower business confidence and deter new investment.
- Widespread criminal activity poses a threat to economic growth and national security.
- A deterioration of the fiscal outlook due to unfunded spending pressures or the materialisation of contingent liabilities could increase borrowing costs, and crowd out both private and public investment.

The key focus areas outlined in the Medium-Term Budget Policy Statement (MTBPS) is to enhance economic growth are as follows:

- Higher economic growth and a durable recovery in economic activity require a stable macroeconomic framework, complemented by rapid implementation of economic reforms and improved state capability;
- Government continues to provide a stable macroeconomic policy framework, underpinned by a flexible exchange rate, inflation targeting and sustainable fiscal policy, to encourage investment;
- Numerous reforms under way through Operation Vulindlela and the economic recovery plan. However, the most pressing reforms are required in electricity and freight rail
- Implementing urgent measures to reduce load shedding in the short term and transform the sector through market reforms to achieve long term energy security National Energy Crisis Committee (NECOM) interventions include:
 - Improving Eskom's plant performance
 - Clearing regulatory obstacles by establishing a one stop shop to bring electricity onto the grid more rapidly. This will be supported by the Energy Security Bill, which removes regulatory impediments for independent power producers
 - Supporting the rollout of rooftop solar for households and businesses, including through tax incentives
 - Implementing a wheeling framework and grid capacity rules to provide certainty to private producers investing in energy projects
- Several reforms are underway to support recovery in the transport sector, arrest the decline and increase the volume of freight rail. These include:
 - The Economic Regulation of Transport Bill, which will establish the transport regulator, has been tabled in Parliament and is now with the National Council of Provinces.
 - Software upgrades to increase efficiency through better signaling.
 - Steps to prevent theft and vandalism and resolving legal challenges in relation to locomotive procurement.
 - Granting third-party access to the rail network.
 - To facilitate competition and improve pricing, the operations and infrastructure management functions of Transnet Freight Rail are due to be separated by October 2023.
- The 2023 Budget makes allocations towards infrastructure as well as crime and corruption, to ensure that public resources are used to lay the foundation for a more resilient economy.

The President of South Africa, in his State of the Nation Address (SONA), on the 9th of February 2023 spoke about how our country has, for many months, endured a debilitating electricity shortage that has caused immense damage to our economy. And for two years before that, our society was devastated by the COVID-19 pandemic that caused great loss of life and much hardship. The pandemic worsened a situation of deep unemployment, as the country lost two million jobs. The pandemic negatively affected livelihoods and increased poverty. Now, persistent load-shedding is impeding our recovery from the effects of these events.

The most immediate task on the agenda for the year ahead is to drastically reduce the severity of loadshedding in the coming months, and ultimately end loadshedding altogether.

The President spoke about the issues concerning South Africa most is:

- Loadshedding;
- Unemployment;
- Poverty and rising cost of living; and
- Crime and corruption

The following focus areas were also highlighted, amongst others, during the State Of Nation Address:

- National State of Disaster due to the electricity crises and its effects;
- Extreme weather events (drought, floods and wild fires);
- Climate change;
- Just Energy Transition Investment Plan (R1.5 trillion invested over 5-years into projects such as renewable energy, green hydrogen and electric vehicles);
- Major investments and developments in renewable energy which will create jobs and stimulate local economies;
- To conclude a social compact and work on a framework to enable joint action in key areas such as energy, transport and logistics, employment creation and skills development, investment and localization, social protection, crime and corruption;
- Covid-19 vaccinations;
- Initiatives like the Solidarity Fund being mobilized to end gender-based violence and femicide, and to respond to the effects of climate change;
- Develop master plans in sectors such as automotive, clothing and textiles, poultry, sugar, agriculture and global business services;
- Reliable water supply (Department of Water and Sanitation is in the process of investing in major infrastructure projects);
- Efficient transport and road infrastructure system;

- National Rail policy to guide the modernization and reform of the rail sector, providing for third-party access to our rail network;
- Challenges in the transportation of commuters on passenger rail;
- A comprehensive turnaround plan is being implemented to streamline the process for water use license applications;
- Building bridges;
- Roll-out of 5G mobile networks and will reduce the cost of data;
- Mobilising greater levels of investments;
- Investment conference on 13 April 2023;
- Unlocking investment in the hemp and cannabis sector;
- Bounce-back loan scheme for companies that need finance to recover from the effects of the pandemic;
- Employment Tax incentives has been expanded to address the challenge of youth unemployment;
- Finalizing amendments to the business Act, 1991 (Act 71 of 1991) to reduce regulatory impediments for small, medium and micro enterprises (SMMEs) and co-operatives
- Presidential Employment Stimulus in providing work and livelihood opportunities;
- Rising cost of living that is deepening poverty and inequality;
- Extension of the Social Relief of Distress (SRD) Grant;
- Focus on eradicating the backlog in the processing of title deeds;
- Strengthening the SAPS, improving the capacity of the NPA and courts to ensure perpetrators are brought to justice

The President stated that poor performance of many local governments remains an area of concern. There are 163 out of 257 municipalities that are dysfunctional or in distress due to poor governance, ineffective and sometimes corrupt financial and administrative management and poor service delivery.

Government is implementing a number of interventions to address failures at local government level and improve basic service delivery.

Government interventions include:

- Enhancing the capacity of public representatives and officials;
- Maintaining and upgrading local infrastructure;
- Invoking the powers of national government to intervene where municipalities fail to meet their responsibilities;
- Integrity assessments will become a mandatory requirement for recruitment to the public service and entry exams will be introduced;

- Legislation will be amended to strengthen the role of the Public Service Commission to ensure that qualified people are appointed to senior management positions.

The Western Cape Premier in his State of the Province address, on 16th February 2023, reiterated the following sentiments highlighted during the State of the Nation Address, including but not limited to, the new National State of Disaster, the president to address the energy crises, establishing an oversight committee to monitor government expenditure related to the energy crises, economic growth recovery initiatives, unemployment / job creation (especially youth interventions), sustainable infrastructure development, educational infrastructure, health infrastructure, provision of housing (dignified living), agriculture, crime and safety, as well as campaigns against gender-based violence and femicide.

The Premiers' speech focused, amongst others, on the following areas:

- The new National State of Disaster due to the energy crises;
- Ensuring the citizens basic needs are protected (Water, Wifi and health);
- Renewable energy / green economy push
 - Drive to increase energy resilience, mitigate effects of loadshedding and potential of the power generation sector to stimulate growth and create employment opportunities
- Municipal Energy Resilience plan
 - A local government-level programme that develops, supports and builds capacity at municipalities across our province to implement renewable energy projects.
 - Stellenbosch is working towards procuring energy from Independent Power Producers.
- Establishment of the Infrastructure Department
 - Aimed to further prioritise the importance of developing and maintaining critical infrastructure in the Western Cape
- Rapid School Build Programme (Education Infrastructure)
- Provision of housing opportunities
- Health infrastructure
- "Our Growth For Jobs" strategy
 - Radical drive to reduce unemployment
 - Youth interventions
 - Agriculture
- Crime & Safety
- SAPS Devolution
- Campaigns against Gender-based violence and femicide

Provincial treasury reiterated most of the challenges and focus areas highlighted in the Premier's State of the Province address, the SONA and the 2023 Budget Review.

National Treasury encourages municipalities to maintain tariff increases and adopt a tariff setting methodology at levels that reflects an appropriate balance between the affordability to poorer households and other customers, while ensuring the financial sustainability of the municipality. Municipalities must ensure that their budgets are funded from realistically anticipated revenues. This means that the municipality must refrain from assuming collection rates that are unrealistic and unattainable. The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. The municipalities must therefore generate sufficient revenue to fully recover their costs, deliver services to customers sustainably and invest in the infrastructure that promises local economic development. The municipality's revenue is determined by setting a package of tariffs that is not only considered to be affordable to its ratepayers and the users of its services but deemed to be at fair and realistic levels.

Tariff increases by Eskom and Water Boards is above inflation and should be considered as such while determining cost reflective tariffs. In the instance of bulk tariff increases for electricity, municipalities are encouraged to apply for electricity tariff increases that reflect the total cost of providing the service, to ensure that they are working towards achieving fully cost-reflective tariffs that will assist them to achieve financial sustainability. Municipalities should consider the following facts during the tariff setting process, namely, the costs of bulk purchases and the fluctuation in the seasonal cost thereof; the consumption patterns to enable better demand planning and management; and in the event that municipalities have been under recovering costs, embark on a process to correct their tariff structures over a reasonable time period so that cost reflective tariffs are achieved, which in turn will result in financial sustainability.

Local government confronts tough fiscal choices in the face of financial and institutional problems that result in service-delivery breakdowns and unpaid bills. Municipalities can offset these trends by improving their own revenue collections, working more efficiently and implementing cost-containment measures. In order to maintain a funded budget, municipalities need to not only focus on tariff increases, but also focus on how to eliminate expenditure that is unnecessary. The Cost Containment Regulations were issued on 07 June 2019, as well as the municipality's Cost Containment Policy is embedded in the municipality's operations that assists in driving down costs, ensuring that value for money is achieved and resources of the municipality is used effectively, efficiently and economically.

Municipalities are required to consider the following during the compilation of the 2023/2024 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;
- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulation read with MFMA Circular No.82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates;
- Strictly control the use of costly water tankers and fix the water infrastructure to enable the sustainable provision of water;
- Prioritise the filling of critical vacant posts, especially linked to the delivery of basic services; and
- Curbing consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

The aforementioned were taken into account during the compilation of the municipality's budget.

The application of sound financial management principles for the compilation of the Stellenbosch's financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities. The municipality's business and service delivery priorities were reviewed as part of this year's planning, through the Integrated Development Plan (IDP), and the annual budget process.

Funds were shifted from low to high priority programmes so as to maintain sound financial stewardship. A critical review was also undertaken on non-core and 'nice to have' items with regards to expenditure. The municipality has embarked on developing a revenue enhancement strategy to optimize revenue, including the collection of debt owed by consumers. Furthermore, the municipality has undertaken various customer care initiatives to ensure the municipality truly involves all citizens in the process of ensuring a people lead government.

The main challenges experienced during the compilation of the 2023/2024 MTREF can be summarized as follows:

- The on-going difficulties in the national and local economy;
- National State of Disaster – Electricity crises / Load shedding;
- Aging infrastructure;
- The need to reprioritise projects and expenditure within the existing resource envelope;

- The increased cost of bulk electricity and procuring water inventory, which is placing upward pressure on service tariffs to residents. Continuous high tariff increases are not sustainable - as there will be point where services will no-longer be affordable;
- Attracting economic investment
- Water Conservation;
- Reductions in allocations of some of the National and Provincial grants due to a worsening fiscal outlook;
- Limited resources to deal with all key priorities;
- Decline in reserves available to fund capital programmes.

The following budget principles and guidelines directly informed the compilation of the 2023/2024 MTREF:

- Integrated Development Plan was used to inform the measurable objectives, targets and backlog eradication goals;
- Tariff and property rate increases should be as affordable as possible and should ideally not exceed inflation as measured by the CPI, except where there are price increases in the inputs of services that are beyond the control of the municipality. However, tariffs need to remain or move towards being cost reflective, and should take into account the need to address infrastructure backlogs;
- National, provincial and local priorities;
- Headline inflation forecasts; and
- Funding choices and modelling.

The Integrated Development Plan (IDP) were used as a guiding strategic document to inform the budget compilation. The challenge however is still to deliver services more efficiently and effectively with the tight financial envelope.

Stellenbosch municipality's revenue strategy was based on the following fundamentals, namely, tariff policies of the municipality, economic outlook and development for Stellenbosch and surrounding areas, National Treasury's guidelines and macroeconomic policy, National, Provincial and Regional fiscal growth rates and electricity tariffs as approved by National Electricity Regulator of South Africa (NERSA).

The financial resources to fund the Operational Budget will and must consist of realistically anticipated revenue generated from property taxes, service charges and other income. The municipality were mindful of the estimated headline inflation for 2023/2024 of between 3% to 6% forming the basis of the extensive income modelling exercise, but also taking into account the principles of economical

services that are cost reflective, trading services generating surpluses, the effect of escalating salary costs and bulk purchases. Inflation is forecast to fluctuate around 5.2% over the medium term in line with moderating inflation expectations.

The national budget focuses on fiscal consolidation. This means that we as municipalities must ensure that we do not borrow beyond our ability to repay and we do not spend money we do not have, until we ignite growth and generate revenue, we have to be tough on ourselves.

It is expected that fuel prices will increase substantially in the next financial year, and this will be provided for in the budget.

The total budget quantum for the 2023/2024 year is R2 778 066 062 of which R2 276 266 197 (82%), is allocated to the operating budget and R501 799 865 (18%) to capital investment.

OPERATING BUDGET – REVENUE

Overall revenue budget increase was limited to 7.42% resulting in annual operating revenue increasing from R2 209 698 098 in 2022/2023 to R2 386 813 668 in 2023/2024. Taking cognisance of the economic conditions, the resultant low employment levels and levels of disposable income, it was important to keep services affordable by critically looking at the costs associated with providing the service.

Accordingly, management investigated potential pitfalls and amongst others found that spiralling expenditure on employee costs did not keep trend with realistically anticipated revenue streams, compounded by the decline in electricity surpluses as a result of higher input costs to provide the service.

REVENUE CATEGORIES	2022/2023	2023/2024	% INCR
Property Rates	438 941 447	475 740 757	8.38%
Electricity	812 307 977	913 669 187	12.48%
Water	176 782 708	185 621 843	5.00%
Sewerage	109 133 951	108 646 667	-0.45%
Refuse	94 971 363	107 653 574	13.35%
Rental of facilities	10 098 683	10 603 901	5.00%
Fines	124 955 174	131 570 078	5.29%
Licences and Permits	7 482 512	7 871 599	5.20%
Operational + Capital grants	344 598 437	340 645 001	-1.15%
Other Income	90 425 846	104 791 061	15.89%
Operating Revenue	2 209 698 098	2 386 813 668	7.42%

- Average tariff increases:

Property Rates	7.00%
Electricity	17.61%
Water	6.00%
Sanitation	6.50%
Refuse removal	9.10%
- The proposed electricity tariffs are subject to change based on the final findings and recommendation of the cost of supply study. The proposed electricity charges and tariff structure is subject to National Electricity Regulator of South Africa (NERSA) approval.
- The Municipality succeeded in accessing the EPWP Incentive Grant for Municipalities in a bid to give some relief to the poorest of the poor by means of contract employment opportunities over the short term. The allocation for the 2023/24 financial year is R 4 786 000.

Rates

In the 2023/2024 financial year, the Property Rates Tariff paid by owners will increase with 7.00%, whilst total rates also increased with 8.38%. The increase in total rates is due to interim valuations that were performed. Rates rebates to senior citizens and disabled persons are also available as per the requirements of the amended Rates Policy to qualifying ratepayers with a monthly income of R15 000 or less.

Electricity

According to NERSA, the inclining block rate tariff structure is commonly used to charge for water usage. The feature of this tariff structure is that the more you use, the higher the average price. The objective of the inclining block tariff is to provide protection for lower usage customers against high price increases resulting in a reduction in tariffs to these customers. This means that higher consumption customers will see increasingly punitive charges based on their electricity usage. The municipality is implementing the directive from NERSA as part of the Municipality's Licensing Agreement and as a result had to deal with the negative impact of a declining Electricity surplus, year-on-year, putting more pressure on the level and quality of services provided.

Council's attention is further drawn to the fact that the proposed electricity tariff is at 17.61% whereas the increase in electricity bulk purchases for the 2023/2024 financial year is 22% as approved by NERSA (National Electricity Regulator of South Africa) for implementation by all municipalities. Although the proposed tariffs increase with 17.61%, the municipality is experiencing a decrease in electricity demand as consumers are utilising alternative energy sources.

Municipalities are urged to examine the cost structure of providing electricity services and to apply to NERSA for electricity tariff increases that reflect the total cost of providing the service, so that they work towards achieving fully cost-reflective tariffs that will help them achieve financial sustainability.

Water

Taking cognizance of the challenges that the country is currently experiencing due to the severe drought, the plight of the poor and the affordability of basic services, the average tariff increase for the rest of the consumptive water scales is 6.00%. The tariff is designed to cater for current and future capital investment in basic water infrastructure and the need to generate surpluses. **It is however important to note that the proposed revenue as per table A4 (Appendix 1 – Part 1 – Section D) is based on the anticipated actual performance of the income to be derived in 2023/2024 and not based on the approved budget for the same year.**

Sewerage (Sanitation)

The proposed increase in this tariff is 6.50%. Sanitation services is classified as an economical service. This means that the service charges for sanitation must cover the cost of providing the service, i.e. it must at least break even. This tariff increase is necessitated by operational requirements, maintenance of existing aging infrastructure, new infrastructure financing/provision and to ensure that the service is delivered in a sustainable manner. **It is however important to note that the proposed revenue as per table A4 (Appendix 1 – Part 1 – Section D) is based on the anticipated actual performance of the income to be derived in 2023/2024 and not based on the approved budget for the same year.**

Refuse (Solid Waste)

Refuse removal services, like sanitation are also classified as an economical service. This means that the service charges for refuse must cover the cost of providing the service, i.e. it must at least break even. The municipality will implement an above inflation tariff increase as this service does not break even and to provide for the additional expenditure for the transport of the waste from the Stellenbosch Landfill Site. The solid waste tariffs were modelled to give effect to the principle of the service charge being cost reflective as the service cannot be cross-subsidized. It is proposed that the tariff increases by 9.10% as a result of the before mentioned. The very nature of this tariff does not lend it to financing the expansion of the landfill site and therefore the proposed extension by way of constructing the new cell, was funded from council's own reserves.

It is however important to note that the proposed revenue as per table A4 (Appendix 1 – Part 1 – Section D) is based on the anticipated actual performance of the income to be derived in 2023/2024 and not based on the approved budget for the same year.

Debt Management

The municipality is currently executing all credit control and debt collection procedures as required in the approved Credit Control and Debt Collection policy. These internal procedures followed include the disconnection of services, where there are services that can be disconnected, the issuing of final notices, the conclusion of reasonable agreements where the settlement of the accounts is not possible and also the follow up on defaulting debtors not honoring arrangements. The municipality continuously enforces the above procedures to ensure that debt which is collectable is collected and all debt that is regarded as not recoverable, be written off.

The municipality developed a revenue enhancement strategy. The document focuses on the formulation and implementation of strategies to improve financial management and controls within the municipality. The objective of any successful revenue enhancement strategy is to build and improve on current payment levels and then to recover arrear debt.

The municipality has also promulgated the Credit Control and Debt Collection By-Law on the 4th of March 2011 to strengthen the internal credit control and debt collection procedures through handing over of all debt over 90 days to the appointed attorneys.

A zero-tolerance approach will be followed where consumers are able to pay for services, as this indirectly denies paying consumers the level and standard of service that they are entitled to.

OPERATING BUDGET - EXPENDITURE

The budget sees an increase in annual operating expenditure from R 2 119 664 507 in 2022/2023 to R2 276 266 197 in 2023/2024. This 7.39% increase is primarily due to increases in several expenditure categories, examples which are included in the table below:

EXPENDITURE CATEGORIES	2022/2023	2023/2024	% INCR.
Employee Related Costs	590 885 967	617 695 992	4.54%
Remuneration of Councillors	20 845 768	22 096 514	6.00%
Depreciation & Impairment	214 992 797	220 283 469	2.46%
Finance Charges	68 069 222	59 688 487	-12.31%
Bulk Purchases Electricity	543 925 482	636 392 814	17.00%
Other Expenditure	680 945 271	720 108 921	5.75%
Total Expenditure	2 119 664 507	2 276 266 197	7.39%

Council to note the upward pressure of external borrowing interest (Finance Charges) on future tariffs. In this regard, strong political will and strategic leadership is required to ensure that the municipality maintains the position of being responsive to its communities by ensuring that service charges are kept affordable and realistic by amongst other, critically investigating funding choices and expenditure decisions.

Explanation of significant expenditure variances:

Finance Charges

The interest payable for the 2023/2024 financial year has been calculated on the maximum amount of possible borrowings drawn down up to the end of the 2023/2024 financial year.

Bulk Purchases

The municipal tariff guideline increase issued by NERSA setting the bulk purchase increase at 22%.

Other expenditure

Budgetary constraints and economic challenges meant that the municipality had to apply a combination of cost-saving interventions. These interventions include amongst other, measures to limited telephone usage and filling of critical vacancies that will result in a decrease in consulting fees.

CAPITAL BUDGET

The capital budget increased from R 378 709 141 in 2022/2023 to R501 799 865 in 2023/2024.

DIRECTORATE	2022/2023	2023/2024	% INCR.

CAPITAL PROJECTS ABOVE R50 MILLION INCLUDED IN THE THREE YEAR MTREF

The following projects included in the three year MTREF budget are above R50 million:

Project Description	2023/2024	2024/2025	2025/2026	MTREF Total
Expansion of the landfill site (New cells)	46 000 000	55 600 000	1 000 000	102 600 000
Bien don 66/11kV substation new	25 000 000	25 000 000	25 000 000	75 000 000
Bulk Water Supply Pipe and Reservoir: Kayamandi	1 500 000	40 000 000	75 000 000	116 500 000
New Reservoir & Pipeline: Vlottenburg	46 000 000	34 000 000	-	80 000 000
Upgrade of WWTW Wemmershoek	19 500 000	45 000 000	5 000 000	69 500 000
Upgrade of WWTW: Klapmuts	15 040 350	35 000 000	10 500 000	60 540 350
	153 040 350	234 600 000	116 500 000	504 140 350

Major capital expenditure is planned in the following areas during the 2023/2024 financial year:

- Expansion of the landfill site (New cells)
- Landfill Gas To Energy
- Alternative Energy
- Bien don 66/11kV substation new
- Electricity Network: Pniel
- Electrification INEP
- General Systems Improvements - Stellenbosch
- Kayamandi(Costa grounds)new substation 11 kV switching station
- Laterra Substation
- Bulk Water Supply Pipe and Reservoir: Stellenbosch
- Bulk Water Supply Pipeline & Reservoir – Jamestown
- New Reservoir & Pipeline: Vlottenburg
- Upgrade of WWTW Wemmershoek
- Upgrade of WWTW: Klapmuts
- Lanquedoc Access road and Bridge
- Khayamandi Pedestrian Bridge (R304, River and Railway Line)
- Bird Street Dualling - Adam Tas to Kayamandi
- Main Road Intersection Improvements: Franschhoek
- Adam Tas - Technopark Link Road

References

1. Must reconcile with Budgeted Cash Flows
2. For example: VAT, taxation
3. Council approval for policy required - include sufficient working capital (e.g. allowing for a % of current debtors > 90 days as uncollectable)
4. For example: sinking fund requirements for borrowing
5. Council approval required for each reserve created and basis of cash backing of reserves

PART 2

A: OVERVIEW OF STELLENBOSCH MUNICIPALITY

Background

Stellenbosch Municipality is located in the heart of the Cape Winelands. It is situated about 50 km from Cape Town and is flanked by the N1 and N2 main routes. The municipal area covers approximately 900 km².

State of the Greater Stellenbosch Area

Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town’s central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa’s top (air) links to the global economy, and not much further away from Cape Town harbour, the shipping portal to both the Atlantic and the Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality’s area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as a number of rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Languedoc, Groot Drakenstein, Muldersvlei, Klappmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlootenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes a number of informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, varying from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound and the area is the home of the very first Wine Route in South Africa. A variety of sport facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The Municipal area has a nuseveralatres, which include the Stellenbosch University’s HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre and dance), Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street at Theatre and Aan de Braak Theatre.

Ward Demarcation

The Stellenbosch Municipality is currently structured into the following **23** wards:

Table 1: Municipal ward demarcation

Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopard Leap Wine Farm
4	Kylemore, Johannesburg, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan (Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms, Kelsey Farm
7	Mostersdrift, Karindal, Rozendal, Uniepark, Simanswyk and Unirversiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of US campus (residential areas within both these areas), Southern border is the Eerste River, Northern border is Merriman Street, Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Oliehout Street, Banghoek Rd, Acedemia, Bosman Street, Smuts Rd, Joubert Street, De Beer Rd, De Villiers Rd from Ryneveld Street to Cluver Rd on the lefthand side
11	Boundaries of the ward are: Kridge Rd, Herte Street, Skone Uitsig Rd onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Rd onto George Blake Street, Mark Street, Distillery Rd, Santhagen Rd, Swawel Avenue, Kanarie Rd, Tarentaal Rd, Bokmakierie Rd, Fisant Rd, Devon Valley Rd, Kiewiet Rd, Dagbreek Rd, Pelikaan Street, Patrys Rd, Hammerkop Rd, Loerie Rd, Muldersvlei Landgoed, and all areas in Onder Papegaaienberg and businesses
12	Kayamandi: Zone A, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang, Smarties (Mgabadel Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4 th and 5 th Avenue, 10 th , 12 th and 14 th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Rd, Long streets, Crombi Rd to end of Gabriels Rd, Asalea Rd, 2nd Road, Noble Rd, Bailey Rd, Eike Street, Curry Street, Hoop Rd, Pansy Rd, West Rd, Laai Rd, Anthony Rd, Carriem Rd, Archilles Rd, Bergstedt Rd, Davidse Rd, Cupido Rd, Pearce Rd, Robyn Rd, Gonzalves Rd, Hercules Rd, Chippendale Rd, Afrika Rd, Arnolds Rd, September Rd, Jakaranda Street, Short Rd, Quarry Rd, Middle Rd, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gembok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Rd towards Langstraat -Suid Rd, Kloof Street, Fir Street, Fontein Rd, Williams R towards Gabriels Rd towards February Rd, Valentyn Rd, Pool Rd, Raziet Rd, Ortell Rd, Rhode Rd, King Rd, Hine Rd, Hendrikse Rd, Rhode Rd), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Rd, Belladonna Street, Wildeklawer Welgevonden Boulevard, Olive Rd, Sonnedou Rd, Mountain Silver Rd, Silver Oak Rd, Froetang Rd, Katbos Rd, Everlasting, Fynbos Street, Sourfig Street, Scarlet Cresant, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate.) The borders of the ward are the R44 Klapmuts road and Long streets.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spiritis Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poulter / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Streets, Schroder Rd, Die Braak, Bird Street from Dorp Street, Denniseg area, Muller Rd, Banghoek Road, Reyneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

Below is a map of the Cape Winelands District in relation to the provincial district boundaries:

Map 1: Locality of Cape Winelands in relation to Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km². The province spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands and West Coast) and 24 local municipalities.

Below is a map of the municipalities in relation to the Cape Winelands District:

Map 2: Locality map of Stellenbosch Municipality in relation to Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within close proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country and a comprehensive road and rail network. This gives the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. As a local authority, Stellenbosch Municipality governs the towns of Stellenbosch, Pniël, Klapmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi and Vlothenburg, and the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein and Theewaterskloof Municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch and Franschhoek, and Klapmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlothenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living, yet in close proximity to city life. This has placed the municipal area under constant development pressure.

Source: Western Cape, Social – Economic Profile 2022

¹ According to the Quarterly Labour Force Survey (QLFS) – Q1: 2022, the official unemployment rate was 34.5% in the first quarter of 2022.

Socio – Economic Context

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2022. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer and Quantec.

Population Growth

The current population of Stellenbosch in 2022 are 199 325 persons, which is the most populated municipal area in the Cape Winelands District (CWD). This total is expected to grow to 215 456 by 2026, equating to an average annual growth rate of 2.0 per cent for the period.

The estimated population growth rate of Stellenbosch is therefore 0.3 percentage and points higher than the estimated average annual population growth rate of the Cape Winelands District which is 1.7 per cent.

The table below depicts the population growth from 2022 to 2026:

Table 3: Population Growth

Area	2022	2023	2024	2025	2026
%					
Stellenbosch	3.3	2.3	2.0	2.0	1.6
Cape Winelands	2.7	1.8	1.6	1.6	1.6
Western Cape	2.9	1.8	1.7	1.7	1.6

Source: Western Cape, Social – Economic Profile 2022

Sex Ratio

The overall sex ratio depicts the number of males per 100 females in the population. The data indicates that as of 2022, there are more females than males in the Stellenbosch municipal area with a ratio of 51.1 per cent (females) to 48.9 per cent (males).

The sex ratio is therefore 96, meaning that for every 100 women there are 96 men. The ratio increases slightly towards 2023 and remains unchanged from 2023 to 2026. This could be attributed to a wide range of factors such as an increase in female mortality rates as well as the potential inflow of working males to the municipal area.

The table below depicts the sex ratio within the Stellenbosch municipal area.

Table 4: Sex Ratio

Year	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2022	98.0	108.9	97.6	95.7	93.9	96.1
2023	98.7	110.0	98.4	96.2	94.4	96.9
2024	98.8	110.3	98.5	96.3	94.4	97.0
2025	98.9	110.6	98.6	96.3	94.3	97.1
2026	99.0	110.3	98.9	96.3	94.3	97.4

Source: Western Cape, Social – Economic Profile 2022

Age Cohorts

The age cohorts are composed according to the population of Stellenbosch. These groupings are expressed as a dependency ratio which indicates those who are part of the workforce (Aged 15 – 64) and those who are dependent on them (children or senior citizens). A higher dependency ratio implies greater pressure on social systems and the delivery of basic services.

Between 2022 and 2026, the largest population growth projection was recorded in the 65+ age cohort at 2.7 per cent. This reflects possible improvements in life expectancy (an ageing population) or that more people are choosing the Stellenbosch municipal area as a retirement destination. Notable growth is also expected in the working age cohort, which results in an overall decrease in the dependency ratio towards 2026.

The table below depicts the age cohorts between 2022 and 2026.

Table 2: Age Cohorts

Year	Children: 0 – 14 Years	Working Age: 15 – 65 Years	Aged: 65 +	Dependency Ratio
2022	43 801	144 203	11 321	38.2
2024	45 272	150 716	11 932	38.0
2026	76 765	156 091	12 600	38.0
Growth	1.7%	2.0%	2.7%	-

Source: Western Cape, Social – Economic Profile 2022

Household Size

Household size refers to the number of people per household. The average size of households is expected to remain constant at 3.6 people per household from 2022 to 2026. The trend of the constant average household size could be attributed to a wide range of factors but are not limited to, lower fertility rates, ageing population, divorce, cultural patterns surrounding intergenerational co-residence, as well as socioeconomic factors that shape trends in employment, education, and housing markets.

The table below depicts the household sizes from 2022 to 2026:

Figure 1: Household size

Source: Western Cape, Social – Economic Profile 2022

Population Density

Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health and service delivery risks. In 2022, the population density of the Cape Winelands District was 45 persons per square kilometer. In order of highest to lowest, the various local municipal areas compare as follows:

In order of highest to lowest, the various local municipal areas compare as follows:

- Stellenbosch 240 people/km²;
- Drakenstein 194 people/km²;
- Breede Valley 51 people/km²;
- Langeberg 27 people/km²; and
- Witzenberg 14 people/km².

According to the above comparison, Stellenbosch has the highest density in the Cape Winelands District. This is helped a lot by the fact that the municipal Spatial Development Framework (mSDF) says that urban development should stay within the limits of the urban edge.

Table 3: Population growth

	2022	2023	2024	2025	2026
Stellenbosch	3.3	2.3	2.0	2.0	1.6
Cape Winelands	2.7	1.8	1.6	1.6	1.6
Western Cape	2.9	1.8	1.7	1.7	1.6

Source: Western Cape, Social – Economic Profile 2022

Education

Education and training improve access to employment opportunities and help sustain and accelerate overall development. Quality Education is the 4th Sustainable Development Goal, while the National Development Plan (NDP) emphasises the link between education and employment as well as the

significant contribution it makes to the development of the capabilities and well-being of the population.

Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch increased from 27 491 enrolments in 2019 to 28 594 in 2021 (more than 1 104 learners were enrolled compared to 2019).

The graphics below depict the learner enrollments, learner-teacher ratio and learner retention from 2019 to 2021.

Graph 1: Learner enrolment

Source: Western Cape, Social – Economic Profile 2022

Graph 2: Learner – Teacher Ratio

Source: Western Cape, Social – Economic Profile 2022

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior. The inverse of the learner-retention rate is commonly referred to as the drop-out rate. The learner retention rates are influenced by a wide array of factors, including low socio-economic background, student attitudes towards education, overcrowded classrooms, critical thinking skills, study skills and other personal circumstances which can make it difficult for the learner to focus on

education. Although the learner retention rate in the Stellenbosch municipal area improved from 75.5 per cent in 2020 to 79.1 per cent in 2021, more than 20 per cent of the learners did not complete their studies.

Graph 3: Learner retention

Source: Western Cape, Social – Economic Profile 2022

Number of schools and no – fee schools

Figure 2: Number of schools and no – fee schools

The number of schools within the Stellenbosch municipal area is recorded at 39 in 2021. A total of R90 million will be spent in the Stellenbosch municipal area across the MTREF. This allocation will be used for upgrading and additions as well as new and replacement infrastructure in the following schools; Aviation, Elsenburg Agri School, New Klipmuts PS and HS, and New Stellenbosch PS. The No-fee Schools Policy abolishes school fees in the poorest 40 per cent of schools nationally for learners from Grade R to Grade 9. As per the policy, schools that do not charge fees will be allocated a larger amount of funding from the national budget per learner to

Schools with libraries/media centres

The Stellenbosch municipal area consist of 39 schools in 2021 of which 27 (69 per cent) were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information which is in turn directly linked to improved education outcomes.

Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised.

Stellenbosch's matric pass rate improved from 85.1 per cent in 2020 to 87.9 per cent in 2021; recording the highest matric pass rate in the district in both 2020 and 2021 in the Cape Winelands District.

Graph 4: Education outcomes (matric pass rate)

Source: Western Cape, Social – Economic Profile 2022

Health

Health Facilities

According to the LGSEP 2022, in 2021, the Stellenbosch municipal area had 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites and 10 TB clinics.

The municipal area has 14 (17.9 per cent) out of the 78 primary healthcare facilities within the Cape Winelands district.

The table depicts the total healthcare facilities.

Table 4: Health facilities

Area	Community Health Centres ²	Community Day Centres ³	Regional hospitals	District Hospitals	PHC Clinics (Satellite and Mobile)	PHC Clinics (Fixed)
Stellenbosch	0	1	0	1	6	7
Cape Winelands District	0	5	2	4	33	39

Source: Western Cape, Social – Economic Profile 2022

Emergency Medical Services

The provision of more operational ambulances can provide greater coverage of emergency medical services. The Stellenbosch municipal area had a total of 6 ambulances servicing the region, which translates to 0.3 ambulances per 10 000 people in 2021. This number only refers to Provincial ambulances and excludes all private service providers and remained unchanged between 2020/21 and 2021/22.

HIV / AIDS and Tuberculosis

The number of clients (patients) that remain committed to their antiretroviral treatment (ART) plan in the Stellenbosch municipal area increased by one patient between 2020/21 and 2021/22. In total, 6 915 registered patients received antiretroviral treatment in the Stellenbosch municipal area in 2021/22. In turn, the number of new patients receiving ART also increased from 460 in 2020/21 to 481 in 2021/22. There has been an average annual increase of 3.65 per cent between 2020/21 (849) and 2021/22 (880) in the number of registered patients receiving TB treatment in the Stellenbosch municipal area.

Table 5: HIV/AIDS Management

Area	Registered patients receiving ART		Number of new ART patients	
	2020/21	2021/22	2020/21	2021/22
Stellenbosch	6 914	6 919	460	481
Cape Winelands District	32 949	32 719	2 825	3 780

Source: Western Cape, Social – Economic Profile 2022

² **Community Health Centre:** A facility that normally provides primary health care services, 24 hour maternity, accident and emergency services and beds where health care users can be observed for a maximum of 48 hours and which normally has a procedure room but not an operating theatre.

³ **Community Day Centre:** A health facility that provides a comprehensive health care services during day hours, including mother and child health, chronic diseases care, women's health, HIV and TB care, men's health, acute services, physio therapy, mental health services and oral health care.

Graph 5: Tuberculosis

Source: Western Cape, Social – Economic Profile 2022

Child Health

The immunisation coverage rate for children under the age of one in the municipal area improved slightly from 52.7 per cent in 2020/21 to 55.8 per cent in 2021/22. The overall CWD rate increased from 60.6 per cent to 62.2 per cent across the same period. The number of malnourished children under five years of age (severe acute malnutrition) per 100 000 people in the municipal area increased notably from 0.9 in 2020/21 to 1.5 in 2021/22.

The CWD also increased from 1.8 per cent to 2.2 per cent while the provincial average changed from 0.9 to 1.3 per cent. The neonatal mortality rate (deaths per 1 000 live births before 28 days of life) for the municipal area declined from 6.3 in 2020/21 to 3.1 in 2021/22. The rate was still notably below the CWD average of 8.0. A total of 9.8 per cent of all babies born in a facility in the municipal area in 2021/22 weighed less than 2 500 grams, indicating possible challenges with long-term maternal malnutrition and poor health care during pregnancy.

Table 6: Child Health

Area	Low Birth Rate		Neonatal Mortality Rate per 1000		Acute Malnutrition Rate (Under 5) per 100 000		Immunisation Rate (Under 1)

Maternal Health

In 2020/21, the Stellenbosch municipal area recorded the lowest number of maternal deaths (57.3) and teenage pregnancies (11.4 per cent) in the CWD, however, this increased to 61.1 per cent (maternal deaths) and 13.2 per cent (teenage pregnancies) in 2021/22. However, the termination of pregnancy rate (0.6 per cent) remained unchanged across this period.

Table 7: Maternal Health

Area	Maternal Mortality Rate		Delivery rate of women under 20 years		Termination of pregnancy rate	
	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22

Poverty

GDPR Per Capita

An increase in the real regional gross domestic product (GDPR) per capita, i.e., GDPR per person, is experienced only if the real economic growth rate exceeds the population growth rate. Even though real GDPR per capita reflects changes in the overall well-being of the population, not everyone within an economy will earn the same amount of money as estimated by the real GDPR per capita indicator.

An increase in GDPR per capita, i.e., GDPR per person, is experienced only if the economic growth rate exceeds the population growth rate. At R67 798 in 2021, the Cape Winelands District's real GDPR per capita is below that of the Western Cape's figure of R81 650 for the same period. However, Stellenbosch has outperformed both the District and the Province by recording a per capita income figure of R84 325 in 2021.

Cape Winelands District recorded the highest figure across 2021. While the 2021 figure has regressed moderately for the period 2015 – 2021, the robust economic potential of the municipality is highlighted by its persistent high level of per capita incomes recorded, despite the recent recessionary economic environment coupled with the COVID-19 pandemic which restricted economic activity both regionally and globally.

Graph 6: GDP Per Capita

Source: Western Cape, Social – Economic Profile 2022

Income Inequality

South Africa suffers among the highest levels of inequality in the world when measured by the commonly used Gini index. Inequality manifests itself through a skewed income distribution, unequal access to opportunities, and regional disparities.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. Income inequality has increased in Cape Winelands District between 2015 (0.59) and 2021 (0.62). These disparities in income are certain to worsen across the ensuing MTREF given the potential aftereffects of the COVID-19 pandemic. Stellenbosch has displayed a similar trend to that of the District's trajectory with inequality levels worsening from 0.62 in 2015 to 0.63 in 2021.

Graph 7: Income Inequality

Source: Western Cape, Social – Economic Profile 2022

Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL i.e., that cannot afford to purchase adequate levels of food and non-food items. The UBPL in South Africa is R1 227 (in April 2019 prices) per person per month.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment and poor living conditions. The NDP aims to eliminate poverty by 2030.

In 2021, 58.91 per cent of Stellenbosch's population fell below the UBPL. This figure improved marginally from the 60.62 per cent and 60.76 per cent recorded for the periods 2015 and 2018, respectively. Stellenbosch along with Drakenstein (61.96 per cent in 2021) represent the highest proportion of people living in poverty across the Cape Winelands District, while the Stellenbosch figure of 58.91 per cent is marginally above that of the District figure (57.26 per cent) recorded in 2021.

Table 9: Poverty Line

Basic Service Delivery

The Constitution stipulates that every citizen has the right to access adequate housing and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to services such as potable water, basic sanitation, safe energy sources and refuse removal services, to ensure that households enjoy a decent standard of living. This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2021. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

Housing and household services

With a total of 50 792 households in the Stellenbosch municipal area, 74.5 per cent had access to formal housing. This is lower than the Cape Winelands District average of 82.4 per cent. The area also had a

substantially higher proportion of informal dwellings, a total of 24.7 per cent compared with the District's total of 16.9 per cent.

Service access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water inside the dwelling / yard or communal / neighbour's tap at 99.3 per cent, access to a flush or chemical toilet at 96.4 per cent, access to electricity (including a generator) for lighting at 96.8 per cent and the removal of refuse at least weekly by the local authority at 82.1 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Free Basic Services

Municipalities also provide a package of free basic services to households that are financially vulnerable and struggle to pay for services. The number of households receiving free basic services in the Stellenbosch municipal area has declined sharply in 2020. The stressed economic conditions are expected to exert additional pressure on household income, which will likely increase the demand for free basic services and in turn the number of indigent households. However, this is area specific and dependent on the qualifying criteria which are used.

Figure 3: Basic Service

Source: Western Cape, Social – Economic Profile 2022

Safety and Security

Murder

Murder is defined as the unlawful and intentional killing of another person.

Within the Stellenbosch area, the number of murders increased from 67 in 2019/20 to 70 in 2020/21, increasing further to 87 in 2021/22. The Stellenbosch municipal area's murder rate (per 100 000 people) increased from 36 in 2020/21 to 44 in 2021/22, and the murder rate (per 100 000 people) for the Cape Winelands District also increased from 42 to 43 for the same period.

Graph 8: Murder Statistics

Source: Western Cape, Social – Economic Profile 2022

Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency and human trafficking.

In 2022, there were 226 sexual offences in the Stellenbosch area compared to 806 reported cases in the Cape Winelands District. The incidence of sexual offences (per 100 000 people) in the Stellenbosch municipal area (115) was higher than that of the District (84) in 2021/22.

Graph 9: Sexual Offences per 100 000

Source: Western Cape, Social – Economic Profile 2022

Drug – related Offences

Drug-related crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.

Drug-related crime within the Stellenbosch area decreased from 1 589 cases in 2020/21 to 1 125 cases in 2021/22. The Cape Winelands District's drug-related offences decreased sharply from 5 903 in 2020/21 to 5 729 in 2021/22. When considering the rate per 100 000 people, with 575 drug-related offences per 100 000 people in 2021/22, the Stellenbosch area's rate is below the District's 600 per 100 000 population.

Graph 10: Drug – related Offences per 100 000

Source: Western Cape, Social – Economic Profile 2022

Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area increased from 153 in 2020/21 to 252 in 2021/22. This translates into a rate of 128 per 100 000 people in 2021/22, which is above the District's 86 per 100 000 people.

Graph 11: Driving under the influence

Source: Western Cape, Social – Economic Profile 2022

The type of road user that died in or during a crash i.e. driver, cyclist, passengers, pedestrians.

The number of road user fatalities in the Stellenbosch area increased from 35 in 2020/21 to 39 in 2021/22. While the number of fatal crashes decreased from 34 to 31 for the same reference period.

Graph 12: Fatal Crashes and Road User Fatalities

Source: Western Cape, Social – Economic Profile 2022

Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

The number of residential burglaries in the Stellenbosch area decreased from 971 in 2020/21 to 958 in 2021/22. Stellenbosch municipal area's rate of 489 per 100 000 population is above the District's 448 for 2021/22.

Graph 13: Residential Burglaries

Source: Western Cape, Social – Economic Profile 2022

Economy and Labour Market Performance

Sectoral Overview

In 2020, the economy of Stellenbosch was valued at R18 625.6 billion (current prices) and employed 71 911 people. Historical trends between 2016 and 2020 indicate that the municipal area realised an average annual growth rate of -0.7 per cent. The 2020 recession made a substantial dent in the average growth rate over the period, but load shedding and the drought within the Province also played a major role in prior years.

Estimates for 2021 however indicate a marked recovery in growth (4.6 per cent) from the effects of the COVID-19 related restrictions on economic activity in 2020. It was largely driven by growth in the wholesale and retail trade, catering and accommodation (7.8 per cent) as tourism activity resumed; as well as the finance, insurance, real estate and business services (3.5 per cent); and manufacturing (5.0 per cent) sectors. The mining and quarrying (-14.2 per cent), construction (-1.0 per cent) and general government (-0.9 per cent) sectors were the only sectors that experienced a further economic decline after the easing of restrictions.

Despite the economic recovery experienced in 2021, the economy continued to shed jobs, with an estimated 2 435 net jobs lost. This was largely driven by job losses in the wholesale and retail trade, catering and accommodation (-945 jobs); manufacturing (-338 jobs); and agriculture, forestry and

fishing (-328) sectors, reflecting that employment creation is lagging behind the improved GDP. Only the general government sector was able to create jobs during the year.

Table 10: Economic Sector Overview

	SECTOR	GDP			Employment		
		R Million value 2019	Trend 2015 – 2019	Real GDP growth 2020e	Number of jobs in 2019	Average annual change 2015 - 2019	Net change 2020e

Formal and Informal Employment

It is estimated that Stellenbosch's total employed will in 2021 amount to 69 476 workers, of which 55 435 (79.8 per cent) are employed in the formal sector and 14 041 (20.2 per cent) are informally employed. Employment in the formal sector had an annual average increase of only 0.2 per cent from 2016 to 2020 while the informal sector suffered an annual average decline of 5.9 per cent over this period. The informal economy was responsible for the majority of the job losses in 2021. This is a concern as the informal economy should be able to act as a buffer during times of economic recession.

Most of the formally employed consisted of semi-skilled (42 per cent) and low-skilled (32 per cent) workers. The skilled category only contributed 25.8 per cent to total formal employment. The skilled and semi-skilled categories grew at a pace of 0.7 per cent per annum from 2016 to 2020 and notably outpaced low-skilled employment which shed 0.9 per cent of jobs per annum. The growth in the skilled

categories reflects the increasing market demand for skilled labour and the need for skills development initiatives, especially with the growing tertiary sector in the Stellenbosch municipal area.

Table 11: Skills Levels Formal Employment

Skill Levels Formal employment	Skill Level Contribution 2020 (%)	Average growth (%) 2016 - 2020	Number of jobs	
			2020	2021
Skilled	32.0	- 0.9	14 305	14 433
Semi-skilled	42.2	0.7	23 353	23 327
Low-skilled	25.8	0.7	17 688	17 675

Unemployment

To protect South African citizens from the COVID-19 pandemic, the government announced a national lockdown in March 2020 that brought about a shutdown of the economy, which in turn resulted in a shock in the labour market and a big change in the way people went about doing their work. According to the Quarterly Labour Force Survey (StatsSA, 2021), The number of unemployed persons decreased by 60 000 to 7,9 million in the 1st quarter of 2022 compared to the previous quarter. The number of discouraged jobseekers decreased by 54 000 (1,4%) and the number of people who were not economically active for reasons other than discouragement decreased by 112 000 (0,8%) between the two quarters resulting in a net decrease of 166 000 not economically active population.

The above changes in employment and unemployment resulted in the official unemployment rate decreasing by 0,8 of a percentage point from 35,3% in the fourth quarter of 2021 to 34,5% in the first quarter of 2022. The unemployment rate according to the expanded definition of unemployment also decreased by 0,7 of a percentage point to 45,5 % between April and June 2022 compared to January to March 2022. The biggest job gains were recorded in community and social services (281 000), manufacturing (263 000) and trade (98 000). However, there were job losses in private households (186 000), finance (72 000), construction (60 000) and agriculture (23 000). The total number of persons employed was 14,9 million in the first quarter of 2022. The expanded unemployment rate⁴ in South Africa increased by 2,2 percentage points to 46,6 per cent (12.5 million people) from July 2021 to September 2021, due to the fact that people were available for work but did not actively look for work during the national lockdown.

⁴ Definition: Expanded unemployment rate (aged 15–64 years): were not employed in the reference week; and were available to work but did not look for work either because they are discouraged from looking for work .

B: LEGISLATIVE ENVIRONMENT

Legal Requirements

The medium term revenue and expenditure framework for 2023/2024, 2024/2025 and 2025/2026 was compiled in accordance with the requirements the relevant legislation, of which the following are the most important:

- i) the Constitution, Act 108 of 1996
- ii) the Local Government Transition Act, Act 209 of 1993
- iii) the Municipal Structures Act, Act 117 of 1998
- iv) the Municipal Systems Act, Act 32 of 2000
- iv) the Municipal Finance Management Act, Act 56 of 2003

In addition to the above, the Municipal Budget and Reporting Framework as approved on 17 April 2009 gave a clear directive on the prescribed reporting framework and structure to be used.

Guidelines issued by National Treasury

National Treasury issued the following circulars regarding the budget for 2015/2016:

MFMA Circular No. 74 Municipal Budget Circular for the 2015/16 MTREF- 12 December 2014

MFMA Circular No. 75 Municipal Budget Circular for the 2015/16 MTREF- 04 March 2015

Other circulars used during the compilation of the budget:

MFMA: Circulars: All Municipal Budget Circulars from 2 March 2009 until 9 December 2016

- MFMA Circular No. 86 Municipal Budget Circular for 2017/2018 MTREF – 8 March 2017
- MFMA Circular No. 89 Municipal Budget Circular for 2018/2019 MTREF – 8 December 2017
- MFMA Circular No. 91 Municipal Budget Circular for 2018/2019 MTREF – 7 March 2018
- Local Government: Municipal Finance Management Act, 2003-Municipal Cost Containment Regulation (Draft)- 16 February 2018/ Cost Containment regulations issued June 2019
- MFMA Circular No. 93 Municipal Budget Circular for 2019/2020 MTREF – 7 December 2018
- MFMA Circular No. 94 Municipal Budget Circular for 2019/2020 MTREF – 7 March 2019
- Local Government: Municipal Finance Management Act, 2003-Municipal Cost Containment Regulations issued June 2019
- MFMA Circular No. 98 Municipal Budget Circular for 2020/2021 MTREF – 6 December 2019
- MFMA Circular No. 99 Municipal Budget Circular for 2020/2021 MTREF – 9 March 2020
- MFMA Circular No.107 Municipal Budget Circular for 2021/2022 MTREF – 4 December 2020
- MFMA Circular No.108 Municipal Budget Circular for 2021/2022 MTREF – 8 March 2021
- MFMA Circular No.112 Municipal Budget Circular for 2022/2023 MTREF- 6 December 2021
- MFMA Circular No.115 Municipal Budget Circular for 2022/2023 MTREF- 4 March 2022

- MFMA Circular No.122 Municipal Budget Circular for 2023/2024 MTREF- 12 December 2022
- MFMA Circular No.123 Municipal Budget Circular for 2023/2024 MTREF – 3 March 2023

The following are discussion points that are highlighted in the above:

- National outcomes/priorities
- Economy and Headline inflation forecasts
- Division of Revenue outlook
- Local Government Conditional Grants & additional allocations and Changes to structure of conditional grant allocations
- Unfunded budgets in Local Government
- Municipal Standard Chart of Accounts (mSCOA)
- IDP Consultation process post 2021 Local Government Elections
- Development of Integrated Development Plan (IDP)
- Revising rates, tariffs and other charges
- Eskom Bulk Tariff Increases
- Funding choices and budgeting issues
- Transfers to Municipalities
- Conditional transfers to municipalities
- Unconditional transfers to municipalities
- Borrowing for capital infrastructure
- Revenue Budget
- Cost Containment Measures
- Municipal Budget and Reporting Regulations
- Preparation of Municipal Budgets for 2023/2024 MTREF
- Budget process and submissions for the 2023/24 MTREF and
- Submission of Budget Documentation

The guidelines provided in the above mentioned circulars, annexures and other economic factors were taken into consideration and informed budget preparation and compilation.

C: OVERVIEW OF ANNUAL BUDGET PROCESS

In terms of Section 24 of the MFMA, Council must, at least 30 days before the start of the financial year, consider the annual budget for approval. Section 53 requires the Mayor of a municipality to provide general political guidance over the budget process and the priorities that must guide the preparation of the budget. In addition, Chapter 2 of the Municipal Budget and Reporting Regulations, gazetted on 17 April 2009, states that the Mayor of a municipality must establish a Budget Steering Committee to provide technical assistance to the Mayor in discharging with the responsibilities set out in section 53 of the Act.

A time schedule outlining important dates and deadlines as prescribed for the IDP/Budget process was approved on **24 August 2022**. The budget process for the 2023/2024 MTREF period proceeded/will proceed according to the following timeline

Activity	Time frame
Formulation of budget assumptions	September 2022
Detailed programmes and projects to further define budget	November 2022 – March 2023
IDP and Budget considered by Council	29 March 2023
IDP and Budget - public participation	April 2023
Final approval of IDP and the Budget	24 May 2023

D: OVERVIEW OF ALIGNMENT OF ANNUAL BUDGET WITH THE INTEGRATED DEVELOPMENT PLAN (IDP)

The intent of the Strategic goals for the Fourth Generation IDP will remain the same as the goals of the Third Generation IDP, although a slight change for 3 of the goals namely: “Preferred Investment Destination” has been amended to “Valley of Possibility” to have a clearer indication that it needs to include possibilities for all and not just investors; “Greenest Municipality” has been amended to “A Green and Sustainable Valley” to incorporate all facets of sustainability; “ Safest Valley” has been amended to “A Safe Valley”, whilst “Dignified Living” and “Good Governance and Compliance”, remain unchanged.

Horizontal Alignment Matrix

Table 13: Horizontal Alignment Matrix

Strategic Focus Areas	National Strategic Outcomes	National Planning Commission	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
Valley of Possibility	Ensuring decent employment through inclusive economic growth (4) Ensuring decent employment through inclusive economic growth (4)	Creating jobs (1)	Create opportunities for growth and jobs (1)	Promoting sustainable infrastructure services and transport system which fosters social and economic opportunities.
Green and Sustainable Valley	Ensuring that the environmental assets and natural resources are well protected and continually enhanced (10)	Transitioning to a low carbon economy (3) Transforming urban and rural spaces (4)	Enable resilient, sustainable, quality and inclusive living environment (4)	To create an environment and forge partnerships that ensures the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District through economic, environmental and social infrastructure investment.

Strategic Focus Areas	National Strategic Outcomes	National Planning Commission	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
	Ensuring vibrant, equitable and sustainable rural communities with food security for all (7) Promoting sustainable human settlements and improved quality of household life (8)	Transitioning to a low carbon economy (3) Transforming urban and rural spaces (4)	Increase wellness, safety and tackle social ills (3) Enable resilient, sustainable, quality and inclusive living environment (4)	Environmental and social infrastructure investment.
Safe Valley	Ensuring all people in South Africa are and feel safe (3)		Increase wellness, safety and tackle social ills (3).	To create an environment and forging partnerships that ensures the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District.
Dignified Living	Providing improved quality of basic education (1) Enabling a long, healthy life for all South Africans (2)	Providing quality health care (6)	Improve education outcomes and opportunities for growth and jobs (2) Increase wellness, safety and tackle social ills (3)	To create an environment and forging partnerships that ensures the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.

Strategic Focus Areas	National Strategic Outcomes	National Planning Commission	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
	Setting up an efficient, competitive and responsive economic infrastructure network (6)	Expanding infrastructure (2)	Create opportunities for growth and jobs (1) Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	Promoting sustainable infrastructure services and transport system which fosters social and economic opportunities.
Good Governance and Compliance	Achieving an accountable, effective and efficient local government system (9) Creating a better South Africa and a better and safer Africa and world (11) Building an efficient, effective and development oriented public service and an empowered fair and inclusive citizenship (12)	Improving education and training (5) Building a capable state (7) Fighting corruption (8)	Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	Promoting sustainable infrastructure services and transport system which fosters social and economic opportunities.
	Achieving a responsive, accountable, effective and efficient local government system (9)	Building a capable state (7)	Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities.

Performance management at Stellenbosch municipality is evaluated to embody the following;

Consistency: Objectives, performance indicators and targets are consistent between planning and reporting documents.

Measurability: Performance indicators are well defined and verifiable, and targets are specific, measurable and time bound.

Relevance: Performance indicators relate logically and directly to an aspect of the municipality's mandate and the realisation of its strategic goals and objectives.

Reliability: Recording, measuring, collating, preparing and presenting information on actual performance / target achievements is valid, accurate and complete.

Stellenbosch municipality targets, monitors, assess and reviews organisational performance which in turn is directly linked to individual employees' performance. The performance of the municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations.

The Five-Year Top-Level Service Delivery and Budget Implementation is part of the Integrated Development Plan and the financial performance objectives are captured in supporting table SA7.

E: OVERVIEW OF MUNICIPAL BY-LAWS BUDGET RELATED POLICIES

The following policies are new:

Infrastructure Asset Unbundling Policy

This policy is intended to provide a framework for the unbundling of completed infrastructure services capital projects and financial asset year-end processes within the requirements of sections 60, 62, 63, 78, and 79 of the Municipal Finance Management Act, 2003 (Act 56 of 2003) (MFMA), and the South African Standards of Generally Recognised Accounting Practices (GRAP) as well as to promote good financial management practices. This policy applies to all officials within the Stellenbosch Local Municipality who utilise and/or manage any type of infrastructure assets. The Municipal Council of Stellenbosch have adopted an Asset Management Policy to regulate the effective management of all council's assets and wants to lay down broad guidelines for consistent, effective and efficient asset management principles of Stellenbosch Municipality. The Municipality of Stellenbosch have agreed to adopt an Infrastructure Unbundling Policy that will guide the Municipality with the effective, complete, and accurate capitalisation of their assets and complying with year-end processes relating to assets. Refer to Appendix 5.

Pool Vehicle Policy

The purpose of this policy is to ensure the proper procedure of booking and utilization of a pool vehicle. The policy clearly stipulates that no person, other than a municipal official in possession of a valid driver's licence may drive a Pool Vehicle and no person other than an official may be transported in a Pool Vehicle, provided that the CFO, Municipal Manager or a director may in exceptional circumstances authorise that other passenger may be transported in such Pool Vehicle. Municipal officials that receive car allowance are NOT allowed to use any pool vehicle. Refer to Appendix 6.

The following existing policies were reviewed and amended

Borrowing, Funds and Reserves

This policy strives to establish a borrowing framework policy for the Municipality and set out the objectives, policies, statutory requirements and guidelines for the borrowing of funds. The policy provides a framework to ensure that the annual budget of Stellenbosch Municipality is fully funded and that all funds and reserves are maintained at the required level to avoid future year noncash

backed liabilities. The policy aims to give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework. Refer to Appendix 7.

Budget Implementation and Monitoring Policy

The policy aims to give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the planning, preparation and approval of the annual and adjustments budgets. The framework for virements is also explained and regulated in this policy as well as monitoring roles and responsibilities. Refer to Appendix 8.

Cash Management and Investment Policy

To regulate and provide directives in respect of the investment of funds and to maximize returns from authorized investments, consistent with the primary objective of minimizing risk. Refer to Appendix 9.

Credit Control and Debt Collection Policy

This policy provides a framework to enable Council to proactively manage and collect all money due for services rendered and outstanding property taxes, subject to the provisions of the Municipal Systems Act of 2000 and any other applicable legislation and internal policies of Council. Refer to Appendix 10.

Development Charges Policy

The Municipality derives its authority to impose a development charge in terms of Section 75A. General power to levy and recover fees, charges and tariffs of the Local Government: Municipal Systems Act, 2000, Act 32 of 2000. The Municipality approved its new Land Use Planning Bylaw in terms of the Spatial Planning and Land Use Planning Act, 2013 (Act 16 of 2013) in October 2015 and it was officially promulgated and became effective in December 2015. Since then, the Municipality faces significant changes in the planning environment, amongst others the need for and manner of generating development charges. Refer to Appendix 11.

Grant-in-aid Policy

This policy provides the framework for grants-in-aid to non-governmental organisations (NGO's), community-based organisations (CBO's) or non-profit organisations (NPO's) and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12 and 67 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003). Refer Appendix 12.

Indigent Policy

Due to the level of unemployment and subsequent poverty in the municipal area, there are households which are unable to pay for basic municipal services. The provision of free basic services ensures that registered indigent consumers have access to basic services. This policy provides the framework for the administration of free basic services to indigent consumers. Refer to Appendix 13.

Irrecoverable Debt Policy

This policy enables Council and the CFO to write off irrecoverable debt of indigent consumers, debt which cannot be recovered due to consumers not being registered as indigent or not traceable or due to prescription of debt. Refer to Appendix 14.

Rates Policy

The revised Rates Policy as required by the Municipal Property Rates Act (Act no 6 of 2004) is attached as Appendix 15.

Supply Chain Management Policy

Section 111 of the MFMA requires each Municipality and municipal entity to adopt and implement a supply chain management policy, which gives effect to the requirements of the Act. The Preferential Procurement Policy Framework Act, no 5 of 2000 and its accompanying regulations influences and dictates process around the evaluation and awarding of points. In this regard, the Minister of Finance acting in terms of section 5 of the Procurement Policy Framework Act, revised the Regulations accompanying this Act on the 20th January 2017 for implementation by all affected public entities by the 1 April 2017. The Supply Chain Management Policy was therefore amended and adopted at Council during February 2017. Refer to Appendix 16.

Travel and Subsistence Policy

This policy sets out the basis for the payment of subsistence, travel allowance, hourly rate when applicable for the purpose of official travelling. Refer to Appendix 17.

Virement Policy

The policy sets out the Virement principles and processes which the Stellenbosch Municipality will follow during a financial year. These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year. The policy shall give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the Approved budget, and it will be applicable to all municipal staff and councillors involved in budget implementation. Refer to Appendix 18.

Ward Allocation Policy

The objective of the Ward Allocations Policy is to create opportunities for Councillors to identify ward projects in line with the identified IDP needs, with the support of their Ward Committees, which would improve the quality of living in all wards. These projects would need to fit into the basket of services of the relevant User Department and must comply with the following, namely, Local Government's mandate; council policies; support the pillars and objectives of the IDP and directly benefit the community. The Policy shall be governed by the underlying principle of ensuring that ward allocation projects meet the requirements of the Integrated Development Plan, including specific reference to, valley of opportunity, green and sustainable valley, safe valley, valley with dignified living and valley of good governance and compliance. Refer to Appendix 19.

The following existing budget related policies and by-laws were reviewed but no amendments were necessary:

Accounting Policy

This policy provides the accounting framework applicable to the finances of the municipality and is informed by the Municipal Finance Management Act (Act no 56 of 2003). Refer to Appendix 20.

Asset Management Policy

The Municipal Finance Management Act Number 56 of 2003 will be the legislative framework for the Asset Management Policy whilst Generally Recognised Accounting Practice (GRAP) will be the accounting framework.

The Municipal Council of Stellenbosch is in terms of the MFMA and GRAP obliged to adopt an Asset Management Policy to regulate the effective management of all council's assets.

- **And whereas** the municipal manager as accounting officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.
- **And whereas** these assets must be protected over their useful life and may be used in the production or supply of goods and services or for administrative purposes in meeting the municipality's operational requirements.

- **Now therefore** the municipal council of the Stellenbosch Municipality adopts this asset management policy. Refer to Appendix 21.

Cost Containment Policy

The purpose of the policy is to regulate spending and to implement cost containment measures at Stellenbosch Local Municipality. The objectives of this policy are to ensure that the resources of the municipality are used effectively, efficiently and economically and to implement cost containment measures. The cost containment policy will apply to council and all municipal employees. Refer to Appendix 22.

Inventory Management Policy

In terms of the MFMA, the Accounting Officer for a municipality must:

- (a) be responsible for the effective, efficient, economical and transparent use of the resources of the municipality as per section 62 (1)(a);
- (b) take all reasonable steps to prevent unauthorised, irregular and fruitless and wasteful expenditure and other losses as per section 62(1)(d); and
- (c) be responsible for the management, including the safeguarding and the maintenance of the assets, and for the management of the liabilities, of the municipality as per section 63 (1)(a) and (b).

The policy aims to achieve the following objectives which are to provide guidelines that employees of the Municipality must follow in the management and control of inventory, including safeguarding and disposal of inventory, procure inventory in line with the established procurement principles contained in the Municipality's Supply Chain Management Policy and eliminate any potential misuse of inventory and possible theft. Refer to Appendix 23.

Liquidity Policy

The documented Liquidity Policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to in order to ensure that its current and future liquidity position is managed in a prudent manner. This policy will be implemented to provide guidance on the minimum liquidity level that Stellenbosch Municipality has to maintain in order to comply with required legislative and / or National Treasury directives and within the overall financial management objectives as approved/reviewed by the Council from time to time. Refer to Appendix 24.

Preferential Procurement Policy

Section 217(1) of the Constitution, 1996 (Act 108 of 1996) provides that when contracting for goods and services, organs of state must do so in accordance with a system that is fair, equitable, transparent, competitive and cost effective. Section 217(2) and (3) of the Constitution allows organs of state to grant preferences when procuring for goods and services within a Framework prescribed by National legislation. The preferential procurement policy is founded on the following principles, namely, value for money, open and effective competition, ethics and fair dealing, accountability and reporting and equity. This policy will be applicable to all active industry sectors within the Stellenbosch Municipal area and must be read with the supply chain management policy of the municipality. Refer to Appendix 25.

Petty Cash Policy

All purchases below R 2 000 are regulated by this policy. Clear processes and procedures are stipulated to ensure that all transactions are processed effective and efficiently in a bid to ensure prudent financial control. Refer to Appendix 26.

Credit Control and Debt Collection By-Law

This by-law give effect to the implementation and enforcement of Municipality's Credit Control and Debt Collection Policy and/or to regulate its implementation and enforcement in the Stellenbosch Municipal Area (WC024) in terms of section 156(2) of the Constitution of the Republic of South Africa (Act 108 of 1996) and sections 96 and 98 of the Municipal Systems Act (Act 32 of 2000); to provide for the collection of all monies due and payable to the Municipality; and to provide for matters incidental thereto. All debt owing to the Municipality must be collected in accordance with this By-law and the Credit Control and Debt Collection Policy. Refer to Appendix 27.

Special Ratings Area Policy

The aim of the policy is to provide the framework to strike an appropriate balance between facilitating self-funded community initiatives that aim to improve and/or upgrade neighbourhoods. Refer to Appendix 28.

Special Ratings Area By-Law

A "special rating area" refers to a special rating area approved by the Council in accordance with the provisions of section 22 of the Property Rates Act. This By-law aims to provide for the establishment of special ratings areas, to provide for additional rates and to provide for matter incidental thereto. Refer to Appendix 29.

Tariff By-Law

In terms of section 75(1) of the Systems Act, a municipal council must adopt by-laws to give effect to the implementation and enforcement of its tariff policy. In terms of section 75(2) of the Systems Act, by-laws adopted in terms of section 75(1) of the Systems Act may differentiate between different categories of users, debtors, service providers, services, service standards and geographical areas as long as such differentiation does not amount to unfair discrimination. Refer to Appendix 30.

Tariff Policy

This policy serves as the implementing tool which guides the levying of tariffs for municipal services in accordance with the provisions of the Municipal Systems Act and any other applicable legislation. Tariffs represent the charges levied by Council on consumers for the utilization of services provided by the Municipality and rates on properties. Tariffs will be calculated in various ways, dependent upon the nature of the service being provided. Refer to Appendix 31.

Rates By-Law

In terms of Section 3 of the Property Rates Act, a municipal council must adopt a policy consistent with the property rates act on levying of rates on rateable properties in the municipality. Refer to Appendix 32.

Financing of External Bodies performing municipal functions Policy

The purpose of this Policy is to provide a framework for financial assistance by Stellenbosch Municipality (“the Municipality”) to external organisations/bodies conducting local government functions to the extent as set out in section 155(6)(a) and (7) of the Constitution as listed in Part B of Schedule 4 and 5. Refer to Appendix 33.

Wayleave Policy

In terms of S151 of the Constitution of the Republic of South Africa, 108 of 1996, a municipality has the right to govern on its own initiative, the local government affairs of its community, subject to national and provincial legislation. S156 of the Constitution grants the municipalities the right to administer the local government matters listed in Schedule 5B, which include municipal roads. A municipality may make by-laws for the effective administration of municipal roads. This Policy will be converted into municipal by-laws to give it legal effect. Refer to Appendix 34.

F: OVERVIEW OF KEY BUDGET ASSUMPTIONS

Municipalities' long-term financial viability depends largely on the extent to which improved and sustainable revenue capacity on the one hand and sound financial management of its resources on the other hand can be achieved. These imperatives necessitate proper multi-year financial planning. Future impacts of revenue streams, expenditure requirements and the financial implications for the community at large (i.e. the potential influence on rates, tariffs and service charges) must be identified and assessed to determine the sustainability of planned interventions, programs, projects and sundry service delivery actions.

Taking these principals into consideration, the following assumptions (**ceteris paribus**) were made and relates to the parameters within which the budget was compiled for the next three years

	2023/2024	2024/2025	2025/2026
Percentage Increase:			
Water	6.00%	5.50%	5.50%
Electricity	17.61%	14.50%	10.90%
Sanitation	6.50%	6.00%	6.00%
Refuse	9.10%	9.00%	9.00%
Property Rates	7.00%	6.00%	6.00%
Collection Rates			
Water	95%	95%	95%
Electricity (Post Paid Meters)	97%	97%	97%
Sanitation	96%	96%	96%
Refuse	96%	96%	96%
Rates	96%	96%	96%
Employee Related Costs			
Salaries and Wages and related costs	5.40%	4.70%	4.70%
Notch Increment	2.40%	2.40%	2.40%
Other Assumptions			
Bulk Purchases - Electricity	22.00%	14.50%	10.90%

Budgetary constraints and economic challenges meant that the municipality had to apply a combination of cost-saving interventions and higher than headline CPI revenue increases to ensure a sustainable budget over the medium term.

Municipalities should also pay particular attention to managing all revenue and cash streams effectively and carefully evaluate all spending decisions.”

G: HIGH LEVEL BUDGET OVERVIEW**Capital Budget for 2023/2024, 2024/2025 and 2025/2026**

Although the capital budget is infrastructure orientated and addresses the very urgent need for the upgrading of infrastructure as addressed by the different infrastructure master plans, it does however speak to the IDP (Integrated Development Plan) and the needs of the community. It's also aligned to the strategic priority in the State of the Nation Address of Infrastructure investment and the “back to basics” approach. The responsiveness of the budget can be measured against what was identified as priorities by the community and the actual amount allocated, bearing in mind that resources are limited, to address or at least alleviate the most critical needs identified.

In this regard it is important to note that the need for infrastructure upgrades, inclusive of electricity infrastructure were key to ensure the delivery of sustainable services.

