One of the aims of the reconciliation process is to identify exceptions, i.e. records on the roll and not on the billing system and records on the billing system and not on the roll. In addition, the reconciliation must identify duplicated records, missing data, and data errors. These exceptions should then be investigated, and remedial action strategies developed for data cleansing and other corrective actions. The Debtors Ageing data should also form part of the reconciliation process so that "debtors" can be tracked and assessed at a property record level and prioritised for verification of rates liability measured against a MPRA property and owner.

To facilitate reconciliation of the separate databases (Roll and Billing), a unique property identifier (common primary unique link code) must be created and populated for each rateable property on the roll system and on the rates billing system. This property identifier must be unique, without duplicates, and remain constant for the life of the property. The standards adopted by the South African Council for the Property Valuers Profession (SACPVP), namely South African Standard: Municipal Valuations for Property Rating, specifies that the Surveyor General Code SG 21-digit Code, derived, and created from the property description, be applied for all registered full title property defined in terms of part (a) of the definition of property.

For all other MPRA defined property, Part (a) Sectional Title, Part (b) Registered Rights, Part (c) Land Tenure Rights and Part (d) PSI, and apportioned multiple use property in terms of sections 8(2)(i) and 9(2), an added suffixed 5 digits to the SG 21-digit code must be assigned by the designated municipal valuer, thereby creating a unique 26-digit code. The municipality must ensure that the SG21 digit code and 26-digit coding system is applied in their valuation roll management system and billing system and engage with their designated municipal valuer and systems service providers to implement the unique property identifier.

Further it is important that municipalities who are performing a general valuation (GV) to implement a new valuation roll on 1 July 2023, must also as best practice compare the current consolidated roll to the new valuation roll. This can identify any anomalies and errors of category of property and market values for review and investigation and the option of lodging an objection by the municipality, where applicable. This process should also identify outliers and shifts in market values by category and area so that tariffs on the new roll can be modelled and determined in an equitable manner to avoid rates shocks.

Municipalities should undertake this exercise as a routine practice during the budget process so that supplementary adjustments to the valuation roll are kept up to date. In order to ensure that the most updated information is used for the reconciliations, municipalities are reminded to adhere and comply with s23(1)(2) of the MPRA and therefore use the Part A register as the basis for performing the reconciliations going forward.

Furthermore, municipalities are also advised and expected to comply with s8(1) of the MPRA in terms of the billing methodology that needs to be specified within their policies to ensure that the correct categories (based on the selection made by the municipality) are used in the reconciliation process.

The list of exceptions derived from this reconciliation will indicate where the municipality may be compromising its revenue generation in respect of property rates or whether the municipality is overstating its revenue budget.

A further test would be to reconcile this information with the Deeds Office registry. In accordance with the MFMA Circular No. 93, municipalities are once more requested to submit their reconciliation of the Valuation roll/Part A register to the billing system to the National Treasury on a quarterly basis by no later than the 10th working day. A detailed action plan must accompany the reconciliation where variances are noted.

The above information must be uploaded by the municipality's approved registered user(s) using the GoMuni Upload Portal at: https://lg.treasury.gov.za/ibi_apps/signin. If the municipality experience any challenge uploading the information, a request for an alternative arrangement may be emailed to linda.kruger@treasury.gov.za.

No operation can be sustainable if it does not collect its revenue. A municipality is no different. There is a misconception that a municipality may not interrupt or restrict the supply of water services of a defaulting consumer. The National Treasury confirms that neither the

Water Services Act, 1997 (Act No. 108 of 1997) or any other legislation prevents a municipality from cutting the supply of water to a defaulting consumer unless the consumer is an indigent in which case the water services to that household must be restricted to the national free basic water limit of 6 kilolitre water monthly (or 50 kilowatt hours in the case of free basic electricity monthly). This was confirmed by the Constitutional Court in the matter of Mazibuko and Others v City of Johannesburg and Others (CCT 39/09) [2009] ZACC 28; 2010 (3) BCLR 239 (CC); 2010 (4) SA 1 (CC) (8 October 2009).

Municipalities are urged to use the restriction/ interruption of supply of both water and electricity services as a collection tool. Effective from the tabling and adoption of the 2023/24 MTREF, municipalities' By-laws and policies must facilitate this and clearly stipulate the order in which any partial payment of the consolidated municipal bill (including property rates) will be applied as well as the process before the supply of water and electricity services will be cut. The National Treasury recommended that any partial payment firstly be applied to property rates, wastewater, waste management, water and lastly to electricity. When interrupting or restricting the supply of water it is important that such is undertaken together with the municipal engineer(s) to ensure a continued minimum supply of waste water.

5.2 Setting cost-reflective tariffs

Reference is made to MFMA Circular No. 98, paragraph 4.2. The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. A credible budget is one that ensures the funding of all approved items and is anchored in sound, timely and reliable information on expenditure and service delivery (Financial and Fiscal Commission (FFC), 2011). Credible budgets are critical for local government to fulfil its mandate and ensure financial sustainability.

A credible expenditure budget reflects the costs necessary to provide a service efficiently and effectively, namely:

- A budget adequate to deliver a service of the necessary quality on a sustainable basis; and
- A budget that delivers services at the lowest possible cost.

The National Treasury issued a tariff setting tool and guide as part of MFMA Budget Circular No. 98 (refer item 4.2) on 6 December 2019 and since 2019, encouraged municipalities to utilise the tool. **With effect, the 2023/24 MTREF, all municipalities (except metropolitan cities and district municipalities that do not provide any services) as part of both the tabled and adopted MTREF submissions must submit the completed National Treasury tariff tool (in excel format)** illustrating that the revenue component of the budget is credible and funded and that the municipality's tariffs are cost reflective. If the municipality's initial calculation results in high increases to facilitate cost-reflectiveness, it is recommended that such are phased in over 3 to 5 years. The municipality's strategy in this regard should be included as part of the budget narratives.

This tool will assist in setting tariffs that are cost-reflective and enable a municipality to recover costs to fulfil its mandate. Going forward it is also imperative that every municipality fully embrace the Municipal Standard Chart of Accounts (mSCOA): costing component. Considering, mSCOA implementation is entering its sixth year of implementation, all municipalities must fully embrace and report also utilising the costing segment correctly. The National Treasury Municipal Costing Guide is available on the link below on the National Treasury website.

<http://mfma.treasury.gov.za/Guidelines/Documents/Forms/AllItems.aspx?RootFolder=%2fGuidelines%2fDocuments%2fMunicipal%20Costing%20Guide&FolderCTID=0x0120004720FD2D0551AE409361D6CB3E122A08>.

5.3 Tariffs – achieving a balance between cost-reflectiveness and affordability

National Treasury encourages municipalities to maintain tariff increases at levels that reflect an appropriate balance between the affordability to poorer households and other consumers while ensuring the financial sustainability of the municipality.

When setting tariffs, it is therefore critical to understand the economic environment specific to the municipality and consideration should include at least –

- *The socio-economic profile undertaken for the municipality* available on the National Treasury GoMuni portal – municipalities are encouraged to annually update their own socio-economic profile using the template model available on GoMuni;
- *The most recent average monthly household income in the municipality* as per Statistics South Africa (Stats SA) available on [Statistics South Africa | Improving Lives Through Data Ecosystems \(statssa.gov.za\)](https://www.statssa.gov.za);
- *The average property value in the municipality* per its most recent approved general valuation roll and/ or supplementary general valuation roll;
- *The number of indigent households in the municipality*, including any variation in the number of indigent households included in the Equitable Share: free basic services component for the municipality vs the municipality's own indigency level discretion; and
- *The economic drivers and activities specific to the municipal area²; etc.*

The municipality's tariff-setting or other committee tasked with this role must understand and deliberately reflect on this context during the tariff-setting process. Considering the average monthly household income, the median affordable municipal bill would ideally not exceed proportionally the average monthly household income. This median affordable bill, in combination with the median average property value should inform the basis to determine any rebates to households with income below the median.

It is also important when setting particularly water and electricity tariffs that municipalities consider setting two-tier tariffs, that include a basic availability charge to recover the fixed (direct and indirect) cost associated with the service in conjunction with consumption-based tariff bands. For example, in a drought, such tariffs will facilitate the ability to pay for infrastructure and maintenance, treating chemicals and salaries, etc. while parallel facilitating water restriction based on inclining tariffs as consumption increase. Furthermore, it is important to link the municipality's water tariffs to dam levels, also approved as part of the budget process. For example, if the dam levels drop to 60 per cent the first tier of restriction tariffs should become applicable in terms of the municipality's approved tariff policy.

It is also noted that NERSA approves seasonal tariffs for Eskom but not necessarily for the municipality. It is important that the municipality clearly factor this in its tariff application to NERSA, illustrating the cashflow crunch if the municipality is not similarly allowed a seasonal tariff to recover the higher Eskom bulk cost during winter months.

Lastly, municipalities are cautioned against setting tariffs that include operating inefficiencies. This could lead to tariffs falling into the unaffordable range.

The Consumer Price Index (CPI) inflation is forecasted to be within the 3 to 6 per cent target band; therefore, municipalities are required to **justify all increases in excess of the projected inflation target for 2023/24** in their budget narratives and pay careful attention to

² The spatialised tax data is now available through National Treasury for all municipalities that provides an up to date information on economic activity within a municipal boundary.

tariff increases across all consumer groups. In addition, municipalities should include a detail of their revenue growth assumptions for the different service charges in the budget narrative.

5.4 Bulk Account Payments and Concessions

During 2018/19, intense work was undertaken to resolve systemic and structural issues pertaining to the electricity function in municipalities. Core to this work was addressing the escalating Eskom debt that threatened the sustainability of Eskom as well as that of municipalities.

During the process, Eskom agreed to provide relieve in certain areas. Municipalities are reminded of the following concessions that remain in place:

- The interest rate charged on overdue municipal bulk accounts were reduced from prime plus 5 per cent to prime plus 2.5 per cent;
- Payment terms were extended from 15 days to 30 days for municipal bulk accounts; and
- Eskom allocation of municipality payments to capital first and then to interest.

These concessions align to the MFMA and are meant to curb municipal growing debt levels by allowing a more conducive payment regime than what was previously employed. In addition, municipalities are urged to budget for and ring-fence their payment of bulk services. Bulk current account payments must be honoured religiously to avoid stringent application of the bulk suppliers' credit control policy.

Municipalities are also urged to enforce a culture of payment for services through their normal credit control processes. In this regard it should be noted that municipalities are only compensated for free basic services based on an indigent user component calculation through the equitable share. As such, a municipality's allocation of free basic services to all of the municipality's consumers is not funded in the equitable share. Every municipality, during the budget process, must consider the affordability to the municipality when allocating free basic services above the national norm and to consumers other than indigent consumers. **If a municipality has any arrears on any of its bulk supplier's accounts, it must limit its provision of free basic services to registered indigent consumers only.**

5.5 Critical Notice Affecting STS Meters

As highlighted in previous MFMA Circular No. 115 (dated 06 December 2022) municipalities are once again alerted that there is still a pending business risk to the prepayment metering industry that requires urgency of action. The token identifiers (TID) used to identify each credit token will run out of available numbers in November 2024, at which point all STS meters will stop accepting credit tokens.

The remedy is to visit each meter and enter a special set of key change tokens in order to reset the meter memory. Municipalities are advised that the National Treasury, through the Office of the Chief Procurement Officer (OCPO), will soon facilitate a transversal contract for the provision of auditing, re-calibration and re-configuration services for standard transfer specification compliant prepayment meters that align to minimum and critical technical specifications for local government. In this respect the development of the transversal contract for smart prepaid meters as per NRS 049 (per latest approved version) is at an advanced stage and should be issued shortly by National Treasury.

If your municipality or municipality entity is currently in the process of procuring for a solution or is planning to, you are cautioned:

- Against proceeding prior to the OCPO having issued and awarded the transversal contract for the provision of inter alia auditing, re-calibration and re-configuration services for standard transfer specification compliant prepayment meters Terms of Reference (ToR); and

- That, with immediate effect, you must obtain the National Treasury's input prior to proceeding with any current procurement or proposed procurement for this purpose or any related solution or similar. This is to prevent unnecessary and wasteful expenditure on such solutions. Any request for National Treasury's input on the current or planned procurement of any related solution or similar or component thereof, must be directed to the National Treasury for the attention of the Local Government Budget Analysis Unit (Mr. Sadesh Ramjathan) Sadesh.Ramjathan@treasury.gov.za.

In this regard, municipalities will have two options to choose from:

- Firstly, to pursue the route of auditing, re-calibrating and re-configuring services for standard transfer specification compliant prepayment meters; and/ or
- Secondly, to replace the old meter with a new smart prepaid meter.

For both options, the municipality will have to budget accordingly as no additional funding will be available through the national fiscus.

Your assistance in proactively ensuring that the municipality and/ or its entities are not adversely affected by these processes will be appreciated.

5.6 Completeness and credibility of revenue related information in the Budget

The MBRR regulates the minimum level of information required from municipalities when compiling, implementing, monitoring, and evaluating the municipality's financial management situation. Failure to include the minimum required information hampers the municipal council, the public and stakeholders' ability to make informed decisions and engage on the matter. It also limits research, studies, and benchmarking undertaken for local, provincial, and national purposes.

The National Treasury would like to take this opportunity to caution municipalities that the MBRR prescribe the minimum level of information municipalities must include as part of their legal reporting obligations.

Going forward the Treasuries will place increased attention and focus on the adequacy of municipalities' submissions. The National Treasury regards this non-compliance to include the minimum level of information as serious and if persistent will consider applying the available legal sanctions, including recourse in terms of section 216(2) of the Constitution. In this context, National Treasury will particularly focus on the completeness of asset management related information as well as the statistical information required in the A, B and C schedules during the 2023/24 MTREF.

5.7 Eskom Bulk Tariff increases

The National Energy Regulator of South Africa (NERSA) is responsible for the price determination of the bulk costs of electricity. In the municipal financial year 2022/23, bulk electricity costs increased moderately at 9.61 per cent, compared to 17.8 per cent in the 2021/22 municipal financial year. Due to Eskom's funding needs, they are seeking higher tariff increases and have applied to NERSA for a 32 per cent hike from 1 April 2023/24. NERSA will make a final decision on the tariff application by 24 December.

In addition, a High Court hearing is still pending on the Multi-Year Price Determination (MYPD 5) application. The urgent High Court review requires NERSA to urgently process the Eskom revenue application for at least one year, as required by law. The timeframes for the review allow for a decision to be made in time for implementation by 1 April 2023.

5.8 Updated Municipal Borrowing Policy Framework

Cabinet approved the Update to the Policy Framework for Municipal Borrowing and Financial Emergencies on the 17th of August, 2022. The purpose of the Update is to re-examine the original Policy Framework, along with the legislation (i.e. Municipal Finance Management Act – MFMA) that was adopted to implement it, considering the experience with municipal borrowing that has accumulated since 2000.

The following key reforms have been introduced through the Update to the Policy Framework for Municipal Borrowing:

- The Policy Framework for Municipal Borrowing has been updated to introduce the necessary reforms that will expand the scope of responsible municipal borrowing and create an environment that attracts more players (e.g. insurers, pension funds, institutional investors and fund managers, and international Development Finance Institutions) in the municipal debt market space. The original core principles underlying municipal borrowing are maintained (i.e. creditworthy municipalities should borrow prudently to finance capital investment, and that there will be no bail-outs by the provincial or national government);
- The updated policy framework clarifies the role of Development Finance Institutions (DFIs), as it was not clearly articulated in the original policy. DFIs are required to pursue clear and agreed developmental goals, as outlined in the policy. The objective of this approach is to ensure that a DFI lending does not crowd out the private sector. Public-sector lenders, both domestic and foreign, should be guided by a social and developmental investment approach in which demonstrable social outcomes are considered alongside potential financial returns;
- The updated policy framework permits and clarifies innovative infrastructure financing mechanisms (such as pooled financing mechanisms, project finance, tax increment financing, revenue bonds, and pledging of conditional grants) that municipalities can use to leverage municipal borrowing. Municipalities are encouraged to explore these alternatives, and innovative infrastructure financing mechanisms permitted subject to the requirements contained in the Municipal Finance Management Act (MFMA) and
- The participation of both private and public sector market participants in the development of a liquid secondary market for municipal debt securities is also encouraged. The policy proposes options that can be explored to support the development and growth of an efficient and liquid market for municipal debt obligations.

The Updated Municipal Borrowing Policy Framework can be accessed at the MFMA website at the following link <http://mfma.treasury.gov.za/Guidelines/Pages/default.aspx>.

5.9 Tariff Policies

Municipalities must comply with the provisions of Section 74 of the Municipal Systems Act (MSA) which requires that a municipal council must adopt and implement tariff policy on the levying of fees for municipal services provided by the municipality itself or by way of service delivery agreements, and which complies with the provisions of this Act and with any other applicable legislation. Municipalities should also ensure that the tariff policies adhere to all the principles outlined in section 74(2) of the MSA. A municipality's tariff policies must also take into consideration variable factors such as water shortages and electricity feedback excess into the municipal system from new generation capacity. Municipalities must adopt by-laws to give effect to the implementation and enforcement of their tariff policies.

5.10 Non-Revenue Electricity and Non-Revenue Water/ Revenue Losses:

Water Service Authority municipalities and electricity licensed municipalities are urged to align both their non-revenue water and non-revenue electricity indicators and their set targets in the 2023/24 SDBIPs with identifiable infrastructure or operational projects and/ or programmes. Municipalities should improve on the baseline information included in the SDBIPs by indicating the volume of water losses (i.e., kilolitres/ mega-litres) and the amount of electricity losses (KwH or MWs) for the previous year. This approach will help to determine the progress of municipalities in curbing losses, which impact on municipal revenues, in both non-revenue water and non-revenue electricity.

6. Burial of Councillors

Salaries, allowances and benefits for political office-bearers and members is managed through Determination of Upper Limits of Salaries, Allowances and Benefits of Different Members of Municipal Councils notice issued by the Minister of Cooperative Governance and Traditional Affairs.

Section 167 of the MFMA provides that a municipality may remunerate its Councillors within the framework of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998), setting the upper limits of the salaries, allowances and benefits for those political office-bearers and members. Any benefit which is not included in the above-mentioned notice will be deemed irregular expenditure and recovery thereof from the Councillor concerned is mandatory.

Municipalities may also refer to relevant Councillor Pension Scheme or personal funeral policies in existence for any funeral benefits relating to such Councillor

7. Funding choices and management issues

Municipalities are under pressure to generate revenue. The ability of customers to pay for services is declining and this means that less revenue will be collected. Therefore, municipalities must consider the following when compiling their 2023/24 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;
- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulations read with MFMA Circular No. 82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates;
- Strictly control the use of costly water tankers and fix the water infrastructure to enable the sustainable provision of water;
- Prioritise the filling of critical vacant posts, especially linked to the delivery of basic services; and
- Curbing the consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

Accounting officers are reminded of their responsibility in terms of section 62(1)(a) of the MFMA to use the resources of the municipality effectively, efficiently and economically. Failure to do this will result in the accounting officer committing an act of financial misconduct which will trigger the application of chapter 15 of the MFMA, read with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings.

7.1 Employee related costs

The Salary and Wage Collective Agreement for the period 01 July 2021 to 30 June 2024 dated 15 September 2021 through the agreement that was approved by the Bargaining Committee of the Central Council in terms of Clause 17.3 of the Constitution should be used when budgeting for employee related costs for the 2023/24 MTREF. In terms of the agreement, all employees covered by this agreement shall receive with effect from 01 July 2023 and 01 July 2024 an increase based on the projected average CPI percentages for 2023 and 2024. The forecasts of the Reserve Bank, in terms of the January 2023 and January 2024, shall be used to determine the projected average CPI. Municipalities are encouraged to perform an annual head count and payroll verification process by undertaking a once-a-year manual salary disbursement, in order to root out ghost employees.

According to the 2021 State of Local Government Finance Report, there are about 165 municipalities that are in financial distress. These municipalities need to ensure that they seek an early exemption from this dispensation of this salary agreement. Municipalities should also avoid paying out leave in cash while having major financial challenges.

7.2 Remuneration of Councillors

Municipalities are advised to budget for the actual costs approved in accordance with the Government Gazette on the Remuneration of Public Office Bearers Act: Determination of Upper Limits of Salaries, Allowances and Benefits of different members of municipal councils published annually between December and January by the Department of Cooperative Governance. It is anticipated that this salary determination will also take into account the fiscal constraints. Municipalities should also consider guidance provided above on salary increases for municipal officials during this process. Any overpayment to councilors contrary to the upper limits as published by the Minister of Cooperative Governance and Traditional Affairs will be irregular expenditure in terms of Section 167 of the MFMA and must be recovered from the councilor(s) concerned.

8. Transfers to municipalities

8.1 Criteria for the release of the Equitable Share

Section 216(2) of the Constitution of South Africa requires that the National Treasury must enforce compliance with the measures established to ensure both transparency and expenditure control in each sphere of government and may stop the transfer of funds to an organ of state if that organ of state commits a serious or persistent material breach of those measures.

The criteria for the release of the Equitable Share Instalments for the 2023/24 municipal financial year are as follows:

- The 2023/24 adopted budget must be funded and adopted by Council as per the legal framework, as required in terms of section 18 of the MFMA and consistent with the Budget Council and Budget Forum resolutions;
 - a. The adopted budget must include budget allocations for bulk suppliers current account payments;
 - b. Should the adopted budget still be unfunded, then a credible funding plan will be required to show how the municipality intends moving progressively out of this position into a funded state, if this plan has been adopted in the past, then a progress report must be submitted on the framework previously shared to guide municipalities which is aligned to the rescue phase of the new approach to Municipal Financial Recovery Service (MFRS);

- c. Those municipalities that adopted an unfunded budget must work with their respective Provincial Treasuries to rectify this position in the lead up to the main adjustments budget process in February 2023; and
- d. A council resolution showing commitment to address the unfunded position must be submitted by these municipalities to the National Treasury by 01 July 2023.
- Credible mSCOA data strings and source documents for the 2023/24 MTREF and 2022/23 audits must be generated directly from the core municipal financial system and successfully uploaded to the Local Government GoMuni Portal. Source documents must be submitted in PDF and no excel based spreadsheet/ templates will be accepted;
- The report submitted by bulk suppliers in terms of section 41 of the MFMA must indicate that the current account has been paid timeously in terms of section 65(2)(e) of the MFMA. In addition, where the municipality has a repayment plan with Eskom and/ or the water boards, proof that the current accounts have been paid and a copy of the agreed upon payment plan (or evidence of negotiations underway with creditors) must be submitted to the National and provincial treasuries;
- Municipalities must provide evidence that SARS, pension and other staff benefits deducted from municipal officials have been paid over the appropriate Funds and/ or institutions;
- The information requested in MFMA Circulars No. 93, 98 and 107 on the reconciliation of the valuation roll have been submitted to the National Treasury as per the required timeframes;
- The Competency Regulations reporting requirements have been complied with;
- Provide a copy of the Unauthorised, Irregular, Fruitless and Wasteful (UIF&W) expenditure register, the latest copy of the Municipal Public Accounts Committee (MPAC) recommendations, Council Resolution on UIFW as well as a copy of the council approved UIFW Reduction Strategy/ Plan, proof of establishment of the Disciplinary Board (or evidence of progress towards their establishment) including evidentiary evidence demonstrating functionality of the Disciplinary Board and updated audit action plan (where the audit has been completed);
- Those municipalities that received an adverse or disclaimed opinions for the 2020/21 financial year will not receive their funding allocation unless there is a council resolution committing to address these opinions with an implementable plan. The resolution must be signed by each member of the Council and submitted to National Treasury by 1 October 2023;
- The Municipal Financial Recovery Service progress reporting framework for financial recovery plans must be complied with by municipalities under intervention in terms of S139 of the Constitution;
- Additionally, those municipalities that have outstanding audits for both the 2020/21 and 2021/22 financial years as well as municipalities with outstanding 2021/22 audit opinions that also received an adverse or disclaimer opinion in 2020/21, will also not receive their allocation; and
- Any other outstanding documents as per the legal framework have been submitted including the AFS submission (municipality only and consolidated AFS).

Failure to comply with the above criteria will result in National Treasury invoking section 38 of the MFMA which empowers National Treasury to withhold a municipality's equitable share if the municipality commits a serious or persistent breach of the measures established in terms of Section 216(2) of the Constitution which includes reporting obligations set out in the MFMA and National Treasury requests for information in terms of Section 74 of the MFMA.

9. The Municipal Budget and Reporting Regulations

9.1 Schedule A – version to be used for the 2023/24 MTREF

National Treasury has released Version 6.7 of the Schedule A1 (the Excel Formats) which is aligned to Version 6.7 of the *mSCOA* classification framework and must be used when compiling the 2023/24 MTREF budget.

All municipalities must prepare their 2023/24 MTREF budgets in their financial systems and produce the Schedule A1 directly from their financial system.

Municipalities must start early enough to capture their tabled budget (and later the adopted budget) in the budget module in the financial system and must ensure that they produce their Schedule A1 directly out of the budget module. **Manual capturing on the A1 schedule version 6.7 is not allowed** in terms of the *mSCOA* Regulations.

National Treasury has protected the A1 schedule version 6.7 in order to ensure that the Schedule A1 generated directly from the financial system and not populated manually.

The budget, adjustments budget and Section 71 monthly reporting Schedules that have been regulated in terms of the MBRR have also been aligned to the *mSCOA* chart version 6.7. The revised MBRR Schedules for the 2023/24 MTREF and its linkages to the financial and non-financial data string are available on the link below:

<http://mfma.treasury.gov.za/RegulationsandGazettes/Municipal%20Budget%20and%20Reporting%20Regulations/Pages/default.aspx>

9.2 Assistance with the compilation of budgets

If municipalities require advice with the compilation of their respective budgets, specifically the budget documents or Schedule A1, they should direct their enquiries to their respective provincial treasuries or to the following National Treasury officials:

Province	Responsible NT officials	Tel. No.	Email
Eastern Cape	Matjati Mashoeshoe Pitso Zwane Oreal Tshidino	012-315 5553 012-315 5171	Matjati.Mashoeshoe@treasury.gov.za Pitso.Zwane@Treasury.gov.za Ophulusa.Tshidino@Treasury.gov.za

National and provincial treasuries will analyse the credibility of the data string submissions.

9.3 Assessing the 2023/24 MTREF budget

National and provincial treasuries will assess the 2023/24 MTREF budgets to determine if it is complete, funded and complies with the *m*SCOA requirements. The *m*SCOA data strings for the tabled (TABB) and adopted (ORGB) budgets will be used for this assessment.

Municipalities should note that the MFMA legislated timeframes for submission of the tabled and adopted budgets are outer timeframes. In this context, different to previous MTREF's, going forward, if the municipality's budget is unfunded, council in terms of MFMA section 74 is requested to table and/ or adopt a budget funding plan together with the budget at the same time.

The Treasuries' **assessment period** of municipal budgets will be from **01 April to 30 June 2023 for both the tabled and adopted budgets**. However, (in a context of some municipalities persisting with unfunded budgeting practices), **if the municipality tabled and/ or adopted an unfunded budget in the 2022/23 MTREF**, the municipality must adjust its schedule of key budget deadlines to facilitate an earlier Treasuries' assessment thereof between 1 April to 15 May 2023 for both tabled and adopted budgets. In this period the national and provincial treasuries will evaluate all municipal budgets for completeness and for being fully funded. Any adjustment that needs to be made must be done before the start of the municipal financial year on 30 June 2023.

Importantly, in order to generate an adopted budget (ORGB) data string, the budget must be locked immediately on the financial system at the start of the new municipal financial year on 1 July. Therefore, once the ORGB data string has been generated, errors in the ORGB can only be corrected via an adjustments budget in February of each year. In terms of the design principles of *m*SCOA, municipalities are not allowed to open the budget on the system for corrections after it has been locked. This means that the tabled budget data string (TABB) should in fact be verified and errors in the TABB should be corrected in the ORGB **before the adopted budget is locked on the financial system and the ORGB data string is generated**.

Amending an unfunded, incomplete and erroneous budget through an adjusted budget is also not encouraged as the National Treasury only considers an adjusted budget in the third and fourth quarter of the financial year for analysis and publication purposes. This will result in overspending and unauthorised expenditure not been monitored in the first six months of the financial year.

The National Treasury would like to emphasise that ***where municipalities have adopted an unfunded budget together with a funding plan that lacks credibility, they will be required to correct the funding plan and ensure that it is credible. The credible funding plan must be immediately adopted by the Municipal Council, and the changes to the***

budget must be effected in the mid-year adjustments budget to ensure compliance with Section 18 of the MFMA.

Municipalities with municipal entities are once again reminded to prepare consolidated budgets and in-year monitoring reports for both the parent municipality and its entity or entities. The following must be compiled:

- An annual budget, adjustments budget and monthly financial reports for the parent municipality in the relevant formats;
- An annual budget, adjustments budget and monthly financial reports for the entity in the relevant formats; and
- A consolidated annual budget, adjustments budget and monthly financial reports for the parent municipality and all its municipal entities in the relevant formats.

The budget and data strings that the municipality submits to National Treasury must be a consolidated budget for the municipality (including entities). The budget of each entity must be submitted on the D Schedule in pdf format.

In the past it was noted that municipalities have challenges to align the audited outcomes on the financial system to A1 Schedule. Municipalities must ensure that the audited figures and adjusted budget figures captured on the A1 Schedule aligns to the annual financial statements and Schedule B respectively.

10. Submitting budget documentation and A1 schedules for 2023/24 MTREF

To facilitate oversight of compliance with the Municipal Budget and Reporting Regulations, accounting officers are reminded that:

- Section 22(b)(i) of the MFMA requires that, ***immediately*** after an annual budget is tabled in a municipal council, it must be submitted to the National Treasury and the relevant provincial treasury in electronic formats. If the annual budget is tabled to council on **31 March 2023**, the final date of submission of the electronic budget documents and corresponding *mSCOA* data strings is **Monday, 03 April 2023**; and
- Section 24(3) of the MFMA, read together with regulation 20(1) of the MBRR, requires that the approved annual budget must be submitted to both National Treasury and the relevant provincial treasury within ten working days after the council has approved the annual budget. However, given that municipalities are generating the annual budgets directly from the financial system as required by the *mSCOA* Regulations and that the budgets must be verified before it is locked on the financial system and transacted against, municipalities must submit the approved budget to the National Treasury and the relevant provincial treasury in electronic formats ***immediately*** after approval by the municipal council. Therefore, if the annual budget is tabled to council on **31 May 2023**, the final date of submission of the electronic budget documents and corresponding *mSCOA* data strings is **Thursday, 01 June 2023**.

Since the 2020/21 MTREF, municipalities are no longer required to submit hard copies of all required documents including budget related, Annual Financial Statements and Annual Reports to National Treasury via post or courier services. Electronic copies must be submitted in PDF format to the GoMuni Upload portal.

10.1 Expected submissions for 2023/24 MTREF

The following information should be submitted for the 2023/24 MTREF:

- The budget documentation as set out in the MBRR. The budget document must include the main A1 Schedule Tables (A1 - A10);
- The non-financial supporting tables (A10, SA9, SA11, SA12, SA13, SA22, SA23, SA24 etc. and any other information not contained in the financial data string) in the A1 schedule must be submitted in the prescribed *mSCOA* data string in the format published with Version 6.7 of the A1 schedule;
- The draft and final service delivery and budget implementation plan (SDBIP) in electronic PDF format;
- The draft and final IDP;
- The council resolution for the tabled and adopted budgets;
- Signed Quality Certificate as prescribed in the MBRR for the tabled and adopted budgets;
- D Schedules specific for the entities;
- A budget locking certificate immediately at the start of the new municipal financial year on 1 July;
- The National or Provincial treasury input to the tabled budget must be included as an Annexure to the adopted budget together with the municipality's explanation of how such was addressed in the adopted budget. If not, the explanation should provide reasons; and
- The bulk water-and electricity invoices for the 3 months immediately preceding respectively the tabled and adopted budgets, must be included as an annexure to the tabled and adopted budgets as part of supporting the municipalities provision for and calculations of payments to bulk suppliers over the 2023/24 MTREF.

10.2 Portals for the submission of information

Municipalities must ensure that the documents are submitted to the correct portals/ mailboxes. These portals/ mailboxes are:

https://lg.treasury.gov.za/ibi_apps/signin (GoMuni Upload Portal) – All documents required in terms of legislation, including:

- *mSCOA* Data Strings by approved registered users;
- Budget-related and in-year documents and schedules (A, B and C) by approved registered users; and
- Reconciliation of the valuation roll to the financial system (as per MFMA Circular No. 93).

Budget related documents and schedules must be uploaded by approved registered users using the GoMuni Upload Portal at: https://lg.treasury.gov.za/ibi_apps/signin. The GoMuni Upload Portal does not have the same size restrictions encountered with lgdocuments@treasury.gov.za, but requires all documents to:

- Be in PDF format only; and
- Each PDF file must NOT contain multiple document e.g. council resolution and quality certificate within the budget document. Each document type must be identified clearly and uploaded separately.

Municipalities may **only** send electronic versions of the above documents to lgdocuments@treasury.gov.za when experiencing problems with the GoMuni Upload Portal.

lgdataqueries@treasury.gov.za – Database related and submission queries and the grant rollover templates.

lgdocuments@treasury.gov.za – Any additional information required by National Treasury that is not listed under the GoMuni Upload portal such as the documents meeting the criteria to release Equitable Share and the contact list information.

FMCM and Audit Action plans – using the web-enabled systems and as articulated in MFMA Circulars No. 113 and 114.

Please do not submit the same document to ALL the platforms listed above as it means that our Database Team must register the same documents three times which slows down the process. **Any document/ queries that are submitted to the incorrect portal/ mailbox will be deleted and not processed.**

10.3 Publication of budgets on municipal websites

In terms of section 75 of the MFMA, all municipalities are required to publish their tabled budgets, adopted budgets, annual reports (containing audited annual financial statements) and other relevant information on the municipality's website. This will aid in promoting public accountability and good governance.

All relevant documents mentioned in this circular are available on the National Treasury website, <http://mfma.treasury.gov.za/Pages/Default.aspx>. Municipalities are encouraged to visit it regularly as documents are regularly added / updated on the website.

10.4 Communication by municipal entities to National Treasury

Municipal entities should not request meetings directly from National Treasury. National Treasury will only engage the entities through the parent municipalities. This includes all communications apart from the legislative reporting requirements.

Introduction

This budget circular is a follow-up to MFMA Circular No. 122 that was issued on 09 December 2022. It aims to provide further guidance to municipalities with the preparation of their 2023/24 Medium Term Revenue and Expenditure Framework (MTREF) budgets and should be read together with the budget circulars that have been issued previously.

The grant allocations as per the 2023 Budget Review and the 2023 Division of Revenue Bill are also key focus areas in this circular. Municipalities are reminded to refer to the annual budget circulars of the previous years for guidance in areas of the budget preparation that is not covered in this circular.

1. The South African economy and inflation targets

GDP is expected to grow by 0.9 per cent in real terms in 2023, compared with an estimate of 1.4 per cent at the time of the medium-term budget policy statement (MTBPS), recovering slowly to 1.8 per cent in 2025.

The economic outlook faces a range of risks, including weaker-than-expected global growth, further disruptions to global supply chains and renewed inflationary pressures from the war in Ukraine, continued power cuts and a deterioration in port and rail infrastructure, widespread criminal activity, and any deterioration of the fiscal outlook.

Government is taking urgent measures to reduce load-shedding in the short term and transform the sector through market reforms to achieve long-term energy security. Several reforms are under way to improve the performance of the transport sector, specifically freight rail and to improve the capability of the state.

The following macro-economic forecasts must be considered when preparing the 2023/24 MTREF municipal budgets.

Table 1: Macroeconomic performance and projections, 2021 - 2026

Fiscal year	2021/22	2022/23	2023/24	2024/25	2025/26
	Actual	Estimate	Forecast		
CPI Inflation	4.9%	6.9%	5.3%	4.9%	4.7%

Source: Budget Review 2023.

Note: the fiscal year referred to is the national fiscal year (April to March) which is more closely aligned to the municipal fiscal year (July to June) than the calendar year inflation.

2. Key focus areas for the 2023/24 budget process

2.1 Local government conditional and unconditional grants allocations

Over the 2023 MTEF period, local government allocations will increase by a total of R14.3 billion, made up of R8.1 billion in the local government equitable share and R6.2 billion in direct conditional grants. This takes the total direct allocation to R521.7 billion over the same period. These allocations alleviate some of the financial pressures, particularly in basic services, where the costs of providing services are rising.

The *local government equitable share* and related allocations increases at an annual average rate of 7.8 per cent and municipal conditional grants increase by 3.5 per cent over the 2023 MTEF period.

The *local government equitable share* formula has been updated to account for projected household growth, inflation and estimated increases in bulk water and electricity costs over the 2023 MTEF period. It also includes allocations for the operational and maintenance costs associated with the provision of free basic services.

The 2023 Budget has ensured that sufficient provision has been made to ensure that all municipalities are fully subsidised to support indigent households. Following this, R1.35 billion has been left unallocated in the LGES formula for 2023/24 to serve as a precautionary measure should municipal electricity tariffs exceed the 20.7 per cent provided for in the formula (see section 5.7 on why this is above the 18.7 per cent approved by the Energy Regulator). If the actual increase in municipal bulk tariffs exceeds the provision made in the formula, it will be the first call on those unallocated funds. We will consider funding broader cost relief measures for municipalities if funds remain available after that.

The R6.2 billion in direct conditional grants is funded from the Budget Facility for Infrastructure (BFI) and is broken down as follows:

- **R2.2 billion** added to the Urban Settlements Development Grant to fund the implementation of projects in the eThekweni Metropolitan Municipality and the City of Johannesburg;
- **R461 million** added to the Public Transport Network Grant to align funding with the revised implementation plan and cash flow projections for the City of Cape Town's MyCiTi public transport network project; and
- **R3.4 billion** added to the Regional Bulk Infrastructure Grant to fund 3 water projects in Sol Plaatje Local Municipality, Drakenstein Local Municipality and Nelson Mandela Bay Metropolitan Municipality.

Notable changes to the conditional grants system

Housing emergency grants

Changes to conditional grants in the 2023 Budget include the discontinuation of the conditional emergency housing grants for provinces and municipalities. The baselines of these two grants are shifted to the Department of Human Settlements. This will allow the department to respond quickly in the event of an emergency housing need.

Changes to the INEP conditional grant frameworks

As part of government's efforts to accelerate access to electricity thereby addressing the energy crisis, Eskom and municipal INEP grants will begin funding alternative energy technologies such as rooftop solar and energy-saving devices. Due process must be followed to access funding for these new technologies. As a result, both Eskom and municipalities will need to conform to the set requirements by submitting business plans by 31 October 2023. These business plans, will need to be approved by the Department of Mineral Resources and Energy (DMRE) before they can be implemented. Priority should be given to new connections, i.e., non-grid technology should be targeted at households that do not have access to electricity.

The annual Division of Revenue Bill was published on 22 February 2023. The Bill specifies the grant allocations and municipalities must reconcile their budgets to the numbers published therein in compiling their 2023/24 MTREF.

The Division of Revenue Bill, 2023, which includes the annexures outlining allocations to each municipality is available at:

<http://www.treasury.gov.za/documents/national%20budget/2023/default.aspx>

2.2 Re-enforcing improved intergovernmental relations in the 2023 Division of Revenue Bill, (DoRB)

In order to strengthen the system of good intergovernmental relations as envisaged in the Chapter 3 of the Constitution and subsequent related legislation, municipalities are reminded of Section 31(3) of DoRA that provides for the facilitation of personal liability for unnecessary litigation. As required by subsection (1)(a) of this clause, read together with section 41(3) of the Constitution, a municipality may only institute litigation against any organ of state, state-owned enterprise, public- and/ or municipal entity after exhausting all dispute resolution mechanisms required and/ or available to the municipality in terms of existing intergovernmental relations processes, policy and/ or any related contract with the municipality, including in terms of the Municipal Finance Management Act, 2003, the Intergovernmental Relations Framework Act, 2005, and/ or the Electricity Regulation Act, 2006 (dispute processes administered by National Energy Regulator of South Africa (NERSA)).

Section 31 is amended to include a clause that requires that where an organ of state decides to institute judicial proceedings against another organ of state, it must, within 10 working days of its decision, notify the National Treasury, the relevant provincial treasury, the Department of Cooperative Governance and the Auditor-General, of the details of compliance with Chapter 4 of the Intergovernmental Relations Framework Act, 2005, including an explanation of the failure to resolve the dispute.

2.3 Conditional grants usage

Conditional grant funds may only be used for the purposes, and subject to the conditions specified in the framework for each conditional grant. These conditions are binding in terms of sections 11 and 12 of the annual Division of Revenue Act. Any instruction by a municipal, provincial, or national official or politician that is inconsistent with the framework of a conditional grant is invalid. Municipalities are reminded that in terms of section 32 of DoRA, spending of a grant that is inconsistent with DoRA is considered irregular or unauthorised expenditure.

3. Pension and medical aid fund defaults

There has been a growing trend where municipalities are deducting pension and/ or medical aid contributions from officials but are not paying it over to their pension- and/ or medical aid fund. This is inconsistent with the intent and spirit of the MFMA and constitutes an act of financial misconduct in terms of section 171 of the MFMA read with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings, 2014 and also a financial offence in terms of section 173 of the MFMA read together with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings. Municipal Councils should refer these actions to the Disciplinary Boards for further investigation and should also lay criminal charges against the accounting officer or any other responsible or delegated official who has failed to perform the responsibility outlined in terms of section 65(2)(f) of the MFMA which states that “the accounting officer of a municipality must take all reasonable steps to ensure that the municipality complies with its tax, levy, duty, pension, medical aid, audit fees and other statutory commitments”. Municipal Councils should also consider further measures and actions in terms of the Pension Funds Act, as may be applicable.

4. Municipal Standard Chart of Accounts (mSCOA)

4.1 Version 6.7 of the *m*SCOA Chart Go Live

Version 6.7 of the *m*SCOA chart will go live on 13 March 2023, whereafter tabled budget data strings can be uploaded on the GoMuni portal.

For new *m*SCOA chart changes to be considered for version 6.8 of the chart, a Frequently Asked Questions (FAQ) must be logged by 31 August 2023 on the *m*SCOA FAQ database on GoMuni. FAQ queries can be logged at:

https://lg.treasury.gov.za/ibi_apps/portal/mSCOA_FAQ

It is important that the issue logged is described clearly and that sufficient supporting evidence is provided to ensure that all aspects of the issue are considered. After investigating the query logged, the following actions will be taken:

- If the query does not require a chart change, the FAQ will be closed, and feedback will be provided to the logger.
- If the query warrants a chart change, it will be submitted for consideration and approval by the relevant committees within the National Treasury.

Chart changes are communicated in October of each year to allow sufficient time for municipalities and vendors to effect such changes. Chart changes are officially published in the MFMA Budget Circular in December of each year.

4.2 Additional requirements to change municipal financial systems

The cost and risk associated with procuring and implementing a new Enterprise Resource Planning (ERP) financial system necessitate careful consideration and extensive planning to ensure a smooth operational transition. Such a transition takes at least 18 months to conclude and does not come without challenges and disruptions in operations.

The National Treasury will regulate the minimum business processes and system specifications for *m*SCOA by the end of 2024/25. A new transversal tender for the provision of ERP financial systems that complies with these regulations will be put in place once the regulations have been issued. Municipalities should therefore exercise extreme caution when changing their financial systems at this stage to eliminate fruitless and wasteful expenditure by procuring financial systems that might not comply with the said regulations.

Municipalities are reminded to follow the due diligence processes set out in MFMA Budget Circulars No. 93, 98 and *m*SCOA Circulars No 5 and 6 prior to procuring new financial systems to protect them from making incorrect decisions in this regard.

In addition, and **with immediate effect**, municipalities must inform the National and relevant Provincial Treasury of any intention to replace the financial system currently operating at the municipality prior to inviting proposals from system providers. This is a requirement in terms of section 74 of the MFMA. The submission should include:

- A comprehensive motivation with specific reasons for why it is deemed necessary to replace the existing financial system;
- A copy of the service level agreement with minutes of the meetings between the municipality and the current service provider (financial system vendor) during the previous twelve months;
- An assessment to determine which modules of the existing financial system are being utilised by the municipality. Reasons must be provided for modules not in operation. Details and reasons must be provided on the use of third-party systems to provide functionality required in terms of MFMA Circular No. 80;

- An assessment to detail the proficiency of municipal users to utilise the current financial system properly. Reasons must be provided if users are not proficient in the use of the system and the details must be provided on how the system is being operated and transactions are being captured on the system in such cases;
- The date on which the existing financial system was implemented, the procurement and implementation costs and the current operational costs thereof must be disclosed;
- The organisational structure, specifically for the IT department/ function, clearly indicating management capacity and responsibility for operating the financial system;
- A technical assessment should be submitted indicating how the existing ICT infrastructure, server and network comply with the requirements of the current financial system; and
- Copies of all IT strategies, policies and procedural documents including the IT disaster recovery plan must be made available.

The above submissions and all enquiries must be forwarded to lgdocuments@treasury.gov.za. A working committee comprising representatives from the National and Provincial Treasuries, the Office of the Auditor-General and other relevant stakeholders will assess the submissions and respond with its findings. These findings must be tabled in Council and a council resolution must be submitted to lgdocuments@treasury.gov.za within 14 working days after the Council meeting has taken place.

It must be emphasized that the combination of both credible data inputs and an effective financial system is fundamental to ensure the quality and timeliness of financial reporting. If the data input into the financial system is incorrect then any management information generated by the system will lack credibility and reliability for decision making. Furthermore, a municipality with poorly designed business processes will not resolve the problem by implementing a new financial system. Processes must firstly be redesigned with the necessary data validation rules if the municipality is to improve its data integrity. This foundation is integral to ensuring that software applications generate credible information and can be used effectively by municipalities.

5. The revenue budget

Similar to the rest of government, municipalities face a difficult fiscal environment. The weak economic growth has put pressure on consumers' ability to pay for services, while transfers from national government are growing more slowly than in the past. Some municipalities have managed these challenges well, but others have fallen into financial distress and face liquidity problems. These include municipalities that are unable to meet their payment obligations to Eskom, Water Boards and other creditors. There is a need for municipalities to focus on collecting revenues owed to them and eliminate wasteful and non-core spending. It is important to note that the municipal equitable share as a policy instrument is meant to subsidise services to the poorest of the poor and not to pay municipal creditors. This bad practice by municipalities will have to be addressed as a matter of urgency. Municipal creditors should be advised that municipalities cannot use funds allocated for basic service provision to pay creditors.

Municipalities must ensure that they render basic services, maintain their assets and a clean environment. Furthermore, there must be continuous communication with the community and other stakeholders to strengthen awareness and participation and to improve the municipality's reputation. This will assist in attracting investment in the local economy which may result in increased employment.

Some municipalities are experiencing serious liquidity challenges. Therefore, the new leadership is advised to:

- Decisively address unfunded budgets by reducing non-priority spending and improving revenue management processes to enable collection; and
- Address service delivery failures by ensuring adequate maintenance, upgrading and renewal of existing assets to enable reliable service delivery.

5.1 Maximising the revenue generation of the municipal revenue base

Reference is made to MFMA Circulars No. 93, paragraph 3.1 and No. 98, paragraph 4.1. The emphasis is on municipalities to comply with Section 18 of the MFMA and ensure that they fund their MTREF budgets from realistically anticipated revenues to be collected. Municipalities are cautioned against assuming collection rates that are unrealistic and unattainable as this is a fundamental reason for municipalities not attaining their desired collection rates.

The purpose of the above mentioned MFMA Circulars is to ensure that the municipalities are using their entire revenue base as the basis for the revenue budget. It is essential that municipalities reconcile their most recent consolidated valuation roll data to that of the current billing system data to ensure that revenue anticipated from property rates is realistic. The municipalities should implement a data management strategy and develop internal capacity to perform these reconciliations and investigations to improve completeness of billing.

One of the aims of the reconciliation process is to identify exceptions, i.e. records on the general valuation roll that are not on the billing system and records on the billing system and vice versa. In addition, the reconciliation must identify duplicated records, missing data, and data errors. These exceptions should then be investigated, and remedial action strategies developed for data cleansing and other corrective actions. The Debtors Ageing data should also form part of the reconciliation process so that “debtors” can be tracked and assessed at a property record level and prioritised for verification of rates liability measured against a MPRA property and owner.

To facilitate reconciliation of the separate databases (General Valuation Roll and Billing), a unique property identifier (common primary unique link code) must be created and populated for each rateable property on the general valuation roll system and on the rates billing system. This property identifier must be unique, without duplicates, and must remain constant for the life of the property. The standards adopted by the South African Council for the Property Valuers Profession (SACPVP), namely South African Standard: Municipal Valuations for Property Rating, specifies that the Surveyor General Code SG 21-digit Code, derived, and created from the property description, be applied for all registered full title properties defined in terms of part (a) of the definition of property.

For all other MPRA defined property, Part (a) Sectional Title, Part (b) Registered Rights, Part (c) Land Tenure Rights and Part (d) PSI and, apportioned multiple use property in terms of sections 8(2)(i) and 9(2), an added suffixed 5 digits to the SG 21-digit code must be assigned by the designated municipal valuer, thereby creating a unique 26-digit code. The municipality must ensure that the SG21 digit code and 26-digit coding system is applied in their valuation roll management system and billing system and engage with their designated municipal valuer and systems service providers to implement the unique property identifier.

Further it is important that municipalities who are performing a general valuation (GV) to implement a new valuation roll on 1 July 2023, must also as best practice compare the current consolidated roll to the new valuation roll. This will identify any anomalies and errors of category of property and market values for review and investigation and the option of lodging an objection by the municipality, where applicable. This process should also identify outliers and shifts in market values by category and area so that tariffs on the new roll can be modelled and determined in an equitable manner to avoid rates shocks.

Municipalities should undertake this exercise as a routine practice during the budget process so that supplementary adjustments to the valuation roll are kept up to date. In order to ensure that the most updated information is used for the reconciliations, municipalities are reminded to adhere and comply with Section 23(1)(2) of the MPRA and therefore use the Part A register as the basis for performing the reconciliations going forward.

Furthermore, municipalities are also advised and expected to comply with Section 8(1) of the MPRA in terms of the billing methodology that should to be specified within their policies to ensure that the correct categories (based on the selection made by the municipality) are used in the reconciliation process.

The list of exceptions derived from this reconciliation will indicate where the municipality may be compromising its revenue generation in respect of property rates or whether the municipality is overstating its revenue budget.

A further test would be to reconcile this information with the Deeds Office registry. In accordance with the MFMA Circular No. 93, municipalities are once more requested to submit their reconciliation of the Valuation roll/ Part A register to the billing system to the National Treasury on a quarterly basis by no later than the 10th working day after the end of the quarter. A detailed action plan must accompany the reconciliation where variances are noted.

The above information must be uploaded by the municipality's approved registered user(s) using the GoMuni Upload Portal at: https://lg.treasury.gov.za/ibi_apps/signin. If the municipality experience any challenge uploading the information, a request for an alternative arrangement may be emailed to linda.kruger@treasury.gov.za.

Municipalities are reminded of the need to clearly communicate the GV appeals and objection process to residents to ensure that any disputes are timeously resolved.

Revenue Collection – No operation can be sustainable if it does not collect its revenue. A municipality is no different. There is a misconception that a municipality may not interrupt or restrict the supply of water services of a defaulting consumer. The National Treasury confirms that neither the Water Services Act, 1997 (Act No. 108 of 1997) or any other legislation prevents a municipality from cutting the supply of water to a defaulting consumer unless the consumer is an indigent in which case the water services to that household must be restricted to the national free basic water limit of 6 kilolitre water monthly (or 50 kilowatt hours in the case of free basic electricity monthly). This was confirmed by the Constitutional Court in the matter of Mazibuko and Others v City of Johannesburg and Others (CCT 39/09) [2009] ZACC 28; 2010 (3) BCLR 239 (CC); 2010 (4) SA 1 (CC) (8 October 2009).

Municipalities are urged to use the restriction/ interruption of supply of both water and electricity services as a collection tool. Effective from the tabling and adoption of the 2023/24 MTREF, municipalities' By-laws and policies must facilitate this and clearly stipulate the order in which any partial payment of the consolidated municipal bill (including property rates) will be applied as well as the process before the supply of water and electricity services will be cut. The National Treasury recommended that any partial payment firstly be applied to property rates, wastewater, waste management, water and lastly to electricity. When interrupting or restricting the supply of water it is important that such is undertaken together with the municipal engineer(s) to ensure a continued minimum supply of waste-water.

Municipalities should develop a Wheeling Framework to allow for the transmission of energy across their networks. These wheeling frameworks provide an opportunity for municipalities to generate revenue from their distribution networks. Provincial Treasuries or National Treasury can be approached for support to develop these frameworks.

5.2 Funding Depreciation

The information shared in Circular 115 regarding the funding of the depreciation refers. It is important to note that depreciation represents the cost of using assets in service delivery and forms part of the total cost of providing the municipal service. Accordingly, it should be included in the setting of cost reflective tariffs to recover the full cost of rendering the service, failing which the depreciation will not be cash backed on Table A7 and will remain a journal entry with no value as mentioned in MFMA Circular No. 115.

5.3 Tariff-setting – the impact of loadshedding

Loadshedding not only affects the electricity service but also some municipalities' ability to pump water, thereby negatively impacting the stability of water supplies and the related functioning of the wastewater reticulation network. The loadshedding crisis has been declared a state of disaster and will require tough budgeting choices for municipalities to make sure that basic municipal services are sustained. The regulations published in the Government Gazette No. 48152 on 27 February 2023 in terms of the Disaster Management Act, 2002 (Act 57 of 2002) require municipalities to "ensure continuous operation of water infrastructure and other specified essential infrastructure, including by installing alternative energy sources or other measures to provide an uninterrupted power supply." Municipalities are also required to "mobilise available resources" and "provide funds for this purpose, subject to affordability." As an immediate interim solution back-up electricity to pump water should be prioritised while being mindful of its affordability within the municipality's available funding sources and other critical priorities. The municipality need to adequately plan and prioritise funding in its 2023/24 MTREF for this purpose, including:

- When planning to pump water/ maintain the wastewater service by way of any alternative solution(s), it is important that the municipality properly plan and budget for the associated capital and operational costs to operate and maintain the solution(s) over the 2023/24 MTREF and longer-term;
- Any additional cost the municipality already incurred in this regard during the period of elevated loadshedding since December 2022 should be projected to continue in 2023/24 i.e. diesel to operate a generator;
- Although a state of emergency has been declared to deal with the continual loadshedding challenges in the country, it is likely that loadshedding will continue during the 2023/24 municipal financial year. It is proposed that municipalities factor in the impact of loadshedding on their electricity revenue projections, taking into account current experience in terms of loadshedding practices by Eskom;
- The additional costs of prolonged loadshedding should be considered;
- Municipalities are always asked to try to balance full cost recovery on services with affordability for their residents. In practice, this means that where the full increase in the cost of a service is not passed on to consumers, municipalities must offset the increased costs through savings identified elsewhere in their operations. Therefore, **reducing/ limiting overall expenditure** is a key part of budgeting for the response to loadshedding. The municipality should stick to its core mandate and functions and carefully review overall expenditure to manage the net effect. Measures should include aggressively cutting costs, frills, and vanity projects, dealing with bloated administrations and structures possibly duplicated across Municipal Manager and Mayoral offices, and applying for exemptions from the annual salary increases if these are not affordable;
- While municipalities are urged to maximise efficiency in their operations, tariff setting efforts should consider the need to make additional provision for repairs and maintenance associated with infrastructure breakdowns during loadshedding;
- **Reducing/ limiting overall expenditure** – the municipality should stick to its core mandate and functions – it is necessary to carefully look at the overall expenditure side to manage the net effect, including aggressively cutting costs, fancy, frills, vanity

projects, deal with bloated admin- and structures possibly duplicated across Municipal Manager and Mayoral offices, and apply for exemptions from the annual salary increases; and

- The cost should be considered and included when setting the tariffs of the service(s) to which it relates.

Municipalities should also budget for reduced bulk purchases and sales to municipal customers based on the same loadshedding assumptions cited above.

Municipalities should carefully monitor their Eskom accounts for any penalties that result from increased demand immediately after a period of loadshedding is ended. Eskom has indicated that they will reverse any penalties for exceeding notified maximum demand that results from the implementation of loadshedding. This should be factored into the tariff calculation to ensure that consumers are not overcharged.

Lastly, it is important to note that a municipality may only introduce a load-shedding levy or surcharge with the approval of the Minister of Finance and in terms of the legislated processes set-out in the MFMA and Municipal Fiscal Powers and Functions Act, 2007.

5.4 Setting cost-reflective tariffs

Reference is made to MFMA Circular No. 98, paragraph 4.2. The setting of cost-reflective tariffs is a requirement of Section 74(2) of the Municipal Systems Act which is meant to ensure that municipalities set tariffs that enable them to recover the full cost of rendering the service. This forms the basis of compiling a credible budget. A credible budget is one that ensures the funding of all approved items and is anchored in sound, timely and reliable information on expenditure and service delivery (Financial and Fiscal Commission (FFC), 2011). Credible budgets are critical for local government to fulfil its mandate and ensure financial sustainability.

A credible expenditure budget reflects the costs necessary to provide a service efficiently and effectively, namely:

- A budget adequate to deliver a service of the necessary quality on a sustainable basis; and
- A budget that delivers services at the lowest possible cost.

The National Treasury issued a tariff setting tool and guide as part of MFMA Budget Circular No. 98 (refer item 4.2) on 6 December 2019 and since 2019, has encouraged municipalities to utilise the tool. **With effect, from the 2023/24 MTREF, all municipalities (except metropolitan cities and district municipalities that do not provide any services) as part of both the tabled and adopted MTREF submissions must submit the completed National Treasury tariff tool (in excel format)** illustrating that the revenue component of the budget is credible and funded and that the municipality's tariffs are cost reflective. If the municipality's initial calculation results in high increases to facilitate cost-reflectiveness, it is recommended that such are phased in over 3 to 5 years. The municipality's strategy in this regard should be included as part of the budget narratives.

This tool will assist in setting tariffs that are cost-reflective and enable a municipality to recover costs to fulfil its mandate. Going forward it is also imperative that every municipality fully embrace the Municipal Standard Chart of Accounts (*mSCOA*): costing component. Considering, *mSCOA* implementation is entering its sixth year of implementation, all municipalities must fully embrace and report also utilising the costing segment correctly. The National Treasury Municipal Costing Guide is available on the link below on the National Treasury website.

<http://mfma.treasury.gov.za/Guidelines/Documents/Forms/AllItems.aspx?RootFolder=%2fGuidelines%2fDocuments%2fMunicipal%20Costing%20Guide&FolderCTID=0x0120004720FD2D0551AE409361D6CB3E122A08>.

5.5 Tariffs – achieving a balance between cost-reflectiveness and affordability

National Treasury encourages municipalities to maintain tariff increases at levels that reflect an appropriate balance between the affordability to poorer households and other consumers while ensuring the financial sustainability of the municipality.

When setting tariffs, it is therefore critical to understand the economic environment specific to the municipality and consideration should include at least –

- *The socio-economic profile undertaken for the municipality* available on the National Treasury GoMuni portal – municipalities are encouraged to annually update their own socio-economic profile using the template model available on GoMuni;
- *The most recent average monthly household income in the municipality* as per Statistics South Africa (Stats SA) available on [Statistics South Africa | Improving Lives Through Data Ecosystems \(statssa.gov.za\)](http://Statistics South Africa | Improving Lives Through Data Ecosystems (statssa.gov.za));
- *The average property value in the municipality* per its most recent approved general valuation roll and/ or supplementary general valuation roll;
- *The number of indigent households in the municipality*, including any variation in the number of indigent households included in the Equitable Share: free basic services component for the municipality vs the municipality's own indigency level discretion; and
- *The economic drivers and activities specific to the municipal area¹; etc.*

The municipality's tariff-setting or other committee tasked with this role must understand and deliberately reflect on this context during the tariff-setting process. Considering the average monthly household income, the median affordable municipal bill would ideally not exceed proportionally approximately 10 to 15 per cent the average monthly household income. This median affordable bill, in combination with the median average property value should inform the basis to determine any rebates to households with income below the median. Furthermore, municipalities contemplating to increase free basic electricity allocations as an indigent relief measure, should do so only after careful consideration of the long-term financial impact that such a decision might have.

It is also important when setting particularly water and electricity tariffs that municipalities are encouraged to set two-tier tariffs, that include a basic availability charge to recover the fixed (direct and indirect) cost associated with the service in conjunction with consumption-based tariff bands. For example, in a drought, such tariffs will facilitate the ability to pay for infrastructure and maintenance, treating chemicals and salaries, etc. while parallel facilitating water restriction based on inclining tariffs as consumption increase. Furthermore, it is important to link the municipality's water tariffs to dam levels, also approved as part of the budget process. For example, if the dam levels drop to 60 per cent the first tier of restriction tariffs should become applicable in terms of the municipality's approved tariff policy.

It is also noted that NERSA approves seasonal tariffs for Eskom but not necessarily for the municipality. It is important that the municipality clearly factors this in its tariff application to NERSA, illustrating the cash flow crunch if the municipality is not similarly allowed a seasonal tariff to recover the higher Eskom bulk cost during winter months.

Lastly, municipalities are cautioned against setting tariffs that include operating inefficiencies. This could lead to tariffs falling into the unaffordable range.

¹ The spatialised tax data is now available through National Treasury for all municipalities that provides an up to date information on economic activity within a municipal boundary.

The Consumer Price Index (CPI) inflation is forecasted to be within the 3 to 6 per cent target band; therefore, municipalities are required to **justify all increases in excess of the projected inflation target for 2023/24** in their budget narratives and pay careful attention to tariff increases across all consumer groups. In addition, municipalities should include a detailed account of their revenue growth assumptions for the different service charges in the budget narrative.

Additional loadshedding considerations when calculating anticipated revenue collection rates include:

- Consumption patterns amongst pre-paid users who work more sparingly with electricity units. This can have a lagging effect on revenue estimations i.e. although units are paid for up front, it is not necessarily used in high-demand periods; and
- A decline in average consumption patterns for post-paid customers.

As part of its debtor management strategy municipalities should clearly communicate the impact of loadshedding on municipal tariff setting, including through education campaigns. Consumers will expect a decrease in their electricity bills as consumption drops due to loadshedding. Not understanding the impact of tariff structures (fixed and demand-driven components) can create distrust and reduce willingness to pay municipal accounts.

5.6 Municipal Debt Relief

An optimally designed debt solution for Eskom can leverage the structural reform of the electricity sector that is needed both on the Eskom side and the municipal side, however, the municipal debt owed to Eskom pose a material risk to any Eskom debt relief package. In parallel the challenge of defaulting municipalities cannot be separated from a consumer culture to not pay for services.

Municipal Debt Relief that is **conditional and application based**, has therefore been sanctioned. The relief is aimed to correct the underlying behaviour and operational practices in defaulting municipalities and Eskom while in parallel, progressively introducing a smart metering solution to change consumer behaviour by instilling a culture of payment for services consumed. The proposal consists of 4 elements:

- i. **Eskom will write-off all debt municipalities owe** as on 31 March 2023 (excluding the March 2023 current account). This will be done over three national financial years and require as a critical qualification that municipalities monthly honour their current (monthly consumption) Eskom and water accounts going forward and maintain a minimum average quarterly collection, etc;
- ii. Secondly, **new mechanisms are explored to resolve non-payment** – this to include a dispute ombud mechanism and re-assigning the license of persistent defaulters;
- iii. Thirdly, Eskom will continue to **implement a regime of installation of pre-paid meters** in Eskom supplied areas to improve Eskom collection. Municipalities are additionally encouraged to adopt a similar operating regime; and
- iv. Lastly, the National Treasury will continue to implement municipal revenue enhancement initiatives, including a transversal tender for a smart pre-paid meter solution to change to a forward looking culture of payment of the consolidated municipal bill.

More details on the application process and related conditions for municipalities will soon be outlined and published through a separate MFMA Circular.

5.7 Bulk Account Payments and Concessions

Since 2018/19, intense work was undertaken to resolve systemic and structural issues pertaining to the electricity function in municipalities. Core to this work was addressing the

escalating Eskom debt that threatened the sustainability of Eskom as well as that of municipalities.

During the process, Eskom agreed to provide relieve in certain areas. Municipalities are reminded of the following concessions that remain in place:

- The interest rate charged on overdue municipal bulk accounts were reduced from prime plus 5 per cent to prime plus 2.5 per cent;
- Payment terms were extended from 15 days to 30 days for municipal bulk accounts; and
- Eskom allocation of municipality payments to capital first and then to interest.

These concessions align to the MFMA and are meant to curb municipal growing debt levels by allowing a more conducive payment regime than what was previously employed. In addition, municipalities are urged to budget for and ring-fence their payment of bulk services. Bulk current account payments must be honoured religiously to avoid stringent application of the bulk suppliers' credit control policy.

Municipalities are also urged to enforce a culture of payment for services through their normal credit control processes. In this regard it should be noted that municipalities are only compensated for free basic services based on an indigent user component calculation through the equitable share. As such, a municipality's allocation of free basic services to all of the municipality's consumers is not funded in the equitable share. Every municipality, during the budget process, must consider the affordability to the municipality when allocating free basic services above the national norm and to consumers other than indigent consumers. **If a municipality has any arrears on any of its bulk supplier's accounts, it must limit its provision of free basic services to registered indigent consumers only.**

5.8 Critical Notice Affecting STS Meters

As highlighted in previous MFMA Circular No. 115 (dated 04 March 2022) municipalities are once again alerted that there is still a pending business risk to the prepayment metering industry that requires urgency of action. The token identifiers (TID) used to identify each credit token will run out of available numbers in November 2024, at which point all STS meters will stop accepting credit tokens.

The remedy is to visit each meter and enter a special set of key change tokens in order to reset the meter memory. Municipalities are advised that the National Treasury, through the Office of the Chief Procurement Officer (OCPO), will soon facilitate a transversal contract for the provision of auditing, re-calibration and re-configuration services for standard transfer specification compliant prepayment meters that align to minimum and critical technical specifications for local government. In this respect the development of the transversal contract for smart prepaid meters as per NRS 049 (per latest approved version) is at an advanced stage and should be issued shortly by National Treasury.

If your municipality or municipality entity is currently in the process of procuring for a solution or is planning to, you are cautioned:

- Against proceeding prior to the OCPO having issued and awarded the transversal contract for the provision of inter alia auditing, re-calibration and re-configuration services for standard transfer specification compliant prepayment meters Terms of Reference (ToR); and
- That, with immediate effect, you must inform and obtain the National Treasury's input prior to proceeding with any current procurement or proposed procurement for this purpose or any related solution or similar. This is to prevent unnecessary and wasteful expenditure on such solutions. Any request for National Treasury's input on the current or planned procurement of any related solution or similar or component thereof, must be

directed to the National Treasury for the attention of the Local Government Budget Analysis Unit (Mr. Sadesh Ramjathan) at Sadesh.Ramjathan@treasury.gov.za.

In this regard, municipalities will have two options to choose from:

- Firstly, to pursue the route of auditing, re-calibrating and re-configuring services for standard transfer specification compliant prepayment meters; and/ or
- Secondly, to replace the old meter with a new smart prepaid meter.

For both options, the municipality will have to budget accordingly as no additional funding will be available through the national fiscus.

Your assistance in proactively ensuring that the municipality and/ or its entities are not adversely affected by these processes will be appreciated.

5.9 Completeness and credibility of revenue related information in the Budget

The MBRR regulates the minimum level of information required from municipalities when compiling, implementing, monitoring, and evaluating the municipality's financial management situation. Failure to include the minimum required information hampers the municipal council, the public and stakeholders' ability to make informed decisions and engage on the matter. It also limits research, studies, and benchmarking undertaken for local, provincial, and national purposes.

The National Treasury would like to take this opportunity to caution municipalities that the MBRR prescribe the minimum level of information municipalities must include as part of their legal reporting obligations.

Going forward the Treasuries will place increased attention and focus on the adequacy of municipalities' submissions. The National Treasury regards this non-compliance to include the minimum level of information as serious and if persistent will consider applying the available legal sanctions, including recourse in terms of section 216(2) of the Constitution. In this context, National Treasury will particularly focus on the completeness of asset management related information as well as the statistical information required in the A, B and C schedules during the 2023/24 MTREF.

5.10 Eskom Bulk Tariff increases

The National Energy Regulator of South Africa (NERSA) is responsible for the price determination of the bulk costs of electricity. In January 2023, NERSA approved tariff increases of 18.7 per cent in 2023/24 and 12.7 per cent increase in 2024/25. For purposes of calculating the free basic energy subsidy in the local government equitable share formula, the National Treasury has added 2 per cent to these increases. This is in anticipation of higher increases than those published in January, for municipalities, due to the difference in the financial years of Eskom customers and municipalities meaning that Eskom only has nine months to collect the allowable revenue from municipalities. R1.1 billion is added to the free basic energy subcomponent of the free basic services component of the local government equitable share formula to fund these higher tariff increases. To this end, the free basic electricity subsidy in the local government equitable share is calculated based on a 20.7 per cent tariff increase in 2023/24 and a 14.7 per cent increase in 2024/25. In the absence of an approved tariff increase in the outer year of the MTEF period, the formula assumes an increase of 17.7 per cent in 2025/26. This is the average of the estimated increases for the first two years of the MTEF period.

5.11 Updated Municipal Borrowing Policy Framework

Cabinet approved the Update to the Policy Framework for Municipal Borrowing and Financial Emergencies on the 17th of August, 2022. The purpose of the update was to re-examine the original Policy Framework, along with the legislation (i.e. Municipal Finance Management Act – MFMA) that was adopted to implement it, considering the experience with municipal borrowing that has accumulated since 2000.

The following key reforms have been introduced through the Update to the Policy Framework for Municipal Borrowing:

- The Policy Framework for Municipal Borrowing has been updated to introduce the necessary reforms that will expand the scope of responsible municipal borrowing and create an environment that attracts more players (e.g. insurers, pension funds, institutional investors and fund managers, and international Development Finance Institutions) in the municipal debt market space. The original core principles underlying municipal borrowing are maintained (i.e. creditworthy municipalities should borrow prudently to finance capital investment, and that there will be no bail-outs by the provincial or national government);
- The updated policy framework clarifies the role of Development Finance Institutions (DFIs), as it was not clearly articulated in the original policy. DFIs are required to pursue clear and agreed developmental goals, as outlined in the policy. The objective of this approach is to ensure that a DFI lending does not crowd out the private sector. Public-sector lenders, both domestic and foreign, should be guided by a social and developmental investment approach in which demonstrable social outcomes are considered alongside potential financial returns;
- The updated policy framework permits and clarifies innovative infrastructure financing mechanisms (such as pooled financing mechanisms, project finance, tax increment financing, revenue bonds, and pledging of conditional grants) that municipalities can use to leverage municipal borrowing. Municipalities are encouraged to explore these alternatives, and innovative infrastructure financing mechanisms permitted subject to the requirements contained in the Municipal Finance Management Act (MFMA); and
- The participation of both private and public sector market participants in the development of a liquid secondary market for municipal debt securities is also encouraged. The policy proposes options that can be explored to support the development and growth of an efficient and liquid market for municipal debt obligations.

The Updated Municipal Borrowing Policy Framework can be accessed at the MFMA website at the following link <http://mfma.treasury.gov.za/Guidelines/Pages/default.aspx>.

5.12 Tariff Policies

Municipalities must comply with the provisions of Section 74 of the Municipal Systems Act (MSA) which requires that a municipal council must adopt and implement a tariff policy on the levying of fees for municipal services provided by the municipality itself or by way of service delivery agreements, and which complies with the provisions of this Act and with any other applicable legislation. Municipalities should also ensure that the tariff policies adhere to all the principles outlined in section 74(2) of the MSA. A municipality's tariff policies must also take into consideration variable factors such as water shortages and electricity feedback excess into the municipal system from new generation capacity. Municipalities are urged to develop wheeling and Small-Scale Embedded Generation (SSEG) frameworks to guide the

development of associated tariffs. Municipalities must adopt by-laws to give effect to the implementation and enforcement of their tariff policies.

5.13 Non-Revenue Electricity and Non-Revenue Water/ Revenue Losses

Water Service Authority municipalities and electricity licensed municipalities are urged to align both their non-revenue water and non-revenue electricity indicators and their set targets in the 2023/24 SDBIPs with identifiable infrastructure or operational projects and/ or programmes. Municipalities should track improvements on the baseline information included in the SDBIPs by indicating the volume of water losses (i.e., kilolitres/ mega-litres) and the amount of electricity losses (KwH or MWs) for the previous year. This approach will help to determine the progress of municipalities in curbing losses, which impact on municipal revenues, in both non-revenue water and non-revenue electricity.

6. Burial of Councillors

Salaries, allowances and benefits for political office-bearers and members is managed through Determination of Upper Limits of Salaries, Allowances and Benefits of Different Members of Municipal Councils notice issued by the Minister of Cooperative Governance and Traditional Affairs.

Section 167 of the MFMA provides that a municipality may remunerate its Councillors within the framework of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998), setting the upper limits of the salaries, allowances and benefits for those political office-bearers and members. Any benefit which is not included in the above-mentioned notice constitutes irregular expenditure and recovery thereof from the Councillor concerned is mandatory.

Municipalities may also refer to relevant Councillor Pension Scheme or personal funeral policies in existence for any funeral benefits relating to such Councillor.

7. Funding choices and management issues

Municipalities are under pressure to generate and collect revenue for service delivered. The ability of customers to pay for services is declining and this means that less revenue will be collected. Therefore, municipalities must consider the following when compiling their 2023/24 MTREF budgets:

- Improving the effectiveness of revenue management processes and procedures;
- Cost containment measures to, amongst other things, control unnecessary spending on nice-to-have items and non-essential activities as highlighted in the Municipal Cost Containment Regulations read with MFMA Circular No. 82;
- Ensuring value for money through the procurement process;
- The affordability of providing free basic services to all households;
- Not taking on unfunded mandates;
- Strictly control the use of costly water tankers and fix the water infrastructure to enable the sustainable provision of water;
- Automate business services where possible to increase efficiencies and lower customer costs;
- Prioritise the filling of critical vacant posts, especially linked to the delivery of basic services; and
- Curbing the consumption of water and electricity by the indigents to ensure that they do not exceed their allocation.

Accounting officers are reminded of their responsibility in terms of section 62(1)(a) of the MFMA to use the resources of the municipality effectively, efficiently and economically. Failure to do this will result in the accounting officer committing an act of financial misconduct which will trigger the application of chapter 15 of the MFMA, read with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings, 2014.

7.1 Employee related costs

The Salary and Wage Collective Agreement for the period 01 July 2021 to 30 June 2024 dated 15 September 2021 through the agreement that was approved by the Bargaining Committee of the Central Council in terms of Clause 17.3 of the Constitution should be used when budgeting for employee related costs for the 2023/24 MTREF. In terms of the agreement, all employees covered by this agreement shall receive with effect from 01 July 2023 and 01 July 2024 an increase based on the projected average CPI percentages for 2023 (5.4 per cent according to the Reserve Bank's Monetary Committee Statement for January 2023) and 2024 (4.8 per cent according to the Reserve Bank's Monetary Committee Statement for January 2023). The forecasts of the Reserve Bank, in terms of the January 2023 and January 2024, shall be used to determine the projected average CPI. Municipalities are encouraged to perform an annual head count and payroll verification process by undertaking a once-a-year manual salary disbursement, to root out ghost employees.

According to the 2021 State of Local Government Finance Report, there are about 165 municipalities that are in financial distress. These municipalities need to ensure that they seek an early exemption from this dispensation of this salary agreement. Municipalities should also avoid paying out leave in cash while having major financial challenges.

7.2 Remuneration of Councillors

Municipalities are advised to budget for the actual costs approved in accordance with the Government Gazette on the Remuneration of Public Office Bearers Act: Determination of Upper Limits of Salaries, Allowances and Benefits of different members of municipal councils published annually between December and January by the Department of Cooperative Governance. It is anticipated that this salary determination will also take into account the fiscal constraints. Municipalities should also consider guidance provided above on salary increases for municipal officials during this process. Any overpayment to councillors contrary to the upper limits as published by the Minister of Cooperative Governance and Traditional Affairs will be irregular expenditure in terms of Section 167 of the MFMA and must be recovered from councilor(s) concerned.

8. Conditional Grant Transfers to Municipalities

8.1 Criteria for the release of the Equitable Share

The equitable share release criteria for 2023/24 were set out in MFMA Circular No. 122. To assist with managing this process, a guiding checklist has been developed (attached hereto as Annexure A) which municipalities can follow throughout the course of the year to ensure that the required documents are timeously uploaded to the GoMuni platform in line with the prescribed deadlines.

Going forward, municipalities will be required to submit the completed checklist as part of the quarterly performance reporting process for quarter 1 of the municipal financial year. According to section 52(d) of the MFMA, the mayor of a municipality must within 30 days of the end of each quarter, submit a report to council on the implementation of the budget and the financial state of affairs of the municipality. The report must then be submitted to National

and Provincial Treasury within 5 days of being tabled in council as per section 32 of the MBRR. The report for quarter 1 of 2023/24 must therefore be submitted to council by the end of October 2023 and submitted to National and Provincial Treasury by no later than 5 November 2023. By including the completed checklist in this report, municipalities confirm their adherence to the equitable share release criteria, including that all supplementary information (as defined in the checklist) was successfully uploaded to the GoMuni platform.

Please note that most of the information required for the release of the equitable share, is already uploaded/ submitted by municipalities as part of existing reporting requirements throughout the year. There are however a few items (clearly marked in the checklist) that does not have a dedicated storage location (for example, payments of employee benefits) on GoMuni. A dedicated Equitable Share Verification Folder will be created on GoMuni for this purpose.

8.2 Criteria for the rollover of conditional grant funds

In terms of Section 21 of the Division of Revenue Act, 2022 (Act No.5 of 2022) (DoRA) in conjunction with the Division of Revenue Amendment Act, 2022 (Act No. 15 of 2022) (DoRAA), the Act requires that any conditional allocation or a portion thereof that is not spent at the end of the 2022/23 financial year reverts to the National Revenue Fund (NRF), unless the rollover of the allocation is approved in terms of subsection (2). Furthermore, the receiving officer, provincial treasury and national transferring officer is required to prove to National Treasury that the unspent allocation is committed to identifiable projects, in which case the funds may be rolled over.

When requesting a rollover in terms of section 21(2) of the 2022 DoRA, municipalities must include the following information with their submission to National Treasury:

1. A formal letter, signed by the accounting officer addressed to the National Treasury requesting the rollover of unspent conditional grants in terms of section 21(2) of the 2022 DoRA;
2. A list of all the projects that are linked to the unspent conditional grants and a breakdown of how much was allocated, spent and the balance per project;
3. The following evidence indicating that work on each of the projects has commenced, as applicable to the specific rollover(s):
 - a) Proof that a contractor or service provider was appointed for delivery of the project before 31 March; or
 - b) Proof of project tender and tender submissions published and closed before 31 March or with the appointment of contractor or service provider for delivery of service before 30 June in cases where additional funding was allocated during the course of the financial year of the project;
 - c) Incorporation of the Appropriation Statement;
 - d) Evidence that all projects linked to an allocation will be fully utilised by 30 June 2024 (attach cash flow projection for the applicable grant).
4. A progress report (also in percentages) on the status of each project's implementation that includes an attached **legible implementation plan**);
5. The value of the committed project funding and the conditional allocation from the funding source;
6. Reasons why the grants were not fully spent during the year on the original allocation per the DoRA;
7. Rollover of rollovers will not be considered. Municipalities must therefore not include previous year's unspent conditional grants as rollover request;
8. An indication of the time period within which the funds are to be spent if the rollover is approved; and

9. Proof that the Municipal Manager and Chief Financial Officer are permanently appointed.

No rollover requests will be considered for municipalities with vacant or acting Chief Financial Officers and Municipal Managers for a period exceeding 6 months from the date of vacancy; this also includes acting appointments because of suspensions of either MM or CFO that are more than 12 months.

If any of the above information is not provided or the application is received by National Treasury (Intergovernmental Relations Division) after 31 August 2023, the application will be declined.

In addition, National Treasury will also consider the following information when assessing rollover applications; and reserves the right to decline an application should there be non-performance by the municipality in any of these areas:

1. Compliance with the in-year reporting requirements in terms of sections 71 and 72 of the MFMA and section 12 of the 2022 DoRA, **including the Municipal Manager and Chief Financial Officer signing-off on the information** sent to National Treasury;
2. Submission of the pre-audited Annual Financial Statements to National Treasury by 31 August 2023;
3. Accurate disclosure of grant performance in the 2022/23 pre-audited Annual Financial Statements, (i.e. correct disclosure of grant receipts and spending in the notes to the AFS);
4. Despite the fact that local government is required to comply with to different norms and standards prescribed by different legislations, municipalities are expected to fully comply with the provisions of DoRA that relate to rollover processes and disclose conditional grant performance in the 2022/23 pre-audited Annual Financial Statements (i.e Cash coverage and unspent conditional grants in the Statement of Financial Position) in order to verify grant expenditure; and
5. Cash available reflected in the Statement of Financial Position and Cash Flow Statements and the bank (net position including short term investments) as at 30 June 2023 is equivalent to the unspent amount at the end of the financial year. If the amount that is requested for rollover **is not entirely cash-backed**, such a rollover will not be approved. National Treasury will also not approve portions of rollover requests.

It should be noted that under no circumstances will the National Treasury consider requests to rollover:

1. The entire 2022/23 allocation to the municipality, in cases whereby the rollover request is more than 50 per cent of the total allocation, National Treasury will approve the rollover amount up to 50 per cent of the 2022/23 allocation;
2. Rollover request of the same grant for the third consecutive time. In a case where a municipality is applying for rollover as a result of additional funding, the application will be given a careful consideration;
3. Funding for projects procured through Regulation 32 of the Municipal Supply Chain Management Regulations (Gazette No.27636) – Projects linked to additional funding and disasters are exempted; and
4. A portion of an allocation where the proof of commitment for the rollover application is linked to invoices that were issued before or on 31 May 2023.

8.3 Unspent conditional grant funds for 2022/23

The process to ensure the return of unspent conditional grants for the 2022/23 financial year will be managed in accordance with section 22 of the DoRA. In addition to the previous MFMA Circulars, the following practical arrangements will apply:

- Step 1: Municipalities must submit their June 2023 conditional grant expenditure reports according to section 71 of the MFMA reflecting all accrued expenditure on conditional grants and further ensure that expenditure reported to both National Treasury and national transferring officers reconciles;
- Step 2: When preparing the Annual Financial Statements, a municipality must determine the portion of each national conditional grant allocation that remained unspent as at 30 June 2023. The unspent grant values must be determined based on the guidance that was provided in mSCOA Circular No. 13 in as far as VAT, retention and interest is concerned; and
- Step 3: If the receiving officer wants to motivate in terms of section 22(2) of the 2020 DoRA that the unspent funds are committed to identifiable projects, the rollover application pack must be submitted to National Treasury by no later than 31 August 2023.

National Treasury will not consider any rollover requests that are incomplete or received after this deadline.

- Step 4: National Treasury will confirm in writing whether or not the municipality may retain any of the unspent funds as a rollover based on criteria outlined above by 20 October 2023;
- Step 5: National Treasury will communicate the unspent conditional grants amount by 08 November 2023. A municipality must return the remaining unspent conditional grant funds that are not subject to a specific repayment arrangement to the National Revenue Fund by 17 November 2023; and
- Step 6: Any unspent conditional grant funds that should have but has not been repaid to the National Revenue Fund by 17 November 2023, and for which a municipality has not requested a repayment arrangement, will be offset against the municipality's 06 December 2023 equitable share allocation.

All other issues pertaining to Appropriation Statement and reporting on approved rollovers are addressed in the Annexure to MFMA Circular No. 86.

9. The Municipal Budget and Reporting Regulations

9.1 Alignment of Municipal Budget and Reporting Regulations (MBRR) Schedules

The revised Regulated MBRR Schedules (A1, B, C, D, E and F), as aligned to the mSCOA chart and GRAP are published on the National Treasury web page and can be accessed using the following link.

<http://mfma.treasury.gov.za/RegulationsandGazettes/Municipal%20Budget%20and%20Reporting%20Regulations/Documents/Forms/AllItems.aspx?RootFolder=%2fRegulationsandGazettes%2fMunicipal%20Budget%20and%20Reporting%20Regulations%2fDocuments%2f2023%2d24&FolderCTID=0x0120001860D4A2BD7AD042BF8427FC3BB59F67>

The alignment of the A1 Schedules required substantial changes to the reporting formats used for budgeting and reporting purposes which required the creation of new A1 Schedule codes to ensure that the data strings populate the new reporting formats. The relevant changes were also made in the reporting formats relating to versions 6.1 to 6.7 of the mSCOA chart to ensure that the historical data are populating when reports are drawn from GoMuni.

To ensure that ERP systems generate the A1 Schedule aligned to version 6.7 of the mSCOA chart, municipalities and system vendors should refer to the linkages provided on GoMuni. The following reports on GoMuni should be used for this purpose:

- List *m*SCOA account linkages to A1 Schedule based on 6.7 under menu option *m*SCOA Reporting; and
- List *m*SCOA A1 schedule codes WIP (i.e. new A1 Schedule codes) under menu option *m*SCOA Administration.

Both reports can be located under:

https://lg.treasury.gov.za/ibi_apps/portal/Local_Government_Database

The new format for the non-financial data strings A1D and A1F is available on the link below:

<http://mfma.treasury.gov.za/RegulationsandGazettes/Municipal%20Budget%20and%20Reporting%20Regulations/Documents/Forms/AllItems.aspx?RootFolder=%2fRegulationsandGazettes%2fMunicipal%20Budget%20and%20Reporting%20Regulations%2fDocuments%2f2023%2d24&FolderCTID=0x0120001860D4A2BD7AD042BF8427FC3BB59F67>

The A1D is the data string which populates information which we do not extract from the TABB while the A1F populates the budget information which we do not extract from the ORGB. Municipalities should ensure that they use the new format when submitting the non-financial data strings.

10. Submitting budget documentation and A1 schedules for 2023/24 MTREF

The MFMA and its Regulations require the submission of *m*SCOA data strings for budgets, in-year reporting, and annual financial statements in a specific format and by a required timeframe. The credibility and accuracy of the *m*SCOA data strings must be verified by municipalities prior to submission to the GoMuni Upload portal. Since the financial system must be locked at the end of the month in order to generate a *m*SCOA data string, municipalities may not open closed periods to correct errors. Errors must be corrected in the next open period. Providers of municipal financial systems must ensure that the necessary internal controls are built into the system to prevent the opening of closed periods on the financial system and the bypassing of such controls. This also applies to the correction of information in closed periods for 3rd party systems that should be integrating with the main financial system in terms of the requirements of the *m*SCOA Regulations.

From 1 July 2023, Municipal Managers and Chief Financial Officers will be required to sign off on the financial and non-financial data strings submitted to the GoMuni Upload portal when they submit their data strings. The schedules prescribed in terms of the Municipal Budget and Reporting Regulations (MBRR) populated from the *m*SCOA data strings on National Treasury's Local Government and Reporting System (LGDRS) must also be signed off monthly. These sign-offs are for audit purposes and serves as a confirmation by the municipality that the data strings submitted are accurate. Details on the submission of the signed-off figures will be communicated in due course.

In terms of Section 171 of the MFMA, financial misconduct by municipal officials includes the provision of incorrect or misleading information in any document which must be submitted to the National Treasury.

From 1 July 2023, the GoMuni Upload portal for the monthly in-year data strings will be closed at 16h00 on the 10th working day of each month. All publications by the National and Provincial Treasuries are now solely sourced from the *m*SCOA data strings submitted by

municipalities and several stakeholders including Statistics South Africa (STATSSA), Auditor General South Africa (AGSA), the Reserve Bank, and NERSA are in the process of streamlining some of their reporting to the information contained on the National Treasury Local Government Database and Reporting System (LGDRS). The resubmission of data strings after the legislated timeframes is not only illegal but also causing challenges in data sets used by various stakeholders for analysis and reporting purposes. **No data string submissions will therefore be accepted by the National Treasury after the 10th working day of the respective month.**

Chief Director: Local Government Budget Analysis

03 March 2023

ANNEXURE A: Equitable Share Verification Checklist:

General Requirements

Criteria	Verification Requirement	Yes/No
2023/24 Adopted Budget	Council resolution, adopted <i>m</i> SCOA budget data strings (ORGB), PDF version of adopted MTREF budget uploaded to GoMuni Upload portal immediately after approval.	
<ul style="list-style-type: none">Is the municipality's completed tariff tool (National Treasury format) included as part of its budget submission (MFMA Budget Circular No. 98 (refer item 4.2)).	The completed National Treasury EXCEL tariff tool uploaded to GoMuni with the adopted budget by start of budget year i.e. 1 July 2023 .	
<ul style="list-style-type: none">Are allocations made for bulk suppliers current account payments?	Allocations reflected in <i>m</i> SCOA budget data strings (ORGB) and budget schedules/ document.	
<i>If unfunded budget position–</i>	-	
<ul style="list-style-type: none">Is a Budget Funding Plan (BFP) adopted with the budget?	Copy of the adopted Budget Funding Plan uploaded to GoMuni with the adopted budget by start of budget year i.e. 1 July 2023 .	
	PDF version of BFP/progress report uploaded to GoMuni Upload portal by start of budget year i.e. 1 July 2023 .	
	Is the BFP credible and show how the municipality intends moving progressively out of this position into a funded state?	
	In the case of the latest progress report being submitted, is it aligned to the rescue phase of the new approach to Municipal Financial Recovery Service (MFRS)?	
<ul style="list-style-type: none">Council resolution reflecting commitment to address unfunded position.	PDF copy of resolution uploaded to GoMuni Upload portal by start of budget year i.e. 1 July 2023 .	
<i>m</i>SCOA		
<ul style="list-style-type: none">Submission of Data Strings	Successful submission of all financial and non-financial <i>m</i> SCOA data strings to the GoMuni Upload portal	
	Timeous submission of all financial and non-financial <i>m</i> SCOA data strings to the GoMuni Upload portal	
	Data strings submitted are credible as per the analysis done by NT/PTs	
	Data strings are generated directly from the main municipal financial system	
	The regulated MBRR Schedules are generated directly from the core municipal financial system	
	Successful submission of all financial and non-financial <i>m</i> SCOA data strings to the GoMuni Upload portal	
<ul style="list-style-type: none">Submission of documents	Municipal documents required in terms of legislation and MFMA Circulars have been submitted timeously and in the required format to the GoMuni Upload portal.	
<ul style="list-style-type: none">Financial System Changes	Municipality has followed the processes in Circulars No. 93, 98, 123 and <i>m</i> SCOA Circulars No 5 and 6 to change their financial system.	
UIF & W		
<ul style="list-style-type: none">UIF&W Register	Documents need to be uploaded to NTs eMonitoring Webpage	
<ul style="list-style-type: none">MPAC recommendation on UIF&W		
<ul style="list-style-type: none">Council Resolution on UIF&W		
<ul style="list-style-type: none">UIF&W Reduction Strategy		
Disciplinary Board		
<ul style="list-style-type: none">Does the municipality have a functional disciplinary board?	Proof of establishment (or efforts to establish DC Board) uploaded to NTs eMonitoring Webpage NTs eMonitoring Website.	
Competency Regulations		
<ul style="list-style-type: none">Has the minimum municipal competency regulations reporting requirements been adhered to?	In line with the Competency Regulations, consolidated reporting information must be uploaded to GoMuni by 30 January 2023 and 30 July 2023 .	
Audit Process		
<ul style="list-style-type: none">Opinion Received	Did the municipality receive an adverse or disclaimed audit opinion or had outstanding audits for two consecutive financial years?	
<ul style="list-style-type: none">Adverse or disclaimed audit opinion	Council resolution signed by each member of the Council was uploaded to NT's eMonitoring Webpage within 1 month after conclusion of the audit process reflecting council's commitment to address the opinion.	
<ul style="list-style-type: none">Is a council approved audit action plan in place?	Audit action plan, together with council resolution, to be uploaded to NT's eMonitoring Webpage within 60 days from audit report issuance.	
Interventions (where applicable)		
<ul style="list-style-type: none">In the event of a discretionary or mandatory intervention in terms of section 139 of the Constitution, is a Financial Recovery Plan (FRP) in place?	The FRP and monthly progress reports submitted in terms of sections 145 and 146 of the MFMA must be uploaded to GoMuni Upload portal for each month since the inception of the FRP.	

Quarterly Requirements

Criteria	Verification Requirement	Quarter 3 (Jan – March)	Quarter 4 (April – June)	Quarter 1 (July – Sept)	Quarter 2 (Oct – Dec)
Bulk Supplier Payments					
<ul style="list-style-type: none"> Were current account payments to bulk suppliers (Eskom and Water Boards) timeously made? 	PT/NT to verify status according to MFMA S41 Report. No action required from municipality if account in good standing.	-	-	-	-
<ul style="list-style-type: none"> <u>If current account in arrears, are payment agreements in place?</u> 	Copy of payment agreement or evidence of discussions are uploaded to on GoMuni Upload portal.				
Staff benefit Deductions					
<ul style="list-style-type: none"> Were a) SARS, b) pension and c) other staff benefits timeously paid over to the relevant funds/institutions? 	Proof of payment for each category, for each month of the quarter uploaded to on GoMuni Upload portal.				
Reconciliation of Valuation Roll					
<ul style="list-style-type: none"> Has the valuation role been reconciled to the financial system? 	In line with MFMA Circulars No. 93, 98 and 107, proof of the verification for each quarter should be uploaded on GoMuni Upload portal.

8.3	MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR APRIL 2023
-----	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance and Compliance

17 May 2023 & 24 May 2023

1. SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR APRIL 2023

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2022/2023 to report the deviations to Council.

3. DELEGATED AUTHORITY

Council

FOR NOTING.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2022/2023) stipulate that SCM deviations be reported to Council. In compliance thereto, this report presents to Council the SCM deviations that occurred during April 2023.

5. RECOMMENDATION

that Council notes the deviations as listed for the month of April 2023.

6. DISCUSSION / CONTENTS

6.1. Background/Legislative Framework

The regulation applicable is as follows:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations

Deviation from and ratification of minor breaches of, procurement processes

36. (1) A supply chain management policy may allow the accounting officer—

(a) To **dispense with the official procurement processes** established by the policy and to procure any required goods or services through any convenient process, which may include direct negotiations, but only—

(i) in an emergency;

(ii) if such goods or services are produced or available from a single provider only;

(iii) for the acquisition of special works of art or historical objects where specifications are difficult to compile;

(iv) acquisition of animals for zoos; or

(v) in any other exceptional case where it is impractical or impossible to follow the official procurement processes; and

(b) to ratify any minor breaches of the procurement processes by an official or committee acting in terms of delegated powers or duties which are purely of a technical nature.

(2) The accounting officer must record the reasons for any deviations in terms of sub regulation (1) (a) and (b) and **report them to the next meeting of the council**, or board of directors in the case of a municipal entity and include as a note to the annual financial statements.

6.2. Discussion

Reporting the deviations as approved by the Accounting Officer for April 2023:

The following deviations were approved with the reasons as indicated below:

DEVIATION NUMBER	CONTRACT DATE	NAME OF CONTRACTOR	CONTRACT DESCRIPTION	REASON	SUBSTANTIATION WHY SCM PROCESS COULD NOT BE FOLLOWED	TOTAL CONTRACT PRICE R
D/SM 10/23	11 April 2023	ACTOM Power Transformers	Jan Marais SS Transformer upgrades: Extension of Transformer Storage	Exceptional case and it is impractical or impossible to follow the official procurement processes	Electrical services department initiated a tender process to procure two 20MVA Transformers for the replacement and upgrade of the transformers at Jan Marais Substation, Jonkershoek area. This was needed to increased power demands and system improvements. This was done under bid B/SM 101/20, known as Package A in the tender document and the tender was awarded to Actom Transformers for the design and construction. The Transformers were constructed and completed in November 2021 and stored after completion. Three months storage at no cost was included in the bid. This storage period expired at the end of March 2022. A variation order was approved to extend storage for the 6 months with the manufacturer which came to an end in September 2022. Due to the nature of the storage of power transformers which required that it must be filled with Hydrogen gas and be monitored by specialised professionals. The storage cannot be done onsite at the municipality. Bid B/SM 111/21 known as Package B in the tender document, was for the appointment of a contractor to install the transformers at Jan Marias Substation, the consultant responsible for this construction phase contract	R1 833 792,30 (Incl. Vat)

AGENDA

14TH MEETING OF THE COUNCIL
OF STELLENBOSCH MUNICIPALITY

2023-05-24

					<p>was terminated due to poor performance. A new consultant was appointed to replace to complete the construction phase of the project.</p> <p>The package B tender, B/SM 111/21 was awarded, and the contractor was expected to start with construction during October 2022, however due to poor performance the services of the contractor were terminated in November 2022. A new contractor must be appointed, however for this to happen the scope of the current consultant must be amended.</p> <p>The scope of works is amended through a section 116 process. This process has been initiated and is planned to be completed by end May 2023.</p> <p>All the above has created a delay in the installation of the transformers and an extension of storage must be arranged. It is important to note that the transformer remain with the manufacturer, all the warranties and guarantees will remain intact.</p>	
D/SM 11/23	21 April 2023	Kainos Projects Africa (Pty) Ltd	Operation and maintenance contract	Exceptional case and it is impractical or impossible to follow the official procurement processes	<p>The handling and treating of sewage at the Stellenbosch WWTW and Wemmershoek WWTW are deemed an essential service as part of the provision of sanitation services. The Operation and Maintenance of the Stellenbosch Wastewater Treatment Works (WWTW) and the Wemmershoek WWTW has been performed by Stellenbosch Municipality over the past few years. There is a need to appoint a service provider to take over operations and maintenance from the municipality due to the current staff shortages, skill levels and non-compliance of the wastewater treatment plants to meet environmental laws and regulations.</p>	R 1 610 119.34 per month (Incl. VAT)

					<p>The Department of Environmental Affairs and Development Planning (DEADP) in terms of section 28(4) of the national environment management act 1998, have issued a Directive to the municipality to implement various corrective actions to achieve compliance for the Wemmershoek WWTW. The time allowed to implement an action plan is 30 calendar days.</p> <p>The Department of Water and Sanitation has subsequently issued a notice of non-compliance for a variety of factors for the Stellenbosch WWTW. They mentioned that the Stellenbosch WWTW malfunction is affecting the Eerste River and immediate action is required to address these concerns.</p> <p>This is an exceptional case, and it is impractical or impossible to follow the official procurement processes to timeously appoint a service provider to the operation and maintenance of the WWTWs. Urgent action and an immediate response are required.</p> <p>The deviation can thus be motivated for two reasons: a) an "emergency" and/or as b) "an exceptional case".</p>	
--	--	--	--	--	---	--

6.3 Legal Implications

The regulation applicable is:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations: Deviations from and ratification of minor breaches of, procurement processes.

6.4 Staff Implications:

No staff implications

6.5 Previous / Relevant Council Resolutions:

None

6.6 Risk Implications

That the market may not be tested.

The measures in place to deal with deviations mitigate the risk to an acceptable level.
The auditor general also audit the deviations during the yearly audit.

6.7 Comments from Senior Management:

The item was not circulated for comment except to Municipal Manager.

6.8.1 Municipal Manager

Supports the recommendations.

**RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE
EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 6.3**

that Council notes the deviations as listed for the month of April 2023.

11.1	PROTECTION SERVICES: (PC:)
11.1.1	PERMISSION TO VISIT GERMANY ON INVITATION OF LANDESVERBAND KINDER -UND JUNGERHOLUNGSZENTREN (KIEZ) – FIREFIGHTING EXCHANGE PROGRAM 20 AUGUST 2023 - 31 AUGUST 2023

Collaborator No: 749544
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 17 May 2023 & 24 May 2023

1. SUBJECT: PERMISSION TO VISIT GERMANY ON INVITATION OF LANDESVERBAND KINDER -UND JUNGERHOLUNGSZENTREN (KIEZ) – FIREFIGHTING EXCHANGE PROGRAM 20 AUGUST 2023 - 31 AUGUST 2023

2. PURPOSE OF REPORT

To obtain Council approval to visit Germany on invitation of KIEZ, an NGO, on a firefighting exchange program from 20 August 2023 to 31 August 2023.

3. DELEGATED AUTHORITY

In terms of 9.2 of the Cost Containment Policy 2019, only the municipal council in a council meeting can approve the international travel for any official or political bearer.

4. EXECUTIVE SUMMARY

Assistant Chief Fire Officer Mr Craig van Reenen was nominated to participate in the firefighting exchange program to represent Stellenbosch Municipality in Germany from 20 August 2023 to 31 August 2023.

The invitation by the Landesverband Kinder-und Jungerholungszentren (KIEZ), sponsor one official from a municipality to attend the German peer learning program.

The costs for accommodation and transport in Germany will be covered by the host, KIEZ. The municipality is requested to cover the travel costs to and from Germany as well as other associated costs such as daily allowances. See attached as Appendix 1. This is an excellent opportunity for firefighters to share their expertise with a first world country.

5. RECOMMENDATIONS

- (a) that Council approves the request for attendance of the firefighting exchange program that will be hosted in Germany from 20 to 31 August 2023; and
- (b) that Council approves the daily allowance and travel costs to and from Germany for the duration of the program.

6 DISCUSSION / CONTENTS**6.1 Background**

Assistant Chief Fire Officer Mr Craig van Reenen were nominated to participate in the firefighting exchange program to represent Stellenbosch Municipality in Germany from 20 August 2023 to 31 August 2023.

Firefighting is described as an ultrahazardous, unavoidably dangerous activity. Fires, in its nature are very dangerous and equally destructive. A fire in Germany and a fire in South Africa challenges firefighters in the same manner. The difference is that the so called “first world countries” are better equipped to deal with fires in terms of vehicles, equipment, manpower and the number and proximity of their fire stations. The impact on society in the various countries also differs. Stellenbosch and surrounding areas are very prone to grass, mountain, formal and especially informal settlement fires. This excursion will enlighten our understanding of fires and firefighting in other countries and the exchange of ideas and skills will be invaluable and can only benefit the fire service, the municipality, and the community at large. This will be the first opportunity of its kind for one of our fire fighters and hopefully not the last.

Mr Craig van Reenen, the nominee, who also holds the position of Assistant Chief Fire Officer, is a veteran with 25 years’ experience. Due to Mr van Reenen’s inquisitive nature he swiftly educated himself, obtained the necessary skills and advanced quickly through the ranks in fire services. His variety of skills also includes a certificate as an intermediate paramedic (AEA). His years’ experience in various fire stations within the City of Cape Town and in the Cape Winelands District, coupled with the necessary skills set and fluency in the English language makes him an ideal exchange candidate.

6.2 Discussion

Assistant Chief Fire Officer Mr Craig van Reenen was nominated to participate in the firefighting exchange program to represent Stellenbosch Municipality in Germany from 20 August 2023 to 31 August 2023 for work purposes.

The objective of the trip is to obtain a mutual understanding of firefighting, the roles that fire fighters fulfil in different countries and to exchange skills. The engagement will span from 20 August 2023 to 31 August 2023.

6.3 Financial Implications

Cost of local return flights and visa costs.

In line with the Cost Containment Policy

6.4 Legal Implications

In line with the Cost Containment Policy.

6.5 Staff Implications

None

6.6 Previous / Relevant Council Resolutions:

None.

6.7 Risk Implications

None.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.1.1

- (a) that Council approves the request for attendance of the firefighting exchange program that will be hosted in Germany from 20 to 31 August 2023; and
- (b) that Council approves the daily allowance and travel costs to and from Germany for the duration of the program.

Germany Exchange Programme

Dear City Manager and Municipal Managers

An invitation was received from Landesverband Kinder-und Jungerholungszentren (KIEZ), Sachen-Anhalt e.V., a partner of the Cape Winelands District Municipality to visit Germany from Sunday, 20 August 2023 to Thursday, 31 August 2023.

Background

Cape Winelands District Municipality has an ongoing partnership with KIEZ, an NGO in Germany. The projects with the NGO are mainly aimed at youth development and give them a global understanding of the people, culture, and skills of the two regions.

This year, however, our fire department received an invitation as well to participate in an exchange of skilled firefighters.

Purpose

This exchange will aim to get a mutual understanding of firefighters, their roles in different countries, and the exchange of skills. This exchange will further, align with programmes that will enhance youth and their future in firefighting and fire control.

Therefore, Cape Winelands District Municipality would like to extend the invitation to all Local Municipalities in the Cape Winelands District. Each municipality can nominate one fireman to partake in this programme.

Costs

- a) Each municipality will have to cover the travelling costs of their representative;
- b) Accommodation and transport in Germany will be provided by the host, KIEZ

Kindly indicate accepting or declining the invitation. Kindly provide us with the name of the participant that will represent the municipality by Tuesday, 30 May 2023.

Please note that more details and programme will be forthcoming once the participants are confirmed.

Your favourable response will be appreciated.

Thank you and kind regards,

Mr. P.A Williams

Acting Municipal Manager

Meeting Date:

17 May 2023 & 24 May 2023

1. **SUBJECT: APPLICATION FOR SEPERATION OF NOTARIALLY TIED PROPERTIES, PORTION 17 OF FARM 369 AND PORTION 3 OF FARM 527 FROM THE MOTHER ERF, PORTION 837 OF THE FARM BLAAUW KLIP NUMBER 510**

2. **PURPOSE**

To obtain Council-approval for the separation of Notarial tied properties, portion 17 of Farm 369 and portion 3 of Farm 527 from the Mother Erf, Portion 837 of the farm Blaauw Klip number 510.

3. **DELEGATED AUTHORITY**

Council

4. **EXECUTIVE SUMMARY**

During October 2004 a Deed of Sale was entered into between the Stellenbosch Municipality, the Cape Dutch Estate Stellenbosch (Pty) Ltd and Blaauwklippen Agricultural Estates (Pty) Ltd. A copy of the Deed of Sale is attached hereto as **APPENDIX 1**. In terms of the Deed of Sale various portions of Council-owned land were sold to the purchasers (now the applicants).

In terms of Clause 2.2.3 it was recorded that:

"The seller shall be entitled to impose a notarial tie condition between the property hereby sold and the existing property of the purchaser, so that the purchaser or its successor in title shall not be entitled to sell or otherwise alienate or transfer any portion of the property hereby sold without the simultaneous sale or alienation or transfer of the property collectively referred to as Blaauwklippen Estate, being the existing property of the Purchaser, or its successor in title, to the same transferee."

The reason for inserting the clause was to ensure that the Purchaser would not be able to sell or otherwise dispose of the property that was sold to them. For this reason, the municipal properties were first consolidated into one portion, and then notarially tied to the property collectively referred to as Blaauwklippen. The Notarial Deed, registering the notarial tie (condition of sale), was registered with the Registrar of Deeds on 25 July 2006, a copy of which is attached hereto as **APPENDIX 2**.

An application is now brought to un-tie Portion 17 of the Farm 369 (Paradyskloof Erf) and Portion 3 of the Farm 527 (Skilpadrug Erf) from the Mother Erf (**APPENDIX 4**). The application is brought on the basis that the fact that Blaauwklippen cannot sell these properties is placing a financial strain on the business and they are not able to raise the necessary funds they require for operational purposes. COVID had, and continues to have, a devastating effect on Blaauwklippen's wine and hospitality businesses. They say it is not an application for change in land use for development purposes, but merely to enable the current owners to utilise the properties individually to raise funds. They say it will not necessarily lead to the urban development of the properties as the farm will remain zoned for agricultural purposes and be protected by the MSDF.

The properties are situated outside the urban edge (**APPENDIX 5**). Council however in March 2023 approved the inclusion of "portion of remainder, portion 3 and a broader portion of portion 7 of farm 527 portion 7 of Farm 527" to form part of the housing pipeline (**APPENDIX 6**).

5. RECOMMENDATION

FOR CONSIDERATION

6. DISCUSSION / CONTENT

6.1 Background

6.1.1 Blaauwklippen, Stellenbosch

The property was initially leased from the municipality after which the Deed of Sale was entered into.

During October 2004 a Deed of Sale was entered into between the Stellenbosch Municipality, the Cape Dutch Estate Stellenbosch (Pty) Ltd and Blaauwklippen Agricultural Estates (Pty) Ltd. A copy of the Deed of Sale is attached hereto as **APPENDIX 1**. In terms of the Deed of Sale various portions of Council-owned land were sold to the purchasers (no applicants).

In terms of Clause 2.2.3 it was recorded that:

"The seller shall be entitled to impose a notarial tie condition between the property hereby sold and the existing property of the purchaser, so that the purchaser or its successor in title shall not be entitled to sell or otherwise alienate or transfer any portion of the property hereby sold without the simultaneous sale or alienation or transfer of the property collectively referred to as Blaauwklippen Estate, being the existing property of the Purchaser, or its successor in title, to the same transferee."

The reason for inserting the clause was to ensure that the Purchaser would not be able to sell or otherwise dispose of the property that was sold to them. For this reason, the municipal properties were first consolidated into one portion, and then notorially tied to the property collectively referred to as Blaauwklippen. The Notarial Deed, registering the notarial tie (condition of sale), was registered with the Registrar of Deeds on 25 July 2006, a copy of which is attached hereto as **APPENDIX 2**.

The following properties were tied to Mother Erf, Portion 837 of the Farm Blaauw Klip Number 510 (Title Deed 34249/2015), in terms of Notarial Deed K 770/2006:

1. Farm No 1457 – erf on open field opposite golf course;
2. Portion 17 of the Farm No 369 – Paradyskloof Erf – C on map below;
3. Portion 3 of the Farm 527 (Skilpadrug Erf) – D on map below.
4. Remainder Portions 52, 53 and 54 of the Farm Blaauw Klip number 510 (Kreefgat Properties).

On 22 October 2008, the Mayoral Committee recommended to un-tie the properties known as remainder portions 52, 53 and 54 for the Farm Blaauw Klip number 510 (also known as the Kreefgat properties).

These properties were released from the Mother Erf by Notarial Deed K57/2010 which is attached hereto as **APPENDIX 3**.

6.2 DISCUSSION

6.2.1 Location and context

The property under discussion is situated at Blaauwklippen Farms.

Fig 1: Proposed areas to un-tie: C and D.

Hereto attached as **APPENDIX 4** an application received from Blaauwklippen Agricultural Estates Stellenbosch (Pty) Ltd. to un-tie Portion 17 of the Farm 369 (Paradyskloof Erf – C above) and Portion 3 of the Farm 527 (Skilpadrug Erf -D above) from the Mother Erf. The application is brought on the basis that the fact that Blaauwklippen cannot sell these properties is placing a financial strain on the business and they are not able to raise the necessary funds they require for operational purposes. COVID had, and continues to have, a devastating effect on Blaauwklippen's wine and hospitality businesses. The applicants say is not an application for change in land use for development purposes, but merely to enable the current owners to utilise the properties individually to raise funds. They say it will not necessarily lead to the urban development of the properties as the farm will remain zoned for agricultural purposes and protected by the MSDF.

The sizes of the different portions requested to be released are as follows:

Mother Erf – Farm 1457 – erf on open field opposite golf course – 36.44ha

Farm 369/17 – Paradyskloof erf – 26.67ha

Farm 527/3 – Kreefgat Property – 14.79ha

The properties are situated outside the urban edge (**APPENDIX 5**). Council however in March 2023 approved the inclusion of “portion of remainder, portion 3 and a broader portion of portion 7 of farm 527 portion 7 of Farm 527” to form part of the housing pipeline (**APPENDIX 6**).

6.3 FINANCIAL IMPLICATION

There will be no financial implications for the Stellenbosch Municipality subject to the applicant carrying all the costs for the removal of the restrictive conditions and registration of the properties and the notarial deed that needs to be amended.

6.4 LEGAL IMPLICATIONS

Council may revise the decision taken in 2008 to un-tie the properties. If untied nothing stop the applicants from selling the properties separately and the new owners bringing applications to develop the land, unless conditions are attached and registered against the title deeds of the untied properties. If any development is planned that is not in line with the current zoning of agricultural the owners will have to apply for rezoning of the properties. There is a further complication that the properties are outside the urban edge which will need a change to the Spatial development Framework to amend the urban edge. Council however in March 2023 approved the inclusion of “portion of remainder, portion 3 and a broader portion of portion 7 of farm 527 portion 7 of Farm 527” to form part of the housing pipeline (**APPENDIX 6**).

6.5 STAFF IMPLICATIONS

No additional staff implications.

6.6 PREVIOUS COUNCIL RESOLUTIONS

On 22 October 2008, the Mayoral Committee recommended to un-tie the properties known as remainder portions 52, 53 and 54 for the Farm Blaauw Klip number 510 (also known as the Kreefgat properties). At the time of the compilation of the item writer was unable to locate the council resolution that followed on the 2008 recommendation. These properties were however released from the Mother Erf by Notarial Deed K57/2010 which is attached hereto as **APPENDIX 3**.

6.7 RISK IMPLICATIONS

The risk exists that if the property is sold that new owners will want to develop the land and change the agricultural zoning currently attached to the properties.

6.8 INPUTS RECEIVED FROM DIRECTORATES

6.8.1 Municipal Manager

Support the application provided that the deed contains a provision to protect the agricultural zoning.

6.8.2 Chief Financial Officer**6.8.3 Director Infrastructure**

No objection against the application.

6.8.4 Director Planning and Economic Development

To consider the merits of an application to untie a notarial tie the original purpose and intend for imposing the subject notarial tie by the beneficiary thereof should be understood.

The subject Blaauwklippen Farms were previously owned by the Stellenbosch Municipality. In the context of the Stellenbosch space economy these collective farming units have two prime characteristics which are important considerations:

1. The agricultural potential of the subject properties is very high, and
2. The subject properties are an important element of the Stellenbosch Open Space System.

Farmlands is a significant characteristic and important ingredient of the Stellenbosch space. Economy that contributes towards the value of the cultural, scenic, and productive landscape, and ultimately the economic and associated tourism vitality of the Cape Winelands brand.

When the Stellenbosch Municipality embarked on the process to sell the land, it was the intention to ensure that the farms remain productive to retain its value for the Stellenbosch space economy. With due consideration of the need to secure the ongoing financial feasibility of the subject farms, it was considered prudent to retain and operate the farms as a collective entity. For this purpose, it was consequently the rationale of the notarial tie to ensure this objective.

To untie the notarial tie will facilitate that the separate farms portions can be sold off to different entities and would ultimately undermine the feasibility to retain the farms as economic viable entities. This will pave the way to solicit support for the eventual development of the properties in yet sprawling high end residential estates and the loss of a high value asset.

It should be noted that it is not speculative to suggest that it is the prerogative of the owner to develop the subject farmlands, as the owner has recently already held exploratory discussions with the Spatial Planning section for the eventual development of the entire land area that compromises the subject Blaauwklippen farmlands.

The subject properties fall outside of the urban edge and the original rationale for the properties in the context of the Stellenbosch space economy is maintained in the present municipal spatial planning framework.

It is thus submitted that there is no justifiable rationale for the municipality to agree to the unbinding of the notarial tie over the subject properties, and that if it should be supported, it would potentially undermine the MSDP by paving the way to pursue development rights of the subject properties.

6.8.5 Director Community and Protection Services.

No objection to application.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.3.1

that Council considers the application.

APPENDIX 1

DEED OF SALE

Made and entered into by and between:

STELLENBOSCH MUNICIPALITY

(herein represented by Jacobus Petrus Retief in his capacity as Municipal Manager duly authorised thereto)

Town House
Plein Street
Stellenbosch

("Seller")

and

CAPE DUTCH ESTATE STELLENBOSCH (PTY) LTD
Reg No 1971/011401/07

(herein represented by Horst V Brunner in his capacity as Executive Director duly authorised thereto)

c/o Blaauwklippen Estate
Strand Road
Stellenbosch

("Purchaser")

and

BLAAUWKLIPPEN AGRICULTURAL ESTATES (PTY) LTD
Reg No 1972/000312/07

(herein represented by Horst V Brunner in his capacity as Executive Director duly authorised thereto)

c/o Blaauwklippen Estate
Strand Road
Stellenbosch

("Lessee")

Handwritten signatures of the parties involved in the deed of sale, including the Municipal Manager, the Executive Director, and the Lessee.

Recordal:

Whereas:

- A. The Seller is the registered owner of the immovable agricultural property referred to in clause 2 of this agreement, the Lessee being the lessee thereof in terms of various long term lease agreements;
- B. The Purchaser, through its affiliate company being the Lessee, at present conducts certain farming activities on the said immovable agricultural property and is desirous of purchasing the said property so as to incorporate same into its present farming activities on the wine estate known as Blaauwklippen Estate;
- C. The Seller is committed:
 - (a) To maintaining the rural and agricultural character of the properties forming the subject matter of this agreement;
 - (b) To obtain funds with which to purchase property suitable for development projects and housing for previously disadvantaged communities;
- D. Consequently the Purchaser wishes to purchase and the Seller wishes to sell the said agricultural property to the Purchaser on the terms and conditions set out herein;
- E. The Lessee consequently hereby consents and agrees to the said sale and purchase and consequently the cancellation of the said lease agreements subject to the fulfillment of the conditions set out herein;
- F. The properties forming the subject matter of this sale agreement are land situated in the area of jurisdiction of the municipal council of Stellenbosch and therefore do not constitute "agricultural land" as envisaged in terms of the Subdivision of Agricultural Land Act No. 70/1970.

NOW THEREFORE THE PARTIES AGREE AS FOLLOWS:

1. SUSPENSIVE CONDITIONS

- 1.1 This agreement is subject thereto that the Seller obtains approval from the relevant authorities to utilise the proceeds of this sale agreement towards the acquisition of property and/or cross-subsidisation of development or housing projects, including low cost housing, for previously disadvantaged communities and not as provided for in Section 76(2) of the Municipal Ordinance No. 20/1974;
- 1.2 This agreement is further subject to the successful subdivision(s) of the relevant properties of the Seller of which portions are hereby sold, where applicable, so as to constitute the properties set out in clause 2.

- 1.3 This agreement is subject to the approval of the Board of Directors of the Purchaser to be given within 30 days from the date of signature hereof by the parties,
- 1.4 Notwithstanding the signature hereof on behalf of the Seller, the parties agree that this agreement shall be subject to final approval by Stellenbosch Municipality (hereinafter referred to as "the Council") following a public participation process in terms of Section 124 of the Municipal Ordinance No. 20/1974.
- 1.5 It is further agreed and recorded between the parties that the said Council shall be entitled to insist, after considering any proposals, recommendations or objections received by it during such public participation process and after publication of official notices in the prescribed public media of its intention to dispose of the property to the Purchaser in terms of this agreement, to include such amended conditions and/or new and/or alternative conditions as it may deem fit, to this agreement. The parties agree to negotiate in good faith the inclusion of such conditions as proposed or in amended form and failing agreement thereon this agreement shall lapse and be no longer of any force or effect.

2. PROPERTY

- 2.1 The properties forming the subject matter of this agreement are described as follows:
- 2.1.1 A certain portion known as "Munisipale Huurgrond Perseel No. 527 E", measuring approximately 14,78 hectares, being a portion of the Farm No. 527 in the Municipality and Division of Stellenbosch;
- 2.1.2 A certain portion known as "Munisipale Huurgrond Perseel No. 369 GN", measuring approximately 26,7 hectares, being a portion of the Farm No. 369 in the Municipality and Division of Stellenbosch;
- 2.1.3 A certain portion known as "Munisipale Huurgrond Perseel No. 376 BN", measuring approximately 8,1 hectares, being a portion of the Farm No. 376 in the Municipality and Division of Stellenbosch;
- 2.1.4 A certain portion known as "Munisipale Huurgrond Perseel No. 376 DN", measuring approximately 7,99 hectares, being a portion of the Farm No. 376 in the Municipality and Division of Stellenbosch;
- 2.1.5 A certain portion known as "Munisipale Huurgrond Perseel No. 369 H", measuring approximately 6 hectares, being a portion of the Farm No. 369 in the Municipality and Division of Stellenbosch;

Handwritten signatures and initials in black ink, located in the bottom right corner of the page. There are three distinct marks: a stylized 'R' or 'B' shape, a signature that appears to be 'J. van der Merwe', and another signature that is less legible.

2.1.6 A certain portion known as "Munisipale Huurgrond Perseel No. 369 J", measuring approximately 13,7 hectares, being a portion of the Farm No. 369 in the Municipality and Division of Stellenbosch;

2.1.7 A certain portion known as "Munisipale Huurgrond Perseel No. 375 B", measuring approximately 4100 square metres, being a portion of the Farm No. 375 in the Municipality and Division of Stellenbosch;

All of which properties are situated in the Municipality and Division of Stellenbosch, Province of the Western Cape and are as set out in the diagrams annexed hereto as **ANNEXURE A, B, C, D, E, F and G**, but which properties shall exclude a road reserve which will be indicated on the eventual subdivisional and consolidation diagrams of the relevant properties, for possible future roads necessary for extensions to the Stellenbosch Township.

(Hereinafter referred to as "the property" and/or "the properties")

2.2 It is recorded that the Seller shall be entitled:

2.2.1 to consolidate the aforesaid properties; or such of the components of the said properties as it may deem fit in its absolute discretion, before giving transfer thereof the Purchaser, at its own cost and expense.

2.2.2 to record as a condition of title relating to all or any of the aforesaid properties that such properties shall be zoned agricultural and shall not be rezoned and/or developed for any non-agricultural purpose;

2.2.3 to impose a notarial tie condition between the property hereby sold and the existing property of the Purchaser so that the Purchaser or its successors in title shall not be entitled to sell or otherwise alienate or transfer any portion of the property hereby sold without the simultaneous sale or alienation or transfer of the property collectively referred to as Blaauwklippen Estate being the existing property of the Purchaser, or its successors in title, to the same transferee;

3. PURCHASE PRICE AND METHOD OF PAYMENT :

3.1 The purchase price of the property payable by the Purchaser to the Seller is the sum of R14 250 000.00 (Fourteen Million Two Hundred and Fifty Thousand Rand) exclusive of Value Added Tax.

3.2 The aforesaid total purchase price of the property shall be payable free of commission and bank charges to the Seller's attorneys at Stellenbosch immediately prior to registration of transfer of the property in favour of the Purchaser provided that the Purchaser shall, within 21 days after

finalisation of the final terms of the agreement as envisaged in clause 1.5 furnish the Seller or its attorney with confirmation from the RSA commercial bank of the Purchaser, to be acceptable to the Seller in its sole discretion, that the Purchaser shall have sufficient funds available for the purchase price against registration of transfer.

4. VALUE ADDED TAX

- 4.1 It is recorded that the Seller is registered as a vendor in terms of the Value Added Tax Act ("the Act").
- 4.2 It is therefore recorded that should Value Added Tax be payable on the purchase price of the immovable property referred to in clause 2.1 the Purchaser shall be required to pay such Value Added Tax in accordance with the prescribed tariff of the Act to the Seller's attorney simultaneous with the purchase price as determined in clause 3.2.

5. POSSESSION AND OCCUPATION

- 5.1 It is recorded and agreed that the Purchaser through the tenancy of the Lessee is deemed already to be in possession of the properties in terms of the relevant lease agreements between the Seller and the Lessee.
- 5.2 Until date of registration the Purchaser shall therefore remain in possession and occupation of the properties in terms of the lease agreements and shall be responsible to fulfil all of its obligations vis-à-vis the Seller in accordance with the terms and conditions set out in the lease agreements until the registration of transfer, on which event the said lease agreements shall lapse and be of no further force and effect.

It is agreed that no compensation will be payable by the Seller to the Lessee due to the premature termination of the said agreements of lease; provided however that any rental paid in advance by the Lessee shall be repaid by the Seller on a proportionate basis.

- 5.3 The Purchaser shall be entitled to utilise, free of charge, the area of the road reserve referred to in clause 2.1 above; provided that should the Seller require same for road building purposes, it shall be entitled to give the Purchaser 3 (three) months' written notice to that effect, whereupon the Purchaser shall vacate such portion without any consideration for whatever reason or improvements such as vineyard thereon being payable by the Seller.

6. TRANSFER

Registration of transfer of the property shall be effected by Attorneys Marais Müller Inc, 21 Oewerpark, Die Boord, Stellenbosch (Mr Philip Rall) following final approval by the council and as soon as possible after approval by the Surveyor-

Handwritten signature and initials in black ink, located in the bottom right corner of the page.

General of the various subdivisions and consolidations but only after the purchase price as set out in paragraph 3 and the amounts stipulated in paragraphs 7 and 8 infra have been paid by the Purchaser.

7. RATES AND TAXES, WATER CHARGES

- 7.1 The Purchaser shall be liable for payment of all rates and taxes levied on the property as from the date of registration. Should the Lessee have paid any such rates and taxes in advance, a pro rata portion thereof shall be credited by the Seller to the account of the Lessee.
- 7.2 Any outstanding capital amount pertaining to the water rights and irrigation scheme as set out in any of the lease agreements between the Seller and the Lessee shall, on registration of transfer when the existing lease agreements will lapse ito par. 5.2, become the responsibility of the Purchaser who will be responsible either to pay the full outstanding balance in one lump sum or to pay such balance over the remaining period of the loan relating thereon.

8. TRANSFER COSTS

- 8.1 The Purchaser shall pay on demand all costs and disbursements incurred to effect registration of transfer of the property in its name, including transfer fees, fees for the registration of servitudes and other notarial agreements, transfer duty (if applicable) subdivisional costs and agreements, survey charges, stamp duty, Deeds Office charges and the costs of drawing this agreement plus VAT on such fees.
- 8.2 The Seller shall be responsible for payment of any costs or survey charges regarding the consolidation of all or some of the properties prior to transfer thereof in favour of the Purchaser.

9. BROKERAGE

The parties agree that this sale was not concluded through the agency of any agent and that no commission would therefore be payable.

10. DEFAULT

In the event of the Purchaser failing to pay any portion of the purchase price on the due date, or in the event of either of the parties failing to comply with any of the other terms of this agreement after having received a written notice delivered to the defaulting party by registered post or by hand calling upon the defaulting party to remedy such breach within 14 days from date of posting or delivering by hand of such notice.

Handwritten signature and initials in black ink, located in the bottom right corner of the page.

- 10.1 Should the Seller be the defaulting party, the Purchaser will be entitled, either:
- 10.1.1.1 to cancel the agreement and tender return of the property to the Seller against re-payment of the monies paid by the Purchaser to the Seller; or
 - 10.1.1.2 to claim specific performance from the Seller;
- without prejudice to his rights to claim damages arising from such breach.
- 10.2 Should the Purchaser be the defaulting party, the Seller shall be entitled either:
- 10.2.1.1 to cancel this agreement and retake possession of the property, in which event the Purchaser shall forfeit as liquidated damages any amounts already paid under this agreement; or
 - 10.2.1.2 to claim the full outstanding amount which will immediately become due under this agreement without prejudice to his rights to claim damages arising from such breach.
- 10.3 In the event of legal proceedings being instituted as a result of such breach, the successful party shall be entitled to recover from the defaulting party his legal costs on the scale as between attorney and client, including collection commission.

11. GENERAL CONDITIONS

- 11.1 The property is sold as described in the Seller's Title Deed(s), subject to all conditions and servitudes attaching to the property or mentioned or referred to in the said Title Deed(s). The Purchaser agrees to accept title as held by the Seller who shall not be liable for any deficiency in the event of the property which may be found on a re-survey, nor does the Seller desire to benefit by any excess which may be found.
- 11.2 The Seller does not give any express or implied warranty whatsoever in regard to the Property or any aspect thereof.
- 11.3 The property is sold "voetstoots" as it now stands, and the Seller shall not be responsible for any latent or patent defects to which the property may subject;
- 11.4 The Purchaser hereby acknowledged that it has not been persuaded to enter into this Agreement to reason of any express or implied notification, statement, representation, act or omission made by or on behalf of the Seller, unless same has been expressly set forth herein.

- 11.5 It is hereby agreed that this Agreement shall constitute the entire Agreement between the Seller and Purchaser, and that no amendment, addition or deletion in respect thereof shall be of any legal force and effect, unless such amendment, addition or deletion has been made in writing and signed by both parties hereto.
- 11.6 Any concession, admission or condonation made by the Seller to the Purchaser in regard to any of the terms and conditions of this Agreement, shall be entirely without prejudice to the Seller's rights in terms hereof, and shall in no regard to construed as a waiver by the Seller of this rights in terms hereof.
- 11.7 The Seller and Purchaser herewith choose "domicilium citandi et executandi" at their respective addresses set out in the pre-amble hereto, where all notices and/or process originating from this Agreement shall be served.

12. ELECTRICAL INSTALLATION

The Seller shall not be required to deliver to the Purchaser or the transferring attorneys a Certificate of Compliance in respect to the electrical installations on any of the buildings on the property in terms of Regulation R2920/1992 of the Machinery and Occupational Safety Act No 6/1983 or any amendment or substitution thereof. The Purchaser shall at its expense repair and/or rectify or have repaired any defects and/or deficiencies in the said electrical installations as required by the accredited person concerned for the furnishing of the Certificate of Compliance.

13. SPECIAL CONDITIONS

- 13.1 It is recorded that the Purchaser has applied to the Council for the rezoning of a portion of its existing property for purposes of the construction thereon of a wine cellar, the approval of which has been withheld owing to the fact that an insufficient quantity of grapes had been produced on the existing property of the Purchaser. Notwithstanding the fact that final approval of this Deed of Sale still has to be granted by the Council, consent is hereby granted to the Purchaser to proceed with the construction of a wine cellar subject to the approval of the plans thereof in the normal course of events; provided that should this agreement of sale be cancelled or fall through for whatever reason or registration of transfer not be proceeded with within 6 (six) months after fulfillment of the last of the suspensive conditions set out herein, the parties undertake to amend the lease agreements into fixed term agreements and agree that market related rentals and escalations would be applicable thereto. Failing consensus what would constitute a market related rental and escalation, such matter would be referred by the Council on their sole discretion to an independent agriculture estate agent within the Stellenbosch Wine of

Origin area to determine a market related rental and escalation and whose ruling, as expert and not as arbitrator, shall be binding on all parties concerned.

- 13.2 It is recorded that the Purchaser leases a certain agricultural property.
- 13.3 The Purchaser shall, within 18 calendar months from the first day of the month following the month during which the transfer of the properties referred to in Clause 2, was registered, in good faith furnish the Seller with a written proposal of how the Purchaser:
- 13.3.1 intends to advance Black empowerment on the properties owned by the Purchaser and/or leased from the Seller; and
 - 13.3.2 intends to advance Black Empowerment on the property known as Farm 502V; and
 - 13.3.3 intends to uplift and contribute to the local community.
- 13.4 The Purchaser and the Seller shall in consultation discuss these proposals and failing consensus on any one of the aforesaid proposals, the Seller shall be entitled to forthwith cancel the existing lease in respect of Farm 502V notwithstanding any contrary provisions contained therein without any compensation being payable in respect of such cancellation.

Handwritten signatures and initials in black ink, including a large stylized signature, a smaller signature, and the initials 'JP'.

Protocol No. 44

NOTARIAL DEED

CREATING RESTRICTIVE TIE CONDITION

BE IT HEREBY MADE KNOWN

THAT at STELLENBOSCH on this 2nd day of MAY 2006

before me

JANA ELIZABETH VAN ZYL

of STELLENBOSCH, in the Province of the Western Cape, Notary Public, by lawful authority duly admitted and sworn and in the presence of the subscribing witnesses personally came and appeared

LEE GRÜNEWALD of STELLENBOSCH, she, the said Appearer being duly authorised thereto by:

1. A special power of attorney in her favour signed at STELLENBOSCH on 16th NOVEMBER 2005, granted by

STELLENBOSCH MUNICIPALITY

("Seller")

and

2. A special power of attorney in her favour signed at STELLENBOSCH on 16th NOVEMBER 2005, granted by

BLAAUWKLIPPEN AGRICULTURAL ESTATES STELLENBOSCH (PTY) LTD

No. 1972/000312/07

("Purchaser")

3. A special power of attorney in her favour signed at STELLENBOSCH on 16th NOVEMBER 2005, granted by

CAPE DUTCH ESTATES STELLENBOSCH (PTY) LTD

Reg No 1971/011401/07

("Owner")

AND THE APPEARER DECLARED THAT:

A. WHEREAS the Seller is transferring to the Purchaser the following properties, to wit:-

- (1) Portion 17 of the Farm No. 369 in the Municipality and Division of Stellenbosch, Province of the Western Cape;

Measuring 26,6719 (Twenty Six Comma Six Seven One Nine) hectares

as appears from diagram SG. No. 1565/2004

Held by Certificate of Registered Title No. T. (4) SSS41/2006.

- (2) Portion 3 of the Farm No. 527 in the Municipality and Division of Stellenbosch, Province of the Western Cape;

Measuring 14,7917 (Fourteen Comma Seven Nine One Seven) hectares

as appears from diagram SG. No. 5157/2004

Held by Certificate of Registered Title No. T. (a) SSS46/2006.

- (3) Farm No 1457 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;

Measuring 33,3864 (Thirty Three Comma Three Eight Six Four) hectares

as appears from diagram SG. No. 5170/2004

Held by Certificate of Consolidated Title No. T. (10) SSS47/2006.

(hereinafter referred to as "the Seiler's property")

B. AND WHEREAS the Owner is the registered owner of the following properties, to wit:-

- (1) Remainder of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 36,0885 (Thirty Six Comma Nil Eight Eight Five) hectares
Held by Deed of Transfer No. T.4195/1972 (par 1);
- (2) Portion 52 (a portion of Portion 31) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 1,0405 (One Comma Nil Four Nil Five) hectares
Held by Deed of Transfer No. T.4195/1972 (par 2);
- (3) Portion 53 (a portion of Portion 51) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 5788 (Five Thousand Seven Hundred and Eighty Eight) square metres
Held by Deed of Transfer No. T.4195/1972 (par 3);
- (4) Portion 54 (a portion of Portion 10) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 5889 (Five Thousand Eight Hundred and Eighty Nine) square metres
Held by Deed of Transfer No. T.4195/1972 (par 4)

(hereinafter referred to as "the Owner's property")

C. AND WHEREAS the Owner and the Purchaser are affiliate companies and since the Purchaser conducts an enterprise as wine estate on the Owner's property as well as on the Seller's property in terms of certain lease agreements which are being cancelled simultaneous with the registration hereof;

D. AND WHEREAS it is a condition of the sale agreement between the Seller and the Purchaser whereby the Seller's property is to be transferred to the Purchaser that a notarial deed creating a restrictive tie condition be registered simultaneous with the registration of transfer of the said Seller's property in favour of the Purchaser whereby the Purchaser or its successors in title and the Owner or its successors in title shall not be entitled to sell or alienate or transfer any of the said properties without the simultaneous sale or alienation or transfer of all the other aforesaid properties to the same transferee;

- E. **AND WHEREAS** the Owner has accepted the said conditions and has agreed to the registration of this Notarial Deed without any compensation being payable;

NOW THEREFORE THESE PRESENT WITNESSETH:

1. That the Title Deeds of

- ✓ (1) Portion 17 of the Farm No. 369 in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 26,6719 (Twenty Six Comma Six Seven One Nine) hectares
as appears from diagram SG. No. 1565/2004
Held by Deed of Transfer No. T. (11) SSS48/2006.
- ✓ (2) Portion 3 of the Farm No. 527 in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 14,7917 (Fourteen Comma Seven Nine One Seven) hectares
as appears from diagram SG. No. 5157/2004
Held by Deed of Transfer No. T. (11) SSS48/2006.
- ✓ (3) Farm No 1457 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 33,3864 (Thirty Three Comma Three Eight Six Four) hectares
as appears from diagram SG. No. 5170/2004
Held by Deed of Transfer No. T. (11) SSS48/2006.
- (4) Remainder of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 36,0885 (Thirty Six Comma Nil Eight Eight Five) hectares
Held by Deed of Transfer No. T.4195/1972 (par 1);
- (5) Portion 52 (a portion of Portion 31) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 1,0405 (One Comma Nil Four Nil Five) hectares
Held by Deed of Transfer No. T.4195/1972 (par 2);

- (6) Portion 53 (a portion of Portion 51) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 5788 (Five Thousand Seven Hundred and Eighty Eight) square metres
Held by Deed of Transfer No. T.4195/1972 (par 3);
- (7) Portion 54 (a portion of Portion 10) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;
Measuring 5889 (Five Thousand Eight Hundred and Eighty Nine) square metres
Held by Deed of Transfer No. T.4195/1972 (par 4)

be endorsed to the effect that none of the aforesaid properties may be sold, alienated or transferred unless all the aforesaid properties are simultaneously sold, alienated or transferred to the same transferee.

2. That the Purchaser shall be liable for the payment of the legal costs pertaining to the drafting and registration of this Deed.

Protocol No: 499

NOTARIAL AGREEMENT:

RELEASE FROM RESTRICTIVE TIE CONDITION

KNOWN ALL MEN WHOM IT MAY CONCERN :

THAT on this 24th day of June 2009, before me

AREND LEOPOLD DE WAAL

Notary Public, by lawful authority duly sworn and admitted and practising at Stellenbosch in the Province of the Western Cape, personally came and appeared

COLET BOURBON-LEFTLEY

she, the said Appearer, duly authorised thereto by :

{COMM/SERVITUDES/ADW/AVD1486}

Handwritten signatures

- 2 -

(i) : a Special Power of Attorney dated at STELLENBOSCH on 24 March 2009 granted to her by

STELLENBOSCH MUNICIPALITY

(hereinafter referred to as the "Municipality")

(ii) : a Special Power of Attorney dated at STELLENBOSCH on 18 June 2009 granted to her by

BLAAUWKLIPPEN AGRICULTURAL ESTATES STELLENBOSCH (PTY) LTD
No 1972/000312/07

(hereinafter referred to as "Blaauwklippen")

(iii) : a Special Power of Attorney dated at STELLENBOSCH on 18 June 2009 granted to her by

CAPE DUTCH ESTATES STELLENBOSCH (PTY) LTD
No 1971/011401/07

(hereinafter referred to as "Cape Dutch Estates")

which powers of attorney have this day been exhibited to me and now remain filed in my protocol.

AND THE APPEARER DECLARED THAT :

- 1 WHEREAS the parties entered into Notarial Tie Agreement No K770/2006S (hereinafter referred to as "the Notarial Tie Agreement") in terms of which certain immovable properties of Blaauwklippen and Cape Dutch Estates were notarially tied;
- 2 AND WHEREAS it was acknowledged by the Municipality that it was not the intention to notarially tie certain of the immovable properties that were tied in terms of the Notarial Tie Agreement, which properties are to be released from the Notarial Tie Agreement.

NOW THEREFORE THE PARTIES AGREE AS FOLLOWS:

- 1 THAT the following immovable properties, namely:

- (1) Portion 52 (a portion of Portion 31) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;

- 3 -

- (2) Portion 53 (a portion of Portion 51) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;

Measuring 5788 (FIVE THOUSAND SEVEN HUNDRED AND EIGHTY EIGHT) square metres

Held by Deed of Transfer No T4195/1972 (par 3);

- (3) Portion 54 (a portion of Portion 10) of the Farm Blaauw Klip No 510 situate in the Municipality and Division of Stellenbosch, Province of the Western Cape;

Measuring 5889 (FIVE THOUSAND EIGHT HUNDRED AND EIGHTY NINE) square metres

Held by Deed of Transfer No T4195/1972 (par 4);

shall be released from the working of the Notarial Tie Agreement to the effect that Cape Dutch Estates shall be entitled to sell, alienate or transfer the aforesaid properties separately from the other immovable properties referred to in the Notarial Tie Agreement.

- 2 THAT the costs involved in the finalisation and registration of this Agreement will be borne by Cape Dutch Estates.

THUS DONE AND EXECUTED by the appearer before me, the Notary, on the date aforementioned in the presence of the undersigned witnesses.

APPENDIX 4

BLAAUWKLIPPEN

APPLICATION AND MOTIVATION FOR THE SEPARATION OF NOTARIALY TIED PROPERTIES , PORTION 17 OF THE FARM NO 369 AND PORTION 3 OF THE FARM NO 527 FROM THE MOTHER ERF, PORTION 837 OF THE FARM BLAAUW KLIP NUMBER 510.

1 BACKGROUND

1.1 Initially, the properties listed in 1.1.1 to 1.1.4 below were tied to the Mother Erf, Portion 837 of the Farm Blaauw Klip Number 510 in Municipality and Division of Stellenbosch (T 34249/2015), in terms of Notarial Deed K 770/2006:

- 1.1.1 Farm No 1457 situate in Municipality and Division of Stellenbosch (Erf on open field opposite golf course) (A)
- 1.1.2 Portion 17 of the Farm No 369 in Municipality and Division of Stellenbosch (Paradyskloof Erf) (C)
- 1.1.3 Portion 3 of the Farm No 527 in Municipality and Division of Stellenbosch (Skilpadrug Erf) (D)
- 1.1.4 Remainder Portion 52 of the Farm Blaauw Klip Number 510 in Municipality and Division of Stellenbosch (Kreefgat Property)
Remainder Portion 53 of the Farm Blaauw Klip Number 510 in Municipality and Division of Stellenbosch (Kreefgat Property)
Remainder Portion 54 of the Farm Blaauw Klip Number 510 in Municipality and Division of Stellenbosch (Kreefgat Property)

1.2 We attach the best copy in our possession of the Deed of Sale, dated 1 November 2004 in terms of which the properties were originally notarially tied (refer inter alia, to clauses 2.2.1 and 2.2.3).

1.3 We also attach a copy of the Notarial Deed K 770/2006 in terms of which the abovementioned properties were subsequently notarially tied.

1.4 In October 2008, the Mayoral Committee in its capacity as Delegated Authority, approved the application to "un-tie" the properties listed in subparagraph 1.1.4 above. Please refer to item 5.2.7 of the Minutes of the Mayoral Committee

Meeting dated 2008-10-22: Report by Municipal Manager - attached hereto for ease of reference.

- 1.5 We attach a copy of Notarial Deed K 57/2010 which released the aforementioned properties from the Mother Erf. These properties are now held by CRT Number T 20990/2020.
- 1.6 Blaauwklippen Agricultural Estates Stellenbosch (Pty) Ltd ("Blaauwklippen") wishes to apply to un-tie Portion 17 of the Farm No 369 (Paradyskloof Erf) (C) and Portion 3 of the Farm No 527 (Skilpadrug Erf) (D) from the Mother Erf (A) and submits herewith its motivation for the requested separation.
- 1.7 A Location map of the properties C and D to be untied from A is included as Figure 1 below:

- A – Farm 510/837, Stellenbosch (±36.44ha)
- B – Farm 1457, Stellenbosch (±33.39ha)
- C – Farm 369/17, Stellenbosch (±26.67ha)
- D – Farm 527/3, Stellenbosch (±14.79ha)

2 THE EFFECT OF COVID AND NEED FOR FLEXIBILITY IN ENCUMERING OR SELLING THE PROPERTIES

The Covid pandemic has had, and continues to have, devastating effects on Blaauwklippen's wine and hospitality businesses and Blaauwklippen need to generate additional funds for operational purposes and to settle debt due and payable.

Two options to raise funds have been identified, ie to Sell off certain properties, and/or raise additional loan capital.

- 2.1 Due to its location in relation to the Mother Erf, the Paradyskloof property C and the Skilpadrug property D have been identified as appropriate properties to sell. However, due to the restrictive tie-conditions, Blaauwklippen cannot sell these properties individually without also selling the Mother Erf as well as Erf 1457 (B), all tied to the Mother Erf.
- 2.2 The subject properties are currently tied under one Mortgage Bond as security for repayment of the loan obtained when Blaauwklippen was purchased from the previous owner.

For the same reason, the current Bondholder cannot release only properties C and D from the bond and new financiers are not prepared to lend funds without security of unbonded properties.

3 THE ORIGIN OF THE NOTARIAL TIE OF CERTAIN OF THE PROPERTIES TO THE MOTHER ERF:

- 3.1 Clause 2.2.3 of the Deed of Sale provides that the Seller (Stellenbosch Municipality) shall be entitled to impose a notarial tie condition between the property thereby sold and the existing property of the Purchaser (Cape Dutch Estate (Pty) Ltd) so that the Purchaser or its successors in title shall not be entitled to sell or otherwise alienate or transfer any portion of the property thereby sold without the simultaneous sale or alienation or transfer of the property collectively referred to as Blaauwklippen Estate being the existing property of the Purchaser, or its successors in title, to the same transferee.

- 3.2 At the time, the lessee, Blaauwklippen Agricultural Estates Stellenbosch Pty Ltd (also a party to the Deed of Sale) was renting the properties which were the subject of the sale from the Municipality in terms of long-term leases.
- 3.3 The preamble to the Deed of Sale recorded, inter alia, that the purchaser through its affiliate company the lessee (Blaauwklippen) was conducting farming activities on the sale properties and is desirous of purchasing the said property so as to incorporate same into its present farming activities on the wine estate known as Blaauwklippen Estate.
- 3.4 The Deed of Sale expressly records in paragraph F that *"The properties forming the subject matter of the sale are situate in the area of jurisdiction of the municipal council of Stellenbosch and therefore do not constitute "agricultural land" as envisaged in terms of the Subdivision of Agricultural Land Act, 70/1970."*
- 3.5 Clause 14 of the Deed of Sale provides a mechanism to deal with the future use of the property in the event that the *"...purchaser or its successor in title..... develop or sell or otherwise dispose of the property or any portion thereof for purposes of development of the property or any portion thereof for any purpose other than bona fide agricultural purposes,"*
- 3.6 The properties listed in 1.1.4 above were also previously notarially tied to the Mother Erf in accordance with a similar sale agreement dated 13 August 2003 but were subsequently released in October 2008. Those properties, to be consolidated with Portion 71 of Farm Blaauw Klip 510, received rezoning and subdivision approval on appeal from the Executive Mayor on 13 July 2021.
- 3.7 It is our contention that the said properties C and D should also be untied from the Mother Erf to afford the owner the flexibility to exercise its constitutional property rights.

4 SPATIAL PLANNING CONSIDERATIONS

- 4.1 It is clear from a consideration of how the Stellenbosch town has grown since 2004 when the Deed of Sale was entered into, and 2006 when the notarial tie of the properties was registered, that circumstances have changed, that the spatial planning vision for the municipality's growth has evolved and that other statutory protections are in place to protect land deemed to have agricultural and rural value.
- 4.2 Having regard to Figure 1 above as well as the location of the properties that are still notarially tied to the Mother Erf, it is clear that the notarial tie of the properties no longer makes logical spatial planning sense. The properties do not form an economic unit with one another or with the Mother Erf and are not contiguous to each other. Furthermore, the properties are in any event protected by their current designation in the MSDF and through other statutory means and the need to protect the agricultural and rural use of the properties through a notarial tie to the Mother Erf has become superfluous.
- 4.3 Having regard to the fact that an owner of property has the constitutional right to administrative action which is lawful, reasonable and procedurally fair, it is our submission that the property owner has the right to have this application considered on its merits in terms of the applicable spatial planning and statutory application processes that apply at the time. The changes in circumstances since 2004 warrant a reconsideration of the notarial tie that significantly limits the property owner's property rights.
- 4.4 It is important to note that this application is not for change in land use for development purposes of the subject properties, but merely to enable the owner to utilise the properties independently to raise funds.

Figure 2: Extract of the Stellenbosch MSDF (2019)

- 4.5 The cancellation of the notarial tie will patently not lead to the urban development of the subject properties. The farms will remain zoned for agricultural purposes and protected by the MSDF.
- 4.6 This function to protect Council's vision for the spatial development of Stellenbosch, has been replaced by the MSDF and using a Title Deed condition or a notarial tie to enforce the Stellenbosch Municipality's spatial planning policy has become outdated.

REQUEST / APPLICATION

5. The inability to raise finance, encumber, or sell the individual properties due to the fact that they are notorially tied to the Mother Erf is placing a further commercial constraint on Blaauwklippen's business as it cannot raise the necessary funds for operational purposes. The financial institutions or potential purchasers of some of these properties require free title as security for lending purposes and / or to enter into sale agreements.
- 6 In the light of the above, we ask therefore that the application for the removal of the restrictive condition (the notarial tie) as per Notarial Deed K 770/2006, be approved insofar as it relates to the following properties:

- 6.1 Portion 837 of the Farm Blaauw Klip Number 510 in Municipality and Division of Stellenbosch (Mother Erf) (A)
- 6.2 Portion 17 of the Farm No 369 in Municipality and Division of Stellenbosch (Paradyskloof Erf) (C)
- 6.3 Portion 3 of the Farm No 527 in Municipality and Division of Stellenbosch (Skilpadrug Erf) (D)

7 We ask further that the Municipality provide the necessary Power of Attorney confirming that the aforementioned properties have been released from the notarial tie to the Mother Erf to enable the owner to sell, alienate or encumber the properties separately.

8 We thank you in anticipation.

A handwritten signature in dark ink, appearing to read 'Ben-Carl', with a large circular flourish underneath.

STELLENBOSCH FRAMEWORK

11.3.2	APPLICATION HORIZON HOUSE TO EXTEND LEASE: ERF 3722 AND PORTIONS OF ROAD RESERVE
--------	---

Collaborator No:

IDP KPA Ref No:

Good Governance

Meeting Date:

17 May 2023 & 24 May 2023

1. SUBJECT: APPLICATION HORIZON HOUSE TO EXTEND LEASE: ERF 3722 AND PORTIONS OF ROAD RESERVE

2. PURPOSE

To inform Council of the request from Horizon House to extend the lease agreement entered into in 2020.

3. DELEGATED AUTHORITY

Council where an agreement exceeds 9 years and 11 months or the value is above R5 million.

4. EXECUTIVE SUMMARY

Horizon House, situated on the outskirts of Onder Papegaaiberg, is an NGO catering for the needs of people living with disabilities. They indicated in 2020 that they have received a donation to put up new fencing around the facility and to develop walking trails, to be use by their residents, and also the greater public. They wanted to extend the area onto a portion of municipal land, situated to the south of their property for this reason, on an encroachment basis. Council considered the matter and approved the lease of an area of approximately 2500 m² for a period of 9 years and 11 months after a public participation process and considering the comments received.

Due to the nature of an encroachment this legal vehicle are no longer used for applications to use council land for whatever reason is proposed. An agreement was entered into with Huis Horizon, attached as **APPENDIX 1**. We have received a further request from them for a longer lease period – **APPENDIX 2** attached. It seems from the information provided that none of the improvements envisaged in 2020 has materialised. They are requesting a longer lease period over the current leased land, but it is was not clear how long. The item served before Mayco in February 2023 and was referred back for clarification and refinement.

We have contacted Huis Horizon and attached as **APPENDIX 3** is the latest information received from them indicating a request for a 30-year lease agreement. Any agreement longer than 10 years should be registered with the deeds office and the information statement process where council advertise an intention to enter into the long term lease must be advertised for public comment. Only after comment has been received and considered can an in principal decision be taken (which must again be advertised given that it is not an open market lease) about any extension of the current lease agreement. Council must approve the information statement (**APPENDIX 4**) should the request be entertained, and the item will then be returned to council after comments has been received. A new lease agreement will be entered into if the application is approved eventually.

5. RECOMMENDATION

For consideration

6. DISCUSSION / CONTENT**6.1 Background**

An application was received from Horizon House, Stellenbosch, to use a portion of Erf 3722 for recreational purposes and to extent their fencing onto a portion of the street reserve (Patrys road).

Having considered the matter on 2020-01-22. Having considered the matter Council resolved as follows:

- a) *that the portion of erf 3722 Stellenbosch, as well as the portion of street reserve and agricultural land, as indicated on Fig 3,4 and 5, respectively be identified as land not required for the municipality's own use during the period of the proposed encroachment agreement;*
- b) *that approval be granted in principle to enter into an encroachment agreement with Horison House to enable them to use/manage the land for the purpose as per their request subject to advertising the intent to enter into the agreement for public comment/inputs/objections.*
- c) *That the rental be determined as per the tariff rate".*

Following the above Council resolution, a Public Notice was published in the Eikestad News of 13 February, soliciting comments/inputs/objections on or before 5 March 2020. One (1) objection was received, i.e. from Work Centre for Adult persons with disability, operating from the Horizon House premises. Council resolved to lease the premises to Huis Horizon for a period of 9 years and 11 months.

6.2 Discussion

They are requesting a longer lease period, but it is not clear how long. If this is considered favourably an information statement will have to be published for public comment/alternative proposals in terms of the asset transfer regulations.

Due to the nature of an encroachment this legal vehicle is no longer used for applications to use council land for whatever reason is proposed. An agreement was entered into with Huis Horizon, attached as **APPENDIX 1**. We have received a further request from them for a longer lease period – **APPENDIX 2** attached. It seems from the information provided that none of the improvements envisaged in 2020 has materialised. They are requesting a longer lease period, but it is not clear how long. If this is considered favourably an information statement will have to be published for public comment/alternative proposals in terms of the asset transfer regulations.

We have contacted Huis Horizon and attached as **APPENDIX 3** is the latest information received from them indicating a 30 years lease agreement. Any agreement longer than 10 years should be registered and the information statement process where council advertise an intention to enter into the long term lease must be advertised for public comment. Only after comment has been received and considered can an in principal decision be taken (which must again be advertised given that it is not an open market lease) about such a long lease. Council must approve the draft information statement (**APPENDIX 4**) should the request be entertained and the item will then be returned to council after comments has been received.

6.3 Financial Implications

The latest information is that the intended fence will cost R1 900 000 for a 790 m long fence and that the area that they want to lease additional to what is currently under lease is 260 m. The fence is along the road and the current lease covers an area of 2500 m².

The agreement was signed in April 2022 and based on a R150 per month with an escalation of 8% each after last signature the escalation would have applied from 1 July 2022. All the cost for improvements/maintenance will be for the account of Horizon House. They are currently not paying rates and taxes on the rental property. The amount was determined in 2020 as per the fees for encroachments on the tariff book and was not market related or a % of the market related rental. From 1 July 2023 a new structure for the old encroachment agreements will be in place. Rentals of council land is normally based on a market related price and where the organisation renting is providing a social service to the greater Stellenbosch Municipality a % of between 5 – 20 % is applied. No market related rental has been determined for the rental space.

6.4 Legal requirements

Long term rights on Council property (seen as a disposal which would include leases) may only be awarded after an information statement was approved by Council and advertised for public comment. Any agreement longer than 10 years should be registered and the information statement process where council advertise an intention to enter into the long term lease must be advertised for public comment. Only after comment has been received and considered can an in principal decision be taken (which must again be advertised given that it is not an open market lease) about such a long lease. Council must approve the draft information statement (**APPENDIX 4**) should the request be entertained and the item will then be returned to council after comments has been received.

6.5 Staff Implications

No additional staff implications.

6.6 Previous / Relevant Council Resolutions

36th COUNCIL MEETING: 2020-07-29: ITEM 11.2.3

RESOLVED (majority vote)

- (a) Council considered the objection before making a final determination;
- (b) that approve the encroachment application, the Municipal Manager be authorised to conclude the Agreement; and
- (c) that Council approved the proposed delegations to the Municipal Manager in **APPENDIX 5**.

The following Cllrs requested that their votes of dissent be minuted:

*Cllr F Adams; FT Bangani-Menziwe (Ms); G Cele (Ms); DA Hendrickse; LK Horsband (Ms);
N Sinkinya (Ms); and P Sitshoti (Ms).*

6.7 Risk Implications

The risk implications are addressed in the item.

6.8 Comments from Senior Management

None requested.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.3.2

- (a) that Council confirm that erf 3722 and portions of the road reserve situated next to Huis Horizon is not needed for municipal services;
- (b) that Council put out an information statement indicating that a 30-year lease will be considered pending on the response from the community;
- (c) that Council approve the draft information statement attached as **APPENDIX 4**;
- (d) that the Applicant must allow reasonable access to the public during the day and that the rules for access be submitted to the Municipal Manager for approval before implementation;
- (e) that the Applicant restore the watercourse to its natural status and maintain it as such for the full period of the lease;
- (f) that the Administration map the area to be leased precisely and attach it to the return item after the public participation process;
- (g) that the current lease agreement remains in place until a final decision is made.

ANNEXURES:

- Annexure 1: Current lease agreement
- Annexure 2: Application February 2023
- Annexure 3: Additional information
- Annexure 4: Draft information statement

ANNEXURE 1

STELLENBOSCH
STELLENBOSCH • PNIEL • FRANSCHHOEK

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

LEASE AGREEMENT

granted by

STELLENBOSCH MUNICIPALITY

(herein represented by **Geraldine Mettler** in her capacity as Municipal Manager;
hereinafter referred to as the "Municipality")

Of

Civic Centre
Plein Street
Stellenbosch
7600

TO

HUIS HORIZON

(herein represented by **EC Bresler** in her capacity as Executive Director)

hereinafter referred to as "the Lessee

Of

PO Box 102
Stellenbosch
7599

USE OF LEASE AREA:

- a) To use a portion of Council owned property for gardening purposes, leisure activities and for the construction of a boundary fence.

Permission is hereby granted by the **Municipality** to the **Lessee** being the registered owner of Erf 6287, Stellenbosch to retain the encroachment on the property of the **Municipality** as described above and shown on Plans hereto attached as **APPENDIX 1**.

1. DURATION OF THIS PERMIT

This Agreement shall endure for a period of 9 years and 11 months from date of signature of the last signing party, subject to the parties right of earlier termination as set out in the clause 6.1.

2. RENTAL FEE

- 2.1 The rental fee of R150 per month (Inclusive of VAT) will be payable (monthly in advance) before the 7th of each month.
- 2.2 On 1 July of each year the fee referred to in sub-clause 2.1, will escalate by 8% by the Municipality.

3. RATES AND TAXES

The Lessee shall not be responsible for the payment of rates and taxes in respect of the lease area.

4. USE OF THE LEASE AREA

- 4.1 The Lease Area shall be used for the purpose set out above and It shall not be altered or extended, nor shall any further building or structures be erected thereon without the prior, written permission of the Municipality.
- 4.2 The Lessee shall ensure that the lease area is kept in a neat and tidy condition to the satisfaction of the Municipality. The Lessee shall, when notified by the Municipality, within a period of thirty days of such notice at his/her/its own expense, trim or remove any vegetation which in the opinion of the Municipality is or threatens to become unsightly or dangerous, failing which the Municipality may cause such vegetation to be trimmed or removed at the Lessee's expense.
- 4.3 The Lessee agrees that in the event of the whole or portion of his/her/its property abutting the encroachment being disposed of whilst this agreement is still in existence, this agreement shall be terminated as from the date of the disposal.

Handwritten signatures and initials at the bottom right of the page. There are three distinct signatures: one in a circle, one with a cross-like mark, and one more complex signature.

- 4.4 No trees growing on the Property shall be pruned or removed without the approval of the Municipality. Specific conditions may be imposed regarding the vegetation on the encroached area.

5. **MUNICIPALITY'S RIGHT OF ACCESS**

The Municipality shall have the right of free access to the ~~encroachment~~ ^{lease area} at all times for inspection of the ~~encroachment~~ ^{lease area} and for inspection, maintenance and repair of any services which may traverse the encroachment or to install such services. The Municipality shall not be liable for any damage to the ~~encroachment~~ ^{lease area} which may arise from such inspection, maintenance, repair or installation.

6. **TERMINATION**

- 6.1 This Agreement may be terminated by either party at any time upon three (3) month's written notice in writing and without payment of any compensation. Upon termination of this Agreement the Lessee shall be obligated to remove all temporary structures at his/her/its own cost and to re-instate the land to the satisfaction of the Municipality and shall not be entitled to claim compensation in respect thereof. All structures left on the property will become the property of the Lessor and no compensation is payable in respect thereof.

7. **INDEMNITY**

The Lessee hereby indemnifies and undertakes to keep the Municipality indemnified against all liability howsoever caused or whether arising as a direct or indirect result of the existence of the ~~encroachment~~ ^{lease} or use of the area ~~encroached~~ ^{leased} upon and against all actions, suits, proceedings, claims, demands, costs and expenses whatsoever which may be taken or made against the Municipality or incurred or become payable by the Municipality at the suit of any person.

8. **SUBLETTING AND ASSIGNMENT**

The Lessee shall not assign his/her/its rights under this Agreement, to any other person or entity.

[Handwritten signatures and initials]

9. OWNERSHIP

- 9.1 The Municipality, shall not be deemed to have relinquished its rights to the ownership of the property or to have waived any of its rights pertaining to the property whether in terms of the current law, regulation or any other legislation to be enacted in future.

10. DOMICILIUM

The Municipality and the Lessee hereby appoint irrevocably for all purposes of and connected with this Agreement, the addresses stated in the heading of this Agreement, to be their respective *domicilium citandi et executandi*.

11. BREACH

In the event of the Lessee breaching any of the conditions of this Agreement and failing to remedy such breach within a period of thirty days of dispatch of a notice by the Municipality, requiring such breach to be remedied, the Municipality may terminate this agreement and may at the cost of the Lessee cause any structures erected by the Lessee be demolished, removed or filled in and the land to be re-instated to the satisfaction of the Municipality with no compensation payable to the Lessee.

Handwritten signatures and initials at the bottom right of the page. There are several distinct marks, including what appears to be a signature 'mu' in a circle, and other scribbled initials and marks.

ANNEXURE 2

VOORLEGGING : HUIS HORISON SEKURITEITSHENING – WATERCOURSE (Erf 3722)

Datum: Februarie 2023

1. BESTUURSOPSOMMING

Die dringendheid van die beoogde omheining.

Die Munisipaliteit het die bewaring, bestuur en ontwikkeling van die 3 Ha gebied onder die dam langs Huis Horison se gronde (Erf 3722) aan ons toegesê in 2020 om te bewaar en benut. Die betrokke stuk grond word deur Cape Nature geklassifiseer as 'n "Watercourse" en is van kritiese belang vir die ondersteuning van die funksionering van Beskermdes Gebiede en Kritiese Biodiversiteitsareas.

Aangesien dit 'n 'watercourse' is, is daar nie behuisings-of besigheidsontwikkelingsmoontlikhede nie. Omheining sal in die eerste plek sekuriteit verbeter en die toename van plakkers, stroping van inheemse fauna en flora, storting, vure en besoedeling teewerk. Eers daarna kan verdere ontwikkeling van stappaaie en beheerde toegang geskied.

2. PROBLEEMSTELLING

Donateurs is nie gretig om by te dra tot die omheining nie, as gevolg van die terme van die huurkontrak nl: 9 jaar 11 maande, 'n 3 maande kansellasië, en geen vergoeding vir infrastruktuur opgesit nie.

Op die oomblik vermeerder die plakkers op die gronde omdat daar nie 'n heining is nie. Daar is 'n toename in besoedeling, stroping, vure en misdaad, wat die hele buurt benadeel.

Die area dien as 'n wegkruipplek vir misdadigers en is 'n baie groot bedreiging vir ons inwoners.

Daar is reeds aansoek gedoen vir toestemming vir oorskrydings nl. dat die heining in sekere dele 2-2.5m vanaf padskouer opgerig kan word ipv 5m soos in die "Lease agreement" staan. Die verslapping versoek is reeds aan Piet Smit gerig en 'n terreinbesoek het plaasgevind – hulle het mondelings geen beswaar gehad nie, maar ons wag steeds op amptelike terugvoer. Daarsonder sal baie bome (wat ons juis wil beskerm) uitgehaal moet word, en kostes van die heining sodanig onbekostigbaar styg.

Addisioneel hiertoe styg staalpryse aanhoudend en raak die dringendheid van die saak nou almal se sak.

3. PROGRAMBESKRYWING

Die uithaal van uitheemse plantegroei en hervestiging van inheemse, habitat geskikte, plante is deel van ons Ekoterapie-programme, en dra by tot die bewaring van 'n natuurlike gebied ("greening of the environment").

‘n Hout-stappad (“boardwalk”) met ‘n voëluitkykpunt word beplan as deel van ons staproete, en sal sodoende die omgewing toeganklik maak vir ons inwoners en dagwerkers, sodat hulle die waarde en terapeutiese voordele daarvan kan benut.

Die area sal ook toeganklik gemaak word vir die onmiddellike omgewing van Onder-Pappegaaiberg (woonhuise en besighede) om te gebruik vir rekreasie; stap, fietsry, piekniek, ‘forest bathing’ en meditasie.

Indien die omgewing omhein word, kan dit volwaardig ontwikkel word as ‘n arboretum, wat ‘n opvoedkundige natuurervaring sal wees vir die breër Stellenbosch gemeenskap asook ‘n toerisme aantreklikheid aangesien dit enigste van sy soort in die gemeenskap is.

Huis Horison het reeds die volgende ondersteuning:

- ‘n Beskryfde gemeenskapsbetrokkenheid: Die buurplaas is bereid om ten minste 20 mense beskikbaar te maak om te help met die opruim en skoonmaak van die rommelstrooiing deur die plakkers.
- Plantkenners, Prof Ernst van Jaarsveld (Babylonstoren) en Professor Jan Gilliomme, het reeds hul betrokkenheid bevestig in die rehabilitasie van die vleiland. Volgens kenner Ernst van Jaarsveld, het die vleiland uitstekende potensiaal (met ‘n bestaande inheemse raamwerk) om herstel en bewaar te word, en as ‘n Bos-Arboretum gevestig word (met stappad en voël uitkykpunt).
- Die Munisipaliteit sal die vleiland rehabilitasie beskryf en ondersteun in die nuwe IDP.
- Plaaslike hengelaars sal hul tyd en kennis gee om die dam se vis populasie te help herstel en bewaar.
- Skole het reeds aangedui hulle wil betrokke raak in die bewaring van die area deur hul gemeenskapsdiensprogramme.

Hierdie is alles deel van ons toewyding tot ‘n gesonde omgewing, goeie buurmanskap, en om verdere geleenthede te skep vir gemeenskapsontwikkeling, vaardigheidsopleiding, spirituele inisiatiewe en sodoende ‘n waardetoevoeging vir ‘n breër gemeenskap te wees.

4. PROJEKBESKRYWING

R2 500 000 word benodig vir die vleiland heining. [Spesifikasie: Betaview 25 Zinc 2.1 hoog met flat rap razor wire bo. Sluit 3 6m skuifhekke in.]

5. KONTROLE EN BESTUUR

- Die voltydse Tegnies- en Terreinbestuurder is verantwoordelik vir die bestuur, beplanning en kontrole van instandhouding en beplanning, toesig en uitvoering van nuwe ontwikkeling van die terrein, onder andere die heiningprojek.
- Kort-en langtermynbeplanning word gedoen en weeklikse verslag gelewer aan die uitvoerende direkteur om die sukses ten opsigte van alle fasette van die program te meet en saam met die finansiële bestuurder die uitgawes te monitor en beheer.
- Die sentrum is ‘n Maatskappy Sonder Winsbejag met ‘n bekwame en toegewyde direksie en gesonde algemene en finansiële bestuur.

- Huis Horison het goeie ondersteuning van die gemeenskap, wyksraadslid en die Munisipaliteit.
- Jaarlikse ouditering vind plaas deur 'n onafhanklike, eksterne ouditeursmaatskappy; Moore Stellenbosch.
- Deurlopende instandhouding sal deur die ekoterapie- en vrywilligerprogramme by die sentrum gedoen word.

PROJEK IMPAK

Subject: Huis Horison Inligting vir Erf 3722

Beste Annalene

Ek stuur hierdie namens Magdie van Heerden, want sy is op die oomblik nie by haar rekenaar, en weens die dringendheid van die inligting.

Heining

Die Heining vir Erf 3722 sal vir ons R1,900,000 kos (staalpryse styg aanhoudend, maar dit is volgens ons mees onlangse kwotasie)

Lengte: 790m

Spesifikasie : Betafence 25 3D panels Zincalu afwerking, 2.400 hoog met "sharktooth top rails" en "underdigs", 2x Skuifhekke 6m(w) x 2.4m(h) en 4x Voetganger hekke 2.4m(h) x 1.2m(w).

Oorskrydings

Dat die heining 2-2.5m vanaf padskouer opgerig kan word ipv 5m soos wat in die "Lease agreement" staan agv die kompleksiteit van installasie (hoeveelheid gevestigde bome en inheemse bome), onderhoud en toegang, en veiligheid. Die verslapping versoek is destyds aan Mnr Piet Smit gerig en het 'n terreinbesoek plaasgevind – hulle het geen beswaar gehad nie.

Die totale lengte van die oorskryding strek op Tarentaal Str (ongeveer 260m).

Verlenging van Huurkontrak

Ons doen aansoek vir verlenging van die huurkontrak na ten minste 30 jaar (29 jaar en 11 maande) sodat dit vir ons moontlik is om befonders vir die projek te kan kry.

Laat weet asb as enigiets onduidelik is of indien jul meer info benodig.

Vriendelike groete / Kind regards

ANNEXURE 4

OFFICIAL NOTICE:

INFORMATION STATEMENT IN RELATION TO
 3722 AND PIECES OF ROAD RESERVE
 SITUATED NEXT TO HUIS HORIZON IN
 ONDERPAPEGAAIBERG.

1. PURPOSE

To provide the prescribed information in terms of regulation 34 and 35 of the Asset Transfer Regulations, published in terms of Section 168 of the Local Government: Municipal Finance Act (R878, 22 August 2008), to the public to provide input on during the Public Participation Process.

2. BACKGROUND

Stellenbosch Municipality is the owner of Erf 3722 and the pieces of road reserve situated next to Huis Horizon in Onder Papagaaiberg.

Stellenbosch Municipality is currently leasing the approximately 2500 m² on 9 year and 11 month lease agreement to Huis Horizon for an amount of R150 per month. The land is a vleiland and cannot be used for development. Huis Horizon has requested that the Municipality extend the lease to 30 years to allow them to get an investor to erect a fence along the street front to provide more security as they want to develop the area in an area for people to walk and enjoy nature.

The municipality will also require Huis Horizon to allow reasonable access to the public during the day and that the rules for access be submitted to the Municipal Manager for approval before implementation; Huis Horizon must restore the watercourse to its natural status and maintain it as such for the full period of the lease; the Administration must map the area to be leased precisely and attach it to the return item after the public participation process;

3. DISCUSSION

3.1 Public Participation Process

Council is publishing this information statement to invite comments from the public on Council's intention to consider the long term lease requested. Council therefore herewith invites comments and inputs on the probability of a long term lease to Huis Horizon as requested.

Council will make a decision on the request after comments and inputs was received on this information statement in terms Asset Transfer Regulations, Regulation 35.

3.2 Information Statement

In terms of Regulation 35, when the Municipal Council proposes to grant long term right(s) (30 year lease) is considered the Municipal Manager must publish an Information Statement referred to in Regulation 34 for public comment.

In terms of Regulation 34 an Information Statement must consist of the following:

- a) the reason for the proposal to grant a long-term right to use, control or manage the relevant capital asset.
- b) any expected benefit to the municipality that may result from the granting of the right.
- c) any expected proceeds to be received by the municipality from the granting of right; and
- d) any expected gain or loss that will be realised or incurred by the municipality arising from the granting of the right.

3.2.1 Reason(s) for the proposal to grant a long term right to use, control or manage the erf 3722 and the portions of the road reserve situated next to Huis Horizon

- a) The daily management and maintenance of the various municipal land is a challenge as the security on open spaces poses a threat of invasion, the open spaces must be cleaned to prevent a fire hazard.
- b) The land is an environmental protected area and cannot be used for development. The land can be used for the public if it is developed in an area where people can safely walk and enjoy nature.
- c) Due to the investment that is expected to put up a fence through donor funding the request is made to grant a long term lease to receive a return on investment.

3.2.2 Expected benefits to the municipality that may result from the granting of the rights

- a) a) The daily management and maintenance of the various municipal land is a challenge as the security on open spaces poses a threat of invasion, the open spaces must be cleaned to prevent a fire hazard.
- b) The land is an environmental protected area and cannot be used for development. The land can be used for the public if it is developed in an area where people can safely walk and enjoy nature.
- c) Due to the investment that is expected to put up a fence through donor funding the request is made to grant a long term lease to receive a return on investment. The management and development of the Van der Stel Sports facility will result in savings on maintenance costs and staff, while at the same time providing the broader Stellenbosch Community with a world class sport facility.

3.2.3 Expected proceeds to be received by the Municipality from the granting of the rights

- a) The municipality will receive a monthly rental income for the property;
- b) Community access to a developed area to enjoy nature.
- c) Economic activities may be encouraged and stimulated.
- d) The residents of the facility will benefit especially as they have special needs.

3.2.4 Expected gain or loss that will be realised or incurred by the municipality arising from the granting of the rights

- a) A current open space that attracts crime may be provided with security to enable the residents and public to enjoy the area.
- b) Less financial pressure on the municipality's capital and operating budgets to fence the area and deal with security.

3.3 Public comment invited

The public are invited to provide input/comment to the municipality on the proposal that the Municipality enter into a 30 year lease agreement as proposed by Huis Horizon.

Comment must reach the offices of the Municipality on or before and must be addressed to the Municipal Manager. Comments can be sent via email to Municipal.Manager@ Stellenbosch.gov.za or delivered to the 3rd Floor, Main Office Building, 17 Plein Street, Stellenbosch.

Any queries can be directed via email to at Annalene.deBeer@ Stellenbosch.gov.za.

11.6.1	REQUEST FOR APPROVAL OF THE DRAFT POLICY ON SIDEWALK ACCESSIBILITY
--------	---

Collaborator No: 745030
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 17 May 2023 & 24 May 2023

1. SUBJECT: REQUEST FOR APPROVAL OF THE DRAFT POLICY ON SIDEWALK ACCESSIBILITY

2. PURPOSE

That council notes and approves the draft policy on Sidewalk Management.

3. DELEGATED AUTHORITY

Reserved for decision by Council.

4. EXECUTIVE SUMMARY

The Municipality aims is to promote and prioritize Non-Motorised Transport (NMT), as these were outcomes from IDP consultative processes and forms part of the Municipality's and National Government's Strategic Planning.

Landscaping, outdoor dining and other activities carried out on sidewalks may obstruct drivers' sight distances and pedestrian movements, creating potentially unsafe conditions.

The Municipality endeavours to improve sidewalk management and strive for a safe environment for all sidewalk and roadway users. In order to achieve this, the municipality intends to introduce a policy and processes that would improve safety and make sidewalks more accessible and user friendly to pedestrians.

5. RECOMMENDATIONS

- (a) that the content of this report be noted;
- (b) that the Draft Sidewalk Accessibility Policy, attached as **ANNEXURE A**, be accepted as the copy to be used in a Public Participation process;

- (c) that the Draft Sidewalk Accessibility Policy be duly advertised for the purpose of a public participation process; and
- (d) that upon the completion of the public participation process, the Draft Sidewalk Accessibility Policy together with any comments/objections be resubmitted to Council for final approval and adoption.

6. DISCUSSION / CONTENTS

6.1 Background

Stellenbosch is a developing town and as part of its strategic planning, a shift from reliance on private motor vehicles towards safer, sustainable alternatives such as NMT is required. The Municipality has also received numerous requests through IDP sessions to prioritize on NMT in Stellenbosch. The Municipality therefore aims to promote and prioritise NMT.

Stellenbosch is also a unique town, with landscaped / tree-lined road verges and opportunities for outdoor dining etc. Although the Municipality intends to preserve this unique character, if activities in road verges are not regulated, pedestrian movements could be impeded.

Landscaping, structures, outdoor dining and other commercial activities within the road reserve, implemented by adjacent landowners, often obstruct pedestrian movements on sidewalks as well as drivers' sight distances, potentially creating unsafe scenarios.

6.2 Discussion

The Municipality aims is to promote and prioritize Non-Motorised Transport (NMT), as these were outcomes from IDP consultative processes and forms part of the Municipality's and National Government's Strategic Planning.

The Constitution of the Republic of South Africa, Act 108 of 1996 Section 85 (1) (b) mandates the Department of Transport (DoT) with the role of developing transport policy. Through its policies the DoT aims to integrate NMT as a recognized mode of transport, ensuring that appropriate and safe infrastructure is provided.

To make provision for safe pedestrian movements, the municipality is obligated to ensure that sidewalks are safe and accessible and that obstructions that gives rise to unsafe conditions are removed.

Section 4 of the Municipality's By-law on Roads and Streets stipulates that no person may "plant or cause to be planted, any tree, shrub or other plant on or allowing any such tree, shrub or plant to remain on; or placing or cause to be placed any other impediment or obstruction on such a street, sidewalk, walkway or road reserve forming part thereof, other than in accordance with conditions prescribed by the Municipality.

The objectives of this policy are to:

- To improve sidewalk management, ensuring a safe environment for all roadway and sidewalk users.
- To introduce guidelines that would make sidewalks more accessible for pedestrians, minimizing obstructions on sidewalks and ensuring that continuous pedestrian belts are maintained.
- To set out the general administrative procedure for compliance with this policy.

The Municipality appreciates the acknowledgement and support from the citizenry, private sector and all sidewalk users in ensuring that the risk to pedestrians and road users is mitigated, and that all parties are collectively contributing towards a safer community in Stellenbosch Municipality.

6.3 Financial Implications

Current capital and operational funding will be utilized for required works on sidewalks.

6.4 Legal Implications

Adjacent landowners may wish to seek compensation for landscaping removed by the municipality.

6.5 Staff Implications

Phased implementation of the policy is proposed, to align with available resources.

6.6 Previous / Relevant Council Resolutions:

8TH COUNCIL MEETING: 2022-10-26: ITEM 11.6.4

The Speaker **RULED**

that this matter be referred to a combined Section 80 Committee meeting between Planning -; Corporate -; Infrastructure - and Protection Services.

6.7 Risk Implications

Risk associated with liability resulting from injury to pedestrians could be mitigated.

6.8 Comments from Senior Management:

6.8.1 Director: Infrastructure Services

6.8.2 Director: Planning and Economic Development:

I do not have a problem with the item in principle, however, we need to ensure that there is alignment between this policy and the recently communicated process for dealing with outdoor dining applications communicated by the Director: Corporate Services. Furthermore, I suggest that the team responsible for this policy also have a short discussion with the Senior Manager: Development Management (Stiaan Carstens) to ensure that there is alignment between the content of the policy and the manner in which our Land Use Management Section will deal with applications for the use of sidewalks for activity such as outdoor dining. (Addressed. Detailed inputs were received from Development Management and subsequent discussions were held)

6.8.3 Director: Community and Protection Services:

- 1) When the pedestrian walkways are created it should clearly be marked (lets say by thin white lines) as this will identify the walkway and make it easier for the enforcement officer to note transgressions.
- 2) It should be noted within the outdoor dining policy, that allocating and giving businesses permission to use areas or lease areas from the municipality in "the sidewalk area", the municipality does not give businesses permission to sell

alcohol, neither allow their patrons to consume alcohol on that leased area. Businesses will have to apply and amend their liquor license.

With this in mind and consideration of point 1, staff will be able to do enforcement; and in relation to point 2, the SAPS and Law Enforcement will also be able to enforce the consumption and selling of liquor if it is not on the businesses liquor license. (Noted)

6.8.4 Director: Corporate Services:

I support the comments from the Director Planning and Economic Development in regard to the outdoor dining processes. Addressed, see inputs under 6.8.2. Staff vacancies can only be filled within budget provision and must be done in a sustainable manner. (Addressed, see input under Item 6.4).

6.8.5 Municipal Manager:

Please ensure that the policy is in line with the policy on outdoor dining, trading and the use of public places for commercial ventures and display.

(Addressed) The Sidewalk Accessibility Policy takes into account the municipal approval processes for outdoor dining.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.6.1

- (a) that the content of this report be noted;
- (b) that the Draft Sidewalk Accessibility Policy, attached as **ANNEXURE A**, be accepted as the copy to be used in a Public Participation process;
- (c) that the Draft Sidewalk Accessibility Policy be duly advertised for the purpose of a public participation process; and
- (d) that upon the completion of the public participation process, the Draft Sidewalk Accessibility Policy together with any comments/objections be resubmitted to Council for final approval and adoption.

POLICY ON SIDEWALK ACCESSABILITY

1. Introduction

Due to complexities in the use, handling, and management of sidewalks, the Municipality has decided to compile a policy focussing exclusively on the accessibility of sidewalks.

Sidewalks must meet the needs of all sidewalk uses, i.e. of persons of all abilities which includes children, the elderly, parents with prams, pedestrians with vision impairments and people using wheel-chairs and other assistive devices. Sidewalks must be usable and functional since it is utilized for the most basic forms of mobility namely walking, cycling, running etc.

Stellenbosch is a unique town, with landscaped / tree-lined road verges and opportunities for outdoor dining etc. Although the Municipality intends to preserve this unique character, if activities in road verges are not regulated, pedestrian movements could be impeded. The Municipality has therefore decided to introduce a policy and implement guidelines to this effect, so that sidewalks remain accessible and safe for all users.

2. Legislative and Policy Context

2.1 National Policies and Guidelines

The Constitution of the Republic of South Africa, Act 108 of 1996 Section 85 (1) (b) mandates the Department of Transport with the role of developing transport policy. The following policies and guidelines have been developed by the Department of Transport, with relevant extracts that support the Municipality's Policy on Sidewalk Accessibility:

White Paper on Transport Policy:

- To encourage, promote and plan for the use of Non-Motorised Transport (NMT) where appropriate.
- Infrastructure and maintenance standards will be developed and must recognize NMT as an essential mode of transport.

Draft White Paper on Roads Policy:

- Integration of NMT as a recognised mode in the transport system and ensure appropriate infrastructure is provided for safe NMT usage.
- All authorities must strive to maintain the integrity of the road reserve in order to ensure that future network development is not compromised, and that services can be located and accessed appropriately.
- Services installed in a road reserve must be installed with the approval of the local authority, in the form of a wayleave.
- Ensure that safer road networks are provided for that appropriate infrastructure is provided for and that safe NMT usage and road safety audits are conducted.

NMT Facility Guidelines:

- Aims to enhance integrated transport, to ensure that the proper movement (or mobility) of people, to increase safety, reduce fatalities and produce universally designed infrastructure to improve the physical environment of all NMT users.

2.2 Municipal By-laws and Policies

The Constitution also makes provision for a Municipality to make and administer by-laws and policies for the effective administration of Local Government Competencies, the following are extracts of relevant Municipal by-laws and policies

The Municipality's By-law on Roads and Streets:

- The by-law assists the Municipality to regulate functions on roadways, walkways and other spaces within road reserves and aims to promote a safe environment for the benefit of all road and sidewalk uses and provides procedures, methods and practices to manage the use of roads, streets, sidewalks and road verges.

The Municipalities Draft NMT Policy:

- Stellenbosch Municipality will strive to develop walkable and cycle-able environments that are safe for all to use and contribute to the mobility needs, economic vibrancy and social health of communities.

The Universal Access Policy

- The rights of people with disabilities are protected by the country's Constitution, which stipulates that governmental departments and state bodies have a responsibility to ensure that concrete steps are taken so that people with disabilities are able to access the same fundamental rights and responsibilities as persons without disabilities.
- The Universal Access Policy aims to create conducive environment to address issues affecting people with diverse needs/ requirements including persons with disabilities.

The Municipality's Draft Wayleave Policy

- Sets out the procedure internal departments, external departments, private parties etc.. to obtain approval for any of the following works carried out in the road reserves, digging of trenches, tunnelling, erection of signboards, erection of structures, street shaping, planting of trees, and any other Work that may affect motorists, cyclists, pedestrians etc..

3. Objectives

The objectives of the policy are:

- a) To improve sidewalk management, ensuring a safe environment for all roadway and sidewalk users.
- b) To introduce guidelines that would make sidewalks more accessible for pedestrians, minimizing obstructions on sidewalks and ensuring that continuous pedestrian belts are maintained.
- c) To set out the general administrative procedure for compliance with this policy.

4. Functions and Components of the Road Reserve

The Road Reserve (which includes the Sidewalk Area or Road Verge) has the following functions:

- Connects and links communities and serves all transportation needs of residents, commuters, businesses etc..
- Provides space for required services, such as pipelines and cables for electricity, water, sewer, telecommunication, stormwater services etc.

Typical Cross Section of Municipal Roads:

The Road Reserve comprises the following:

- **The Road Verge:** utilized by pedestrians (and cyclist where applicable), and can consist of constructed sidewalk as found in CDB, industrial areas and along priority routes in residential areas. Unconstructed / natural sidewalks are found on certain roads in residential areas. Services such as pipelines and cables for electricity, water, sewer, telecommunication, stormwater etc. are normally located within this area.
- **Carriageways:** also referred to as the roadways and are utilized by motor vehicles and cyclist.

In residential areas, where formal sidewalks have not been constructed, obstructions are often found in the form of landscaping. Where the sidewalk is natural ground, space must be

reserved and be kept clear from obstructions to ensure safe and continuous pedestrian movements. The surface should be suitably firm, and level so as not to create a tripping hazard. A suitable surface may comprise natural ground, laterite gravel, grassing or paving as approved by the municipality.

On certain roads within the CBD, outdoor dining other commercial activities are allowed. Where these are allowed, space must be reserved and kept clear from obstructions to ensure safe and continuous pedestrian movements.

5. Guidelines

The following minimum guidelines are applicable where constructed and natural sidewalks occur. The preferred option is a pedestrian belt located near the front face of the kerb. A pedestrian belt of at least 1.5m must remain free from obstructions, see **Option 1** below:

OPTION 1:

In instances where the position of existing landscaping or other features prohibits the implementation of Option 1, the pedestrian belt may be located away from the roadway. In this instance a 750mm setback from the front face of the kerb edge must be in effect. An additional passage (on the extension of the cadastral boundary) between the setback and pedestrian belt should be maintained. No obstructions are therefore allowable within the pedestrian belt, the setback line, the passage between the pedestrian belt and setback line, as shown in **Option 2** below:

OPTION 2:

Variations to Option1 and 2 are allowable and will be dependent on the outcome of the safety audit. The diagrams below show how an obstruction can be accommodated and how a continuous pedestrian belt can be maintained:

VARIATIONS:

The above are minimum guidelines, certain locations may require wider pedestrian belts to accommodate higher pedestrian volumes. In such instances wider pedestrian belts will be required by the Municipality.

6. Application Processes

6.1 Way-leave Application Process

A way-leave application must be submitted for any proposed construction work, temporary use of sidewalk, landscaping on sidewalk, outdoor dining or other commercial activity allowable within the road reserve. The wayleave application process grants rights / approval for proposed works / activities and comprises site inspections, assessments as well as a Road Safety Audit. Where it is found that the proposed works/activity will have a detrimental impact on the Municipality or any of its services, the application may be declined. The Municipality's draft Wayleave Policy outlines the procedures and processes when submitting a wayleave application. Proposals for any construction work, temporary use of sidewalk, landscaping on sidewalk, outdoor dining or other commercial activity must follow the wayleave application process (which includes the compilation of a drawing), applications must be submitted to Infrastructure Services Directorate.

6.1.2 Landscaping

Landowners that have frontage onto to the Road Reserve, may submit applications for proposed landscaping within the Road Verge. Permission may be granted for landscaping outside of the pedestrian belt. The Wayleave Application process as described above must be followed. Landscaping in the road reserve should be maintained by the applicant, the landscaping will however be deemed the property of the Municipality.

6.1.3 Outdoor Dining

On certain roads within the Municipality, Outdoor Dining or Trading and Events are allowed if approved in terms of the relevant Policy. Business that have frontage onto the Road Reserve, may submit applications for proposed outdoor dining or trading and events withi. To commence the process for applications for Outdoor Dining or Trading, a site plan detailing the proposals must be prepared and processes followed in terms of the relevant policy. For example, applications for Outdoor dining, including layout plans, must be submitted to the Corporate Services Directorate. Additional processes required for Outdoor Dining or Trading and Events on sidewalks may also include the following:

- Wayleave Application (as described above)
- Building plan Application for any proposed structure
- Land Use Planning Application
- Lease Agreement
- All relevant approvals

7. Road Safety Audit Process

A Roads Safety Audit will be carried out to determine the impact of the proposed construction work, use of sidewalk, landscaping, structures, outdoor dining or other commercial activity allowable within the road reserve. Road Safety Audit will also be carried out on existing scenarios, for alignment and compliance with Policy. Road Safety Audits will determine impacts on the safety of pedestrians, cyclist drivers etc. The road safety audit methodology is prescribed in the South African Road Safety Audit Manual, Chapter 4 refers to proposed interventions and Chapter 5 makes reference to Roads Safety Audit on existing scenarios.

Aspects to consider when conducting the road safety audit:

- Is the minimum width for the pedestrian belt sufficient for the prevailing conditions?
- Will pedestrian facilities be satisfactory for visibility, the disabled, the elderly, children etc?
- Will cyclist or other road users be affected?
- Are tripping hazards present?
- Will vehicle sight distances and visibility be affected by the proposed intervention?
- Will the proposed intervention negatively affect neighbouring properties?

- Will the accessibility / maintenance of services be affected?
- Will existing traffic operations be negatively affected?

The following process should be followed when carrying out a road safety audit:

Step 1: Estimate the Frequency of Possible Incidents

FREQUENCY	DEFINITION
Frequent	One or more per month
Probable	One or more per year (but less than one per month)
Occasional	Once every one to three years
Remote	Less frequent than once in three years

Step 2: Estimate the Severity of Possible Incidents

SEVERITY of OUTCOME	EQUIVALENT CRASH OUTCOME
Catastrophic	Likely multiple deaths
Serious	Likely death or serious injury requiring hospitalization
Minor	Likely minor injury
Negligible	Likely trivial injury or property damage only

Step 3: Determine the Level of Risk

		FREQUENCY			
		Frequent	Probable	Occasional	Remote
SEVERITY	Catastrophic	Intolerable	High	High	Medium
	Serious	High	High	Medium	Medium
	Minor	High	Medium	Medium	Low
	Negligible	Medium	Medium	Low	Low

Step 4: Course of Action

RISK	
Intolerable	Proposed Landscaping or Outdoor Dining can-not be allowed.
High	Proposed Landscaping or Outdoor Dining can-not be allowed.
Medium	Proposed Landscaping or Outdoor Dining may be allowed, on condition that mitigation measures be effectively implemented.
Low	Proposed Landscaping or Outdoor Dining may be allowed.

Where the impact of proposed landscaping, structures, outdoor dining or other commercial activity is determined as being Intolerable or High, the application will be declined. Where a risk is determined as Medium, the application may be approved on condition that mitigation measures be introduced. Where the risk is designated as Low the application may be approved, along with any condition stipulated by the Municipality.

8. Aligning Existing Scenarios with Policy

Landscaping and other structures located within the road reserve that is not in compliance with Municipal processes, will require rectification. Rectification will also be required for outdoor dining or other commercial activities that has not been approved by the Municipality.

The rectification process will in general include liaison with the relevant landowner(s) providing time frames for rectification. The Municipality will communicate to residents and businesses the procedures for the rectification and regulation of landscaping, outdoor dining and other commercial activities.

Where there is non-compliance with time frames provided, or an unacceptable risk of danger to motorists, cyclists or pedestrians (as assessed and determined by the Municipality), the Municipality may remove landscaping and other structures located within the road reserve that is not in compliance with Municipal processes, in terms of the provisions made in the Municipality's By-law on Roads and Streets.

This ensures an acceptable level of risk to both the users of the sidewalks as well as to the Municipality.

The Municipality appreciates the acknowledgement and support from the citizenry, private sector and all sidewalk users in ensuring that the risk to pedestrians and road users is mitigated, and that all parties are collectively contributing towards a safer community in Stellenbosch Municipality

9. SHORT TITLE AND COMMENCEMENT

This policy is called the Stellenbosch Municipality's Policy on Sidewalk Accessibility and will commence on the date of publication.

11.6.2	PARKING MANAGEMENT ALONG THE MAIN ROAD IN THE CENTRAL BUSINESS DISTRICT AREA OF FRANSCHHOEK
--------	--

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance and Compliance

17 May 2023 & 24 May 2023

1. SUBJECT: PARKING MANAGEMENT ALONG THE MAIN ROAD IN THE CENTRAL BUSINESS DISTRICT AREA OF FRANSCHHOEK

2. PURPOSE

That Council takes note of this report and approves the proposals contained herein.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

Council had previously approved a notice to obtain public inputs on the Council's intention to implement parking management along the main road in Franschhoek.

89 comments and a signed petition was received when the comment period closed, it should however be noted that most of the comments received were similar in nature. Comments relate mostly to the loss of free parking opportunities, safety and security, and possible effects on Franschhoek's old village charm.

The provision of alternative parking area addresses concerns relating to additional financial burdens to tourists, visitors and locals as well as concerns relating to an increase in parking on side and back roads. The Municipality had commenced with the planning of the upgrading of the Parking Area at the intersection of Dirkie Uys Road and La Rochelle Street.

An appropriate parking management model will address safety and security concerns and ensure that Franschhoek's village charm is retained. The Municipality will also ensure that appropriate notices are in place to inform tourist where paid parking is applicable.

5. RECOMMENDATIONS

- (a) that Council takes note that a public participation process was followed;
- (b) that Council considered the comments received;
- (c) that Council considers the extent to which comments are addressed; and
- (d) that Council approves the implementation of parking management on the Main Road, once the upgrade of the parking area at the intersection of Dirkie Uys Road and La Rochelle Street, and other internal processes are completed.

6. DISCUSSION / CONTENTS

6.1 Background

The municipality had previously implemented parking management (parking fee collection and associated tasks), to manage the increase in demand for parking in

the Central Business District (CBD) area of Stellenbosch.

Recent commercial developments in Franschhoek have increased the demand for parking, necessitating the need to implement parking management along the Main Road in Franschhoek CBD.

Council had previously approved a notice to obtain public inputs on Council's intention to implement parking management along the main road in Franschhoek.

The notice was placed in the February 2023 edition of the Franschhoek Tattler as well as on the Municipality's Website on the 1st February 2022, 89 comments and a signed petition were received when the comment period closed on the 1st March 2023.

6.2 Discussion

It should be noted that most of the comments received were similar in nature and, comments can therefore be summarized as follows:

- Additional financial burdens and inconveniences for tourist, visitors and locals seeking parking in the main road.
- Increase in parking inside and back roads.
- With the introduction of parking attendants, Franschhoek may lose its village charm which could have a detrimental impact on tourism.
- Tourism destination with many first-time visitors, who may not be aware that parking must be paid for.
- Safety and security may be impacted, increased possibility of card scamming and other related crime.
- Parking is only under pressure during December and February.
- Proposal is short of strategic and business detail.

The petition was signed by 555 persons at the time that the comment period closed, it does however appear as if the majority signatories of the petition are those that visit the Central Business District (CBD) occasionally and would not be detrimentally impacted by parking management.

The Municipality has assessed the comments and is able to address the comments by:

- Providing an alternative free parking facility. The Municipality had commenced with the planning of the upgrading of the Parking Area at the intersection of Dirkie Uys Road and La Rochelle Street. It is estimated that construction will commence in October 2023 and be complete around December 2023.
- Ensuring that an appropriate parking management model be used, that would not detract from Franschhoek's old village charm and one can incorporate measures that would mitigate, as far as possible, criminal activity.
- Ensuring that appropriate notices are in place to inform tourist where paid parking is applicable.

The provision of an alternative parking area addresses concerns relating to additional financial burdens to tourists, visitors and locals as well as concerns relating to increase in parking on side and back roads. An appropriate parking management model will address safety and security concerns and ensure that Franschhoek's village charm is retained.

The demand for parking in the CBD will continue to increase as economic development occurs. The introduction of parking management is an essential step forward towards a more functional CBD. Vehicles that park for extended periods of time during the day on the Main Road will have dedicated off-street facility, which is more appropriate. This will better enable the Municipality to improve walkability in the CBD linking off-street parking area with tourist and other destinations.

6.3 **Financial Implications**

Additional income will be received from the collection of parking fees.

6.4 **Previous / Relevant Council Resolutions:**

7TH COUNCIL MEETING: 2022-08-24: ITEM 11.6.1

RESOLVED (majority vote with abstention)

- (a) that Council takes note of this report; and
- (b) that a notice be compiled for publication to obtain public inputs in regard to the Council intention to start with parking management along the main road in Franschhoek.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.6.2

- (a) that Council takes note that a public participation process was followed;
- (b) that Council considered the comments received;
- (c) that Council takes note the extent to which comments are addressed; and
- (d) that Council approves the implementation of parking management on the Main Road, once the upgrade of the parking area at the intersection of Dirkie Uys Road and La Rochelle Street, and other internal processes are completed.

NOTICE FOR PUBLIC COMMENT

INTENTION TO START PARKING MANAGEMENT ALONG THE MAIN ROAD IN FRANSCHHOEK

Notice No. 8/2023

Notice is hereby given, in terms of the **Municipal Council's Resolution, Item 11.6.1 taken at the 7th Council Meeting held on 24th August 2022**, of the Municipality's intention to start with parking management along the Main Road in Franschhoek.

Parking Management comprises the implementation of parking tariffs, the collection of fees and other associated tasks. Recent commercial developments in the Franschhoek Central Business District, have led to an increase in the demand for parking, necessitating the need to implement parking tariffs. The municipality therefore intends to implement parking tariffs from 1ST July 2023 on approximately 146 parking bays located on the Main Road. The parking tariff amount will be determined through a separate municipal process, and these will be made known in subsequent publications. It is noted that free parking is still available at the municipal parking area located at the corner of Dirkie Uys and La Rochelle Streets.

The public is invited to provide comment / input to the municipality, on its intention to start with parking management along the Main Road in Franschhoek.

Any inputs may be forwarded to: Engineering.Services@stellenbosch.gov.za or submitted at the following address: Second Floor; Ecclesia Building; 71 Plein Street; Stellenbosch.

Comments / inputs must be submitted on or before 1ST March 2023. Any person who is unable to read and write or have any sight disability, will be assisted by an official at the above-mentioned address, should they not be able to provide comments on their own accord.

**G Mettler
Municipal Manager

Subject: [EX] Paid parking in Franschhoek

Dear Sir

I would like you to note my objection to the notion of residents, visitors and local businesses in Franschhoek having to pay for parking in the main street and/or the surrounding roads.

Franschhoek depends on our visitors for revenue and it would have a negative affect on our ability to encourage people to visit. Local business and residents are already feeling the negative effects of load shedding, lack of increases in salaries, rise in the cost of living etc, and it is making life very difficult for us.

The money collected will probably not be invested back into Franschhoek, but rather used by Stellenbosch. As it is, we are funding so many charities in the area, such as Hospice and Franco. We cannot afford more.

In addition, we as residents have not been properly consulted as in town meetings etc.

Regards

Deborah van Duyn

Subject: [EX] Parking meter attendants in Franschhoek .

My experience of meter attendants in Paarl is very negative. I have been erroneously threatened with parking fines on several occasions, when I had already paid for parking, in order to to put extra money into the pockets of the attendants. Franschhoek has struggled for years with illegal parking attendants threatening tourists. This would be another way of extorting and intimidating tourists
Please don't put Franschhoek in that position again . We don't want parking attendants.

Objection to the Proposed Parking Management System – Franschhoek

The members of the Franschhoek Forum oppose and strongly object to the proposal of the parking management system for Franschhoek.

The Franschhoek Forum's chief concern is an increase in traffic congestion and violations, namely in private driveways, the narrowing of the side streets with parked vehicles to avoid being charged causing disarray for emergency services, Ambulances SAPS & Fire Brigade, armed response and private security firms, municipal waste collection and other services rendered by the municipality.

In the current economic climate, the implementation would also raise innumerable concerns for consumers using the roads, jeopardizing the local tourist attractions and their offerings.

We request that Stellenbosch Municipality duly engage with the local community and stakeholders to find a feasible alternative to the proposed Parking Management System.
Yours sincerely

Subject: [EX] Re: Notice No 8/2023 - Parking Management on Main Road, Franschhoek

Dear Ms Mettler

As indicated in my previous email, there was a joint meeting on Tuesday, 28th February of the Heritage and Ratepayer Committees of the Franschhoek Heritage & Ratepayers Association (FHRPA) to consider the proposed introduction of a pay-to-park scheme in Huguenot Street.

There has been a very strong, emotive response from the community to the notification of the scheme. We understand many residents have sent emails objecting to it and an online petition against the scheme (<https://chnq.it/WpVKrgk2>) has so far attracted over 700 signatures. Although some signatories are not recognised as Franschhoek residents, the fact remains that a very large number of Franschhoek residents are very strongly opposed to the scheme and have signed this petition.

In a very useful and constructive discussion at our joint meeting, several valid points were made:

- Without details of the scheme the FHRPA and individual residents cannot provide informed comments;
- Without details of the scheme, there has not been proper public consultation and as a result, the "rumour mill" has worked overtime and led to some very emotional reactions;
- Franschhoek needs an overall traffic management plan and strategy having regard to the substantially increased traffic flows to be generated when Train Camp is operational later this year and when the cableway is operational in 2025 with 400 000 passengers per annum;
- Parking provision and charging are critical components of such a plan and strategy;
- It is wrong to extract and treat the parking component in isolation in the absence of such a plan and strategy.
- The IDP 2022-2027 identified as key Ward 1 priorities, the
 - "Upgrading of the Municipal Parking area on the corner of Dirkie Uys and La Rochelle Street" (also known as the Tennis Court Car Park); and
 - "Establishment of parking area at the back of Franschhoek Town Hall / Franschhoek Municipal Offices for use of Taxis during the day and public after operating hours" (Note: this area is already used for parking accommodating +/- 20 private cars)

but it is not known when work on either will start or be completed;

- A pay-to-park scheme implemented before the Tennis Court Car Park and the area behind the municipal offices have been upgraded will have a severe adverse impact during the construction periods on employees in the CBD who now park in Huguenot Street as the cost of then parking there may be unaffordable for them;
- With an acute shortage of parking bays during these construction periods, there will be very limited (if any) alternative free parking available as mentioned in Notice No 8/2023.

Having regard to these points and the very widespread concern the proposed scheme has caused, **we request an urgent meeting** with the relevant officials to obtain details of it and discuss any sequencing of the upgrading of the

Tennis Court Car Park and the area behind the Municipal offices that may be necessary to mitigate their adverse impacts.

We look forward to hearing as soon as possible from you or one or other of the relevant officials.

Kind regards

Good afternoon Ms Mettler

I am writing as a co-chair of the Franschhoek Heritage & Ratepayers Association (FHRPA) for myself and on behalf of Irmela Alberts as the other co-chair.

Notice No 8/2023 for Public Comment of the Intention to Start Parking Management on Main Road in Franschhoek refers.

We do not know when this notice was posted and it is, perhaps, unfortunate that it was not sent to the FHRPA as the Interest Group registered with the municipality for Franschhoek and the Franschhoek Valley. The posting of this notice was only drawn to our attention two days ago - on Tuesday, 21st February 2023. If it was posted then it only gives 7 clear days and 5 working days before the deadline date for comment of 1st March 2023.

It is hoped you may agree that this is unusual and, if I may say, an unreasonably short period for public comment on any issue let alone one as important as this.

We have today convened an urgent joint meeting on Tuesday 28th February of the Heritage and Ratepayers Committees of the FHRPA to review Notice No 8/2023. It is hoped that very shortly thereafter we can then let you have the considered comment of the FHRPA. In the circumstances, please treat this email as a request for an extension of time for comment to Monday, 6th March 2023.

We look forward to hearing from you.

Kind regards

OBJECTION TO STELLENBOSCH'S PLANNED IMPOSITION PARKING TARRIFFS IN FRANSCHHOEK

I hereby strongly object to Stellenbosch Municipality's planned imposition of parking tariffs in Franschhoek.

The planned parking tariffs will have absolutely no benefit for Franschhoek, its businesses, restaurants, residents, and visitors to Franschhoek

Franschhoek is a small village. It's businesses, restaurants and shops serve the Franschhoek community and thousands of tourists that visit Franschhoek as a highly sought-after tourist destination. Parking tariffs will detract and have a singular detrimental effect on the attraction of Franschhoek as tourist destination. It will undoubtedly be seen and experienced as a negative feature, by all visitors who visit Franschhoek by car.

One of the benefits for people living in Franschhoek is that shops, restaurants, and businesses are a few minutes' drive from home. It is unthinkable and totally unacceptable for me and my family to have to pay for parking every time that we drive "to town".

Each reason offered by Stellenbosch Municipality in its attempt to justify the imposition of parking tariffs in Franschhoek is spurious and is totally rejected. The attempted justification is nothing more than a smoke screen aimed at hiding the real and only reason for parking tariff imposition, namely, to milk the Franschhoek community and its visitors for more Municipal revenue. It is a blatant additional tax named "parking tariffs".

The parking tariff system applied in Stellenbosch has caused me and my family to visit Stellenbosch only when necessary.

Stellenbosch Municipality should rather address the dangerous situation created by the large trucks that navigate their way through Franschhoek Main Road in great numbers on a daily basis.

Goeiedag,

Dis met groot kommer dat ons hoor van die beplande betaalde parkering wat beoog word vir Franschhoek.

Soos reeds in Stellenbosch, is dit 'n verdere risiko vir onreelmatige betalings (kontant aanvaar), asook moontlike kaart vervalsings.

Ons dink dat dit tot nadeel sal wees vir die toeriste wat reeds skepties is om kaarte in die publiek te gebruik, vanweë kaart "scammers" wat gereeld in die dorp is.

Ons vra dat die saak ernstig heroorweeg word. Sekerlik gaan daardie klein inkomste nie so 'n groot verskil maak, terwyl die teendeel die hele beeld van die dorp sal verander.

Vriendelike groete ,

René en Yvonne de la Rey.

Subject: [EX] Petition against proposed parking tariffs in Franschhoek

Dear Sir/Madam,

I am writing to you on behalf of a group of concerned citizens who are strongly opposed to the Municipality's intention to start with parking management along the Main Road in Franschhoek, as per Notice No. 8/2023.

We understand that the Municipality intends to implement parking tariffs from 1 July 2023 on approximately 146 parking bays located on the Main Road. We believe that this will have a detrimental impact on both the residents and the businesses of Franschhoek. The proposed parking tariffs will discourage visitors from coming to the town, which will negatively affect the local economy. Additionally, residents who are already facing financial challenges will be further burdened by the additional costs of

parking.

As such, we have collected a list of 555 (and counting) names who are against the proposed parking tariffs. We urge the Municipality to reconsider its decision and find alternative solutions to address the parking challenges in Franschhoek. For your convenience I've attached a signature list as well as a commentary list.

Please find the link attached to verify my petition: <https://chng.it/XqkrVM6R>

We respectfully request that our petition be taken into consideration, and we hope that the Municipality will work with us to find a mutually beneficial solution.

Thank you for your attention to this matter.

Sincerely,

Gawie Nieuwoudt on behalf of the petitioners.

Subject: [EX] Notice for Public Comment: Intention to start parking management along the Main Road Franschoek.

The Beginning of the End!

How to slowly strangle a gem of a tourist destination to death...
By implementing parking management along the Main Road of Franschoek.

In time, gone will be the hours of leisurley shopping and long relaxing luncheons.

The village where time once stood still, will no longer exist.

One eye will always be kept on the dial, in case of overstaying and having to pay a fine.

No more “no hurry in Africa”.

The Director,
Engineering Services.

I wish to STRONGLY register my objection to the proposed paid-for parking per Notice 8/2023 passed on 22 August 2022 by Council.

I challenge the Municipality to stand and face the residents of Franschhoek in a truly open public debate regarding this matter, rather than “hiding” behind a process of enforcing their opinion on the residents of Franschhoek.

Regards,

Reinher Behrens

Subject: [EX] Objection to Notice 08/2023. Franschhoek Parking

Dear Sir / Madam

I have been a resident of Franschhoek for 15 years, and a regular visitor for many years prior to that. I seriously object to the parking management scheme proposed for the Main Road in Franschhoek in Notice no. 08/2023

Parking is only under pressure in our Main Road during the very busy holiday season from December to February each year, therefore this proposal is not warranted. Paid parking may indeed be a deterrent to tourists and day-trippers who visit at other times of the year. It will also seriously disadvantage many residents, especially those who are older, in the off-season when Main Road parking offers convenience and safety at no cost.

The town has its own privately-funded parking system which works very well and supports the community.

Kind regards

Subject: [EX] Paid parking tarrif Franschhoek

I, hereby object to the new proposed idea of paid parking similar to that of Stellenbosch.
As a resident here in Franschhoek I feel the charm of this winelands destination will be taken away and will feel more like a commercial town. As it is we pay enough rates and taxes and do not see the need to pay extra .

Kind regards
Tienka Millar

We object to the proposed parking tariffs planned for Franschhoek. From previous experience we have witnessed in other areas, the people will then park in front of private residences to the inconvenience of residents causing more traffic problems.

Dear Sir or Madame

As a resident of Domaine Des Anges in FRANSCHHOEK, I strongly oppose the parking tariffs that are proposed for FRANSCHHOEK.

I do not see a benefit to the community for such a levy.

Furthermore, if you insist on implementing such a tariff, you should consider providing residents with an exemption sticker that can be displayed in the windscreen; something that is done in major cities around the world.

Thanks for reading my objection to your proposed parking tariffs for Franschhoek

Kind regards

Subject: [EX] Pay Parking in the Main Road of Franschoek

Dear Sir

I have lived in Franschoek for 36 years and find the idea of installing paid parking in the Main Road of Franschoek unnecessary. It is about 3 months of the year that there may be a parking issue. Surely the business in Franschoek need to provide parking for their employees on their property – that use to be the case. There is always parking available on the old tennis courts below Hospice. A far bigger problem is the number of very large trucks that go through the main road and up the Pass. Spend the money putting in a weigh bridge, and staff to man that, to keep them off the road.

I would like to register my objection for having to pay for parking in Franschoek. The village has done a good job keeping informal car guards at bay too to protect the visitors who come to Franschoek.

Regards
Sue Norman

Subject: [EX] Parking in Franschhoek

To whom it may concern .

My husband and I are deeply troubled by the recent notice for public comment regarding the intention to start parking management along the main road in Franschhoek. We strongly oppose the proposed parking tariffs and believe that they will have a detrimental effect on the local community and economy.

Franschhoek is a small town that depends heavily on tourism for its economic well-being. The proposed parking tariffs will deter tourists from visiting the town, and as a result, local businesses will suffer. In

addition, residents who live in the town will be burdened with extra costs, as they will have to pay for parking every time they visit the town centre.

We also believe that the proposed parking management system is flawed. The system is based on a pay-and-display model, which is outdated and not user-friendly. The parking tariffs are also exorbitant and will put a strain on the budgets of local residents and visitors alike.

We, therefore, call on the Stellenbosch Municipality to reconsider its decision to implement the proposed parking management system in Franschhoek. We urge the Municipality to engage in a meaningful consultation process with the local community and stakeholders, to find a more equitable and sustainable solution that will benefit everyone.

We believe that a well-planned and well-executed parking management system could be a positive step for Franschhoek, but only if it is implemented in a way that is fair, reasonable and beneficial to all. We call on the Municipality to put the needs and interests of the local community first, and to work with us to find a solution that works for everyone.

Kind regards

Good day

This is to notify you that our family strongly object to charged parking in Franschoek.

This will open up another avenue for criminals to defraud tourists in our town.

Where should we park who works in town? We do not have big parking areas and we need to park in the street.

This is a money making racket which would be only to the disadvantage of our beautiful town.

I would like to object to the proposal for pay parking in Franschoek main road.
I feel it would push parking to the back streets and this subsequently will cause accidents due to lack of clear vision on the cross streets. We always have this parking problem when there are major festivals and I feel it will be like this all the time.
A few tourists will not mind paying but the majority of local workers and shoppers will.

I have also signed the petition.

Subject: [EX] Notice No 8/2023 - Intention to start parking management along the main road in Franschhoek

Dear Sir/Madam

Stellenbosch Municipality Notice No 8/2023 refers.

As a resident of Franschhoek, living in Van Wijk Street which is just below the main road of Franschhoek, I wish to comment on the intention of the Municipality to start with parking management along the main road of Franschhoek.

The Central Business District of Franschhoek is very different to Stellenbosch in that the street above the main road (Dirkie Uys Street) and the street below the main road (Van Wijk Street) are largely residential, unlike the town center of Stellenbosch. I understand that recent developments in the Franschhoek Central Business District have led to an increase in the demand for parking, but I do not believe the implementation of parking tariffs will solve the problem or alleviate the pressure on parking. In fact, it will cause more problems for the residents living above and below the main road of Franschhoek.

I request the Municipality to consider the unintended consequences of such a decision on the residents in and around the Central Business District of Franschhoek who would like to see the area maintain a residential character

and not become the preferred parking area for visitors. The street and pavements are narrow and cannot accommodate pedestrians, delivery trucks, tourists, contractors, and many other traffic that is related to the Central Business District. We are already seeing a huge increase in traffic using Van Wijk Street as a thoroughfare to avoid the congested main road, often speeding, or disregarding the 4-way stops.

Franschhoek currently has a privatized system in place which is working and has made an enormous contribution in keeping all the illegal car guards, beggars, scammers, and thieves at bay. All these unsavory elements that are harassing tourists, visitors, and residents alike, will all return once the Municipality introduces parking tariffs. Stellenbosch and Paarl are prime examples of this situation, and I would like to see Franschhoek Central Business District free of this kind of harassment in future.

Thank you for your attention to the above matter.

Regards,

Jackie Loubser
37 Van Wijk Street

To whom it may concern.

I write as a recent arrival in this delightful town, who much appreciates the services provided by the Stellenbosch municipality. However, I am distressed to hear of the plans for parking management. In my view, to start charging would detract from the ambience and charm of the place, which attracts so many visitors each year. It absolutely is not necessary in terms of traffic control, even at the busiest of times.

I would urge that you think again about this proposal.

Subject: [EX] Comment on Municipal Council's resolution ITEM 11.6.1 charging for parking in Franschoek

Dear Madam/Sir,

The decision to charge a fee for parking on the main road in Franschoek comes as a great shock, and I, as a Franschoek Resident, would like to make it clear I DO NOT AGREE WITH RESOLUTION ITEM 11.6.1.

As a matter of fact, I cannot find a single Franschoeker who endorses this rather foolish and hopelessly misguided decision, which, let us be frank, is made from a sentiment of pure avarice and not any practical thinking.

This will be of no benefit to Franschoekers as it will negatively impact the people who can least afford it, i.e. the retail workers who need the parking along main street, and benefit only those to whom are well off, i.e. the business partners who will secure this tender.

I have been parking along Huguenot Street for well over a year and finding a spot has NEVER been a problem except during festivals. Generally the rotation of cars circulating through parking bays is frequent.

Moreover, the tourists who can afford it will happily pay to park in a single spot the entire day (if they even decide to pay at all - remember, they rent cars so they can just leave everything here and go back to their country).

In other words, YOU ARE CREATING A POTENTIAL SCENARIO WHERE THE WEALTHY GAINS AMPLE, CHEAP PARKING, AND THE IMPECUNIOUS - THE WORKERS TRYING TO SUSTAIN FRANSCHHOEK'S ECONOMY AND INDUSTRIES AMIDST RAMPANT LOAD SHEDDING - WILL HAVE TO WALK LONG DISTANCES TO THEIR DESTINATIONS BECAUSE OF MOUNTING PARKING COSTS. This is not fair.

I therefore implore you to carefully reconsider if the average Franschhoeker will truly gain anything from this decision, and please make the wise, and dare I say morally sound, choice to repeal this resolution.

Yours sincerely,
Pieter Naude

Subject: [EX] Franschhoek Municipality : Parking Issue

Good day to whom it may Concern :

Dear Sirs / Madame - Stellenbosch Municipality :

As residents in Franschhoek for 23 years (Erf 1355) - We have been advised that there is an intended issue to introduce Car / Vehicle Marshalls on a PAY as YOU PARK basis in our most beautiful small Village - Franschhoek.

We in this regard : should there be substance to this " **OBJECT TO THE IMPLEMENTATION OF PAID PARKING IN FRANSCHHOEK MAIN ROAD** " .

We as a Family avoid travelling to Stellenbosch for any purpose especially Shopping as the Paid Parking Systems in the Town are quite frankly "outrageous".

We would not wish the same to be a system of discouragement to our Local Residents and especially our vast Tourist attendances and support.

There is plenty of parking in Franschhoek, even when we have Festivals Bastille and Champagne to name two.

Regards.

In my opinion (and experience), these paid "car guards" do not work, a prime example is in Stellenbosch as well as Paarl where their illegal car guards, ATM/Card Scammers and beggars are far worse than Franschhoeks. We currently have a privatized system in place which is working.

Subject: [EX] Paid Parking Franschhoek

Good morning,

The notion of implementing paid parking in Franschhoek is a terrible idea! We as residents and business owners are COMPLETELY opposed to this idea. I am sure I speak for many on this proposition and we will stand together against this.

Kind Regards

Subject: [EX] FW: Comment on Proposal To Introduce Paid Parking Along the Main road in Franschhoek

Dear Geraldine Mettler

This letter is to condemn in the strongest terms the proposal of Stellenbosch Municipality to impose paid parking on the main road in Franschhoek.