The capital budgets as proposed, amounts to:

<u>2023/2024</u>	<u>2024/2025</u>	<u>2025/2026</u>
R	R	R
501 799 865	586 095 464	503 055 975

Compilation of the Capital Budget

The capital budgets depicted per Directorate are as follows:

	<u>2023/2024</u>		<u>2024/2025</u>		<u>2025/2026</u>	
	R	%	R	%	R	%
Municipal Manager	40,000	0.01%	40,000	0.01%	40,000	0.01%
Planning and Economic Development	9 043 500	1.80%	29 835 000	5.09%	31 450 000	6.25%
Community and Protection Services	24 642 002	4.91%	45 115 000	7.70%	16 080 000	3.20%
Corporate Services	33 901 000	6.76%	19 620 000	3.35%	9 270 000	1.84%
Infrastructure Services	433 423 363	86.37%	491 235 464	83.81%	445 965 975	88.65%
Financial Services	750 000	0.15%	250 000	0.04%	250 000	0.05%
	501 799 865	100.00%	586 095 464	100.0%	503 055 975	100.0%

Investment in infrastructure for the next three years' equals:**Financing of the Capital Budget**

The proposed financing sources of the capital budget for the next three years are as follows:

	2023/20224		2024/2025		2025/2026	
	R		R		R	
Own Funding						
Capital Replacement Reserve	173 826 279	34.64%	271 946 329	46.40%	218 796 875	43.49%
Development Contribution	24 118 086	4.81%	22 199 985	3.79%	20 000 000	3.98%
External Funding						
Grants National Government	79 189 500	15.78%	57 816 150	9.86%	58 603 100	11.65%
Grants Provincial Government	24 666 000	4.92%	34 133 000	5.82%	30 656 000	6.09%
External Loans	200 000 000	39.86%	200 000 000	34.12%	175 000 000	34.79%
	501 799 865	100.00%	586 095 464	100.00%	503 055 975	100.00%

As alluded to in the before-mentioned text and in the Council item; substantial investment in infrastructure is crucial in order to maintain sustainable levels of service delivery. For the detailed capital projects please refer to **Appendix 1 – Part 2 – Section N**.

Operating Budget for 2023/2024, 2024/2025 and 2025/2026**Expenditure**

The operating expenditure budget per Vote (Directorate) is as follows:

	<u>2023/2024</u>	<u>2024/2025</u>	<u>2025/2026</u>
	R	R	R
Municipal Manager	24 980 610	26 021 905	27 114 950
Planning and Development	88 317 261	86 981 546	96 096 074
Community and Protection Services	423 767 703	431 064 094	447 805 407
Infrastructure Services	1 388 537 360	1 544 001 968	1 751 767 049
Corporate Services	236 436 509	246 692 773	257 736 398
Financial Services	114 226 754	119 650 650	123 286 375
Total Expenditure	2 276 266 197	2 454 412 936	2 703 806 253

The operating expenditure budget per category is as follows:

	<u>2023/2024</u>	<u>2024/2025</u>	<u>2025/2026</u>
	R	R	R
Employee related costs	617 695 992	631 369 707	674 745 854
Remuneration of councillors	22 096 514	23 422 304	24 827 641
Depreciation & asset impairment	220 283 469	225 790 548	230 390 566
Finance charges	59 688 487	72 516 590	91 614 910
Bulk purchases-Electricity	636 392 814	776 399 233	947 207 065
Transfers and grants	20 635 518	21 048 229	21 469 194
Other expenditure	699 473 403	703 866 325	713 551 023
Total Expenditure	2 276 266 197	2 454 412 936	2 703 806 253

The operational budget will be funded as follows:

	<u>2023/2024</u>	<u>2024/2025</u>	<u>2025/2026</u>
	R	R	R
Electricity Sales	913 669 187	1 046 151 218	1 160 181 699
Water Sales	185 621 843	194 902 936	204 648 084
Sewerage Charges	108 646 667	115 165 467	122 075 396
Refuse Charges	107 653 574	117 342 398	127 903 213
Property Rates	475 740 757	504 285 202	534 542 314
Other Income	595 481 640	611 621 186	666 253 794
Total Income	2 386 813 668	2 589 468 407	2 815 604 500

H: OVERVIEW OF THE BUDGET FUNDING**Financing of the Capital Budget**

The proposed financing sources of the capital budget for the next three years are as follows:

	<u>2023/2024</u>	<u>2024/2025</u>	<u>2025/2026</u>
	R	R	R
Capital Replacement Reserve	173 826 279	271 946 329	218 796 875
Grants National Government	79 189 500	57 816 150	58 603 100
Grants Provincial Government	24 666 000	34 133 000	30 656 000
External Loans	200 000 000	200 000 000	175 000 000
Development Contribution	24 118 086	22 199 985	20 000 000
	501 799 865	586 095 464	503 055 975

Grant funding from National Government includes the following:

- Integrated National Electrification Programme (Municipal) Grant
- Integrated Urban Development Grant

Grant funding from Provincial Government includes the following:

- Human Settlement Development Grant
- Informal Settlements Upgrading Partnership Grant: Provinces (Beneficiaries)
- Integrated Transport Planning (2024/2025)
- Regional Socio-Economic Project/violence through urban upgrading (RSEP/VPUU)

Financing of the Operational Budget

The operational budget is financed from the tariff increases as displayed above. In addition to these, the following grant allocations are expected, and expenditure was adjusted accordingly:

- Equitable Share Allocation
- Community Library Services Grant
- Local Government Financial Management Grant
- Municipal Accreditation and Capacity Building Grant
- Financial assistance to municipalities for maintenance and Construction of Transport Infrastructure:
- Community Development Workers Operational Support Grant
- Expanded Public Works Program Incentive Grant
- Human Settlement Development Grant
- Title Deeds Restoration Grant

REPORT RECEIVED FROM COMMUNITY DEVELOPMENT: 2023/2024 GRANT-IN-AID ALLOCATIONS AND DONATIONS

1. SUBJECT

GRANT IN AID APPLICATIONS AND DONATIONS 2023/2024

2. PURPOSE

To obtain Council's approval for Grant-in-Aid (GiA) applications and recommended donations for the financial year 2023-2024.

3. DELEGATED AUTHORITY (FOR DECISION BY MUNICIPAL COUNCIL)

In terms of Municipal Finance Management Act (MFMA), Act (56 of 2003) Section 17. (3) (e) relating to content of annual budgets and supporting documents.

4. EXECUTIVE SUMMARY

The application is in terms of the annual GiA donations made to non-governmental organisations (NGOs), community-based organisations (CBOs), non-profit organisations (NPOs) or non-profit companies (NPC) and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by the Grant in Aid Policy approved at the Council Meeting in May 2022.

5. RECOMMENDATIONS

- a) That council consider and approve the recommended donations to organizations as per detailed list.

6. DISCUSSION / CONTENTS

6.1. Background

In terms of Council's Grant-in-Aid Policy, proposals were called for by means of advertisement in the press on 13 October 2022 (Eikestad Nuus) and on the municipal website and Facebook page.

The advertisement included an invitation to attend one of three compulsory workshops on either 1, 2 or 3 November 2022 to assist and give guidance on the policy and application procedure. Two hundred and eleven (211) persons attended the workshops.

A workshop to assist with capacity building of small, emerging organisations was conducted on 4 November 2022 focussing on financial management.

This workshop was also advertised in the local newspaper and is not compulsory. The workshop was attended by fifteen (15) persons.

By the closing date (2 December 2022), 132 applications were received.

6.2 Discussion

The Department Community Development scrutinized and evaluated one hundred and thirty two (132) applications representing the following categories:

CATEGORY	SUB CATEGORY	APP's RECEIVED	APP's RECOMMENDED / CONDITIONALLY RECOMMENDED	WARDS SERVED THROUGH THE ORGANIZATIONS	RECOMMENDED AMOUNT (2023-2024)
Social Development	General	6	4	1-4, 6-11, 18-19, 22	160 000
	Partial Care	58	18	ALL	720 000
	Disability	4	2	2, 11-17	80 000
	Elderly	7	2	5-6, 11	70 000
	Youth	11	5	1, 2, 4-6, 10-16, 19	200 000
	Substance Abuse	2	1	4, 6-10, 12, 16-17, 20	40 000
	Gender	1	1	12	40 000
	Food Security	3	2	1-6, 8-9, 12-21, 23	2 976 711
	People Living on the Street	1	0	ALL	0
	Safety	1	0	5	0
	Skills Development	3	2	ALL	80 000
Health	Physical and Psychological	4	3	ALL	120 000
Environment		1	0	4	0
Sport, Art and Culture	Sport Clubs	23	0	ALL	0
	Art and Culture	7	1	4	40 000
Total		132	41		4 526 711

Table 1: Applications and grant recommendations per category

The detailed list of applications received and evaluated can be found with the item. Reason for not recommending organizations can be found in the note's column of detailed list of applications.

The Municipality would like to support as many as possible organizations delivering valuable services within our communities but cannot disregard requirements of the MFMA (56 of 2003)

Section 67 stipulating the responsibility of council to ensure donations are made to organizations who has the capacity to govern itself according to accepted financial practises and who can deliver the services for which the donation is required and benefiting the intended target audience.

Considering the changes in the ECD sector (function migration from the Department of Social Development to the Department of Education), the changes through the Second Amendment Bill to the Children's Act placing more responsibility on Local Government with regards to childcare facilities and the changes to the Municipal Grant in Aid Policy (to promote compliance with the Children's Act) emphasis should be on supporting local ECD's through the Grant in Aid process.

A second opportunity to comply with the GiA policy will be available to non-qualifying applicants during the comment period in April 2023.

Declarations of Interest:

Communication was distributed to all municipal officials and councillors with a possible vested interest to ensure that applications for outside work forms were completed.

All assessments were done by Community Development Department officials with inputs from the Sr Manager Community Services and the Manager Sport, Halls and Recreation for all applications received from sport clubs. Where declarations of interests were received relating to officials in the Community Development Department, the applicable officials were removed from the assessment process.

The following declarations relating to municipal officials and councillors are noted.

Applicant	Person	Organisation Capacity	Municipal Capacity	Declaration Received
Stellemploy	Portia Jansen	Director	Community Development Coordinator (Daughter of Director)	Y
Abba Stellenbosch	Portia Jansen	Chairperson	Community Development Coordinator (Daughter of Chairperson)	Y

6.3 Financial Implications

This report has the following financial implications:

2023-2024 (Cat A)
1 590 000

2023-2024 (Cat B)	2024-2025 (Cat B)	2025-2026 (Cat B)
2 936 711	2 979 890	2 535 300

DRAFT BUDGET TOTAL	4 526 711.00
2023-2024	

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

This report has no staff implications to the Municipality.

6.6 Previous / Relevant Council Resolutions:

None

6.7 Risk Implications

This report has no risk implications for the Municipality.

6.8 Comments from Senior Management:**6.8.1 Municipal Manager:**

Ensure that the following is included in the item:

1. Detail of declarations of interest listing councillors and officials.
2. The assessment process followed where councillors and officials were linked to applications.

Ensure that all municipal officials and councillors who serve on the boards of local organisations complete a request to perform outside / private work.

6.8.2 Chief Financial Officer:

Financial Services agree with the recommendations. The funding for the Grant in Aid donations will be provided for in the Medium-Term Revenue and Expenditure Framework (MTREF/Budget).

References

1. Positive cash balances indicative of minimum compliance - subject to 2
2. Deduct cash and investment applications (defined) from cash balances
3. Indicative of sufficient liquidity to meet average monthly operating payments
4. Indicative of funded operational requirements
5. Indicative of adherence to macro-economic targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)
6. Realistic average cash collection forecasts as % of annual billed revenue
7. Realistic average increase in debt impairment (doubtful debt) provision
8. Indicative of planned capital expenditure level & cash payment timing
9. Indicative of compliance with borrowing 'only' for the capital budget - should not exceed 100% unless refinancing
10. Substantiation of National/Province allocations included in budget
11. Indicative of realistic current arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)
12. Indicative of realistic long term arrear debtor collection targets (prior to 2003/04 revenue not available for high capacity municipalities and later for other capacity classifications)
13. Indicative of a credible allowance for repairs & maintenance of assets - functioning assets revenue protection
14. Indicative of a credible allowance for asset renewal (requires analysis of asset renewal projects as % of total capital projects - detailed capital plan) - functioning assets revenue protection

STELLENBOSCH MUNICIPALITY

PROPERTY TAX RATES FOR THE PERIOD 1 JULY 2023 TO 30 JUNE 2024

For the applicable provisions refer to the approved Rates Policy and Special Rating Areas Policy of the Municipality

PROPERTY RATES:

Property rates are levied in terms of Section 14(1) of the Local Government : Municipal Property Rates Act 6 of 2004 (the MPRA)

Category of Property	Tariff
Residential	R 0.005092
Industrial	R 0.011202
Business and Commercial	R 0.010693
Agricultural	R 0.001272
Mining	R 0.011711
Public Service Purposes	R 0.010693
Public Service Infrastructure	R 0.001272
Public Benefit Organisation	R 0.001272
Heritage	R 0.004073
Vacant Residential	R 0.010184
Vacant Other (not Residential nor Agricultural)	R 0.020367
Multiple Use Purpose (Each Component is categorised and rated as per above)	Multi Tariff

SPECIAL RATING AREAS (SRA):

Additional rates, for each SRA as approved by Council, are levied in terms of Section 22(1) of the MPRA

Special Rating Area	Tariff (Excl VAT)	Tariff (Incl VAT)
Jonkershoek	R 0.0009296	R 0.001069
Technopark	R 0.001607	R 0.001848

Relief measures for Special Rating Areas may be granted according to the approved Special Rating Area Policy.

RELIEF MEASURES:

Relief Measures are generally described in paragraph 8 of approved Rates Policy, and will be granted according to the approved Rates Policy. This includes the specific undermentioned relief measures:

1. Gross Monthly Household Income (Qualifying Senior Citizens & Disabled Persons)

A rebate as per the table below may be granted as per paragraph 8.3 of the approved Rates Policy

Gross Monthly Household Income (Income bands)				% Rebate
Up to			R 8 000	100%
From	R 8 001	To	R 11 000	75%
From	R 11 001	To	R 13 000	50%
From	R 13 001	To	R 17 000	25%

2. Municipal Valuation Threshold

On qualifying residential properties, up to a maximum valuation of R 250 000, which amount includes the R15 000 as per Section 17(1)(h) of the MPRA and the R 235 000 Reduction granted as per paragraph 8.2.1(ii) of the approved Rates Policy.

3. Stellenbosch Special Rebates

A rebate of 20% may be granted as per paragraph 8.6 of the approved Rates Policy.

STELLENBOSCH MUNICIPALITY

PLEASE NOTE, FOR ALL TARIFFS WHERE THERE IS A MAXIMUM DEMAND CHARGE AS PART OF THE TARIFF: In the event that the access demand or Notified Maximum Demand is exceeded more than once in a municipal financial year, the following additional charges will apply		
1. A 10% of the total Access Demand Charge/Notified Maximum Demand will be added to your municipal account on the 2nd occasion. 2. A 20% of the total Access Demand Charge/ Notified Maximum Demand will be added to your municipal account on the 3rd occasion. 3. A 30% of the total Access Demand Charge/ Notified Maximum Demand will be added to your municipal account on the 4th occasion. 4. On the 5 th occasion the municipality reserves the rights to disconnect your electricity supply and only when the electricity supply has been upgraded and bulk levy contribution paid will the supply be restored. * Occasion refers to the number of times/events the Access Demand/ Notified Maximum Demand has been exceeded		
9. External Wheeling		
Customer received power at low voltage (<400V) in c/kWh	28.00	32.93
Customer received power at medium voltage (>400V) in c/kWh	24.26	28.53
10. Generation for Own Use		
Customers that want to connect an Own Generation for Own Use only system to the municipal electrical grid without being compensated for reverse power flow can remain on their current tariff and continue to use their current meter.		

	Approved 2022/2023	Application 2023/2024
11. Generation for Own Use and Export		
Customers that want to connect an Own Generation for Own Use and Export system to the municipal electrical grid and who want to be reimbursed will have to do the following:		
1 The Municipality shall provide and install the requisite meters at the customer's cost.		
2 The customer will stay on the existing purchase tariff.		
3 For reimbursement the basic charge will be increased to include the automated meter reading cost.		
4 The reimbursement will only be for the export energy.		
5 Customer not allowed to generate more than his total consumption per financial year.		
12.Availability Fees (Per Annum)

BEGRAAFPLAASDIENSTE / CEMETERY SERVICES: WC024				
Waar 'n familie as behoeftige geregistreer is by die Munisipaliteit, kan die familie (slegs naaste familie) kwalifiseer vir 50% afslag, na goedkeuring van die relevante Direkteur, op die tarief vir 'n grafperseel. Die familie of delegasie moet skriftelik aansoek doen en rig aan die betrokke Direkteur.				
Hierdie vergunning is slegs van toepassing Maandae tot Saterdag- Vakansiedae uitgesluit. Plaaswerkers: brief ter bevestiging van plaaseienaar.				
When a family has been registered as an indigent beneficiary at the Municipality, the members of the family (not including extended members) qualifies for 50% discount, after approval by the relevant Director, on the tariff of a gravesite. The family or a delegate must apply in writing to the relevant Director. This concession is only applicable Mondays to Saturdays, excluding Public Holidays. Farm workers: must provide written confirmation from the farm owner.				
1. Grafperseel : kinders onder 12 jaar oud / Grave site children under the age of 12 years	821.80	757.49	113.62	871.11

Admin cost for record enquiries	0.00	0.00	0.00	0.00
BEGRAAFPLAASDIENSTE / CEMETERY SERVICES: OUTSIDE WC024				
Tariewe vir persone wat buite die munisipale grense gewoon het met sterfte datum = 4 maal die tariewe hierbo, behalwe die verkoop van nisse, waarop 'n 50% belading geld. Indien sulke persone reeds 'n graf besit, geld hierdie belading steeds op die maak van grafte. / Tariffs for persons residing outside of the municipal area at the time of death = 4 times the tariffs above, with the exception of the sale of nisses, to which a 50% surcharge applies. Should such a person already possess a grave site, the excess still applies to the digging of the grave and other related charges.				
Normale tariewe geld ten opsigte van begrafsie op Sondae en Openbare Vakansiedae vir geloofsgroepe soos vervat in die Verordening/ Normal tariffs will apply for burials on Sundays and public holidays for certain religious groups as determined by the By-Law.

The following groups have been identified for the discounted tariffs:

- (i) Schools located within the WC024 for an official school function: discounted tariff of 30% on the rental of a hall for the function to a maximum of one (1) function per financial year. Deposit fees must be paid in full.
- (ii) Churches located within WC024 for an official church function: discounted tariff of 30% on the rental of a hall for the function to a maximum of one (1) function per financial year. Deposit fees must be paid in full. Proof of location/residence will be required.
- (iii) Churches using a hall on a regular basis:
 - a Sermons are limited to 2 (two) hours per Sunday to accommodate other denominations/religious groups at the venue.
 - b The two Town Halls (Stellenbosch and Franschhoek), are excluded.
 - c The grant is subject to availability of the hall.
 - d A formal agreement will be entered into between the parties.
A once-off deposit fee per financial year applies as per the approved tariffs. If forfeited due to damage, etc, this will have to be repaid before access for the next event/ service will be granted.
 - e In addition, a rental fee equivalent to the tariff for 1 day (weekday tariff) applies as a monthly fee. The fee specific to the specific hall will apply.
 - f Furniture will be free of charge, but must be arranged and put back after the sermon by the hirer.
 - g Due to the constraints on municipal overtime, no municipal officials will be available on weekdays or weekends to perform any supervisory functions or assistance.
- (iv) Non-Governmental Organisations: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge.
- (v) Government Departments in other spheres of Government: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge.
- (vi) The six recognised vulnerable groups namely Aged, Disabled, Children, Youth, Women and People living on the Streets: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge. This discount is not available to individuals but is focused on interest groups representing the vulnerable groups.
- (vii) Individual families registered as indigent at the Municipality will be entitled to a 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full): Furniture, kitchen and utensils are free of charge. This rebate is for a maximum of one (1) booking per financial year per indigent family and the two Town Halls (Stellenbosch and Franschhoek are excluded).
- (viii) Organisations promoting the Greater Stellenbosch: 30% discount on rental of a hall or facility excluding the relevant deposit fees (which must be paid in full). Furniture, kitchen and utensils are free of charge. The following are examples of rebates that will be approved:
 - Van Der Stel Festival
 - Wine Festival (Previously Food and Wine Festival)
 - Flower Show (Stellenbosch and Pniel)
 - Stellenbosch Festival
 - Bastille Festival
 - CANSA sub-organizations within the WC024.

- (ix) Free access to municipal halls for youth activities. Provided that prior arrangement is made with the relevant staff.
- (x) Free access to municipal halls for Community Police Forums and Neighbourhood Watches situated within WC 024, limited to one meeting per month. Such requests should be electronically sent to the Law Enforcement- Community Safety Liaison Officer who will liaise with the Halls Bookings Office to verify availability. This rebate will only be considered for weekdays.
- (xi) The rebates mentioned in paragraphs i), ii), iv), v), vi) and vii) will only be considered for weekdays. All applications must be in writing and submitted to the Director: Community and Protection Services.
- (xii) The Director: Community and Protection Services may consider motivated applications for discount in line with the abovementioned and approve rebates.

WAYLEAVE TARIFFS FOR THE PERIOD 1 JULY 2023 TO 30 JUNE 2024 Applicable to services rendered from 1 July 2023					
DIREKTORAAT: INFRASTRUKTUUR DIENSTE DIRECTORATE: INFRASTRUCTURE SERVICES					
ASSET MANAGEMENT AND SYSTEMS SECTION WAYLEAVE ADMINISTRATION TARIFFS	Unit	Tariff 2022/23 (Incl. VAT)	Tariff 2023/24 (Excl. VAT)	VAT 15%	Tariff 2023/24 (Incl. VAT)
1.1 Administration fee for a miscellaneous wayleave to use the road reserve for a period of one month or less other than to install an underground service	per application	R 540.78	R 486.70	R 73.01	R 559.71
PLUS: Inspection Fee (once-off)	per application	R 1 081.58	R 973.42	R 146.01	R 1 119.43
For the temporary use of the road reserve for less than one month other than for the installation of an underground service, including for: the placement or storage of an item such as a chemical toilet, container, ladder, scaffolding, mobile crane or materials, pumping of concrete, excavation of trial holes. The fee is payable in advance. PLUS: The cost of all inspections during the course of the wayleave from services verification to the site rehabilitation after construction. The fee is payable in advance.					
1.2 Administration fee for a wayleave or permit to use the road reserve to install an underground service (total construction duration is less than ten working days)	per application	R 1 081.58	R 973.42	R 146.01	R 1 119.43
PLUS: Inspection Fee (once-off)	per application	R 2 163.15	R 1 946.84	R 292.03	R 2 238.86
For the use of the road reserve to install a pipe, tunnel, cable or duct for water, electricity, communication, or any other service – where the total construction duration is less than ten working days. The fee is payable in advance. PLUS: The cost of all inspections during the course of the wayleave from services verification to the site rehabilitation after construction. The fee is payable in advance.					
1.3 Administration fee for a wayleave or permit to use the road reserve to install an underground service	per application	R 3 244.73	R 2 920.25	R 438.04	R 3 358.29
PLUS: Inspection Fee (per month, based on the total construction duration)	per month of construction, per application	R 2 163.15	R 1 946.84	R 292.03	R 2 238.86
For the use of the road reserve to install a pipe, tunnel, cable or duct for water, electricity, communication, or any other service. The fee is payable in advance. PLUS: The cost of all inspections during the course of the wayleave from services verification to the site rehabilitation after construction. The fee is payable in advance.					
1.4 Tariff for authorised trenching across a municipal roadway (per metre of trenching)	Per m measured from 0.5m behind the kerb or road edge	R 5 407.88	R 4 867.09	R 730.06	R 5 597.15
For using an open trench to cross a roadway to install a pipe, cable or duct for water, electricity, communication or any other service. This tariff applies if the municipality grants written authorisation for a roadway trench before digging of the trench commences. The applicant may not begin roadway trenching before paying the roadway open trench fee and the Municipality issues written authorisation. The fee is payable when the written authorisation is issued. The roadway open trench fee is for the increased maintenance and reconstruction costs and inherent degradation of the roadway caused by roadway trenching. It applies even if the trench is reinstated in compliance with the Municipality's requirements and standards.					
1.5 Tariff for unauthorised use of the road reserve for a period of more than one month other than to install an underground service (100% of admin & inspection fee under tariff 1.1)	per month	R 1 622.36	R 1 460.13	R 219.02	R 1 679.15
For the use of the road reserve beyond the one month allowed by the miscellaneous wayleave application. This is for holders of an approved miscellaneous wayleave that has expired and has not been renewed.					
1.6 Tariff for unauthorised commencement of use of the road reserve	per month	R 5 407.88	R 4 867.09	R 730.06	R 5 597.15
For the commencement of use of the road reserve (i.e. encroachment) without an approved wayleave or before Stellenbosch Municipality issues a wayleave.					
1.7 Tariff for unauthorised use of the road reserve to install an underground service					
Where construction period was 10 working days or less (200% of admin & inspection fee under tariff 1.2)	per application	R 6 489.45	R 5 840.51	R 876.08	R 6 716.58
Where construction period was more than 10 working days (200% of admin & inspection fee under tariff 1.3)	per application	R 10 815.75	R 9 734.18	R 1 460.13	R 11 194.30
For the commencement of an installation of an underground service without an approved wayleave or before Stellenbosch Municipality issues a wayleave. Includes a 100% surcharge which applies regardless of whether Stellenbosch Municipality issues a wayleave.					

1.8 Tariff for unauthorised trenching across a municipal roadway (per metre of trenching) (200% of tariff 1.6) For commencement of a roadway trench without written authorisation or before the Municipality issues written authorisation for the roadway trench. Includes a 100% surcharge. The surcharge applies regardless of whether the Municipality issues a written authorisation, and regardless of whether the roadway trench is necessary.	Per m measured from 0.5m behind the kerb or road edge	R 10 815.75	R 9 734.18	R 1 460.13	R 11 194.30
1.9 Tariff for unauthorised after-hours use of the road reserve for the installation of an underground service For the commencement of use of the road reserve to install an underground service outside of business hours. Work performed under an approved wayleave can only be performed in regular working hours (Mondays – Thursdays 08:00-17:00 and Fridays 08:00-15h00). Working after hours, on public holidays or the weekend is not permitted.	per occasion	R 5 407.88	R 4 867.09	R 730.06	R 5 597.15
1.10 Tariff for excavations being left open for longer than ten working days On completion of the Work, all trenches and excavations in the public road reserves must be backfilled and reinstated as soon as possible in accordance with the technical specifications. Failure to do so represents an unacceptable safety hazard.	per occasion	R 5 407.88	R 4 867.09	R 730.06	R 5 597.15
1.11 Tariff for unauthorised site abandonment for a period exceeding 14 days The wayleave holder may not leave the site for more than fourteen days without permanently reinstating the site.	per occasion	R 5 407.88	R 4 867.09	R 730.06	R 5 597.15
1.12 Tariff for not cleaning or reinstating the road reserve within 14 days of completion The construction site's cleaning up, and the reinstatement to its previous condition is considered part of the Work. It must be completed within 14 days after the construction work has been completed.	per occasion	R 5 407.88	R 4 867.09	R 730.06	R 5 597.15
WAYLEAVE ADMINISTRATION REFUNDABLE DEPOSITS					
2.1 Services Deposit A services deposit is required where there is a risk of damage to municipal services. It is determined by the service co-ordinator and is based on the replacement value of the services in close proximity to the Works e.g. Cost of cable repairs: LV – R 40 000, MV – R 240,000, HV – R 1,250,000, 66 KV R – R 2,500,000, etc. This deposit is paid into the recoverable cost account of Stellenbosch Municipality. After completion, damages will be assessed, the site will be inspected, and all additional costs will be communicated to the applicant. Stellenbosch Municipality will refund the balance of the deposit once all works are complete, and upon final inspection where the Municipality's engineers are satisfied that the reinstatement meets the Municipality's standard and requirements.	per application				
2.2 Bank Guarantee / Appropriate Business Insurance Another acceptable form of partial deposit is a bank guarantee as surety in favour of Stellenbosch Municipality or appropriate business insurance. NB: The first R25,000 of the Services Deposit must be paid into the recoverable cost account of Stellenbosch Municipality. A Bank Guarantee or appropriate business insurance can cover the balance of the required Services Deposit.	per application				
WAYLEAVE ADMINISTRATION TARIFF NOTES					
3.1 Unless the context indicates otherwise, 'road reserve' includes a roadway, sidewalk footway and verge. 3.2 Suppose Stellenbosch Municipality incurs any costs resulting from Work in or use of the road reserve including remedying substandard or non-compliant reinstatement repairing damage, 3rd party claims, or cleaning of the site. In that case, the actual costs will be offset against the deposit (plus 10% administration fee, including VAT). The Municipality will refund the balance if any. 3.3 All internal Departments or State Funded Projects (National or Provincial), where Stellenbosch Municipality will take over the infrastructure, will be exempted from paying the Administrative Fee, Refundable Deposits Non-Refundable Payments and/or Penalties. 3.4 No micro trenching is allowed in the WC024.

TARIFF RULES
BUILDING DEVELOPMENT MANAGEMENT TARIFF STRUCTURE FOR 2023/2024
1. EFFECTIVE DATE

1.1 Fees are effective from 1 July 2023.

1.1. These tariffs replace all previous tariffs charged by the Building Development Management branch of Council.

2. METHOD OF PAYMENT

2.1 Fees can be paid in cash or electronically.

3. TIME OF PAYMENT

3.1 Fees are due when an invoice for the proposed application is presented for payment

3.2 The Building Plan Application **is deemed to be submitted after proof of payment** and no processing of applications will commence until receipt of payment of the fee/s is verified by finance.

4. PROOF OF PAYMENT

4.1 A receipt must be issued to the applicant for all fees received. A copy of the receipt must be attached to the application.

5. REFUNDS

5.1 All fees payable is set fees and are not deposits.

5.2 Applications are valid for 12 months from date of payment and building plan fees on lapsed plans are not refundable.

5.3 Building Plan Fees will only be waived or refunded in circumstances considered extraordinary by the Director: Planning & Economic Development, before commencement of evaluation process.

6. SUBJECT TO CHANGE

6.1 All fees and business rules are subject to change.

6.2 The fees applicable at the time of submission of the application are payable.

7. EXEMPTIONS

7.1 The following applications are exempt from the payment of scrutiny fees:

- Applications from Central or Provincial Government for work funded by the Government and for use by Government Departments. Building plan applications must however still be submitted and approved prior to commencement of any building works.
- Building Plans for all buildings and structures erected for and by the Local Authority. Building plan applications must however still be submitted and approved prior to commencement of any building works.
- All applications required to address / give effect to successful resettlement claims in terms of the Restitution of Land Rights Act, as well as in cases where land has been allocated to a successful

claimant, such claimant is allowed to submit only one application (building plan), for residential development only, which application(s) will be exempted from building plan fees as per normal fees.

- Applications from Orphanages and Homes for the Aged registered under the **National Welfare Act 79 of 1965 (As amended)**, as well as any welfare institutions in the discretion of the Director.

Building plan applications must however still be submitted and approved prior to commencement of any building works.

- The Director: Planning & Economic Development may grant or refuse applications for the exemption of some or all the applicable Building Development application fees of a particular application which are necessitated due to changes to developments made at the request of the Spatial Development Planning department of the Stellenbosch Municipality in the interests of environmental or heritage conservation.

- In cases where a successful land claimant submits a building plan for a purely non-residential development (which does not include any residential development) on land so obtained, such non-residential application is subject to all the fees applicable to any other similar application which was not obtained by way of the Restitution of Land Rights Act.

- If a successful land claimant submits a building plan for a mixed-use development (which includes non-residential development) on land so obtained, such non-residential building plan gets charged the normal fees as specific for such application as if the non-residential part of the application is a separate application from the residential part of the development.

8. OTHER FEES

8.1 Requests for information: if information is specifically requested in terms of the "Access of Information Act," the relevant fees as prescribed in terms of that Act apply.

8.2 Printing fees:

- a) Printing fees are charged per page according to size in accordance with the applicable tariffs.
Copies will only be made in the sizes that are available at a particular office.

9. APPLICATION OF THE TARIFFS

9.1 Minor Building Work: As defined in the Building Regulations:

Each item charged for separately even if part of a full plan submission.

- Aviary
- Solid fuel store not exceeding 10m² in area and 2 m in height
- Tool shed not exceeding 10m² in area
- Child's playhouse not exceeding 5m² in area
- Cycle shed not exceeding 5m² in area
- Greenhouse not exceeding 15m² in area
- Open sided car, caravan or boat shelter or a carport where such shelter or carport does not exceed 40m² in area
- Any pergola
- Private swimming pool
- Change room, not exceeding 10m² in area, at a private swimming pool
- Lapa's and gazebos (with any type of roof covering) under 40m² in area

- Any free-standing wall
- Reconstruction of fire and natural disaster damaged buildings at applicable rate as per single/other/non-residential categories
- Any other structure, not being a Minor Building Work as per definition, are charge per meter square of the applicable category

9.2 Applications for Alterations and Additions: Plans will be assessed as follows:

- Additions: assessed on the area (square metres) per category
- Alterations: assessed on the QS/Architect estimated value and calculated at 0.008% of the value

9.3 Applications for Provisional Authorisation to Commence with the erection of a Building:

Applications for provisional authorisation to proceed with the erection of a building prior to final building plan approval will be considered on condition that:

- The application has been formally submitted (the full scrutiny fees paid) and the plans have been circulated to the applicable service branches.
- The application for provisional authority is in writing and is fully motivated.
- The prescribed provisional authorisation fee is paid. This fee is not refundable.
- The application is for specific items of work clearly defined on the working drawings accompanying the building plan submission.
- Full Planning (Zoning) approval has been obtained or is otherwise in compliance with all applicable zoning provisions.
- The property must be not encumbered by private restrictive title deed conditions.
- Provisional authorisation may be subject to applicable conditions and may include to limit the extent to which the subject building works may be implemented under such provisional authorisation prior to final approval of the building plan application.
- Any work done prior to the approval the building plans is entirely at the applicant's risk and should the plans require amendments or should the application be refused for any reason the work already completed will have to altered or removed as the case may be at the applicant's expense.

9.4 Minimum Fee for Social Responsibility – to the discretion of Director: Planning & Economic Development as specified.

An approved minimum application fee for private Subsidised Housing Projects will be considered on condition that:

- Subsidised Proof in accordance with the Housing Code to be presented and submitted with building plan applications
- The minimum application fee is applicable to each application and is not a bulk application fee
- Pre-submission notification to be submitted, indicating the number of erven, with erf numbers approved for subsidised housing

These business rules must be read in conjunction with the "BUILDING DEVELOPMENT FEES TARIFF STRUCTURE FOR 2023/2024".

These tariff rules must be read in conjunction with the "BUILDING DEVELOPMENT MANAGEMENT TARIFF STRUCTURE FOR 2023/2024".

**TARIFF RULES
LAND USE MANAGEMENT & SPATIAL PLANNING, HERITAGE AND ENVIRONMENT
TARIFF STRUCTURE FOR 2023/2024**

- 1.12 All fees and business rules are subject to change.
- 1.13 The specific fee applicable at the time when the application is accepted by Council, is payable.

LAND USE MANAGEMENT**2 APPLICATION FEES****Description**

- 2.1 Application fees are the minimum fee payable for submitted applications.
- 2.2 All fees are payable per item applied for (each consent, departure, rezoning, etc, charged separately) per property in line with the Stellenbosch Land Use Planning By-law , where applicable. Unless application is simultaneously made for the consolidation or subdivision of more than one property, which is directly adjacent, cadastrally bounded to each other, owned by the same property owner and submitted as one application for consideration. Only one application fee will be applicable for all erven included in the application.

Rezoning & Determination of a zoning

- 2.3 Rezoning fee is payable per application.
- 2.3.1 Determination of a zoning is payable per application.

Permanent Departure fee

- 2.4 The departure fee must be charged per application per property (i.e. if a building departs from the street and lateral building lines, coverage as well as from height, then the applicable fee must be charged as a single fee per property). In the case of registered indigent owners, as well as subsidised housing schemes, no departure fee at all would be payable.

Temporary Departure, Permission in terms of the Zoning Scheme (Additional Uses/ Technical Approvals), Permission in terms of condition in the Title Deed, Occasional Use of Land, Consent Use in terms of the Zoning Scheme

- 2.5 Temporary departure, Permissions, Occasional use of land, Consent uses and Technical approvals, etc. are charged separately per application per property in addition to any departures (regulations) applied for.
- 2.5.1 A separate fee is applicable in respect of applications for temporary departure, consent use or special development in order to establish a house shop and/or early childhood development centres (ECD's) / home day care centres or day care centre and all Occasional use of Land applications.

Subdivision & Consolidation & Amendment or Cancellation of subdivision plan (inclusive of general plan/diagram)

- 2.6 Application fee is payable per application submitted.

Exemption Certificates (subdivision/consolidation)

- 2.7 This fee is payable for subdivisions/consolidations which are exempted in terms of the applicable legislation. This fee is payable per application submitted.

Removal, Relaxation, Suspension and Amendment of Restrictive Title Deed conditions

- 2.8 This fee is payable per application per property submitted.

Amendment, Deletion or Imposition of conditions in respect of an existing approval

- 2.9 This fee is payable per application submitted.

Extension of validity period of approval

- 2.10 Fees should be paid as depicted on the tariff schedule. For all applications for extension the fee will be 50% of the current application fee, for the financial year in which the application for extension is submitted, inclusive of VAT.

Permission in terms of condition of approval or Administrative permission or approval inclusive of but not limited to: Site Development Plans; HOA Constitutions; Architectural / Design / Aesthetic Manuals or Guidelines, Landscaping Plans & Phasing Plans

- 2.11 This fee is payable per application submitted. All permissions or approvals that is required and originates from a condition of an approval attached to a land use application granted by the municipality, will be exempted from this tariff. Any subsequent applications for the amendment to such permissions/ approvals on the initiative of the applicant will not be exempted.

Closure of Public Place / Roads or part thereof

- 2.12 This fee is payable per application submitted.

Disestablishment of Home-Owners Association

- 2.13 This fee is payable per application.

Rectify failure of a Home-Owners Association to meet its obligations

- 2.14 This fee is payable per application.

Permission for reconstruction of existing building constituting a non-conforming use

- 2.15 Permission required for the reconstruction of an existing building that constitutes a non-conforming use that is destroyed or damaged to the extent that it is necessary to demolish a substantial part of the building. This fee is payable per application.

Naming and numbering of Streets, Places and Buildings

- 2.16 This fee is payable per application submitted.

Renaming of Streets, Places and Buildings

- 2.17 This fee is payable per application submitted.

3 ADVERTISING FEES**Advertising framework**

- 3.1 Advertising: is required in terms of the relevant land use legislation.
- 3.2 Advertising will be done in accordance with the land use legislation and fees will be charged accordingly.

- 3.3 Advertising in the press and advertising which consists of the serving of notices to interested and affected parties are charged independently (with different fees being applicable). No 'serving of notice' fee is applicable when notifying the applicant of the outcome of an application or notifying any objectors of the right of appeal.

Advertising in the press

- 3.4 The fee for advertising in the press is applicable whenever press advertising is required in a local weekly newspaper or daily newspaper and/or Provincial Gazette. This fee is only payable when Council undertakes the advertising.
- 3.5 Advertising in the press is a basic advertising fee. Should the actual costs be more, the applicant is liable for such extra costs upon receipt of a quote.
- 3.6 Composite applications for the same property when advertised collectively in the press carry a single advertising fee.

Serving of notices

- 3.7 The fee for serving of notices is payable when Council conducts the serving of notices. This fee is not applicable when the applicant conducts the advertising.
- 3.8 The fee applicable for every 10 notices or part thereof to be served by Council is depicted in the schedule.
- 3.9 The 'serving of notices' fee is also applicable when notices are delivered by Council to interested and affected parties.

4 OTHER

Deviation from Council Policies and By-laws

- 4.1 Deviation from Council Policies and By-laws are charged per application per property.

Appeal

- 4.2 Appeal fees are charged and are payable per appeal submitted in respect of any decision taken by Council.

Intervener Status

- 4.3 This fee is payable per application submitted.

Transfer clearance

- 4.4 Transfer clearance fees are payable per erf for which application is made for clearance in terms of the applicable land use legislation and includes a Power of Attorney (POA) and a Certificate of Registered Title (CRT).

Zoning Certificate

- 4.5 This fee is payable when a formal zoning certificate is issued. Payment of this fee is required in respect of each erf for which a zoning certificate is requested.

Business Licence

- 4.6 This fee is payable in respect of each application received for the issuing of a business licence.

5 CONTRAVENTION PENALTY

- 5.1 Contravention penalty is applied in accordance with a Council Policy, By-law and/or any such enabling planning legislation and associated provisions.
- 5.2 A contravention penalty as stipulated in the Stellenbosch Municipal Land Use Planning By-Law, is payable within 30 days after approval of the utilisation of the land and/or construction activity.
- 5.3 The Contravention penalty is payable within 30 days from date of approval of the land use application that was submitted as a result of a contravention notice that was served.
- 5.4 If the property is to be transferred, the Municipality will only issue a certificate in terms of the Stellenbosch Municipal Land Use Planning By-Law, upon proof of payment of the contravention penalty.
- 5.5 No occupancy certificate for the building construction will be issued unless proof of the payment of the contravention penalty is submitted by the applicant.
- 5.6 Formula for Contravention Penalty: **((actual area/m² multiply by penalty rate A) + (indirect area /m² multiply by penalty rate B)) x (valuation/m²) = R/m²**
The area of the construction activity (actual area per square meter x penalty rate A) and/or land area (indirect area per square meter x penalty rate B) that is unlawfully utilised in terms of the relevant zoning of the property) multiplied by (the municipal value per square meter (m²) of the land and/or building as stipulated in the current valuation roll of the municipality as on the date that is indicated on the contravention notice)
- 5.7 **Definitions:**
- 5.7.1 "Area" refers to the utilisation of the land and/or work on the land and/or construction activity on the land and/or any building on the land and/or structure on the land that is being utilised in a manner other than permitted in the zoning scheme without the prior approval of the municipality.
- 5.7.2 "Valuation" refers to the municipal valuation of any land and/or building as indicated in the current Municipal Valuation Roll.
- 5.7.3 "Date" refers to the date as indicated on the contravention notice.
- 5.7.4 "Property value" refers to the Value of property as reflected in the most recent municipal valuation roll.
- 5.7.5 "Valuation year" refers to the year of the last municipal valuation.
- 5.7.6 "Annual adjustment" refers to the Value adjustment (if any) on house price index or any other approved by the municipality.
- 5.7.7 "Size of property" refers to the area in square meters of the property as indicated on the title deed.
- 5.7.8 "Direct area of contravention" refers to the area in which the contravention occurs, e.g. rooms, floor area, coverage, and contravention measured in square meters.
- 5.7.9 "Indirect area of contravention" refers to the area complementary to the contravention, e.g. area used for parking, storage, outdoor activities or purposes.
- 5.7.10 "Penalty Rate A" refers to the rate at which penalty amount will be calculated on area of contravention as approved annually by Council.
- 5.7.11 "Penalty Rate B" refers to the rate at which penalty amount will be calculated on indirect area of contravention as approved annually by Council.

- 5.7.12 “Amount payable” refers to the total amount payable as a contravention penalty in terms of the relevant bylaw.

6 PRINTING FEES

- 6.1 Printing fees are charged per page according to size and colour. The three types of copies/prints are mono (black & white), Colour line prints and Full Colour prints (photo). Copies will only be made in the sizes that are available at a particular office.
- 6.2 The fee charged for electronic information does not include the CD, which must be supplied by the applicant.
- 6.3 If information is specifically requested in terms of the Promotion of Access to Information Act, 2000, the relevant fees as prescribed in terms of that Act applies.

SPATIAL PLANNING, HERITAGE AND ENVIRONMENT

7 PLANNING ADVISORY COMMITTEE SCRUTINY FEE

- 7.1 Planning Advisory Committee Scrutiny fees (Aesthetics Committee) are charged when a matter needs to be submitted to the Planning Advisory Committee (Heritage/Aesthetics Committee) for scrutiny, when buildings are older than 60 years or situated in the historical core. The fees are payable per application and are categorized as follows:
- 7.1.1 Minor alterations to existing buildings <500m²;
- 7.1.2 Major alterations to existing buildings >500m² and new developments.

8 COMPLEXITY FEES (ADDITIONAL FEES FOR HIGH IMPACT APPLICATIONS) AND AMENDMENT OF URBAN EDGES.

Description

- 8.1 Additional fees are charged on top of the basic application fees when a Heritage Impact Assessment (HIA), Environmental Impact Assessment (EIA) and Traffic Impact Statement / Assessment (TIA/S) are required, since such applications are more complex and involve more work. The complexity fees are charged to cover additional expenses due to the processing of complex applications, resulting from the fact that such applications normally are more complicated to process and due to the fact that it requires input from specialised staff which would not normally be involved in the assessment of applications which doesn't require an impact statement/assessment. The EIA and HIA fees are charged up front like all other fees if the application requires assessment in terms of the NEMA and/or NHRA. If an EIA and/or HIA fee has been paid when the SPLUMA/LUPA/By-law application was submitted and it turns out in the end that it did not lead to a full EIA / HIA, the EIA/HIA fee is not refundable. Complexity fees are charged per assessment/study.

9 APPLICATION FOR SIGNAGE

- 9.1 Application fees for signage (including flags) are paid in respect of each sign applied for. A minimum fee for signs smaller than 1m² is in place, but when signs are larger than 1m², the minimum fee plus the enhancement fee will be payable for every additional m².

10 EXEMPTIONS

- 10.1 All indigent residents which are registered as such with the Municipality and with proof submitted together with all applications for all permanent Departures will be exempted from the application fees applicable to permanent Departures.
- 10.2 All applications submitted by or on behalf of Council are exempt from all the application, advertising and other fees in the attached table. This exemption only applies to applications made by Council or where Council is the developer. All other government institutions must pay the normal fees.
- 10.3 All applications for a zoning certificate from provincial or national government are exempted from the application fees applicable to zoning certificates for state owned land.
- 10.4 Applications for the establishment of state, provincial and/or council subsidised housing schemes are exempt from all the application and other fees in the attached table. Advertising fees are payable in this regard. Application fees are, however, applicable in subsidised housing areas after the establishment of the areas has been completed; subject to the conditions in the establishment of any of the less formal townships.
- 10.5 All applications required to address / give effect to successful resettlement claims in terms of the Restitution of Land Rights Act, as well as in cases where land has been allocated to a successful claimant, such claimant is allowed to submit only one application, for residential development only (but including subdivision, removal of restrictions, etc, related to such residential development), which application(s) are exempt from all the application and other fees in the attached table. Advertising fees are payable in this regard. If a successful land claimant submits a mixed-use development application (which includes non-residential development) on land so obtained, such non-residential development gets charged the normal fees as specified for such application, including advertising and service of notice fees, as if the non-residential part of the application is a separate application from the residential part of the development. In cases where a successful land claimant submits a purely non-residential development application (which does not include any residential development) on land so obtained, such non-residential development application is subject to all the fees applicable to any other similar application which wasn't obtained by way of the Restitution of Land Rights Act/Rural Act 9.
- 10.6 The above fees, if not specifically exempted, also applies to applications in the BCDA areas where Council is the commenting authority.
- 10.7 The Director: Planning & Economic Development may grant or refuse applications for the exemption of some or all the applicable fees of particular applications which are necessitated due to changes to the developments made at the request of the Environmental Management Services in the interest of environmental or heritage conservation.
- 10.8 The Director: Planning & Economic Development may grant or refuse applications for the exemption or reduction of contravention penalties based on objections to a compliance notice submitted to the Development Management Department as provided for in the Stellenbosch Municipal Land Use Planning By-Law.

Exemption

The Municipal Manager may at his or her sole discretion, and after taking into consideration the merits of a specific application, exempt an applicant from paying the tariffs as set out above, or at a reduced rate.

APPENDIX 4

STELLENBOSCH MUNICIPALITY

SUMMARY OF CHANGES TO BUDGET AND RELATED POLICIES

2023/2024

STELLENBOSCH MUNICIPALITY

SUMMARY OF POLICIES

Policy/ By-law	Summarized Nature of change
Pool Vehicle Policy	New Policy
Infrastructure Asset Unbundling Policy	New Policy
Borrowing, Funds and Reserves Policy	<p>2023/24 Borrowing, Funds and Reserves Policy Changes:</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical and language changes and layout improvements were applied to enhance the readability of the document. The details of such may be traced via the "Track Changes" that has been activated in said documents.</p> <p>Substantial Changes</p> <p>Major changes were made to the Budget Implementation and Monitoring Policy. The details of such may be traced via the "Track Changes" that has been activated in said document.</p> <p>4.1. OPERATING BUDGET</p> <p>The Operating Budget should be cash funded. The Operating Budget is funded from the following main sources of revenue:</p> <ul style="list-style-type: none"> a) Property Rates; b) Service Charges; c) Government Grants and Subsidies; d) Rental of facilities and Equipment; e) Other revenue, fines, interest received etc.; <p>The following guiding principles apply when compiling the Operating Budget:</p> <ul style="list-style-type: none"> a) Provision for revenue that will not be collected is made against the expenditure item provision for bad debt and based on actual collection levels for the previous financial year and the reasonably projected annual non-payment rate; j) Sufficient provision must be made for the maintenance of existing infrastructure based on affordable levels. The maintenance budgets are normally lower than the recommended levels as a guiding principal repair and maintenance should constitute between 5% and 8% of total operating expenditure and should annually be increased incrementally until the required targets are achieved.

Policy/ By-law	Summarized Nature of change
	<p data-bbox="527 220 836 247">4.2. CAPITAL BUDGET</p> <p data-bbox="617 283 909 315">c) External Borrowing:</p> <p data-bbox="657 373 1521 535">a. The borrowing requirements as contained in the Borrowing Policy in paragraph 6 are used as a basis to determine the affordability of external loans over the Medium Term Income and Expenditure Framework. The ratios to be considered to take up additional borrowings are as follows, unless in contravention with any loan covenants:</p> <ul style="list-style-type: none"> <li data-bbox="706 535 1372 567">i. Estimated long-term credit rating of BBB and higher; <li data-bbox="706 567 1521 640">ii. Total Long-term Debt to Total Operating Revenue (excluding conditional grants and transfers) not to exceed 45%; <p data-bbox="527 667 1521 735">Capital Cost (Interest Paid and Redemption) as a % of Total Operating Expenditure not to exceed the norm between 6 -8 %.</p> <p data-bbox="527 793 803 825">1. RESERVES POLICY</p> <p data-bbox="527 850 1521 919">All reserves are “ring fenced” as internal reserves within the accumulated surplus, except for provisions as allowed by the General Recognized Accounting Practices (GRAP):</p> <p data-bbox="625 951 982 982">a) Housing Development Fund;</p> <p data-bbox="625 1050 1169 1081">a) Cash generated from Operating Activities:</p> <ul style="list-style-type: none"> <li data-bbox="657 1134 1521 1228">a. The Municipality has maintained a strong ability to generate surplus operational cash flow which it has used to fund most of its capital spending in the past; <li data-bbox="657 1270 1521 1428">b. In the past depreciation charges could be considered sufficiently cash backed based on the cash surplus generated prior to capital spending. However, going forward should capital spending increase sharply it will result simultaneously with Depreciation charges increasing sharply which may therefore in future not be fully supported by cash. <li data-bbox="657 1470 1521 1564">c. Depreciation is a method to generate future cash. Therefore, it is prudent to annually measure the cash coverage for depreciation charges until it is fully funded from cash through tariff setting. <li data-bbox="657 1606 1521 1824">d. As at year end it is to be determined whether the Municipality meets its Minimum Liquidity Criteria as stipulated in the Liquidity Policy, excess cash in addition to this prescribed level is to be calculated and appropriated to the Capital Replacement Reserve and no more than 80% of the balance of the Capital Replacement Reserve as at year end should be allocated to the following year’s capital budget unless sufficient recommendations are made to Council to substantiate such a decision.

Policy/ By-law	Summarized Nature of change
Budget Implementation and Monitoring Policy	<p>2023/24 Budget Implementation and Monitoring Policy</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical changes and layout improvements were applied to enhance the readability of the document. The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p>Substantial Changes</p> <p>Major changes were made to the Budget Implementation and Monitoring Policy. The details of such may be traced via the “Track Changes” that has been activated in said document.</p>
Cash Management and Investment Policy	<p>2023/24 Cash Management and Investment Policy</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical changes and layout improvements were applied to enhance the readability of the document. The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p>Substantial Changes</p> <p>The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p><i>Substantial changes made to the cash management and investment policy from pages 5 to 8 are as follow:</i></p> <p>Cheque Management were replaced by Petty Cash Withdrawal on point 3.2.2 (page3). Cheques are not used as a method of payment or accepted as payment.</p> <p>3.2 Bank Accounts</p> <p>3.2.2 Petty Cash Withdrawal</p> <p>Petty Cash is replenished by completing a petty cash replenish form provided.</p> <p>3.2.3 Delegation/Rights</p> <p>The incumbents of the following posts are authorized to sign petty cash request forms and authorise electronic payments on behalf of Council:</p> <p>3.2.3.1 Signatories for signing of cheques were removed from policy</p> <p>3.2.3.2 Electronic Funds Transfer (EFT) and Petty cash request</p> <p>A-Signatories:</p> <p style="padding-left: 40px;">Chief Financial Officer</p> <p style="padding-left: 40px;">SNR Manager: Financial Management Services</p>

Policy/ By-law	Summarized Nature of change
	<p>SNR Manager: Revenue and Expenditure</p> <p>Manager: Expenditure</p> <p>Manager: Revenue</p> <p>SNR Manager: Supply Chain Management</p> <p>Manager: Budget and Costing</p> <p>Manager: Financial Statements, Compliance and Reporting</p> <p>Manager: Financial Asset Management</p> <p>B-Signatories:</p> <p>Chief Accountant: Consumer Accounts and Valuations</p> <p>Senior Accountant: Cash Management and Credit Control</p> <p>Senior Accountant: MFMA Reporting and Compliance</p> <p>Senior Accountant: Financial Statements and Reconciliations</p> <p>Chief Accountant: Asset Management</p> <p>Chief Accountant: SDBIP Monitoring and Budget Control x2</p> <p>Senior Accountant: Creditors and Payroll</p> <p><i>Each electronic payment and petty cash request form needs to be authorized by at least two A-Signatories, or one A-Signatory and one B-Signatory.</i></p> <p><i>B Signatories were amended: the word Senior replacing the word Chief for Accountant: Financial Statements and Reconciliations and Accountant: MFMA Reporting and Compliance. Petty cash request were added to the heading and the petty cash request form were added to the paragraph above.</i></p> <p>4.CASH MANAGEMENT PROCEDURES</p> <p>4.5 Deposit Books</p> <p>Each satellite-office cashier has an enumerated deposit book, as each pay point has a number. The Senior Clerk: Cashier orders books from the bank when needed. Head Office cashiers use the cash-vault machines for all deposits.</p> <p>4.6 Other payment methods</p> <p>4.6.2 3rd Party</p> <p>Payments can be made at any EasyPay and pay points. This information is extracted and uploaded on a daily basis from EasyPay and and credited against the client's accounts.</p>

Policy/ By-law	Summarized Nature of change
	<p>4.6.3 Cheque Deposit (Only bank guaranteed cheques will be accepted) and 4.6.4 Mailed Bank Guaranteed Cheques were removed from policy because the municipality does not accept any cheques.</p> <p>4.6.5 Rejected Debit Orders and/or Electronic Payments</p> <p>When debit orders are rejected by the respective banks, the full balance will immediately become payable. If debit orders are rejected three times the debit order will be cancelled.</p> <p>4.6.5.1 In the event that a debit order is rejected due to insufficient funds, or the clients bank account being closed (or other reasons) an admin charge , as approved by council, will be levied to the debtor account. An admin charge will not be levied in the event of death or where the error arises on the municipalities side.</p> <p>4.6.6 Private Money</p> <p>No Municipal employee is allowed to:</p> <ul style="list-style-type: none"> - Use Council's cash funds at any stage to be replaced at a later stage. - Use his/her own money as cashier float. - Safeguard private money amongst Council's cash (e.g., Cashier drawers, petty cash boxes, safes. Cash vault machines (where installed) etc.) <p>5.3 Diversification</p> <p>Council will only make investments, as prescribed by Section 6 of the Municipal Investment Regulations, with approved institutions as set out in par 5.2 above. Excluding investments made per Executive Mayoral Committee resolution not more than 50% of available funds will be placed with a single institution. The discretion of management should be used when investing funds into the institution quoting the highest rate versus diversification of investment portfolio. Should the difference between the investment quotes be minimal, a decision can be made to invest in the lower quote for the diversification of investment portfolios.</p> <p>5.5 Internal Controls Over Investments</p> <p>5.5.1 Delegations</p> <p>5.5.1.1 In terms of Section 60(2) of the Local Government: Municipal Systems Act, (Act 32 of 2000) (the MSA), the Council may only delegate to the Municipal Manager (MM) the power to make decisions on investments on behalf of the Municipality.</p> <p>5.5.1.2 In terms of section 79 of the Act, the Accounting Officer has delegated to the Chief Financial Officer (CFO), in writing, his/her duty under section 65(2) (h) to manage the Council's available working capital effectively and</p>

Credit Control and Debt Collection Policy	<p>2023/24 Credit Control and Debt Collection Policy</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical changes and layout improvements were applied to enhance the readability of the document. The details of such may be traced via the "Track Changes" that has been activated in said document.</p> <p>Substantial Changes</p> <p>The details of such may be traced via the "Track Changes" that has been activated in said document.</p> <p><i>Substantial changes made to the credit control and debt collection policy are as follow:</i></p> <p>2.2.2 Water Services:</p>												

Policy/ By-law	Summarized Nature of change
	<p>(a) The Stellenbosch Municipality may in the event of an owner/debtor/consumer exhibiting a trend of non-payment of accounts during a twelve (12) month period prior to a non-payment event (i.e. 3 times or more non-payment events) consider the installation of water demand management devices with pre-paid functionality in a bid to limit credit risk. The Municipality may also consider upward adjustment of the relevant consumer deposit/bank guarantee.</p> <p>(b) In addition to the above, Stellenbosch Municipality will restrict water usage on a property for a high-usage non-paying owner/debtor/consumer or a non-paying indigent owner if such user fails to pay for water usage in excess of 6k/ (kilolitre). These restrictive measures will be applied on said property as described and according to the table below.</p> <p>The process to limit the outstanding debt basically follows a three-stage approach. The stages corresponding to the limiting levels as per the table below are dependent upon the level of usage at the commencement of debt management and the "Category of usage" of the property. The stages are administered as follows:</p> <ul style="list-style-type: none"> (i) It will be incumbent of the user to present proof of occupancy if in the opinion of said user the number of persons on the property is different as to the "Category of usage" applied by Stellenbosch Municipality. Upon any proven discrepancies the Stellenbosch Municipality may apply the necessary corrective actions. (ii) The lowest stage of service for any "Category of usage" is the "Free Basic Service" level [6k/ (kilolitre)]. (iii) If the defaulting user is using more than the monthly usage of the "1st Restrictive limit" as per the table below at the commencement of debt management, the user's maximum usage will be set to the corresponding "1st Restrictive limit" level. (iv) If the defaulting user is not using more than the monthly usage of the "1st Restrictive limit" then the level will, at the commencement of debt management, be set based upon the range of a given lower level within which said user's usage corresponds. (v) Upon the user defaulting after any previous stage had been set and to mitigate further debt the service level will be downgraded from the highest level at the commencement of debt management via reactionary stages until that user is at the lowest stage of service. (vi) The Stellenbosch Municipality will determine the timeframes between stages which may be different for the users involved. (vii) After the implementation of any restrictive measures as describe above, and said user has fully paid the outstanding debt, the Stellenbosch Municipality may after consideration and approval by the Manager Revenue or the Accountants in the Credit Control Section reverse the restrictive measures, but nevertheless in discreet ascending stage steps. Each stage will be time managed to prove successful payment of usage during said stage before any other stage is considered. If said user should default during this process all restrictive measures will be reverted.

Development Charges Policy	<p>2023/24 Development Charges Policy</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical changes and layout improvements were applied to enhance the readability of the document. The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p>Substantial Changes:</p> <p>The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p><i>Substantial Changes made to the Development Charges policy are as follow:</i></p> <p>6. OBLIGATION TO IMPOSE A DEVELOPMENT CHARGE</p> <p>6.1 Development Charges Apply</p> <p>When the Municipal Planning Tribunal or delegated authority approves a land development application which will or may result in intensified land use with an increased demand for external municipal engineering services infrastructure, it may, by imposing a condition of approval in terms of section 66 of the Planning By-Law, levy a development charge proportional to the calculated municipal public expenditure that has or may be incurred to satisfy the increased demand according to the normal need arising from such approval.</p>		

Policy/ By-law	Summarized Nature of change
	<p>6.4 A developer must pay to the Municipality the full amount of the applicable development charge due prior to the exercise of any rights to use, develop or improve the land arising from the approval of a land development application, unless in the case of a phased land development –</p> <p>6.4.1 The Municipality authorises phased payments in the conditions of approval of land development applications, to take into account the timing of the proposed phases of the land development; and</p> <p>6.4.2 The Municipality may approve payment of the outstanding development charge into an attorney's trust account, in cases where this will enable the completion of infrastructure projects in lieu of Development Charges that are not yet completed at the time that clearance is sought and if such withholding of clearance is deemed to be unfair towards the developer.</p> <p>An example of this is where the Municipality has requested the upgrade or installation of a service in-lieu of Development Charges, of which the upgrade was not an original condition of approval, or which is not specifically triggered by the development, but of which the immediate upgrade will be of benefit to the Municipality and/or the greater public. The conditions for the utilisation of the funds in this trust account shall be stipulated in a letter of undertaking issued by the trust attorney and as agreed to in writing by the Municipality.</p> <p>7.CALCULATION OF DEVELOPMENT CHARGES</p> <p>7.7 Where possible, unit costs for each municipal infrastructure service should be re-calculated every five years to take into account the current and planned capacity for each municipal infrastructure service at the date of re-calculation, and any other relevant factors.</p> <p>7.8 The unit costs were last recalculated for 2022/23. No adjustment factor between 2021/22 and 2022/23 was approved by Council as the new rates became effective immediately. As an escalation factor is still required in some instances, for instance to escalate the value of work done in lieu of DCs over multiple financial years, this increase is hereby confirmed as 14.7415%.</p> <p>7.9 In the event of the Municipality discovering that a gross error has occurred in the determination of the development charges, or if there are justifiable reasons to review the charges, it may, by means of a council resolution, correct such error or review the charges.</p> <p>9.INSTALLATION OF EXTERNAL ENGINEERING SERVICES INSTEAD OF THE PAYMENT OF DEVELOPMENT CHARGES</p> <p>9.1 "Upon the "Developer" having complied with all the terms and conditions of an engineering services agreement the "Municipality" undertakes to value the total cost of "Municipal Services", such valuation will be based on the payment certificates as certified by the professional Consulting Engineer. The total value as per the final payment certificate of the project will be used to determine the total</p>

Policy/ By-law	Summarized Nature of change
	<p>cost of “Municipal Services”. If the project has been completed in a previous financial year, the total completion value (as normally indicated on the final payment certificate) can be escalated to the year at which time DC payment is to be made. The escalation rate will be the same as the DC annual escalation as approved by council.</p> <p>The outstanding amount of development contributions payable as concluded with the “Developer” will be reduced by the value of such “Municipal Services” as provided in terms of this Agreement. The outstanding amount will be payable before a clearance certificate is issued by the Municipality, or before an occupation certificate is issued (where clearance certificate is not applicable).”</p> <p>12.SUBSIDIES AND EXEMPTIONS</p> <p>12.1 The Municipality may only subsidise a land development or category of land developments through reducing the development charge payable in respect thereof if it meets any of the following criteria.</p> <ul style="list-style-type: none"> • The beneficiaries of the land development must primarily be indigent persons, persons dependent on pensions or social grants for their livelihood, or persons temporarily without income. • The land development must be for purposes of serving community, conservation, educational, institutional or public purposes as defined in Schedule 2 to the SPLUMA. • The applicant for a subsidy must be a registered non-profit or charitable community organisations undertaking social development projects that is beneficial to the community and/or where the applicant is able to demonstrate how the proposed development will have a social and/or economic benefit to the Municipality. The use of any land or buildings, or any part thereof, shall not be for the private financial benefit of any individual, including as a shareholder in a company or otherwise. • If the bulk engineering services for the land development concerned have been budgeted to be funded through a fiscal transfer from another sphere of government, a subsidy may be granted to the extent of that grant funding. <p>12.2 Examples of land uses that may potentially qualify for subsidies or exemptions, are the following:</p> <ul style="list-style-type: none"> • Breaking New Ground (BNG) (also known as low-cost) housing projects implemented by the Municipality will be exempt from DCs. These projects are approved by council prior to implementation and such approval should include financial commitments regarding the provision of bulk services for these projects. It is thus not necessary for development charges if the provision of bulk services is to be funded by alternative funding sources. If any bulk upgrades are identified to accommodate the new development during land use approval, then the onus will be on Council to allocate the required funds to the budget as part of the project implementation.