This has been done without any discussion or consultation with the residents and business owners of Franschhoek who will be the most impacted by this outrageous decision.

What is the basis of this random decision?

There is no parking problem in Franschhoek and this imposition will damage the characteristic of Franschhoek as a beautiful village.

The reference to Franschhoek Central Business District is ridiculous as this does not exist. It's a main road with restaurants, bars, shops and galleries not a Central Business District.

The introduction of paid parking is just another scheme by Stellenbosch Municipality to deprive Franschhoek of its unique character as a village and world-renowned tourist destination. It seems that Stellenbosch Municipality wants to destroy the reputation of Franschhoek and bring it down to a lower level.

Franschhoek already suffers at the hands of Stellenbosch Traffic department who patrol the main road handing out tickets, persecuting local businesses from delivering wine and other products to restaurants and generally being unpleasant to everyone they come into contact with. Issuing tickets is a huge revenue earner for Stellenbosch – none of which comes back to Franschhoek. Indeed there used to be one Traffic person and sometimes there are two or three.

Franschhoek is further blighted by the huge number of large trucks and lorries which use Franschhoek instead of staying on the N1 and paying tolls. This makes the main road extremely dangerous. This is a huge problem which needs sorting out as a priority not some made up revenue generating parking scheme.

Imposition of paid parking on the main road will significantly damage the health of small businesses located on the main road as it will drive customers away.

Franschhoek's character and heritage will be damaged by the image of a number of fluorescent jacketed parking attendants running around trying to impose parking charges. Not exactly welcoming for worldwide visitors to Franschhoek.

There is absolutely no rational basis for implementing paid parking in Franschhoek main road. It is discriminatory and designed to damage Franschhoek's position as one of the most popular tourist destinations in South Africa.

I would suggest you hold an open meeting in Franschhoek to hear the fact that this proposal has limited support among the ratepayers of Franschhoek. This is just bullying by Stellenbosch Municipality.

Yours sincerely

Gerard Holden

STELLENBOSCH
STELLENBOSCH • PNIEL • FRANSCHHOEK

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

NOTICE FOR PUBLIC COMMENT

**INTENTION TO START PARKING MANAGEMENT ALONG
MAIN ROAD IN FRANSCHHOEK**

Notice No. 8/2023

Notice is hereby given, in terms of the **Municipal Council's 11.6.1 taken at the 7th Council Meeting held on 22 Aug** Municipality's intention to start with parking management along Franschhoek.

Parking Management comprises the implementation of parking collection of fees and other associated tasks. Recent commercial developments in the Franschhoek Central Business District, have led to an increase in parking, necessitating the need to implement parking tariffs. The Municipality therefore intends to implement parking tariffs from 1 July 2023 for 146 parking bays located on the Main Road. The parking tariffs will be determined through a separate municipal process, and these will be published in subsequent publications. It is noted that free parking is still available at the parking area located at the corner of Dirkie Uys and La Rochelle Street.

The public is invited to provide comment / input to the municipality regarding the intention to start with parking management along the Main Road in Franschhoek.

Any inputs may be forwarded to: engineering.services@stel.co.za submitted to the following address: Second Floor, Ecclesia Building, 101 Main Road, Franschhoek.

Best idea ever

10/10

This will free up parking from staff taking up all the parking and denying customers parking to get to the shops and restaurants.

Great idea

Thank you

Justine Fielies

This is such a terrible idea for locals and tourists alike. The "paid car guards" are going to be just as bad as the current informal car guard hustlers. This is an idea that has been discussed for many years. It has always been a bad idea and it still is now.

Subject: [EX] RE: OBJECTION TO Notice No 8/2023 — Implementation of paid parking in Franschhoek Main Road

Regarding the Implementation of paid parking in Franschhoek Main Road, as a ratepayer and full-time resident of Franschhoek, I would like to strenuously object and voice my complete opposition to this proposal, which is misguided and unnecessary.

The notice is referred to below.

STELLENBOSCH
STELLENBOSCH • PNIEL •

MUNICIPALITY • UMASIPALA

**NOTICE FOR PUBLIC COMMENT
INTENTION TO START PARKING MANAGEMENT
MAIN ROAD IN FRANSCHHOEK**

Notice No. 8/2023

Notice is hereby given, in terms of the **Municipal Ordinance 11.6.1** taken at the **7th Council Meeting** held on 11.06.2023, of the Municipality's intention to start with parking management on the Main Road in Franschhoek.

Parking Management comprises the implementation of parking, collection of fees and other associated tasks. Recently, the Franschhoek Central Business District, have led to an increase in parking, necessitating the need to implement parking tariffs. The Municipality therefore intends to implement parking tariffs for the 146 parking bays located on the Main Road. The tariffs have been determined through a separate municipal process, and will be published in subsequent publications. It is noted that free parking will be maintained in the parking area located at the corner of Dirkie Uys and L...

There is no way to ensure that the parking attendants are not impersonated by “scam artists” [i.e. thieves] who use the same or similar devices to collect parking fees and end up scamming motorists and stealing their card data and withdrawing large amounts of money from unsuspecting motorists’ accounts or even cloning the card for later use. This concern is not just conjecture about what *might happen*. It is what *has happened* regularly in the past in Paarl and Stellenbosch.

Furthermore, it is completely incorrect that *“Recent commercial developments in the Franschhoek Central Business District have led to an increase in demand for parking, necessitating the need to implement parking tariffs... on the Main Road.”* This is simply false and misleading. Yes, there is more demand than during the COVID-19 restriction period, but not more than before COVID. Moreover, implementing parking tariffs will not create even one additional parking space. Therefore the entire exercise is completely pointless.

Franschhoek currently has a privately funded system in place which is working extremely well and which preserves the free parking we have always enjoyed throughout the village. Almost every business in Franschhoek displays cards in their windows that reassure visitors that the village has free parking and visitors should dismiss anyone who asks for parking fees. Uniformed attendants also reassure visitors that no fee or illegal “car guarding” is allowed in the village.

Likewise the businesses reassure customers that instead of paying beggars, they can donate to a fund for the needy.

Finally, it should be noted that the Notice for Comment states that the tarified parking will be on “the Main Road.” This is more correctly named Huguenot Road/R45. As such, it is a Provincial road and its usage and any modifications (eg speed limit) is governed by the Western Cape Province and not the Stellenbosch Municipality. Appeals have been made in the past to have the speed limit in the village reduced below 60kph. However, these appeals have been dismissed by the Stellenbosch Municipality on the grounds that the Municipality lacks jurisdiction as it is a Provincial road and not a Municipal road.

Again, I strenuously object and voice my complete opposition to this proposal.

Sincerely,

Peter Ellis
Franschhoek Resident

Subject: [EX] Parking management Franschhoek Main Road.

Good day,

Regarding the proposed parking management in the Franschhoek Main Road –

1. I don't think it is necessary – making people pay for parking is not going to mean there will be less cars wanting to park in the main road.
2. It is going to spoil part of what makes Franschhoek special, that being the “village” feel. We are trying to hold on to our “country feel” for as long as possible and not just become another busy town where one is bombarded with regulations and “officials” at every point.
3. It is going to mean even more people (the car guards) hanging around on our streets, making one feel uneasy and clogging up our already too full pavements.
4. Most residents who have lived here for long – like me, 32 years, are going to be very unhappy to have to pay for parking to quickly pop into the pharmacy or the like.

I trust that my opinions will be carefully considered.

Good evening

We are residents of Franschhoek and we agree that the current system of parking works just fine. There is an added security risk with bringing in "meter maids" into town. Also the tourist will look for parking at retail outlets that will leave resident with no free parking. Franschhoek has always been a town known for free parking and we need to keep this hospitality going!

Subject: [EX] Disagreement With Proposed Parking Tariffs (Notice 8/2023)

To whom it may concern,

I am writing this email to express my objection to the Stellenbosch Municipality's proposed implementation of parking tariffs on Main Street of Franschoek.

The recent decision to consider imposing parking tariffs has raised serious concerns among local residents, business owners and visitors, who rely on free parking in the area. With tourism remaining depressed due to the pandemic, this tariff could cause further decline in the number of businesses in the area.

It is understandable that the Stellenbosch Municipality is looking to generate more revenue. However, I believe that implementing a parking tariff may not be the best solution and could have a negative impact on the local economy.

I believe local security groups are already extremely effective in keeping the area safe for parking and enforcing parking regulations. The rate of theft or break-ins of vehicles is extremely low and it would be unnecessary to impose an additional fee on residents, who already pay higher taxes than those living in surrounding municipalities.

Therefore, I encourage you to reconsider your resolution to impose parking tariffs on Franschhoek Main Street.

Sincerely

Christian Landau

(Franschhoek resident of 31 years)

Subject: [EX] Objection against proposed paid for parking in Franschhoek

To whom It May Concern,

I wish to object against this proposal as it will change the face of Franschhoek and affect the local's disposable income.

Franschhoek has been able to maintain having its Village charm while attracting record numbers of visitors and tourists.

Part of the attraction is that visitors can safely and slowly discover the Village walking up and down the Main street, having lunch and/or shopping while not having to worry about how much time they paid for when they parked; and if they are going to get a parking ticket.

Paid parking will inevitably cause people not to stay as long as they would have if they did not have to pay for parking. Or alternatively they just ignore the risk of getting a parking ticket which will result in mountains of admin; and a nasty surprise when they get back home and find out that the rental company has charged them a huge admin fee on top of the parking fine. Not the best souvenir of a trip to SA.

Having parking attendants working and collecting payment could attract unemployed chancers who prey on unsuspecting tourists.

ATM scamming is already a huge and ongoing problem which is proving very difficult to eradicate. Forcing parking payment with credit cards could add another dimension to this criminal activity.

As locals we shop and do business in different parts of the Village which means that unnecessary money will have to be spent each time we have to park somewhere else.

This is especially going to be problematic in Winter when the closest parking bay to each store is searched for.

So in summary I believe that this is a bad idea which will negatively change the face of the Village.

Regards,

Samantha Bürgin

Subject: [EX] Proposal for Paid Parking - Franschhoek

To Whom It May Concern.

I recently read that Stellenbosch Municipality is intending to introduce 146 paid parking bays in Franschhoek. I think this is totally unnecessary and ill advised.

Franschhoek is a destination town; people come here to relax, stroll down the main street, shop, browse, drink coffee, while away the day at our restaurants, taste wine etc; visitors and locals are encouraged to take their time and experience all that's on offer. They're less likely to take their time (and spend their money) if they either have to pay hefty parking charges or constantly go and top up parking fees.

Added to that, not all locals are able to afford parking charges; some pop in from outlying areas to do their grocery shopping and paying for parking is an unnecessary expense. There are also people who work in the shops that use the parking bays and all-day parking will be prohibitively expensive. Bus services from other areas are limited and not everyone in Franschhoek has deep pockets.

While I understand the need to raise revenue for the municipality, I think there are more effective ways of doing this. With a little bit of effort on the part of the Traffic Dept, signs for speed limits could be erected (especially on the pass road) and permanent cameras placed to catch errant drivers of motor cycles and high-performance cars who continue to use the Franschhoek Pass road as a race circuit, oftentimes putting other peoples' lives in danger.

I sincerely hope that the Municipality will re-think this unnecessary parking proposal.

Thank you for your attention.

Regards,

Liz King

Subject: [EX] PAID PARKING IN FRANSCHHOEK : ABSOLUTELY NO!!

To whom it may concern

It comes at great dissatisfaction, disappointing residents of the planned parking that's been suggested by our municipality.

Franschhoek residents has been a village community working very hard to make it a safe and enjoyable experience, in which we have been very successful.
Having said that... many unmentioned individuals have tirelessly worked to achieve the result and can't imagine the scale of destruction that will happen if we go down this....paid parking route.

It's difficult not to feel that authorities are desperate to get their hands on more money or are showing an element of jealousy in what's been achieved in Franschhoek.

Alarm bells:

1. Increase in unwanted individuals hanging in our street.
2. Increase in information been sold to criminals of parked cars habits/ patterns.
3. Increase in congestion

4. Stripping the village of it's character and charm. WE ARE NOT A CITY.

5. We already are paying higher taxes on our property evaluation which puts the residents in the rightful position to decline/ reject this proposed parking.

Please let sanitary prevail

Subject: [EX] Parking management along the Main Road in Franschhoek

To Whom it may concern.

As a resident and business owner in Franschhoek, I object to the Municipality's intention to start with parking management with out an in-depth discussion with the village residents and business owners.

It is my opinion that this will open the door to further crime & scamming of visitors/international holiday makers and residents alike in the village, which we really don't need. It will also impact on the small business and restaurants along the main road as many of the visitors love to stroll along the main road, popping into shop and having lunch. Now they will have to keep an eye on the clock and dash back to their cars. This will really take away from our beautiful village vibe and relaxing friendly environment.

Kind regards

I wish to express my objection to the proposed paid parking in Franschhoek main road. It will increase security problems with more opportunity for scammers as happened in other towns. As main tourism centres on restaurant/winery activities, no tourist wants to be constantly clock watching parking times.

Subject: [EX] Paid parking in Franschhoek

Dear Stellenbosch Municipality

As a concerned resident of Franschhoek, I would like to submit my opposition to this proposal.

One of the pleasures of this town is the lack of car guards and parking meter attendants harassing residents and visitors alike.

We love parking our vehicle up town and meandering through the shops and squares and even stop for a coffee or a bite to eat, sometimes taking an hour and sometimes a few hours.

If this proposal goes ahead, it will definitely have an impact on, not only our enjoyment of Franschhoek but on visitor numbers and the time and money they spend in town.

The community and business owners have worked hard to create an inviting and welcoming experience for tourists. This will destroy all the effort and dedication to keep Franschhoek as one of the best places to visit in the Cape.

Please do not implement paid parking in Franschhoek. We don't need it and we don't want it

Regards

Subject: [EX] Notice No 8/2023 response

Good Day,

I am a resident of Franschoek and have just taken note of your above notice regarding implementing parking charges along the main road in Franschoek.

I strongly OPPOSE the introduction of these charges for the following reasons:

1. They will reduce footfall to the village, which is already compromised post Covid. Franschoek is a mix of a tourist town and a place for residents alike to stop and eat at the restaurants and then shop. If shoppers/ eaters are constantly thinking about their parking charges they will not feel relaxed to visit one more shop / have one more coffee.
2. The residents association already privately funds 5 parking attendants to provide security along the main road for the benefit of all. Stellenbosch Council is not proposing to use the proceeds from parking charges for a similar activity, and this is instead a pure revenue raising exercise for the council at the expense of the village. The parking funds in no way will be used directly back for the benefit of Franschoek.
3. A number of disabled friends and tourists require close access to a number of the shops along the main road - there is no proposal for an exclusion for disabled persons and so this is a discriminatory proposal.
4. Should these proposals be implemented all they will do is put more pressure on the side roads that are already congested and create more bottle necks.

This appears to be a purely cynical exercise without any cost/benefit analysis to the people and businesses of Franschhoek that will be directly affected, and I urge the council to reconsider what will be an unpopular and detrimental exercise.

Kind regards

Tamzin Lawrence

Dear sirs

I have lived in Franschhoek for 25 years and would strongly recommend not to go ahead with them. Instead I would like to see the ground at the entrance to Franschhoek after the Franschhoek Cellars be converted into a parade area. This property I believe is owned by the railways it can be expropriated without compensation as being vital for the future of Franschhoek. This would give the council much needed income on a continual basis. Please give it some thought before going against the wishes of the majority of Franschhoek residents.

Kind regards

Subject: [EX] Intention to start parking management along Main road in Franschhoek

Dear Geraldine Mettler

Reference is made to Notice 8/2023 Item 11.6.1 held at the committee meeting on 22 August 2022. The public have been invited to comment.

We own the le Petit Paris Guest House in Akademie Street.

We strongly object to the implementation of parking management in the Main Street, reasons primarily:

1. Franschhoek is well renowned and known for having a "no pay for parking" rule. This is an attraction in the town for locals and tourists alike.
2. The fact is that the town has sufficient parking made available at Dirkie Uys and la Rochelle Streets, all of the guests we have spoken to have commented that they always find parking and everything is within walking distance from where you park.

3. Introducing this paid for parking system will lessen the “calm and tranquil” nature of Franschoek. It is not the amount to pay, but the inconvenience.
4. This will be viewed as a money-making scheme, as there is no parking crisis. Certainly, everyone I speak to has no issues with parking.
5. I am concerned that this will change the character of the town – making it more commercialised, and not the authentic town that it is. It is a step in the wrong direction.

I trust these comments will be taken into consideration.

Kind regards

Subject: [EX] FRANSCHHOEK - on street parking.

To whom it may concern.

I read with much concern your **notice no 8/2023. Intention to start Parking Management along the Main Road Franschhoek.** And would comment as follows

Vehicular parking management should not simply mean charging for parking.

The term Parking Management I would suggest should properly mean seeking ways for the provision of effective and adequate parking strategies, including signage for the area mentioned. Charging for parking is, I would suggest a means to increase the coffers of the municipality at the expense of the Franschhoek community and will not necessarily improve or satisfy the provision of car parking. It could have the negative effect of limiting and frustrating the ability of visitors to experience our town and enjoy its facilities. Parking management as described in

this notice is not an effective solution nor rational way to improve the requirements for vehicular parking along sections of Huguenot Street and could well alienate the very people we need to serve in order to perpetuate the commercial success of the town.

The Franschhoek Heritage and Ratepayers Association have for quite some time been advocating for better and safe pavements, pedestrian crossings and even the elimination of parking along one section of Huguenot Street so as to increase the pavement width and allow for better pedestrian safety. Also included in a strategic approach should be how best to create parking for the commercial sector and its employees. Pedestrian safety is of prime importance and our pavements are a disgrace to the town and your council that oversee its development. This strategic approach to planning should be seen in conjunction with a considered parking construction development to provide for a controlled car parking facility (which may be charged for) on a council owned property behind the present Council offices bounded by Dirkie Uys Street, the Hospice Centre and La Rochelle St.

I would suggest that the intent of this notice as to parking management be rejected as being insufficient and poorly considered as a parking management proposal and further that the talks between the Franschhoek Heritage and Ratepayers Association be opened so as to jointly investigate further the matter and with some urgency seek a solution that will better serve the needs of the Franschhoek community than simply charging for on street parking.

Brian Howard
Franschhoek resident and ratepayer

To whom it may concern

I have been a resident of Franschhoek for the past 23 years and never once have I thought we need to pay for parking along the main road ... It is a quaint little village and the biggest appeal here is that you don't have all the big city traits, like parking meter, fast food places etc.. also like what happened a few weeks ago in Paarl, overseas visitors where scammed out of a very large amount of money.. so my point being we are giving the criminals more chance of a bigger opportunity to scam and commit more crimes ... So it's a BIG NO for me ...

Subject: [EX] Parking Management along MAIN ROAD in FRANSCHHOEK

Hello,

I write to you in my capacity of director of ETOILE D'OR (PTY) LTD, the owner of the commercial center « Vendôme » on Main Road Franschhoek, of the industrial site 61 Cabrière Street and other properties in Franschhoek.

My attention was drawn to Notice 8/2023 of the Municipality's intention to start with parking management along Main Road in Franschhoek.

I strongly oppose this intention.

First of all, there is no need whatsoever as parking spaces in our Village are plentiful.

Second, during low seasons, even on Main Road itself, every local can find easily a convenient parking space. The « income » that might be generated is in no relation to the inconvenience caused to everybody !

Third, this would mean more harassment for the tourists and other visitors, who are the blood of our local business. A sound policy in my view is to do **everything** to welcome these visitors and **nothing** that could leave any negative impression on them.

If a « parking management » can be useful or even necessary in places like central Stellenbosch, it makes no sense at all and would harm our businesses in Franschhoek.

I beg you not to implement the idea of a « parking management » nobody called for.

Kind regards

Roy REDING

Subject: [EX] Parking Management in Franschoek

To whom it may concern

This letter serves to advise that I am strongly AGAINST the implementation of the proposed parking management along the main road of Franschoek.

The justification for the implementation of this makes absolutely no sense, as how does the need for additional parking bays relate to now charging for the same number of bays?

There is also no extra commercial development along the main road.

This is a blatant attempt to take further money from your constituents who are already taking financial strain.

Our village is only really busy for 2 months of the year, for the rest of the time there is more than sufficient parking available.

Many of us are already paying to have private security on the main road as crime has increased. Added to this our police force has been reduced.

We used to have a colonel stationed here and we've been downgraded, so we have a non existent police presence along the main road.

None of this makes any sense other than an attempt to milk the community.

Your sincerely
Chantal Lascaris

Subject: [EX] Franschhoek Parking

Good morning,

Do NOT implement paid parking in Franschhoek! We as residents and business owners are COMPLETELY opposed to this idea. I am sure I speak for many on this proposition and we will stand together against this.

Best Regards,

Shaun Winkler

OBJECTION: INTENTION TO START PARKING MANAGEMENT ALONG THE MAIN ROAD IN FRANSCHHOEK

ATTENTION/TO: engineering.services@ Stellenbosch.gov.za

CC: Mayor (Gesie Van Deventer) <mayor@ Stellenbosch.gov.za>

REFERENCE: Notice No. 8/2023

Good day,

La Residence is a boutique, luxury hotel operating at Elandskloof Private Road, Franschhoek.

We would hereby like to object to the intention to start parking management along the main road in Franschhoek.

Our reasons are:

- Having paid "car guards" or "parking managers" attracts the opportunity for illegal car guards, vagrants and beggars to impersonate them when they are not around and then harass and intimidate our guests to give them money.
- The moment any form of payment (be it cash or Snapscan or card) is brought into the picture there is the opportunity for criminals.
- Scammers make use of the opportunity to impersonate car guards to clone people's cards and rob them of thousands.

The Stellenbosch Municipality has not been providing any additional form of Law Enforcement to combat these persons that rob, intimidate, and harass our international and local guests. We have written to the Mayor's Office in 2021 and 2022 to request more Law Enforcement agents but no final outcome was received. **You mention in your notice that the recent commercial developments in the Franschhoek Central Business District has led to an increase in the demand for parking, yet you have still not increased the number of Law Enforcement officials.**

In principal I do not have a problem herewith as too many people who work in town park on a spot for the whole day and prevents our visitors from finding parking.

The town has quite a few disabled parking spots and I would request that they be make DISABLED/ELDERLY as these parking spots are used by everybody or standing empty and none of the elderly can find a parking spot.

Thank you for the fantastic service offered by the Stellenbosch Municipality.

Kind regards,

Dear Sir/Madam,

WRT the above referenced notice I would like to raise the following questions.

What is the purpose of this initiative?

If there is any profit derived from this initiative where will this profit go and what oversight will be in place? If there is a loss who pays for it?

Who is to manage this Parking Management and at what cost?

Comment- There is an Initiative, that was implemented via the Franschhoek Rate Payers Association, on the Main road, some 5 months ago. Stellenbosch municipality is well aware of this project through the on-going discussions with the Municipality. This initiative has been funded via voluntary contribution by Traders and Individuals of Franschhoek. This Initiative has already been well accepted by the People and Traders of Franschhoek and The Municipality is well aware of the long term goal of this initiative, that is to create a Non-Profit organization responsible for the over all security to the greater Franschhoek.

Thanks and Regards

Subject: [EX] Intention To Start Parking Management In Franschhoek Main Road

Dear Sir/Madam

As a result of so called 'car guards', atm scammers, beggars & the harassing of people (residents & tourists) in Franschhoek (of which I am a resident), there has been a private implementation of security patrol of our main road (funded by business & residents), since its recent inception there has been a vast improvement of the situation. I feel that the intention to start parking management in Franschhoek will just exasperate & lead to further incidents of harassment.

Therefore I am completely against this intended initiative by Stellenbosch Municipality.

Yours sincerely

Subject: [EX] We say no to parking fees in Franschhoek

To whom it may concern,

Stellenbosch Municipality this should definitely NOT be implemented in Franschhoek!!

It's bad enough that tourist get a parking ticket issued for parking their car on the "wrong side" of the street without being aware that this is illegal.

Tourist is use to being able to do this abroad, 1st time offenders should get a warning.

Now you want to add more opportunity for tourist to get more fines.

We should keep our town as welcoming to tourist is possible as it is what keeps our town alive!!!

Our community is still trying to recover from the impact of Covid, we need to try and keep it as attractive to visit Franschhoek as possible.

Not charging for parking means that visitors can park and explore town for as long as they want to.

If they have to pay, they will need to think about "how much time is left for what I paid for my parking" then rush back to pay again or worse...arrive back too late and have a parking ticket which leads to administration fees charged by car rental companies for handling parking ticket payments.

Locals also don't have the luxury of parking in one mall like in Stellenbosch where they can do shopping...multiple stops often need to be done to do all of your shopping. This adds an extra expense to just doing one's daily shopping in our community.

This will also affect the people that work in the village...if you have to pay R4 per 30 min you park your car while at work, a huge part of your daily wage will go just to park your car in town while you are at work. I paid R4 for 30min in Stellenbosch, this is the min amount you have to pay.

Last week I spoke to a gentleman that works at the Stellenbosch Tourism office, he said that he pays R85 per day in parking fees, just to be at work!! This is ridiculous.

Thank you.

Subject: [EX] Parking Tariffs Franschhoek

Attention: Ms Geraldine Mettler
Municipal Manager
Stellenbosch

Dear Ms Mettler;

I am writing in connection with your notice in the February copy of the Franschhoek Tatler (at page 9), where you announce Stellenbosch Municipality's intention to introduce parking tariffs along the Main

Road (Huguenot Road) in Franschhoek in the Central Business District (CBD) as from July 2023 and calling for commentary.

As a long time Franschhoek resident, and a ratepayer, I am very concerned about this, for 3 reasons.

1. This will contribute to discouraging tourists and visitors from visiting Franschhoek.
2. It will encourage those that do visit to park in the nearby side roads to avoid tariffs, such as the one I live in, Van Wijk Street, which is already congested, particularly during high season and on any of Franschhoek's numerous Festivals. Van Wijk street, running parallel to the main road, is quite narrow and we frequently have issues with the wine tram or refuse removal or any other large vehicle that cannot get past when 2 SUV's park either side of the road.

One Bastille Festival, a bus was stuck for over 2 hours, just outside my house. I wasn't there but a friend sent photos, and both sides of the street was lined with cars, and the bus could not pass.

This happens quite often and sometimes I cannot pass because sadly people don't think.

We often struggle even to park outside our home because someone has opted to park there, who in fact lives or visits several blocks away. I reserve my driveway parking for my guests, so cannot use it myself.

Not many will go to find the "free parking" available 2 streets away, to avoid the tariffs, most will slip down the nearest side road.

This kind of problem will just add greatly to the stress experienced by Guesthouses and Residents living in what is becoming a very busy and noisy village.

It is still a Village and in no way can it be compared to Stellenbosch.

3. There is a lot of fraud going on in Stellenbosch around paid parking and it will certainly happen here. Tourism is the absolute backbone of Franschhoek's economy and it cannot survive (as we cannot) if Tourists are discouraged from coming.

Parking Tariffs, Parking Fraud, and congested impassable side roads will all contribute to this discouragement.

With thanks,

Kind regards,

Jo Scott

Subject: [EX] Franschhoek Parking

To whom it may concern

The proposal to put paid parking via parking attendants is a bad idea and it will detract from the village feel of the main Rd. You are essentially talking about one Rd.

My experience with these systems in both Cape Town and Stellenbosch leaves a lot to be desired. They have become a hive of card scamming and enabling of car jamming etc. They have not reduced the vagrancy and the only benefit seems to be to the council coffers. I further doubt that the parking fees would cover the cost of the salaries.

For once take into consideration the community you are serving and not your own interests. Add value don't detract from it rather use those funds to back up our police in fighting crime and traffic officers that stop taxis and Uber drivers that don't know what a stop street or pedestrian crossing is and think it is okay to do u turns on main Rd.

Kind regards
Brian Marsh

To: Engineering Services <Engineering.Services@stellenbosch.gov.za>
Subject: [EX] Parking charges Franschhoek

To whom it may concern,

The Stellenbosch Municipality seems hell bent on collecting more revenue at the expense of businesses in Franschhoek.

Firstly, we do not have a parking problem on the main road. It may be busy during the high season but these are visitors to the town who spend money on the stores and restaurants on the main road. By charging a fee these guests will either not come or spend less time due to worrying about how long they have been there.

In addition we will have parking attendants harassing visitors and locals making a visit to the main road unpleasant. I for one will not support it and will park one street back as will most locals. This will cause congestion in the residential area.

Franschhoek does not need parking charges. We need traffic circles at the main intersections where too many accidents happen. We also need a limit on truck sizes passing through the town. They are very dangerous, noisy and do not contribute anything to Franschhoek.

Get your priorities right before you ruin the character of the town and lose revenue because it is no longer a pleasant destination.

From a disgruntled rate payer.

T Burger.
Franschhoek.

Subject: [EX] Objection against paid parking in Franschhoek

Dear Sir, Madam,

We are very concerned regarding the plans to make paid parking in Franschhoek.

By making the main road a paid parking zone, you will motivate people to park in the side streets, and then we have our illegal car guards back.
The Franschhoek community has put so much effort and money into getting rid of these illegal car guards, it would be silly to throw all of that away.
Municipality should rather invest in more guards in the street to keep the streets safe, for which the community is paying now.
It is the task of Municipality to keep the village safe.

Moreover, in Paarl and Stellenbosch, where they do have paid parking, people have been victims of scamming by the illegal car guards.

They have a Yoco credit card machine, they tell the people to pay for the parking with their credit card and they take an enormous amount.
For one person in Paarl, he was scammed for R110.000,=
We don't want that in our village.

Paid parking in the main street will make it less attractive for south african citizens who are coming from Cape Town for the day.
By having paid parking, one should offer a free alternative, such as parking at the beginning of the village and offer a free transfer into the village.
This will make the village less busy with cars.

An alternative to make money is to make a toll station in the Franschhoek Pass
What we really don't need in this village is these heavy trucks making a lot of noise and they make the streets unsafe.
It is also a burden for the local restaurants who have their terraces outside and people can't talk properly on the terrace.
By making a toll in the Franschhoek Pass, you would demotivate the heavy trucks to drive through Franschhoek.
They are only driving here because they don't want to pay the toll for the Pass on the N1.
By charging the trucks R120-R150 each time they want to pass, Franschhoek Municipality would make much more and easier money and keep the village tourist friendly.
Also the ones who are making unnecessary noise are the bikers over the weekends.
Charge each biker R30-R40 to demotivate them to drive here to make noise and cause many accidents over the weekends.
They are not supporting the Franschhoek community, they might have breakfast in Franschhoek but not spending serious money here so we can do without them.
Locals should have free access through the toll, and people who don't have a number plate starting with CL or CJ can pay a small amount like R10.

And what we need as well is speed bumps between Groendal and Franschhoek, and roundabouts to make the traffic not able to speed so much.
A roundabout at the 2 entrances of Groendal, as well as at the Monument.

It would be such a benefit for Franschhoek not having the trucks in the streets.
I know people have been wanting to have the Robertsvlei Road tarred and make the trucks go there.
I'm not sure what the reason is for not doing this, as the Village would really benefit from it.

We hope Municipality makes a wise decision and we do thank you for giving us the opportunity to give comments and input.

Kind regards,
Roel & Lucienne Rutten

I have read that you advocating that Parking Management be introduced on Main Road, Franschhoek.

Please can you send me a copy of the proposed business model so that I understand whether this is feasible or not.

In my opinion toll fees on the numerous 30/40mt trucks using our Main Road would be a greater money spinner if your sole objective is revenue generation.

I look forward to receiving your further advices.

Best regards

George Ware

To whom it may concern

I am a Franschhoek resident and am completely against the idea of paid parking in Franschhoek. Rather create more parking space on the gravel at the monument, between the tram and Franschhoek cellar or on the old tennis/netball courts between the municipal building and hospice.

Dear Sir

I would like to strongly object to having paid parking along the main shopping street in Franschhoek. I have lived in the village for 10 years and have enjoyed being able to park and quickly do my business in the village and leave. For most of the year outside of the summer season parking is a pleasure in the village and I see no reason at all to make it into a money making exercise

Kind regards
Shelley Fawcett

Subject: [EX] Intention to start parking management Main Road Franschhoek

Dear reader,

It came to my attention that the municipality of Stellenbosch intends to introduce paid parking in Franschhoek on Main road.

For us as returning guests from the Netherlands, this sounds like a decision that is not in the interest of the guests, residents and business owners of Franschhoek.

This seems to me a decision that is not conducive to tourism since obviously there will also be enforcement and people will be fined for violations. The tourist industry in South Africa is suffering due to high crime rates, poverty, frequent power outages and other problems. Business owners are already having a very tough time after the Covid pandemic and this is not going to help the business climate and ultimately may lead to increase of unemployment.

So I think you should reconsider the decision and should not introduce it.

With kind regards,

Roger & Anna Bastiaens

Subject: [EX] Comment on notice 8/2023 Franschhoek main road parking

From
MR M D F MEDLEY
2 Dirkie Uys Street

Reference: Notice No. 8/2023 Parking Management Along Main Road Franschhoek

Dear Sir/Madam,

I am writing to express concern about the planned implementation of parking tariffs on Franschhoek Main Road.

The village and its businesses are still in recovery from the devastating fallout from the Covid-19 pandemic and associated restrictions.

The implementation of parking charges would clearly be an unnecessary retrograde step at this time on that recovery.

The plan also needs to consider the constant and ongoing threat of illegal parking guards and the associated crime risk and threat to tourists of people posing as official parking attendants.

Already there are many occasions of scams for parking, credit card theft, scams at ATMs and more.

In addition the implications of the highly likely possibility that people will seek alternative parking down side streets to avoid paid parking also needs to be fully considered.

There will be an obvious criminal interest in cars parked away from patrolled areas.

The possibility of an increase in road traffic accidents and danger to pedestrians with the likely increased traffic and parking down side streets, plus access for residents could also be an issue.

I trust concerns will be fully considered.

Yours sincerely,

Dominic Medley

To Whom It May Concern

My letter is Based on the notice that was sent yesterday, 21 February 2023 to the Public, concerning Parking Tariffs in Franschhoek.

We live in a beautiful, charming village, where tourists visit our lovely town daily from all over the world. Franschhoek is special and yet different to other towns and villages in the Winelands. Franschhoek has a reputation of being a friendly town with all it has to offer, including free parking spaces making it easily accessible and convenient for tourists to visit restaurants, world renowned art galleries and boutique shops.

We all are aware of the incident that occurred not to long ago in Paarl, where tourists were scammed by fake parking guards. With this proposal, how are they supposed to know who is real and who is fake???, all the tourists know is that they will need to pay for parking in town! Fortunately, in Franschhoek everyone knows that parking spaces are not charged for , which means this issue would not happen in our village. The moment we start charging for parking, this will open a door for all kinds of criminals and scammers to take advantage of the opportunity to manipulate tourists and locals, and all the efforts to have private security on our streets will be in vain. Tourist feel safe by walking the streets of Franschhoek, knowing that their vehicles are safe and secured in our main street and side streets of Franschhoek.

We already have enough going on in Franschhoek with car guards harassing tourists, ATM Scams, House-break-ins, vehicle theft, cable theft, taxis, shoplifting etc. without having to deal with another set of opportunities for criminals.

We all are aware that Franschhoek does not have enough police or law enforcement or any other security provided by Municipality to deal with more issues in our village.

Let us keep Franschhoek safe, and tourist friendly for all tourists and locals. NO TO PARKING BEING CHARGED FOR.

Subject: [SUSPICIOUS MESSAGE] Parking Management - Franschhoek Main Road - Notice 8/2023

Good day

It is with regret that I have seen the notice sent out regarding the parking management planned for Franschhoek.

As a Franschhoek resident we experienced an extremely negative lockdown and many businesses had to close and we are only just recently starting to see an influx of tourist and NO PAYMENT for parking, making a very attractive town to visit and very welcoming. Not charging for parking means visitors can park and explore the town for as long as they want to without having to run back to their vehicles to secure the parking and not get a ticket.

We also don't have a mall as in other towns where guests or locals can park in the mall, do their shopping and explore the towns.

This adds an extra expense to doing just one daily shopping if we should pay. It will also affect the people working in the village as they have nowhere else to park and cannot in these difficult times afford to pay for many hours per day.

I truly hope that this proposed plan will not be passed.

To whom it may concern.

I object to the proposed implementation of paid parking on the Franschoek main road.

I have lived in Franschoek for over 20 years and have always been able to find parking in the Main Street. There is no need to make people pay to park. Particularly in our small town. It will affect the local people negatively if we have to pay additional fees just to go about our everyday lives.

Thank you

As a long standing resident of Franschhoek, I wish to raise my objection to the proposed "pay for parking" in Franschhoek as per the notice 08/2023.

Franschhoek has its own parking system which works very well, and we do NOT need a "pay to park" municipal parking system which will be to the detriment of our town.

Subject: [EX] FRANSCHHOEK PAID PARKING

The Director
Engineering Services
Stellenbosch Municipality

27 February 2023

FRANSCHHOEK PAID PARKING

It is with the utmost disgust that the advent of PAID PARKING has to even be proposed for Franschhoek.

There is absolutely no substantive argument that this can be justified. All the normal jargon that is par for the course for this type of proposal is copy paste from other Municipalities requesting or trying another way to find another income stream. Just look at Stellenbosch, the back streets are crammed with cars that have no where else to park. This has not alleviated the parking space problem in Plein Street, for example, in my opinion. Neither is it going to solve any non existent problems in Franschhoek.

No known Public Participation has taken place nor have any notices been sent out to residents or property owners informing the community of such.

What is the origin of this proposal? How is it justified?

Where will people park If not in the Main Road. Outside residents houses causing a different nuisance factor ? I wonder if the proposer put any real thought into this matter.

Is this a guaranteed loss making venture? Lets see the costs and the income stream thereof as well as historical data from other municipalities. Also the proposed usage of such funds and how they will be allocated. Surely we as Rate Payers, residents and business owners should have a right to say what happens in our town.

As a resident in my 18th year, a rate payer, a MD of a Franschhoek based company and as MD of a Commercial Retail property in Franschhoek I totally disagree with this proposal.

Look elsewhere for additional income firstly by cutting your own costs. This is not what a visit to Franschhoek Main Rd should be about.

Let the Public know that all you are actually after is trying to create a stream of income unbeknown to us whether such funds will be beneficial to our community. The Metered Parking nuisance factor most certainly will not be beneficial.

Subject: [EX] Paid parking

The Director, Engineering Service,

It is with great shock that the news of paid parking on the Main Road, the R 45, was received, I wish to register my objection to the proposed paid parking per Notice 8/2022 by Council. I have been a Resident in Franschhoek for 36yrs. You will be taking away the Village atmosphere, which is what attracted us here in the first place and the attraction to the tourists, who love the Quaint Village feel. The proposed paid parking will definitely take that feeling away. This is a Village and not a Town, so please do not spoil that by trying to commercialize our "Dorp". I have not had problems finding parking, there are a lot more cars over the Summer months, which we are grateful for, as it keeps our Village viable. I am sure this will encourage illegal car guards, again. We have Private security in the Main Road, which has eliminated the illegal car guards and the harassment of locals and Tourists alike, thus we have created a pleasant, safe environment for all.

Don't try to fix that which is not broken!! I certainly will NOT pay for parking, when I shop in town and I am sure all the locals feel the same. Please revoke the said Council Resolution.

Yours Sincerely,
Mrs. Pamela Lewis.

Subject: [EX] Franschhoek Main St parking

The Director, Engineering Services,

I wish to register my objection to the proposed paid-for parking per Notice 8/2023 passed on 22 Aug 2022 by Council. I am disappointed, but not surprised, that it has taken you so long to notify the public who are directly affected by this Council Resolution.

Having spent some 14 years on the Heritage and the Ratepayers committees and having been chairman of both I wish to inform you that the parking issue has taken up many hours of debate.

At each General meeting when discussed, paid for parking was resolutely defeated by all attendees. Only 1 committee member was in favour recently, yet he lives on a farm, so he's not a resident.

What Public Participation have you carried out in this regard??

As we know at peak season parking is tight.

Lets look at the causes.

The Municipality used to insist that new developments provide on site parking. This has fallen away. So the Municipality is at fault.

The Municipality brought in a system of reserved parking, eg, Centre Ville, Balloon Rouge, Auberge Danielle, Bovine. Hence reducing the available spaces. So the Municipality is at fault.

Heavy red lines were painted down all the side streets further reducing available parking. So the Municipality is at fault.

The only new business in the central part of the Main Road, R45, is Checkers. Why were they not required to provide adequate on site parking. ?? So again the Municipality is at fault.

So lets take another look at the problem.

For 3 months of the year parking is a bit tight.

Note however, that as a 21 year resident I do weekly shopping and have never failed to find a parking spot close by my destination. Certainly not in this 2023 year.

I shop at Clicks and Checkers twice per week, rarely I have to drive around the block and note that the public parking on the old tennis courts is empty. Then there's an empty space in front of Checkers/ Clicks.

The public parking is my only plus for your municipality.

So the parking guards may be the real problem.

So the local FWV and businesses have done a very effective self security solution.

So there's no longer a problem, REALLY.

So now what's the problem.

A small group of Municipal employees, WHO DO NOT LIVE IN FRANSCHHOEK, are trying to enforce their opinion on the residents of Franschhoek.

The concept of putting in a 12 month cost to solve a 3 month problem makes no sense.

Residents will NOT pay for parking, I assure you.

So what's the solution.

Revoke the said Council Resolution.

By the way, R45 is Provincial, Do you have their permission?

With kind regards,

Don HV Carroll

Subject: [EX] Parking in Franschoek

I wish to add my objection to paid parking on the high street of Franschoek on the grounds that there has not been enough public participation in the process
Yours H. Siebert

Subject: [EX] No to paid parking in Franschhoek

Stellenbosch Municipality this should definitely NOT be implemented in Franschhoek Wine Valley!!

It's bad enough that tourist get a parking ticket issued for parking their car on the "wrong side" of the street without being aware that this is illegal.

We should keep our town as welcoming to tourist is possible as it is what keeps our town alive!!!

Our community is still trying to recover from the impact of Covid, we need to try and keep it as attractive to visit Franschhoek as possible.

Not charging for parking means that visitors can park and explore town for as long as they want to.

If they have to pay, they will need to think about "how much time is left for what I paid for my parking" then rush back to pay again or worse....arrive back too late and have a parking ticket which leads to administration fees charged by car rental companies for handling parking ticket payments.

Locals also don't have the luxury of parking in one mall like in Stellenbosch where they can do shopping...multiple stops often need to be done to do all of your shopping. This adds an extra expense to just doing one's daily shopping in our community.

This will also affect the people that work in the village...if you have to pay R4 per 30 min you park your car while at work, a huge part of daily wage will go just to park your car in town while you are at work. I paid R4 for 30min in Stellenbosch, this is the min amount you have to pay.

So No to this crazy idea.

------	---------------------------------------

11.8.1	ADOPTION OF THE FINAL DRAFT STELLENBOSCH BY-LAW ON MUNICIPAL LAND USE PLANNING, 2023 AND ASSOCIATED SYSTEM OF DELEGATIONS AND CATEGORISATION MODEL
--------	---

Collaborator No: 749408
 IDP KPA Ref No: Good Governance
 Meeting Date: 17 May 2023 & 24 May 2023

1. SUBJECT: ADOPTION OF THE FINAL DRAFT STELLENBOSCH BY-LAW ON MUNICIPAL LAND USE PLANNING, 2023 AND ASSOCIATED SYSTEM OF DELEGATIONS AND CATEGORISATION MODEL

2. PURPOSE

Is for the Portfolio Councillor of Planning to present to Council for consideration the adoption of the proposed final Draft By-law on Municipal Land Use Planning, as well as the updated system of delegations and the categorisation model on decision making on land use and land development applications for the associated statutory operations of the land use planning functionality.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The Municipal Land Use Planning By-law (hereafter referred to as the "By-law"), which was adopted in 2015, has been reviewed and accordingly amended during the course of 2022. The resulting proposed draft amended By-law was adopted by Council for the purpose of public participation, which process was concluded by February 2023. The proposed Draft By-law was updated in terms of the comments received, and the final Draft By-law is now being submitted to Council for adoption.

For the purpose of adopting the final Draft By-law, the system of delegations and the categorisation model on decision making for land use and land development applications was also reviewed and updated.

5. RECOMMENDATIONS

- (a) that the final Draft Stellenbosch By-law on Municipal Land Use Planning, 2023, duly introduced in terms of Section 12(1) of the Local government: Municipal Systems Act, 2000 (Act 32 of 2000) by the Portfolio Councillor for Planning, and attached as **ANNEXURE "A", BE APPROVED** in terms of section 12(2) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000);

- (b) that the updated system of delegations in terms of the Stellenbosch By-law on Municipal Land Use Planning, 2023, attached as **ANNEXURE “D”, BE APPROVED** in terms of Section 59 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000);and
- (c) that the amended categorisation model of decision making on land use and land development applications in terms of Section 69(1) of the Stellenbosch Municipal Land Use Planning By-law, 2015, attached as **ANNEXURE “E”,** and which includes the qualification and appointment of the identified Authorised Employees in terms of Section 68(a) of the Stellenbosch Municipal Land Use Planning By-law, 2015, **BE APPROVED** and to come into effect simultaneously with the Stellenbosch Municipal Land Use Planning By-law, 2023.

6. DISCUSSION / CONTENTS

6.1 Background

An overview of the planning law review that resulted in the adoption of the Stellenbosch Municipal Land Use Planning By-law in 2015, was provided in the previous report to Council in November 2022 and in which the Draft By-law on Land Use Planning was presented for adoption for the purpose of public participation.

6.2 Final Draft By-law on Municipal Land Use Planning

The Draft By-law was duly advertised on 9 December 2022, and the commenting period closed on 8 February 2023. The advertisement was also sent per e-mail to the full mailing list of all active town planning consultants in the Stellenbosch Municipal area, as well as all organisations active in land use and land development applications.

The Office of the Municipal Manager did not receive any inputs in response to the advertisement on the Draft By-law. The internal comments were workshopped with officials from the Provincial Department of Development Planning who also made additional inputs regarding matters on which recent legal opinions were obtained and judgements of recent court cases.

These inputs were considered and the Draft By-law was accordingly updated, attached as **ANNEXURE “A”** as the final Draft By-law. The updating of the Draft By-law should be read together with the original record of amendments to the By-law 2015-2022, attached as **ANNEXURE “B”**. The latest and final record of additional amendments to the By-law 2015 – 2023, is attached as **ANNEXURE “C”**.

The nature and scope of the additional amendments was considered for the purpose of any additional requirement for public participation, and it was concluded that the additional amendments are not material in nature regarding the original amendments, and which would warrant the need for any additional public participation.

The process of amending the By-law has been concluded and is now being submitted to Council for consideration and adoption. Following the adoption of the final Draft By-law, the By-law needs to be published and in terms of which the existing By-law will automatically be repealed.

An appropriate process for the training of planning staff, officials, and Councilors, as well as a communications campaign will be undertaken in preparation for the implementation of new By-law.

6.2.1 Amended system of delegations for statutory land use planning functionality

With the adoption of an amended by-law, it is also required to review and update the existing system of delegations for the associated statutory operations of the land use planning functionality.

With the application of the current system of delegations, adopted in 2019, it has also become apparent that this suit of delegations contains omissions which results in operational difficulties, as well as inappropriate levels of authority to decide on matters.

The current need to amend the system of delegations to make provision for any new and amended provisions of the new By-law is consequently also an apt opportunity to update the system of delegations to ensure that there are no oversights, as well as to ensure efficient and effective, as well as accountable levels of authority to deal with the associated statutory operations of the land use planning functionality.

The proposed system for delegations for the land use planning functionality is attached as **ANNEXURE "D"**.

6.2.1 Amended Categorisation model for land use planning decision making

The By-law, and as required in terms of the National Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013), hereafter referred to as "**SPLUMA**", stipulates in Section 70(1) that a Municipal Planning Tribunal (MPT) must be established to decide on land use and land development applications.

Notwithstanding the mandatory establishment of a MPT, the municipality may also, in terms of Section 68(1) of the By-law, appoint an Authorised Employee (AE) and delegate a category of applications to the AE to decide on such applications.

For such purpose the land use and land development applications should be categorise in terms of Section 69(1) of the By-law to determine which types of applications will be considered by the AE and the MPT respectively.

The categorisation model is very similar to the former system of delegations where qualified types of applications were decided on by e.g. Senior Managers or Directors. Such system of delegations ensured that applications of a non-complex nature are decided on without undue time delays.

The categorisation model for Stellenbosch Municipality was reviewed in April 2020, and during the past three years it has become apparent that the categorisation model can be improved to enhance timeframes on service delivery and facilitate developments. With the introduction of the new planning by-law, and regarding the amendments and differentiation between types of land use and land development applications, it is also necessary to introduce an amended categorisation model.

The proposed categorisation model, which includes the rationale and criteria for distinguishing the different types of applications, as well as identifying all the authorised decision makers who, together with the MPT, must decide on the assigned categories of applications, is attached as **ANNEXURE "E"**.

6.3 Financial Implications

The review of the By-law was undertaken internally (in house) with no cost to Council. The required publishing of the By-law after adoption will result in a cost which funding is available on the existing budget of the Directorate.

6.4 Legal Implications

The amendment of the subject By-law with the replacement of the current By-law is governed in terms of the provisions of Section 12 of the Municipal Systems Act, which needs to be satisfied. Due process are followed in terms of this enabling legislation for the introduction of final Draft By-law to Council by a member of the Municipal Council.

6.5 Staff Implications

The review process was undertaken internally (in-house) and there are no additional staff implications for the adoption of the final Draft.

6.6 Previous / Relevant Council Resolutions

Adoption of the Municipal Land Use Planning By-law in 2015, as well as the adoption of the Draft By-law for the purpose of public participation in November 2022.

6.7 Risk Implications

Due to the amendments to the subject By-law to address and effect corrections, omissions and improvements, the risks associated with these matters will be averted by adopting the final Draft By-law.

6.8 Comments from Senior Management:**6.8.1 Director: Infrastructure Services**

No comments solicited.

6.8.2 Director: Planning and Economic Development

Supports the Item.

6.8.3 Director: Community and Protection Services

No comments solicited.

6.8.4 Director: Corporate Services

No comments solicited.

6.8.6 Chief Financial Officer

No comments solicited.

6.8.7 Municipal Manager

Supports the item.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.8.1

- (a) that the final Draft Stellenbosch By-law on Municipal Land Use Planning, 2023, duly introduced in terms of Section 12(1) of the Local government: Municipal Systems Act, 2000 (Act 32 of 2000) by the Portfolio Councillor for Planning, and attached as **ANNEXURE "A", BE APPROVED** in terms of section 12(2) of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000);

-
- (b) that the updated system of delegations in terms of the Stellenbosch By-law on Municipal Land Use Planning, 2023, attached as **ANNEXURE “D”**, **BE APPROVED** in terms of Section 59 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000); and
- (c) that the amended categorisation model of decision making on land use and land development applications in terms of Section 69(1) of the Stellenbosch Municipal Land Use Planning By-law, 2015, attached as **ANNEXURE “E”**, and which includes the qualification and appointment of the identified Authorised Employees in terms of Section 68(a) of the Stellenbosch Municipal Land Use Planning By-law, 2015, **BE APPROVED** and to come into effect simultaneously with the Stellenbosch Municipal Land Use Planning By-law, 2023.

ANNEXURES

ANNEXURE A: Proposed final Draft Stellenbosch By-law on Municipal Land Use Planning, 2023.

ANNEXURE B: Report on record of amendments and reasons for changes to By-law on Municipal Land Use Planning.

ANNEXURE C: Report on record of additional amendments and reasons for changes to By-law on Municipal Land Use Planning.

ANNEXURE D: Proposed Revised system of delegations for the Stellenbosch By-law on Municipal Land Use Planning, 2023.

ANNEXURE E: Proposed revised Categorisation Model for decision making structures on land use and land development applications, 2023.

ANNEXURE A

STELLENBOSCH MUNICIPALITY

By-law on Municipal Land Use Planning 2023

To regulate and control municipal land use planning.

PREAMBLE

WHEREAS section 156(1) of the Constitution of the Republic of South Africa, 1996 (Act 108 of 1996) confers on municipalities the executive authority and right to administer local government matters set out in Part B of Schedule 4 and Part B of Schedule 5 to the Constitution;

WHEREAS Part B of Schedule 4 to the Constitution lists municipal planning as a local government matter;

WHEREAS section 156(2) of the Constitution empowers municipalities to make and administer laws for the effective administration of matters that it has the right to administer;

WHEREAS Parliament has enacted the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) and the Western Cape Provincial Legislature has enacted the Land Use Planning Act (Act 3 of 2014), which among other things set out development principles which apply to all organs of state responsible for the implementation of legislation regulating the use and development of land;

NOW THEREFORE Stellenbosch Municipality has adopted this By-law.

ARRANGEMENT OF SECTIONS AND SCHEDULES

CHAPTER I

INTERPRETATION AND APPLICATION

1. Definitions
2. Application of By-law

CHAPTER II

SPATIAL PLANNING

3. Compilation or amendment of municipal spatial development framework
4. Establishment of project committee
5. Establishment of intergovernmental steering committee
6. Procedure with intergovernmental steering committee
7. Procedure without intergovernmental steering committee
8. Functions and duties
9. Local spatial development frameworks
10. Compilation, adoption, amendment or review of local spatial development frameworks
11. Status of local spatial development frameworks
12. Structure plans

CHAPTER III DEVELOPMENT MANAGEMENT

13. Determination of zoning
14. Non-conforming uses
15. Land development requiring approval and other approvals
16. Continuation of application after change of ownership
17. Rezoning of land
18. Departures
19. Consent uses
20. Subdivision
21. Confirmation of subdivision
22. Lapsing of subdivision
23. Amendment or cancellation of subdivision plan
24. Exemption of certain subdivisions and consolidations
25. Ownership of public places and land for municipal service infrastructure and amenities

26. Closure of public places
27. Services arising from subdivision
28. Certification by Municipality
29. Owners' associations
30. Owners' associations that cease to function
31. Consolidation of land units
32. Lapsing of consolidation
33. Removal, suspension or amendment of restrictive conditions
34. Endorsements in connection with removal, suspension or amendment of restrictive conditions

CHAPTER IV APPLICATION PROCEDURES

35. Manner and date of notification
36. Procedures for applications
37. Pre-application consultation
38. Information required
39. Application fees
40. Grounds for refusing to accept application
41. Receipt of application and commencement of application process
42. Provision of additional information or documents
43. Withdrawal of application or power of attorney
44. Public notice in accordance with other laws and integrated procedures
45. Publication of notices
46. Serving of notices
47. Additional contents of notice
48. Other methods of public notice
49. Requirements for petitions
50. Requirements for submission of comments
51. Intergovernmental participation process
52. Amendments before approval
53. Further public notice
54. Liability for cost of notice
55. Right of applicant to reply
56. Written assessment of application

- 57. Decision-making period
- 58. Failure to act within period
- 59. Powers to conduct routine inspections
- 60. Decisions on application
- 61. Notification and coming into operation of decision
- 62. Duties of agent
- 63. Errors and omissions
- 64. Exemptions to facilitate expedited procedures

CHAPTER V

CRITERIA FOR DECISION-MAKING

- 65. General criteria for consideration of applications
- 66. Conditions of approval

CHAPTER VI

EXTENSION OF VALIDITY PERIOD OF APPROVALS

- 67. Applications for extension of validity period

CHAPTER VII

MUNICIPAL PLANNING DECISION-MAKING STRUCTURES

- 68. Municipal planning decision-making structures in respect of applications and appeals
- 69. Consideration of applications
- 70. Establishment of Tribunal
- 71. Composition of Tribunal for municipal area
- 72. Process for appointment of members for Tribunal for municipal area
- 73. Term of office and conditions of service of members of Tribunal for municipal area
- 74. Disqualification from membership of Tribunal
- 75. Meetings of Tribunal for municipal area
- 76. Code of conduct for members of Tribunal for municipal area
- 77. Administrator for Tribunal for municipal area
- 78. Functioning of Tribunal for municipal area
- 79. Appeals
- 80. Procedure for appeal
- 81. Consideration by Appeal Authority

CHAPTER VIII

PROVISION OF ENGINEERING SERVICES

- 82. Responsibility for provision of engineering services
- 83. Development charges and other contributions
- 84. Land for parks, open spaces and other uses

CHAPTER IX

ENFORCEMENT

- 85. Enforcement
- 86. Offences and penalties
- 87. Serving of compliance notices
- 88. Contents of compliance notice
- 89. Objections to compliance notice
- 90. Failure to comply with compliance notice
- 91. Compliance certificates
- 92. Urgent matters

- 93. General powers and functions of authorised employees
- 94. Powers of entry, search and seizure
- 95. Warrant of entry for enforcement purposes
- 96. Regard to decency and order
- 97. Enforcement litigation

CHAPTER X MISCELLANEOUS

- 98. Naming and numbering of streets
- 99. Repeal and Transitional Arrangements
- 100. Short title and commencement

SCHEDULE 1 CODE OF CONDUCT FOR MEMBERS OF TRIBUNAL

CHAPTER I INTERPRETATION AND APPLICATION

Definitions

- 1. In this By-law, unless the context indicates otherwise, any word or expression to which a meaning has been assigned in the Western Cape Land Use Planning Act, 2014 (Act 3 of 2014), has the meaning assigned to it in that Act and—

“adopt”, in relation to a spatial development framework, zoning scheme, policy or strategy, means the approval thereof by a competent authority;

“agent” means a person authorised in terms of a power of attorney to make an application on behalf of the owner;

“Appeal Authority” means the Appeal Authority contemplated in section 79(1);

“applicable period”, referred to in sections 17(5) and (6), 18(2), 19(5), 22(1) and 32(1), means the period that may be determined by the Municipality in the approval;

“applicant” means a person referred to in section 15(2) who makes an application to the Municipality as contemplated in that section;

“application” means an application to the Municipality referred to in section 15(2);

“authorised employee” means a municipal employee who is authorised in terms of delegated or sub-delegated authority by the Municipality to exercise a power or perform a duty in terms of this By-law or to inspect land and buildings in order to enforce compliance with this By-law or the zoning scheme;

“base zoning” means the zoning before the application of any overlay zone;

“commencement”, in relation to construction, means to have begun continuous physical, on-site construction in accordance with building plans approved in terms of the National Building Regulations and Building Standards Act, 1977 (Act 103 of 1977), and that has gone beyond site clearing, excavation or digging trenches in preparation for foundations;

“comments”, in relation to comments submitted by the public, municipal departments and other organs of state and service providers on an application or appeal, includes objections, representations and petitions;

“consolidation”, in relation to land, means the merging of two or more adjacent land units into a single land unit, and includes the physical preparation of land for consolidation;

“Council” means the municipal council of the Municipality;

“date of notification” means the date on which a notice is served as contemplated in section 35 or published in the media or *Provincial Gazette*;

“development charge” means a development charge contemplated in section 83 as levied by the Municipality;

“emergency” includes a situation that arises from a flood, strong wind, severe rainstorm, fire, earthquake or industrial accident and that requires the relocation of human settlements or people;

“external engineering service” means an engineering service outside the boundaries of a land area referred to in an application and that is necessary for the utilisation and development of the land;

“Land Use Planning Act” means the Western Cape Land Use Planning Act, 2014 (Act 3 of 2014);

“local spatial development framework” means a local spatial development framework contemplated in section 9;

“Municipal Manager” means the Municipal Manager of the Municipality;

“municipal spatial development framework” means a municipal spatial development framework contemplated in section 10 of the Land Use Planning Act;

“Municipality” means the municipality of Stellenbosch established by Provincial Notice No. 479 in *Provincial Gazette* of 22 December 2000 issued in terms of the Local Government: Municipal Structures Act, 1998 (Act 117 of 1998), and, where the context so requires, includes—

- (a) the Council;
- (b) another political structure or a political office bearer of the Municipality, authorised or delegated to perform a function or exercise a power in terms of this By-law;
- (c) the Tribunal, authorised or delegated to perform a function or exercise a power in terms of this By-law;
- (d) the Municipal Manager; and

(e) an authorised employee;

“non-conforming use” means an existing land use that was lawful in terms of a previous zoning scheme but that does not comply with the zoning scheme in force;

“overlay zone” means a category of zoning that applies to land or a land unit in addition to the base zoning and that—

(a) stipulates additional development parameters or use rights that may be more or less restrictive than the base zoning; and

(b) may include provisions and development parameters relating to—

- (i) primary or consent uses;
- (ii) subdivision or subdivisonal areas;
- (iii) development incentives;
- (iv) density limitations;
- (v) urban form or urban renewal;
- (vi) heritage or environmental protection;
- (vii) management of the urban edge;
- (viii) scenic drives;
- (ix) coastal setbacks; or
- (x) any other purpose as set out in the zoning scheme;

“owners’ association” means an owners’ association contemplated in section 29;

“pre-application consultation” means a consultation contemplated in section 37;

“restrictive condition” means any condition registered against the title deed of land restricting the use, development or subdivision of the land concerned;

“service” means a service provided by the Municipality, any other organ of state or a service provider, including services for the provision of water, sewerage, electricity, refuse removal, roads, storm-water drainage, and includes infrastructure, systems and processes related to the service;

“site development plan” means a dimensioned plan drawn to scale that indicates details of the proposed land development, including the site layout, positioning of buildings and structures, property access, building designs and landscaping;

“social infrastructure” means community facilities, services and networks that meet social needs and enhance community well-being;

“Spatial Planning and Land Use Management Act” means the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013);

“Spatial Planning and Land Use Management Regulations” means the Spatial Planning and Land Use Management Regulations: Land Use Management and General Matters, 2015, made under the Spatial Planning and Land Use Management Act and published under Notice R239/2015 in *Government Gazette* 38594 of 23 March 2015;

“subdivisional area” means an overlay zone that permits subdivision for the purposes of a subdivision application involving a change of zoning;

“Tribunal” means the Municipal Planning Tribunal, established in terms of section 70.

Application of By-law

2. This By-law applies to all land situated within the municipal area, including land owned by organs of state.

CHAPTER II

SPATIAL PLANNING

Compilation or amendment of municipal spatial development framework

3. (1) When the Council compiles or amends its municipal spatial development framework in accordance with the Municipal Systems Act, the Council must, as contemplated in section 11 of the Land Use Planning Act—
 - (a) establish an intergovernmental steering committee to compile a draft municipal spatial development framework or a draft amendment of its municipal spatial development framework; or
 - (b) refer its draft municipal spatial development framework or draft amendment of its municipal spatial development framework to the Provincial Minister for comment.
- (2) The Municipality must—
 - (a) publish a notice in two of the official languages of the Province most spoken in the area in two newspapers circulating in the area concerned of—
 - (i) the intention to compile or amend the municipal spatial development framework; and
 - (ii) the process to be followed, in accordance with section 28(3) and 29 of the Municipal Systems Act;
 - (b) inform the Provincial Minister in writing of—

- (i) the intention to compile or amend the municipal spatial development framework;
 - (ii) its decision in terms of subsection (1)(a) or (b); and
 - (iii) the process contemplated in subsection (2)(a)(ii); and
- (c) register relevant stakeholders, who must be invited to comment on the draft municipal spatial development framework or draft amendment of the municipal spatial development framework as part of the process contemplated in subsection (2)(a)(ii).

Establishment of project committee

4. (1) The Municipality may establish a project committee to assist to compile or amend its municipal spatial development framework and to perform the duties of the Municipality referred to in sections 6 to 8.
- (2) The project committee must consist of—
 - (a) the Municipal Manager or a municipal employee designated by the Municipal Manager; and
 - (b) municipal employees appointed by the Municipal Manager from the following municipal departments, where relevant:
 - (i) the integrated development planning office;
 - (ii) the spatial planning department;
 - (iii) the engineering department;
 - (iv) the local economic development department; and
 - (v) the housing department.

Establishment of intergovernmental steering committee

5. (1) If the Council establishes an intergovernmental steering committee, it must consist of—
 - (a) the Municipal Manager, or a designated municipal employee to represent the Municipal Manager; and
 - (b) representatives of—
 - (i) the Municipality, nominated by the Municipal Manager;
 - (ii) the Department, nominated by the Head of Department;
 - (iii) the provincial department responsible for land use planning, nominated by the Head of that department; and
 - (iv) other relevant organs of state, if any, who may have an interest in the compilation or amendment of the spatial development framework of the Municipality.

- (2) When the Council establishes an intergovernmental steering committee the Municipal Manager must—
 - (a) designate a municipal employee to represent the Municipal Manager;
 - (b) nominate other representatives of the Municipality; and
 - (c) in writing, invite written nominations for representatives from the persons or organs of state contemplated in subsection (1)(b)(ii), (iii), and (iv).

Procedure with intergovernmental steering committee

6. (1) If the Council establishes an intergovernmental steering committee, the Municipality must compile a draft *status quo* report setting out an assessment of the existing levels of development and development challenges in the municipal area or relevant area in the municipal area and must submit it to the intergovernmental steering committee for comment.
- (2) After consideration of the comments of the intergovernmental steering committee, the Municipality must finalise the *status quo* report and submit it to the Council for adoption.
- (3) After finalising the *status quo* report the Municipality must compile a first draft of the municipal spatial development framework or first draft of the amendment of the municipal spatial development framework and submit it to the intergovernmental steering committee for comment.
- (4) After consideration of the comments of the intergovernmental steering committee, the Municipality must finalise the first draft of the municipal spatial development framework or first draft of the amendment of the municipal spatial development framework and submit it to the Council to approve the publication thereof for public comment in accordance with the process adopted in terms of sections 28(3) and 29 of the Municipal Systems Act.
- (5) After consideration of the comments received by virtue of the publication contemplated in subsection (4), the Municipality must compile a final draft of the municipal spatial development framework or final draft of the amendment of the municipal spatial development framework and submit it to the intergovernmental steering committee for comment.
- (6) After consideration of the comments of the intergovernmental steering committee contemplated in subsection (5), the Municipality must finalise the final draft of the municipal spatial development framework or final draft of the amendment of the municipal spatial development framework and submit it to the Council for adoption.
- (7) If the final draft of the municipal spatial development framework or final draft of the amendment of the municipal spatial development framework contemplated in subsection (6) is materially different to what was published in terms of subsection (4), the Municipality must in accordance with

subsections (4), (5) and (6), read with the necessary changes, follow a further consultation and public participation process before the municipal spatial development framework or amendment of the municipal spatial development framework is adopted by the Council.

- (8) The Council may at any time in the process of compiling a municipal spatial development framework or drafting an amendment of the municipal spatial development framework request comments from the intergovernmental steering committee.
- (9) The Council must adopt the final draft municipal spatial development framework or final draft amendment of the municipal spatial development framework, with or without amendments and must within 14 days of its decision give notice of its decision in the media and the *Provincial Gazette*.

Procedure without intergovernmental steering committee

- 7. (1) If the Council does not establish an intergovernmental steering committee to compile or amend its municipal spatial development framework, the Municipality must—
 - (a) compile a draft *status quo* report setting out an assessment of the existing levels of development and development challenges in the municipal area or relevant area in the municipal area and submit it to the Council for adoption;
 - (b) after adoption of the *status quo* report, compile a first draft of the municipal spatial development framework or first draft of the amendment of the municipal spatial development framework and submit it to the Council to approve the publication thereof for public comment;
 - (c) after approval of the first draft of the municipal spatial development framework or first draft of the amendment of the municipal spatial development framework for publication contemplated in paragraph (b), submit the first draft of the municipal spatial development framework or first draft of the amendment of the municipal spatial development framework to the Provincial Minister for comment in terms of section 13 of the Land Use Planning Act; and
 - (d) after consideration of the comments received from the public and the Provincial Minister, submit the final draft of the municipal spatial development framework or final draft of the amendment of the municipal spatial development framework, with any further amendments, to the Council for adoption.
- (2) If the final draft of the municipal spatial development framework or final draft of the amendment of the municipal spatial development framework contemplated in subsection (1)(d) is materially different to what was published in terms of subsection (1)(b), the Municipality must follow a further consultation and public participation process before the municipal spatial development framework or amendment of the municipal spatial development framework is adopted by the Council.

- (3) The Council must adopt the final draft of the municipal spatial development framework or final draft of the amendment of the municipal spatial development framework, with or without amendments, and must within 14 days of its decision give notice of its decision in the media and the *Provincial Gazette*.

Functions and duties

8. (1) The Municipality must, in accordance with the directions of executive mayor—
- (a) ensure the compilation of the municipal spatial development framework or drafting of an amendment of the municipal spatial development framework for adoption by the Council;
 - (b) provide technical knowledge and expertise to the Council;
 - (c) ensure that the compilation of the municipal spatial development framework or drafting of the amendment of the municipal spatial development framework is progressing according to the process contemplated in section 3(2)(a)(ii);
 - (d) guide the public participation process and ensure that the registered stakeholders remain informed;
 - (e) ensure the incorporation of amendments to the draft municipal spatial development framework or draft amendment of the municipal spatial development framework based on the consideration of the comments received during the process of drafting thereof;
 - (f) ensure the drafting of—
 - (i) a report in terms of section 14(c) of the Land Use Planning Act setting out the response of the Municipality to the provincial comments issued in terms of section 12(4) or 13(2) of that Act; and
 - (ii) a statement setting out—
 - (aa) whether the Municipality has implemented the policies and objectives issued by the national minister responsible for spatial planning and land use management and if so, how and to what extent the Municipality has implemented it; or
 - (bb) if the Municipality has not implemented the policies and objectives, the reasons for not implementing it;
 - (g) ensure alignment of the municipal spatial development framework with the development plans and strategies of other affected municipalities and other organs of state as contemplated in section 24(1) of the Municipal Systems Act;

- (h) facilitate the integration of other sector plans into the municipal spatial development framework; and
- (i) if the Council establishes an intergovernmental steering committee—
 - (i) assist the Council in establishing the intergovernmental steering committee and adhering to timeframes; and
 - (ii) ensure the flow of information between the project committee and the intergovernmental steering committee.
- (2) The members of the intergovernmental steering committee must—
 - (a) provide the intergovernmental steering committee with the following:
 - (i) technical knowledge and expertise;
 - (ii) input on outstanding information that is required to compile the municipal spatial development framework or draft an amendment thereof;
 - (iii) information on budgetary allocations;
 - (iv) information on and the locality of any current or planned projects that have an impact on the municipal area; and
 - (v) written comments in terms of section 6; and
 - (b) provide the project committee, if established, or the Municipality with written comments in terms of section 6.

Local spatial development frameworks

9. (1) The Municipality may adopt a local spatial development framework for a specific geographical area in a part of the municipal area.
- (2) The purpose of a local spatial development framework is to, for a specific geographical area, —
 - (a) provide detailed spatial planning guidelines;
 - (b) provide more detail in respect of a proposal provided for in the municipal spatial development framework;
 - (c) meet specific land use planning needs;
 - (d) provide detailed policy and recommended development parameters for land use planning;
 - (e) provide detailed priorities in relation to land use planning and, in so far as they are linked to land use planning, biodiversity and environmental issues; and
 - (f) guide decision-making on land use applications.

Compilation, adoption, amendment or review of local spatial development frameworks

10. (1) If the Municipality compiles, amends or reviews a local spatial development framework, it must adopt a process plan, including the public participation processes to be followed for the compilation, amendment, review or adoption of a local spatial development framework.
- (2) The Municipality must, within 21 days of adopting a local spatial development framework or an amendment of a local spatial development framework, publish a notice of the decision in the media and the *Provincial Gazette*.

Status of local spatial development frameworks

11. (1) A local spatial development framework or an amendment thereof comes into operation on the date of publication of the notice contemplated in section 10(2).
- (2) A local spatial development framework guides and informs decisions made by the Municipality relating to land development, but it does not confer or take away rights.

Structure plans

12. (1) If the Municipality intends to convert a structure plan to a local spatial development framework, the Municipality must comply with sections 9 to 11 and must—
 - (a) review that structure plan and make it consistent with the purpose of a local spatial development framework contemplated in section 9(2); and
 - (b) incorporate the provisions of the structure plan that are consistent with that purpose in the local spatial development framework.
- (2) The Municipality must, in terms of section 16(4) of the Land Use Planning Act, withdraw the relevant structure plan by notice in the *Provincial Gazette* when it adopts a local spatial development framework contemplated in subsection (1).

CHAPTER III

DEVELOPMENT MANAGEMENT

Determination of zoning

13. (1) The owner or his or her agent may apply in terms of section 15(2) to the Municipality for the determination of a zoning for land referred to in section 34(1), (2) or (3) of the Land Use Planning Act.
- (2) When the Municipality considers an application in terms of subsection (1), it must have regard to the following:
 - (a) the lawful utilisation of the land, or the purpose for which it could be lawfully utilised immediately before the commencement of the Land Use Planning Act, if it can be determined;

- (b) the zoning, if any, that is most compatible with that utilisation or purpose and any applicable title deed condition;
 - (c) any departure or consent use that may be required in conjunction with that zoning;
 - (d) in the case of land that was vacant immediately before the commencement of the Land Use Planning Act, the utilisation that is permitted in terms of the title deed conditions or, where more than one land use is so permitted, one of such land uses determined by the Municipality; and
 - (e) where the lawful utilisation of the land and the purpose for which it could be lawfully utilised immediately before the commencement of the Land Use Planning Act cannot be determined, the zoning that is the most desirable and compatible with any applicable title deed condition, together with any departure or consent use that may be required.
- (3) If the lawful zoning of the land contemplated in subsection (1) cannot be determined, the Municipality must rezone the land concerned in terms of section 15(2)(a).
 - (4) A land use that commenced unlawfully, whether before or after the commencement of this By-law, may not be considered to be lawful.

Non-conforming uses

- 14.** (1) A non-conforming use does not constitute an offence in terms of this By-law.
- (2) A non-conforming use may continue as long as it remains otherwise lawful, subject to the following:
- (a) if the non-conforming use is ceased for any reason for a period of more than twenty-four consecutive months, any subsequent utilisation of the property must comply with this By-law and the zoning scheme, with or without departures;
 - (b) an appropriate application contemplated in section 15(2) must be made for the alteration or extension of buildings or structures in respect of the non-conforming use;
 - (c) the owner bears the onus of proving that the non-conforming use right exists; and
 - (d) the use right is limited to the area of the building or land in respect of which the proven use right exists.
- (3) Subject to subsection (2)(a) and (b), if an existing building that constitutes a non-conforming use is destroyed or damaged to the extent that it is necessary to demolish a substantial part of the building, the Municipality may grant permission for the reconstruction of such building subject to conditions.

Land development requiring approval and other approvals

- 15.** (1) No person may commence, continue, or cause the commencement or continuation of, land development, other than the subdivision or consolidation of land referred to in section 24, without the approval of the Municipality in terms of subsection (2).
- (2) The owner or his or her agent may apply to the Municipality in terms of this Chapter and Chapter IV for the following in relation to the development of the land concerned:
- (a) a rezoning of land;
 - (b) a permanent departure from the development parameters of the zoning scheme;
 - (c) a departure granted on a temporary basis to utilise land for a purpose not permitted in terms of the primary rights of the zoning applicable to the land;
 - (d) a subdivision of land that is not exempted in terms of section 24, including the registration of a servitude or lease agreement;
 - (e) a consolidation of land that is not exempted in terms of section 24;
 - (f) a removal, suspension or amendment of restrictive conditions in respect of a land unit;
 - (g) a permission required in terms of the zoning scheme;
 - (h) an amendment, deletion or imposition of conditions in respect of an existing approval;
 - (i) an extension of the validity period of an approval;
 - (j) an approval of an overlay zone as contemplated in the zoning scheme;
 - (k) an amendment or cancellation of an approved subdivision or consolidation plan or part thereof, including a general plan or diagram;
 - (l) a permission required in terms of a condition of approval;
 - (m) a determination of a zoning;
 - (n) a closure of a public place or part thereof;
 - (o) a consent use contemplated in the zoning scheme;
 - (p) to disestablish an owner's association;
 - (q) to rectify a failure by an owners' association to meet its obligations in respect of the control over or maintenance of services; and
 - (r) a permission required for the reconstruction of an existing building that constitutes a non-conforming use that is destroyed or damaged

to the extent that it is necessary to demolish a substantial part of the building.

- (3) If section 53 of the Land Use Planning Act is applicable to the land development, the owner or agent must also apply for approval of the land development in terms of that Act.
- (4) When an applicant or owner exercises a use right granted in terms of an approval, he or she must comply with the conditions of the approval and the applicable provisions of the zoning scheme.
- (5) The Municipality may, subject to subsection (7), on its own initiative rezone land of which it is not the owner for a purpose contemplated in sections 13(3) and 17(1).
- (6) The Municipality may, subject to subsection (7), on its own initiative conduct land development or an activity contemplated in subsections (2)(b), (c), (f) to (j) and (l) to (r) in respect of land which is not owned by the Municipality.
- (7) When the Municipality on its own initiative acts in terms of subsection (2), (5) or (6)-
 - (a) the Municipality is regarded for purposes of this Chapter and Chapter IV as an applicant and must comply with this Chapter and Chapter IV, including the publication and notice requirements; and
 - (b) the decision on applications in terms of subsection (2)(a), (d) and (j) must be made by the Tribunal-

.Continuation of application after change of ownership

- 16.** If land that is the subject of an application is transferred to a new owner, the new owner may continue with the application as the successor in title to the previous owner and the new owner is regarded as the applicant for the purposes of this By-law.

Rezoning of land

- 17. (1)** The Municipality may, on its own initiative, rezone land of which it is not the owner to—
 - (a) provide a public service or to provide a public recreational space; or
 - (b) substitute a zoning scheme or part thereof for a zoning scheme in terms of which the land is not zoned in accordance with the utilisation thereof or existing use rights.
- (2) An applicant who wishes land to be rezoned must submit an application to the Municipality in terms of section 15(2).
- (3) When the Municipality creates an overlay zone for land it must comply with sections 12 and 13 of the Municipal Systems Act.
- (4) Zoning may be made applicable to a land unit or part thereof and zoning need not follow cadastral boundaries.

- (5) Subject to subsection (6), a rezoning approval contemplated in subsection (2) lapses after the applicable period reckoned from the date that the approval comes into operation if, within that period—
 - (a) the zoning is not utilised in accordance with the approval; or
 - (b) the following requirements have not been met:
 - (i) the approval by the Municipality of a building plan envisaged for the utilisation of the approved use right; and
 - (ii) commencement of the construction of the building contemplated in subparagraph (i).
- (6) An approval of a rezoning to subdivisional area contemplated in section 20(2) lapses after the applicable period reckoned from the date that the approval comes into operation if, within that period—
 - (a) a subdivision application is not submitted; or
 - (b) the conditions of approval are not complied with.
- (7) If a subdivision application is submitted in respect of land that is zoned as subdivisional area, the zoning of subdivisional area lapses on the later date of the following dates:
 - (a) the date on which the subdivision is approved; or
 - (b) the date after the applicable period contemplated in subsection (6) including any extended period approved in terms of section 67.
- (8) The approval of a rezoning to subdivisional area must include conditions that make provision for at least—
 - (a) density requirements;
 - (b) main land uses and the extent thereof; and
 - (c) a detailed phasing plan or a framework including—
 - (i) main transport routes;
 - (ii) main land uses;
 - (iii) bulk infrastructure;
 - (iv) requirements of organs of state;
 - (v) public open space requirements; and
 - (vi) physical development constraints.
- (9) If a rezoning approval lapses, the zoning applicable to the land before the approval of the rezoning applies or, where no zoning existed before the approval of the rezoning, the Municipality must determine a zoning in terms of section 13.

Departures

- 18.** (1) An applicant may apply to the Municipality in terms of section 15(2) —
- (a) for a departure from the development parameters of a zoning or an overlay zone; or
 - (b) to utilise land on a temporary basis for a purpose not permitted in terms of the primary rights of the zoning applicable to the land for a period not exceeding five years.
- (2) A departure contemplated in subsection (1)(a) lapses after the applicable period from the date that the approval comes into operation if, within that period—
- (a) the departure is not utilised in accordance with the approval; or
 - (b) the following requirements have not been met:
 - (i) the approval by the Municipality of a building plan envisaged for the utilisation of the approved departure; and
 - (ii) commencement of the construction of the building contemplated in subparagraph (i).
- (3) The Municipality may approve a departure contemplated in subsection (1)(b) for a period shorter than five years but, if a shorter period is approved, the period together with any extension approved in accordance with section 67 may not exceed five years.
- (4) A temporary departure contemplated in subsection (1)(b), except for a right to utilise land for a purpose granted on a temporary basis for a specific occasion or event, may not be approved more than once in respect of a particular use on a specific land unit.
- (5) A temporary departure contemplated in subsection (1)(b) may include an improvement of land only if—
- (a) the improvement is temporary in nature; and
 - (b) the land can, without further construction or demolition, revert to its previous lawful use upon the expiry of the use right.
- (6) A temporary departure contemplated in subsection (1)(b) lapses after one year from the date that the approval comes into operation if, within that period the temporary departure is not utilised in accordance with the approval.

Consent uses

- 19.** (1) An applicant may apply to the Municipality in terms of section 15(2) for a consent use contemplated in the zoning scheme.

- (2) If the development parameters for the consent use that is being applied for are not defined in the zoning scheme, the Municipality must determine the development parameters that apply to the consent use in terms of conditions of approval imposed in terms of section 66.
- (3) A consent use may be approved permanently or for a period specified in the conditions of approval imposed in terms of section 66.
- (4) A consent use approved for a specified period must not have the effect of preventing the property from being utilised in the future for the primary uses permitted in terms of the zoning of the land.
- (5) A consent use contemplated in subsection (1) lapses after the applicable period from the date that the approval comes into operation if, within that period—
 - (a) the consent use is not utilised in accordance with the approval; or
 - (b) the following requirements have not been met:
 - (i) the approval by the Municipality of a building plan envisaged for the utilisation of the approved consent use; and
 - (ii) commencement of the construction of the building contemplated in subparagraph (i).

Subdivision

- 20. (1) No person may subdivide land without the approval of the Municipality in terms of section 15(2) unless the subdivision is exempted in terms of section 24.
- (2) No application for subdivision involving a change of zoning may be considered by the Municipality unless the land concerned is zoned as a subdivisinal area.
- (3) An applicant may submit a subdivision application simultaneously with an application for rezoning.
- (4) The Municipality must impose appropriate conditions in terms of section 66 relating to engineering services for an approval of a subdivision.
- (5) If the Municipality approves a subdivision, the applicant must submit a general plan or diagram to the Surveyor-General for approval, including proof to the satisfaction of the Surveyor-General of—
 - (a) the Municipality's decision to approve the subdivision;
 - (b) the conditions of approval imposed in terms of section 66; and
 - (c) the approved subdivision plan.
- (6) The Municipality must issue a certificate to the applicant or any other person on his or her written request to confirm that all the conditions of approval contemplated in subsection 21(1)(c) have been met, if the applicant has submitted the proof contemplated in that section.

- (7) If the Municipality issues a certificate referred to in subsection (6) in error, the owner is not absolved from complying with the obligations imposed in terms of the conditions.

Confirmation of subdivision

- 21. (1)** A subdivision or part thereof is confirmed and cannot lapse when the following requirements are met within the period contemplated in section 22(1):
- (a) approval by the Surveyor-General of the general plan or diagram contemplated in section 20(5);
 - (b) completion of the installation of engineering services in accordance with the conditions contemplated in section 20(4) and other applicable legislation;
 - (c) proof to the satisfaction of the Municipality that all the conditions of the approved subdivision that must be complied with before compliance with paragraph (d) have been met in respect of the area shown on the general plan or diagram; and
 - (d) registration of the transfer of ownership or certificate of registered title in terms of the Deeds Registries Act of the land unit shown on the diagram or of at least one new land unit shown on the general plan.
- (2) Upon confirmation of a subdivision or part thereof in terms of subsection (1), zonings indicated on an approved subdivision plan are confirmed and cannot lapse.
- (3) The Municipality must in writing confirm to the applicant or any other person on his or her written request that a subdivision or part of a subdivision is confirmed if the applicant has to the satisfaction of the Municipality submitted proof of compliance with the requirements referred to in subsection (1)(a) to (d) for the subdivision or part thereof.
- (4) No building or structure may be constructed on a land unit forming part of an approved subdivision unless the subdivision is confirmed as contemplated in subsection (1) or the Municipality approved the construction before the confirmation of the subdivision.

Lapsing of subdivision

- 22. (1)** An approved subdivision lapses after the applicable period from the date that the approval comes into operation if the requirements contemplated in section 21(1)(a) to (d) have not been met within that period.
- (2) If an applicant complies with section 21(1)(b) and (c) only in respect of a part of the land reflected on the general plan contemplated in section 21(1)(a), the applicant must withdraw the general plan and submit a new general plan to the Surveyor-General for that part of the land.
- (3) If an approval of a subdivision or part thereof lapses in terms of subsection (1)—
- (a) the Municipality must—

- (i) amend the zoning map and, where applicable, the register accordingly; and
 - (ii) notify the Surveyor-General accordingly; and
- (b) the Surveyor-General must endorse the records of the Surveyor-General's office to reflect the notification that the subdivision has lapsed.

Amendment or cancellation of subdivision plan

- 23.** (1) The Municipality may in terms of section 15(2) approve the amendment or cancellation of a subdivision plan, including conditions of approval, the general plan or diagram, in relation to land units shown on the general plan or diagram that have not been registered yet in terms of the Deeds Registries Act.
- (2) When the Municipality approves an application in terms of subsection (1), any public place that is no longer required by virtue of the approval must be closed in terms of section 26.
- (3) The Municipality must notify the Surveyor-General of an approval in terms of subsection (1) and the Surveyor-General must endorse the records of the Surveyor-General's office to reflect the amendment or cancellation of the subdivision.
- (4) An amended subdivision approval contemplated in subsection 1 does not extend the validity period of the initial approval of the subdivision as contemplated in section 22(1).

Exemption of certain subdivisions and consolidations

- 24.** (1) The subdivision or consolidation of land does not require the approval of the Municipality in the following cases:
- (a) a subdivision or consolidation that arises from the implementation of a court ruling;
 - (b) a subdivision or consolidation that arises from an expropriation;
 - (c) a minor amendment to the common boundary between two or more land units if the resulting change in area of any of the land units does not exceed 10 per cent;
 - (d) the consolidation of a closed public place with an abutting erf;
 - (e) the construction or alteration of a public or proclaimed street;
 - (f) the registration of a servitude or lease agreement, for—
 - (i) the provision of a borehole or installation of water pipelines, electricity transmission lines, sewer pipelines, storm water pipes and canals, gas pipelines or oil and petroleum product pipelines or related infrastructure by a service provider, whether it is on behalf of an organ of state or not;

- (ii) the provision or installation of telecommunication infrastructure by or on behalf of a licensed telecommunications operator;
 - (iii) the imposition of height restrictions; or
 - (iv) the granting of a right of habitation, private right of way or usufruct.
- (g) the subdivision or consolidation of land units that arise from the establishment of a development scheme as defined in section 1(1) of the Sectional Titles Act, 1986 (Act 95 of 1986), after the sectional plan has been registered in terms of section 12 of that Act.
- (2) An owner or his or her agent must obtain a certificate from the Municipality that certifies in writing that the subdivision or consolidation is exempted from the application of section 15, and sections 20 to 23 in the case of a subdivision or sections 15, 31 and 32 in the case of a consolidation.
- (3) The Municipality must indicate on the subdivision plan, or on the diagram in respect of the consolidation, that the subdivision or consolidation is exempted from the application of the sections referred to in subsection (2).

Ownership of public places and land for municipal service infrastructure and amenities

- 25.** (1) The ownership of land that is earmarked for a public place as shown on an approved subdivision plan vests in the Municipality upon confirmation of the subdivision or a part thereof.
- (2) The Municipality may in terms of conditions imposed in terms of section 66 determine that land designated for the provision of municipal service infrastructure and amenities on an approved subdivision plan be transferred to the Municipality upon confirmation of the subdivision or a part thereof.

Closure of public places

- 26.** (1) The Municipality may, on its own initiative or on application, permanently close a public place or any part thereof in accordance with Chapter IV.
- (2) An applicant who requires the closure of a public place, whether permanently or temporarily, must apply in terms of section 15(2) to the Municipality.
- (3) If any person lodges a claim against the Municipality for loss or damage that he or she has allegedly suffered due to wrongdoing on the part of the Municipality when it permanently closed a public place, the authorised employee must—
- (a) require proof of negligence or any other wrongdoing on the part of the Municipality which resulted in the loss or damage; and
 - (b) before any claim is paid or settled, obtain a full technical investigation report in respect of the circumstances that led to the closure of the

public place to determine whether or not there has been negligence on the part of the Municipality.

- (4) The Municipality may pay a claim if—
 - (a) the circumstances of the loss or damage reveal that the Municipality acted wrongfully;
 - (b) in the case of loss of or damage to property, the claimant has proved his or her loss or damage;
 - (c) in the case of personal injury, the claimant has provided proof of a fair and reasonable quantum;
 - (d) no claim has been paid by personal insurance covering the same loss; and
 - (e) any relevant information as requested by the authorised employee has been received.
- (5) The ownership of the land comprising any public place, or a part thereof, that is permanently closed in terms of this section continues to vest in the Municipality unless the Municipality determines otherwise.
- (6) The Municipal Manager may, without complying with Chapter IV, temporarily close a public place—
 - (a) for the purpose of, or pending, the construction, reconstruction or maintenance of the public place;
 - (b) for the purpose of, or pending, the construction, extension, maintenance or demolition of any building, structure, works or service alongside, on, across, through, over or under the public place;
 - (c) if the public place is in a state that is dangerous to the public;
 - (d) by reason of an emergency or public event that requires special measures for the control of traffic or crowds; or
 - (e) for any other reason that renders the temporary closing of the public place necessary or desirable.
- (7) The Municipality must notify the Surveyor-General of an approval in terms of subsection (1) and the Surveyor-General must endorse the records of the Surveyor-General's office to reflect the closure of the public place.

Services arising from subdivision

- 27. Subsequent to the approval of an application for subdivision in terms of this By-law, the owner of any land unit originating from the subdivision must—
 - (a) allow that the following be conveyed across his or her land unit as may be reasonably required in respect of other land units originating from the subdivision:
 - (i) gas mains;
 - (ii) electricity cables;

- (iii) telephone cables;
 - (iv) television cables;
 - (v) other electronic infrastructure;
 - (vi) main and other water pipes;
 - (vii) foul sewers;
 - (viii) storm-water pipes; and
 - (ix) ditches and channels;
- (b) allow the following on his or her land unit if considered necessary and in the manner and position as may be reasonably required by the Municipality:
- (i) surface installations such as mini-substations;
 - (ii) meter kiosks; and
 - (iii) service pillars;
- (c) allow access to the land unit at any reasonable time for the purpose of constructing, altering, removing or inspecting any works referred to in paragraph (a) or (b); and
- (d) receive material or permit excavation on the land unit as may be required to allow use of the full width of an abutting street and to provide a safe and proper slope to its bank where necessitated by differences between the level of the street as finally constructed and the level of the land unit unless he or she elects to build retaining walls to the satisfaction of and within a period to be determined by the Municipality.

Certification by Municipality

- 28.** (1) A person may apply to the Registrar of Deeds to register the transfer of a land unit, a certificate of title or certificate of consolidated title, as the case may be, in any of the instances referred to in subsection (3)(a) to (b) only if the Municipality has issued a certificate in terms of this section.
- (2) The Registrar of Deeds may register the transfer of a land unit, a certificate of title or certificate of consolidated title, as the case may be, in any of the instances referred to in subsection (3)(a) to (b) only if the Municipality has issued a certificate in terms of this section.
- (3) The Municipality must issue a certificate to transfer a land unit contemplated in subsections (1) and (2) if the owner provides the Municipality with the following:
- (a) in the case of the first registration of the transfer of ownership of a land unit arising from a subdivision to any person other than the developer and where an owner's association is constituted, proof that—

- (i) all common property arising from the subdivision has been transferred to the owners' association by virtue of section 29(3)(e); or
 - (ii) all common property arising from the subdivision will be transferred to the owners' association simultaneously with the registration of the transfer of that land unit;
- (b) in the case of the first registration of the transfer of ownership or certificate of registered title of a land unit arising from a subdivision and that leads to the confirmation of the subdivision, proof that—
 - (i) land needed for public purposes or other municipal infrastructure as contemplated in terms of a condition imposed under section 66 has been transferred to the Municipality or will be transferred to the Municipality simultaneously with the registration of the transfer of that land unit or certificate of registered title;
 - (ii) the engineering services and amenities that must be provided in connection with the subdivision are available; and
 - (iii) a certificate contemplated in section 20(6) has been issued by the Municipality.

Owners' associations

- 29.** (1) The Municipality may, when approving an application for a subdivision of land, impose conditions relating to the compulsory establishment of an owners' association by the applicant for an area determined in the conditions.
- (2) An owners' association that comes into being by virtue of subsection (1) is a juristic person and must have a constitution.
- (3) The constitution of an owners' association must be approved by the Municipality before registration of the transfer of the first land unit and must make provision for—
- (a) the owners' association to formally represent the collective mutual interests of the area, suburb or neighbourhood set out in the constitution in accordance with the conditions of approval;
 - (b) control over and maintenance of buildings, services or amenities arising from the subdivision;
 - (c) the regulation of at least one annual meeting with its members;
 - (d) control over the design guidelines of the buildings and erven arising from the subdivision;
 - (e) the ownership by the owners' association of all common property arising from the subdivision, including—
 - (i) private open spaces;
 - (ii) private roads; and

- (iii) land required for services provided by the owners' association;
 - (f) enforcement of conditions of approval or management plans;
 - (g) procedures to obtain the consent of the members of the owners' association to transfer an erf in the event that the owners' association ceases to function; and
 - (h) the implementation and enforcement by the owners' association of the provisions of the constitution.
- (4) The constitution of an owners' association may have other objectives as set by the association but may not contain provisions that are in conflict with any law.
 - (5) The constitution of the owners' association takes effect upon the registration of the transfer of ownership of the first land unit to a person other than the developer.
 - (6) An owners' association may amend its constitution when necessary, but if an amendment affects the Municipality or a provision referred to in subsection (3), the amendment must also be approved by the Municipality.
 - (7) An owners' association that comes into being by virtue of subsection (1) —
 - (a) has as its members all the owners of the land units arising from the subdivision and their successors in title, who are jointly liable for expenditure incurred in connection with the association; and
 - (b) is upon registration of the transfer of ownership of the first land unit to a person other than the developer automatically established.
 - (8) The design guidelines contemplated in subsection (3)(d) may introduce more restrictive development rules than the rules provided for in the zoning scheme.

Owners' associations that cease to function

- 30. (1) If an owners' association ceases to function or carry out its obligations any affected person, including a member of the association, may apply—
 - (a) in terms of section 15(2)(p) to disestablish the owners' association subject to—
 - (i) the amendment of the conditions of approval to remove the obligation to establish an owners' association; and
 - (ii) the amendment of title conditions pertaining to the owners' association, to remove any obligation in respect of an owners' association;
 - (b) in terms of section 15(2)(q) for appropriate action by the Municipality to rectify a failure of the owners' association to meet any of its obligations in respect of the control over or maintenance of services contemplated in subsection 29(3)(b); or

- (c) to the High Court to appoint an administrator who must exercise the powers of the owners' association to the exclusion of the owners' association.
- (2) In considering an application contemplated in subsection (1)(a), the Municipality must have regard to—
 - (a) the purpose of the owners' association;
 - (b) who will take over the control over and maintenance of services for which the owners' association is responsible; and
 - (c) the impact of the disestablishment of the owners' association on the members of the owners' association and the community concerned.
- (3) The Municipality or the affected person may recover from the members of the owners' association the amount of any expenditure incurred by the Municipality or that affected person, as the case may be, in respect of any action taken in terms of subsection (1).
- (4) The amount of any expenditure so recovered is, for the purposes of section 29(7)(a), considered to be expenditure incurred in connection with the owners' association.

Consolidation of land units

- 31.** (1) No person may consolidate land without the approval of the Municipality in terms of section 15(2) unless the consolidation is exempted in terms of section 24.
- (2) If the Municipality approves a consolidation, the applicant must submit a diagram to the Surveyor-General for approval, including proof to the satisfaction of the Surveyor-General of—
- (a) the Municipality's decision to approve the consolidation;
 - (b) the conditions of approval imposed in terms of section 66; and
 - (c) the approved consolidation plan.
- (3) If the Municipality approves a consolidation, the Municipality must amend the zoning map and, where applicable, the register, accordingly.

Lapsing of consolidation

- 32.** (1) An approved consolidation of land units lapses if the consolidation is not registered in terms of the Deeds Registries Act within the applicable period from the date that the approval comes into operation.
- (2) If an approval of a consolidation lapses in terms of subsection (1)—
- (a) the Municipality must—
 - (i) amend the zoning map, and where applicable the register, accordingly; and
 - (ii) notify the Surveyor-General accordingly; and

- (b) the Surveyor-General must endorse the records of the Surveyor-General's office to reflect the notification that the consolidation has lapsed.

Removal, suspension or amendment of restrictive conditions

- 33.** (1) The Municipality may—
- (a) remove or amend a restrictive condition permanently;
 - (b) suspend a restrictive condition permanently for the extent of the development specified in the approval;
 - (c) suspend or amend a restrictive condition for a period specified in the approval; or
 - (d) remove, suspend or amend a restrictive condition as contemplated in paragraph (a) or (b) subject to conditions of approval.
- (2) When an owner applies for a removal, suspension or amendment of restrictive conditions, the owner must in addition to the procedures set out in Chapter IV submit a copy of the relevant title deed to the Municipality.
- (3) The Municipality must cause a notice of an application in terms of section 15(2)(f) to be served on—
- (a) all organs of state that may have an interest in the restrictive condition;
 - (b) a person whose rights or legitimate expectations will be materially and adversely affected by the approval of the application; and
 - (c) all persons mentioned in the title deed for whose benefit the restrictive condition applies.
- (4) When the Municipality considers the removal, suspension or amendment of a restrictive condition, the Municipality must have regard to the following:
- (a) the financial or other value of the rights in terms of the restrictive condition enjoyed by a person or entity, irrespective of whether these rights are personal or vest in the person as the owner of a dominant tenement;
 - (b) the personal benefits which accrue to the holder of rights in terms of the restrictive condition;
 - (c) the personal benefits which will accrue to the person seeking the removal, suspension or amendment of the restrictive condition if it is amended, suspended or removed;
 - (d) the social benefit of the restrictive condition remaining in place in its existing form;

- (e) the social benefit of the removal, suspension or amendment of the restrictive condition; and
 - (f) whether the removal, suspension or amendment of the restrictive condition will completely remove all rights enjoyed by the beneficiary or only some of those rights.
- (5) An approval to remove, suspend or amend a restrictive condition comes into operation—
 - (a) if no appeal has been lodged, after the expiry of the period contemplated in section 79(2) within which an appeal must be lodged; or
 - (b) if an appeal has been lodged, when the Appeal Authority has decided on the appeal.
- (6) The Municipality must cause a notice of the decision to remove, suspend or amend a restrictive condition to be published in the *Provincial Gazette* after the decision comes into operation as contemplated in subsection (5) and notify the Registrar of Deeds of the decision.
- (7) If an owner intends to apply in terms of section 15(2) for land development that is contrary to a restrictive condition applicable to the land concerned, the owner must when the application for land development is submitted simultaneously apply for the removal, suspension or amendment of the restrictive condition.
- (8) The Municipality must consider the land development application and the application for the removal, suspension or amendment of the restrictive condition contemplated in subsection (7) together and make an integrated decision.
- (9) Where a condition of title, a condition of establishment of a township or an existing scheme provides for a purpose with the consent or approval of the Municipality, such consent must be requested and may be granted by the municipality in terms of the provisions as provided for in the subject title deed.

Endorsements in connection with removal, suspension or amendment of restrictive conditions

- 34. (1) An applicant at whose instance a restrictive condition is removed, suspended or amended must, after the publication of a notice contemplated in section 33(6) in the *Provincial Gazette*, apply to the Registrar of Deeds to make the appropriate entries in, and endorsements on, any relevant register or title deed to reflect the removal, suspension or amendment of the restrictive condition.
- (2) The Registrar of Deeds may require proof of the removal, suspension or amendment of a restrictive condition from the applicant, including the submission of the following to the Registrar of Deeds:
 - (a) a copy of the approval;
 - (b) the original title deed; and

- (c) a copy of the notice contemplated in section 33(6) as published in the *Provincial Gazette*.

CHAPTER IV

APPLICATION PROCEDURES

Manner and date of notification

- 35. (1)** Any serving of a notice or notification or acknowledgement given in terms of this By-law must be in writing and may be issued to a person—
- (a) by delivering it by hand to the person;
 - (b) by sending it by registered mail—
 - (i) to that person's business or residential address and municipal billing address, where the billing address differs from the business or residential address; or
 - (ii) in the case of a juristic person, to its registered address or principal place of business and municipal billing address, where the billing address differs from the business or residential address;
 - (c) by means of data messages contemplated in the Electronic Communications and Transactions Act, 2002 (Act 25 of 2002), by sending a copy of the notice to the person, if the person has an email address or other electronic address; or
 - (d) where an address is unknown despite reasonable enquiry, by publishing it once in the *Provincial Gazette* and once in a local newspaper circulating in the area of that person's last known residential or business address.
- (2)** The date of notification in respect of a notice served or given to a person in terms of this By-law—
- (a) if it was served by certified or registered post, is the date of registration of the notice;
 - (b) if it was delivered to that person personally, is the date of delivery to that person;
 - (c) if it was left at that person's place of residence, work or business in the Republic with a person apparently over the age of sixteen years, is the date on which it was left with that person;
 - (d) if it was displayed in a conspicuous place on the property or premises to which it pertains, is the date that it is posted on that place; or
 - (e) it was e-mailed or sent to an electronic address, is the date that it was received by that person as contemplated in the Electronic Communications and Transactions Act, 2002.

- (3) The Municipality may determine specific methods of service and notification in respect of applications and appeals, including—
 - (a) information specifications relating to matters such as size, scale, colour, hard copy, number of copies, electronic format and file format;
 - (b) the manner of submission to and communication with the Municipality;
 - (c) the method by which a person may be notified;
 - (d) other information requirements; and
 - (e) other procedural requirements.

Procedures for applications

- 36. (1) An applicant must comply with the procedures in this Chapter and, where applicable, the specific procedures provided for in Chapter III of this By-law.
- (2) An applicant may apply simultaneously for different types of applications for land development in terms of section 15(2).

Pre-application consultation

- 37. (1) The Municipality may require an owner who intends to submit an application or his or her agent to make a pre-application scrutiny submission and/ or to meet with the authorised employee and, where applicable, with employees of other relevant organs of state for a pre-application consultation before he or she submits an application to the Municipality in order to determine the information and documents that must be submitted with the application.
- (2) The Municipality may issue guidelines regarding—
 - (a) applications that require a pre-application scrutiny submission or consultation;
 - (b) the nature of the information and documents that must be submitted with an application;
 - (c) the attendance of employees from the Municipality or other organs of state at a pre-application consultation;
 - (d) the procedures at a pre-application consultation.
- (3) The Municipality must provide and keep a record of the feedback on a pre-application scrutiny submission and must keep minutes of the proceedings of a pre-application consultation.

Information required

- 38. (1) Subject to subsection (2), an application must be accompanied by the following information and documents where applicable:

- (a) an application form provided by the Municipality, completed and signed by the applicant;
- (b) if the applicant is an agent, a power of attorney authorising the applicant to make the application on behalf of the owner;
- (c) if the owner of the land is a company, closed corporation, trust, body corporate or owners' association, proof that the person is authorised to make the application on behalf of the company, closed corporation, trust, body corporate or owners' association;
- (d) proof of registered ownership or any other relevant right held in the land concerned;
- (e) a written motivation for the application based on the applicable criteria referred to in section 65, excluding sections 65(a), (b), (d), (e) and (g);
- (f) a copy of the Surveyor-General's diagram of the property concerned or, if it does not exist, an extract from the relevant general plan;
- (g) a locality plan and site development plan, if required, or a plan showing the proposed land development in its cadastral context;
- (h) in the case of an application for the subdivision of land, copies of the subdivision plan showing the following:
 - (i) the location of the proposed land units;
 - (ii) the proposed zonings in respect of the proposed land units;
 - (iii) all existing structures on the property and abutting properties;
 - (iv) the proposed public places and the land needed for public purposes;
 - (v) the existing access points;
 - (vi) all servitudes;
 - (vii) contours with at least a one-meter interval or such other interval as may be approved by the Municipality;
 - (viii) the street furniture;
 - (ix) the lamp, electricity and telephone posts;
 - (x) the electricity transformers and mini-substations;
 - (xi) the storm-water channels and catchpits;
 - (xii) the sewerage lines and connection points;
 - (xiii) any significant natural features; and
 - (xiv) all distances and areas to scale;
- (i) proof of an agreement or permission if the proposed land development requires a servitude over land or access to a provincial or national road;

- (j) any other documents or information that the Municipality may require;
 - (k) proof of payment of application fees;
 - (l) a copy of the title deed of the land concerned;
 - (m) a conveyancer's certificate indicating that the application is not restricted by any condition contained in the title deed pertaining to the land concerned or a copy of all historical title deeds; and
 - (n) where applicable, the record of feedback on a pre-application scrutiny submission and/ or the minutes of a pre-application consultation in respect of the application.
- (2) The Municipality may by means of the feedback on a pre-application scrutiny or at a pre-application consultation add or remove any information or documents contemplated in subsection (1) for a particular application.
 - (3) The Municipality may issue guidelines regarding the submission of information, documents or procedural requirements.

Application fees

- 39. (1) An applicant must pay the application fees determined by the Municipality before submitting an application in terms of this By-law.
- (2) Application fees paid to the Municipality are non-refundable and proof of payment of the application fees must accompany an application.

Grounds for refusing to accept application

- 40. The Municipality may in terms of section 41(3) refuse to accept an application if—
 - (a) there is no proof of payment of the applicable fees; or
 - (b) the application is not in the form or does not contain the information or documents referred to in section 38.

Receipt of application and commencement of application process

- 41. (1) The Municipality must—
 - (a) record receipt of an application, in writing or by affixing a stamp on the application, on the day of receipt;
 - (b) verify whether the application complies with section 38; and
 - (c) notify the applicant in writing within 14 days of receipt of the application—
 - (i) that the application is complete and complies with section 38 and that the application process commences; or

- (ii) of any information, documents or fees referred to in section 38 that are outstanding and that the applicant must provide to the Municipality within 14 days of the date of notification.
- (2) The Municipality must within 14 days of receipt of the outstanding information, documents or fees referred to in subsection (1)(c)(ii) notify the applicant in writing that the application is complete and that the application process commences.
- (3) The Municipality may refuse to consider the application if the applicant fails to provide the information or documents or pay the fees within the period contemplated in subsection (1)(c)(ii).
- (4) The Municipality must notify the applicant in writing of a refusal to consider an application under subsection (3) and must close the application.
- (5) An applicant has no right of appeal to the Appeal Authority in respect of a decision contemplated in subsection (3) to refuse to consider an application.
- (6) If an applicant wishes to continue with an application that the Municipality refused to consider under subsection (3), the applicant must apply again and pay the applicable application fees.
- (7) The Municipality must cause notice of the application to be given within 21 days from the date on which the application process commences as contemplated in subsection (1)(c)(i) or (2).

Provision of additional information or documents

- 42. (1) The Municipality must, within 30 days of receipt of an application that complies with section 38, notify the applicant in writing of any information or documents it requires in addition to the requirements contemplated in section 38.
- (2) The applicant must provide the Municipality with the additional information or documents contemplated in subsection (1) within 30 days of the date of notification or within the further period agreed to between the applicant and the Municipality.
- (3) If the applicant fails to provide the additional information or documents within the period contemplated in subsection (2), the Municipality must consider the application without the information or documents and notify the applicant accordingly.
- (4) The Municipality must, within 21 days of receipt of the additional information or documents, if the applicant provided all the required information or documents, acknowledge receipt thereof and notify the applicant in writing that the application process proceeds or that further information, documents or fees are required as a result of the information or documents received.

- (5) If the Municipality notified the applicant that further information or documents are required as contemplated in subsection (4), subsections (2) and (3) apply to the further submission of information or documents.

Withdrawal of application or power of attorney

- 43. (1) An applicant may, at any time before the Municipality makes a decision on an application submitted by the applicant, withdraw the application by giving written notice of the withdrawal to the Municipality.
- (2) The owner must in writing inform the Municipality if he or she has withdrawn the power of attorney given to his or her former agent and confirm whether he or she will personally proceed with the application.

Public notice in accordance with other laws and integrated procedures

- 44. (1) The Municipality may, on written request and motivation by an applicant, before notice is given of an application in terms of section 45 or 46, determine that—
 - (a) a public notice procedure carried out in terms of another law in respect of the application constitutes public notice for the purpose of an application made in terms of this By-law; or
 - (b) public notice of the application given in terms of this By-law may be published in accordance with the requirements for public notice applicable to a related application in terms of another law.
- (2) If the Municipality determines that an application may be published as contemplated in subsection (1)(b), an agreement must be entered into between the Municipality and the relevant organs of state to facilitate the simultaneous publication of notices.

Publication of notices

- 45 (1) When the Municipality intends to consider an application in terms of this By-law, the decision relating to which will likely materially and adversely affect the rights of the public, it must subject to section 44—
 - (a) take appropriate steps to communicate the application to those likely to be materially and adversely affected by it and call for comments from them;
 - (b) consider any comments received; and
 - (c) decide whether or not to approve the application, with or without changes.
- (2) (a) Information concerning the application must be published by way of notice if the application—
 - (i) affects the rights of the public throughout the Republic, in the Government Gazette and a newspaper which is distributed, or in newspapers which collectively are distributed, throughout the Republic;

- (ii) affects the rights of the public in the Province only, in the Provincial Gazette and a newspaper which is distributed, or in newspapers which collectively are distributed, throughout the Province; or
 - (iii) affects the rights of the public in a specific area only, in a newspaper which is distributed in that specific area.
- (b) A notice published in terms of paragraph (a) must be in at least two of the official languages of the Province.
- (c) A notice published in terms of paragraph (a)(iii) must take account of the Municipality's language policy .
- (3) A notice published in terms of subsection (2) must—
 - (a) include sufficient information about the application to enable members of the public to submit meaningful comments, including, at least—
 - (i) information on the nature and purpose of the application; and
 - (ii) a description of the land unit or land units to which the application relates;
 - (b) specify a place or places where, and the hours within which, further information concerning the application will be available for public scrutiny;
 - (c) include an invitation to members of the public to submit written comments in connection with the application to the Municipality on or before a date specified in the notice, which date may not be earlier than 30 days from the date of publication of the notice;
 - (d) include a caution that comments received after the closing date may be disregarded;
 - (e) indicate the name and official title of the person to whom any comments must be sent or delivered, and that person's—
 - (i) work, postal, street and email address;
 - (ii) work telephone number; and
 - (iii) fax number, if any; and
 - (f) specify that the applicant and any person who commented on the application, will be notified of the decision on the application, and that the decision will be published on the Municipality's website, as contemplated in section 61(1).
- (4) A notice published in terms of subsection (2)(a)(i) and (ii) in a newspaper may, notwithstanding subsection (3), only contain—
 - (a) a concise statement of the application;

- (b) the name, official title, contact telephone number, email address and physical address of the person from whom further information on the application and the administrative procedure can be obtained; and
 - (c) a note that a more detailed notice concerning the application appears in the Government Gazette or Provincial Gazette, as the case may be.
- (5) Access to further information as contemplated in subsection (3)(b) will be allowed from the date on which the notice is published until the closing date for comment, during normal office hours.
- (6)
 - (a) In order to ensure that the application is brought to the attention of the public, the Municipality may, in addition, publicise the information referred to in subsections (3) or (4) by way of communications through the printed or electronic media, including by way of press releases, press conferences, the internet, radio or television broadcasts, posters, leaflets, announcements through a loudhailer, publications on community notice boards, emails or social media.
 - (b)
 - (i) The municipality may cause a notice to be displayed on the land concerned.
 - (ii) A notice contemplated in subparagraph (i) must comply with subsection (3) and must remain legible for the notice period.
- (7)
 - (a) If the application materially and adversely affect the rights of members of a specific community consisting of a significant proportion of people who cannot read or write or who otherwise need special assistance—
 - (i) an additional notice must be publicised in the area of that community in a manner that will bring the application to the attention of the community at large; and
 - (ii) the Municipality must take special steps to solicit the views of members of the community.
 - (b) Special steps in terms of paragraph (a)(ii) may include—
 - (i) the holding of public or group meetings where the application is explained, questions are answered and views from the audience are minuted;
 - (ii) a survey of public opinion in the community on the application; or
 - (iii) provision of a secretarial facility in the community where members of the community can state their views on the application.
- (8)
 - (a) The Municipality may extend the closing date for comment contemplated in subsection (3)(c).
 - (b) Any extension of the closing date of more than one month must be published by way of a notice as prescribed in subsection (2), and when appropriate, as prescribed, in subsection (6).

- (9) (a) The Municipality—
 - (i) may refuse to accept comments received after the closing date for comment; or
 - (ii) may, but is not obligated to, grant requests for condonation of late submission of comments.
- (b) A request for condonation may be granted on good cause shown by the person who submitted the comments if that condonation would not—
 - (i) lead to unnecessary delays; or
 - (ii) otherwise prejudice the public interest.
- (10) (a) If it is reasonable and justifiable in the circumstances, the municipality may depart from the provisions of this section.
- (b) In determining whether a departure as contemplated in paragraph (a) is reasonable and justifiable, the Municipality must take into account all relevant factors, including—
 - (i) the objects of this By-law, and any other applicable law regulating land use planning;
 - (ii) the nature and purpose of, and the need for, the approval of the application;
 - (iii) the likely effect of the approval of the application;
 - (iv) the urgency of approving the application or the urgency of the matter; and
 - (v) the need to promote an efficient administration and good governance.
- (11) The publication of a notice contemplated in subsection (2) does not release a Municipality from the obligation to cause a notice to be served in the instances contemplated in section 46(1).
- (12) The Municipality may require the applicant to attend to the publication as contemplated in subsection (2) of the public notice of an application.
- (13) An applicant who publishes a notice in terms of this section must within the period determined by the Municipality of publication of the notice provide the Municipality with proof, as determined by the Municipality, that the notice was published in accordance with this section.

Serving of notices

- 46. (1)** When the Municipality intends to consider an application in terms of this By-law, the decision relating to which will likely materially and adversely affect the rights or legitimate expectations of any person, it must—
 - (a) cause a notice regarding the application to be served on that person and call for comments from that person;

- (b) consider any comments received; and
 - (c) decide whether or not to approve the application, with or without changes.
- (2) The notice contemplated in subsection (1)(a) must—
 - (a) include sufficient information about the application to enable the person to submit meaningful comments, including, at least—
 - (i) information on the nature and purpose of the application; and
 - (ii) a description of the land unit or land units to which the application relates;
 - (b) specify a place or places where, and the hours within which, further information concerning the application will be available for inspection;
 - (c) include an invitation to the person to submit written comments in connection with the application to the Municipality on or before a date specified in the notice, which date may not be earlier than 30 days from the date of the serving of the notice;
 - (d) include a caution that comments received after the closing date may be disregarded;
 - (e) specify the name and official title of the person to whom any comments must be sent or delivered, and that person's—
 - (i) work, postal, street and email address;
 - (ii) work telephone number; and
 - (iii) fax number, if any; and
 - (f) specify that the applicant and any person who commented on the application, will be notified of the decision on the application, and that the decision will be published on the Municipality's website, as contemplated in section 61(1).
- (3) Access to further information as contemplated in subsection (2)(b) will be allowed from the date on which the notice is served until the closing date for comment, during normal office hours.
- (4) The Municipality may, in its discretion, also give a person referred to in subsection (1) an opportunity to—
 - (a) obtain assistance and, in serious or complex cases, legal representation;

- (b) present and dispute information and arguments; and
 - (c) appear in person.
- (5) (a) If the application materially and adversely affect the rights or legitimate expectations of a person who cannot read or write or who otherwise needs special assistance—
 - (i) the notice must include information set out in a manner that will bring the application to the attention of that person; and
 - (ii) the Municipality must take special steps to solicit the views of that person.
- (b) Special steps in terms of paragraph (a)(ii) may include—
 - (i) the holding of meeting where the application is explained, questions are answered and views from that person are minuted; or
 - (ii) the provision of a secretarial facility to assist that person to state that person's views on the application.
- (6) (a) The Municipality may extend the closing date for comment contemplated in subsection (2)(c).
- (b) The Municipality must inform every person whose rights or legitimate expectations may be materially and adversely affected by the application, of any extension of the closing date of more than one month by serving another notice as prescribed in subsection (1)(a).
- (7) (a) The Municipality—
 - (i) may refuse to accept comments received after the closing date for comment; or
 - (ii) may, but is not obligated to, grant requests for condonation of late submission of comments.
- (b) A request for condonation may be granted on good cause shown by the person who submitted the comments if that condonation would not—
 - (i) lead to unnecessary delays; or
 - (ii) otherwise prejudice the public interest.

- (8) (a) If it is reasonable and justifiable in the circumstances, the Municipality may depart from the provisions of this section.
- (b) In determining whether a departure as contemplated in paragraph (a) is reasonable and justifiable, the municipality must take into account all relevant factors, including—
 - (i) the objects of this By-law, and any other applicable law regulating land use planning;
 - (ii) the nature and purpose of, and the need for, the approval of the application;
 - (iii) the likely effect of the approval of the application;
 - (iv) the urgency of approving the application or the urgency of the matter; and
 - (v) the need to promote an efficient administration and good governance.
- (9) The Municipality may require the applicant to attend to the serving of a notice as contemplated in subsection (2).
- (10) An applicant who serves a notice in terms of this section must within the period determined by the Municipality from the service of that notice provide the Municipality with proof, as determined by the Municipality, of the service of the notice in accordance with subsection (2).
- (11) The Municipality may require the applicant to make the application available for inspection by members of the public at a public place determined by the Municipality.

Additional contents of notice

- 47.** When notice of an application is published or served in terms of this By-law, the notice must in addition to sections 45 and 46 also—
 - (a) provide the name and contact details of the applicant and the owner;
 - (b) identify the land or land unit to which the application relates by giving the property description and the physical address; and
 - (c) state the intent and purpose of the application.

Other methods of public notice

- 48. (1)** The Municipality may cause public notice to be given by one or more of the methods referred to in subsection (2)—

- (a) to ensure additional public notice of applications listed in section 45(1) if the Municipality considers notice in accordance with section 45 or 46 to be ineffective or expects that the notice would be ineffective; or
 - (b) to give public notice of any other application in terms of this By-law.
- (2) Public notice contemplated in subsection (1) may be given by—
 - (a) displaying a notice contemplated in section 45 and 47 of a size of at least 60 centimetres by 42 centimetres on the frontage of the erf concerned or at any other conspicuous and easily accessible place on the erf, provided that—
 - (i) the notice is displayed for a minimum of 30 days during any period that the public may comment on the application; and
 - (ii) the applicant, within 30 days from the last day of display of the notice, submits to the Municipality—
 - (aa) a sworn affidavit confirming the maintenance of the notice for the prescribed period; and
 - (bb) at least two photos of the notice, one from close up and one from across the street;
 - (b) convening a meeting for the purpose of informing affected members of the public of the application;
 - (c) broadcasting information regarding the application on a local radio station in a specified language;
 - (d) holding an open day or public meeting to notify and inform affected members of the public of the application;
 - (e) publishing the application on the Municipality's website for the duration of the period within which the public may comment on the application; or
 - (f) obtaining letters of consent or objection to the application, provided that the letters are accompanied by acceptable evidence that the person signing the letter has been provided with correct and adequate information about the application.
- (3) Additional public notice can be given simultaneously with notice given in accordance with sections 45 or 46 or thereafter.
- (4) The Municipality may require the applicant to attend to the publication of a notice as contemplated in subsection (2).
- (5) An applicant who gives notice in terms of this section must within the period determined by the Municipality of giving notice provide the Municipality with

proof, as determined by the Municipality that notice has been given in accordance with subsection (2).

Requirements for petitions

- 49.** (1) Comments in respect of an application submitted by the public in the form of a petition must clearly state—
- (a) the contact details of the authorised representative of the signatories of the petition;
 - (b) the full name and physical address of each signatory; and
 - (c) the comments and reasons therefor.
- (2) Notice to the person contemplated in subsection (1)(a) constitutes notice to all the signatories to the petition.

Requirements for submission of comments

- 50.** (1) A person may respond to a notice contemplated in section 44, 45, 46 or 48 by commenting in writing in accordance with this section.
- (2) Any comment made as a result of a notice process must be in writing and addressed to the person mentioned in the notice and must be submitted within the period stated in the notice and in the manner set out in this section.
- (3) The comments must state the following:
- (a) the name of the person concerned;
 - (b) the address or contact details at which the person or body concerned will receive notice or service of documents;
 - (c) the interest of the person in the application; and
 - (d) the reason for the comments.
- (4) The reasons for any comment must be set out in sufficient detail in order to—
- (a) indicate the facts and circumstances that explain the comments;
 - (b) where relevant demonstrate the undesirable effect the application will have if approved;
 - (c) where relevant demonstrate any aspect of the application that is not considered consistent with applicable policy; and
 - (d) enable the applicant to respond to the comments.

- (5) The Municipality may refuse to accept comments submitted after the closing date.

Intergovernmental participation process

- 51. (1) Subject to section 45 of the Land Use Planning Act and section 44 of this By-law, the Municipality must, simultaneously with the notification to the applicant that an application is complete as contemplated in section 41(1)(c)(i) or (2) cause notice of the application together with a copy of the application to be given to every municipal department and organ of state that has an interest in the application and request their comment on the application.
- (2) An organ of state must comment on a land use application within 30 days of—
 - (a) the date of notification of a request for comment on the application; or
 - (b) receiving all the information necessary to comment if the application is not complete and a request for additional information is made within 14 days of the date of notification of the request for comment.
- (3) If an organ of state fails to comment within the period referred to in subsection (2), the Municipality may notify the organ of state's accounting officer or accounting authority contemplated in the Public Finance Management Act, 1999 (Act 1 of 1999), of the failure.

Amendments before approval

- 52. (1) An applicant may amend his or her application at any time before the approval of the application—
 - (a) at the applicant's own initiative;
 - (b) as a result of a comment submitted during the notice process; or
 - (c) at the request of the Municipality.
- (2) If an amendment to an application is material, the Municipality must give notice of the amendment of an application to all municipal departments and other organs of state and service providers who commented on the application and request them to submit comments on the amended application within 21 days of the date of notification.
- (3) If an amendment to an application is material, the Municipality may require that further notice of the application be published or served in terms of section 44, 45, 46 or 48.

Further public notice

- 53.** (1) The Municipality may require that notice of an application be given again if more than 18 months have elapsed since the first public notice of the application and if the Municipality has not considered the application.
- (2) The Municipality may, at any stage during the processing of the application if new information comes to its attention that is material to the consideration of the application, require—
- (a) notice of an application to be given or served again in terms of section 44, 45, 46 or 48; and
 - (b) an application to be re-sent to municipal departments and, where applicable, other organs of state or service providers for comment.

Liability for cost of notice

- 54.** The applicant is liable for the costs of publishing and serving of all notices of an application in terms of this By-law.

Right of applicant to reply

- 55.** (1) Copies of all comments and other information submitted to the Municipality must be given to the applicant within 14 days after the closing date for public comment together with a notice informing the applicant of his or her rights in terms of this section.
- (2) The applicant may, within 30 days from the date on which he or she received the comments, submit a written reply thereto to the Municipality.
- (3) The applicant may, before the expiry of the period of 30 days referred to in subsection (2), apply to the Municipality for an extension of the period to submit a written reply, to an additional period not exceeding 14 days.
- (4) If the applicant does not submit a reply within the period of 30 days or within an additional period contemplated in subsection (3), if granted, the applicant is considered to have no comment.
- (5) The Municipality may in writing request additional information or documents from the applicant as a result of the comments received, and the applicant must supply the information or documents within 30 days of notification of the written request or the further period as may be agreed upon between the applicant and the Municipality.
- (6) If the applicant fails to provide the additional information or documents within the period contemplated in subsection (5), the Municipality may consider the application without the information or documents and notify the applicant accordingly.

Written assessment of application

56. (1) An authorised employee must in writing in accordance with section 65 assess an application and make a recommendation to the decision-maker regarding the approval or refusal of the application.
- (2) An assessment of an application must include a motivation for the recommendation and, where applicable, the proposed conditions of approval.

Decision-making period

57. (1) When an authorised employee makes a decision in respect of an application as contemplated in section 69(1) and no integrated process in terms of another law is being followed, the authorised employee must decide on the application within 60 days, reckoned from—
- (a) the last day for the submission of comments as contemplated in section 50(2) if no comments were submitted;
 - (b) the last day for the submission of the applicant's reply to comments submitted as contemplated in section 55(2) or (3); or
 - (c) the last day for the submission of additional information as contemplated in section 55(5).
- (2) If no integrated process in terms of another law is being followed and the Tribunal must decide on an application as contemplated in section 69(2), the Tribunal must decide on the application within 120 days, reckoned from the applicable date contemplated in subsection (1)(a), (b) or (c).
- (3) The authorised employee or Tribunal, as the case may be, may extend the period contemplated in subsection (1) or (2) in exceptional circumstances, including the following:
- (a) if an interested person has submitted a petition for intervener status; and
 - (b) in the case of the Tribunal, if an oral hearing is to be held.

Failure to act within period

58. Subject to section 41(5), an applicant may lodge an appeal with the Appeal Authority if the authorised employee or the Tribunal fails to decide on an application within the period referred to in section 57(1) or (2).

Powers to conduct routine inspections

59. (1) An authorised employee or member of the Tribunal may, in accordance with the requirements of this section, enter land or a building to conduct an inspection for the purpose of obtaining information to assess an application

in terms of this By-law and to prepare a written assessment contemplated in section 56.

- (2) When conducting an inspection, the authorised employee or member of the Tribunal may—
 - (a) request that any record, document or item that is relevant to the purpose of the investigation be produced to assist in the inspection;
 - (b) make copies of or take extracts from any document produced by virtue of paragraph (a) that is related to the inspection;
 - (c) on providing a receipt, remove a record, document or other item that is related to the inspection; and
 - (d) inspect any building or structure and make enquiries regarding that building or structure.
- (3) No person may interfere with a person referred to in subsection (1) who is conducting an inspection as contemplated in subsection (1).
- (4) The authorised employee or member of the Tribunal must, on request, produce identification showing that he or she is authorised to conduct the inspection.
- (5) An inspection under subsection (1) must take place at a reasonable time after reasonable notice has been given to the owner, occupier or person in lawful control of the land or building and with the written consent of the owner, occupier or person in lawful control of the land or building.

Decisions on applications

- 60.** An employee authorised by virtue of section 69(1), or the Tribunal by virtue of section 69(2), or the Municipality by virtue of section 68(c) as the case may be, may in respect of an application contemplated in section 15(2)—
 - (a) approve, in whole or in part, or refuse that application;
 - (b) upon the approval of that application, impose conditions in terms of section 66;
 - (c) conduct any necessary inspection to assess an application in terms of section 59;
 - (d) in the case of the Tribunal, appoint a technical adviser to advise or assist in the performance of the Tribunal's functions in terms of this By-law.

Notification and coming into operation of decision

- 61. (1)** The Municipality must, within 21 days of its decision—

- (a) in writing notify the applicant and any person who commented on the application, of the decision and reasons for the decision, and inform such persons of any right of appeal, where applicable; and
 - (b) publish the decision on its website for a period of at least 90 days, and, in such publication, notify members of the public whose rights are materially and adversely affected by the decision, of the decision and reasons for the decision and the right of appeal.
- (2) A notice contemplated in subsection (1) must also where applicable—
- (a) stipulate the period, if any, in which the appeal proceedings must be instituted;
 - (b) state the name and address of the person with whom proceedings for appeal must be instituted;
 - (c) set out any other formal requirements in respect of the proceedings for appeal; and
 - (d) inform the applicant when an approval comes into operation.
- (3) If the owner has appointed an agent, the owner must take steps to ensure that the agent notifies him or her of the decision of the Municipality.
- (4) An approval comes into operation only after the expiry of the period contemplated in section 79(2) within which an appeal must be lodged if no appeal has been lodged.
- (5) Subject to subsection (6), the operation of the approval of an application that is the subject of an appeal is suspended pending the decision of the Appeal Authority on the appeal.
- (6) If an appeal is lodged only against conditions imposed in terms of section 66, the Tribunal or the authorised employee who imposed the conditions may determine that the approval of the application is not suspended.

Duties of agent

- 62.** (1) An agent must ensure that he or she has the contact details of the owner on whose behalf he or she is authorised to act.
- (2) An agent may not provide information or make a statement in support of an application which information or statement he or she knows or believes to be misleading, false or inaccurate.

Errors and omissions

- 63.** (1) The Municipality may at any time correct an error in the wording of its decision if the correction does not change the decision or result in an alteration, insertion, suspension or deletion of a condition of approval.

- (2) The Municipality may, on its own initiative or on application by the applicant or interested party, upon good cause shown, condone an error in a procedure, if the condonation does not have a material adverse effect on, or unreasonably prejudice, any party.

Exemptions to facilitate expedited procedures

- 64.** (1) The Municipality may in writing and subject to section 60 of the Land Use Planning Act—
 - (a) exempt a development from compliance with a provision of this By-law to reduce the financial or administrative burden of—
 - (i) integrated application processes contemplated in section 44;
 - (ii) the provision of housing with the assistance of a state subsidy; or
 - (iii) incremental upgrading of existing settlements;
 - (b) in an emergency situation authorise that a development may depart from any of the provisions of this By-law.
- (2) If the Provincial Minister grants an exemption or authorisation to deviate from a provision of the Land Use Planning Act to the Municipality in terms of section 60 of the Land Use Planning Act, the Municipality is exempted from or authorised to deviate from any provision in this By-law that corresponds to the provision of the Land Use Planning Act in respect of which an exemption was granted or deviation was authorised.

CHAPTER V

CRITERIA FOR DECISION-MAKING

General criteria for consideration of applications

- 65.** When the Municipality considers an application, it must have regard to the following:
 - (a) the application submitted in terms of this By-law;
 - (b) the procedure followed in processing the application;
 - (c) the desirability of the proposed utilisation of land and any guidelines issued by the Provincial Minister regarding the desirability of proposed land uses and which relevant desirability considerations for the assessment of the proposed use or development of land includes the -
 - (i) socio-economic impact;
 - (ii) compatibility with surrounding uses;
 - (iii) impact on the external engineering services;
 - (iv) impact on safety, health and wellbeing of the surrounding community;

- (v) impact on heritage;
 - (vi) impact on the biophysical environment;
 - (vii) traffic impacts, parking, access and other transport related considerations; and
 - (viii) whether the imposition of conditions can mitigate an adverse impact of the proposed use or development of land.
- (d) the comments in response to the notice of the application, including comments received from organs of state, municipal departments and the Provincial Minister in terms of section 45 of the Land Use Planning Act;
 - (e) the response by the applicant, if any, to the comments referred to in paragraph (d);
 - (f) investigations carried out in terms of other laws that are relevant to the consideration of the application;
 - (g) a written assessment by a registered planner appointed by the Municipality in respect of an application for—
 - (i) a rezoning;
 - (ii) a subdivision of more than 20 cadastral units;
 - (iii) a removal, suspension or amendment of a restrictive condition if it relates to a change of land use;
 - (iv) an amendment, deletion or imposition of additional conditions in respect of an existing use right;
 - (v) an approval of an overlay zone contemplated in the zoning scheme;
 - (vi) a phasing, amendment or cancellation of a subdivision plan or part thereof;
 - (vii) a closure of a public place or part thereof;
 - (h) the impact of the proposed land development on municipal engineering services;
 - (i) the integrated development plan, including the municipal spatial development framework;
 - (j) the integrated development plan of the district municipality, including its spatial development framework, where applicable;
 - (k) the applicable local spatial development frameworks adopted by the Municipality;
 - (l) the applicable structure plans;
 - (m) the applicable policies of the Municipality that guide decision-making;

- (n) the provincial spatial development framework;
- (o) where applicable, a regional spatial development framework contemplated in section 18 of the Spatial Planning and Land Use Management Act and provincial regional spatial development framework;
- (p) the policies, principles and the planning and development norms and criteria set by the national and provincial government;
- (q) the matters referred to in section 42 of the Spatial Planning and Land Use Management Act;
- (r) the principles referred to in Chapter VI of the Land Use Planning Act;
- (s) the applicable provisions of the zoning scheme; and
- (t) any restrictive condition applicable to the land concerned.
- (u) the impact of the proposed land development on any heritage resources as defined in the National Heritage Resources Act, 1999 (Act 25 of 1999)

Conditions of approval

- 66.** (1) The Municipality may approve an application subject to reasonable conditions that arise from the approval of the proposed utilisation of land.
- (2) Conditions imposed in accordance with subsection (1) may include conditions relating to—
- (a) the provision of engineering services and infrastructure;
 - (b) requirements relating to engineering services as contemplated in sections 82 and 83;
 - (c) the cession of land or the payment of money;
 - (d) settlement restructuring;
 - (e) agricultural or heritage resource conservation;
 - (f) biodiversity conservation and management;
 - (g) the provision of housing with the assistance of a state subsidy, social facilities or social infrastructure;
 - (h) energy efficiency;
 - (i) requirements aimed at addressing climate change;
 - (j) the establishment of an owners' association in respect of the approval of a subdivision;
 - (k) the provision of land needed by other organs of state;
 - (l) the endorsement in terms of the Deeds Registries Act in respect of public places where the ownership thereof vests in the Municipality;

- (m) the provision of land needed for public places or the payment of money in lieu of the provision of land for that purpose;
 - (n) the extent of land to be ceded to the Municipality for the purpose of a public open space or road as determined in accordance with a policy adopted by the Municipality;
 - (o) the registration of public places in the name of the Municipality;
 - (p) the transfer of ownership to the Municipality of land needed for other public purposes;
 - (q) the implementation of a subdivision in phases;
 - (r) requirements of other organs of state;
 - (s) the submission of a construction management plan to manage the impact of the construction of a new building on the surrounding properties or on the environment;
 - (t) agreements to be entered into in respect of certain conditions;
 - (u) the phasing of a development, including lapsing clauses relating to such phasing;
 - (v) the delimitation of development parameters or land uses that are set for a particular zoning;
 - (w) the setting of a validity period and any extensions thereto;
 - (x) the setting of a period within which a particular condition must be met;
 - (y) requirements for a temporary departure for a specific occasion or event, which must include—
 - (i) parking and the number of ablution facilities required;
 - (ii) the maximum duration or occurrence of the occasional use; and
 - (iii) any other development parameters that the Municipality may determine;
 - (z) the payment of a contravention penalty in respect of the unlawful utilisation of land.
- (3) If the Municipality imposes a condition contemplated in subsection (2)(a) or (b), an engineering services agreement must be concluded between the Municipality and the owner of the land concerned before the construction of engineering services and infrastructure commences on the land.
- (4) A condition contemplated in subsection (2)(c) may require only a proportional contribution to municipal public expenditure according to the normal need therefor arising from the approval, as determined by the Municipality in accordance with section 83(7) and any other applicable provincial norms and standards.

- (5) Municipal public expenditure contemplated in subsection (4) includes but is not limited to municipal public expenditure for municipal service infrastructure and amenities relating to—
 - (a) community facilities, including play equipment, street furniture, crèches, clinics, sports fields, indoor sports facilities or community halls;
 - (b) nature conservation;
 - (c) energy conservation;
 - (d) climate change; or
 - (e) engineering services.
- (6) Except for land needed for public places or internal engineering services, any additional land required by the Municipality or other organs of state arising from an approved subdivision must be acquired subject to the applicable laws that provide for the acquisition or expropriation of land.
- (7) An owners' association or home owners' association that came into being by virtue of a condition imposed under the Land Use Planning Ordinance, 1985 (Ordinance 15 of 1985), and that exists immediately before the commencement of this By-law is regarded as an owners' association that came into being by virtue of a condition imposed by the Municipality in accordance with this By-law.
- (8) The Municipality may not approve a land use application subject to a condition that approval in terms of other legislation is required.
- (9) Conditions requiring a standard to be met must specifically refer to an approved or published standard.
- (10) No conditions may be imposed that rely on a third party for fulfilment.
- (11) If the Municipality approves a land use application subject to conditions, it may specify which conditions must be complied with before the sale, development or transfer of the land.
- (12) Notwithstanding the provisions of any other section in this By-law, and the exclusion of section 18(1)(b), a conditional approval of an application lapses if the conditions therein are not complied with within :-
 - (a) a period of ten years from the date of such conditional approval, if no period for compliance is specified in such approval; or
 - (b) the period for compliance specified in such conditional approval, which, together with any extension which may be granted, may not exceed ten years.

CHAPTER VI

EXTENSION OF VALIDITY PERIOD OF APPROVALS

Applications for extension of validity period

- 67.** (1) The Municipality may, on a date before or after the expiry of the validity period of an approval, approve an application for the extension of a validity period imposed in terms of a condition of approval if the application for the extension of the period was submitted before the expiry of the validity period.
- (2) When the Municipality considers an application in terms of subsection (1), it must have regard to the following:
- (a) whether the circumstances prevailing at the time of the original approval have materially changed;
 - (b) whether the legislative or policy requirements applicable to the approval that prevailed at the time of the original approval have materially changed; and
 - (c) whether there is a pending review application in court which may have an effect on the date of implementation of the approval.
- (3) If there are material changes in circumstances or in legislative or policy requirements that will necessitate new conditions of approval if an extension of a validity period is approved, an application contemplated in section 15(2)(h) must be submitted for consideration before or simultaneously with the application for the extension of a validity period.
- (4) The extended validity period takes effect on and is reckoned from the expiry date of the validity period applicable to the original approval or from the expiry date of the previously extended validity period approved in terms of this By-law.

CHAPTER VII

MUNICIPAL PLANNING DECISION-MAKING STRUCTURES

Municipal planning decision-making structures in respect of applications and appeals

- 68.** Applications or appeals are decided—
- (a) in the case of an application referred to in section 15(2)(a) to (f), (h) to (k), (n), (o) or (r), by an authorised employee who has been authorised by the Municipality to consider and determine the applications as contemplated in section 69(1);
 - (b) in the case of an application referred to in section 15(2)(a) to (f), (h) to (k), (n), (o) or (r) where an authorised employee has not been authorised by the Municipality to consider and determine the applications as contemplated in section 69(2), by the Tribunal;

- (c) in the case of an application referred to section 15(2)(g), (l), (m), (p) or (q), by the Municipality;
- (d) by the Appeal Authority where an appeal has been lodged against a decision of an authorised employee or the Tribunal in respect of applications referred to in paragraph (a) or (b) respectively; or
- (e) by the appeal authority referred to in section 62(3) of the Municipal Systems Act where an appeal has been lodged against a decision of an authorised employee in respect of applications referred to in section 15(2)(g), (l), (m), (p) or (q).

Consideration of applications

- 69.** (1) The Municipality may categorise applications referred to in section 15(2)(a) to (f), (h) to (k), (n), (o) or (r) for consideration and determination by an authorised employee.
- (2) The Tribunal considers and determines all applications referred to in section 15(2)(a) to (f), (h) to (k), (n), (o) or (r) that have not been categorised for consideration and determination by an authorised employee.

Establishment of Tribunal

- 70.** (1) The Municipality must—
- (a) establish a Municipal Planning Tribunal for its municipal area;
 - (b) by agreement with one or more municipalities establish a joint Municipal Planning Tribunal; or
 - (c) agree to the establishment of a district Municipal Planning Tribunal by the district municipality.
- (2) An agreement referred to in subsection (1)(b) or (c) must provide for—
- (a) the composition of the Tribunal;
 - (b) the terms and conditions of appointment of members of the Tribunal;
 - (c) the determination of rules and procedures at meetings of the Tribunal; and
 - (d) other matters as may be prescribed in terms of the Spatial Planning and Land Use Management Act.

Composition of Tribunal for municipal area

- 71.** (1) A Tribunal established in terms of section 70(1)(a) must consist of at least the following members appointed by the Council:
- (a) three employees in the full-time service of the Municipality; and
 - (b) two persons who are not employees of the Municipality or councillors.
- (2) The members of the Tribunal must have knowledge and experience of land use planning or the law related thereto and be representative of a broad range of appropriate experience and expertise.

- (3) A member of the Tribunal appointed in terms of subsection (1)(b) may be—
- (a) an official or employee of—
 - (i) any department of state or administration in the national or provincial sphere of government;
 - (ii) a government business enterprise;
 - (iii) a public entity;
 - (iv) organised local government as envisaged in the Constitution;
 - (v) an organisation created by government to provide municipal support;
 - (vi) a non-governmental organisation; or
 - (vii) any other organ of state not provided for in subparagraphs (i) to (iv); or
 - (b) an individual in his or her own capacity.

Process for appointment of members for Tribunal for municipal area

- 72.** (1) The members of the Tribunal referred to in section 71(1)(b) may be appointed by the Council only after the Municipality has—
- (a) in the case of an official or employee contemplated in section 71(3)(a), extended a written invitation to nominate an official or employee to serve on the Tribunal to the departments in the national and provincial spheres of government, other organs of state and organisations referred to in section 71(3)(a); and
 - (b) in the case of member contemplated in section 71(3)(b), by notice in a newspaper in circulation in the municipal area, invited interested parties to submit, within the period stated in the notice, names of persons who meet the requirements to be so appointed.
- (2) An invitation for nominations must—
- (a) request sufficient information to enable the Municipality to evaluate the knowledge and experience of the nominee;
 - (b) request a written nomination in the form that the Municipality determines that complies with subsection (3);
 - (c) permit self-nomination; and
 - (d) provide for a closing date for nominations, which date may not be less than 14 days from the date of publication of the invitation in terms of subsection (1)(b) or the written invitation in terms of subsection

(1)(a), and no nominations submitted after that date may be considered by the Municipality.

- (3) A nomination in response to an invitation must—
 - (a) provide for acceptance of the nomination by the nominee, if it is not a self-nomination;
 - (b) include confirmation by the nominee that he or she is not disqualified from serving as a member in terms of section 74;
 - (c) include agreement by the nominee that the Municipality may verify all the information provided by the nominee; and
 - (d) include a statement that the nominee will be obliged to commit to and uphold a code of conduct if he or she is appointed.
- (4) If no or insufficient nominations are received or if the nominees do not possess the requisite knowledge and experience or comply with any additional criteria which may have been determined by the Municipality, the Municipality must invite nominations for a second time and follow the process required for the invitation for nominations referred to in this section.
- (5) If after the second invitation for nominations, no or insufficient nominations are received or if the nominees do not possess the requisite knowledge and experience or comply with any additional criteria which may have been determined by the Municipality, the executive authority of the Municipality must designate persons who possess the requisite knowledge and experience and comply with any additional criteria which may have been determined by the Municipality and appoint the persons.
- (6) Nominations submitted to the Municipality by virtue of subsection (1) must be submitted in writing in the form determined by the Municipality and must contain the contents referred to in subsection (3).
- (7) The Municipality must convene an evaluation panel consisting of officials in the employ of the Municipality to evaluate nominations that comply with this section as received by the Municipality and must determine the terms of reference of that evaluation panel.
- (8) The Council must appoint the members of the Tribunal after having regard to—
 - (a) the recommendations of the evaluation panel;
 - (b) the knowledge and experience of candidates in respect of land use planning or the law related thereto;
 - (c) the requirement that the members of the Tribunal must be representative of a broad range of appropriate experience and expertise;
 - (d) the powers and duties of the Tribunal; and

- (e) the policy of the Municipality in respect of the promotion of persons previously disadvantaged by unfair discrimination.
- (9) The Council may not appoint a person to the Tribunal if that person—
 - (a) was not nominated in accordance with the provisions of this section;
 - (b) is disqualified from appointment as contemplated in section 74; or
 - (c) does not possess the knowledge or experience required in terms of section 71(2).
- (10) The Council must designate from among the members of the Tribunal—
 - (a) the chairperson of the Tribunal; and
 - (b) another member as deputy chairperson, to act as chairperson of the Tribunal when the chairperson is absent or unable to perform his or her duties.
- (11) The Municipal Manager must—
 - (a) inform the members in writing of their appointment;
 - (b) obtain written confirmation from the Council that the Council is satisfied that the Tribunal is in a position to commence its operations; and
 - (c) after receipt of the confirmation referred to in paragraph (b), publish a notice in the *Provincial Gazette* of the following:
 - (i) the name of each member of the Tribunal;
 - (ii) the date on which the appointment of each member takes effect;
 - (iii) the term of office of each member; and
 - (iv) the date that the Tribunal will commence its operation.
- (12) The Tribunal may commence its operations only after publication of the notice contemplated in subsection (11)(c).

Term of office and conditions of service of members of Tribunal for municipal area

- 73.** (1) A member of a Tribunal contemplated in section 70(1)(a)—
- (a) is appointed for five years or a shorter period as the Municipality may determine; and
 - (b) may be appointed for further terms, subject to section 37(1) of the Spatial Planning and Land Use Management Act.

- (2) The office of a member becomes vacant if—
 - (a) the member is absent from two consecutive meetings of the Tribunal without the leave of the chairperson of the Tribunal;
 - (b) the member tenders his or her resignation in writing to the chairperson of the Tribunal or, if the member who is resigning is the chairperson, to the Council;
 - (c) the member is removed from the Tribunal under subsection (3); or
 - (d) the member dies.
- (3) The Council may, after having given the member an opportunity to be heard, remove a member of the Tribunal if—
 - (a) sufficient grounds exist for his or her removal;
 - (b) the member contravenes the code of conduct referred to in section 76;
 - (c) the member becomes subject to a disqualification from membership of the Tribunal as referred to in section 74.
- (4) A vacancy on the Tribunal must be filled by the Council in terms of section 71 and 72.
- (5) A member who is appointed by virtue of subsection (4) holds office for the unexpired part of the period for which the member he or she replaces was appointed.
- (6) Members of the Tribunal referred to in section 71(3)(b) must be appointed on the terms and conditions and must be paid the remuneration and allowances and be reimbursed for expenses as determined by the Council.
- (7) An official of the Municipality appointed in terms of section 71(1)(a) as a member of the Tribunal—
 - (a) may serve as member of the Tribunal only for as long as he or she is in the full-time employ of the Municipality;
 - (b) is bound by the conditions of service determined in his or her contract of employment and is not entitled to additional remuneration, allowances, leave or sick leave or any other additional employee benefit as a result of his or her membership on the Tribunal.
- (8) A person appointed in terms of section 71(1)(b) as a member of the Tribunal—
 - (a) is not an employee on the staff establishment of the Municipality;
 - (b) in the case of a person referred to in section 71(3)(a), is bound by the conditions of service determined in his or her contract of employment and is not entitled to additional remuneration, allowances, leave or sick leave or any other additional employee benefit as a result of his or her membership of the Tribunal;

- (c) performs the specific tasks in respect of the consideration of an application allocated to him or her by the chairperson of the Tribunal;
 - (d) sits at such meetings of the Tribunal that requires his or her relevant knowledge and experience as determined by the chairperson of the Tribunal;
 - (e) in the case of a person referred to in section 71(3)(b), is entitled to a seating and travel allowance as determined by the Municipality for each meeting of the Tribunal that he or she is required to attend; and
 - (f) in the case of a person referred to in section 71(3)(b), is not entitled to overtime, annual leave, sick leave, maternity leave, family responsibility leave, study leave, special leave, a performance bonus, medical scheme contribution, pension, motor vehicle or any other benefit to which a municipal employee is entitled to.
- (9) The allowances referred to in subsection (8)(e) are subject to taxation in accordance with the normal tax rules that are issued by the South African Revenue Service.

Disqualification from membership of Tribunal

- 74. (1)** A person may not be appointed or continue to serve as a member of the Tribunal if that person—
- (a) is not a citizen or permanent resident of the Republic of South Africa;
 - (b) is a member of Parliament, a Provincial Legislature, a municipal council or a House of Traditional Leaders;
 - (c) is an unrehabilitated insolvent;
 - (d) has been declared by a court of law to be mentally incompetent or has been detained under the Mental Health Care Act, 2002 (Act 17 of 2002);
 - (e) has at any time been convicted of an offence involving dishonesty;
 - (f) has at any time been removed from an office of trust on account of misconduct;
 - (g) has previously been removed from a tribunal for a breach of the Spatial Planning and Land Use Management Act or this By-law;
 - (h) has been found guilty of misconduct, incapacity or incompetence; or
 - (i) fails to comply with the Spatial Planning and Land Use Management Act or this By-law.

- (2) A member must vacate office if that member becomes subject to a disqualification as contemplated in subsection (1).
- (3) A member of a Tribunal—
 - (a) must make full disclosure of any conflict of interest, including any potential conflict; and
 - (b) may not attend, participate or vote in any proceedings of the Tribunal in relation to any matter in respect of which the member has a conflict of interest.
- (4) For the purposes of this section, a member has a conflict of interest if—
 - (a) the member, a spouse, family member, partner or business associate of the member is the applicant or has a pecuniary or other interest in the matter before the Tribunal;
 - (b) the member has any other interest that may preclude or may reasonably be perceived as precluding the member from performing the functions of the member in a fair, unbiased and proper manner;
 - (c) the member is an official in the employ of national, provincial or local government, if the department by which such an official is employed has a direct or substantial interest in the outcome of the matter.
- (5) The Council may at any time remove any member of the Tribunal from office—
 - (a) if there are reasonable grounds justifying the removal; or
 - (b) where a member has been disqualified in terms of subsection (1), after giving such a member an opportunity to be heard.
- (6) If a member's appointment is terminated or the member resigns, the Council may appoint a person to fill the vacancy for the unexpired portion of the vacating member's term of office in accordance with sections 71 and 72.

Meetings of Tribunal for municipal area

- 75.** (1) Subject to section 78, the Tribunal contemplated in section 70(1)(a) must determine its own internal arrangements, proceedings and procedures and those of its committees by drafting rules for—
 - (a) the convening of meetings;
 - (b) the procedure at meetings; and
 - (c) the frequency of meetings.
- (2) The Tribunal may constitute itself to comprise one or more panels to determine—

- (a) applications in specific geographical areas;
 - (b) applications in specific areas within the Municipality; or
 - (c) a particular application or type or category of application.
- (3) In this section, section 77 and section 78, unless the context indicates otherwise, “the Tribunal” includes a panel of the Tribunal contemplated in subsection (2).
 - (4) The Tribunal must meet at the time and place determined by the chairperson or, in the case of a panel, the presiding officer provided that it must meet at least once per month if there is an application to consider.
 - (5) If the Tribunal constitutes itself to comprise a panel, the Tribunal must designate at least three members of the Tribunal to be members of that panel, of whom one must at least be a member contemplated in section 71(1)(b).
 - (6) A quorum for a meeting of the Tribunal is the majority of its appointed members.
 - (7) A quorum for a meeting of a panel of the Tribunal is—
 - (a) the majority of its designated members; or
 - (b) three members, if the panel consist of only three members.
 - (8) Meetings of the Tribunal or a panel of the Tribunal must be held as contemplated in this section and section 78 in accordance with the rules of the Tribunal.

Code of conduct for members of Tribunal for municipal area

- 76. (1) The code of conduct in Schedule 1 applies to every member of a Tribunal contemplated in section 71(1).
- (2) If a member contravenes the code of conduct, the Council may—
 - (a) in the case of member contemplated in section 71(1)(a), institute disciplinary proceedings against the member;
 - (b) remove the member from office.

Administrator for Tribunal for municipal area

- 77. (1) The Municipal Manager must appoint or designate an employee as the Administrator and other staff for the Tribunal contemplated in section 70(1)(a) in terms of the Municipal Systems Act.
- (2) The Administrator must—
 - (a) liaise with the relevant Tribunal members and the parties concerned regarding any application to be determined by, or other proceedings of, the Tribunal;

- (b) maintain a diary of meetings of the Tribunal;
- (c) allocate a meeting date for, and application number to, an application;
- (d) arrange the attendance of members of the Tribunal at meetings;
- (e) arrange venues for Tribunal meetings;
- (f) perform the administrative functions in connection with the proceedings of the Tribunal;
- (g) ensure that the proceedings of the Tribunal are conducted efficiently and in accordance with the directions of the chairperson of the Tribunal;
- (h) arrange the affairs of the Tribunal so as to ensure that time is available to liaise with other organs of state regarding the alignment of integrated applications and authorisations;
- (i) notify the parties concerned of decisions and procedural directives given by the Tribunal;
- (j) keep a record of all applications submitted to the Tribunal as well as the outcome of each, including—
 - (i) decisions of the Tribunal;
 - (ii) on-site inspections and any matter recorded as a result thereof;
 - (iii) reasons for decisions; and
 - (iv) proceedings of the Tribunal; and
- (k) keep records by any means as the Tribunal may deem expedient.

Functioning of Tribunal for municipal area

- 78.** (1) The meetings of the Tribunal contemplated in section 75(1)(a) must be held at the times and places as the chairperson may determine.
- (2) If an applicant or a person whose rights or legitimate expectations will be affected by the approval of an application requests to make a verbal representation at a meeting of the Tribunal, he or she must submit a written request to the Administrator at least 14 days before that meeting.
- (3) The Chairperson may approve a request contemplated in subsection (2), subject to reasonable conditions.
- (4) An application may be considered by the Tribunal by means of—
- (a) the consideration of the written application and comments; or
 - (b) an oral hearing.
- (5) The application may be considered in terms of subsection (4)(a) if it appears to the Tribunal that the issues for determination of the application

can be adequately determined in the absence of the parties by considering the documents or other material lodged with or provided to it.

- (6) An oral hearing may be held—
 - (a) if it appears to the Tribunal that the issues for determination of the application cannot be adequately determined in the absence of the parties by considering the documents or other material lodged with or provided to it; or
 - (b) if such hearing would assist in the expeditious and fair disposal of the application.
- (7) If appropriate in the circumstances, the oral hearing may be held by electronic means.

Appeals

- 79.** (1) The executive authority (*executive committee/executive mayor of the Municipality/if the Municipality does not have an executive committee or executive mayor, a committee of councillors*) is the Appeal Authority in respect of decisions of the Tribunal or an authorised employee contemplated in section 68(a) or (b) and a failure to decide on an application as contemplated in section 58.
- (2) A person whose rights are affected by a decision contemplated in subsection (1) may appeal in writing to the Appeal Authority within 21 days of notification of the decision.
 - (3) An applicant may appeal in writing to the Appeal Authority in respect of the failure of the Tribunal or an authorised employee to make a decision within the period contemplated in section 57(1), (2) or (3) any time after the expiry of the period contemplated in that section.
 - (4) An appeal is lodged by serving the appeal on the Municipal Manager in the form determined by the Municipality and subject to section 80(1).
 - (5) When the Appeal Authority considers an appeal, it must have regard to—
 - (a) the provisions of section 65, read with the necessary changes; and
 - (b) the comments of the Provincial Minister contemplated in section 52 of the Land Use Planning Act.

Procedure for appeal

- 80.** (1) An appeal is invalid if—
- (a) in the case of an appeal contemplated in section 79(2), it is not lodged within the period referred to in that subsection; or
 - (b) it does not comply with sections 79 (2) – (4) and 80 (2) - (7)
- (2) An appeal must set out the following:
- (a) the grounds for the appeal, which may include the following grounds:

- (i) that the administrative action was not procedurally fair as contemplated in the Promotion of Administrative Justice Act, 2000 (Act 3 of 2000);
 - (ii) grounds relating to the merits of the land development or land use application on which the appellant believes the Tribunal or authorised employee erred in coming to the conclusion that the Tribunal or authorised employee did, as the case may be,
 - (b) whether the appeal is lodged against the whole decision or a part of the decision;
 - (c) if the appeal is lodged against a part of the decision, a description of the part;
 - (d) if the appeal is lodged against a condition of approval, a description of the condition;
 - (e) the factual or legal findings that the appellant relies on;
 - (f) the relief sought by the appellant;
 - (g) any issue that the appellant wishes the Appeal Authority to consider in making its decision; and
 - (h) in the case of an appeal in respect of the failure of a decision-maker to make a decision, the facts that prove the failure.
- (3) A person who lodges an appeal must within the period referred to in subsection 79(2), submit proof of payment of appeal fees, as may be determined by the Municipality, to the Municipal Manager.
 - (4) An applicant who lodges an appeal must simultaneously serve notice of the appeal on any person who commented on the application concerned and any other person as the Municipality may determine.
 - (5) The notice must be served in accordance with section 35.
 - (6) The notice contemplated in subsection (5) must invite persons to comment on the appeal within 21 days of the date of notification.
 - (7) The appellant must submit proof of service of the notice as contemplated in subsection (5) to the Municipal Manager within 14 days of the date of notification.
 - (8) If a person other than the applicant lodges an appeal, the Municipal Manager must give written notice of the appeal to the applicant within 14 days of receipt thereof.
 - (9) An applicant who has received notice of an appeal in terms of subsection (8) may submit comment on the appeal to the Municipal Manager within 21 days of the date of notification.

- (10) The Municipality may refuse to accept any comments on an appeal submitted after the closing date for comments on an appeal.
- (11) The Municipal Manager—
 - (a) may request the Provincial Minister within 14 days of the receipt of an appeal to comment in writing on the appeal within 30 days of the date of notification of the request;
 - (b) must notify and request the Provincial Minister within 14 days of the receipt of an appeal to comment on the appeal within 30 days of the date of notification of the request in respect of appeals relating to the following applications:
 - (i) a development outside the Municipality's planned outer limit of urban expansion as reflected in its municipal spatial development framework;
 - (ii) if the Municipality has no approved municipal spatial development framework, a development outside the physical edge, including existing urban land use approvals, of the existing urban area;
 - (iii) a rezoning of land zoned for agricultural or conservation purposes;
 - (iv) any category of land use applications as may be prescribed by the Provincial Minister; and
 - (c) must on receipt of an appeal in terms of this section notify the applicant in writing whether or not the operation of the approval of the application is suspended.
- (12) An authorised employee must draft a report assessing an appeal and must submit it to the Municipal Manager within—
 - (a) 30 days of the closing date for comment requested in terms of subsections (6) and (9), if no comment was requested in terms of subsection (11); or
 - (b) 30 days of the closing date for comments requested in terms of subsection (11).
- (13) The Municipal Manager must within 14 days of receiving the report contemplated in subsection (12) submit the appeal to the Appeal Authority.
- (14) The Municipal Manager or an employee designated by him or her must—
 - (a) liaise with the Appeal Authority and the parties concerned regarding any appeal lodged with the Appeal Authority;
 - (b) maintain a diary of meetings of the Appeal Authority;
 - (c) allocate a meeting date for, and appeal number to, an appeal;

- (d) arrange the attendance of members of the Appeal Authority at meetings;
 - (e) arrange venues for the Appeal Authority;
 - (f) perform the administrative functions in connection with the proceedings of the Appeal Authority;
 - (g) ensure that the proceedings of the Appeal Authority are conducted efficiently and in accordance with the directions of the Appeal Authority;
 - (h) arrange the affairs of the Appeal Authority so as to ensure that time is available to liaise with other organs of state regarding the alignment of integrated appeal procedures;
 - (i) notify the parties concerned of decisions and procedural directives given by the Appeal Authority;
 - (j) keep a record of all appeals lodged as well as the outcome of each, including—
 - (i) decisions of the Appeal Authority;
 - (ii) on-site inspections and any matter recorded as a result thereof;
 - (iii) reasons for decisions; and
 - (iv) proceedings of the Appeal Authority; and
 - (k) keep records by any means as the Appeal Authority may deem expedient.
- (15) An appellant may, at any time before the Appeal Authority makes a decision on an appeal submitted by the appellant, withdraw the appeal by giving written notice of the withdrawal to the Municipal Manager.
- (16) The owner must in writing inform the Municipality if he or she has withdrawn the power of attorney given to his or her former agent and confirm whether he or she will personally proceed with the appeal.

Consideration by Appeal Authority

- 81.** (1) An appeal may be considered by the Appeal Authority by means of—
- (a) the consideration of the written appeal and comments; or
 - (b) an oral hearing.
- (2) The appeal may be considered in terms of subsection (1)(a) if it appears to the Appeal Authority that the issues for determination of the appeal can be adequately determined in the absence of the parties by considering the documents or other material lodged with or provided to it.

- (3) An oral hearing may be held—
 - (a) if it appears to the Appeal Authority that the issues for determination of the appeal cannot be adequately determined in the absence of the parties by considering the documents or other material lodged with or provided to it; or
 - (b) if such hearing would assist in the expeditious and fair disposal of the appeal.
- (4) If appropriate in the circumstances, the oral hearing may be held by electronic means.
- (5) If the Appeal Authority decides to hold an oral hearing, any party to the appeal proceedings may appear in person or may be represented by another person.
- (6) The Appeal Authority must ensure that every party to a proceeding before the Appeal Authority is given an opportunity to present his or her case, whether in writing or orally as contemplated in subsections (2) and (3) and, in particular, to inspect any documents to which the Appeal Authority proposes to have regard in reaching a decision in the proceeding and to submit comments thereon in accordance with this Chapter or, in the case of an oral hearing, to make submissions in relation to those documents.
- (7) The Appeal Authority must—
 - (a) consider and determine all appeals lawfully submitted to it;
 - (b) confirm, vary or revoke the decision of the Tribunal or authorised employee;
 - (c) provide reasons for any decision made by it;
 - (d) give directions relevant to its functions to the Municipality;
 - (e) keep a record of all its proceedings; and
 - (f) determine whether the appeal falls within its jurisdiction.
- (8) Subject to subsection (12), the Appeal Authority must decide on an appeal within 60 days of receipt of the assessment report as contemplated in section 80(13).
- (9) If the Appeal Authority revokes a decision of the Tribunal or authorised employee it may—
 - (a) remit the matter to the Tribunal or authorised employee—
 - (i) if there was an error in the process that was unfair and that cannot be corrected by the Appeal Authority; and

- (ii) with instructions regarding the correction of the error; or
 - (b) replace the decision with any decision it regards necessary.
- (10) The Appeal Authority may appoint a technical adviser to advise or assist it with regard to a matter forming part of the appeal.
- (11) The Appeal Authority must within 21 days from the date of its decision notify the parties to an appeal in writing of—
 - (a) the decision and the reasons therefor; and
 - (b) if the decision on an appeal upholds an approval, notify the applicant in writing that he or she may act on the approval.
- (12) The Appeal Authority may extend the period contemplated in subsection (8) in exceptional circumstances, including the following:
 - (a) if an interested person has submitted a petition for intervener status;
 - (b) if an oral hearing is to be held.
- (13) Nothing in this section prohibits a person from instituting proceedings for the judicial review of a decision as contemplated in section 6 of the Promotion of Administrative Justice Act, 2000 (Act 3 of 2000)

CHAPTER VIII

PROVISION OF ENGINEERING SERVICES

Responsibility for provision of engineering services

- 82.** (1) An applicant is responsible for the provision, installation and costs of internal engineering services required for a development once an application is approved.
- (2) The Municipality is responsible for the provision and installation of external engineering services.
- (3) If the Municipality is not the provider of an engineering service, the applicant must satisfy the Municipality that adequate arrangements have been made with the relevant service provider for the provision of that service.
- (4) The Municipality may enter into a written agreement with an applicant to provide that—
- (a) the applicant is responsible for the provision, installation and costs of external engineering services instead of paying the applicable development charges; or
 - (b) the applicant is responsible for the provision, installation and costs of external engineering services and that the fair and reasonable costs

of the external engineering services may be set off against the development charges payable by the applicant.

Development charges and other contributions

- 83.** (1) The applicant must pay development charges to the Municipality in respect of the provision and installation of external engineering services.
- (2) These external engineering services for which development charges are payable must be set out in a policy adopted and annually reviewed by the Municipality.
- (3) The amount of the development charges payable by an applicant must be calculated in accordance with the policy adopted by the Municipality.
- (4) The date by which development charges must be paid and the means of payment must be specified in the conditions of approval.
- (5) The development charges imposed are subject to escalation at the rate calculated in accordance with the policy on development charges.
- (6) The Municipality must annually submit a report to the Council on the development charges paid to the Municipality, together with a statement of the expenditure of the amount and the purpose of the expenditure.
- (7) When determining the contribution contemplated in section 66(4) and (5), the Municipality must have regard to provincial norms and standards as well as—
- (a) the municipal service infrastructure and amenities for the land concerned that are needed for the approved land use;
 - (b) the public expenditure on that infrastructure and those amenities incurred in the past and that facilitates the approved land use;
 - (c) the public expenditure on that infrastructure and those amenities that may arise from the approved land use;
 - (d) money in respect of contributions contemplated in section 66(4) paid in the past by the owner of the land concerned; and
 - (e) money in respect of contributions contemplated in section 66(4) to be paid in the future by the owner of the land concerned.

Land for parks, open spaces and other uses

- 84.** (1) When the Municipality approves an application for the use of land for residential purposes, the Municipality may require the applicant to provide land for parks or public open spaces in terms of conditions of approval imposed in accordance with section 66.
- (2) The extent of land required for parks or public open spaces is determined by the Municipality in accordance with a policy adopted by the Municipality.
- (3) The land required for parks or public open spaces must be provided within the land area of the application or may, with the consent of the Municipality, be provided elsewhere within the municipal area.

- (4) When an application is approved without the required provision of land for parks or open spaces within the land area of the development, the applicant may be required to pay money to the Municipality in lieu of the provision of land.

CHAPTER IX

ENFORCEMENT

Enforcement

- 85.** (1) The Municipality must comply and enforce compliance with—
 - (a) the provisions of this By-law;
 - (b) the provisions of a zoning scheme;
 - (c) conditions imposed in terms of this By-law or any law repealed by the Land Use Planning Act.
- (2) The Municipality may not do anything that is in conflict with subsection (1).

Offences and penalties

- 86.** (1) A person is guilty of an offence and is liable on conviction to a fine or imprisonment not exceeding 20 years or to both a fine and such imprisonment if he or she—
 - (a) contravenes or fails to comply with sections 15(1) and (4), 20(1), 21(4), 31(1), 59(3), 62(2) or 88(2);
 - (b) utilises land in a manner other than prescribed by a zoning scheme without the approval of the Municipality;
 - (c) upon registration of the transfer of ownership of the first land unit arising from a subdivision to a person other than the developer, fails to transfer all common property arising from the subdivision to the owners' association;
 - (d) supplies particulars, information or answers in an application, or in an appeal against a decision on an application, or in any documentation or representation related to an application or an appeal, knowing it to be false, incorrect or misleading or not believing them to be correct;
 - (e) falsely professes to be an authorised employee or the interpreter or assistant of an authorised employee; or
 - (f) hinders or interferes with an authorised employee in the exercise of any power or the performance of any duty of that employee.
- (2) An owner who permits his or her land to be used in a manner set out in subsection (1)(b) and who does not cease that use or take reasonable steps to ensure that the use ceases, is guilty of an offence and liable upon conviction to a fine or imprisonment not exceeding 20 years or to both a fine and such imprisonment.

- (3) A person convicted of an offence in terms of this By-law who, after conviction, continues with the action in respect of which he or she was so convicted, is guilty of a continuing offence and liable upon conviction to imprisonment for a period not exceeding three months or to an equivalent fine or to both such fine and imprisonment, in respect of each day on which he or she so continues or has continued with that act or omission.
- (4) The Municipality may adopt fines and contravention penalties to be imposed in the enforcement of this By-law.

Serving of compliance notices

- 87.** (1) The Municipality must serve a compliance notice on a person if it has reasonable grounds to suspect that the person is guilty of an offence in terms of section 86.
- (2) A compliance notice must instruct the person to cease the unlawful utilisation of land or construction activity or both, without delay or within the period determined by the Municipality, and may include an instruction to—
- (a) demolish, remove or alter any building, structure or work unlawfully erected or constructed or to rehabilitate the land or restore the building concerned to its original form or to cease the activity, as the case may be, within the period determined by the Municipal Manager;
 - (b) submit an application for the approval of the utilisation of the land or construction activity in terms of this By-law within 30 days of the service of the compliance notice and to pay the contravention penalty within 30 days of the decision on the application; or
 - (c) rectify the contravention of or non-compliance with a condition of approval within a specified period.
- (3) A person who has received a compliance notice with an instruction contemplated in subsection (2)(a) may not submit an application in terms of subsection (2)(b).
- (4) An instruction to submit an application in terms of subsection (2)(b) must not be construed as an indication that the application will be approved.
- (5) In the event that the application submitted in terms of subsection (2)(b) is refused, the owner must demolish, remove or alter the building, structure or work unlawfully erected or constructed and rehabilitate the land or restore the building.
- (6) A person who received a compliance notice in terms of this section may object to the notice by submitting written representations to the Municipality within 30 days of the date of notification.

Contents of compliance notice

- 88.** (1) A compliance notice must—

- (a) identify the person to whom it is addressed;
- (b) describe the alleged unlawful utilisation of land or construction activity and the land on which it is occurring or has occurred;
- (c) state that the utilisation of land or construction activity is unlawful and inform the person of the particular offence contemplated in section 86 which that person allegedly has committed or is committing by the continuation of that activity on the land;
- (d) state the steps that the person must take and the period within which those steps must be taken;
- (e) state anything which the person may not do and the period during which the person may not do it;
- (f) make provision for the person to submit representations in terms of section 89 with the contact person stated in the notice; and
- (g) issue a warning to the effect that—
 - (i) the person may be prosecuted for and convicted of an offence contemplated in section 86;
 - (ii) on conviction of an offence, the person will be liable for the penalty as provided for;
 - (iii) the person may be required by an order of court to demolish, remove or alter any building, structure or work unlawfully erected or constructed or to rehabilitate the land or restore the building concerned or to cease the activity;
 - (iv) in the case of a contravention relating to a consent use or temporary departure, the approval may be withdrawn; and
 - (v) in the case of an application for authorisation of the activity or development parameter, the contravention penalty, including any costs incurred by the Municipality, may be imposed.

- (2) Any person on whom a compliance notice is served must comply with that notice within the period stated in the notice unless and until the person has objected to the notice in terms of section 89 and the Municipality has not decided on the matter in terms of that section or the Municipality has agreed to suspend the operation of the compliance notice in terms of section 89(2).

Objections to compliance notice

- 89.** (1) Any person who receives a compliance notice in terms of section 87 may object to the notice by making written representations to the Municipality within 30 days of the date of notification.
- (2) After consideration of any objections or representations made in terms of subsection (1) and any other relevant information, the Municipality—

- (a) may suspend, confirm, vary or withdraw the compliance notice or any part of the compliance notice; and
- (b) must specify the period within which the person to whom the compliance notice is addressed must comply with any part of the compliance notice that is confirmed or varied as contemplated in subsection (2)(a).

Failure to comply with compliance notice

90. If a person fails to comply with a compliance notice, the Municipality may—

- (a) lay a criminal charge against the person;
- (b) apply to the court for an order—
 - (i) restraining that person from continuing the unlawful utilisation of the land;
 - (ii) directing that person to, without the payment of compensation—
 - (aa) demolish, remove or alter any building, structure or work unlawfully erected or constructed; or
 - (bb) rehabilitate the land concerned;
- (c) in the case of a consent use or temporary departure, withdraw the approval granted and take any of the other steps contemplated in section 88(1)(g).

Compliance certificates

- 91.** (1) An authorised employee who is satisfied that the owner or occupier of any land or premises has complied with a compliance notice may issue a certificate, in the manner and form determined by the Municipality, to confirm the compliance.
- (2) The authorised employee must submit a report to the Municipality regarding his or her findings contemplated in subsection (1) and the issuing of a compliance certificate.

Urgent matters

- 92.** (1) The Municipality does not have to comply with sections 87(6), 88(1)(f) and 89 in a case where an unlawful utilisation of land must be stopped urgently and may issue a compliance notice calling upon the person or owner to cease the unlawful utilisation of land immediately.
- (2) If the person or owner fails to cease the unlawful utilisation of land immediately, the Municipality may apply to the court for an urgent interdict or any other relief necessary.

General powers and functions of authorised employees

- 93.** (1) An authorised employee may, with the written consent of the owner, occupier or person in lawful control of the land or building without a warrant and after reasonable notice has been given to the owner, occupier or person in lawful control of the land or building, enter upon land or premises or enter a building at any reasonable time for the purpose of ensuring compliance with this By-law.
- (2) An authorised employee must be in possession of proof that he or she has been designated as an authorised employee for the purposes of subsection (1).
- (3) An authorised employee may be accompanied by an interpreter, a police official or any other person who may be able to assist with the inspection.

Powers of entry, search and seizure

- 94.** (1) In ensuring compliance with this By-law an authorised employee may in accordance with section 93—
- (a) question any person on land or premises entered upon or in a building entered who, in the opinion of the authorised employee, may be able to provide information on a matter that relates to an investigation regarding an offence in terms of, or contravention of, this By-law;
- (b) question any person on that land or those premises or in that building about any act or omission in respect of which there is a reasonable suspicion that it constitutes—
- (i) an offence in terms of this By-law;
- (ii) a contravention of this By-law; or
- (iii) a contravention of an approval or a term or condition of that approval;
- (c) question that person about any structure, object, document, book, record, written or electronic information or inspect any structure, object, document, book, record or written or electronic information that may be relevant for the purpose of the investigation;
- (d) copy or make extracts from any document, book, record, written or electronic information referred to in paragraph (c), or remove that document, book, record or written or electronic information in order to make copies thereof or extracts therefrom;
- (e) require that person to produce or deliver to a place specified by the authorised employee any document, book, record, written or electronic information referred to in paragraph (c) for inspection;

- (f) examine that document, book, record, written or electronic information or make a copy thereof or an extract therefrom;
 - (g) require from that person an explanation of any entry in that document, book, record, written or electronic information;
 - (h) inspect any article, substance, plant or machinery which is or was on the land, or any work performed on the land or any condition prevalent on the land, or remove for examination or analysis any article, substance, plant or machinery or a part or sample thereof;
 - (i) take photographs or make audio-visual recordings of anything or any person on that land or those premises or in that building relevant to the purposes of the investigation; or
 - (j) seize a book, record, written or electronic information referred to in paragraph (c) or article, substance, plant or machinery referred to in paragraph (h) or a part or sample thereof that in his or her opinion may serve as evidence at the trial of the person to be charged with an offence under this By-law or the common law, provided that the user of the article, substance, plant or machinery on the land or premises or in the building concerned may make copies of that book, record or document before the seizure.
- (2) When an authorised employee removes or seizes any article, substance, plant or machinery, book, record or other document as contemplated in this section, he or she must issue a receipt to the owner or person in control thereof.
 - (3) An authorised employee may not have a direct or indirect personal or private interest in the matter to be investigated.

Warrant of entry for enforcement purposes

- 95.** (1) A judge of a High Court or a Magistrate for the district in which the land is situated may, at the request of the Municipality, issue a warrant to enter upon the land or premises or building if—
- (a) the prior permission of the occupier or owner cannot be obtained after reasonable attempts; or
 - (b) the purpose of the inspection would be frustrated by the occupier or owner's prior knowledge thereof.
- (2) A warrant may be issued only if it appears to the Judge or Magistrate from information on oath or affirmation that there are reasonable grounds for believing that—
- (a) an authorised employee has been refused entry to land or a building that he or she is entitled to inspect;
 - (b) an authorised employee will be refused entry to land or a building that he or she is entitled to inspect;

- (c) an offence contemplated in section 86 is occurring or has occurred and an inspection of the premises is likely to yield information pertaining to that offence; or
 - (d) the inspection is reasonably necessary for the purposes of this By-law.
- (3) A warrant must authorise the Municipality to enter upon the land or premises or to enter the building to take any of the measures referred to in section 94 as specified in the warrant, on one occasion only, and that entry must occur—
- (a) within one month of the date on which the warrant was issued; and
 - (b) at a reasonable time, except where the warrant was issued on grounds of urgency.

Regard to decency and order

- 96.** The entry upon land or premises or in a building under this Chapter must be conducted with strict regard to decency and order, which must include regard to—
- (a) a person's right to respect for and protection of his or her dignity;
 - (b) the right to freedom and security of the person; and
 - (c) a person's right to personal privacy.

Enforcement litigation

- 97.** Whether or not the Municipality lays criminal charges against a person for an offence contemplated in section 86, and despite section 87, the Municipality may apply to the court for an interdict or any other appropriate order, including an order compelling that person to—
- (a) demolish, remove or alter any building, structure or work unlawfully erected or constructed;
 - (b) rehabilitate the land concerned;
 - (c) cease the unlawful utilisation of land.

CHAPTER X MISCELLANEOUS

Naming and numbering of streets

- 98. (1)** If as a result of the approval of a development application streets or roads are created, whether public or private, the Municipality must approve the

naming of streets and must allocate a street number to each of the erven or land units located in such street or road.

- (2) The proposed names of the streets and numbers must be submitted as part of an application for subdivision.
- (3) In considering the naming of streets or the numbering of properties, the Municipality must take into account the relevant policies regarding street naming and numbering.
- (4) The Municipality must notify the Surveyor-General of the approval of new streets as a result of the approval of an amendment or cancellation of a subdivision plan in terms of section 23 and the Surveyor-General must endorse the records of the Surveyor-General's Office to reflect the amendment or cancellation of the street names on an approved general plan.

Repeal and Transitional Arrangements

- 99.** (1) The Stellenbosch Bylaw on Municipal Land Use Planning, 2015 is hereby repealed.
- (2) Any approval, granted or in force in terms of By-law Municipal Land Use Planning, 2015, and in existence immediately before the commencement of this By-law, remains in force and is regarded to have been issued or granted in accordance with this By-law and in terms of the corresponding provisions of applicable by-laws for the period for which, and subject to the conditions under which, it was issued or granted under the repealed By-law until withdrawn, amended or extended in terms of applicable by-laws.
- (3) Any action taken, application or appeal lodged in terms of the Stellenbosch By-law on Municipal Land Use Planning, 2015 and that has not been finalised before this by-law comes into operation, must be administered and finalised as if the Stellenbosch By-law on Municipal Land Use Planning, 2015, had not been repealed.

Short title and commencement

- 100.** (1) This By-law is called the Stellenbosch By-law on Municipal Land Use Planning 2023.
- (2) This By-law shall come into operation on 1 July 2023.

SCHEDULE 1**CODE OF CONDUCT FOR MEMBERS OF TRIBUNAL****General conduct**

- 1.** A member of the Tribunal must at all times—
 - (a) act in accordance with the principles of accountability and transparency;
 - (b) disclose his or her personal interests in any decision to be made in the planning process in which he or she serves or has been requested to serve; and
 - (c) abstain completely from direct or indirect participation as an advisor in any matter in which he or she has a personal interest and leave any chamber in which such matter is under deliberation unless the personal interest has been made a matter of public record and the Council has given written approval and has expressly authorised his or her participation.
- 2.** A member of the Tribunal may not—
 - (a) use his or her position or privileges as Tribunal member or confidential information obtained as a Tribunal member, for private gain or to improperly benefit another person; or
 - (b) participate as a decision-maker concerning a matter in which that Tribunal member or that member's spouse, family member, partner or business associate has a direct or indirect personal interest or private business interest.

Gifts

- 3.** A member of the Tribunal may not receive or seek gifts, favours or any other offer under circumstances in which it might reasonably be inferred that the gifts, favours or offers are intended or expected to influence that member's objectivity as an advisor or decision-maker in the planning process.

Undue influence

- 4.** A member of the Tribunal may not—
 - (a) use the power of his or her office to seek or obtain special advantage for private gain or to improperly benefit another person that is not in the public interest;
 - (b) use confidential information acquired in the course of his or her duties to further a personal interest;

- (c) disclose confidential information acquired in the course of his or her duties unless required by law to do so or by circumstances to prevent substantial prejudice or damage to another person; or
- (d) commit a deliberately wrongful act that reflects adversely on the Tribunal, the Municipality, the government or the planning profession by seeking business by stating or implying that he or she is prepared, willing or able to influence decisions of the Tribunal by improper means.

ANNEXURE B

ANNEXURE “B”

Stellenbosch Municipal Land Use Planning Bylaw Review 2022

Record of reasoning of proposed amendments

(Reflecting amendments from the 2015 version.)

Section reference	Reasoning or motivation for amendments
Heading/name of by-law	Unless an amendment by-law is done whereby only certain sections are amended or deleted using the <i>brackets-and-underline method</i> , the amended by-law will be a new by-law which replaces the previous version. As such it will be necessary to properly name and date the by-law, to make it distinguishable from previous versions. Consequently, a name suggestion is included which where the municipality's name and the year-date of the version is to be inserted. Note that this amendment not only has an impact on section 99 in the text itself, but also in the index.
Index 15	This is more fully addressed in section 68, but it is a result of the view that not all application types listed in section 15 are SPLUMA land development applications and do therefore not necessarily have to be considered by the MPT or AO.
Index 25	Improved wording as the word “amenities” is used throughout the by-law and not “social facilities”.
Index 47	Change heading from “Contents of Notice” to “Additional contents of notice” in accordance with changes to Section 47.
Index 68	Details appear in section 68, but is the result the realisation that not all application types listed in section 15(2) are SPLUMA land development applications and do therefore not necessarily have to be considered by the MPT or AO.
Index 80	Improved wording as there is only one procedure.
Index 83	Development charges are linked to engineering infrastructure, whereas there may also be other contributions as well.
Index 99	Since it is recommended that the previous by-law is to be repealed and replaced with the new (amended) by-law, it is necessary to include a transitional measure to regulate the transition period.
Definitions	
Agent	This change appears throughout the by-law. The reason is that LUPA already defines “owner” as the person registered in a deeds registry as the owner of land or who is the beneficial owner in law, thus owner is already described as owner of land hence there is no need to repeat it every time. This comment will only be made once and is applicable in all instances where the by-law refers to “owner of land”.
Applicable period	<p>The reason for deleting the words “condition of” is because not all applicable periods are contained in conditions of approval. The sections referred to in this definition does not refer to the conditions of approval but actually form part of the decision itself. If there is a need to extend the validity period the application is therefore for an extension of the validity period in terms of Section 15(2)(h) and not an application for the amendment of a condition in terms of Section 15(2)(i), unless specific validity period were imposed as conditions of approval.</p> <p>Secondly with the granting of the exemption (by the Minister of Rural Development and Land Reform) of the provisions of section 43(2) on condition that the alternative provision be regulated for in the municipal land use planning by-law, the definition of applicable period was further adjusted to make provision for the alternative provision in such a way the normal lapsing of right in the by-law (based on commencement) can remain as is.</p>

Note on applicable period	<p>This note is to be deleted from the by-laws, as it is just a note to municipalities and not part of the regulatory instrument. This comment is provided for the instance that either SPLUMA section 43(2) is amended or if and when the Western Cape is granted exemption from this section of SPLUMA.</p> <p>“Applicable period” refers to the period that may be determined by the Municipality in the conditions of approval subject to section 43(2) of the Spatial Planning and Land Use Management Act or the period referred to in section 43(2) of the Spatial Planning and Land Use Management Act, 2013.</p> <p>Section 43(2) of the Spatial Planning and Land Use Management Act will remain applicable until the Act has been amended or an exemption has been granted.</p>
Notes (<i>in general</i>)	All “notes” are to be deleted from the by-laws, as these are just notes to municipalities and do not form part of the regulatory instrument. It is not repeated in all instances, but is applicable in all instances.
Commencement	This newly inserted term refers only to the instances where it is linked to the lapsing of approved land use rights in respect of section 17 (Rezoning), section 18 (Departure) and section 19 (Consent use)
Emergency	Improved wording to provide more clarity.
Municipal Manager	This change occurs throughout this document and will not be repeated again, the reasons is proper use of capitalisation of the official position of Municipal Manager.
municipal spatial development framework	MSA does not refer to MSDF, but LUPA does. Change wording to accurately reflect reference in LUPA.
Municipality	Change wording to accurately reflect the statutory reference to the establishment of the Stellenbosch municipality
Occasional use	The definition was deleted as it is only a type of temporary departure, more clarity appears in section 18(4).
Overlay zone	Change “or” to “and” because if it remains an “or” it will mean either one of the two are applicable whereas there may very well be situations where both are required.
Overlay zone Base zoning	Deleted as base zoning is not part of an overlay zone.
Overlay zone Local areas	The word “local areas” has been deleted as it is vague and adds no value to this concept.
Overlay zone Coastal setback lines	Deleted the words “where coastlines are involved” for the reason that coastal set back lines can only apply where coastlines are involved.
Spatial Planning and Land Use Regulations	Improved the wording.
3(1)(a)	To make it more clear that it involves the SDF itself as well as amendments thereto.
3(1)(b)(ii)	Deleted words which are actually duplicated by “the process contemplated in subsection (2)(a)(ii)”.
4(1)	<p>Changed “must” to “may” to provide for an option to establish a project committee and not to make it compulsory.</p> <p>Also to provide that when the municipality does not opt have an intergovernmental steering committee, then it could use the project committee to do this work.</p>
4(2)(b)	Add “where relevant” because all departments may not be necessary in all cases, so these words add some flexibility depending on the situation at hand – therefore the words “at least” are also deleted.
5(1)	Improved wording because the Municipal Manager is not mentioned in the existing by-laws whereas the corresponding section 12 of LUPA does and it is to give improved effect to the LUPA requirements as well as to more clearly spell

	out the role of the Municipal Manager in this. Previous wording has been replaced by new wording.
6(1)	<p>This is to provide for the situation where the municipality does not establish a project committee, whereas it is really the function of the municipality to do this, but they may use a project committee for this purpose. This amendment occurs in various instances in sections 6-8 and will not be repeated.</p> <p>Insertion of “relevant area” - this is to provide for smaller or localised amendments to a SDF, where it may not be necessary to do a draft status quo report for the whole area, but just for a smaller relevant area. This amendment occurs in various instances in sections 6-8 and will not be repeated.</p>
6(5)	Replace “comments and representations” with only “comments” - this occurs in various instances in the document and will not be repeated. The reason is that “comments” is defined in section 1 which definition includes “representations” and it will be confusing if it is mentioned separately. This suggested change occurs in a number of instances and will not be repeated again.
7(2)	Improved referencing in order to provide more clarity and to provide a clear distinction between the two documents.
8(1)	Reflect that the Executive Mayor is the designated political office bearer to oversee the MSDF process.
8(1)(a)	The municipality must ensure and not oversee. This amendment occurs in various instances in section 8 and will not be repeated
8(1)(f)(i)	Improved referencing.
8(2)(b)	To provide for instance if a project committee was established, which is now an option and not compulsory as it was in the previous version of the by-laws
9(2)(d)	The word “recommended” is better legislative grammar than “proposed”, but it is also inserted to indicate and make it clear that the parameters in a local SDF as a policy document can only be proposed/recommended as a local SDF cannot give rights and development parameters - if the word “recommended” is not inserted it may be misconstrued as that it does.
13(3)	Change to be accepted. The reason is to make it very clear that - if after the “fact finding mission” it results in 2(e), i.e. no zoning could be determined, then the action which must be followed by municipality to give effect to 2(e) would be to rezone the land from “unknown” to its new zoning whatever it is to be, via a rezoning process, in which case the municipality will be the applicant and will have to comply with all relevant provisions of the by-law as set out in the new sections 15(5) and (6) and amended (7). Initially it was not clear what is to happen in such a case.
Heading of section 15	Inclusion of “and other approvals”, as not all the matters in 15(2) are land development applications in terms of SPLUMA, some are not and hence the addition of “other approvals”. Additional reasoning will be found in comments at section 68. This amendment to the heading is also to facilitate and enable the suggested amendments to section 68.
15(2) occasional use	Deleted occasional use as an application type as an “occasional use” is in essence a temporary departure for a specific occasion or event on a specific site and as such it is distinguished from the normal temporary departure as in section 18(4) provision is made that it may be granted more than once on a specific land unit and in section 66(2)(y) provision is made for specific conditions in this regard. As a result, occasional use as a specific application has been removed.
15(2) home owners’ association	The word “home” was removed as industrial or business areas may also have owners’ associations, so the new wording is a more generic term as home owners’ associations are only linked to residential uses.
15(4)	This section in the existing Bylaw which refers to section 52 of SPLUMA is deleted in total. Firstly, is it only informative, but secondly it lends municipal credibility to a SPLUMA provision, the content of which is regarded unconstitutional. If section 52 of SPLUMA is challenged or amended, it may mean that the by-law will have to be amended as a result. Downstream re-numbering occurs as a result of this deletion.

15(4)	Renumbered - Existing Bylaw 15(5) now 15(4) in new Bylaw
15(5) & (6)	<p>Renumbered and this sections was inserted to make it clear that when the municipality undertakes these activities, what the process is that must be followed and then links it to the new section 15(7) which provides that when the municipality undertakes these activities, it is then an applicant and must adhere to all application requirements.</p> <p>Also Section 13(3) was inserted in (5) as well as there may be instances where there is a need for a municipality to rezone as a result of an unsuccessful zoning determination and where no request from an owner is forthcoming and where it does not meet the requirements of section 17(1).</p>
15(7)	<p>Renumbered, deleted and replaced with new wording was inserted. Subsection 7(a) was inserted and reworded to make it clear that where the municipality is the applicant it must follow all procedures which an ordinary applicant would normally have to comply with in terms of the by-laws.</p> <p>The addition of subsection 7(b) is to identify the types of applications, where the municipality is the applicant, that must be considered by the MPT and not by an AO, so as to ensure or build in some impartiality facilitated by the outside persons serving on a MPT. This provision has changed from previous version in terms of which all types of applications by the municipality had to be decided on by the MPT.</p>
17(5)	Insertion of "reckoned" the reason is improved wording to make it clearer.
17(6)	Improved wording to make it clearer.
17(6)(a)	The word "and" was replaced with to "or" to prevent the situation where compliance with one of the two provisions will keep the rights alive, which is not the intention.
18(4)	The new insertion is necessary due to the fact that an occasional use was removed as a separate application, due to it being a temporary departure, but it requires some kind of distinction from an ordinary temporary departure so that it can be granted more than once on a specific land unit. It thus describes the "occasional use as right to utilise land for a purpose granted on a temporary basis for a specific occasion or event.
21(1)(d)	This is to provide for an additional method to secure confirmation of the subdivision by means of a certificate of registered title to provide for circumstances where the economy is not conducive to selling of erven and can then save the subdivision from lapsing. The option for a certificate of consolidated title has been removed as it is irrelevant and not applicable when dealing with the confirmation of a subdivision.
22(2)	Insertion to result in improved wording to make it clearer.
23(1)	Alternate wording to make it clearer.
23(4)	A total reword, the reason being to prevent the "stopping of the clock" by way of submitting an amended subdivision, however small the changes may be, as it can be abused to gain more time beyond the original validity period. The conservative approach suggested is favoured. This was confirmed at the Municipal Planning Heads Forum on 17 May 2017.
24(1)(f)(iii)	Improved grammar as a result of new (v)
24(1)(f)(iv)	Improved grammar as a result of new (v)
24(1)(f)(v)	New insertion, the reason is to provide for an additional exemption of a matter not really of municipal interest, to lessen the administrative burden and red-tape.
24(1)(g)	The existing provision for the exemption for the subdivision of agricultural land in some instances is removed. The subdivision of productive farming units in the context of the Stellenbosch rural landscape and its value to the space economy of Stellenbosch requires sensible consideration and if exempted from an application, the role of municipal planning is forfeited. An exemption for the subdivision of agricultural land also denies the municipality of the opportunity to institute conditions which may be required. Accordingly, the provision for this exemption is removed from the Bylaw.

24(1)(g)	<p>This is a new section 24(1)(g) that deals with a separate matter than the (g) above that is being removed as discussed above.</p> <p>This insertion is to provide for sectional title development scheme to be also exempted. Currently with the wording of the definitions of "land" in SPLUMA and LUPA includes a sectional title scheme (part of a real right), which again is an unintended consequence. Making it an exemption in the by-laws achieves the object easier than amending SPLUMA and LUPA.</p>
24(4)	New section inserted. This insertion is necessary to ensure that where there is a court order, an expropriation or a sectional title scheme is applicable, that no certification of the municipality will be necessary. If the Courts have made a ruling, how can a municipality then still need to make a certification in order to achieve compliance with a court order?
Heading of section 25	The reason is improved wording to make it clearer and to ensure that the heading encompasses the content of 25(1) and (2) and be aligned with it - as the content addresses "amenities" whereas the heading referred to "social facilities" which may be confusing.
26(1)	Insertion of "its" - the reason is improved wording to make it clearer.
26(4)(b)	The reason is improved wording to make it clearer and to distinguish it from (c)
26(4)(c)	The reason is improved wording to make it clearer and to distinguish it from (b)
27(a)	This emanated from a historical situation and may not always be the case anymore. This is why the words "without compensation" has been removed and replaced with "as may reasonably be required".
28(1) and (2)	<p>These changes emanate from the change in section 21 that a certificate of registered title should also be able to confirm a subdivision. Since this changes the status of land is necessary that the section 28 certification also be amplified by adding the certificate of registered title and certificate of consolidated title where applicable. Whilst this provides for more options for the developer, it simultaneously increases the obligations and legal effect in that actions which would normally have followed registration of transfer. It is there necessary to subject these to certification as well, hence the insertion.</p> <p>The option for a certificate of consolidated title has been removed as it is irrelevant and not applicable when dealing with the confirmation of a subdivision.</p> <p>Due to the omission of former sections 28(3) (a) & (b) [see below] with new resulting numbering, the corresponding omission of reference to such numbering and replacing "<i>subsection (3)(a) to (d)</i>" with "<i>subsection (3)(a) to (b)</i>"</p>
28(3)(a) & (b)	These provisions as provided in former Bylaw has been removed from the new Bylaw as it has transpired that the transfer of a property may not be held back due to outstanding money.
28(3) (a), (b), (c) & (d)	Due to the omission of former sections 28(3) (a) & (b), the former sections 28(3) (c) & (d) are now renumbered from former (c) to new (a) and former (d) to new (b).
28(3)(a), (a)(i), (b)(i)-(iii)	(With reference to newly numbered sections) Improved wording to make it clearer and renumbering to improve numbering
28(3)(a)(ii)	(With reference to newly numbered sections). This is to ensure that no land to be transferred to the owners' association is left in the hands of the developer/applicant and prevent many problems experienced in this regard in the past.
28(3)(b) and (b)(i)	(With reference to newly numbered sections). This is to highlight and ensure that where confirmation of a subdivision via certificate of registered title occurs it will also result in these transfers where required. The option for a certificate of consolidated title has been removed as it is irrelevant and not applicable when dealing with the confirmation of a subdivision.
29(3)	Improved wording to make it clearer.
29(5)	This is a logical amendment in that the constitution of the owners' association cannot take effect before the owners' association comes into being which as set out in section 28(3)(c) can only occur after registration of first land unit to a person different to the developer/applicant.

29(7)(b)	Improved wording for the same reasoning as for 29(5) above
30(1)	Deletion as it is already provided for in section 15(2)(p)
30(1)(a) and (b)	Improved referencing as number needed to be amended as “occasional use was taken out of the list in section 15(2).
30(2)	Improved referencing
33(1) and (1)(a) and (b)	This was deleted as it is now provided for and included in the new section 15(6) in order to result in an improved grouping of matters and to distinguish the permanent removal from those which may be suspended for a specific period.
33(1)(c)	Rewording to provide that the removal, suspension or amendment of a restrictive condition, can be made subject to conditions.
33(2)	Amended with the omission of subsection (2)(b) for requirement of bondholder's consent in line with proposed LUPA amendments. The omission of this requirement would not mean that it does not have to be submitted if the corresponding sections in LUPA are eventually not amended to delete the requirement for a bondholder's consent.
33(3), (3)(b), (4), (5) and (6)	Renumbering to (2) as a result of upstream adjustments and to improve wording to make it clearer.
33(3)(b)	Addition of the wording “materially and adversely” to existing provision in line with proposed amendments to LUPA.
33(7) and (8)	New clauses inserted as previously a land use application was done in terms of LUPA and the removal, suspension or amendment of a restrictive condition in terms of the Removal of Restrictions Act, 1967. Now they are all done in terms of the same legislation (as a result of the provisions of SPLUMA) and since this is the case these matters should be applied for and considered simultaneously, which is what these 2 new sections require and provide for.
34(1)	Improved referencing.
35(1)(b)(i)-(ii), and (d)	The reason is improved wording to make it clearer and to provide for more options.
35(2)(a)-(d) and (3)(b)	Improved grammar.
36(2)(c)	Improved grammar to not make it a closed list.
37(1),(2) & (3)	Make provision in addition to requirement for a pre-application consultation meeting to also allow for a practise for a pre-application consultation by means of a submission with corresponding requirement for the municipality to issue and keep record of feedback on such pre-application submission.
38(1)	This insertion is to improve the wording to provide for situations where perhaps not all the documents in this list are necessary for a specific application and to enable the outcome of the pre-consultation meeting in 38(2) to determine which documents may not be relevant or applicable.
38(1)(c)	The reason is improved wording to make it clearer.
38(1)(e)	Omission of subsection (1)(e) for requirement of bondholder's consent in line with proposed LUPA amendments. The omission of this requirement would not mean that it does not have to be submitted if the corresponding sections in LUPA are eventually not amended to delete the requirement for a bondholder's consent. Corresponding renumbering from (e) to (o) – which now stops at (n) with the omission of former (e).
38(1)(e) [former(g)]	The matters provided for in 65(a), (b), (d), (e) and (g) are not matters which can be addressed in a motivation for an application when it is first submitted as these matters and aspects follow only after submission of the application. As such these matters are now excluded as it would not be practically possible to comply with them.
38(1)(o) [former(n)]	Improved grammar
38(1)(n) [former(o)]	Insert wording to reflect the record of a pre-application submission in accordance with changes in 37 (1) to (3) above.

40	Improved referencing
41(1)(a) and (7)	Improved grammar
45	This section on the publishing of notices is replaced in its entirety with a new section 45 which is in line with proposed amendments in LUPA which will provide more discretion to the Municipality for the requirements on the publishing of notices in accordance with requirements of PAJA. The former Section 45(4) and (5) is retained as new sections 45 (12) and (13). Requirements that municipality, as applicant, is also subject to these provisions – former (5) is omitted as it is now provided for in the new section 15(5)-(7) - there is no need to make this distinction.
46	This section on the serving of notices is replaced in its entirety with a new section 46 which is in line with proposed amendments in LUPA which will provide more discretion to the Municipality for the requirements on the serving of notices in accordance with requirements of PAJA. The former Section 46(4), (5) and (6) is retained as new sections 46 (9), (10) and (11). Requirements that municipality, as applicant, is also subject to these provisions - former (7)- is omitted as it is now provided for in the new section 15(5)-(7) - there is no need to make this distinction.
47	This section retains only some requirements not provided for in sections 45 and 46. Former subsections (d) to (i) are omitted which is fully covered in new sections 45 and 46.
48(2)(a)	Consequential amendment of referencing due to new section 45 and amended section 47.
48(2)(e)	Removed “or” as improved grammar as any one or more of these possibilities could be opted for.
Heading of section 50	Improved grammar
51(1) and (2)	Improved referencing and grammar
51(2)	Change period for comments from an organ of state from 60 days to 30 days to improve timeframes on the processing of applications.
51(2)(a) and (b)	To provide more clarity on dates and to improve wording to make it clearer and also to provide and regulate for a situation where a commenting body requires additional information to enable it to provide comments.
51(3)	This insertion is an attempt to improve accountability when there is non-performance by a commenting body in so far as provision of comments are concerned.
53(2)(a)	Delete “and” to ensure that either one or both can be required.
53(2)(b)	Improved wording to make it clear that where applicable other organs of state or service providers must again be notified.
54	Deletion of referencing as it is simpler to refer to this by-law rather than to list the section, as these may change in future, thus preventing unnecessary amendments to the by-laws.
55(5)	Amended wording to provide more clarity and regulation on how to obtain additional information or documents (and time) when it is needed as a result of comments received pursuant to the notification process which was followed.
55(6)	Amended wording as at this stage the application is already complete, and processes have started. Section (5) above provides for such additional information or documents, but regulates that if it is not submitted, then consideration of the application must proceed without the relevant additional information or documents. The application process should not be further delayed as a result.
56(1)	Improved grammar and sentence construction.
57(1) and (2)	Improved grammar, referencing and sentence construction.
59(1) and (2)	The reason is to provide for a MPT member to also be able to inspect a property.
59(2)(a)	Improved wording to make it clearer and to link the record, document or item to be produced, to the purpose of the investigation.
59(2)(c)	Delete “or” as there is no need to link these items with an “or” as the option should be there to do one, some or all of the options.

59(5)	Improved wording to make it clearer, but also to provide for an inspection where written consent could be obtained so that a warrant is not necessary.
60	Improved referencing
61(1) - with new (a) and (b), and (2) – with new (a) – (d).	The amendments are consequential to amendments to 45 and 46. The changes Although these changes are linked to the changes to section 45 and 46, it also represents a general improvement that may stand on its own.
65	Renumbering as a result of deletion of section 65(2)
65(c)	Adding subsections (i) – (viii) in order to provide guidance with specific relevant considerations to determine the desirability of a proposed use or development of land.
65(g)	This improved wording is to make it clear that it refers to the municipality's planner's assessment and that it is not a requirement that the relevant applications may only be submitted or must (as application) be accompanied by an assessment of a registered planner.
65(g)(vii)	This wording has been deleted, because if a zoning determination results in a rezoning it is already covered in 65(g)(i) and is also addressed in section 13(3) on the process of zoning determination.
65(j) (o), (r) and (s) and new (t) and (u).	Improved grammar and sentence construction and insertion of new (t) i.e. include restrictive title conditions if any, is to be a relevant consideration when determining a land use application. (u) is added in order to consider the heritage impact and in terms of section 38(8) of the National Heritage Resources Act 1999 (Act 25 of 1900).
65(2)	This whole section was removed, firstly because there may be other considerations or reasons on which a site development plan may not be acceptable. Secondly, as will appear more fully in section 15(2) and 68, a site development plan when following from a land use approval is not seen as a land development application.
66(2)(l)	No real purpose in referencing this section 31, there may even be other relevant sections and when the Deeds Registries Act is amended may then effect this section of the by-law, necessitating an unnecessary by-law amendment.
66(2)(y) and (y)(iii)	This links to the insertion in section 18(4) and provides for specific requirements/conditions which may be imposed as part of an occasional use seen as a temporary departure for a specific occasion or event, and to separate or distinguish it from an ordinary temporary departure.
66(2)(z)	The word "levy" has throughout been replaced with "penalty" as it is really a fine or punishment for a contravention as opposed to the previous dispensation under LUPO when payment of a contravention levy actually "bought" a person a right, which is not the case anymore. Even after payment of a contravention penalty will the submission of a suitable land use application be required.
66(3)	Improved wording to make it clearer.
66(11)	<p>(1) Initially amended to provide that it may include a certificate of registered title and certificate of consolidated title as potential milestones where certain conditions must be complied with.</p> <p>(2) Since it has the same effect section 66(2)(x) <i>"the setting of a period within which a particular condition must be met"</i> it was deleted and replaced with a section to give effect to the Minister of Rural Development and Land Reform's exemption to the province of the Western Cape from section 43(2) of SPLUMA in terms of section 55 of SPLUMA, where by the original 5 years is replaced for a period of 10. The exemption is effective for a period of 15 years, provided that:-</p> <ul style="list-style-type: none"> a) the municipality resolves to accept and implement this exemption; and b) the municipality regulates for the exemption in the prescribed manner in their land use planning by-laws; which <p>is what the reworded section 66(11) seeks to achieve.</p>
66(12)	This section was deleted as it is now provided for in the new section 15(5) -(7)
67(1)	Rewording to improve the understanding of the section and in which the link to section 43(2) of SPLUMA has been removed. This link was removed to provide for the instance that either SPLUMA section 43(2) is amended or if and when

	the Western Cape is granted exemption from this section of SPLUMA. Section 43(2) of the Spatial Planning and Land Use Management Act will remain applicable until the Act has been amended or an exemption has been granted.
Heading of section 68	This change in heading is necessary due to the separation of matters which are considered SPLUMA land development applications and those which are not considered as such. As such some of these may become Council/delegated decisions in which cases the MSA section 62 appeals may be applicable. This appears more fully in sections 68(a)-(e)
68	Since there can now be more than one appeal authority (as a result of MSA 62 and the interpretation above, it is necessary to specify appeals considerations as well.
68(a) & (b)	This is to identify the application types in 15(2) which are regarded as land development applications for the purpose of SPLUMA compliance. The lists in paragraphs (a) and (b) are the same, noting that paragraph (a) relates to the AO and paragraph (b) relates to the MPT. This same comment is applicable to (b) and will not be repeated there.
68(c)	This is to identify the application types in 15(2) which are not regarded as land development applications for the purpose of SPLUMA compliance and which may be considered by the Municipality in terms of delegations.
68(d)	This section determines that for those matters for consideration in (a) and (b) above, the SPLUMA defined Appeal Authority is the appeal authority.
68(e)	This section determines that for those matters for consideration in (c) above, the Council's MSA 62 Committee is the appeal authority if it was decided by a committee of the Council or a delegate of the Council. If the full Council decided on the matter, then there can be no MSA section 62 appeal.
69(1)	This provides for categorisation of those matters which for the purpose of SPLUMA compliance are regarded as land development applications to an AO
69(2)	This provides for categorisation of those matters which for the purpose of SPLUMA compliance are regarded as land development applications to the MPT.
71(1)	Improved referencing
71(3)(a)(vi)	Improved wording by replacing 'and' with 'or' to make it clear that it can be any of these
71(3)(a)(vii)	Improved referencing.
72(1)(b)	Improved referencing.
72(2)(c)	To provide for self-nomination which was not provided for before and which is not prohibited in SPLUMA.
72(2)(d)	To provide and regulate for a closing date for submission of nominations, which was not provided or regulated for before and not prohibited in terms of SPLUMA and provide for administrative certainty.
72(3)(a)	To provide for acceptance of nomination if it is not a self-nomination. A self-nomination is deemed to be accepted.
72(3)(c)	Improved grammar to provide for a complete list.
72(3)(d)	Improved grammar.
72(3)(e)	This was reworded and moved to 72(2)(d)
72(4) and (5)	The word skill was replaced with experience as this is the term used in SPLUMA to be aligned with it.
72(9)	Improved grammar – no need to refer to he/she as the introduction part of (9) already refers to "a person".
72(11)(c)	Improved referencing
73(2)(b)	The reason is improved wording to make it clear that when the chair resigns he/she must inform the Council as it is Council who appointed the Chair. Although the other members are also appointed by Council, the chair manages the MPT and needs to be aware of who resigns, the chair will then in the normal course of events inform the Council accordingly, but there is no practical purpose of when the chair resigns to inform anybody else other than the Council who appointed him/her.
73(7)(a)	Improved grammar and sentence construction.
73(7)(b)	Improved wording to make it clearer.

74(1)(b)	Improved use of capitalisation.
74(4)(a)	Spouse was omitted and is now included to be aligned with SPLUMA regulations, Schedule 3.
75(3)	Improvement of referencing, grammar and wording to make it clearer.
75(6)	Deletion of “simple” there is no point in making the majority a simple majority.
75(7)(a)	The initial wording did not really make sense. SPLUMA also does not regulate this, so just using the term majority will suffice.
75(7)(b)	Improved wording to make it clearer.
77(2)(a)	Improved wording to make it clearer. Applications are not filed with the MPT, they are submitted to the municipality and determined by the MPT.
79(3)	Improved wording to make it clearer as section 57 provides for 3 different periods whereas the initial wording did not recognise this.
79(4)	Improved wording and linking it directly to the provisions of section 80(1).
79(5)(a)	Improved referencing
80(1)(a)	Change required as a result of the interpretational challenges that the word “and” leads to – the intention is that either (a) or (b) should trigger an invalid appeal and not both combined as it would lead to an absurdity.
80(1)(b)	Improved wording to make it clearer of what an appeal should consist of and to improve the grammar.
80(3)	This is to make it clear that where appeal fees are payable that it must be paid within the period set out section 79(2) and not afterwards.
80(6), (9), (11)(a) & (b)	Improved wording to make it clearer.
80(11)(a) & (b)	Changed time periods from 60 days to 30 days in accordance with proposed LUPA amendments.
80(16)	Owner was replaced by appellant as it is not only the owner who may submit an appeal.
81(6)	Improved wording to make it clearer.
81(8)	Improved grammar.
81(13)	New addition in line with proposed LUPA amendments. This action is possible in terms of PAJA regardless of this addition.
Heading of section 83	Improved wording to make it clearer. SPLUMA links development charges to engineering services whereas there may be charges for amenities as well. This heading will now be more aligned to the content of section 83, which has not been amended.
84(1)	Improved referencing.
85(1)(c) and (d)	Municipality is only to enforce the conditions imposed in terms of the by-laws and laws repealed by LUPA. It cannot be all title conditions as many of these may be so-called “contractual” conditions in which the municipality has no role to play. It is the statutory provisions which must be enforced by this, it is submitted that it will be covered by the proposed improved wording and the deletion of (d)
86(1)(a)	This change is as a result of a deletion of section 15(4) which resulted in 15(5) now becoming 15(4)
86(1)(c)	Change to be accepted. Just improved wording to make it clearer and to link this to amendment made in section 28(3)(c) relating to certification where an owners’ association is involved.
86(2)	Improved wording to make it clearer as this deleted content is already included in the first part of this sentence.
86(4)	Change “must” to “may” to provide a municipal choice to adopt fines or not and not make it compulsory.
87(1) and (2)	The owner is not necessarily the contravener on who the notice must be served. The word owner is deleted to facilitate this.
87(2)(b)	Improved grammar.
87(6)	Improved wording to make it clearer.
88(1)(b)	Improved grammar as the word “concerned” adds no further meaning here and can be deleted.
88(2)	Include wording “and until” to improve understanding that the compliance notice is suspended if and from the time when an objection is submitted.

89(1)	The owner is not necessarily the contravener on who the notice must be served. The word owner is deleted to facilitate this.
89(2)(a)	Improved grammar.
90(b)	Improved wording to make it clear that it can be the magistrate or other court as well. Courts have their own jurisdiction, and it is not for the municipal by-laws to determine this and there is no need that this matter must be applied for at the High Court.
90(c)	To provide for additional methods for law enforcement.
92(2)	Improved wording to make it clear that it can be the magistrate or other court as well. Courts have their own jurisdiction, and it is not for the municipal by-laws to determine this and there is no need that this matter must be applied for at the High Court.
93(1)	Improved wording to make it clearer and to improve the content.
94(1)	Improved grammar and referencing.
94(1)(a) and (c)	Improved wording to make it clearer.
95(2)	To provide for affirmation as well as an alternative to an oath.
97	Improved wording to make it clear that it can be the magistrate or other court as well. Courts have their own jurisdiction, and it is not for the municipal by-laws to determine this and there is no need that this matter must be applied for at the High Court.
98(4)	Improved wording to make it clearer.
99	Renumbered the first paragraph to (1) (<i>since a 2 is to be added</i>) and inserted a description of which by-law is to be repealed (by date) –consequently not necessary to retain table in Schedule 2 of former bylaw.
99	<i>(In addition to the comments directly above)</i> A new section (2) and (3) has been added to regulate and facilitate the transition between the repealed and replacement by-law to ensure the seamless transition and to avoid any uncertainty and ambiguities. It is important to year-date-name the by-laws.
100	Wording amended in accordance with approach to repeal and replace existing Bylaw with the new proposed Bylaw.
Schedule 1	
1(a)	Improved grammar
1(c)	Improved grammar and sentence construction as it is implicit in the rest of this section that a MPT member is already a decision maker.
2(a) and (b)	Improved grammar and wording to make it clearer.
Schedule 2	Omit Schedule 2 as this aspect has been provided for in section 100(1) – no further need for this table.

ANNEXURE C

ANNEXURE “C”

Stellenbosch Municipal Land Use Planning Bylaw Review 2022

Record of reasoning of additional proposed amendments

(Reflecting amendments from the 2015 version.)

Section reference	Reasoning or motivation for amendments
13(2)(e) & (3)	<p>Omit the proposed reference of “<i>If subsection (2)(e) is applicable...</i>” of the draft Bylaw to read in accordance with the current bylaw provision, save for the alternative process to undertake a rezoning process to establish the land use rights:</p> <p><i>“If the lawful zoning of the land contemplated in subsection (1) cannot be determined, the Municipality must rezone the land concerned in terms of section 15(2)(a).”</i></p>
15(2)(k)	To include a consolidation plan as a type of application for amendment or cancellation to be considered. It was an oversight to never have such type of application.
18(6)	Propose the inclusion of new Section 18(6) to provide that an approval for a temporary departure lapses if not implemented after one year of such approval being granted. It is with the understanding that the total effective period of a temporary departure will remain a total of 5 years from effective date of approval.
24(1)(f)(i)	<p>Current provisions only provide for linear infrastructure, and also excludes that private landowners may require such servitudes. Proposed amendment to also include certain area structures like boreholes or infrastructure related to linear infrastructure. Propose amendment includes the combination of Sections 24(1)(f)(i) and 24(1)(f)(v).</p> <ul style="list-style-type: none"> (f) the registration of a servitude or lease agreement, for— (i) the provision of a borehole or installation of water pipelines, electricity transmission lines, sewer pipelines, storm water pipes and canals, gas pipelines or oil and petroleum product pipelines or related infrastructure by a service provider, whether it is on behalf of an organ of state or not; (ii) the provision or installation of telecommunication infrastructure by or on behalf of a licensed telecommunications operator; (iii) the imposition of height restrictions; or (iv) the granting of a right of habitation, private right of way or usufruct.
24(4)	The proposed inclusion of this new section to the Draft Bylaw creates a potential difficulty for the municipality. If no certification is required for such instances the Municipality will otherwise not carry any knowledge of such cases. As there is no obligation to exclude such cases from obtaining the required certificate from the municipality, it is proposed to omit this provision that will ensure that these cases are noted by the municipality by obtaining the required certificate from the municipality.
33(1) – (a) & (b)	The current provision of the Draft Bylaw only refers to and make provision for the temporary “suspension” of a restriction in a title condition for a specified period of time, which temporary suspension will only relate to a land use activity.