Policy/ By-law	Summarized Nature of change
	<ul style="list-style-type: none"> • Public schools, hospitals, clinics and other public infrastructure projects developed and funded by government which provides a service to especially the poorer communities may qualify for a potential subsidy. These projects will have a social and economic benefit to the communities and the Municipality in its whole and in so doing will alleviate some institutional and financial pressure on the Municipality in terms of providing social infrastructure and social development programmes. <p>12.3. Applications for subsidies must be in writing and addressed to the Director: Infrastructure Services for evaluation, calculation of the applicable development charge as if it were payable, and submission of a recommendation to the Stellenbosch Municipal Council for consideration. Such submission must clearly indicate how the application meets the criteria of 12.1 and 12.2 above.</p> <p>12.4 If a subsidy is granted, the Municipal Council must set out the reasons for its decision, must identify the alternative funding source for the required bulk engineering services to the value of the subsidy, and must budget for and/or obtain funding from an alternative source to the value of the subsidy.</p> <p>12.5 Before the Municipality grants an individual subsidy, it must:</p> <p>12.5.1 ensure that the revenue to be forgone as a result of any subsidy approved by the Municipal Council is reflected in the Municipality's budget (Finance);</p> <p>12.5.2 must provide for budgetary provision for the realisation of the revenue forgone to be made, from another realistically available source of revenue(Finance);</p> <p>12.5.3 ensure that the monetary value of the subsidy, together with the amount of any other payment or payments received by the Municipality towards the capital costs of external engineering services for an approved land development, is at least equal to the development charge calculated in accordance with paragraph 12.4.1.</p> <p>13. SPECIAL ARRANGEMENTS</p> <p>13.1. Rural areas/farms: Development Charges will not be levied in respect of buildings as are reasonably connected with the permissible main farming activities on the farm (e.g. cellar and bottling facilities on a wine farm or a fruit packaging and storage facility on a fruit farm). Development Charges according to the applicable tariff will be levied for any other development on farms requiring approval of land use applications, e.g., a farm stall, function venue, tourist accommodation facilities, conference facilities or other commercial activities. A scientifically calculated reduction factor of 50% will however be applied to the trip generation rates as specified for such land uses outside of urban areas.</p> <p>13.7 Temporary Departures: No Development Charges will be levied in respect of temporary departure approvals; provided that:</p> <p>13.7.1. If, in the Municipality's opinion, any external engineering services upgrades are required to meet increased demand due to the impact of the temporary land use concerned, even if of a</p>

Policy/ By-law	Summarized Nature of change
	<p>temporary nature, the developer must construct such upgrade at own cost; and</p> <p>13.7.2. if an application for an extension of a temporary departure is granted, Development Charges will be levied due to the prolonged impact on services.</p>
Grants in Aid	<p>2023/24 Grant-in-aid Policy</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical changes and layout improvements were applied to enhance the readability of the document. The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p>Substantial Changes</p> <p>The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p><i>Substantial changes in the grant-in-aid policy are as follow:</i></p> <ol style="list-style-type: none"> 1. General changes to correct language use contributing to clarity throughout the policy. 2. Defining the concept of emerging organization not requiring audited financial statements as organization not older than 5 years of the application in question. 3. Including churches as PBO's as bodies used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged in as far as alleviating the burden on municipal cemeteries to erect “Memorial Walls”. 4. Clarifying the responsibility of applicants to respond to the Call for Proposals by RSVP'ing to attend the compulsory clarification meeting. 5. Health Category: Including services aimed at addressing mental health within communities/schools. 6. Environment Category: Include facilities created to alleviate the burden on municipal cemeteries. 7. Services for persons living on the street: Create opportunities for organisations other than Night Shelters to apply for Category B applications to include the following services for persons living on the streets: “Provision of social relief and healthy living, trauma, mental and substance support, job rehabilitation, skills development, job creation, readiness and placement services specifically for persons on the streets” 8. Inclusion of specific mandatory template to use for feedback reports which will <ol style="list-style-type: none"> a. Assist with standardization of assessments of feedback reports and b. Assist organization to include all required information in feedback reports
Indigent Policy	<p>2023/24 Indigent Policy</p> <p>Substantial Changes</p> <p>The details of such may be traced via the “Track Changes” that has been activated in said document.</p>

Policy/ By-law	Summarized Nature of change
	<p><i>Substantial changes in the indigent policy are as follow:</i></p> <p>5.2 Household:</p> <p>(c) The head of the household should be:</p> <ul style="list-style-type: none"> (i) the registered owner or part owner of the property; or (ii) the registered lessee of a Council housing unit; or (iii) the registered lessee of an Organ of State - (as defined in Section 239 of the Constitution) owned housing unit; or (iv) in meritorious cases as determined by the Municipality a person, being the head of the household, who is incapable of paying for basic municipal services and who resides in said property/unit. <p>5.5 Qualifying income:</p> <ul style="list-style-type: none"> (a) The total Gross Household income for a household will be taken into account when considering the application for Indigent support. (b) The maximum qualifying income level defined as the Indigent Income Threshold for a household as described in paragraph 5.2 of this Policy will be equal to or less than R 7 000 per month. Proof must be produced in the form of pay slips, unemployment certificates, income certificates or other acceptable proof of income. (c) Should proof of income not be available, income may be declared by means of a sworn statement. Such applications may be verified by means of a full investigation and a socio-economic survey.
Irrecoverable Debt Policy	<p>2023/24 Irrecoverable Debt Policy</p> <p>Substantial Changes</p> <p>The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p><i>Substantial in the irrecoverable debt policy are as follow:</i></p> <p>1. Requirements before writing-off debt</p> <p>All applicable actions must have been executed/implemented before any debt, owed to Stellenbosch Municipality will be considered for writing-off.</p> <p>However, in special cases where all applicable actions were impossible/impractical to implement, the administration must motivate such write-off for consideration.</p> <p>The irrecoverable debt of registered indigent consumers may be written-off on an annual basis by Council.</p>

Policy/ By-law	Summarized Nature of change
	<p>The abovementioned applicable actions are those as contained in the approved Credit Control and Debt Collection Policy of Stellenbosch Municipality.</p> <p>3. Thresholds for writing-off of debt</p> <p>3.1 The writing-off of debt per individual case may be considered as follows:</p> <ul style="list-style-type: none"> (i) Above forty thousand rand (R40 000) will be effected after Council approval. (ii) Amounting to forty thousand rand (R40 000) and below may be effected after motivation to and approval by the Chief Financial Officer (CFO) or his/her delegate. (iii) Amounting to twenty-five thousand rand (R25 000) and below may be effected after motivation to and approval by the Senior Manager: Revenue and Expenditure. (iv) Amounting to fifteen thousand rand (R15 000) and below may be effected after motivation to and approval by the Manager Revenue. <p>3.2 The writing-off of any interest (or part thereof) component of debt, providing that the debt excluding the interest component, is paid in full, may be considered as follows:</p> <ul style="list-style-type: none"> (i) Above one hundred and fifty thousand rand (R150 000) will be effected after Council approval. (ii) Amounting to one hundred and fifty thousand rand (R150 000) and below may be effected after motivation to and approval by the Chief Financial Officer (CFO). <p>5. Rescission of Judgments</p> <p>Stellenbosch Municipality will consider applications for the consent to rescission of judgments, obtained by the Stellenbosch Municipality for the recovering of debt, provided that the following conditions are applicable:</p> <p>5.1 All outstanding debt accrued on the affected account of said property have been settled in full, and</p> <p>5.2 A period of at least five years has lapsed since the date of the applicable judgment, in the case where the Stellenbosch Municipality has written off any debt.</p>

Policy/ By-law	Summarized Nature of change
Rates Policy	<p>2023/24 Rates Policy</p> <p>Minor Corrections and document layout improvements</p> <p>Various grammatical changes were applied to enhance the readability of the document. The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p>Substantial Changes</p> <p>The details of such may be traced via the “Track Changes” that has been activated in said document.</p> <p><i>Substantial changes in the rates policy are as follow:</i></p> <p>4. DEFINITIONS</p> <p>“residential purposes” in relation to the use of the property means improved property primarily intended for human habitation and inhabited as such; subject to paragraph 7.9 of this Policy and provided that:</p> <ul style="list-style-type: none"> the following properties are specifically excluded from this definition: hostels, old age homes, and vacant land; properties registered in terms of the Sectional Title Act, 1986 (Act 95 of 1986) must solely be used for this purpose; or properties owned by a share-block company must solely be used for this purpose; or a block of flats must solely be used for this purpose; or a dwelling used for this purpose must be situated on property used for or related to educational purposes; or the predominant use of a retirement scheme or life right scheme must be 60% or more for this purpose. <p>7. APPLICATION OF RATING</p> <p>7.4 Public Service Infrastructure properties</p> <p>The Municipality will apply the rate ratio as set out in the MPRA to public service infrastructure.</p> <p>The Municipality acknowledges that Sections 17(1)(a) and 17(1)(aA) of the MPRA provides for the distinct grouping of kinds of public service infrastructure as in the “public service infrastructure” definition in Section 1 of the MPRA.</p> <p>These groups will be processed respectively as either a PSI formulae code or a PSIE formulae code as referenced by the table in paragraph 18.1. For such</p>

Policy/ By-law	Summarized Nature of change
	<p>properties for which the Municipality is the owner the formulae code MUNP will be used.</p> <p>The Municipality will impose the 100% exclusion under the PSIE formulae code as directed by Section 93A of the MPRA.</p> <p>For properties under the PSI formulae code the Municipality will impose the 30% exclusion as directed by Section 17(1)(a) of the MPRA and grant on the 70% remainder a further 100% exception.</p> <p>7.5 Rural Properties</p> <p>7.5.1 Agricultural Use</p> <p>The Municipality will apply the rate ratio as set out in the MPRA to properties that are used for agricultural purposes by <i>bona fide</i> farmers. These properties will however not qualify for any relief measures.</p> <p>For a property to be categorised as agricultural, processes and structures fundamental to agricultural activities on that farming unit, will be considered. Structures such as a dwelling used by the farmer and farm employees will be considered integral to such processes.</p> <p>The Municipality may consider applying multiple use categorisation as per paragraph 7.2 if any structures are not used exclusively for agricultural purposes, or the structures are used for delivering or selling services or products to/for customers.</p> <p>7.5.2 Alternate Criteria and Use</p> <p>(a) Where a property in a rural area is being used for residential, business, mining, or industrial purposes, such as truck depots, construction yards, restaurants, functioning venue, guesthouses, and/or factories, said property will be valued and rated according to the category for residential, business, mining or industrial properties as applicable. The Municipality may however, consider valuating said property as a Multiple Use Property (refer to paragraph 7.2 of this Policy).</p> <p>(b) Owners of a property in rural areas which is not categorised as agricultural, but which in the opinion of the owner should be agricultural, must apply (refer to paragraph 14.1 of this Policy) for a revaluation, submit documentation as required by the CFO and declare in an affidavit, that no contraventions of the criteria for agricultural activities are taking place on the property. The application will be dealt with according to the supplementary valuation process.</p> <p>8.3 Senior Citizens and Disabled Persons</p> <p>8.3.4 The percentage rebate granted to different monthly <i>household income</i> levels will be determined according to the schedule below. The income</p>

1 Introduction

This policy is intended to provide a framework for the unbundling of completed infrastructure services capital projects and financial asset year-end processes within the requirements of sections 60, 62, 63, 78, and 79 of the Municipal Finance Management Act, 2003 (Act 56 of 2003) (MFMA), and the South African Standards of Generally Recognised Accounting Practices (GRAP) as well as to promote good financial management practices.

It is the responsibility of the accounting officer to maintain a system of internal control over assets, including an accurate, valid, and complete asset register, and to ensure that appropriate accounting principles are applied to all assets.

This policy applies to all officials within the Stellenbosch Local Municipality who utilise and/or manage any type of infrastructure assets.

The Municipal Council of Stellenbosch have adopted an Asset Management Policy to regulate the effective management of all council's assets and wants to lay down broad guidelines for consistent, effective and efficient asset management principles of Stellenbosch Municipality

The Municipality of Stellenbosch have agreed to adopt an Infrastructure Unbundling Policy that will guide the Municipality with the effective, complete, and accurate capitalisation of their assets and complying with year-end processes relating to assets.

2 Definitions

In this Policy, unless the context indicates otherwise.

An **asset** means a resource:

- a) controlled by Stellenbosch Municipality;
- b) as a result of a past event;
- c) it is probable that future economic benefits or service potential associated with the assets will flow to the municipality;

Infrastructure assets are defined as assets that usually display some or all of the following characteristics:

- a) they are part of a system or network;
- b) they are specialised in nature and do not have alternative uses;
- c) they are immovable; and
- d) they may be subject to constraints on disposal.
- e) examples are road networks, sewer systems, water networks etc.

Capitalisation of assets means the recording of assets in the Fixed Asset Register. Assets may only be recorded in the Fixed Asset Register once the recognition criteria is complied with

in accordance with GRAP. That means the cost of an item shall be recognised as an asset if, and only if: It is probable that future economic benefits or service potential associated with the item will flow to the municipality; and the cost or fair value of the item can be measured reliably.

Cost means the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognized in accordance with specific requirements of other Standards of Generally Recognized Accounting Practices (GRAP). Elements of cost are the following:

- a) The purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates;
- b) Any cost directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management; and
- c) The initial estimate of the cost of dismantling and removing the item and restoring the site on which it is located.

Current Replacement Cost (CRC) is the cost of replacing the service potential of an existing asset, by reference to some measure of capacity, with an appropriate modern equivalent asset. GRAP 17 defines CRC as the cost the entity would incur to acquire the asset on the reporting date.

Depreciation means the systematic allocation of the depreciable amount of an asset over its useful life.

Directly Attributable Costs are:

- a) cost of employee benefits arising directly from the construction or acquisition of an item;
- b) cost of site preparation;
- c) initial delivery and handling cost;
- d) cost of testing whether the asset is functioning properly, after deducting the net proceeds from selling any items produced while bringing the asset to that location and condition; and
- e) professional fees.

Expected Useful Life (EUL) is a measure of the estimated life of an asset or component, such as time, number of cycles, distance intervals, production units, etc.

Fixed Asset Register means a register for recording all municipal-owned and controlled assets in accordance with GRAP accounting standards.

Generally Recognised Accounting Practice (GRAP) are accounting standards issued by the Accounting Standards Board (ASB) in terms of section 89 of the Public Finance Management Act (PFMA).

Impairment means a determined loss in future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation.

Estimated Remaining Useful Life (ERUL) is the period remaining over which economic benefits or service potential can be derived from an asset.

Useful life means the period over which an asset is expected to be available for use by the municipality.

Work-in Progress Register (WIP) the list of projects still under construction and not available for use at reporting date.

3 Purpose

The purpose of this policy is to ensure that all assets are classified and capitalised using the GRAP accounting standards and are recorded accurately on the **FAR (Fixed Asset Register)**.

4 Objectives

The objectives of the policy are stipulated as follows:

- Specifying Council's practice regarding accounting for assets. To establish a framework for the accounting treatment of assets, including proper recognition, measurement, disposal and impairment thereof to assist officials in understanding their legal and managerial responsibilities with regard to key asset functions such as:
 - o efficiently unbundling the assets from the project value to tangible assets;
 - o acknowledge when an asset is available for use and ready for recognition in the FAR;
 - o asset valuation principles in accordance with GRAP and Directive 7;
 - o establishing and maintaining asset registers.

5 Statutory and Regulatory Framework

This policy aligns with the Municipality of Stellenbosch Asset Management Policy.

This policy must comply with the accounting standards specified by the Accounting Standards Board. The relevant approved and effective accounting standards include:

- GRAP 1 Presentation of Financial Statements;
- GRAP 3 Accounting Policies, Changes in Accounting Estimates and Errors;
- GRAP 12 Inventory;
- GRAP 13 Leases;
- GRAP 17 Property, plant, or equipment;
- GRAP 16 Investment property;
- GRAP 19 Provisions, Contingent Liabilities and Contingent Assets;
- GRAP 31 Intangibles;
- GRAP 103 Heritage Assets;
- GRAP 27 Agriculture;
- GRAP 21 Impairment of Non-cash generating assets;
- GRAP 26 Impairment of Cash-generating assets;
- GRAP 110 Living and Non-living Resources.

6 Responsibilities & Accountability

The purpose of this section is to prescribe the responsibilities of the various functionaries within Stellenbosch Municipality.

The Accounting Officer (Municipal Manager)

The Accounting Officer (Municipal Manager) or his duly delegated representative is responsible to ensure implementation and compliance with the responsibilities prescribed in section 63 of the MFMA.

- The municipality has and maintains a management, accounting and information system that accounts for the assets of the municipality which includes the addition of new assets, and the disposal of old assets.

Asset Managers/ Directors

The manager referred to in Section 56 of the Municipal Systems Act is someone reporting directly to the Municipal Manager and has the functional accountabilities for the physical management of a particular set of assets in order to achieve the municipality's strategic objectives relevant to their directorate.

Asset managers should:

- ensure that a complete asset verification of all inventory and asset items is performed annually;
- ensure that the Work-in Progress register (WIP) is up to date;
- ensure all new assets are categorised correctly and are added to the updated AR;
- ensure that all obsolete, damaged, and unused assets, supported by relevant asset and condemnation forms, are handed in at the Asset Management Department without delay.

Infrastructure Services Departments:

The head of the various engineering departments are responsible for:

- Ensure that departmental officials read and acknowledge the Unbundling Policy and know the processes to follow.
- Updating the WIP register when projects have been completed in a specific financial year.
- Providing project-related information for the categorisation of the assets.
- Assist in the annual ERUL assessment of assets.
- Identify any potentially impaired assets on an annual basis and report them to the Asset Management Department.
- Ensure that complete asset verification of infrastructure asset items is performed on a five (5) year rolling basis or as prescribed by the relevant managing department, i.e. all infrastructure assets are verified over a five (5) year period.

7 Asset Capitalisation

As stated in the Asset Management Policy 2021 - 2022;

"Stellenbosch Municipality does not capitalize an asset based on a capitalization cost threshold but recognizes an asset when it complies with the definition of an asset as stipulated in GRAP 17 and the cost of the asset to the municipality can be measured reliably.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition (GRAP 17.22).

Assets will only be capitalized in the asset register on completion or finalization of the project."

Asset Capitalisation Procedures:

- i) The status of all the ongoing municipal projects within the jurisdiction of the municipality need to be updated accordingly on the FAR and WIP register at the end of each financial year:

- Completed projects: Projects that have been signed off as completed and the assets are available for use.
 - Work-in progress: Projects that are still on-going in the next financial year and not completed in the current financial year.
- ii) Capitalise completed projects as per the GRAP standards
- i. New assets: Assets that have previously not been captured on the FAR. Replacements or renewals: Assets capitalised on the FAR to replace existing old and damaged assets on the FAR. The asset that is replaced will have to be derecognised (removed from the FAR).
 - An asset categorisation (according to the GRAP asset classifications and CIDMS asset hierarchy) should be present.
 - The asset value as per project cost and apportionment during the unbundling process should be available. If the asset cost is not available, as the case might be with some donated assets, the fair value as at the date of the handover, will be recognised as the asset value.
 - Each asset component should have an Expected Useful Life (EUL) allocated to it. All new assets should have a EUL equal to their Estimated Remaining Useful Life (ERUL). In the case of a donated asset, the EUL and ERUL may differ if the donated asset was used before the transfer.
 - The acquisition date will be the date when the project was completed and became available for use. In the case of a donated asset, the handover date will be recorded as the take-on date on the FAR.
 - The asset GIS ID needs to be assigned to each of the new assets before adding it to the FAR. Asset location information should be populated in the FAR for proper control and maintenance of the assets.
 - ii. Upgraded assets: Assets that are on the FAR but have been upgraded/improved:
 - Using the previously assigned GIS ID to get the correct location.
 - The new asset value associated with the upgrade should be linked to the existing asset.
 - In the case of upgrading an existing component, the acquisition date and ERUL of the existing component need to be assigned to the upgraded component. The ERUL of the improved component should be reviewed for an increase in ERUL.
 - In the case of upgrading an existing asset but with a new component, the steps as for a new asset should be followed.

- iii) The total of all asset additions in the FAR capitalised within a financial year should align with the total project cost transferred out of the WIP register at the reporting date.

Asset Classification

Assets must be classified according to the GRAP accounting standards and the CIDMS hierarchy. The municipality's hierarchy should be approved by Council and recorded in the Asset Management Policy. [Figure 1](#) below depicts the asset hierarchy as per CIDMS.

Figure 1 – CIDMS Asset Hierarchy

Asset Value

The value of the asset accounts for the cost of the asset including all associated costs such as preliminary & general costs, site clearance, excavation costs, material costs, and transport costs.

Where the acquisition cost of an asset is not available and the date on which control was handed over is also not available, the acquisition cost is measured using the deemed cost at the date the municipality adopted the Standards of GRAP in accordance with Directive 7. The deemed cost is determined as the fair value of the asset at the measurement date.

When an asset is donated to the municipality and the actual asset cost is not available, the asset will be recorded in the FAR at fair value on the date of donation.

8 Depreciation

Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item shall be depreciated separately.

A significant part of an item of property, plant, and equipment may have a useful life and a depreciation method that are the same as the useful life and depreciation method of another significant part of that same item. Such parts may be grouped in determining the depreciation charge.

A variety of depreciation methods can be used to allocate the depreciable amount of an asset on a systematic basis over its useful life. These methods include the straight-line method, the diminishing balance method, and the production unit method. The straight-line depreciation results in a constant charge over the useful life if the asset's residual value does not change.

The straight-line depreciation method is used to allocate the depreciable amount of infrastructure assets over their useful lives on a systematic basis.

9 Asset Impairments

Impairments are defined as “a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation”.

According to the Municipal Finance Management Act (MFMA) and GRAP, assets should be reviewed for impairments on an annual basis. There are two impairment accounting standards to be used by local government. If an asset is used with the objective to generate a commercial return, the Standard on Impairments of Cash-generating assets, GRAP 26, will be applicable. Local government assets are usually used to render a service rather than generating a commercial return. In the case of service delivery assets, the Standard on Impairment of Non-cash generating (GRAP 21) assets was applied for the testing of impairments.

Recoverable amount is the amount that the municipality expects to recover from the future use of an asset, including its residual value on disposal.

The recoverable service amount or recoverable amount is the higher of an asset's fair value less the cost to sell and its value in use.

The recoverable amount of individual assets, or groups of identical assets, is determined separately and the carrying amount is reduced to the recoverable amount on an individual asset, or group of identical assets, basis. However, there may be circumstances when it may not be possible to assess the recoverable amount of an asset on this basis, for example when all of the plant and equipment in a sewerage purification work is used for the same purpose. In such circumstances, the carrying amount of each of the related assets is reduced in proportion to the overall decline in recoverable amounts of the smallest grouping of assets for which it is possible to make an assessment of recoverable amounts.

The following may be indicators that an asset is impaired, such assets should be tested for an impairment:

- a) The item has been damaged;
- b) The item has become technologically obsolete;
- c) The item remains idle for a considerable period of either prior to it being put into use or during its useful life;

The detail on external and internal impairment indicators is indicated in GRAP 21.23.

Reversal of an Impairment Loss

The same procedures as for the identification of impaired assets are followed to assess whether there is an indication that an impairment may have decreased or eliminated. If so, the difference between the recoverable amount and the carrying amount should be debited to the asset's carrying amount. Therefore, the asset's value will increase to be equal to the recoverable amount.

The ERUL of the asset should be reviewed when a reversal of impairment occurs.

The increased carrying amount due to reversal should not be more than what the depreciated historical cost would have been if the impairment had not been recognised.

Reversal of an impairment loss is recognised as income in the Statement of Financial Performance.

Depreciation must be adjusted for the reviewed ERUL of the asset.

10 Asset Derecognitions

The carrying amount of an asset shall be derecognised:

- a) on disposal (including disposal through a non-exchange transaction); or
- b) when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an asset shall be included in the surplus or deficit when the item is derecognised.

In terms of Section 14 of the MFMA the municipality may not dispose of any capital asset required to provide a minimum level of basic municipal services.

A municipality may dispose of any other capital asset, provided that:

- a) the Council, in a meeting open to the public, has first determined that the asset is not required to provide a minimum level of basic municipal services; and
- b) the Council has considered the fair market value of the asset and the economic and community value to be received in exchange for the asset.

The decision that a specific asset is not needed to provide the minimum level of basic municipal services, may not be reversed by the municipality after that asset had been sold, transferred, or otherwise disposed of.

11 Estimated Remaining Useful Life (ERUL) Assessment

An ERUL assessment has to be conducted annually on assets that have an ERUL of 2 years or less to identify assets that have to be disposed of, impaired, and adjusted. Departments should also review the ERUL of any asset where indicators exist that there might be an increase or decrease in the life cycle of the asset. The ERUL might increase in the case of an

asset upgrade or if an event occurred that affects the life cycle of the asset in a positive manner. Any event/ factor that affects the life cycle of an asset in a negative manner should be recorded, for the asset's ERUL to be review.

Procedure during an ERUL review:

- The Fixed Asset Register is to be reviewed annually and assets with an ERUL of 2 years or less need to be identified;
- The list of identified assets is to be discussed with all engineering department heads to determine the status of the assets;
 - a. Vandalised assets to be included on the impairment list;
 - b. Assets that are no longer in a working condition to be added to the disposed of list;

Assets that are still in working condition are to be noted and the ERUL is to be adjusted adequately.

STELLENBOSCH MUNICIPALITY

POOL VEHICLE POLICY

2023/2024

STELLENBOSCH MUNICIPALITY

DRAFT POOL VEHICLE POLICY

TABLE OF CONTENT

Purpose	1
Utilization of Pool Vehicles	1
Section 1: Responsibilities of Drivers	1
Section 2: Determining the need for vehicles	3
Section 3: Issue of Vehicles	3
Section 4: Proper use of Municipal vehicles	4
Section 5: Vehicle Keys	5
Section 6: Damage, Losses, and Theft	5
Section 7: Garaging and parking of municipal transport	6
Section 8: Mechanical Appreciation	6
Section 9: Safe Driving	7
Section 10: Speedometers, Odometers and Hour-meters	7

Section 11: Care of Tyres	7
Section 12: Fuel and Oil	8
Section 13: Servicing and repair of municipal motor vehicles	9

Purpose

To ensure the proper procedure of booking and utilization of a pool vehicle.

Utilization of Pool Vehicles

No person, other than a municipal official in possession of a valid driver's licence may drive a Pool Vehicle and no person other than an official may be transported in a Pool Vehicle, provided that the CFO, Municipal Manager or a director may in exceptional circumstances authorise that other passengers may be transported in such Pool Vehicle.

Municipal officials that receive car allowance are NOT allowed to use any pool vehicle.

Section 1: Responsibilities of Drivers

The full cooperation of all employees concerned is required to always ensure that the municipal transport system functions efficiently. All drivers are expected to accept and exercise the responsibilities associated with the operation of vehicles.

1.1 Usage

1.1.1 Municipal transport is provided strictly for official services only and is not to be used for private purpose

1.1.2 When a municipal vehicle is to be used, the driver must ensure that a copy of the Trip Authorization Form (provided by fleet management) duly authorized and signed, is held in the vehicle.

1.1.3 All municipal vehicles must be issued with a Daily Logbook. The driver is required to record all his/her daily trips in the logbook. The Daily Logbook must be submitted to the Fleet management Department upon returning the vehicle.

1.1.4 Municipal fuel cards may be used only for the purposes of refuelling of municipal vehicles and is not to be used for private purposes.

1.2 Public Image

All municipal vehicles shall be driven in a SAFE and COURTEOUS manner, which will promote the municipality's PUBLIC IMAGE. Municipal drivers are constantly in public view; their behaviour shapes the public concept of municipal efficiency in general.

1.3 Careful handling

Municipal vehicles shall at all times be driven and handled with proper care and attention, to obtain the best mechanical service and avoid infringements of the law. Any evidence of neglect, rough handling or reckless driving must be reported to Fleet management Services and will result in disciplinary action.

1.4 Inspection

- 1.4.1 Pre-drive inspection of vehicles are to be carried out by Fleet management officer daily, as required in terms of the pool vehicle policy.
- 1.4.2 Fleet management officer must always ensure that the vehicle is in a roadworthy condition.
- 1.4.3 The last user of a vehicle will be held responsible for any unreported damage/defects/loss. The fleet management officer must thoroughly inspect a vehicle after each trip. Any damage/defects found by the Fleet management officer must be reported to the fleet Manager immediately and an appropriate action must be taken by management. A vehicle must not be driven prior to all damages/ defects being attended to.
- 1.4.4 All municipal vehicles must be inspected periodically by the Fleet management officer of Stellenbosch Municipality to ensure that a proper state of cleanliness, repair and efficiency is being maintained. All instances of poor upkeep of municipal vehicles must be investigated and disciplinary action taken. All costs incurred in repairing the vehicle are to be recovered from the driver/person responsible for the vehicle.

1.5 Pre- and Post-Driver Activities

- 1.5.1 Before a vehicle is driven, the fleet management officer must ensure that the following activities have been carried out:

Pre-trip activities

- a) Carry out an inspection of the vehicle.
- b) Record all damages to the vehicle observed during the pre-inspection.
- c) Both fleet management and line department signs the findings of the pre-inspection
- d) Check whether the logbook details is the same as the km's on the odometer
- e) Give the driver the trip authorisation form and make sure that it is signed.
- f) Ensure that the details of the trip to be undertaken are entered in the Logbook.

Post-trip activities

- a) Cross check the odometer reading, distance covered and time in the daily Logbook.
 - b) Inspect the vehicle thoroughly.
 - c) Report to fleet manager any damage to the vehicle.
 - d) Confirm whether fuel was purchased and hand over the fuel slip to fleet management.
 - e) Check whether all information is correctly recorded in the logbook.
- 1.5.2 Every trip undertaken by the driver must appear as a separate entry in the Logbook.

- 1.5.3 Inspection Forms and Logbook entries must be checked by fleet management officer every day. All instances of irregular/unauthorized use of motor vehicles must be investigated by Fleet management services and disciplinary action be taken where necessary.

1.6 Safety

All employees must be fully aware that it is a criminal offence to disobey the general safety instructions issued by their employer. Persons guilty of failing to observe safety instructions are liable not only to disciplinary action in terms of the Municipality's Conditions of Service, but also to prosecution by the Department of Labour.

1.7 Rules

Failure to observe the rules contained herein and any additional instructions issued by Fleet management will render the offending employee liable to disciplinary action.

1.8 Driver Competency

The Traffic Management Section will perform a Competency Test to every municipal employee who requires to operate a municipal vehicle. The employee must pass the test to receive a certificate authorizing them to operate a municipal vehicle.

Section 2: Determining the need for vehicles

- 2.1 The Managers of departments are responsible for determining the number and types of vehicle(s) that will be required for a booking and will communicate that to fleet management via email, it is the responsibility of fleet management to determine which vehicles will be available.
- 2.2 A vehicle must be booked from fleet management 24 hours before the trip.

Section 3: Issue of Vehicles

3.1 Exclusive use of vehicles

- 3.1.1 There will be no exclusive use of a pool vehicle.

3.2 Pool Vehicles

- 3.2.1 Authorization is to be obtained from each manager of Department prior to an employee taking possession of a vehicle.

- 3.2.2 A daily trip authorization form is to be completed and approved by the Director or senior manager of Department prior to the employee taking possession of a vehicle.
- 3.2.3 Vehicle keys are to be issued to the employee by fleet management officer and stored by fleet management at the close of business each day.
- 3.2.4 A physical inspection of the vehicle is to be conducted by fleet management officer subsequent to the vehicle being returned by the employee as stated in 1.4
- 3.2.5 A register is to be maintained by fleet management, which details the following information daily:
 - a) Name of employee
 - b) Travel destination for the day
 - c) Mileage for the day
 - d) Time of transfer of vehicle to employee
 - e) Name of fleet management Officer that issued the vehicle
 - f) Time of return of vehicle keys.
- 3.2.6 Unless prior arrangements have been made with fleet management, employees who fail to return vehicles at the close of business each day, will be subject to disciplinary action.
- 3.2.7 No employee shall take a pool vehicle home overnight.

Section 4: Proper use of Municipal vehicles

The following rules must be observed:

- 4.1 The most economical vehicle suitable for the purpose must be used.
- 4.2 The vehicle shall only be driven by an appropriate licensed and duly authorized employee on official duty.
- 4.3 The driver must be licensed in terms of National Road Traffic Act for the particular class of vehicle under his/her control.
- 4.4 No person shall move, drive, or operate any municipal vehicle unless he/she is fully authorized to do so. The unauthorized use of a vehicle will render the person concerned liable for prosecution in a court of law, over and above any internal disciplinary action.

- 4.5 Passengers, inclusive of municipal staff, are not permitted to ride on or inside any municipal vehicle except for the execution of municipal duties. All passengers must sign an indemnity prior to being transported in a municipal vehicle.
- 4.6 The driver shall not deviate any vehicle from the shortest route to the destination to serve the private interest of the driver or his/her passengers, or in connection with the conveyance, loading or unloading of private property or goods.
- 4.7 The driver shall not utilize any municipal vehicle for private purpose.
- 4.8 The driver of any vehicle shall not deviate to any unauthorized routes or destinations and shall not enter any unauthorized premises or areas.
- 4.9 Drivers are expected to route their vehicles so as to secure maximum operating efficiency at minimum expenses.
- 4.10 Logbooks with specific details must be kept up to date and inspected by fleet management officer every day. Any deviation must be investigated and, when necessary, reported to fleet manager for further investigation, so that disciplinary action can be taken against infringing members.
- 4.11 The fleet manager must report all deviations and actions taken to the Chief Financial Officer monthly.

Section 5: Vehicle Keys

- 5.1 Employees in charge of vehicles must always ensure that the ignition, door lock, fuel cap, gear lock and other keys of the vehicle in use are suitably safeguarded against loss or theft.
- 5.2 In the event of a vehicle's keys being lost or mislaid, the driver must not attempt to open the locking system of the vehicle but must obtain assistance from fleet management services.
- 5.3 A thorough investigation must be conducted by Fleet management to establish the causes for vehicle keys being lost. Where it is found that the loss of keys is due to negligence on the part of the driver, all costs to recover/replace the keys must be recovered from the driver.
- 5.4 At no time shall a driver leave his/her vehicle unattended without first switching off the engine and removing the ignition key, engaging the gear-lock, and removing the key.

Section 6: Damage, Losses, and Theft

Damage, losses, and theft, other than those arising from accidents, are dealt with under this section.

- 6.1 An employee who takes over a municipal vehicle must ensure that any damage or loss is immediately brought to the notice of Fleet Management in writing. Unless he/she complies with this instruction, he /she will be deemed to have received the vehicle in good order.

- 6.2 Any person found unlawfully removing fuel from a municipal vehicle or engaged in an unauthorized removal or exchange of any component on a municipal vehicle will be subjected to the strictest discipline, as prescribed in the prevailing Conditions of Service.
- 6.3 In the event of losses, thefts and hijacking, the employee operating the vehicle must immediately report the matter to Fleet Management for further investigation and follow up
- 6.4 In the event of a hijacking or armed robbery, Law Enforcement must be contacted immediately
- 6.5 Any pool vehicle may be subjected to a search by fleet management officer.

Section 7: Garaging and parking of municipal transport

7.1 Overnight parking

- Vehicles must be parked at designated municipal premises.
- Under no circumstances should municipal vehicles be parked outside designated premises without the authorization of Fleet Management services.

7.2 Reserved areas

No pool vehicle is allowed to park on reserved areas or the area for visiting personnel.

Section 8: Mechanical Appreciation

- 8.1 Whilst a municipal pool vehicle is in operation, the driver shall regularly check the warning lights, indicators, and gauges. Immediate action must be taken should anything untoward being noticed, to prevent damage or further damage to the vehicle or its components.
- 8.2 Where there is an indication of excessive engine heat or lack of oil pressure, the engine shall be switched off immediately and the vehicle not driven further under its own power until the matter has been rectified.
- 8.3 The “revving” up of engines is detrimental, especially at the cold starting-up stage. Until normal operating temperatures are achieved, high speed engine operation must be avoided.
- 8.4 Where a vehicle is subjected to extended periods of waiting in dense traffic, the neutral gear position must be selected and the hand brake applied, to avoid unnecessary wear on the clutch components.
- 8.5 Travelling with a foot on the clutch pedal must be avoided, as this causes premature failure of the clutch assembly and release bearing.
- 8.6 A smooth balance must be maintained between the clutch and accelerator pedal to avoid damage to the vehicle's drive train.

Section 9: Safe Driving

9.1 Traffic Regulations

Traffic fines arising from neglect on the part of the driver will not be paid by the Municipality. The driver will be held personally responsible and will not receive any financial assistance from the Municipality.

9.2 Speed Limits

Apart from the necessity of observing the speed limits laid down by the government and local authorities, municipal motor vehicles must not be driven at speeds that may endanger the lives of occupants and other road users. Speed must be adjusted to suit weather conditions, road conditions and the vehicle being used.

Section 10: Speedometers, Odometers and Hour-meters

- 10.1 It is important that odometers and hour-meters always reflect the true elapsed distance and times. Any defect in a speedometer, odometer or hour-meter should be rectified as soon as possible.
- 10.2 No person shall disconnect the speedometer of a municipal vehicle. Where a speedometer is fitted to a vehicle, the National Road Traffic Act requires it to be in good working order.
- 10.3 Speedometers and hour-meters should not be tampered with.

Section 11: Care of Tyres

11.1 Tyre pressures

Fleet management officer must ensure that the inflation of tyres is in accordance with the pressures recommended by the manufacturer of the vehicle. Incorrect inflation, particularly under inflation, is the greatest single factor contributing to undue wear, overheating and premature failure of tyres. Any deviation from specified pressures will have adverse effects on steering, braking, road holding and safety.

11.2 Precautionary measures

- 11.2.1 The checking and correction of tyre pressures should be performed in cold tyres only.
- 11.2.2 Scuffing or running into kerbs and running over projections should be avoided.
- 11.2.3 Mechanical defects that cause uneven tyre wear should be rectified immediately.

- 11.2.4 Regular inspections should be held for tread wear, cuts, bruises and stones wedged between dual wheels. Tread depth at any point across the entire breadth of the tread and circumference of the tyre must not be allowed to be less than 1 mm. A tyre that does not meet this requirement must be replaced immediately.
- 11.2.5 Dust caps on tyre valves must be replaced.
- 11.2.6 Sudden or fierce braking, unnecessary acceleration and fast cornering should be avoided.
- 11.2.7 Dumping sites are always littered with sharp projections, which cause an ongoing puncture problem. Special care must be taken to avoid sharp obstacles.
- 11.2.8 The removal of any imbedded foreign objects will deflate the tyre, therefore must be reported to Fleet Management Services, and not be removed by the driver.
- 11.2.9 The abusive or negligent treatment of tyres should be avoided as any tyre damage caused through abuse or negligence will be for the account of the driver.

Section 12: Fuel and Oil

12.1 Supply

Where employees are in charge of municipal pool vehicles require fuel and/or oil, they shall obtain supplies from the nearest designated supply point. Drivers are to ensure that the fleet number, odometer reading and quantity of fuel supplied are entered correctly on the appropriate forms. Tanks are to be filled to a constant level.

- 12.1.1 The Fleet management officer is responsible for checking the engine oil and water on every occasion before it is booked or that the vehicle is refuelled.

12.2 Fuel saving

Some factors that have a major bearing on fuel economy are set out below for the guidance of all concerned:

- 12.2.1 Wastage due to the overfilling of the fuel tank must be avoided and vehicles must, wherever possible, be parked on level ground and in the shade.
- 12.2.2 Vehicles must at all times be driven in the gear ratio appropriate to the road conditions.
- 12.2.3 Road speeds must be kept as constant as possible.
- 12.2.4 Acceleration and braking must be executed smoothly and gently. The most uneconomical use of fuel occurs during acceleration and with the engine idling in a stationary vehicle.
- 12.2.5 Any strong smell of fuel must be investigated immediately, especially if noted while the vehicle is in motion. Besides causing wastage, petrol leakage is highly dangerous.
- 12.2.6 The driver should not allow the engine of any vehicle or machine to run unnecessarily.

Section 13: Servicing and repair of municipal motor vehicles

- 13.1 All motor vehicles shall be serviced and repaired in accordance with the policies and procedures as laid down by Stellenbosch municipality and the relevant service provider.
- 13.2 Fleet management officer in charge of pool vehicles shall be responsible for ensuring that service arrangements are strictly adhered to.
- 13.4 Timeous servicing arrangements - When a vehicle needs to be serviced, Fleet management officer must arrange for the vehicle to be serviced through Wesbank. Servicing is not to be delayed due to the non-availability of a substitute vehicle.

1. INTRODUCTION

The documented **Borrowing, Funds and Reserves Policy**, sets out the framework for the prudent use of Borrowing, Funds and Reserves available to the Municipality.

This Policy should be implemented in conjunction with the approved **Liquidity Policy**. The Liquidity Policy sets out the prudent level of cash to be maintained by the Municipality as one of several factors to ensure long term financial sustainability. It is however of equal importance to protect, maintain and extend the infrastructure of the Municipality to ensure the continued provision of services at an acceptable standard.

This policy is implemented to provide guidance on the appropriation of capital funding resources on a sustainable basis in the longer term.

2. BACKGROUND AND APPROACH

With reference to the applicable legislation as referred to in paragraph 3 below. Legislation exists and prescribes the framework of a Borrowing as well as Funds and Reserves Policy and these factors will all be addressed in this Policy.

Although legislation provides guidance as to the broader framework to ensure financial management of resources to ensure the Council meets all of its obligations timeously, it is not prescriptive with regards to quantifying not only the prudent level of Borrowing, Funds and Reserves but more so the optimal level hereof.

~~Therefore~~Therefore, in this Policy cognisance has been taken of the legislative guidelines whilst more prescriptive guidelines are set for the optimal management and monitoring of resources to the Municipality's avail based on sound financial practices.

3. LEGISLATIVE REQUIREMENTS

The legislative framework governing borrowings, funds and reserves are:

- 1.1. Local Government Municipal Finance Management Act, Act 56 of 2003 (MFMA) must be complied with; and

- 1.1.1. MFMA Circular 71 stipulates the following guidelines regarding borrowing:

Capital Cost (Interest Paid and Redemption) as a % of Total Operating Expenditure

$(\text{Capital Cost (Interest Paid and Redemption)} / \text{Total Operating Expenditure}) \times 100$

Criteria: 6% - 8%

Debt (Total Borrowings) / Revenue

$(\text{Overdraft} + \text{Current Finance Lease Obligation} + \text{Non Finance Lease Obligation} + \text{Short Term Borrowings} + \text{Long Term Borrowings}) / \text{Total Operating Revenue}$

Criteria: Maximum 45%

1.2. Local Government Municipal Budget and Reporting Regulation, Regulation 393, published under Government Gazette 32141, 17 April 2009.

4. FUNDING POLICY

The Local Government Municipal Budget and Reporting Regulation, Regulation 393, published under Government Gazette 32141, 17 April 2009 stipulates:

8. (1) *Each municipality must have a funding and reserves policy which must set out the assumptions and methodology for estimating –*

- (a) *projected billings, collections and all direct revenues;*
- (b) *the provision for revenue that will not be collected;*
- (c) *the funds the municipality can expect to receive from investments;*
- (d) *the dividends the municipality can expect to receive from municipal entities;*
- (e) *the proceeds the municipality can expect to receive from transfer or disposal of assets;*
- (f) *the municipality's borrowing requirements;*
- (g) *the funds to be set aside in reserves.*

In terms of Section 18 and 19 of the MFMA an **annual budget** may only be funded from:

Cash backed accumulated funds from previous years' surpluses not committed for other purposes:

Transfers from the accumulated surplus to fund operating expenditure will only be allowed for specific once-off projects with no recurring operating expenditure resulting thereof.

Borrowed funds, but only for capital projects:

Actual capital expenditure may only be incurred on a capital project if the funding for the project has been appropriated in the Capital Budget, but has also been secured from the financial source that is not committed for another purpose.

Realistically anticipated revenues to be collected:

Realistic anticipated revenue projections must take into account projected revenue for the current year based on actual collection levels in previous financial years.

4.1. OPERATING BUDGET

The Operating Budget should be cash funded. The Operating Budget is funded from the following main sources of revenue:

- a) Property Rates;
- b) ~~Surplus generated from~~ Service Charges;
- c) Government Grants and Subsidies;
- ~~c)d)~~ Rental of facilities and Equipment;
- ~~d)e)~~ Other revenue, fines, interest received etc.;

The following guiding principles apply when compiling the Operating Budget:

- a) Growth parameters must be realistic taking into account the current economic conditions;
- b) Tariff adjustments must be in line with the following approved policies: ***Tariff Policy and Indigent Policy***;
- c) Revenue from Government Grants and Subsidies must be in line with allocations gazetted in the Division of Revenue Act and provincial gazettes. Transfers of a conditional nature must be appropriated only as prescribed and should not be used to fund the Operating Budget;
- d) Revenue from public contributions, donations or any other grants may only be included in the Budget if there is acceptable documentation that guarantees the funds and if the transfers are unconditional of nature;

- e) Provision for revenue that will not be collected is made against the expenditure item provision for bad debt and based on actual collection levels for the previous financial year and the reasonably projected annual non-payment rate;
- f) Interest received from actual Long-term and or Short-term Investments are based on the amount reasonably expected to be earned on cash amounts available during the year according to the expected interest rate trends. The actual amount allocated for interest on investments is contributed to the Capital Replacement Reserve;
- g) A detailed salary budget is compiled on an annual basis. All funded positions are budgeted for in total as well as new and/or funded vacant positions. As a guiding principle the salary budget should not constitute more than 35% of annual Operating Expenditure;
- h) Depreciation charges are fully budgeted for according to the Asset Register.
- i) The annual cash flow requirement for the repayment of borrowings must fully be taken into consideration with the setting of tariffs;
- j) Sufficient provision must be made for the maintenance of existing infrastructure based on affordable levels. The maintenance budgets are normally lower than the recommended ~~levels~~As levels as a guiding ~~principle~~principal repair and maintenance should constitute between 5% and 8% of total operating expenditure and should annually be increased incrementally until the required targets are ~~achieved~~achieved.
- k) Individual expenditure line items are to be revised each year when compiling the budget to ensure proper control over expenditure.

4.2. CAPITAL BUDGET

The capital budget provides funding for the municipality's capital programme based on the needs and objectives as identified by the community through the Integrated Development Plan and provides for the eradication of infrastructural backlogs, renewal and upgrading of existing infrastructure, new developments and enlargement of bulk infrastructure.

The capital budget is limited by the availability and access to the following main sources of funding:

- a) Accumulated cash backed internal reserves such as the Capital Replacement Reserve;
- b) External borrowings;
- c) Government Grants and Subsidies;

d) Public Donations and Contributions.

The following guiding principles apply when considering sources of funding for the capital budget:

a) **Government Grants and Subsidies:**

- a. Only Government Gazetted allocations or transfers as reflected in the Division of Revenue Act or allocations as per Provincial Gazettes may be used to fund projects;
- b. The conditions of the specific grant must be taken into consideration when allocated to a specific project.

b) **Public Donations and Contributions:**

- a. In the case of public contributions, donations and/or other grants, such capital projects may only be included in the annual budget if the funding has been received by the municipality already.

c) **External Borrowing:**

- a. The borrowing requirements as contained in the **Borrowing Policy** in paragraph 6 are used as a basis to determine the affordability of external loans over the Medium Term Income and Expenditure Framework. The ratios to be considered to take up additional borrowings are as ~~follows,~~ ~~unless follows, unless~~ in contravention with any loan covenants:
 - i. Estimated long-term credit rating of BBB and higher;
 - ~~ii. Interest Paid to Total Expenditure not to exceed 5%;~~
 - ~~iii-ii.~~ ii. Total Long-term Debt to Total Operating Revenue (excluding conditional grants and transfers) not to exceed ~~35~~45%;
 - ~~iv. Operating Cash Surplus generated before loan repayments are made covers the Total Annual Repayment at least 1 time;~~
 - ~~v. Capital Cost (Interest Paid and Redemption) as a % of Total Operating Expenditure not to exceed the norm between 6 -8 %~~ Percentages of Total Annual Repayment (Capital and Interest) to Operating Expenditure to be less than 10%.

d) **Cash backed Reserves**

- a. Allocations to capital projects from cash backed internal reserves will be based on the available funding for each ring-fenced reserve according to the conditions of each reserve. With reference to Paragraph 5, **Reserves Policy**.

All capital projects have an effect on future operating budget therefore the following additional cost factors should be considered before approval:

- a) Personnel cost to staff new facilities once operational;
- b) Contracted services, that is, security, cleaning etc.;
- c) General expenditure such as services cost, stationery, telephones, material etc.;
- d) Other capital requirements to the operate facility such as vehicles, plant and equipment, furniture and office equipment etc.;
- e) Costs to maintain the assets;
- f) Interest and redemption in the case of borrowings;
- g) Depreciation charges;
- h) Revenue generation as the additional expenses incurred may be offset by additional revenue generated to determine the real impact on tariffs.

5. RESERVES POLICY

All reserves are “ring fenced” as internal reserves within the accumulated surplus, except for provisions as allowed by the General Recognized Accounting Practices (GRAP):

- a) Housing Development Fund;
- ~~b) Revaluation Reserve~~

The municipality endeavours to effectively utilise and maintain the **Capital Replacement Reserve** for the funding of capital replacement and renewal for future financial years. This reserve needs to be cash backed. This will provide the Municipality with a more balanced capital funding approach in the longer term thereby reducing the risk of reaching its maximum gearing ability or depleting its free cash.

This Reserve can be generated as follows from the Operating Budget; the following methodology needs to be read in conjunction with the **Liquidity Policy**:

- a) **Cash generated from Operating Activities:**

- a. The Municipality has maintained a strong ability to generate surplus operational cash flow which it has used to fund most of its capital spending in the past;
- b. In the past depreciation charges could be considered sufficiently cash backed based on the cash surplus generated prior to capital spending. ~~However~~ However, going forward should capital spending increase sharply it will result simultaneously with Depreciation charges increasing sharply which may therefore in future not be fully supported by ~~cash~~; cash.
- c. Depreciation is a method to generate future cash. ~~Therefore~~ Therefore, it is prudent to annually measure the cash coverage for depreciation charges until it is fully funded from cash through tariff ~~setting~~; setting.
- d. As at year end it is to be determined whether the Municipality meets its **Minimum Liquidity Criteria** as stipulated in the **Liquidity Policy**, excess cash in addition to this prescribed level is to be calculated and appropriated to the Capital Replacement Reserve and no more than 80% of the balance of the Capital Replacement Reserve as at year end should be allocated to the following year's capital budget unless sufficient recommendations are made to Council to substantiate such a decision.

~~b) Interest received on the investment made for the Capital Replacement Reserve~~

6. BORROWING POLICY

It is required that the Municipality comply with the guidelines of Chapter 6 of the MFMA with regards to Debt Disclosure as detailed in Sections 46, 47, 48 and 49. This section should be read in conjunction with point c) under paragraph 4.2. on page 6. External borrowings may only be incurred for approved capital programmes and may under no circumstances be allocated to fund the Operating Budget.

Municipal infrastructure has a long-term economic life and it is appropriate to fund assets of this nature with long term external borrowing. The economic life of assets should be equal to or longer than the tenure of the external borrowing.

The following needs to be taken into consideration when accessing external borrowing:

a) Types of loan financing

- a. Annuity Loans enable the Municipality to provide for the redemption of loans on an amortising basis which is generally the most cost effective method of financing often referred to as vanilla funding;
- b. Bullet Redemption Loans are attractive as interest on the loan is serviced with the capital redemption only taking place at the end of the tenure of the loan. However, this method is more costly as interest is paid on the full debt throughout the term as the Capital does not reduce. This type of loan also requires an annual contribution to a sinking fund, which in essence then mimics the traits of an annuity loan although at a higher cost. The use of such structure warrants a detailed motivation based on the benefits to the implementation of the capital project;
- c. Sculpted Repayment Loans offer a combination of the above two types, as loans are sculpted according to the potential cash flows to be generated from the capital project in future. For ~~example~~example, the following can be included in a sculpted loan:
 - i. A capital grace period in the first years of the development of the capital project;
 - ii. An incremental annual increase in the repayment in relation to the projected growth in revenue from the project.

b) Interest Rate Risk Management

- a. The impact of interest and capital redemption payments on both the current and forecasted property rates and service charges through tariffs taking into consideration the current and future capacity of the consumer to pay therefore;
- b. Likely movement in interest rates for variable rate borrowings. There are benefits to be yielded from borrowing on a variable rate if rates are projected to decrease in future, however it is prudent for the Municipality to enter into fixed interest rate loans to accurately budget for expenses incurred.

c) Tenure of Borrowing

- a. The tenure of external borrowings should where possible match the economic useful life of the asset.

d) Security

- a. Unless sufficient motivation is provided and other than for the provision of a sinking fund for the redemption of a bullet loan, the provision of any security against external borrowings, should be specifically motivated by the CFO for approval.

e) Loan Covenants

- a. The Municipality is to maintain a Loan Covenants Register detailing the covenants entered into with each active loan agreement until date of maturity thereof;
- b. Compliance with all loan covenants are to be monitored and reported on semi-annually to ensure that the Municipality does not breach any covenants;
- c. Should a default be triggered based on non-compliance with loan covenants, the Municipality is to alert Council and send the related Financial Institutions a written commitment to address the matter within a reasonable timeframe.

f) Level of gearing

- a. As stipulated in point c) under paragraph 4.2. on page 6, gearing is not only limited by the level of debt against the Total Operating Income (excluding conditional grants) but also limited by other operational factors including compliance with the stipulations of the approved **Liquidity Policy**.

7. CORPORATE GOVERNANCE (OVERSIGHT)

Compliance with the various stipulations as documented in this Borrowing, Funds and Reserves Policy need to be monitored by the Chief Financial Officer and reported on to the Municipal Manager on a monthly basis and to the Finance/Audit Committee on a quarterly basis.

Where compliance has been breached the Chief Financial Officer must present an action plan to correct the non-compliance. The Finance Committee must monitor the successful implementation of the corrective action plans and report progress to Council.

8. TRANSITIONAL ARRANGEMENT

Upon adoption of this policy by the Council, the Municipal Manager in conjunction with the Chief Financial Officer must determine the current performance levels of the Municipality against this Policy and present a plan of action towards achieving and maintaining the stipulation as set out in this policy thereby utilising a more blended funding mix for capital infrastructure investment.

The Council must approve an appropriate timeframe within which the Municipality must achieve the approved stipulations as set out in this Policy. The period between the date of the policy adoption by Council and the target date for compliance shall be known as the Transitional Period.

The Finance Committee must report progress during the approved Transitional Period to the Council.

9. POLICY MANAGEMENT

The *Borrowing, Funds and Reserves Policy* forms part of the Municipality's overall financial objectives and therefore forms part of approved Budget Policies. The policy must be reviewed at least annually during the budget revision and presented to Council for approval.

The **pPolicy** is effective from the date it is approved by Council.

8. REVIEW OF POLICY	<u>3127</u>

1. PREAMBLE

In the spirit of the Municipal Finance Management Act, (No.56 of 2003) “ to modernize budget and financial management practices by placing local government finances on a sustainable footing in order to maximize the capacity of municipalities to deliver services to all residents customers, users and investors” and,

Whereas chapter 4 of the Municipal Finance Management Act, (No 56 of 2003) determines that a municipality may, except where otherwise provided in the Act, incur expenditure only in terms of an approved budget; and within the limits of the amounts appropriated for the different votes in an approved budget,

~~In terms of the Budget and Reporting Regulations the municipality has to adopt a policy which includes the following:-~~

- ~~1. a policy dealing with the shifting of funds within votes~~
- ~~2. a policy dealing with the introduction of adjustment budgets~~
- ~~3. policies dealing with unforeseen and unavoidable expenditure~~
- ~~4. policies dealing with management and oversight~~

Therefore the Stellenbosch Municipality revised its Budget Policy to give effect to the Budget and Reporting Regulations as set out in this policy.

2. DEFINITIONS

~~"Accounting officer" means a person appointed in terms of section 82(l) (a) or (b) of the Municipal Structures Act;~~

~~"Allocation", means-~~

- ~~(a) a municipality's share of the local government's equitable share referred to in section 214(l) (a) of the Constitution;~~
- ~~(b) an allocation of money to a municipality in terms of section 214(1) (c) of the Constitution;~~
- ~~(c) an allocation of money to a municipality in terms of a provincial budget; or~~
- ~~(d) any other allocation of money to a municipality by an organ of state, including by another municipality, otherwise than in compliance with a commercial or other business transaction;~~

~~"Annual Division of Revenue Act" means the Act of Parliament, which must be enacted annually in terms of section 214 (1) of the Constitution;~~

~~"Approved budget," means an annual budget-~~

- ~~(a) approved by a municipal council, or~~
- ~~(b) includes such an annual budget as revised by an adjustments budget in terms of section 28 of the MFMA;~~

~~"Basic Municipal Service" means a municipal service that is necessary to ensure an acceptable and reasonable quality of life and which, if not provided, would endanger public health or safety or the environment;~~

~~"Budget-related Policy" means a policy of a municipality affecting or affected by the annual budget of the municipality, including-~~

- ~~(a) the tariff policy, which the municipality must adopt in terms of section 74 of the Municipal Systems Act;~~
- ~~(b) the rates policy which the municipality must adopt in terms of legislation regulating municipal property rates; or~~
- ~~(c) the credit control and debt collection policy, which the municipality must adopt in terms of section 96 of the Municipal Systems Act;~~

~~"Budget transfer" means transfer of funding within a function / vote subject to limitations.~~

~~"Budget Year" means the financial year of the municipality for which an annual budget is to be approved in terms of section 16(1) of the MFMA;~~

~~"Chief Financial Officer" means a person designated in terms of section 80(2) (a) of the MFMA;~~

~~"councillor" means a member of a municipal council;~~

~~"current year" means the financial year, which has already commenced, but not yet ended;~~

~~"delegation", in relation to a duty, includes an instruction or request to perform or to assist in performing the duty;~~

~~"executive mayor" means the councillor elected as the executive mayor of the municipality in terms of section 55 of the Municipal Structures Act;~~

~~"financial recovery plan" means a plan prepared in terms of section 141 of the MFMA~~

~~"financial year" means a twelve months period commencing on 1 July and ending on 30 June each year~~

~~"financing agreement" includes any loan agreement, lease, and instalment purchase contract or hire purchase arrangement under which a municipality undertakes to repay a long term debt over a period of time;~~

~~"fruitless and wasteful expenditure" means expenditure that was made in vain and would have been avoided had reasonable care been exercised;~~

~~"irregular expenditure", means-~~

- ~~(a) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the MFMA, and which has not been condoned by Council (b) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of that Act;~~
- ~~(b) expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Public Office Bearers Act, 1998 (Act No. 20 of 1998); or~~

~~(c) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or entity or any of the municipality's by laws giving effect to such policy, and which has not been condoned in terms of such policy or by law, but excludes expenditure by a municipality which falls within the definition of "unauthorised expenditure";~~

~~"investment/s", in relation to funds of a municipality, means-~~

- ~~(a) the placing on deposit of funds of a municipality with a financial institution; or~~
- ~~(b) the acquisition of assets with funds of a municipality not immediately required, with the primary aim of preserving those funds;~~

~~"local community" has the meaning assigned to it in section 1 of the Municipal Systems Act;~~

~~"Municipal Structures Act" means the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998);~~

~~"Municipal Systems Act" means the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000);~~

~~"long-term debt" means debt repayable over a period exceeding one year;~~

~~"municipal council" or "council" means the council of a municipality referred to in section 18 of the Municipal Structures Act;~~

~~"municipality"-~~

- ~~(a) when referred to as a corporate body, means a municipality as described in section 2 of the Municipal Systems Act; or~~
- ~~(b) when referred to as a geographic area, means a municipal area determined in terms of the Local Government: Municipal Demarcation Act, 1998 (Act No. 27 of 1998);~~

~~"municipal service" has the meaning assigned to it in section 1 of the Municipal Systems Act (refer to the MSA for definition);~~

~~"municipal tariff" means a tariff for services which a municipality may set for the provision of a service to the local community, and includes a surcharge on such tariff;~~

~~"National Treasury" means the National Treasury established by section 5 of the Public Finance Management Act;~~

~~"official", means-~~

- ~~(a) an employee of a municipality or municipal entity;~~
- ~~(b) a person seconded to a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity; or~~
- ~~(c) a person contracted by a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity otherwise than as an employee;~~

~~"overspending"-~~

- ~~(a) means causing the operational or capital expenditure incurred by the municipality during a financial year to exceed the total amount appropriated in that year's budget for its operational or capital expenditure, as the case may be;~~
- ~~(b) in relation to a vote, means causing expenditure under the vote to exceed the amount appropriated for that vote; or~~
- ~~(c) in relation to expenditure under section 26 of the MFMA, means causing expenditure under that section to exceed the limits allowed in subsection (5) of this section;~~

~~"quarter" means any of the following periods in a financial year:~~

- ~~(a) 1 July to 30 September;~~
- ~~(b) 1 October to 31 December;~~
- ~~(c) 1 January to 31 March; or~~
- ~~(d) 1 April to 30 June;~~

~~"service delivery and budget implementation plan" means a detailed plan approved by the executive mayor of a municipality in terms of section 53(l)(c)(ii) of the MFMA for implementing the municipality's delivery of municipal services and its annual budget, and which must indicate-~~

- ~~(a) projections for each month of-

 - ~~(i) revenue to be collected, by source; and~~
 - ~~(ii) operational and capital expenditure, by vote;~~~~
- ~~(b) service delivery targets and performance indicators for each quarter; and~~
- ~~(c) any other matters that may be prescribed, and includes any revisions of such plan by the executive mayor in terms of section 54(l) (c) of the MFMA;~~

~~"unauthorised expenditure", means any expenditure incurred by a municipality otherwise than in accordance with section 15 or 11(3) of the MFMA, and includes-~~

- ~~(a) overspending of the total amount appropriated in the municipality's approved budget;~~
- ~~(b) overspending of the total amount appropriated for a vote in the approved budget;~~
- ~~(c) expenditure from a vote unrelated to the department or functional area covered by the vote;~~
- ~~(d) expenditure of money appropriated for a specific purpose, otherwise than for that specific purpose;~~
- ~~(e) spending of an allocation referred to in paragraph (b), (c) or (d) of the definition of "allocation" otherwise than in accordance with any conditions of the allocation; or~~
- ~~(f) a grant by the municipality otherwise than in accordance with the MFMA;~~

~~"virement" refer to the definition of budget transfer~~

~~"vote" means-~~

- ~~(a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the~~
- ~~(b) municipality; and~~
- ~~(c) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned.~~

3.2. OBJECTIVES OF POLICY

The objective of the budget policy is to:

- ~~a) Set out the principles which the municipality will follow in preparing each medium term revenue and expenditure framework budget~~
- ~~b) Outline the responsibilities of the executive mayor, the accounting officer, the chief financial officer and other senior managers in compiling the budget~~
- ~~c) Establish and maintain procedures to ensure adherence to Stellenbosch Municipality's Integrated Development Plan (IDP) review and budget processes~~
- ~~d) Give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the planning, preparation and approval of the annual and adjustments budgets~~

~~The policy shall apply to all staff and councillors of the Stellenbosch Municipality that are involved in budget implementation.~~

- a) The policy sets out the budgeting principles which Stellenbosch Municipality will follow in preparing each annual budget 9or adjustments budget). The policy aims to give effect to the requirements and stipulations of the Municipal Finance Management Act in terms of the planning, preparation and approval of the annual budgets.
- b) The policy shall apply to all the relevant parties within the Stellenbosch Municipality that are involved throughout the budget process.
- c) A Budget Steering Committee will be established to guide the budget process.

~~4. BUDGET PREPARATION PROCESS~~

~~4.1 Budget Steering Committee~~

~~a) The mayor of a municipality must establish a budget steering committee to provide technical assistance to the mayor in discharging the responsibilities set out in section 53 of the Act.~~

~~b) The steering committee must consist of at least the following persons:~~

- ~~i. the councillor responsible for financial matters;~~
- ~~ii. the Municipal Manager;~~
- ~~iii. the Chief Financial Officer;~~
- ~~iv. the senior managers responsible for at least the three largest votes in the municipality;~~
- ~~v. the manager responsible for budgeting;~~
- ~~vi. the manager responsible for planning; and~~
- ~~vii. any technical experts on infrastructure.~~

~~4.2 Roles and responsibilities~~

~~4.2.1 Executive Mayor~~

~~a) As provided in Section 21(1) of the MFMA, the Mayor is responsible for:~~

- ~~i. Co-ordinating the process for preparing the annual budget and for reviewing the Integrated Development Plan (“IDP”) and budget related policies;~~
- ~~ii. Tabling in the council a time schedule outlining key deadlines.~~

~~b) In addition, as provided in Section 21(2) of the MFMA, for purposes of preparing the budget, the Mayor is required to:~~

- ~~I. — Take into account the Municipality's IDP;~~
 - ~~II. — Take all reasonable steps to ensure that the Municipality revises the IDP;~~
 - ~~III. — Take into account the national budget, the provincial budget, the national government's fiscal and macro-economic policy, the Annual Division of Revenue Act and any agreements reached in the budget forum;~~
 - ~~IV. — Consult the relevant district municipality, if applicable, and local municipalities within the district, the provincial treasury, and when requested, the national treasury, and any national organs of state as may be prescribed;~~
 - ~~V. — Provide on request information to the National Treasury and other organs of state and other municipalities affected by the budget.~~
- ~~e) Pursuant to Section 52 of the MFMA the mayor must:~~
- ~~I. — provide general political guidance over the fiscal and financial affairs of the municipality;~~
 - ~~II. — in providing such general political guidance, may monitor and, to the extent provided in~~
 - ~~III. — the MFMA, oversee the exercise of responsibilities assigned in terms of the MFMA to the accounting officer and the chief financial officer, but may not interfere in the exercise of those responsibilities;~~
 - ~~IV. — must take all reasonable steps to ensure that the municipality performs its constitutional and statutory functions within the limits of the municipality's approved budget;~~
 - ~~V. — must within 30 days of the end of each quarter, submit a report to the council on the implementation of the budget and the financial state of affairs of the municipality; and~~
 - ~~VI. — must exercise the other powers and perform the other duties assigned to the mayor in terms of the MFMA or delegated by the council to the mayor.~~
- ~~d) As Required by Section 53 of the MFMA, the mayor must:~~
- ~~I. — provide general political guidance over the budget process and the priorities that must guide the preparation of a budget;~~
 - ~~II. — co-ordinate the annual revision of the integrated development plan in terms of section 34 of the Municipal Systems Act and the preparation of the annual budget, and determine how the integrated development plan is to be taken into account or revised for the purposes of the budget; and~~
 - ~~III. — take all reasonable steps to ensure that:~~
 - ~~a. — the municipality approves its annual budget before the start of the budget year;~~

- ~~b. the municipality's service delivery and budget implementation plan is approved by the mayor within 28 days after the approval of the budget; and~~
- ~~c. the annual performance agreements as required in terms of section 57(1)(6) of the Municipal Systems Act, for the municipal manager and all senior managers comply with the MFMA and in particular, the provisions of Section 53(1)(c)(iii) of the MFMA;~~
- ~~iv. promptly report to the municipal council and the MEC for finance in the province any delay in the tabling of an annual budget, the approval of the service delivery and budget implementation plan or the signing of the annual performance agreements referred to above; and~~
- ~~v. ensure~~
 - ~~a. that the revenue and expenditure projections for each month and the service delivery targets and performance indicators for each quarter, as set out in the service delivery and budget implementation plan, are made public no later than 14 days after the approval of the service delivery and budget implementation plan; and~~
 - ~~b. that the performance agreements of the municipal manager, senior managers and any other categories of officials as may be prescribed are made public no later than 14 days after the approval of the municipality's service delivery and budget implementation plan. Copies of such performance agreements must be submitted to the council and the MEC for local government in the province.~~

4.2.2 Accounting Officer

- ~~a. The Accounting Officer shall provide technical and administrative support to the Executive Mayor in the preparation and approval of the annual and adjustment budgets, as well as the consultative process and the furnishing of information.~~
- ~~b. The Accounting Officer shall ensure that all heads of departments provide the inputs required by the Chief Financial Officer for the purpose of preparing the budget.~~
- ~~c. The Accounting Officer shall delegate to the Chief Financial Officer all such powers as may be necessary for the Chief Financial Officer to prepare the budgets.~~

4.2.3 Chief Financial Officer

- ~~a. The Chief Financial Officer shall provide technical and administrative support to the Executive Mayor in the preparation and approval of the annual and adjustment budgets, as well as the consultative process and the furnishing of information.~~
- ~~b. The Chief Financial Officer shall be responsible for preparing the budgets, as delegated by the Accounting Officer.~~
- ~~c. The Chief Financial Officer shall ensure that the annual and adjustments budgets comply with the requirements of the National Treasury, reflect the budget priorities determine by the mayor, are aligned with the IDP, and comply with all budget-related policies, and shall make recommendations to the mayor on the revision of the IDP and the budget-related policies where these are indicated.~~

4.2.4 Directors directly accountable to the Accounting Officer

- ~~a. Directors shall provide technical and administrative support to the Executive Mayor in the preparation and approval of the annual and adjustment budgets, as well as the consultative process and the furnishing of information.~~

4.3 Public participation process

~~a) Immediately after the draft resolutions of the annual budget is tabled in a municipal council, the Accounting Officer of the municipality must—in accordance with Chapter 4 of the Municipal Systems Act—~~

- ~~i. make public the annual budget and the documents referred to in section 17(3); and~~
- ~~ii. invite the local community to submit representations in connection with the budget; and~~
- ~~iii. submit the annual budget—(draft budget)~~
- ~~iv. in both printed and electronic formats to the National Treasury and the relevant provincial treasury as prescribed by National Treasury; and~~
- ~~v. in either format to any prescribed national or provincial organs of state and to other municipalities affected by the budget.~~

~~b) When the annual budget has been tabled, the municipal council must consider any views of—~~

~~i. the local community; and~~

~~ii. the National Treasury, the relevant provincial treasury and any provincial or national organs of state or municipalities which made submissions on the budget.~~

~~e) The Municipal Manager must also make public any information that the municipal council considers appropriate to facilitate the budget consultation process, including:~~

~~i. Summaries of the annual budget and supporting documents in alternate language predominant in the community; and~~

~~ii. Information relevant to each ward in the municipality~~

~~iii. All the information contemplated in sub-regulation (c) must cover~~

~~iv. The relevant financial and service delivery implications of the annual budget; and~~

~~v. At least the previous year's actual outcome, the current year's forecast outcome, the budget year, and the following two years.~~

~~d) When submitting the annual budget to the National Treasury and the relevant provincial treasury, the municipal manager must also submit to National Treasury and the relevant provincial treasury, both in printed and electronic form—~~

~~i. The supporting budget documentation as tabled in the municipal council;~~

~~ii. The draft Service Delivery and Budget Implementation Plan (SDBIP); and~~

~~iii. Any other information as may be required by National Treasury.~~

~~e) The Municipal Manager must send copies of the annual budget and supporting documentation as tabled in the municipal council, in both printed and electronic form to:~~

~~i. Any other municipality affected by the annual budget within ten working days of the annual budget being tabled in the municipal council; and~~

~~ii. Any organ of state on receipt of a request from the organ of state.~~

~~f) After considering all budget submissions, the council must give the Executive Mayor an opportunity—~~

~~i. to respond to the submissions; and~~

~~ii. if necessary, to revise the budget and table amendments for consideration by the council.~~

~~g) Within consideration of the approval of the Annual Budget and thirty (30) days before the start of the budget year the Executive Mayor must table the following documents in the Council in consideration of the annual budget approval~~

- ~~i. A report summarizing the local community's views on the annual budget;~~
- ~~ii. Any comments on the annual budget received from National Treasury and Provincial Treasury;~~
- ~~iii. Any comments on the annual budget received from any organ of state, including any affected municipality; and~~
- ~~iv. Any comments on the annual budget received from any other stakeholders.~~

~~h) The Municipal Manager must assist the Executive Mayor in the preparation of the documents referred to in sub-regulation (g) and 23 (2) of the Act.~~

4.4 Approval of the budget

~~(a) Council shall consider the medium term revenue and expenditure framework budget (MTREF) for approval not later than 31 May (30 days before the start of the budget year).~~

~~(b) The council resolution must contain budget policies and the performance measures to be adopted.~~

~~(c) The council must consider the full implications, financial or otherwise, of the annual budget and supporting documentation before approving the annual budget.~~

~~(d) When approving the annual budget, the council must consider and adopt separate resolutions dealing with each of the matters contemplated.~~

~~(e) Should the municipality fail to approve the budget before the start of the budget year, the executive mayor must inform the MEC for Finance that the budget has not been approved.~~

~~(f) The budget tabled to Council for approval shall include the following supporting documents:~~

- ~~i. draft resolutions approving the budget and levying property rates, other taxes and~~
- ~~ii. tariffs for the financial year concerned;~~
- ~~iii. measurable performance objectives for each budget vote, taking into account the~~
- ~~iv. municipality's IDP;~~
- ~~v. the projected cash flows for the financial year by revenue sources and expenditure~~

- ~~VI. — votes;~~
- ~~VII. — any proposed amendments to the IDP;~~
- ~~VIII. — any proposed amendments to the budget-related policies;~~
- ~~IX. — particulars of any proposed allocations or grants to other municipalities, municipal~~
- ~~X. — entities, external mechanisms assisting the municipality in service delivery, other~~
- ~~XI. — organs of state, and organizations such as non-governmental organizations,~~
- ~~XII. — welfare institutions and so on;~~
- ~~XIII. — particulars of the municipality's investments;~~
- ~~XIV. — particulars of any proposed service delivery agreements, including material~~
- ~~XV. — amendments to existing service delivery agreements;~~
- ~~XVI. — the proposed cost to the municipality for the budget year of the salary, allowances~~
- ~~XVII. — and benefits of~~

- ~~(i) — each political office bearer of the municipality;~~
- ~~(ii) — councillors of the municipality; and~~
- ~~(iii) the municipal manager, the chief financial officer, each senior manager of the municipality and any other official of the municipality having a remuneration package greater than or equal to that of a senior manager;~~

~~4.5 Service Delivery and Budget Implementation Plan (SDBIP)~~

~~a) The Executive Mayor must approve the Service Delivery and Budget Implementation Plan not later than 28 days after the approval of the Budget by Council, and within ten days (10) after the Executive Mayor has approved the Plan it has to be made public.~~

~~b) The SDBIP shall include the following components:~~

- ~~i. — Projections for each month of Revenue to be collected, by source, and Operational and capital expenditure, by vote;~~
- ~~ii. — Service delivery targets and performance indicators for each quarter;~~
- ~~iii. — Monthly projections of revenue to be collected for each source;~~
- ~~iv. — Monthly projections of expenditure (operating and capital) and revenue for each vote;~~
- ~~v. — Quarterly projections of service delivery targets and performance indicators for each vote;~~
- ~~vi. — Information for expenditure and delivery; and~~
- ~~vii. — Detailed capital works plan.~~

5.3. BUDGET PRINCIPLES

- ~~a) The municipality shall ensure that revenue projections in the budget are realistic taking into account actual collection levels. The expenses may only be incurred in terms of the approved annual budget (or adjustments budget) and within the limits of the amounts appropriated for each vote in the approved budget.~~
- ~~b) Stellenbosch Municipality shall prepare a three year budget (medium term revenue and expenditure framework (MTREF)) which will be reviewed annually and will be approved by Council. The MTREF budget will at all times be within the framework of the Municipal Integrated Development Plan (IDP).~~
- ~~c) The annual budget will consist of a Capital and Operating Budget which will be discussed below:~~

35.1 Capital Budgets

- ~~a) The capital budget refers to the allocations made to specific infrastructural projects and the purchase of equipment and other forms of assets having a lifespan of more than one year, as classified per the Stellenbosch Asset Management Policy.~~

35.1.1 Basis of Calculation

- ~~a) The zero based method is used in preparing the annual capital budget, except in cases where a contractual commitment has been made that would span over more than one financial year.~~
- ~~a) The current three year MTREF budget, including two future planning years in terms of the 5 year IDP, is the departure point in preparing the subsequent annual capital budget.~~
- b) The annual capital budget shall be based on realistically anticipated revenue (capital loans to be taken up will be deemed to be part of this), which should be equal to the anticipated capital expenditure in order to result in a balanced budget.
- c) The impact of the capital budget on the current and future operating budgets in terms of finance charges to be incurred on external loans, depreciation of fixed assets, maintenance of fixed assets and any other operating expenditure to be incurred resulting directly from the capital expenditure, should be carefully analyzed when the annual capital budget is being compiled.
- d) In addition, the council shall consider the likely impact of such operational expenses- net of any revenues expected to be generated by such item- on future property rates and service tariffs.

53.1.2 Financing

4. Own Financing Sources

The Council shall establish a Capital Replacement Reserve (CRR) for the purpose of financing capital projects and the acquisition of capital assets. Such reserve shall be established from the following:

- a) unappropriated cash-backed surpluses to the extent that such surpluses are not required for operational purposes;
- b) further amounts appropriated as contributions in each annual or adjustments budget; and
- c) net gains on the sale of fixed assets in terms of the fixed asset management and accounting policy.

2. Other Finance Sources

The Ad- Hoc capital budget shall be financed from external sources such as the following:

- a) Grants and subsidies as allocated in the annual Division of Revenue of Act;
- b) Grants and subsidies as allocated by Provincial Government;
- c) External Loans;
- d) Private Contributions;
- e) Contributions from the Capital Development Fund (developer's contributions); and
- f) Any other financing source secured by the local authority.

3.1.3 Process and responsible parties

The process to be followed in the compilation of the capital budget is as follows:

- a. The current 3 year MTREF budget is the departure point in preparing the subsequent annual capital budget.
- b. The CFO, in conjunction with the Senior Manager: Financial Management Services and the Manager: Budget & Costing and after consultation with the Budget Steering

Committee sets the reasonable growth level of the capital budget to be financed out of own and external sources and determines affordability.

- c. The draft capital budget is compiled based on the projects that emanated out of the engagements with the different stakeholders.
- d. The CFO, together with the Senior Manager: Financial Management Services, engage with the Directors and the Senior Managers in order to determine the priorities for a particular financial year and to determine the ranking of projects based on these priorities.
- e. The draft capital budget is submitted to the Budget Steering Committee for perusal and suggestions.
- f. The draft capital budget is tabled in Council at least 90 days (31 March) before the start of the new financial year.
- g. After the draft budget is tabled in Council, it is advertised for public comment for a period of 30 days.
- h. Once the comments from the public have been received, noted and considered, any amendments and the final budget are tabled in Council for final approval, at least 30 days (31 May) before the start of the financial year.

5.1.3 3.1.4 Implementation

The process to be followed in the compilation of the capital budget is as follows:

- a) After the budget has been approved, the service delivery and budget implementation plan (SDBIP) should be compiled.
- b) The SDBIP must be tabled to the Mayor within 28 days after aforementioned approval.
- c) Each director has to indicate the intended spending patterns of both their capital and operating budgets. (Cash flows)
- d) These listed cash flows are consolidated into the Service Delivery and Budget Implementation Plan of the organisation.
- e) The SDBIP will be monitored on a monthly basis ~~where actual spending will be compared with the planned spending as indicated by the directors at the beginning of the year.~~
- f) Each directorate can use their respective vote numbers as indicated on the capital budget

5.2 3.2 Operational Budget

The operational budget refers to the funds that would be raised in the delivery of basic services, grants & subsidies and any other municipal services rendered. These funds are in turn used to cover the expenses incurred in the day to day running of the organization.

~~5.2.1~~ 3.2.1 Basis of Calculation

- a) A zero based approach is used ~~in preparing the annual operating budget.~~ by budget holders in preparing the annual operating budget, depending on the type of revenue or expenditure.
- b) The annual operating budget shall be based on realistically anticipated revenue, which should at least be equal to the anticipated cash operating expenditure in order to result in a balanced budget.-
- ~~c) An income based approach shall be used whereby realistically anticipated income is determined first and the level of operating expenditure would be based on the determined income flows.~~
- c) An income based approach shall be used where the realistically anticipated revenue would firstly be projected. The level of operating expenditure will then be based on the projected revenue, thus resulting in a balanced budget.

~~5.2.2~~ 3.2.2 Financing

The operating budget shall be financed from the following sources:

- a) ~~Service Charges~~
 - ~~(i) Electricity Charges~~
 - ~~(ii) Water Sales~~
 - ~~(iii) Refuse Removal Fees~~
 - ~~(iv) Sewerage Fees~~

~~Increases in tariffs should be cost reflective.~~

- b) ~~Property rates~~

~~Increases in rates will as far as possible be limited to inflation.~~

e) ~~Grants & Subsidies~~

~~Grants and subsidies shall be based on all the gazetted grants and subsidies plus all other subsidies received by the organization.~~

d) ~~Interest on Investments~~

~~The budget for interest and investment shall be in accordance with the Cash Management and Investment policy of the organization.~~

e) ~~Rental Fees~~

~~Income from rental property will be budgeted for based on the percentage growth rate as determined by Financial Services for a particular budget year.~~

f) ~~Fines~~

~~Income from fines will be budgeted for based on the actual fines issued in the preceding year (calculated on the basis of actual fines issued till end of February of each year, extrapolated over 12 months) and the percentage growth rate as determined by Financial Services for a particular budget year.~~

g) ~~Other Income~~

~~All other income items will be budgeted for based on the actual income received in the preceding year (calculated on the basis of actual receipts until end of February of each year, extrapolated over 12 months) and the percentage growth rate as determined by Financial Services for a particular budget year.~~

Agency Services - Compensation received by the municipality for cost to provide the agency service should be recognised as receipts and not set-off against the expenditure. This compensation maybe in the form of commission, agency fees, contract fees, etc.

Interest, Dividend and Rent on Land - Consist of the income associated with ownership of interest bearing financial instruments, such as bank deposits, loans extended to others, and bills and bonds issued by others. Dividends come in the form of receipts from shares and distribution of profits to the owner. Rent on land is the receipts due to ownership of land.

Operational Revenue - Operational revenue refers to all other income not elsewhere classified such as administrative fees, bad debts recovered, breakages, commission, discounts and early settlements, etc.

Rental from Fixed Assets - Operating lease income received by the municipality from external use. Distinction is made between rental income based on market related versus non-market related rates.

Sales of Goods and Rendering of Services - This category consist of sales and services rendered provided that the municipality produced or partially produced the good or service.

Service Charges - This group of accounts provides for the basic services delivered by municipalities.

Licences or Permits - Granting of licences or permits associated with a regulatory function by government. Fees recognised under this category must result from a principle agreement. If the municipality act as an agent on behalf of provincial or national government the transaction need to be treated accordingly. Judgment need to be applied in deciding whether the "licence or permits" need to be classified as exchange or non-exchange revenue.

Fines, Penalties and Forfeits - This item consists of all compulsory receipts imposed by a court or quasi-judicial body. Out-of-court settlements are also included in this category. As with taxes, this item consists of unrequited, compulsory transactions. Thus, the recipient municipality does not provide anything in return for these receipts.

Property Rates - Property Rates means a municipal rate on property envisaged in section 229 (1)(a) of the Constitution read with the Municipal Property Rate Act 6 of 2004 as amended by the Municipal Property Rates Amendment Act, 2014. Rateable property means property on which a municipality may in terms of section 8 levy a rate and excludes impermissible rates as per section 17 of the Act.

Transfers and Subsidies - This category provides for of all unrequited, voluntary receipts from other parties. Thus an entry should be made under this item when the municipality does not provide anything of similar value directly in return for the transfer from the other party and the transfer is voluntary. {GRAP 23: Transfers are inflows of future economic benefits or service potential from nonexchange transactions, other than taxes.} This group of accounts provide for "operational and capital transfers and subsidies" received "in-kind or in monetary value".

Interest, Dividend and Rent on Land - Consist of the income associated with ownership non-exchange transactions.

3.2.3 Process

- a. The CFO, in conjunction with the Senior Manager: Financial Management Services and the Manager: Budget & Costing, and after consultation with the Budget Steering Committee, sets the reasonable growth level of the operational budget based on the current financial performance and the prevailing industry growth levels. (i.e. CPI).
- b. After the income has been determined, an acceptable growth level for the operating expenditure is determined and the draft operating budget is discussed with the relevant Directors for their perusal and amendments.
- c. The draft operating budget is compiled based on the submissions from the engagements with the different stakeholders.
- d. The draft operating budget serves before the Budget Steering Committee for perusal and suggestions.

e. The draft operating budget is tabled in Council at least 90 days (31 March) before the start of the new financial year.

f. The draft SDBIP is tabled in Council at least 90 days (31 March) before the start of the new financial year.

g. After the draft budget is tabled in Council, it is advertised for public comment for a period of 30 days.

h. Once the comments from the public have been received, noted and considered, the final budget (inclusive of any amendments) is tabled in Council for adoption, at least 30 days (31 May) before the start of the financial year.

i. Sect 25(1) of the Municipal Finance Management Act (56 of 2003) states that "if a municipal council fails to approve an annual budget, including revenue raising measures necessary to give effect to the budget, the Council must reconsider the budget and again vote on the budget, or on an amended version thereof, within 7 days of the Council meeting that failed to approve the budget."

5.2.3 3.2.4 Implementation

- a) After the budget has been approved, the service delivery and budget implementation plan (SDBIP) is compiled.
- b) The SDBIP must be tabled to the Mayor within 28 days after aforementioned approval.
- c) Each director has to indicate the intended spending patterns of both their capital and operating budgets. (Cash flows)
- d) These listed cash flows are consolidated into the Service Delivery and Budget Implementation Plan of the organisation.
- e) The SDBIP will be monitored on a monthly basis, ~~where actual spending will be compared with the planned spending as indicated by the directors at the beginning of the year.~~

- f) Each directorate can use their respective vote numbers as indicated on the operatingcapital budget.

~~5.3 Contents of the Budget~~

- a) ~~The budget must comply with the provisions of Section 17(1) of the MFMA, and in particular:~~
- ~~i. The budget must be in the format prescribed by the regulations;~~
 - ~~ii. The budget must reflect the realistically expected revenues by major source for the budget year concerned;~~
 - ~~iii. The expenses reflected in the budget must be divided into the votes of the various departments of the municipality;~~
 - ~~iv. The budget must also contain:~~
 - ~~1. the foregoing information for the two years immediately succeeding the financial year to which the budget relates;~~
 - ~~2. the actual revenues and expenses for the previous financial year, and~~
 - ~~3. the estimated revenues and expenses for the current year.~~
- b) ~~The budget must be accompanied by all of the documents referred to in Section 17(3) of the MFMA.~~
- c) ~~For the purposes of Section 17(3) (k) of the MFMA, the salary, allowances and benefits of each group referred to therein must be stated individually.~~

~~5.4 Components of the Budget~~

- a) ~~The annual budget and adjustments budget shall, as required by Section 17(2) of the MFMA consist of:~~
- ~~i. the Capital component, and~~
 - ~~ii. the Operating component~~
 - ~~iii. Cash flow budget~~
 - ~~iv. Balance sheet budget~~
- b) ~~The operating component shall duly reflect the impact of the capital component on:~~

- ~~I. Compensation of employees & Remuneration of Councillors~~
 - ~~II. Bulk Purchases~~
 - ~~III. Debt impairment~~
 - ~~IV. Depreciation charges;~~
 - ~~V. ;~~
 - ~~VI. Finance charges;~~
 - ~~VII. Inventory consumed;~~
 - ~~VIII. Contracted services;~~
 - ~~IX. Transfer and subsidies; and~~
 - ~~X. Other operating expenses.~~
- e) ~~Before approving the capital budget component of the annual or adjustments budget, the council shall consider the impact of the capital component on the present and future operating budgets of the municipality in relation to the items referred to:~~
- ~~I. The projected cost covering all financial years until the project is operational;~~
 - ~~II. The future operational costs and revenue on the project, including municipal tax and tariff implications.~~
 - ~~III. All capital projects have an effect on future operating budgets. The following cost factors must therefore be considered before approval:~~
 - ~~1) Additional personnel cost to staff new facilities once operational;~~
 - ~~2) Additional contracted services, such as security, cleaning etc.~~
 - ~~3) Additional general expenditure, such as services cost, stationery, telephones, material etc.~~
 - ~~4) Additional other capital requirements to operate the facility, such as vehicles, plant and equipment, furniture and office equipment etc.~~
 - ~~5) Additional costs to maintain the assets;~~
 - ~~6) Additional interest and redemption in the case of borrowings;~~
 - ~~7) Additional depreciation charges;~~
 - ~~8) Additional revenue generation. The impact of expenditure items must be offset by additional revenue generated to determine the real impact on tariffs.~~

6. 3.2.5 ADJUSTMENTS BUDGETS

- (a) Each adjustments budget shall reflect realistic excess, however nominal, of current revenues over expenses.

- (b) The Chief Financial Officer shall ensure that the adjustments budgets comply with the requirements of the National Treasury, reflect the budget priorities determined by the executive mayor, are aligned with the IDP, and comply with all budget-related policies, and shall make recommendations to the executive mayor on the revision of the IDP and the budget-related policies where these are indicated.
- (c) Council may revise its annual budget by means of an adjustments budget as regulated.
- (d) The Accounting Officer must promptly adjust its budgeted revenues and expenses if a material under-collection of revenues arises or is apparent.
- (e) The Accounting Officer shall appropriate additional revenues, which have become available but only to revise or accelerate spending programmes already budgeted for or any areas of critical importance identified by Council in compliance with Item 2 of Section 10.
- (f) The Council shall in such adjustments budget, and within the prescribed framework, confirm unforeseen and unavoidable expenses on the recommendation of the Executive Mayor.
- (g) Only the Executive mayor shall table an adjustment budget. Adjustments budget shall be done once as part of the mid-year budget performance assessment.
- (h) An adjustments budget must contain all of the following:
 - I. an explanation of how the adjustments affect the approved annual budget
 - II. appropriate motivations for material adjustments; and
 - III. an explanation of the impact of any increased spending on the current and future annual budgets.
- (i) Any unappropriated surplus from previous financial years, even if fully cash-backed, may not be used to balance any adjustments budget, but may be appropriated to the municipality's capital replacement reserve.
- (j) Municipal taxes and tariffs may not be increased during a financial year except if required in terms of a financial recovery plan and or per National Treasury Regulations.
- (k) Unauthorised expenses may be authorised in an adjustments budget.

6.1 Formats of adjustments budgets

- ~~(a) An adjustment budget and supporting documentation of a municipality must be in the format specified by National Treasury and include all the required tables, charts and explanatory information, taking into account any guidelines issued by the Minister in terms of section 168(1) of the Act.~~

6.2 Funding of the adjustments budgets

- ~~(a) An adjustments budget of a municipality must be appropriately funded.~~
- ~~(b) The supporting documentation to accompany an adjustments budget in terms of section 28(5) of the Act must contain an explanation of how the adjustments budget is funded.~~

6.3 Timeframes for tabling of adjustments budgets

- ~~(a) An adjustments budget referred to in section 28(2)(b), (d) and (f) of the Act may be tabled in the municipal council at any time during the mid-year budget and performance assessment has been tabled in the council, but not later than 28 February of the current year.~~
- ~~(b) Only one adjustments budget referred to in subregulation (1) may be tabled in the municipal council during a financial year, except when the additional revenues contemplated in section 28(2)(b) of the Act are allocations to a municipality in a national or provincial adjustments budget, in which case subregulation (3) applies.~~
- ~~(c) If a national or provincial adjustments budget allocates or transfers additional revenues to a municipality, the mayor of the municipality must, at the next available council meeting, but within 60 days of the approval of the relevant national or provincial adjustments budget, table an adjustments budget referred to in section 28(2)(b) of the Act in the municipal council to appropriate these additional revenues.~~
- ~~(d) An adjustments budget referred to in section 28(2)(c) of the Act must be tabled in the municipal council at the first available opportunity after the unforeseeable and unavoidable expenditure contemplated in that section was incurred within the period set in section 29(3) of the Act.~~

- ~~(e) An adjustments budget referred to in section 28(2)(e) of the Act may only be tabled after the end of the financial year to which the roll-overs relate, and must be approved by the municipal council by 25 August of the financial year following the financial year to which the roll-overs relate.~~
- ~~(f) An adjustments budget contemplated in section 28(2)(G) of the Act may only authorise unauthorised expenditure as anticipated by section 32(2)(a)(i) of the Act, and must be—~~
- ~~(g) dealt with as part of the adjustments budget contemplated in subregulation (1); and~~
- ~~(h) a special adjustments budget tabled in the municipal council when the mayor tables the annual report in terms of section 127(2) of the Act, which may only deal with unauthorised expenditure from the previous financial year which the council is being requested to authorise in terms of section 32(2)(a)(i) of the Act.~~

6.4 Submission of tabled adjustments budgets

- ~~(a) The municipal manager must comply with section 28(7) of the Act, read together with section 22(b)(i) of the Act, within ten working days after the mayor has tabled an adjustments budget in the municipal council.~~
- ~~(b) When submitting the tabled adjustments budget to the National Treasury and the relevant provincial treasury in terms of section 28(7) of the Act, read together with section 22(b)(i) of the Act, the municipal manager must submit in both printed and electronic form

 - ~~i. the supporting documentation referred to in section 28(5) of the Act within ten working days of the adjustments budget being tabled in the municipal council; and~~
 - ~~ii. any other information as may be required by National Treasury.~~~~
- ~~(b) The municipal manager must send copies of an adjustments budget and supporting documentation, in both printed and electronic form to—

 - ~~i. any other municipality affected by that adjustments budget within ten working days of the adjustments budget being tabled in the municipal council; and~~
 - ~~ii. any other organ of state on receipt of a request from that organ of state.~~~~

6.5 Approval of adjustment budget

- ~~(i) A municipal council must consider the full implications, financial or otherwise, of the adjustments budget and supporting documentation referred to in section (1) (a) before approving the adjustments budget.~~
- ~~(j) When approving the adjustment budget, a municipal council must consider and adopt separate resolutions dealing with each of the matters listed in item 4 of Schedule B.~~

~~6.6 Publications of approved adjustment budget~~

- ~~(a) Within ten 10 working days after the municipal council has approved an adjustment budget, the municipal manager must in accordance with section 21A of the Municipal Systems Act make public the approved adjustments budget and supporting documentation, as well as the resolutions referred to in section 5 (a).~~
- ~~(b) When making public an adjustment budget and supporting documentation, the municipal Manager must make public awareness of the adjustment budget, including—~~
- ~~(c) Summaries of the adjustment budget and supporting documentation in alternate languages predominant in the community;~~
- ~~(d) Information relevant to each ward in the municipality, if that ward is affected by the adjustments budget; and~~
- ~~(e) Any consequential amendment of the service delivery and budget implementation plan that is necessitated by the adjustments budget.~~

~~6.7 Submission of approved adjustments budget and other documents~~

- ~~(a) The Municipal Manager must comply with section 28(7) of the Act read together with section 24(3) of the Act within ten working days after the municipal council has approved and adjustments budget.~~
- ~~b) When submitting an adjustments budget to National Treasury and other relevant Provincial Treasury in terms of section 28(7) of the Act read together with section 24(3) of the Act, the municipal manager must also submit to National Treasury and the relevant Provincial Treasury, I both printed and electronic form—~~

- ~~i. The supporting documentation within ten working days after the municipal council has approved the adjustments budget;~~
- ~~ii. The amended service delivery and budget implementation plan, within ten working days after the council has approved the amended plan in terms of the section 54(1)(c) of the Act; and~~
- ~~iii. Any other information as may be required by the National Treasury.~~

~~(c) The municipal manager must send copies of an adjustments budget and supporting documentation, in electronic pdf format to the local government upload portal—~~

- ~~i. Any other municipality affected by that adjustments budget within ten (10) working days of the adjustments budget being tabled in the municipal council; and~~
- ~~ii. Any other organ of state on receipt of a request from that organ of state.~~

~~7. BUDGET IMPLEMENTATION~~

~~7.1 Monitoring (Section 71 of MFMA)~~

~~(a) The Accounting Officer with the assistance of the Chief Financial Officer and other senior managers is responsible for the implementation of the budget, and must take all reasonable steps to ensure that:~~

- ~~i. funds are spent in accordance with the budget;~~
- ~~ii. expenses are reduced if expected revenues are less than projected; and~~
- ~~iii. revenues and expenses are properly monitored.~~

~~7.2 Reporting~~

~~7.2.1 Monthly budget statements (Section 71 of the MFMA)~~

~~(b) Accounting Officer with the assistance of the Chief Financial Officer must, not later than ten working days after the end of each calendar month, submit to the Executive Mayor and Provincial and National Treasury a report in the prescribed format on the state of the municipality's budget for such calendar month, as well as on the state of the budget cumulatively for the financial year to date.~~

~~(c) This report must reflect the following:~~

- ~~i. actual revenues per source, compared with budgeted revenues;~~
- ~~ii. actual expenses per vote, compared with budgeted expenses;~~
- ~~iii. actual capital expenditure per vote, compared with budgeted expenses;~~
- ~~iv. actual borrowings, compared with the borrowings envisaged to fund the capital budget;~~
- ~~v. the amount of allocations received, compared with the budgeted amount;~~
- ~~vi. actual expenses against allocations, but excluding expenses in respect of the equitable share;~~
- ~~vii. explanations of any material variances between the actual revenues and expenses as indicated above and the projected revenues by source and expenses by vote as set out in the service delivery and budget implementation plan;~~

- ~~viii. the remedial or corrective steps to be taken to ensure that the relevant projections remain within the approved or revised budget; and~~
- ~~ix. projections of the revenues and expenses for the remainder of the financial year, together with an indication of how and where the original projections have been revised.~~

~~7.2.2 Quarterly Reports (Section 52 of MFMA)~~

- ~~(a) The Executive Mayor must submit to Council within thirty days of the end of each quarter a report on the implementation of the budget and the financial state of affairs of the municipality. The report submitted to National and Provincial Treasury must be both in electronic format and in a signed written document.~~

~~7.2.3 Mid-year budget and performance assessment (Section 72 and 88 of MFMA)~~

- ~~(a) The Accounting Officer must assess the budgetary performance of the municipality for the first half of the financial year, taking into account all the monthly budget reports for the first six months, the service delivery performance of the municipality as against the service delivery targets and performance indicators which were set in the service delivery and budget implementation plan.~~
- ~~(b) The Accounting officer must then submit a report on such assessment to the Executive Mayor by 25 January each year and to Council, Provincial Treasury and National Treasury by 31 January each year.~~
- ~~(c) The Accounting Officer may in such report make recommendations after considering the recommendation of the Chief Financial Officer for adjusting the annual budget and for revising the projections of revenues and expenses set out in the service delivery and budget implementation plan.~~

8.4. REVIEW OF POLICY

- (a) This policy shall be reviewed on an annual basis to ensure that it is in line with the municipality's strategic objectives, good governance, prudent expenditure management and with relevant legislation.

PREAMBLE

Whereas Section 13 of the Local Government: Municipal Finance Management Act, 2003 (No. 56 of 2003) (the Act) determines that a municipality must introduce an appropriate and effective cash management and investment arrangement;

and whereas a bank, in accordance with the provisions of Section 13 of the Act, has to disclose details regarding a municipalities' investments;

and whereas councillors and officials, as trustees of public funds have an obligation to ensure that cash resources are managed as effectively, efficiently, and economically as possible;

now therefore the Stellenbosch Municipality adopted the Cash and Investment Management Policy set out in this document.

1. LEGAL FRAMEWORK

- a) Legislation – Local Government: Municipal Finance Management Act 56 of 2003 (As amended).
- b) Treasury regulations in terms of Section 13(1) of the Act (As amended).

In this Policy, the terms “*the Act*” or “*MFMA*” refers to the Local Government: Municipal Finance Management Act, 2003 (No. 56 of 2003).

2. OBJECTIVES

- a) To maximize returns from authorized investments, consistent with the secondary objective of minimizing risk.
- b) To ensure compliance with all legislation governing the investment of funds.
- c) To maintain adequate liquidity to meet cash flow needs.
- d) To undertake the investment of funds not immediately required for operational purposes in a prudent financial manner.
- e) To ensure diversification of permitted investment.

3. CASH MANAGEMENT

3.1 Guiding Principles

It is recognised that from time to time, Council has cash flow surpluses and borrowing requirements due to daily receipts and payments.

Council maintains a daily cash position summary and a yearly cash flow projection is prepared during the annual planning process and is updated monthly. This determines Council's borrowing requirements and surpluses for investment. Cash invested “outside” the bank account is covered by paragraph 5 of this Policy.

3.2 Bank Accounts

Council operates one primary bank account for its day to day operational activity requirements and two secondary accounts specifically for service charges and revenue derived from fines.

All monies due to Council and due by Council emanating from Council activities must pass through this primary account, therefore secondary accounts are swept daily, and all balances are transferred to the primary bank account.

3.2.1 Revenue Management

Revenue Management Section 64 of the Act clearly states that all moneys received must be promptly deposited in the Municipality's primary and other bank accounts, therefore:

- all revenue received by the Municipality, including revenue received by any collecting agent on its behalf, is recorded at least on a weekly basis.
- all monies collected by the Municipality on behalf of another organ of state must be transferred to that organ of state at least on a weekly basis.

3.2.2 ~~Cheque Management~~ Petty Cash Withdrawal

~~Cheques are printed in batch format. To prevent the removing of cheques, cheques are delivered in sealed boxes where strict control is exercised over the numerical sequence of cheques on the expenditure system by means of a cheque register~~
~~Petty Cash is replenished by completing a petty cash replenish form provided.....~~

3.2.3 Delegation/Rights

The incumbents of the following posts are authorized ~~to sign~~ to sign petty cash request forms and authorise electronic payments ~~cheques~~ on behalf of Council:

~~3.2.3.1~~ Cheques

~~A Signatories: Chief Financial Officer~~

~~SNR Manager: Financial Management Services~~

~~SNR Manager: Revenue and Expenditure~~

~~Manager: Expenditure Management~~

~~Manager: Revenue~~

~~SNR Manager: Supply Chain Management~~

~~Manager: Budget and Costing~~

~~Manager: Financial Statements, Compliance and Reporting~~

~~Manager: Financial Asset Management~~

~~B Signatories: Chief Accountant: Consumer Accounts and Valuations~~

~~Senior Accountant: Cash Management and Credit Control~~

~~Chief Accountant: MFMA Reporting and Compliance~~

~~Chief Accountant: Financial Statements and Reconciliations~~

~~Chief Accountant: Asset Management~~

~~Senior Accountant: Creditors and Payroll~~

~~Each cheque needs to be signed by at least two A-Signatories, or one A-Signatory and one B-Signatory.~~

A-Signatories: Chief Financial Officer
 SNR Manager: Financial Management Services
 SNR Manager: Revenue and Expenditure
 Manager: Expenditure
 Manager: Revenue
 SNR Manager: Supply Chain Management
 Manager: Budget and Costing
 Manager: Financial Statements, Compliance and Reporting
 Manager: Financial Asset Management

B-Signatories: Chief Accountant: Consumer Accounts and Valuations
 Senior Accountant: Cash Management and Credit Control
SeniorChief Accountant: MFMA Reporting and Compliance
SeniorChief Accountant: Financial Statements and Reconciliations
 Chief Accountant: Asset Management
 Chief Accountant: SDBIP Monitoring and Budget Control x2
 Senior Accountant: Creditors and Payroll

Each electronic payment and petty cash request form needs to be authorized by at least two A-Signatories, or one A-Signatory and one B-Signatory.

3.3 Bank Overdraft

3.3.1 Council made the decision to not request an overdraft facility with its primary banker. as the general policy is to avoid going into overdraft.

In the instance that short-term debt is incurred based on expected income it must be repaid within the same financial year. (Section 45 of the MFMA)

3.3.2 Any overdrawn bank account at any date must be reported without avail to Council supported by reasons, therefore.

3.3.3 Any short-term facility that requires review must first be approved by the Accounting Officer.

4. CASH MANAGEMENT PROCEDURES

4.1 Internal Controls

The supervisor and/or Accountant do a monthly audit on the cashier floats, manual receipt books and the compilation of daily cash-up and banking documents.

4.2 Issuing of Receipts

The cashier will only issue an official enumerated receipt when a client pays his/her municipal account in full or partially.

4.3 Cancellation of Receipts

An official enumerated receipt will only be cancelled whilst the client is still at the cash office and only for the following ~~reasons;~~reasons.

- a) cashier made an error.
- b) client made an error.

The cashier will re-issue a correct receipt and the cancelled receipt will be signed by the incumbent and the supervisor. In cases where the client wants his money back a prescribed official document must be completed and signed by the Client, Cashier and the Supervisor stating the reason(s) for cancelation.

4.4 Cash Balancing

After the end of each shift, the cashier will count the monies received, and do a daily end of day cashier procedure. The supervisor will then re-count the money to ensure that the cashier's daily takings balances with the supervisor's end-of-day totals. The cashier will do a final end-of-day procedure when he/she balances, and the supervisor will do a receipting end of day shut-down procedure.

4.4.1 Cashier surplus and shortage

If the cashier is short, he/she will then pay the monies in immediately. If there is a surplus the cashier will receipt the surplus on the same day. Management discretion can be used should there be substantial evidence and motivation that it was out of the control of a cashier to avoid a shortage the Manager can exonerate the cashier from paying the shortfall and in such an instance the shortage should be allocated to an expense line item.

4.4.2 Cashier resources

The Cashier will be supplied with the necessary tools and equipment to perform a proper cashier function. (~~E.g.~~E.g., Ultra-violetUltraviolet lights, etc.)

4.5 Deposit Books

Each satellite-office cashier has an enumerated deposit book, as each pay point has a number. The Senior Clerk: Cashier orders books from the bank when needed. Head Office cashiers use the cash-vault machines for all deposits.

4.6 Other payment methods

4.6.1 Direct Deposits and ACB

Direct deposits can be made into Municipal bank account via the Internet or by deposit slip via their bank, using the applicable Municipal account number as reference. This information is extracted and uploaded on a daily basis from the bank and is then credited against the client's accounts. Accounts are also paid by means of a debit order (ACB) payment.

4.6.2 3rd Party

Payments can be made at any EasyPay ~~and Pay@~~ pay points. This information is extracted and uploaded on a daily basis from EasyPay ~~and Pay@~~ and credited against the client's accounts. ~~incomplete~~

4.6.3 ~~Cheque Deposit (Only bank guaranteed cheques will be accepted)~~

~~The cashier will issue an official enumerated receipt when a client pays his/her Municipal account with a bank guaranteed cheque. Bank guaranteed cheques that are dropped into the cheque deposit box at the Municipal office are taken out of the box on a daily basis, receipted by the cashier and the receipt is posted to client on request.~~

4.6.4 ~~Mailed Bank Guaranteed Cheques~~

~~Bank guaranteed cheques attached to the Municipal account are collected from the post office on a daily basis and is recorded in a register at the Records department. It is then collected by the Supervisor. Cashiers who will write all the bank guaranteed cheques up in a register. The supervisor will hand it to the cashier to be receipted and the receipt details will be entered in the register.~~

4.6.5 ~~Returned/Rejected Cheques and Debit Orders~~ Debit Orders and/or Electronic Payments

~~If cheques and debit orders are returned and marked as "Refer to Drawer", the full balance will immediately become payable. -When debit orders are rejected by the respective banks, the full balance will immediately become payable. , and the full balance will be immediately become due. Any debit orders captured by the Finance Department and If debit orders are rejected three times the debit order will be cancelled.~~

4.6.5.1

In the event that a debit order is rejected due to insufficient funds, or the clients bank account being closed (or other reasons) an admin charge , as approved by council, will be levied to the debtor account. An admin charge will not be levied in the event of death or where the error arises on the municipality's side. The cost that is payable by the

~~consumer must be equal to the prescribed fee that has been approved by Council in all cases where a cheque bears the status of "Refer to Drawer".~~

4.6.5.2 ~~Bank charges in this regard will be payable by the consumer. In the event of a customer having tendered a "refer to drawer cheque" for the second time, no further cheques will be accepted from him/her, excluding bank guarantee cheques.~~

4.6.5.3 ~~A cashier must not accept a cheque that was issued by a Consumer in the event the cheque bears the status as a post-dated cheque, altered and/or an unsigned cheque. In the event this occurs and notwithstanding the aforementioned provisions, all bank charges that would arise and be incurred by Stellenbosch Municipality will then be recovered from the said cashier. The cashier will be required to pay back the bank costs as approved by Council within 24 hours for recovery of the said amount.~~

4.6.6 Private Money

No Municipal employee is allowed to:

- Use Council's cash funds at any stage to be replaced at a later stage.
- Use his/her own money as cashier float.
- ~~Change a Municipal official's cheque for cash.~~
- Safeguard private money amongst Council's cash (~~e.g.e.g.,~~ Cashier drawers, petty cash boxes, safes, Cash vault machines(~~machines~~ (where installed) etc.)

5. INVESTMENTS

5.1 Guiding Principles

Generally, Council will invest surplus funds with deposit taking institutions registered in terms of the Bank's Act, 1990 (Act 94 of 1990) for terms not exceeding one year in anticipation of cash flow expectations. From time to time, with prior Executive Mayoral Committee approval, investments can exceed 1 [one] year and be made at other institutions/instruments as approved in the National Treasury regulations from time to time.

5.2 Permitted Investments

The Account Officer must ensure that only the following investment types are utilized in terms of Section 6 of the Municipal Investment Regulations (No. R. 308) dated 1 April 2005:

- a) Securities issued by national government.
- b) Listed corporate bonds with an investment grade rating from a recognized credit rating agency.

- c) Deposits with banks registered in terms of the Banks Act (Act 45 of 1984).
- d) Deposits with the Public Investment Commissioners.
- e) Deposits with the Corporation for Public Deposits.
- f) Banker's acceptance certificate or negotiable certificates of deposits of registered banks.
- g) Guaranteed endowment policies with the intention of establishing a sinking fund.
- h) Repurchase agreements with registered banks.
- i) Municipal bonds issued by a municipality.
- j) Any other investment type as identified by the Minister of Finance in consultation with the Financial Services Board.

5.3 Diversification

Council will only make investments, as prescribed by Section 6 of the Municipal Investment Regulations, with approved institutions ~~which have a rating as defined per Appendix A as set out in par 5.2 above. Excluding investments made per Executive Mayoral Committee resolution not more than 50% of available funds will be placed with a single institution.~~ The discretion of management should be used when investing funds into the institution quoting the highest rate versus diversification of investment portfolio. Should the difference between the investment quotes be minimal, a decision can be made to invest in the lower quote for the diversification of investment portfolios.

5.4 Investment Managers

5.4.1 In the event of the appointment of an external Investment Managers

Where the above means a natural person or legal entity that is a portfolio manager registered in terms of the Financial Markets Control Act, 1989 (Act 55 of 1989), and Stock Exchanges Control Act, 1985 (Act 1 of 1985), contracted by a municipality or municipal entity to-

- a) advise it on ~~investments;~~investments.
- b) manage investments on its behalf; or
- c) advise it on investments and manage investments on its behalf.

The External Investment Manager will be appointed in terms of Supply Chain Management Policy and a service level agreement will govern the functions and responsibility of the service provider. All investments made by the External Investment Manager on behalf of the Council of Stellenbosch Municipality must be made within the ambit of this Policy and with National Treasury's investment regulations.

5.5 Internal Controls Over Investments

5.5.1 Delegations

5.5.1.1 In terms of Section 60(2) of the Local Government: Municipal Systems Act, (Act 32 of 2000) (the MSA), the Council may only delegate to the Municipal Manager (MM) the power to make decisions on investments on behalf of the Municipality.

5.5.1.2 In terms of section 79 of the Act, the Accounting Officer has delegated to the Chief Financial Officer (CFO), in writing, his/her duty under section 65(2) (h) to manage the Council's available working capital effectively and economically in terms of the prescribed cash management and investment framework.

5.5.2 Obtaining quotations and concluding deals

Request are emailed to all approved institutions the day before, or the morning thereof. A cut-off is requested to ensure timeous processing of authorisation and payment of the investment transactions. Quotes are captured on the decision report rates are compared and chosen in terms of the policy. Writing mandates, signed by the CFO and MM, shall be issued to all successful investees with whom the Council of Stellenbosch Municipality invests funds setting out the following:

5.5.2.1 Authorised dealers: name and particulars of the Council's officials who are authorised to transact investments deals with the investees;

5.5.2.2 Authorised signatories: name and particulars of the Council's officials who are authorised to sign written confirmations or any other correspondence in respect of investments transactions.

5.5.2.3 A dealing sheet, signed by an authorised dealer, shall be prepared in all instances for each individual investment, detailing the quotations received and the recommended investee. The CFO shall advice the MM to approve the transaction.

A written confirmation of the terms of each investment transaction shall be prepared, and signed off by the CFO and MM.

5.5.3 A monthly investment register should be kept of all investments made. The following information must be ~~recorded~~: -

- name of ~~institution~~: institution.
- capital ~~invested~~: invested.
- date ~~invested~~: invested.
- interest ~~rate~~: rate.

- maturation date;date.
- interest received;received.
- Investment balance;balance.
- total withdrawal amount;amount.
- total interest earned.

5.5.3.1 The investment register and accounting records must be reconciled on a monthly basis.

6. OWNERSHIP

All investments must be made in the name of the Council of Stellenbosch Municipality.

Written proof of investments made must be obtained from the institution where the investment is made and must be kept on file.

7. DUE CARE

In dealing with financial institutions, the following ethical principles must be observed:

- 7.1 The Chief Financial Officer and all staff in his/her directorate shall not accede to any influence by or interference from Councillors, investment agents, institutions, or any other outsiders;
- 7.2 Under no circumstances may inducements to invest be accepted;
- 7.3 Interest rates quoted by one institution must not be disclosed to another institution; and
- 7.4 The business ethics of any controlling body of which the relevant financial institution is a member must be observed by such institution or body at all times.

8. PERFORMANCE MEASUREMENT

Measuring the effectiveness of Council's treasury activities is achieved through a mixture of subjective measures. The predominant subjective measure is the overall quality of treasury management information. The Chief Financial Officer has primary responsibility for determining this overall quality.

Objective measures include: -

- (a) Adherence to policy.

- (b) Timely receipt of interest income.

9. REPORTING

9.1 Reports

The following reports are produced:

REPORT NAME	FREQUENCY	PREPARED BY	RECIPIENT
Bank Balance report	Daily	Senior Clerk: Electronic Payments	Chief Finance Officer
Investments	Monthly	<u>Senior</u> Chief Accountant: Financial Statements and Reconciliations	Manager: Financial Statements and Reporting

10. ANNUAL REVIEW OF POLICY

This Policy will be reviewed annually or earlier if so required by legislation.

Any changes to this Policy must be adopted by Council and be consistent with the applicable Acts and any National Treasury Regulations.

11. EFFECTIVE DATE

The effective date of this Policy is 1 July 2020-2023 and will be reviewed on an annual basis to ensure that it is in line with the Municipality's strategic objectives and with legislation.

12. SHORT TITLE

This Policy is the Cash Management and Investments Policy of the Stellenbosch Municipality.

PREAMBLE

In terms of Section 96 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) a Municipality shall-

- (a) collect all money due and payable to it, subject to the provisions of said Act and any other applicable legislation and By-laws; and
- (b) for this purpose, implement and maintain a credit control and debt collection policy which is consistent with its Rates and Tariffs ~~policies~~policies, and which complies with the provisions of said Act.
- (c) In order to give effect to the afore going provisions of said Act, the Council of the Stellenbosch Municipality (WC024), herein after refer~~red~~red to as the Municipality, has adopted a policy relating to credit control and debt collection as set out hereinafter.

1. PRINCIPLES

This Policy supports the following principles:

- (a) Human dignity must be upheld at all times.
- (b) This Policy must be implemented with equity, fairness and consistency.
- (c) Endeavours shall be focused such that data related to owners/debtors/consumers and accounts are correct at all times.
- (d) The implementation of this Policy shall be based on sound business principles, which may include credit worthiness checks and assessments of the credit risks involved.
- (e) New services will only be provided if supported by the relevant service contract(s) being duly completed. Payment of the applicable consumer deposit will be the primary means to cover said contract obligation.

Any deviation from the payment of the consumer deposit will be directed by the sole discretion and due consideration/approval by an accountant or more senior official in the Municipality's Revenue Department.

Alternatively, to the payment of a deposit a bank guarantee in a form acceptable to the Municipality's Chief Financial Officer will be considered.

- (f) Interest on overdue accounts will be charged at the South African Reserve Bank's prime interest rate plus one percent and will be levied on applicable accounts outstanding after the relevant due dates thereof. For the purposes of calculation, a portion of a month will be deemed to constitute a full month.
- (g) Deposits/Bank guarantees will be utilised to proactively mitigate the potential of unnecessary credit risk exposure to Council.
- (h) An administration fee and/or collection fee will be charged on overdue accounts, according to Council's approved tariffs and the By-laws of Stellenbosch Municipality (WC024).
- (i) The rates components on overdue accounts may be processed in terms of Sections 28 and 29 of the Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA) and as described in the Rates Policy of Stellenbosch Municipality.

2. MUNICIPAL ACCOUNTS and ADDITIONAL MECHANISMS

2.1 Notices and Demands

The Owner's/Debtor's/Consumer's attention is drawn to the note on the municipal account, which states that the supply of services will be discontinued/restricted without further notice if the accounts are not settled in full. This serves as a warning to a defaulting owner/debtor/consumer that services will be discontinued/restricted upon defaulting on payments.

Notices, e-mails, cell phone text messages (SMS) or any available informative actions will however be issued to account holders as a first attempt (first notice) after the due date as a means to recover debt and to remind consumers/debtors/owners of their obligation to pay for services.

The aim of such reminders is to urge co-operation to settle accounts without the necessity to employ more drastic steps and to offer the opportunity to make arrangements to pay off such debt where the financial position of a consumer is such that relief is possible as per criteria in the Municipality's Rates or Indigent Policies.

Failure to respond to the aforesaid first notice will result in the disconnection and/or restriction of services and a final demand being issued where applicable.

Failure to respond to a final demand and in the event of arrears not being settled within the period stipulated in the final demand, or an arrangement not being concluded, legal action may be instituted (with the Municipality's rights reserved, notwithstanding the fact that services were disconnected/restricted or not) to recover the full outstanding debt.

In this regard the Municipality may consolidate any separate accounts of a debtor, credit a payment by a debtor against any account of that debtor and implement any of the measures provided for in this policy or the Credit Control and Debt Collection By-law in relation to any arrears of any of the accounts of such a debtor.

In the case of housing rental contracts, the Municipality may consider procedures for eviction or right sizing.

2.2 Additional Mechanisms

2.2.1 Electricity Services:

In the event of an owner/debtor/consumer, failing to pay for electrical services due and payable, and in the event of such consumer having been placed on the disconnection list 3 times within a twelve (12) month period prior to such event, then Stellenbosch Municipality will have the right to install pre-paid electricity meters in a

bid to limit credit risk. The Municipality may also consider upward adjustment of the relevant consumer deposit/bank guarantee.

2.2.2 Water Services:

(a) The Stellenbosch Municipality may in the event of an owner/debtor/consumer exhibiting a trend of non-payment of accounts during a twelve (12) month period prior to a non-payment event (i.e. 3 times or more non-payment events) consider the installation of water demand management devices with pre-paid functionality in a bid to limit credit risk. The Municipality may also consider upward adjustment of the relevant consumer deposit/bank guarantee.

(b) In addition to the above, Stellenbosch Municipality will restrict water usage on a property for a high-usage non-paying owner/debtor/consumer/user or a non-paying indigent owner/debtor/consumer/user if such owner/debtor/customer/user fails to pay for water usage in excess of 6kl (kilolitre). These restrictive measures will be applied on said property as described and according to the table below.

The process to limit the outstanding debt basically follows a three-stage approach. The stages corresponding to the limiting levels as per the table below are dependent upon the level of usage at the commencement of debt management and the "Category of usage" of the property. The stages are administered as follows:

- (i) It will be incumbent of the owner/debtor/customer/user to present proof of occupancy if in the opinion of said owner/debtor/customer/user the number of persons on the property is different as to the "Category of usage" applied by Stellenbosch Municipality. Upon any proven discrepancies the Stellenbosch Municipality may apply the necessary corrective actions to address the issue at hand.
- (ii) The lowest stage of service for any "Category of usage" is the "Free Basic Service" level [6kl (kilolitre)].
- (iii) If the defaulting owner/debtor/customer/user is using more than the monthly usage of the "1st Restrictive limit" as per the table below at the commencement of debt management, the owner's/debtor's/customer's/user's maximum usage will be set to the corresponding "1st Restrictive limit" level.
- (iv) If the defaulting owner/debtor/customer/user is not using more than the monthly usage of the "1st Restrictive limit" then the level will, at the commencement of debt management, be set based upon the range of a given lower level within which said owner's/debtor's/customer's/user's usage corresponds.

- (v) Upon the owner/debtor/customer/user defaulting after any previous stage had been set and to mitigate further debt the service level will be downgraded from the highest level at the commencement of debt management via reactionary stages until that owner/debtor/customer/user is at the lowest stage of service.
- (vi) The timeframes for the implementation of the downgrading from the highest level to the lowest level will be determined and implemented by the Municipality on date of defaulting by the owner/debtor/customer/user. These timeframes between stages may be different for the owners/debtors/customers/users involved.
- (vii) After the implementation of any restrictive measures as describe above, and said owner/debtor/customer/user has fully paid the outstanding debt, the Stellenbosch Municipality may after consideration and approval by the Manager Revenue or the Accountants in the Credit Control Section reverse the restrictive measures, but nevertheless in discreet ascending stage steps. Each stage will be time managed to prove successful payment of usage during said stage before any other stage is considered. If the owner/debtor/customer/user should however default during this process all restrictive measures will be reverted in discreet downwards stage step from the stage on which the owner/debtor/customer/user was at the time of defaulting.

<u>Category of usage</u>	<u>Free Basic Service</u>	<u>2nd Restrictive limit</u>	<u>1st Restrictive limit</u>
<u>1 to 6 persons or Indigent households</u>	<u>200l per day up to 6kl per month</u>	<u>Not applicable for this "Category of usage"</u>	<u>400l per day up to 12kl per month</u>
<u>7 to 9 persons</u>	<u>200l per day up to 6kl per month</u>	<u>400l per day up to 12kl per month</u>	<u>750l per day up to 22.5kl per month</u>
<u>10 or more persons</u>	<u>200l per day up to 6kl per month</u>	<u>400l per day up to 12kl per month</u>	<u>1000l per day up to 30kl per month</u>

2.2.3 Rental Services:

Actions against defaulters are regulated to a degree by the contracts involved.

All contracts must at minimum and where appropriate, include the following criteria/requirements:

- (i) Due date for payments.
- (ii) Applicable procedures upon the defaulting of payments.
- (iii) Handover procedures.
- (iv) Eviction or right sizing actions.

3. ARRANGEMENTS

Should owners/debtors/consumers wish to make arrangements to pay off accounts in arrears, the following guidelines shall apply:

- (a) The main aim of arrangements should be to ensure that current accounts (which may include penalties/interest and/or any admin fees) are at least paid in full, before entering into acceptable arrangements to pay off arrears.
- (b) The Municipality may enter into an arrangement with a tenant or occupier of a property which is linked to an account in arrears, on proviso that:
 - (i) a written affidavit is received which certifies that the registered owner of said property, at which such tenant or occupier resides; is:
 - untraceable;
 - not contactable;
 - of unknown whereabouts; or
 - not co-operating with said tenant or occupier.
 - (ii) such tenant or occupier has substantiated the ability to pay and the right to occupation stating the rental due and the time period of such occupation and providing the last known address of the registered owner;
 - (iii) such tenant or occupier undertakes to advise the registered owner, at the first reasonable opportunity, of the current situation and further agrees to obtain the consent of the registered owner to condone the process as described in this paragraph 3 (b); and
 - (iv) where applicable, such tenant or occupier provides comprehensive details of the non-co-operation of the registered owner.
- (c) Care must be taken to ensure that all reasonable financial and social assistance, as provided for in various Municipality's Policies, is rendered to assist owners/debtors/consumers before drastic action is taken to recover debt e.g. subsidies for Free Basic Services and relief measures on property rates.
- (d) All arrangements must be concluded in writing and the debtor must be provided with a copy thereof. Arrangements will be invalid unless signed by the debtor and one or more delegated representative(s) of the municipality.
- (e) Arrangements must be entered into that are both affordable to the consumer and protect the Municipality's interest by ensuring the most cost-effective debt recovery.

- (f) Arrangements must be final, and debtors will not be allowed to re-arrange debt repayments. The Municipality may for a meritorious case, upon presentation of proof of current difficulties, consider delaying the receipt of the arranged instalment. This delay may not exceed 3 months.
- (g) It is of vital importance to ensure that the settlement of current accounts (which may include penalties/interest and/or any admin fees), together with the debt repayment instalment, is seen as the minimum requirement for any agreement.
- (h) Arrangements must be compiled in a format that facilitates legal action, upon breach of contract. Written arrangements must as far as possible be in the form of agreements in terms of Section 57 of the Magistrate's Courts Act, 1944 (Act 32 of 1944) and as amended by the Jurisdiction of Regional Courts Amendment Act, 2008 (Act 32 of 2008) (hereinafter referred to the Section 57 Agreements).

All debt repayment arrangements will be logged on the financial system to ensure maximum accessibility and to enable the effective administration of such repayments.

- (i) Arrears of Councillors and other Municipal Officials must be settled in full or arrangements to pay off such amounts, by means of salary deductions, may be entered into. This includes the seizure of ~~bonuses~~bonuses, or any other additional allowances (this paragraph (i) must be read in conjunction with the relevant sections of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000)).

The Stellenbosch Municipality is entitled to recover all arrears more than ninety days by means of salary deductions and proportionally from increases and/or the official's bonus/performance bonus. In this regard, all temporary contract workers are also regarded as municipal officials.

- (j) No interest will be levied on outstanding amounts for which arranged agreements have been entered into.
- (k) It is a preferable that a water demand management device, pre-payment water meter and/or a prepaid electricity meter be installed when any arrangement is entered into.
- (l) Arrangements may only be concluded upon submission of the following documentation:
 - (i) Proof of identification;
 - (ii) Proof of Income;
 - (iii) Supporting documentation relating to expenses;

- (iv) Three-month bank statements and/or payslips; and/or
- (v) Any other relevant documentation as may be requested by the Credit Control Section.

4. ADJUSTMENT OF DEPOSITS/BANK GUARANTEES

Deposits/Bank guarantees may be increased to cover the additional risk as regulated in terms of the Municipality's By-Laws.

Increases in deposits/bank guarantees shall be utilised to cover the additional risk resulting from default payments. Deposits/Bank guarantees may be increased by an amount up to three times or more of a monthly average consumption as determined by the Municipality.

The necessity for any deviation of said payment will be directed by the sole discretion and due consideration/approval by an accountant or more senior official in the Municipality's Revenue Department.

The latter deposits will be utilised only after closing of account by debtor or transfer of property. Should the account remain unpaid, such deposit will be utilised for the unpaid portion. Any credits will be refunded to the consumer.

The Stellenbosch Municipality will not pay any interest on any deposits.

5. FURTHER ACTIONS

- (a) Should arrangements not be concluded or adhered to, services will be discontinued or restricted. The Municipality must ensure that a fair and equitable procedure, including reasonable notice of the intention to discontinue or limit has been followed.

Where legislation does not allow for the complete termination of services, the Credit Control Section will determine the applicable minimum level of service provision, where after, all amounts owing become due and must be paid in full before services are restored to full capacity.

- (b) Should amounts owed not be settled by the final date, i.e. after the date for payment set out in a final demand, such accounts and the relevant Agreements, where applicable, will be handed over to the Municipality's Collection Attorneys for recovery and/or to consider instituting further legal action.
- (c) The Municipality shall at its own discretion in compliance to the measures provided for in the Municipality's By-Laws, be entitled to withhold or limit the

supply of services until the total costs, penalties, other fees, services, and rates due to the Municipality have been paid in full.

This may include the restriction of supply of water or electricity to a debtor who is found guilty by the Municipality or any Court of Law:

- (i) of fraud or theft of water ~~and~~and/or electricity,
 - (ii) any another criminal activity relating to the supply or unauthorised consumption of water ~~and~~and/or electricity, or
 - (iii) if it is evident that fraud, theft or any other criminal activity has occurred relating to such supply or consumption.
- (d) Stellenbosch Municipality may consider an auxiliary levy of up to 50% on the purchase of pre-paid electricity/water to recover arrear debt.
 - (e) Stellenbosch Municipality may consider black-listing consumers in cases where the consumer was handed over to institute legal proceedings.
 - (f) The Municipality may attach the rental income in whole or in part from a tenant or occupier of a property which is left unpaid by the owner thereof, provided that Section 115 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) is adhered to.
 - (g) Once the Municipality has exhausted all reasonable and practicable debt recovery measures, in an effort to recover outstanding debt, the Municipal Manager will have sole discretion to approve the litigation process for the disposal of the movable and/or immovable assets of defaulting owners/debtors/consumers by means of a Sale in Execution order.

6. NEW APPLICATIONS FOR SERVICES

- 6.1 No transfer of services from an owner to a tenant (Organ of State property excluded) will be allowed. The status quo of contracts signed before 01 July 2011 will be maintained, provided that the tenant does not default on payments.
- 6.2 The owner or his/her proxy applying for a service to be rendered must be positively identified by means of a generally acceptable means of identification as used by financial institutions. A copy of the identification details (such as a copy of the person's ID and proof of residence (for business users)) must be kept for reference purposes.
- 6.3 The amount of a service deposit/bank guarantee will be based on tariffs as determined by the Council.
- 6.4 Adjustments to deposits/bank guarantees will be determined by the debtor's payment record of municipal accounts and consumption levels.

- 6.5 The provision of all services will be subject to the signing and acceptance of the conditions of supply contained in a service contract.
- 6.6 Where the consumer is not the owner of a property, the owner must on his/her request, regularly be served with a copy of a statement of the amount due.
- 6.7 The Municipality may utilize any services in order to enhance the effectiveness of credit checks.

7. THE RENDERING OF ACCOUNTS

- 7.1 Accounts must be rendered regularly and timeously to all property owners and consumers utilising municipal services.
- 7.2 Accounts must be consumer friendly and must clearly reflect the following minimum information:
 - (a) the name, address and contact numbers of Stellenbosch Municipality;
 - (b) the name and postal address of the account holder;
 - (c) details of the property in respect of which the account is issued;
 - (d) the contents of the account will be reflected in at least one of the three official languages of the Western Cape ~~province~~Province;
 - (e) the balance brought forward from the previous account, as well as a summary of transactions for the present period;
 - (f) all services for which the account is rendered, as well as amounts billed for such services;
 - (g) the final amount payable;
 - (h) the final date for payment;
 - (i) soft reminders in respect of interest levies and discontinuation of services; and
 - (j) the situation of payment facilities, and modes of payment accepted and office hours for payment.

8. ACCOUNT QUERIES

- 8.1 Consumers have the right to query accounts. In order to ensure the correctness of accounts and the satisfaction of consumers, all queries must be attended to swiftly and effectively.
- 8.2 Claims of not having received an account do not constitute a valid reason for non-payment of accounts.

Queries regarding such non-receipt must be followed up with the Revenue Section in order for same to be addressed.

A consumer liable for any services rendered by, or rates due to the Municipality must furnish the Municipality with an address where correspondence can be directed to.

Consumers should be encouraged to provide the Municipality with e-mail addresses where accounts could be sent to, rather than traditional postal addresses.

8.3 Duplicate accounts shall be available upon request at a prescribed fee.

8.4 Accounts in Dispute

8.4.1 Should an account in respect of water or electricity consumption be disputed, the concerned consumer must at minimum pay the average amount of the previous 12 (twelve) month's accounts. This shall be applicable only for the month in which the dispute was raised. Subsequent accounts issued in months thereafter (barring any new dispute raised) shall be considered unrelated to the dispute in question.

All other Municipal services or rates disputed will be dealt with at the discretion of the Municipality.

8.4.2 The dispute in question shall be considered to be resolved after all actions have been taken by the Municipality; including but not limited to the following:

- (i) determining the correctness of the account;
- (ii) relevant procedures were taken to adjust the account accordingly; and
- (iii) a written notice or a telephonic confirmation to such effect has been given to the concerned consumer.

8.4.3 In the event that a consumer declaring a dispute, does not adhere to paragraph 8.4.1 above, the disputed account will be subject to the normal Credit Control and Debt ~~collection~~-Collection procedures.

8.5 Errors or Omissions

8.5.1 The Municipality strives to ensure the accuracy of consumer accounts. The onus of the consumer is however to verify that the services as stipulated on the account statement has been delivered and is correct. Upon detection of any errors or omissions the consumer should raise the dispute and notify the Municipality soonest and preferably in writing.

8.5.2 Accounts will only be rectified at the sole discretion of the Municipality after considering and verifying all aspects and conditions affecting the amount due and deemed to be in error. The adjustment (if applicable) to the account will be

processed as per paragraph 8.4 above and applied after the date of inspection or confirmation by the specific Services Department.

- 8.5.3 Upon the sole discretion of the Municipality serious nonconformities or discrepancies of an account may be adjusted based upon the actual tariffs and legislation applicable.

9. DUE DATES OF ACCOUNTS

Accounts are payable by the 7th (seventh) day of each month or the first working day thereafter, should the 7th (seventh) day fall on a weekend or public holiday.

Upon extraordinary circumstances the date above may be temporary amended by the Municipal Manager to a reasonable date.

10. ALLOW SUFFICIENT TIME TO SETTLE ACCOUNTS

In order to allow sufficient time to settle accounts, the account should, where possible, be ready for delivery at least two weeks before the due date.

This necessitates proper scheduling of all processes leading to the issuing of accounts to meet the Municipality's commitment to its consumers.

11. CONSOLIDATION OF ACCOUNTS

In order to reduce cost and to enhance credit control and debt collection measures, separate accounts for services rendered in respect of a property or separate accounts of a debtor will be consolidated as far as possible. This will not be limited to consumer accounts only but may be extended to any other amount payable arising from any liability or obligation due to the Municipality.

12. PAYMENT OF ACCOUNTS – GENERAL

- 12.1 In order to promote the payment of accounts, payment facilities and hours for payment must be convenient to consumers, but the establishment of such facilities should still be subject to normal business principles and the economy of the provision of such services.

- 12.2 The following facilities are presently available – with the office hours (usually between 08h00 - 13h00 and 13h30 - 15h30) and modes of payment indicated. Facilities are extended on an on-going basis.

<i>Facility</i>	<i>Hours</i>	<i>Payment methods accepted</i>
-----------------	--------------	---------------------------------

Cash offices at Stellenbosch, Kayamandi, Franschhoek, <u>Klapmuts</u> and Pniel	Office hours: Monday to Friday	Cash, debit cards
Cash offices at Klapmuts	Office hours (to be announced)	Cash, debit cards
Debit orders	Application during office hours	Bank transfers
Third Party Service Providers: Countrywide outlets of Pick 'n Pay, Shoprite/Checkers, Pep Stores, Ackermans and other stores	Trading hours <u>as per Service Provider</u> : 7 days per week	Cash, credit cards, debit cards
Internet payments	All hours	Bank transfers
Direct bank deposits	Banking hours	Bank transfers
Personnel deductions	Office hours	Direct deductions from earnings
24-hour Utility shops at petrol stations	All hours	Cash, credit cards, debit cards
Approved Pre-Paid Vending Agents	Trading hours <u>as per Vending Agent</u>	Cash

- 12.3 The use of correct account references for electronic payments and/or direct deposits is a requirement to ensure correct allocation of payment and to avoid any penalties and administration costs. It is the responsibility of the consumer making the payment to ensure that the correct reference number is made known to the Municipality.
- 12.4 All payments by means of Electronic Funds Transfer (EFT) or payments via the facilities as approved must be made in time so as to reflect in the Municipality's bank account before close of business on the due date.
- 12.5 Payment prioritisation of payments received will be allocated in the following order:
- (i) Penalties.
 - (ii) Municipal Rates.
 - (iii) Special Rating Area Levies.
 - (iv) Sewerage.
 - (v) Refuse.
 - (vi) Rentals.
 - (vii) Sundries.
 - (viii) Water.
 - (ix) Electricity.

13. DISHONoured PAYMENTS

- 13.1 Receipts issued in respect of dishonoured payments must be written back upon receipt of such notices. Interest on arrears must be raised where applicable and administration costs be debited to debtors account. Debtors must be ~~notified~~notified, and debt recovery actions be instituted where necessary.
- 13.2 Should payments be dishonoured ~~twice~~twice, the financial system must be encoded not to accept debit order transactions of such a debtor and he/she must be informed thereof in writing.
- 13.3 If payments are dishonoured twice in a financial year, consumer deposits/bank guarantees may be adjusted to mitigate increased financial risk.

14. PENDING LEGAL ACTIONS AGAINST CONSUMERS

Legal actions, such as notices of intended sales in execution, press releases regarding pending insolvency's, etc. may be followed up to evaluate the credit rating of such debtors in order to take steps to minimize the risk of financial loss for the Municipality.

15. INTEREST

- 15.1 Interest will be raised monthly, on a reasonable time after due date, to allow finalization of EFT payments, journal processing, system updates, etc. The latter interest raising will be on all arrear balances of all services (excluding housing services), property rates or arrangements as per paragraph 3 of this Policy, remaining unpaid.
- 15.2 A portion of a month is deemed to be a full month for the purposes of calculation of interest payable.
- 15.3 Interest on outstanding arrear accounts will be calculated and charged at the South African Reserve Bank's prime interest rate plus one percent.

16. GENERAL AND OTHER SERVICES

16.1 Monthly Consumer accounts:

- 16.1.1 Debtor's records must be coded correctly and timeously to ensure the rendering of accurate accounts to consumers.
- 16.1.2 The supply of water and electricity must conform to the conditions of supply set out in the By-Laws for Stellenbosch Municipality, as promulgated in the *Provincial Gazette*.

- 16.1.3 Due to the inclined block tariffs employed for these services, care must be taken to ensure meter readings are taken accurately and at intervals as close as possible to 30 days. Should this not be possible, consumption may be estimated as set out in the Municipality's By-Laws. As a general rule it is accepted that deviations in consumption periods exceeding 10% should be guarded against.

16.2 Sundry Services:

- 16.2.1 Accounts for recovery of cost encountered by the Municipality in respect of sundry services rendered are issued if and when such services are rendered to consumers.
- 16.2.2 As these services are usually not based on formal service contracts, it is essential that it be billed as soon as possible, and the recovery of such debt must receive priority, as the risk of loss to the Municipality is more eminent than in the case of other services.
- 16.2.3 Care should be taken to obtain full and accurate information of such debtors and to obtain prepayment for such services where possible.
- 16.2.4 Actions applied to follow up unpaid accounts will be determined by the nature and extent of the debt and the cost effectiveness of such actions.

17. CONDITIONS RELATING TO RENTAL AND PURCHASING OF MUNICIPAL PROPERTY

- 17.1 Municipal property may only be leased or sold after approval of such transactions and the signing of a rental or purchase agreement. Such approvals may be by way of specific Council resolutions or in the form of delegations.
- 17.2 The conditions for payment of instalments and deposits are regulated by the contents of the rental and purchase agreements and the Municipality explicitly reserves its rights to discontinue services for non-payment not only limited to the leased property but any other property of the lessee within the jurisdiction of Stellenbosch Municipality (WC024).
- 17.3 Other specific rental and purchase agreements are tailored to the specific nature and requirements of such transactions.
- 17.4 Full details of remedies for defaulting lessees and purchasers and procedures to address such defaults must be contained in the relevant ~~contracts, but~~ contracts but must not have the effect of limiting the Municipality in terms of this or any other Policy regulating arrears.
- 17.5 These remedies usually commence with written reminders, leading to the cancellation of the contracts and the institution of further legal action where necessary.

17.6 Rental and purchase agreements represent formalised individual contracts that form the basis of all actions by the parties involved. Both parties are bound to such conditions, failing which may lead to the cancellation of such contracts by the parties involved and claims for damages.

17.7 Lessees ~~whom~~who may qualify for rental subsidies must be referred to the housing office to apply for such subsidies in an effort to make rentals more affordable.

18. RENTALS IN RESPECT OF MUNICIPAL EMPLOYEES

Apart from the general conditions applicable to general rental the following conditions will also be applied:

- (a) Rent will be based on the principle of market related rentals as required by Municipal Supply Chain Management (SCM) Regulation 40.
- (b) Rent, and optionally rates and service charges, where applicable, may only be paid by means of salary deductions. A specific clause to this effect must form part of the contract.
- (c) The relevant Director, or his/her delegated official, must co-sign rental agreements of employees to ensure that financial conditions are met.

19. INDIGENT CONSUMERS

19.1 The Stellenbosch Municipality supports the principle of providing support to indigent consumers by way of providing Free Basic Services in accordance with the provisions of the Municipality's Indigent Policy. All effort must be made to limit the re-occurrence or accumulation of indigent debt of such consumers.

20 CONTACT OF RESPONSIBLE OFFICE

The contact details for Credit Control enquiries:

1. DEFINITIONS

In this policy, unless the context indicates otherwise -

- 1.1** **'Amendment Bill'** means the Fiscal Powers and Functions Amendment Bill, 2020;
- 1.2** **'applicant'** means a person or entity contemplated in section 45(1) of the SPLUMA who submits a land development application;
- 1.3** **'bulk service'** means the capital infrastructure assets associated with that portion of an external engineering service which is intended to ensure provision of municipal infrastructure services for the benefit of multiple users or the community as a whole, whether existing or to be provided as a result of a development in terms of the MSDF – the relevant Municipal Master Plan shall be used as a guide to identify such bulk services;
- 1.4** **'capacity'** means the extent of availability of a municipal infrastructure service, based on the capital infrastructure asset or combination of capital infrastructure assets installed for provision of such municipal infrastructure services;
- 1.5** **'capital infrastructure asset'** means land, property, building or any other immovable asset, including plant and equipment that accede thereto, which is required for provision of a municipal infrastructure service, limited to immovable;
- 1.6** **"community facilities"**, including play equipment, street furniture, crèches, clinics, sports fields, indoor sports facilities or community halls; conservation purposes, energy conservation, climate change; or engineering services.
- 1.7** **'developer'** means a person or entity intending to implement or implementing undertaking land development;
- 1.8** **'development charge (DC)'** means a charge levied by a Municipal Planning Tribunal in terms of section 40(7)(b) of, and contemplated in section 49 of, the SPLUMA, which must-
 - (a) contribute towards the cost of capital infrastructure assets required to meet increased demand for existing and planned external engineering services; or
 - (b) with the approval of the Minister, contribute towards capital infrastructure assets required to meet increased demand for other municipal engineering services not prescribed in terms of the SPLUMA;
- 1.9** **'Engineer'** means an engineer employed by the Municipality or any person appointed by the Municipality from time to time to perform the duties of the Engineer envisaged in terms of this Policy, including the Director: Infrastructure Services;
- 1.10** **'engineering services'** means a municipal engineering service as defined in section 1 of the SPLUMA;
- 1.11** **'engineering services agreement'** means a written agreement concluded between the Municipality and a developer, recording their detailed and specific respective rights and obligations regarding the provision and installation of the external engineering services required for an approved land development, and regarding the associated development charge;
- 1.12** **'external engineering service'** means an engineering service situated outside the boundaries of a land area and which is necessary to serve the use and development of the land area concerned; provided that in circumstances where the characteristics

of a specific area or the design of the relevant engineering service so requires, such services can be located within the boundaries of a land area;

- 1.13** **'impact zone'** means a geographical zone within which the capital infrastructure assets or system of capital infrastructure assets required to provide bulk services to an approved land development are located (the impact zones are Stellenbosch Town, Klappmuts, Dwars River, Franschhoek, Koelenhof, Polkadraai and Raithby);
- 1.14** **'internal engineering service'** means an engineering service within the boundaries of a land area which is necessary for the use and development of the land area concerned and which is to be owned and operated by the Municipality or service provider;
- 1.15** **'land development'** means the erection of buildings or structures on land, or the change of use of land, including township establishment (provision of engineering services infrastructure), the subdivision or consolidation of land or any deviation from the land use or uses permitted in terms of the Zoning Scheme;
- 1.16** **'land development application'** means an application for approval of land development as contemplated in section 41 of the SPLUMA;
- 1.17** **'land use'** means the purpose for which land is or may be used lawfully in terms of a the municipal land use scheme or of any other authorisation, permit or consent issued by a competent authority, and includes any conditions related to such land use purposes;
- 1.18** **'link engineering service'** means the capital infrastructure assets associated with that portion of an external engineering service which links an internal engineering service to the applicable bulk service, and which is not shared by multiple users or the community generally;
- 1.19** **'LUPA'** means the Western Cape Land Use Planning Act, 2014, Act. 3 of 2014 (PN 99/2014 of 7 April 2014);
- 1.20** **'MSDF'** means the current Stellenbosch Municipal Spatial Development Framework contained in the Municipality's approved Integrated Development Plan;
- 1.21** **'Municipality'** means (a) the Stellenbosch Municipality (WCO24) established in terms of Provincial Notice 489 of 22 September 2000 in terms of the Local Government: Municipal Structures Act, 117 of 1998, and (b) includes all political structures or office bearers, the Municipal Planning Tribunal and municipal staff members to whom authority has been delegated to take decisions in terms of the Municipality's delegation system;
- 1.22** **'municipal infrastructure service'** means any of the following municipal services, namely potable water, sewerage and wastewater treatment, electricity distribution, municipal roads, street lighting, storm water management, solid waste disposal and public transport, including non-motorised transport. Community facilities, including play equipment, street furniture, crèches, clinics, sports fields, indoor sports facilities or community halls. Conservation purposes, energy conservation, climate change; or engineering services.
- 1.23** **'Municipal Planning Tribunal'** means a Municipal Planning Tribunal as defined in the SPUMA, and includes a municipal official authorised to determine land use and land development applications, in terms of section 35 of the SPLUMA;
- 1.24** **'Planning By-Law'** means the Stellenbosch Municipality: Land Use Planning By-Law published in the Western Cape Provincial Gazette Extraordinary of 20 October 2015;

- 1.25 **'SPLUMA'** means the Spatial Planning and Land Use Planning Act, 16 of 2013;
- 1.26 **'Systems Act'** means the Local Government: Municipal Systems Act, 2000, Act 32 of 2000 ("MSA"); and
- 1.27 **'Zoning Scheme'** means the Stellenbosch Municipality: Zoning Scheme By-Law published in the Western Cape Provincial Gazette Extraordinary of 27 September 2019.