	<p>Regarding development parameter restrictions, there are instances where it is not desirable to remove a title condition altogether where the scope of the proposed development has a minimal impact on the title condition.</p> <p>It is consequently proposed to include a provision for the permanent “suspension” of a title deed restriction as it relates and is attached to a specific extent of a proposed development. This approach is also preferred to the alternative but cumbersome option to amend the title conditions.</p> <p>Section 33 (1) is accordingly amended with the inclusion of the option to suspend a title condition permanently in new proposed Section 33(1)(b). Renumbering of former proposed Section 33(1) (b) to 33(1)(c) and 33(1)(c) to 33(1)(d) accordingly.</p>
33(2)	<p>Due to the new electronic regime of submitting applications, the requirement for a “certified” copy of the title deed is problematic and as this is also not a minimum requirement of the framework planning acts, this requirement is omitted from the draft Bylaw.</p>
33(9)	<p>Many enquiries are received on the process in terms of which the municipality may grant a permission as provided for in certain title deeds. It is understood that the Bylaw should not regulate on these matters which may result in undue unintended actions like appeal processes provided for in the Bylaw, it is proposed to include a new section aligned with associated Section 45(6) of the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013), which will provide clarity on this matter.</p> <p>New section 33(9) proposed:</p> <p style="padding-left: 40px;">Where a condition of title, a condition of establishment of a township or an existing scheme provides for a purpose with the consent or approval of the Municipality, such consent must be requested and may be granted by the municipality in terms of the provisions as provided for in the subject title deed.</p>
46(2)(f)	<p>The requirement that a decision must be communicated in at least two of the official languages of the province will result in undue operational difficulties and it is proposed to omit this requirement.</p>
51(3)	<p>In the Draft Bylaw this section compelled the municipality to report all instances of non-performance to provide inputs/ comments to the executive authority of that organ of state, the Minister and relevant MEC. This may not in all instances applicable and can but an undue burden on the municipality. It is consequently proposed to change the provision from “must” to “may” so as to provide for a discretion for instances where non-compliance is enduring or consistent.</p>
60	<p>Inclusion of wording “<i>or the Municipality by virtue of section 68(c)</i>”. It was an oversight to not include the decisions that the Municipality needs to take on the qualified application types referred to in section 68(c), as section 60 is the empowering provision to make decisions on applications listed in section 15(2).</p>
Former 66(11)	<p>In the Draft Bylaw, Section 66(11) of the current Bylaw was omitted on the basis that the wording of Section 66 in general inherently provides for a distinction between conditions that must be complied with or not prior to the sale, development or transfer of the land.</p>

	<p>On reconsideration it is proposed to retain this provision for the sake of clarity, but it is also proposed to amend such provision as an absolute requirement (must) to a discretionary provision (may):</p> <p><i>"66(11) If the Municipality approves a land use application subject to conditions, it may specify which conditions must be complied with before the sale, development or transfer of the land."</i></p> <p>The new proposed Section 66(11) of the draft Bylaw will be included as the new Section 66(12) in the Final Draft Bylaw.</p>
66(12)	<p>This new section includes unintentionally and erroneously that a temporary departure will remain valid for 10 years prior to implementation, whilst the provisions in section 18, and specifically the new proposed Section 18(6), have specific provisions on the validity period for this type of land use approval. It is accordingly proposed to amend 66(12) to exclude approvals for temporary departures.</p> <p>66 (12) Notwithstanding the provisions of any other section in this By-law, and the exclusion of section 18(1)(b), a conditional approval of an application lapses if the conditions therein are not complied with within :-</p> <ul style="list-style-type: none"> (a) a period of ten years from the date of such conditional approval, if no period for compliance is specified in such approval; or (b) the period for compliance specified in such conditional approval, which, together with any extension which may be granted, may not exceed ten years.
80(3)	<p>Tariffs also require appeal fee from appellants other than applicants. It is thus proposed to amend the wording in the Final Draft Bylaw to refer to "a person" to include any party that submits an appeal.</p>
88(1)(v)	<p>Requirement for including the amount of the contravention penalty in the notice has practical implications and it is proposed to omit the wording to this effect.</p> <p>(v) in the case of an application for authorisation of the activity or development parameter, the contravention penalty in the amount as stated in the notice, including any costs incurred by the Municipality, may be imposed.</p>
89	<p>It is a concern that this provision for an objection against a notice may result in recurring actions with no results. Amendment proposed to ensure that reference is made to a decision taken on appeal to signify the end of the process.</p> <p>88(2) (b) must specify the period within which the person to whom the compliance notice is addressed must comply with any part of the compliance notice that is confirmed or varied as contemplated in subsection (2)(a).</p>
100	<p>To determine that the Bylaw will come into operation on 1 July 2023</p>

STELLENBOSCH MUNICIPALITY:

***CATEGORISATION MODEL FOR DECISIONMAKING ON LAND USE AND LAND
 DEVELOPMENT APPLICATIONS IN TERMS OF SECTION 69 OF THE BYLAW ON
 MUNICIPAL LAND USE PLANNING 2023***

EFFECTIVE 1 JULY 2023

1. PURPOSE AND CONTEXT

The purpose of this Categorisation Model is to:

- 1.1 To determine and assign, in terms of Section 69 of the Bylaw on Land Use Planning, 2023 – hereafter referred to as *the Bylaw*, and as contemplated in terms of Section 35(3) of the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) [SPLUMA], categories of land use and land development applications in terms of Section 15(2) of the Bylaw for decision making; and
- 1.2 To duly appoint Authorised Employee's [AE] in terms of Section 68(a) of the Bylaw to supplement the Municipal Planning Tribunal [MPT], established in terms of Section 70(1)(a) of the Bylaw, to make decisions on land use and land development applications as contemplated in terms of Section 69(1) of the Bylaw.
- 1.3 All applications contemplated in terms of Section 68(c) of the Bylaw, and which are not regarded as land use and land development applications, will be duly decided on by the authorised employees in terms of the system of delegations approved by Council.

2. GENERAL PRINCIPLES ON DECISION MAKING

The categorisation model is based on the following general principles on decision making for all categories of application types:

- 2.1 When a land use and land development application consist of any number of individual types of applications as contemplated in terms of Section 69 of the Bylaw, the decision maker required to decide on the highest category of applications must decide on the full extent of all associated applications of lesser categories, regardless of the cited authorised decision maker on those categories of applications.
- 2.2 If any of the Authorised Employees have a personal or vested interest in any application which he/ she lawfully has to consider, or may be implicated by taking a decision on such application due to his/ her professional involvement in the processing of such application, or does not comply with the requirement of registration with SACPLAN as a Professional Town and Regional Planner, he/ she must refer such application for consideration to the Authorised Employee at the next higher post level for consideration and a decision. In the instance of the Director responsible for the land use planning functionality, such application must be referred to the Municipal Planning Tribunal for consideration and a decision.
- 2.3 When an authorised decision maker does not agree with the evaluation and recommendation of the application and which in his/ her judgement affects the application category to the effect that he/ she may not decide on the matter, the subject application must be escalated with such rationale and motivation in accordance with the newly established application category to the designated authorised decision maker.
- 2.4 When an objection to an application is officially withdrawn by the objector, the application will, for the purpose of classification of type of application for decision making, be regarded as uncontested and may be decided on as if there is no objection to the application.
- 2.5 When an application is conditionally supported, and such conditions are relevant to the merits and desirability of the subject application to be considered

on, the subject application will be regarded as uncontested insofar as the conditions attached to such support are found warranted and are fully accommodated in any recommendation of the authorised official and the associated approval that may be granted by the authorised decision maker. If the conditions attached to such support is not supported and will not be accommodated in the recommendation and any associated approval that may be granted, the subject application should be viewed as being contested and regarded as an objection for the purpose of categorisation of the subject application.

- 2.6 Any application for the amendment, deletion or imposition of conditions, as well as an application for the amendment or cancellation of an approved subdivision plan or part thereof, or a consolidation, and including a general plan or diagram, and which includes the phasing thereof, will generally be considered and decided on in terms of the categorisation model, but should the registered planner authorised to assess such application be of the opinion that the potential impact of such application, and with due consideration of any objections thereto, should warrant that the authorised decision maker that decided on the subject application of origin must consider and decide on such application, such discretion may be exercised to refer the subject application to such authorised decision maker that decided on the application of origin.
- 2.7 In instances where the Municipality is the applicant or the owner of land which is subject to a land use and land development application, the provisions of Section 15(7)(a) of the Bylaw regarding the decision maker applies. In all other instances the decision maker on the subject land use and land development application will be categorised in accordance with the criteria of the application category.

3. CRITERIA OF CATEGORISATION MODEL

For the purpose of interpretation of the relevant criteria in the application categories, the following meanings is assigned to the relevant concepts:

3.1 Compliance to land use planning directives

If any plan, policy, guideline or associated land use planning directive specifically provides for the utilisation or development of land as proposed in a land use and land development application, the proposed utilisation or development is regarded as being in compliance with prevailing land use planning directives.

3.2 Consistency with land use planning directives

If any land use planning directives do not specifically provide for the utilisation or development of land as proposed in a land use and land development application, but the proposed utilisation or development of land is implicitly and rationally supported by relevant land use planning directives and explicitly supports and promotes the intent and purpose of any such prevailing land use planning directive, the utilisation or development is regarded as being consistent with prevailing land use planning directives.

If there are no clear grounds for consistency, but the proposed land use and land development application is also not explicitly prohibited or constrained by any relevant land use planning directive or otherwise implicitly in conflict with the intent and purpose of any relevant land use planning directive, or will not impact negatively on any prevailing locational, development or spatial context as depicted in any relevant land use planning directives, the utilisation or development of land is regarded as not being inconsistent with prevailing land use planning directives.

3.3 Deviation from land use planning directives

If the proposed utilisation or development of land in a land use or a land development application does not comply with and is not consistent with any plan, policy, guideline or associated land use planning directive, but excluding any application for a permanent departure from development parameters as provided for, the proposed utilisation or development deviates from prevailing land use planning directives. Such land use and land development application

will explicitly or implicitly be prohibited or constrained by any prevailing land use planning directive and be in clear conflict with the intent and purpose of any such prevailing land use planning directive and will otherwise in fact impact negatively or undermine the prevailing locational, development or spatial context.

4. APPLICATION CATEGORIES

The categorisation model is based on the following categories of application types:

4.1 Category 1 – Application is compliant and uncontested.

- a) The land use and land development application are compliant with the municipal spatial planning framework.
- b) The land use and land development application are compliant with any relevant Council plan, policy or guideline.
- c) No objection from any interested or affected party was submitted against the proposed land use and land development application, with due regard to the relevant general principles in this regard.

4.2 Category 2: Application is not inconsistent and may be contested.

- a) The land use and land development application are consistent or not inconsistent with the municipal spatial planning framework.
- b) The land use and land development application are consistent or not inconsistent with any relevant Council plan, policy or guideline.
- c) Objection from any interested or affected party may have been submitted against the proposed land use and land development application.

4.3 Category 3 - Application is inconsistent and deviates, excluding the MSDF.

- a) The land use and land development application are consistent or not inconsistent with the municipal spatial planning framework.
- b) The land use and land development application are inconsistent with and/or deviates from any relevant Council plan, policy or guideline.
- c) Objection from any interested or affected party may have been submitted against the proposed land use and land development application.

4.4 Category 4 – Application is inconsistent and/ or deviates, inclusive of the MSDF.

- a) The land use and land development application deviates from the municipal spatial planning framework.
- b) The land use and land development application are inconsistent with and/or deviates from any relevant Council plan, policy or guideline.
- c) Objection from any interested or affected party may have been submitted against the proposed land use and land development application.

4.5 Category 5 – Application on initiative of Council or on Council owned land.

- a) The land use and land development application are either initiated or undertaken by the Council, or Council is the owner of such land on which the land use and land development proposal is undertaken.

4.5.1 Category Criteria

- 4.5.1.1 Any land use and land development application for rezoning, subdivision of land, or the approval of an overlay zone as contemplated in the zoning scheme, must be decided on by the Municipal Planning Tribunal in accordance with the provisions of the Bylaw.
- 4.5.1.2 All land use and land development applications other than for rezoning, subdivision of land, or the approval of an overlay zone as contemplated in the zoning scheme -:

- (i) If any such application is consistent and uncontested, such application may be considered and decided on by either the Senior Manager Development Management or the Director responsible for the land use planning functionality.
- (ii) If any such application is inconsistent and / or contested, such application may be considered and decided on by the Director responsible for the land use planning functionality.
- (iii) If any such application deviates from the municipal spatial development framework, such application must, regardless of the designated authorised decision maker, be considered and decided on by the Municipal Planning Tribunal.

5. AUTHORISED OFFICIALS

To supplement the Municipal Planning Tribunal, the following Authorised Officials are appointed to take decisions on land use and land development applications in accordance with the categorisation model:

- 5.1 Manager: Land Use Management (MLUM); subject to Professional Registration with SACPLAN as a Professional Town and Regional Planner
- 5.2 Senior Manager: Development Management (SMDM); subject to Professional Registration with SACPLAN as a Professional Town and Regional Planner
- 5.3 Relevant Director Responsible for the Land Use Planning functionality (DIR); subject to Professional Registration with SACPLAN as a Professional Town and Regional Planner.

11.8.2	APPROVAL OF THE FINAL DRAFT STELLENBOSCH MUNICIPALITY OUTDOOR ADVERTISING & SIGNAGE BY-LAW
--------	---

Collaborator No: 749467
 IDP KPA Ref No: Good Governance
 Meeting Date: 17 May 2023 & 24 May 2023

1. SUBJECT: APPROVAL OF THE FINAL DRAFT STELLENBOSCH MUNICIPALITY OUTDOOR ADVERTISING & SIGNAGE BY-LAW

2. PURPOSE

To provide Council with the pertinent facts in order to approve and adopt the Final Draft Stellenbosch Municipality Outdoor Advertising and Signage By-law.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The purpose of the subject by-law is to control, manage and regulate outdoor advertising and signage, and to provide mechanisms and guidelines for the control, regulating and management thereof, including matters connected therewith.

The subject by-law was undergoing two (2) rounds of public participation, with the first round soliciting numerous comments, which was subsequently addressed and the second round only solicited comments from the Stellenbosch Interest Group ("SIG").

The comment submitted by SIG was further debated in several workshop in order to finalise the draft by-law, which is serving before Council for adoption and promulgation. The request also involves the approval of the relevant delegations in respect of the by-law, as well as the approval of the fine structure to be submitted to the court for final approval.

5. RECOMMENDATIONS

- (a) that Council approve the Final Draft Stellenbosch Municipality Outdoor Advertising and Signage, attached as **APPENDIX 1**, in terms of Section 13 of the Municipal Systems Act, Act 32 of 2000;
- (b) that Council **approve** the submission of the Admission of Guilt Fines, attached as **APPENDIX 2** for submission to the relevant court for endorsement;
- (c) that Council **approve** the amendment of the System of Delegations in respect of the said by-law, attached as **APPENDIX 3** to this report; and
- (d) that Council **authorise** the Department: Development Planning in consultation with the Legal Services to promulgate the said by-law in the Provincial Gazette.

6. DISCUSSION / CONTENTS**6.1 Background & Discussion**

At the 24th Council Meeting dated 06 May 2010, Council resolved that the Draft Outdoor Advertising Signage By-law, be approved and be promulgated in the Provincial Gazette. The Department has investigated and confirmed that the by-law approved in 2010 was not promulgated, and therefore this by-law was used as a guideline to control, manage and enforce signage matters within the Stellenbosch Municipality.

The Directorate: Infrastructure Services commenced with a process to draft an updated outdoor signage by-law, as there were areas which falls within the functional mandate of the said directorate related to signage, specifically when such signage was located within the road reserve, which include sidewalks and that impacts the Road Safety Act.

Council therefore on 31 October 2018 approved that the draft by-law underwent a public participation process ("PPP"). A number of comments were received during this, which involved round table discussions and debates, and these comments were included, to the extend it was relevant to the objectives of the by-law. A second round of public comment was requested and approved by Council on 28 April 2021, and the 2nd draft by-law was published for comment from 14 May 2021 until 14 June 2021, copy of advert attached as **APPENDIX 4**. During this period, the only comment(s) received from the Stellenbosch Interest Group ("SIG"), copy attached as **APPENDIX 5**, which mainly related to ensure that the said by-law was aligned with the zoning categories and definitions as stipulated within the Stellenbosch Municipality Zoning Scheme By-law, 2019. Therefore, there were no significant amendments to the 2nd draft.

It must be noted that currently, the Stellenbosch Municipality which is a world-renowned tourist destination, and also comprise of areas and buildings of high valued heritage and cultural significance, is currently plagued with signage boards, including billboards, posters and specifically 3rd party signage be placed all over the municipal area. In certain instances, the signage detracts from the high valued heritage and cultural significance that has made the Municipal Area sought after tourism destination, and also has resulted in infringements of the Road Safety Act, which has resulted in Council embarking on a process to develop and duly promulgate the required legislation to ensure that outdoor advertising is duly managed and regulated.

6.2 Financial Implications

The by-law once promulgated will ensure that the enforce of illegal outdoor signage can be addressed and will also result in an increase of revenue the scrutiny fee for signage applications.

6.3 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.4 Staff Implications

Currently, the positions to manage the administration of the signage applications are contained on the municipal organogram, and in certain instances the post are filled. It must also be noted that Council has a Law Enforcement Department, which is required to enforce municipal by-laws and policies.

6.5 Previous / Relevant Council Resolutions:

24th Council Meeting: 2010-05-06: Item 7.13

RESOLVED (nem con)

- (a) that the Draft Outdoor Advertising Signage By-law attached as APPENDIX 1, be approved and be promulgated in the Provincial Gazette; and
- (b) that the areas demarcated in schedule 1 and 2 of the attached By-law be approved as areas of maximum control for the Stellenbosch and Franschoek nodes respectively.

6.6 Risk Implications

There are no risks associated with the approval of this item.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.8.2

- (a) that Council approve the Final Draft Stellenbosch Municipality Outdoor Advertising and Signage, attached as **APPENDIX 1**, in terms of Section 13 of the Municipal Systems Act, Act 32 of 2000;
- (b) that Council **approve** the submission of the Admission of Guilt Fines, attached as **APPENDIX 2** for submission to the relevant court for endorsement;
- (c) that Council **approve** the amendment of the System of Delegations in respect of the said by-law, attached as **APPENDIX 3** to this report; and
- (d) that Council **authorise** the Department: Development Planning in consultation with the Legal Services to promulgate the said by-law in the Provincial Gazette.

APPENDICES

- Appendix 1: Final Draft By-law Relating to Outdoor Advertising and Signage
- Appendix 2: Admission of Guilt Fines
- Appendix 3: Proposed System of Delegations relating the Outdoor Advertising and Signage
- Appendix 4: Advertisement for Calling on Public Comment
- Appendix 5: Comments received from Stellenbosch Interest Group ("SIG") during the 2nd round of Public Participation

APPROVAL OF THE FINAL DRAFT STELLENBOSCH MUNICIPALITY OUTDOOR ADVERTISING & SIGNAGE BYLAW

STELLENBOSCH MUNICIPALITY

OUTDOOR ADVERTISING AND SIGNAGE BYLAW

To control, manage and regulate outdoor advertising and signage and to provide mechanisms and guidelines and policies for the control, regulating and management thereof and for matters connected therewith.

PREAMBLE

WHEREAS section 156(2) and (5) of the Constitution provides that a Municipality may make and administer By-laws for the effective administration of the matters which it has the right to administer, and to exercise any power concerning a matter reasonably necessary for, or incidental to, the effective performance of its functions;

AND WHEREAS Part B of Schedule 5 to the Constitution lists Billboards and the display of advertisements in public places as local government matters to the extent set out in section 155(6) (a) and (7);

AND WHEREAS the Stellenbosch Municipality seeks to manage, control and regulate outdoor advertising and signage and any matters connected therewith;

BE IT ENACTED by the Council of the Stellenbosch Municipality, as follows:—

1. Definitions

In this Bylaw, unless inconsistent with the context-

“advertisement” means any representation of a word, name, letter, figure or object or an abbreviation of a word or name, or any symbol, or any light which is not intended solely for illumination or as a warning against any dangers and **“advertising”** has a similar meaning;

“advertisement ownership” mean that person or body that has authorised the advertising of information or a product. The authority who contracts a service provider for such an advertisement, the service provider who physically mounts or displays such an advertisement and the owner or body who's information or product is being advertised, will jointly and severally be responsible for such advertisement and may jointly or severally be charged for any misconduct of this By-Law

“advertising structure” means any physical structure designed for an advertising sign, any detached screen or board that is greater than 4.5 m² in overall size; supported by or made from a structure that is used to be affixed, displayed or shown as a sign.

“aerial sign” means a sign that is displayed or performed in the air, including but not limited to balloons and blimps that can be viewed from within the Municipality's area of jurisdiction;

“approval” means approval by the Municipality and **“approve”** has a corresponding meaning;

“areas of control” means those areas set out in Schedule 1 of this By-Law; and which may be modified or amended from time to time, which amendments and modifications will be graphically depicted by way of maps as prepared by the Municipality;

“authorized official” an employee of the Municipality or any other person who is appointed or authorized thereto to perform any act, function or duty related to the

provisions of this By-Law, or exercise any power in terms of this By-Law; and “**official**” has a corresponding meaning;

“**banner**” means any material upon which a sign is displayed in such a manner as to be fully legible in windless conditions, attached to one or more ropes, poles or flagstaffs projecting vertically, horizontally or at an angle, or attached to buildings or special structures, but excludes banners carried as part of a procession. A flag which is not displayed on an approved flagpole shall for the purposes of this By-Law be deemed to be a banner;

“**billboard**” means any screen or board which stands free and is larger than 4.5m² in total area; which is supported by, or consists of, a structure used, for the purpose of posting, displaying or exhibiting a sign;

“**Central Business District (CBD)**” means an area in the build environment demarcated as such on the Spatial Development Framework for a town;

“**class 2 roads**” means the roads which form the primary network for the urban areas as a whole and which are characterized by high volumes, restricted access and fairly high speeds;

“**class 3 roads**” means roads that distribute traffic between the principal residential, industrial and business districts of the town and which form the link between the primary network (class 2 roads) and the roads within residential areas;

“**clear height**”, in relation to a sign, means the vertical distance between the lowest edge of the sign and the natural level of the surrounding ground, footway or roadway immediately below the sign;

“**commercial advertising**” means any words, letters, logos, figures, symbols, pictures relating to the name of a business, trade, partnership, individual, or any information, recommendation or exhortation in respect of any particular goods manufactured or sold, or any particular services rendered or offered, or any event for commerce or entertainment, including sporting events;

“commercially sponsored sign” means a sign which advertises goods or services, but the erection of which has a secondary purpose, which is to promote or contribute to some recognized public or community goal or function;

“common boundary facade” means any façade of a building which is built abutting a rear or side boundary of an erf and which façade is blank, that is, having no architectural features, which includes windows;

“composite sign” means a single freestanding advertising structure for the display of more than one sign;

“consultant” means a suitably qualified independent person or company that acts on behalf of, or as an agent of, an applicant for approval of a sign in terms of this By-Law;

“continuing offence” means an offence in terms of this By-Law, which offence continues to exist after the expiry of the notice period referred to in a notice served in terms of this By-Law;

“custom made design” means the design of any sign, which features special effects such as specialist character cut outs or shapes or three-dimensional presentations or moving parts or a combination thereof, and which is uniquely designed or constructed for erection in a particular location;

“development board” means a sign displayed at premises upon which building operations are currently in progress and relating to any services being provided, work being done or goods being supplied in connection with such building operations, but excludes contract boards for building and civil engineering projects as required in terms of the National Building Regulations and Control Act, 1977 (Act 103 of 1977);

“display” means the display of a sign and includes the erection of any billboard, sign or structure intended solely or primarily for the support of a sign or billboard, and

includes the display of a sign of a business, trade partnership or individual connected with the contents of the sign or sign, and "displayed" has a corresponding meaning;

"electronic sign" means a sign which has an electronically controlled, illuminated display surface which allows all, or a portion, of the sign to be changed or illuminated in different ways;

"Environmental Impact Assessment" (EIA) means an assessment carried out in accordance with the Municipality's guidelines for outdoor advertising;

"estate agency" means a person who markets, sells or leases properties with or without buildings erected thereon and **"estate agent"** has a corresponding meaning;

"existing sign" means any sign previously approved by the Municipality;

"flat sign" means a sign which is affixed to, or painted directly onto a wall of a building but not onto or over windows or doors or architectural articulations and which at no point projects more than 250mm in front of the surface of such wall;

"freestanding sign" means any sign or group of signs contained or displayed on one freestanding structure which is not attached to a building or to any structure or object not intended to be used for the primary purpose of advertising;

"gateway route" means a prominent route with an entrance to or exit from a specific part of the Municipality's jurisdiction, consisting of man-made or natural features and creating a strong sense of arrival or departure and which is consistent with town planning or development framework plans or By-Law, and which may be geographically depicted by way of maps or listed by the Municipality;

"graphic" includes but is not limited to any component which contributes to the visual appearance or aesthetics of a sign, including its background;

“headline poster” means a temporary poster advertising the contents of a daily or weekly newspaper;

“height of a sign” is calculated by measuring the vertical distance between the uppermost and lowest parts of the advertising panel;

“Heritage Impact Assessment” (HIA) means a visual and contextual assessment of the impact that any proposed sign may have on the cultural heritage, whether built or recognized at the locality where the proposed sign will be displayed;

“internally illuminated sign” means an advertisement or structure used to display an advertisement which has been installed with electrical or other power and an artificial light source which is fully or partially enclosed within the structure or sign and which light is intended to illuminate the advertisement or a portion thereof;

“law” means any law, proclamation, ordinance, Act of Parliament or Provincial Legislature, or any other enactment having the force of law;

“locality bound advertising” means any sign displayed on a specific erf, premises or building and may include such a sign on municipal owned land, adjacent to, abutting on or within 5 meters of the aforementioned erf, premises or building, which sign refers to an activity, product, service or attraction, located, rendered or provided on or from that erf or those premises;

“loose portable sign” means a freestanding locality bound notice or advertising board placed or erected in the road reserve or in a public place;

“movable sign” means a sign not permanently fixed and not intended to remain fixed in one position, but does not include any moving part on a fixed permanent sign;

“Municipality” means the Municipality of Stellenbosch established in terms of section 12 of the Municipal Structures Act, 117 of 1998, and includes duly authorized agent, service provider or any employee thereof acting in connection with this By-Law by virtue of a power vested in the Municipality and delegated or sub-delegated to such agent service provider or employee;

“new sign” means any sign first displayed after the promulgation of this By-Law;

“non-profit body” means a body established primarily to promote a community goal or benefit without direct or personal financial gain, and may include educational, sporting, medical, municipal departments, bodies as well as charities or community organizations;

“organ of state” means—

- (a) any department of state or administration in the national, provincial or local sphere of government;
- (b) any other functionary or institution—
 - (i) exercising a power or performing a function in terms of the Constitution or a provincial constitution; or
 - (ii) exercising a public power or performing a public function in terms of any other Legislation;

“overall height”, in relation to a sign, means the vertical distance between the uppermost edge of the sign and the finished level of the ground, footway or roadway immediately below the centre point of the sign;

“perimeter of an intersection” means the perimeter of the area embraced within the prolongation of the road reserve lines of two or more public roads that join one another at any angle, whether or not one such public road crosses the other;

“person” includes—

- (a) any organ of state;
- (b) any company incorporated or registered as such under any law; and
- (c) any body of persons, whether incorporated or not, functioning as a single entity for whatever purpose;

“poster” means temporary signs capable of being attached to the Municipal electrical light standards or pasted to fixed structures to advertise events or campaigns, including elections or referenda of limited duration and excluding signs advertising markets, exhibitions or events which are held on a regular basis;

“projected sign” means any sign projected by a laser projector, video projector, or other apparatus;

“projecting sign” means a sign which is affixed to a wall of a building and which at some point projects more than 250mm in front of the surface of such wall;

“public façade” means any façade of a building that has architectural articulations and which is visible to the public;

“public place” means any public road, public street, thoroughfare, bridge, subway, footway, foot pavement, footpath, sidewalk, (or similar pedestrian portion of a road reserve), lane, square, open space, garden, park or enclosed place vested in the Municipality, or other state authority or indicated as such on the Surveyor General's records, or utilized by the public or zoned as such in terms of the applicable zoning scheme;

“public road” means public road as defined in the National Road Traffic Act, 1996 (Act 93 of 1996);

“road reserve” means the area contained within the statutory width of a road, and includes roadways, shoulders and sidewalks and the airspace above such roadways, shoulders and sidewalks and all other areas within the road reserve boundary;

“roadway” means that portion of a road, street or thoroughfare improved, constructed or intended for vehicular traffic as defined in the National Road Traffic Act, 1989 (Act 29 of 1989);

“roof sign” means a sign affixed to a roof of a building where the top edge of any point of that sign does not exceed the height of the roof plane to which it is affixed;

“Rural Area” means an area outside the urban edge excluding natural areas as described in schedule 1;

“scenic route” means a road designated as such on an approved zoning scheme or from which landscapes or features of aesthetic or cultural significance can be seen or viewed as designated by the Municipality;

“security sign” means an outdoor sign for neighbourhood watch and similar schemes, and a sign containing the name, logo, address and telephone number of a security company contracted to protect, or security system installed to protect, the premises on which the sign is displayed;

“service station facility sign” means freestanding signs at petrol filling stations, roadside rest and service areas and includes service station pylon signs;

“shop” means a building used for retail trade or services;

“sign” means any object, product, replica, advertising structure, device or board which is used to publicly display a sign, or which is in itself a sign and includes a poster, billboard and an advertisement which is included in the architectural design of a building or structure and which is visible from any public place;

“signalized traffic intersection” means an intersection controlled by traffic signals;

“sky sign” means a sign where the top edge of any point of that sign exceeds the height of the roof plane to which it is affixed;

“sponsored sign” means a sign, the primary purpose of which is not to advertise goods or services, but which displays a graphic or content which promotes community or public awareness of a recognized public or community goal;

“street name signs” means pole-mounted, double-sided, internally illuminated or un-illuminated signs displayed in combination with names of streets, not exceeding one (1) m²;

“street furniture” means public facilities and structures which are not intended primarily for advertising and includes but is not limited to seating benches, planters, bins, pole mounted bins, bus shelters, sidewalk clocks, drinking fountains, Telkom boxes, traffic signal controllers, electricity boxes, post boxes and telephone booths, but excludes road traffic signs, traffic signals, street lights or any other road-related structures;

“teardrop banner” means any material in a teardrop shape with or without a printed sign which is fully legible in windless conditions and held taught by a spring tension and supported by a single flexible pole;

“temporary signs” means signs which are displayed for a maximum period of 14 days, or such other period as may be approved by the Municipality;

“thickness”, in relation to a projecting sign, means the width of such sign measured parallel to the plane of the main wall to which such sign is affixed;

“third-party advertising” means the advertising of goods or services that are not made, procured, sold or delivered from the property on which the sign or sign advertising those goods or services is fixed or placed, and includes advertising which is not locality bound;

“three dimensional sign” means a sign containing more than 2 dimensions, including product replicas;

“Traffic Impact Assessment” (TIA) means a study carried out by a registered professional engineer with demonstrable experience in the field of traffic engineering that investigates the impact a proposed sign may have on vehicle, pedestrian, or cyclist safety and traffic operation, which study should recommend any mitigating measures that may be required as a result of that impact;

“traffic sign” means a road traffic sign as prescribed in the National Road Traffic Act, 1996 (Act 93 of 1996);

“traffic signal” means a road traffic signal as prescribed in the National Road Traffic Act, 1996 (Act 93 of 1996);

“transit advertising” means advertising by means of a movable sign which is capable of being transported by road either on or in conjunction with a motorized vehicle, including trailers primarily used for advertising;

“transportation terminals” means any area designated by the Municipality as such, where the formal interchange of modes of public transport takes place by the public, including, but not limited to designated railway stations, official taxi terminals and bus terminals;

“Urban conservation area” means an area in the build environment demarcated as such on the Spatial Development Framework for a town;

“Urban Edge” means an area in the build environment demarcated as such on the Spatial Development Framework for a town;

“urban edge line” means a predetermined point to point boundary line as determined by the Municipality, which has as its purpose, the containment of urban development;

“Urban Areas” means an area within the urban edge of a town;

“veranda” includes a cantilever canopy and sunblind;

“Visual Impact Assessment (or VIA)” means the analysis of the potential visual impacts to boundary walls and fences. The document that contains a visual impact analysis is also often referred to as a visual impact assessment or VIA.

“window signs” means signs which are temporarily or permanently painted on, or attached to the window-glass of a building;

“zone” means a land use zone as set out in the relevant zoning schemes or Town Planning Regulations as amended from time to time and applicable to any erf on which a sign is displayed or intended to be displayed and **“zoning”** has a corresponding meaning.

2. Principles

- 2.1 To maintain the sensitive environmental quality of each area.
- 2.2 To promote the aesthetic sensitivity of the environment.
- 2.3 To find a balance between outdoor advertising opportunities and economic development on the one hand, and the conservation of visual, tourist, environmental and heritage characteristics and traffic safety on the other side.
- 2.4 Outdoor advertising must respect the integrity of any site where it is displayed supplement the character of the area.
- 2.5 To give recognition to the substantial number of technical details that apply to specific types of signs and their effect on specific places.
- 2.6 To give recognition to the Stellenbosch Municipality's Heritage Guidelines & Policies.
- 2.7 To ensure that the cultural landscapes, heritage and scenic route overlay zones, and the rural areas and nodes aesthetics and scenic landscapes be protected and conserved, and that only signage and advertising as contained in this bylaw be permitted.

CHAPTER 1

3. Submission of applications

- (1) Other than those signs referred to in section 13(3) to 13(10) of this Bylaw, no person may display any advertisement or erect or use any sign for advertising purposes without the Municipality's approval in terms of this Bylaw and any other applicable legislation.
- (2) Every person intending to display a new sign or to alter or to add to an existing approved sign or submit a signage plan in terms of a Site Development Plan proposal, must apply in writing to the Municipality which application must be accompanied by the following information in duplicate:
 - (a) a site plan, drawn to a scale of not less than 1:200, showing the following—
 - (i) the site on which it is proposed that the sign is to be erected or displayed;
 - (ii) the position of the sign and the building, if any, to which it is to be attached;
 - (iii) every building and the existing signs on the site;
 - (iv) existing and proposed landscaping, traffic signals and road traffic signs; and
 - (v) the positions, with dimensions, of the sign in relation to the boundaries of the site and the location of the streets abutting the site, together with its existing approved zoning conditions;
 - (b) a drawing, which complies with the requirements of the National Building and Regulations Standards Act, 1977 (Act 103 of 1977), and is in sufficient detail to enable the Municipality to consider the appearance of the sign and all relevant construction detail, including a description of the materials of which the sign is to be constructed, the colours to be used, and whether or not the sign is to be illuminated; In the latter event, the plan must indicate whether or not the sign is an electronic sign and, if so, full details must be furnished;

- (3) The drawing referred to in sub-section (2)(b) must have detailed drawings of such sign to a scale of not less than 1:20 and a site plan indicating the position of the sign on the site to a scale of not less than 1:50;
- (4) If a sign is to be attached to or displayed on the wall or façade of a building, the Municipality may require the submission of an additional drawing, drawn to a scale of not less than 1:100, showing—
 - (i) an elevation of the building in colour;
 - (ii) the details and position of the proposed sign; and
 - (iii) the details and the position of every existing sign on the building

Alternatively, the Municipality may require a coloured print of or an artist's photographic- or computer-generated impression of the building with the details of the proposed sign superimposed on such graphic and drawn as nearly as is practicable to the same scale as that of the graphic;

- (5) If the applicant is not the registered owner of the property on which the sign will be erected, he or she must obtain the consent of the registered owner of the land or building on which the sign is erected, indicating that person's knowledge of the application.
- (6) The Municipality may require the submission of any or all of the following studies or assessments—
 - (a) an Environmental Impact Assessment (either the 1st stage thereof; being the completion of an Environmental Checklist or in its entirety);
 - (b) a Heritage Impact Assessment; and
 - (c) a Traffic Impact Assessment.
- (7) If a community or portion thereof or a person will be affected by the proposed sign, it may require a public participation process prior to considering the approval.
- (8) The Municipality may require a signage master plan in respect of any development where the erection of numerous signs is proposed, or the rationalization of previously approved signs is required so as to allow it to consider a consistent design master plan prior to assessment of any individual sign.
- (9) The Municipality must notify the applicant of any additional requirements it has within twenty-one (21) working days of the date of submission of the original application and payment of the application fee.

- (10) The Municipality must retain a copy of each document that formed part of an application.
- (11) The Municipality may require a written notice from the applicant or person to confirm that an approved sign was erected.

4. Fees and general factors in considering approval of applications, amendments and conditions

- (1) Every person who applies to the Municipality for approval in terms of this Bylaw must, on making application, pay to the Municipality an application fee as determined by the Municipality and no sign may be erected until such time as the application fees have been paid in full, or the required approval has been granted.
- (2) In considering an application for the display of an advertisement or the erection of a sign in terms of this Bylaw, or an amendment or condition attaching or to be attached to an approval, the Municipality may have regard to the following factors:
 - (a) The area of control in which the proposed sign is to be erected or displayed as set out in Schedule 1 of this Bylaw; provided that if a sign falls into more than one area of control or if a proposed site in one area of control may impact on an adjacent area of control, the Municipality shall be entitled to determine the area of control pertaining to that application;
 - (b) the locality or landscape and the advertising opportunities pertaining to that area of control; the number of signs already displayed or proposed to be displayed on the erf and in the area surrounding the erf concerned;
 - (c) the findings of any Traffic- , Environmental- or Heritage Impact Assessment
 - (d) Impact Assessment and public participation processes where applicable
 - (e) locality bound signs must relate to the lawful use of a property provided that no such sign must be affixed to or placed on residential premises or portions thereof other than is permitted by or for home industries and legal temporary uses; and
 - (f) that no sign or advertisement may be designed or displayed that—
 - (i) will constitute a danger to any person or property;
 - (ii) will display any material or graphic which does not comply with the requirements of the Advertising Standards Authority of South Africa.

- (iii) will be detrimental to the environment or amenity of the neighbourhood by reason of either its size, intensity, frequency, illumination, quality of design, material, proposed graphic or locality.
 - (iv) will obscure any other signs approved in terms of this Bylaw or its predecessor; and
 - (v) will be detrimental or otherwise negatively impact on the environment, whether artificial or natural.
- (3) Subject to any conditions in Schedule 16, all new signs or advertising structures approved under this Bylaw and any successive Bylaw, may remain on display uninterrupted until such time as they do not comply with the provisions of this Bylaw or any other applicable legislation.

5. Factors relating to specific signs, areas of control, and commercial sponsored signs

- (1) The Municipality may, in addition to the factors set out in section 4 of this Bylaw, apply certain minimum standards to certain specific sign types and proposed localities when an application for approval is made in respect thereof and will apply certain specific criteria to applications for the erection of signs by non-profit bodies.
- (2) The specific standards and criteria are set out in schedules 1 to 18 of this Bylaw. The Schedules are part of the Bylaw and are not any less important than the content of the Bylaw itself.
- (3) Schedule 1 of this Bylaw indicates the areas of control in which certain specific sign types may be permitted, subject always to approval in terms of this Bylaw and furthermore subject to any additional requirement pertaining to a specific sign type as set out in the remaining schedules.
- (4) The description of areas or routes in Schedule 1 should be read with the definitions as contained in the Municipality's Zoning Scheme Bylaw.
- (5) The Municipality may grant an exemption from the terms of this Bylaw in respect of sign types or areas of control set out in Schedules 10, 11 and 12 of this Bylaw having regard to—
 - (a) the area of control where it is proposed to display the signs;
 - (b) nature of the event;
 - (c) duration of the erection or display of the sign;

- (d) size of the proposed sign;
- (e) any traffic, safety, environmental or heritage impact assessment; and
- (f) the outcome of any public participation process.

CHAPTER 2

6. Standard conditions for approval

- (1) All signs and advertising structures must be properly erected and constructed of the requisite strength and must be secure and must comply with the requirements pertaining thereto of the National Building Regulations and Standards Act, 1977 (Act 103 of 1977).
- (2) The applicant to whom approval has been granted and the owner of the property or building to which it is attached shall be jointly and severally liable for the maintenance thereof and must undertake at least one inspection per year thereof with a view to satisfying themselves as to the safety thereof.
- (3) Where any sign or advertising structure is vandalised or becomes torn or damaged or otherwise falls into a state of disrepair, and/or dilapidation the applicant to whom the approval has been granted and the owner of the fixture or property which or to which a sign is attached must within seven (7) working days of a notice in writing to do so, repair it.
- (4) All signs and their support structures must be constructed of incombustible, durable materials suited to the function, nature and permanence of the sign.
- (5) All glass used in a sign, other than glass used in illumination, must be safety glass of at least 3mm thick.
- (6) Glass panels used in a sign must not exceed 0.9m² in area, each panel being securely fixed in the body of the sign, structure or device independently of all other panels.
- (7) Every sign and its support structure must be kept in a state of good repair.
- (8) No sign may obstruct the opening and closing of any window or opening provided for ventilation of a building or obstruct any stairway or doorway or other means of exit from the building or prevent movement of people from one part of a roof to another.
- (9) No advertising structure may be closer to overhead electrical equipment than the minimum distance as prescribed in the Occupational Health and Safety Act, Act 85 of 1993.

7. Electrical requirements

- (1) All signs needing an electrical connection must preferably be supplied from the existing electrical supply on the erf where it is to be erected. If this is not possible, application for a metered electricity supply must be made to the relevant authority.
- (2) Every sign in connection with which electricity is used, must be provided with suitable capacitors to prevent interference with radio and television reception.
- (3) Each power cable and conduit containing electrical conductors in respect of a sign must be so positioned and fixed so that it is safe, unseen, inaccessible and child tamper proof and animal proof.
- (4) Each interior high-voltage installation that runs unattended (such as a window display) and each exterior high-voltage installation must have an acceptable type of fireman's switch in accordance with the requirements as stipulated in sections 6.7.2 and 7.5 of SANS 0142 1993 promulgated in terms of the Occupational Health and Safety Act.

8. Illumination requirements

- (1) The Municipality may approve an illuminated sign, provided that the provisions of this Bylaw are complied with and that such illumination does not constitute a road safety hazard or cause undue light spillage.
- (2) Signs may not be illuminated if no sign content is displayed.
- (3) Requirement for internal illumination or electronic signs—
 - (a) internally illuminated and electronic signs may only be displayed in areas of partial and minimum control and must be less than 2.1m².
 - (b) electronic signs may not have subliminal flashes; and
 - (c) prior to erection, the Municipality may require a Traffic Impact Assessment, Environmental and Heritage Impact Assessment to be conducted, the results of which must indicate that no detrimental impact on traffic is envisaged. In addition, the Municipality may require subsequent traffic monitoring of any internally illuminated or electronic sign.
- (4) Requirements for external illumination:
 - (a) the light source emanating from external illumination must not be visible to traffic traveling in either direction;

- (b) external illumination must not be positioned so as to create any undue light spillage beyond the surface area of the sign; and
- (c) approved wayleaves must be obtained from the Director: Infrastructure Services or his/her nominee prior to any excavations for the installation of signs. This also applies for signs to be erected in the vicinity of overhead powerlines.
- (5) Electricity Power sources may be applied for as per the conditions of the Electricity Services Bylaw.

9. Road traffic safety requirements

- (1) Signs may not be erected in an area where they are an unacceptable distraction for drivers, which acceptability may be determined in terms of the guidelines laid down in the S.A. Road Traffic Signs Manual.
- (2) Electronic signs may not be permitted if they are visible from class 2 or 3 roads, gateway route or a scenic route unless expressly approved in writing by the Municipality.
- (3) Advertising on bridges, towers, telecommunication masts, pylons or street poles shall not be permitted.
- (4) The graphic content of signs must not have the potential to be visually interpreted as a road traffic sign, due to any factor, including but not limited to the following:
 - (a) any stylised or pictorial presentation of a road traffic sign or traffic signal;
 - (b) any word, symbol, logo or other device used on a road traffic sign;
 - (c) use of combinations of colours specified for road traffic signs, in a manner likely to lead to confusion; and
 - (d) any reflector paint or material.
- (5) Signs may not be erected in an area where the traffic volume, the average following headway, or accident history requires a higher degree of awareness from drivers.
- (6) Signs may not be attached to or obscure a road traffic sign or traffic signal specifically provided for in the South African Road Traffic Signs Manual or the South African Development Community Road Traffic Signs Manual.
- (7) Signs may not be erected within the road reserve of any public road unless expressly approved by the Municipality.

- (8) When located at signalized traffic intersections, signs may not have the colours red or yellow or green as main colours and may not obscure or interfere with any road traffic sign or traffic signal.
- (9) Electronic signs shall not be permitted within 80 meters of the perimeter of a signalised traffic intersection.
- (10) Flashing or running messages or variable transition messages that have a message change interval of greater than 0,3 seconds or have transition effects between message changes shall not be permitted if viewable from a public road. Such signs will not be permitted within Historical Areas or upon roads with high traffic flow at night.
- (11) Static display, simple transition signs must display a complete frame for an information cycle length of not less than 60 seconds when visible from a signalised traffic intersection and 30 seconds at other locations.
- (12) All signs larger than 4.5m² erected adjacent to a public road or in a railway reserve intended to advertise to persons using class 2 and 3 roads must be spaced a minimum specified distance from any other sign or road traffic sign, such distance measured parallel to the centre line of the roadway, in accordance with the measurements set out in Table 1 below:

TABLE 1: LINEAR SPACING BETWEEN SIGNS

Instance	Spacing required when visible for traffic on road with a speed of:		
	≤ 60 km/h (In the Rural Areas and the Scenic Routes)	61 – 80km/h	≥80km/h
Where a sign follows a road sign	120m	200m	300m
Where a sign follows another sign	250m	250m	300m
Where a sign precedes a road sign	40m	70m	100m

- (13) The abovementioned minimum distances specified in Table 1 above may be decreased by the Municipality if the sign falls within an area of minimum control, or in other areas of control on submission of a Traffic Impact Assessment motivating a reduction of this spacing to the satisfaction of the Municipality. The Municipality may prepare a list or map of designated areas in which the abovementioned spacing requirements shall not be applicable.

10. Legal requirements

All signs to be erected or displayed within the area of jurisdiction of the Municipality must, in addition to complying with this Bylaw, comply with all other applicable legislation, including any applicable Zoning Scheme Bylaw or condition of approval or any departure from the applicable Zoning Scheme Bylaw.

11. Approval

- (1) The Municipality may refuse any application or grant its approval subject to conditions relating to the erection or use of the sign and including a condition that the owner of any sign or billboard on the land or building on which it is erected or displayed, or both such owners or the person whose product or services are advertised, indemnify the Municipality against any consequences flowing from the erection, display or mere presence of such sign.
- (2) The Municipality may, at any time, withdraw an approval granted in terms of this Bylaw or its predecessor or amend any condition or impose a further condition in respect of such approval, if a sign or advertising structure:
- (a) is in a state of disrepair and/or dilapidation;
 - (b) remains unused for more than 90 consecutive days;
 - (c) becomes redundant or obsolete;
 - (d) no longer complies with any provision of this Bylaw; or
 - (e) is substantially altered from the original approved application by way of either structure or graphic content.
- (3) Should an approved sign not be erected within 12 months from the date of approval or within such other time as is specified in the approval, such approval shall lapse, unless that period is extended in writing by the Municipality prior to such lapse.

- (4) In the event that the structure supporting such sign is intentionally demolished before the expiry of the approval period, the approval shall lapse and no further sign or supporting structure may be erected or re-erected without the Municipality's approval.
- (5) All decisions made by the Municipality in terms of this bylaw with regard applications must be in writing and within sixty (60) calendar days after a completed application was received, or within sixty (60) calendar days after receipt of additional information as required by the Municipality.
- (6) In notifying an applicant of the outcome of the application the Municipality must inform such applicant or an objector of his right to appeal in terms of section 12.

CHAPTER 3: GENERAL PROVISIONS

12. Appeal

A person whose rights are affected by a decision in terms of a delegated power may appeal against that decision by giving written notice of the appeal and the reasons therefore in terms of section 62 of the Local Government: Municipal Systems Act, Act 32 of 2000 to the Municipal Manager within twenty-one (21) days of the date of the notification of the decision.

13. Signs for which Municipality's approval not required

- (1) Should any sign not comply with the conditions relative to each sign type listed below an application in terms of section 3 will be required.
- (2) Subject to compliance with the conditions relative to each sign provided for in sub-sections (3) to (10), and any other applicable legislation, or condition imposed by the Municipality, no application for approval is required in terms of this Bylaw in respect of the signs provided for in sub-sections (3) to (10).
- (3) Development Boards
 - (a) Development boards shall be removed forthwith when the building operations are complete or if the building operations are discontinued, or when the provisions of the services, the doing of the work, or the supply of the goods to which the sign relates has ceased.
 - (b) The Municipality may order the removal of any such sign if the building operations have been substantially completed or discontinued or an Occupancy Certificate has been issued by the Municipality, or the provision of the services, the doing of the work or the supply of the goods to which it relates, has for all practical purposes ceased, and such signs may thereupon be forthwith removed but no later than five (5) days after the date of the order for removal thereof.
 - (c) If the premises on which building operations are in progress, are to be used wholly for residential purposes, only one development board may be displayed, and such development board may not exceed 3m² in total area.

- (d) If the premises are not to be used wholly for residential purposes, no more than two development boards may be displayed, and the aggregate area of both development boards may not exceed 5m² in total area;
- (e) If the signage, whether on freestanding boards, or flexible building covering material, include any other form of third-party advertising, such sign must then comply with the provisions of Schedule 8 hereto and approval for the display thereof must first be obtained in terms of this Bylaw.

(4) To Let/For Sale Signs

- (a) These include any sign not exceeding (400mm x 500mm) (0.2m²) in total area displayed at existing premises or at properties upon which a new building is being erected and relating to accommodation being offered to rent or purchase in the building; and
- (b) on condition that any such sign must be removed within 2 weeks from date of issue of the occupation certificate or conclusion of a contract.

(5) On Premises Business Signs

These include any sign not illuminated, not projecting over a public road and not exceeding 0.2m² in total area notifying only the types of trade, business, industry or profession lawfully conducted by any occupant or permanent resident of the premises to which it is attached, the name of such occupant, the type of activity, the address and telephone number of such premises and the hours of attendance (if any); provided that only one such sign per occupant may be displayed.

(6) Window Signs

These include any locality bound signs which are temporarily or permanently painted on or attached to the window glass of a building used for commercial, office, industrial or entertainment purposes, or any other temporary or permanent sign which is displayed within 2 meters of any window or external opening through which it can be seen from the outside such a building, on condition that no window sign may exceed 4m² in an area of maximum control. (Not more than 50% of window and not more than total area or 4m²)

(7) Signs incorporated in the face of a building

Any sign forming an integral part of the fabric of a building (but excluding a painted sign or a sign affixed in any manner onto the building), on condition that no such sign may exceed 0.2m² in total area.

(8) Security Signs

Any security sign not projecting over a public road and not exceeding 0.2m² in total area indicating either that a security watch scheme is in operation or that a security company has been contracted to protect the premises on which the sign is displayed, on condition that—

- (a) only one such sign is displayed on any public road or each street frontage of such premises; and
- (b) the said sign displays only the name, logo, address and telephone number of a security company contracted to protect the premises on which the sign is displayed.

(9) Sponsored, Commercially sponsored and Non-Profit Body Signs: less than 4.5m².

- (a) Any such sign whether erected by or in connection with a non-profit body or not; not exceeding 4.5m² in total area on condition that no more than 5% of the total surface area of the sign is used for third party advertising; and the sign is not illuminated, and furthermore provided that only one such sign may be permitted per erf.
- (b) Signs which comply with provisions of sub-section (a) may, when erected on Municipal land, only be erected once agreement has been concluded with the Municipality, wherein the extent of the community or public benefit and the terms of the erection of the sign has been agreed.
- (c) All other sponsored signs are dealt with in Schedule 16 and 17.

(10) Advertising on Vehicles

Signs painted or affixed directly onto the body of a motorised vehicle unless transit advertising.

14. Disfigurement

No person may destroy, harm, damage or disfigure or deface the front or frontage of any street, road traffic sign, wall, fence, land, rock, tree or other natural feature, or the front or frontage or roof of any building or structure in any manner whatsoever during construction or through the display or use of a sign or the writing or painting of any sign, symbol, letters or numerals. Furthermore, no person may disfigure any sign legally displayed in terms of this Bylaw.

15. Damage to Municipal property

No person may, in the course of erecting or removing any sign, or banner, cause damage to any tree, electric standard or service or other Municipal installation or property and street furniture.

16. Entry and inspections

The Municipality shall be entitled, through its authorized officers, to enter into and upon any premises, at a reasonable time for the purpose of carrying out any inspection necessary for the proper administration and enforcement of the provisions of this By-Law.

17. Presumptions

Any person charged with an offence in terms of this Bylaw who is—

- (a) alone or jointly with any other person responsible for organising, or in control of any meeting, function or event, to which a sign or poster relates, shall be deemed, until the contrary is proved, to have knowingly displayed every unlawful sign or poster displayed in connection with such meeting, function or event or to have caused or allowed it to be so displayed;
- (b) the person whose name appears on an unlawful sign or whose product or services are advertised on such sign, shall be deemed, until the contrary is proved, to have displayed such sign, or to have caused or allowed it to be displayed;
- (c) the owner of any land or building on which any unlawful sign was or is displayed, shall be deemed, until the contrary is proved, to have knowingly displayed such sign, or caused or allowed it to be displayed.

18. Enforcement and removal of signs

- (1) If any sign displayed is in contravention of this Bylaw, the Municipality may without prejudice to or in addition to the right to take legal steps or prosecute, serve a notice on the owner or lessee of the sign, or the land owner or occupant on whose land the sign is erected or displayed, or person whose product or services are advertised,

calling upon such person to remove such sign or carry out such alteration thereto or do such work as may be specified in such request or notice, within a time frame specified therein.

- (2) A notice served in terms of sub-section (1) may be withdrawn or varied by the Municipality, by agreement with the person so served, or failing such agreement, by the service of a further notice.
- (3) Should the Municipality's directives, as set out in the notice, not be carried out within the time period specified therein, the Municipality may, without further notice to the person upon whom the notice was served, remove or alter the sign or do such work as may be specified in such notice.
- (4) Any costs incurred by the Municipality in removing signs, or in doing alterations or other works required in terms of a notice, may be recovered from the person on whom the notice was served.
- (5) Notwithstanding any other clause in this Bylaw, if a sign is, or is reasonably considered to be an imminent danger to life or property, the Municipality itself may, after a minimum of six (6) hours prior notice carry out or arrange for the removal of such sign in event of the noncompliance with such notice.
- (6) Any costs incurred by the Municipality in carrying out or arranging for the removal of any sign may be recovered from the owner or lessee of the sign, or the landowner on whose land the sign was erected, or the person whose product or services were advertised, jointly and severally.
- (7) Unlawful or dangerous signs removed by the Municipality may be reclaimed from the Municipality on payment in full to it of any costs incurred by the Municipality in the removal of the said sign, as well as payment of the costs incurred in the storage of such sign.
- (8) Any unlawful signs removed by the Municipality and not reclaimed within two (2) months of the date of removal may be disposed of or be sold by the Municipality to defray its removal or storage costs.

19. Serving of notices

- (1) A notice, order or any other document issued by the Municipality in terms of this Bylaw is deemed to be duly issued if an official of the Municipality, formally delegated, signed it.

- (2) Any notice or other document that is served on a person in terms of this Bylaw is regarded as having been duly served—
 - (a) when it has been delivered to that person personally;
 - (b) when it has been left at that person's place of residence or business in the Republic with a person apparently over the age of 16 years;
 - (c) when it has been posted by registered or certified mail to that person's known residential or business address in the Republic, and an acknowledgment of the posting thereof from the postal service is obtained;
 - (d) if that person's address in the Republic is unknown, when it has been served on that person's agent or representative in the Republic in the manner provided by paragraphs (a), (b) or (c); or
 - (e) if that person's address and agent or representative in the Republic is unknown, when it has been posted in a conspicuous place on the land or business premises to which it relates;
 - (f) in the event of a body corporate, when it has been delivered at the registered office of the premises of the body corporate; or
 - (g) when it has been delivered, at the request of that person, to his or her e-mail address.
- (3) Serving of a copy is deemed to be service of the original.
- (4) When any notice or other document is served on the owner, occupier, or holder of any property, or right in any property, it is sufficient if that person is described in the notice or other document as the owner, occupier, holder of the property or right in question, and it is not necessary to name that person.

20. Liaison forums in community

- (1) The Municipality may establish liaison forums in the community for the purposes to—
 - (a) ensure the local community participation in the implementation and execution of this Bylaw; and
 - (b) promoting local economic development and the conservation of visual, tourist, environmental and heritage characteristics of the Stellenbosch Municipal area;
- (2) A forum as contemplated in sub-section (1) may consist of-
 - (a) a person or persons of an interested party or an affected person or community;

- (b) designated official or officials of the Municipality and
- (c) a council member of the relevant council committee
- (3) The Municipality may request-
 - (a) a forum to give their input or
 - (b) make use of a forum's special knowledge or capacity
- (4) A forum of persons or a person as defined in sub-clause (2) may give input on their own accord to the Municipality for its consideration but will have no decision-making powers.

21. Offences and Penalties

- (1) A person who contravenes any provision or fails to comply with any provision of this By-law, or fails to comply with a notice issued in terms of this Bylaw, commits an offence and shall upon conviction be liable to—
 - (a) a fine or imprisonment, or either such fine or imprisonment or to both such fine and such imprisonment; and
 - (b) in the case of a continuing offence, to an additional fine or an additional period of imprisonment or to such additional imprisonment without the option of a fine or to both such additional fine and imprisonment for each day on which such offence is continued; and
 - (c) a further amount equal to any costs and expenses found by the court to have been incurred by the Municipality as result of such contravention or failure.
- (2) A person commits an offence if he or she—
 - (a) threatens, resists, hinders, obstructs or otherwise interferes with, or who uses foul or abusive language towards or at an employee or contractor of the Municipality in the exercise of any powers or performance of any duty or function in terms of this Bylaw; or
 - (b) impersonates an employee or contractor of the Municipality.

22. Conflict with other legislation

- (1) In the event of any conflict between any provision of this By-law and National and Provincial legislation, standards, policies or guidelines, the National and Provincial legislation, standards, policies or guidelines shall prevail subject to section 151(3) and 156(4) of the Constitution.
- (2) In the event of an inconsistency between the different texts the English text shall prevail.

23. Exemptions

Notwithstanding the provisions of this Bylaw, the Municipality may, in written application, exempt any person or class of persons from any or all of the requirements of this Bylaw in considering such exemption it may impose any conditions or requirements it deems appropriate.

24. Repeal of Bylaw

The stipulations of any Bylaw previously passed by the municipality, or any abolished Municipality now incorporated in the present Municipality are herewith repealed as far as they relate to matters provided for in this Bylaw and insofar as it has been made applicable to the Municipality by the authorization for the execution of powers and functions covered in Section 84(3) of the Local Government: Municipal Structures Act, 1998 (Act 117 of 1998).

25. Transitional arrangements

- (1) Anything done before the promulgation of this Bylaw, which was not done in terms of a provision repealed in this Bylaw and was unlawful, shall in the event of such act or sign still not complying with the provisions of this Bylaw, be unlawful and the Municipality in such case may take the necessary action in terms of section 19 hereof.

- (2) All legal signs that exist at the date of publication of this Bylaw, must in all respects comply with the stipulations in this bylaw within a period of six (6) months from the date of publication. Any sign that fails to comply after the initial six (6) months will be removed.
- (3) The municipality could instruct an owner of a sign to remove it should the sign fail to comply to the regulations of this Bylaw. Should the owner neglect to remove the sign and/or within the period of 6 months, after publication of this bylaw, then the Municipality reserves the right to remove such sign at the expense of the owner.
- (4) When a sign as a result of the change of ownership or occupation or a change in the nature of a business, industry, trade or profession performed on the premises or due to the installation of new traffic signs or a change in the level or location of any road, foot path or kerbstone or due to any other factor what so ever, no longer comply with the regulations of this Byaw then the person responsible for the sign must immediately remove, erase or change the sign to comply to this Bylaw.

26. Short title and commencement

This Bylaw shall be known as the Stellenbosch Municipality Outdoor Advertising and Signage Bylaw.

SCHEDULE 1: AREAS OF CONTROL

Area Type	Natural Area	Rural Area	Urban Area	Urban Area	Urban Area
Control Strength	Maximum	Maximum	Maximum	Partial	Minimum
Area Description	<ul style="list-style-type: none"> • Proclaimed, declared or zoned nature reserve and conservation areas. • Protected natural environment. • Forestry areas. • River corridors. • 1:100 Year flood plains. • Wetlands. • Game reserves 	<ul style="list-style-type: none"> • Agricultural areas/zones • Horticultural areas • Rural small holdings • Large private open spaces (e.g. golf courses) • Scenic routes • Scenic landscapes • Scenic features • Municipal parks • Urban edge zones as defined in the Urban Edge Policy • Agricultural and horticultural areas/zones and adjacent road and rail reserves • Specific areas or sites designated as maximum control by way of a map as contained in the zoning scheme bylaw prepared by the Municipality 	<ul style="list-style-type: none"> • Urban conservation overlay areas • Declared Heritage sites • Graded buildings and places • Residential zones and adjacent road and rail reserves • Pedestrian malls and pedestrian squares • Private Open Spaces e.g. Golf courses • River corridors • Specific areas or sites designated as maximum control by way of a map as contained in the zoning scheme bylaw prepared by the Municipality 	<ul style="list-style-type: none"> • Central business districts, unless within an urban conservation area • Mixed use commercial and residential areas, unless within a conservation area • Commercial ribbon development and activity corridors, unless within a conservation area • Commercial and business districts and adjacent streets and rail reserves, unless within a conservation area • Entertainment district or complexes with commercial zones, unless within a conservation area • Educational institutions, Sports fields and stadiums, unless within a conservation area • Limited zones (including railway reserves, transport use zones) • Specific areas or sites designated as partial control by way of a map as contained in the zoning scheme bylaw prepared by the Municipality 	<ul style="list-style-type: none"> • In Heritage insensitive areas • Designated transportation terminals unless historical conservation area or graded building or site • Designated areas within limited use zones unless within a conservation area • Specific areas or sites designated as minimum control by way of a map as contained in the zoning scheme bylaw prepared by the Municipality • Industrial zones

SCHEDULE 2: BILLBOARDS

- (1) Subject to approval in terms of this By-Law, the erection or display of Billboards, whether custom made or of standard design, is permitted only in areas of minimum control and subject to a traffic safety audit and visual impact assessment. In addition:
 - (a) If the proposed erf where the billboards are to be erected borders on class 2 and 3 roads the billboard may not be placed less than 5 meters from the property's boundary line. If the proposed site of erection of a billboard has been designated as a gateway then no billboards will be permitted within such gateway;
 - (b) Billboards must comply with the standard conditions of approval set out in this By-Law;
 - (c) Billboards must not encroach over the boundary line of the property on which it is erected, whether such encroachment is aerial or on ground level;
 - (d) Billboards must have a minimum clear height of 2.4m and a sign structure which does not exceed a maximum height of 7.5m above natural ground level;
 - (e) Billboards must not exceed a maximum total size of 6 x 3m (18m²) provided that on any V-shaped structure, two such panels may be permitted;
 - (f) Billboards must be displayed between the angles of 90° and 60° to the direction of oncoming traffic;
 - (g) Billboards must be spaced a minimum distance apart as specified in section 9 of this By-Law;
 - (h) If located at signalized traffic intersections, Billboards may not be erected or displayed within 50 meters of the perimeter of the intersection if un-illuminated; and within 80 meters of the perimeter of the intersection if illuminated;
 - (i) If erected along the right hand side of a section of road, such that its graphics are visible to a driver traveling on the left hand side of the road, shall be deemed to have replaced the advertising opportunity that existed on the left hand side of the road;
 - (j) Billboards must have a minimum letter or number height of 285mm.

SCHEDULE 3: LOCALITY BOUND FREESTANDING AND COMPOSITE SIGNS

- (1) Subject to approval in terms of this By-Law and subsection 5, the erection or display of locality Bound freestanding and composite signs are permitted only in urban areas of maximum, partial and minimum control and subject to a traffic safety audit and visual impact assessment. In addition:
 - (a) Locality bound freestanding signs may only be permitted in the following instances:
 - (i) where business premises are set back 15 meters or more from the boundary of the road reserve; or
 - (ii) where it is not reasonably possible to affix appropriate signs to a building; or
 - (iii) where such a sign is necessary to allow the public to locate the entrance to business premises; or
 - (iv) where the existence of a freestanding composite sign may prevent the proliferation of signs.
- (2) Locality bound freestanding composite signs may not exceed 4,5 meters in height and in addition may not exceed 4.5m² in total area. This provision may be waived, after having regard to the following factors:
 - (a) if such increase reduces the number of individual signs facing any one street boundary of the site, thereby minimising the visual impact on the surrounding environment;
 - (b) if more than two significant roads approach the site in question;
 - (c) the number of businesses which will be advertising on such sign;
 - (d) the number of approach or exit routes to the site in question;
 - (e) the applicable zoning of the area surrounding the site in question.
- (3) Service Station freestanding pylon signs must be locality bound and may only be erected or displayed at service stations adjacent to and directly accessible from the public road at which such a sign is directed and only one Service Station freestanding facility sign per street boundary may be permitted.
- (4) Service station freestanding pylon signs may not exceed 7,5 meters in height and may not consist of more than eight advertising panels of 4.5m² each in total area. In areas

of maximum control the maximum height is 4,5 meters and an area of 7.0m² on each side.

- (5) In conservation areas and single residential zones only standard locality bound, free standing and composite signs shall be allowed as prescribed in Schedule 18.

SCHEDULE 4: SIGNS ATTACHED TO WALLS OF BUILDINGS: FLAT AND PROJECTING SIGNS

Subject to approval in terms of this By-Law, the erection or display of flat and projecting signs are permitted in all areas of maximum, partial or minimum control. In addition, flat and projecting signs may:

- (1) not be allowed within 1.0 meters of the edge of a roadway nor may it extend to within 1.0 meters of the edge of a roadway;
- (2) not project in front of a wall more than 1,5 meters in the case of a sign which has a clear height of more than 7,5 meters or more than 1 meter in the case of any lesser clear height;
- (3) not project more than 250mm over a footway unless such sign has more than 2.4 meters clear height;
- (4) not obstruct the view from any window or any other external opening of any building and no portion of any such sign may obstruct the opening or closing of any window, door or any other openings
- (5) not exceed 5m² in total area and may not exceed 20% (in areas of maximum control), 30% (in areas of minimum and partial control) or one-quarter of the overall area of the surface to which they are affixed or painted whichever is the lesser. This size restriction may be waived on condition that:
 - (a) an Environmental Visual Impact Assessment be submitted to the Municipality indicating no detrimental environmental impact is envisaged;
 - (b) or in a conservation area, a Heritage Impact Assessment be submitted to the Municipality indicating no detrimental heritage impact is envisaged; and
 - (c) only graphics designed and created by a suitably qualified consultant be displayed on such sign;
- (6) may be considered for approval on blank common boundary facades of non-residential buildings.
- (7) if the sign appears on public facades of any building—
 - (a) be so designed as to become an integral part of the building design; and
 - (b) when a third-party sign, only be permitted if custom-made and subject to the requirements of 5(a) to (c) above.

- (8) No signs may be attached to walls or fences of residential buildings.

SCHEDULE 5: SKY SIGNS

- (1) Subject to approval in terms of this By-Law, the erection or display of sky signs whether custom made or of standard design, is permitted in areas of minimum control only. In addition, sky signs must:
 - (a) be limited to a maximum total size of 4.5m² and subject to Traffic Safety Assessment and Visual Impact Assessment indicating no detrimental environmental impact is envisaged; and
 - (b) not obstruct the view from any other building.
- (2) Sky signs along the top edge of the roof of cultural, historic or architecturally significant buildings will not be allowed.

SCHEDULE 6: ROOF SIGNS

- (1) Subject to approval in terms of this By-Law, the erection or display of roof signs is permitted only in areas of minimum control.

In addition:

- (a) The total area of any roof sign affixed flush onto or painted onto a roof of a building may not exceed one-quarter of the overall area of the roof to which it is affixed or painted.
 - (b) When attached to the bottom edge of a roof or vertically midway on the roof of a building, such sign may not exceed 500mm in height and its total area may not exceed 25% of the roof area to which it is affixed.
- (2) It shall be permissible to affix a roof sign along the edge of a roof of a building, if such sign is composed of a single line of individual, cut-out letters, without visible bracing or support but may not be erected along more than two edges of such roof and may not exceed 3.6m² in total area; with a maximum height of 500mm.

SCHEDULE 7: SIGNS ON A VERANDAH, BALCONY, CANOPY, SUPPORTING COLUMNS, PILLARS AND POSTS

Subject to approval in terms of this By-Law and subsection 11 below, the erection or display of signs on a veranda, balcony, canopy, supporting columns, pillars and posts may only be permitted in areas of medium and minimum control on the condition that they also comply with the following:

- (1) No signs may be attached to Historical Buildings
- (2) No such signs will be allowed on or over architectural features of buildings.
- (3) Such signs may be affixed flat onto or painted on a parapet wall, balustrade or railing of a veranda or balcony, and beam or fascia of a veranda or balcony.
- (4) The sign may not exceed 1m in height or project above or below or beyond either end of the surface to which it is affixed, or project more than 250mm in front of the surface to which it is affixed or project over a roadway or within 0,6 meters of the edge of the roadway.
- (5) Such signs may be affixed flat onto or painted on supporting columns, pillars and posts. In this regard, no sign may project more than 50mm in front of the surface to which it is affixed and may not extend beyond any of the extremities of such column, pillar or post. Signs affixed flat onto non-rectangular supporting structures must be curved to fit the form of such structure.
- (6) Only one sign per column, pillar or post will be allowed.
- (7) Such signs suspended below the roof of a veranda, canopy or the floor of a balcony may not exceed 1,8 meters in length or 600mm in height.
- (8) Every such sign must be at right angles to the building line.
- (9) No signs suspended under a canopy may extend beyond the external edge of the canopy or veranda to which it is attached.
- (10) All suspended signs must have a clear height of at least 2,4 meters.
- (11) Such signs on the roof of a veranda, canopy or balcony, excluding the main roof of a building, must be composed of a single line of freestanding individual, cut- out silhouette letters without visible bracing or other visible means of support and may not be erected along more than two edges of such roof of a veranda or balcony.

- (12) No such sign shall be allowed in a conservation area within a single residential zone unless a Heritage Impact Assessment was submitted which found that no negative impact would be made on the heritage resources.

SCHEDULE 8: SIGNS ON BOUNDARY WALLS AND FENCES AND ON CONSTRUCTION SITE HOARDINGS

Subject to approval in terms of this By-Law, the erection or display of signs on boundary walls and fences is permitted only for locality bound signs in urban areas of maximum, minimum or partial control and in addition:

- (1) In urban areas of maximum and partial control, the Municipality may approve an application to affix a locality bound sign against a boundary wall only if the sign is indented into the wall or composed of individual, un-illuminated cut-out letters or symbols fixed flat on such wall not projecting more than 50mm from the face of such wall.
- (2) In areas of minimum control, the Municipality may approve, subject to Visual Impact Assessment—
 - (a) an application to affix a locality bound sign flat onto a boundary wall only if it does not project more than 50mm from the face of such wall; and
 - (b) an application to affix a locality bound flat sign with a maximum size of 0.5m² onto the permanent fence of an erf.
- (3) Third party and locality bound advertising on construction site hoardings and fences must comply with the following conditions:
 - (a) any one sign may not exceed a vertical dimension of 3 meters and total area of 18m² and in the case of construction site cladding, the graphic must comply with the requirements of the Advertising standards Association of South Africa.
 - (b) any such sign may not project more than 100mm in front of the hoarding or fence to which it is affixed;
 - (c) it may not be illuminated in areas of maximum and partial control; and
 - (d) advertising will not be allowed on construction site hoardings and fences within the cone of vision of motorists at signalised traffic intersections.

SCHEDULE 9: HEADLINE POSTERS

Subject to approval in terms of this By-Law, the erection or display of headline posters is permitted in all areas except natural and rural areas of maximum control. In addition:

- (1) Headline posters may not exceed 0.9m x 0.6m in area.
- (2) The commercial content of the poster may not exceed 20% of the area of the poster nor may such commercial lettering be larger than the main lettering in the remainder of the poster.
- (3) The posters may be attached to Municipal electrical light poles only where approved by the Municipality for the express purposes of these posters.
- (4) Posters may not be affixed to traffic signal poles, or other poles which carry road traffic signs, or poles erected for any other purpose except as provided for in item 5 below, or any other street furniture, walls, fences, trees, rocks or other natural features.
- (5) Headline posters may not be pasted on municipal electric light poles but are to be mounted on board and affixed securely with stout string or plastic ties unless a permanent frame has been approved for this purpose.
- (6) Only one headline poster per pole, regardless of which newspaper group it is, will be permitted, and must be at a uniform height of approximately 2 meters.
- (7) The number of posters as well as the designated areas for the display of headline posters as approved by the Municipality must be strictly adhered to.
- (8) All "special events" posters are to comply with the following:
 - (a) the name of the newspaper group, the "special event" and the date of the "special event" must appear on the posters in letters not less than 50mm in height;
 - (b) the special event posters may not be displayed more than 14 days before the date of the event and they must be removed within 48 hours after the date of the event shown on the poster.
- (9) Headline posters and fastenings are to be removed on a daily basis failing which the posters will be removed, at the newspaper group's expense, in accordance with the standard charges for removal of posters.
- (10) The Municipality may recover the costs of the removal of unauthorised posters, and the reinstatement of the surface from which such posters were removed, from the person responsible for the display of such posters or the newspaper group concerned.

- (11) The Municipality may remove any poster displayed in contravention of the abovementioned conditions.
- (12) Any poster not removed on a daily basis or a poster relating to a “special event by due date referred to in item 8(b) may be removed by the Municipality.
- (13) The display of unauthorised posters is illegal, and the Municipality may also remove such posters.
- (14) The Municipality may determine the costs involved for the removal of unauthorised posters.
- (15) Application must be made on an annual basis by each newspaper group for permission to display such posters subject to an annual fee per newspaper group.
- (16) A deposit per newspaper group who wishes to display posters must be paid annually against which a charge for the removal of any poster which contravenes the By-Law will be levied. In the event of the above deposit being exhausted, permission to display such poster may be withdrawn until a further deposit is submitted to the Municipality.

SCHEDULE 10: POSTERS, BANNERS, TEAR-DROP BANNERS, FLAGS AND BALLOONS

Subject to approval in terms of this By-Law, the erection or display of posters, banners, tear-drop banners and flags other than those referred to in Schedule 11, or balloons, is permitted in all areas, except areas of maximum control. Only to be displayed within or adjacent to property associated with advertisement. In addition:

- (1) The display of posters, banners, tear-drop banners, flags and balloons is prohibited on any bridge or across any public road, and along any road designated by the Municipality, unless consent has been obtained from the Municipality.
- (2) Posters, banners, tear-drop banners, flags and balloons may not be attached so as to interfere with or constitute a danger to passing pedestrians or vehicular traffic.
- (3) No banner, or flag-type banner may be larger than 5m², and no flag may be larger than 2m²; provided further that no flagpole may exceed a relevant height restriction of the zoning of the premises, up to a maximum of 8m above natural ground level, measured directly below the pole;
- (4) No poster, banner, tear-drop banner, flag, or balloon may be displayed within 30 meters of any road traffic sign or traffic signal. - special permission required for display within 30m
- (5) Posters, banners, flags, or balloons may not be affixed to trees, traffic signal poles, electrical or service authority distribution boxes, or other poles which carry road traffic signs, rock, other natural features, street furniture or other Municipal property.
- (6) Posters, banners, tear-drop banners, flags, or balloons may not be affixed in such a way that they unfairly prejudice other businesses or organisations or obscure any approved existing signs.
- (7) Only one banner per premises will be permitted unless the Municipality's written permission is obtained for more than one.
- (8) (i) A maximum of five flagpoles bearing national flags may be erected on the premises of an accommodation facility on a single residential erf
- (ii) Subject to the conditions laid down in paragraph 4, a maximum of two tear-drop banners or flags displaying the name, corporate symbol or nature of the business on the premises on which it is displayed, may be allowed.

- (9) Posters, banners, tear-drop banners, flags and balloons not kept in a good condition may not be displayed and must be removed after notification by the Municipality.

SCHEDULE 11: TEMPORARY POSTERS, TEAR-DROP BANNERS, BANNERS AND FLAGS ON PUBLIC ROADS AND PUBLIC PLACES

Subject to approval in terms of this By-Law, the erection or display of posters, banners, tear-drop banners and flags in public roads or public places, for the purpose of advertising specific events, is permitted in all areas of control except natural and rural areas of maximum control. In addition—

- (1) Approval for third party advertising on posters, banners, tear-drop banners, flags and balloons may only be granted for a function or event conducted for religious, educational, social welfare, animal welfare, sporting, civic or cultural purposes or for a function or event relating to a Municipal, Provincial or Parliamentary election or referendum.
- (2) The name of the host organisation, the date and venue must appear on the material in letters not less than 50mm in height.
- (3) Posters, banners tear-drop banners and flags may only be erected to advertise the event and the name or emblem of a sponsor may not cover more than 20% of the surface of the material.
- (4) The Municipality may levy a tariff to cover the cost for the removal of material which has been erected without the approval of the Municipality given under the hand of an authorized official.
- (5) Posters, banners, tear-drop banners and flags may be displayed for a maximum period of fourteen days prior to the event and must be removed within 2 days from the date of the event or the last day thereof as applicable.
- (6) Posters with a maximum measurement of 80 cm x 50 cm must be mounted on a board and affixed securely with stout string or plastic fastening without damage caused to the poles. No securing material with a metal content is permitted.
- (7) Posters, banners, tear-drop banners and flags, excluding election posters and flags, may only be erected in the roads, or places as indicated by the Municipality and may not be erected in residential areas or on bridges. No political banners will be allowed.
- (8) Only one poster or flag per organisation may be erected on every second streetlight pole.
- (9) Posters and flags must be erected at a uniform height of approximately 2 meters.

- (10) No posters, banners, tear-drop banners or flags may be affixed to trees, traffic signs, traffic signals, central ridges, existing advertising signs or any municipal buildings or over hydrant identification signs.
- (11) No posters, banners, tear-drop banners and flags may be displayed within 30 meters of any road traffic sign or traffic signal.
- (12) All materials used to affix the posters must be removed together with the posters.
- (13) The Municipality may remove any indecent or torn posters, banners, tear-drop banners or flags, or any posters, banners or flags which create a traffic hazard in the opinion of the Municipality
- (14) The Municipality is exempted from claims that may be instituted against the Municipality as a result of the display of posters, banners, tear-drop banners and flags.
- (15) The display of posters, banners, tear-drop banners and flags purely for commercial advertising is not permitted, provided that any poster, banner or flag which relates to a sport, the arts, or a cultural event may be permitted, despite such posters, banners, tear-drop banners or flags containing commercial elements. The commercial element may not exceed 20% of the extent of the poster, banner, tear-drop banner or flag.
- (16) Organisations or persons who obtained approval to display posters or flags must pay a deposit as determined by the Municipality, which shall entitle that person to display the said poster or flag for a maximum period of 14 days, or such time as stipulated by the Municipality. No poster or flag may be displayed without such deposit having been paid.
- (17) The Municipality may remove or request the applicant to remove all posters, banners, tear-drop banners or flags should any of the above conditions not be complied with.
- (18) Posters, banners, tear-drop banners or flags that are not removed by the due date may be removed by the Municipality in which case the deposit paid in terms of item 15 will be forfeited to the Municipality.
- (19) Banners will be erected or removed by the Municipality at a rate as approved from time to time and the banner must comply with the specifications as laid down by the Municipality.

SCHEDULE 12: ESTATE AGENT SIGNS

Subject to approval in terms of this By-Law, the erection or display of estate agent signs is permitted in all areas except natural areas of maximum control. Only estate agents registered with the Estate Agents Board will be allowed to erect show houses signs. Proof of registration must accompany the application. In addition:

- (1) Estate Agencies must apply annually for permission to display signs and approval may be subject to payment of an annual fee in accordance with the Municipality's by-law and policy on tariffs.
- (2) A deposit may be required by the Municipality against which a charge for the removal of any sign which contravenes this By-law will be levied. In the event of the above deposit being exhausted, permission to display such signage may be withdrawn until a further deposit is paid to the Municipality.
- (3) Any Estate Agent sign unlawfully erected, or in contravention of the provisions of this Schedule, will be subject to a charge by the Municipality; in the event of the said sign not being removed, photographic evidence of the unlawful sign may be obtained by the Municipality prior to levying the said charge.
- (4) "For sale", "Sold" and "To let" signs shall be fixed flat to the surface of the boundary fence or wall of the property.
- (5) "Sold" signs may be displayed, fixed flat to the surface of the boundary fence or wall of the property, for a maximum period of two weeks.
- (6) No sign may be erected in such a way that any part of it is closer than 1.5m from a road verge.
- (7) No sign may be erected on centre islands.
- (8) No sign may obscure a road traffic sign.
- (9) No signs may be erected on any tarred area of pavements.
- (10) Estate agent signs may not exceed 0.3m² in total area.
- (11) "Show House" signs may be displayed only from 12h00 on Fridays to 20h00 on Sundays.
- (12) Show house signs may not be affixed to trees, traffic signals, street poles or other poles which carry road traffic signs, walls, fences, rocks, other natural features or landscaped areas, street furniture, or other Municipal property, unless such other display is authorised by the Municipality in writing.

- (13) On each sign, the wording "On Show", "Show House", "Show Flat" or "Show Plot" with the Agency's name and directional arrow must be displayed as well as the date.
- (14) Show house signs may be displayed on stakes making use of a design approved by the Municipality. Estate Agent signs may not be displayed on concrete, tarred or paved surfaces. It is not permissible for stakes to penetrate the ground deeper than 15cm.
- (15) Not more than six estate agent directional signs will be permitted in total per show house, show plot or block of flats in which a show flat is on display. The definition of one sign will include the display of two signboards only when such boards are sandwiched back to back around an electric light pole.
- (16) Show houses signs may not be displayed along Scenic Routes or on any bridge, public park or public open space.
- (17) Directional signs may be displayed along main routes only, being the shortest route from a main road to the property.
- (18) Only one directional sign per show house/flat/plot may be displayed along class 2 or 3 roads, excluding roads referred to in item 7 above.

SCHEDULE 13: LOOSE PORTABLE SIGNS

Subject to approval in terms of this By-Law, the erection or display of loose portable signs is permitted in areas of minimum and partial control as well as designated areas within urban areas of maximum control. In addition:

- (1) Loose portable signs may not be placed in a road reserve or in public open spaces without the written permission of the Municipality.
- (2) The Municipality may remove and impound loose portable signs placed without permission in a road reserve or on Municipal property. Owners can recover their signs on payment of the prescribed fee as determined the Municipality which will be used to defray the cost of removal, storage and transportation.
- (3) The following criteria will apply in respect of an application in terms of item 1:
 - (a) that it does not pose a hazard in terms of safety to the public;
 - (b) that it does not obstruct or cause inconvenience to the public either by its physical size or location;
 - (c) that it does not unfairly prejudice other traders;
 - (d) that the loose portable sign or proposed number thereof does not detract from the amenity of the local streetscape or local environment;
 - (e) that it is intended solely to advertise the name of the business, goods or services for sale from the advertiser's premises;
 - (f) that the maximum dimensions of the proposed loose portable sign must be 1.2m (height) x 0.6m (width).
 - (g) that it may be placed directly in front of the advertiser's premises, provided that the above criteria are met; and
 - (h) that a minimum clear footway width of 1,8 meters must remain clear and 2,5 meters in the central business district and sidewalks with high pedestrian volumes.
- (4) The Municipality may demarcate areas within the road reserve or on municipal property where, during normal trading hours, applicants may then place the approved loose portable signs. The said signs must be removed outside normal trading hours and stored away from public view.

- (5) The Municipality may levy tariffs for displaying the loose portable signs, which tariffs shall be payable in advance for a maximum period of six months.
- (6) Applicants will be required to indemnify the Municipality against any claims from third parties that may arise, due to the placement of loose portable signs within the road reserve or on municipal property.
- (7) Notwithstanding the above, the Municipality may cause the removal or impoundment of the sign or signs should the applicant contravene any of the above conditions.

SCHEDULE 14: AERIAL SIGNS

Subject to approval in terms of this By-Law, the erection display of aerial signs is permitted only in urban areas of minimum control. In addition:

- (1) No aerial signs affixed to any building or structure may be flown at a height of more than 45 meters from the surface measured from ground level.
- (2) Aerial signs may not be flown above a public road.

SCHEDULE 15: TRANSIT ADVERTISING

Subject to approval in terms of this By-Law, the erection or display of transit signs is permitted only in urban areas of minimum control.

In addition:

- (1) The parking of a transit sign which is visible from a public road or a public place for the purpose of third-party advertising is prohibited, except if it is displayed on a designated display site approved in terms of this By-Law as well as the Streets By-Law.
- (2) Transit signs parked on private property for the purpose of storage must be positioned in such a manner as not to be visible from a street or public place.
- (3) The advertising panel or portion of the vehicle used for transit advertising may not exceed a cumulative total of 18m².
- (4) The Municipality may designate sites in areas of minimum control for transit advertising and may publish notices indicating such sites.
- (5) Notwithstanding any provisions of this By-Law, the Municipality may, without prior notice, remove any unauthorised transit signs from municipal property, and, in the case of unauthorised transit advertising on private property, the Municipality may serve a notice ordering the removal thereof in terms of this By-Law.
- (6) Transit signs must be properly fixed to the ground at the parking location.

SCHEDULE 16: SIGNS ON MUNICIPAL LAND OR BUILDINGS

- (1) No sign may be displayed or erected on municipal land or buildings without the written permission of the Municipality.
- (2) The following specific conditions and criteria will apply to the signs mentioned in items (a) to (c) below:
 - (a) Commercially sponsored signs other than those in section 13 (10).

Notwithstanding the area of control within which it is proposed to erect a commercially sponsored sign on Municipal land or buildings, and subject to compliance with all other provisions of this By-Law, the Municipality may consider a commercially sponsored sign for approval, subject to the following:

- (i) Public or community needs or goals must be identified or adopted by the Municipality and if such needs can be addressed either entirely or in part by the granting of concessions to particular persons for the erection of commercially sponsored signs, the Municipality may call for public input on such public or community needs or goals and the related advertising opportunity.
- (ii) In order to identify such public or community needs or goals, the Municipality and other interested authorities must consult prior to proposals being invited, so as to establish conditions, criteria and constraints in respect of such advertising.
- (iii) The Municipality's Supply Chain Management Policy will apply.
- (iv) that any proposal be evaluated on the following factors:
 - (aa) the adherence to the principles of this By-law;
 - (bb) the design contribution;
 - (cc) the best community benefit offered;
 - (dd) the creativity and public safety;
 - (ee) the permanence of the contribution to the community goals or needs; and
 - (ff) the recovery cost over the period of the erection of the sign as opposed to the largest advertising opportunity or financial gain.

- (v) When contributions in kind are to be recovered by the Municipality, a conversion thereof to a monetary contribution to the Municipality's income base will be assessed.
- (vi) the Municipality, as landowner, reserves the right not to proceed with any proposal prior to final approval thereof and the call for invitations for proposals in any respect shall not be regarded decision by the Municipality to proceed with the erection of a sign in respect of a specific site.
- (vii) Once accepted, any sign to be erected in terms of this schedule must be the subject matter of a written agreement between the Municipality as landowner and the person responsible for the erection of the sign.

(b) Sponsored signs

Notwithstanding the area of control within which it is proposed to erect such a sign on Municipal owned land or buildings and subject to compliance with all other provisions of this By-Law, the Municipality may consider a sponsored sign for approval on condition that:

- (i) written detail will be provided which clearly indicates the recognised community goals which will be promoted by the erection or display of the proposed sign;
- (ii) signs with a political content will not be permitted;
- (iii) no more than 5% of the total surface of the sign is used for third party advertising.
- (iv) the maximum size of any such sign will be 6m x 3m; provided in the event of a V-shaped sign where the size may not exceed two panels of 6m x 3m each. Not allowed in areas of maximum control
- (iv) applications for billboards to be erected in terms of this section must comply with the requirements as set out in Schedule 2.
- (vi) no sign erected in terms of this clause be located within 5 meters of a property's boundary line.

(c) Non-profit body signs

Notwithstanding the area of control within which it is proposed to erect a sign, and subject to compliance with all other provisions of this By-Law, the Municipality may consider the erection of a sign by or for the benefit of a non-

profit body subject to compliance to a VIA and with the requirements set out in Schedule 17.

SCHEDULE 17: SIGNS ERECTED BY OR FOR THE BENEFIT OF NON-PROFIT ORGANISATIONS

- (1) Notwithstanding the area of control within which it is proposed to erect a sign by or for the benefit of a non-profit organisation, and subject to compliance with all other provisions of this By-Law, the Municipality may consider such a sign for approval subject to the following:
 - (a) written details from the host non-profit organisation regarding the nature and extent of the support to be received from the erection or display of the sign must be delivered to the Municipality together with the other information set out in Section 3 of this By-Law;
 - (b) the extent of involvement of previously disadvantaged communities, small businesses, job creation and empowerment will be considered in any proposal;
 - (c) any proposal will be evaluated on the following factors:
 - (i) the adherence to the principles or provisions of this By-Law;
 - (ii) the design contribution;
 - (iii) the best community benefit offered;
 - (v) the creativity and public safety; and
 - (vi) the permanence of the contribution to the community goals or needs as opposed to the largest advertising opportunity or financial gain.
 - (d) in the event of it being proposed that the said sign will be erected on municipal property:
 - (i) the Municipality must evaluate the proposal;
 - (ii) the Municipality as landowner reserves the right not to proceed with any proposal prior to final approval thereof; and
 - (iii) if accepted, a written agreement between the Municipality, the person responsible for the erection of the sign and the non-profit body must be entered into.
 - (e) In addition the following conditions will apply:
 - (i) signs with a political content will not be permitted;

- (ii) the maximum size of any such sign is 6m x 3m; provided in the event of a V-shaped sign being proposed, its maximum size will not exceed two panels of 6m x 3m each;
- (iii) applications for billboards to be erected in terms of this section must comply with the requirements as set out in Schedule 2;
- (iv) no sign erected in terms of this clause may be located within 5 meters of a property's boundary line;
- (v) the name of the non-profit body must be displayed on the sign with a maximum 300mm lettering height;
- (vi) all parties that may be affected by the erection or display of such sign must be given opportunity for their input;
- (vii) the Municipality may require submission of impact assessment studies; and
- (viii) no more than two individual signs of 6m x 3m each may be permitted, or alternatively one V-shaped sign with a maximum of two panels of 6m x 3m each on any one property. In addition, only one sign per street frontage will be permitted.

SCHEDULE 18: STANDARD FREE STANDING AND COMPOSITE SIGNS FOR THE CONSERVATION AREA

- (1) Subject to approval and in accordance to this By-Law, the erection and display of standard free standing and composite signs will be the primary way of advertising in conservation areas and in areas of single residential zoning. In addition:
 - (a) Only one standard advertising structure, designed according to Municipal requirements, will be allowed on a property.
 - (b) A composite sign of maximum two advertising signs and size not exceeding an area of 1.8 m² per advertising structure showing only the name of the business and its main product will be allowed.
 - (c) In the case of a business centre, more than one advertising sign per advertising structure will be allowed in which case the centre's name and the names of the businesses in the centre may be displayed.
- (2) The signs and advertising structures shall:
 - (a) Comply to the design standards and requirements of the Municipality.
 - (b) Not be displayed in the road reserve.

APPENDIX 2

**OUTDOOR ADVERTISING AND
SIGNAGE BYLAW**

ADMISSION OF GUILT

OFFENCES AND FINES

Section Contravened	Description of Offence	Proposed Fine (1)	Approved Fine (2)
3(1)	Display any advertisement or erect or use any sign for advertising purposes without the Municipality's approval	R2 500	
4(1)	No sign may be erected until such time as the application fees have been paid in full	R2 000	
4(2)(f)	(f) that no sign or advertisement may be designed or displayed that— (i) will constitute a danger to any person or property; (ii) will display any material or graphic which does not comply with the requirements of the Advertising Standards Authority of South Africa. (iii) will be detrimental to the environment or amenity of the neighbourhood by reason of either its size, intensity, frequency, illumination, quality of design, material, proposed graphic or locality. (iv) will obscure any other signs approved in terms of this By-Law or its predecessor; and (v) will be detrimental or otherwise negatively impact on the environment, whether artificial or natural.	R2 000	
6(1)	(1) All signs and advertising structures which are not properly erected and constructed of the requisite strength or inadequately secured or does not comply with the requirements pertaining thereto of the National Building Regulations and Standards Act, 1977 (Act 103 of 1977).	R2 000	
6(2)	Sign not repaired within seven after receipt of notice in writing for being vandalised, torn, damaged or falling into state of disrepair	R2 000	

9(2)	Signs may not be erected in an area where they are an unacceptable distraction for drivers, which acceptability may be determined in terms of the guidelines laid down in the S.A. Road Traffic Signs Manual.	R2 000	
14	No person may destroy, harm, damage or disfigure or deface the front or frontage of any street, road traffic sign, wall, fence, land, rock, tree or other natural feature, or the front or frontage or roof of any building or structure in any manner whatsoever during construction or through the display or use of a sign or the writing or painting of any sign, symbol, letters or numerals. Furthermore, no person may disfigure any sign legally displayed in terms of this By-law.	R2 500	
15	No person may, in the course of erecting or removing any sign, or banner, cause damage to any tree, electric standard or service or other Municipal installation or property and street furniture.	R2 500	
17(2)	(2) A person commits an offence if he or she— (a) threatens, resists, hinders, obstructs or otherwise interferes with, or who uses foul or abusive language towards or at an employee or contractor of the Municipality in the exercise of any powers or performance of any duty or function in terms of this By-law; or (b) impersonates an employee or contractor of the Municipality. APPENDIX 5

Belangegroep Stellenbosch Interest Group

14 June 2021

Mr Deon Louw

deon.louw@stellenbosch.gov.za

Dear Mr Louw

STELLENBOSCH MUNICIPALITY SECOND DRAFT BY-LAW RELATING TO OUTDOOR ADVERTISING AND SIGNAGE

Please find the Stellenbosch Interest Group's (SIG's) comments on the Second Draft By-Law relating to Outdoor Advertising and Signage below.

The SIG wishes to place on record the importance for the Stellenbosch Municipality to; first, take note of the comments of Ms Claire Abrahamson relating to this By-law. Secondly, the comments of the Stellenbosch Municipality's recently appointed Senior Heritage Planner, Ms Katherine Robinson, must be obtained as she will be administering the Signage Policy. The significance of the afore-mentioned two heritage practitioners must precede and override any comments that are contributed by the SIG.

In particular, the following input from Ms Claire Abrahamson must be given immediate attention:

- *Rural landscapes are vulnerable to visual degradation through inappropriate signage, which can sometimes form an "urban intrusion" into the landscape.*
- *If a sign impacts or alters building fabric older than 60 years, application to HWC under Section 34 of the National Heritage Resources Act would be required, and comment on the proposed sign from the local heritage bodies would be appropriate.*
- *Applications for proposed new signs within conservation areas should engage with and receive the comment of any registered conservation bodies within those areas.*
- *The Municipality has a conservation team that is in the process of finalising a CMP for the whole area. It would be prudent to workshop this section of the by-law with them, to ensure that adequate control of signage in historic environments is provided.*

The SIG's concern relates in particular to the need for specific reference in the By-law to rural areas. The By-law indicates what is not permitted but gives no guidelines as to what signage should look like in this area of maximum control.

The SIG's further wishes to comment as follows:

Definitions

“**sign**” means any object, product, replica, advertising structure, mural, device or board which is used to publicly display a sign, or which is in itself a sign and includes a poster, billboard and an advertisement which is included in the architectural design of a building or structure and which is visible from any public place;

Comment: Signs must exclude murals. Murals must be dealt with in a separate By Law. In recent decades, public murals have become a common phenomenon in urban landscapes around the world. The Stellenbosch Municipality needs to establish a Public Mural Art Policy and Regulations that employ murals as an acceptable element while maintaining a balance which reflects and influences social, political, historical, cultural, and aesthetic values in Stellenbosch. In this regard Cape Town's Mural Policy would be a possible example to adapt for the unique character of Stellenbosch and the Winelands.

Comment: Rural areas are listed as areas of maximum control. The schedules only refer to what is not permitted under the schedules 9: headline posters 11: Temporary posters, tear-drop banners, banners and flags on public roads and public places.

SCHEDULE 1: AREAS OF CONTROL P35

The table refers

Please note that the SIG considers that the text highlighted in yellow below should be added to the draft document and that the text that has been struck through should be deleted.

Urban Area – Partial Control

Mixed use commercial and residential areas, unless within a conservation area.

Commercial ribbon development and activity corridors, unless within a conservation area.

Commercial and business districts and adjacent streets and rail reserves, unless within a conservation area.

Entertainment district or complexes with commercial zones, unless within a conservation area.

Educational institutions, Sports fields and stadiums, unless within a conservation area.

~~Undetermined zones~~ Limited use zones (including railway reserves, transport use zones).

Specific areas or sites designated as partial control by way of a map as contained in the zoning scheme regulations prepared by the Municipality. (Comment: There are no partial control sites marked on a map in the zoning scheme)

Urban Area – Minimum Control

Designated areas within ~~undetermined zones~~ limited use zones unless within a conservation area.

Specific areas or sites designated as minimum control by way of a map as contained in the zoning scheme ? (Comment: There are no partial control sites marked on a map in the zoning scheme)

SCHEDULE 4:

(8) ~~is not allowed on the sides of buildings around the areas of maximum and partial control.~~ Comment: The text should be omitted because it contradicts the introductory paragraph of Schedule 4: the erection or display of flat and projecting signs are permitted in all areas of maximum, partial or minimum control.

Add the following:

(9) No signs may be attached to walls or fences of residential buildings.

SCHEDULE 5: SKY SIGNS

Sky signs are not suitable for Stellenbosch or the Winelands.

(2) ~~Sky signs along the top edge of the roof of cultural, historic or architecturally significant buildings will only be permitted if they are locality bound, un-illuminated and consist of individual cut-out letters or logos.~~ Comment: This at least must be removed. Such signs should not appear on the roof of a cultural, historic or architecturally significant building.

SCHEDULE 6: ROOF SIGNS

(1b) When attached to the bottom edge of a roof or vertically midway on the roof of a building, such sign may not exceed ~~1~~ 0,5 metre in height and its total area may not exceed 25% of the roof area to which it is affixed. Comment: 1 metre is too big, consider 0.5metre and a limitation should be set for the total area if the roof is large.

2) It shall be permissible to affix a roof sign along the lower edge of a roof of a building, if such sign is composed of a single line of individual, cut-out letters, without visible bracing or support but may not be erected along more than two edges of such roof and may not exceed 3.6m² in total area; with a maximum height of ~~1 metre~~ 0,5metre.

SCHEDULE 7: SIGNS ON A VERANDAH, BALCONY, CANOPY, SUPPORTING COLUMNS, PILLARS AND POSTS

The numbering should be reviewed. Two sections (1) appear under Schedule 7.

(1) No signs may be attached to Historical Buildings

~~(1)~~ (2) No such signs will be allowed on or over architectural features of buildings.

(2) No such signs will be allowed on or over architectural features of buildings.

Comment: Please note that columns, pillars, verandas, and balconies etc are all architectural features.

(7) Every such sign must be at right angles to the building line.

Comment: Unclear to which building line is referred.

SCHEDULE 13: LOOSE PORTABLE SIGNS

(d) that the loose portable sign, **only one per business**, ~~or proposed number thereof~~ does not detract from the amenity of the local streetscape or local environment;

(h) that a minimum clear footway width of 1,8 meters must remain clear and 2,5 meters in the **urban conservation area** ~~central business~~ district and sidewalks with high pedestrian volumes.

SCHEDULE 14: AERIAL SIGNS

(2) Aerial signs may not be flown above a public road. ~~time~~ ('time' should be deleted)

SCHEDULE 15: TRANSIT ADVERTISING

(4) The Municipality may designate sites in areas **of** ~~ad~~-minimum control for transit advertising and may publish notices indicating such sites.

The SIG wishes to thank the Municipality for the good working relationship that has been established with the committee in drafting this By-law and suggests that the task be completed by working with the Heritage practitioners that are deeply committed to improving the visual and environmental condition of our unique Municipality's historic and rural character.

Kind regards,

Patricia Botha

11.8.3	APPROVAL OF THE ADAM TAS CORRIDOR OVERLAY ZONE IN TERMS OF THE STELLENBOSCH MUNICIPALITY LAND USE PLANNING BY-LAW, 2019
--------	--

Collaborator No:	749468

To obtain Council's approval for the draft Adam Tas Corridor Overlay Zone to be included in the Stellenbosch Municipality: Zoning Scheme By-law, 2019.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

1) Council resolved *inter alia* at their meeting of 11 October 2022 (Item 11.8.1) that the public participation process and advertisement of the draft Adam Tas Overlay Zone can commence subject to the following conditions:

- a. The public participation phase of the project will take place over 60 days (2 months).
- b. The draft Overlay Zone will be advertised in the local newspaper, municipal web page and notice boards within two weeks after the decision by Council; and that.

2) After the process of public participation was concluded, the draft Adam Tas Corridor report must be resubmitted to Council together with all comments received for consideration within 2 months.

The Adam Tas Corridor Local Spatial Development Framework and Development Guidelines were approved by Council in October 2022 as official spatial policy for the development of the area. Following the approval of the Framework, Council also approved the process to obtain input from the public on the draft overlay zone in October 2022. The overlay zone is the mechanism through which the framework can be implemented.

The purpose of the overlay zone in terms of Section 239 (1) of the Stellenbosch Municipality: Zoning Scheme By-law is to designate land for future subdivision where a change of zoning from the pre-existing base zone will be required once the subdivision is approved and where the principle of future subdivision has been approved through a rezoning process, but the subdivision plan itself has not yet been approved.

The draft overlay zone was advertised for 60 days in line with the approval of Council. No comment was received during this period.

This item thus serves to obtain Council's approval of the draft Adam Tas Corridor Overlay Zone to be included in the Stellenbosch Municipality: Zoning Scheme By-law, 2019.

5. RECOMMENDATION

that Council approves the draft Adam Tas Corridor Overlay Zone attached as **APPENDICE 1** to the agenda for incorporation in the Stellenbosch Municipality: Zoning Scheme By-law, 2019.

6. DISCUSSION /CONTENTS

The Municipal Spatial Development Framework (MSDF) approved by Council in November 2019 aimed to address the restructuring of Stellenbosch in a meaningful way with a view to respond to the principles of the Spatial Planning and Land Use Management Act, 2013 (SPLUMA).

The approved MSDF recognised and proposed two catalytical projects which can play a significant role in achieving these principles spatially, one of which was the development of the Adam Tas Corridor.

The Adam Tas Corridor Local Spatial Development Framework was subsequently approved by Council at the end of October 2022.

The complexity associated with the Adam Tas Development Corridor can be encapsulated as follows:

1. That landownership over the 11 identified precincts is not homogenous with various land parcels currently in the ownership of the private sector and various state institutions.
2. Determine a mechanism to implement such an initiative that will be significantly incentivised to attract investment.
3. To ensure that there is sufficient bulk infrastructure to enable the development vision.
4. The magnitude of the project is of such a nature that it will be implemented over multiple years and require significant public and private partnerships.

The Adam Tas Corridor Local Spatial Development Framework guides and informs decisions made by the Municipality relating to land development, without conferring or removing development rights. For rights to be allocated to the Adam Tas Corridor – enabling actual development as contemplated in the Local Spatial Development Framework – the envisaged rights and obligations need to be incorporated in the Stellenbosch Municipality Zoning Scheme By-Law, 2019.

The most appropriate option for incorporating the LSDF's envisaged rights and obligations in the LUMS appears to be establishing an ATC Local Area Overlay zone as provided for in Section 17 of the Stellenbosch Municipality Land Use Planning By-law, 2019.

ADVANTAGES TO ESTABLISH AN OVERLAY ZONE

From the perspective of the Adam Tas Corridor, establishing an Overlay Zone will have the following advantages:

- Framing development parameters specific to the project context, including the specific objectives pursued through the project.

-
- Ensuring a high-level of integration in the work undertaken by different landowners for different parts of the area over a prolonged period of time.
 - Enabling a clear and accountable Land Use Management process while allowing significant flexibility over time to accommodate changes in societal and landowner context.

Chapters 23 and 24 of the Stellenbosch Municipality; Zoning Scheme By-law deals extensively with Overlay Zones.

In terms of the By-law an Overlay Zone (*oorlegsonering*) means a category of zoning that applicable to a defined area or land unit which stipulates additional development parameters that may be more or less restrictive than the base zone as defined in the zoning scheme.

The objective of an Overlay Zone is to serve two different roles, which may be pursued within a single overlay zone:

- (a) In the first role an overlay zone can impose additional and more restrictive development parameters to achieve e.g., a conservation goal, like prescribing a building character, development parameters or limiting the types of land uses to protect an established historic character of an area.
- (b) In the second role it can be used as a tool to facilitate development in pursuance of a specific developmental goal e.g., to promote a type of development or harness investment and job creation and may include the establishment of less restrictive development parameters and/ or by vesting inherent additional land use rights with the potential of incentives for less burdensome statutory processes.

The overlay zone envisaged for the Adam Tas Corridor is in pursuance of the second role, and specifically in pursuance of:

- (a) The development vision of the Stellenbosch Municipal Spatial Development Framework in general and the Adam Tas Corridor Spatial Plan in particular,
- (b) Unlocking and leveraging investment by facilitating the establishment of pre-approved land use rights.

INCORPORATION OF OVERLAY ZONE INTO EXISTING ZONING SCHEME BY-LAW

In pursuance of the approved spatial planning goals and in consultation with all landowners and interested and affected parties, the municipality will develop and approve the overlay zone in accordance with a process to rezone the land to a representing subdivisional area zoning in accordance with the zoning scheme by-law.

The envisage overlay zone will not change the existing base zoning and land use rights but will establish an additional layer of inherent enhanced land use rights attached to pre-determined performance conditions to be complied with when the subject landowner exercises the option to take up the inherent land use rights of the overlay zone.

Although the inherent land use rights exist and may be taken up at any time, the base zoning and associated existing land use rights will not change if not purposefully taken up by the subject landowner. The subject landowner will consequently also not be liable for any enhanced land tax, development charges or any other obligations unless

the subject landowner elects to act on and implement the enhanced land use rights of the overlay zone.

As previously indicated, the Adam Tas Corridor consists of eleven distinct precincts, and each precinct will have its own distinct type and mix of land uses in accordance with the Local Spatial Development Framework and Development Guidelines of the Adam Tas Corridor.

The land use rights attached to the overlay zone is pre-approved in accordance with the subdivisional area rezoning process during the establishment of the overlay zone, and the landowners will consequently not be required to launch individual land use application processes with associated public participation processes to establish these land use rights.

ADMINISTRATIVE PROCESS TO IMPLEMENT INHERENT LAND USE RIGHTS

To facilitate the implementation of the inherent land use rights, the developers will need to launch administrative processes (this means it is not statutory processes where land use rights are granted, and which are associated with public participation processes) to ensure that all conditions and requirements attached to the overlay zone is being complied with.

During this process, the subject landowners within a precinct will first need to develop a precinct development plan for the approval of the Municipality that will illustrate the overall implementation and allocation of land use rights to the different properties, as well as the associated obligations and counter performance in terms of required infrastructure investment. This again is an administrative process (this means it is not statutory processes where land use rights are granted, and which are associated with public participation processes) but must be developed in partnership between landowners in a specific precinct.

Following the approval of this precinct development plan, a site development plan that complies with this precinct development plan needs to be submitted for approval to the municipality by individual property owners/ developers to take up the specific land use rights attached to such property. This again is an administrative process (this means it is not statutory processes where land use rights are granted, and which are associated with public participation processes).

The purpose of these precinct development and site development plans is to illustrate how the inherent land use rights will be implemented in accordance with the pre-approvals facilitated by the establishment of the overlay zone. The purpose of these plans is therefore not to establish any new or additional land use rights, and consequently there will also be no need or obligation for any additional public participation processes.

A landowner has no obligation to implement the inherent land use rights attached to the overlay zone and will also not be prohibited by pursuing any other type of development not permitted in terms of the subject overlay zone. Should the developer/ landowner however elect to establish any additional or alternative land use rights which are outside the scope of the inherent land use rights attached to the overlay zone, a comprehensive land use application process will need to be followed.

The only other statutory requirement relates to the submission of the actual building plan for approval in terms of the National Building Regulations. This process will be subject to normal building plan approval processes.

Establishing an Overlay Zone will involve an amendment to the Stellenbosch Municipality Zoning Scheme By-law, 2019, following the procedures related to public participation and approval set out in Sections 12 and 13 of the Municipal Systems Act. In terms of the Stellenbosch Municipality Zoning Scheme By-law, 2019, the Overlay Zone does not change the underlying zoning of the properties to which it relates but may vary the development parameters relating to these properties.

A final draft ATC Local Area Overlay zone is attached as **APPENDIX 1**.

7. COMMENTS FOR OTHER DEPARTMENTS

The planning process was undertaken with the knowledge and participation of senior management. The draft concept underpinning the MSDF was presented to management and received their full support.

The MSDF was made available to all directorates during the 60-day period for public participation and input and comments were received and are addressed to their satisfaction.

8. FINANCIAL IMPLICATIONS

No financial implication.

9. LEGAL IMPLICATIONS

The recommendations in this report comply with Council's policies and applicable legislation.

10. STAFF IMPLICATIONS

None

11. RISK IMPLICATIONS

None

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.8.3

that Council approves the draft Adam Tas Corridor Overlay Zone attached as **APPENDICE 1** to the agenda for incorporation in the Stellenbosch Municipality: Zoning Scheme By-law, 2019.

APPENDIX 1: Draft Adam Tas Corridor Local Spatial Development Framework Overlay Zone

APPENDIX 1

Adam Tas Corridor Overlay Zone

(To be incorporated in Chapter 27 of the SM Zoning

Scheme By-Law 2019: Local Overlay Zones **Sections 263-265 and Section 266 (1)-(4) remain and is reflected as it is.)**

263. Zone name and designation on map

- (1) The Local Area Overlay zone shall be depicted on a map and shall be referred to by the code (LAO) followed by a number designating the zone. The area to which the Local Area Overlay zone applies shall be indicated on the zoning map by a green unique coloured dotted outline with a transparent fill in the same colour.

264 Purpose of the zone and incorporation of land

- (1) The purpose of the local area overlay zones is to provide more detailed development parameters for a specified local area.
- (2) The Municipality may demarcate new Local Area Overlay areas or amend existing areas by amending the Scheme in terms of Planning Law, but land cannot be rezoned by an owner for incorporation into or exclusion from this overlay zone.