2. INTRODUCTION

- 2.1. The Constitution enjoins local government not just to seek to provide services to all its inhabitants, but to be fundamentally developmental in orientation and to play a key role in promoting justifiable social and economic development. To this end it *inter alia* has to perform regulatory functions in respect of land use planning and development and ensuring lawful, reasonable and fair administrative government practices.
- 2.2. Socio-economic development is generally regarded as the passport to reduced poverty, reduced inequality and improved social well-being. New economic development generally also has a positive impact on the municipality's finances. It increases revenue from property rates and service charges by expanding the base of ratepayers. But development associated with economic growth has an impact on the demand for essential engineering services, which are needed to support sustainable social and economic development. Without available infrastructure of adequate capacity, public and private sector investment in Stellenbosch will decline.
- 2.3. Stellenbosch is as an attractive destination for economic investment. Working towards the MDSF vision of Stellenbosch as the "Valley of Opportunity and Innovation", a number of principles are key, including that future opportunity be allowed to build on existing infrastructure investment. Engineering services infrastructure (water, sewerage, stormwater, roads, street lighting, solid waste and electricity) represents substantial assets for enabling individual and communal development opportunity of different kinds.
- 2.4. The creation and promotion of an enabling environment for business to grow and create jobs, is fundamental to a competitive and vibrant economy. The potential for large scale upliftment and development may be severely hampered by the lack of attention to necessary infrastructure. The Municipal Council aims to create an economically enabling environment in which investment can grow and jobs can be created while still being able to provide basic services to all its citizens. The equitable and efficient financing of the cost of infrastructure to accommodate new developments is key in this regard.
- 2.5. Additional engineering services infrastructure must be provided to create additional services capacity to cater for growing needs, and it comes at a high cost. The rationale for DCs needs to be understood in relation to how this particular funding mechanism fits within the municipal fiscal framework. Municipal service delivery is generally financed through a fiscal framework that is based on a clear assignment of fiscal powers and functions that empower municipalities to raise property rates and used charges on electricity distribution, water and sanitation services and solid waste collection.
 - 2.5.1. These primary sources of revenue are supplemented by intergovernmental transfers that support the operating costs of basic service delivery to poor households, as well as related national development priorities. Municipalities may use any operational surpluses generated from this revenue to finance

capital investment programmes, again supplemented by intergovernmental transfers, as well as funds that have been borrowed to finance infrastructure investment programmes.

2.5.2. Municipal development charges complement these sources of capital finance, by providing a direct charge to beneficiaries of existing and planned infrastructure installed to enable an intensification of land use. Development charges are thus an additional source of capital finance, which enhance the efficiency and volume of municipal capital financing through -

- o ensuring that the beneficiaries of infrastructure pay a fair share of the costs of installing it, relative to other residents;
- o releasing resources that a municipality would otherwise have dedicated to meeting these needs to be spent on other development priorities; and
- o providing an additional revenue stream to support municipal borrowing programmes, where applicable.

2.6 For both municipalities and developers to budget and plan efficiently, requires a robust legal basis on which development charges are levied, linked to long term spatial and infrastructure planning systems. Local government may only act within the powers lawfully conferred upon it.

2.7 After the country's first democratic elections, the Legislator was tasked to translate the electoral dream of a "Better Life For All" into legislation. It put the public sector at the heart of the challenge to reduce poverty. Legislation such as the SPLUMA and LUPA followed, both which empowers, qualifies and constrains municipal powers to levy development charges.

2.8 The Municipal Fiscal Powers and Functions Amendment Bill 2020, published for public comment during 2020, provides for a uniform, consistent, transparent and equitable basis on which municipalities can calculate and levy development charges on developers. The Amendment Bill requires that development charges are paid by both the public and private sectors, in order to ensure that a substantial portion of municipal bulk infrastructure investment can be financed on a 'user pays' principle, with the needs of poor households directly and transparently supported through public subsidies, including intergovernmental transfers.

2.9 A Development Charge ('DC') is a once-off capital charge to recover the actual cost of external infrastructure required to accommodate the additional impact of a new development on engineering services. A DC calculation is triggered by a land use change/ development application that will, if approved, intensify the municipal infrastructure demand. The threshold is the level up to which a new land use is deemed to have the same infrastructure impact as the existing permissible use and is determined based on a technical assessment.

2.10 The DC policy is an important tool to provide economic infrastructure and to ensure sustainable infrastructure investment in all the required engineering services. It provides the key details of the Municipality's Development Charges for Engineering Services, covering water, roads, stormwater, sewerage, solid waste and electricity.

2.11 A motivation for DCs is that the incidence of the cost is more accurately and equitably assigned to those who directly benefit from the infrastructure, rather than being spread amongst all ratepayers. The key function of a system of DCs is to ensure that those who benefit from new infrastructure investment, or who cause

off-site impacts, pay their fair share of the associated costs. A primary role of a system of DCs is to ensure the timely, sustainable financing of required urban infrastructure.

3. LEGISLATIVE (REGULATORY) FRAMEWORK

3.1 Source of empowerment

A municipality derives its power to levy development charges from legislation, not from policy. Policy determinations cannot override, amend or be in conflict with laws (including subordinate legislation). ^[1]

In *Fedsure* the Constitutional Court said that '[i]t seems central to the conception of our constitutional order that the Legislature and Executive in every sphere are constrained by the principle that they may exercise no power and perform no function beyond that conferred upon them by law'. It is trite that "a local government may only act within the powers lawfully conferred upon it". ^[2]

"A municipality under the Constitution is not a mere creature of statute otherwise moribund save if imbued with power by provincial or national legislation. A municipality enjoys 'original' and constitutionally entrenched powers, functions, rights and duties that may be qualified or constrained by law and only to the extent the Constitution permits." ^[3]

It is also a well-established principle of South African law that powers given to a public body for one purpose cannot be used for ulterior purposes which are not contemplated at the time when the powers were confirmed. ^[4] Good intentions and public benefits are insufficient. As *Baxter* mentions: "It does not help that the improper purpose which the public authority sought to achieve was well intentioned, or even that it would benefit the public." ^[5]

The powers lawfully conferred upon the Municipality in relation to development charges have been qualified and constrained in terms of national, provincial as well as municipal legislation. A study into this rather dense legislative environment was undertaken to ensure that this policy document will be in line with the current and proposed empowering legislation.

3.2 Relevant legislation

Attention is invited to the provisions of the following legislation.

- The National Constitution.
- Local Government: Municipal Systems Act, 32 of 2000 – ('MSA').
- Stellenbosch Municipality: Zoning Scheme By-Law 2019 – ('Zoning Scheme').

¹ *Akani Garden Route (Pty) Ltd v Pinnacle Point Casino (Pty) Ltd* 2001 (4) SA 501 (SCA) at par [6] and [7].

² *Fedsure Life Assurance Ltd and Others v Greater Johannesburg Transitional Council and Others* 1999 (1) SA 374 (CC) par 56.

³ *City of Cape Town v Robertson* 2005 (2) SA 323 (CC) at par 60.

⁴ See *Baxter, Lawrence*. 1984. *Administrative Law*. Juta & Co, Ltd: Cape Town on p. 508 and 511.

⁵ See *Administrator, Cape v Associated Buildings Ltd* 1957 (2) SA 317 (A) at 329). Also see *South Peninsula Municipality and Another v Malherbe NO and Others* 1999 (2) SA 966 (C) at 981D.

- Municipal Fiscal Powers and Functions Act, 12 of 2007 – ('Fiscal Powers Act').
- The SPLUMA.
- The LUPA.

For ease of reference some of the relevant provisions therein contained, are quoted *verbatim* further below and in Appendix "A".

3.2.1 The National Constitution – ('Constitution')

The Constitution enjoins local government to seek to provide services to the citizens, to be fundamentally developmental in orientation, to *promote* justifiable social and economic development and, together with other organs of state, to contribute to the progressive realisation of the fundamental constitutional rights.

Municipalities derive their fiscal powers from section 229 of the National Constitution. Section 229(1)(a) empowers a municipality to impose rates on property and surcharges on fees for services provided by or on behalf of the Municipality.

It is necessary to distinguish between '*services charges*' and '*development charges*'.

- A service charge is ongoing contributions (usually levied monthly), required to recover the ongoing costs reasonably associated with rendering the service (e.g., refuse removal), including capital, operating, maintenance, administration and replacement costs, and interest charges.
- A Development Charge ('DC') is a once-off capital charge to recover the actual cost of external infrastructure required to accommodate the additional impact of a new development on engineering services. Development charges fall in the section 229(b) category and is not a service fee.

3.2.2 Local Government: Municipal Systems Act, 32 of 2000 – ('MSA')

See Appendix "A" for relevant sections of the MSA. Essentially it deals with the empowerment of local authorities to provide municipal services for the benefit of the local community and the funding thereof by charging service charges or fees for covering the costs thereof. This is achieved by applying tariffs that must reflect the costs reasonably associated with rendering the service, including capital, operating, maintenance, administration and replacement costs, and interest charges. DCs are not intended to fund municipal services being rendered.

3.2.3 Spatial Planning and Land Use Management Act, 16 of 2013 – ('SPLUMA')

- Section 40(7)(b) empowers a municipal Planning Tribunal, in the approval of any land development application, to impose any reasonable conditions, including conditions related to the provision of engineering services and the payment of any development charges.

- Section 49(4) provides that an applicant may, in agreement with the Municipality or service provider, install any external engineering service instead of payment of the applicable development charges, and the fair and reasonable cost of such external services may be set off against development charges payable.
- According to section 49(5), if external engineering services are installed by an applicant instead of payment of development charges, the provision of the Local Government: Municipal Finance Management Act, 56 of 2003 pertaining to procurement and the appointment of contractors on behalf of the Municipality, does not apply.

[NOTE: 'Applicant' to be read as a 'developer' as defined.]

3.2.4 Western Cape: Land Use Planning Act, 3 of 2014 – ('LUPA')

- Section 40(1) of LUPA empowers a municipality, when approving a land use application, to do so subject to conditions, which conditions the must be reasonable conditions and must arise from the approval of the proposed utilisation of land.
- In terms of section 40(2) such conditions may include, but are not limited to, conditions relating *inter alia* to the provision of engineering services and infrastructure; and the cession of land or the payment of money.
- Section 40(3) empowers a municipality to require in a condition relating to the provision of engineering services and infrastructure that a proportional contribution to municipal public expenditure be made according to the *normal need* therefor arising from the approval, as determined by the Municipality in accordance with norms and standards as may be prescribed. Section 40(12) provides that a municipality may, if appropriate, depart from contributions so determined.
- Section 40(4) provides that such municipal public expenditure includes, but is not limited to, municipal public expenditure for municipal service infrastructure and amenities relating to—
 - o community facilities, including play equipment, street furniture, crèches, clinics, sports fields, indoor sports facilities or community halls;
 - o conservation purposes, energy conservation, climate change; or engineering services.
- Section 40(5) requires that, when determining the contribution contemplated in subsections (3) and (4), a municipality must have regard to at least—
 - o the municipal service infrastructure and amenities for the land concerned that are needed for the approved land use;
 - o the public expenditure on that infrastructure and those amenities incurred in the past and that facilitates the approved land use;

- o the public expenditure on that infrastructure and those amenities that may arise from the approved land use;
 - o money in respect of contributions contemplated in subsection (3) paid in the past by the owner of the land concerned; and
 - o money in respect of contributions contemplated in subsection (3) to be paid in the future by the developer of the land concerned.
- Section 40(6) requires that, except for land needed for public places or internal engineering services, any additional land required by the Municipality arising from an approved subdivision must be acquired subject to applicable laws that provide for the acquisition or expropriation of land.

3.2.5 Stellenbosch Municipality: Zoning Scheme By-Law 2019 – ('Zoning Scheme')

20. *Development charges in terms of this Scheme*

- (1) *The calculation of development charges and whether a development charge is payable, shall be subject to the Municipality's adopted policy.*
- (2) *Where the provision in a particular zone identifies that a development charge is payable for **intensified** primary development **rights which came into operation as a result** of this Scheme, and where the owner intends to develop according to such intensified rights, such development charge shall be calculated when the building plan is submitted and shall be paid prior to the approval of said building plan.*
- (3) *Where an application is made in terms of Planning Law, or where application is made for technical approval in terms of this Scheme, the Municipality may impose a condition related to development charges payable where said approval leads to the intensification of land use beyond the primary rights which has been originally approved on the land unit.*
- (4) *Unless an alternative agreement is reached in writing between the owner and the Municipality, no building plan shall be approved on any land unit where an outstanding development charge is payable.*
- (5) *If the Municipality fails to calculate a development charge at the appropriate approval stages as set out in this section, it is deemed that there are no charges related to that development.*

[NOTE: 'Owner' to be read as a 'developer' as defined.]

NOTES:

1. 'Landowner' to be read as a 'developer', as defined.
2. Other relevant sections of the Zoning Scheme are quoted *verbatim* in Appendix "A" for ease of reference (i.e. 89, 102, 115, 128, 140, 151 162, 172 and 219 – development charges in the Multi-Unit Residential zone, Mixed-Use zone, Industrial zone, Education zone, Community zone Utility Service zone, Transport-facilities zone, and Agricultural and Rural zone)

3.2.6 (a) Municipal Fiscal Powers and Functions Act, 12 of 2007 – ('Fiscal Powers Act')

This Act was adopted to regulate the exercise by municipalities of their power to impose surcharges on fees for services provided under section 229 (1) (a) of the Constitution; to provide for the authorisation of taxes, levies and duties that municipalities may impose under section 229 (1) (b) of the Constitution; and to provide for matters connected therewith. The date of its commencement is 7 September 2007.

This Act applies to municipal surcharges and municipal taxes referred to in section 229 of the Constitution, *other than rates on property* regulated in terms of the Local Government: Municipal Property Rates Act, 2004, and municipal base tariffs regulated under the Municipal Finance Management Act, 2003, the Municipal Systems Act, 2000, or sector legislation.

(b) Municipal Fiscal Powers and Functions Amendment Bill

During 2020 National Treasury published the Amendment Bill for public comments (Government Gazette Notice No. 3 of 2020) and awaited comments until the 31st March 2020. Since then, it refined the Amendment Bill in line with the public comments received.

As part of the Cabinet protocols, the Amendment Bill had to be presented to the Directors-General Clusters and Cabinet Committees for their inputs and recommendations before submitting it to Cabinet for approval to table in Parliament for scrutiny. According to National Treasury as of November 2021 these processes were far advanced, and the Amendment Bill is likely to be submitted to Parliament during the first quarter of 2022.

National Treasury previously published various draft *Policy Frameworks* for Municipal Development Charges since the commencement of the 2007 Act. According to those frameworks the guiding principles in relation to development charges were equity and fairness, predictability, spatial and economic neutrality and administrative ease and uniformity. 'Fairness' to ensure that developers pay only for the infrastructure investments which they benefit from. 'Predictability' to enable developers to accurately estimate their liability and hold municipalities to account for the timely delivery of required infrastructure.

Those Policy Frameworks have since been converted into a memorandum of objects to the Amendment Bill. It was part of the document that was published for public comments in the 2020 Government Gazette. Therefore, in the formulation of this policy

document, the focus has been to bring it in line with the underlying thinking encountered in the Amendment Bill and in the 'Memorandum of Objects' concerned.

The purposes of the Amendment Bill *inter alia* include to amend the 2007 Act, so as to regulate the power of municipalities to levy development charges; to set out the permissible uses of income from development charges; to provide for the basis of calculation of development charges; to provide for municipal development charges policies, community participation and by-laws; to provide for the installation of external engineering services by developers instead of payment of development charges; to provide for the consequences of non-provision of infrastructure by a municipality; to regulate reductions to the obligation to pay development charges through subsidies; to provide for matters relating to the budgeting of and accounting for development charges; to establish an entitlement on the part of municipalities to withhold other approvals or clearances due to non-payment of development charges; and to amend the SPLUMA.

Essentially the Amendment Bill seeks to regulate the power of municipalities to levy development charges in respect of a land development application submitted to the Municipality in terms of section 33(1) of SPLUMA or a municipal planning by-law. Clause 4 of the Amendment Bill proposes the insertion of **Chapter 3A**, which deals with development charges and *inter alia*:

- provides for a power for municipalities to levy development charges and establishes the basis on which they are calculated (Clause 9A);
- allows a municipality which decides to levy development charges to subsidise a land development or category of land developments through reducing the development charges payable where it has set out a criteria for such subsidy in its policy on development charges (Clause 9E);
- permits a municipality to set off the cost of infrastructure installed by the developer against a development charge (Clause 9G);
- deals with the consequences of a municipality not providing infrastructure for which a developer has paid a development charge (Clause 9H)
- provides for mechanism to resolve dispute for a person whose rights are affected by a decision regarding development charges (Clause 9K).

The Amendment Bill proposes amendments to SPLUMA, including *inter alia* the deletion of the definition of "engineering service" and inserting the following definitions:

- '*bulk engineering services*' means capital infrastructure assets associated with that portion of an external engineering service which is intended to ensure delivery of municipal engineering services for the benefit of multiple users or the community as a whole, whether existing or to be provided as a result of development in terms of a municipal spatial development framework.

- *'link engineering services' means the capital infrastructure assets associated with that portion of an external engineering service, which links an internal engineering service to the applicable bulk engineering services.*
- *'municipal engineering service' means a system for the provision of water, sewerage, electricity, municipal roads, stormwater drainage, gas and solid waste collection and removal required for the purpose of land development management, referred to in Chapter 6.*

The Amendment Bill restricts the scope of engineering services to those already covered in the current definition of engineering services provided in the SPLUMA. These are the provision of water, sewerage, electricity, municipal roads, storm water drainage, gas and solid waste collection and removal required for the purpose of land development. However, some level of flexibility has been provided for municipalities to levy development charges on other engineering services not specified in the SPLUMA, by providing for a municipality to apply to the Minister of Finance for an extension of services to be included in the calculation of development charges.

The Amendment Bill also proposes the following amendments to the SPLUMA.

- The amendment of the empowering provision (section 40(7) of the SPLUMA), by the substitution for paragraph (b) of the following paragraph:

(A Municipal Planning Tribunal may ...)

in the approval of any application, impose any reasonable conditions, including conditions related to the provision of engineering services and the payment of any development charges: Provided that the Municipal Planning Tribunal endorses the Municipality's calculation of development charges and, where applicable, the timing for payment thereof as a condition or conditions of approval.

- The amendment of section 49 by the substitution for subsection (2) of the following subsection:

A municipality is responsible for the provision of external engineering services: Provided that link engineering services are installed by an applicant and that the municipality may require that such services are installed to provide a greater capacity than the land development itself needs, subject to the municipality reimbursing the applicant accordingly, unless the applicant waives his or her claim to reimbursement or the value of installing the additional capacity is set off against the applicable development charges liability.

- The amendment of section 49 by the addition of the following subsection:

A municipality may agree to contribute towards the cost of link engineering services, where the applicant's provision of link engineering service that meet the minimum standards of the municipality shall result in capacity that exceeds the requirements of the land development itself: Provided that the maximum contribution of the municipality does not exceed the amount which represents the difference between the cost associated with meeting the minimum standard and the cost of the actual requirements of the land development in question. (Emphasis added).

[NOTE: 'Applicant' refers to a 'developer' as defined.]

If the amendments to SPLUMA (as proposed in the Amendment Bill) go through unamended and the Amendment Bill (unamended) becomes law, the following is noteworthy.

- A **development charge** will mean a charge levied by a Municipal Planning Tribunal in terms of section 40(7)(b) of, and contemplated in section 49 of, SPLUMA, which must-
 - o contribute towards the cost of capital infrastructure assets required to meet increased demand for existing and planned **external engineering services**; or
 - o with the approval of the Minister, contribute towards capital infrastructure assets required to meet increased demand for other municipal engineering services not prescribed in terms of SPLUMA.
- Section 9A(1)(a) will empower a municipality to levy a development charge in respect of a **land development application** as contemplated in section 33(1) of SPLUMA or a municipal planning by-law.
- Section 9A(4) will require that the amount of a development charge must be-
 - o **proportional** to the extent of the demand that the land development is projected to create for **existing or planned bulk** engineering services; and
 - o calculated on the basis of a **reasonable assessment of the costs** of providing existing or planned **bulk** engineering services.
- According to the new SPLUMA definition, "**bulk engineering services**" will mean *capital infrastructure assets associated with that portion of an **external engineering service** which is intended to ensure delivery of municipal engineering services for the **benefit of multiple users** or the community as a whole, whether existing or to be provided as a result of development in terms of a municipal spatial development framework.*

- According to the SPLUMA “**external engineering service**” means an engineering service situated outside the boundaries of a land area and which is necessary to serve the use and development of the land area.

3.3 Interpretation

Our higher Courts in recent times have repeatedly stated that when it comes to the interpretation of statutes, the fundamental rule is that the words in a statute must be given their *ordinary grammatical meaning*, unless to do so would result in an absurdity.

There are *three interrelated riders*: the provisions should be interpreted purposively; the provision must be properly contextualised and statutes must be construed consistently with the Constitution so that where reasonably possible the provisions should be interpreted to preserve their constitutional validity. It is also well recognised that it is wrong to ignore the clear language of a statute under the guise of adopting a purposive interpretation, as doing so would be straying into the domain of the legislature.

When attributing meaning to the words used in legislation, regard must be had to the context provided by reading the particular provisions in the light of the Act or by-law as a whole and the circumstances attendant upon its coming into existence. The *‘inevitable point of departure is the language of the provision itself’*, read in context and having regard to the purpose of the provision and the background to it landing on the statute books. It is therefore useful, when looking at the question of the legal requirements to be satisfied when imposing development charges in the context of present-day legislation, to have a historical perspective.

It is therefore important to take cognisance of the Legislative Background provided in Appendix “A” for a proper understanding of the Legislature’s intention with DCs’.

4. OBJECTIVES

- 4.1. The objectives of this policy are to provide a sustainable and equitable framework for the financing of capital infrastructure assets and to ensure that:
 - 4.1.1. The Municipality is able to provide capital infrastructure assets in a timely and sufficient manner to support land development;
 - 4.1.2. Development charges complement other sources of capital finance available to the Municipality and are not utilised as a general revenue source;
 - 4.1.3. Development charges are managed in a predictable, fair and transparent manner; and
 - 4.1.4. Unnecessary litigation in the administration of development charges is minimised.

5. KEY PRINCIPLES OF THE POLICY

- 5.1. Principles to be applied must be in accordance with the current legislation, as well as Chapter 3A of the Amendment Bill, and further expounded in this policy.

5.2. Development Charges will be levied based on the increased demand that utilisation of intensified land use rights, which came into operation as a result of the Zoning Scheme or approval of new land development applications, are reasonably expected to have on existing and planned external engineering services capacity, irrespective of the geographical location of the development. For example, the traffic generated by a development located along a provincial road, will ultimately end up on the municipal road network that link to the provincial roads. The same applies to the additional stormwater run-off that ends up in downstream municipal networks and river courses, increase in demand and the bulk supply of water, and sewer and solid waste disposal. Factors are allowed in the calculations to reflect actual usage of infrastructure for these cases.

5.3. Four key principles underlie the system of development charges. These are:

5.3.1. **Equity and Fairness:** Development charges should be reasonable, balanced and practical so as to be equitable to all stakeholders. The key function of a system of development charges is to ensure that those who benefit from new infrastructure investment, or who cause off-site impacts, pay their fair share of the associated costs.

This implies that:

5.3.1.1. The Municipality should recover from developers a contribution that is as close as possible to be full and actual costs of the capital infrastructure assets that are needed to mitigate the impacts of their land developments and to provide external engineering services to their developments;

5.3.1.2. Development charges are levied to recover the infrastructure costs incurred or to be incurred due to land development, and are thus not a form of taxation;

5.3.1.3. Costs which should be covered by development charges can be determined both in relation to the value of pre-installed capital infrastructure assets resulting from historical investments, and the provision of new capital infrastructure assets to meet new capacity requirements; and

5.3.1.4. Development charges are not an additional revenue source to be used to deal with historical backlogs in provision of services, such as backlogs that exist in some historically disadvantaged areas.

5.3.2. **Predictability:** Development charges should be a predictable, legally certain, and reliable source of revenue to the Municipality for providing external engineering services and should be clearly and transparently accounted for. In order to promote predictability in municipal finance systems the costs associated with municipal capital infrastructure assets provided expressly to benefit poor households should be established before subsidies are applied in a transparent manner to fund the liability.

5.3.3. **Spatial and Economic Neutrality:** The primary role of a system of development charges is to ensure the timely, sustainable financing of required capital infrastructure assets.

This implies that:

5.3.3.1. Development charges should be determined based on identifiable and measurable costs so as to avoid distortions in the economy and in patterns of spatial development;

5.3.3.2. Development charges should not be used as a spatial planning policy instrument;

5.3.3.3. Costs recovered should be dedicated only to the purpose for which they were raised; and

5.3.3.4. Development charges should be calculated where possible on a sectoral or geographic scale to more accurately approximate costs within a specific impact zone.

5.3.4. **Administrative ease and uniformity:** The determination, calculation and operation of development charges should be administratively simple and transparent.

6. OBLIGATION TO IMPOSE A DEVELOPMENT CHARGE

6.1. Development Charges Apply

When the Municipal Planning Tribunal or delegated authority approves approves a land development application which will or may result in intensified land use with an increased demand for external municipal engineering services infrastructure, it may, by imposing a condition of approval in terms of section 66 of the Planning By-Law, levy a development charge proportional to the calculated municipal public expenditure that has or may be incurred to satisfy the increased demand according to the normal need arising from such approval.

6.2. Development Charges do not apply

Development Charges do not apply to land development restricted to the exercise of current primary land use rights obtained or approved prior to the commencement of the Zoning Scheme, **unless 13.6 is applicable**.

It also does not apply to the following types of land use applications, as the impact of those land uses have an insignificant impact on engineering services infrastructure and those uses have a social and/or economic benefit to the Municipality and/or the community:

6.2.1. Home / non-commercial early childhood development centres that serve the surrounding community.

6.2.2. Community based churches and places of religious worship (it must be clear that such development will not lead to a significant additional service usage that will have an increased demand on municipal services)

6.2.3. House shops up to the lesser of 30% of the floor area of the buildings on the site or 50m² per erf.

6.2.4. Second dwellings – up to a total maximum of five bedrooms per erf will not trigger a Development Charges payment.

6.3. A development charge will be determined by the Municipality in terms of and on the basis of the applicable statutory provisions referred to in paragraph 3.2 above read with this policy.

6.4. A developer must pay to the Municipality the full amount of the applicable development charge due prior to the exercise of any rights to use, develop or improve the land arising from the approval of a land development application, unless in the case of a phased land development –

- 6.4.1. The Municipality authorises phased payments in the conditions of approval of land development applications, to take into account the timing of the proposed phases of the land development; and

~~6.4.2. The Municipality agrees that the developer must provide an acceptable written guarantee from a registered financial institution, in an amount due and subject to written terms and conditions imposed by the Municipality.~~

~~6.4.3.~~ 6.4.2. The Municipality may approve payment of the outstanding development charge into an attorney's trust account, in cases where this will enable the completion of infrastructure projects in lieu of Development Charges that are not yet completed at the time that clearance is sought and if such withholding of clearance is deemed to be unfair towards the developer. An example of this is where the Municipality has requested the upgrade or installation of a service in-lieu of Development Charges, of which the upgrade was not an original condition of approval, or which is not specifically triggered by the development, but of which the immediate upgrade will be of benefit to the Municipality and/or the greater public. The conditions for the utilisation of the funds in this trust account shall be stipulated in a letter of undertaking issued by the trust attorney and as agreed to in writing by the Municipality.

- 6.5. When approving a land development application, the Municipality must stipulate at least the following matters relating to the development charge –

- 6.5.1. The total amount of the development charge;
- 6.5.2. The dates/development milestones on which the payment or payments must be made and the amount of such payments;
- 6.5.3. Whether the Municipality and the developer have agreed that the developer will install any bulk services, as contemplated in paragraph 9; and
- 6.5.4. Where the developer is to install bulk services instead of the payment of some portion or all of a development charge –
- 6.5.4.1. The nature and extent of the bulk services to be installed by the developer;
- 6.5.4.2. The timing of commencement and completion of the bulk services to be installed by the developer;
- 6.5.4.3. The amount of the developer's fair and reasonable costs of installation, or the process for determining that amount, including the process, after installation, for making any adjustments to an amount specified as determined by the Municipality; and
- 6.5.4.4. The engineering and other standards to which the installed external engineering services must conform.

- 6.6. The Municipality and a developer may, and in the circumstances provided for in paragraph 9 must, conclude an engineering services agreement to give detailed effect on the arrangements contemplated in this paragraph 6, provided that an engineering services agreement may not permit any intensification of land use beyond that which was approved.

7. CALCULATION OF DEVELOPMENT CHARGES

- 7.1. Subject to the provisions of this policy, a development charge shall be calculated with reference to the estimated increased load placed on the external engineering

services networks that results from the development in a specific impact zone.

- 7.2. The capital cost of internal engineering services is for the account of the developer.
- 7.3. Subject to paragraph 6.3 above and for purposes of calculation of the bulk services component of a development charge, the Municipality must –
 - 7.3.1. Determine a unit cost for each municipal infrastructure service, which unit cost must include all land cost, professional fees, materials, labour and reasonable costs of construction, but must exclude the value of any debts incurred by the Municipality for purposes of funding existing capital infrastructure assets, to the extent that such debt has not been repaid by the Municipality;
 - 7.3.2. Apply a formula, which formula will –
 - 7.3.2.1. Be aimed at determining the impact of the proposed land use on municipal infrastructure services, taking into account current and planned capacity, relative to the impact of the land use occurring at the date of approval of the land development application; and
 - 7.3.2.2. Calculate the amount payable by multiplying the unit cost referred to in paragraph 7.3.2.1, by the estimated proportion of the municipal infrastructure services, including current and planned capacity, that will be utilised by the proposed land development.
- 7.4. The basis upon which development charges unit costs of the civil services and community services will be determined, as envisaged in paragraph 7.7, shall be consistent with Chapter 3A of the Amendment Bill.

The methodology for calculating unit costs can be summarised as follows, per service and for each impact zone thereof:

- Use an appropriate planning horizon in the future for that service (e.g. 20 years).
- Use town-planning scenarios and engineering master planning to determine what new services are required, such that at that point in the future, the joint capacity of existing and future services matches the number of consumption units that will be in place, being the existing amount plus the future development amount.
- Estimate the costs of the existing and future infrastructure, as though it was all being constructed at the present day, i.e. replacement cost for existing infrastructure or present-day cost for future infrastructure.
- Establish the number of consumption units that the total infrastructure will cater for i.e. existing consumption plus future consumption.
- From the above calculate the cost per unit consumption factor.
- The DC for the development in question is then calculated by multiplying the nett additional consumption needed for that development, by the cost per unit consumption factor.

In this manner the new development is paying its fair share of the infrastructure that it uses in that impact zone, and not financing an existing shortfall nor financing a surplus being created.

- 7.5. The basis upon which development charges will be determined i.t.o. electricity will be as per NRS 069: Code of practice for the recovery of capital costs for distribution network assets.
- 7.6. The Municipality must adjust the unit cost for each municipal infrastructure service on an annual basis during the budget preparation process referred to in Section 21 of the Local Government: Municipal Finance Management Act 56 of 2003, to take account of inflationary impacts and must publish the adjusted unit costs within two months of approving the municipal budget. The Municipality will use the Contract Price Adjustment Factor as prescribed in the SAICE General Conditions of Contract for Construction Works (as amended) to determine the annual effect of inflation.
- 7.7. Where possible, unit costs for each municipal infrastructure service should be re-calculated every five years to take into account the current and planned capacity for each municipal infrastructure service at the date of re-calculation, and any other relevant factors.
- 7.7.7.8. The unit costs were last recalculated for 2022/23. No adjustment factor between 2021/22 and 2022/23 was approved by Council as the new rates became effective immediately. As an escalation factor is still required in some instances, for instance to escalate the value of work done in lieu of DCs over multiple financial years, this increase is hereby confirmed as 14.7415%.
- 7.8.7.9. In the event of the Municipality discovering that a gross error has occurred in the determination of the development charges, or if there are justifiable reasons to review the charges, it may, by means of a council resolution, correct such error or review the charges.

8. ADJUSTMENT FOR ACTUAL COSTS OR USAGE

- 8.1. Notwithstanding the provisions of paragraph 7.3, the Municipality may at its own instance or on request by a developer, increase or reduce the amount of the bulk services component of a development charge so as to reflect the actual cost of installation of the required bulk services, where:
- 8.1.1. exceptional circumstances, as motivated by the developer and if accepted by the Council, justify such an increase or reduction; or
 - 8.1.2. a particular land development significantly exceeds the size or impact thresholds set out in the applicable Development Charges tariff tables.
 - 8.1.3. the actual usage of a particular land development varies significantly from the usage of the approved Development Charges tariff tables and of which the actual usage is motivated by a professional engineer and can be justified by means of recognised engineering guidelines and/or industry norms and standards.
 - 8.1.4. Where a development is situated outside the urban area, and it is not connected to or uses the bulk infrastructure allowed for in the Development Charge calculation, because it is providing its own bulk services (e.g. water supply and waste water package plant) or its reduced usage is not already allowed for in the calculation, then that portion of the Development Charge must be adjusted by means of calculations by a professional engineer in terms of this section, and the developer must pay for his own bulk infrastructure to the approval of the Engineer.
- 8.2. Where the Municipality adjusts the amount of the bulk services component of a development charge on the basis of actual costs in terms of this section:

- 8.2.1. the developer is responsible for the costs of performing the calculation of such adjustment, which must be carried out by a registered professional civil

engineer appointed by the developer with appropriate experience and expertise having regard to the nature and extent of the proposed land use; and

- 8.2.2. the actual cost must include, where applicable and without limitation, land costs, professional fees, materials, labour, the reasonable costs of construction and any tax liabilities: provided that all such costs would otherwise have been borne by the Municipality, in the provision and installation of the bulk services concerned.

9. INSTALLATION OF EXTERNAL ENGINEERING SERVICES INSTEAD OF THE PAYMENT OF DEVELOPMENT CHARGES

- 9.1. The Municipality may agree with a developer that the developer installs all or part of the external engineering bulk services required for an approved land development instead of the payment of the applicable development charge.
- 9.2. Where a developer installs external engineering services to the technical standards required by the Municipality, as reflected in the applicable conditions of approval of the land development application or as agreed with the Municipality in writing, the developer may set off the fair and reasonable cost of such installation, as determined by the Municipality, against the applicable development charges.
- 9.3. Any capital infrastructure assets forming part of an external engineering service installed by a developer instead of payment of any part of a development charge shall, upon installation, become the property of the Municipality, and-
 - 9.3.1. the developer shall bear the responsibility of ensuring that ownership or other relevant rights to the affected capital infrastructure assets is or are transferred to the Municipality;
 - 9.3.2. the Municipality must include the applicable capital infrastructure asset gain in its next adjustments budget, in accordance with regulations relating to asset gains, made in terms of the Local Government: Municipal Finance Management Act 56 of 2003.
- 9.4. The Municipality may require that a developer installs external engineering services to accommodate a greater capacity than that which would be required for the proposed land use alone in accordance with any master plan approved by the Municipality, in order to support planned future development in the vicinity of the approved land development. Where the total fair and reasonable cost of installation of such required external engineering services exceeds the development charge payable by the developer, the Municipality may reimburse the developer the amount in excess of the development charge, in accordance with a written agreement, provided that such infrastructure has been provided for in accordance with an approved master planning programme for such service and which has been approved as a capital project in terms of the budget of the Municipality. This reimbursement is to be within an agreed payment schedule not exceeding three years from the date of installation unless the developer waives his right to the applicable reimbursement.
- 9.5. If the developer elects to develop outside the Municipality's approved capital expenditure programme, he or she will have to fund the provision of services to enable such development. There is no obligation on the Municipality to provide services to land simply because an owner wants to develop his/her land and the Municipality is not obligated to re-imburse the developer for such expense. Section 152 of the

Constitution emphasises the fact that the Municipality must structure its administration and budgeting and planning processes to give priority to the basic needs of the community.

- 9.6. When a developer installs external engineering services instead of payment of a development charge, he or she must adopt the most cost-effective and efficient approach to meet the Municipality's technical standards. The principles of procuring the most cost-effective and efficient services must be followed. Therefore, the installation of engineering services must be provided at costs based on a competitive procurement process and evaluated by the developer's consultant with a recommendation for appointment. Such recommendation must be approved by the Municipality before the appointment of a contractor for this purpose.
- 9.7. "Upon the "Developer" having complied with all the terms and conditions of an engineering services agreement the "Municipality" undertakes to value the total cost of "Municipal Services", such valuation will be based on the payment certificates as certified by the professional Consulting Engineer. The total value as per the final payment certificate of the project will be used to determine the total cost of "Municipal Services". If the project has been completed in a previous financial year, the total completion value (as normally indicated on the final payment certificate) can be escalated to the year at which time DC payment is to be made. The escalation rate will be the same as the DC annual escalation as approved by council. The outstanding amount of development contributions payable as concluded with the "Developer" will be reduced by the value of such "Municipal Services" as provided in terms of this Agreement. The outstanding amount will be payable before a clearance certificate is issued by the Municipality, or before an occupation certificate is issued (where clearance certificate is not applicable)."

10. NON-PROVISION BY THE MUNICIPALITY

- 10.1. Where the Municipality has agreed to install the required external engineering services and fails to do so within a period of twelve months from the date for completion stipulated in such agreement, the Municipality must return the applicable portion of the development charge paid by the developer, to the developer, with interest charged at the applicable rate for debts owed to the State.
- 10.2. Notwithstanding the provisions of paragraph 10.1, the Municipality and the developer may agree to:
 - 10.2.1. an extension of the time period for the installation of the required external engineering services by the Municipality: provided that such extended time period may not exceed twenty-four months and provided further that where the Municipality completes the installation within such extended time period, it has no obligation to return the development charge paid by the developer, to the developer; or
 - 10.2.2. an engineering services agreement, or such a revised agreement, in terms of which the developer agrees to install the required external engineering services in whole or in part and, where agreeing to install in part, the time period within which the Municipality will install those external engineering services for which it remains responsible: provided that the extended time period for installation by the Municipality may not exceed twenty-four months and provided further that where the Municipality completes its portion of the installation within such extended time period, it has no obligation to return that portion of the development charge paid by the developer which pertains to the external engineering services installed by the Municipality, to the developer.

11. WITHHOLDING CLEARANCES AND APPROVALS.

- 11.1. The Municipality shall be entitled to withhold any consent, clearance or approval in respect of a land development in the event where development charges owed by the developer remain unpaid or the developer fails to install external engineering services in accordance with an engineering services agreement entered into with the Municipality.

- 11.2. The Municipality shall not be obliged to allow any internal or link services to be connected to the bulk services of the Municipality until all development charges have been paid by a developer.

12. SUBSIDIES AND EXEMPTIONS

- 12.1. The Municipality may only subsidise a land development or category of land developments through reducing the development charge payable in respect thereof if it meets any of the following criteria.

- ~~The land development must be for purposes of providing low income and subsidised housing (i.e. those who qualify for the Financial Linked Individual Subsidy Programme). Proof of sale must be submitted, and the proposed residential development must be located on land with a “Less Formal Residential” zoning in terms of the Zoning Scheme.~~
- The beneficiaries of the land development must primarily be indigent persons, persons dependent on pensions or social grants for their livelihood, or persons temporarily without income.
- The land development must be for purposes of serving community, conservation, educational, institutional or public purposes as defined in Schedule 2 to the SPLUMA.
- The applicant for a subsidy must be a registered non-profit or charitable community organisations undertaking social development projects that is beneficial to the community and/or where the applicant is able to demonstrate how the proposed development will have a social and/or economic benefit to the Municipality. The use of any land or buildings, or any part thereof, shall not be for the private financial benefit of any individual, including as a shareholder in a company or otherwise.
- If the bulk engineering services for the land development concerned have been budgeted to be funded through a fiscal transfer from another sphere of government, a subsidy may be granted to the extent of that grant funding.

- 12.2 Examples of land uses that may potentially qualify for subsidies or exemptions, are the following:

- Breaking New Ground (BNG) (also known as low-cost) housing projects implemented by the Municipality will be exempt from DCs. These projects are approved by council prior to implementation and such approval should include financial commitments regarding the provision of bulk services for these projects. It is thus not necessary for development charges if the provision of bulk services is to be funded by alternative funding sources. If any bulk upgrades are identified to accommodate the new development during land use approval, then the onus will be on Council to allocate the required funds to the budget as part of the project implementation.
- Public schools, hospitals, clinics and other public infrastructure projects developed and funded by government which provides a service to especially the poorer communities may qualify for a potential subsidy. These projects will have a social and economic benefit to ~~these~~ communities and the Municipality in its whole and in so doing will alleviate some institutional and financial pressure on the Municipality in terms of providing social infrastructure and social development programmes.

12.2.12.3. Applications for subsidies must be in writing and addressed to the Director: Infrastructure Services for evaluation, calculation of the applicable development charge as if it were payable, and submission of a recommendation to the Stellenbosch Municipal Council for consideration. Such submission must clearly indicate how the application meets the criteria of 12.1 and 12.2 above.

12.3.12.4. If a subsidy is granted, the Municipal Council must set out the reasons for its decision, must identify the alternative funding source for the required bulk engineering services to the value of the subsidy, and must budget for and/or obtain funding from an alternative source to the value of the subsidy.

12.4.12.5. Before the Municipality grants an individual ~~exemption subsidy~~, it must:

- 12.4.1. ensure that the revenue to be forgone as a result of any ~~exemption subsidy~~ approved by the Municipal Council is reflected in the Municipality's budget (Finance);
- 12.4.2. must provide for budgetary provision for the realisation of the revenue forgone to be made, from another realistically available source of revenue (Finance);
- 12.4.3. ensure that the monetary value of the ~~exemptionsubsidy~~, together with the amount of any other payment or payments received by the Municipality towards the capital costs of external engineering services for an approved land development, is at least equal to the development charge calculated in accordance with paragraph 12.4.1.

13. SPECIAL ARRANGEMENTS

13.1. Rural areas/farms: Development Charges will not be levied in respect of buildings as are reasonably connected with the permissible main farming activities on the farm (e.g. cellar and bottling facilities on a wine farm or a fruit packaging and storage facility on a fruit farm). Development Charges according to the applicable tariff will be levied for any other development on farms requiring approval of land use applications, e.g., a farm stall, function venue, tourist accommodation facilities, conference facilities or other commercial activities. A scientifically calculated reduction factor of 50% will be however be applied to the trip generation rates as specified for such land uses ~~in~~ outside of urban areas.

13.2. Gross Leasable Area ("GLA"): When at the time of the Development Charges calculation being done, the GLA figure is not known, it will be deemed to be 15% less than the permissible total bulk (i.e. based on 85% of the total permissible bulk).

13.3. Development Charges In lieu of Parking bays: If the development is located in an area where in the opinion of the Municipality the lack of sufficient on-site parking is currently causing problems, payment of Development Charges in lieu of providing parking bays will not be permitted. Some or all of the following criteria must be met before a Development Charges payment in lieu of parking will be favourably considered:

- If located in the historical CDB core where buildings were approved with limited parking provision;
- When a development is situated within a 500m radius of a public transport hub or facility;
- When a development is situated along a primary functional public transport route – provided that the necessary embayment required, is provided;

- When a development is situated along a primary Non-Motorised Transport route (as defined by the Non-motorised Transport Masterplan) – provided that the necessary facilities are in a good state;
 - Where a public parking garage has been constructed that, in the Municipality's opinion, adequately caters for the demand created by the shortfall of on-site parking.
- 13.4. Provincial roads outside of the urban boundaries are not allowed for. For provincial Roads within the urban boundaries, 20% of the value thereof has been allowed for in the determination of the Development Charges tariffs and therefore this percentage will be allowed to be offset from Development Charges where constructed by the Developer in terms of an engineering services agreement. The offsetting of Development Charges against the full cost of provincial road upgrades would result in an under-recovery of Development Charges for municipal roads. Exception is upgrades to intersections between municipal and provincial roads, where the full amount can be offset from Development Charges.
- 13.5. Non-motorised transport facilities: A functional and safe non-motorised transport and public transport network will reduce the dependence on private motor vehicles and therefore relieve road congestion and free up capacity on the roads and intersections. The developer may set off its fair and reasonable cost of providing such facilities, as determined by the Municipality, against the applicable development charges if the Municipality is satisfied, based on its non-motorised transport master plan, that those facilities are for the benefit of multiple users/developments and/or the community as a whole.
- 13.6. Handling of properties with historical land use rights: If a property (especially business and industrial zoned property) has an existing zoning right, it does not necessarily mean that DCs have been paid on the full development potential of the property when such zoning was approved. A DC credit can only be granted if a DC for a specific development or building has been paid in the past, or if there are existing permanent, legal buildings (has building plan approval) on the site which service demand has already been absorbed into the bulk service networks. Otherwise there is no justification for granting such a credit. The onus to prove that DCs have been paid is on the Developer/Applicant. DC's will be payable before building plan approval.
- 13.7. Temporary Departures: No Development Charges will be levied in respect of temporary departure approvals; provided that:
- 13.7.1. If, in the Municipality's opinion, any external engineering services upgrades are required to meet increased demand due to the impact of the temporary land use concerned, even if of a temporary nature, the developer must construct such upgrade at own cost; and
- 13.7.2. if an application for an extension of a temporary departure is granted, Development Charges will be levied due to the prolonged impact on services.
- ~~13.7.3.~~
- 13.8. Where a development's Development Charges are utilised to upgrade a specific service in order to create the required capacity, and the Development Charges for that specific service category is not sufficient to cover the cost of the upgrade, the Director: Infrastructure Services, at his discretion, will determine if Development Charges from the other service categories can be utilized to cover the cost. Factors to be taken into consideration include the status of bulk services in the development area, the practicality and timing to secure alternative sources of funding, etc. Electrical Development Charges may not be used to cross fund civil engineering infrastructure

and vice versa. The Community Facilities Development Charges must be ring fenced and not utilised on civil or electrical infrastructure.

- 13.9. Where a service other than a bulk service needs to be modified/relocated in order to accommodate a development, and such modification/relocation is the municipality's responsibility, but cannot be implemented by the municipality due to time and/or budget and/or operational constraints, such work may be offset from DCs. An example would be if a municipal service is located on private property, without a servitude, and such service needs to be relocated to allow building work.

~~13.10.~~

Appendix “A”

Legislative background and relevant statutory provisions**Legislative background****1. The Townships Ordinance, 33 of 1934 – (‘Townships Ordinance’)**

Before 1 July 1986 (i.e., the commencement date of the Land Use Planning Ordinance, 15 of 1985), land use applications in the Province of the Cape of Good Hope were dealt with in terms of the Townships Ordinance, 33 of 1934.

It *inter alia* provided in section 35 *ter* that an enhancement levy was due to the local authority concerned by the owner of any land of which the *value* is or has increased in consequence of ‘provisions’ being or having been ‘prescribed’ (i.e., zoning rights granted). The intention clearly was that the levy would serve as the developer’s contribution towards the cost of providing or upgrading municipal services infrastructure required to serve development undertaken, based on the approved enhanced rights.

2. The Venter Commission

Under the Townships Ordinance, however, the settling of the question of a basis on which engineering services should be provided by the township establisher and the local authority concerned, was one of the biggest single factors that retarded the township establishment process and the rapid and effective production of new residential sites.

On 26 June 1982 the State President therefore appointed a commission to inquire into and make recommendations *inter alia* regarding methods which may promote the provision of sufficient residential erven and reduce the cost thereof. The commission became known as the Venter Parliamentary Commission (the ‘Venter Commission’).

At that stage the regulation of costs of township establishment in the Cape Province was based on the recommendations of the 1970 Niemand Commission. These included the basic principle that the existing municipality rate payers should not be expected to carry the burden of services for the new township but that the arrangements between the township owner and the municipality should be such that the municipality did not make a profit out of the township owner or the purchaser of his erven either. In short, the basis for cost liability was supposed in all cases to be the principle of equal treatment, in accordance with which the inhabitants of the old town should not subsidise the new township and neither should the old derive benefit from the new township.

The Venter Commission published three reports, respectively dated 29 March 1983, 16 June 1983 and 30 November 1983. It assumed, for purposes of those reports, that the concept of ‘*internal services*’ referred to the engineering services network that was internal to the township concerned, but that it did not include the higher order services situated within the area of the township concerned that were generally classified as ‘*external services*’ and were able to serve adjacent areas as well. It recommended [1] that ‘*the township establisher should accept responsibility for the installation and financing of all engineering services that are internal to the township, and the local authority should accept responsibility for the installation and financing of external engineering services.*’.

3. The Land Use Planning Ordinance, 15 of 1985 – (‘LUPO’)

Many of the recommendations of the Venter Commission were adopted by the then Cape Province Provincial Government and served as points of departure for the drafting of the Land Use Planning Ordinance, 15 of 1985 (‘LUPO’).

Section 42(1) of (the now repealed) LUPO, empowered the competent authority to grant a land

¹ Par 3.6 Venter Commission 2nd Report sub-paragraph 10.

use application, subject to 'such conditions as he may think fit'. Section 42(2) of LUPO is particularly noteworthy. It read as follows:

'Such conditions may, having regard to-

- (a) *the community needs and **public expenditure which** in his or its opinion **may arise** from the authorisation, exemption, application or appeal concerned **and** the public expenditure **incurred in the past** which in his or its opinion facilitates the said authorisation, exemption, application or appeal, and*
- (b) *the various **rates and levies** paid in the past or to be paid in the future by the owner of the land concerned, **include conditions** in relation to the cession of land or the **payment of money which is directly related to requirements** resulting from the said authorisation, exemption, application or appeal in respect of the provision of necessary services or amenities to the land concerned.'* [Emphasis added].

LUPO no longer catered for enhancement levies but introduced an arrangement in terms of which local authorities could require, as a condition of approval, a contribution towards specified public expenditure. The qualification was that such expenditure (incurred in the past or that may arise) should (a) in the opinion of the authority, facilitate the land use approval; and (b) had to be directly related to requirements *resulting* from such approval, *in respect of the provision of necessary services or amenities to the land concerned.*

The reason why local authorities were required to take into consideration '*the various rates and levies paid in the past or to be paid in the future by the owner of the land concerned*', relates to how *loans*, as mechanism to finance infrastructure investment programmes, fits within the municipal fiscal framework. When loans are taken up for this purpose, municipalities repay same *inter alia* by using income from those sources. In other words, even the owners of vacant land contribute towards the cost of existing infrastructure that was or new infrastructure that will be provided with borrowed funds. To disregard their previous and future contribution would therefore be in conflict with the requirement that municipality should not make a profit out of the developer.

4. Conclusion

Development charges are not a new revenue source or tax for municipalities, but a once-off infrastructure access charge imposed by a municipality on a developer as a condition of approval of a land development that will result in intensification of land uses and an increase in the use of or need for municipal engineering infrastructure.

All the new order local government and planning legislation and language used therein, can easily induce an exaggerated sense of the extent of the substantive shift that it is brought about. Actually, the new order regime very much replicates that which previously subsisted in terms of the old order legislation and provides for the substantive continuity of the regulatory structure.

The new order legislation merely refined statutory arrangements relating to development charges whilst the underlying principles in respect thereof, remained the same. People working with the legislation shall appreciate the pattern today is not something essentially different to what it was yesterday and because different language is used in the legal framework one shouldn't allow that to confuse oneself into thinking of it as some sort of a legal revolution. The underlying principles still represent an equitable division of development costs between the local authority and the developer.

Relevant statutory provisions

The National Constitution – ('Constitution')

- Section 229(1)(b) empowers a municipality, if authorised by national legislation, to impose other taxes, levies and duties.

- According to section 229 (2) the power of a municipality to impose rates on property, surcharges on fees for services provided by or on behalf of the Municipality, or other taxes, levies or duties-
 - o may not be exercised in a way that materially and unreasonably prejudices national economic policies, economic activities across municipal boundaries, or the national mobility of goods, services, capital or labour; and
 - o may be regulated by national legislation.

Stellenbosch Municipality: Zoning Scheme By-Law 2019 – ('Zoning Scheme')

20. Development charges in terms of this Scheme

- (1) The calculation of development charges and whether a development charge is payable, shall be subject to the Municipality's adopted policy.
- (2) Where the provision in a particular zone identifies that a development charge is payable for intensified primary development rights which came into operation as a result of this Scheme, and where the owner intends to develop according to such intensified rights, such development charge shall be calculated when the building plan is submitted and shall be paid prior to the approval of said building plan.
- (3) Where an application is made in terms of Planning Law, or where application is made for technical approval in terms of this Scheme, the Municipality may impose a condition related to development charges payable where said approval leads to the intensification of land use beyond the primary rights which has been originally approved on the land unit.
- (4) Unless an alternative agreement is reached in writing between the owner and the Municipality, no building plan shall be approved on any land unit where an outstanding development charge is payable.
- (5) If the Municipality fails to calculate a development charge at the appropriate approval stages as set out in this section, it is deemed that there are no charges related to that development. (0)

89. Development charges in the Multi-Unit Residential zone

- (1) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.
- (2) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation because of this Scheme.
- (3) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (4) The Municipality shall consider additional development charges in at least the following instances where building plans for primary rights are submitted:
 - (a) any new development where a group housing or retirement village scheme exceeds the density per hectare as indicated below for the various former scheme areas:
 - (i) 20 units per hectare in former Stellenbosch scheme area and former Section 8 scheme area;
 - (ii) 30 units per hectare in former Franschhoek scheme area;
 - (b) any new development where the total floor area exceeds the following:
 - (i) in former Stellenbosch and Franschhoek scheme areas:
 - 40% for erven up to 1499m² (factor of 0.4)

- 50% for erven up to 1749m² (factor of 0.5)
- 60% for erven up to 1999m² (factor of 0.6)
- (ii) in former Section 8 areas: (0)
 - 100% of the land unit (factor of 1.0)
- (c) where consolidation is undertaken which results in a greater floor area threshold applying than set out above for the original land unit size;
- (d) any new development where a direct or indirect limitation applied on the development potential of the land unit by a condition of approval or the provisions of the former zoning scheme.

102. Development charges in the Local Business zone

- (1) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.
- (2) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation as a result of this Scheme.
- (3) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (4) The Municipality shall consider additional development charges in at least the following instances where building plans for primary rights are submitted:
 - (a) any development which exceeds the previously approved development extent or land use on a land unit which was zoned "Restricted Business", "Specific Business" or "Minor Business" in the former Stellenbosch or Franschoek schemes;
 - (b) any development where the floor area exceeds 150% of the area of the land unit (factor of 1,5);
 - (c) any development where consolidation is undertaken which results in the intensification of land use which is greater than that applicable on the individual erven; and
 - (d) any new development where a direct or indirect limitation applied on the development potential of the land unit by virtue of a condition of approval or the provisions of the former zoning scheme.

115. Development charges in the Mixed-Use zone

- (1) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.
- (2) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation because of this Scheme.
- (3) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (4) The Municipality shall consider additional development charges in at least the following instances where building plans for primary rights are submitted:
 - (a) any new development where the total floor area exceeds the following:

- (i) in former Franschhoek scheme area:
 - 255% of the area of the land unit (coverage of 85% on 3 floors) for business related buildings;
 - 150% (coverage of 50% on 3 floors) for flats and any other residential buildings;
- (ii) in former Section 8 scheme areas:
 - 300% of the area of the land unit (floor factor of 3,0) for business related buildings;
 - 100% of the area of the land unit (floor factor of 1,0) for flats and any other residential buildings);
- (iii) in former Stellenbosch scheme areas:
 - 425% of the area of the land unit (coverage of 85% on 5 floors) for business related buildings;
 - 185% of the area of the land unit (coverage of 85% on ground and 50% on 2 more floors) for flats and any other residential buildings (excluding hotel and guest house);
 - 285% (coverage of 85% on ground and 50% on 4 more floors) for hotels and guest house.
- (b) any new development where a direct or indirect limitation applied on the development potential of the land unit in terms of a condition of approval or the provisions of the former zoning scheme.

128. Development charges in the Industrial zone

- (1) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.
- (2) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation because of this Scheme.
- (3) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (4) The Municipality shall consider charging development charges in at least the following instances where building plans for primary rights are submitted:
 - (a) any new development where the total floor area exceeds the following:
 - (i) in former Franschhoek and Stellenbosch scheme areas:
 - 225% of the area of the land unit (coverage of 75% on 3 floors);
 - (ii) in former Section 8 scheme areas:
 - 150% of the area of the land unit (floor factor of 1,5);
 - (b) any new development where a direct or indirect limitation applied on the development potential of the property by a condition of approval or the provisions of the former zoning scheme.

140. Development charges in the Education zone

- (1) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation because of this Scheme.
- (2) The Municipality shall, prior to approval of such a building plan, determine the extent of such

additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.

- (3) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.

151. Development charges in the Community zone

- (1) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation because of this Scheme.
- (2) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (3) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law. (0)

162. Development charges in the Utility Services zone

- (1) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation because of this Scheme.
- (2) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (3) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.

172. Development charges in the Transport Facilities zone

- (1) The Municipality shall, prior to approval of a building plan for a primary right, determine whether the building to be approved constitutes an increase in development rights which is greater than the rights which existed in the former scheme, and should this be found to be the case, require that a development charge in accordance with section 20 of this Scheme.
- (2) The Municipality shall at least consider imposing development charges in the following instances:
 - (a) any new development or expansion of business-related ancillary uses to passenger transport uses;
 - (b) any new petrol filling stations or expansion of existing filling stations;

any new development where a direct or indirect limitation applied on the development potential of the land unit by a condition of approval or the provisions of the former zoning scheme.

219. Development charges in the Agriculture and Rural zone

- (1) A development charge is payable in terms of section 20 in instances where a building plan is submitted to utilise intensified primary development rights which came into operation as a result of this Scheme.
- (2) The Municipality shall, prior to approval of such a building plan, determine the extent of such additional rights and calculate the required levy, which shall be paid by the landowner prior to the approval of said building plan.
- (3) The Municipality may impose development charges for any additional use or consent use application in accordance with Planning Law.

Local Government: Municipal Systems Act, 32 of 2000 – ('MSA')

According to the MSA a '*municipal service*' means a service that a municipality is empowered to provide and which it provides or may provide to or for the benefit of the local community. Irrespective of whether such a service is provided (or to be provided) by the municipality through an internal mechanism or by engaging an external mechanism.

- Section 4 (1) provides that the council of a municipality has the right to finance the affairs of the municipality by
 - o charging fees for services; and
 - o imposing surcharges on fees, rates on property and, to the extent authorised by national legislation, other taxes, levies and duties.
- Section 4(2) provides that the council of a municipality, within the municipality's financial and administrative capacity and having regard to practical considerations, has the duty *inter alia* to-
 - o exercise the municipality's executive and legislative authority and use the resources of the municipality in the best interests of the local community;
 - o strive to ensure that municipal services are provided to the local community in a financially and environmentally sustainable manner; and
 - o promote and undertake development in the municipality.
- According to section 11(3) a municipality exercises its legislative or executive authority *inter alia* by imposing and recovering rates, taxes, levies, duties, service fees and surcharges on fees, including setting and implementing tariff, rates and tax and debt collection policies.
- Section 74 of the MSA requires that a municipal council must adopt and implement a tariff policy on the levying of fees for municipal services provided by the municipality itself or by way of service delivery agreements, and which complies with the provisions of the MSA and any other applicable legislation. In terms of section 74(2) a tariff policy must *inter alia* reflect at least the following principles, namely that-
 - o tariffs must reflect the costs reasonably associated with rendering the service, including capital, operating, maintenance, administration and replacement costs, and interest charges;
 - o tariffs must be set at levels that facilitate the financial sustainability of the service, taking into account subsidisation from sources other than the service concerned;
 - o the extent of subsidisation of tariffs for poor households and other categories of users should be fully disclosed.
- Section 75A of the MSA deals with the general power of municipalities to levy and recover fees, charges and tariffs. It provides that a municipality may-
 - o levy and recover fees, charges or tariffs in respect of any function or service of the municipality; and

⊖ recover collection charges and interest on any outstanding amount.

1. DEFINITIONS

“**Appendix A**” means the application form for Grant-in-Aid, detailed more fully below, and provided for in clause 5.2.

“**Appendix B**” refers to the memorandum of agreement (MOA), detailed more fully below, and provided for in clause 10.

“**Capacity building**” Capacity building refers to a process which enables human beings to realize their potential, build self-confidence and lead lives of dignity and fulfillment. ~~These Capacity Building programs have to align to the basket of services of the Directorate: Social Development and Early Childhood Development i.e. Early Childhood Development, Youth Development, Substance Abuse, Poverty Alleviation, Vulnerable Groups and Street People.~~

“**Community Based Organization (CBO)**” are nonprofit groups that work at a local level to improve life for residents. The focus is to build equality across society in all streams including, but not limited to – health care, environment, quality of education, access to technology, access to spaces and information.

“**Early Childhood Development (“ECD”) Facility**” means any place, building or premises, including a private residence, maintained or used partly or exclusively, for the reception, protection and temporary or partial care of more than six children that shall be registered, managed and maintained in terms of the Children’s Amendment Act, 41 of 2007.

“**Emerging Organisations**” are organisations which have been established within the past five years of the application in question.

“**Grant-in-aid**” means a grant-in-aid or allocation, as referred to in Section 12, 17 (3) (j) (iv) of the MFMA, made by the municipality to any organisation or body referred to in Section 67(1) and to be utilised to assist the municipality in fulfilling the Constitutional mandates including social developmental and arts and culture programmes as set out therein.

“**Local Agenda 21**” means the international program, adopted by South Africa to put sustainable development into practice.

“**Memorandum of agreement (MOA)**” means the agreement entered into between the municipality and any organisation or body which receives a Grant-in-Aid in terms of this Policy and **Appendix A**.

“**Non-governmental organisation (NGO)**” means a non-governmental organisation (NGO) that is a legally constituted non-profit organisation that operates independently from any form of government.

“**Non-profit company (NPC)**” means a company whose Memorandum of Incorporation must set out at least one object of the company and each such object must be either a public benefit object or object relating to one or more cultural or social activities, or communal or group interests as required by Item 1(1) of Schedule 1 of the Companies Act, 71 of 2008.

“**Non-profit organisation (NPO)**” means a non-profit organisation registered in terms of

Section 13 of the NPO Act, 71 of 1997, established for public purpose and which income and

property thereof is not distributable to its members or office-bearers, except as reasonable compensation for services rendered.

“Stellenbosch Environmental Management Framework (SEMF)” means legal and moral obligations of Stellenbosch Municipality as it relates to the environment, and provides a dynamic vision, goals and objectives, and spatial and strategic directives towards giving effect to such obligations.

2. PURPOSE, AIMS AND OBJECTIVES

- 2.1. This policy aims to provide a framework for Grant-in-Aid to non-governmental organisations (NGOs), community-based organisations (CBOs), non-profit organisations (NPOs) or non-profit companies (NPC), Public Benefit Organisations (PBO's) in so far as to alleviate the burden on municipal cemeteries and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12, 17 and 67 of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003).
- 2.2. The purpose of the Grant-in-Aid Policy is to complement the goals, objectives, programmes and actions of the Stellenbosch Municipality's Integrated Development Plan (IDP), in order to create a sustainable, credible and caring municipality by empowering and building communities and enhancing growth and sharing through partnerships. Priority ward needs as identified through Council's IDP MUST be the guiding factor in developing these partnerships.
- 2.3. Grant-in-Aid should not duplicate services already provided for by Council or which falls within the geographical jurisdiction in which Council operates, being WC024.
- 2.4. Grant-in-Aid should improve the opportunity for Council to elicit the support of external organisations to deliver those services to communities which fall within the Council's area of responsibility in a way that allows the Stellenbosch community and town to create an enabling environment for community development.

3. LEGAL FRAMEWORK

All transfers of funds in terms of this policy shall comply with the: Constitution of the Republic of South Africa, 1996 as amended (Constitution); Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) as amended (MSA); Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003) (MFMA); and any other applicable legislation, regulations and policies that may govern the transfer of municipal funds and that are not in contradiction to the above.

4. RESTRICTIONS

- 4.1. The Policy applies to all transfers of grants made by the Municipality towards support of services for the poor, marginalized, ~~or otherwise~~ vulnerable people or

[projects aligned to the strategic objectives of the municipality as described in the IDP](#). Individuals may not apply for Grant-in-Aid and no payment may be made under this policy to individuals. Council may however set aside a specific amount from which the Municipal Manager, after consultation with the Executive Mayor, may, at his/her discretion, make donations to support individual, meritorious cases in order to assist and/or recognise individual excellence in whichever field. Bursaries to individuals are treated according to the Council's Bursary Policy.

- 4.2. The total expenditure on grants may not exceed 1% of the operational budget of the Municipality.
- 4.3. Grants will only be made for services rendered in the WCO24.
- 4.4. Transfers made to categories A and B
 - 4.4.1. Transfers provided for those listed in Category A below may be made to a maximum of R40 000-00 per organisation or body per annum.
 - 4.4.2. Transfers in Category B may exceed this amount where funding relates to night shelters or addresses specific ward priorities identified and specified in the IDP and upon proper motivation contained in a business plan to address said issue. Consideration for grants larger than R 40 000, 00 requires audited financial statements, schedule of estimated annual costs and a business plan as provided for in 6 below. The decision to grant an amount more than R 40 000,00 is solely at the discretion of council and subject to available funds.
- 4.5. Grant-in-Aid transfers/payments shall be restricted to deserving organisations and bodies serving, especially those working with the poor/aged/youth/disabled/women/[children](#), as per the eligible categories in 6.2, provided that such organisations or bodies:
 - 4.5.1. Operate as a separate legal entity and are recognised as such by South African legislation;
 - 4.5.2. Are governed by their constitutions, have regular meetings with their membership and subscribe to sound accounting practices; and
 - 4.5.3. Are located and serve communities and individuals who are most in need within the jurisdiction of the Municipality.
- 4.6. No Grant-in-Aid may be made to any political body, rate payers association or for any religious purposes.
- 4.7. No grant will be allocated, under this policy, to organisations or bodies in cases where a member of Council, an official of Stellenbosch Municipality or close relatives of said individuals receive any financial or other gain.
- 4.8. Funds may only be transferred to an organisation or body if provision has been made for the expenditure on the budget or appropriations budget.
- 4.9. An organisation or body is only entitled to one allocation per financial year, but disbursements can be made more often.

5. PUBLIC ADVERTISEMENT

- 5.1. The advertisements must meet the following requirements:
 - 5.1.1. The Municipal Manager must, place a public advert in local newspapers distributed in the Stellenbosch Municipal area, calling for proposals.
 - 5.1.2. This advert must be placed in time to complete all relevant processes prior to the approval of the annual draft budget or any adjustment budget in order to invite public comment on the proposed donations prior to the approval of the final or adjustment budget.
 - 5.1.3. Advertisements should clearly specify the categories for which proposals are called, the closing date for applications, who the proposal should be addressed to, and where and how to obtain the relevant documentation pertaining to such applications/proposals, including the prescribed forms.
 - 5.1.3-5.1.4. Advertisements must clearly specify the dates, times and venues of the compulsory briefing sessions as well as the RSVP dates for these sessions. Only organisations who responded to the advertisement by confirming their interest to attend will be accommodated in the compulsory sessions.
 - 5.1.4-5.1.5. Advertisements should also clearly reflect the Municipality's right not to make an award, as well as the fact that awards will not be made to organisations that have received funds in the previous year but have not submitted a final report on the projects or previous expenditure.
 - 5.1.5-5.1.6. The advertisement should also clearly state that final approval is reliant on the approval of the budget and that **no late submissions will be considered.**
- 5.2. Only applications made on the prescribed form, being **Appendix A**, may be considered.
- 5.3. Funds may not be transferred to any organisation or body that has not submitted a proposal in response to a public advertisement and after the attendance of a compulsory briefing session and that have not signed a Memorandum of Agreement with the Municipality.

6. GENERAL GUIDELINES AND CATEGORIES

6.1. General Guidelines

Funding of applications shall proceed on the basis listed below in response to an advertisement issued after the expiry of the relevant period associated with the specific category and after a compulsory workshop explaining the policy, application process and the required documentation has been attended by the applicants. Subject to the MOA provided for in clause 10, all funding is unrequited, provided there is compliance with said MOA. Funding of application in –

- 6.1.1. Category A will be considered on an annual basis ; and

6.1.2. Category B shall be considered on a three year basis subject to a monthly review at the discretion of the Municipality which may result in early termination for unsatisfactory and reckless expenditure.

6.1.3. Council in 6.1.1 and 6.1.2 reserve the right not to fund an organisation for two periods in succession and to cancel said funding in accordance with the MOA concluded.

6.1.4. Funding applications however will not be considered in the following instances:

- (i) Where a project or organisation is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding;
- (ii) Where in Council's opinion, an organisation receives sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and a budget for the ensuing financial year;
- (iii) Where only an individual will benefit;
- (iv) For political or ratepayers organisations/groupings or religious purposes;
- (v) Projects outside the boundaries of the Municipality;
- (vi) Where expenses have already been incurred,
- (vii) Where an applicant did not attend the compulsory clarification session as advertised, and
- (viii) Where applications were received after the due date and time for submissions.

6.1.5. Funding of projects and to organisations shall exclude travel costs, subsistence, accommodation, food or entertainment expenses of any kind, staff salaries, bursaries, payments in lieu of rates or other municipal charges except for where the transport and nutrition is intended for beneficiaries/participants in the projects in question. The Municipality may also exercise their discretion to allow funding to extend to the above costs on a needs basis for the organisation or body clearly motivated for in the application.

6.1.6. Subsequent requests from applicants to cover overspending on projects will not be considered.

6.2. Categories Eligible for Grant-in-Aid

The following categories currently apply. Cognisance should be taken that these categories are not exhaustive. Other than the general guidelines and conditions set out above, categories now indicated may require specific criteria applicable to its projects/programmes:

Category A

6.2.1. **Health**

Projects/programmes include the following but are not limited to:

- (i) Public Health interventions inclusive of TB, STDs and HIV/Aids;
- (ii) Preventable lifestyle diseases e.g. drug/alcohol abuse, tobacco related illnesses; and

~~(iii)~~ Promotive and preventative services to infants, children and women.

~~(iii)(iv)~~ Counseling for mental health issues experienced in poorer communities and/or schools.

6.2.2. Environment

Purpose: To stimulate the development of sustainable leisure, aesthetic and environmental projects within the municipal area; to increase the awareness of the environment by promoting “Greening of the City”; to promote swimming skills and water safety.

Projects/programmes include the following but are not limited to:

~~(i)~~ Voluntary rescue organisations;

~~(i)(ii)~~ Facilities created to alleviate the burden on municipal cemeteries

~~(ii)(iii)~~ Lifesaving clubs and swimming organisations;

~~(iii)(iv)~~ Environmental groups/organisations; and

~~(iv)(v)~~ Organisations promoting community involvement as a means of sustaining leisure, aesthetic or environmental projects.

~~(v)(vi)~~ Projects which further the Council’s aims and the strategies of SEMF (Strategic Environmental Management Framework) and including but not limited to the sustainable management of:

- o Riverine corridors;
- o Biodiversity;
- o Natural and built environment;
- o Heritage resources;
- o Quality urban spaces;
- o Ecological conservation areas;
- o Urban agricultural complexes;
- o Bioregional planning;
- o Nature area management;
- o Wetlands;
- o Local Agenda 21 projects

6.2.3. Solid Waste (Cleansing)

Purpose: Waste Reduction and awareness. Projects/programmes include the following but are not limited to:

- (i) Waste reduction and awareness;
- (ii) Educational programmes/projects addressing litter and waste handling; and
- (iii) Waste minimisation solutions.

6.2.4. Social Development

Purpose: The promotion of projects/programmes which stimulates the Stellenbosch Municipality’s Integrated Development Plan (IDP) focusing especially on the needs of the most marginalised sectors in the greater Stellenbosch as identified in the ward priorities.

Projects/programmes include the following but are not limited to:

- (i) Poverty alleviation;
- (ii) Urban renewal;
- (iii) Capacity building of communities;

- (iv) Youth development;
- (v) Women and gender development;
- (vi) Early childhood development;
- (vii) Street people programmes;
- (viii) Arts and culture programmes
- (ix) Facilitation of public participation processes; arts and culture programmes
- (x) Development of disabled persons, and
- (xi) Development of elderly people

6.2.5. Sports and Recreation

Purpose: To stimulate the development of sustainable Sport and Recreation infrastructure and programmes within the municipal area especially targeting disadvantaged communities; encourage creativity and self-reliance on the part of grassroots sport and recreation bodies -or groups; to increase participation in sport and recreation programmes and activities.

Projects/programmes include the following but are not limited to:

- (i) Local sport and recreation clubs;
- (ii) School sport teams
- (iii) Local sport and recreation councils or associations
- (iv) Informal sport and recreation groups; and
- (v) Community and non-government organisations.

Category B

6.2.6. ~~Night Shelters~~ Services for persons living on the street

Purpose: Provision of shelter and other services for vulnerable individuals living on the street, without homes, in the need of assistance of shelter at night. ~~Shelter is provided on a temporary basis and residency should not be provided for on a permanent basis.~~ The Municipality aims to reduce the number of people living on the streets of Stellenbosch and as such the organisation or body's goals should align with this vision. Further the Municipality aims to reduce the socio-economic effects of poverty on the community of Stellenbosch. The organisation or body must therefore present to Council a clear business plan with a comprehensive response to the prevention, reduction, outreach and stabilisation of street people. Organisations or bodies that provide a continuum of services and that collaborate with businesses, government departments and other organisations are preferred. ~~Street people programmes listed in Category A shall fall under this category if provision is made for overnight stay.~~

Projects/programmes must include the following but are not limited to:

- (i) Provision of basic services (overnight facility, shower, morning and evening meals
- ~~(ii)~~ Provision of social work services inclusive of referrals
- ~~(iii)~~ Provision of social relief and healthy living, trauma, mental and substance

support, job rehabilitation, skills development, job creation, readiness and placement services specifically for persons on the streets

- ~~(iii)~~(iv) Family re-integration services
- ~~(iv)~~(v) Social support
- ~~(v)~~(vi) Community work programmes
- ~~(vi)~~(vii) Facility maintenance (Infrastructure and operational equipment)

6.2.7. **Projects aligned to the strategic objectives of the municipality as described in the IDP**

Purpose: The promotion of projects/programmes which stimulates the Stellenbosch Municipality's Integrated Development Plan (IDP) focusing on the strategic objectives of the Municipality and identified ward priorities. The organisation must therefore present to Council not only a clear business plan detailing how they intend to address the specific issue but how they intend to partner with other organisations to achieve a unified approach to that particular challenge. Organisations or bodies that provide a continuum of services and that collaborate with businesses, government departments and other organisations are preferred. Projects/programmes include the following strategic objectives but are not limited to:

Those listed in Category A that address specific ward priorities identified and specified in the IDP and upon proper motivation contained in a potential plan to address said issue.

- (i) Valley of Possibility
- (ii) Green and Sustainable Valley
- (iii) Dignified Living
- (iv) Safe Valley
- (v) Good Governance and Compliance

7. APPLICATION PROCEDURE

Applications and proposal for Grant-in-Aid must be on the prescribed form stated in 5.2 above, a copy of which is attached hereto as **Appendix A for Category A and B**. Applications must be accompanied by a covering letter on the letterhead of the organisation or body, signed by the head of the organisation or body and must include the following information. ~~Should an applicant wish to submit a Category B application, but would want to be considered for a Category A application in the event that the Category B application is declined, this must be clearly stated in the covering letter and supporting documents MUST be submitted for both types of applications:~~

- 7.1. The applicant's legal name and a brief description of the applicant organisation's or body's business;
- 7.2. if the applicant claims to be a non-profit organisation, the registration number and the certificate;
- 7.3. the date of establishment, details of the applicant's member founding documents,

including constitution and certificates of incorporation;

- 7.4. a contact name, full street address, telephone number and an e-mail address;
- 7.5. if funding is required for a specific project, a brief description of the project what it aims to achieve, as well as the detailed budget for and duration of the project;
- 7.6. a description on how the project aligns with the needs identified in the community through the IDP process and which ward priorities will be addressed through the project;
- 7.7. if the request is for general support, the organisation's or body's overall budget must be included;
- 7.8. references, independent of the applicant and its executive;
- 7.9. most recent audited financial statements (subject to MFMA, section 67(4)) statements; or at least statements signed off by the treasurer and chairperson of the organization in the case of small emerging organizations;
- 7.10. a summary of past achievements;
- 7.11. a declaration by the head of the organization to the satisfaction of the Municipal Manager, that the organisation or body implements effective, efficient and transparent financial management and internal control mechanisms to guard against fraud, theft and financial mismanagement and has in the past complied with requirements for similar transfers of funds; and
- 7.12. notwithstanding the above requirements, the CFO after considering the merits of an application not complying with the minimum application criteria and after consulting the Municipal Manager, may for the purpose of this policy approve a deviation from the norm;
- 7.13. Applications for Category B **must** include a schedule of annual costs for a three year period, a three year business plan and audited financial statements.

8. OBLIGATIONS OF THE APPLICANT

- 8.1. The head of the organisation or body must acknowledge in writing to the Municipal Manager that the money was received in its bank account and that the amount is/will be utilised to the benefit and in accordance with the role of the organisation or body in society. The funds ~~should~~must be used as outlined in the application form.
- 8.2. The organisation or body shall ~~regularly~~ report, if and when required but at least once a year, to the Municipal Manager regarding the activities conducted, the ward within which activities are conducted, as well as the number of people benefiting from the activities on the prescribed template (Appendix B).

~~8.3. If funding is required for a specific project, a brief description of the project and what it aims to achieve, as well as the detailed budget for and duration of the project.~~

~~8.4-8.3.~~ The applicant must attend a compulsory workshop on the Grant-in-Aid policy and application procedure prior to submission of the application.

~~8.5-8.4.~~ If successful with the application, the applicant must spend funds according to the approved Grant-in-Aid funding request. Should the need change over the funding period, written consent needs to be obtained from the municipality prior to spending the funds on alternative needs. Failure to spend funding on approved projects can result in the applicant being required to return the funding and/or the applicant being excluded from future applications for a period of 5 years.

9. RIGHTS OF THE MUNICIPALITY

- 9.1. The Municipality shall be entitled, from time-to-time, to verify and inspect the existence and activities of the organisation or body. The municipality will therefore have the right to physically visit the premises where the organisation, or the funded project, is based; to peruse the budgets and any progress reports related to the project (in contract).
- 9.2. The Municipality shall manage contracts entered into with organisations or bodies by receiving reports and doing the necessary site visits and inspections to ensure that this policy and contract are being complied with.
- 9.3. The Municipality has the right not to give a Grant-in-Aid to any or all organisations applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.
- 9.4. The Municipality will run proposed donations through a public participation process before final awards are made.

10. AGREEMENT

Before any funds are transferred to an organisation an agreement (**Appendix BC**) must be concluded by the Municipal Manager with the beneficiary to protect the interest of the Municipality.

11. DEVIATION

This policy constitutes the entire framework for Grant-in-Aid and no deviation will be entertained.

12. COMMENCEMENT

This Policy takes effect on the date on which it is adopted by the Council of Stellenbosch Municipality.

**APPLICATION FOR GRANT-IN-AID: 2023/24**

	❖ Full details of the proposal/project/business plan including objectives;						
	❖ The number of people who will benefit and how the project/program will contribute or enhance the strategic objectives of Stellenbosch Municipality;						
	❖ The project/program commencement and completion dates;						
	❖ Information on the total costs of the project/program budget;						
	❖ A breakdown of costs and an outline of any contributions by fundraising and / or own contributions;						
	❖ A list of all other sources of funding together with the assessments;						
	❖ A summary of past achievements;						
4	❖ Reference independent of the applicant and its executive/board or committee members.						
4	SIGNED AND STAMPED CREDITOR CONTROL FORM (An original signed copy of a correctly completed Creditors Control form of the Stellenbosch Municipality or an electronic generated confirmation of bank details created through online banking)						
5	ACCOUNT ON EXPENDITURE FOR PRECEDING FUNDING (If you have received funding from Stellenbosch Municipality previously in the preceding financial year , expenditure of the funds received needs to be accounted for with this new application). Please refer to Section M for the format.						
6	PROOF OF REGISTRATION/AFFILIATION (Attach a copy of the organisation's Registration Certificate of Affiliation)						

REQUIREMENTS CATEGORY B APPLICATIONS		
L	(Please note that Category B applications MUST adhere to the following requirements and those listed under section K, except where indicated otherwise.)	
1	AUDITED FINANCIAL STATEMENTS A copy of the latest audited financial statements must be included in the application. Category B applications MUST submit their latest audited financial statements. Statements signed off by the treasurer, chairperson or other delegated party will not be accepted.	
2	THREE YEAR BUSINESS PLAN See the requirements for the business plan as listed under section K as guideline. NOTE: Category B applications MUST provide a clear proposal for a period of three years. Each year must be indicated separately and be costed per annum indicating all expenditure against the projected measurable outcomes. Outcomes must be listed to how they will be reported on and measured on a monthly basis.	
M	FORMAT FOR FEEDBACK REPORT	
1	Narrative report on the project including numbers reached, outcomes reached, outcomes-reached , evaluation of the project indicating successes and failures/lessons learned.	
2	Pictures of the project/program.	
3	Financial report on expenditure regarding previous donation separate from the annual financial statements. (Attach proof of expenditure).	
N	THE FOLLOWING SHALL APPLY:	
1	The allocation of Grant-In-Aid will only be considered if the application document has been fully completed and signed and is accompanied by the required and supporting documentation referred to therein.	
2	An applicant who has been registered as a NPC, NGO, NPO or PBO-non-profit-organization in terms of Section 13 of the Non-Profit Organisation Act, 1997 with , and the necessary proof thereof, is submitted together with this application.	
3	Applicants must in their submission clearly indicate/specify and motivate what the funds will be utilized for.	
4	The Grant-In-Aid must be exclusively utilized for the purpose defined and the successful applicant must submit the necessary undertaking to this effect.	
5	Applicants must in their submission satisfy the Council of their ability to execute the project successfully.	
6	Organisations who have already received financial or other assistance from the Council during the previous financial year MUST specify same in their application.	
7	No funding will be considered for political groupings, churches or ratepayers organisations or for religious purposes.	
8	No funding will be considered where only an individual will benefit or where a member of Council or an official of Stellenbosch Municipality will receive any financial or other gain.	
9	Projects outside the boundaries of the Council will not be considered.	
10	Expenditure that will not be funded includes: travel costs (unless it is for the transport of beneficiaries), subsistence, accommodation, food (unless intended for the beneficiaries) or entertainment expenses of any kind, staff salaries including bonuses, bursaries and payments in lieu of rates or other municipal charges.	
11	Subsequent requests from the applicants to cover overspending on projects will not be considered.	
12	Successful applicants must at all times comply with the provisions of Section 67(1) of the Municipal Finance Management Act no. 56 of 2003 which inter alia stipulates that the organization or body has to:-	
	❖ Enter into and comply with a Memorandum of Agreement with the Municipality as well as with all reporting financial management and auditing requirements as may be contained in such an agreement. This memorandum of agreement will bind the successful applicant to deliver on what the application speaks to, but also to commit to become involved with municipal programs of the community where it functions. The Memorandum of Agreement will be made available to successful applicants for completion.	
	❖ Report at least once a year monthly on the actual expenditure of the amount allocated to it. Should monthly allocations be made, monthly reports will be required.	
13	The Council reserves the right not to give a Grant-In-Aid to any organization applying for grants. Having been awarded a grant previously does not give an applicant the right to receive a grant again.	
14	Funding will not be considered where a project or organization is already receiving funds from Council in terms of Council's functions. Applicants are required to disclose other sources of funding, failing which such applicant will be disqualified.	
15	Funding will not be considered where in Council's opinion, an organization received sufficient funds from other sources to sustain its activities or the project applied for. For this purpose, organisations must submit financial statements and budget for the ensuing financial year.	
16	Organisations having received funding from Stellenbosch Municipality during the previous financial year, are required to attach to any new application, a copy of the financial statements relating to the year in which the funding was received from Council, as required in terms of Section 17 of the Non-profit Organisation Act, 1997 and Section 67(1) of the Municipal Finance Management Act, 2003 (MFMA).	
17	Funding will not be considered where expenses have already been incurred on a project by the applicant. (The Council's Grant-In-Aid Policy must be consulted for the sake of completeness).	

O DECLARATION OF INTEREST:	
The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations:

MEMORANDUM OF AGREEMENT

Entered into and between

STELLENBOSCH MUNICIPALITY

(hereafter called the "**MUNICIPALITY**")

Herein represented by **Geraldine Mettler**, in her capacity as **Municipal Manager**, being duly authorised

and

(hereafter called the "**BENEFICIARY**")

Herein represented by _____ in his/her capacity as _____,
being duly authorised.

WHEREAS Section 67(1) of the Local Government: Municipal Finance Management Act, Act 56 of 2003 (MFMA) oblige the Accounting Officer of a **MUNICIPALITY** to satisfy himself that, before transferring funds of the **MUNICIPALITY** to an organisation or body outside any sphere of government otherwise than in compliance with a commercial or other business transaction, that such organisation or body:-

- (a) has the capacity and has agreed-
 - (i) to comply with any agreement with the **MUNICIPALITY**;
 - (ii) for the period of the agreement to comply with all reporting, financial management and auditing requirements as may be stipulated in the agreement;
 - (iii) to report at least monthly to the Accounting Officer on actual expenditure against such transfer (should transfers be done on a monthly basis); and

- (b) implements effective, efficient and transparent financial management and internal control systems to guard against fraud, theft and financial mismanagement; and
- (c) has in respect of previous similar transfers complied with all the requirements as set out above; and
- (d) give permission to site visits done by the **MUNICIPALITY**.

WHEREAS the **MUNICIPALITY** has approved a Grants-in-Aid Policy, in terms whereof applications are considered;

WHEREAS the **BENEFICIARY** has applied for a grant-in-aid as per the official grant-in-aid application form; and

WHEREAS the **MUNICIPALITY** has approved such application, subject to certain conditions;

NOW THEREFORE THE PARTIES AGREE AS FOLLOWS:

1. TRANSFER OF FUNDS

1.1 The **MUNICIPALITY** hereby undertakes to transfer an all-inclusive amount of

R..... (.....), being a donation for the period **01 July 20...** to **30 June 20...** to the **BENEFICIARY**.

1.2 Bank Account details: (The following are confirmed through a correctly completed Creditors Control Form.)

Account number	:	_____
Name of financial institution	:	_____
Name of account holder	:	_____
Branch code	:	_____
Type of account	:	_____

1.3 The all-inclusive amount will be transferred in equal amounts on the following dates (if applicable):

2. OBLIGATIONS OF BENEFICIARY

- 2.1 The **BENEFICIARY** must acknowledge in writing to the Municipal Manager that the amount(s) was(were) received in its bank account.
- 2.2 The **BENEFICIARY** hereby certifies that the money will be utilised in accordance with the role of the organisation or society, to the benefit of the community and in accordance with the project(s) / programme(s) as indicated in the application form.
- 2.3 The **BENEFICIARY** undertakes to regularly report on a monthly basis to the Municipal Manager regarding the activities conducted, actual expenditure against such transferred funds, as well as the number of people benefiting from the activities should monthly payments be made. If not, an annual report on the expenditure will be provided.

~~2.4 The **BENEFICIARY** further undertakes to submit an audited financial statement for its financial year to the Municipal Manager by not later than **30 April 20...**~~

3. SPECIFIC CONDITIONS

- 3.1 The parties specifically agree on the following:

That the organization will commit to active involvement in any programme run by the municipality in the area of operation of the organization when such a programme is active in the community.

Other conditions:

4. DECLARATION OF INTEREST

The beneficiary declares that the following municipal employees and/or councillors have a vested interest in the business of the beneficiary. However, they do not benefit directly from this donation and were not part of the decision making process in the allocation of the donations: (Name and designation)

5. ACQUISITION OF ASSETS

- 5.1 Should the **BENEFICIARY** wish to acquire any moveable or immovable assets with the money donated in terms of this Agreement, the **BENEFICIARY** hereby undertakes to:-
- 5.1.1 adhere to the principles as per the **MUNICIPALITY'S** Supply Chain Management Policy, and
- 5.1.2 take all reasonable steps to ensure that such assets are maintained and that a -system of internal control of such assets is in place.

6. RIGHTS OF THE MUNICIPALITY

- 6.1 The **MUNICIPALITY** shall be entitled, from time to time, to verify the existence and to inspect the activities of the **BENEFICIARY**, having regards for its right to privacy as entrenched in terms of the Constitution of the Republic of South Africa.-
- 6.2 The **MUNICIPALITY** shall further be entitled to peruse the budgets and any progress reports related to the project / programme as per this Agreement.

7. FAILURE TO COMPLY

- 7.1 Failure by the **BENEFICIARY** to comply with the obligations as set out in Clause 2 of this Agreement, may lead to the cancellation of this Agreement, in which case the **MUNICIPALITY** may demand that the organisation pays back any unspent funds as per this Agreement. The **MUNICIPALITY** may even, depending on the circumstances leading to the non-compliance by the **BENEFICIARY**, demand that the organisation pays back the full amount paid to the **BENEFICIARY**. Failure to comply may result in not considering applications for grants from the **BENEFICIARY** for a period of 5 years.

8. INDEMNIFICATION

- 8.1 The **BENEFICIARY** hereby acknowledges that it receives the grant voluntarily and that it shall keep the **MUNICIPALITY** indemnified at all times against any loss, cost, damage, injury or liability suffered by the **MUNICIPALITY** resulting from any action, proceeding or claim made by any person (including themselves) against the **MUNICIPALITY** caused directly or indirectly by the use/spending of the grant.

9. DISPUTE RESOLUTION

9.1 Any dispute arising from this Agreement shall be mediated between the Parties by a mutually agreed upon and suitably skilled mediator. Should the mediator be unsuccessful and the Parties fail to reach agreement, the dispute may be referred by the aggrieved Party to the arbitration of a single arbitrator, to be agreed upon between the Parties, or failing agreement, to be nominated on the application of any Party, by the President for the time being of the South African Association of Arbitrators. The decision of the single arbitrator shall be final and binding on the Parties.

10. NOTICES AND DOMICILIA

10.1 The parties choose as their *domicilia citandi et executandi* their respective addresses as set out in this clause for all purposes arising out of or in connection with the agreement at which addresses all processes and notices arising out of or in connection with this Agreement, its breach or termination, may validly be served upon or delivered to the Parties.

10.2 For purposes of this Agreement the Parties' respective addresses shall be:

10.2.1 The MUNICIPALITY:

Town House
Plein Street
Stellenbosch
7600

10.2.2 The BENEFICIARY:

or at such other address of which the Party concerned may notify the other(s) in writing provided that no street address mentioned in this sub-clause shall be changed to a post office box or poste restante.

- 10.3 Any notice given in terms of this Agreement shall be in writing and shall-
- 10.3.1 if delivered by hand be deemed to have been duly received by the addressee on the date of delivery;
- 10.3.2 if posted by prepaid registered post be deemed to have been received by the addressee on the 8th (eighth) day following the date of such posting;
- 10.3.3 if transmitted by facsimile/ electronic mail be deemed to have been received by the addressee on the day following the date of dispatch;
- 10.4 Notwithstanding anything to the contrary contained or implied in this Agreement, a written notice or communication actually received by one of the Parties from another, including by way of facsimile transmission/ electronic mail, shall be adequate written notice or communication to such party.

11. ENTIRE AGREEMENT

This Agreement, including the **Grant-in-Aid policy and application form**, reflects the entire Agreement between the Parties and no variation, amendment or addendum shall be of any force and effect between the Parties unless contained in writing, signed and agreed on by both Parties.

PREAMBLE

The Stellenbosch Municipal Council accepts and acknowledges its Constitutional duties and mandate relating to indigent support in terms of Sections 152 and 153 of the Constitution of the Republic of South Africa, 1996 (Act 108 of 1996) towards the community/consumers within the jurisdiction of Stellenbosch Municipality (WC024).

Council further acknowledges that because of the level of unemployment and consequential poverty in the municipal area, that correlated households are incapable of paying for basic municipal services.

Indigent relief measures are thus a fundamental requirement that is achievable only within sustainable budgets set by Council as well as support and direction via National Government.

Concomitantly, indigent households equally have the responsibility of managing their levels of consumption and that they are responsible for the payment of municipal services that are consumed in excess of the reduced cost or Free Basic Service levels as described in this Policy.

The effective implementation of such a program depends principally on affordability and is supported by the socio-economic analysis of various areas as included in the Council's Integrated Development Planning. The Council's mandate regarding affordability of basic services to poor households is directed by mechanisms in Section 74(2)(c) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) and Section 15 of the Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004).

Council's mandate is further extended by Section 96 of the aforementioned Systems Act requiring a municipality to adopt, maintain and implement a credit control and debt collection policy which according to Section 97 must *inter-alia* make provision for indigent debtors consistent with national policy.

In order to give effect to the foregoing, the Council of Stellenbosch Municipality has adopted a policy relating to indigence as set out hereinafter.

1. DEFINITIONS

In this Policy, a word or expression derived from a word or expression as defined, has a corresponding meaning unless the context indicates that another meaning is intended:

“Municipality” means Stellenbosch Municipality (WC024).

“Basic Services” means that level of services delivered by the Municipality at a reduced cost or at no cost to the Indigent consumer and which the Council has considered reasonable and sustainable within budget constraints.

“Child-headed household” means a household of only minors under the age of 18 years, being a child as defined in Section 28 of the Constitution, and in which a minor has assumed the role of caregiver in respect of the other minor(s) in the household. This is further described in paragraph 5.2(e) of this Policy.

“Constitution” refers to the Constitution of the Republic of South Africa, 1996

“Gross household income” means the total combined earnings of the head of the household and his or her spouse(s) who are not alienated from the household. Any other financial contribution towards the household income by any means, by other dependent(s) or occupant(s) must be taken into consideration. Government grants as received by or for dependent minors or disabled occupants (excluding spouses) will be ignored and not be added as a financial contribution towards the household income.

“Household” means a family unit comprising a head of the family, being a natural person. The family unit may include spouse(s), blood related or adopted dependents. The household may be further extended by other occupants with or without children who reside on the same premises. All the above (including the extended members) will be deemed to be members of such a household. This is further described in paragraph 5.2 of this Policy.

“Indigence” means the lack of necessities of life such as sufficient water, basic sanitation, refuse removal, environmental health, basic energy, health care, housing, food, and clothing.

“Indigent consumer” means the person identified as the head of the household and as described in paragraph 5.2 who makes a formal written application on the prescribed form required for the indigent subsidy.

“Indigent household” means a household that has applied for, has qualified, and continues to qualify for indigent support as per this Policy.

“Indigent subsidy” means that portion of the overall support or financial assistance to indigent households that has been allocated to a specific indigent household.

“Indigent Income Threshold” means the qualifying monthly income as described in paragraph 5.5 and as set in paragraph 5.5(b) of this Policy.

“Pre-payment electricity meter” means a type of electricity meter that requires consumers to pay for energy before using it and which will allow the flow of the pre-purchased amounts of energy in an electrical circuit.

“Pre-payment water meter” means a type of water meter that requires consumers to pay for water before using it and which will allow the flow of the pre-purchased amounts of water.

“Valuation Threshold” means that value of municipal valuation as set for residential properties in paragraph 8.2 of the Municipality’s Rates Policy.

“Water management device” means a device designed to manage or restrict the water flow, water consumption or water needs of a residential property.

2. **POLICY OBJECTIVES**

The objectives of this Policy are to:

- (a) provide a framework within which the Municipality can exercise its executive and legislative authority regarding the identification of indigent households and the implementation of financial aid to such.
- (b) ensure the provision of basic services to indigent households within the jurisdiction of the Municipality in a sustainable manner and within the financial and administrative capacity of the Municipality.
- (c) ensure the establishment of procedures and guidelines for the effective subsidisation of basic services charges to such approved indigent households within budgetary and national grant guidelines.

3. **POLICY PRINCIPLES**

The following guiding principles for the formulation of this Policy, are to:

- (a) ensure that the portion for free basic services allocated as part of the equitable share received annually, be utilised for the benefit of indigent households.
- (b) promote an integrated approach to subsidised basic service delivery.
- (c) optionally use external services and/or references to verify the information provided by the applicants.
- (d) optionally use various classification criteria to direct the different processes.

- (e) maintain the relief measures to indigent households for as long as such indigent household remains registered on the municipality's indigent data base or register and the municipality continues to receive equitable share for this purpose.
- (f) review the relief measures by random sampling to ensure *bona fide* indigent support.
- (g) engage the community in the development and implementation of this Policy.

4. LEGISLATIVE CONTEXT

4.1 This policy is implemented within the framework of the following legislation:

All citations to applicable Acts as referenced in this Policy shall include all amendments and regulations to such as promulgated.

- (a) The Constitution of the Republic of South Africa, 1996, in particular Sections 152 and 153.
- (b) Local Government: Municipal Systems Act, 2000 (Act 32 of 2000), in particular Sections 74, 96 and 97.
- (c) Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003).
- (d) Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004), in particular Section 15 and/or.
- (e) any other legislation that may be applicable

4.2 This Policy was developed using the following guideline(s):

- (a) National Framework for Municipal Policies.
- (b) National Indigent Policy Assessment tool, 2018 - COGTA

5. QUALIFICATIONS AND SCOPE

The introduction of reduced cost or free basic services will ensure that indigent consumers have access to basic services.

5.1 Subsidy:

Subsidies are granted from external funds, allocated by the National Government as an Equitable Share allocation, to subsidize Indigent households with specified levels of basic services. This is based on a:

- (a) Level of income enabling Indigent households to pay for a basic package of municipal services; and/or

- (b) Municipal property valuation value that sets the level at which indigent support may be granted.
- (c) Subsidy scheme that is promoted through the press and by means of personal referral, but principally via referrals by the credit control and debt recovery section of the Municipality.

5.2 Household:

- (a) The head of the household, or his/her spouse(s) who are not alienated from the household, must indicate if said person is:
 - (i) a state official in any capacity; or
 - (ii) a director of a company, a member of a Closed Corporation or Trust, or
 - (iii) involved in any state tender processes.
- (b) The head of the household must be a South African citizen with valid South African identity documentation and have permanent residency.
- (c) The head of the household should be:
 - (i) the registered owner or part owner of the property; or
 - (ii) the registered lessee of a Council housing unit; or
 - (iii) the registered lessee of an Organ of State - (as defined in Section 239 of the Constitution) owned housing unit; or
 - (iv) in meritorious cases as determined by the Municipality a person, being the head of the household, who is incapable of paying for basic municipal services and who resides in said property/unit.

The head of the child-headed household shall be deemed to meet these criteria.

- (d) To register as an indigent consumer the head of the household must personally complete and sign the registration form.
- (e) Child-headed households will only be approved based on the following criteria:
 - (i) both parents of the household are deceased, or one parent and/or guardian is deceased, and the other is totally alienated from the household;
 - (ii) a minor has assumed the role of caregiver in respect of the other minor(s) in the household. This caregiver is the head of the household and shall be deemed to meet the criteria as per paragraph 5.2(c);
 - (iii) such minors reside permanently on the property;
 - (iv) such minors, and exclusively only minors occupy the property as their normal residence;

- (v) such minors are scholars or unemployed and if income is derived, the household earns less than the qualifying income as envisaged by the defined Indigent Income Threshold;
 - (vi) the situation pertaining to the household has been verified by the Municipality; and
 - (vii) the situation pertaining to the household will be reviewed when the caregiver as per (ii) above reaches the age 18 years or older.
- (f) Indigent households living in homes for senior citizens shall be eligible to qualify for assistance and support under this Policy, subject to the following rules and procedures:
- (i) For the purposes of passing/issuing the free basic electricity units to such indigent household, the onus will be on the unit owner or lessee to apply and submit proof that the electricity connection is in the name of the Indigent consumer and not in the name of the organization providing the accommodation.
 - (ii) In the event of the unit being occupied by a single individual without any dependents as per the definition of a household above, the level of income to qualify shall be equal to or less than 50% (fifty percent) of the defined Indigent Income Threshold per month.

5.3 Basis of Subsidy:

- (a) Only formal or informal housing units utilized for residential purposes will be taken into consideration for the purpose of this subsidy, being the provision of free basic services.
- (b) All informal structures where a pre-payment electricity meter has been installed by the Municipality will qualify for the electricity subsidy. In the cases where off-grid electricity is supplied by an authorised service provider appointed in terms of paragraph 5.7.2(b) of this Policy such households will also qualify for a subsidy, which subsidy will be paid directly to the authorised service provider.
- (c) Applications deviating from the above will only be considered after a detailed investigation and evaluation by the Municipality.

5.4 Liability for payment of municipal accounts:

- (a) Subsidies will only be granted to households liable for the payment of municipal service fees.
- (b) Subsidies will only be granted by means of a credit on municipal accounts and free basic electricity vouchers or in the form of subsidy paid directly to the authorised service providers of off-grid electricity as envisaged in paragraph

5.7.2(b) of this Policy. No subsidy will be paid directly to any Indigent consumer or household in the form of cash or any such disbursement.

- (c) Households are liable for the payment of fees, as stated on the monthly account, for any service in any given month that exceeds that service's subsidy.
- (d) Monthly accounts, as well as the instalments arranged in respect of the repayment of debt, must be paid punctually and in full. If required, and after reasonable alternatives have been exhausted, the process to recover debt from indigent consumers will be dealt with in terms of the Credit Control and Debt Collection Policy and procedures of the Municipality.
- (e) Pre-payment electricity meters may be installed on all properties of formal households before receiving indigent subsidies to prevent escalation of debt.
- (f) Water management devices or Pre-payment water meters may be installed on properties of formal households before receiving indigent subsidies to prevent escalation of debt.

5.5 Qualifying income:

- (a) The total Gross Household income for a household will be taken into account when considering the application for Indigent support.
- (b) The maximum qualifying income level defined as the Indigent Income Threshold for a household as described in paragraph 5.2 of this Policy will be equal to or less than R ~~6-5007 000~~ per month. Proof must be produced in the form of pay slips, unemployment certificates, income certificates or other acceptable proof of income.
- (c) Should proof of income not be available, income may be declared by means of a sworn statement. Such applications may be verified by means of a full investigation and a socio-economic survey.

5.6 Targeting mechanisms:

The following principles for the granting of free basic services apply:

- (a) Properties in respect of which property tax is levied on a municipal valuation amount will qualify as follows:
 - (i) The municipal valuation of a property being less than or equal to the defined Valuation Threshold will be used as the guiding threshold.
- (b) Indigent subsidies will only be considered by the Municipality upon application on a prescribed form by households which consider themselves as being indigent.

5.7 Basic services :

The Municipality will provide the following basic services at reduced or at no cost to the Indigent consumer:

5.7.1 Formal Households

Free basic services for Formal households will consist of the following:

- (a) 100 kWh electricity per household per month subject to it being supplied via a prepayment metering system as the qualifying criteria for a registered indigent household to be placed on the Lifeline Electricity Tariff. Free electricity units will not be applicable should the Indigent Household choose not to install a pre-paid meter;
- (b) a basic charge for water and a maximum of 6 kl water per household per month;
- (c) a service subsidy not exceeding the cost of one refuse unit in respect of a single residential property;
- (d) a service subsidy not exceeding the cost of one sewerage service unit supplied to residential properties with a maximum area of 250m²; and/or
- (e) 50% of the applicable tariff for clearances of septic tanks.

5.7.2 Informal Settlement Households

Free basic services for Informal Settlement Households will consist of the following:

- (a) 100 kWh electricity per household per month; or
- (b) a maintenance and operations subsidy (equivalent in Rand value to 100kWh electricity per household per month) for off-grid solar home systems, operated by a municipal approved service provider or Energy Service Company (ESCO).

(In the case of off-grid electricity subsidies as contemplated above, the Municipality may, subject to a detailed review by the Revenue Section appoint an authorised service provider to provide the maintenance and operations function for a group or groups of indigent recipients of off-grid electricity at a maximum rand equivalence of the value of 100 kWh electricity per household per month.)
- (c) Other services (specifically water, sewerage and refuse removal services) are not billed for.

5.7.3 Indigent households residing in homes for senior citizens

Free basic services for qualifying households residing in homes for senior citizens as per paragraph 5.2(f) of this Policy will consist of 100 kWh electricity per household per month.

5.8 Free bulk services

Free Bulk Services shall be the provision of services (water standpipes, high mast lighting, ablution facilities and refuse removal) to informal settlements.

The cost of the provision of free bulk services will be recovered from the Equitable Share Allocation from National Government and processed monthly.

5.9 Other concessions

- (a) Registered indigent consumers limited to the immediate occupants of the household occupying the property excluding any extended members could qualify for a discount of up to 50% (fifty percent) on the approved fees and tariffs for non-trading services (refer paragraph (d) below) as set by Council from time to time subject to application to the relevant Director.
- (b) Proof of registration as an indigent consumer must be obtained from the Credit Control Section of Financial Services prior to the application for the discount being made.
- (c) For the purposes of clarity, other categories of consumers (other than registered indigent consumers) such as back yard dwellers, farm workers and lessees of other property earning equal to or below the Indigent Income Threshold per month, may also qualify for the concessions (i.e. a discount of up to 50% (fifty percent) on the approved fees and tariffs, limited to the services envisaged in paragraph (d) below.
- (d) Discounted non-trading Services; refers to:
 - (i) Community hall discounts.
 - (ii) Burial fees in sections of cemeteries without head stones (i.e. crosses or flat stone areas only) and cremations when available. This concession is only applicable for burials on Mondays to Saturdays, excluding Public Holidays. Farm workers must provide written confirmation regarding the burial site from the farm owner.

6. ALLOCATION OF SUBSIDIES

- (a) The subsidy in any given month and service will be an amount not exceeding the amount as reflected in the Council's approved Tariff Schedules for services for Indigent households as per paragraphs 5.7 and 5.9 of this Policy.
- (b) Only one subsidy per service per property/household may be allocated in any given month.
- (c) Subsidy levels may be adjusted from time to time, depending on the availability of funds or any adverse conditions.

- (d) Lessees of subsidized housing units already receiving a municipal subsidy for the alleviation of municipal service costs included in rentals will not qualify for an Indigent subsidy. Should the latter subsidy be more advantageous, such a lessee may request that the Indigent subsidy replace the rental subsidy.

7. APPLICATIONS FOR INDIGENT SUBSIDIES

- (a) Applications (i.e. applications submitted by individuals) will be required by any household which considers themselves to be an indigent household.
- (b) Only applications lodged by means of the prescribed application form will be considered by the Municipality.
- (c) Such households may be visited by employees of the Municipality or approved service providers, where after a written recommendation would be considered.
- (d) The maximum subsidy may be granted to households with no income, even if the corresponding accounts are not paid in full.
- (e) Indigent assistance will be applicable for as long as an indigent household remains registered as such on the indigent data base or register and the Municipality continues to receive equitable share for this purpose.
- (f) The Municipality may disclose a list of Indigent households for public inspection, which may include the publication thereof.
- (g) In a case of misrepresentation or any other transgression of the conditions for the provision of subsidies, the subsidy will be withdrawn with immediate effect and not be reconsidered for a period of at least 12 months. The Municipality may recover such subsidies up to a maximum period of three years.
- (h) Indigent relief will not apply in respect of property owners with more than one property, whether such property is situated inside or outside the area of jurisdiction of the Municipality.
- (i) Subsidies will not be granted on a *pro-rata* basis and applications approved after the twentieth day of a month will be granted in the following month.
- (j) The onus is on the recipient of indigent subsidy to inform the Municipality immediately of any changes in personal circumstances that may warrant a review of his/her indigent status. For example, the status of any change of employment or to the Gross Household income as per paragraph 5.5 above must be reported to the Municipality.
- (k) The municipality reserves the right to review and/or to conduct home visits on a random basis with the view of assessing whether a household would still qualify for receiving indigent assistance.

- (l) Upon cancellation of indigent assistance normal credit control procedures will be applicable on arrear accounts of such cancelled applications.

8. PROPERTY TAX REBATES BASED ON MUNICIPAL VALUATION

This Policy only addresses indigent subsidies, and any form of rates relief is addressed as provided for in the Rates Policy of the Municipality.

9. INDIGENT REGISTER

- (a) The Municipality shall draw up and maintain a register in respect of formal properties and households receiving indigent assistance.
- (b) The register may be open for inspection by the public during office hours.
- (c) The Municipality may at regular intervals review the register and apply randomly selected checks as to the status of an application.

4. Provision for irrecoverable debt	3
5. Rescission of Judgments	3
6. Short Title	3

PREAMBLE

The Stellenbosch Municipal Council accepts and acknowledges its Constitutional duties and mandate towards the community/consumers of Stellenbosch Municipality (WC024).

Council further acknowledges that in order to deliver services in a sustainable manner, that same be managed in terms of Council's Credit Control and Debt Collection Policy having due regard of its limited financial resources and the need to manage cash flows.

Council therefore is aware of its duty to prepare financial statements that gives a true reflection of the financial position for a given period.

In order to give effect to the foregoing, the Council of Stellenbosch Municipality has adopted a policy relating to the management of irrecoverable debt as set out hereinafter.

1. Requirements before writing-off debt

All applicable actions must have been executed/implemented before any debt, owed to Stellenbosch Municipality will be considered for writing-off.

However, in special cases where all applicable actions were impossible/impractical to implement, the administration must motivate such write-off for consideration.

The irrecoverable debt of registered indigent consumers may be written-off on an annual basis by Council.

The abovementioned applicable actions are those as contained in the approved Credit Control and Debt Collection Policy of Stellenbosch Municipality.

2. Bad Debt Recovered

Bad debt recovered after having been written-off will be treated in terms of the Municipality's Accounting Policy.

The approval for the write-off of any debt does not mean that actions to recover the debt will be terminated. Conditionally, further actions may be instituted, depending on the costs involved. Should the debt be recovered, it will accordingly be recorded in the financial records of Stellenbosch Municipality.

3. Thresholds for writing-off of debt

3.1 The writing-off of debt per individual case may be considered as follows:

- (i) Above ~~thirty-five~~forty thousand rand (~~R35-R40~~ 000) will be effected after Council approval.
- (ii) Amounting to ~~thirty-five~~forty thousand rand (~~R35-R40~~ 000) and below may be effected after motivation to and approval by the Chief Financial Officer (CFO) or his/her delegate.
- (iii) Amounting to twenty-~~five~~ thousand rand (~~R20-R25~~ 000) and below may be effected after motivation to and approval by the Senior Manager: Revenue and Expenditure.
- (iv) Amounting to ~~ten-fifteen~~ thousand rand (~~R10-R15~~ 000) and below may be effected after motivation to and approval by the Manager Revenue.

3.2 The writing-off of any interest (or part thereof) component of debt, providing that the debt excluding the interest component, is paid in full, may be considered as follows:

- (i) Above one hundred and ~~twenty-five~~ thousand rand (~~R120-R150~~ 000) will be effected after Council approval.
- (ii) Amounting to one hundred and ~~twenty-five~~ thousand rand (~~R120-R150~~ 000) and below may be effected after motivation to and approval by the Chief Financial Officer (CFO).

- (iii) Amounting to ten thousand rand (R10 000) and below may be effected after motivation to and approval by the Senior Manager Revenue and Expenditure or Manager Revenue.

4. Provision for irrecoverable debt

Provision for bad/irrecoverable debt will be dealt with in terms of the Municipality's Accounting Policy.

5. Rescission of Judgments

Stellenbosch Municipality will consider applications for the consent to rescission of judgments, obtained by the Stellenbosch Municipality for the recovering of debt, provided that the following conditions are applicable:

- 5.1 All outstanding debt accrued on ~~all accounts~~the affected account of ~~the~~ said property have been settled in full, and
- 5.2 A period of at least five years has lapsed since the date of the applicable judgment, in the case where the Stellenbosch Municipality has written off any debt.

6. Short Title

This Policy is the Irrecoverable Debt Policy of the Stellenbosch Municipality.

1. BACKGROUND

In 2007, Stellenbosch Municipality initiated a process to prepare a General Valuation (GV) Roll of all property situated within the geographical boundaries of Stellenbosch Municipality (WC024) in terms of the requirements of the Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004) including any subsequent amendments and consequential regulations (the MPRA) which became effective on 1 July 2009 at Stellenbosch Municipality.

This Policy is formulated in terms of Section 3 of the MPRA.

2. LEGISLATIVE CONTEXT

- 2.1 In terms of Section 229 of the Constitution, 1996 (Act 108 of 1996), a municipality may impose rates on property.
- 2.2 In terms of Section 4 (1) (c) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000), a municipality has the right to finance the affairs of the municipality by imposing, *inter alia*, rates on property.
- 2.3 In terms of Section 2 (1) of the MPRA a metropolitan or Local municipality may levy a rate on property in its area in accordance with the provisions of the MPRA.
- 2.4 This Policy must be read together with and is subject to the provisions of the MPRA.
- 2.5 In terms of Section 62 (1) (f) (ii) of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003) (the MFMA), a municipality must have and implement a rates policy as may be prescribed by any applicable national legislation.
- 2.6 In terms of Section 8(1) of the MPRA, the Municipality will, as the primary instrument, levy rates on the use of property, but implemented as per paragraph 5.5 of this Policy.
- 2.7 All citations to applicable Acts as referenced in this Policy shall include all amendments and regulations to such as promulgated.

3. GUIDING PRINCIPLES

- 3.1 The rating of property will be implemented impartially, fairly, equitably and without bias, and these principles also apply to the setting of criteria for exemptions, reductions, and rebates contemplated in Section 15 of the MPRA.
- 3.2 The rating of property will be implemented in a way that:-
 - is developmentally oriented;
 - supports sustainable local government by providing a stable and buoyant revenue source within the legislative ambit of the Municipality;
 - supports local and socio-economic development;
 - promotes simplicity, uniformity, and certainty in the property rates assessment process;

- gives due consideration to the need for simple and practical process of billing and collection of property rates;
- promotes sustainable land management, especially that which reduces the risk from natural disasters;
- achieves national and local environmental management objectives; and
- balances the affordability by ratepayers versus the financial sustainability of the Municipality.

3.3 Other principles that will steer the processes of this Policy:

- All ratepayers within a specific category will be treated equally and reasonably.
- The Municipality will, when levying property rates for each financial year, take cognizance of the aggregate burden of rates on property owners in the various categories of property ownership.
- Rates Increases/Decreases will be guided by the budget requirements of the Municipality, and by Section 20 of the MPRA.
- In dealing with the poor/indigent ratepayers the Municipality may provide relief measures through exemptions, reductions or rebates.

3.4 Further determinants that will guide the processes of this Policy:

- The Zoning Scheme of the Municipality determines, via the provisions therein, the zoning and thus the legally binding use of a given property.
- However, the rating of said property is governed by the MPRA which determines a collection of rules that by implication sets the conditions by which the use of a property is categorised. It is therefore possible that even though an owner is using a property within the set rules of the Zoning Scheme, said property would not be rated on the same basis due to the definitions and provisions as applied according to the MPRA and this Policy.
- Moreover, such categorisation instituted according to the MPRA or this Policy does not condone any unlawful use of a property regardless of circumstances.

4. DEFINITIONS

In this Policy, a word or expression derived from a word or expression as defined, has a corresponding meaning unless the context indicates that another meaning is intended.

The following four definitions in the MPRA are only shown for clarity:

“Exclusion”, in relation to a municipality's rating power, means a restriction of that power.

“Exemption”, in relation to the payment of a rate, means an exemption granted by a municipality.

“Reduction”, in relation to a rate payable on a property, means the lowering of the amount for which the property was valued and the rating of the property at that lower amount.

“Rebate”, in relation to a rate payable on a property, means a discount granted on the amount of the rate payable on the property.

In addition to the definitions contained in the MPRA, the following definitions apply for the purpose of the application of this Rates Policy.

Furthermore, specific terms or phrases used, but not defined in the MPRA are defined herein to describe said term or phrase for a specific perspective of the MPRA by the Municipality:-

“the Municipality” means Stellenbosch Municipality (WC024).

“MPRA” refers to the Local Government: Municipal Property Rates Act, 2004 (Act 6 of 2004) including any subsequent amendments and consequential regulations.

“Accommodation Establishment” means a property used for the supply of overnight sleeping facilities to transient guests at a fee.

“agricultural activities” means the intensive cultivation of soils for purposes of planting or growing, and gathering of trees or crops in a managed and structured manner; the intensive rearing of livestock or aquaculture. In addition, all the provisions as detailed in the definition of “Agricultural Property” in the MPRA persist in this Policy.

“agricultural purposes” refers to the active pursuit by a *bona fide* farmer to derive the principle source of income, which is commercially sustainable, from agricultural activities exclusively on Agricultural Properties.

“bed & breakfast” in relation to *Accommodation Establishment* means:

- an initiative on a property of which the residential character is maintained,
- where the owner or operator permanently resides in the same dwelling,
- where normally only breakfast is served, and
- sleeping accommodation to transient guests is limited to no more than 3 guest bedrooms.
- This property will be deemed to be a Residential Category.

“bona fide farmer” is a person or legal entity that is a legitimate farmer whose primary income originates from agricultural activities.

“business and commercial property” means a property that is used for the purpose described as the activity of buying, selling or trade in goods, commodities or services and includes any office or other buildings on the same property, the use of which is incidental to such business. This definition excludes the business of mining and agriculture activities.

“Chief Financial Officer (CFO)” means a person designated in terms of Section 80(2) (a) of the Local ~~government~~Government: Municipal Finance Management Act, 2003 (Act 56 of 2003).

“Conservation Area” means:

- a Protected Area as defined in Section 1 of the MPRA and listed in the “Protected Areas Register” as stipulated in Section 10 of the Protected Areas Act defined in the MPRA as the National Environmental Management: Protected Areas Act, 2003 (Act 57 of 2003); nevertheless, specifically those parts of properties as described in Section 17 (1) (e) of the MPRA; or

- a mountain catchment area as described in Section 9 of the *Protected Areas Act* and declared in terms of the Mountain Catchment Areas Act, 1970 (Act 63 of 1970).

“Guesthouse” in relation to *Accommodation Establishment* means:

- an initiative that is operated on a property of which the residential character is maintained; and
- where the sleeping accommodation to transient guests exceeds 3 but limited to 16 guest bedrooms, or
- if any services are offered beyond the limited services of a *Bed & Breakfast* establishment.
- This property will be deemed to be a Business Category.

“household income” means the gross sum of all monthly income from all sources. Income sources may include wages, salaries, profits, dividends, pensions, rentals, board & lodging, interest received, grants or investment income and other forms of financial contributions.

“industrial property” means a property that is used for the purpose described as the branch of trade or manufacturing, production assembling or processing of finished or partially finished products from raw materials or fabricated parts, typically via a high-volume production process and on such large scale that capital and labour are significantly necessitated; and includes any office or other buildings on the same property, the use of which is incidental to such business.

“Open Space” means a property, but specifically land that is used as a park, garden, for passive leisure or maintained in its natural state and which is zoned as open space. These properties may either be publicly owned being commonly open to public access; or privately owned and used without financial gain.

“ratepayer” means a person or legal entity that is liable in terms of the MPRA for the payment of rates on property levied by the Municipality. The term “Ratepayer” is herein considered to be synonymous with the MPRA definition of the term “owner”.

“residential purposes” in relation to the use of the property means improved property primarily intended for human habitation and inhabited as such; subject to paragraph 7.9 of this Policy and provided that:

- the following properties are specifically excluded from this definition: hostels, old age homes, and vacant land;
- ~~the predominant use of a property with not more than two dwelling units on said property, must be 80% or more (based upon a percentage of the total area of buildings and structures) for this purpose; or~~
- properties registered in terms of the Sectional Title Act, 1986 (Act 95 of 1986) must solely be used for this purpose; or
- properties owned by a share-block company must solely be used for this purpose; or
- a block of flats must solely be used for this purpose; or
- a dwelling used for this purpose must be situated on property used for or related to educational purposes; or

- the predominant use of a retirement scheme or life right scheme must be 60% or more for this purpose.

“**SARS**” means the South African Revenue Service.

“**vacant land**” means a property:

- without any buildings or structures; or
- where immovable improvements have been erected but deemed incomplete and unoccupied.

“**valuation roll**” means a valuation roll drawn up in terms of Section 30 of the MPRA or a supplementary valuation roll drawn up in terms of Section 78(6) of the MPRA.

5. IMPOSITION OF RATES

- 5.1 The Municipality shall as part of the annual budgeting cycle, set for each category a rate, (being a cent amount in the Rand) that will be imposed, in accordance with the MPRA, on the market value of a property, for all rateable properties as recorded in the Municipality’s valuation roll, drawn up in terms of the MPRA. The amount so determined together with any relief measures as described in this Policy shall be the Rates due and payable by the owner of said property.

The levying of rates forms part of the Municipality’s annual budget process as set out in Chapter 4 of the MFMA.

Details of the resolution pertaining to the rate for each of the various property categories are to be published in the *Provincial Gazette* as set out in Section 14 of the MPRA.

- 5.2 The rates charged as a cent amount in the Rand for the residential property as per paragraph 6.1 (a) of this Policy is the base rate and the rate charged to all other categories of properties are reflected as a ratio to the residential rate if so prescribed by Regulations promulgated in accordance with the MPRA.
- 5.3 The Municipality will be guided by the definition of “ratio” in the MPRA and directed by Regulations pertaining to rate ratios as promulgated in terms of Section 19 of the MPRA and as applicable to the prescribed non-residential properties.
- 5.4 For properties used for multiple purposes, the Municipality may apply the category of multiple use. For such properties, the Municipal Valuer will apportion a value to each distinct use and apply the appropriate category for billing at the applicable rate.
- 5.5 For the purposes of determining a property’s category, the Municipality will determine such as per Section 8 of the MPRA. It should be noted that the Municipality considers permitted use to be appropriate on vacant properties and that all other properties would be categorised according to the actual use of said property.
- 5.6 Building Clause references

Obligations pertaining to Building Clauses as per the development agreements or contracts will under the obligation or constraint of Section 19(1)(d) not be administered as part of the valuation nor the rating processes.

5.7 Period for which rates are levied

The Valuation Roll will, according to Section 32(1) of the MPRA, remain valid for a General Valuation cycle of four years.

5.8 Valuation value constraints

- (a) For the purposes of valuing a property, no valuation value shall be less than R1 000 unless the valuer determines that said property's valuation value must be zero.
- (b) For administrative purposes all valuation values exceeding R1 000 may be rounded to the nearest R1 000 interval.

6. CATEGORIES

6.1 Categories of Property

Property Categories, each of which correlates to a distinct use of a property, have been determined as described below.

The codes that have been associated with each property Category are listed in paragraph 18.1 of this Policy. In addition, paragraph 18.1 identifies the attributes and criteria that determines the basis for application.

The Municipality will apply the following property Categories:

Item	Category (of property)	Purpose/Use
(a)	Residential	Refer Section 1 ("Definitions") in the MPRA and the defined term " <i>Residential Purposes</i> " as per paragraph 4 in this Policy.
(b)	Industrial	Refer the definitions as per paragraph 4 in this Policy.
(c)	Business and commercial	Refer the definitions as per paragraph 4 in this Policy.
(d)	Agricultural	Refer Section 1 ("Definitions") in the MPRA and the defined term " <i>Agricultural Purposes</i> " as per paragraph 4 in this Policy.
(e)	Mining	Refer Section 1 ("Definitions") in the MPRA.
(f)	Public Service Purposes	Refer Section 1 ("Definitions") in the MPRA.
(g)	Public Service Infrastructure	Refer Sections 1 and Sub-sections 17(1)(a) and 17(1)(aA) in the MPRA.
(h)	Public Benefit Organisation	Refer to Section 8(2)(h) in the MPRA.
(i)	Multiple Use	Refer paragraph 7.2 in this Policy.
(j)	Heritage	Refer Section 15(2A)(b) in the MPRA.
(k)	Vacant Residential	Vacant and Permitted use set as Residential.
(l)	Vacant Other	Vacant and Permitted use not set as Residential.

6.2 Categories for Relief Measures

The Municipality will consider relief measures on rates, being Exemptions, Rebates and/or Reductions on properties, according to various criteria as described in this Policy.

The codes (referred to as the Rebate Codes), associated with the specific relief measure, are listed in paragraph 18.2 of this Policy.

7. APPLICATION OF RATING

The Municipality will, in addition to the various criteria referenced above, apply the following criteria when rating a property:

7.1 Vacant Properties

The Category of Vacant properties will be determined according to the property's permitted use and these properties will not qualify for any relief measures.

Vacant property of which the permitted use has been set as residential will be rated as per the Vacant Residential Category.

Vacant property of which the permitted use has not been set as residential will be rated as per the Vacant Other Category.

Any vacant property registered in the name of the Municipality will be categorised as a Vacant Other Category and exempted from paying property rates.

Normally, Agricultural properties will not be considered as being vacant, however this consideration lapses if the ambit (scope) of either of the terms "*agricultural activities*" or "*bona fide farmer*" as defined in this Policy is not relevant or cannot be applied to said property.

7.2 Multiple use Properties

Properties with multiple uses as per Section 9 of the MPRA may be categorised for each distinct use as determined by the Municipality and which category will be applied for billing at the appropriate and applicable rate.

The different uses will be grouped into two or more components. The first component, which will be determined by the largest apportioned area of the property will be the primary component; the other components (sub-components) will be identified by their generalised functional name.

The category of the primary component of such a property will be directed in the first instance by the dominant use of the property, but at the sole discretion of the Municipality.

A multiple use property may qualify for the valuation exclusion as per paragraph 8.2.1 (i) of this Policy, provided that at least one of the components has been categorised as residential. Sub-components will not be eligible for the reduction as per paragraph 8.2.1(ii).

Sub-components may not be categorised for any of the following categories: Public Service Purposes, Public Benefit Organisation nor any vacant category.

7.3 Public Service Purposes Properties

Properties used for Public Service Purposes will be categorised as per paragraph 6.1 (f) of this Policy and will be rated at the applicable rate. The exclusions, exemptions, rebates and reductions relating to the usage of properties as detailed in this Policy and the MPRA, will apply if applicable.

7.4 Public Service Infrastructure properties

The Municipality will apply the rate ratio as set out in the MPRA to public service infrastructure.

The Municipality acknowledges that Sections 17(1)(a) and 17(1)(aA) of the MPRA provides for the distinct grouping of kinds of public service infrastructure as in the “public service infrastructure” definition in Section 1 of the MPRA.

These groups will be processed respectively as either a PSI formulae code or a PSIE formulae code as referenced by the table in paragraph 18.1. For such properties for which the Municipality is the owner the formulae code MUNP will be used.

The Municipality will impose the 100% exclusion under the PSIE formulae code as directed by Section ~~93B~~ 93A of the MPRA.

For properties under the PSI formulae code the Municipality will impose the 30% exclusion as directed by Section 17(1)(a) of the MPRA and grant on the 70% remainder a further 100% exception.

7.5 Rural Properties

The categorizing and/or qualification of all rural properties will be dealt with at the sole discretion of the Municipality.

7.5.1 Agricultural Use

The Municipality will apply the rate ratio as set out in the MPRA to properties that are used for agricultural purposes by *bona fide* farmers. These properties will however not qualify for any relief measures.

For a property to be categorised as agricultural, processes and structures fundamental to agricultural activities on that farming unit, will be considered. Structures such as a dwelling used by the farmer and farm employees will be considered integral to such processes.

The Municipality may consider applying multiple use categorisation as per paragraph 7.2 if any structures are not used exclusively for agricultural purposes, or the structures are used for delivering or selling services or products to/for customers.

~~The Municipality deems property with extent less than one hectare not to be agricultural property.~~

7.5.2 Alternate Criteria and Use

- (a) Where a property in a rural area is being used for residential, business, mining, or industrial purposes, such as truck depots, construction yards, restaurants, functioning venue, guesthouses, and/or factories, said property will be valued and rated according to the category for residential, business, mining or industrial properties as applicable. The Municipality may however, consider valuating said property as a Multiple Use Property (refer to paragraph 7.2 of this Policy).

~~(b) Properties in rural areas that are primarily used for residential purposes will be valued and rated as residential properties and may thus qualify in terms of the~~

~~definition of residential property for the applicable relief measures (refer to paragraph 8 of this Policy).~~

- (be) Owners of a property in rural areas which is not categorised as agricultural, but which in the opinion of the owner should be agricultural, must apply (refer to paragraph 14.1 of this Policy) for a revaluation, submit documentation as required by the CFO and declare in an affidavit, that no contraventions of the criteria for agricultural activities are taking place on the property. The application will be dealt with according to the supplementary valuation process.

7.6 Municipal Properties

Municipal-owned properties which are leased in terms of a lease agreement or those properties which are allocated to beneficiaries but not yet transferred, will be rated as per the provisions of this Policy. The exclusions, exemptions, rebates, and reductions relating to the usage of properties as detailed in this Policy and the MPRA, will apply if applicable. The rates of said non-exempted property will be passed on to the lessee or the allocated beneficiary.

All other Municipal-owned properties as described in Section 7 (2) (a) (i) of the MPRA, will be exempted from paying property rates and Special Rating Area rates.

For administrative purposes it should be noted that by 1 July 2023 all exemptions as applied to municipal owned properties will be changed to exclusions.

7.7 Special Rating Area (SRA)

The Municipality may consider the application for a Special Rating Area (SRA) provided that the owners of the predefined demarcated area have approved the budget and the specifics relating to such SRA. The process must adhere to Section 22 of the MPRA and to the Municipality's Special Rating Area Policy and By-Law.

The budget for such SRA will be raised via a pre-determined tariff applied on the municipal valuation of each property. This pre-determined tariff is linked to the annual budget proposal and would therefore be unique to a specific SRA and for a given financial year.

7.8 Land Reform Beneficiary properties

The Municipality will determine a Land Reform Beneficiary that corresponds to the use of such property. The said determination will be applied for billing at the appropriate and applicable rate.

The Municipality will however exclude such properties from rates for a period of 10 years subject to Section 17(1)(g) and phase-in the rates as per Section 21(1)(b) of the MPRA.

7.9 Adjoining properties

The Municipality acknowledges that there are residential properties, registered in the name of the same owner, which are used basically as if such properties were one property.

For the above, the deemed secondary component [the adjoined property] shall be classified as a RESA formula code and will therefore not be eligible for the reduction as per paragraph 8.2.1(ii).

The Municipality will apply the RESA formula code for units in a Sectional Title scheme such as a garage or a storage unit. Consequently, these properties or units will not be eligible for the reduction as per paragraph 8.2.1(ii).

The Municipality will not consider any notarial links between any property.

Administratively a link between the adjoining property and its associated parent property must be set so as to facilitate tracking of such pairing.

8. RELIEF MEASURES

8.1 Applying relief measures on Rates

Notwithstanding that the Municipality is obligated as per the MPRA to exclude specific properties or parts thereof from rating, the Municipality will consider applying relief measures on property rates, being Exemptions, Rebates and/or Reductions as described in this Policy.

- (a) The Municipality may grant exemptions, rebates and/or reductions to the categories of properties and/or categories of owners that meet the specified criteria as indicated in sub-paragraphs of paragraph 7 above or as indicated below.
- (b) The Municipality will exclude specific properties or parts thereof as indicated in sub-paragraphs of paragraph 7 above or as indicated below.
- (c) The Municipality will not grant relief in respect of payments for rates to any category of owners or properties other than that as provided for in this Policy, nor to owners of properties on an individual basis.
- (d) Any application (when required or as requested) for a relief on rates must be submitted as per paragraph 14.1 of this Policy.

8.2 Residential Property

8.2.1 The Municipality will not levy a rate on the initial portion of the valuation of a residential property being the sum of:

- (i) the first R15 000 exclusion on the basis set out in Section 17 (1) (h) of the MPRA; and
- (ii) on a further R235 000 reduction, provided it does not exceed the remaining valuation in respect of a residential property, or the primary component of a multiple use property, that is categorised for *residential purposes*, as per the definition in paragraph 4 of this Policy.
 - This reduction will only apply if the total valuation of said property does not exceed R 5 000 000.

- All -sub-components of a multiple use property as per paragraph 7.2 of this policy, and the secondary component of adjoining properties or units of a sectional title scheme as per paragraph 7.9 of this policy, do not qualify.

The above where applicable, will be applied once only per property.

8.3 Senior Citizens and Disabled Persons

Designated owners being registered owners of properties or allocated beneficiaries as per paragraph 7.6 of this Policy who are senior citizens or who are disabled persons may qualify for a rebate according to their *household income*.

To qualify for the rebate referred to above, the designated owner must be a natural person, registered as a South African citizen. If not a South African citizen, the designated owner must be the registered owner of the property within the jurisdiction of the Municipality and must submit proof of his/her permanent residency in South Africa. The property in question must satisfy the residential property requirements as per this Policy and in addition to the above-mentioned, the designated owner must also:

- 8.3.1 Occupy the property as his/her normal residence; and
- be at least 60 years of age, or in receipt of a disability grant; and
 - be in receipt of a monthly *household income* not exceeding the highest income amount as referenced in the table of paragraph 8.3.4 of this Policy; and
 - when being the designated owner of more than one property, a rebate will be granted only on the occupied property; and
 - where the designated owner is unable to occupy the property due to no fault of his/her own, the spouse or minor children may satisfy the occupancy requirement; and
 - where the occupant of a residential property is a senior citizen or a disabled person and is the usufructuary of the property, he/she may satisfy the occupancy requirement.
- 8.3.2 Apply as per paragraph 14.1 of this Policy with proof of income, which may include proof of a SARS assessment, or any other relevant document as requested.
- 8.3.3 If the property in question is alienated by the designated owner, then that owner would be liable for the *pro rata* rates, inclusive of the pension rebate. The new owner will be liable for the full *pro rata* portion of the rates excluding any pension rebates.
- 8.3.4 The percentage rebate granted to different monthly *household income* levels will be determined according to the schedule below. The income bands and rebates for the effective financial period of this Policy are as follows:

Gross Monthly Household Income				% Rebate
Income bands				
Up to		8 000		100%
From	8 001	to	10-11 000	75%

From	10-11 001	to	12-13 000	50%
From	12-13 001	to	15-17 000	25%

8.4 Conservation Area

The Municipality will exclude those portions of a property within the ambit of a conservative area as defined in this Policy.

The apportioned value of any portion of such property, utilized for any purpose other than that used for such conservation purposes, or developed and used for commercial, business, agricultural or residential purposes will be categorised accordingly and rated at the applicable rate as described in paragraph 7.2 of this Policy.

The Municipality will apply Section 17 (2) of the MPRA upon withdrawal of said property from the conservation agreements inferred in Section 17 (1) (e) of the MPRA.

8.5 Religious Organisations

In terms of Sections 1 and 17 (1) (i) of the MPRA, the Municipality will not levy a rate on a property used primarily as a place of public worship by a religious community, including the official residence which is occupied by the office bearer of that community who officiates at services at that place of worship.

The Municipality will apply Section 17 (5) of the MPRA if as per Section 17 (5) (a) of the MPRA said property is no longer used or has been disposed by the religious community.

8.6 Stellenbosch Special Rebate

The Municipality may, for the organisations not meeting all the criteria for public benefit organisations as described in paragraph 8.7 below, nor the criteria for NPO organisations as described in paragraph 8.8 below, consider a rebate of 20% which shall be identified as “Stellenbosch Special Rebate” (SSR).

This rebate will only be applicable to said organisations that apply as per paragraph 14.1 of this Policy for such rebate.

8.7 Public Benefit Organizations (PBO)

The Municipality will apply the rate ratio as set out in the MPRA to public benefit organisations.

As per the MPRA the specific public benefit activity listed in Item 1 (Welfare and Humanitarian), Item 2 (Health Care), and Item 4 (Education and Development) of Part I of the Ninth Schedule of the Income Tax Act will be applicable and must be conducted/executed on said property.

All Public Benefit Organisations must annually submit, according to paragraph 14.1 of this Policy proof of their status as per the above criteria. A SARS TAX Clearance Certificate may be required as well.

8.8 Non-Profit Organizations (NPO)

An organisation must be registered as a Non-Profit Organisation (NPO) under the Non-profit Organisations Act, 1997 (Act 71 of 1997) to be considered as a candidate for the relief measures described below.

Organizations listed in paragraph 8.8.1 below that are operated as not-for-gain (declared or registered by law) or organisations that execute activities as per Item 6 (Cultural), item 7 (Conservation, Environment and Animal Welfare) and Item 9 (Sport) of Part 1 of the Ninth Schedule to the Income Tax Act may receive a rebate. All abovementioned organisations being privately controlled must be the owner of said properties.

These rebates are not applicable to any vacant land irrespective of its zoning or intended usage unless stated otherwise in this Policy.

Any part of said property that has been categorised as agricultural will not qualify for this relief measure.

All NPO must annually submit, according to paragraph 14.1 of this Policy proof of their status as per the above criteria. A SARS TAX Clearance Certificate may be required as well.

Abovementioned organisations which have a total revenue/income as defined in the schedule of paragraph 8.8.2 of this Policy will receive a rebate as set in said schedule.

8.8.1 Prescribed not-for-gain organisations

(a) *Health and welfare institutions*

Privately owned properties used exclusively as a hospital, clinic, mental hospital, orphanage, non-profit retirement village, old age home or benevolent institution, including workshops used by the members or patients, laundry or cafeteria facilities.

(b) *Charitable institutions*

Properties used solely for the performance of charitable work.

(c) *Agricultural societies*

Property owned by agricultural societies used for the purposes of the society.

(d) *Cemeteries and crematoria*

Privately owned properties used as cemeteries and crematoria.

(e) *War veterans*

Property registered in the name of a trustee or organisation in terms of the Social Assistance Act, 2004 (Act 13 of 2004), maintained for the welfare of war veterans and their families.

8.8.2 The percentage rebate granted to different total revenue/income levels (expressed as being the revenue/income before any expenses, operating costs or any deductions have been

applied) will be determined according to the schedule below. The revenue/income bands and rebates for the effective financial period of this Policy are as follows:

<i>Total Revenue/Income</i>				% Rebate
Revenue/Income bands (Rands)				
Up to			2 000 000	80%
From	2 000 001	to	5 000 000	50%
More than			5 000 000	20%

8.9 Properties affected by Disaster or adverse Economic Conditions

The Municipality may consider additional relief measures as envisaged in Section 15(2)(d) of the MPRA and as approved by Council.

8.10 Exceptional General Valuation Rates Increases: Phasing in

The Municipality may consider a relief measure for owners of property adversely affected by exceptional rates increase of a new General Valuation (GV) cycle. This incentive will only be implemented as from the implementation date of a GV and on proviso that:

- (a) for a property to qualify, the Rates for the first financial year of the GV cycle for the property, as result of the property valuation of a GV cycle, must be at least four (4) times more than that of the rates for said property during the financial year preceding the start of the GV cycle.
- (b) the rates for the financial year preceding the start of the GV cycle must be greater than R1 000 per annum;
- (c) the rebate granted would be phased-out over two financial years;
- (d) the rebate for the first financial year will be 50% and during the second year it will be 25% rebate on the rates applicable for that year;
- (e) this incentive will not be cumulative on any other rebate that may be granted to said owner;
- (f) the most beneficial rebate between this incentive and any other rebate which said owner may receive in each financial year will prevail;
- (g) improvements or errors of valuations to said property that could have influenced the GV valuation will be reviewed during the application approval;
- (h) applications will only be considered until the end of the initial 6 months of a GV cycle; and
- (i) owners of such property must apply as per paragraph 14.1 of this Policy.

9. LIABILITY FOR AND PAYMENT OF RATES

9.1 Liability for and payment of rates

Liability for and payment of rates is governed by criteria in this Policy, by the MPRA, the Municipality's Credit Control and Debt Collection Policy, By-Laws and any other applicable

legislation. Actions as per the applicable By-Laws and/or Policies shall be taken against defaulters.

There are one of two methods of payment that the owner of the property must agree upon, namely (i) paying the rates on a monthly basis or (ii) paying the rates in one amount every annum.