265. Areas designated as local area overlay zones

- (1) Municipality has designated the areas listed in **Table D** as Local Area Overlay zones.

TABLE D: LOCAL AREA OVERLAY ZONES		
Number and Map Reference	Description of Area	Colour on map
LAO1	Techno Park Local Area Overlay zone	
LAO2	Adam Tas Corridor Local Area Overlay zone	TBC

266. Areas declared as local overlay zone areas and specific provisions

Sub-sections 1-4 deals with the Techno Park Local Area Overlay Area.

- (1) The Adam Tas Corridor Local Overlay Area is indicated on Map LAO2 and the parameters in this subsection will apply as indicated.
- (2) The purpose of the Adam Tas Corridor Overlay zone is to enable development of the area in a manner which provides for:

- (a) A vibrant, compact, and efficient urban district as part of Stellenbosch town, respectful of the environment and history.
- (b) Increased access to livelihood opportunity for ordinary citizens and different income groups.
- (c) Inclusionary Housing.
- (d) Seamless spatial and socio-economic integration with surrounding areas.
- (e) Financial sustainability.
- (f) Pro-active partnership, shared responsibility, and a clear differentiation of roles between landowners, government, and other stakeholders.
- (g) A clear development process with speedy decision-making.

Figure 28. Delineation of the ATC Overlay Zone boundaries, distinguishing between Precincts 1 - 10 (in red) as the urban precincts and Precinct 11 (Papegaaiberg in green) as a green precinct

- (3) Unless otherwise indicated, the development parameters set out in this Chapter replace all the development rules set out in the various use zones applicable to the area and shall apply to all the properties or portion of properties falling within the boundaries of the Adam Tas Corridor Local Area Overlay zone as depicted on map LAO2.
- (4) The Municipality's overall intent for the Adam Tas Corridor Overlay Area is stated in the Adam Tas Corridor Local Spatial Development Framework, prepared in

terms of the legislative framework, settlement development and management objectives, principles, and policy set out in the Spatial Planning and Land Use Management Act 16 of 2013, Western Cape Land Use Planning Act 3 of 2014, approved Stellenbosch Municipal Spatial Development Framework, and related legislation and policy.

- (5) Core components of the Adam Tas Corridor Local Spatial Development Framework which informs the development parameters in this Chapter, its extent and distribution across the area, take-up, phasing, and form, are the:
- (a) Development Principles.
 - (b) Policy framework.
 - (c) Area-wide Development Framework, including the identification of precincts, mix of uses (including the compulsory provision of inclusionary housing), and development yields permitted.
 - (d) Area-wide Services Framework, including the progressive extent of development permitted with respect to bulk infrastructure provision/ investment triggered by such development.
 - (e) Area-wide Development Guidelines.
 - (f) The hierarchical process of plan preparation and approval - the "package of plans" - required for precincts and parts of precincts following below the Development Framework and the focus and format of each.
- (6) The indicative land area allocated to different uses as permissible in the Adam Tas Corridor Overlay Area and precincts shall be as set out in the table below:

Area	Residential	Mixed use residential	Mixed use commercial/retail	Light industry	Sporting facilities	Public facilities
Overall Area	259 730	487 111	379 398	220 661	57 026	198 025
Precinct #1 Droë Dyke	173 125	194 766	-	-	21 641	43 281
Precinct #2 Sawmill	-	49 063	56 072	28 036	-	7009
Precinct #3 Oude Libertas	-	17 804	17 804	-	-	23 735
Precinct #4 Adam Tas	-	56 986	56 986	14 247	-	14 247
Precinct #5 Remgro	-	12 360	24 719	12 360	-	12 360
Precinct #6 Bosman's Crossing	-	16 586	14 513	8 293	-	2 073
Precinct #7 Bergkelder	-	-	50 971	16 990	-	16 990
Precinct #8 Van der Stel	-	24 073	30 951	-	6 878	6 878
Precinct #9 Plankenbrug	-	-	98 514	140 735	14 073	28 147
Precinct #10 Northern Extension	86 605	115 473	28 868	-	14 434	43 302
Precinct #11 Papegaalberg	-	-	-	-	-	-

- (7) The overall extent of floor area permitted in the Adam Tas Corridor Local Area Overlay area and its distribution between precincts and uses shall be as set out in the table below.

Area	Residential		Mixed use residential		Mixed use commercial/retail		Light industry		Sporting facilities		Public facilities		TOTAL	
	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum	Minimum	Maximum
Overall Area	372 971	528 793	884 948	1 250 285	908 685	1 227 516	500 076	669 315	104 551	143 809	375 427	526 881	3 146 659	4 346 599
Precinct #1 Droë Dyke	234 758	328 902	264 103	370 014	-	-	-	-	29 345	41 113	58 690	82 225	586 895	822 254

Precinct #10 Northern Extension	138 213	199 891	184 283	266 522	46 071	66 630	-	-	23 035	33 315	69 106	99 946	460 709	666 304
Precinct #11 Papegalberg	-	-	-	-	-	-	-	-	-	-	-	-	-	-

- (8) At the discretion of the Municipality, and subject to meeting the overall intent for the Adam Tas Corridor Overlay Area, floor area associated with the preservation of historic buildings, historic structures, and inclusionary housing, may be excluded from overall floor area permitted.
- (9) With cognisance to the general purpose of a specific building or structure, its specific location and built environment context - including the general townscape, historic features, view lines, and the amenity of adjoining development - no building or structure in the Adam Tas Corridor Overlay Area shall exceed a height of six (6) storeys.
- (10) The Municipality will follow a package of plans approach as the basis for approvals in respect of the Adam Tas Corridor Overlay Zone.
- (11) The package of plans consists of the following components, listed in a hierarchy from higher - order to lower-order plans:
- Contextual Framework.
 - Development Framework.
 - Precinct Plan.
 - Subdivision Plans.
 - Site Development Plans.

- f) Building Plans.
- (12) The Municipality will issue detailed specifications related to the focus, subject matter, and format of components of the package of plans for the Adam Tas Corridor Overlay Area from time to time.
- (13) General provisions of the package of plans are that:
- a) Lower-order plans must follow higher-order plans.
 - b) The Municipality may deem the description of the Adam Tas Corridor Overlay Area contained in the approved Municipal Spatial Development Framework as the Contextual Framework for the area.
 - c) The Municipality may deem the description and associated development parameters of the Adam Tas Corridor Overlay Area contained in the approved Adam Tas Local Corridor Local Spatial Development Framework as the area-wide Development Framework for the area.
 - d) Bulk allocated to a Precinct Plan area remains "floating" across the precinct - within the overall over-all intent for the Adam Tas Corridor Overlay Area as stated in the Adam Tas Corridor Local Spatial Development Framework and area-wide Development Framework - and shall be allocated to a specific development area through the mechanism of a Site Development Plan.
 - e) Unless otherwise stated in this Chapter, no development may commence on site unless the necessary hierarchy of plans have been submitted and approved by the Municipality.
 - f) A specific plan - at any level in the hierarchy - shall only lapsed if replaced by a new approved plan.
 - g) The Municipality is the approving authority of any level of plan and may require amendments of plans under preparation to address reasonable concerns related to the overall vision, strategic goals, and planning of the area.
- (14) Upon approval of a Precinct Plan for each of the precincts constituting the Adam Tas Corridor Overlay Area, and with cognisance to the development guidelines contained in the Adam Tas Corridor Local Spatial Development and the area-wide Development Framework for the area, the Municipality shall impose conditions of

approval which will specify additional development parameters for the precinct, including, but not limited to:

- a) Site coverage, height, and massing of buildings.
 - b) The relationship between buildings, streets, and spaces.
 - c) The management of environmental resources.
 - d) The provision of Inclusionary Housing.
 - e) The general response to, incorporation, and management of aspects of heritage and culture.
 - f) Parking, and access.
 - g) Engineering services provision.
- (15) The application and calculation of Development Charges (DCs) for the enhanced rights as per 266(6) for these developments, will be subject to the Stellenbosch Municipality's DC Policy and DC Tariffs, as approved annually by Council.
 - (16) Road reserve widths for public roads that includes non-motorized transport, pedestrian walkways, cycle routes and public transport routes within the Adam Tas Corridor will be a minimum of 16m wide. The development of traffic impact assessments and the Adam Tas transport study will propose and inform on road reserve widths.
 - (17) Final Road Reserve widths will be determined by the Municipality's Infrastructure Services in collaboration with the Planning Department.
 - 18) Non-motorized transport and public transport in the overlay zone must be promoted.
 - 19) The Adam Tas Transport Study currently underway will inform and provide guidance to the Municipality on all transport related aspects which must be taken into account in the preparation of all precinct plans.
 - (20) The new residential or mixed-use development which include 20 dwelling units or more, must contain a minimum of 30% of the total units to be targeted at affordable housing on-site (also referred to as inclusionary housing units), falling within the affordability thresholds for rental or ownership.
 - (21) These inclusionary housing units must be provided on-site as part of the market-related development i.e., in the same building or on the same land parcel and

should be spread throughout the development as indicated on the approved precinct site development plan.

- (22) Residents of the inclusionary housing units must have indiscriminate access to all entrances and amenities of the development; and -
 - a) The inclusionary housing units are not intended for community residential buildings, communes, hostels, and less formal residential. The inclusionary housing units should only be used for permanent residence and excludes any of the land uses associated with transient guest (i.e., home lodging, bed and breakfast, hotel, tourist accommodation establishment, tourist dwelling units, etc.)
 - b) The target market for beneficiation should benefit employed households (excl. students) earning stable incomes that fall within the affordability threshold as defined above.
- 23) The inclusionary housing units will be reserved for qualifying recipients with a total combined annual gross monthly household income from R3 500 to R27 200 (Financial Services Charter Measure, 2022 rates (updated yearly)).
 - a) Monthly rent or repayments may not be more than 30% of the total monthly household income for renters and 30-35% for homeowners;
 - b) The sale price or rental amount may not escalate annually beyond inflation, based on the Consumer Price Index (CPIX) as published by Stats SA.
- 24) The conditions of affordable housing which relates to the inclusionary housing units must be in place for not less than 30 years using a suitable management mechanism, to the satisfaction of the Director: Planning and Economic Development, or until repealed by a Council resolution.
 - a) Prior to the approval of any building plan, the developer shall submit to the Director: Planning and Economic Development for approval, a mechanism to ensure the abovementioned condition, as well as the affordability criteria of the qualifying recipients. The approval mechanism shall be implemented to the satisfaction of the Director prior to the occupation of any building on the relevant portion.
 - b) If rented, the qualifying household income criteria and rent may not escalate annually beyond inflation (based on the CPIX). Lease agreements need to ensure that the tenants are subject to annual income certification and the units as allocated remains available to the intended income group; or

- c) If sold, a restrictive condition must be included in the deed of sale capping the sale price to comply with the definition of affordability and must only be sold to pre-approved buyers that meet the affordability criteria.
 - d) Approval on resale prices of units needs to be sought from the Director: Planning and Economic Development before such a transaction take place.
- 25) The developer or managing agent (HOA or Body Corporate) must provide the Director: Planning and Economic Development with the list of registered inclusionary housing units, annually. The entities should also ensure that the affordability preservation and any other requirements as agreed in the inclusionary housing agreements as part of the planning permission are stipulated in the constitution of these bodies.
- 26) If in due course, the Stellenbosch Municipal policy on Inclusionary Zoning is adopted and the provisions and requirements thereof are preferred to the above conditions, the developer/owner has the option (but no obligation) to adopt and adhere to the policy requirements instead.
- (27) In addressing parking, landowners should consider:
 - a) The intent expressed in the Adam Tas Corridor Local Development Framework and area-wide Development Framework to pursue and environment prioritising public and non-motorised transport.
 - b) The reality of having to accommodate parking – serving Stellenbosch town and the Adam Tas Corridor Overlay Area – while expecting to progress towards lower private motor vehicle dependence and use over time; this, in turn, requiring innovative transitory arrangements, including the provision of parking in a form enabling ready conversion in future to other uses.
 - c) Centralised parking facilities, delinking the provision of parking from the specific entity served.
- (28) With cognisance to the intent expressed in the development guidelines contained in the Adam Tas Corridor Local Spatial Development Framework, its core components, and the development parameters contained in this Chapter, it is anticipated that the Municipality, landowners, and other stakeholders will enter into formal agreements from time to time to further inform the manner in which the overall development intent for the Adam Tas Corridor Overlay Area is to be achieved and to affirm the varied commitments

and responsibilities of landowners and stakeholders. These agreements may include inter alia:

- a) Shared responsibility related to the provision of infrastructure services and the phasing of infrastructure, including the extent and use of development contributions.
 - b) Incentives offered to landowners (including the cost of public land to be made available for development and conditions associated with its development).
 - c) Shared responsibility related to the formation and operation of institutional arrangements established in support of the Adam Tas Corridor Overlay Area.
 - d) Landowner and shared responsibility related to the provision of inclusionary housing.
 - e) Shared responsibility related to undertaking environmental remediation work.
 - f) Shared responsibility related to the provision and operation of public facilities.
- 29) To enable the coordination demanded to achieve the stated overall intent for the Adam Tas Corridor Overlay Area between landowners, the Municipality, and other stakeholders, the Municipality and landowners will establish and maintain dedicated institutional arrangements to support the Municipality in exercising its responsibility in managing the uptake and implementation of development parameters envisaged in the Adam Tas Corridor Local Spatial Development Framework and contained in this Chapter.
- 30) The Institutional mechanism referred to in (29) above will be established within three (3) months after the proclamation of the Adam Tas Overlay Zone and according to a structure with Terms of Reference as approved by Council. The institutional mechanism will include the establishment of a Project Management Unit ("PMU") who will assist the Municipality with the implementation of the ATC.
- 31) The purpose, composition and functioning of the Institutional Mechanism will be described in the Terms of Reference as approved by Council and as may be amended from time to time.
- 32) Public participation related to the Adam Tas Corridor Overlay Area as

contemplated in the Stellenbosch Municipality Land Use Planning By- law, 2015 shall occur:

- a) Prior to the adoption of the Adam Tas Corridor Local Spatial Development Framework and establishment of the Adam Tas Corridor Local Area Overlay zone.
 - b) At the review of the Adam Tas Corridor Local Spatial Development Framework (and resultant- if demanded through the review- amendment of the Overlay zone).
 - c) When a departure from the provisions of the Adam Tas Corridor Local Area Overlay zone is applied for.
- 33) As part of the dedicated institutional arrangements contemplated in Section (34) above, detailed arrangements will be agreed to related to addressing possible disputes between landowners, their agents, and proponents of individual development projects in the Adam Tas Corridor Overlay Area.
- 34) The Municipality may consider lead projects to commence development of the Adam Tas Corridor Overlay Area - prior to completion and adoption of Precinct Plans - if it is considered that the specific project will contribute to the overall development objectives for the area, do not impede future opportunity, and assist in learning about and enabling future roll-out of development in the area.
- 35) Lead projects - taken together- should encompass a balanced package of interventions and reflect the future of the area as a vibrant, mixed use living and working environment serving a range of interests and income groups.
- 36) No application for building plan approval in terms of the National Building Act for a lead project shall be granted by the Municipality unless a Site Development Plan has first been approved.
- 37) As it is expected that development of the Adam Tas Corridor Overlay Area will take place over a lengthy period, the Municipality may consider interim uses for parts of the area, ensuring fruitful use of existing land and building resources, meeting community needs, and assisting in project learning.
- 38) In considering interim uses other than that permitted in terms of the base zoning of the Adam Tas Corridor Overlay Area, the Municipality may require submission of a Site Development Plan for approval.

- 39) To address issues of nuisance and safety the following restrictions apply to the Adam Tas Corridor Overlay Area:
- a. No building shall be used for the manufacture, storage, distribution, or sale of any product or item which increases the fire hazard to any other improvement or property in the environment.
 - b. No business shall be permitted which constitutes a nuisance by the emission of smoke, gases, and effluvia, which could reasonably be expected to be injurious to products or persons in the Adam Tas Corridor Overlay Area.
 - c. The storage of material or the use of equipment or research processes, which may cause vibrations beyond the boundaries of the land unit upon which such equipment or processes occur, shall not be permitted.
 - d. The storage of explosives shall not be permitted in the Adam Tas Corridor Overlay Area.

11.8.4	REQUEST FOR THE APPROVAL OF THE DRAFT STELLENBOSCH MUNICIPALITY INCLUSIONARY ZONING POLICY, 2023
--------	---

Collaborator No: 749595
 IDP KPA Ref No: Good Governance and Compliance
 Meeting Date: 17 May 2023 & 24 May 2023

1. SUBJECT: REQUEST FOR THE APPROVAL OF THE DRAFT STELLENBOSCH MUNICIPALITY INCLUSIONARY ZONING POLICY, 2023

2. PURPOSE

To provide Council with the pertinent facts that include the responses from the extended legislative Public Participation Process ("PPP") in order to approve that the draft Stellenbosch Municipality Inclusionary Zoning Policy.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The draft policy document which aims to support Stellenbosch Municipality and other key role players in delivering more high-quality affordable housing (also referred to as inclusionary housing) in well-located and priority development areas, creating a mix of income groups across new and infill developments in Stellenbosch Municipality promoting social and economic integration.

To deliver affordable housing within the Stellenbosch Municipality, available municipal spatial planning; and land use planning systems and land-based financing mechanisms were investigated and identified. This will be used in leveraging and incentivizing land value gains in spatially targeted areas for the creation public good (i.e. affordable housing) and to enable well performing settlements (i.e. integrated, inclusive, resilient, efficient) in order to address current development challenges and historical spatial imbalances/inequalities.

The spatial compact as envisaged and approved in the Stellenbosch Municipal Spatial Development Framework, 2019 and the Adam Tas Corridor Local Spatial Development Framework and Development Guidelines, 2022 of enabling inclusive, efficient, and an effective municipality by providing a wide choice of quality affordable housing to meet the needs of the community, widening the opportunities for homeownership, and creating flexibility and choice of tenures and price ranges for those who rent and seek the security of tenures. In addition to facilitate and grow a strong partnership with the private sector in terms of delivering more quality affordable housing.

The report also provides the feedback received during the Public Participation Process and provides responses from the comments, where applicable.

It is noted that there was large scale support, even from the bodies providing comments, and suggest comments related to suggestions which will be discussed below.

5. RECOMMENDATIONS

- (a) that Council takes note of the feedback from the Public Participation Process (“PPP”), which commenting period closed on 08 May 2023; copies attached as **APPENDIX 4** to this report; and
- (b) that Council **approve and adopt** the draft Stellenbosch Municipality Inclusionary Zoning Policy, 2023 in terms of the Local Government Municipal Systems Act No. 32 of 2000, copy attached as **APPENDIX 1** to this report.

6. DISCUSSION / CONTENTS**6.1 Background**

Council approved the Municipal Spatial Development Framework, 2019 (“MSDF”) and the Adam Tas Corridor (“ATC”) Local Spatial Development Framework and Development Guidelines, 2022 (“LSDF”) which identifies the development of an inclusionary zoning (housing) policy to achieve a desired urban future of more affordable housing opportunities in well located parts of our towns to become more socially and economically inclusive.

The envisaged spatial transformation of our towns is underpinned by the Constitution, Spatial and Land Use Management Act, Act 16 of 2013 (“SPLUMA”) principles of spatial justice, sustainability, efficiency and good governance, and specifically to meet the expectations of the Western Cape Inclusionary Housing Policy Framework as approved by the Provincial Cabinet in October 2022.

At the 11th Council Meeting dated 22 February 2023, Council resolved that the Draft Stellenbosch Municipality Inclusionary Zoning Policy, be advertised for public comment for a period of sixty (60) days. The draft by-law was advertised in the Eikestadnuus, Paarl Post and Die Burger and the municipal website on 02 & 07 March 2023. The closing date for comments was 08 May 2023.

Comments were received from the Internal Engineering Department, which was addressed as the comments related to the Development Contributions (“DC’s”) Policy. Comments were received from Stellenbosch Interest Group (“SIG”), copy attached as **APPENDIX 4** to this report, and the Ndifuna Ukwazi, copy attached as **APPENDIX 5** to this report.

6.2 Discussion

The policy aims to apply the inclusionary zoning provisions in land use planning permissions which is a municipal planning mandate within the Stellenbosch Municipality context.

A prerequisite of the development of the municipality’s inclusionary zoning policy was the adoption of a policy framework by the Western Cape Government (“WCG”). The Western Cape Inclusionary Housing Policy Framework, 2022, was approved by Cabinet in October 2022 and sets out a clear definitional framework and approaches available to municipalities in developing a municipal inclusionary zoning policy.

Another prerequisite includes the identification of unaffordable housing as a development challenge within the municipality’s spatial policies and an indication on how and where this should be addressed. The Council approved MSDF and the ATC LSDF and Development Guidelines, 2022 identifies the development issue of unaffordability and proposes the development of a targeted inclusionary zoning (housing) policy using the available municipal spatial planning, land use management

and land-based financing mechanisms within its control in order to leverage and incentives private developments to provide more high-quality affordable housing.

As part of the policy development process, a housing market study in partnership with the WCG departments, namely Department of Environmental Affairs and Development Planning ("DEA&DP"), Department of Human Settlements ("DHS"), Department of Transport and Public Works ("DT&PW"), the Department of the Premier ("DOTP"), and four participating municipalities (including Stellenbosch Municipality) was concluded in September 2022.

The goal of the housing market study was to determine how the local property market functions and where there might be a mismatch between the availability and/or provision of housing opportunities compared to the ability of existing households to afford these housing opportunities. The study followed an evidence-based approach and illustrates specifically the mismatch between household income and the entry level, affordable, and conventional market segments (also referred to as the affordable housing segments). *The study demonstrated a functional and active property market in the luxury market segmentation with few housing opportunities in the affordable housing segments in Stellenbosch.*

Responses to the comments received during the Public Participation Process

Organisation / Individual	Summary of relevant comment(s)	Departmental Response(s)
Stellenbosch Interest Group ("SIG")	The policy will not mandate developers to choose one of the three options, except perhaps in the case of spatially targeted area, it is not entirely clear where these areas are located.	<p>The Policy clearly not that the policy will be applicable within the Restructuring Zones as contained within the Municipality's Spatial Development Framework, 2019 ("MSDF").</p> <p>The policy is further clear that the Adam Tas Corridor ("ATC") which was also identified as the Municipality's Spatial Transformation District is an area where this policy will be applicable, and therefore the Council has approved and adopted the ATC Local Spatial Development Framework during October 2022.</p>
	The dwelling units must be used exclusively for permanent residency and not for any land uses associated with transient guests such as home lodging, bed and breakfast, hotels, tourist accommodation establishments, tourist dwelling units, etc. It is unclear how this requirement will be policed, managed, and administered, as there are many loopholes that can be exploited to circumvent its enforcement. Therefore, the creation of overlay zones is necessary.	<p>The comment is noted and the Department has undertaken the public participation process i.r.o. the Adam Tas Corridor Overlay Zone, and the request to approve the overlay will serve at the Council meeting scheduled for May 2023.</p> <p>It must also be noted that the Inclusionary Zoning Policy is a land use management tool to implement the prescripts of the policy.</p>
	It is also necessary to provide an overall map that displays the areas	As mentioned above, the maps that indicate the areas where the policy will be applicable

	designated for each of the three type of inclusionary zoning: mandatory, spatially targeted, or voluntary implementation.	is contained within the MSDF and the ATC LSDF.
Ndifuna Ukwazi	The policy should be amended to reflect a racially targeted approach which prioritises Black families for affordable units generated out of inclusionary housing.	The policy was informed by the housing market study which was compiled for Stellenbosch Town and Klapmuts, and the goal of the study was specific to provide the factual information related determining how the local property market functions and where there might be a mismatch between the availability and/or provision of housing opportunities compared to the ability of existing households to afford these housing opportunities . The study followed an evidence-based approach and illustrates specifically the mismatch between household income and the entry level, affordable, and conventional market segments (also referred to as the affordable housing segments). <u><i>The study demonstrated a functional and active property market in the luxury market segmentation with few housing opportunities in the affordable housing segments in Stellenbosch</i></u>
	The policy should lower the upper affordability threshold and take a stronger position on the need for income brackets to further break down this broad category. There should be a proportional spread of households across the income bands (based on the number of people falling into the various brackets in a specific context) to ensure that municipal policies provide truly affordable housing.	As noted above the Housing Market Study followed an evidence-based approach and through this study the affordability in terms of the Stellenbosch Context was determined and used to inform the policy.

It must be noted that both commenting organisations in their responses applauded Council for taking the leap in drafting and ultimately adopting the policy. This is also evident from the article published by Ndifuna Ukwazi on 26 April 2023, copy attached as **APPENDIX 6** to this report. This is also evident in the commenting letters submitted by both organisations.

It is imperative to note that housing markets alone cannot fix themselves and it has various negative consequences for both households and towns as identified within the municipality's spatial planning policies. The provincial and municipal policy imperatives identified inclusionary zoning as a planning system tool (also referred to as a land use regulatory mechanism) used to secure affordable housing through the regulatory system of development planning permissions to oblige property owners and developers to provide affordable housing, for sale or rent, within new residential and mixed-use developments.

The policy option provides scope for using land-based financing and planning mechanisms by the municipality to offset these costs by one or more incentives, including density bonus (including parking reductions or other planning parameter variances), providing or leveraging public land leasing and land sales, discounting or deferring the payment of developer contributions, expedited planning processes through an overlay zone mechanism (i.e. Adam Tas Local Area Overlay Zone, in progress) in well-located and spatial targeted areas in alignment with its adopted spatial policies.

The development of the municipal inclusionary policy was done in parallel with the provincial policy framework and various technical assistance groups facilitated by the Development Action Group ("DAG"), Lincoln Institute, DEA&DP, Centre of Affordable Housing Finance ("CAHF") and other participating municipalities were made available to the drafting team to engage on technical issues and facilitate peer learning since the only inclusionary housing policy currently adopted and implemented is within the City of Johannesburg. These platforms, partners, and internal technical workshops provided valuable inputs into the draft municipal policy position on inclusionary zoning.

6.3 Financial Implications

There are no financial implications in respect of the drafting of this report and or the by-law, as the by-law was produced in house and the Housing Market Study was funded by the Western Cape Government: DEA&DP.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

This report has no additional staff implications to the Municipality.

6.6 Previous / Relevant Council Resolutions:

11TH COUNCIL MEETING: 2023-02-22: ITEM 8.2

RESOLVED (nem con)

- (a) that Council takes note of the draft Stellenbosch Municipality Inclusionary Zoning Policy, attached as APPENDIX 1 to this report, and
- (b) that Council approves that the draft Stellenbosch Municipality Inclusionary Zoning Policy, be advertised for public comment for a period of sixty (60) days, whereafter same be resubmitted to Council for final consideration and subsequent approval in terms of the Local Government Municipal Systems Act No. 32 of 2000.

6.7 Risk Implications

The risks are addressed through the content of the report.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.8.4

- (a) that Council takes note of the feedback from the Public Participation Process (“PPP”), which commenting period closed on 08 May 2023; copies attached as **APPENDIX 4** to this report; and
- (b) that inclusionary zoning policy be amended as per comments received and readvertised for public comment for 21 Days.

APPENDICES

- Appendix 1: Final Draft Stellenbosch Municipality Inclusionary Zoning Policy
- Appendix 2: Western Cape Government: Department of Environmental Affairs and Development Planning: Housing Market Studies for Intermediate Cities / Larger Towns in the Western Cape: Stellenbosch Town Report, Final Report, August 2022
- Appendix 3: Copy of advertisement placed in the newspapers, requesting comment.
- Appendix 4: Comments received from Stellenbosch Interest Group (“SIG”)
- Appendix 5: Comments received from Ndifuna Ukwazi
- Appendix 6: Ndifuna Ukwazi Article placed in the Property Wheel.co.za dated 26 April 2023

1. DEFINITIONS AND TERMS OF CLARIFICATION

“Additional land use rights (obtained through development permissions)” refers to any development permission that increases or enhances allowable bulk or development yield over and above the existing rights, including the removal of restrictive title deed conditions (WCG 2022).

“Affordable housing” are determined by National Government as an income threshold for the affordable or gap housing market of households earning up to R22 000 per month. The Financial Services Charter (FSC) defines the affordable housing target market to be the approximate cost of bonded entry-level housing in the country, capable of being mortgaged, adjusted annually by the midpoint of the average Consumer Price Index (CPI) and the average Building Cost Index (BCI). The Banking Association of South Africa annually updates this measure and makes this available on its website. However, affordability can fluctuate depending on the context and for the purposes of municipal inclusionary housing policies, affordability can be determined by using the aforementioned sources, as well as considering the outcomes of housing market studies for particular settlements. Also refer to gap market/housing below (WCG 2022).

“Affordability preservation” - the purpose of inclusionary housing is to increase the stock of well-located affordable housing over the long term. If such housing is not restricted from being sold or rented in the open market following the first generation of allocation, the purpose is defeated, while public value profits a few. Preserving the affordability of inclusionary units over the long term is therefore a key policy concern (WCG 2022).

“Density bonus” refers to a zoning tool that allows developers to increase height and/or bulk in a project by allowing building heights or a floor factor/floor space greater than the zoned maximum as well as

relaxations of related requirements, such as parking, in exchange for a public good namely affordable housing (also referred to as inclusionary housing). This tool is used primarily for projects that include the development of housing units. The added density is intended to compensate the developer with additional revenue from the construction of additional dwellings. This recognises the added costs of development or differences in profit margins between market rate units and the inclusion of below-market rate units or unprofitable amenities. The result is development that provides additional density and public benefits without direct public funding. The density bonus is a one-time, in-kind obligation in which the private sector developers' cost of capital investment in affordable housing can be offset by granting additional, monetizable development rights, greater than the zoned maximum for a specific development site. (WCG 2022).

“Development charges” also known as an impact fee, is a charge that a local government imposes on the developer of a new development project to pay for all or a portion of the costs to the public sector of providing public services to the new development. Development charges have been used by local governments to help offset fiscal burdens created by new developments related to municipal infrastructure and provision of public services such as sewer and wastewater management treatment systems, road networks, parks and so on. Development charges are calculated by assessing the costs that the development would impose on the current municipal infrastructure network and what additional capacity or infrastructure would be required to ensure that the new development is adequately serviced. The fee is often able to be paid either in kind or in cash (NT 2017).

“Finance-linked Individual Subsidy Programme (FLISP)” is a housing subsidy for first-time home buyers to assist with purchasing a property. The subsidy can be used on its own or in combination with mortgage and non-mortgage finance facilities, making it more affordable to purchase a property (plot and/or house).

Households with an income between R3 501 to R22 000 may qualify for the FLISP subsidy if they meet all the criteria. The subsidy amount depends on the income of the applicant and ranges between R27 960 – R121 626 (WCG 2022).

“Gap market/housing” refers to households falling into the portion of the market that earn too much to qualify for full grant housing assistance, but too little to be able to afford a bond of sufficient size to purchase an entry level market house. The gap housing market is understood to fall within the broader affordable housing market. Also refer to affordable housing above (WCG 2022).

“Housing/property ladder” refers to where there are “progressive stages of securing adequate and improved housing. This encompasses moving from informal to formal housing, and within the formal realm, from renting to owning and from owning a small house/flat to owning a larger and/or more valuable property” (WCG 2022).

“Land-based financing” (LBF) goal as defined by National Treasury (Cities Support Programme 2017) is a mechanism to be primarily used to maximize and unlock the value of government assets, advance a city’s spatial restructuring goals, and promote transit orientated development. This mechanism refers to policy and regulatory mechanisms that allow the public sector to participate in the appreciation of real estate values resulting from public, and at times, private improvements. These improvements may make land parcels more accessible in the case of transit investments, or may prepare land (proactive zoning through the use of an overlay zone such as the ATC overlay zone) for private sector development through the provision of network infrastructure (such as water connectivity and sewerage access) and additional public amenities (such as public open space, hospitals, and schools). Mechanisms associated with LBF include special assessment districts, tax increment financing, development charges, leveraging the value

of municipal real estate, sale of development rights, density bonus, inclusionary housing, land readjustment schemes and so on (NT 2017; OECD 2022).

“Land value capture” refers to a policy approach that enables communities to recover and reinvest land value increases that result from public investment and government actions (i.e. planning permissions). It is rooted in the notion that public action should generate public benefit. When used in conjunction with good governance and urban planning principles, land value capture can be an integral tool to help governments advance positive fiscal, social, and environmental outcomes. Well-known instruments include land banking, land readjustment, land leasing, inclusionary housing, transfer of development rights, charges on building rights, special assessments, impact fees, land value taxes, and exactions (OECD 2022).

“Leveraging the value of municipal real estate” refers to the municipal land as an asset which can be leveraged for improved strategic use. Transacting in municipal land can take the form of sales, auctions, leases, or any other conveyance that sees the rights and entitlements to municipal owned property transferred at below market cost value in exchange for a policy benefit required by the municipality. Depending on the municipality’s goals, legal, and regulatory framework, and institutional capacity, it could decide to convey a parcel of land for a fee, receive an in-kind payment of infrastructure in lieu of cash, or participate as an equity partner in the development (NT 2017).

“Municipality” means Stellenbosch Local Municipality;

“Open-market housing” refers to housing sold or rented on the open market (willing buyer and seller) with no state assistance, with or without a mortgage (WCG 2022).

“Overlay zone” means a category of zoning applicable to a defined area or land unit, which stipulates additional development parameters that may be more or less restrictive than the base zone as defined in the Stellenbosch Municipality Zoning Scheme Bylaw (2019).

“Planning permissions” refers to authorisations given in response to applications made to a competent authority to develop land (WCG; 2022).

“Priority development areas” as defined in the Stellenbosch Municipal Spatial Development Framework (2019) and subsequent Capital Expenditure Framework (2020) refers to the urban functional areas of Stellenbosch, Klapmuts, and Franschhoek. These areas are priority development areas where the municipality intends to focus investment in order to achieve the goals of the MSDf as well as other strategic documents, namely the Adam Tas Local Spatial Development Framework and Development Guidelines (2022).

“Set-aside requirement” refers to the number of inclusionary housing units that must be provided in a development according to the size of the development or in relation to the additional rights given (WCG 2022).

“Settlement restructuring” refers to the need to transform i) the apartheid form of our urban settlements where the poorest live the furthest away from opportunities – spending the most time and money accessing these opportunities or being caught in spatial poverty traps – and residential areas are defined and separated by class and race ii) the unsustainable modernist form of our settlements where settlements are designed with the automobile as the main form of movement and land uses is monofunctional. Typically, settlement restructuring is planned for and implemented through investment

in socially integrated, mixed-use infill development on well-located land, along with densification, intensification of land uses, public transport and non-motorised transport and taking high quality facilities and amenities to marginalised township areas (WCG 2022).

“Social housing” refers to rental housing targeted at households earning R1 850 – R22 000 per month. Social Housing is governed by the Social Housing Act, 2008 (Act 16 of 2008) and the policy prescripts of the National Housing Code (WCG 2022).

“Spatial apartheid” refers to “the legacy of apartheid – communities segregated from one another based on race (and class) with so-called black and coloured people relocated to less well-resourced urban areas or prevented from accessing or owning property in these areas – as well as the impacts of the legacy of the modernist approach to city building based on the automobile and functional separation of land uses. This has left South Africa with cities that are inefficient, inequitably developed and environmentally, socially, and fiscally expensive to live in and to manage. It has also meant that discrimination has been structured into settlement patterns” (WCG 2022).

“Spatial transformation” as a national focus on transforming of cities as envisaged by the NDP 2030. Namely ensuring that a larger proportion of the population of the population should live closer to places of work and that travel distances and costs should be reduced, especially for poor households. Urban systems are key levers to overcome the debilitating impact of distance and separation on the fortunes of the individual, household, business, and the state, as well as the environment and the resilience of the system as a whole. These include both hard (physical structures and networks) and soft (such as governance systems including urban management and land use management) systems that facilitate and enable compact cities and transformed urban spaces of social and economic inclusion on an equitable

basis. The equitable distribution of resources within cities, as well as building systems that facilitate affordable and safe access to the full ambit of resources that makes urban living productive, are critical to spatial transformation. The South African Local Government Association (SALGA) defines spatial transformation as the overhaul of an inherited segregated spatial dispensation and preventing it from re-establishing itself in new forms of post-apartheid class and income-based spatial segregation and spatial inequality. In considering how to measure whether we are spatially transforming our settlement, SALGA identifies four themes: proximity and access; housing and basic services; integration and inequality; safety and amenity; and agency and governance (WCG 2022).

“Spatially targeted areas” refers to “a built environment investment prioritisation approach where specific areas are designated for investment or specific land uses, within an urban system, to achieve transformative development outcomes. Spatial targeting is an approach recommended by the National Development Plan 2030” (WCG 2022) and the Integrated Urban Development Framework (2016).

2. PURPOSE

2.1 The intention of this document is to support Stellenbosch Municipality and other key role players in delivering more high-quality affordable housing (also referred to as inclusionary housing) within mixed sustainable communities by using all the municipal planning tools (regulations, mechanisms, & incentives) available to them. It outlines the affordable housing challenge that needs to be met, and provides information on how the existing municipal planning tools operate and recommendations on how they need to change to assist in delivery.

3. OBJECTIVES OF THE POLICY

- 3.1 To increase the supply of high-quality affordable housing (also referred to as inclusionary housing) in well-located and priority development areas, creating a mix of income groups across new and infill developments in Stellenbosch Municipality promoting social and economic integration (also referred to as settlement restructuring).
- 3.2 Using the municipal spatial planning, land use planning system, and land-based financing tools and their mechanisms to leverage and incentivize land value gains in spatially targeted areas for the creation of public goods (i.e. affordable housing), enabling well-performing settlements (i.e. integrated, inclusive, resilient, efficient) in order to address current and historical spatial imbalances/inequalities (also referred to as spatial apartheid).
- 3.3 Achieve a more inclusive, efficient, and effective municipality by providing a wide choice of quality affordable housing to meet the needs of the community, widening the opportunities for homeownership, and creating flexibility and choice of tenures and price ranges for those who rent and seek the security of tenures (also referred to as housing/property ladder) as envisioned by its adopted and approved spatial policies.
- 3.4 Facilitate and grow strong partnerships with the private sector in terms of delivering more quality affordable housing.

4. LEGISLATIVE FRAMEWORK

- 4.1 This document should be read in conjunction with the following documentation namely; Western Cape Government Inclusionary Housing Policy Framework (November 2022), Stellenbosch Municipality Land Use Planning By-law, Stellenbosch Municipality Zoning Scheme By-law, Stellenbosch Municipal Spatial Development Framework, Adam Tas Local Area Spatial Development Framework and Development Guidelines; Adam Tas Local Area

Overlay Zone, Stellenbosch Municipality Development Contributions Policy; Stellenbosch Municipality Rates Policy; Municipal Fiscal Powers and Functions Act (2002), and the draft Municipal Fiscal Powers and Functions Amendment Bill (2020).

- 4.2 The details of the municipal planning tools reflect the position in May 2023, and will be subject to change. Accordingly, the document will be robust to changes in future policies and some parts are likely to evolve which will necessitate periodical updates.

5. PRINCIPLES OF INCLUSIONARY ZONING

- 5.1 Inclusionary zoning must be understood as a planning system tool (also referred to as a land use regulatory mechanism) used to create affordable housing and foster social and economic inclusion through the regulation of private development. Therefore, its use and powers are guided by the broader understanding of the power to regulate land use for the public good (i.e. affordable housing).
- 5.2 The goal of inclusionary zoning is achieving racially and/or socio-economically integrated communities by confronting and addressing the exclusionary impact of development, which in many contexts has often been facilitated by planning and land use regulation (also referred to as spatial transformation).
- 5.3 Inclusionary zoning is one of the land and planning tools where spatially targeted financing (also referred to as land-based financing) leverages the benefits of agglomeration, increasing land demand, infrastructure investments, and planning decisions that drive up the value of urban land. Land-based financing is based on the recognition that property owners and developers benefit from this rising value and the possibility for local government to capture some of the rising value for the public good (also referred to as land value capture).

- 5.4 This policy option provides the scope for securing affordable housing through the regulatory system of development planning permissions to oblige property owners and developers to provide affordable housing, for sale or rent, within the new residential and mixed-use developments (also referred to as set-aside requirement) in well-located and priority development areas as defined by the municipal spatial development framework and/or other strategic spatial policies (namely the Adam Tas Local Spatial Development Framework and Development Guidelines) and the associated urban management mechanisms (namely the Adam Tas Local Area Overlay Zone).
- 5.5 The policy option provides scope for securing affordable housing through the land-based financing and planning systems to oblige property owners and developers to pay developer contributions (also referred to as impact fees or development charges), and/or additional land use rights (benefits obtained through development permissions), as well as offsetting the cost by one or more incentives, such as a density bonus (which includes parking reductions or other planning parameters variances), providing and leveraging public land leasing and land sales, discounting the payment of developer contributions, expedited planning processes through an overlay zone mechanism (i.e. Adam Tas Local Area Overlay Zone) and/or any other land-based financing and planning system mechanisms deemed appropriate by the Municipality.
- 5.6 It is not the intention, in this mechanism, that a housing subsidy is made available to assist the property owners and developers to meet this affordable housing contribution, but that the cost of the contribution is absorbed in the land price paid for the land and in the award of additional land use rights to offset the costs of such a contribution.
- 5.7 When the inclusion of affordable units on-site within market-rate projects has been demonstrated based on the financial viability criteria as unfeasible, the property owners and

developers can enter into an inclusionary zoning agreement that sets out alternatives, such as payments of an affordable housing fee (also referred to in-lieu requirement) or provision of affordable units off-site in another project within the priority development areas.

6. INCLUSIONARY ZONING: REGULATIONS, MECHANISMS, AND OFF-SET INCENTIVES IN SPATIALLY TARGETED AREAS

The following applies within the Municipality:

DEFINITIONS

Inclusionary zoning

- 6.1 Inclusionary zoning, is a planning system tool used to secure affordable housing (alternatively referred to as inclusionary housing) within private residential and mixed-use developments, through the regulatory system of development planning permissions to oblige an applicant to provide affordable housing, for sale or rent, within the new residential and mixed-use development in well-located located and priority development areas as defined by the municipal spatial development framework and/or other strategic spatial policies (namely the Adam Tas Local Spatial Development Framework and Development Guidelines) and the associated urban management mechanisms (namely the Adam Tas Local Area Overlay Zone).
- 6.2 The applicant should pay developer contributions, and/or adhere to the additional land use rights obtained through development permissions, and the municipality will reasonably offset the cost by means of using one or more incentives, such as a density bonus (which includes parking reductions or other planning parameters variances), providing and leveraging public land leasing and land sales, discounting the payment of developer contributions, expedited planning processes through an overlay zone mechanism (i.e. Adam Tas Local Area Overlay

- Zone) and/or any other land-based financing and planning system mechanisms deemed appropriate by the Municipality.
- 6.3 When the inclusion of affordable units on-site within market-rate projects has been demonstrated based on the financial viability criteria as unfeasible, the property owners and developers can enter into an inclusionary zoning agreement that sets out alternatives, such as payments of an in-lieu fee or provision of affordable units off-site in another project within the priority development areas.

Affordability

- 6.4 Households should not spend more than a third of their income on housing (also referred to as the premium to income ratio). The standard differentiates between renters with a premium-to-income ratio of 30% and owners with a premium-to-income ratio ranging between 30 – 35%.
- 6.5 Property owners and developers can use the international spatially targeted approach for calculating affordability usually referring to affordability as being aligned with a proportion of an area's median income and below. Households below the median household income or households with a monthly income below 50%-80% of the area's median household income are targeted. A detailed household income analysis is required as part of the pre-application process requirements and should be submitted to the municipality.

Affordable housing

- 6.6 In the local context, affordable housing has traditionally been used to describe the “GAP market/Housing”. The “GAP market/Housing” refers to persons/households who earn in excess of R3 500 monthly household income and can therefore not qualify for a full government housing subsidy but earn too little to qualify for a mortgage loan to purchase a property. The government ceiling for the “GAP market/Housing” is R22 000 monthly household income.
- 6.7 The Financial Sector Charter (FSC) defines the affordable housing target market to be the approximate cost of bonded entry-level housing in the country, capable of being mortgaged, adjusted annually by the midpoint of the average Consumer Price Index (CPI) and the average (Building Cost Index). The Banking Association of South Africa annually updates this measure and makes this available on its website for example the 2022 rate is determined as R27 200 monthly household income a month.
- 6.8 The Stellenbosch housing market study (2022) outcomes reflect the undersupply of houses valued in the affordable (R300 000 – R600 000) and conventional (R600 000 – R900 000) market segments. The high-end market segment (R900 000 – R1.2 million) also appears to match the current demand and considering the urbanisation and migration trends expected and projected in this market segment, this segment is included.
- 6.9 Based on the aforementioned standard definitions of affordability and the evidence gathered through the housing market study, affordability in the Stellenbosch Municipality context refers to the following market segmentations – affordable (R300 00 – R600 000), conventional (R600 000 – R900 000), and high-end (R900 000 - R1.2 million).

Affordability thresholds estimates/examples using the ratios discussed above

6.10 As examples of the application of affordability thresholds, the following estimates can be derived based on some assumptions¹ based on the housing market study:

Market segment (residential property value)	Minimum monthly household income needed to purchase in this market segment	Maximum monthly household income needed to purchase in this market segment
Affordable (R300 000 – R600 000)	R7 300	R14 750
Conventional (R600 000 – R900 000)	R14 750	R22 200
High end (R900 000 – R1.2 million)	R22 200	R29 600

Table 1: Extract from Stellenbosch housing market study (source: WCGb, 2022)

6.11 The abovementioned affordability thresholds as evidenced in the housing market study, accommodate the government-defined “Gap Market/Housing”, as well as the FSC affordable housing target market and the affordability threshold for Stellenbosch Municipality ranges between R3 500 and R27 200 (2022 rates, to be updated annually). The housing market study and its affordability threshold as determined should be applied when updated every two years.

¹ Assuming 7.75% interest rate, 20 year loan tenor, 30% premium to income ratio, 10% deposit and no subsidy (i.e. FLISP). There are cautionary notes which should be considered in the interpretation of the calculations, namely – 1) house purchases below R1.2 million avoid transfer fees, there are other transfer costs which can be applicable to the household and have not been included; 2) not all households purchase in the market segment they can afford as some may have additional funds from a once-off source, and some may have other competing expenses that prohibit them from spending the benchmark figure of 30% on housing; 3) Some households may be living in properties that they accessed either by purchase or inheritance or gift, that today they might not be able to afford to buy

Well-located

- 6.12 Areas (such as suburbs, neighbourhoods, town centres, and activity corridors) with good public transport and non-motorised transport, access to existing urban service, public and private education, health and social facilities, amenities, retail facilities, and work opportunities.
- 6.13 Based on the municipal spatial development framework of the Municipality, these areas are defined as priority development areas (also referred to as growth nodes), namely Stellenbosch, Klapmuts, and Franschhoek. The settlements are further delineated by the adopted urban edges, and priority development areas focused on housing (i.e. social restructuring zones; PSHDA's), intensification zones (i.e. mixed-use community and residential infill; strategic sites, projects and/or infill opportunities) and development corridors (including activity routes).
- 6.14 Based on the strategic spatial policies namely the Adam Tas Local Spatial Development Framework and Development Guidelines and the associated enabling urban management mechanisms (namely the Adam Tas Local Area Overlay Zone), the delineated areas are priority spatial targeting areas.
- 6.15 The listed priority spatial targeting areas are primarily identified for mandatory implementation of affordable housing provision through the inclusionary zoning mechanism, with alternative options requiring approval incorporated.

REQUIREMENTS FOR INCLUSIONARY ZONING WHEN MANDATORY, SPATIALLY TARGETED, OR VOLUNTARY IMPLEMENTATION

Mandatory implementation with off-set requirements (primary option)

- 6.16 The mandatory application of inclusionary zoning means that the property owner and developer are automatically required to include a portion of affordable housing units (also referred to as inclusionary housing or the set-aside requirement) as part of their development within the well-located priority development areas as defined. The municipality therefore only grants approval for the development if the developer builds a proportion of the affordable units.
- 6.17 Inclusionary zoning requirements are triggered by land development applications, as such, the requirement does not affect existing, approved land use rights.
- 6.18 Inclusionary zoning is mandatory for all new development applications under the jurisdiction of Stellenbosch Municipality that request additional development rights from the municipality within their residential or mixed-use developments.
- 6.19 New residential or mixed-use developments which include 20 dwelling units or more, are required to contribute a minimum of 20% of the total units to be targeted at affordable housing.
- 6.20 The affordable units can be designed to provide non-market housing accommodation for rental or ownership.
- 6.21 The affordable units are intended for dwelling units and not student housing, community residential buildings, communes, hostels, or less formal residential. The dwelling units should be used for permanent residence and excludes any of the land uses associated with transient

- guests (i.e. home lodging, bed and breakfast, hotel, tourist accommodation establishment, tourist dwelling unit, etc.).
- 6.22 All conditions for affordable housing will be in place for not less than 30 years, or until repealed by a Council resolution.
- 6.23 Any off-set incentive packages contemplated as part of the off-set requirement will be over and above the allowable development parameters as per the prevailing zoning defined in the zoning scheme by-law. As such, development parameters must be determined first, with off-set incentive packages added to that determination.
- 6.24 The affordable housing contribution should be delivered on-site, and if demonstrated and deemed unfeasible an inclusionary housing agreement can be entered into to determine in-kind off-site or affordable housing fee (in-lieu) contributions.
- 6.25 When inclusionary housing is applicable, it will be implemented as a condition of approval (section 66.(1)(d))(settlement restructuring) by the Stellenbosch Municipality. The Municipality may act against property owners and developers who do not comply with the conditions for inclusionary zoning outlined in land use/development approvals, as with any condition of approval.
- 6.26 The priority development areas as identified by the municipal spatial development framework are Stellenbosch, Klapmuts, and Franschhoek, and fall within the delineated and adopted urban edges.

Spatially targeted implementation within an applicable overlay zone (primary option)

- 6.27 Implementation of inclusionary housing in targeted areas within the municipality, where an overlay zone has been designated or higher-density developments are encouraged by means of spatial policies or strategies in areas for urban infill, transit-orientated development, etc.

- These targeted areas normally have a well-performing housing market and public investment has been targeted in the area.
- 6.28 The mandatory application of inclusionary zoning means that the property owner and developer are automatically required to include a portion of affordable housing units (also referred to as inclusionary housing or the set-aside requirement) on-site as part of their development within the well-located priority development areas as defined. The municipality therefore only grants approval for the development if the developer builds a proportion of the affordable units.
- 6.29 Inclusionary zoning requirements are triggered by land development applications, as such, the requirement does not affect existing, approved land use rights.
- 6.30 Inclusionary zoning is mandatory for all new development applications and when property owners and developers want to utilize the land use rights as applied by the Adam Tas Corridor Local Area Overlay Zone.
- 6.31 New residential or mixed-use developments which include 20 dwelling units or more, are required to contribute a minimum of 30% of the total units to be targeted at affordable housing on-site or as defined by an approved precinct site development plan.
- 6.32 The affordable units can be designed to provide non-market housing accommodation for rental or ownership.
- 6.33 The affordable units are intended for dwelling units and not student housing, community residential buildings, communes, hostels, or less formal residential. The dwelling units should be used for permanent residence and excludes any of the land uses associated with transient guests (i.e. home lodging, bed and breakfast, hotel, tourist accommodation establishment, tourist dwelling unit, etc.)

- 6.34 All conditions for affordable housing will be in place for not less than 30 years, or until repealed by a Council resolution.
- 6.35 The inclusionary zoning parameters as defined in the Adam Tas Local Area Overlay zone are applicable. The Municipality may act against property owners and developers who do not comply with the parameters as outlined in land use/development approvals, as with any condition of approval.
- 6.36 Based on the strategic spatial policies namely the Adam Tas Local Spatial Development Framework and Development Guidelines, and the associated enabling urban management mechanisms (namely the Adam Tas Overlay Zone), the delineated areas are priority spatial targeting areas.

Voluntary implementation (alternative option)

- 6.37 The voluntary application of inclusionary housing means that affordable housing units are only required when the property owners and developers choose to utilise off-set incentive packages provided by the municipality. Such incentive packages could include flexible development parameters or bonuses i.e., density bonuses. This approach is based on willing partners that strike a mutually beneficial arrangement that will result in the delivery of affordable housing.
- 6.38 A property owner and developer developing below the threshold of 20 units, but who meets the criteria for one of the inclusionary zoning options in this framework, may still benefit from the off-set incentive packages associated with the option chosen.
- 6.39 The affordable housing contribution can be delivered on-site, in-kind off-site, or an affordable housing fee (in-lieu payment).

- 6.40 This approach will be assessed on a case-by-case basis and in alignment with the criteria and requirements as stipulated in the inclusionary zoning policy.

AFFORDABLE HOUSING CONTRIBUTION (ALSO REFERRED TO AS SET-ASIDE REQUIREMENT)

- 6.41 Set-aside requirement is a proportion of the extra development rights granted by the municipality that must be set aside as a contribution towards affordable housing.

On-site requirement

- 6.42 The affordable units are built on-site as part of the market-related development i.e., in the same building or on the same land parcel.
- 6.43 The tenure type of the set-aside contribution must be similar to the market-related component of the development.
- 6.44 The on-site requirement is the primary option in the mandatory - and spatially targeted implementation approaches, with exemptions incorporated within these options.

In-kind contribution

- 6.45 In-kind contribution (also referred to as the in-kind off-site requirement) refers to when the affordable units are built off-site on well-located land in areas identified by the municipality in its spatial development framework. The units can be built on municipal-owned land, on land owned by private developers, or another state partner, or on a site under development by an SHI, or another registered affordable housing developer.
- 6.46 This method will be advisable for market-related developments that are not that well-located, thus capturing the value of the development by re-directing it to a well-located site.

- 6.47 The tenure of the units can be either rental or ownership.
- 6.48 The property owner and developer can choose this option in the voluntary implementation approach or when demonstrated and deemed acceptable by the municipality in the mandatory implementation approach.

Affordable housing fee

- 6.49 Affordable housing fee also referred to as the in-lieu requirement. It is the contribution of the affordable housing units in the form of a cash contribution which is ring-fenced into a municipal fund dedicated to the building of affordable housing for the benefit of households in the income range targeted by this policy, as well as in designated / priority development areas, as identified by the municipal spatial development framework, the applicable land use planning by-law or zoning scheme-by-law.
- 6.50 The contribution can either go towards the acquisition and/or assembly and/or packaging of well-located land to be developed for affordable housing; the construction of affordable housing on such land; ensuring the financial sustainability of social housing development, or towards planned in-kind off-site development of affordable housing by the municipality via existing national housing programmes.
- 6.51 Each application is considered on a case-by-case basis, with negotiations taking place based on a standard proforma submitted by the property owner and developer. This proforma should consider the differing land values in each area, as this is a significant cost driver. This proforma should be able to calculate affordable housing contributions for on-site, in-kind off-site, and affordable housing fees (in-lieu).

- 6.52 The property owner and developer can choose this option in the voluntary implementation approach or when demonstrated and deemed acceptable by the municipality in the mandatory implementation approach.

AFFORDABILITY PRESERVATION OF NON-MARKET HOUSING

- 6.53 Preserving the long-term affordability of units produced by inclusionary zoning is key to ensuring that targeted beneficiaries can benefit from the policy over a specified period of time.
- 6.54 Affordable units created by inclusionary zoning developments be maintained not less than 30 years, or until repealed by a Council resolution.

Mechanisms for maintaining affordability are as follows:

Inclusionary units for ownership

- 6.55 Property owners and developers can sell a unit outright to a qualifying household where the beneficiary will independently secure finance from a financial institution and may qualify for and make use of the Finance-linked Individual Subsidy Programme (FLISP).
- 6.56 Property owners and developers can run an instalment sale or lease with an option to buy programme.
- 6.57 The sale price of affordable housing units for sale must be stipulated in the inclusionary housing agreement tied to the planning permission with a view to ensuring this is clearly tailored to the targeted market. The agreement should record provisions for the adjustment of this price year on year.

- 6.58 An increase in the value of the units should be fixed to the Consumer Price Index (CPI), to ensure that homeowners benefit from price appreciation while protecting against the unaffordable escalation of house prices.
- 6.59 Each affordable housing unit needs to be registered with the municipality, to ensure that the valuations process recognizes their status as affordable housing units and as such can be valued and taxed or rated accordingly.
- 6.60 The registered affordable ownership units require municipal approval on resale prices before the transaction takes place for the municipality to monitor and track escalation in the price restrictions and ensure that the inclusionary housing register and valuation process are updated accordingly.
- 6.61 To enable the effective management and monitoring of these affordable housing units and the inclusionary housing agreement, the property owners and developers are required to place a restrictive condition in the title deeds, or any other affordability preservation mechanism deemed appropriate and effective by the municipality.
- 6.62 Resale should only be for pre-approved buyers that meet the affordability criteria as set out by the municipal policy.
- 6.63 Capacity should be put in place for Home-Owner Associations (HOA) and/or Body Corporates to effectively market and manage the allocation process. The affordability preservation and any other requirements as agreed in the inclusionary housing agreement as part of the planning permissions, need to be stipulated in the constitutions of these bodies, including the annual reporting to the municipality as agreed upon.

Rental inclusionary units

- 6.64 Fixed-term leases will be the primary instrument for ensuring that inclusionary units continue to benefit the intended income group as identified in the planning permission associated with the inclusionary housing agreement.
- 6.65 Property owners and developers may choose to retain the units in their ownership and rent them to households that fall within the agreed targeted income range and meet the criteria, along with any additional criteria introduced by this policy and in the inclusionary housing obligation set out in the planning permission.
- 6.66 Capacity should be put in place to market and manage the allocation process and conduct regular income certification, as well as provide the normal services of a landlord, as with any tenant.
- 6.67 Rents charged must remain within the affordability threshold, which will be reviewed annually to accommodate inflation and its impact on maintenance costs, as well as changes in the affordability dynamics in the housing market and changes to income categories in amendments to the inclusionary zoning policy.
- 6.68 Lease agreements need to ensure that the tenants are subject to regular income certification to ensure that the affordable housing units remain as allocated and available to the intended income group. This must include allowance for some income growth over time. Successive tenants would pay the rental as adjusted for inflation at the time of occupation.
- 6.69 The lease agreements should stipulate that sub-letting isn't allowed, and excludes any land uses associated with student housing and transient guests (i.e., home lodging, bed and breakfast, hotel, tourist accommodation establishment, tourist dwelling unit, student housing, etc.).

- 6.70 Property owners and developers may choose to build affordable housing units and hand them over to a social housing institution (SHI) to manage them. In this case, the annual monitoring of affordability preservation as required by the municipality will be managed by the SHI and the property owners and developers will not have to comply with this specific requirement.
- 6.71 When affordable housing units are delivered through partnering with SHIs and where they provide a capital subsidy (administered by the SHRA) the requirement for subdividing and registering the affordable units needs to be accommodated within the application and the conditions of approval.
- 6.72 Each affordable rental unit needs to be registered with the municipality, and approval of new tenants should meet the affordability criteria by the policy. In the case of rental agency management, the affordability criteria of the social housing institution should be met.
- 6.73 In the case where property owners and developers retain ownership and become landlords or use a rental agency for the management of these units, the compliance of the annual reporting should be managed by these parties. The municipality should be informed of the managing rental agents in order for the inclusionary housing unit register as administered by the municipality to be updated accordingly. Annual reporting mechanisms will be agreed upon and stipulated in the inclusionary housing agreement as part of the planning permissions.

Other affordability considerations.

- 6.74 Municipal rates and taxes as approved within the Rating Policy, will be adapted to ensure that affordable housing units are not undermined by the municipality's own policies. The Municipality may consider adding an inclusionary housing category that may benefit/qualify for exemptions, rebates, discounted rates, as well as capped valuation of these units. The

criteria and annual application process will still be applicable as defined in these municipal policies to ensure that the household can maintain affordability including avoiding unjustifiable subsidisation.

- 6.75 Failure to comply with the planning permission and associated agreement should result in a penalty, with rates due on units meant as affordable housing units, calculated for the whole period when units were supposed to be affordable and were not.

BENEFICIATION

- 6.76 The broad principle for dealing with an allocation is whoever takes development or marketing risk for affordable housing may control the allocation of units to the end-users. The responsibility of affordable housing units for ownership vests with the developer/financiers/body corporates/homeowners associations and in the case of rental the landlord, or SHI management.
- 6.77 The allocation process of affordable housing units in inclusionary zoning developments will be different for rental or ownership units. It will also differ depending on whether the property owner or developer will do the allocation, or if the municipality or SHI is involved in the allocation process.
- 6.78 The standard affordability measures as described above applies.
- 6.79 The target market for beneficiation should benefit employed households (excl. students) earning stable incomes that fall within the affordability threshold as defined above.
- 6.80 Developers can deviate from the income profiles if they use the median income formula as explained above.
- 6.81 Proportional allocation within the affordable market income range & units per segment within the range is encouraged.

- 6.82 The developer should consider the following targeted beneficiaries;
 - 6.82.1 Key workers refers to an employee who provides a vital service, typically in the police, health, and education sectors (WCG 2022). Targeting these individuals or households presents an opportunity to empower them to climb the property ladder over time and save on costs associated with travel, access to community facilities, etc.
 - 6.82.2 Vulnerable groups such as the youth, elderly, and people living with disabilities.
 - 6.82.3 Gender, with specific reference to female-headed households.
- 6.83 The developer may partner with companies with employee housing assistance programmes when the beneficiaries comply with the criteria as stipulated in the inclusionary housing agreement.
- 6.84 The municipality may impose requirements on the reporting with regard to allocation within these criteria.

DESIGN

- 6.85 The affordable units should be integrated into the projects and blend in with the surrounding buildings and the development as a whole.
- 6.86 The architectural styles should be similar i.e., tenure blind from the outside, but the interior may differ to enable affordability.
- 6.87 The municipality may regulate the requirement and standards for these units within policies and by-laws i.e., number of bedrooms, size of units, location of affordable units on a site or within a building, or the exterior access to the units.
- 6.88 The affordable housing units need to comply with the National Housing Building Regulatory Council.

- 6.89 The minimum standards must be met regarding bathroom and kitchen areas and fittings, and the quality of these facilities must avoid higher maintenance costs. It is proposed that the Social Housing norms and standards are used as a benchmark in this regard.
- 6.90 The property owner and developer need to consider variety in the housing typologies, based on household composition found within the municipality, namely a mix of studio, one-bedroom, and two-bedroom units in order to respond to different family compositions. The reviewed optimum unit sizes as proposed for social rental stock can be used as a guideline:

Type of unit	Optimum size (sqm)	Minimum size	Occupancy
Room	12	10	1b1p
Bachelor / Studio	25	18	1b2p
1 Bedroom	35	25	1b2p / 2b3p
2 Bedroom	48	42	3b3p / 4b4p
3 Bedroom	60	52	3b4p / 5b6p

Table 2: Extract from Western Cape Government Inclusionary Housing Policy Framework, 2022 (source: WCGa:2022)

OFF-SET INCENTIVE PACKAGES

- 6.91 Fast-tracking of approval processes by a dedicated municipal project team in the Adam Tas Corridor Local Area Spatial Development Framework, and its overlay zone, or any area identified in the priority development areas of the municipal spatial development framework and capital expenditure framework; or other urban management mechanisms (e.g., integrated decision-making, changes in delegations, etc.) as deemed appropriate and applicable by the municipality.
- 6.92 Density bonus which allows private developers to provide units in addition to the prescribed land use density.

- 6.93 Parking requirements: reducing parking requirements for the affordable housing component, particularly in areas close to public transport routes, or as deemed appropriate by the municipality.
- 6.94 Removing or reducing associated planning requirements as deemed appropriate by the municipality and accordingly demonstrated in the financial viability estimates during the pre-application phase.
- 6.95 Development contribution discount: Ten percent (10%) development contribution discount on the affordable housing component of the development be allowed.
- 6.96 The off-set incentive packages should not place a cost burden on the municipality to the extent that it amounts to a hidden subsidy and is not sustainable for the municipality.

INCLUSIONARY ZONING APPLICATION IN STELLENBOSCH MUNICIPALITY

6.97 The table below provides the various options:

Options	Description	Planning obligation	Planning requirement & Off-set benefit packages
Option A	Mandatory inclusionary zoning (units/ha)	<p>20% of dwelling units fall within the affordability thresholds (either using the standard or spatially targeted approach) for rental or ownership within the new residential or mixed-use development of 20du or more.</p> <p>Provision of affordable housing must be provided on-site within the priority development areas, namely Stellenbosch, Klappmuts, & Franschoek, or as alternatively demonstrated.</p> <p>Applicable to the conventional residential zone, multi-unit residential zone, local business zone, and mixed-use zone of the zoning scheme by-law.</p>	<p>Planning requirement: Inclusionary Zoning Agreement & Developer contributions</p> <p>Off-set incentive package: Density bonus – increase in density (du/ha) to accommodate the inclusionary housing units. AND/OR Parking reduction for inclusionary housing units in well-located areas. AND/OR Development contribution discount. AND/OR Other planning parameters deemed to assist in the financial viability/project feasibility as demonstrated.</p>
Option B	Mandatory inclusionary zoning (Bulk/FAR)	<p>Minimum of 10% or a maximum of 17% (depending on the applicable zoning) of the total residential floor area (complying with the minimum 20% requirement) is made up of dwelling units that fall within the affordability thresholds (either using the standard or spatially targeted approach) for rental or ownership within the new residential or mixed-use development of 20du or more.</p> <p>Provision of affordable housing must be provided on-site within the priority development areas,</p>	<p>Planning requirement: Inclusionary Zoning Agreement & Developer contributions</p> <p>Off-set incentive package: Density bonus – increase in density (du/ha) to accommodate the inclusionary units. AND/OR Parking reduction for inclusionary units in well-located areas. AND/OR</p>

Options	Description	Planning obligation	Planning requirement & Off-set benefit packages
		namely Stellenbosch, Klapmuts, & Franschhoek, or as alternatively demonstrated.	Development contribution discount. AND/OR Other planning parameters deemed to assist in the financial viability/project feasibility as demonstrated.
		Applicable to the conventional residential zone, multi-unit residential zone, local business zone, and mixed-use zone of the zoning scheme by-law.	
Option C (ATC)	Mandatory spatial targeted inclusionary zoning (units/ha) – overlay zone	<p>30% of dwelling units fall within the affordability thresholds (either using the standard approach or spatially targeted approach) for rental or ownership within the new residential or mixed-use development.</p> <p>Provision of affordable housing can only be provided on-site within the delineated area and in accordance with the precinct site development plans, within the Adam Tas Corridor.</p> <p>Applicable to the Adam Tas Corridor Local Area Overlay Zone.</p>	<p>Planning requirement: Inclusionary Zoning Agreement & Developer contributions & Precinct Site Development Plan & Compliance with applicable LSDF and Development Guidelines</p> <p>Off-set incentive package: Overlay Zone – upzoned property and expedited planning process</p> <p>AND</p> <p>Density bonus – increase in density (du/ha) to accommodate the inclusionary units. AND/OR Parking reduction for inclusionary units in well-located areas. AND/OR Development contribution discount. AND/OR Other planning parameters deemed to assist in the financial viability/project feasibility as demonstrated.</p>

Options	Description	Planning obligation	Planning requirement & Off-set benefit packages
Option D (ATC)	Mandatory spatial targeted inclusionary zoning (Bulk/FAR) – overlay zone	<p>Minimum of 25% of the total residential floor area (complying with the minimum 30% requirement) is made up of dwelling units that fall within the affordability thresholds (either using the standard or spatially targeted approach) for rental or ownership within the new residential or mixed-use development of 20du or more.</p> <p>Provision of affordable housing can only be provided on-site within the delineated area and in accordance with the precinct site development plans, within the Adam Tas Corridor.</p> <p>Applicable to the Adam Tas Corridor Local Area Overlay Zone.</p>	<p>Planning requirement: Inclusionary Zoning Agreement & Developer contributions & Precinct Site Development Plan & Compliance with applicable LSDF and Development Guidelines</p> <p>Off-set incentive package: Overlay Zone – upzoned property and expedited planning process</p> <p>AND</p> <p>Density bonus – increase in density (du/ha) to accommodate the inclusionary units. AND/OR Parking reduction for inclusionary units in well-located areas. AND/OR Development contribution discount. AND/OR Other planning parameters deemed to assist in the financial viability/project feasibility as demonstrated.</p>
Option E	Voluntary inclusionary zoning	20% of dwelling units fall within the affordability thresholds (either using the standard or spatially targeted approach), or as agreed to by the for rental or ownership within the new residential or mixed-use development.	<p>Planning requirement: Inclusionary Zoning Agreement & Developer contributions</p> <p>Off-set benefit package:</p>

Options	Description	Planning obligation	Planning requirement & Off-set benefit packages
		Provision of affordable housing can be provided in-kind off-site or in-lieu within priority development areas, namely Stellenbosch, Klapmuts, & Franschhoek.	Public land leasing & land sales AND/OR Leveraging municipal real estate AND Density bonus – increase in density (du/ha) to accommodate the inclusionary units. AND/OR Parking reduction for inclusionary units in well-located areas. AND/OR Development contribution discount. AND/OR Other planning parameters deemed to assist in the financial viability/project feasibility as demonstrated.
Option F	Targeted in-kind off-site affordable housing provision	To the satisfaction of the municipality, when the development already targets the affordability thresholds. The application may be exempted from the provisions of the policy provided that the development assessment and ultimately the permission places this on record for monitoring and compliance processes.	Planning requirement: Inclusionary Zoning Agreement & Developer contributions Off-set incentive package: To be negotiated.

Table 3: Inclusionary application in Stellenbosch Municipality, (own source)

INCLUSIONARY ZONING AGREEMENT

- 6.98 Planning permissions will be accompanied by an Inclusionary Zoning Agreement between the applicant and the Municipality setting out the basis on which the affordable housing contribution will be made in line with the municipal inclusionary zoning policy, including inter alia:
- 6.99 Whether the contribution will be met on site, off site or as an in-lieu contribution;
- 6.100 When and where the inclusionary housing units will be constructed;
- 6.101 The number and sizes of units to be provided on site or off site;
- 6.102 How off-site units will be provided;
- 6.103 Whether the units will be rented or sold and the sale price or monthly rental;
- 6.104 How levies will be dealt with in terms of units sold within sectional title schemes;
- 6.105 The income group (or groups within the broader income range) to be targeted to purchase or rent the units as well as other priority groups such as women, the youth or people with disabilities, along with the proportional allocation of units, if relevant;
- 6.106 Who will undertake the screening and allocation process and how this process will be undertaken;
- 6.107 If the rented units will be sold on and to whom;
- 6.108 The total amount of the in-lieu contribution should this be the case, and to whom, how and when it will be paid. An in-lieu contribution should be paid prior to issue of the occupancy certificate for the development and the issue of such certificate should be conditional on proof of payment;
- 6.109 The reporting requirements to enable the monitoring of affordability of the affordable housing units over time, and to whom reports will be provided;
- 6.110 Title deed restrictions to be introduced on stock for sale to maintain affordability.

FINANCIAL VIABILITY CRITERIA

- 6.111 In the pre-application phase of the application, the property owner, developer and municipality need to consider and evaluate the economic trade-offs involved in requiring a certain percentage of affordable units in new residential or mixed-use development.
- 6.112 Following this approach ensures that it is economically sound, will not deter development, and will deliver the types of new affordable units the local community needs. It can also be used to determine how a new inclusionary zoning would affect market-rate housing development costs and profits.
- 6.113 It also assists in highlighting what is economically reasonable for the municipality trying to set affordable housing requirements and offer developers meaningful incentives.
- 6.114 It does not replace a detailed financial feasibility analysis prepared by a trained professional.
- 6.115 Variables that make the greatest difference to the bottom line results: hard construction costs (usually 60-70% of development costs can be attributed to materials and labour – drives the cost side of the equation); average rental rates or market price sales (average monthly starting rental rates for new rental projects and average market prices for for-sale projects are the most important assumptions on the revenues side of the equation); capitalization rates (used to translate net operating income in a year of stabilized occupancy into total project value).
- 6.116 The literature and local case studies suggests the following financial viability criteria for consideration and these factors and measures should form part of the pre-application phase of the application:

Factors and measures
Property size / development footprint
Current zoning and land use
Proposed new zoning

Vacant land cost
Municipal property valuation
Developed land value per land use: Residential sales income
Developed land value per land use: Rental income per land use
Developed land value per land use: Office rental income
Developed land value per land use: Retail rental income
Developed land value per land use: Parking rental income
Developed land value per land use: Parking sales income
Total number of parking bays required
<p>Assign parking requirements to each site (per m² and per dwelling unit), for each chosen/permitted land use, for both scenarios.</p> <p>m² parking requirement residential no concession</p> <p>m² parking requirement residential with concession</p> <p>m² parking requirement office no concession</p> <p>m² parking requirement office with concession</p> <p>m² parking requirement retail no concession</p> <p>m² parking requirement retail with concession</p>
Percentage of residential floor area allocated to the ratio of affordable housing units for each site.

SUMMARY: Key considerations for the Inclusionary Zoning Policy and Regulations for Stellenbosch Municipality

Which type of policy is the municipality considering in adopting?	
Hybrid	<ul style="list-style-type: none"> • Mandatory requirements and additional, optional developer incentives for greater affordability in targeted areas. • Tend to produce more affordable units than voluntary policies. • Tend to serve more low-income households in well-located areas. • Offer uniformity and predictability for property owners and developers.
Where does the policy apply?	
Target areas	<p>Inclusionary Housing Trigger Area</p> <ul style="list-style-type: none"> • Requirements apply to specific priority development areas (i.e., Adam Tas Corridor, Stellenbosch Town, Klipmuts and Franschhoek) located within the delineated and adopted urban edges. <p>Priority receiving areas for Inclusionary housing.</p> <ul style="list-style-type: none"> • Well-located specific priority development areas as defined by the municipal spatial development framework, capital expenditure framework, Adam Tas Corridor Local Spatial Development Framework, and Adam Tas Local Area Overlay Zone, social restructuring zones, PSHDA's, and so on.
To whom does the policy apply?	
Residential and non-residential property owners and developers	<ul style="list-style-type: none"> • Applies to property owners and developers if the development project trigger the policy to go into effect. • Allows mixed-use property owners and developers to contribute to the community.
To what types of projects does the policy apply? (i.e. What's the trigger for the policy to be in effect?)	
Minimum development size	<ul style="list-style-type: none"> • Trigger is 20 dwelling units or more. • May apply to smaller developments on voluntary implementation option.
Tenure type	<ul style="list-style-type: none"> • Applies to both rental and ownership development projects.

How can the property owner and developer meet the policy's requirements?	
Constructing affordable housing contribution on-site	<ul style="list-style-type: none"> Promotes social and economic integration in well-located areas. On-site construction is the standard requirement within the spatially targeted and mandatory implementation approaches, with alternative options requiring approval incorporated.
Deciding duration for affordability preservation	<ul style="list-style-type: none"> Rental and homeownership units to remain affordable for at least 30 years, or until repealed by Council.
Defining the share of affordable housing contribution	<ul style="list-style-type: none"> 20% of total units or total floor area within the priority development areas (Stellenbosch Town, Klapmuts and Franschhoek) located within the delineated and adopted urban edges. 30% of total units or floor area within the priority development areas delineated in the Adam Tas Local Spatial Development Framework and Development Guidelines and the Adam Tas Local Area Overlay Zone.
Varying income requirements within development project	<ul style="list-style-type: none"> Proportional allocation within the affordable market income range and units per segment within the range is proposed. Affordable housing market segments targeted are: <ul style="list-style-type: none"> Affordable (R300 000 – R600 000); Conventional (R600 000 – R900 000); and – High-end (R900 000 – R1.2million).
Offering trade-offs for deeper affordability	<ul style="list-style-type: none"> Development projects that target the affordable housing market segments as defined is exempted from applying the policy.
Deciding the location of affordable housing contribution within the development	<ul style="list-style-type: none"> Affordable units on-site may be clustered, located on certain floors, or in adjacent buildings.
Setting specification requirements for	<ul style="list-style-type: none"> Require affordable units to be identical to market-rate units (tenure blind) and allow internal variations with minimum standards.

affordable housing contribution	<ul style="list-style-type: none"> • Social Housing norms and standards are proposed as minimum design requirements regarding bathroom, kitchen areas, fittings and quality of facilities is recommended to be used as a guideline. • Variety of housing typologies are proposed, based on household composition within the municipality to respond to different family compositions. Optimum unit sizes as proposed for social rental stock is recommended to be used as a guideline.
What are the prices and income requirements for affordable units?	
Affordability criteria for households	<ul style="list-style-type: none"> • Focus on households falling within the GAP market/Housing and affordable housing target market namely >R3 500 – R27 200 (FSC 2022, rates to be updated yearly) annual gross household income. • Provisions for household income over time for annual income verification has been proposed in line with CPI.
Targeted beneficiaries	<ul style="list-style-type: none"> • Employed households (excluding students) earning stable incomes falling within the affordability threshold. • Suggestions around targeted beneficiaries (e.g., key workers, vulnerable groups, etc.) are proposed for consideration in the beneficiation process.
Setting affordable housing cost for household income	<ul style="list-style-type: none"> • Premium to income ratio for renters not more than 30% and for homeowners between 30-35%. • Differentiated procedure for premium to income ratio allowed when detailed household income analysis are provided.
What are the off-set incentives available to property owners and developers?	
Deciding whether and how resources from existing land-based financing and housing mechanisms may be used by renters or homeowners	<ul style="list-style-type: none"> • Municipal rates and taxes to be adapted to ensure the affordability of these units. • Municipality to consider inclusionary housing category for these households to qualify and benefit from exemptions, rebates, discounted rates, and capped valuation of units. • Households can apply for financial subsidies, such as FLISP.
Expedited permissions	planning <ul style="list-style-type: none"> • Fast-tracking of approval processes by a dedicated municipal project team for implementing the Adam Tas Corridor Spatial Development Framework and Development Guidelines, and its overlay zone (pro-active rezoning mechanism).

Density, height, bulk bonus, or other zoning variances	<ul style="list-style-type: none"> • Density bonus which allows private developers to provide units in addition to the prescribed land use density. • Reducing parking requirements for the affordable housing component, particularly in areas close to public transport routes, or as deemed appropriate by the municipality. • Removing or reducing associated planning requirements as deemed appropriate by the municipality and accordingly demonstrated in the financial viability estimates during the pre-application phase.
Receiving discounts	<ul style="list-style-type: none"> • 10% development contribution discount on the affordable housing component of the development.

Introduction

Project background and purpose

Problem statement

Developed in 2021, the draft Western Cape Inclusionary Housing Policy Framework provides a guide for municipalities to develop local policies which harness inclusionary housing as a mechanism to promote better located affordable housing in towns and cities, in partnership with the private sector. As a first step to determining if inclusionary housing has the potential to be an effective policy tool in the local municipal context, it is necessary to have a clear understanding of the residential property market in the municipality.

Given that many local governments do not have the means to undertake this detailed analysis themselves, the Western Cape Department of Environmental Affairs and Development Planning (DEADP) in partnership with the Department of Human Settlements appointed the Centre for Affordable Housing Finance in Africa (CAHF) to deliver housing market studies for identified urban areas of George, Stellenbosch, Mossel Bay and Drakenstein municipalities.

Project objectives

The overall aim of the project is to underpin and support each of the municipalities to decide on the applicability of an inclusionary housing policy for their municipality and then to assist with the design and development of that policy, by providing key data to inform the design and parameters.

The reports include: analysis of the residential property markets; housing supply and demand assessments; and analysis of the affordability gap in each area, and are intended to provide the intelligence needed to ensure an evidence-led understanding of the housing markets in these urban areas.

Key research questions

In order to inform the potential development of a local inclusionary housing policy, the analysis of the residential property market must address the following questions:

- What is the profile of housing in the city? – by market segment, property type, neighbourhood
- What is the state of the residential market currently? – in terms of market performance, activity, key players, government and private sector delivery
- What is the affordability gap? – where is affordable housing needed, how much and what type? what is the target market for the affordable housing market?
- Is there an active property development market that would make the application of an inclusionary housing policy viable?

Data sources

Deeds data from Lightstone Pty.

Deeds data was purchased from Lightstone Pty for the study areas in each of the local municipalities, covering the period 1 January 2017 – 31 December 2021. Record-level data is aggregated over time by calendar year, at subplace level, using StatsSA boundary delineations.

NB: The data purchased from Lightstone, and detailed in the Supply and Market Activity sections of this report, reflects only the Census sub-places contained within the study area, as well as the relevant portion of the Stellenbosch NU subplace which is within the study area—see **Appendix A** for a detailed explanation. The deeds data therefore reflects the study area, and *not* the entire municipality.

TPN Credit Bureau data on rental market

Given that the deeds data from Lightstone does not allow sight of the rental market, we obtained rental market data from TPN Credit Bureau, who produce and sell Investor Reports for specific areas. The reports provide data on rental prices by size of unit (no. of bedrooms) for last three years, low, average and high monthly rental. The drawback of the TPN data is that a) it only includes formal properties, and b) only includes data from landlords and companies that voluntarily provide the data to TPN. The lack of updated municipal or sub-place level data on the rental market is critical gap impacting on municipal planning.

Stats SA sources

Demographic data and data on housing circumstances was sourced from Stats SA sources, including the: 2011 Census, 2016 Community Survey, 2019 General Household Survey, and Labour Force Survey Q4 2021. For many key indicators, the most updated data is not available at municipal level, forcing a trade-off between how recent the data is, and whether it is too high level to be useful to a study of the city area.

DEADP and other Western Cape provincial sources

Population estimates were provided by the WC Department of Social Development and DEADP. Quantec data (2021) published in the Municipal Economic Review and

Outlook was provided by Provincial Treasury. Additional data was obtained from DHS on: housing project pipeline status per municipality; FLISP and social housing delivery; Restructuring Zones; and demand information acquired through public Open Day events in municipalities.

Income segments

Apart from more outdated income data from Stats SA source, recent data on income at municipal level was difficult to obtain. In addition to Quantec data acquired from Provincial Treasury, the WC Department of Economic Development and Tourism also provided municipal-level income data for 2021. GeoTerralimage provided income data at subplace level for the four municipalities, which allowed us to isolate the data for the George city area.

Data from Stellenbosch municipality

The municipality provided a wealth of information, including: valuations data; housing demand database data; housing project information; backyard dwellings; and land use management decisions. Shapefiles were provided for: land use and zoning; the urban edge, priority development areas, zoning schemes, informal settlements and LUPO applications. This data was overlaid with deeds data from Lightstone to get a spatial understanding of market activity.

Key respondent interviews

A limited number of key respondent interviews were undertaken to supplement the quantitative data sources. In Stellenbosch, we spoke to two private developers and an executive manager at the University of Stellenbosch. The interviews explored: trends in the market; the nature of demand and the target market; the level of activity and growth in the rental and ownership markets; and market prices (rental and ownership).

Additional sources

Additional sources included: the Social Housing Regulatory Authority (SHRA), Consumer Credit Market Reports, and other sector reports and publications.

Study area

Stellenbosch municipality: Urban edge

Data source: Stellenbosch Municipality, Municipal Demarcation Board (MDB), ESRI South Africa.

As shown in the map above, the 2019 urban edge for Stellenbosch municipality includes a number of separate outlying areas—such as Pniel and Groendal—in addition to the town of Stellenbosch itself. The scope of this study is limited to the main central town of Stellenbosch, as encircled by the urban edge (map to the right)—see **Appendix A** for further detail.

Centre for Affordable
Housing Finance
in Africa

Study area: Stellenbosch town

Data sources: Stellenbosch Municipality, Municipal Demarcation Board (MDB), ESRI South Africa.

Key demographics

Stellenbosch town is the largest settlement in the municipality, followed by Klapmuts and Franschhoek and a number of smaller rural settlements. Home to a major university of 22 000 students, the town serves as a centre for the municipality with education, commercial and government services. Stellenbosch is an important centre for tourism, due to its natural environment and wineries, and also attracts retirees.

Population

Identified as the main urban node of the municipality, Stellenbosch town had a population of 101 843 in 2021, with a total of 27 359 households. Stellenbosch town is home to 52% of the total households in the municipality.*

At municipal level, 73% of households have access to basic services, as well as live in a formal dwelling. Municipal population estimates by WC DSD are shown to the right, alongside figures for Drakenstein, George and Mossel Bay.

According to earlier DEADP estimates, having increased relatively faster at 2.8% per annum between 2001 and 2011, Stellenbosch municipality's population growth is estimated to slow to 2.2% per annum from 2011 to 2023, at which point the population growth rate is expected to increase to 2.5% per annum up to 2028. The municipal IDP forecasts a lower population growth rate of 1.7% per annum for the period 2021-2025. Household size in the municipality has been declining slightly, from 3.4 in 2001, to 3.3 in 2016. The municipal IDP 2022-2027 puts household size at 3.7 in 2021.

Density

Stellenbosch municipality's population density is 236 persons per km², higher than neighbouring Drakenstein municipality at 191 person/km². The 2019 SDF set the target density for the municipality at 25 dwelling units per hectare, but noted that the average density in 2015 was only 8.17, indicating that significant changes to settlement patterns needed to be effected in order to increase density within the urban edge.

Number of households per municipality

Female	19,122	36.58%
Male	33,152	63.42%
Grand Total	52,274	100.00%

Source: 2016 Community Survey.

Demographics

As of 2021, the municipal population is 51.2% female (2021), while the 2016 Community Survey puts the number of women-headed households at just 37%.

According to the 2016 CS, approximately 30% of Stellenbosch municipality's population were adults, 42% were youth (15-34) and 4% elderly persons (65 and over). Stellenbosch municipality has an ageing population, with the cohort of persons 65 or over, growing faster than the cohort of working age adults. The great majority of stable homeowners are over 50 years old, with only about 5% under 35.

Growth of number of households by subplace (2021-2031)

1001 - 2000
2001 - 5000
5001 - 13922

Population growth by area – 2001-2031

Between 2001 and 2011, Khayamandi more than doubled in size, with an additional 5 004 households. Cloetville also grew in population with 1 081 additional households. Stellenbosch SP dropped by one third, losing nearly 3 000 households. Reflecting densification at the centre of town, La Colline more than doubled its number of households. Jamestown and Paradyskloof to the south also gained population.

The next ten years until 2021 saw continued growth in Khayamandi, with another 2 760 households being added.

Looking forward, the growth in Khayamandi is forecast to continue at the same rate, growing by one third before 2031. La Colline and Cloetville will also continue to densify. Having dropped in size prior to 2021, Welgevonden is anticipated to gain another 420 households in the next 10 years.

In total, the Stellenbosch town area is anticipated to gain an additional 6 146 households between 2021 and 2031, according to these estimates by WC DSD.

Housing context

• Dwelling type and tenure

The data from the 2016 Community Survey shows that 66% of households in Stellenbosch municipality stayed in formal dwellings and 33% in informal dwellings—see pie graph. According to more recent figures from the 2021 MERO, 36 592 households in the municipality reside in formal dwellings, or 73% of total households. An estimated 25% of residents live in the 29 informal settlements in the municipality (2022-2027 IDP).

The 2016 CS has the most recent data at municipal level on tenure status—see table to the right. At that point in time, one half of the municipality's households reported that they owned their property (50%) while 19% rented. Stellenbosch municipality has a lower ownership rate than the national average (65%) and lower rates of rental than the national average (26%)—according to national data from the 2019 GHS.

Of those who owned, 41% of households reported they possessed the title deed to their home, while 37% said they did not have the deed to their property (2016 CS).

At the time of the 2011 Census, one third of households reported that they were in an RDP or government-subsidised dwelling, while 37% indicated they were not.

Housing demand

Stellenbosch town housing demand database

According to data provided by the municipality, as of November 2021, the number of people on the Stellenbosch municipality housing demand database was 17 945. Residents of Stellenbosch town made up 64% of the database (11 396), of which: 64% were aged 41-65 years old, and 0.12% (or 14 people) indicated a member in the household had a disability.

The housing demand database information must be viewed with caution for a number of reasons. The data is based on those people who voluntarily come forward, and income data is self reported and not verified. Furthermore, the demand data is a moving target and thus these figures only speak to one point in time as recorded at one event. Finally, it has been observed that this open day methodology typically undercounts persons with disabilities.

Housing gaps

Because state housing delivery has not produced sufficient units and the private sector is not building units affordable to low and middle income households at scale, there is a significant shortage of adequate, affordable housing in Stellenbosch town, resulting in land invasions, a growth in informal settlements, and large numbers of workers and students from the university or private sector needing to commute daily

Stellenbosch town housing demand database (November 2021)

By suburb

By monthly income

Stellenbosch town housing demand database by suburb and monthly income (Nov 2021)

Source: Stellenbosch Municipality, Stellenbosch November 2021 statistics.

into town. The current housing gap is specifically with respect to student housing and affordable housing for employed, lower and middle income groups. The demand for lower-value rental accommodation for university students is in the region of 4 000 units.

The data indicates that housing need is concentrated in particular areas of the town. Cloeteville, Idas Valley, Khayamandi, and Jamestown make up nearly half of the municipality's total BNG housing need. Cloeteville (84%), and Idas Valley (88%) have the highest proportion of applicants on the waiting list for 10 years or more.*

Many people on the housing demand database have been waiting for housing assistance for years. According to the 2019 SDF, 74% of the applicants (for the entire municipality) had been on the waiting list for longer than 10 years, 24% of which are currently on the waiting list for more than 20 years.

Looking at the demand database for the municipality in 2018, the majority of people (53%) were over 40 and had been on the waiting list for more than 10 years, according to the 2019 MSDf.* Those applicants who were under 40 years of age were mainly located in Khayamandi and Klapmuts, which falls outside the study area (see pg 6).

* Sourced from 2019 Stellenbosch SDF, which includes an analysis of a May 2018 extract from the WC Housing Demand Database for the municipality.

Unmet housing needs – Informal settlements and backyard dwellings

The presence of informal settlements and backyard dwellings in Stellenbosch town, provides a sort of proxy for housing demand, indicating the number of households unable to find alternate, adequate accommodation which is affordable. The location of these dwellings may indicate areas of opportunity for settlements, or may express preferences for location with respect to formal or informal employment.

As shown in the map, informal settlements within Stellenbosch town are almost entirely located in Khayamandi, at the northern end of town. Its important to note that, absent a recent survey of informal settlement residents which provides data on type and quantum of income, its difficult to know if those households would qualify for subsidized housing, and thus whether the required housing opportunities would need to be provided by government through fully-subsidized units, service sites, social housing or FLISP. These households may have income which make them ineligible for full subsidies and unable to purchase a newly-built unit, but adequate to enable some affordability—perhaps affordable rental or a low value house on the resale market. The existence of the informal settlements and backyard dwellings are therefore an indication of housing inadequacy, but not evidence of effective housing demand or capacity to pay.

Backyard dwellers in Khayamandi

A 2021 survey of backyard dwellers in Khayamandi yielded good information on the circumstances of residents, with implications for determining demand and for adequate housing. A total of 1 629 households were interviewed.

backyard dwellings were mostly occupied by single youth. Nearly three quarters (73%) of backyard structures were inhabited by one person, and 62% of

heads of households were aged between 18 and 25. Another 45% of household heads were 26-35 years old, while only 2% were over 55. The great majority of the heads of households were single (84%).

Although 48% of persons were employed, incomes were low, with 59% earning R4 000 or less a month. Only 4% reported a monthly income over R10 000. The share of households receiving a social grant—primarily the child support grant—was only 18%.

Of those who were employed, 57% indicated they were in permanent employment—mostly unskilled or low skilled—primarily as restaurant workers, general workers, and security personnel.

Approximately half of backyard households had been staying at the same address for five years. Most respondents indicated they were renting their dwellings and/or the land on which it sat. Importantly, only 11% of respondents had registered on the housing demand database.

While reported income levels would suggest that approximately one third of backyard dwellers would meet the income requirements below R3 500/month, single persons who did not have dependents would be ineligible for a housing subsidy unless they were elderly or had disabilities (both of which were very small numbers). However the relative frequency of permanent employment suggests steady formal income which would support access to credit.

Stellenbosch town: Urban edge and informal settlements

Data sources: Stellenbosch Municipality, Municipal Demarcation Board (MDB), ESRI South Africa.

Employment

In 2020 Stellenbosch municipality's GDP per capita was R89 378, exceeding both Drakenstein at R76 561 and the provincial figure of R84 967 (2021 MERO). Given the concentration of jobs, the GDP per capita in Stellenbosch town itself is likely higher than the municipal figure.

The 2022-2027 IDP reports that the economy of Stellenbosch municipality grew by an average annual growth rate of 0.9% between 2015 and 2019, but contracted by 6.7% in 2020, largely due to COVID and economic lockdowns.

• Employment

Despite the onset of the pandemic, unemployment in Stellenbosch municipality actually dropped very slightly from 11.6% in 2019, to 11.3% in 2020.

Of the approximately 73 800 workers in 2020, 74% were formally employed while 26% worked in the informal sector.

With respect to formal employment, 24% of workers in 2020 were skilled, 43% semi-skilled, and 32% low-skilled, with the number of low-skilled workers declining in the last four years.

Apart from those who are unemployed, the large number of persons in informal employment creates a challenge for accessing finance to support their housing. Mortgage finance is likely unavailable to these households as banks require evidence of formal employment with a regular income.

Unemployment rates (2010-2020)

Source: 2021 Quantec, calculations by Urban Economics.

Informal employment (2010-2020)

Source: 2021 Quantec, calculations by Urban Economics.

Income

Household income

At R19 791 in 2019, average monthly household income in Stellenbosch municipality exceeds the average for the country, and for the province (2021 MERO). However it is just slightly below the average for Cape Town metro, as shown in the graph below. Stellenbosch municipality's average monthly household income is just R208 below that of Drakenstein.

While average household income in the metro and the province overall declined from 2015 to 2019, the average household income in Stellenbosch increased very marginally—by 0.1% between 2015 and 2019.

Average monthly household income (current prices), 2019

Income distribution

Income data obtained from GeoTerraImage (GTI) for 2021 at subplace level allowed analysis of the income profile of households in Stellenbosch town, instead of the entire municipality.* The graphs to the right display the income distribution. In Stellenbosch town, 8 825 households, or 25% of the total, earn R2 379 or less / month. Approximately 62% earn about R12 000 or less per month.

Monthly household income distribution for Stellenbosch town (n=35 271)**

Source: ©GEOTERRAIMAGE—Neighbourhood Lifestyle Index™ (NLI™) Release 2021.

Monthly household income distribution for Stellenbosch town,** % (2021)

Source: ©GEOTERRAIMAGE—Neighbourhood Lifestyle Index™ (NLI™) Release 2021.

* The W.C. Department of Economic Development and Tourism also provided municipal level household income data for 2021. A comparison of the DEDT and GTI data shows that the overall number of households at municipal level is close, but the GTI data has considerably more households in the bottom income segment. A comparison of the two data sources is provided in Appendix C. The GTI data is used in this report because it was available at subplace level.
** Includes data from 16 subplaces in Stellenbosch town.

Rental market

Rental rates

As noted above, the 2016 CS put the overall rental rate for Stellenbosch municipality at 18.8%. The 2016 Community Survey reported that 15.45% of households rented from private individuals, while another 3.36% rented from the municipality or social housing institutions.

However subplace-level data on the percentage of households who rent is scarce. The most recent data on the percent of households renting by sub place is only available from the 2011 Census, and indicated that—at that time—overall 31% of households in the municipality rented their accommodation. In Stellenbosch town alone, that percentage was higher at 47%. At that time, rental rates were highest in central areas of Stellenbosch town, Stellenbosch sub place itself and La Colline. This makes sense given the presence of the university and the number of student renting their accommodation during their studies.

The pie graph displays Census 2011 figures for Stellenbosch town only. In terms of the size of rental units, 21.5% were 1-2 bedroom units, 12.1% were 3 rooms, and 23.8% had 4 rooms back in 2011.

However clearly these areas, and Stellenbosch town, has changed significantly in the last eleven years. The new Census 2021 data will provide much more recent figures.

Summary of demand side assessment

■ Demand for affordable housing

Stellenbosch town had a total of 27 359 households in 2021, and is expected to grow by 2.5% per annum between 2023 and 2028 (DSD). With a relatively high population density of 236 persons per km², the municipality has an ageing population, with the cohort of persons 65 or over growing faster than the cohort of working age adults. Particular areas of the town are expected to densify more rapidly, especially Khayamandi, La Colline, Cloetsville and Welgevonden. In total, the Stellenbosch town area is anticipated to gain an additional 6 146 households between 2021 and 2031.

As of November 2021, the number of households from Stellenbosch town on the waiting list was 11 396, of which 47% stay in Khayamandi. The current housing gap is specifically with respect to lower-income student housing and affordable housing for employed, lower and middle income groups. Housing need is concentrated in particular areas of the town: Cloetsville, Idas Valley, Khayamandi, Jamestown, and central Stellenbosch. In addition to unmet housing needs for students reliant on financial aid, there is lack of housing for

young families and young people starting their career. Technopark employees, university staff, teachers at local schools, lecturers, support staff at university are also another key market which is not sufficiently met.

■ Affordability

According to the 2021 MERO, the average monthly household income in Stellenbosch municipality in 2021 was R19 791, which exceeded the average for the country and the province. A household with this income could purchase a house priced approximately R796 000 with a mortgage.*

As shown in the table below, 32.8% of households in Stellenbosch town earn less than R3 500/month and 19.8% of households earn R3 501-R8 000/month. According to the calculations presented in the table, only 20.5% of Stellenbosch town households could afford to purchase a home worth approximately R1.2 million or more, with a mortgage. The following section explores whether there is a sufficient supply of houses in the price bracket which is affordable to these households.

Demand for student housing

Approximately 8 000 students at the University of Stellenbosch are in need of private accommodation off campus. Students who receive assistance from the National Student Financial Aid Scheme (NSFAS) have a housing allowance of approximately R60 000/year, or R5 000 /month. About 4 500 NSFAS students stay on campus but there is still about 2 500 who need to find their own accommodation. Although a number of private developers have started building for the wealthier student market (see pg 30), there is a gap for NSFAS students who require a safe place to stay at around R5 000 per month.

Of the approximately 8 000 students who require private accommodation in town, about one quarter are in the rental bracket of R5 000/ month, another portion rent in the region of R8 000/month, while the wealthier segment rent units between R8 000 and R15 000 month. The gap in supply therefore remains for affordable private accommodation for lower income students, many of who receive NSFAS support.

Stellenbosch town household income brackets and affordable housing purchase price (2021)

Monthly household income bracket **	No. of households	Percent of total households	House affordable to household at lowest end of the bracket *	House affordable to household at top end of bracket

Total	35 267	100.0%		

Source: ©GEO TERRA IMAGE – Neighbourhood Lifestyle Index™ (NLI™) Release 2021. Own calculations.

*Assuming a 7.75% interest rate, loan term of 20 years, 10% deposit, 30% housing premium to income ratio, and no FISP. Also assuming the household has a regular formal income and is not accessing other finance. See cautionary notes of methodology on page 31.

** The GII income brackets shown on pg 15 have been converted here to standard income brackets. The conversion assumes the number of households is evenly spread across the income bracket, which may not be true. The total number of households in this table differs slightly from the total on pg 15 because of the conversion.

Supply side assessment

Ownership market – Housing stock by market segment

Market segmentation allows for analysis of how categories of properties have performed differently over time. Most properties under R300 000 were developed through government housing projects, with resale restrictions for houses under eight years old. Properties between R300 000 and R1.2 million are of current interest to government, investors and developers keen on providing more affordable housing, while houses valued over R1.2 million typically trade in more conventional and organic ways.

Number of residential properties by market segment
Stellenbosch, 2021

Number of residential properties by market segment
Stellenbosch, 2017 to 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

With a count of 14 244 residential properties, the total value of the residential property market of Stellenbosch town was R32.39 billion in 2021, having increased by 4.7% from 2020, and an average of 3.65% per annum over the last five years.* Just 8% of Stellenbosch town's residential properties are in the entry market (under R300 000) and only 7% are in the affordable segment (R300 000 – R600 000), while 13% are in the conventional market valued between R600 000 and R900 000.

Eleven percent of residential properties in Stellenbosch town are in the high-end market (valued between R900 000 and R1.2 million), while the large majority (62%) are in the luxury market over R1.2 million. This means that only about 1 in 3 residential properties is under R1.2 million. Only 28% of the residential properties, or 3 931 houses, are valued R900 000 or less.

These properties valued over R1.2 million would require a minimum monthly household income of R29 600 in order to purchase with a mortgage. (This calculation—and others in this report—assume a 7.75% interest rate, 10% deposit, 30% housing premium to income ratio, 20-year loan tenor, and no FLISP subsidy.)

* NB: As noted in the Data Sources section above, the data purchased from Lightstone, and detailed in the Supply and Market Activity sections of this report, reflects only the Census sub-places contained within the study area (Stellenbosch town). The deeds data therefore reflects the study area, and not the entire municipality.

Distribution of residential properties by market segment
Stellenbosch, 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Number of residential properties	Market Segment
2	Under R300 000
1 000	R300 000 to R600 000
2 000	R600 000 to R900 000
3 000	R900 000 to R1.2m
3 885	Over R1.2m

Of the 1 115 entry market properties, 92% are government-subsidised properties (GSP). As shown in the map above, the entry level housing is clustered in Khaymandi, while the bulk of properties valued over R1.2 million are located in the centre of town. Cloeteville is a fairly mixed neighbourhood with the majority of residential properties in the conventional market.

Comparing Lightstone deeds data to the Stellenbosch Valuation Roll

The Lightstone data for the study area as of 31 December 2021 includes 14 244 residential properties in total, while the Stellenbosch Valuation Roll (2 July 2020) contains 15 709 properties, approximately 1 500 more.

The difference between the total residential stock counts of Lightstone and the municipal valuation roll are to be expected, for a number of reasons. Firstly, there may be a difference in timing between the date that the municipality published their roll, and the updated data from the Deeds Office and Surveyor General which Lightstone uses for its count at any point in time.* Second, the municipality may categorise residential properties differently than Lightstone. Finally, municipalities may undervalue properties in order to avoid widespread disputes over rates.

Having acknowledged these differences in methodology, a comparison of the two datasets is still valuable as it provides a more detailed picture of the market. Furthermore, the municipal valuation roll permits sight into the market segment above R1.2 million.

In our analysis of the Stellenbosch Valuation Roll, we only included properties that are zoned residential and that are located in the neighbourhoods which are part of the Stellenbosch city area, inside the urban edge. The areas included in the Lightstone data are delineated in **Appendix A**.

The graph compares the data from the two sources and shows the number of properties in each market segment. The number of properties in the Lightstone data is higher than the valuation roll for the lower market segments (especially under R300 000), while the valuation roll has a bigger count of properties in the higher market segments, most notably above R1.2 million.

Stellenbosch town: Number of properties, by market segment (Lightstone and municipal VR)

Source: Lightstone data as of 31 Dec 2021, Stellenbosch Valuation Roll, July 2020.

Lightstone's valuation methodology

Lightstone's valuation approach is broadly based on three methodologies and uses a combination of these methodologies to estimate the value of a property at a given point in time:

1. **Repeat sale valuation of the property:** A previous sale price is inflated to current value using the Lightstone Residential Property Price Indices. Properties may have an extremely low purchase prices and as such these prices are often not used to generate a repeat sale valuation, but may sometimes be utilised where it appears that there are volumes that carried similar sale prices in the area.
2. **Comparable sales valuation:** This methodology uses comparable sales in the area in recent times inflated to current value using the Lightstone Residential Property Price Index. If low value sales occurred in the area, these values will affect the comparable sale valuation downwards.
3. **Third party valuations:** These are valuations completed by third parties such as municipalities and physical valuers which Lightstone uses as input at a property level in valuing a particular property. The Lightstone Residential Repeat Sale Indices is then used to bring historic valuations to current value.

* The date of valuation for the Stellenbosch VR was 2 July 2020. The roll was approved/implemented 1 July 2021.

Comparing Lightstone deeds data to the Stellenbosch Valuation Roll

The graph below further segments the properties valued over R1.2 million, as per the Stellenbosch VR, and shows that many of the properties are grouped at the bottom end of the **luxury** segment—R1.2 million to R1.8 million.

Properties over R1.2 million

A critical drawback of the five market segments we use to analyse the Lightstone data is that all properties valued above R1.2 million are grouped together and not separated into R300 000 increments, which would allow for more detailed and nuanced understanding of the upper end of the property market. The graph to the right displays the Lightstone market segmentation, alongside the detailed market segmentation possible with the VR data.

Ownership market – Housing stock by property type

Property type categorization is particularly relevant because of its implications for affordability. Often estate properties are higher value, while sectional title—in some, but not all cases—offer a more affordable option. Second, the property type is particularly relevant to an inclusionary housing policy as typically estate properties are located outside the main urban areas, while sectional title units may be better located in relation to economic opportunities.

In Stellenbosch town, in 2021 the largest portion of residential properties are freehold title outside an estate (54.5%), followed by sectional title outside an estate including student rental (27.2%), and 18.0% freehold within a private estate. Fifty properties—0.4%—are sectional title properties within estates.*

Property type by market segment

In 2021, 88% of freehold estate properties were in the **luxury** market—mostly located in Welgevonden to the north, as well as Paradyskloof to the south. The great majority of sectional title units (outside of an estate) are also in the **luxury** market (33.7% of **luxury** market stock). Much of the **high end** market is also sectional title (39%).

While freehold properties (outside of estates) exist in every market segment, all **entry** level properties are freehold (except for one sectional title unit). Notably, 93% of these **entry** level, freehold properties are government-subsidised properties.

Property type by location

As shown in the map above, not surprisingly, the great majority of sectional title units outside of estates are in central Stellenbosch, in the Stellenbosch sub place in the centre of town. A large portion of these properties would be student rental units. Typically rental units would be part of a sectional title development with a body corporate managing the complex, and common areas. A block of flats with one owner would also likely be a number of sectional title units on the same erf.

* The four property types used in the analysis of deeds data in this report are: freehold title (outside an estate); freehold title within an estate (referred to as freehold estate); sectional title (outside an estate); and sectional title within an estate (referred to as sectional title estate).

Stellenbosch, 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced June 2022).

Comparing Lightstone deeds data to the Stellenbosch Valuation Roll - Property types

These graphs below compare the data on the number of freehold and sectional title properties from the two data sources, the Stellenbosch Valuation Roll and the Lightstone deeds data (grouping together properties that are inside and outside private estates).^{*} Notably, the overall split between freehold and sectional title in the Lightstone data is very similar to the ratio reflected in the Valuation Roll; the VR contains 69.8% freehold and 30.2% sectional title, while the Lightstone data is split 72.8% freehold and 27.2% sectional title.

In total, the VR contains 602 more freehold properties than what is contained in the Lightstone data (10 970 Valuation Roll; 10 368 Lightstone). However, within the *luxury* market segment, approximately 1 100 more freehold properties are captured in the Lightstone data, as shown below.

Stellenbosch town: Number of freehold properties, by market segment (Lightstone & municipal VR)

NB: Both freehold properties inside and outside estates are included.
Source: Lightstone data as of 31 Dec 2021. Stellenbosch Valuation Roll, July 2020.

Stellenbosch town: Number of sectional title properties, by market segment (Lightstone and municipal VR)

NB: Both sectional title properties inside and outside estates are included.
Source: Lightstone data as of 31 Dec 2021. Stellenbosch Valuation Roll, July 2020.

Similar to freehold properties, the VR contains more sectional title units (863) than the Lightstone data. There are approximately 4 739 sectional title properties on the VR, compared to 3 876 in the Lightstone data.

In the *entry* market segment, again, there is a large disjuncture. The VR includes 655 sectional title properties below R300 000, while the Lightstone data has a single property.

In summary, the comparison of the stock data for freehold and sectional title properties from the VR and Lightstone reflects a similar pattern. For both property types, it appears the municipal valuation roll has a higher total count, with the difference most pronounced in the *entry* market where it appears that either the VR contains an overcount or Lightstone is undercounting.

Comparing Lightstone deeds data to the Stellenbosch Valuation Roll - Property types

The data in the Stellenbosch Valuation Roll enables us to look at the properties valued over R1.2 million, in smaller market segments, to get a sense of the distribution. The graph on the left shows freehold properties over R1.2 million as per the Stellenbosch Valuation Roll.

In the Lightstone data, 56% of freehold properties (inclusive of properties inside and outside estates) are in the *luxury* segment (5 790), compared to only 43% of freehold properties in the municipal valuation roll (4 736).