The paying of rates on a monthly basis will be the preferred method unless the owner has selected the annual method of payment via a written request before 31 May preceding a financial year.

- (i) When paying on a monthly basis the amount due shall be paid not later than the date as specified on the monthly accounts. The cycle of such payments will start on the first day of July (the start of a financial year) and extend to the 30th of June the following year.
- (ii) When paying a once-off amount (the full rates for that financial year), then that amount shall be paid in full not later than the date as specified on the account. Please note that additional annual payments may be triggered during a financial year by a supplementary valuation on said property.

Changes to the preferred method of payment must be exercised by the owner before 31 May of a financial year and once set the method of payment will not be changed during a current financial year.

9.2 Rates in arrears for longer than 90 days

When an owner's rates account is in arrears for longer than 90 (ninety) days, then the Municipality may initiate the proceedings as described in Sections 28 or 29 of the MPRA.

A notice to this effect will be forwarded to the tenant, occupier or agent providing the required legal information regarding their payments to the owner, which are to be redirected to the Municipality so as to cover the arrear rates account.

A notice will be forwarded to the owner in question to indicate the legal proceedings and the actions that the Municipality has initiated.

10. QUANTIFICATION OF COSTS TO MUNICIPALITY AND BENEFITS TO COMMUNITY

The cost to the Municipality and benefit to the local community in terms of exemptions, rebates, reductions and exclusions referred to in the MPRA and rates on properties that must be phased-in in terms of the MPRA will be reflected in the Municipality's budget.

11. OBJECTION AND APPEALS

- (a) Any person may lodge an objection to a valuation subject to Section 50 of the MPRA but within the period stated in the notice referred to in Sections 49(1)(a) and 78(5)(b) of the MPRA.
- (b) An appeal to an appeal board against a decision of a municipal valuer in terms of section 51 of the MPRA may be lodged in the prescribed manner subject to Section

54 of the MPRA. The appeal must be lodged (as a guideline), within a period of 30 days nonetheless, as set out in Section 54(2) of the MPRA.

- (c) The administrative actions or processes as described in the MPRA for the handling of objections or appeals will be the basis that the Municipality will follow.
- (d) The lodging of an objection or appeal: -
 - (i) In terms of Section 50 of the MPRA does not defer liability for the payment of rates in terms of this Policy; or
 - (ii) In terms of Section 54 of the MPRA does not defer liability for the payment of rates in terms of this Policy.

12 CLEARANCE CERTIFICATES

All monies collected by the Municipality, specifically in respect of Special Rating Areas and any estimated amounts in terms of Section 118(1A) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) (the Systems Act), or Section 89 of the Insolvency Act, 1936 (Act 24 of 1936), are for the purpose of Section 118 of the Systems Act, deemed to be due and must be paid in order to facilitate the transfer of immovable property:

- (i) All amounts that are due must be paid in full prior to the issuing of any clearance certificate in terms of Section 118, of the Systems Act; and
- (ii) No interest shall be paid by the Municipality to the registered seller in respect of these payments which are deemed to be due.
- (iii) The Municipality will not be responsible for the apportionment of rates and/or services due or paid in respect of any rates clearances and registrations.
- (iv) The Municipality may issue only one clearance certificate for properties deemed to be in an adjoined state as per paragraph 7.9 of this Policy.

13 ADJUSTMENTS OF RATES PRIOR TO SUPPLEMENTARY VALUATION

13.1 If the owner of a property which has been subdivided or consolidated after the last general valuation wishes to sell the consolidated erf, or one or more of the erven which have been subdivided from the parent erf, as the case may be, applies to the Municipality for a clearance certificate in terms of Section 118 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000), and if the Municipality has not yet included such valuation of the relevant property(ies) in a supplementary valuation:-

- (a) the Municipal Valuer shall conduct a valuation of the relevant property(ies) for purposes of a supplementary valuation; and
- (b) the valuation shall be submitted to the CFO for approval of the levying of rates on such property(ies) in accordance with such valuation, with effect from the date on which the relevant subdivision or consolidation (as the case may be) was registered in the Deeds Office.

- 13.2 Any valuations performed in terms of paragraph 13 shall be included in the next supplementary valuation process as per the provisions in Sub-sections 78 (1) to (5) of the MPRA.

14. GENERAL

14.1 Applications for Relief Measures

- (a) All applications, required in terms of this Policy for a specific relief measure must be submitted to the Municipality by 30 November of each year, which date precedes the financial year in which the rate is to be levied. If the relief measure applied for is granted, the relief measure will apply for the full financial year. All successful applicants are bound by all the criteria as per paragraph 14.1 of this Policy.
- (b) Any applicant who, during a financial year, for the first time, meets all the criteria other than (a) above, may apply to receive the relief measure initiated from the month following the approval by the Municipality of said application for the remainder of that financial year, thereafter all the criteria as per paragraph (a) above will apply to applications for subsequent financial years.
- (c) Late applications received after 30 November of a given year may be considered by the Municipality, in which case, if the relief measure applied for is granted, a *pro rata* rebate for the remainder of the next (new) financial year may be applicable.
- (d) Persons who have submitted false information and/or false affidavits will have the relief measure withdrawn with effect from the commencement of the financial year in question.
- (e) All applications for relief measures will require the applicant's municipal accounts to have been paid up to date or the conclusion of a suitable arrangement with the Municipality as provided for in the Municipality's Credit Control and Debt Collection By-Law and Policy.
- (f) The Municipality reserves the right to request current and/or previous audited financial statements or to inspect all properties before or after implementing the applicable rate and to revoke or amend any decision made prior to such investigation or financial review.
- (g) The Municipality reserves the right to recover any rates and/or relief measures from owners of properties after the status of said properties have changed.
- (h) The Municipality reserves the right to request any additional information as may be deemed necessary.

14.2 Regular policy review processes

This Policy will be reviewed on an annual basis to ensure that it complies with the Municipality's strategic objectives and with legislation.

14.3 Language Interpretation

The legal interpretation of the English version of this Policy only shall prevail above all other language translations of this Policy.

14.4 Severance

If any provision of this Policy is struck down as invalid by a court of law, such provision shall be severed from this Policy, and shall not affect the validity of the remaining provisions.

15 BY-LAWS

The principles contained in this Policy will be reflected in the By-Law as promulgated and adjusted by Council from time to time.

16 CONTACT OF RESPONSIBLE OFFICE

The contact details for Property Rates enquiries:

E-mail Address: enquiries.navrae@ Stellenbosch.gov.za

Telephone Numbers: See Municipal Account for relevant telephone numbers

Postal Address: PO Box 17, Stellenbosch, 7601

17 SHORT TITLE

This Policy is the Rates Policy of the Stellenbosch Municipality.

18. CATEGORY AND REBATE CODES

18.1 Category Codes

The Formulae Codes (Derived from the Categories listed in paragraph 6.1 of this Policy) as listed below will be used in the Valuation Roll and supporting letters or Notices to reflect by association the applicable Category (as indicated in the "Category (of property)" column).

Council shall on an annual basis during the budget approval cycle set the cent amount in the Rand values (being the Category Tariff) for each of the Categories in the table below.

Category (of property)	Category Code	Formulae Code	Supporting references
Residential	RES	RES	MPRA Sections 8(2)(a); 17(1)(h) and the Policy paragraph 8.2.1
	RES	RESA	Adjoining residential; the Policy paragraph 7.9
	RES	RESM	MPRA Section 17(1)(h) i.e. ONLY Policy paragraph 8.2.1 (i)
	RES	RESIF	Municipal Owned: Informal settlements, 100% exclusion will apply
	RES	REL1	MPRA Section 17(1)(i) – the official residence; the Policy paragraph 8.5
	RES	MUNRR	Municipal Owned: Rented or Leased property; the Policy paragraph 7.6
	RES	MUNR	Municipal Owned: Section 8(2)(h) and the Policy paragraph 7.6
	RES	LRBR	Land Reform Beneficiary: MPRA Section 17(1)(g); the Policy paragraph 7.8
Industrial	IND	IND	MPRA Section 8(2)(b); Policy Definitions for "industrial"
Business	BUS	BUS	MPRA Section 8(2)(c); Policy Definitions for "business"
	BUS	RELIG	MPRA Section 17(1)(i) – the place of worship; the Policy paragraph 8.5
	BUS	MUNBR	Municipal Owned: Rented or Leased property; the Policy paragraph 7.6
	BUS	MUNB	Municipal Owned: Section 8(2)(h) and the Policy paragraph 7.6
	BUS	POS	Public Open Spaces
	BUS	PROS	Private Open Spaces
Agricultural	AGR	AGR	MPRA Section 8(2)(d); (Not considered to be a vacant property); the Policy paragraph 7.5
	AGR	PROT	Protected Areas: MPRA Section 17(1)(e); the Policy paragraph 8.4

Definitions

- 1.1. In this Policy, unless the context otherwise indicates, a word or expression to which a meaning has been assigned in the Act has the same meaning as in the Act, and
 - 1.1.1. **“Act”** means the Municipal Finance Management Act, No. 56 of 2003;
 - 1.1.2. **“Bid”** means a written offer in a prescribed or stipulated form in response to an invitation by the municipality for the provision of goods, services or construction works through price quotations, advertised competitive bidding process or proposals;
 - 1.1.3. **“Bidder”** means any person submitting a competitive bid or a quotation;
 - 1.1.4. **“Closing time”** means the time and day specified in the bid documents for the receipt of bids;
 - 1.1.5. **“Competitive bidding process”** means a competitive bidding process referred to in paragraph 12(1)(b)(i) of this Policy;
 - 1.1.6. **“Competitive bid”** means a bid in terms of a competitive bidding process;
 - 1.1.7. **“Contract”** means the agreement which is concluded when the municipality accepts, in writing, a competitive bid or quotation submitted by a supplier;
 - 1.1.8. **“Contract manager”** means an official of the Municipality who is responsible for the planning for the planning and execution of a transaction involving the procurement of goods, services or works;
 - 1.1.9. **“Contractor”** means any person or entity whose competitive bid or quotation has been accepted by the municipality;
 - 1.1.10. **“Delegated authority”** means any person or committee delegated with authority by the municipality in terms of the provisions of the Municipal Finance Management Act;
 - 1.1.11. **“Department”** means a section within a specific directorate in terms of the municipal organigram;
 - 1.1.12. **“Electronic format”** means a bid submitted by a bidder via email or made available through a cloud storage services;
 - 1.1.13. **“Emergency dispensation”** means emergency as referred to in paragraph 36(1)(a)(i) of this policy under which one or more of the following is in existence that warrants an emergency dispensation;
 - (a) The possibility of human injury or death;
 - (b) The prevalence of human suffering or deprivation of rights;
 - (c) The possibility of damage to property, or suffering and death of livestock and animals;
 - (d) The interruption of essential services, including transportation and communication facilities or support services critical to the effective functioning of the municipality as a whole;

- (e) The possibility of serious damage occurring to the natural environment;
 - (f) The possibility that failure to take necessary action may result in the municipality not being able to render an essential community service;
 - (g) The possibility that the security of the state could be compromised; or
 - (h) The prevailing situation, or imminent danger, should be of such a scale and nature that it could not readily be alleviated by interim measures, in order to allow time for the formal procurement process. Emergency dispensation shall not be granted in respect of circumstances other than those contemplated above.
- 1.1.14. **“Final award”**, in relation to bids or quotations submitted for a contract, means the final decision on which a bid or quote is accepted;
- 1.1.15. **“Formal written price quotation”** means quotations referred to in paragraph 12 (1) (d) of this Policy;
- 1.1.16. **“Green procurement”** means the procurement of environmentally friendly products and services;
- 1.1.17. **“in the service of the state”** means to be –
- (a) A member of –
 - (i) Any municipal council;
 - (ii) Any provincial legislature; or
 - (iii) The National Assembly or the National Council of Provinces;
 - (b) A member of the board of directors of any municipal entity;
 - (c) An official of any municipality or municipal entity;
 - (d) An employee of any national or provincial department, national or provincial public entity or constitutional institution within the meaning of the public Finance Management Act, 1999 (Act No.1 of 1999);
 - (e) A member of the accounting authority of any national or provincial public entity; or
 - (f) An employee of Parliament or a provincial legislature;
- 1.1.18. **“Long term contract”** means a contract with a duration period exceeding one year and does not have the same meaning as contracts of a long term nature referred to in paragraph 22(1)(b)(vi) of this policy;
- 1.1.19. **“Long term nature contract”** means a contract as defined by section 33(1) of the Municipal Finance Management Act imposing financial obligations on the Municipality beyond the first three years covered in the approved annual budget;
- 1.1.20. **“List of accredited prospective providers”** means the list of accredited prospective providers in terms of Central Supplier Database (CSD) of National

Treasury;

- 1.1.21. **“Other applicable legislation”** means any other legislation applicable to municipal supply chain management, including but not limited to the following –
 - (a) The Preferential Procurement Policy Framework Act;
 - (b) The Broad-Based Black Economic Empowerment Act; ~~and~~
 - (c) The Construction Industry Development Board Act;
 - (d) The Local Government: Municipal Systems Act;
 - (e) The Competition Act; and
 - (f) The Promotion of Administrative Justice Act.
- 1.1.22. **“Policy”** means the Supply Chain Management Policy of Stellenbosch municipality as amended from time to time;
- 1.1.23. **“Parent municipality”** has the meaning assigned to it in section 1 of the Municipal Systems Act;
- 1.1.24. **“Petty Cash”**, means the procurement of goods and services through the supply chain management requisition and order system by means of one verbal and written quotation below a determined amount in relation with the Petty Cash Policy;
- 1.1.25. **“Single source”**: refers to when the competition exist in the market, but from a selected few suppliers due to technical capabilities and abilities comply with the requirements of the municipality;
- 1.1.26. **“Sole Supplier:”** It refers in instances where there is no competition and only one service provider exist in the market, with sole distribution rights and/or patent rights or manufacturer;
- 1.1.27. **“Strip and quote:”** When the repairs and maintenance on our machines, vehicles are done by one supplier and/or strip-and-quote, for example a municipal vehicle that needs repairs enters the workshop, however to do the repairs, the vehicle has to be send to a supplier that determines what repairs should be done;
- 1.1.28. **“Supplier database”** means the list of accredited prospective providers which the municipality or municipal entity must keep in terms of the Regulation 14 of the Supply Chain Management Regulations;
- 1.1.29. **“Treasury guidelines”** means any guidelines on supply chain management issued by the Minister in terms of section 168 of the Act;
- 1.1.30. **“Trust”** means the agreement through which the property of one person is made over or bequeathed to a trustee to administer such property for the benefit of another person;
- 1.1.31. **“Trustee”** means any person, including the founder of a trust, to whom property is bequeathed in order for such property to be administered for the benefit of another person;
- 1.1.32. **“The Act”** means the Local Government: Municipal Finance Management Act,

2003 (Act No. 56 of 2003);

- 1.1.33. **“The Regulations”** means the Local Government: Municipal Finance Management Act, 2003, Municipal Supply Chain Management Regulations published by Government Notice 868 of 2005;
- 1.1.34. **“The PPPF Regulations”** means Preferential Procurement Policy Regulations, 2017 Published under Government Notice R32 in Government Gazette 40553 of 20 January 2017; and
- 1.1.35. **“Written or verbal quotations”** means quotations referred to in paragraph 12(1)(b) & (c) of this Policy.

CHAPTER 1**IMPLEMENTATION OF SUPPLY CHAIN MANAGEMENT POLICY****2. SUPPLY CHAIN MANAGEMENT POLICY**

- (1) All officials and other role players in the supply chain management system of the Stellenbosch Municipality must implement this Policy in a way that –
 - (a) Gives effect to –
 - (i) Section 217 of the Constitution; and
 - (ii) Part 1 of Chapter 11 and other applicable provisions of the Act;
 - (b) Is fair, equitable, transparent, competitive and cost effective;
 - (c) Complies with –
 - (i) The Regulations; and
 - (ii) Any minimum norms and standards that may be prescribed in terms of section 168 of the Act;
 - (d) Is consistent with other applicable legislation;
 - (e) Does not undermine the objective for uniformity in supply chain management systems between organs of state in all spheres; and
 - (f) Is consistent with national economic policy concerning the promotion of investments and doing business with the public sector.
- (2) The municipal entity must, in addition to complying with subparagraph (1), apply this Policy, to the extent determined by the parent municipality, in a way that is consistent with the supply chain management policy of the parent municipality.
- (3) This Policy applies when the Stellenbosch Municipality –
 - (a) Procures goods or services;
 - (b) Disposes goods no longer needed;
 - (c) Selects contractors to provide assistance in the provision of municipal services otherwise than in circumstances where Chapter 8 of the Municipal Systems Act applies; or
 - (d) Selects external mechanisms referred to in section 80(1)(b) of the Municipal Systems Act for the provision of municipal services in circumstances contemplated in section 83 of that Act.

- (4) This Policy, except where provided otherwise, does not apply in respect of the procurement of goods and services contemplated in section 110(2) of the Act, including –
 - (a) Water from the Department of Water Affairs or a public entity, another municipality or a municipal entity; and
 - (b) Electricity from Eskom or another public entity, another municipality or a municipal entity.

3. AMENDMENT OF THE SUPPLY CHAIN MANAGEMENT POLICY

- (1) The Accounting Officer must –
 - (a) At least annually review the implementation of this Policy; and
 - (b) When the Accounting Officer considers it necessary, submit proposals for the amendment of this Policy to the Stellenbosch Council.
- (2) If the Accounting Officer submits proposed amendments to the Stellenbosch Council that differs from the model policy issued by the National Treasury, the Accounting Officer must –
 - (a) Ensure that such proposed amendments comply with the Regulations; and
 - (b) Report any deviation from the model policy to the National Treasury and the relevant provincial treasury.
- (3) When amending this supply chain management policy, the need for uniformity in supply chain practices, procedures and forms between organs of state in all spheres, particularly to promote accessibility of supply chain management systems for small businesses must be taken into account.

4. DELEGATION OF SUPPLY CHAIN MANAGEMENT POWERS AND DUTIES

- (1) The Stellenbosch Council hereby delegates all powers and duties to the Accounting Officer, which are necessary to enable the Accounting Officer –
 - (a) To discharge the supply chain management responsibilities conferred on Accounting Officers in terms of –
 - (i) Chapter 8 or 10 of the Act; and
 - (ii) This Policy;
 - (b) To maximize administrative and operational efficiency in the implementation

of this Policy;

- (c) To enforce reasonable cost-effective measures for the prevention of fraud, corruption, favouritism and unfair and irregular practices in the implementation of this Policy; and
 - (d) To comply with his or her responsibilities in terms of section 115 and other applicable provisions of the Act.
- (2) Sections 79 and 106 of the Act apply to the sub-delegation of powers and duties delegated to an Accounting Officer in terms of subparagraph (1).
 - (3) The Accounting Officer may not sub-delegate any supply chain management powers or duties to a person who is not an official of Stellenbosch Municipality or to a committee, which is not exclusively composed of officials of the Stellenbosch Municipality.
 - (4) This paragraph may not be read as permitting an official, to whom the power to make final awards has been delegated, to make a final award in a competitive bidding process otherwise than through the committee system provided for in paragraph 26 of this Policy.

5. SUB-DELEGATIONS

- (1) The Accounting Officer may in terms of section 79 or 106 of the Act sub-delegate any supply chain management powers and duties, including those delegated to the Accounting Officer in terms of this Policy, but any such sub-delegation must be consistent with subparagraph (2) of this paragraph and paragraph 4 of this Policy.
- (2) The power to make a final award –
 - (a) Above R 10 million (VAT included) may not be sub-delegated by the Accounting Officer;
 - (b) Above R 200,000 (VAT included), but not exceeding R 10 million (VAT included), may be sub-delegated but only to –
 - (i) The Bid Adjudication Committee of which the Chief Financial Officer or a senior manager is a member; or
 - (ii) Accounting Officer of the municipality, after due consideration of all facts was done; and
 - (c) Below R 200,000 (VAT included) to be disposed by delegated official according approved delegatory power and functions issued by Accounting Officer.

- (3) The Bid Adjudication Committee to which the power to make final awards has been sub-delegated in accordance with subparagraph (2) must within five days of the end of each month submit to the official referred to in subparagraph (4) a written report containing particulars of each final award made by such official or committee during that month, including –
 - (a) The amount of the award;
 - (b) The name of the person to whom the award was made; and
 - (c) The reason why the award was made to that person.
- (4) A written report referred to in subparagraph (3) must be submitted –
 - (a) To the Accounting Officer, in the case of an award by –
 - (i) The Bid Adjudication Committee of which the Chief Financial Officer or a senior manager is a member; or
 - (b) To the Chief Financial Officer or the senior manager responsible for the relevant bid, in the case of an award by –
 - (i) The Bid Adjudication Committee of which the Chief Financial Officer or a senior manager is not a member.
- (5) Subparagraphs (3) and (4) of this policy do not apply to procurements out of petty cash.
- (6) This paragraph may not be interpreted as permitting an official to whom the power to make final awards has been sub-delegated, to make a final award in a competitive bidding process otherwise than through the committee system provided for in paragraph 26 of this Policy.
- (7) No supply chain management decision-making powers may be delegated to an advisor or consultant.

6. OVERSIGHT ROLE OF COUNCIL

- (1) The Stellenbosch Council reserves its right to maintain oversight over the implementation of this Policy.
- (2) For the purposes of such oversight the Accounting Officer must –
 - (i) Within 30 days of the end of each financial year, submit a report on the implementation of this Policy and the supply chain management policy of any municipal entity under the sole or shared control of the municipality, to the council of the municipality; and
 - (ii) Whenever there are serious and material problems in the implementation of

this Policy, immediately submit a report to Council.

- (3) The Accounting Officer must, within 10 days of the end of each quarter, submit a report on the implementation of the supply chain management policy to the Executive Mayor.
- (4) The reports must be made public in accordance with section 21A of the Municipal Systems Act.

7. SUPPLY CHAIN MANAGEMENT UNIT

- (1) A supply chain management unit is hereby established to implement this Policy.
- (2) The supply chain management unit operates under the direct supervision of the Chief Financial Officer or an official to whom this duty has been delegated in terms of section 82 of the Act.

8. TRAINING OF SUPPLY CHAIN MANAGEMENT OFFICIALS

- (1) The training of officials involved in implementing this Policy should be in accordance with any Treasury guidelines on supply chain management training.

CHAPTER 2

SUPPLY CHAIN MANAGEMENT SYSTEM

9. FORMAT OF SUPPLY CHAIN MANAGEMENT SYSTEM

- (1) This Policy provides systems for –
 - (i) Demand management;
 - (ii) Acquisition management;
 - (iii) Logistics management;
 - (iv) Disposal management;
 - (v) Risk management; and
 - (vi) Performance management.

PART 1: DEMAND MANAGEMENT

10. SYSTEM OF DEMAND MANAGEMENT

- (1) The Accounting Officer must establish and implement an appropriate demand management system in order to ensure that the resources required by Stellenbosch Municipality support its operational commitments and its strategic goals outlined in the Integrated Development Plan.
- (2) The demand management system must –
 - (a) Include timely planning and management processes to ensure that all goods and services required by Stellenbosch Municipality are quantified, budgeted for and timely and effectively delivered at the right locations and at the critical delivery dates, and are of the appropriate quality and quantity at a fair cost;
 - (b) Take into account any benefits of economies of scale that may be derived in the case of acquisitions of a repetitive nature;
 - (c) Provide for the compilation of the required specifications to ensure that its needs are met; and
 - (d) To undertake appropriate industry analysis and research to ensure that innovations and technological benefits are maximized.
- (3) Green procurement must be incorporated as far as reasonably possible for all specifications of goods, services and construction works.
- (4) In the development of bid specifications, innovative mechanisms should be explored to render the service or product more resource and energy efficient.

PART 2: ACQUISITION MANAGEMENT

11. SYSTEM OF ACQUISITION MANAGEMENT

- (1) The Accounting Officer must implement the system of acquisition management set out in this Part in order to ensure –
 - (a) That goods and services are procured by Stellenbosch Municipality in accordance with authorised processes only;
 - (b) That expenditure on goods and services is incurred in terms of an approved budget in terms of section 15 of the Act;
 - (c) That the threshold values for the different procurement processes are complied with;
 - (d) That bid documentation, evaluation and adjudication criteria, and general conditions of a contract, are in accordance with any applicable legislation; and
 - (e) That any Treasury guidelines on acquisition management are properly taken into account.
- (2) Unless otherwise indicated in the bid documents, the Municipality shall not be liable for any expenses incurred by prospective bidders in the preparation and / or submission of a bid or quotation.

12. RANGE OF PROCUREMENT PROCESSES

- (1) Goods and / or services may only be procured by way of –
 - (a) Cash purchases administered by the Expenditure Division up to a transaction value as defined in Council's Petty Cash Policy;
 - (b) Petty cash purchases through one verbal request and or verbal /written quotation for the procurement of goods through the supply chain management requisition and order system of a transaction value between R 0 and R 2,000 (VAT included);
 - (c) Written or verbal quotations for procurement of goods and/or services of a transaction value between R 2,000 and R 10,000 (VAT included);
 - (d) Formal written quotations for procurement of goods and/or services of a transaction value between R 10,000 and R 200,000;
 - (e) Procurements above a transaction value of R 200,000 (VAT included); and
 - (f) The procurement of long-term contracts.
- (2) The Accounting Officer may, in writing-
 - (a) Lower, but not increase, the different threshold values specified in subparagraph (1); or
 - (b) Direct that –

- (i) Written quotations are obtained for any specific procurement of a transaction value lower than R 2,000;
 - (ii) Written price quotations be obtained for any specific procurement of a transaction value lower than R 10,000; or
 - (iii) A competitive bidding process be followed for any specific procurement of a transaction value higher than R 200,000.
- (3) Goods or services may not deliberately be split into parts or items of a lesser value merely to avoid complying with the requirements of the policy. When determining transaction values, a requirement for goods or services consisting of different parts or items must as far as possible be treated and dealt with as a single transaction.

13. GENERAL PRECONDITIONS FOR CONSIDERATION OF WRITTEN QUOTATIONS OR BIDS

- (1) A written quotation or bid may not be considered unless the provider who submitted the quotation or bid –
- (a) Has furnished that provider's –
 - (i) Full name;
 - (ii) Identification number or company or other registration number; and
 - (iii) Tax reference number and VAT registration number, if any;
 - (b) Has authorised the Stellenbosch Municipality to obtain a tax clearance by means of the Tax Compliance Status Pin from, from the South African Revenue Services and Central Supplier Database Number (CSD) that the provider's tax matters are in order; and
 - (c) Has indicated –
 - (i) Whether he or she is in the service of the state, or has been in the service of the state in the previous twelve months;
 - (ii) If the provider is not a natural person, whether any of its directors, managers, principal shareholders or stakeholder is in the service of the state, or has been in the service of the state in the previous twelve months; or
 - (iii) Whether a spouse, child or parent of the provider or of a director, manager, shareholder or stakeholder referred to in sub-paragraph (ii) is in the service of the state, or has been in the service of the state in the previous twelve months.

14. LISTS OF ACCREDITED PROSPECTIVE PROVIDERS

- (1) The Accounting Officer must –
- (a) Keep a list of accredited prospective providers of goods and services that must be used for the procurement requirements through written or verbal quotations and formal written price quotations;
 - (b) At least once a year through newspapers commonly circulating locally, the

website and any other appropriate ways, invite prospective providers of goods or services to apply for evaluation and listing as accredited prospective providers;

- (c) Specify the listing criteria for accredited prospective providers as stated within the database registration forms; and
 - (d) Disallow the listing of any prospective provider whose name appears on the National Treasury's database as a person prohibited from doing business with the public sector.
- (2) The list must be updated at least quarterly to include any additional prospective providers and any new commodities or types of services.
Prospective providers must be allowed to submit applications for listing at any time.
 - (3) The list must be compiled per commodity and per type of service.

15. PETTY CASH PURCHASES

- (1) The Accounting Officer must establish the conditions for the procurement of goods by means of cash purchases and petty cash purchases referred to in paragraph 12(1)(a) and (b) of this Policy, which must include conditions –
 - (a) determining the terms on which a manager may delegate responsibility for cash purchases and petty cash purchases to an official reporting to the manager;
 - (b) limiting the maximum number of cash purchases and petty cash purchases or the maximum amounts per month for each manager;
 - (c) excluding any types of expenditure from cash purchases and petty cash purchases, where this is considered necessary;
 - (d) requiring a monthly reconciliation report from each manager to the
Chief Financial Officer, including –
 - (i) the total amount of cash purchases and petty cash purchases for that month; and
 - (ii) receipts and appropriate documents for each purchase; and
 - (e) any other conditions determined by the Chief Financial Officer.
- (2) Cash purchases will be dealt with in terms of the Petty Cash Policy of Council.
- (3) Petty cash purchases will be dealt with in terms of the Supply Chain Management Policy of Council.

16. WRITTEN OR VERBAL QUOTATIONS

- (1) The conditions for the procurement of goods or services through written or verbal quotations are as follows –

Quotations must be obtained from at least three different providers preferably

from, but not limited to, providers whose names appear on the list of accredited prospective providers of the Stellenbosch Municipality, provided that if quotations are obtained from providers who are not listed, such providers must meet the listing criteria set out in paragraph 13 of this Policy;

- (b) Where no suitable providers are available from the list of accredited prospective providers, quotations may be obtained from other possible providers;
- (c) To the extent feasible, providers must be requested to submit such quotations in writing;
- (d) If it is not possible to obtain at least three quotations, the reasons must be recorded and reported quarterly to the Accounting Officer or another official designated by the Accounting Officer;
- (e) The Accounting Officer must record the names of the potential providers requested to provide such quotations with their quoted prices; and
- (f) If a quotation was submitted verbally, the order may be placed only against written confirmation by the selected provider.

17. FORMAL WRITTEN PRICE QUOTATIONS

- (1) The conditions for the procurement of goods or services through formal written price quotations are as follows: -
 - (a) Quotations must be obtained in writing from at least three different providers whose names appear on the list of accredited prospective providers of the Stellenbosch Municipality. Quotations may be obtained from providers who are not listed, provided that such providers meet the listing criteria set out in paragraph 13 of this Policy;
 - (b) Where no suitable providers are available from the list of accredited prospective providers, quotations may be obtained from other possible providers not registered on the municipal supplier database;
 - (c) If it is not possible to obtain at least three quotations, the reasons must be recorded and approved by the Chief Financial Officer or an official designated by the Chief Financial Officer;
 - (d) The Accounting Officer must record the names of the potential providers and their written quotations; and
 - (e) For the obtaining of quotations for services, Stellenbosch Municipality will utilize their notice boards.
- (2) A designated official referred to in subparagraph (1)(c) must within three days of the end of each month report to the Chief Financial Officer on any approvals given during that month by that official in terms of that subparagraph.

18. PROCEDURES FOR PROCURING GOODS OR SERVICES THROUGH WRITTEN OR VERBAL QUOTATIONS AND FORMAL WRITTEN PRICE QUOTATIONS

- (1) The procedure for the procurement of goods or services through written or verbal quotations or formal written price quotations is as follows –
 - (a) When using the list of accredited prospective providers the Accounting Officer must promote on-going competition amongst providers by inviting providers to submit quotations on a rotation basis;
 - (b) Where no suitable providers are available from the list of accredited prospective providers, quotations may be obtained from other possible providers not registered on the municipal supplier database;
 - i. All requirements in excess of R 30,000 (VAT included) that are to be procured by means of formal written price quotations must, in addition to the requirements of paragraph 17, be advertised for at least seven days on the website and an official notice board of the Stellenbosch Municipality;
 - ii. The municipality will follow a preferred bidding process in the event that the market did not respond in terms of the sourcing of quotations on the website for seven (7) days and if no responsive bids was received.
 - (c) Offers received must be evaluated on a comparative basis taking into account unconditional discounts;
 - (d) The Accounting Officer or Chief Financial Officer must on a monthly basis be notified in writing of all written or verbal quotations and formal written price quotations accepted by an official acting in terms of a sub-delegation;
 - (e) Offers below R 30,000 (VAT included) must be awarded based on compliance to specification and conditions of contract, ability and capability to deliver the goods and services and lowest price;
 - (f) Acceptable offers, which are subject to the preference points system (PPPFA and associated regulations), must be awarded to the bidder who scored the highest points; and
 - (g) Stellenbosch Municipality will maintain a proper record keeping system.

19. COMPETITIVE BIDS

- (1) Goods or services above a transaction value of R 200,000 (VAT included) and long term contracts may only be procured through a competitive bidding process, subject to paragraph 11(2) of this Policy.
- (2) No requirement for goods or services above an estimated transaction value of R 200,000 (VAT included), may deliberately be split into parts or items of lesser value merely for the sake of procuring the goods or services otherwise than through a competitive bidding process.

20. PROCESS FOR COMPETITIVE BIDDING

- (1) The procedures for the following stages of a competitive bidding process are as follows:-

- (a) Compilation of bidding documentation as detailed in paragraph 21;
- (b) Public invitation of bids as detailed in paragraph 22;
- (c) Site meetings or briefing sessions as detailed in paragraph 22;
- (d) Handling of bids submitted in response to public invitation as detailed in paragraph 23;
- (e) Evaluation of bids as detailed in paragraph 28;
- (f) Award of contracts as detailed in paragraph 29;
- (g) Administration of contracts;
- (h) After approval of a bid, the Accounting Officer and the bidder must enter into a written agreement;
- (i) Proper record keeping; and
- (j) Original / legal copies of written contracts agreements must be kept in a secure place for reference purposes.

21. BID DOCUMENTATION FOR COMPETITIVE BIDS

- (1) The criteria to which bid documentation for a competitive bidding process must comply, must –
 - (a) Take into account –
 - (i) The general conditions of contract and any special conditions of contract, if specified;
 - (ii) Any Treasury guidelines on bid documentation; and
 - (iii) The requirements of the Construction Industry Development Board, in the case of a bid relating to construction, upgrading or refurbishment of buildings or infrastructure;
 - (b) Include the preference points system to be used, goals as contemplated in the Preferential Procurement Regulations and evaluation and adjudication criteria, including any criteria required by other applicable legislation;
 - (c) Compel bidders to declare any conflict of interest they may have in the transaction for which the bid is submitted;
 - (d) If the value of the transaction is expected to exceed R 10 million (VAT included), require bidders to furnish –
 - (i) If the bidder is required by law to prepare annual financial statements (AFS) for auditing, their audited AFS –
 - (aa) For the past three years; or

- (bb) Since their establishment if established during the past three years;
- (ii) A certificate signed by the bidder certifying that the bidder has no undisputed commitments for municipal services towards a municipality or other service provider in respect of which payment is overdue for more than 30 days;
- (iii) Particulars of any contracts awarded to the bidder by an organ of state during the past five years, including particulars of any material non-compliance or dispute concerning the execution of such contract;
- (iv) A statement indicating whether any portion of the goods or services are expected to be sourced from outside the Republic, and if so, what portion and whether any portion of payment from the municipality or municipal entity is expected to be transferred out of the Republic; and
- (e) Stipulate that disputes must be settled by means of mutual consultation, mediation, adjudication (with or without legal representation), or, when unsuccessful, in a South African court of law;
- (f) The period for which bids are to remain valid and binding must be indicated in the bid documents; and
- (g) A provision for the termination of the contract in the case of non- or under-performance and objections and complaints must be included in the bid documentation.

22. PUBLIC INVITATION FOR COMPETITIVE BIDS

- (1) The procedure for the invitation of competitive bids is as follows –
 - (a) Any invitation to prospective providers to submit bids must be by means of a public advertisement in a newspaper commonly circulating locally, the website of the Stellenbosch Municipality or any other appropriate ways (which may include an advertisement in the Government Tender Bulletin); and
 - (b) The information contained in a public advertisement, must at least include
 - (i) The closure date for the submission of bids, which may not be less than 30 days in the case of transactions over R10 million (VAT included), or which are of a long term nature, or 14 days in any other case, from the date on which the advertisement is placed in a newspaper, subject to subparagraph (2) of this policy; and
 - (ii) A statement that bids may only be submitted on the bid documentation provided by the Stellenbosch Municipality
 - (iii) Contact details for further enquiries.
- (2) The Accounting Officer may determine a closure date for the submission of bids which is less than the 30 or 14 days requirement, but only if such shorter period can be justified on the grounds of urgency or emergency or any exceptional case where it is impractical or impossible to follow the official procurement process.

- (3) Bids submitted must be sealed and must clearly indicate the bid number on the outside of the envelope for which the bid is being submitted.
- (4) Where bids are requested by the Municipality in electronic format, such bids must be supplemented by sealed hard copies.
- (5) The municipality may require bidders to submit section(s) of their bid in electronic format, but only after the bid closing date. If the electronic copy differs from the original hard copy, the original hard copy will be binding.

23. PROCEDURE FOR HANDLING, OPENING AND RECORDING OF COMPETITIVE BIDS AND FORMAL WRITTEN PRICE QUOTATIONS IN EXCESS OF R 30,000

- (1) The procedures for the handling, opening and recording of bids are as follows
 - (a) Bids –
 - (i) Must be opened only in public;
 - (ii) must be opened at the same time and as soon as possible after the period for the submission of bids has expired; and
 - (iii) Received after the closing time should not be considered and returned unopened immediately; and
 - (b) Any bidder or member of the public has the right to request that the names of the bidders who submitted bids in time must be read out and, if practical, also each bidder's total bidding price;
 - (c) No information, except the provisions in subparagraph (b), relating to the bid should be disclosed to bidders or other persons until the successful bidder is notified of the award;
 - (d) The Accounting Officer must –
 - (i) Record in a register all bids received in time;
 - (ii) Make the register available for public inspection; and
 - (iii) Publish the entries in the register and the bid results on the website.
 - (e) The bidder shall choose a *domicilium citandi et executandi* in the Republic and unless notice of the change thereof has duly been given in writing, it shall be the address stated in the bid.
 - (f) Opening of bid procedures –
 - (i) At the specified closing time on the closing date the applicable bid box shall be closed;
 - (ii) The bid box shall be opened in public as soon as practical after the closing time by at least two officials from the Supply Chain Management Unit and the Security Officer on duty;
 - (iii) It is the responsibility of the bidder to ensure that their bid is placed in the correct bid box. The municipality will not on its own initiative

redirect any bid if it is placed in an incorrect bid box before the closing time of submissions.

- (iv) Immediately after the opening of the bid box all bids shall be opened in public;
 - (v) At the official opening of the bids, the bids shall in all cases be read out in terms of the name of the bidder and, if practical, the amount of the bid;
 - (vi) As soon as a bid or technical proposal has been opened the bid / proposal shall be stamped with the official stamps, and endorsed with the opening officials' signatures;
 - (viii) The name of the bidder, and where possible, the bid sum shall be recorded in a bid opening record kept for that purpose; and The responsible officials who opened the bidding documentation received shall forthwith place their signatures on the bid opening record (register) and shall ensure that the bid opening record, indicating at least the bid price of each bidder, the BBBEE status level contribution of each bidder and where applicable the local content percentages of the goods offered are made available for public inspection and are published on the municipality's website.
- (g) Site Inspections / clarification meeting –
- (i) Site inspections / clarifications meeting, where applicable, will be compulsory.
 - (ii) If site inspections / clarification meeting are to be held, full details must be included in the bid notice. Service providers that are late for the commencement of the site inspection/clarification meeting will be disqualified.
 - (iii) Minutes of all site inspection/clarification meetings must be kept for record purposes
 - (iv) Any proposed Addendums to the advertised bid document must be tabled at the Bid Specification Committee Meeting for consideration and approval.
- (h) Bid validity periods
- (i) The validity period is calculated from the bid closure date and bids shall remain in force and binding for a period of six (6) months as indicated in the invitation to bid and the bid documents, subject to any other applicable legislation and instructions from the National Treasury for specific types of procurement.
 - (ii) The period of validity may be extended by the SCM Department, provided that the original bid validity period has not expired and that all bidders are given an opportunity to extend such period.
 - (iii) Any such extension shall be agreed to by a bidder in writing.
- Bidders who fail to respond to such a request before the validity of

their bid expires, or who decline such a request shall not be considered further in the bid evaluation process.

- (iv) All bidders who indicated the acceptance of the extension of the bid validity period, bids will be considered for evaluation purposes.
- (v) If the validity of all bids expired without it being awarded within the bid validity period, including any extensions thereof allowable in terms of applicable legislation, the bid must be cancelled and published in the same media in which the original bid invitation appeared.
- (vi) All bidders must be notified in writing of the cancellation of a bid.

(i) Samples

- (i) The call for samples should be limited to where samples are called for in the bid documents, samples (marked with the bid and item number as well as the bidder's name and address) shall be delivered separately (to the bid) to the addressee mentioned in the bid documents by no later than the closing time of the bid.
- (ii) Bids may not be included in parcels containing samples.
- (iii) If samples are not submitted as required in the bid documents, then the part of the bid for which no sample is provided shall be declared invalid.
- (iv) Samples shall be supplied by a bidder at his / her own expense and risk. Stellenbosch Municipality shall not be obliged to pay for such samples or compensate for the loss thereof, unless otherwise specified in the bid documents, and shall reserve the right to return such samples or to dispose of them at its own discretion.
- (v) If a bid is accepted for the supply of goods according to a sample submitted by the bidder, that sample will become the contract sample. All goods/materials supplied shall comply in all respects to that contract sample.

(j) Bid Sum

- (i) A bid will not necessarily be invalidated if the amount in words and the amount in figures do not correspond, in which case the amount in words shall be read out at the bid opening.

24. NEGOTIATIONS WITH PREFERRED BIDDERS

- (1) The Accounting Officer may negotiate the final terms of a contract with bidders identified through a competitive bidding process as preferred bidders, provided that such negotiation –
 - (a) Does not allow any preferred bidder a second or unfair opportunity;
 - (b) Is not to the detriment of any other bidder; and

- (c) Does not lead to a higher price than the bid as submitted.
- (2) Minutes of such negotiations must be kept for record purposes.

25. TWO-STAGE BIDDING PROCESS

- (1) A two-stage bidding process is allowed for –
 - (a) Large complex projects;
 - (b) Projects where it may be undesirable to prepare complete detailed technical specifications; or
 - (c) Long term projects with a duration period exceeding three years.
- (2) In the first stage technical proposals on conceptual design or performance specifications should be invited, subject to technical as well as commercial clarifications and adjustments.
- (3) In the second stage final technical proposals and priced bids should be invited.

26. COMMITTEE SYSTEM FOR COMPETITIVE BIDS

- (1) A committee system for competitive bids is hereby established, consisting of the following committees for each procurement or cluster of procurements as the Accounting Officer may determine as issued within the directive and stating the terms of reference of each bid committee –
 - (a) A Bid Specifications Committee;
 - (b) A Bid Evaluation Committee; and
 - (c) A Bid Adjudication Committee.
- (2) The Accounting Officer appoints the members of each committee, taking into account section 117 of the Act; and
- (3) The committee system must be consistent with –
 - (a) Paragraph 27, 28 and 29 of this Policy;
 - (b) Any other applicable legislation; and
 - (c) The Accounting Officer may apply the committee system to formal written price quotations.

27. BID SPECIFICATIONS COMMITTEES

- (1) A Bid Specifications Committee must compile the specifications for each procurement of goods or services by the Stellenbosch Municipality.
- (2) Specifications –

- (a) Must be drafted in an unbiased manner to allow all potential suppliers to offer their goods or services;
 - (b) Must take account of any accepted standards such as those issued by Standards South Africa, the International Standards Organisation, or an authority accredited or recognised by the South African National Accreditation System with which the equipment or material or workmanship should comply;
 - (c) Must, where possible, be described in terms of performance required rather than in terms of descriptive characteristics for design;
 - (d) May not create trade barriers in contract requirements in the forms of specifications, plans, drawings, designs, testing and test methods, packaging, marking or labelling of conformity certification;
 - (e) May not make reference to any particular trade mark, name, patent, design, type, specific origin or producer unless there is no other sufficiently precise or intelligible way of describing the characteristics of the work, in which case such reference must be accompanied by the word “equivalent”;
 - (f) Must indicate the preference points system set out in the Preferential Procurement Regulations 2017;
 - (g) Must be approved by the Accounting Officer prior to publication of the invitation for bids in terms of paragraph 22 of this Policy; and
 - (h) The Accounting Officer may sub-delegate the requirements in sub-paragraph 2(g) above to the Chairperson of the Bid Specifications Committee.
- (3) A Bid Specifications Committee must be composed of one or more officials of the Stellenbosch Municipality preferably the manager responsible for the function involved, and may, when appropriate, include external and / or internal specialist advisors.
 - (4) No person, advisor or corporate entity involved with the Bid Specifications Committee, or director of such a corporate entity, may bid for any resulting contracts.

28. BID EVALUATION COMMITTEES

- (1) A Bid Evaluation Committee must –
 - (a) Evaluate bids in accordance with –
 - (i) The specifications for a specific procurement; and
 - (ii) The points system set out in terms of paragraph 27(2)(f);
 - (b) Evaluate each bidder’s ability to execute the contract;
 - (c) Check in respect of the recommended bidder whether municipal rates and taxes and municipal service charges are not in arrears; and

- (d) Submit to the adjudication committee a report and recommendations regarding the award of the bid or any other related matter.
- (2) A Bid Evaluation Committee must as far as possible be composed of
 - (a) Officials from departments requiring the goods or services; and
 - (b) At least one supply chain management practitioner of the Stellenbosch Municipality.
- (3) The relevant user department's official shall carry out a preliminary evaluation of all valid bids received and shall submit a bid evaluation report to the Bid Evaluation Committee for consideration.
- (4) Any evaluation of a bid shall consider the bids received and shall note for inclusion in the evaluation report, a bidder –
 - (a) Whose bid does not comply with the provisions of paragraph 38 of this Policy;
 - (b) Whose bid does not comply with the provisions of paragraph 13 of this Policy;
 - (c) Whose bid is not in compliance with the specification;
 - (d) Whose bid is not in compliance with the terms and conditions of the bid documentation;
 - (e) Who is not registered and verified on the municipality's supplier database within seven days of the closing time for bids. In this regard bid documentation shall state that the responsibility for registration and verification rests solely with the bidder;
 - (f) Who, in the case of construction works acquisitions, does not comply with the requirements of the Construction Industry Development Board Act regarding registration of contractors. Verification of compliance with this requirement shall be by means of Stellenbosch Municipality's Supplier Database;
 - (g) Whose tax status are non-compliant and cannot be verified with the South African Revenue Services (SARS) certifying that the taxes of the bidder are in order or that suitable arrangements have been made with SARS; and
 - (h) Who fails to comply with any applicable Bargaining Council agreement.
- (5) Bids shall be evaluated according to the following as applicable –
 - (i) Bid price (corrected if applicable and brought to a comparative level where necessary);
 - (ii) The unit rates and prices;
 - (iii) The bidder's ability to fulfil its obligations in terms of the bid documents;
 - (iv) Any qualifications to the bid;
 - (v) The bid ranking obtained in respect of Preferential Procurement as required by Stellenbosch Municipality's Preferential Procurement Policy;

- (vi) The financial standing of the bidder, including its ability to furnish the required institutional guarantee, where applicable; and
- (vii) Any other criteria specified in the bid documents.
- (6) The Bid Evaluation Committee shall check in respect of the recommended bidder whether municipal rates and taxes and municipal service charges are not in arrears.
- (7) The evaluation of bids on an equitable basis may be considered during the evaluation process.
- (8) Additional information or clarification of bids may be called for if required.
- (9) Alternative bids may be considered, provided that a bid free of qualifications and strictly in accordance with the bid documents is also submitted. Stellenbosch Municipality shall not be bound to consider alternative bids. The alternative offer is to be submitted with the main offer together with a schedule that compares the specifications of the bid documents with the alternative offer.
- (10) If a bidder requests in writing, after the closing of bids, that his/her bid be withdrawn, then such a request may be considered and reported in the bid evaluation report.
- (11) If, after bids have been brought to a comparative level, two or more scores equal total adjudication points, regulation 11(5) of the Preferential Procurement Regulations of 2017 will apply.
- (12) If two or more bids are equal in all respects after applying regulation 11(5), the Bid Evaluation Committee shall draw lots to decide on the recommendation for award.
- (13) All disclosures of conflict of interest shall be considered by the Bid Evaluation Committee and if the conflict of interest is of a material nature, this shall be reported to the Bid Adjudication Committee.
- (14) The relevant User Department in consultation with the SCM Unit may, before the bid is considered by the Bid Evaluation Committee, provide a reasonable opportunity to a bidder who made an innocent error and / or omission in their bid document, to correct the innocent error and / or omission, provided that such opportunity will not unduly prejudice any of the other bidders.
- (15) In an event as described in sub-paragraph 14, bidders shall be afforded a minimum of two (2) working days up to a maximum of five (5) working days (in consultation with the relevant User Department or the Manager: Supply Chain Management) from time of notification to correct such innocent errors and / or omissions. If no response is received from such bidders at the deadline the bid may be deemed to be non-responsive.

29. BID ADJUDICATION COMMITTEES

- (1) A Bid Adjudication Committee must –
 - (a) Consider the report and recommendations of the Bid Evaluation Committee;

and

- (b) Either –
 - (i) Depending on its delegations, make a final award or a recommendation to the Accounting Officer to make the final award; or
 - (ii) Make another recommendation to the Accounting Officer how to proceed with the relevant procurement.
- (2) A Bid Adjudication Committee must consist of at least four senior managers of the Stellenbosch Municipality, which must include –
 - (a) The Chief Financial Officer or, if the Chief Financial Officer is not available, another manager in the budget and treasury office reporting directly to the Chief Financial Officer and designated by the Chief Financial Officer;
 - (b) At least one senior supply chain management practitioner who is an official of the Stellenbosch Municipality; and
 - (c) A technical expert in the relevant field who is an official, if such an expert exists.
- (3) The Accounting Officer must appoint the chairperson of the committee. If the chairperson is absent from a meeting, the members of the committee who are present must elect one of them to preside at the meeting.
- (4) Neither a member of a Bid Evaluation Committee, nor an advisor or person assisting the evaluation committee, may be a member of a Bid Adjudication Committee.
 - (a) If the Bid Adjudication Committee decides to award a bid other than the one recommended by the Bid Evaluation Committee, the Bid Adjudication Committee must prior to awarding the bid–
 - (i) Check in respect of the preferred bidder whether that bidder's municipal rates and taxes and municipal service charges are not in arrears; and
 - (ii) Notify the Accounting Officer.
 - (b) The Accounting Officer may –
 - (i) After due consideration of the reasons for the deviation, ratify or reject the decision of the Bid Adjudication Committee referred to in paragraph (a); and
 - (ii) If the decision of the Bid Adjudication Committee is rejected, refer the decision of the adjudication committee back to that committee for reconsideration.
- (6) The Accounting Officer may at any stage of a bidding process, refer any recommendation made by the evaluation committee or the adjudication committee back to that committee for reconsideration of the recommendation.

- (7) The Accounting Officer must comply with section 114 of the Act within 10 working days

30. PROCUREMENT OF BANKING SERVICES

- (1) A contract for banking services –
 - (a) Must be procured through competitive bids;
 - (b) Must be consistent with section 7 or 85 of the Act; and
 - (c) May not be for a period of more than five years at a time.
- (2) The process for procuring a contract for banking services must commence at least nine months before the end of an existing contract.
- (3) The closure date for the submission of bids may not be less than 60 days from the date on which the advertisement is placed in a newspaper in terms of paragraph 22(1). Bids must be restricted to banks registered in terms of the Banks Act, 1990 (Act No. 94 of 1990).

31. PROCUREMENT OF IT RELATED GOODS OR SERVICES

- (1) The Accounting Officer may request the State Information Technology Agency (SITA) to assist with the acquisition of IT related goods or services through a competitive bidding process.
- (2) Both parties must enter into a written agreement to regulate the services rendered by and the payments to be made to SITA.
- (3) The Accounting Officer must notify SITA together with a motivation of the IT needs if –
 - (a) The transaction value of IT related goods or services required in any financial year will exceed R 50 million (VAT included); or
 - (b) The transaction value of a contract to be procured whether for one or more years exceeds R 50 million (VAT included).
- (4) If SITA's comments on the submission and the Stellenbosch Municipality disagree with such comments, the comments and the reasons for rejecting or not following such comments must be submitted to the council, the National

Treasury, the relevant provincial treasury and the Auditor General.

32. PROCUREMENT OF GOODS AND SERVICES UNDER CONTRACTS SECURED BY OTHER ORGANS OF STATE

- (1) The Accounting Officer may procure goods or services under a contract secured by another organ of state, but only if –

- (a) The contract has been secured by that other organ of state by means of a competitive bidding process applicable to that organ of state;
 - (b) There is no reason to believe that such contract was not validly procured;
 - (c) There are demonstrable discounts or benefits to do so; and
 - (d) That other organ of state and the provider has consented to such procurement in writing.
- (2) Subparagraphs (1)(c) and (d) do not apply if –
 - (a) A municipal entity procures goods or services through a contract secured by its parent municipality; or
 - (b) A municipality procures goods or services through a contract secured by a municipal entity of which it is the parent municipality.
- (3) If paragraph (1) is complied with, Stellenbosch Municipality must request at least the following documents from the relevant organ of state and service provider as referred to under subparagraph (1)(d) –
 - (a) A written declaration confirming –
 - (i) That the organ of state followed a competitive bidding process applicable to it;
 - (ii) That the organ of state has no reason to believe that the contract was not validly procured by itself;
 - (iii) That the organ of state evaluated the bid in terms of price and BBBEE and if applicable, in terms of functionality or quality, and concluded that the bid(s) that were accepted were in all aspects the best compliant and respective bid(s); and
 - (iv) That the organ of state gives formal written permission to Stellenbosch Municipality to procure goods and / or services from the approved bid(s) as accepted by the organ of state;
 - (b) Agenda and minutes of the organ of state's Bid Evaluation Committee at which the specific bid was evaluated;
 - (c) Agenda and minutes of the organ of state's Bid Adjudication Committee at which the bid was awarded or the approval of the Accounting Officer of that organ of state who approved the bid;
 - (d) A copy of the successful bidder(s) bid submissions; and
 - (e) Written consent from the service provider.
- (4) If Stellenbosch Municipality should enter into a contract secured by other organs of state, it shall enter into a contract with the successful bidder(s) on the same terms and conditions as accepted by the relevant organ of state.
- (5) Contracts entered into by Stellenbosch Municipality under paragraph (4) shall not be deemed to be a deviation from the official procurement processes.
- (6) The Accounting Officer shall report to Council on a monthly basis all contracts entered into in terms of paragraph (4) above.

33. PROCUREMENT OF GOODS NECESSITATING SPECIAL SAFETY ARRANGEMENTS

- (1) The acquisition and storage of goods in bulk (other than water), which necessitate special safety arrangements, including gasses and fuel, should be avoided wherever possible.
- (2) Where the storage of goods in bulk is justified, such justification must be based on sound reasons, including the total cost of ownership, cost advantages and environmental impact and must be approved by the Accounting Officer.

34. PROUDLY SA CAMPAIGN

- (1) Stellenbosch Municipality supports the Proudly SA Campaign to the extent that, all things being equal, preference is given to procuring local goods and services from –
 - (a) Firstly: Suppliers and businesses within the municipality or district;
 - (b) Secondly: Suppliers and businesses within the relevant province; and
 - (c) Thirdly: Suppliers and businesses within the Republic.

35. APPOINTMENT OF CONSULTANTS

- (1) The Accounting Officer may procure consulting services provided that any Treasury guidelines in respect of consulting services, Construction Industry Development Board guidelines and Council's Cost-Containment Policy in respect of services related to the built environment and construction works are taken into account when such procurements are made.
- (2) Consultancy services must be procured through competitive bids if –
 - (a) The value of the contract exceeds R 200,000 (VAT included); or
 - (b) The duration period of the contract exceeds one year.
- (3) In addition to any requirements prescribed by this policy for competitive bids, bidders must furnish particulars of –
 - (a) All consultancy services provided to an organ of state in the last five years; and
 - (b) Any similar consultancy services provided to an organ of state in the last five years.
- (4) The Accounting Officer must ensure that copyright in any document produced, and the patent rights or ownership in any plant, machinery, thing, system or process designed or devised, by a consultant in the course of the consultancy service is vested in the Stellenbosch Municipality.
- (5) Where the estimated value of fees is less than R 200,000 and the duration of the appointment is less than one year, any National Treasury and, where applicable, Construction Industry Development Board guidelines in respect of consulting

services are taken into account.

36. DEVIATION FROM AND RATIFICATION OF MINOR BREACHES OF PROCUREMENT PROCESSES

- (1) The Accounting Officer may –
 - (a) Dispense with the official procurement processes established by this Policy and to procure any required goods or services through any convenient process, which may include direct negotiations, but only –
 - (i) In an emergency (as per definition);
 - (ii) If such goods or services are produced or available from a single source or sole provider only (as per definition);
 - (iii) For the acquisition of special works of art or historical objects where specifications are difficult to compile;
 - (iv) Acquisition of animals for zoos and/or nature and game reserves; or
 - (v) In any other exceptional case where it is impractical or impossible to follow the official procurement processes; and
 - (b) Ratify any minor breaches of the procurement processes by an official or committee acting in terms of delegated powers or duties, which are purely of a technical nature.
- (2) The Accounting Officer must record the reasons for any deviations in terms of subparagraphs (1)(a) and (b) of this policy and report them to the next meeting of the council and include as a note to the annual financial statements.
- (3) Subparagraph (2) does not apply to the procurement of goods and services contemplated in paragraph 11(2) of this policy.

37. UNSOLICITED BIDS

- (1) In accordance with section 113 of the Act there is no obligation to consider unsolicited bids received outside a normal bidding process.
- (2) The Accounting Officer may decide in terms of section 113(2) of the Act to consider an unsolicited bid, only if –
 - (a) The product or service offered in terms of the bid is a demonstrably or proven unique innovative concept;
 - (b) The product or service will be exceptionally beneficial to, or have exceptional cost advantages;
 - (c) The person who made the bid is the sole provider of the product or service; and
 - (d) The reasons for not going through the normal bidding processes are found to

be sound by the Accounting Officer.

- (3) If the Accounting Officer decides to consider an unsolicited bid that complies with subparagraph (2) of this policy, the decision must be made public in accordance with section 21A of the Municipal Systems Act, together with –
 - (a) Reasons as to why the bid should not be open to other competitors;
 - (b) An explanation of the potential benefits if the unsolicited bid were accepted; and
 - (c) An invitation to the public or other potential suppliers to submit their comments within 30 days of the notice.
- (4) The Accounting Officer must submit all written comments received pursuant to subparagraph (3), including any responses from the unsolicited bidder, to the National Treasury and the relevant provincial treasury for comment.
- (5) The adjudication committee must consider the unsolicited bid and may award the bid or make a recommendation to the Accounting Officer, depending on its delegations.
- (6) A meeting of the adjudication committee to consider an unsolicited bid must be open to the public.
- (7) When considering the matter, the adjudication committee must take into account –
 - (a) Any comments submitted by the public; and
 - (b) Any written comments and recommendations of the National Treasury or the relevant provincial treasury.
- (8) If any recommendations of the National Treasury or provincial treasury are rejected or not followed, the Accounting Officer must submit to the Auditor General, the relevant provincial treasury and the National Treasury the reasons for rejecting or not following those recommendations.
- (9) Such submission must be made within seven days after the decision on the award of the unsolicited bid is taken, but no contract committing the

Stellenbosch Municipality to the bid may be entered into or signed within 30 days of the submission.

38. COMBATING OF ABUSE OF SUPPLY CHAIN MANAGEMENT SYSTEM

- (1) The Accounting Officer must –
 - (a) Take all reasonable steps to prevent abuse of the supply chain management system;
 - (b) Investigate any allegations against an official or other role player of fraud, corruption, favouritism, unfair or irregular practices or failure to comply with this Policy, and when justified –
 - (i) Take appropriate steps against such official or other role player; or

- (ii) Report any alleged criminal conduct to the South African Police Service;
- (c) Check the National Treasury's database prior to awarding any contract to ensure that no recommended bidder, or any of its directors, is listed as a person prohibited from doing business with the public sector;
- (d) Reject any bid from a bidder –
 - (i) If any municipal rates and taxes or municipal service charges owed by that bidder or any of its directors to the Stellenbosch Municipality or to any other municipality or municipal entity, are in arrears for more than three months; or
 - (ii) Who during the last five years has failed to perform satisfactorily on a previous contract with the Stellenbosch Municipality or any other organ of state after written notice was given to that bidder that performance was unsatisfactory;
- (e) Reject a recommendation for the award of a contract if the recommended bidder or any of its directors, or trust or its trustees has committed a corrupt or fraudulent act in competing for the particular contract;
- (f) Cancel a contract awarded to a person if –
 - (i) The person committed any corrupt or fraudulent act during the bidding process or the execution of the contract; or
 - (ii) An official or other role player committed any corrupt or fraudulent act during the bidding process or the execution of the contract that benefited that person; and
- (g) Reject the bid of any bidder if that bidder or any of its directors –
 - (i) Has abused the supply chain management system of the Stellenbosch Municipality or has committed any improper conduct in relation to such system;
 - (ii) Has been convicted for fraud or corruption during the past five years;
 - (iii) Has wilfully neglected, reneged on or failed to comply with any government, municipal or other public sector contract during the past five years; or
 - (iv) Has been listed in the Register for Tender Defaulters in terms of section 29 of the Prevention and Combating of Corrupt Activities Act (No 12 of 2004).
- (2) The Accounting Officer must inform the National Treasury and relevant provincial treasury in writing of any actions taken in terms of subparagraphs (1)(b)(ii), (e) or (f) of this Policy.

PART 3: LOGISTICS, DISPOSAL, RISK AND PERFORMANCE MANAGEMENT

39. LOGISTICS MANAGEMENT

- (1) The Accounting Officer must establish and implement an effective system of logistics management, which must include –
 - (a) The monitoring of spending patterns on types or classes of goods and services incorporating, where practical, the coding of items to ensure that each item has a unique number;
 - (b) The setting of inventory levels that includes minimum and maximum levels and lead times wherever goods are placed in stock;
 - (c) The placing of manual or electronic orders for all acquisitions other than those from petty cash;
 - (d) Before payment is approved, certification by the responsible officer that the goods and services are received or rendered on time and is in accordance with the order, the general conditions of contract and specifications where applicable and that the price charged is as quoted in terms of a contract;
 - (e) Appropriate standards of internal control and warehouse management to ensure that goods placed in stores are secure and only used for the purpose for which they were purchased;
 - (f) Regular checking to ensure that all assets including official vehicles are properly managed, appropriately maintained and only used for official purposes; and
 - (g) Monitoring and review of the supply vendor performance to ensure compliance with specifications and contract conditions for particular goods or services.

40. DISPOSAL MANAGEMENT

- (1) A supply chain management policy must provide for an effective system of disposal management for the disposal or letting of assets, including unserviceable, redundant or obsolete assets, subject to sections 14 and 90 of the Act
- (2) A supply chain management policy must specify the ways in which assets may be disposed of, including –
 - (a) Transferring the asset to another organ of state in terms of a provision of the Act enabling the transfer of assets;
 - (b) Transferring the asset to another organ of state at market related value or, when appropriate, free of charge;
 - (c) Selling the asset; and
 - (d) Destroying the asset.
- (3) The Accounting Officer must ensure that –

- (a) Immovable property is sold only at market related prices except when the public interest or the plight of the poor demands otherwise;
 - (b) Movable assets are sold either by way of written price quotations, a competitive bidding process, auction or at market related prices, whichever is the most advantageous, except when the public interest or the plight of the poor demands otherwise;
 - (c) Firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;
 - (d) Immovable property is let at market related rates except when the public interest or the plight of the poor demands otherwise;
 - (e) All fees, charges, rates, tariffs, scales of fees or other charges relating to the letting of immovable property are annually reviewed;
 - (f) Where assets are traded in for other assets, the highest possible trade-in price is negotiated; and
 - (g) In the case of the free disposal of computer equipment, the provincial department of education is first approached to indicate within 30 days whether any of the local schools are interested in the equipment.
- (4) All matters relating to the alienation of movable and immovable assets shall be dealt with in terms of Council's Asset Transfer Policy and the Asset Transfer Regulations, 2008 and Council's adopted Immovable Assets Policy.
 - (5) Notwithstanding the provisions of paragraph 3 hereof, the following statutory powers of Stellenbosch Council in respect of the alienation of immovable property, are reserved to be exercised by Council –
 - (a) To decide on reasonable grounds that an asset is not needed to provide the minimum level of basic municipal services; and
 - (b) To considered the fair market value of the asset and the economic and community value to be received in exchange for the asset, and
 - (6) Notwithstanding sub-paragraph (3)(b) & (g) above, the Accounting Officer must determine the most advantageous way for the disposal or letting of movable capital assets, i.e. written price quotations, competitive bidding, or auction, except when public interest or the plight of the poor demands otherwise.
 - (7) The Accounting Officer is hereby authorized to dispose of movable capital assets:
 - (8)
 - (a) Up to a value of R 2 000 000.00
 - (b) Up to a value of R1 000 000.00 (CFO and BAC Members)

41. RISK MANAGEMENT

- (1) The criteria for an effective risk management strategy within supply chain management system, should include the identification, consideration and avoidance of potential risks.

- (2) Risk management should include –
 - (a) The identification of risks on a case-by-case basis;
 - (b) The allocation of risks to the party best suited to manage such risks;
 - (c) Acceptance of the cost of the risk where the cost of transferring the risk is greater than that of retaining it;
 - (d) The management of risks in a pro-active manner and the provision of adequate cover for residual risks; and
 - (e) The assignment of relative risks to the contracting parties through clear and unambiguous contract documentation.

42. PERFORMANCE MANAGEMENT

- (1) The Accounting Officer must establish and implement an internal monitoring system in order to determine, on the basis of a retrospective analysis, whether the authorised supply chain management processes were followed and whether the objectives of this Policy were achieved. The retrospective analysis will link to the regulatory reports and submissions on the implementation of the supply chain management policy to the delegated authorities as prescribed in terms of supply chain management regulations and the delegation system of council, as amended from time to time.

PART 4: OTHER MATTERS

43. PROHIBITION ON AWARDS TO PERSONS WHOSE TAX MATTERS ARE NOT IN ORDER

- (1) No award above R 30,000 (including VAT) may be made in terms of this Policy to a person whose tax matters have not been declared by the South African Revenue Service to be in order.
- (2) Before making an award to a person the Accounting Officer must first check with SARS whether that person's tax matters are in order.
- (3) If SARS does not respond within 7 days such person's tax matters may for purposes of subparagraph (1) be presumed to be in order.
- (4) Where the recommended bidder is not tax compliant on the date of award, the bidder should be notified of the non-compliant status and be requested to submit written proof of tax compliance from SARS within 7 working days from the date of award. The proof of tax compliance submitted by the bidder must be verified by the Municipality. The Municipality will reject a bid submitted by the bidder if such bidder fails to provide proof of tax compliance within the timeframe as set out in this sub-paragraph.

44. PROHIBITION ON AWARDS TO PERSONS IN THE SERVICE OF THE STATE

- (1) Irrespective of the procurement process followed, no award may be made to a person in terms of this Policy –
 - (a) Who is in the service of the state;
 - (b) If that person is not a natural person, of which any director, manager, principal shareholder or stakeholder is a person in the service of the state; or
 - (c) A person who is an advisor or consultant contracted with the Stellenbosch Municipality.

45. AWARDS TO CLOSE FAMILY MEMBERS OF PERSONS IN THE SERVICE OF THE STATE

- (1) The Accounting Officer must ensure that the notes to the annual financial statements disclose particulars of any award of more than R 2,000 to a person who is a spouse, child or parent of a person in the service of the state, or has been in the service of the state in the previous twelve months, including –
 - (a) The name of that person;
 - (b) The capacity in which that person is in the service of the state; and
 - (c) The amount of the award.

46. ETHICAL STANDARDS

- (1) A code of ethical standards as set out in [subparagraph (2) / the “National Treasury’s code of conduct for supply chain management practitioners and other role players involved in supply chain management, which also include all other municipal officials not involved in supply chain management system”] is hereby established for municipal officials and other role players in the supply chain management system of the Stellenbosch Municipality in order to promote-
 - (a) Mutual trust and respect; and
 - (b) An environment where business can be conducted with integrity and in a fair and reasonable manner.
- (2) A municipal official or other role player involved in the implementation of this Policy–
 - (a) Must treat all providers and potential providers equitably;
 - (b) May not use his or her position for private gain or to improperly benefit another person;
 - (c) May not accept any reward, gift, favour, hospitality or other benefit directly or indirectly, including to any close family member, partner or associate of that person, of a value more than R 350;
 - (d) Notwithstanding subparagraph (2)(c), must declare to the Accounting Officer details of any reward, gift, favour, hospitality or other benefit promised, offered or granted to that person or to any close family member, partner or associate of that person;
 - (e) Must declare to the Accounting Officer details of any private or business interest which that person, or any close family member, partner or associate, may have in any proposed procurement or disposal process of, or in any award of a contract by, the Stellenbosch Municipality;
 - (f) Must immediately withdraw from participating in any manner whatsoever in a procurement or disposal process or in the award of a contract in which that person, or any close family member, partner or associate, has any private or business interest;
 - (g) Must be scrupulous in his or her use of property belonging to Stellenbosch Municipality;
 - (h) Must assist the Accounting Officer in combating fraud, corruption, favouritism and unfair and irregular practices in the supply chain management system; and
 - (i) Must report to the Accounting Officer any alleged irregular conduct in the supply chain management system which that person may become aware of, including –
 - (i) Any alleged fraud, corruption, favouritism or unfair conduct;
 - (ii) Any alleged contravention of paragraph 47(1) of this Policy; or

- (iii) Any alleged breach of this code of ethical standards.
- (3) Declarations in terms of subparagraphs (2)(d) and (e) –
 - (a) Must be recorded in a register, which the Accounting Officer must keep for this purpose; and
 - (b) By the Accounting Officer must be made to the Executive Mayor of the municipality who must ensure that such declarations are recorded in the register.
- (4) The National Treasury's code of conduct and Schedule 2 of the Systems Act must be adhered to by supply chain management practitioners and other role players involved in supply chain management.
- (5) A breach of the code of ethics must be dealt with as follows –
 - (a) In the case of an employee, in terms of the disciplinary procedures of the Stellenbosch Municipality envisaged in section 67(1)(h) of the Municipal Systems Act;
 - (b) In the case a role player who is not an employee, through other appropriate means in recognition of the severity of the breach;
 - (c) In all cases, financial misconduct must be dealt with in terms of chapter 15 of the Act; and
 - (d) All cases of non-compliance to this Policy should be reported to the Accounting Officer.