Number of freehold properties over R1.2 million by market segment: Stellenbosch Valuation Roll

NB: Both freehold properties inside and outside estates are included.
Source: Lightstone data as of 31 Dec 2021. Stellenbosch Valuation Roll, July 2020.

The graph below looks at the sectional title properties valued over R1.2 million on the Stellenbosch Valuation Roll.

In the Lightstone data, 77% of sectional title properties (both inside and outside estates) are in the *luxury* segment (3 016), compared to only 43% of the sectional title properties listed in the municipal valuation roll (2 990). The considerable difference in the counts of sectional title *luxury* properties bears further exploration.

Number of sectional title properties over R1.2 million by market segment: Stellenbosch Valuation Roll

NB: Both sectional title properties inside and outside estates are included.
Source: Lightstone data as of 31 Dec 2021. Stellenbosch Valuation Roll, July 2020.

Comparing municipalities – By size, market segmentation, GSP and property type

The graph to the right compares the study areas in George, Mossel Bay, Stellenbosch and Paarl/Wellington (Drakenstein) with respect to: the number of residential properties by market segment, the share of government-subsidised properties (GSP), and property type.

Market size and segmentation

In terms of the number of residential properties, among the four study areas, Stellenbosch town has the smallest residential property market, with a total of 14 244 properties. As shown in the bottom graph, Stellenbosch town also has the smallest residential property market in terms of value (R32.35 billion in 2021).

Of the four areas, Stellenbosch town has the largest proportion of properties in the **luxury** market over R1.2 million (62%). Stellenbosch also has the smallest portion of residential properties in the **entry** market, just 7.8%, compared to George with 41% of properties valued below R300 000.

Residential market size

Properties by market segment, government-subsidised housing and property type

Total value of residential property markets and average annual growth rate (2017-2021)

Data source: CAHP's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Contribution of government housing programmes*

In Stellenbosch town, only 9% of residential properties are government-subsidised, making up just 1.2% of the total residential property market in terms of value. In contrast, neighbouring Drakenstein has 28% GSP, while as much as 43% of the residential properties in George are GSP.

Property types

Unlike the other three municipalities, only 54.5% of residential properties in Stellenbosch town are freehold title (outside an estate). This is likely due to the presence of student rental as well as the small number of GSP.

About 18% of properties are freehold houses in a private estate. Due to the university, Stellenbosch has the largest proportion of sectional title properties among the four areas (27.2%).

* GSP are identified through a proxy which is applied by Lightstone the deeds data. See further details on page 26 below.

Government-subsidised properties – Number and spatial distribution

Government-subsidised houses are not explicitly recognised or marked on the title deed. Therefore it is necessary to use a proxy to identify these properties on the deeds registry—the proxy is based on common programme characteristics of BNG/RDP houses, including the year, first registration price and buyer type, maximum prices, and proximity to other similar housing types (see **Appendix B**). This analysis helps to understand the contribution of public investment in subsidised housing programmes, and the performance of these assets on the ground.

Notably, by virtue of the fact that the data is from the Deeds Office, these figures only include those subsidised houses where a title deed has been transferred to the beneficiary. According to the 2016 CS, title deed possession was low in Mossel Bay municipality (41%)—among both GSP and non-GSP properties. Due to the title deed backlog, these figures will not reflect those units delivered by government and handed over to beneficiary households who have not yet received a title deed.

Number and location of GSP

Stellenbosch town contains only **1 353 GSP**, making up **9.5% of residential properties** in 2021. The GSP in Stellenbosch town are fairly new, with 62% eight years old or less.

All of the GSP are concentrated in just three subplaces: Khayamandi, Cloetesville and Idas Valley.

- Khayamandi contains 69% of the total GSP in the town. The area is almost entirely government-subsidised properties, with 78% of the houses subsidised by the state. Only 11% of these GSP are over 8 years old, indicating the area is a fairly new settlement.
- In contrast, Cloetesville is a more mixed neighbourhood with 18% of the residential properties GSP. However 96% of these GSP are over 8 years old, and thus eligible to be sold on the resale market.
- In Idas Valley, GSP make up only 6% of the total properties—all of which are over 8 years old.

Government subsidised properties – Performance and role of GSP

Value of GSP properties

Together the 1 353 GSP in Stellenbosch town were valued at R378.6 million in 2021, with an average value of R279 848. In 2021, 76% of GSP in the Stellenbosch town were entry market properties valued under R300 000, with 13% in the affordable segment valued R300 000 to R600 000, and another 10% in the conventional market.

As shown in the left-hand graph, GSP dominate the entry level market in Stellenbosch town: 92% of entry level properties were built by government, and 18% of residential properties in the affordable market (R300 000 – R600 000). Thus, not only are most GSP in the entry market segment, most of the entry market segment are GSP.

As shown in the bottom graph, the GSP in Stellenbosch town have appreciated over time. Unlike the other study areas that mostly have older GSP stock, only 38% of the GSP are over 8 years or older. However these 510 properties had an average value of R442 388 in 2021, much higher than in the other study areas. The newer GSP less than 8 years have a significantly lower average value of just R181 515. The performance of these properties over 8 years is particularly relevant as GSP older than 8 years are eligible to be sold in the formal property market.

Residential exclusion for property rates

Notably, the residential exclusion threshold as per the Stellenbosch rates policy is R250 000, meaning that the average owner of a GSP under 8 years old will not be levied any rates, while the average owner of a GSP over 8 years old would be levied rates on approximately R192 400, or 43% of the value of their property.*

* It's noted that the number of residential properties in Stellenbosch town valued under R250 000 was 3 272 in 2021, or 23%, meaning that 23% of total residential properties fall under the residential exclusion threshold.

Rental market – Rental prices by property type and size

The TPN Credit Bureau provides updated data on the rental market, however it is important to note that these figures are for the municipality as a whole, and not Stellenbosch town.

By number of bedrooms

According to the TPN data, the average monthly rental for a 3 bedroom unit in Stellenbosch municipality was R13 911, and for a 2 bedroom unit it was R8 655. These averages dropped very slightly in 2020—as shown in the graph below—and then returned to 2019 levels.

Monthly rental prices for 2 and 3 bedroom units (2019-2021)

Source : TPN Credit Bureau, Investor Reports March 2022.

By property type

On average, rental prices for sectional title units are more affordable than freehold property. (Notably, the TPN data does not disaggregate freehold properties inside and outside of private estates as the Lightstone data does.)

According to TPN data, at the end of 2021, average rent was around R9 000/month for freehold properties and around R8 000/month for sectional title units. The graphs below show the average rental price as well as the price range, from Q1 2020 to Q4 2021. As at the final quarter of 2021, the minimum rental price was approximately R5 000/month for both freehold and sectional title properties.

Rental price range (2020-2021)

Source : TPN Credit Bureau, Investor Reports March 2022.

Target market

Assuming a benchmark of 30% of income spent on rent, the lowest-priced freehold or sectional title property (R5 000/month) would be affordable to households with a minimum income of R16 670/month—which is approximately 31% of households in Stellenbosch town.*

* Calculation based on income data from ©GEOTERRA IMAGE – Neighbourhood Lifestyle Index™© (NLI™) Release 2021.

Rental market – Rental price distribution

Rental price distribution

The graphs to the right display the distribution of rental units (less than 3 rooms, 3 rooms, and more than 3 rooms) according to their rental price. Data is from TPN, for 2021, for Stellenbosch municipality as a whole.

For **freehold** properties, the largest share of rental units with less than three rooms (approximately 27%) go for a rental price of R8 000/month. However freehold property with less than three rooms can rent for as low as R3 000/month, and as high as R14 000/month.

Most three bedroom units are priced R10 000 – R18 000 /month, but the range extends from R7 000 to R23 000 per month. Larger properties with over three bedrooms are all above R13 000/month and have the widest distribution of prices, from R13 000 to over R45 000 per month.

Again assuming a 30% rent to income ratio, a household would need a monthly income of R26 670 to rent the most common small freehold with less than three rooms (R8 000)—only an estimated 23% of households in the municipality earn this much or more.

For **sectional title** properties, the most common sectional title unit with 2 bedrooms rents for R8 000/month. The most common sectional title unit with less than 2 bedrooms rents for the same price, but it is easier to find units less than that (R4 000 – R5 000 / month). The biggest portion of larger sectional title units with more than 2 bedrooms rent at R14 000/month, but prices range from R4 000 to R22 000 per month.

The average household in Stellenbosch is unlikely to locate a rental unit in their price range. For example, a household looking for a 3 bedroom house in Stellenbosch municipality is most likely to find a R14 000/month freehold property (requiring an income of R46 670 /month)—only 13% of households fall in this category. Alternatively if they are looking for a sectional title unit, they would typically find apartments for R8 000/month, which require a monthly income of R26 670. Approximately 23% of households in the municipality earn this much.

Rental price distribution (2021)

Source : TPN Credit Bureau, Investor Reports March 2022.

Rental housing for students

Rental price distribution

With a total student body of 22 000, the University of Stellenbosch is a critical force in the residential property market of the municipality, and especially Stellenbosch town itself. The university itself accommodates approximately 6 500 students in its residences, leaving around 8 000 students who require affordable accommodation in town.

A number of years ago, many students stayed in granny flats of houses in town, but more recently homeowners have converted these properties for tourist accommodation. Until the 2000's, the primary private student accommodation was blocks of flats which would work for students, or a small family. Small student flats were built in the CBD area, providing a good location, and bringing students closer to campus. However these private units were primarily affordable to wealthier students only.

Currently, there are a number of developers building for the higher income bracket of the student market, but there remains a gap in supply for students who receive support from the National Student Financial Aid Scheme (NSFAS). Much of the stock built now is narrowly targeted at the student market (with small rooms and shared facilities), and is not suitable for small families or young professionals.

In the next year, the University is planning on adding 400 units in the residences, and another 800 private student units will be developed for the top market.

High end student accommodation

The flagship residential development in Stellenbosch, called MySpace, was built by developer Abacus and serves as an example of the types of rental units being built presently which narrowly target wealthier students.

Currently there is one My Space Residence located in Paradys (125 units), with two more locations set to open in January 2023 in Drostdy and Dorpsstreet with a further 550 beds. Most of the units are sharing, with some singles available.

Prices per bed range from R8 500 to R12 500 per month, and include a wide range of amenities including: study area, wifi, gym, lounge area, water and electricity. The least expensive beds (R8 500/month) are in a 24m² twin room, with a small kitchenette, bathroom and two beds. These units are not affordable to NSFAS students who receive an allowance of R5 000/month for accommodation.

Summary of supply side assessment

House prices in Stellenbosch have been rising for a number of years. Out of the four study areas, Stellenbosch town has the largest proportion of **luxury** market properties (62%) as well as the smallest portion of **entry** market units (8%). One developer operating in the area said that it's very difficult to find residential properties for less than R900 000, and most properties under R700 000 would be of lower quality and size. Only 28% of residential properties, or 3 931 houses, are valued R900 000 or less.

Government-subsidised properties

In Stellenbosch town, just 9% of the residential properties are government subsidised (1 353). Stock in the **entry** market is almost entirely the result of public investment: 92% of **entry** market houses are GSP, with all concentrated in 3 subplaces: Khayamandi, Cloetesville and Idas Valley.

Most GSP in Stellenbosch town are fairly new—62% are less than 8 years old—but the older ones have seen significant appreciation over time. The 510 GSP 8 years or older had an average value of R442 388 in 2021, while the newer GSP have a significantly lower average value of just R181 515.*

Rental market

On average, rental prices for sectional title units are more affordable than freehold property. According to TPN data, at the end of 2021, average rent was around R9 000/month for freehold properties and around R8 000/month for sectional title units. The average monthly rental for a 3 bedroom unit in 2021 in Stellenbosch municipality was R13 911, and for a 2 bedroom unit it was R8 655.

The average household in Stellenbosch is unlikely to locate a rental unit in their price range—most units are only affordable to less than a quarter of households. A household looking for a 3 bedroom unit is most likely to find a R14 000/month freehold property which would require a monthly income of R46 670—only 23% of households fall in this bracket.

* It should be noted that the valuation of the GSP under 8 years old is likely an underestimation due to the fact that they have not been sold formally since primary transfer.

Estimated household incomes required to purchase property with a mortgage, per market segment (2021)

Market segment (residential property value)	No. of properties	% share of total properties	Minimum monthly household income needed to purchase in this market segment*	Maximum monthly household income needed
Entry level: < R300 000	1 115	7.8%	--	R7 300
Affordable: R300 000 - R600 000	975	6.8%	R7 300	R14 750
Conventional: R600 000 - R900 000	1 841	12.9%	R14 750	R22 200
High end: R900 000 - R1.2m	1 507	10.6%	R22 200	R29 600
Luxury: > R1.2m	8 806	61.8%	R29 600	--
Total	14 244	100%		

* Assuming 7.75% interest rate, 20 year loan tenor, 30% premium to income ratio, 10% deposit and no FLISP. Source: Lightstone data as of 31 Dec 2021. Own calculations.

Affordability

Only 20% of residential properties (or approximately 2 800 houses) fall in the bracket between R300 000 and R900 000 (**affordable** and **conventional** market segments), which is theoretically accessible for purchase by households earning between R7 300/month and R22 000/month—see table above. As noted above, with the average monthly household income for Stellenbosch (R19 791), a household could only afford a house priced R796 000—but there are less than 3 500 properties valued this amount or less in the town.

Nearly 62% of residential properties are valued over R1.2 million (**luxury** market) and thus would require a monthly income of approximately R29 600 or more in order to purchase with a mortgage (no FLISP). This implies that those units would be out of reach for nearly 80% of households in the town.

Word of caution regarding affordability calculations

There are a number of important cautionary notes which should be raised with respect to these calculations:

- While house purchases below R1.2 million avoid transfer fees, there are other transfer costs which are not included here—see box on pg 43.
- Not all households purchase in the market segment they can afford: some may have additional funds from a once-off source, and some may have other competing expenses that prohibit them from spending the benchmark figure of 30% on housing.
- Some households may be living in properties that they accessed either by purchase or inheritance or gift, that today they could not afford to buy—in some cases properties appreciate faster than incomes.

Current market activity

Market for new build – New transactions by market segment

Unlike Mossel Bay and George, new transactions in Stellenbosch town were *increasing* pre COVID. Having dropped from 2018 to 2019, the volume of new transactions rose by 40% in 2020, driven primarily by more sales in the *affordable* and *conventional* markets. 2021 saw a further increase in new *affordable* transactions, as well as a jump in *luxury* sales, which together boosted the total number of new transactions by 24% in 2021.

In 2021, there were 226 new transactions in Stellenbosch town, totaling R252 million in value. New transactions in Stellenbosch town have averaged 165 per annum over the last five years.

It's important to note that new transactions include both the sale of houses newly constructed by private developers, as well as the transfer of new subsidised units to government housing programme beneficiaries.

For Stellenbosch town, the entirety of the new transactions in the entry market in 2021 (23 transactions) were GSP—there was no private sector construction of new houses below R300 000 in 2021. These 23 new transactions in the entry market were the only GSP registrations in 2021.

New residential transactions by market segment
Stellenbosch, 2017 to 2021

In 2021, 90% of new transactions were sales of *non-GSP* houses which were built by the private sector. These *non-GSP* new transactions in 2021 totaled R62.7 million.

As shown in the map to the right, the *entry* level new transactions in 2021—all GSP—took place in Khayamandi, while the *affordable* new transactions were in Idas Valley. New construction and sales by private developers was centred in Stellenbosch central and Paradyskloof primarily.

Distribution of new transactions by market segment
Stellenbosch, 2021

New build market – New transactions by property type

Analysis of new transactions (excluding GSP) by property type sheds light on the typologies of units which developers are constructing and bringing onto the market within Stellenbosch town.

New units from private sector

The graphs below show the number of new transactions each year, by property type, *excluding* GSP. Over the last five years, the consistent majority of units built and sold by the private sector have been freehold properties in estates (67%), with another 27% sectional title outside estates.

Very few regular freehold houses are being built by the private sector. Only 6% (just 13 houses) of new transactions in 2021 were freehold units outside of estates. The private sector is not building sectional title within estates—only two have been built and sold in Stellenbosch town in the last five years.

New residential transactions by property type:
Non-subsidy properties

Total new transactions

The bar graph to the right *includes* GSP, and thus gives an overall picture of new units being sold or transferred each year. As indicated previously, the 23 new freehold transactions in the *entry* market are all GSP. However notably there is a significant number of new transactions of freehold estate properties in the *affordable* segment—88 transactions in 2021—which are not GSP. Many of these are part of the Idas Valley housing development—see next page.

New transactions of sectional title units (outside an estate) are dominant in the *luxury* market, where there were 44 of these new units sold in 2021.

Idas Valley

Located in the northern portion of Stellenbosch Municipality, north of Helshoogte Road and east of Lelie Street, Idas Valley has a stock of 1 953 residential properties in 2021, of which 39% are in the conventional market, between R600 000 and R900 000 as per the Lightstone data (see also pg 26).

The municipality appointed ASLA Magwebu to execute two projects in Lindida as part of the Idas Valley Housing Project. The project is a mixed housing development, with 113 GAP houses, and 87 fully subsidized units. It's a multi phased development, with families beginning to move in in 2019 and 2020. As part of the Khay Lam project, the Free Market Foundation has also been involved in facilitating the transfer of the properties so that owners receive their title deeds.*

The website of Oak Tree Village, one of the developments in the area, advertises the following new units for sale. These properties are targeted at first time home buyers with gross monthly income below R30 000:**

- 55.7 m² 2 bedroom from R607 950
- 43.4 m² 2 bedroom from R468 000
- 54.6m² 3 bed from R699 500

Resale market – Secondary market sales

The resale market has behaved somewhat differently than the new build market over the last few years in Stellenbosch town. Resale transactions were declining since 2017, and continued to drop into the first year of the pandemic. However in 2021, the total number of resale transactions shot up by 62%, to higher levels than 2017. This increase was driven almost entirely by a boost in resale transactions of properties in the **luxury** market over R1.2 million.

In total there were 554 resale transactions in 2021, totaling R1.38 billion in value. The great majority of these transactions were over R1.2 million (77%), 10% were in the **high end** market, 9% in the **conventional** market, and 3% in the **affordable** market. There were only 9 resale transactions of entry market properties in 2021.

Over the five-year period, the majority of resale transactions have been in the **luxury** market over R1.2 million, averaging approximately 73% of total resale transactions annually.

• Resale transactions of GSP

A number of resale transactions each year are sales of existing GSP which are older than 8 years (and thus no longer subject to sales restrictions). In Stellenbosch town, 62% (501) of the total 1 353 GSP are over 8 years old, comprising a total asset value of

Resale residential transactions by market segment
Stellenbosch, 2017 to 2021

R225.6 million. In 2021, 12 GSP were sold on the resale market, at an average price of approximately R254 583. These resale transactions of GSP made up just 2% of all resale transactions in 2021.

Eight of the 9 **entry** market resale transactions in 2021 were cases of GSP changing hands. This underlines the critical importance of GSP properties, not only in their original delivery to beneficiary households, but also their role in providing a critical supply of affordable housing for households purchasing property on the resale market.

Distribution of resale transactions by market segment
Stellenbosch, 2021

Resale market – Resale transactions by property type

As shown in the pie graph, the largest share of resale transactions are of regular freehold properties outside of private estates (40%). The resale of sectional title units outside estates accounted for 35% of total resale transactions in 2021, with the remaining 24% made up of resale transactions of freehold properties inside estates.

Most resale activity was transactions of properties valued over R1.2 million, both regular freehold and sectional title.

The sale of student units for rental would be reflected in the numbers of resale transactions of sectional title units outside estates. Most of these were properties over R900 000.

Number of residential transactions
Property Type

As shown in the map above, sectional title resale transactions are mostly in downtown Stellenbosch and Pappergaai—most of these sales are for units over R1.2 million.

Number of resale transactions by property type by market segment
Stellenbosch, 2018 to 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Spatial distribution of new vs. resale market activity

These two graphs illustrate the marked differences between the new build and resale markets in Stellenbosch town. A clear pattern is visible in new transactions: entry market new build of GSP in Khayamandi, new affordable segment transactions in Idas Valley, and new build of luxury units over R1.2 million in central Stellenbosch.

Resale activity was overwhelmingly transactions valued over R1.2 million, and was spread across the town, with the majority of resale activity in Welgevonden and central Stellenbosch again.

Distribution of new transactions by market segment
Stellenbosch, 2021

Distribution of resale transactions by market segment
Stellenbosch, 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Churn – Levels of resale transactions by market segment

Another important indicator of market activity is the churn rate. Churn rates measure the rate of formal (registered) turnover of the property market: the total number of formal repeat transactions divided by the total number of properties less new registrations, calculated as an annual ratio. It serves as a useful indicator for understanding how well filtering is happening within the property market, or whether markets in particular neighbourhoods are constrained.* Churn can also indicate a level of market interest. More resale activity also brings new people into an area. Given apartheid's legacy of racially-divided cities, neighbourhoods with very low churn rates are unlikely to diversify quickly.

However it should be noted that churn rates may be undermined by the number of informal sales in the market, which would not be reflected in the formal deeds data.

Prior to the pandemic, the churn rate in Stellenbosch town had been falling, from 4.0% in 2017, to a low of 2.5% in 2020. However, resale activity picked up in 2021, returning to its 2017 level of 4.0%. The graph below shows how the churn rate for Stellenbosch town compare to the other four study areas. The George city area,

Churn rate for four study areas (2017-2021)

Data source: CAHP's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

* See Appendix D for a full explanation of filtering, and its importance to access to affordable housing.

Stellenbosch town and Paarl/Wellington have followed the same pattern over this five-year period, while the churn rate in the Mossel Bay city area has been consistently higher.

Churn rates by market segment

Churn varies significantly between market segments, with higher value properties changing hands more frequently than lower value properties. While the top market segment of properties worth more than R1.2 million have relatively high churn rates – reaching 4.89% in 2021—the bottom entry level market segment of properties worth less than R300 000 have churn rates of 0.82% in the same year. For properties in the affordable market, the churn rate is also low, 1.7%. This means that properties in those market segments are not selling – the potential benefits of filtering are not being realised.

Churn rate by market segment (2017-2021)

Data source: CAHP's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Churn – Turnover of GSP

Churn rates by property type

Resale market transaction rates (or churn) also vary significantly by property type. Freehold estate and sectional title properties (outside private estates) have relatively high levels of turnover – almost twice as large as regular freehold properties outside an estate (including GSP). This suggests a more vibrant market within private estates and sectional title properties outside of estates in Stellenbosch town, and substantial market interest in these property types. Given the demand for student housing, and the regular turnover as students locate there and then leave after their studies, the higher turnover for sectional title outside an estate makes sense.

The churn rates for all the property types was dropping prior to the pandemic, and then rebounded in 2021 to rates higher than the pre-pandemic rates.

Churn rates (2021) by property type

Centre for Affordable
Housing Finance
in Africa

Churn rates of government-subsidised properties

The analysis by property type indicates that the lower levels of churn with freehold properties outside estates, is responsible for reduced overall average of 4.0% across Stellenbosch town. This is partly due to a very small churn rate for GSP—just 0.9% in 2021—largely because of the 8-year preemptive clause attached to government-subsidised properties.

However the impact of the Housing Act restriction on GSP sale in Stellenbosch town is limited, given that only 38% of GSP are 8 years or older and therefore can be transacted freely. The low resale activity of older GSP houses is a cause for concern, as the small churn rate indicates that homeowners are not realizing the asset value of their property.

Churn rates: GSP or non-GSP (2017-2021)

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

First-time home buyers – How do households step onto the property ladder?

FTHB as share of total transactions

First-time home buyers (FTHB) are a critical force in the residential property market, particularly the affordable housing segment, making up 42% of total transactions in Stellenbosch town last year. In 2021, 325 households became home-owners for the first time—of which only 7% received a new house from government.

As shown in the middle graph, transactions by FTHB rose by about 32% in the second year of the pandemic. Likely influenced by the record-low interest rates in 2020, the number of bonded FTHB transactions went from 75 in 2019, to 136 in 2020. In 2021, 45% of FTHB transactions were bonded.

First time home buyers: Total residential transactions
Stellenbosch, 2017 to 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Sales Type
 ■ New transactions
 ■ Resale transactions

How do FTHB step onto the property ladder?

A little over half of FTHB purchase an existing house (55%). More households become home-owners by buying on the resale market, than by purchasing new affordable housing units from private developers.

Of the 177 resale transactions to FTHB, just 10 were older GSP being sold to FTHB. This small number makes sense given that only 38% of the GSP in Stellenbosch are over 8 years old and able to be sold.

First time home buyers
Stellenbosch, 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Transaction type
 ■ New transactions government-subsidised housing
 ■ New transactions non-subsidy
 ■ Resale transactions government-subsidised housing
 ■ Resale transactions non-subsidy

The majority of FTHB who move into a new house did not receive it from government, but instead purchased it from a private developer (126 transactions, or 39% of FTHB).

First-time home buyers – By market segment

By market segment

Excluding the 22 households who were beneficiaries of government-subsidised housing in 2021, approximately half of FTHB are purchasing properties which are R900 000 or less—see pie graph below. Ten percent are buying units in the **high end** market, and 41% are purchasing in the **luxury** market over R1.2 million.

FTHB are particularly important to the **affordable** market segments, making up 91% of sales in this market.

Market Segment
 ■ Under R300 000
 ■ R300 000 to R600 000
 ■ R600 000 to R900 000
 ■ R900 000 to R1.2m
 ■ Over R1.2m

Transfer payments and other costs associated with buying a house

For first-time homebuyers, there can be many unexpected associated costs to purchasing a home including VAT, bond initiation fees, bond registration fees and monthly loan account administration fees. However, the largest additional costs for a home-buyer are the transfer fees, and transfer duty payments.

Transfer fees are paid to the attorneys who complete the transaction paperwork and are typically the largest portion of the total transfer costs—ranging from R23 000 to R35 000 for a R1.2 million house.

Transfer duty payments are owed to the South African Revenue Service (SARS). Homes valued below the threshold of R 1 million are exempt from any duty payments. If the house is R1 million - R1.375 million, 3% of the value over R1 million is owed. The percentage owed continues to climb as the value of the house increases. Transfer duty payments are exempt for those who acquire a house through marriage, divorce, inheritance, or if a property purchase is canceled before it is registered at the Deeds Office.

The threshold adjustment for transfer duty payments took effect on March 1, 2020, prior to which the threshold was R900 000. This adjustment specifically enacted to aid those trying to enter the property market.

Mortgage market – New and resale bonded transactions

An analysis of bonded transactions provides a picture of the health of the mortgage market and the degree of confidence by the financial sector in the residential property market. In 2021, 53% of all transactions (419) in Stellenbosch town were bonded: of which, 80.5% were resale & 19.5% new transactions.

The graphs to the top right show the number of bonded transactions in each market segments—both new and resale. Overall, 36% of new transactions were bonded, although this number is impacted by the number of GSP which are transferred to beneficiaries, obviously without a bond. As noted above, 90% of the new transactions in 2021 were non-GSP. Of these 203 new transactions of non-GSP, only 40% were bonded, meaning that approximately 60% of the households who bought a new house from a developer in Stellenbosch town, did not require financing to do so. Interestingly, most of these cash purchases were for properties in the *affordable* segment (80).

In total, 61% of all resale transactions were bonded. Of the 337 bonded resale transactions, only one was a GSP.

As would be expected, banks primarily lend to the top of the market. There were no bonded transactions under R300 000 in 2021. Of the total bonded transactions, over 78% were for properties valued over R1.2 million in 2021. Only 28% of transactions under R900 000 were bonded, while 63% of transactions over R1.2 million were bonded.

In an area such as Stellenbosch with a large number of wealthy residents, non-bonded transactions could be the result of high-income buyers who don't require financing, or low income households who can't access a mortgage. It may also be that these homes were purchased with non-mortgage loans. In Stellenbosch town, excluding new GSP registrations, 55% of all transactions in 2021 were bonded (see bottom graph), meaning that 45% of households (338 transactions) managed to buy a house cash. This proportion is low compared to Drakenstein at 62%, but higher than Mossel Bay, where only 34% of transactions (excluding new GSP) were financed with a bond.

Mortgage market – Bonded transactions by lender and property type

By lender

In total, 419 bonds were issued for new and resale transactions in 2021, over half of which were issued by Standard Bank and Absa.

However, if we focus specifically on bonds for transactions under R600 000, the picture shifts. No bonds were issued in the entry market in 2021, and there were only 22 bonds issued in the **affordable** segment. Nedbank issued one third (7 bonds) with Absa and Standard Bank both issuing 5 bonds in the **affordable** segment—see bottom right pie graph.

All of the five main banks are lending in every segment (except the entry market) but the bulk of lending is for properties over R1.2 million.

By geographic area

As shown in the map below, in 2021 the banks were primarily lending in central Stellenbosch, Welgevonden and Idas Valley. The graphs to the right zero in on two areas with much of the lending activity: Stellenbosch SP and Welgevonden. In both areas, Absa and Standard Bank issued the most bonds. And in both areas, the overwhelming majority of bonds were for properties valued over R1.2 million.

Market Segment
R600 000 to R900 000
R900 000 to R1.2m
Over R1.2m

By property type

Bonded transactions were fairly evenly spread between the three property types: 36% freehold, 34% sectional title, and 30% freehold estate. There were no bonded transactions for sectional title properties in estates in 2021.

The rate of bonded transactions was highest for freehold and sectional title properties (58% bonded), compared to 46% of freehold estate transactions which were bonded in 2021.

Government housing delivery

According to the Lightstone deeds data, which uses a proxy to identify GSP, as described above, the number of new registrations of GSP in Stellenbosch town over the last five years was only 237 units, as shown in the graph below. Again, it must be noted that the deeds data will only reflect GSP where the beneficiary has received their title deed, and therefore will not necessarily match municipal or provincial figures of houses delivered.

New residential transactions : GSP and non-GSP
Stellenbosch, 2017 to 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (source March 2022).

The development of the Adam Tas corridor is positioned as the main catalytic project highlighted in the 2022-2027 IDP. This involves re-design and development of the land around the Adam Tas Road, along the R44 and the railway line, bringing in a range of housing typologies and different income groups. The intention is for the district to be residentially-led with mixed-use, high density development and an emphasis on non-motorized access to the town centre.

Stellenbosch town: Government housing projects

Data sources: Stellenbosch Municipality, Municipal Demarcation Board (MDB), ESRI South Africa.

The municipality's housing pipeline covers the ten-year period to 2030/31 and is focused on social housing, the provision of serviced sites, affordable housing, upgrading of informal settlements and mixed-use housing (formalized homeownership employer housing, especially farmworker housing) (2022-2027 IDP). Projects within the Stellenbosch town area include:

- Jamestown, Farm 527 (phases 2, 3 and 4)- Work is being undertaken to finalise the sub-division plan, and obtain development rights for mixed-use development, approximately 2000 housing opportunities. The project is a Mayoral priority.
- Idas Valley (erf 9445, Oak Tree Village)
- Rectification of Cloetesville subsidy houses at The Steps and Orlean Lounge – These are temporary units with toilets erected for temporary relocation of occupants (161 housing opportunities).
- Erf 7001, Cloetesville – The intention is to obtain development rights on erf 7001 in order to establish GAP housing (360 GAP housing units).
- Upgrade of the Khayamandi CBD – This project is also a Mayoral priority and involves approximately 1 854 housing opportunities.
- Development of the northern extension, Khayamandi – Approximately 5000-6000 housing opportunities.
- Upgrading of Zone 0 in Khayamandi – 711 housing opportunities.

Restructuring zones and social housing delivery

Activity in the rental market in Stellenbosch town includes government plans for social housing projects. Two Restructuring Zones for Stellenbosch municipality were included in the National 2017 Gazette: Greater Stellenbosch and Plankenburg.

In the map to the right, the area in red marks the RZ which includes central Stellenbosch, as well as the area around Adam Tas Street. The Priority Human Settlements and Housing Development Area (PHSHDA) for the Stellenbosch town is shown on the map in yellow. Some areas of the PHSHDA and RZ extend outside the current urban edge, but both are mainly within the urban edge.

Although there are not currently any social housing projects in implementation, there are four projects in pre-planning stage (and thus not reflected on the map):*

- Lapland Flats—This is a refurbishment of existing medium-rise council flats (400 units), with estimated delivery in 2022/23.
- Two projects in La Colline—The two projects total 550 units and are in early stages.
- Town Centre, Erf 2609—This involves unused or underused buildings that can be demolished and re-developed for social housing, yielding potentially 600 units.

Rental market

Rental yields provide an indication to landlords and potential landlords which properties would be profitable to rent out.

Freehold property rental yields

Since 2010, the gross rental yield for freehold properties in Stellenbosch municipality has stayed below the national average, despite variations during the period. As at the end of 2021, the gross rental yield was approximately 5.1%, while the effective yield (taking into account outstanding rental payments) was a slightly less at around 4.9%.

Sectional title rental yields

Gross rental yields for sectional title also stayed below the national average. At the end of 2021, the gross rental yield for sectional title (6.8%) was higher than that of freehold properties. Effective rental yield for sectional title was again slightly less, at approximately 6.2%. At the end of 2021, gross rental yield for sectional title was approximately 1.7 percentage points higher than for freehold units.

Percentage of tenants in good standing

The percentage of tenants in good standing reflects the number of tenants who are up to date with their monthly payments,* and serves as another indicator of profitability for landlords. The indicator took a heavy hit in the second quarter of 2020, due to the economic impact of COVID and associated lockdowns. At that time the national average dropped to 74%. Since then the national average for percentage of tenants in good standing has substantially recovered, reaching 81.4% at the end of 2021.

At the end of 2021, the good standing rate for Stellenbosch municipality was strong (90.28%), higher than both the national and provincial averages.

Summary of current market activity

As with the other study areas, market activity picked up substantially in 2021—led by resale transactions of *luxury* properties. The property typologies that are seeing the most activity and higher churn rates are freehold estate (5.5%) and sectional title outside estate (5.1%).

• New build market

Unlike Mossel Bay and George, new transactions in Stellenbosch town were *increasing* pre COVID. Then in 2021 they shot up by 24%, due to growth in *affordable* and *luxury* transactions. In 2021, all of the new transactions in the *entry* market (23 transactions) were GSP—there was no private sector construction of new houses below R300 000 in 2021.

Over the last five years, the consistent majority of units built and sold by the private sector have been freehold properties in estates (67%), with another 27% sectional title outside estates. New transactions of sectional title units (outside an estate) are dominant in the *luxury* market, where there were 44 of these new units sold in 2021. Very few regular freehold houses (outside estates) are being built by the private sector—just 13 houses in 2021. Nor is the private sector building sectional title within estates—only two have been built and sold in Stellenbosch town in the last five years.

• Resale market

Unlike new transactions which have been on the rise, resale transactions in Stellenbosch town were declining since 2017, and continued to drop into the first year of the pandemic. However in 2021, the total number of resale transactions shot up by 62%, to higher levels than 2017, driven mostly sales in the *luxury* market over R1.2 million. In total there were 554 resale transactions in 2021, totaling R1.38 billion in value. The great majority of these transactions were over R1.2 million (77%), 10% were in the *high end* market, 9% in the *conventional* market, and 3% in the *affordable* market. There were only 9 resale transactions of *entry* market properties in 2021.

Resale activity of GSP is very thin, because stock of GSP in Stellenbosch town is very small (only 9%), of which only 62% of these units are over 8 years old. In total, 12 GSP changed handed formally in 2021.

The impact of student housing on the residential market is apparent. Given the university setting, 35% of resale activity was sectional title transactions outside estates, with another 40% being freehold properties outside estates. Despite the student market, the overwhelming portion of these transactions are over R1.2 million.

On the whole, the churn rate for Stellenbosch town is at the lower end of the four study areas (4.0% in 2021) yet slightly higher than nearby Paarl/Wellington (3.6%). Similar to the other intermediate cities, low value properties have lower churn rates—one fifth the rate of *luxury* properties.

• First time home buyers

In 2021, 325 households became home-owners for the first time—of which only 7% received a new house from government. Likely influenced by the record-low interest rates in 2020, the number of bonded FTHB transactions went from 75 in 2019, to 136 in 2020. More households become home-owners by buying on the resale market, than by purchasing new affordable housing units from private developers. Approximately half of FTHB are purchasing properties which are R900 000 or less, 10% percent are buying units in the *high end* market, and 41% are purchasing in the *luxury* market over R1.2 million. In 2021, 45% of FTHB transactions were bonded.

• Mortgage market activity

In the new build market, only 40% of non-GSP transactions were bonded, mostly in the *affordable* segment. In Stellenbosch town, excluding new GSP registrations, 55% of all transactions in 2021 were bonded. This proportion is low compared to Drakenstein at 62%, but higher than Mossel Bay, where only 34% of transactions (excluding new GSP) were financed with a bond.

In total, 419 bonds were issued for new and resale transactions in 2021, over half of which were issued by Standard Bank and Absa. There were no bonded transactions below R300 000 in 2021, and only 22 bonds issued in *affordable* segment.

Implications for inclusionary housing

What is the profile of housing in Stellenbosch town?

In order to better understand the implications of the above analysis on inclusionary housing, we return to the key questions set out for this study:

- What is the profile of housing in the city? – by market segment, property type, neighbourhood
- What is the state of the residential market currently? – in terms of market performance, activity, key players, government and private sector delivery
- What is the affordability gap? – where is affordable housing needed, how much and what type? what is the target market for the affordable housing market?
- Is there an active property development market that would make the application of an inclusionary housing policy viable?

This concluding section of the report pulls together the main points of the above analysis to identify the characteristics and trends of the residential property market in Stellenbosch town which would critically impact on the success of an inclusionary housing policy.

Source: Stellenbosch Valuation Roll, July 2020.

Total value of residential properties by market segment: Stellenbosch VR (2020)

Source: Stellenbosch Valuation Roll, July 2020.

With approximately 35 300 households (as per GTI data), nearly one quarter of households in Stellenbosch town earn R2 379 or less. Of the four study areas, Stellenbosch town has the smallest residential property market in terms of number of properties, and also the smallest in terms of value (R32.35 billion), growing at an average 2.0% annually over the last five years.

The municipal valuation roll from July 2020 records 15 709 residential properties while the Lightstone data as at the end of 2021 has fewer (14 244). However both indicate a predominantly luxury market. More than the other three study areas, Stellenbosch town's residential property market is biased towards high value properties, with 62% valued over R1.2 million in 2021. Just 15% (or 2 090) are valued under R600 000, and over half of these lower value properties are government-subsidized units. The stock of GSP in Stellenbosch town is fairly low—just 1 393 units all located in Khayamandi, Cloeteville and Idas Valley; the majority of the GSP are under 8 years old.

Given the location of the university in town, rental rates are high and the share of sectional title properties outside estates (27%) is large.

What is the state of the residential market currently?

Market activity in Stellenbosch town is centred in private estates, in the upper market segments, with sectional title resale playing a larger role due to the presence of the university.

• New build market

Unlike Mossel Bay and George, new transactions in Stellenbosch town were increasing pre COVID, and continued to climb through the pandemic, driven largely by *luxury* market sales and the construction of some *affordable* housing developments.

Delivery of government housing programmes is limited, with 23 new registrations recorded in the Lightstone data in the *entry* market below R300 000 in 2021, in Khayamandi. However the private sector built and sold 203 units with a total value of R62.7 million, of which 46% were actually *affordable* housing valued between R300 000 and R600 000. A new development in Idas Valley saw the sale of 88 new homes in the *affordable* segment between R300 000 and R600 000 in 2021.

Over the last five years, the private sector has primarily been building freehold properties in private estates (67% of total new non-GSP transactions), with another 27% sectional title units outside estates—much of which is likely upper end rental housing for students. The private sector is mainly investing in new gated developments, or student rental housing. Very few regular freehold houses outside of estates are being built—less than 15 in 2021.

Notably, of the approximately 200 new transactions of non-GSP in 2021, only 40% were bonded (80), yet most of these non-mortgage purchases were for properties in the *affordable* segment. If the majority of units are bought without finance, it may be that these *affordable* housing developments are not reaching the target market, but instead are being purchased by higher-income households and/or buyers who are purchasing a second property with cash.

• Resale activity

Resale activity has followed the same pattern as the other three study areas in the last five years, declining from 2017 to 2020, and then rebounding past 2017 levels in the second year of the pandemic. This was clearly driven by secondary sales of *luxury* properties, primarily in Stellenbosch SP, in the centre of town, as well as Welgenden.

Stellenbosch town: New sales by market segment (2021)

Source: Lightstone data as of 31 Dec 2021.

Some of these resale transactions are of GSP, but very few. As noted earlier, Stellenbosch town differs from the other three study areas in its small stock of GSP (only 1 353 houses in total, or 9% of total residential properties). Over half of these (62%) are newer GSP which are still bound by the 8 year sales restriction. In 2021, only 12 GSP changed hands on the secondary market, at an average price of R254 583.

Purchases by first time home buyers jumped to 325 transactions in 2021. Most first time home buyers are purchasing on the secondary market (54%), while 39% are buying new units from private developers. The data suggests that many first time home buyers are wealthier and/or have higher incomes: excluding government housing beneficiaries, 41% of first time home buyers are purchasing properties valued over R1.2 million, and just 49% are purchasing with a bond.

• Mortgage lending

Excluding new GSP registrations, only 55% of all transactions in 2021 were bonded. Nearly 78% of the bonded transactions in 2021 were over R1.2 million, indicating that not only is the mortgage market limited in volume, it is also largely limited to high-value transactions. While some of these households may have drawn up once-off lump sum payments (e.g. pensions or inheritance), many of them will have been drawing upon equity from a previous home.

What is the state of the residential market currently?

Churn rates

After having declined 2018-2020, the overall churn rate for Stellenbosch town returned to 4.0% in 2021. As with the other study areas, the churn rate for the higher market segments exceeds that of the lower market segments—ranging from 0.82% for the entry market, to 8.49% for the luxury market.

Churn rates by subplace
Stellenbosch, 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced June 2022).

Centre for Affordable
Housing Finance
in Africa

As a result of the very low churn rates at the bottom end of the market, filtering is not taking place. This is important because, without turnover at the lower end of the ladder, current homeowners (both GSP and not) are unable to realise the asset wealth of their properties and move up the ladder.

As reflected in the churn rates, the market activity for sectional title outside estates and freehold properties in private estates is substantial.

Market activity is clearly concentrated in particular neighbourhoods and suburbs, as shown in the map. Highest churn rates in 2021 were in Jamestown (8.36%) and Onder Papegaaiberg (5.83%) and Welgevonden (5.75%). One developer interviewed described a process of gentrification in Jamestown as it transformed into a more up-market area, 85% of properties valued over R1.2 million.

Rental market

Data on the rental market is painfully scarce—the TPN data used in this report does not include absolute figures and thus does not assist with quantifying supply and demand. According to a representative of the university, there is a gap in supply of affordable private accommodation for lower income students, many of whom receive NSFAS support.

According to TPN's municipal level data, a 2 bedroom sectional title unit would typically rent for R8 000/month, which require a monthly income of R26 670. Approximately 23% of households in

the municipality earn this much, and students dependent on national financial aid, would have a budget of R5 000/month only.

The graph below compares Stellenbosch municipality to the other three municipalities, demonstrating that effective rental yields for freehold and sectional title were smallest in Stellenbosch.

Effective rental yields for four municipalities (Q4 2021)

Source: TPN Credit Bureau, Investor Reports March 2022.

What is the affordability gap? – Town level

The table to the right compares the stock of housing per market segment in Stellenbosch town, to the number of households with the income required to purchase a house with a bond in that market segment. The results point to:

Unmet housing needs in the lowest segment

The unmet housing need is most pronounced in the lowest segment. The table shows a large number of households with a monthly income below R7 300—approximately 17 900 households, or 51% of the total. However there are only 1 115 formal houses on the deeds registry valued below R300 000. This would suggest an unmet need for affordable formal housing; many of these households may currently be renting, and/or staying in informal settlements or backyard dwellings which are not reflected in the deeds data.

Similarly, in the income segments between R7 300/month and R22 200/month, there are far more households (approximately 8 500) than there are houses in the corresponding market segment which would be affordable to households with this income (around 2 800). One possibility may be that a number of these households are renting, or staying in informal dwellings. The data does suggest there is an undersupply of houses valued in the **affordable** and **conventional** market segments.

Apparent market clearing in the high end segment

In the **high end** market segment of houses valued between R900 000 and R1.2 million, there are 1 507 residential properties, and 1 562 households with monthly incomes that would theoretically enable them to purchase a house at this value. The supply appears to roughly match the demand.

Potential oversupply in the luxury market

However there does appear to be a disjuncture at the top end of the market. There are about 8 800 residential properties valued over R1.2 million in Stellenbosch town (approximately 62% of the total), however there are only about 7 300 households with incomes over R29 600 which would enable them to purchase a house with a bond at this cost. This is consistent with the findings of this study which indicate private developers are focusing on the top end of the market.

Estimated household incomes required to purchase property with a mortgage, per market segment (2021)

Market segment (residential property value)	No. of properties in that market segment	% share of total properties in that market segment	Minimum monthly household income needed to purchase in this market segment*	Maximum monthly household income needed to purchase in this market segment	No. of 2021 households that fall in this income bracket**	Percent of 2021 households that fall in that income bracket
Entry level: < R300 000	1 115	7.8%	--	R7 300	17 909	50.8%
Affordable: R300 000 - R600 000	975	6.8%	R7 300	R14 750	5 447	15.4%
Conventional: R600 000 - R900 000	1 841	12.9%	R14 750	R22 200	3 035	8.6%
High end: R900 000 - R1.2m	1 507	10.6%	R22 200	R29 600	1 562	4.4%
Luxury: > R1.2m	8 806	61.8%	R29 600	--	7 316	20.7%
Total	14 244	100%			35 269	100%

* Assuming 7.75% interest rate, 20 year loan tenor, 30% premium to income ratio, 10% deposit and no FLSP.

** Assuming even spread of number of households at each income level, within an income bracket.

Source: Lightstone data as of 31 Dec 2021; ©GEOTERRAIMAGE – Neighbourhood Lifestyle Index™ (NLI™) Release 2021. Own calculations.

Word of caution regarding affordability calculations

There are a number of important cautionary notes which should be raised with respect to these calculations:

- While house purchases below R1.2 million avoid transfer fees, there are other transfer costs which are not included here. See box on page 43.
- Not all households purchase in the market segment they can afford: some may have additional funds from a once-off source, and some may have other competing expenses that prohibit them from spending the benchmark figure of 30% on housing.
- Some households may be living in properties that they accessed either by purchase or inheritance or gift, that today they could not afford to buy - in some cases properties appreciate faster than incomes.

The affordability gap – Town level

The graph below shows the gap between the housing stock in each market segment and the number of households with an income required to purchase a house with a bond in that market segment.

Stellenbosch town: Number of properties per market segment and number of households in associated income bracket (2021)

* Assuming 7.75% interest rate, 20 year loan tenor, 30% premium to income ratio, 10% deposit and no FJSP.

** Assuming even spread of number of households at each income level, within an income bracket.

Source: Lightstone data as of 31 Dec 2021; ©GEOTERRA IMAGE – Neighbourhood Lifestyle Index™ (NLI™) Release 2021. Own calculations.

It should be emphasized that this analysis must be considered with caution and due recognition of its limitations (see box on prior page). This is not a quantification of demand, but only a comparison of the available stock and the number of households with an income required to purchase that stock with a bond. It does not consider the rental market, and does not take into account the multitude of circumstances that also impact on a household's housing choices and ability to pay e.g. large once-off income such as pension payout or inheritance; equity from a previous property; housing preferences and needs with respect to size, location and other factors; and other sources of credit.

Where is the affordability gap? – Neighbourhood view

With subplace level income data, it's possible to undertake the same analysis we did at municipal level, comparing the number of properties per market segment to the number of households in the associated income band, at neighbourhood level. The graphs below display this comparison for three subplaces in Stellenbosch town, selected because they had a combination of average churn rates and sizable populations—Idas Vallei, Cloetesville and Welgevonden.

Idas Vallei and Cloetesville both have older GSP properties that make up 6% and 18% of the total, respectively. Idas Vallei's residential properties are fairly mixed in value, with the largest portion in the **conventional** market, due to recent new developments (see pg 36). There are a large number of households in the lowest income segment, yet no properties below R300 000. It's not likely the 'surplus' properties in the **conventional** and **high end** market are affordable for households with these incomes.

Similarly, Cloetesville has a disproportionate number of households in the lowest income segment, and clearly insufficient supply of **entry level** and **affordable** units in the area. Again, there appears to be an oversupply of **conventional** market units, relative to the income level of most households in the neighbourhood.

Welgevonden is an entirely different neighbourhood, with zero GSP and nearly all **luxury** properties. The majority of households are also in the top earning segment. It appears that private investment has resulted in an oversupply of homes over R1.2 million, or those units were likely developed with a target market in mind that comes from outside the area.

Churn, GSP and number of properties by market segment –selected subplaces (2021)

	Churn (2021)	GSP as share of total properties in subplace (2021)	Total no. of households in subplace (2021)	No. of GSP over 8 years as share of total GSP in subplace (2021)	Number of properties per market segment (2021)					Total residential properties (2021)
					Under R300 000	R300 000 to R600 000	R600 000 to R900 000	R900 000 to R1.2m	Over R1.2m	
Idas Vallei	2.66%	6%	1 765	100%	1	310	748	494	400	1 953
Cloetesville	1.86%	18%	2 923	96%	142	384	757	258	135	1 676

Is there sufficient developer activity and interest? – Non GSP new transactions by market segment

Given that inclusionary housing leverages planning permissions to compel the incorporation of affordable housing units into private developments, the presence of strong developer interest is a necessary prerequisite for the regulatory mechanism to be effective.

The top left graph compares the number of new registrations of GSP and new transactions of non-GSP properties over the last five years. In 2021, 203 housing units were built and sold by private developers or households in Stellenbosch town.

New registrations and transactions of GSP and non-GSP (2017-2021)
Stellenbosch

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

■ New GSP transactions
■ New non-GSP transactions

The graph below then unpacks the non-GSP new transactions for each year, by market segment. The graph thus reflects the types of products that private developers are putting into the market, providing evidence of the degree and nature of recent private developer activity and investment.

As shown in the map to the right, the apart from the Idas Valley development which already is largely affordable housing, private investment in building new luxury units in the Stellenbosch SP has been substantial.

New transactions non-GSP by market segment (2017-2021)

Source: Lightstone data as of 31 Dec 2021.

Distribution of new transactions by market segment: Non-subsidy properties
Stellenbosch, 2021

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end of December 2021 (sourced March 2022).

Is there sufficient developer activity and interest? – Evidence from land use management applications

The left-hand map shows the main LUPO applications (red) alongside the location of government housing projects (blue). It therefore gives a visualization of public investment alongside private sector intentions for development and investment.

The LUPO applications are centred in the Adam Tas corridor, in keeping with municipal plans for developing that area. Additional applications are for developments near Idas Valley and Cloeteville, and in the centre of town.

The map to the right displays areas proposed for changes to the current urban edge, which also provide an indicator of developer interest. Most are areas of expansion, near Khayamandi, and north and south of the Adam Tas corridor. There is also a proposed adjustment to the urban edge in Jamestown.

Stellenbosch town: Government housing projects and LUPO applications

Data sources: Stellenbosch Municipality, Municipal Demarcation Board (MDB), ESRI South Africa.

Data sources: Stellenbosch Municipality, Municipal Demarcation Board (MDB), ESRI South Africa.

Conclusion

Inclusionary housing is intended to promote better located affordable housing, create more inclusive neighbourhoods and contribute to spatial transformation. The geographic target of an inclusionary housing policy would thus be areas that harbour a potential for greater inclusion and diversity in property value bands, while also containing the space and potential for new developments (in terms of appropriate residential zoning and the existence of bulk infrastructure), in addition to being well-located with respect to transport, jobs and amenities.

The demand and supply side assessments of the residential property market in Stellenbosch town point to opportunities to leverage private developer investment towards the construction of additional affordable housing, both ownership and rental, especially in those areas experiencing increased market activity post-COVID and high churn rates. This includes the centre of town (Stellenbosch subplace) as well as Idas Valley and Jamestown.

The map to the far right displays areas of residential zoning which would allow for further development. The map to the far left, apart from showing the striking racial divisions that continue to define Stellenbosch town spatially, suggests that

Stellenbosch town: Racial distribution

Source: Stellenbosch Municipality Spatial Development Framework, Approved by Council on 11 November 2019, pg. 36.

there is considerable room in these largely-white areas to further densify, before moving to expand the urban edge.

Despite the evidenced demand in the entry and affordable markets, private developers are currently focused on building luxury properties—mostly freehold estate and sectional title. An inclusionary housing policy has the potential to leverage this developer interest towards increased investment in affordable housing, thus increasing supply and contributing to mixed neighbourhoods. The challenge is to ensure that demand in each sub market is met, while preserving new affordable housing for the intended target market.

Appendix A. Scope of Lightstone deeds data

As noted in the Introduction of the report, the area identified for the focus of this study is the Stellenbosch town area within the urban edge. However the borders of the Census subplaces are not perfectly aligned with the urban edge. The map to the right shows the urban edge of Stellenbosch town in purple, which is also the boundary for the study area. The boundaries of the Census subplaces are shown in green.

We purchase the Lightstone indicators at Census sub-place level. For the most part, the boundaries of the Census subplaces align with the urban edge and thus the study area. However in some cases there are portions which fall inside the urban edge / study area, but are part of the expansive Stellenbosch NU which surrounds the town area and also covers the rural areas of the municipality. We identified four of these areas, as shown in the small maps to the right, and considered whether we should request deeds data for this particular portion of the Stellenbosch NU for the purposes of this study:

- Area 1: A luxury golf estate and thus not a priority to include in the study.
- Area 2: A Technopark with mainly office buildings, and thus not a priority to include in the study.
- Area 3: An informal settlement, and thus would not reflect in the deeds data.
- Area 4: A formal residential development, fairly recent and therefore relevant for this study.

We therefore felt it worthwhile to include the data for area 4, as a particular subsection of Stellenbosch NU, and add this data to the 16 subplaces fully (or nearly fully) contained within the study area / urban edge (see list).

Appendix B. Proxy for identifying government-subsidised housing

The term "government-subsidised properties" refers to any properties created as a result of government subsidies, including provision of land, construction of top structures, and where possible, financing. The definition is limited to the data indicators available from the deeds registry, and/or those extrapolated from Lightstone's databases. The methodology uses the knowledge of the government programmes, namely RDP/BNG, discount benefit scheme and 99-year leases, to identify particular characteristics of a residential property to designate it as "government subsidised."

Properties are deemed to be government subsidised, and under which programme, if all of the following conditions hold true:

RDP/BNG:

1. The property's first transaction price is less than the government subsidy amount (R184 658 for 2017; R187 275 for 2018-2021), plus R50 000, depending on the year of transacting, and
2. The property's first seller to a private owner should be a government entity or a major developer/development company,^[2] and
3. The property should be a freehold non-farm property,^[3] and
4. The stand size of the property should be less than or equal to 500 m²,^[4] and
5. New private transactions are not bonded,^[5] and
6. The property's first registration should have taken place also after 1 January 1994,^[6] and

^[1] Subsidy amounts were often used as the default property value on the deeds registry at the time of registration. An amount of R50 000 was added to these amounts to take into consideration the incidences where registrations attempted to consider actual market values.

^[2] The Residential Development Programme (RDP) and Breaking New Ground (BNG) programmes provided funding to provinces, municipalities or developers to build housing directly on top of land made available for that purpose. Both were implemented after 1 January 1994. All RDP/BNG homes were transferred directly from the province or municipality or the developer to the owner directly.

^[3] All RDP/BNG properties were transferred to owners in freehold title.

^[4] The RDP/BNG programme implemented lot size limitations of up to 500 square metres.

^[5] As RDP and BNG properties were provided to owners for free, there should be no bond.

^[6] The programmes were implemented after 1994, with land initially designated in large plots to the developer, province or municipality, and delivered to the homeowners upon completion.

7. The property should not fall in luxury/super wealthy areas or within a gated estate, and ^[7]
8. Properties located in suburbs (Lightstone suburb spatial layer) with 10 or more flagged active RDP/BNG properties. ^[7]

Subsidy Other:

In order to be classified as the 'Subsidy Other' subsidy type, all the following conditions must hold true:^[8]

1. The property is not an RDP/BNG property as defined above, and
2. The title deed type should be freehold (non-farm), and
3. The transferor of the property to the first private owner is a government entity, and
4. The property's first private registration date occurs on or after 1 January 1989, and
5. The property is not located in a luxury or gated estate area.

Alternatively, the following conditions must be met which attempt to identify 99-year leasehold subsidy properties:

6. The property does not meet the RDP/BNG requirements, and
7. The property's first private transfer title deed begins with 'TL'.^[9]

Note that 99-year leasehold properties are also classified as "Subsidy Other" subsidy type. **Properties identified in this report as GSP are a combination of both RDP/BNG and Subsidy Other.**

^[2] Due to the programme guidelines, properties were only developed in large development tracts; this indicator is to prevent isolated properties which might meet other criteria from being inadvertently included (such as due to data entry errors).

^[3] The two other major government housing interventions precede the RDP and BNG programme, namely the Discount Benefit Scheme and the 99-year lease programme.

^[4] 99-year leaseholds were properties provided by the government, in order to adhere to national legislation preventing land ownership by race category. Leasehold ownership was created to provide collateral assurance to those lenders and investors providing acquisition loans. Note that bonded first-time private registrations are allowed for when classifying a property as a 99-year leasehold.

Appendix C. Comparison of municipal level income data from WC DEDT and GTI

For this project, income data was provided by the Western Cape Department of Economic Development and Tourism for 2021, at municipal level only. Income data obtained from GTI, also for 2021, was available at subplace level, allowing isolation of the study area.

Total number of households by municipality (2021) – GTI and WC DEDT data

	GTI total no. of households	DEDT total no. of households	Difference No. of households	%
George	65 010	64 480	-530	-0.8%
Mossel Bay	41 649	33 137	-8 516	-25.7%
Stellenbosch	58 593	50 567	-8 034	-15.9%

R99 084 - R162 667	1 635	3%	1 659	3%
R162 667 and more	1 352	2%	1 439	3%
Total	58 593	100%	50 559	100%

Source: ©GEOTERRA IMAGE – Neighbourhood Lifestyle Index™ (NLI™) Release 2021; W C Department of Economic Development and Tourism, 2021.

* The municipal total for WC DEDT differs slightly from the total of income brackets due to calculations to convert WC DEDT income brackets to those of GTI.

At municipal level, the number of total households for 2021 does not differ significantly between the two data sources: according to GTI, total households for Stellenbosch municipality was 58 593, while DEDT reported 16% less, 50 567 households.

The data does differ significantly in its distribution however. The graph below compares the income data from the two sources. Given that the two sources used different income brackets, the DEDT data was converted into the GTI income segments, which required an assumption that the number of households in an income bracket is evenly distributed across the income range.*

Monthly household income distribution at municipal level (2021) – GTI and WC DEDT data

Source: ©GEOTERRA IMAGE – Neighbourhood Lifestyle Index™ (NLI™) Release 2021; W C Department of Economic Development and Tourism, 2021.

Appendix D. Filtering in residential property markets

Filtering is when households move from one house to another to meet their needs affordably

- **New housing supply** and **functional resale markets** enable filtering
- When filtering works there is **sufficient supply of affordable housing** for ownership and rental, enabling **household mobility** and the **leverage of the housing asset**.
- When filtering doesn't work, **household mobility** is constrained, the **value of the housing asset declines**, and poor households cannot access the property market. This also depresses household affordability for entry-level housing, and widens the housing gap, as first time buyers come without equity.

MUNISIPALITEIT • UMASIPALA • MUNICIPALITY

PROPOSED STELLENBOSCH MUNICIPALITY INCLUSIONARY ZONING (HOUSING) POLICY 2023

Notice is hereby given in terms of Section 12(3)(b) of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) that the Stellenbosch Municipality resolved that the draft Stellenbosch Municipality Inclusionary Zoning (Housing) Policy 2023 be made available for the purpose of public comment.

The draft Stellenbosch Municipality Inclusionary Zoning (Housing) Policy 2023 is available on the Planning Portal of the Municipal Website and can be viewed and downloaded at:
<https://stellenbosch.gov.za/planning-policies/>

The proposed draft policy can also be viewed for inspection during normal office hours at the following venues:-

- Customer Care Office of Land Use Management, Ground Floor, NPK- Building, corner of Plein and Ryneveld Streets, Stellenbosch
- The Stellenbosch Public Libraries at Cloeteville; Franschhoek; Groendal; Jamestown, Kayamandi; Klipmuts; Idas Valley; Plein Street, and Pniel.

Written comments, objections and representations in connection with the draft Stellenbosch Municipality Inclusionary Zoning (Housing) Policy 2023, if any, must be submitted to the Office of the Municipal Manager, Third Floor, Main Building, 17 Plein Street, Stellenbosch by no later than **16:00 on 8 May 2023**.

Any person needing assistance to transcribe that person's comment or representation may, during normal office hours, approach the Customer Care Office of Land Use Management, Ground Floor, NPK- Building, corner of Plein and Ryneveld Streets, Stellenbosch, for assistance with the lodging of comments, objections and representations, if any, in respect of the draft policy.

APPENDIX 4

Belangegroep Stellenbosch Interest Group

HM/CB/0815/32
interestgroupstellenbosch@gmail.com
 2023-05-08

Municipal Manager
 Stellenbosch

Dear Ms Mettler

Draft Stellenbosch Municipality Inclusionary Zoning (Housing) Policy. 2023 Comment by the Stellenbosch Interest Group

The Stellenbosch Interest Group (SIG) welcomes the introduction of a policy on inclusionary housing (IH) for Stellenbosch, particularly given that two thirds of the housing stock in the area is classified as luxury market (valued over 1.2 million rand). This policy has been long overdue.

The primary objective of this policy is to increase the supply of high-quality affordable housing, also known as inclusionary housing, in priority development areas that are well-located, in order to create a mixture of income groups across new and infill developments in Stellenbosch Municipality. This will promote social and economic integration. Although this appears to be an honest attempt to address the spatial inequalities of the past, the broader implementation of the IH policy suggests that it may be nothing more than lip-service.

The policy proposes three different types of inclusionary zoning requirements: mandatory, spatially targeted, and voluntary implementation. It states that it "provides the scope for securing affordable housing through the regulatory system of development planning permissions to oblige property owners and developers to provide affordable housing, for sale or rent, within the new residential and mixed-use developments (also referred to as set-aside requirement) in well-located and priority development areas as defined by the municipal spatial development framework." As far as SIG understand, the IH policy will not mandate developers to choose one of the three options mentioned above, except perhaps in the case of spatially targeted areas, although it is not entirely clear where these areas are located.

It is essential to establish overlay zones with specific regulations to address point 6.21 of the policy. This point states that the affordable units are intended for permanent dwelling units and not for student housing, community residential buildings, communes, hostels, or less formal residential. The dwelling units must be used exclusively for permanent residency and not for any land uses associated with transient guests such as home lodging, bed and breakfast, hotels, tourist accommodation establishments, tourist dwelling units, etc. However, it is unclear how this requirement will be policed, managed, and

8 May 2023

To: Geraldine Mettler
Municipal Manager
Stellenbosch Municipality
By email: municipal.manager@stellenbosch.gov.za

Dear Ms Geraldine Mettler

**RE: NDIFUNA UKWAZI'S COMMENT ON THE DRAFT
STELLENBOSCH INCLUSIONARY ZONING
POLICY**

1. Ndifuna Ukwazi is a non-profit activist organisation and law centre that combines research, organising and litigation in campaigns to advance urban land justice in Cape Town. Our primary mission is to expand and protect access to affordable housing and build an integrated and inclusive city.
2. Since 2017 Ndifuna Ukwazi, along with other civil society organisations and activists, has leveraged the public participation processes that exist in the land use process to campaign for inclusionary housing as a form of urban governance of land markets in Cape Town. This strategy has aimed to achieve greater equity through compelling the City of Cape Town to adopt its own inclusionary housing policy. We have been campaigning for inclusionary housing as a targeted tool to respond to racial exclusion, to address various aspects of the housing problem and to regulate the private sector.
3. While our primary advocacy efforts are to push the City of Cape Town to adopt an inclusionary housing policy, we are encouraged to see that the Stellenbosch Municipality has taken the lead and surpassed Cape Town in trying to heal the divisions of apartheid spatial planning and integrate communities in its jurisdiction.
4. While we welcome this policy, we note concerns on the following two aspects which we address in more detail below:

Ndifuna Ukwazi is
a not-for-profit trust
(IT 540- 2001)
(NPO 094 - 737)

Board of trustees:
Shuaib Manjra (Chair)
Mercy Brown-Luthango
Michael Evans
Ruth Hall
Phumeza Mlungwana
Alan Roberts
Nomfundo Ramalekana

- 4.1. The policy should be amended to reflect a racially targeted approach which prioritises Black families¹ for the affordable units generated out of inclusionary housing policies.
- 4.2. The policy should lower the upper affordability threshold and take a stronger position on the need for income brackets to further break down this broad category. There should be a proportional spread of households across the income bands (based on the number of people falling into the various brackets in a specific context) to ensure that municipal policies provide truly affordable housing.
5. Well done on the progress achieved to date. Please do not hesitate to contact us for any assistance, discussion or engagement. As an NGO, we exist to serve the public interest and are open to helping the government in the performance of their constitutional duties.

Yours faithfully,

Ndifuna Ukwazi

(Per: Jonty Cogger, Attorney and Robyn Park-Ross, Researcher)

¹ Save as otherwise stated, 'Black people' refers to, and includes African people, people of Mixed Descent and classified as 'Coloured' under the apartheid system, and Indian people (as per the definitions in equity legislation such as the Employment Equity Act, 55 of 1998).

NDIFUNA UKWAZI'S SUBMISSION ON THE DRAFT STELLENBOSCH INCLUSIONARY ZONING POLICY

A. INTRODUCTION

1. At the outset, we welcome and support the adoption of the Stellenbosch Inclusionary Zoning Policy ("the draft policy").
2. In our view, there are four criteria to think about for any inclusionary housing policy to advance spatial justice. It must be racially and spatially targeted, be truly affordable based on income, and use the right mechanism to ensure it is retained in perpetuity.

Four Criteria

ADVANCING SPATIAL JUSTICE THROUGH INCLUSIONARY HOUSING IN THE PRIVATE SECTOR

There are four good criteria to think about when considering whether housing products in the private sector advance spatial justice. It must be racially and spatially targeted, be truly affordable based on income, and use the right mechanism to ensure it is retained in perpetuity.

Is it providing greater access to land and housing?

- * Inclusionary housing should advance the **right to housing** for residents. It should be targeted at residents **who need housing the most**. These are residents who are vulnerably housed, facing eviction and displacement or do not yet have decent homes.
- * Inclusionary housing should increase opportunities for Black and Coloured residents to access housing. It should provide **access to housing** for people who were forcefully removed, displaced, denied or dispossessed of land and housing. It should contribute to mixed race buildings and precincts.
- * Inclusionary housing must be appropriate for a **range of household sizes** and not just singles or couples. The size should not exclude the majority of households which are between 3 and 5 people, and welcome children, and women headed households.

Is it well-located?

- * Inclusionary housing should be **integrated into located areas**. It should be located in areas that growing in terms of **economic investment, wealth jobs**. These areas should already have good **transport links**, established **infrastructure** and quality **services** such as hospitals and schools. These areas tend to be the city centre and surrounds; along transport corridors and nodes; and in **former white only** suburbs. It contribute to mixed-use buildings and precincts liveable, dense and sustainable city.

Is it affordable?

- * Inclusionary housing should be rented or sold based on **average incomes** rather than prevailing market prices. Households should **not spend more than 1/3 of their income on rent or a mortgage**. Because a product is cheaper than the market does not make it affordable.
- * Inclusionary housing should be targeted at residents who do not earn enough to rent or own in well-located areas. In 2017, these are households who are earning between **R2,500 and R18,000 per month**. It should contribute to mixed class buildings and precincts.
- * Inclusionary housing must reach deeper to target a **range of low incomes** and not just the top bracket.
- * Inclusionary housing should be rented for less than **R6,000 per month**; or available for purchase in 2018 for less than **R550,000**.

Is it affordable in perpetuity?

- * Inclusionary housing should be **retained in perpetuity**. Whether it is rental stock; or for ownership, the inclusionary housing should not increase substantially higher than inflation or incomes year on year.
- * Transparent, fair and binding regulatory and instal arrangements must be put in place to ensure that inclusionary housing is **protected in perpetuity**. mechanisms must be cost effective and feasible.

3. However, despite the overall good draft policy, we have some concerns that centre around who will truly benefit from inclusionary housing in terms of race and income.

B. INCLUSIONARY HOUSING MUST PROVIDE GREATER ACCESS TO LAND AND HOUSING FOR THOSE WHO NEED IT THE MOST

4. Twenty-seven years after apartheid, racial and class exclusion remains a persistent barrier to access to equitable services. The legacy of spatial inequality in many towns

and cities in the Western Cape means that the majority of Black² residents live in densely populated under-resourced townships, informal settlements on the periphery of the city; while wealthy mostly White residents live in well-resourced, low density, well-located areas.

5. In this context, access to an affordable home in good locations - close to jobs, hospitals, good public schools and other social amenities - remains an unrealised pipedream for the majority of the working class. For instance, nurses, police officers, fire-fighters, and government employees - despite playing an essential public role - are forced to live far from work opportunities in areas more prone to gangsterism, poverty and crime.
6. The lasting effect of living in peripheral locations is to trap the poor in a cycle of poverty, by reducing access to educational opportunities, and making jobs harder to find and keep. Toilets are temporary, water is shared, schools have worse outcomes, gangs and violence are rife, public facilities such as hospitals and police stations are under-resourced and jobs are hard to find and keep. Poor and working class people spend a significant portion of their limited income on unsafe and unreliable public transport to work.
7. Given the layout of segregated towns and cities as a result of apartheid era planning and the Group Areas Act, disproportionate hours commuting, more congestion, pollution on the roads and an unsustainable dependent economy is a legacy of apartheid spatial planning that needs to be actively overhauled.
8. This inverse densification and urban sprawl costs poor and working-class families more everyday and costs the local municipalities more in the long term. It is unsustainable socially, economically and environmentally. Quite literally, where one lives determines the opportunities one can access, the quality of services one receives, and one's enjoyment of fundamental human rights.
9. The state's response to the need for affordable public housing has been to provide it on the urban periphery. Government-subsidised housing, which prioritises the *number* of units built over their *location*, has focused primarily on cheaper land. And cheaper land, generally, means poorly located land.
10. While it is understandable that the state would try to maximise the number of housing units it is able to provide, because the delivery of housing is not in well-located areas, it entrenches spatial inequality. It puts more and more poor, working-class Black people on the urban periphery, away from access to opportunities. And it deepens the segregated nature of the city.
11. The Constitution and the Spatial Planning and Land Use Management Act 16 of 2013 ("SPLUMA") clearly establish a firm mandate for local municipalities to address the legacy of spatial apartheid that is rooted in racial and economic exclusion. The preamble of the Constitution states this mandate in affirmative terms in the commitment to "Heal the divisions of the past and establish a society based on

² Save as otherwise stated, 'Black people' refers to, and includes African people, people of Mixed Descent and classified as 'Coloured' under the apartheid system, and Indian people (as per the definitions in equity legislation such as the Employment Equity Act, 55 of 1998).

democratic values, social justice and fundamental human rights.”³ This mandate stems from the acknowledgment that segregation and land deprivation were cemented and effected through land use management schemes and other spatial planning mechanisms and laws during the colonial and apartheid eras. The Constitution expressly recognises South Africa’s history of forced removals and landlessness in the property clause (section 25), and places obligations on the state to proactively redress past injustice in relation to land and housing.

12. This is clearly evident in several provisions of SPLUMA, but importantly in that it gives effect to two fundamental rights in the Bill of Rights, namely: section 25(5) of the Constitution which requires the state to take reasonable legislative and other measures, within its available resources, to foster conditions which enable citizens to gain access to land on an equitable basis; and section 26(1) of the Constitution which provides for the right to access adequate housing. In terms of section 26(2), the state must take reasonable legislative and other measures, within its available resources, to achieve the progressive realisation of this right.
13. SPLUMA requires that, “spatial planning mechanisms, including land use schemes, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons.”⁴ Importantly, land use schemes must “include provisions to promote the inclusion of affordable housing in residential land development.”⁵
14. Moreover, the Western Cape Land Use Planning Act 3 of 2014 (“LUPA”) requires that “past spatial and other development imbalances should be redressed through improved access to and utilisation of land”⁶ and that “spatial planning mechanisms, including zoning schemes, should incorporate provisions that enable redress in access to land by disadvantaged communities and persons.”⁷
15. The principle of spatial justice requires that unlimited residential development in well-located areas that do not have regard to the imbalances of past racial and class exclusion is detrimental to the vision of people-centred, inclusive and sustainable human settlements. The provision of affordable housing in well-located areas is therefore essential to the underlying SPLUMA’S (and LUPA’S) vision for spatially just cities.
16. Having established the constitutional and statutory duty to redress race-based segregation, we would submit that the intended purpose of town planning legislation in the post-apartheid era must be to break with past racially discriminatory planning practices by incorporating previously excluded informal settlements and bantustans into the planning system and redressing the inequality in access to land-based opportunities. These two goals (namely inclusion and redistribution) are key to understanding the role of inclusionary housing within the municipal zoning scheme.
17. This mandate should be also viewed in the context of how colonial and apartheid era state actors (including spatial planners) relentlessly wielded zoning systems as a tool

³ Preamble of the Constitution, 1996.

⁴ Section 7(a)(iii), Act 16 of 2013.

⁵ Section 24(2)(d), Act 16 of 2013.

⁶ Section 59(1) (a), Act 3 of 2014.

⁷ Section 59(1) (c), Act 3 of 2014.

for racial oppression and segregation, with the result our communities are still segregated from one another by race and class. In stark comparison, post-apartheid state actors have largely failed to meet this by implementing concrete plans to redress centuries of spatial inequities.

18. It is thus undeniable that SPLUMA and LUPA intends to adopt a transformative vision for spatial planning and land use management as a break from the past, and thus intends for local municipalities to dismantle systemic racism in the built environment.
19. A well-crafted inclusionary housing policy has the potential to both expand the supply of affordable housing while simultaneously promoting social, racial and economic inclusion. However, the success of inclusionary housing will hinge on the ability of the policy to get the details of how much housing, how affordable, for how long and for who.
20. In light of the concrete mandate to reverse spatial apartheid, we submit that in order to effectively advance the joint constitutional rights of adequate housing and equitable access to land, the policy should promote these broad principles:
 - 20.1. It must advance the right to housing for residents. It should be targeted at residents who need housing the most. These are residents who are cannot access or sustain housing through an unregulated property market, are vulnerably housed, facing eviction and displacement or do not yet have decent homes;
 - 20.2. It must respond to existing racial and spatial inequalities by increasing opportunities for families who have been excluded (priced-out) on the basis of race, and in the Western Cape, predominantly Black families. It should provide access to housing for people who were forcefully removed, displaced, denied or dispossessed of land and housing. It should contribute to racially diverse and mixed income buildings and precincts;
 - 20.3. It must be appropriate for a range of household sizes and not only singles or couples. The size should not exclude the majority of households which are between 3 and 5 people, and welcome children, and women headed households.

C. WHY RACIAL TARGETING IN INCLUSIONARY HOUSING IS CONSTITUTIONAL

21. In order to achieve racial redress, inclusionary housing units should be racially targeted, increasing opportunities for families excluded from well-located affordable homes on the basis of race. Inclusionary housing should be a tool to correct racial segregation in our towns and cities. The policy does recognise the need for inclusionary housing to provide for a diversity of people who will benefit, including saying that it should look at how their policies can benefit women, the youth and people living with disabilities. This is similar to the Western Cape Government Inclusionary Housing Framework Policy.⁸

⁸ Draft Western Cape Inclusionary Housing Policy Framework, p. 30.

22. Despite a clear recognition of the need to benefit vulnerable groups of people, the policy is silent on the need for inclusionary housing to be racially targeted to break down persistent apartheid segregation. This raises the legitimate question of whether the policy can effectively correct the wrongs of the past if it does not squarely address the most dominant societal feature - entrenched racial and spatial inequality.
23. Section 9(2) of the Constitution states that: 'Equality includes the full and equal enjoyment of all rights and freedoms. To promote the achievement of equality, legislative and other measures designed to protect or advance persons, or categories of persons, disadvantaged by unfair discrimination may be taken.'
24. This section recognises that the state and other institutions may take positive steps to advance groups previously disadvantaged by unfair discrimination. These steps are known as redress measures (or sometimes affirmative action). Therefore, people or groups of people who have been previously disadvantaged by unfair discrimination can be treated differently in order for equality to be achieved in the long term.
25. These measures are not 'in themselves a deviation from, or invasive of, the right to equality guaranteed by the Constitution. They are not "reverse discrimination" or "positive discrimination" ... They are integral to the reach of our equality protection.' They are used to ensure that previously disadvantaged people enjoy equal benefits and opportunities and that systemic disadvantage is eradicated.
26. For redress measures to be constitutional and lawful they must comply with s9(2). In assessing this, three questions will be asked:
 - 26.1. Do the measures target persons or a group of persons who have been disadvantaged by unfair discrimination?
 - 26.2. Are the measures designed to protect or advance these persons or group of persons?
 - 26.3. Do the measures promote the achievement of equality in the long term?*
27. If the answer to all three questions is yes, the redress measure is constitutional. Once a court has determined that a measure complies with s9(2), it cannot amount to unfair discrimination.

Do the measures target persons or a group of persons who have been disadvantaged by unfair discrimination?

28. The first question is whether or not racial targeting in inclusionary housing targets persons or a group of persons who have been disadvantaged by unfair discrimination? The answer to this is clearly yes. Racial targeting in inclusionary housing is designed to protect and advance a group of people (Black, Indian and Coloured people) who have previously been disadvantaged by unfair discrimination. Black, Indian and Coloured people were dispossessed and forcefully removed from their homes and land during Apartheid and colonialism, and made to live in densely-populated, under-resourced and

⁹ *Minister of Finance and Other v Van Heerden* 2004 (6) SA 121 (CC) at para 30.

¹⁰ *Ibid* at para 41.

poorly-serviced peripheral areas. The measures therefore clearly target groups of people who have been disadvantaged by unfair discrimination.

Are the measures designed to protect or advance these persons or group of persons?

29. The next question is whether or not racial targeting in inclusionary housing is designed to protect or advance these people or group of people? One does not have to show that the measures will definitely achieve the intended goal. Instead, the measures must be reasonably capable of addressing the effects of past unfair discrimination.¹¹ These measures are reasonably capable of addressing the effects of past unfair discrimination by increasing access to housing by Black, Indian and Coloured people. The measures are therefore designed to protect or advance these racial groups.

Do the measures promote the achievement of equality in the long term?

30. The final question is whether or not racial targeting in inclusionary housing promotes the achievement of equality in the long-term. Whether a measure promotes the achievement of equality in the long term requires a value judgment in light of all the circumstances. It requires a balancing between:
- 30.1. The interests of those people suffering from the effects of past or present unfair discrimination (Black, Indian and Coloured people); and
 - 30.2. The people who benefited or do benefit from this discrimination (White people).
31. A court will be slow to strike down a redress measure. However, a court may do so where a policy is so extreme and overly burdensome that it sends a signal to the excluded group that their equal dignity is not respected.¹²
32. We argue that racial targeting in inclusionary housing promotes the achievement of equality in the long term as:
33. Racial targeting in inclusionary housing should involve preferential treatment and 'ideal' numerical goals, but should not use rigid quotas, which inflexibly and outright exclude White people from accessing inclusionary housing. This will mean that although there will be some White people who fall within the inclusionary housing income bracket who will be impacted by racial targeting, they will not be absolutely barred from accessing inclusionary housing. This ensures that the measures are not unduly burdensome or exclusionary.
34. It will promote the achievement of equality in the long term as it will mean that Black, Coloured and Indian people will have greater access to housing. It will disrupt the current patterns of disadvantage, curb spatial segregation and mean that housing in Cape Town is more demographically representative of all races.

¹¹ Ibid.

¹² Pierre de Vos 'The past is Unpredictable: Race, Redress and Remembrance in the South African Constitution' (2012) 129 *SALJ* 1 at 93.

35. We therefore conclude that racial targeting in inclusionary housing complies with all three requirements and so is constitutionally valid and lawful.

C. INCLUSIONARY HOUSING MUST BE AFFORDABLE

36. In this section, we argue that inclusionary housing must be *truly affordable based on incomes rather than prevailing market prices*, and in this context, would mean prioritizing households earning between R3,500 and R18,000 per month.¹³
37. The policy will aim to benefit employed people in the gap market as households that earn between R3,500 and R22,000 monthly.¹⁴ It further states that “Based on the aforementioned standard definitions of affordability and the evidence gathered through the housing market study, affordability in the Stellenbosch Municipality context refers to the following market segmentations – affordable (R300 00 – R600 000), conventional (R600 000 – R900 000), and high-end (R900 000 R1.2 million).” Later in the policy the target income group is defined as households with monthly income of R3,500 to R27,200 monthly. This creates a lack of clarity whether the upper income bracket is R22,000 or R27,200. While R22,000 is already high, targeting households earning up to R27,200 will dilute the impact of the policy by not targeting those who need housing the most.
38. We are concerned about who will truly be able to afford the units created from the policy. We assert that;
- 38.1. Just because a product (housing unit) is cheaper than the market, does not make it affordable,
 - 38.2. Inclusionary housing should be targeted at residents who do not earn enough to rent or own in well-located areas,
 - 38.3. Inclusionary housing should contribute to mixed class buildings and precincts, and
 - 38.4. Inclusionary housing must reach deeper to target a range of low incomes and not just the top bracket.
39. The policy definition of affordability and proposed target group may result in inclusionary housing that does not place sufficient emphasis on addressing the most pressing housing need which is located in lower income earning categories.
40. It is therefore concerning that the policy provides such a high upper threshold for affordability and fails to use measures to provide a spread of units across the wide income bracket. In this omission the policy’s definition of affordability and proposed target group runs the risk of developers providing only units at the top end of the affordability bracket (for example, households earning R18,000 to R22,000). For this reason, we urge the Stellenbosch Municipality to lower the upper affordability threshold and to take a stronger position on the need for income brackets to further break down this broad category. There should be a proportional spread of households across the income

¹³ Based on the CoCT MSDF definition of affordable housing

¹⁴ The Policy, p. 16-17.

bands (based on the number of people falling into the various brackets across the municipality) to ensure that municipal policies provide truly affordable housing.¹⁵

41. In addition, the policy mentions the use of Area Mean Income (AMI) to establish housing costs of inclusionary housing. We strongly warn against the use of this as a measure to determine affordability. As proven in the parts of the world that implement this measure (such as many jurisdictions in America), the major issue with this approach is that it is based on the existing average income of an area. In South African towns and cities where race and income segregation are so stark, this is not an appropriate measure to disrupt these areas. The well-located areas correctly targeted in this policy will inevitably have a very high average income due to the exact spatial inequality that this policy is trying to address. Using the average income in this area, rather than the average incomes of the municipality as a whole, will only serve to maintain to some degree the higher income levels of those areas, rather than creating economic integration based on a picture of the entire municipality.

D. CONCLUSION

42. In conclusion, while Ndifuna Ukwazi welcomes the policy as a whole, our recommendations are it should:
 - 42.1. be amended to reflect a racially targeted approach which prioritises Black families for the affordable units generated out of inclusionary housing policies.
 - 42.2. be amended to lower the upper affordability threshold and take a stronger position on the need for income brackets to further break down this broad category. Deep down reach must be prioritised to maximise the impact of the policy. There should be a proportional spread of households across the income bands (based on the number of people falling into the various brackets in the municipality) to ensure that municipal policies provide truly affordable housing.

Ends.

¹⁵ Precedent from social housing can be used as a guideline for recommended income brackets and the proportion of units that should be provided across these bands.

APPENDIX 6

Stellenbosch edges ahead with inclusionary zoning while Cape Town lags behind

26 Apr 2023

by [PropertyWheel_G](#)

5 min read

By Dr. Jonty Cogger, Attorney at Ndifuna Ukwazi

The Stellenbosch Municipality has published a draft [Inclusionary Zoning Policy](#) for public comment (due on the 8th of May 2023). It is a welcome and monumental feat towards redressing the scars of apartheid spatial planning, but where is the Cape Town policy which was promised in November 2019?

When the policy is finalised, Stellenbosch will be the second municipality in South Africa (after Johannesburg in 2019) to adopt inclusionary housing as a land use planning tool. It's also the first Western Cape municipality to publish a draft policy after the Western Cape Government adopted a [Framework Policy](#) as guidance to local municipalities late last year. Other municipalities expected to follow suit are George and Paarl.

What inclusionary zoning does is incentivise the inclusion of affordable homes in private developments for working class people typically in the 'Gap market' – i.e., earning too much for a full government subsidy (R3 500 per month) but not enough to compete on the open property market (R27 000 per month).

Inclusionary zoning obliges private developers to contribute towards spatial restructuring by including affordable housing in new residential developments in exchange for additional development rights. It's a win/win for developers and the public in that it increases affordable homes and integrates communities but also compensates a developer by granting incentives like additional development rights, fast tracking, development charges holidays, and reduced parking requirements. Until now, developers have benefited from a host of public infrastructural amenities in well-located areas (higher zoning, access to good schools, healthcare etc) without any reciprocal obligation to contribute towards the public good.

It cannot be over-emphasised how important inclusionary zoning is for spatial restructuring and redressing racial segregation. During the post-apartheid-era, government-subsidised housing has primarily been built in peripheral locations whereas the private sector has catered for the luxury market in previously "whites-only" areas. The stark spatial division in Cape Town and Stellenbosch (as with many other towns and cities) is evident in how exclusionary residential markets are located in well-off areas, inaccessible and unaffordable to the majority of residents.

Figure 2. Stylised Structure of Western Cape Towns

No. of Residential Properties by Segment: Stellebosch, 2021

No. of Residential Properties by Segment: Stellebosch

Data source: CAHF's Citymark, using deeds registry data supplied by Lightstone Pty. as at the end June 2021 (sourced September 2021).

There are broadly two options for inclusionary housing contributions in the Stellenbosch policy. The first is a mandatory requirement applicable to 'well-located priority development areas' (such as Adam Tas Corridor, Stellenbosch Town, Klampmuts and Franschoek) where an overlay zone will be in place. A **mandatory** 20% affordable units in any development with more than 20 proposed residential market-rate units will be required in the priority development areas. A **mandatory** 30% of affordable housing will be required for residential development in an overlay zone to be implemented in the Adam Tas Corridor. Developers may **voluntarily** contribute affordable housing for developments with 20 residential units or less if they wish to benefit from incentives offered in the inclusionary zoning policy.

Typically, developers can contribute towards inclusionary housing in three ways: 1. by building units in the development (on-site), 2. building units in another development in a well-located area (off-site); or 3. paying a monetary fee (fees-in-lieu). The Stellenbosch policy has made on-site the primary option in the mandatory contributions (i.e., Adam Tas Corridor, Stellenbosch Town, Klapmuts and Franschhoek). Off-site will apply to voluntary contributions or developments that are not well-located to ensure that it still contributes towards providing affordable homes in better locations of Stellenbosch (areas identified as such in the Spatial Development Framework). Fees-in-lieu will also be an option in a voluntary contribution or if negotiated by the Stellenbosch municipality as part of a mandatory contribution (determined on a case-by-case basis).

The affordable housing can be rented or sold by the developer and are protected from being released on the open market for a period of 30 years. In terms of the policy, the affordable homes cannot be used for student accommodation or for transient guests (home lodging, bed and breakfast, hotel, tourist accommodation establishment, tourist dwelling unit, etc.)

The policy also includes a measure of flexibility that allows private developers to negotiate the size and form of inclusionary housing contribution based on feasibility or practical restrictions. This is particularly important since it debunks the notion often given by the Cape Town Mayor, Geordin Hill-Lewis that inclusionary housing will somehow scare away developers. This is clearly not an insurmountable problem for Stellenbosch who is willing to intervene in exclusionary markets that are unsustainable, inefficient and a burden to the public fiscus.

It begs the question of not only why it has taken so long for Cape Town to adopt a policy but also why it is content on allowing spatial inequality to endure. Stellenbosch has produced an excellent policy. It shouldn't take 4 years to develop a policy whereas Stellenbosch only took less than 3 year. It is hoped that the publishing of the Stellenbosch policy will jolt Cape Town into urgent action to catch up with its sister municipality.

11.8.5	APPOINTMENT OF NEW TERM OF OFFICE AND MEMBERS OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL (SMPT)
--------	---

Collaborator No: 747869
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 19 April 2023 & 26 April 2023 & 24 May 2023

1. SUBJECT: APPOINTMENT OF NEW TERM OF OFFICE AND MEMBERS OF THE STELLENBOSCH MUNICIPAL PLANNING TRIBUNAL (SMPT)

2. PURPOSE

To present for consideration the approval of a new term of office of the Stellenbosch Municipal Planning Tribunal (SMPT) with the associated appointment of new municipal planning tribunal members and associated matters.

3. DELEGATED AUTHORITY

The appointment of municipal planning tribunal members and associated matters, Council by virtue of Delegation LUP57.

4. EXECUTIVE SUMMARY

A Municipality is compelled to establish a Municipal Planning Tribunal (MPT) to decide on a category of land use and land development applications. The current term of office, as extended by Council, will end on 31 May 2023.

A recruitment process was duly authorised by Council and undertaken by the Administration to identify persons that are suitably qualified and experienced in land use planning or the law related thereto.

It is proposed to appoint the SMPT for a term of office of 5 years, with a total of 5 external and 5 internal MPT members.

Suitable external MPT members were identified for appointment, and it is proposed to retain the current internal MPT members, with the addition of the Director: Planning and Economic Development. The proposed external MPT members constitute a healthy mix of existing as well as new members in order to secure long term continuity of experience amongst the membership.

5. RECOMMENDATIONS

(a) that the following members **BE APPOINTED** in terms of Section 73(1)(a) of the Stellenbosch Municipal Planning By-law (2015) for a period of 5 Years commencing 1 June 2023 and, on the terms, and conditions as contained in the relevant provisions of the said By-law, namely:

(i) External Members in terms of Section 71(1)(a) of the Stellenbosch Municipal Planning By-law (2015):

- (a) Mr. S. Boshoff
- (b) Mrs. H. Crooijmans-Lemmer
- (c) Mrs. C. Havenga
- (d) Mr. D. Leo
- (e) Mr. P. van Zyl

- (ii) Internal Members in terms of Section 71(1)(b) of the Stellenbosch Municipal Planning By-law (2015):
- (a) Mr. C. Alexander (Snr. Manager Development Planning)
 - (b) Mr. A. Barnes (Director Planning and Economic Development)
 - (c) Mrs. M. Francis (Snr. Manager Infrastructure Planning, Development and Implementation)
 - (d) Mr. M. Williams (Snr. Manager Legal Services)
 - (e) Mr. A. van der Merwe (Snr. Manager Community Services)
- (b) that the appointment of Mrs. H. Crooijmans-Lemmer as the Chairperson of the Stellenbosch Municipal Planning Tribunal **BE APPROVED**;
- (c) that the appointment of Mr. P. van Zyl as the Deputy Chairperson of the Stellenbosch Municipal Planning Tribunal **BE APPROVED**.
- (d) that the remuneration and allowances and reimbursement for expenses for the services of the members of the Stellenbosch Municipal Planning Tribunal **be approved** as follows, as contemplated in terms of Section 73(6) of the Stellenbosch Municipal Planning By-law (2015):
1. For remuneration an hourly fee for meetings, to a maximum of 5 hours per meeting and which will include the time needed for the preparation for the tribunal meeting, in accordance with the annual Guideline Professional Fees of the South African Council of Planners, as follows:
 - a) Chairperson – 100% of Category A Staff (Currently at a rate of R 2879.00/ h)
 - b) Deputy Chairperson – 100% of Category B Staff (Currently at a rate of R 2460.00/h)
 - c) External Members – 100% Category B Staff (Currently at a rate of R 2460.00/h);
 2. For allowances

None
 3. For Reimbursements

Travel allowance payable at annual standard AA tariffs and calculated by using the shortest route from the place of normal residence to the meeting venue.
- (e) that a request to the Head of Department of the Western Cape Department of Environmental Affairs and Development Planning to nominate a suitable Professional Planner in the employ of the Department to serve as a Technical Advisor to the Stellenbosch Municipal Planning Tribunal, **BE AUTHORISED**; and
- (f) that, upon the successful fulfilment of the appointment of the members of the Stellenbosch Municipal Planning Tribunal in terms of Council's decision, the Council's satisfaction that the Stellenbosch Municipal Planning Tribunal is in a position to commence its operations **BE CONFIRMED** in terms of Section 72(11)(b) of the Stellenbosch Municipal Planning By-law (2015) for the purpose of the required notice to be published in the Provincial Gazette in terms of Section 72(11)(c) of said By-law.

6. DISCUSSION / CONTENTS

6.1 Background

An overview of the need and associated process to institute a new term of office for the Stellenbosch MPT was provided in the previous report to Council as per Item 11.8.1 dated 27 July 2022.

The following matters of relevance are reiterated for ease of reference:

The Spatial Planning and Land Use Management Act (2015), hereafter referred to as “SPLUMA”, stipulates in Section 35(1) that “*A municipality must, in order to determine land use and development applications within its municipal area, establish a Municipal Planning Tribunal.*”

Stellenbosch Municipality decided to establish a Municipal Planning Tribunal for its municipal area in terms of Section 70(1)(a) of the Stellenbosch Municipal Planning By-law (2015), hereafter referred to as “*the By-law*”.

In terms of Section 36 (1) “*A Municipal Planning Tribunal (MPT) must consist of both officials in the full-time service of the municipality*” (internal members), as well as “*persons appointed by the Municipal Council who are not officials and who have knowledge and experience of spatial planning, land use management and land development or the law related thereto*” (external members).

The MPT must consist of at least five members or more as the Municipal Council deems necessary (Section 36(3) of SPLUMA), and the term of office of a MPT is five years or such shorter period as the Council may determine, provided that a member may not serve as a member for a continuous period of ten years. (Section 37(1) of SPLUMA). The By-law stipulates in Section 73(1)(b) that a member of a Tribunal may be appointed for further terms, subject to Section 37(1) of SPLUMA as stated above.

The term of office of the current MPT will lapse on 31 May 2023 and a recruitment process was undertaken to appoint a new SMPT. The Terms of Reference of the current SMPT was also reviewed to ensure the ongoing effective and efficient operation of the MPT.

6.2 Discussion

To allow for a process to recruit and appoint new members for a new term of office of the MPT, the term of office of the current MPT members was extended up to the end of February 2023.

An advertisement for the recruitment process of new MPT members commenced on 15 September 2022. As the response to the advertisement for the recruitment process was not satisfactory, the Municipal Manager sanctioned a re-advertisement in terms of Section 72(4) of the By-law. This re-advertisement was launched on 9 December 2022, and due to the December holiday period, the closing date for applications had to be extended up to 16 January 2023.

As the interviews and selection process still needed to be concluded, a second extension of the term of office was approved by Council to ensure the uninterrupted operation of the MPT. The term of office will lapse on 31 May 2023.

The recruitment process included the technical evaluation of applications received, and a shortlist was compiled of applicants that complied with the minimum requirements and presented to the Municipal Manager for approval. It was also directed by the Municipal Manager that the current appointed internal MPT members

be retained for the next term of office of the SMPT, with the addition of the Director Planning and Economic Development.

During the current term of office, the Western Cape Department of Environmental Affairs and Development Planning, nominated a suitable planning official to serve as the Technical Advisor to the Stellenbosch Municipal Planning Tribunal. In light of cost containment and the good service received during the previous term, it is proposed to again approach the Department to nominate a suitable planning official to serve as the Technical Advisor for the upcoming term of office of the SMPT.

The Municipal Manager then approved the shortlisting and appointed the following interview panel to conduct the interviews:

- Director Planning and Economic Development
- Senior Manager Development Management
- Manager Land Use Management

The interviews were conducted on 23 March 2023 and 28 March 2023. The interview process took on the format of an open discussion that was based on standardised questions of relevance to a member of an MPT.

The suitable candidates were identified through this interview process and are being recommended for appointment. The list of all applicants, their qualifications and experience, the technical evaluation with outcome and recommendation of the interview is provided in the table, attached as **ANNEXURE "A"**.

In terms of Section 71(10) of the By-law, Council must also designate from amongst the appointed members of the SMPT a Chairperson and Deputy Chairperson. In light of their previous membership serving on the SMPT, and their experience and suitability for such roles, it is proposed to appoint Mrs. H. Crooijmans-Lemmer as the Chairperson and Mrs. C. Havenga as the Deputy-Chairperson.

This report is submitted now to Council to consider the appointment of the members of the SMPT. In doing so, Council must take due regard to the following matters in Section 72(8) of the By-law:

71(8) *"The Council must appoint the members of the Tribunal after having regard to—*

(a) the recommendations of the evaluation panel;

(b) the knowledge and experience of candidates in respect of land use planning or the law related thereto;

(c) the requirement that the members of the Tribunal must be representative of a broad range of appropriate experience and expertise;

(d) the powers and duties of the Tribunal; and 20 October 2015 Province of the Western Cape: Provincial Gazette Extraordinary 7512 59 Stellenbosch Municipality Land Use Planning By-law August 2015

(e) the policy of the Municipality in respect of the promotion of persons previously disadvantaged by unfair discrimination."

6.5 Financial Implications

Other than the cost associated with the required publishing of the appointment of the new MPT members, there will be no additional financial implications should the recommendations as set out in the report be accepted. The remuneration of the MPT members is regulated and budgeted for.

6.6 Legal Implications

The recommendations in this report will ensure that the Stellenbosch Municipality comply with the legal requirement to appoint an MPT.

6.5 Staff Implications

This report has no staff implications to the Municipality.

6.6 Previous / Relevant Council Resolutions:

- 6.6.1 Council Resolution Item 7.7.2 dated 29 May 2019: Appointment of the term of office and members of the current MPT.
- 6.6.2 Council Resolution Item 11.7.1 dated 28 January 2022: Removing all internal MPT members not on the level of Senior Manager and the appointment of new internal MPT members on Senior Management level.
- 6.6.3 Council Resolution Item 11.8.1 dated 27 July 2022: To extend the term of office of the serving MPT members to 28 February 2023 to allow for a process to recruit and appoint new members for a new term of office of the MPT.
- 6.6.4 Council Resolution Item 11.8.3 dated 22 February 2023: To permit the further extension of the term of office of the serving MPT members to 31 May 2023 in order to undertake a second round of advertisement for the recruitment of MPT members and to conclude the process.

6.7 Risk Implications

This report has no risk implications for the Municipality and serves to ensure that the Stellenbosch Municipality comply with the legal requirement to appoint an MPT.

11.9.1	REQUEST TO UNDERTAKE THE PUBLIC PARTICIPATION PROCESS (“PPP”) IN RESPECT OF THE DRAFT STELLENBOSCH MUNICIPALITY EVENTS PERMITTING BY-LAW, 2023
--------	---

Collaborator No: 749791
 IDP KPA Ref No: Good Governance
 Meeting Date: 17 May 2023

1. SUBJECT: REQUEST TO UNDERTAKE THE PUBLIC PARTICIPATION PROCESS (“PPP”) IN RESPECT OF THE DRAFT STELLENBOSCH MUNICIPALITY EVENTS PERMITTING BY-LAW, 2023

2. PURPOSE

To provide Council with the pertinent facts in order to approve that the draft Stellenbosch Municipality Events Permitting By-law be advertised for a period of thirty (30) days to obtain public comment in respect of the subject draft by-law.

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The draft policy document aims to replace the Stellenbosch Municipality events By-law and is aimed at updating the current by-law, which has been adopted during 2016.

A number of concerns were raised by Local tourism organisations and stakeholders within the tourism fraternity regarding the outdated by-law, as well as the tedious land use application processes, and an update of the by-law was requested.

5. RECOMMENDATIONS

- (a) that council take note of the draft Stellenbosch municipality events permitting by-law, 2023, attached as **APPENDIX 1** to this report, and
- (b) that council approve that the draft Stellenbosch municipality events permitting by-law, 2023, be advertised for public comment for a period of thirty (30) days, whereafter same be resubmitted to council for final consideration and subsequent approval in terms of the local government municipal systems act no. 32 of 2000.

6. DISCUSSION / CONTENTS

6.1 BACKGROUND

Stellenbosch municipality is known for hosting and being a municipal area for major local, national and international events. The events by-law will assist and guide the municipality in regulating and managing event related activities in an efficient and effective manner thereby providing clarity to all role players and stakeholders. Stellenbosch municipality would like to ensure that it becomes a town for great events for visitors to the town and the events industry, by creating stability in the town's events calendar and clearly defining processes and systems that support events. The municipality plays an important role in: the regulations of events, partnerships with events organized in the wc024, events organization, facilitation and the provision of services at events. Currently events are regulated by the events act of 2010 and the municipal events by-law, 2016.

6.2 DISCUSSION

Events are established occurrences within the cape winelands and contributes significantly to the appeal of the cape winelands as a tourist destination and the resulting contribution that these events make to the local economy.

As noted above, the by-law was promulgated during 2016, and have not been reviewed, and therefore a request has been received from the events fraternity to review and update the current by-law.

The department as used the model by-law for events permitting compiled by western cape government's department of economic development & tourism ("dedat") and wesgro, as a basis for the development of this draft by-law, which is required to be advertised for public comment.

6.3 FINANCIAL IMPLICATIONS

None, the by-law has been drafted using the resources within the municipality.

6.4 LEGAL IMPLICATIONS

The recommendations in this report comply with council's policies and all applicable legislation.

6.5 STAFF IMPLICATIONS

This report has no additional staff implications to the municipality.

6.6 PREVIOUS / RELEVANT COUNCIL RESOLUTIONS:

None

6.7 RISK IMPLICATIONS

the risks are addressed through the content of the report.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2023-05-17: ITEM 7.9.1

- (a) that Council take note of the draft Stellenbosch Municipality Events Permitting By-law, 2023, attached as **APPENDIX 1** to this report, and
- (b) that Council approve that the draft Stellenbosch Municipality Events Permitting By-law, 2023, be advertised for public comment for a period of thirty (30) days, whereafter same be resubmitted to Council for final consideration and subsequent approval in terms of the Local Government Municipal Systems Act No. 32 of 2000.

APPENDIX 1

**DRAFT STELLENBOSCH
MUNICIPALITY EVENTS
PERMITTING BYLAW**

PREAMBLE

WHEREAS Stellenbosch Municipality recognises the important role that events plays in the economy of the Western Cape;

AND WHEREAS the Municipality wishes to increase, in a sustainable manner, growth, job creation, investments and social inclusivity by establishing the Municipality as an events – ready and events – friendly location;

AND WHEREAS it is desirable for the Municipality to facilitate effective and efficient event permitting processes and events in the Municipality whilst ensuring regulatory compliance to safeguard public health and safety, the environment and the surrounding community;

BE IT THEREFORE ENACTED by the Council of Stellenbosch Municipality in terms of Section 11 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000), as follows: -

CHAPTER 1 DEFINITIONS, OBJECTIVES AND APPLICATION

1. Definitions

- (1) Words derived from, or which are the singular or plural of the word or terms defined, have corresponding meanings, unless the context indicates otherwise.
- (2) Any terms or provision of this Bylaw must be reasonably interpreted in a manner that is consistent with the purpose and objectives of this By-law.
- (3) In this Bylaw, unless the context indicates otherwise—

“authorised municipal official” means the Municipal Event Officer, a member of the Municipal Event Committee, a municipal law enforcement officer, and any other person who is delegated as contemplated in section 41 to execute a power, function or duty related to the provisions of this Bylaw;

“business day” means any day other than a Saturday, Sunday or official public holiday in the Republic of South Africa;

“Council” means the Municipal Council of the Municipality;

“day” means a period of 24 hours;

“District Municipality” means the Cape Winelands District Municipality;

“existing permit holder” means a person who has been issued with an event permit prior to the commencement of this By-law as contemplated in section 43;

“Fees and Tariffs Policy” means the Stellenbosch Municipality Fees and Tariff Policy, 2023, promulgated by the Municipality in terms of section 75 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000);

“event organiser” means the person contemplated in in section 10;

“event” means sporting, entertainment, recreational, educational, religious, cultural, exhibitional or similar activity, that is accessible to the general public and is hosted either at a specific place (i.e. on a single property) or along a specified route, and which is of a temporary nature, and which can occur on a specific day or on consecutive days for a limited period, and excludes functions such as weddings.

“event party” includes any person who is involved in events and/or event-related activities;

“event-related activity” means any activity undertaken by an event organiser and their event party that is part of, or related to, the preparation, implementation, and winding up of events, including, but not limited to, the activities contemplated in section 23.

“Gazette” means the official Provincial *Gazette* of the Western Cape;

“in writing” means by email or written letter: Provided that a copy of a written letter must also be emailed to the person concerned;

“linear event” means an event along a route taken from a starting point to a destination during which the event takes the form of either a recreational activity or a procession, and which may traverse a single property or a number of properties, and includes marathon, trail running, cycling and mountain biking (including E-bikes) events, but excludes the use of motorized vehicles;

“Municipal Event Committee” means the committee contemplated in section 7;

“Municipal Event Officer” means the person contemplated in section 5;

“Municipal Finance Management Act” means the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003);

“Municipal Manager” means the person appointed as municipal manager in terms of section 82 of the Local Government: Municipal Structures Act, 1998 (Act 107 of 1998);

“Municipality” means the Stellenbosch Municipality, established by Provincial Notice 488 of 2000 issued in terms of section 12 of the Local Government: Municipal Structures Act, 1998 (Act 107 of 1998), and, where the context requires, includes—

- (a) the Council;
- (b) the Municipal Manager;
- (c) an authorised municipal official; and
- (d) a duly authorised representative of the Municipality;

“permit” means an event permit granted in terms of this By-law; **“person”** means a natural person or a juristic person;

“place-bound event” means an event that takes place at an existing venue, or on a specific property;

“private property” means a property owned by a private natural or juristic person;

“Province” means the Province of the Western Cape;

“public property” means a property owned or managed by the Municipality, Western Cape Government or national government, and includes a **“public space”**;

“remotely piloted aircraft system” means an unmanned aircraft which is piloted from a remote pilot station, and includes—
(a) the associated remote pilot station;

- (b) the required C2 Link; and
- (c) any other component as specified in a type design, but excludes a—
 - (i) model aircraft; and
 - (ii) toy aircraft.

“temporary structure” means a non-permanent structure constructed purely on a temporary basis for a specific period, which shall require building plan approval (if applicable) and which shall be demolished on completion of the event for which it was erected.

2. Objectives of the Bylaw

The objectives of this By-law are to—

- (a) provide for the necessary municipal structures and systems to facilitate permit applications for events in the area of jurisdiction of the Municipality;
- (b) regulate permit applications, consideration, approval, rejection, refusal, implementation and related processes;
- (c) establish the Municipality as an events-ready and events-friendly location;
- (d) increase, in a sustainable manner, growth, job creation, investments and social inclusivity through effective and efficient permitting; and
- (e) provide for matters connected thereto.

3. Application of Bylaw

This By-law—

- (a) applies to all instances of events as defined in section 1 in the area of jurisdiction of the Municipality, except to the extent that such events are exempted as contemplated in section 42;
- (b) does not derogate from the provisions of any other By-law or national or provincial legislation;
- (c) binds all persons, entities, organisations, bodies and groups to the extent applicable; and
- (d) binds organs of state.

CHAPTER 2 STRUCTURES AND FUNCTIONS

4. Functions of the Municipality

- (1) The Municipality is the controlling body for the approval and regulation of events within its area of jurisdiction.
- (2) The functions of the Municipality relating to events are to—
 - (a) establish the necessary structures and systems to fulfil its mandate;
 - (b) consider permit applications and issue permits for events;
 - (c) regulate events;
 - (d) facilitate events by coordinating the responsibilities of all role players;
 - (e) ensure access to municipal services during events;

- (f) ensure health, safety, environmental and regulatory compliance before, during and after events;
- (g) attract investment into the event industry through marketing and communications initiatives and interventions;
- (h) bid for events opportunities and host events;
- (i) support the event industry through targeted financial and non-financial means; and
- (j) perform functions connected therewith.