47. INDUCEMENTS, REWARDS, GIFTS AND FAVOURS TO MUNICIPALITIES, OFFICIALS AND OTHER ROLE PLAYERS

- (1) No person who is a provider or prospective provider of goods or services, or a recipient or prospective recipient of goods disposed or to be disposed of may either directly or through a representative or intermediary promise, offer or grant –
 - (a) Any inducement or reward to the Stellenbosch Municipality for or in connection with the award of a contract; or
 - (b) Any reward, gift, favour or hospitality to –
 - (i) Any official; or
 - (ii) Any other role player involved in the implementation of this Policy.
- (2) The Accounting Officer must promptly report any alleged contravention of subparagraph (1) to the National Treasury for considering whether the offending person, and any representative or intermediary through which such person is alleged to have acted, should be listed in the National Treasury's database of persons prohibited from doing business with the public sector.

- (3) Subparagraph (1) does not apply to gifts less than R 350 in value.

48. SPONSORSHIPS

- (1) The Accounting Officer must promptly disclose to the National Treasury and the relevant provincial treasury any sponsorship promised, offered or granted, whether directly or through a representative or intermediary, by any person who is –
- (a) A provider or prospective provider of goods or services; or
 - (b) A recipient or prospective recipient of goods disposed or to be disposed.

49. OBJECTIONS AND COMPLAINTS

- (1) Persons aggrieved by decisions or actions taken in the implementation of this supply chain management system, may lodge within 14 days of the decision or action, a written objection or complaint against the decision or action.

50. RESOLUTION OF DISPUTES, OBJECTIONS, COMPLAINTS AND QUERIES

- (1) The Accounting Officer may, if deem so, appoint an independent and impartial person, not directly involved in the supply chain management processes –
- (a) To assist in the resolution of disputes between the Stellenbosch Municipality and other persons regarding –
 - (i) Any decisions or actions taken in the implementation of the supply chain management system; or
 - (ii) Any matter arising from a contract awarded in the course of the supply chain management system; or
 - (b) To deal with objections, complaints or queries regarding any such decisions or actions or any matters arising from such contract.
- (2) The Accounting Officer, or another official designated by the Accounting Officer, is responsible for assisting the appointed person to perform his or her functions effectively.
- (3) The person appointed should, if appointed –
- (a) Strive to resolve promptly all disputes, objections, complaints or queries received; and
 - (b) Submit monthly reports to the Accounting Officer on all disputes, objections, complaints or queries received, attended to or resolved.
- (4) A dispute, objection, complaint or query may be referred to the relevant provincial treasury if –

- (a) The dispute, objection, complaint or query is not resolved within 60 days; or
 - (b) No response is forthcoming within 60 days.
- (5) If the provincial treasury does not or cannot resolve the matter, the dispute, objection, complaint or query may be referred to the National Treasury for resolution.
- (6) This paragraph must not be read as affecting a person's rights to approach a court at any time.

51. CONTRACTS PROVIDING FOR COMPENSATION BASED ON TURNOVER

- (1) If a service provider acts on behalf of a Stellenbosch Municipality to provide any service or act as a collector of fees, service charges or taxes and the compensation payable to the service provider is fixed as an agreed percentage of turnover for the service or the amount collected, the contract between the service provider and the Stellenbosch Municipality must stipulate
- (a) A cap on the compensation payable to the service provider; and
 - (b) That such compensation must be performance based.

52. CONTRACTS HAVING BUDGETARY IMPLICATIONS BEYOND THREE FINANCIAL YEARS

- (1) Stellenbosch Municipality may not enter into any contract that will impose financial obligations beyond the three years covered in the annual budget for that financial year, unless the requirements of Section 33 of the Act have been fully complied with.

53. INCREASE / EXTENSION IN APPROVED CONTRACT SUM / PERIOD

- (1) Any increase and / or extension in the approved contract sum that may become necessary as a result of exceptional circumstances during the contract period must be approved by the appropriate bid committees prior to implementation.
- (2) Contracts may be expanded or varied by not more than 20% of the original contract value for construction related goods, services and/or infrastructure projects and 15% for all other goods and/or services.
- (3) Any expansion or variation in excess of these thresholds as stated under subparagraph (2) must be dealt with in terms of the provisions of section 116(3) of the Act which will be regarded as an amendment of a contract.
- (4) Where community participation has been a part of the project, the community must be advised of the proposed increase and be invited to provide written comment within a minimum period of seven (7) days.

54. RIGHT OF APPEAL

- (1) In terms of Section 62 of the Municipal Systems Act (Act 32 of 2000 as amended), a person whose rights are affected by a decision taken by the Municipality, in terms of a delegated authority, in the implementation of its supply chain management system,

may appeal against that decision by giving written notice of the appeal and reasons to the Municipal Manager within 21 days of the date of the notification of the decision.

- (2) Notification of the decision in terms of sub-paragraph 55(1) of this policy must state that any appeal must be submitted in writing to the Municipal Manager and must at least contain the following information:
 - (a) The reasons and / or grounds for the appeal;
 - (b) The way in which the appellants rights have been affected; and
 - (c) The remedy sought by the appellant.
- (3) No award, where a competitive bidding process was followed, shall be formally implemented until a ruling has been made on any appeal/s received. The Municipal Manager may however grant approval for the implementation of bid awards prior to the conclusion of the appeal process in respect of bids which in his / her opinion are deemed as urgent.
- (4) The Appeal Authority will provide the service provider with copies of the Bid Committee minutes applicable to the specific tender on request within the 21 days period, of the service provider to enable him/her to motivate his/her appeal. Should the service provider request other documentation a PAIA application should be submitted.
- (5) The appeal authority must consider the appeal and confirm, vary or revoke the decision, but no such variation or revocation of a decision may detract from any rights that may have accrued as a result of the decision.

55. NOTIFICATION OF BID DECISIONS

- (1) The successful and unsuccessful bidders shall be notified in writing by the Supply Chain Management once a bid has been accepted.
- (2) The bidders shall, in addition, be advised of the 21 day appeal period in terms of section 62 of the Municipal Systems Act and be notified that no rights will accrue to him / her until the bid is formally accepted in writing.
- (3) Once the 21 day appeal period has lapsed and a decision has been made by the appeal authority, the appellant and the service provider who the tender was initially awarded will be notified in writing of the outcome thereof by the Supply Chain Management.
- (4) Every notification of decision shall be faxed or sent via electronic mail and ordinary mail to the address chosen by the bidder, with a copy of proof of transmission kept for record purposes, or shall be delivered by hand, in which case acknowledgement of receipt must be signed and dated on a copy of such notification to be kept for record purposes.

56. UNSUCCESSFUL BIDDER DEBRIEFING

- (1) The Municipality will offer an unsuccessful bidder debriefing service to unsuccessful bidders upon request.

- (2) During the debriefing unsuccessful bidders will be informed of how their proposal scored against required criteria and obtain comments from the evaluation team on their bid.
- (3) The debriefing should be a positive and constructive experience that explains how bidders can improve future submissions.
- (4) The debriefing is an opportunity for unsuccessful bidders to –
 - (a) Learn more about the procurement and evaluation process in an informal setting;
 - (b) Find out how their proposal scored against the required criteria;
 - (c) Hear the overall comments from the evaluation team on their bid; and
 - (d) Gather information on how future submissions may be improved.
- (5) The debriefing is not part of the Supply Chain complaint or appeal process in terms of paragraph 49 or 55 of this Policy.
- (6) The debriefing is not a legal proceeding and no legal representation is permitted at the debriefing session.
- (7) At the debriefing session the unsuccessful bid is not compared to other bids, nor will information be provided to the unsuccessful bidder about other bids.
- (8) In scheduling a bidder's debriefings session upon the request of the unsuccessful bidder, the municipality must –
 - (a) Confirm the date and time of the debriefing session in writing;
 - (b) Conduct separate debriefings with each unsuccessful bidder;
 - (c) Ensure that proper minutes are kept of each debriefing session; and
 - (d) Retain all correspondence and documentation relevant to the debriefing session as part of the procurement documentation.
- (9) In conducting bidders' debriefings, the municipality may –
 - (a) Provide a general overview of the evaluation process set out in the bid documents;
 - (b) Discuss the strengths and weaknesses of the bidder's submission in relation to the specific evaluation criteria and the bidders evaluated score;
 - (c) Provide suggestions on how the supplier may improve future submissions; and
 - (d) Address specific questions and issues raised by the supplier in relation to their submission.

57. THE SUSPENSION OF SERVICE PROVIDERS FOR POOR PERFORMANCE AND

OTHER BREACHES

- (1) Any failure to fulfil the deliverables in line with the contract or service levels constitutes a material breach or poor performance which will result in the termination of the contract and/or sanctions will be imposed in the form of suspension from the database.
- (2) Such sanctions will have variation in the periods of suspension based on the gravity of the breach.
- (3) The municipality must consider imposing following sanctions, subject to sub-clause (2) above:
 - a) 6 months for non-declarations of relative/spouse within the municipality;
 - b) 12 months for misleading information provided to the municipality; and
 - c) 24 months for certain or above a certain threshold value based.
 - d) All the above will be applicable based on the gravity of the poor performance and will be analysed on a case by case basis co-ordinated by the Contract Management Section.

58. CONDONATION OF POLICY CONTRAVENTIONS

- (1) Council may condone a contravention in terms of this Policy, provided that such contravention is also not a contravention of the Act or the Municipal Supply Chain Management Regulations, 2005
- (2) Any expenditure relating to such condonation by Council in terms of this Policy, will not constitute irregular expenditure as contemplated under section 1 of the Act.
- (3) Contraventions of the Act relating to supply chain management or the Municipal Supply Chain Management Regulations, 2005 must be dealt with in terms of section 32 and section 170 of the Act.

59. GENERAL

The Framework for Infrastructure Delivery and Procurement Management and relevant Circular is attached as Appendix 26. dDepending on the ability of Stellenbosch Municipality to implement the content of the Framework for Infrastructure Delivery and Procurement Management, only those parts that are practically implementable will be applied. The proper assessments will be done accordingly.

60 CANCELTION OF TENDERS

The municipality may, prior to the award of a tender, cancel the tender if:

- 1) Due to changed circumstances, there is no longer a need for the goods or services requested; or

- 2) Funds are no longer available to cover the total envisaged expenditure; or
- 3) No acceptable tenders are received. [If all bids received are rejected, the municipality must review the reasons justifying the rejection and consider making revisions to the specific conditions of contract, design and specifications, scope of the contract, or a combination of these, before inviting new bids]; or
- 4) Due to material irregularities in the tender process. If there are material irregularities that are committed during the tender process such that it renders the entire process unfair, the municipality may cancel the tender process and start afresh.

61 NEGOTIATING A FAIR MARKET RELATED PRICE

- 1) Tender documents must include a condition stating clearly that the award of the tender may be subject to price negotiation with the preferred tenderers.
- 2) The Bid Evaluation Committee may indicate in its report to the Bid Adjudication Committee that based on the evaluation the prices offered are above market related prices after factoring the premium to be paid in terms of the 80/20 or 90/10 preference point system and the findings of an objective market analysis conducted.
- 3) When the Bid Adjudication Committee considers the Evaluation report it must express itself on whether it agrees or disagrees with the Bid Evaluation Committee; if it disagrees, the decision must be recorded and reasons provided as part of the Bid Adjudication Committee report.
- 4) Where the Bid Adjudication Committee agrees with the BEC or on its own assessment is of the view that the tenderer is charging prices higher than the fair market price, the Bid Adjudication Committee may request from the AO/AA or delegated authority to subject the tender to price negotiations with the three preferred tenderers scoring the highest points (from first highest to third highest) before award is made.
- 5) Upon approval to negotiate, the AO/AA or delegated authority must appoint a cross functional negotiation team, with one member appointed to be team leader.
- 6) The negotiating team leader must ensure that all members of the negotiating team are clear on the negotiation strategy and desired outcomes.
- 7) Negotiations must be fair and objective and may not be used to unfairly prejudice the highest scoring / preferred tenderer or any other tenderer.
- 8) Members of the negotiating team must behave ethically at all material times during and after negotiations, may not divulge any information related to negotiations to third parties without prior consent from the accounting officer/ authority.
- 9) All negotiations must be officially closed with a decision communicated and agreed between parties before moving to negotiate with the next preferred tenderer.
- 10) Negotiating;
 - (a) May not allow any preferred tenderer a second or unfair opportunity
 - (b) Is not to the detriment of any other tenderer
 - (c) Does not lead to higher price than the bid as submitted.

62 SHORT TITLE

- (1) This policy is called the Stellenbosch Municipality Supply Chain Management Policy.

STELLENBOSCH MUNICIPALITY

TRAVEL AND SUBSISTENCY POLICY

2023/2024

REVISED

10. AUTHORITY	10
11. TRAVEL AND SUBSISTENCE ALLOWANCE CLAIM FORM	10
12. SHORT TITLE	10

1. OBJECTIVE

It is essential that representatives of this municipality from ~~time to time~~time-to-time travel in order to establish and maintain links and relationships with other municipalities, government bodies, and other parties, institutions and organizations operating in the sphere of local government. It should also be read together with paragraph 2 of MFMA Circular 82 of 30 March 2016 as well as the Cost Containment Regulations as far as it is applicable to travel and subsistence issues.

This policy sets out the basis for the payment of a subsistence travel allowance, hourly rate when applicable and for the purpose of such official traveling.

In the event of any conflict between a provision of this policy and the Cost Containment Policy, the latter policy shall apply.

2. TRAVEL

2.1 *Responsibilities of Representatives who travel on Business of the Municipality*

- a) Every representative who travels on the business of the municipality must comply with this policy in letter and in spirit.
- b) Representatives who travel on the business of the municipality must take note that their actions, conduct and statements must be in the best interest of the municipality, and they must comply with any specific mandates they have been given.

2.2 **Air Travel**

- a) **The Accounting Officer in respect of all officials or political office bearers and the Executive Mayor in respect of the Accounting Officer only approve the purchase of economy class tickets for air travel.**
- b) All flights by representatives of the municipality shall be in economy class, unless another class of travel is specifically authorized by-
 - (i) the executive committee, with regard to Holders of Public Office and the Municipal Manager, or
 - (ii) The Municipal Manager, with regard to officials and applicants for interviews

2.3 International Travel

- a) International travel for any official or political office bearer can only be approved by the municipal council in a meeting open to the public with a supporting vote of the majority of the members of the municipal council present.
- b) The report to council for approval of international travel must include:
 - (i) A motivation why the international travel is seen as critical and fully setting out the anticipated benefit that the municipality will derive from attending the event, meeting or function;
 - (ii) If international travel to the destination or event was previously undertaken, state what benefits if any derived from the previous attendance;
 - (iii) The full cost of the international travel including travel allowances and visas if applicable to be paid; and
 - (iv) The proposed officials and political office bearers, not exceeding three, to travel and why they have been identified.
- c) The following events will not be considered critical to justify international travel whether the full cost of the travel is paid by another institution or not:
 - (i) Attendance of international sporting events;
 - (ii) Attendance of international social events;
 - (iii) Attendance of international party-political events;
 - (iv) The opening of another country's parliament or any other country's government's celebration events.
- d) The accounting officer or delegated official must ensure that requirements for international travel by officials or political office bearers are not inserted into bid documents, whether it is for inspection of products at source of construction/assembly or for any other reason.

2.4 Car Rental, Travel Costs and rates

- a) Only “A” or “B” category vehicles may be rented, unless it is more cost-effective to hire any other category (for example, when the number of representatives involved could justify the hire of a micro-bus).
- b) Car rental must be approved as part of the travel package before the trip is embarked on. A representative who rents a vehicle whilst traveling on the business of the municipality without having received prior authorization will only be reimbursed for the cost of the vehicle rental if proof of expenditure can be produced and the representative can demonstrate that vehicle rental was reasonably but unexpectedly necessitated by the circumstances.
- c) Parking and toll fee – actual cost will be reimbursed via Petty Cash after the submission of proof of expenditure.
- d) If a representative has to utilize his or her personal motor vehicle, he or she will be reimbursed at the tariffs listed below. The distance to which the reimbursement applies, must be the shortest distance via tarred road between the municipality’s offices and the location where the official business is to be transacted.
 - o ~~Councillors~~Councilors:
Will be reimbursed in terms of the Private Column of Department Transport monthly circulars pertaining to Tariffs for the Use of Motor Transport to a maximum of R4.18 per kilometer.
 - o Officials with vehicle/car allowance:
Will be reimbursed at a flat rate of R4.18 per kilometer where motor vehicles are used and R2.00 per kilometer where ~~motor-cycles~~motorcycles are used. Where it is possible to fly to a destination, but the official prefers to drive with his own vehicle, the lower value between kilometer claim and a flight ticket will be used as basis for reimbursement.
 - o Officials who are in receipt of an Essential User Transportation Allowance:
Will be reimbursed according to the official Cost Tables contained in the “Essential User Scheme: Transport Allowance” circulars of the South African Local Government Bargaining Council – Western Cape Division applicable.

- o Officials without a car allowance and Members of a Committee: established in terms of applicable legislation, as per the Rate per kilometer fixed by the Minister of Finance under section 8(1) (b) (ii) and (iii) of the Income Tax Act, 1962. - If the total number of kilometers for which such reimbursement is received exceeds 8 000 in any tax year, reimbursement for the excess kilometers over 8 000 must be taxed for PAYE purposes. If the cost of any one trip exceeds that of an air ticket, the lesser amount will be paid.

The number of employees travelling to conferences or meetings on official duty for the same matter is limited to three (3) employees, unless otherwise approved in advance by the relevant Director, or Accounting Officer in the case of Directors travelling.

- e) Similar to the above, the number of employees travelling by air to other centers to attend an official engagement on the same matter is also limited to three (3) employees, unless otherwise approved in advance by the relevant Director or Accounting Officer in the case of Directors travelling.
- f) For the purpose of this policy, domestic travel shall mean travel within South Africa, and international travel shall mean travel to any country other than South Africa.
- g) The Accounting Officer will when appropriate determine an hourly rate for the different committees serving Council.
- h) Notwithstanding the above provisions, all employees must make use of shuttle services if the cost of such services is below the cost of hiring a vehicle.

3. SUBSISTENCE

3.1 Subsistence Allowance

- a) A representative may claim a daily subsistence allowance as provided in this policy with the understanding that all authorized personal expenses are covered by the subsistence allowance. No further expenses, with the exception of certain business expenses (see below), may be claimed.
- b) In line with SARS guidelines on Subsistence Allowances and Advances, A daily subsistence allowance will only be applicable where-
 - (i) The representative is obliged to spend at least one night away from his or her usual place of residence on business; R493 per day, or

- (ii) The representative will be on official business for a period exceeding 12 consecutive hours per day, without having to spend a night away from his or her usual place of residence; R152 per day.
- c) A representative of the municipality must claim his or her subsistence allowance, as provided in this policy before embarking on any official trip, with the exception where such claim reaches the creditors section at least three days before the trip; in which case such claim must be submitted after the event. Such a claim must be accompanied by details of the conference or workshop or emailed/faxed invitation.
- d) No subsistence allowance will be paid, and no representative will be entitled to a subsistence allowance, if the trip or travel is not related to the official business of the municipality. All travel on business of the municipality must be approved as such before a representative is entitled to a subsistence allowance.
- e) For the purpose of a subsistence allowance, a representative shall mean-
 - (i) mayor or executive mayor, as the case may be
 - (ii) deputy-mayor
 - (iii) speaker
 - (iv) members of the executive committee or mayoral committee, as the case may be
 - (v) other ~~councillors~~councilors specifically authorized to represent the municipality on a particular occasion
 - (vi) municipal manager
 - (vii) directors
 - (viii) any other official/representative specifically authorized to represent the municipality on a particular occasion
 - (ix) any official or councilor who is a member of a recognized professional institution and is granted permission to attend meetings and conferences of such institution.
- f) The subsistence allowance of international travel will be the lesser of:
 - (i) an amount equivalent to the rates as determined by SARS, at the beginning of 1 July every year.

Or

 - (ii) US\$190 per day where the exchange rate of ZAR is more than 5:1 in relation to the currency of the destination country; and

- (iii) US\$100 per day where the exchange rate of ZAR is less than, or equal to 5:1 in relation to the currency of the destination country;

4. ACCOMMODATION

4.1 Accommodation Costs

- a) Overnight accommodation may only be booked where the return trip exceeds 500 ~~kilometres~~kilometers.
- b) Notwithstanding the provision in paragraph 4.1(a) overnight accommodation where the return trip is 500 ~~kilometres~~kilometers or less, may be booked where in the view of the Accounting Officer or delegated official the limitation may be impractical and any of the following instances are present:
 - (i) The road or any other conditions could ~~jeopardise~~jeopardize the safety, health and security of officials or political office bearers;
 - (ii) The trips are to be undertaken over a number of consecutive days provided that a return trip is in excess of 200 ~~kilometres~~kilometers;
 - (iii) The starting time of the meeting or event would require the official or ~~councillor~~councilor to leave his/her place of residence before 05h00 in order to be punctual.
 - (iv) Should the circumstances as stated in paragraph 4.1 (b)(i) – (iii) not be applicable, but an official still prefers to sleep over and not travel every day, the relevant director may approve travelling and accommodation expenses to be paid in the following manner:
 - The cost of one return trip at the applicable rates stated in this policy to be claimed and reimbursed to the official, plus
 - The Daily Allowance referred to in paragraph 3.1 (b) (ii) of this policy for every night the official spends away from the ~~work-place~~workplace to be claimed and paid to the official and
 - Accommodation paid directly to the relevant establishment equal to the monetary value of R4.50 per kilometer, the potential travel claim for every night that officials sleep over instead of travelling. In cases where more than one official was to travel together, the travel claim will be equally divided between the accommodation costs of the respective officials. Any excess accommodation costs must be borne by the official concerned.

- c) Any request for overnight accommodation and/or travel must be motivated on a prescribed form and approved by the municipal manager or delegated official prior to the arrangement for overnight stay or travel.
- d) The actual cost of accommodation will be borne by the municipality, subject to a maximum of 3- to 4-star rating for the accommodation itself in respect of domestic travel. Where such accommodation is available, the rate for a single room will be payable.
- e) If no such accommodation is available, higher rating accommodation can be used subject to the prior approval of the Municipal Manager.
- f) If a representative stays with a relative or friend, no accommodation allowance may be claimed, but the representative may claim a subsistence allowance of R493 per day.
- g) The recoverable cost of accommodation for international travel may not exceed US\$350 per day.
- h) The municipality will at all times firstly consider accommodation where the National Treasury has negotiated discounts for rates as per MFMA circular 97. In the absence of such accommodation or failure to secure space, only then will the municipality consider accommodation outside the "NT negotiated accommodation".
- i) Notwithstanding the provisions of 4 (1) (c), the procurement of all accommodation services will be subjected to the municipality's SCM policy and preferential procurement policy. The written approval in terms of paragraph 4.1(c) must be filed with the relevant supply chain documents for the accommodation booking.

5 CONFERENCES, MEETINGS AND STUDY TOURS

5.1 Applications for conferences, meetings and conferences, both within or outside South African borders, must be done on the prescribed form. Applications for conferences, study tours and similar events must be accompanied by a motivation that takes the under mentioned aspects into account:

- a) The official's or political office bearer's roles and responsibilities and the anticipated benefits of the conference or event;
- b) Whether the conference or event addresses relevant concerns of the institution;
- c) The appropriate number of officials or political office bearers, not exceeding three, attending the conference or event;
- d) The availability of funds to meet expenses related to the conference or event.

- 5.2** The accounting officer may consider appropriate benchmark costs with other professional bodies or regulatory bodies prior to granting approval for an official to attend a conference or event within and without the borders of South Africa.
- a) Such benchmark costs may not exceed an amount as determined from time to time by the National Treasury through a notice.
 - b) The costs exclude costs related to travel, accommodation and related expenses, but include conference or event registration expenses and any other expenses in relation to the conference or event.
 - c) When considering costs for conferences or events these may not include items such as laptops, tablets or other similar tokens that are built into the price of such conferences or events.
 - d) The accounting officer must grant the approval for officials and in the case of political office bearers and the accounting officer, the mayor for attendance of conferences and events.
- 5.3** The accounting officer must ensure that meetings and planning sessions that entail the use of municipal funds are, as far as may be practically possible, held in-house.
- a) Municipal or provincial office facilities must be unitized for conference, meeting, strategic planning sessions, *inter alia* where an appropriate venue exists within the municipal jurisdiction.
- 5.4** The municipality must, where applicable, take advantage of early registration discounts by granting the required approvals to attend the conference, event or study tour, in advance.

6. TRAVEL AND SUBSISTANCE ALLOWANCES FOR APPLICANTS INVITED FOR INTERVIEWS

- (a) If an invited for an interview has to utilize his or her personal motor vehicle he or she will be reimbursed at the same rates as stipulated in paragraph 2.4 (d) of this policy. The actual cost of air travel will be reimbursed subject to the prior approval of the Municipal Manager or the Director Corporate Services.
- (b) Candidates residing outside the boundaries of Stellenbosch municipality will be reimbursed for reasonable costs of travelling as provided for in this policy. Where the distance to travel and interview circumstances is such that a candidate requires accommodation, suitable accommodation may be pre-authorized by the relevant director and the candidate may be reimbursed.
- (c) If a candidate is made an offer of appointment and declines the offer, no reimbursement of costs will be made.

- (d) Where necessary the User Department in consultation with Human Resources will make suitable travelling and accommodation arrangements and provide budget for the costs.

7. AUTHORISATION

7.1 For purposes of implementing this policy

- a) Only the Municipal Manager may authorize any travel to be undertaken by Directors, but provided the expenses to be incurred are on the approved budget of the relevant department. Claims by other officials to be authorized by directors concerned.
- b) Only the Director Strategic and Corporate Services or the Municipal Manager may authorize payments to be made for persons invited for interviews, but provided that the expenses to be incurred are on the approved budget.
- c) Only the Executive Mayor together with the relevant director may authorize any travel to be undertaken by Holders of Public Office, or the municipal manager, but provided that the expenses to be incurred are on the approved budget of the municipality.
- d) Only Directors may authorize any travel to be undertaken by employees in the respective Directorate, but provided that the expenses to be incurred are on the approved budget of the municipality.
- e) As far as is practically possible, authorization for the above must be obtained prior to the occasion by any representative who travels on the business of the municipality.

An invitation to attend a workshop, meeting or related event is not an automatic authorization to attend such workshop or event. The required authorization must still be obtained from the municipal manager or executive mayor, executive committee or director as the case may be.

8. COUNCIL DELEGATES

Council delegates or representatives to any conference, workshop or meeting must ensure that they arrive on time and attend until the conclusion of such event. If any representative fails to do so, the executive mayor or executive committee, the municipal manager or director as the case may be, may recover all allowances and disbursements paid to enable such delegate or representative to attend such event, provided that such delegate or representative is afforded

the opportunity to submit reasons for not being able to be present from the commencement to conclusion of such event.

9. COMMITTEES ESTABLISHED AS A RESULT OF PRESCRIBED LEGISLATION

Any committee established as a result of prescriptions in relevant legislation, will for the purposes of application of this policy, qualify for an allowance equal to that paid to Holders of Public Office.

10. AUTHORITY

Any deviation from this policy for whatsoever reason must be authorized by the Municipal Manager and in the case of the Municipal Manager, the Executive Mayor will authorize.

In any instance where a delegate did not attend business as approved in accordance with this policy, any expenditure incurred by the council should be refunded by the representative. All deviations in this regard must be approved by council.

11. TRAVEL AND SUBSISTENCE ALLOWANCE CLAIM FORM

The official Travel and Subsistence Allowance claim form, as prescribed by Chief Financial Officer must be used with regard to Travel and Subsistence Allowance applications. The approved form should reach the creditors office 3 days before the intended day of departure in order for allowances to be paid to the representative timeously.

12. SHORT TITLE

This Policy will be known as the Travel and Subsistence Policy.

1. Preamble

Cognisance taken of the need that may arise to transfer within approved votes due to the change in circumstances and priorities.

2. Definitions

"Approved budget," means an annual budget-

- a) approved by a municipal council, or
- b) includes such an annual budget as revised by an adjustments budget in terms of section 28 of the MFMA;

"Budget transfer" means transfer of funding within a vote subject to limitations.

"Capital budget" means a financial plan catering for large and long-term sums for investment in property, plant and machinery, over a period greater than the period considered under an operating budget.

"Chief Financial Officer" means a person designated in terms of section 80(2) (a) of the MFMA;

"Delegation", in relation to a duty, includes an instruction or request to perform or to assist in performing the duty;

"Financial year" means a twelve months period commencing on 1 July and ending on 30 June each year

"Municipal council" or "council" means the council of a municipality referred to in section 18 of the Municipal Structures Act;

"Municipality"-

- a) when referred to as a corporate body, means a municipality as described in section 2 of the Municipal Systems Act; or
- b) when referred to as a geographic area, means a municipal area determined in terms of the Local Government: Municipal Demarcation Act, 1998 (Act No. 27 of 1998);

"Official", means-

- a) an employee of a municipality or municipal entity;

- b) a person seconded to a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity; or
- c) a person contracted by a municipality or municipal entity to work as a member of the staff of the municipality or municipal entity otherwise than as an employee;

"Operating budget" An operating budget is the annual budget of an activity stated in terms of Budget Classification Code, functional/sub-functional categories and cost accounts. It contains estimates of the total value of resources required for the performance of the operations in terms of revenue and expenditure including reimbursable work or services for others;

"Overspending"-

- a) means causing the operational or capital expenditure incurred by the municipality during a financial year to exceed the total amount appropriated in that year's budget for its operational or capital expenditure, as the case may be;
- b) in relation to a vote, means causing expenditure under the vote to exceed the amount appropriated for that vote; or
- c) in relation to expenditure under section 26 of the MFMA, means causing expenditure under that section to exceed the limits allowed in subsection (5) of this section;

"Virement" refer to the definition of budget transfer

"Vote" means-

- a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the
- b) municipality; and
- c) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned.

3. Legislative Framework

Paragraph 4.6 of Circular 51 of the MFMA states that:

“The MFMA and the Municipal Budget and Reporting Regulations seek to move municipalities away from the traditional approach of appropriating/approving budgets by line item. The aim is to give the heads of municipal departments and programmes greater flexibility in managing their budgets. To further facilitate this, each municipality must put in place a council approved virements policy, which should provide clear guidance to managers of when they may shift funds between items, projects, programmes and votes.”

4. Objective of Policy

This policy shall give effect to the requirements and stipulations of the Municipal Finance Management Act and Municipal Budget and Reporting Framework in terms of the Approved budget.

The policy sets out the virement principles and processes which Stellenbosch Municipality will follow during a financial year.

These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year.

The policy shall apply to all staff and councillors of the Stellenbosch Municipality that are involved in budget implementation.

5. Virement Clarification

Virement is the process of transferring budgeted funds from one line item number to another, with the recommendation of the relevant Director to the CFO or delegated finance official, to enable the Budget Office to effect the adjustments.

6. Virement Procedure

- a) All virement proposals must be completed on the appropriate documentation and forwarded to the relevant Finance Officer for checking and implementation. (See annexure 1 and 2)

- b) All virements must be signed and supported by the relevant Director of the directorate within which the vote is allocated. (Section 79 MFMA)
- c) Projected cash flows in the SDBIP should be attached to all virement request and be adjusted in line with the virement.
- d) Relevant corroborating documentation must be attached on the virement form to support the transfer.
- e) All documentation must be in order and approved before any expenditure can be committed and incurred.
- f) All virement~~ations~~ must be motivated and need to be approved by the CFO or a delegated official after the Director of the department has recommended said transfer. The latter requires that such application reaches the office of the CFO prior to incurring expenditure.
- g) The turnaround time for processing of virement~~ations~~ are 72 hours, only if the virement request meets all the necessary requirements.
- h) No virement~~ations~~ will be considered if it equates to facilitating fiscal dumping.
- i) ~~No virements after the closing of orders as stipulated in the financial protocol and/or formally communicated in line with the financial year end preparation will be considered unless in an absolute emergency that could reasonably not have been foreseen.~~

7. Virement Restrictions

- a) Virements are not permitted in relation to the revenue side of the budget.
- b) No virements of funds across votes (directorates) will be accommodated during the year; unless within the adjustments budget.
- c) Virements from the capital budget to the operating budget are not permitted.
- d) Virements will not result in adding 'new' projects to the Capital Budget.

- e) Virements of conditional grant funds to purposes outside of that specified in the relevant conditional grant framework will not be permitted.
- f) The budget savings from the following line items (necessary adjustments) may only be considered and transferred by the CFO:
 - (i) Employee Related Cost
 - (ii) Remuneration of councillors
 - (iii) Depreciation and asset impairment
 - (iv) Finance Charges (Interest on Loan)
 - (v) Municipal Services Consumption (Water, Electricity, Refuse and Sewerage)
 - (vi) Bulk Purchases (Water and Electricity)
 - (vii) Transfers and subsidies paid
- g) An approved virement does not give expenditure authority outside of what is allowed by Council's Supply Chain Management Policy.

8. General Principle

Virements will only be approved if they facilitate and promote sound risk and financial management.

9. Accountability

Accountability to ensure that the virement~~ation~~ application forms are completed in accordance with Council's virement policy and are not in conflict with the directorate's strategic objectives manifests with the head of the relevant directorate.

1. INTERPRETATION

1.1. Acronyms

“IDP”	-	Integrated Development Plan
“SDBIP”	-	Service Delivery and Budget Implementation Plan
“EPWP”	-	Expanded Public Works Programme

1.2. Definitions

“Capital budget” is expenditure relating to the purchase, upgrade or refurbishment of a Council asset (property, plant and/or equipment);

“Town / municipality” means the Greater Stellenbosch also known as WC024, a local municipality established in terms of section 12 of the Local Government Municipal Structures Act (Act 117 of 1998)

“Municipal Manager” means the accounting officer of the municipality of Stellenbosch, appointed in terms of section 54A of the Local Government: Municipal Systems Act (Act No. 32 of 2000) being the head of administration and accounting officer in terms of section 55 of the Local Government: Municipal Systems Act (Act No. 32 of 2000);

“Council” means the municipal Council of Stellenbosch Municipality;

“Councillor” means a member of the Council of the Stellenbosch Municipality;

“Lead directorate” is the directorate whose core business encompasses the ward allocation project, which is the dominant user or beneficiary of the outcome of the ward allocation project and which accepts responsibility and ownership of the ward allocation project;

“Legacy project” is a project that is executed in a financial year and of which the benefits to the community continues into the future;

“User Department” is the department whose core business encompasses the ward allocation project, which is the dominant user or beneficiary of the outcome of the ward allocation project and which accepts responsibility and ownership of the ward allocation project;

“Operating budget” refers to expenditure, other than capital, in respect of Council activities and includes repairs and maintenance of Council assets;

“Ukey” refers to a unique numerical key consisting of 7 segments describing the allocation of funds. All budget items must be linked to a Ukey.

“Veriment” refers to the administrative process required to request and approve the transfer of funds from one cost centre to another. Apart from

re-allocation of funds through the adjustment budget, transfer of funds can only be done between cost centres within a directorate.

“Ward committee” means a committee that has been established for each ward in terms of section 73 of the Local Government: Municipal Structures Act (Act No. 117 of 1998);

“Ward project” a project identified by the ward councillor in line with the identified IDP needs, in consultation with the ward committee and financed by the ward allocation;

2. INTRODUCTION

The Republic of South Africa Constitution, 1996 requires the Municipality to encourage the public participation of community members and community organizations in the matters of local government. The Local Government: Municipal Structures Act, 1998 (Act 117 of 1998) (“Structures Act”) provides for the establishment of ward committees as formal mechanisms to give effect to this Constitutional obligation. Ward committees play a vital role in bridging the gap between the Community, the Municipality and its Council and also play an important role in:

- a) Enhancing participatory democracy;
- b) Neighbourhood and ward based planning including the encouragement of communities to take charge of their own livelihoods;
- c) Assisting the Municipality in service delivery improvement;
- d) Assisting in the economic empowerment of communities;
- e) Enhancing local democracy and accountability;
- f) Enhancing social cohesion, nation building and integration of communities across class, race, culture

Along with many other responsibilities the Municipality provide support to the Councillors and Ward Committees through the Ward Allocation policy. The policy intends to establish uniform rules and regulations in the identification, planning and implementation of ward projects. It will further encourage accountability and regulate all administrative processes in the execution phases.

3. POLICY OBJECTIVE

- 3.1. The objective of the Ward Allocations Policy is to create opportunities for Councillors to identify ward projects in line with the identified IDP needs, with the support of their Ward Committees, which would improve the quality of living in all wards. These projects would need to fit into the basket of services of the relevant User Department and must comply with the following:

- 3.1.1. Local Government’s mandate;
- 3.1.2. Council policies;

- 3.1.3. Support the pillars and objectives of the IDP;
- 3.1.4. Directly benefit the community.
- 3.2. Ward project must be:
 - 3.2.1. Additional projects identified by Councillors as identified through the IDP community participation processes,
 - 3.2.2. Supported by the ward committees, and
 - 3.2.3. Approved by Council.
- 3.3. Ward Allocation funds must be utilised in the manner contemplated in sections
 - 3.3.1. **7(e)** categorising municipalities according to their system of municipal government. B Municipalities include a ward participatory system which allows for matters of local concern to be dealt with by committees established for wards;
 - 3.3.2. **72 (3)** describing the object of a ward committee as being to enhance participatory democracy in local government; and
 - 3.3.3. **74** describing the powers and functions of ward committees

of the Local Government: Municipal Structures Act (Act No. 117 of 1998).

4. STRATEGIC INTENT

The Policy shall be governed by the underlying principle of ensuring that ward allocation projects meet the requirements of the Integrated Development Plan including specific reference to the following:

- 4.1. A **“valley of possibility”** that creates an environment conducive to business development and job creation. To facilitate and coordinate support to emerging entrepreneurs by utilizing internal SCM processes and linking SMME's with opportunities in the market. To provide, upgrade and maintain an effective engineering infrastructure to support effective service delivery and to ensure the provision of non-motorised transport routes as a functional mode of transport.
- 4.2. A **“green and sustainable valley”** that ensures the management of human use of the biosphere and its resources, enhancing the integrity of the environment as an imperative for long-term sustainability and incorporates bio-diversity into the environment as an imperative for long-term sustainability. A valley that ensures spatial sustainability and facilitate efficient use of all forms of capital available to the Town including human capacity and ability and information management.
- 4.3. A **“safe valley”** where integrated safety strategies with multi-stakeholder engagements are implemented to focus on institutional, situational and social crime prevention interventions that will improve law enforcement and neighbourhood watches.

- 4.4. A “**valley with dignified living**” inclusive of sustainable human settlements, social infrastructure through the involvement and building of capacity of stakeholders in the planning and management of the areas where they live. This includes access to basic services to households.
- 4.5. A “**valley of good governance and compliance**” that ensures transparency and is corruption-free, establishes an efficient and productive administration to prioritise service delivery and ensures financial prudence, with clean audits by the Auditor-General;

5. POLICY PARAMETERS

- 5.1. The provisions of this policy apply to Ward Councillors, Ward Committees and all Directorates and Departments of the municipality;
- 5.2. This policy applies to all programmes and projects within the jurisdiction of Stellenbosch Municipality that are funded through ward allocations and which are approved by Council in accordance with this policy.

6. REGULATORY CONTEXT

This Policy draws its legal mandate from the following laws and relevant policies, as amended from time to time:

- 6.1. Legislation:
 - 6.1.1. The Constitution of the Republic of South Africa, 1996
 - 6.1.2. Local Government: Municipal Systems Act, (Act No. 32 of 2000);
 - 6.1.3. Local Government: Municipal Finance Management Act, (Act No. 56 of 2003);
 - 6.1.4. The Municipal Budget and Reporting Regulations with specific reference to Circular 82 adopted by Stellenbosch Council on 25 May 2016.
- 6.2. Policies and documents
 - 6.2.1. Stellenbosch Municipality: Integrated Development Plan (IDP);
 - 6.2.2. Stellenbosch Municipality: Asset Management Policy;
 - 6.2.3. Stellenbosch Municipality: Supply Chain Management Policy;
 - 6.2.4. Stellenbosch Municipality: Virement Policy

7. ROLE PLAYERS, ROLES AND RESPONSIBILITIES

The relevant role players include, but are not limited to:

- 7.1. The Ward Councillors and members of Ward Committees;
- 7.2. Manager: Councillor Support;
- 7.3. Council support staff;

- 7.4. Directors;
- 7.5. Budget office;
- 7.6. Technical or functional representatives in User Departments;
- 7.7. Ward Administrators; and
- 7.8. IDP Department

Official / Councillor	Role and responsibility
Manager: Councillor Support	<p>Owner and driver of Ward Allocation Policy.</p> <p>Collations of all ward projects.</p> <p>Submission of ward allocation projects for draft budget.</p> <p>Facilitation of meetings with councillors.</p> <p>Manage ward administrators in this process.</p> <p>Monthly and annual collations of all ward-project progress reporting on all ward projects.</p> <p>Elevate problems to MM.</p>
Councillor and Ward Committee	<p>Project identification, development, submission for draft budget inclusion to Manager Councillor Support.</p> <p>Signing of commitment form.</p> <p>Finalization and submission of project plans to lead departments.</p> <p>Attending meetings with lead departments.</p> <p>Identification of IDP link.</p> <p>Identification of beneficiaries.</p> <p>Attendance, overseeing and reporting (incl. pictures) on projects.</p> <p>Return service provider goods/equipment (if applicable).</p> <p>It is important to note that Ward Committees play a supporting and advisory role to the Ward Councillor.</p>
Ward Administrator	<p>Minute keeping of Ward Committee meetings and provision of said minutes relating to project identification to lead departments.</p> <p>Administrative support for the execution of ward projects (communication and arrangements)</p> <p>Administrative and coordinating link between lead department, councillor and community (ie. Transport plans, attendance registers, beneficiary communication, indemnity forms, etc.).</p> <p>Assist with the drawing up of project evaluation reports and submission thereof to lead department.</p> <p>Compilation of photographic portfolio of evidence of completed projects with specific focus on goods and services procured.</p> <p>Asset registers and general asset management of furniture, tools and equipment procured.</p>
Speaker after consultation with the Executive Mayor	<p>Identify the annual strategic intent of ward projects.</p> <p>Verify that the identified projects comply with the mandate of local government,</p>

SCM	<p>Procurement of goods and services.</p>

8. CRITERIA FOR THE SELECTION OF PROJECTS

Projects that are to be implemented under the Ward Allocations Policy must comply with the following criteria:

- 8.1 Be within Local Government mandate as defined in legislation.
- 8.3 Be aligned with the objectives and pillars of the Integrated Development Plan and with the approved strategic intent identified by the Speaker.
- 8.4 Comply with all the Policies of Council.
- 8.5 Be informed by the ward based needs of the wards and municipal infrastructure needs that have been –
 - 8.5.1 assessed by the Ward Councillor and Manager Councillor Support, and
 - 8.5.2 reported and supported by the ward committee in accordance with the budget and IDP timelines.
- 8.6 Fall within the core business activity of the Lead Directorate and shall form part of the Lead Directorate's SDBIP.
- 8.7 Preferably be legacy projects that will address a need and be of a sufficient scale to have a significant impact in the ward.
- 8.8 **Not** be projects that directly benefit an individual.
- 8.9 **Not** be projects that benefit a private property – including repairs and maintenance of property not owned by Stellenbosch Municipality.
- 8.10 Projects shall, as far as possible, be completed within the financial year in respect of which they are approved but capital funds may be rolled over to the next financial year at the August Adjustment Budget (MFMA Sec 28 (2) (e) where compelling reasons exist for such roll-over. Funds remaining after the successful completion of projects will be deemed savings and re-allocated to existing approved projects requiring additional funding during the adjustment budget in January of each year.
- 8.11 Projects may cross ward boundaries provided that the relevant ward councillors are in agreement on collaborative planning, funding and implementation of such projects.
- 8.12 The lead directorate must technically evaluate and cost all projects in order to ensure that they are technically feasible, cost effective and comply with budgetary priorities before council considers a project for approval.

- 8.13 Labour intensive approaches shall be developed to maximise EPWP opportunities wherever possible for projects in both the capital and operating budget components. Councillors should note the timelines for submission of EPWP projects as part of the National EPWP Business Plan. These requirements entail that EPWP project identification must be completed and submitted to the LED Department by March each year.
- 8.14 In the case of projects undertaken on the **capital budget**, the assets created must:
- 8.14.1 Be on council property that is appropriately zoned and reserved for the lead directorate.
 - 8.14.2 Have a provision for maintenance and operating costs (inclusive of human resources) on the operating budget of the user directorate for subsequent years. These projects must adhere to sections 18 and 19 of the Local Government: Municipal Finance Management Act, (Act no. 56 of 2003) describing the funding sources and requirements for capital projects.
 - 8.14.3 Be placed on the asset register of the user directorate responsible for the facility.
 - 8.14.4 Be adequately insured and secured by the user directorate responsible for the facility.
- 8.15 In the case of projects undertaken on the **operating budget**:
- 8.16.1
 - 8.14.1. Adequate supervisory control shall be provided by the user directorate.
 - 8.14.2. Projects will be undertaken on council property, except in cases where:
 - 8.14.2.1. A ward hosts a function or event at facilities that are not council owned - subject to adequate supervisory control provided by the relevant user directorate, or
 - 8.14.2.2. A ward funds or supports a local government function (for example; additional law enforcement officers) that is not necessarily performed on council property.
 - 8.14.3. All operational projects will comply with the requirements of National Treasury Circular 82 specifying requirements to be adhered to when providing catering as adopted by Stellenbosch council.
 - 8.14.4. Community events aimed at vulnerable groups must contain an educational component that speaks to the strategic intent as identified by the Speaker.
- 8.15. To contribute to maximum impact through meaningful legacy projects within communities, projects must be limited to **two operational and two capital** projects per ward. (Except for wards consisting of mostly rural areas where council does not own property.)

~~8.15.~~

9. OWNERSHIP AND ACCOUNTABILITY

Directors are responsible for ensuring that all ward allocation projects within their respective directorates are completed during the financial year in respect of the projects approved by Council. Capital funds may be rolled over to the next financial year where compelling reasons exist for such roll-over and after approval has been obtained.

Directors must ensure timeous monthly and annual reporting on constraints and/or progress to the Manager Councillor Support for inclusion in Council documents.

10. BASIS FOR ALLOCATING WARD ALLOCATION BUDGET

10.1. Council **MAY** allocate as part of the municipal annual budgetary process certain funding from the rates accounts towards the Ward Allocations which may be an Operating Budget allocation and/or a Capital Budget allocation. The funding provided for each ward in the municipality must be equal;

10.2. Ward allocation funding might be approved annually as part of the budgeting process with a percentage distribution between capital and operational funding if there is allocation for both capital and operational. All capital projects must be captured on the municipality's capital project identification, planning and prioritization system.

10.3 if funding for ward projects is allocated in the annual budget, formal communication will be circulated to all ward councillors to inform them of the amount allocated to each ward for projects, either for operational or capital or both. This is done after the approval of the budget.

~~10.2.~~

11. POOLING OF FUNDS BETWEEN WARDS

Subject to the clause 8.11 ward allocations may be pooled in order to achieve higher impact and enable legacy projects.

12. PROJECT SELECTION AND IMPLEMENTATION PROCESS

The different stages of selection and implementation are set out hereunder and are subject to the timelines set out in the IDP and Budget Preparation process approved by Council in August of each year. See Ward Allocation SOP for detail and roles and responsibilities. **(ANNEXURE 1) Note that the stages are completed in the preceding financial year to ensure implementation of projects within one financial year.**

ACTION	RESPONSIBLE	TIME LINE
STAGE 1: STRATEGIC INTENT		
Determine and announce strategic intent of all ward projects for the ensuing financial year.	Speaker	July
STAGE 2: INTRODUCTION		
Report submitted at All Wards Meeting containing: 1. Clear strategic intent 2. Timeframes 3. Roles and responsibilities 4. Process 5. Updated ward priorities, ward plans and baseline needs	Manager: Councillor Support supported by 1. Manager IDP 2. Manager Budget Office Representation required from all user departments at meeting.	July
Documentation required for this stage: 1. Minutes of meeting 2. Attendance Register 3. Ward Allocation Policy 4. Updated IDP ward priorities	Manager Councillor Support	July
STAGE 3: WORKSHOP AND CONSULTATION PHASE		
Arrange series of workshops with Ward Councillors and Ward Committees to: 1. Discuss strategic intent, ward priorities, process, timelines and costing of proposed projects 2. Explain the project prioritisation and provide technical information regarding projects. 3. Signing of Commitment Form (ANNEXURE 2)	User Departments through Ward Administrator	July - August
Documentation of meetings containing the following: 1. Minutes 2. Attendance Registers 3. Completed Commitment Forms	Ward Administrator	August
STAGE 4: PROJECT IDENTIFICATION, COSTING AND TECHNICAL REVIEW		
Completed project priority list submitted to user department. (ANNEXURE 3) . This list provides clear indication of projects ward councillors would like to have implemented in order of priority. It will minimize time spent on costing of projects that is lower on the list and that might not be implemented.	Ward Administrator – after decisions taken at ward committee meeting.	September
Costing of projects	User Department	September

[illegible]

Documentation required for this stage include: 1. Completed and signed Ward Project Plans per ward. 2. Minutes of meetings	Manager Council Support Secretariat	May
STAGE 6: IMPLEMENTATION		
Monthly reporting on implementation of projects submitted to Manager Council Support	User Department	Monthly starting in July of each financial year.
Collation and monthly reporting on progress to Executive Mayor and Speaker	Manager Council Support	Monthly starting in August of each financial year.
Changes to approved Ward Allocation Projects can be done as part of the adjustment budget following the same processes and approvals as departmental adjustment budget requests. It is important to note that the adjustment budget does not allow for the creation of new projects, but only for the movement of budget between previously approved projects on the existing budget.		

13. DEVIATION FROM POLICY

- 13.1. Deviation from the project selection criteria as listed in section 8 above may be considered by the Municipal Manager on receipt of a written request from the Manager Councillor Support, supported by the User Directorate, detailing the motivation for such a deviation.
- 13.2. The basis of the Municipal Manager's consideration of a deviation shall be whether the deviation would further the Policy Objective as set out in section 3 of the Policy.
- 13.3. The Municipal Manager shall report to Council on the requests received for deviations from the Policy.

14. PROJECT REVIEW

- 14.1. After every financial year there shall be a review of the projects undertaken by the Ward Allocation process. This review will be undertaken by the Manager Councillor Support and reported to the Municipal Manager and Director's Forum. Once supported the reviewed document must be submitted to Council;
- 14.2. The review must cover the following for all the projects undertaken in the municipal area:
 - 14.2.1. Ward number and Ward Councillor name;
 - 14.2.2. List of projects per User Directorate responsible;
 - 14.2.3. Budgeted cost against projects;
 - 14.2.4. Whether the project was completed within the planned time by the User Directorate – if not, reasons must be supplied;

- 14.2.5. Assessment of project as to whether the original objectives of the project were achieved;
- 14.2.6. Assessment of projects in terms of quality;
- 14.2.7. Assessment of the sustainability of the projects in terms of maintenance and operating cost;
- 14.2.8. Check list for Asset Register and Insurance;
- 14.2.9. Reason for the under spending of allocated funds in order to reflect savings or over-quoting

Stellenbosch Municipality
Standard Operating Procedures

SOP #		Version #	1.1	Date	2018-10-19
Responsible Directorate	Strategic and Corporate Services	Responsible Person	Manager Councillor Support	Author	Manager Community Development
Delegation ref #		Description/Delegation Name	Determine Operational Procedures		
SOP Title	Ward Allocation Projects and Funding				
Purpose	This SOP explains the process to through which Ward Allocation funds are approved, starting with the identification and costing of projects through to the implementation and reporting on completed ward projects.				
Scope	Council may allocate as part of the municipal annual budgetary process certain funding from the rates accounts towards the Ward Allocations which may be an Operating Budget allocation and/or a Capital Budget allocation. The objective of the Ward Allocations is to create opportunities for the Councillors to identify ward projects, with the support of their Ward Committees, which would uplift their communities. These projects would need to fit into the basket of services of the relevant User Department.

This document serves as an agreement between the User Department and the Ward Councillor to commit to costing, planning and implementation of ward allocation projects and the agreed upon timeframes in order to achieve identified outcomes.

User Department Representative:
Name:
Date:

Ward Councillor:
Name:
Date:

I have read and understand the Ward Allocation Policy of Stellenbosch Municipality;

And thus commit as follow:

Nr:	Commitment	Councillor Initial	User Department Initial
1	That I will abide by the prescription of the all policies of Stellenbosch Municipality.		
2	As Ward Councillor, I commit to involve my ward committee members in the written identification of projects all projects will be captured in the minutes of the ward committee meeting and will be supplied to the User Department. The projects will be accompanied by a detailed description of what is envisaged in order to enable the User Department to cost the project accurately.		
3	The projects identified by the ward committee and the Ward Councillor will be prioritised and aligned with the IDP strategic objectives, ward based plans and identified baseline needs.		
4	As Ward Councillor and User Department, we commit to attend all agreed upon meetings and workshop to finalize project plans and ensure that we are prepared for these meetings		
5	We will identify and sign off on all agreed upon ward projects in time for the draft budget approval		
6	The submission for the draft budget will cover the total sum for the ward allocations. No projects will be identified after the approval of the draft budget.		
7	As responsible User Department representative, I commit to cost all identified projects		
8	As Ward Councillor, I understand that projects that have not been approved in the annual budget and included in the SDBIP of the User Department cannot be implemented.		
9	We will utilize the adjustment budget to ensure sufficient funding for approved projects and not identify new projects that are not included in the SDBIP of the User Department.		
10	As Ward Councillor, I commit the active involvement on the day of myself, the ward committee members and ward administrator, should operational funds be earmarked for events.		
11	Should operational funding be utilized for labour intensive projects, I commit to register the project as an EPWP project and abide by the applicable policy. As Ward Councillor, I will not interfere with the recruitment and selection of beneficiaries of the project.		
12	Should capital funding be utilized for the acquisition of moveable assets, all assets will be barcoded and registered on the asset register and insured.		
13	As User Department representative, I will take full responsibility for the procurement processes required for the identified project. I will submit requisitions in time, but cannot take responsibility for the time required by SCM to generate an order.		
14	NO instruction will be given to any service provider without first obtaining a green order slip for said services. Once a service provider has been appointed, changes to the scope of work will not be negotiated with or expected from the service provider.		
15	As User Department representative, I will keep accurate records of all procurements and meetings in order to generate monthly reports.		
16	As Ward Councillor, I will ensure that accurate minutes are kept of ward committee meetings relating to ward projects and that ward administrator will make this freely available to the User Department. I commit the cooperation of the ward administrator with the drawing up of project feedback reports and the taking of photographic evidence.		
17	To protect both the Ward Councillor and User Department representative NO petty cash or direct payments will be allowed as part of ward projects.		
18	All discussions surrounding the ward projects will be followed up with written confirmation of said discussion.		

We agree that ward projects can only be successfully implemented if there is full cooperation between all role-players. Should problems be experienced between the Ward Councillor and the responsible User Department representative, it will be referred to The Speaker and the responsible Director.

By signing this commitment form, I confirm that I have read and understand the content and commit to adhere to all the stipulations.

Signed at _____ on this ____ day of _____ 20_____.

1. Basis of Preparation

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

1.1 Going concern assumption

These unaudited annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Housing development fund

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.3 Internal reserves

Capital replacement reserve (CRR)

In order to finance the acquisition of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of the Annual Budget. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

Self-insurance reserve

The municipality has a Self-insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self-insurance fund is invested in short-term investments. Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

Accumulated surplus

The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.

1.4 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.5 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are insignificant to the annual financial statements are set out below:

Sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Revenue recognition

Accounting Policy 1.16 on Revenue from Exchange Transactions and Accounting Policy 1.17 on Revenue from Nonexchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality.

In concluding judgement, management considered the detailed criteria for recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

Impairment of financial assets

Accounting Policy 1.11: Financial Instruments, referring to the paragraph on impairment of financial assets, describes the process followed to determine the value with which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments - Recognition and Measurement. The management of the municipality is satisfied that impairment of financial assets recorded during the year is appropriate. Details of the impairment loss calculation are provided in the applicable notes to the annual financial statements.

Useful lives of property, plant and equipment and intangible assets

As described in Accounting Policy 1.8 and 1.9 the municipality depreciates its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful life, which is determined when the assets are brought into use. The review of useful life and residual values of assets are only reviewed if one of the indicators of potential review is triggered.

Employee benefit obligations

The municipality obtains actuarial valuations of its employee benefit obligations. The employee benefit obligations of the municipality that were identified are post-retirement health benefit obligations and long-service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the applicable notes to the annual financial statements.

Impairment of non-financial assets

The recoverable amounts of cash-generating units have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The recoverable amounts of individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

Value in use of cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including economic factors such as inflation and interest.

Value in use of non-cash generating assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are

indications that the impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Provisions

Provisions are raised and management determines an estimate based on the information available. Additional disclosures of these estimates of provisions are included in note 20 - Provisions.

Allowance for slow moving, damaged and obsolete stock

An allowance for inventory to write inventory down to the lower of cost or net realisable value. Management has made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the surplus/deficit.

Fair value estimation

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps is calculated as the present value of the estimated future cash flows.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Impairment of statutory receivables

If there is an indication that a statutory receivable, may be impaired, the municipality measures the impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, are reduced, either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Accounting by principals and agents

The entity makes assessments on whether it is the principal or agent in principal-agent relationships.

1.6 Biological assets that form part of an agricultural activity

The municipality recognises biological assets that form part of an agricultural activity or agricultural produce when and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably.

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity or agricultural produce at fair value less costs to sell and from a change in fair value

less costs to sell of a biological asset that form part of an agricultural activity, is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable, is used to determine fair value.

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

The municipality classifies biological assets as consumables which consist of timber in the form of pine trees. All biological assets are held for sale.

Item	Useful life
Trees in a plantation forest	indefinite

1.7 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or for
- administrative purposes; or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that is associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Depreciation is calculated at the straight line method over a period of 30 - 99 years

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Cost model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property - buildings	30-99 years
Property - land	indefinite

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 11).

When classification is difficult, the criteria used to distinguish investment property from owner - occupied property and from property held for sale in the ordinary course of operations, are as follows:

Transfers to, or from, investment property shall be made when, and only when, there is a change in use, evidenced by:

- (a) commencement of owner-occupation, for a transfer from investment property to owner-occupied property;
- (b) commencement of development with a view to sale, for a transfer from investment property to inventories;
- (c) end of owner-occupation, for a transfer from owner-occupied property to investment property; or
- (d) commencement of an operating lease (on a commercial basis) to another party, for a transfer from inventories to investment property.

1.8 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets)

that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

Property, plant and equipment is recognised as an asset when:

- it is probable that the future economic benefits or service potential that are associated with the property, plant and equipment will flow to the municipality; and
- the cost or fair value of the item can be determined reliably.

Measurement

Property, plant and equipment are initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary cost of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment

ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property, plant, and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Incomplete construction work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is available for use.

Impairment

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable service amount, it is written down immediately to its recoverable service amount and an impairment loss is charged to the statement of financial performance.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Depreciation

Property, plant and equipment are depreciated on the straight-line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Land	indefinite
Machinery and equipment	1-25
Furniture and office equipment	2-24

Transport assets	4-20
Computer equipment	5-23
Community assets	4-30
Other property, plant and equipment	6-99
Capital restoration asset	5-30
Electrical infrastructure	10-50
Water supply infrastructure	10-100
Solid waste infrastructure	10-30
Roads infrastructure	10-100
Information and communication infrastructure	3-15
Waste water network	10-100
Stormwater infrastructure	10-50

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 10).

1.9 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations. A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it;
- there is an ability to use or sell it;
- it will generate probable future economic benefits or service potential;
- there are available technical, financial and other resources to complete the development and to use or sell the asset; and
- the expenditure attributable to the asset during its development can be measured reliably. Intangible assets are initially measured at cost.

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result, the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated goodwill, brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item		Useful life
Computer software		3 - 30 years
Internally generated: Capital development	Straight-line	5 - 7 years
Service operating and land rights	Straight-line	5 - 30 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset is the difference between the net disposal proceeds and the carrying amount and is included in surplus or deficit when the asset is derecognised.

1.10 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 14 Heritage assets.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Subsequent to initial measurement classes of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage

asset.

Derecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

1.11 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectible.

A concessionary loan is a loan granted to or received by a municipality on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from an municipality's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, a municipality shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all

other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the municipality shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another municipality; or
- a contractual right to:
 - o receive cash or another financial asset from another municipality; or
 - o exchange financial assets or financial liabilities with another municipality under conditions that are potentially favorable to the municipality.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another municipality; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavorable to the municipality.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by a municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk

or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the municipality had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the municipality designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
 - o it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
 - o on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking
 - o non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
 - o financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Receivables from exchange transactions	Financial asset measured at amortised cost
Receivables from non-exchange transactions	Financial asset measured at amortised cost

Cash and cash equivalents	Financial asset measured at amortised cost
Other receivables from exchange transactions	Financial asset measured at amortised cost
Short term investments	Financial asset measured at amortised cost
Long term receivables	Financial asset measured at amortised cost

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Payables from exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Other financial liabilities	Financial liability measured at amortised cost

Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus, in the case of a financial asset or a liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The municipality first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the municipality analyses a concessionary loan into its component parts and accounts for each component separately. The municipality accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.

- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the municipality uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e., without modification or repackaging) or based on any available observable market data.

Short-term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

Reclassification

The municipality does not reclassify a financial instrument while it is issued or held unless it is:

- combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification

Where the municipality cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the municipality reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the municipality reclassifies the instrument from cost to fair value.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and collectability of financial assets

The municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

The calculation in respect of the impairment of fines receivable (receivables from non-exchange transactions) is based on an assessment of the past history of fines per category.

Derecognition

Financial assets

The municipality derecognises financial assets using trade date accounting. The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Cash includes cash on hand and cash with banks. Cash equivalents are short term highly liquid investments that are held with registered banking institutions with a maturity period of between three and twelve months and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried in the balance sheet at amortised cost.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and cash with bank, net of bank overdrafts. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial

liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another municipality by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Housing rental and instalments

Finance income from the sale of housing by way of instalment sales agreements or finance leases is recognised on a time proportion basis.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Any contingent rent is expensed in the period in which they are incurred.

1.13 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, and then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs. The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.14 Landfill site

Site restoration and dismantling cost - The municipality has an obligation to dismantle,

remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes:

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.
- changes in the measurement of an existing decommissioning, restoration and similar liability that result from change in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in discount rate; and
- the obligation the municipality incurs for having used the items during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

1.15 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Cash generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- ☐ the period of time over which an asset is expected to be used by the municipality; or
- ☐ the number of production or similar units expected to be obtained from the asset by the municipality.

Management has judged all assets as non-cash generating assets.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the

carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is

allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.16 Impairment of non- cash generating assets

Non-cash generating assets are assets other than cash generating assets.

Identification

When the carrying amount of a non-cash generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non cash generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non cash generating intangible asset with an indefinite useful life or a non cash generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of non-cash generating assets is the present value of the non-cash generating assets remaining service potential.

The present value of the remaining service potential of a non cash generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non cash generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset

if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

Recognition and measurement

If the recoverable service amount of a non cash generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash generating asset is adjusted in future periods to allocate the non-cash generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non cash generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non cash generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non cash generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash generating asset is adjusted in future periods to allocate the non-cash generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.17 Employee benefits

Employee benefits are all forms of consideration given by a municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party

of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- a municipality's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from a municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and

- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Accrued leave pay

Liabilities for annual leave are recognised as they accrue to employees. Liability is based on the total accrued leave days owing to employees and is reviewed annually.

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which a municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution

and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Multi-employer plans

The municipality classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined contribution plan, the municipality accounts for in the same way as for any other defined contribution plan.

Where a plan is a defined benefit plan, the municipality account for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the municipality account for the plan as if it was a defined contribution plan.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the municipality during a reporting period, the municipality recognizes the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability, the municipality recognises actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability, the municipality recognise past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus, any liability that may arise as a result of a minimum funding requirement.

The amount determined as a defined benefit liability may be negative (an asset). The municipality measure the resulting asset at the lower of:

- the amount determined above; and

- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The municipality determine the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, the municipality shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, the municipality attributes benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up

to the reporting date.

The municipality recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the municipality re-measures the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The municipality offsets an asset relating to one plan against a liability relating to another plan when the municipality has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and

- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other long term employee benefits

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

Long term service awards are payable after 10 years of continuous service and after every 5 years thereafter to employees. Additional to this employee shall be entitled to a 14th cheque for continuous employment on their 30th and every 5th year onward. Furthermore, a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover based on historical staff turnover. No other long service benefits are provided to employees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost; and

- the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

- terminate the employment of an employee or group of employees before the normal retirement date; or
- provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

The municipality is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

- the location, function, and approximate number of employees whose services are to be terminated;
- the termination benefits for each job classification or function; and
- the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than twelve months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

1.18 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense. A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits. If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Provision for the rehabilitation of landfill sites

At year end a provision is raised for the rehabilitation of landfill sites. The provision is the net present value of the future cash flows to rehabilitate damaged land at year end.

As the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period;
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;
- if the adjustments result in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may be fully recoverable. If there is such an indication, the municipality tests the asset for impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in the accounting policy on impairment of cash-generating assets and/ or impairment of non-cash generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability are recognised in surplus or deficit as they occur.

Provision for constructive obligations

A constructive obligation to restructure arises only when the municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of an activity/operating unit concerned.

- the principal locations affected;
- the location, function, and approximate number of employees who will be compensated for services being terminated;
- the expenditures that will be undertaken; and
- when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality.

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingencies

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability is a:

- possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality;
- present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; the amount of the obligation cannot be measured with sufficient reliability.

1.19 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Service charges

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the billings done during July and August. The billing and invoiced amounts done in July are recognized in total as an accrual as all billing in July pertains to services rendered prior 30 June. An estimate is then made based on August billing pertaining to services rendered up until 30 June.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be

estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by surveys of work performed.

Pre-paid electricity

Revenue from the sale of electricity prepaid units is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Interest earned

Interest earned on investments is recognised in the statement of financial performance on the time proportionate basis that takes into account the effective yield on the investment.

Dividends

Dividends are recognised on the date that the municipality becomes entitled to receive the dividend in accordance with the substance of the relevant agreement, where applicable.

Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant approved tariff. This includes the

issuing of licenses and permits.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Income from agency services

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

1.20 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by the municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, the municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs are recognised in the statement of financial performance in the period in which they become receivable.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Property rates

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources.

Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Debt forgiveness and assumption of liabilities

The municipality recognises revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

The municipality makes use of estimates to determine the amount of revenue that it is

entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables. Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting municipality.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind

Services in-kind that are significant to the municipality's operations and/or service delivery objectives are recognised as assets and the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

Collection charges and penalties

Collection charges and penalty interest is recognised when:

- it is probable that the economic benefits or service potential associated with the transactions will flow to the municipality; and
- the amount of revenue can be measured reliably; and

to the extent that there has been compliance with the relevant legal requirements (if applicable).

1.21 Statutory receivables Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount (for purposes of the Standard of GRAP on Statutory Receivables) means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the accounting policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the accounting policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the accounting policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the municipality and the transaction amount can be measured reliably.

Initial measurement

The municipality initially measures statutory receivables at their transaction amount. Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.
- Accrued interest

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the accounting policy on Revenue from exchange transactions or the accounting policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled to levy additional charges in terms of legislation, supporting regulations, by-laws or similar means on overdue or unpaid amounts, these charges are accounted for in terms of the municipality's accounting policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (taxes and transfers).

Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- significant financial difficulty of the receivable, which may be evidenced by an application for debt counselling, business rescue or an equivalent.
- it is probable that the receivable will enter sequestration, liquidation or other financial re-organisation.
- a breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).
- adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable, or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
 - derecognises the receivable; and
 - recognises separately any rights and obligations created or retained in the

transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The municipality considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.22 Accounting by principles and agents

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.

- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.23 Borrowing costs

Borrowing costs are interest and other expenses incurred by the municipality in connection with the borrowing of funds. Borrowing costs are recognised as an expense in the period in which they are incurred.

1.24 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 59 and 60 for detail.

1.25 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.26 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.27 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.28 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity but is not control over those policies.

Key management as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management are those persons responsible for planning, directing and controlling the activities of the municipality including those charged with the governance of the municipality

in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favorable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

Changes in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Commitments

Items are classified as commitments where the municipality commits itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.29 Changes in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

1.30 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.31 Value Added Tax

The municipality accounts for Value Added Tax on the cash (receipt) basis.

1.32 Budget information

The approved budget is prepared on the accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019/07/01 to 2020/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the statement of comparison of budget and actual amounts.

1.33 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.34 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.35 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term “contractor” thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

1.36 Segment Information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity).
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

2 New standards and interpretations

2.1 Standards and interpretations not yet effective or relevant

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

IGRAP 20: Accounting for Adjustments to Revenue

As per the background to this Interpretation of the Standards of GRAP, there are a number of legislative and regulatory processes that govern how entities levy, charge or calculate revenue, in the public sector. Adjustments to revenue already recognised in terms of legislation or similar means arise from the completion of an internal review process within the entity, and/or the

outcome of an external appeal or objection process undertaken in terms of legislation or similar means. Adjustments to revenue include any refunds that become payable as a result of the completion of a review, appeal or objection process. The adjustments to revenue already recognised following the outcome of a review, appeal or objection process can either result in a change in an accounting estimate, or a correction of an error.

As per the scope, this Interpretation of the Standards of GRAP clarifies the accounting for adjustments to exchange and non-exchange revenue charged in terms of legislation or similar means, and interest and penalties that arise from revenue already recognised as a result of the completion of a review, appeal or objection process. Changes to the measurement of receivables and payables, other than those changes arising from applying this Interpretation, are dealt with in accordance with the applicable Standards of GRAP. The principles in this Interpretation may be applied, by analogy, to the accounting for adjustments to exchange or non-exchange revenue that arises from contractual arrangements where the fact patterns are similar to those in the Interpretation.

The interpretation sets out the issues and relating consensus with accounting for adjustments to revenue.

The effective date of the interpretation is for years beginning on or after 01 April 2020.