5. Appointment of Municipal Events Officer

- (1) The Municipal Manager must, within 30 business days of the commencement of this By-law—
 - (a) appoint a person; or
 - (b) designate a municipal employee, as the Municipal Event Officer.
- (2) The person contemplated in subsection (1) must have the necessary skills and experience to perform their functions effectively and efficiently.
- (3) The Municipal Manager must delegate overall responsibility for events in the area of jurisdiction of the Municipality to the Municipal Event Officer.
- (4) The Municipal Manager may—
 - (a) provide the Municipal Event Officer with dedicated project-specific support in the event of complex events; and
 - (b) appoint or assign administrative and operational staff members to support the Municipal Event Officer in the performance of their functions.
- (5)
 - (a) The contact details of the Municipal Event Officer must be made available to event organisers and on the Municipality's website.
 - (b) The contact details must include the physical office address, email address, telephone number and an emergency after hours telephone number.

6. Functions of Municipal Event Officer

- (1) The functions of the Municipal Event Officer are to—
 - (a) facilitate, coordinate and support events in the Municipality;
 - (b) act as the central point of contact in the Municipality for event organisers;
 - (c) act as liaison and intermediary between event organisers and municipal directorates;
 - (d) facilitate communication and coordination between event organisers, municipal directorates and other events sector stakeholders;
 - (e) act as chairperson and coordinate the activities of the Municipal Event Committee;
 - (f) coordinate the submission, review, consideration, and approval, rejection or refusal of permit applications;

- (g) consider and decide on permit applications as contemplated in section 13(3)(i);
 - (h) act as central point of contact, liaison, intermediary and repository for event organisers for any additional municipal permissions, approvals and processes that are required by municipal directorates;
 - (i) assist event organisers with regard to additional third-party permissions, approvals and processes that may be required;
 - (j) coordinate the Municipality's operational requirements with regard to events;
 - (k) coordinate and facilitate the execution of events in line with permits issued in terms of this By-law;
 - (l) ensure compliance with the provisions of a permit and any conditions attached to a permit, any additional municipal and third-party permissions, approvals and processes, the Code of Conduct, the implementation arrangements, this By-law, any other applicable By-law, and relevant national and provincial legislation;
 - (m) coordinate responses to non-compliance by event organisers;
 - (n) coordinate reporting, monitoring and evaluation of events;
 - (o) pursue standardisation of permitting, planning and monitoring procedures within the Municipality, the District Municipality, the Province and the broader event industry;
 - (p) coordinate, develop and manage the Event Permitting Policy and this By-law; and
 - (q) perform such other functions as may be provided for in this By-law.
- (2) (a) The Municipal Event Officer must establish and maintain—
- (i) an event permit application register;
 - (ii) an event calendar;
 - (iii) an event location portfolio;
 - (iv) a directory of local suppliers, goods and services; (v) an event restrictions schedule;
 - (vi) a non-compliance register as contemplated in section 32; and
 - (vi) a Code of Conduct for event organisers as contemplated in section 22.
- (b) The Municipality may publish in the Event Permitting Policy specific requirements in respect of the items listed in paragraph (a).

7. Appointment of Municipal Event Committee

- (1) The Municipal Manager must, in consultation with the Municipal Event Officer and within 40 business days of the commencement of this By-law—
- (a) establish a Municipal Event Committee chaired by the Municipal Event Officer; and
 - (b) designate municipal employees to be members of such committee.

- (2) The persons contemplated in subsection (1)(b)—
 - (a) must include a representative of the following municipal directorates:
 - (i) community services;
 - (ii) community safety;
 - (iii) planning, building control and economic development; and
 - (iv) infrastructure services; and
 - (b) may include representatives from such other municipal directorates as may be deemed necessary.

8. Functions of Municipal Event Committee

- (1) The functions of the Municipal Event Committee are to—
 - (a) consider and decide on permit applications as contemplated in section 13(3)(ii);
 - (b) determine legislative requirements for events;
 - (c) determine operational requirements for events;
 - (d) support the Municipal Event Officer in the coordination, operational aspects, management and monitoring of events;
 - (e) assist the Municipal Event Officer and event organisers with regard to additional municipal and third-party permissions, approvals and processes that may be required; (f) assist the Municipal Event Officer in ensuring compliance with the provisions of a permit and any conditions attached to a permit, any additional municipal and third-party permissions, approvals and processes, the Code of Conduct, the implementation arrangements, this By-law, any other applicable By-law, and relevant national and provincial legislation;
 - (g) report, monitor and evaluate events in line with this By-law; and
 - (h) perform such other functions as may be provided for in this By-law.
- (2)
 - (a) The Municipal Event Committee must meet as and when necessary to discuss—
 - (i) forthcoming events as indicated in the Event Calendar; and
 - (ii) other matters of importance.
 - (b) The Municipal Event Officer must provide administrative support to, and keep proper minutes of, meetings of the Municipal Event Committee.
 - (c) The Municipal Event Officer may invite representatives of other municipal directorates, national, provincial and municipal organs of state and other events sector stakeholders to attend meetings of the Municipal Event Committee in an advisory capacity as and when needed.

9. Permission for events

- (1) A person may only organise an event in the area of jurisdiction of the Municipality with a valid permit issued by the Municipality as contemplated in section 16, unless such event is—
 - (a) specifically excluded from the definition of events in section 1; or
 - (b) exempted from permit requirements as contemplated in section 37.
- (2) Notwithstanding the provisions of subsection (1), the Municipality may require a person to apply for a permit where the potential impact or risk attached to such events is, in the opinion of the Municipal Event Officer, of such a nature to necessitate a permit.

10. Designation of event organiser

- (1) A person, entity, organisation, body or group who intends to apply for a permit must identify and designate a key individual as the event organiser.
- (2) An event organiser must—
 - (a) be 18 years of age or older; and
 - (b) possess the necessary capacity, resourcing skills and experience to organise the proposed events.
- (3) An event organiser is the designated person that—
 - (a) applies for a permit;
 - (b) is in charge of, plans, manages and supervises events;
 - (c) is responsible for events; and
 - (d) is accountable to the Municipal Event Officer and the Municipality for events.

11. Categories, classification criteria and internal processing times of permit applications

- (1) The-
 - (a) permit application categories;
 - (b) classification criteria for the permit application categories; and
 - (c) internal processing time for each permit application category, are provided for in Schedule 2.
- (2) The Municipality may, by notice in the Gazette, amend the categories, classification criteria and internal processing times contemplated in subsection (1).

12. Application for permits

- (1) (a) An event organiser who intends to organise an event within the area of jurisdiction of Stellenbosch Municipality as contemplated in section 9 must apply for a permit from the Municipal Event Officer.

- (b) A permit application must be submitted timeously, taking into account the permit application categories and related internal processing times contemplated in Schedule 2.
- (2) The permit application must include, but not be limited to, the submission of-
 - (a) a completed permit application form with the following information:
 - (i) full name, identity number, address, contact number and email address of the event organiser;
 - (ii) full name, identity number, address, contact number and email address of the individual shooting the event if different from the event organiser or, in the case of an entity, organisation, body or group, the registered name, registration number and full name, identity number, address, contact number and email address of each member, director or trustee; and
 - (iii) such other information as the Municipal Event Officer may prescribe; and
 - (b) the following prescribed documents:
 - (i) an event plan providing a detailed description of the proposed events;
 - (ii) a completed checklist providing further information on the proposed events;
 - (iii) a signed resolution authorising the individual to act as event organiser;
 - (iv) a signed Code of Conduct as contemplated in section 22;
 - (v) a signed indemnity form indemnifying the Municipality as contemplated in section 42;
 - (vi) proof of payment of the prescribed fess as contemplated in section 24, if applicable; and
 - (vii) such additional documents as the Municipal Event Officer may prescribe.
- (3) The event organiser must submit the completed permit application form and prescribed documents to the Municipal Event Officer online, by email or physically.
- (4) The Municipal Event Officer must provide the event organiser with the-
 - (a) permit application form contemplated in subsection (2)(a); and
 - (b) prescribed documents as contemplated in subsection 2(b)(i) to (v), that must be completed and signed by such event organiser.

13. Review of permit applications

- (1) On receipt of the permit application, the Municipal Event Officer must-
 - (a) review the completed permit application form and prescribed documents; and

- (b) confirm the permit application category
- (2) (a) If the Municipal Event Organiser determines that-
- (i) the proposed date or location for the event is not available;
 - (ii) the event organiser has not complied with the permit application requirements; or
 - (iii) additional information is required,
- that must, within 5 business days from receiving the permit, issue a written notice to such event organiser.
- (b) The event organiser must, within 5 business days from receipt of the notice-
- (i) indicate an alternative date or location for the event;
 - (ii) comply with all permit application requirements; or
 - (iii) provide the required additional information to the Municipal Event Officer,
- as the case may be.
- (c) If the event organiser fails to comply with the request in the notice, the Municipal Event Officer may reject the permit application as contemplated in section 17.
- (3) If the Municipal Event Officer is satisfied that-
- (a) the event organiser has complied with the permit application requirements; and
 - (b) no additional information is required;
- they must—
- (i) in the case of a micro event or small event category, consider the permit application;
- or
- (ii) in the case of a medium, large, major or special event category, refer the permit application to the Municipal Event Committee for consideration together with their recommendation that the permit application be approved or refused.

14. Considering of permit applications

- (1) The Municipal Event Officer or Municipal Event Committee, as the case may be, must consider each permit application on its own merit in an objective, rational and reasonable manner, having regard to the internal processing times contemplated in Schedule 2.
- (2) The following factors must be considered:
 - (a) the Municipality's strategic objectives, policies, by-laws, guidelines and procedures;
 - (b) the District Municipality's policies, by-laws, guidelines and procedures;

- (c) national and provincial policies, legislation, regulations and guidelines;
 - (d) the recommendation of the Municipal Event Officer, if applicable;
 - (e) the permit application category of the proposed events;
 - (f) the scale and nature of the impact on public health and safety, the environment and the surrounding community;
 - (g) security, traffic, noise, lighting and other nuisance considerations;
 - (h) the availability of sufficient municipal and emergency services;
 - (i) the potential contribution to economic development;
 - (j) recording of the event organiser or their event party in the non-compliance register as contemplated in section 32;
 - (k) any additional municipal permissions, approvals and processes that may be required;
 - (l) any additional third-party permissions, approvals and processes that may be required;
 - (m) whether any concerns that the Municipal Event Officer or Municipal Event Committee may have, can be satisfactorily addressed; and
 - (n) any other relevant factors.
- (3) The Municipal Event Officer may request the event organiser to—
- (a) clarify or amend submitted information; and
 - (b) submit such additional information as may be necessary to consider the permit application.
- (4)(a) In the case of a permit application for a medium, large, major or special event, the Municipal Event Officer must obtain comments from all members of the Municipal Event Committee.
- (b) Each member of the Municipal Event Committee must ensure that the requirements of their municipal directorate are factored in before a decision is made.

15. Decision on permit applications

After considering a permit application as contemplated in section 14, the—

- (a) Municipal Event Officer, in the case of a micro or small event; or
- (b) Municipal Event Committee, in the case of a medium, large, major or special event, must decide to approve or refuse the permit application.

16. Approval of permit applications

- (1) If the Municipal Event Officer or the Municipal Event Committee, as the case may be, decides to approve a permit application, the Municipal Event Officer must determine if any-
 - (a) conditions must be attached to the permit to minimise any potential adverse implications for public health and safety, the environment and the surrounding community;

- (b) additional municipal permissions, approvals or processes are required by the municipal directorates or in terms of the Municipality's bylaws; and
 - (c) additional third-party permissions, approvals and processes may, in the opinion of the Municipal Event Officer, be required by other organs of state or public or private entities or in terms of national or provincial legislation: Provided that the event organiser is responsible for identifying, applying for and obtaining all required third party permissions, approvals and processes.
- (2) (a) The Municipal Event Officer must then-
- (i) issue the permit;
 - (ii) attach the necessary conditions to the permit;
 - (iii) inform the event organiser of any additional municipal permissions, approvals or processes that are required; and
 - (iv) advise the event organiser on any additional third-party permissions, approvals and processes that may be required.
- (b) An electronic version of the-
- (i) permit;
 - (ii) conditions; and
 - (iii) letter detailing the additional municipal and third-party permissions, approvals or processes that are or may be required, must be forwarded to the event organiser.
- (3) The approval of a permit application and issuance of a permit is subject to the event organiser having obtained or finalised the required additional municipal and third-party permissions, approvals and processes as contemplated in sections 18, 19 and 20.
- (4) An event organiser must, on request by an authorised municipal official, present the permit electronically or by means of a printout.

17. Rejection or refusal of permit applications

- (1) The Municipal Event Officer or Municipal Event Committee, as the case may be, may reject or refuse a permit application based on objective, rational and reasonable grounds.
- (2) If the Municipal Event Officer or Municipal Event Committee, as the case may be, decides to reject or refuse a permit application, the Municipal Event Officer must, in writing, inform the event organiser and provide reasons for such decision.
- (3) An event organiser may appeal a rejection or refusal as contemplated in section 40.

CHAPTER 4

ADDITIONAL MUNICIPAL AND THIRD-PARTY PERMISSIONS, APPROVALS AND PROCESSES

18. Commencement of events prohibited

An event organiser may not commence an event before the required additional municipal and third-party permissions, approvals and processes as contemplated in sections 19 and 20 have been obtained or finalised, as the case may be.

19. Additional municipal permissions, approvals and processes

- (1) The Municipal Event Officer must act as the central point of contact, liaison, intermediary and repository for an event organiser for any additional municipal permissions, approvals and processes that are required.
- (2) Additional municipal permissions, approvals and processes that may be required may, depending on the nature of the events, relate to, amongst others, the-
 - (a) need to obtain indemnity or risk insurance;
 - (b) submission of a contingency plan;
 - (c) need to notify the public of the event;
 - (d) land use planning and zoning arrangements;
 - (e) erection or construction of temporary structures; (f) construction of buildings or permanent structures;
 - (g) utilisation of municipal services;
 - (h) impact on municipal electricity supply infrastructure and systems;
 - (i) utilisation of municipal properties, venues or facilities;
 - (j) utilisation of municipal parks, reserves and coastal areas;
 - (k) utilisation of municipal dams and other water infrastructure;
 - (l) utilisation of or impact on municipal roads and provincial and national roads in the Municipality;
 - (m) generation of excessive noise;
 - (n) impact of lighting;
 - (o) utilisation of fireworks, special effects, smoke machines, stunts and other potentially dangerous acts;
 - (p) utilisation of explosives, flammable liquids or materials, incendiary devices and fire caused by explosions;
 - (q) utilisation of firearms and ammunition;
 - (r) utilisation of fixed wing aircraft and helicopters;
 - (s) utilisation of remotely piloted aircraft systems ("RPAS");
 - (t) utilisation of motorised watercraft;
 - (u) involvement of children;
 - (v) involvement of animals;
 - (w) utilisation of outdoor advertising and other municipal advertising channels; and

- (x) utilisation of heritage sites, protected areas, places in a heritage register and heritage areas under the ownership or control of the Municipality
- (3) The Municipality may publish in the Event Permitting Policy specific requirements in respect of the additional third-party permissions, approvals and processes contemplated in this section.

CHAPTER 5 CONTROL OF EVENTS

21. General prohibitions

No person may organise an event in the jurisdiction of the Municipality other than-

- (a) an event organiser to whom a permit was issued as contemplated in section 16 and their event party;
- (b) in the venues and on the locations specified in a permit;
- (c) on the dates and during the hours specified in a permit;
- (d) in accordance with the provisions of a permit and any conditions attached to a permit;
- (e) in accordance with any additional municipal and third-party permissions, approvals and processes as contemplated in sections 18, 19 and 20;
- (f) in compliance with the Code of Conduct contemplated in section 22;
- (g) in compliance with the implementation arrangements contemplated in section 23;
- (h) this By-law;
- (i) any other applicable By-law; and
- (j) relevant national and provincial legislation.

22. Code of Conduct

- (1) The Municipality must, within 60 business days of the commencement of this Bylaw, develop a Code of Conduct to ensure that event organisers and event parties conduct themselves in a manner that-
 - (a) promotes friendly relations and cooperation with the Municipality, business owners and the public;
 - (b) does not cause harm to public health and safety, the environment and the surrounding community; and
 - (c) promotes the integrity of the events sector in the Municipality.
- (2) An event organiser must-
 - (a) adhere to the Code of Conduct; and
 - (b) inform the event party of the contents of the Code of Conduct and ensure compliance therewith.

23. Implementation arrangements

- (1) The Municipality must, within 60 business days of the commencement of this By-law, publish in the Event Permitting Policy implementation arrangements to regulate events and event-related activities before, during and after events.

- (2) Implementation arrangements may, depending on the nature of the events, relate to, amongst others-
 - (a) marketing of events;
 - (b) the impact of weather and other factors on scheduled events and the provisions of a permit;
 - (c) the erection and removal of signboards;
 - (d) the impact on public roads and supervision by traffic officers;
 - (e) the utilisation of storm water systems;
 - (f) the impact on municipal electricity supply infrastructure and systems;
 - (g) the impact on Eskom electricity supply infrastructure and systems;
 - (h) the utilisation of generators, lighting and cabling;
 - (i) the utilisation or involvement of explosives, flammable liquids or materials, incendiary devices, fire, fireworks, special effects, smoke machines, stunts and other potentially dangerous acts;
 - (j) the utilisation of firearms and ammunition;
 - (k) the utilisation of fixed wing aircraft and helicopters;
 - (l) the utilisation of remotely piloted aircraft systems (RPAS);
 - (m) the utilisation of motorised watercraft;
 - (n) the availability of first aid kits and medical rescue equipment;
 - (o) the availability of emergency care practitioners and lifeguards;
 - (p) the dismantling, clearing and cleaning of event locations or venues;
 - (q) the handling, storage and disposal of hazardous and medical waste;
 - (r) minimising disruptions to residents and businesses;
 - (s) compensation for residents and businesses for inconvenience or disruptions;
 - (t) the procurement of local goods and services; and
 - (u) community involvement in events and event-related activities

- (3) An event organiser must-
 - (a) adhere to the implementation arrangements; and
 - (b) inform their event party of the implementation arrangements and ensure compliance therewith.

CHAPTER 6 FEES, TARIFFS AND DEPOSITS

24. Fees, tariffs and deposits

- (1) (a) The Municipality may impose—
 - (i) permit application fees; and
 - (ii) permit amendment application fees.
 (b) If the Municipality decides to impose application fees, it may provide for the exemption of payment of application fees in certain circumstances.
- (2) The Municipality must levy the approved municipal fee or tariff for—
 - (a) the provision of a municipal service to an event organiser; and
 - (b) the utilisation of a municipal property, venue or facility by an event organiser.
- (3)(a) The Municipality may require an event organiser to pay a deposit—
 - (i) to cover the provision of a municipal service;
 - (ii) for the utilisation of a municipal property, venue or facility;
 - (iii) to cover any contingencies; and
 - (iv) to recover any damages that may arise from events or the utilisation of a municipal property, venue or facility.
 (b) An event organiser must, if applicable, pay—
 - (i) such deposit on receipt of the permit; and
 - (ii) any shortfall that may arise after conclusion of events.
 (c) The Municipality must refund the remainder of a deposit, if applicable, to the event organiser after conclusion of events.
- (4) The fees and tariffs contemplated in this section—
 - (a) are subject to change; and
 - (b) must be published in the Fees and Tariffs By-law, as amended from time to time.

CHAPTER 7 COMPLAINTS AND ENFORCEMENT

25. Obligation to comply

An event organiser and their event party must comply with-

- (a) the provisions of a permit and any conditions attached to a permit;
- (b) any additional municipal and third-party permissions, approvals and processes as contemplated in sections 18, 19 and 20;
- (c) the Code of Conduct contemplated in section 22;
- (d) the implementation arrangements contemplated in section 23;
- (e) any lawful request by an authorised municipal official;
- (f) his Bylaw;

- (g) any other applicable By-law; and
- (h) relevant national and provincial legislation.

26. Right of entry, inspection and monitoring

- (1) An authorised municipal official may, at any reasonable time and without prior notice, enter any public or private place—
 - (a) where events or event-related activities are being conducted; and
 - (b) where they have reasonable grounds to suspect that events or event-related activities are being conducted, to carry out such inspection and monitoring as they may deem necessary to determine compliance with this By-law as contemplated in section 25.
- (2) No person may—
 - (a) interfere with, hinder, obstruct or prevent; or
 - (b) attempt to interfere with, hinder, obstruct or prevent, an authorised municipal official from entering, inspecting and monitoring as contemplated in subsection (1).

27. Management of non-compliance

- (1) In the case of non-compliance of a non-serious nature, the Municipal Event Officer must—
 - (a) attempt to manage and resolve such non-compliance in an informal manner; and
 - (b) if such non-compliance cannot be resolved informally, issue a compliance notice as contemplated in section 28.
- (2) (a) In the case of non-compliance of a serious nature, the Municipal Event Officer must—
 - (i) issue a compliance notice as contemplated in section 28; or
 - (ii) where it is necessary, reasonable and justifiable to do so to protect public health and safety, the environment or the surrounding community, suspend or revoke the permit with immediate effect.
- (b) If a permit has been suspended or revoked as contemplated in paragraph (a)(ii), the provisions of section 29(2) or 30(2), as the case may be, apply.

28. Compliance notices

- (1) The Municipal Event Officer may serve a compliance notice on an event organiser instructing him or her to comply with section 25.
- (2) A compliance notice must be writing and specify-
 - (a) reasons for the compliance notice being issued;
 - (b) the provisions of a permit or conditions attached to a permit, any additional municipal and third-party permissions, approvals and processes, the Code of Conduct, the implementation

arrangements, this By-law, any other applicable By-law, and relevant national and provincial legislation not being complied with;

- (c) remedial actions to be taken;
- (d) time and date on which the remedial actions must have been implemented;
- (e) consequences of continued non-compliance; and
- (f) the right of the event organiser to respond to the compliance notice.

29. Suspension of permits pending compliance

- (1) The Municipal Event Officer may suspend a permit pending compliance with the remedial actions specified in a compliance notice contemplated in section 28: Provided that the event organiser is given reasonable notice of such suspension and an opportunity to be respond.
- (2) An event organiser whose permit has been suspended must immediately cease all event-related activities.

30. Revocation of permits and shutting down of events due to continued non-compliance

- (1) (a) If an event organiser fails to comply with the remedial actions by the time and date specified in a compliance notice, the Municipal Event Officer—
 - (i) must inform the event organiser in writing that they are guilty of an offence as contemplated in section 39; and
 - (ii) may revoke the permit: Provided that the event organiser must be given reasonable notice and an opportunity to respond.
- (b) The Municipality may undertake the necessary remedial actions itself and hold the event organiser liable for any resultant costs associated with such actions.
- (2) (a) An event organiser whose permit has been revoked must immediately shut down such event and cease all event-related activities.
- (b) If the event organiser fails to shut down the event and cease all event-related activities, the Municipality may take the necessary action to shut down the event and hold the event organiser liable for any resultant costs associated with such action(s).

31. Suspension or revocation of permits due to emergencies

- (1) The Municipal Manager or Municipal Event Officer may suspend or revoke a permit in the event of an emergency.
- (2) If a permit has been suspended or revoked as contemplated in subsection (1), the provisions of section 29(2) or 30(2), as the case may be, apply.

32. Recording of particulars in non-compliance register

- (1) Whenever an—
 - (a) event organiser has been issued with a compliance notice as contemplated in section 28;
 - (b) event organiser has their permit suspended or revoked due to a non-compliance or continued non-compliance as contemplated in section 27(2)(a)(ii), 29 or 30, as the case may be; or
 - (c) event organiser or an event party has been convicted of an offence as contemplated in section 39, the Municipal Event Officer must record the details of such person and the particulars of the non-compliance or offence, as the case may be, in the non-compliance register.
- (2)(a) The Municipal Event Officer must, in writing, inform the event organiser or event party concerned of such recording.
- (b) The event organiser or event party concerned may—
 - (i) appeal the recording in accordance with section 40; and
 - (ii) after a period of three years and on good cause shown, request the Municipal Event Committee in writing to consider their removal from the non-compliance register.
- (3) If an—
 - (a) event organiser; or
 - (b) event organiser whose event party includes a person, whose details have been recorded in the non-compliance register by reason of the issuance of a compliance notice, applies for a permit, the Municipal Event Officer or Municipal Event Committee, as the case may be, must consider the nature of the non-compliance as contemplated in section 14 before deciding to approve or refuse a permit application.
- (4) Notwithstanding the provisions of subsection (3), an
 - (a) event organiser; or
 - (b) event organiser whose event party includes a person, whose details have been recorded in the non-compliance register by reason of—
 - (i) the revocation of a permit due to non-compliance or continued non-compliance as contemplated in section 27(2)(a)(ii) or 30, as the case may be; or
 - (ii) having been convicted of an offence as contemplated in section 39, is disqualified from being issued with a permit.

CHAPTER 8
GENERAL PROVISIONS

33. Financial and non-financial support for events

- (1)(a) The Municipality may, on application and on a case-by-case basis, decide to provide support to events.
- (b) Support may include support of a financial or non-financial nature, or a combination of financial and non-financial support.
- (2) The Municipality must, before providing support as contemplated in subsection (1),
 - (a) identify priority or strategic areas for support;
 - (b) ensure that such support is in line with the Municipal Finance Management Act and municipal financial policies; and
 - (c) publish in the Event Permitting Policy guidelines to effectively manage such support.

34. Bidding and hosting by the Municipality

- (1) The Municipality may—
 - (a) on its own accord; and
 - (b) with other organs of state and private entities, bid to host events in the area of jurisdiction of the Municipality.
- (2) The hosting of any events and the procurement of any goods and services in support of such events by the Municipality—
 - (a) must be conducted in line with the Municipal Finance Management Act and Municipal Supply Chain Management Policy; and
 - (b) are subject to budget availability and budgetary approval.
- (3) The Municipality may develop guidelines to manage municipal events bidding and hosting.

35. Permit amendments

- (1) A permit issued in terms of this Bylaw is not transferrable.
- (2) in the event that an event organiser wishes to amend-
 - (a) the venues
 - (b) the dates or hours of events,
 as specified in the permit or in the conditions attached to a permit, they must submit-
 - (i) a completed permit amendment application form; and
 - (ii) proof of payment of the prescribed fees as contemplated in section 24, if applicable, to the Municipal Event Officer online, by email or physically.
- (3) If the Municipal Event Officer is of the opinion that such amendment-
 - (a) will not have a material impact on the factors contemplated in section 14(2), they must reissue the permit with the amended details; or
 - (b) will have a material impact on the factors contemplated in section 14(2) or cannot be effected due to practical or operational reasons, they must decline the permit amendment application.

- (4) The Municipal Event must provide the event organiser with the permit amendment application form contemplated in subsection (2)(i) that must be completed and signed by the event organiser.
- (5)(a) A permit amendment as contemplated in section does not derogate the event organiser from—
 - (i) the provisions, terms or conditions of any additional municipal and third-party permissions, approvals and processes that have already been applied for, obtained or finalised; and
 - (ii) any additional municipal and third-party permissions, approvals and processes that must still be applied for, obtained or finalised, as contemplated in sections 18, 19 and 20.
- (b) The event organiser is responsible for ensuring that any amendments to a permit are, where applicable, effected in such additional municipal and third-party permissions, approvals and processes.

36. Exemptions

- (1) Notwithstanding the provisions of this By-law, the Municipality may, on reasonable grounds, decide to exempt certain permit application categories from the permit requirements contemplated in section 9.
- (2) The Municipality must, before granting an exemption as contemplated in subsection (1)—
 - (a) take reasonable measures to ensure that any person whose rights may be adversely affected by the granting of such exemption is notified of the envisaged exemption;
 - (b) provide any such person with a reasonable opportunity to object to the envisaged exemption; and
 - (c) duly consider any objections received.
- (3) The Municipality may impose any such conditions to an exemption as it may deem necessary.

37. Prescribed forms

The Municipality must publish such prescribed or standard forms and other documents—

- (a) as specified in this By-law; and
- (b) as may be needed to further contribute to effective, efficient and streamlined permitting processes.

38. Offences and penalties

- (1) A person who—

- (a) commences an event without a valid permit;
 - (b) contravenes a provision of a permit or a condition attached to a permit;
 - (c) fails to obtain, finalise or adhere to, as the case may be, any additional municipal and third-party permissions, approvals and processes as contemplated in sections 18, 19 and 20;
 - (d) fails to comply with the Code of Conduct contemplated in section 22;
 - (e) fails to comply with the implementation arrangements contemplated in section 23;
 - (f) fails to comply with a lawful request by an authorised municipal official;
 - (g) deliberately furnishes false or misleading information to an authorised municipal official;
 - (h) threatens, resists, interferes with, hinders or obstructs an authorised municipal official in the performance of their duties as contemplated in this Bylaw;
 - (i) fails to comply with the terms of a compliance notice as contemplated in section 28;
 - (j) fails to immediately cease all event-related activities when a permit has been suspended as contemplated in sections 27(2)(a)(ii) and 29;
 - (k) fails to immediately cease all event-related activities and shut down such event-related activities when a permit has been revoked as contemplated in sections 27(2)(a)(ii) and 30;
 - (l) fails to pay any shortfall that may arise after conclusion of the events as contemplated in section 24(3)(b)(ii);
 - (m) contravenes a provision of this Bylaw;
 - (n) contravenes a provision of any other applicable Bylaw; or
 - (o) contravenes a provision of relevant national or provincial legislation, is guilty of an offence and may, on conviction, be liable to the payment of a fine or imprisonment, or both a fine and imprisonment.
- (2) An offence provided for in another applicable By-law or in national or provincial legislation must be dealt with by the relevant authority as contemplated in the legislation concerned.

39. Appeals

Any person whose rights are affected by a decision taken in terms of this By-law, may appeal such a decision as contemplated in section 62 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000).

40. Delegations

- (1) The Municipal Manager—
 - (a) must delegate overall responsibility for events in the area of jurisdiction of the Municipality to the Municipal Event Officer as contemplated in section 5; and
 - (b) may delegate such other powers, functions and duties to the Municipal Event Officer, another authorised municipal official or municipal staff member as may be necessary to ensure the effective and efficient implementation of this By-law and the Event Permitting Policy.
- (2) Any delegation contemplated in subsection (1)—
 - (a) may be made subject to such conditions as the Municipal Manager may determine; and
 - (b) must be in writing.
- (3)(a) The Municipal Manager may, at any time, withdraw a delegation contemplated in subsection (1).
- (b) A withdrawal of a delegation must be in writing.

41. Exemption liability

The Municipality is not liable for any damage, loss or compensation-

- (a) resulting from any lawful actions performed in good faith in terms of this Bylaw by the Municipality, an authorised municipal official or any municipal staff member; and
- (b) arising from any events conducted by an event organiser, an event party or any other person in the area of jurisdiction of the Municipality.

42. Transitional Arrangements

- (1) Notwithstanding the provisions of this Bylaw, an existing permit remains valid—
 - (a) until such permit expires;
 - (b) until such permit is revoked; or
 - (c) for 60 business days of the commencement of this Bylaw, whichever occurs first, whereafter the existing permit holder must apply for a new permit as contemplated in section 12.
- (2) An existing permit holder must comply with—
 - (a) the provisions of such permit and any conditions attached to such permit;
 - (b) any additional municipal and third-party permissions, approvals and processes that have been obtained or finalised, as the case may be;
 - (c) the Code of Conduct contemplated in section 22;
 - (d) the implementation arrangements contemplated in section 23;

- (e) any other applicable By-law; and
- (f) relevant national and provincial legislation.

43. Monitoring, evaluation and review

- (1) The Municipal Event Committee must—
 - (a) monitor and evaluate the implementation of this Bylaw and the Event Permitting Policy on an ongoing basis; and
 - (b) review this Bylaw and the Event Permitting Policy at least every three years.
- (2) The Municipality may develop a monitoring, evaluation and review framework for the Bylaw and the Event Permitting Policy.

44. Impact on existing bylaws, processes and procedures

The Municipality must align existing bylaws, policies, processes and procedures to ensure—

- (a) the realisation of the objectives; and
- (b) the full and effective implementation, of this Bylaw.

45. Amendment and repeat of bylaws

The bylaws mentioned in Schedule 1 are hereby amended or repealed to the extent indicated in the third column of the Schedule.

46. Short Title

This Bylaw is called the Stellenbosch Municipality Event Permitting Bylaw, 2023.

SCHEDULE 1
AMENDMENT AND REPEAL OF LAW
(Section 45)

No. and Year of Bylaw or Repeal	Short Title	Extent of Amendment

SCHEDULE 2 EVENTS APPLICATION REQUIREMENTS GUIDELINE

The following information and documentation are required from ALL organisers of events wishing to host events in the Stellenbosch Municipality.

The timeous provision of the complete information will support and assist with the processing of the application, the approval processes by the range of Municipality Departments and compliance with legislative requirements.

SIZE	CATEGORY ATTENDEE / PARTICIPATION SIZE	MINIMUM TIME BEFORE AN EVENT TO SUBMIT A COMPLETE APPLICATION TO THE MUNICIPALITY
Small	200 – 2000	A minimum 15 working days (3 weeks)
Medium	2001 – 5000	A minimum of 20 working days (4 weeks)
Large	5001 – 10 000	A minimum of 25 working days (5 weeks)
Very large	10 0001-above	60 working days (3 months minimum – preferably 6 months)

NOTE:

- Events of fewer than 200 persons where there is no amplified sound or no temporary structures to be used need not submit an application. However, the Municipality may determine whether the impact and risk attached to an event of fewer than 200 persons would require the submission of an application.
- Note this excludes any specific or special application directives which the Municipality may issue from time to time, which may vary by event type, risk, size, the time of the year, duration, venue or location (for example over the festive season or public holiday or related to a type of event or specific venue/location) or impact on the transport network or any other Municipality activity.
- These timeframes do not include events applications where a land use application approval is required i.e. where an event is to be held on land which is not appropriately zoned. In such instances, the time frames for a very large event will apply.

REQUIREMENTS:

- A formal Application detailing the name and contact numbers of the organizer, date/s, venue, nature of event and as much information as possible, and
- An Event Plan including at least the following information:

1. Description of Event:

Type of event: International, National, Local, Linear or Place-bound

- Date/s
 - Duration (daily)
 - Locality/Area
 - Venue
 - Anticipated number of participants and spectators
 - Details of VIPS attending event (including artist/s)
 - Details of nearby Key Point/s or Restricted Areas
2. **Event Programme** (full details and times, plus contact details for person responsible for each aspect of event)
3. **Layout Plan** for event, indicating:
- Stages, Marquees & Other Temporary Structures
 - Access and Evacuation Flows
 - Fencing and Crowd Barriers
 - Catering Facilities and Vendor Areas
 - Restricted/VIP Areas
 - VOC Location
 - Ticket Selling Booths
4. **Event Safety Plan:**
- Medical Plan – including details of private medical service provider/s
 - Security Plan – including details of private security service provider/s
 - Departmental Emergency Response Plan
 - Emergency Procedure/Evacuation Plan
 - LP Gas Plan (if applicable)
 - Accreditation Plan
 - Facility Emergency Plan (if applicable)
 - Civil Aviation Application/Approval (if applicable)
5. **Transport Management Plan**
- Detailed Transportation Plan, incl. transportation modes, routes for event
 - Details of Road Closures (and times)
 - Emergency Vehicle Access Routes
 - Detailed Parking Plan, incl. secured/identified Parking Areas
 - Detailed Event Signage/Communication Plan (warning signage, alternative routes, parking, etc.)
6. **Traffic Management Plan**
- Detailed plan of event venue/location and surrounds;
 - Details of event specific Road Signage (if applicable)
 - Marshalling Plan (if applicable)
7. **Health Requirements:**
- Ablution Facilities and/or Mobile Toilets
 - Details of Vendors / Caterers, including licences
 - Certificate/s of Acceptability – food vendors

Community Participation/Consultation Plan, including:

- Communication with Councillor/s
- Consultation with Community/Residents Organisations/Associations
- Communication with Affected Residents/Businesses/Business Associations.

8. Application Forms /Approvals, incl.

- Noise Exemption (including public participation/consultation)
- Erection of Stages/Marquees/Temporary Structures
- Confirmation of Venue
- Liquor Licence/s (if applicable)

9. Municipal Services Requirements:

- Waste Management Plan, incl.
 - Details of Service Provider/s
 - Arrangements for venue cleansing (prior to and post event)
 - Receipt slip from landfill site (post event)
- Electricity – including wayleaves
- Water

10. Event Communications Plan

- Ticket Selling Strategy
- Emergency Communications Plan
- Approval or application for Municipal Outdoor Advertising and Signage
- Any specific requirements

11. Environmental Protection Plan (if applicable)

12. Indemnity Forms, incl.

- Completed Indemnity Form
- Confirmation of Public Liability insurance

13. Confirmation of Appointment of Safety Officer/s

SCHEDULE 3

EVENTS OVERLAY ZONE

1. Zone name and designation on map

- (1) The Events Overlay zone may be referred to by the code (EO) and shall cover the entire area of the Stellenbosch Municipality's zoning map.

2. Purpose of the zone

- (1) The purpose of the Events Overlay zone is to facilitate the hosting of events on public streets in certain circumstances, with the aim of promoting the tourism and leisure sector as a key driver of local economic development, as well as to enhance the cultural and social cohesion of communities, while protecting the amenity on which these activities rely.
- (2) Provide for a clear distinction between "events" and "occasional use" events.
- (3) Notwithstanding the intention for the overlay zone to be less restrictive with regards to the hosting of events, the overlay zone gives the Municipality a mechanism whereby additional measures and conditions can be imposed which can assist to avoid potential adverse impact of events on the receiving environment, and mitigate such impacts where they cannot be avoided.

3. Definitions in this chapter

The following words shall have the meaning assigned to them below:

"calendar year" means a period of twelve months from January 1 to December 31;

"event" means sporting, entertainment, recreational, educational, religious, cultural, exhibitional or similar activity, that is accessible to the general public and is hosted either at a specific place (i.e. on a single property) or along a specified route, and which is of a temporary nature, and which can occur on a specific day or on consecutive days for a limited period, and excludes functions such as weddings;

"event organizer" has the same meaning contemplated in the Stellenbosch Municipality Events By-law;

"linear event" means an event along a route taken from a starting point to a destination during which the event takes the form of either a recreational activity or a procession, and which may traverse a single property or a number of properties, and includes marathon, trail running, cycling and mountain biking (including E-bikes) events, but excludes the use of motorized vehicles;

"outdoor dining" means dining outdoors on a portion of public street with tables, chairs, and other furnishings for the purpose of selling, offering for sale, and serving

food and beverages in an area set up directly outside the confines of a property with land use rights for a business premises (or equivalent);

“place-bound event” means an event that takes place at an existing venue, or on a specific property;

“temporary structure” means a non-permanent structure constructed purely on a temporary basis for a specific period, which shall require building plan approval (if applicable) and which shall be demolished on completion of the event for which it was erected.

4. General provisions

- (1) The primary, additional and consent uses, and development parameters set out in the applicable base zone remain applicable to any land unit subject to this overlay zone, unless varied in the provisions provided in this chapter.
- (2) Events contemplated in this chapter are exempt from the provisions of section 30(1) (relating to occasional use events).
- (3) A maximum of 12 events per calendar year can be hosted on an individual property, irrespective of the event being a linear event or place-bound event (as contemplated in this chapter), unless otherwise stipulated in this chapter.
- (4) Any event occurring on a property that takes direct access from a proclaimed road shall provide effective traffic control for safe access off such road to the on-site parking area, to the satisfaction of the Municipality.
- (5) Any event contemplated in this chapter:
 - (a) May involve the construction of temporary structures to facilitate the hosting of such event.
 - (b) That involves the provision of temporary commercial services that are not directly associated with the event shall require prior approval for such land use.
 - (c) That involves amplified sound, whether it be for music, entertainment, public announcements or otherwise, shall require the event organizer to provide written confirmation to the Municipality's relevant department that the noise to be generated at the event will be compliant with the Western Cape Noise Control Regulations.
- (6) The Municipality may order that an event be ceased if, in the sole opinion of the Municipality, the event:
 - (a) is not compliant with the provisions stipulated in this schedule; or
 - (b) causes a public nuisance; or
 - (c) impacts on the health, welfare or safety of other properties in the surrounding area (particularly with regard to noise or traffic); or
 - (d) causes damage or poses a potential risk to existing environmental, agricultural or heritage resources.
- (7) Notwithstanding the wording used in the definitions contained in section 3, no event can be both a “linear event” and a “place-bound event”, and the Municipality's Development Management Department has the sole discretion to determine the specific category of an event as contemplated in this schedule.

- (8) Notwithstanding the specific provisions contained in sections 5, 6 and 7 of this schedule, all events must still comply with the provisions of applicable legislation and policy, including, but not limited to, the Municipality's:
- (a) Events By-law; and
 - (b) Roads and Streets By-law; and
 - (c) Policy on Outdoor Dining, Trading and the use of Public Places for Commercial Ventures and Display.

5. Specific provisions: linear events

- (1) Unlimited linear events shall be permitted in the following zones:
 - (a) Transport Facilities zone;
 - (b) Public Road and Parking zone; and
 - (c) Public Open Space zone.
- (2) Unlimited linear events shall be permitted in the following zones, provided that such events do not exceed 300 persons (including any support staff or spectators associated with such event):
 - (a) Education zone;
 - (b) Community zone;
 - (c) Private Open Space zone;
 - (d) Agriculture and Rural zone; and
 - (e) Natural Environment zone.
- (3) For a linear event involving more than 300 persons, including any support staff or spectators associated with such event, a maximum number of 12 events per calendar year shall be permitted on a property with a zoning stipulated in subsection (2), subject to section 4(3).
- (4) A linear event occurring on a property with a zoning stipulated in subsection (2) may not exceed:
 - (a) a maximum of 3 consecutive days;
 - (b) a cumulative number of 12 days in a calendar year.
- (5) A linear event occurring on a property with a zoning stipulated in subsection (2)(d) and 2(e):
 - (a) must make use of existing routes and/or farm tracks approved by the relevant authority;
 - (b) must include the provision of sufficient on-site parking for all vehicles associated with the event, or to the satisfaction of the Municipality; and
 - (c) may not involve any motorized vehicles.
- (6) This section only applies in instances where the Municipality has not already granted approval for such land use or activity on a property.

6. Specific provisions: place-bound events

- (1) Unlimited place-bound events shall be permitted in the following zones:
 - (a) Public Road and Parking zone; and
 - (b) Public Open Space zone.

- (2) A maximum of 12 place-bound events per calendar year shall be permitted on a property in the following zones, subject to section 4(3):
 - (a) Education zone;
 - (b) Community zone;
 - (c) Private Open Space zone; and
 - (d) Agriculture and Rural zone.
- (3) Notwithstanding subsection (2), a place-bound event that involves any amplified music such as an outdoor concert, rave or festival, shall not be permitted to extend beyond 18h00 without the prior written consent of the owners of the surrounding properties, as directed by the Municipality.
- (4) A place-bound event occurring on a property with a zoning stipulated in subsection (2)(a) and 2(b) does not include ancillary events typically associated with the primary uses thereon.
- (5) A place-bound event occurring on a property with a zoning stipulated in subsection (2)(c) and 2(d):
 - (a) will only be permitted if the event makes use of existing facilities and/or infrastructure, including approved structures and landscaped areas, subject to 5(a); and
 - (b) must include the provision of sufficient on-site parking for all vehicles associated with the event, or to the satisfaction of the Municipality.
- (6) A place-bound event occurring on a property with a zoning stipulated in subsection (2) may not exceed:
 - (a) a maximum of 4 consecutive days; and
 - (b) a cumulative number of 12 days in a calendar year.
- (7) All place bound events, regardless of the base zoning of the property on which such event takes place, shall not continue past 22h00 without prior written permission from the Municipality's Development Management Department.
- (8) This Section only applies in instances where the Municipality has not already granted approval for such land use or activity on a property.

24 May 2023

1. SUBJECT: QUARTERLY REPORT OF THE AUDIT AND PERFORMANCE AUDIT COMMITTEE OF STELLENBOSCH MUNICIPALITY FOR THE PERIOD 01 OCTOBER 2022 TILL 31 DECEMBER 2022

2. PURPOSE

To inform Council of the activities of the Audit Committee for the period 01 October 2022 till 31 December 2022 (2nd Quarter). The Minutes of the meeting held for this period mentioned is herewith attached as **APPENDIX 1** which outlines the activities of the Audit and Performance Audit Committee.

3. DELEGATED AUTHORITY

Audit and Performance Audit Committee reports to Council periodically.

4. EXECUTIVE SUMMARY

In terms of Section 166 of the Municipal Finance Act (MFMA), Act No 56 of 2003, each municipality must have an Audit and Performance Audit Committee. The Audit and Performance Audit Committee is an independent advisory body which must advise Council, the political office bearers, the accounting officer, the management and staff of the municipality.

The Audit Committee has executed its duties and responsibilities during the period under review in accordance with its terms of reference as they relate to Council's accounting, internal auditing, internal control and financial reporting practices.

Council established its Disciplinary Board in line with the Financial Misconduct Regulations on the 23 November 2021 and inter alia resolved that a member of the Audit and Performance Audit Committee be elected by the Audit Committee to serve on the board.

5. RECOMMENDATION

that Council take note of the concerns and the reports of the Audit Committee for the period 01 October 2022 till 31 December 2022

6. DISCUSSION / CONTENTS

6.1 Background

In terms of Section 166 (2) (a) the Audit and Performance Audit Committee must provide advice on matters relating to:

-
- internal financial control and internal audit;
 - risk management;
 - accounting policies;
 - the adequacy, reliability and accuracy of financial reporting and information;
 - performance management;
 - effective governance;
 - performance evaluation;
 - compliance with the MFMA; and
 - any issues referred to it by the Council.

The Audit and Performance Audit Committee will also review the annual financial statements in order to advise Council whether its finances are being managed efficiently and effectively. Furthermore, the Audit and Performance Audit Committee may respond to Council on issues raised by the Auditor-General in the audit report and carry out investigations into the financial affairs of the municipality if requested to do so by Council.

In order to execute its responsibilities effectively, the Audit and Performance Audit Committee will have access to the financial records and all other relevant information of the municipality.

6.2 **Discussion**

During this period the committee, amongst other matters, considered the following and would like to report the following in conjunction with the minutes of the meetings attached:

In respect of the external auditors and the external audit:

- Reviewed the Draft Management Report and noted the concerns raised by the AGSA relating to matters that could impact the municipality in future.
- Highlights the PPE and Asset Register concerns which directly impact AFS compilation raised by the AGSA.
- Congratulates the Municipality on SCM practices as no findings by the AGSA.
- Notes the compilation of comprehensive Audit Action Plan.
- Congratulates the Municipality for achieving another consecutive clean audit.

In respect of financial statements:

- Considered the quarterly budget monitoring report
- Requested that the CFO submit realistic cash flows to the next meeting for the capital budget.
- Raised concerns around non-achievement of targets as reported in the Quarterly Performance Report.

In respect of internal control and internal audit:

- Reviewed critical and significant issues raised by the internal audit processes and the adequacy of corrective action in response to such findings as detailed in the reports and follow-up reports.
- Reviewed the progress made by Internal Audit in the execution of its operational plan.
- Reviewed the reports from Internal Audit relating to Performance (PDO's).

In respect of Pre-determined Objectives

- Noted the reports in relation to Quarter 1 PDO's as reviewed by Internal Audit.
- Noted that there were no critical or significant issues raised by Internal Audit in the reporting the achievement of KPI's to Council

In respect of risk management:

- None

In respect of Fraud, Investigations and Consequence management:

- None

6.3 Financial Implications

As per the approved budget.

6.4 Legal Implications

The recommendations comply with legislation.

6.5 Staff Implications

N/A.

6.6 Previous / Relevant Council Resolutions

N/A

6.7 Risk Implications

N/A

6.8 Comments from Senior Management

The Municipal Manager and Senior Managers are in support of this item.

-----	--

The minutes of the Audit and Performance Audit Committee held on 2022-08-29 were **confirmed as correct, subject to the following amendments:**

- On page 5, Item 6.2, change the word “*included*” to “*include*.”
- On page 6, Item 7.1, the last sentence before RESOLVED:

remove the 2nd word “will” in the sentence to read as below:

“A report will serve on progress at the January 2023 APAC meeting for APAC to provide oversight”

- On page 7 refer e, i.e. change Helena change the name Helena to her title

3.2	MATTERS ARISING FROM PREVIOUS MINUTES / ACTION POINTS FOR CONSIDERATION
-----	--

NONE

4.	AUDITOR-GENERAL
-----------	------------------------

4.1	Draft Management Report for the year ending 30 June 2022 (APPENDIX 2) FOR CONSIDERATION
------------	---

The Senior Manager of the Auditor-General, Ms L Klue, presented the Final Management Report to the Committee and everyone present. She firstly congratulated Management and the Audit Committee for achieving a 3rd consecutive clean audit. She however raised concerns relating to material misstatements, PPE and reconciliation of the asset register. She recommended that Management should implement better controls relating to the compilation of annual financial statements.

Ms Klue also commended the Municipality for having no findings in Supply Chain Management and no material non-compliances. Improvement was also noted in the IT governance and controls.

Management responded to the concerns raised and would implement a comprehensive audit action plan to eliminate recurring findings.

The Audit and Performance Audit Committee noted the report and highlighted areas for improvement to Management. The Audit and Performance Audit Committee also congratulated the Municipal Manager and everyone present for achieving a clean audit.

RESOLVED

that the Final Management Report for the period to 30 June 2022, be noted.

4.2	Draft Audit Report for the period ending 30 June 2022 (APPENDIX 3) FOR CONSIDERATION
------------	--

The Audit Committee Chairperson confirmed with the Senior Manager of the Auditor-General that the Draft Audit Report was a reflection of what was discussed and the item dealing with the final management report. The Senior Manager of the Auditor-General confirmed same.

RESOLVED

that the Draft Audit Report for the period ending 30 June 2022, be noted.

5.	FINANCIAL STATEMENTS
-----------	-----------------------------

5.1	Quarterly Budget Monitoring Report Quarter 1 2022/2023 FOR CONSIDERATION	(APPENDIX 4)
------------	--	---------------------

The Chief Financial Officer provided a brief summary of this report to the Audit and Performance Audit Committee. Concerns were raised in relation to slow capital expenditure and the return on investments. The Committee also raised concerns around the Quarterly Performance Report and the reasons given for non-achievement of targets.

The Chief Financial Officer and the Municipal Manager provided responses for the concerns raised which the members noted.

RESOLVED

that the Quarterly Budget Monitoring report be noted.

6.	INTERNAL AUDIT AND INTERNAL CONTROL
-----------	--

6.1	Internal Audit Report: PDO's Quarter 1 FOR CONSIDERATION	(APPENDIX 5)
------------	--	---------------------

The Chief Audit Executive presented this report to the Committee and indicated that Internal Audit were satisfied with the Management Comments and implementation dates provided on the findings raised by Internal Audit for the implementation by the end user departments.

RESOLVED

that the Internal Audit Report: PDO's Quarter 1, be noted.

6.2	Internal Audit Progress Report FOR CONSIDERATION	(APPENDIX 6)
------------	--	---------------------

The Chief Audit Executive provided the Committee with a summary of the progress made by Internal Audit in the execution of its annual internal audit plan. The Chief Audit Executive indicated that a substantial amount of hours were spent on Barnowl (ERM and internal audit software) training and also indicated an overspending of hours allocated on the recruitment and selection review as the scope was changed to include concerns raised by the Municipal Manager.

The Chief Audit Executive also requested that a re-prioritisation of allocated hours be looked at the next Audit and Performance Audit Committee meeting.

RESOLVED

that the Internal Audit Progress Report, be noted.

7.	QUALITY ASSURANCE AND IMPROVEMENT
----	-----------------------------------

NONE

8.	RISK MANAGEMENT AND ICT
----	-------------------------

1. SUBJECT: QUARTERLY REPORT OF THE AUDIT AND PERFORMANCE AUDIT COMMITTEE OF STELLENBOSCH MUNICIPALITY FOR THE PERIOD 01 JANUARY 2023 TILL 31 MARCH 2023

2. PURPOSE

To inform Council of the activities of the Audit Committee for the period 01 January 2023 till 31 March 2023 (3rd Quarter). The Minutes of the meeting held for this period mentioned is herewith attached as **APPENDIX 1** which outlines the activities of the Audit and Performance Audit Committee.

That Council notes the Report of the Audit and Performance Audit Committee included in the Annual Report of Municipality for the year ending 30 June 2022 attached as **APPENDIX 2**.

3. DELEGATED AUTHORITY

Audit and Performance Audit Committee reports to Council periodically.

4. EXECUTIVE SUMMARY

In terms of Section 166 of the Municipal Finance Act (MFMA), Act No 56 of 2003, each municipality must have an Audit and Performance Audit Committee. The Audit and Performance Audit Committee is an independent advisory body which must advise Council, the political office bearers, the accounting officer, the management and staff of the municipality.

The Audit Committee has executed its duties and responsibilities during the period under review in accordance with its terms of reference as they relate to Council's accounting, internal auditing, internal control and financial reporting practices.

5. RECOMMENDATION

- a) that Council take note of the report of the Audit and Performance Audit Committee for the period 01 January 2023 till 31 March 2023
- b) that Council notes the report of the Audit and Performance Audit Committee on the Annual Report of the Municipality ending 30 June 2022.

6. DISCUSSION / CONTENTS

6.1 Background

In terms of Section 166 (2) (a) the Audit and Performance Audit Committee must provide advice on matters relating to:

- internal financial control and internal audit;
- risk management;
- accounting policies;
- the adequacy, reliability and accuracy of financial reporting and information;
- performance management;
- effective governance;

- performance evaluation;
- compliance with the MFMA; and
- any issues referred to it by the Council.

The Audit and Performance Audit Committee will also review the annual financial statements in order to advise Council whether its finances are being managed efficiently and effectively. Furthermore, the Audit and Performance Audit Committee may respond to Council on issues raised by the Auditor-General in the audit report and carry out investigations into the financial affairs of the municipality if requested to do so by Council.

In order to execute its responsibilities effectively, the Audit and Performance Audit Committee will have access to the financial records and all other relevant information of the municipality.

6.2 **Discussion**

During this period the committee, amongst other matters, considered the following and would like to report the following in conjunction with the minutes of the meetings attached:

In respect of the external auditors and the external audit:

- Monitored the progress made with AG action plan and noted the detailed feedback of the CFO in relation to the overview of audit findings follow-up.

In respect of financial statements:

- Enquired about the interim AFS compilation and the controls implemented improved AFS compilation,
- Requested that all matters relating to Unauthorised, irregular, fruitless and wasteful expenditure be reported quarterly to the APAC for information.

In respect of internal control and internal audit:

- Reviewed critical and significant issues raised by the internal audit processes and the adequacy of corrective action in response to such findings as detailed in the reports and follow-up reports;
- Reviewed the progress made by Internal Audit in the execution of its operational plan.
- Reviewed the report from Internal Audit relating to performance (PDO's) for Quarter 2 for the year ending 30 June 2023.
- Reviewed Internal Audit report on Human Resources.
- Reviewed under Quality Assurance and Improvement Plan the assessment of the APAC.

In respect of Pre-determined Objectives

- Noted the reports in relation to Quarter 2 PDO's as reviewed by Internal Audit.
- Noted that there were no critical or significant issues raised by Internal Audit in the reporting the achievement of KPI's for the quarter under review to Council.

In respect of risk management:

- Reviewed the Revised Strategic and Operational Risk Register for the 2022-23 financial year.
- Noted the verbal feedback by the Chief Risk Officer and the MM on Risk Management and ICT.

In respect of Fraud, Investigations and Consequence management:

- Reviewed the Fraud Register as at 29 March 2023
- Expressed appreciation for the improved control environment around fraud and corruption.

that the Internal Audit Report: PDO's – Quarter 2, **be noted.**

6.2	Internal Audit Report: Human Resources – Recruitment and Selection, Personnel files, Archive process and Housing Allowance FOR CONSIDERATION (APPENDIX 4)
------------	--

AUDIT & PERFORMANCE AUDIT COMMITTEE MEETING: 2023-03-29: ITEM 6.2

Member T Lesihla praised the Internal Audit Section for the work conducted on this report.

The following concerns were raised by members T Lesihla and V Botto:

- The termination of employees where their access to collaborator was not revoked;
- the concern of ghost workers that could be a risk;
- no representative from a user department indicated on the shortlisting attendance register;
- complaints may be received that the process was unfair;
- reference checking and background checks must be performed at all levels and evidence be kept;
- verification personal credentials are not undertaken;
- Is there something in place when the unions do not pitch even though they only have observer status; do you document it? Do you have proof that they were invited?

- From an oversight perspective, the Municipal Manager responded as follows and gave the Audit Committee the following assurance on some of the issues raised:
 - Regarding ghost workers – oversight and controls are in place to make sure that that doesn't happen in terms of the various levels of people that actually needs to approve some people going on to the system and the control systems that goes with that.
 - We keep record of all invites that is sent out to the unions and it is also recorded as such in our reports that is in the Recruitment and Selection Reports that is drafted in terms of post shortlisting as well as the interview stage.
 - the findings that have been raised is an action plan in place to make sure that we actually look at our controls and just tighten them when necessary. But and it is monitored very closely by my office.

The Director: Corporate Services concluded as follows:

- The Regulations came into place from the 1st of July and should be adhered to which ensures that the process is a lot tighter than in the past;
- The Recruitment and Selection Policy was amended and the Policy covers all the items that was indicated in the report as findings.
- The Director of a department must provide the panel for that recruitment and selection process. The references of all the people that is on the shortlist are checked and the documentation are kept. A report is drawn up after each recruitment and selection process and signed off by the Director of that department as well as by the Director: Corporate Services.
- All the items indicated in the recruitment process are covered and whether the people have the necessary qualifications and experience, what the results are and the signing of the of the Declaration of interest.
- There are no ghost workers. There is a separation of powers between the creation of a worker and the payment of that worker with documentation that must be provided.
- The unions have no right to question the candidate. They have no voting rights in terms of how the candidate fares. They have only observer status, but we do ask their opinion. It doesn't mean that their opinion sways anybody. I don't sit in all the recruitment processes, but where there are issues we try and resolve the issues.

RESOLVED

that the Internal Audit Report: Human Resources – Recruitment and Selection, Personnel files, Archive process and Housing Allowance, **be noted**.

6.3	Internal Audit Progress Report FOR CONSIDERATION	(APPENDIX 5)
-----	--	---------------------

AUDIT & PERFORMANCE AUDIT COMMITTEE MEETING: 2023-03-29: ITEM 6.3

RESOLVED

that the Internal Audit Progress Report, **be noted.**

6.4	Internal Audit Follow-up Report: 2021/2022 FOR CONSIDERATION	(APPENDIX 6)
-----	--	---------------------

AUDIT & PERFORMANCE AUDIT COMMITTEE MEETING: 2023-03-29: ITEM 6.4

The CAE provided feedback on the Internal Audit Follow-up Report: 2021/2022.

The Chairperson confirmed that 10 findings relating to development contributions are a concern and questioned the CAE if this will be resolved. The CAE responded that he is satisfied with the Director's feedback to address the finding.

The Chairperson also noted 1 risk management finding. The CAE responded that the risk management policy will be submitted to Council in due course.

Member J Williams raised a concern that the management comments provided, highlighted large vacancies within the department as a cause of the finding.

The Municipal Manager responded that this department in question, is the development planning unit who lost 4 Project Managers in a short amount of time to bigger institutions. This is a critical unit within our municipality therefore the positions will be filled as soon as possible. The municipality is in the process of revisiting the Planning By-law to enhance the synergy and for easier implementation regarding the Development Policy.

RESOLVED

that the Internal Audit Follow-up Report: 2021/2022, **be noted.**

7.	QUALITY ASSURANCE AND IMPROVEMENT
-----------	--

7.1	Audit and Performance Audit Committee Assessment (APPENDIX 7)
-----	---

AUDIT & PERFORMANCE AUDIT COMMITTEE MEETING: 2023-03-29: ITEM 7.1

RESOLVED

that the Audit and Performance Audit Committee Assessment Report, **be noted.**

8.	RISK MANAGEMENT AND ICT
-----------	--------------------------------

8.1	Strategic and Operational Risk Register – 2022/23	(APPENDIX 8)
------------	---	---------------------

AUDIT & PERFORMANCE AUDIT COMMITTEE MEETING: 2023-03-29: ITEM 8.1

The Chief Risk Officer informed the meeting that the attached register was approved by Council on 23 January 2023 to reflect the relevant and highest rating strategic risks in the municipality. The committee was informed that the Barn Owl system implementation has continued and that the Directorate Corporate Services was the first proper assessment as per the system. The assessments will continue and reflect in future reporting.

RESOLVED

that the Strategic and Operational Risk Register for 2022/23, **be noted**.

9.	FRAUD RESPONSE COMMITTEE: INVESTIGATIONS AND FRAUD
-----------	---

9.1	Fraud Register – March 2023	(APPENDIX 9)
------------	-----------------------------	---------------------

Report of the Audit and Performance Audit Committee

This report of the Audit and Performance Audit Committee of Stellenbosch Municipality is in respect of the 2021/2022 financial year. The Audit and Performance Audit Committee has complied with its responsibilities in terms of Section 166 of the MFMA and applicable Treasury Regulations. The Committee has also regulated its affairs and discharged its responsibilities concordant to the approved Audit Committee Charter. The Committee's operation is guided by the MFMA, the King IV report on Corporate Governance and International Institute of Internal Auditor's Standards.

The Committee consists of four independent members, elected by the Council: Linda Nene (Chairperson), Tsepo Lesihla, Vincent Botto and June Williams. The Council appointed the Chairperson of the Committee, an independent member. The Municipal Manager, Chief Financial Officer, Directors, Chief Audit Executive, Senior Manager Governance, Chief Risk Officer, MPAC Chairperson, and External Auditors are permanent invitees to the Committee meetings.

Execution of Functions

The Audit and Performance Audit Committee has executed its duties and responsibilities during the financial year in accordance with its terms of reference as they relate to the Council's accounting, external and internal auditing processes, internal control, governance, predetermined objectives and performance monitoring, compliance with laws and regulations, risk management, combined assurance and information technology governance and financial reporting practices.

During the year under review, the Committee, amongst other matters,

1.1 In respect of the External Auditors and the External Audit

- i. Approved the External Auditors' (Auditor-General of RSA) terms of engagement and strategy, the audit plan and budgeted audit fees payable;
- ii. Engaged and interrogated extensively the Audit report and management report of the Auditor General at the Audit and Performance Audit Committee meeting dated 29th November 2022;
- iii. Considered the audit outcome of the Municipality extensively and communicated the Audit and Performance Audit Committee's satisfaction and congratulated the Accounting Officer and Management on the Clean Audit Outcome;
- iv. Based on the audit outcome recommendations were made by the Audit and Performance Audit Committee on the other important matters as well as control deficiencies identified in the Auditor-Generals' management report;

- v. Management have been requested by the Audit and Performance Audit Committee to improve business processes impacting the annual financial statements compilation and reconciliations of transactions, more specially to limit repeat findings of which there were 2 findings relating to errors on the AFS;
- vi. Management are urged to strengthen controls to adequately monitor non-compliance with laws and regulations on a timely basis;
- vii. Management were requested to concentrate on accurate presentation and review of the annual financial statements submitted to the Auditor General for audit;
- viii. The supervision and review process needs to be interrogated to prevent, detect and correct misstatements on a timely basis and the controls designed to monitor compliance with regulations that are not always able to prevent or report the instances of non-compliance in a timely manner to allow for corrective action; and
- ix. The quality of submitted financial statements can still be improved on; thus, management is encouraged to develop action plans early to allow for the improvement in the next reporting cycle.

1.2 In respect of the Annual Financial Statements (AFS)

- i. Confirmed the going concern as the basis of preparation of the annual financial statements;
- ii. Examined, reviewed and interrogated the annual financial statements, performance report as well as financial information disclosed to the public prior to submission and approval by Council;
- iii. Reviewed reports on the adequacy of the portfolio and specific impairments and impairment of other assets;
- iv. Ensured that the annual financial statements fairly represented the financial position of the Stellenbosch Municipality as at the end of the financial year in accordance with South African Standards of GRAP and in the manner required by the MFMA and DORA;
- v. Considered the appropriateness of accounting treatments, significant unusual transactions and management accounting judgements;
- vi. Considered the appropriateness of the accounting policies adopted by Management and changes thereto;
- vii. Through the Chairperson, met separately over the course of the year with the Chief Audit Executive, the Municipal Manager and the External Auditors (Auditor-General of RSA);
- viii. Reviewed any significant legal and tax matters that could have a material impact on the financial statements; and
- ix. Noted that there were no material reports or complaints received concerning accounting practices, internal financial controls, content of annual financial statements, internal controls and related matters.

1.3 In respect of Internal Control and Internal Audit

- i. Reviewed and approved the internal audit mandate, annual and three-year rolling audit plans and evaluated the independence, effectiveness and performance of the Internal Audit Department and compliance with its mandate;
- ii. Considered reports of the Internal and external auditors on Council's system of internal control, including internal financial controls and maintenance of effective internal control systems;
- iii. Reviewed significant issues raised by the internal audit process and the adequacy of corrective action in response to such findings;
- iv. Reviewed significant differences of opinion between the internal audit function and Management and noted that there were no material issues of difference raised and all matters were addressed and resolved;
- v. Assessed the adequacy of the performance of the internal audit function and found it to be effective in providing assurance;

- vi. Reviewed and monitored the quality assurance and improvement plan submitted by internal audit as required by the IIA Standards;
- vii. Assessed the adequacy and sufficiency of available internal audit resources and found these to be limited, as more resources would be required to evaluate the control weaknesses and high-risk areas identified in both the corporate strategic risk, external audit and the audit universe;
- viii. Received limited assurance that proper and adequate accounting records were maintained and that systems safeguarded the assets against unauthorised use or the disposal thereof;
- ix. Based on the above, the Committee's opinion at the date of this report is that there were some breakdowns in internal control, including internal financial controls, for the year under review in the following areas (it is noted that management are in the process of addressing these concerns):
 - Performance management system (PMS)
 - Allowances (Overtime, Standby and Scarce Skills)
 - Development Contributions (Infrastructure Services)
 - Key Controls (Asset Management)
 - Pre-determined objectives
 - Monthly or regular reconciliations of assets, debtors, and creditors
 - Compilation of mid-year or interim AFS
- x. In addition, the Committee noted Management's improved responses to conclude on internal findings from the prior and current year as reported in the internal audit follow up reports.

1.4 In respect of Legal and Compliance with Laws and Regulations

- i. Reviewed with management matters that could have a material impact on Council;
- ii. Monitored compliance with the MFMA and other key legislation applicable to the Municipality, requirements of National and Provincial Treasury, Council's policies, and all other applicable legislation and codes of good governance;
- iii. Reviewed reports from the internal and external auditors detailing the extent of compliance.

1.5 In respect of Risk Management, Combined Assurance and Information Technology

During the period under review, Management presented Strategic and Operational Risk profiles for the Municipality to the Audit and Performance Audit Committee who :

- i. Considered and reviewed reports from Management on risk management, including fraud risks and information technology risks as they pertain to financial reporting and the going concern assessment;
- ii. In respect of the coordination of assurance activities, the Committee reviewed the plans and work outcomes of the external and internal auditors and concluded that these were adequate to address all significant financial, operational and compliance risks facing the Municipality;
- iii. Noted the progress made in terms of Combined Assurance and the co-ordination between assurance providers to mitigate the top 10 strategic risks facing the Municipality as well as the emerging risks;
- iv. The Audit and Performance Audit Committee took cognisance that Information Technology and IT systems controls needing some improvement in the Auditor General's Management report. Member Tsepo Lesihla, ICT expert, has been appointed to the ICT committee to support management in this respect.

1.6 In respect of Pre-Determined Objectives (PDO's)

The Audit and Performance Audit Committee:

- i. The quality of submitted performance information in the Management report is indicated as satisfactory. There were no material findings reported on performance information by the Auditor General and Internal Audit, respectively.
- ii. Internal audit has also provided the Audit and Performance Audit Committee with reports on performance on a quarterly basis and no critical findings have been raised.

1.7 In respect of the Finance Function

The Audit and Performance Audit Committee:

- i. Considered the existing expertise, resources and experience of the organisation-wide finance functional capacity and has noted that the improvement year on year on the quality of the annual financial statements submitted to the Committee and the AGSA. The number of misstatements corrected on the annual financial statements are noted and impact of external factors recognised. Management intend to report on an action plan in this respect.
- ii. The Chief Financial Officer should continue to ensure appropriate measures are in place for the accurate and timeous submission of information to the Office of the Auditor-General.
- iii. Noted that there were no findings on Supply Chain Management (SCM) and commends the CFO and his team for this.

1.8 Independence of the External Auditors

The Audit and Performance Audit Committee is satisfied that the Audit General of RSA (AGSA) were independent of the Council. This conclusion was arrived at, inter alia, after taking into account the following factors:

- i. The presentations made by the Auditor-General to the Audit and Performance Audit Committee;
- ii. The Auditors' independence was not impaired by any consultancy, advisory or other work undertaken by the auditors; and

1.9 General

- i. The Audit and Performance Audit Committee has monitored quarterly the Municipality's implementation plan for audit issues raised in the prior year and are satisfied that the matters have been adequately addressed and resolved. Of all the matters raised in the 2021/2022 audit outcome, two (2) have been repeat findings. The Audit and Performance Committee has raised its concern around the repeat findings and the other important matters raised in the Auditor-General's Management Report. The Municipal Manager has given assurance that all of these will be addressed as urgent and tracked for the 2022/2023 financial year.
- ii. The Audit and Performance Audit Committee concurs and accepts the conclusions of the External Auditor on the annual financial statements and is of the opinion that the audited annual financial statements be accepted and read together with the report of the Auditor-General.

Stellenbosch Municipality has increasingly been stable in the areas of second and third levels of assurance and governance over a three-year period. There has also been stability in the leadership over the past five financial years. The areas for concern, and where attention is required are highlighted above. The Audit and Performance Committee has made recommendations in these areas which management have committed to.

1.10 Conclusion

I am extremely grateful to the members of the Committee for their dedication and high levels of professionalism and diligence in their duties, as well as their flexibility in accommodating last-minute calls to duty. We are fortunate to have the diversity of skills and expertise available to the Municipality. It would be amiss not to convey on behalf of the Committee our appreciation to the Mayor, the entire Council and its Committees for the leadership, support and oversight they have provided during the year.

Finally, the Audit and Performance Audit Committee would like to express its appreciation to Management, Internal Audit, Risk Management and the Auditor General for the support and co-operation extended during the financial year and for providing the relevant information to enable the Audit and Performance Audit Committee to compile this report. This past year was again challenging and Stellenbosch Municipality should be proud of its elected and appointed leaders for taking control and driving an agenda of sustainability and service delivery and improving its audit results in the process, during a time of great fluidity.

On behalf of the Audit and Performance Audit Committee.

A handwritten signature in black ink, appearing to read 'Linda C. Nene', with a long, sweeping underline.

Mr Linda C. Nene FIIA (SA), CCSA, CRMA, CPrac (SA)
Chairperson Audit and Performance Audit Committee
17 January 2023

13.3	AUDIT AND PERFORMANCE AUDIT COMMITTEE EFFECTIVENESS ASSESSMENT REPORT 2022-23
------	--

Collaborator No:

IDP KPA Ref No:

Good Governance and Compliance

Meeting Date:

Council: 24 May 2023

1. SUBJECT: AUDIT AND PERFORMANCE AUDIT COMMITTEE EFFECTIVENESS ASSESSMENT REPORT 2022-23

2. PURPOSE OF REPORT

For Council to note the Effectiveness Assessment of the Audit and Performance Audit Committee

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

The effectiveness of the Audit and Performance Audit Committee is assessed annually on behalf of Council via a performance assessment conducted by the Executive Mayor, the Municipal Manager (MM), and the Chief Audit Executive (CAE) annually (attached as **Appendices 1, 2 and 3** respectively.)

The Audit and Performance Audit Committee also conducts a self-assessment on their effectiveness annually. The outcome of this self-assessment is reported to Council annually (attached as **APPENDIX 4.**)

5. RECOMMENDATIONS

- (a) that Council notes the Effectiveness Assessment of the Audit and Performance Audit Committee conducted on behalf of Council.
- (b) that Council notes the outcome of the Audit and Performance Audit Committee's self-assessment.

6. DISCUSSION AND BACKGROUND

6.1 Background

The Audit and Performance Audit Committee of Stellenbosch Municipality for the year under review consist of four (4) members as per the requirements of legislation and the approved Audit and Performance Audit Committee Charter of Council. The members of the committee currently are Mr. LC Nene, Ms. J Williams, Mr. T Lesihla and Mr. VJ Botto.

The Audit and Performance Audit Committee report to Council on several areas as per the requirements of Section 166 of the MFMA and is provides assurance to Council and Management in terms of its mandate.

The efficiency and effectiveness of the committee is assessed annually by the Executive Mayor, the MM and the CAE. The Audit and Performance Audit Committee also assesses itself against the required legislation, industry standards and best practice. This report serves to inform Council of the outcomes of assessments.

6.2 The Local Government: Municipal Finance Management Act

In terms of Section 166 (2) (a) the Audit and Performance Audit Committee must provide advice on matters relating to:

- internal financial control and internal audit;
- risk management;

- accounting policies;
- the adequacy, reliability and accuracy of financial reporting and information;
- performance management;
- effective governance;
- performance evaluation;
- compliance with the MFMA; and
- any issues referred to it by the Council.

The Audit and Performance Audit Committee will also review the annual financial statements to advise Council whether its finances are being managed efficiently and effectively. Furthermore, the Audit and Performance Audit Committee may respond to Council on issues raised by the Auditor-General in the audit report and carry out investigations into the financial affairs of the municipality if requested to do so by Council.

6.3 Financial Implications

As per the approved budget.

6.4 Legal Implications

The recommendations are in line with the legislation

6.5 Staff Implications

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY THE EXECUTIVE MAYOR

For each of the following statements, indicate a number between 1 and 3, with 1 indicating that you strongly disagree and 3 indicating that you strongly agree with the statement. Indicate 0 if you do not have enough knowledge or information to rank the Audit and Performance Audit Committees performance on a particular statement.

Indicate one number for each statement.

Leading Practice	Effectiveness Rating (1-3)	Comments
Composition and Quality		
1. members have the appropriate qualifications to meet the objectives of the Audit and Performance Audit Committee's charter, including appropriate financial literacy.	3	The Audit and Performance Audit Committee (APAC) have the required qualifications and executes its mandate effectively.
2. Audit and Performance Audit Committee members have differing perspectives due to a diversity of experience and backgrounds.	3	The APAC have a very balanced skill set which provides effective assurance to Council and management.
3. The Audit and Performance Audit Committee demonstrates integrity, credibility, trustworthiness, willingness to actively participate, ability to constructively handle conflict, interpersonal skills, and pro-activeness.	3	The APAC actively participates and deals with conflict if any pro-actively.
4. The Audit and Performance Audit Committee demonstrates appropriate knowledge of the municipality.	3	The APAC have a very balanced skill set which provides effective assurance to Council and management. They are well versed in local government and leading practice.
5. Members of the Audit and Performance Audit Committee meet all applicable independence requirements.	3	All members of the APAC are independent.
6. The leadership of the Audit and Performance Audit Committee chair is effective.	3	The Chair provides very good leadership.

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY THE EXECUTIVE MAYOR

7. The Audit and Performance Audit Committee considers the significant risks faced by the Stellenbosch Municipality. Examples of risks include (but are not limited to): <ul style="list-style-type: none"> • Regulatory and legal • Political • Economic • Strategic • Finance • Technology • Human Resources 	3	An independent member of the APAC has been seconded to the Risk and Fraud a Management Committee who advises the APAC on all risk management matters. This committee also submits quarterly reports to the APAC.
Process & Procedures		
8. The Audit and Performance Audit Committee reports its proceedings and recommendations to Council after each committee meeting.	3	The APAC submits reports to Council quarterly
9. The Audit and Performance Audit Committee dedicates appropriate time and resources to execute its responsibilities.	3	Yes
10. Audit and Performance Audit Committee meetings are conducted in an effective manner, with time being spent primarily on significant issues.	3	Yes
11. The Audit and Performance Audit Committee respects the line between oversight and management of the financial reporting process.	3	Yes. The APAC understand and execute their functions very well.
12. Audit and Performance Audit Committee members come to meetings well prepared.	3	Yes
Communication & Information		
13. The level of openness between the Audit and Performance Audit Committee and relevant parties (management, Internal Audit, and the Auditor General) is appropriate.	3	Yes. There is good constructive engagement between all parties regularly. The Accounting officer provides regular feedback to me in this regard.

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY THE EXECUTIVE MAYOR

Oversight of the Financial Reporting Process, Including Internal Controls		
14. The Audit and Performance Audit Committee understands and gives appropriate consideration to the internal control testing conducted by management, Internal Audit, and the Auditor General to assess the process of detecting internal control issues or fraud.	3	
15. If management's assessment of internal controls resulted in the identification of significant deficiencies or material weaknesses, plans to address these issues are reviewed, evaluated and monitored by the Audit and Performance Audit Committee.	3	Yes. The Chief Audit Executive reports quarterly to the APAC on the execution of Internal Audit's risk-based audit plan. All findings of deficiencies and weaknesses if any are reported and followed up.
16. The Audit and Performance Audit Committee reviews the management recommendation letters written by the auditors (external and internal) and monitors the process to determine that all significant matters raised are addressed.	3	Yes
17. The Audit and Performance Audit Committee ensures that management takes action to achieve resolution when there are instances of repeat comments from auditors, particularly for those related to internal controls.	3	Yes. This is monitored quarterly via Internal Audit reports and the AG action plan.
18. The Audit and Performance Audit Committee's understanding of the Financial Accounting and reporting process is adequate.	3	Yes
19. The Audit and Performance Audit Committee adequately considers the Annual Financial Statements, significant policies, significant issues affecting the financial statements.	3	Yes
Oversight of Audit Function		
20. The Audit and Performance Audit Committee understands the co-ordination of work between the auditors (Internal and Auditor General).	3	Yes. Combined Assurance framework is in place.

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY THE EXECUTIVE MAYOR

21. The Audit and Performance Audit Committee regularly reviews the adequacy of the internal audit function (eg. The charter, audit plan, budget, compliance, and number, quality and continuity of staff).	3	Yes
22. The internal audit reporting lines established with the Audit and Performance Audit Committee promote an atmosphere where significant issues that might involve management will be brought to the attention of the Audit and Performance Audit Committee.	3	Yes
23. The Audit and Performance Audit Committee appropriately considers internal audit reports, management's responses, and improvement actions.	3	Yes
24. The Audit and Performance Audit Committee considers the Auditor General's audit plan and provides recommendations as appropriate.	3	Yes
25. The Audit and Performance Audit Committee comprehensively reviews management's representation letters to the Auditor General, (including making enquiries about any difficulties obtaining the responses).	3	Yes. The AG's engagement letter and reports are submitted to the APAC for discussion where all assurance providers are present.
26. The Audit and Performance Audit Committee has private sessions with executive management, Internal Audit and Auditor General, which result in candid discussion of pertinent issues.	3	Yes. This happen if and when needed.
Overall Ethics and Compliance Culture		
27. The Audit and Performance Audit Committee oversees management's procedures for enforcing the municipality's Code of Conduct.	3	Yes

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY THE EXECUTIVE MAYOR

28. The Audit and Performance Audit Committee oversees the process in place to address: <ul style="list-style-type: none">• The risks of non-compliance with applicable regulations;• Conflict of Interest; and• Violations of the code of ethical conduct	3	Yes. All matters are reported to the APAC.

<i>Understanding the Business, Including Risks</i>		
<p>6. The Audit and Performance Audit Committee considers the significant risks faced by the Stellenbosch Municipality. Examples of risks include (but are not limited to):</p> <ul style="list-style-type: none"> • Regulatory and legal • Political • Economic • Strategic • Finance • Technology • Human Resources 	3	Strategic and operational risk registers are regularly interrogated by the Committee and also considered when approving the IA strategic and operational plans.
7. The Audit and Performance Audit Committee understands and approves the process implemented by management to effectively identify, assess, and respond to the municipality's key risks.	3	Yes. APAC member Mr Lesihla advises and sit on the Risk Management Committee has also facilitated this.
8. The Audit and Performance Audit Committee understands and approves management's fraud risk assessment and has an understanding of identified fraud risks.	3	Yes. APAC member Mr Lesihla advises and sits on the Risk Management Committee has also facilitated this.
<i>Process & Procedures</i>		
9. The Audit and Performance Audit Committee dedicates appropriate time and resources to execute its responsibilities.	3	Yes

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY INTERNAL AUDIT

Leading Practice	Effectiveness Rating (1-3)	Comments
10. Audit and Performance Audit Committee meetings are conducted in an effective manner, with time being spent primarily on significant issues.	3	Yes.
11. The Audit and Performance Audit Committee respects the line between oversight and management of the financial reporting process.	3	Yes. There is a clear understanding of their roles and functions.
12. Audit and Performance Audit Committee members come to meetings well prepared.	3	Yes
Communication and Information		
13. The level of openness between the Audit and Performance Audit Committee and relevant parties (management, Internal Audit, and the Auditor General) is appropriate.	3	There is unrestricted and open communication between all parties.
Oversight of the Financial Reporting Process, Including Internal Controls		
14. The Audit and Performance Audit Committee receives sufficient information to assess and understand management's process to evaluate the municipality's system of internal controls (eg. Financial reporting and disclosure controls, operation controls, and compliance controls).	3	Yes. Detailed reports from Internal Audit and Management on a quarterly basis ensures that the APAC receives sufficient information to advise and provide assurance on the control environment.
15. The Audit and Performance Audit Committee understands and gives appropriate consideration to the internal control testing conducted by management, Internal Audit, and the Auditor General to assess the process of detecting internal control issues or fraud.	3	The APAC a very good understanding of the types of assurance provided by management, Internal Audit and the Auditor General respectively on internal controls.

AUDIT AND PERFORMANCE AUDIT COMMITTEE PERFORMANCE ASSESSMENT BY INTERNAL AUDIT

Leading Practice	Effectiveness Rating (1-3)	Comments
16. If management's assessment of internal controls resulted in the identification of significant deficiencies or material weaknesses, plans to address these issues are reviewed, evaluated and monitored by the Audit and Performance Audit Committee, responsibility of Fraud and Risk Management Committee (FARMCO).	3	Regular reporting to the APAC ensures oversight. All material, critical and significant weaknesses, if any, are reported to the APAC quarterly.
17. The Audit and Performance Audit Committee makes enquiries of the appropriate parties (Auditor General, Internal Audit and Management) on the depth of experience and sufficiency of the Stellenbosch Municipality's accounting and finance staff.	3	Yes. The APAC reports annually on the efficiency and effectiveness of the Finance function.
18. The Audit and Performance Audit Committee reviews the management recommendation letters written by the auditors (external and internal) and monitors the process to determine that all significant matters raised are addressed.	3	Yes. All recommendations by Internal Audit and the Auditor General are reviewed and followed up. The AG action plan is updated and reported on a quarterly basis to the APAC. Internal Audit follow up reports are also submitted to the Committee annually.
19. The Audit and Performance Audit Committee ensures that management takes action to achieve resolution when there are instances of repeat comments from auditors, particularly for those related to internal controls.	3	Yes. The AG action plan is updated and reported on a quarterly basis to the APAC. Internal Audit follow up reports are also submitted to the Committee annually. Repeat findings, if any, are highlighted and corrective action is reported.
20. The Audit and Performance Audit Committee's understanding of the Financial Accounting and reporting process is adequate.	3	Yes
21. The Audit and Performance Audit Committee adequately considers the Annual Financial Statements, significant policies, significant issues affecting the financial statements.	3	Yes. The draft AFS are submitted to the APAC for review annually prior to the final submission to the Auditor General. Quarterly Budget Monitoring Reports (Section 52) are also submitted to APAC for consideration.

IDP KPA Ref No:

Meeting Date:

Good Governance & Compliance

24 May 2023

1. **SUBJECT: SECTION 116(3); B/SM 13/21: ESH.3, TO UNDERTAKE: PROFESSIONAL ELECTRICAL ENGINEERING SERVICES FOR THE PROCUREMENT AND INSTALLATION OF TWO NEW 20MVA 66/11kV TRANSFORMERS AND ASSOCIATED: AMENDED SCOPE OF WORKS**

2. **PURPOSE**

To extend the current scope of works to include the following, Review of scope of works for the contractor, tender documents and drawings that was compiled by RHDHV to procure Leafy Space (Pty) Ltd by doing a due diligence and amending the scope, tender documentation and drawings if required. Zutari (Pty) Ltd will then have to go out on tender and test the market again to procure a suitably qualified service provider to execute the construction works on site

3. **DELEGATED AUTHORITY**

Council.

4. **EXECUTIVE SUMMARY**

In 2018/19 a service provider was appointed to provide electrical professional services for the ongoing electrical network upgrades and system improvements for the replacement of two existing 10MVA 66/11kV transformers at Jan Marais 66/11kV substation with two 20MVA units. Due to poor performance the services of that service provider (RHDHV) have been terminated; Zutari (Pty) Ltd was procured to take the project to its completion.

Package A: Manufacture and delivery to site of the two 20MVA transformers are underway and ACTOM has been appointed to manufacture the units. The specifications for the units were compiled by a service provider that's services were terminated. The newly appointed service provider must manage and facilitate the manufacturing process and report the progress to Stellenbosch monthly. They will also be responsible to verify that the specifications are followed and ensuring that the manufacturer (ACTOM) does not deviate from the specifications or budgets.

Package B: Deals with the installation of the two 20MVA transformers on site at Jan Marius substation. This tender document has been compiled and is currently being finalized to be advertised. The tender evaluation and appointment of the contractor will be dealt with by RHDHV.

Once a contractor has been appointed, the newly appointed Zutari (Pty) Ltd will be responsible for the remaining portion of the project which will include but not be limited to the project management, construction management and contract management of the contractor up until closeout and handover.

The Section 116 notice was placed in the newspaper (Die Burger) on Friday, 21 April 2023 to invite comments from the community. The commenting period was from 21 April – 12 May 2023. No comments or objections were received.

5. RECOMMENDATIONS

- (a) that Council note in terms of MFMA Section 116(3) the reasons for the extension of the tender;
- (b) that Council note the public participation process that was followed and that no comments were received (Annexure B & C); and
- (c) that the extension of the scope of services for tender BSM 13/21 ESH.3 in favour of Zutari (Pty) Ltd be approved.

6. DISCUSSION / CONTENTS

6.1 Background

On the 23 August 2022 Zutari (Pty) Ltd (consulting engineers) was appointed by means of B/SM 13/21: ESH.3, to undertake: Professional electrical engineering services for the procurement and installation of two new 20 MVA 66/11kV transformers and associated works. The scope of Zutari (Pty) Ltd appointment is limited to the construction and project management of the construction works on site to be done by the contractor, Leafy Space (Pty) Ltd. Zutari (Pty) Ltd scope does not include the reviewing and amendment of the specifications, reviewing and revising designs and specifications in order to prepare tender documentation which is in line with Stellenbosch Municipality's SCM policies to procure a competent contractor to finalise the construction phase of the project.

Leafy Space (Pty) Ltd was appointed on 28 February 2022 as the contractor under bid B/SM 111/21 Jan Marais Substation Upgrade (Civil, Electrical and Structural works) to do the construction works. Leafy Space (Pty) Ltd services were terminated on 24 November 2022. Termination letter Annexure A is attached for ease of reference. There is currently no contractor appointed to execute the construction work on site.

The intention of this item is to obtain approval from Council to amend the scope of works of Zutari (Pty) Ltd to include the review of scope of works for the contractor, including evaluation and amendment of tender documents and drawings that was compiled by RHDHV to initially procure Leafy Space (Pty) Ltd. Zutari (Pty) Ltd must do a due diligence and amend the scope, tender documentation and drawings if required. Zutari (Pty) Ltd will then have to go out on tender and test the market again to procure a suitably qualified service provider (contractor) to execute the construction works on site at Jan Marais substation.

6.3 Discussion

Objective

The objective of Stellenbosch Municipality is extend the scope of works of Zutari (Pty) Ltd to include the reviewing and amendment of the specifications and then used these revised designs and specifications to prepare tender documentation which is in line with Stellenbosch Municipality's SCM policies to procure a competent contractor to finalise the construction phase of the project .

The scope of the project can be summarized as follows:

Package A

Familiarized themselves with the detailed design and specifications that is used to manufacture the two new 20MVA transformers at ACTOM. Use these specification to draw up construction specifications to complete Package B.

Package B

Review and amend the current specifications that was compiled by RHDHV. Zutari must familiarise themselves with the Jan Marais Substation electrical layout and plant and draw up specifications and tender documents that will be used to procure and appoint a contractor that will be responsible to install the Transformers and complete all electrical and civil construction works associated with the installation of the 20 MVA transformers and associated plant up to completion and handover. Zutari (Pty) Ltd will be responsible for the remaining portion of the project which will include but not be limited to the project management, construction management and contract management of the contractor up until closeout or handover.

6.4 Financial Implications

The original approved rates as per B/SM 13/21: ESH.3 will be applicable for the duration of the extension. Funding is available on the approved 2022/23 and 2023/24 budget. A cost estimate Annexure B detailing the additional professional fees is attached. Zutari (Pty) Ltd is currently appointed by means of purchase order no 000000900002544 to the value of R 637 500.00 exc. VAT. Their current appointment amounts to R 750 000.00 incl. VAT. The amended scope of works will increase the total costs to R 2 243 428.00 exc. VAT

6.5 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.6 Staff Implications

This report has no staff implications to the Municipality.

6.7 Previous / Relevant Council Resolutions

Not applicable

6.8 Risk Implications

In order for the Municipality to operate the electrical high and medium voltage network effectively and to ensure the overall safety of the network, it is necessary to upgrade the Jan Marais Substation which is in line with the approved Electricity Master plan as SDF.

The non-extension of B/SM 13/21 ESH.3 will result in no future developments being executed as there is no surplus capacity available at Jan Marias Substation that is located in the central Stellenbosch Area.

Stellenbosch Municipality has decided to cancel Contract B/SM111/21 with Leafy Space in terms of the General Conditions of Contract clause 9.2.1.3.2 due to outstanding or unacceptable documentation as detailed in the Contract Data clause 5.3.1 of the Contract. (see Annex G)

The background information and detail reasons for cancel the contract are as follows:

- i. Leafy Space has missed several opportunities including the deadline date to deliver all the outstanding documentation as listed in Annex G to enable SBM to hand over the site. The opportunities are:
 - 14 April 2022, 14 days (clause 5.3.2) after contract was signed to deliver the documents as listed in clause 5.3.1 (see also Annex G)
 - Minutes of kick-off meeting dated 25th May 2022 and follow-up emails from SBM request the documentation as listed in Annex G
 - Site hand-over meeting dated 19th Oct 2022. [Zutari email dated 7th Oct 2022: Meeting agenda / invite and requesting that the outstanding documentation be presented at the site handover meeting to ensure site haver can take place]
 - Deadline date of 16:00 on Monday 24th Oct 2022 as set by Leafy Space themselves during the site hand over meeting.
- ii. The contract between SBM and Leafy Space stretch over a contract period of 9 months, starting 31st March 2022 with estimated contract ending date the 9th of December 2022. To date Leafy Space did not request for extension of time and has submit a program with estimate end date April 2023.
- iii. Leafy Space fail to proof their competency and know how to execute the project safely and to the technical requirements as stated in the Contract. A project specific (i) risk assessment with mitigation actions, (ii) method statements, and (iii) Quality Assurance plan matched to a construction program with holding points is critical to be in place before a project of this nature to upgrade and refurbish a live outdoor substation can start. The proof of competency of the personnel to execute the project was also outstanding

BID NOTICE

STELLENBOSCH MUNICIPALITY HEREBY INVITES YOU TO TENDER FOR BSM 82/23: TECHNICAL REVIEW AND ASSISTANCE WITH THE FINANCIAL STATEMENTS FOR A PERIOD 01 JULY 2023 UNTIL 30 JUNE 2026

TENDER NUMBER: BSM 82/23
DESCRIPTION: TECHNICAL REVIEW AND ASSISTANCE WITH THE FINANCIAL STATEMENTS FOR A PERIOD 01 JULY 2023 UNTIL 30 JUNE 2026

CLOSING DATE: 22 May 2023
CLOSING TIME: 12h00. Bids will be opened in the Council Chambers or Supply Chain Management Boardroom

INFORMATION:
Tender Specifications: Monique Steyt, 021 808 8516; email: Monique.Steyt@stellenbosch.gov.za
SCM Requirements: Gerald Kraukamp 021 808 8518; email: Gerald.Kraukamp@stellenbosch.gov.za

Office hours for collection: 08h00-15h30

Tenders may only be submitted on the Tender documentation issued by Stellenbosch Municipality and must be valid for 180 days after tender closing. Late, electronic format, telephonic or faxed Tenders will not be considered and Stellenbosch Municipality does not bind itself to accept the lowest, part of or any Tender.

Sealed Tenders, with "BSM 82/23: TECHNICAL REVIEW AND ASSISTANCE WITH THE FINANCIAL STATEMENTS FOR A PERIOD 01 JULY 2023 UNTIL 30 JUNE 2026," clearly endorsed on the envelope, must be deposited in the Tender box at the offices of the Stellenbosch Municipality, Town House Complex, Plein Street, Stellenbosch. The Tender box is accessible 24 hours a day and Tenders must be accompanied by the completed Tender documents. Tenders not accompanied by a complete Tender document, will not be considered.

NOTE: This tender will be evaluated in terms of the General Conditions of Contract, Supply Chain Management Policy and relevant specification as depicted in the document and also the Stellenbosch Preferential Procurement Policy effective from 16 January 2023 in accordance with the Preferential Procurement Regulations that was promulgated by the Minister of Finance on 04 November 2022 in Government Gazette No 47452.

The preferential points system applied is as follows: 80/20 in terms of the approved policy.

Price	80
B-BBEE status level of contribution	10
Locality	10
Total points for Price, B-BBEE and locality	100

The following conditions to Tender exist (failure to comply may result in your Tender being disqualified):

1. This Tender is subject to the general conditions of contract (GCC) and special conditions for Tendering.
2. Relevant terms of reference.
3. Tenderers must be registered on the Central supplier database (CSD) if they wish to conduct business with the municipality.
4. No award will be made to tenderers whose tax status is non-compliant.
5. Tenders submitted must be in a sealed envelope clearly marked with the Tender number, placed in the tender box before closing time. Failure will result in the tender being invalid.

Tender documents, in English, are available free of charge on the website: www.stellenbosch.gov.za. Alternatively, hard copies of the document are obtainable from the offices of the Supply Chain Management Unit, Stellenbosch Municipality, Town House Complex, 1st Floor, Plein Street, Stellenbosch, upon payment of a non-refundable fee of R156.00 per document.

Note: The municipality will never contact you to pay money in exchange for the award of a tender.

NOTICE 56/2023

NOTICE IN TERMS OF SECTION 116(3) OF THE LOCAL GOVERNMENT: MUNICIPAL FINANCE MANAGEMENT ACT, 2003 (ACT 56 OF 2003) FOR THE PROPOSED AMENDMENTS TO THE TENDER AWARDED TO RESOURCE INNOVATIONS AFRICA (PTY) LTD B/S/M 12/21: RECYCLABLE WASTE COLLECTION AND PROCESSING OF THE RECYCLABLE MATERIAL AT A LICENSED MRF UP UNTIL JUNE 2023

Notice is hereby given in terms of Section 116 (3) (a) and (b) of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003) that it is the intention of the Stellenbosch Municipality to amend the existing contract:

Number: B/S/M 12/21:

Description: RECYCLABLE WASTE COLLECTION AND PROCESSING OF THE RECYCLABLE MATERIAL AT A LICENSED MRF UP UNTIL JUNE 2023

Contractor: RESOURCE INNOVATIONS AFRICA (PTY) LTD

Reasons for the proposed amendment: To extend the current contract period to beyond 30 June 2023, to allow the Municipality to conclude the procurement process for a new service provider. This extension is to ensure continued service delivery in the WC024 areas.

The original approved rates will be charged for the duration of the extension.

Notice is hereby further given in terms of Section 21 and 21A of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) that the local community and interested / affected parties are invited to submit comments or representations to the Municipality in respect of the above, such comments or representations must be received within 21 days of advertisement via electronic mail to the e-mail address provided below, or be delivered to the undersigned to the mailing address provided hereunder. Persons who are physically disabled or who cannot read or write but wish to participate in the process, may come during office hours to the Municipal Offices, Supply Chain Department, Plein Street, Stellenbosch where a staff member will assist that person to transcribe that person's comments or representations.

Comments and/or representations must be submitted to the following email address: engineering.services@stellenbosch.gov.za with the subject line entitled "B/S/M 12/21: COMMENTS ON NOTICE OF AMENDMENT TO EXTEND THE TENDER PERIOD"

The closing date/time for the submission of representations and/or comments is 12:00 on 12 May 2023. Any comments or representations received after this time and date will not be considered.

All enquiries regarding this intent can be directed to the following official:

NOTICE KN53/2023

NOTICE IN TERMS OF SECTION 116(3) OF THE LOCAL GOVERNMENT: MUNICIPAL FINANCE MANAGEMENT ACT, 2003 (ACT 56 OF 2003) B/S/M 13/21 ESH.3 TO UNDERTAKE PROFESSIONAL ELECTRICAL ENGINEERING SERVICES FOR THE PROCUREMENT AND INSTALLATION OF TWO NEW 20MVA 66/11KV TRANSFORMERS AND ASSOCIATED AMENDED SCOPE OF WORKS

Notice is hereby given in terms of Section 116 (3) (a) and (b) of the Local Government: Municipal Finance Management Act, 2003 (Act 56 of 2003) that it is the intention of the Stellenbosch Municipality to amend the existing contract:

Number: B/S/M 13/21 ESH.3

Description: B/S/M 13/21 ESH.3 TO UNDERTAKE PROFESSIONAL ELECTRICAL ENGINEERING SERVICES FOR THE PROCUREMENT AND INSTALLATION OF TWO NEW 20MVA 66/11KV TRANSFORMERS AND ASSOCIATED AMENDED SCOPE OF WORKS

Contractor: ZUTARI (PTY) LTD

Reasons for the proposed amendment: On 23 August 2022 Zutari (Pty) Ltd (consulting engineers) was appointed by mean of B/S/M 13/21 ESH.3, to undertake Professional electrical engineering services for the procurement and installation of two new 20 MVA 66/11KV transformers and associated works. The scope of Zutari (Pty) Ltd appointment is limited to the construction and project management.

Leafy Space (Pty) Ltd was appointed on 28 February 2022 as the contractor under bid B/S/M 11/21 Jan Marais Substation Upgrade (Civil, Electrical and Structural works) to do the construction works. Leafy Space (Pty) Ltd's services was terminated on 24 November 2022 due to poor performance.

The scope of services of Zutari (Pty) Ltd under B/S/M 13/21 ESH.3 does not include the appointment of a contractor to execute the construction works on site. In order for Zutari (Pty) Ltd to appoint a suitably qualified contractor, their appointment needs to be amended to include the reviewing, revising designs and specifications in order to prepare tender documentation which is in line with Stellenbosch Municipality's SCM policies to procure a competent contractor to finalise the construction phase of the project.

The original approved rates will be charged for the duration of the extension.

Notice is hereby further given in terms of Section 21 and 21A of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000) that the local community and interested / affected parties are invited to submit comments or representations to the Municipality in respect of the above, such comments or representations must be received within 21 days of advertisement via electronic mail to the e-mail address provided below or be delivered to the undersigned to the mailing address provided hereunder. Persons who are physically disabled or who cannot read or write but wish to participate in the process, may come during office hours to the Municipal Offices, Supply Chain Department, Plein Street, Stellenbosch where a staff member will assist that person to transcribe that person's comments or representations.

Comments and/or representations must be submitted to the following email address: s116.contracts@stellenbosch.gov.za, with the subject line entitled "B/S/M 13/21 ESH.3: COMMENTS ON NOTICE OF AMENDMENT TO THE TENDER AWARDED TO ZUTARI (PTY) LTD".

The closing date/time for the submission of representations and/or comments is 12:00 on 12 May 2023. Any comments or representations received after this time and date will not be considered.

All enquiries regarding this intent can be directed to the following official:

Name & Surname: Mr Mark Benson
Telephone Number: E-mail enquiries only

LETTER OF APPOINTMENT

It is our pleasure to inform you that you have been appointed in terms Tender B/SM 13/21: ESH.3, to undertake: **Professional electrical engineering services for the procurement and installation of two new 20 MVA 66/11kV transformers and associated works.**

This document consists of the following sections:

A SCOPE OF WORK

1. Background
2. Scope and Objective
3. Consultant Fees
4. Project Timeframe
5. Skill Transfer
6. Performance
7. Submission of Technical Proposal
8. Evaluation of Technical Proposal
9. Scoring of functionality
10. Flow Chart indicating evaluation and appointment process

B PERFORMANCE

D REMUNERATION

E CASH FLOW

F PROGRAMME

G DATA

H COMMUNICATION

I CONFIRMATION OF ACCEPTANCE OF THIS LETTER OF APPOINTMENT

A. SCOPE OF WORK

1. BACKGROUND

In 2018/19 a service provider was appointed to provide electrical professional services for the ongoing electrical network upgrades and system improvements for the replacement of two existing 10MVA 66/11kV transformers at Jan Marius 66/11kV substation with two 20MVA units. Due to poor performance the services of that service provider have been terminated; this bid is to procure the services of a new service provider that would take the project to its completion.

Package A: Manufacture and delivery to site of the two 20MVA transformers are underway and ACTOM has been appointed to manufacture the units. The specifications for the units were compiled by a service provider that's services were terminated. The newly appointed service provider must manage and facilitate the manufacturing process and report the progress to Stellenbosch monthly. They will also be responsible to verify that the specifications are followed and ensuring that the manufacturer (ACTOM) does not deviate from the specifications or budgets.

Package B: Deals with the installation of the two 20MVA transformers on site at Jan Marius substation. This tender document has been compiled and is currently being finalized to be advertised. The tender evaluation and appointment of the contractor will be dealt with by the current service provider.

Once a contractor has been appointed the newly appointed service provider will be responsible for the remaining portion of the project which will include but not be limited to the project management, construction management and contract management of the contractor up until closeout and handover.

2. OBJECTIVE

The objective of Stellenbosch Municipality is to procure the services of a suitable qualified professional service provider review and then used these preliminary design reports as the basis of the project.

The scope of the project can be summarized as follows:

Package A

Familiarized themselves with the detailed design and specifications that is used to manufacture the two new 20MVA transformers at ACTOM. Draw up a schedule with holding points for quality checks and draft a project programme based on the manufacturers programme.

The newly appointed service provider must manage and facilitate the manufacturing process and report the progress to Stellenbosch monthly. They will also be responsible to verify that the specifications are allowed and ensuring that the manufacturer (ACTOM) does not deviate from the specifications or budgets.

Package B

Familiarized themselves with the tender documentation and conditions of appointment that is applicable to the newly appointed contractor. Initiate and chair the Site kickoff meeting and compilation of a detailed project programme. The newly appointed service provider will be responsible for the remaining portion of the project which will include but not be limited to the project management, construction management and contract management of the contractor up until closeout or handover.

3. DESCRIPTION OF THE SERVICES REQUIRED

The services required from a consultant, will be to meet the objectives as described above, including undertaking the necessary planning, assessments investigations, studies, and reporting.

The implementation of the above mentioned are subject to availability of pre-approved funding.

4. PROGRAMME AND TIME FRAME

Implementation of subsequent stages will be subject to availability of pre-approved funding, but it is anticipated that the time frames will be as follow:

- | | |
|---|--------------|
| 1. Stage 1 | |
| • Planning, Studies, Investigations & Assessments | 01 June 2022 |
| 2. Stage 2 | |
| • Inception | 06 June 2022 |

B. PERFORMANCE

Consultants and their work must abide to the Code of Conduct, Board Notice 41 of 2017, by the Engineering Council of South Africa, as per the Engineering Profession Act, Act 46 of 2000.

As such the actions and work performed by consultants will result in projects that will work (and perform its function) as required originally (per scope of tender), or as altered thereafter with the approval of the Municipality. Consultants will ensure that all designs, materials, and measures chosen will perform as expected by the Municipality. The completed project will perform as required within the prevailing South African conditions, including known political conditions, within and around the Municipality. The Consultants will take responsibility that such project will perform as is required within such conditions.

Consultants will take full responsibility for any design faults or misperceptions resulting in a project not performing as specified and will be held liable if such requested specification and operations are not achieved. The Tender Document, Document A as well as this document will form contract with the Consultant, the following Performance Criteria are also applicable:

PERFORMANCE CRITERIA

The following performance criteria apply:

- B.1) Consultants are required to keep to programme dates
- B.2) Personal involvement with the project and the team as and when needed
- B.3) Consultants must liaise with the Local Authority to address any possible issue(s)
- B.4) Consultants to provide good administrative support in responding to correspondence timeously
- B.5) Your regular attendance at requested meetings
- B.6) Consultants are to ensure adequate record keeping
- B.7) Timely response to requested information
- B.8) Consultants to provide good administrative support in responding to correspondence timeously
- B.9) Your regular attendance at requested meetings
- B.10) Consultants are to ensure adequate record keeping
- B.11) Timely response to requested information
- B.12) Consultants to perform the Asset Unbundling of construction projects implemented, as per Stellenbosch Municipal Standards
- B.13) Consultants to provide a professional service on time and within budget

C. PROFESSIONAL INDEMNITY INSURANCE

Clause 5.4.1 of Part C1.2: Contract Data of Tender B/SM 13/21 states: "The Service provider shall insure against professional negligence, errors, and omissions under a Professional Indemnity policy for at least twice the fee amount provided for each assignment in respect of a claim, without limit to number of claims. The Bidder must provide proof of such insurance to the Employers Representative within 14 (fourteen) days after the notification of acceptance of the Assignment. For projects that have significant impacts, the Municipality may request additional Professional Indemnity. Such projects may therefore have additional Professional Indemnity requirement that will be determined by the Municipality when the scope of works is compiled."

The project value is defined as professional fees plus construction value; therefore, your insurance policy must provide cover to Stellenbosch Municipality to a minimum value of at least twice the fee amount provided for each assignment in respect of a claim, against liability for:

- C.1) the loss or damage suffered by Stellenbosch Municipality by reason of error, omission, neglect, or breach of professional duty by yourself, your employees or independent contractors appointed by yourselves in providing the services as described above,
- C.2) death, injury, loss, or damage to property of any third Party arising from any error, omission, neglect, or breach of professional duty by yourself, your employees or independent contractors appointed by yourselves in providing the services as described above.

Please provide the following:

- C.3) A copy of your insurance policy
- C.4) Limit of public liability per claim
- C.4) Expiry date of the applicable policy

D. REMUNERATION

- D.1) Payment in respect of the services to be provided by the consultant as appointed by means of this letter of appointment, will be remunerated by Stellenbosch Municipality will be time and cost based.
- D.2) The Estimated fees for various stages will be as agreed with Municipal Project Manager and in line with the technical proposal fee estimates and fee structures submitted.
- D.3) The implementation of all further Stages is subject to availability of pre-approved funding.
- D.4) Any invoices must be addressed to Stellenbosch Municipality and must indicate the VAT number of the municipality as well as your own VAT number.

Handwritten signature and initials, possibly 'fe' and 'E', with a large flourish.

D.5) A hard copy must be delivered to Stellenbosch Municipality and an electronic copy must be forwarded to the municipal project manager for this project.

E. CASHFLOW

Updated cash flow projections must accompany all requests for payments. Please also include a cashflow that is in line with your envisaged programme and milestones with your acceptance of this letter of appointment.

F. PROGRAMME

An envisaged programme must be forwarded with acceptance of this letter of appointment, and it is expected that this programme be adhered to.

G. DATA

All designs, plans, documentation, and the like prepared by yourself for this project, become the property of the Stellenbosch Municipality upon payment thereof.

H. COMMUNICATION

All formal communication between yourself and other role players must be copied to the relevant project / line and senior manager. Minutes and/or notes of all meetings must be confirmed in writing and copied to the rest of the team.

We trust that you are willing to accept the appointment and conditions and request you to acknowledge your acceptance of this appointment letter by signing the section below and returning a copy to Stellenbosch Municipality.

Yours faithfully

13.5	ESTABLISHMENT OF SECTION 80 COMMITTEES (PORTFOLIO COMMITTEES)
------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance & Compliance

24 May 2023

1. SUBJECT: ESTABLISHMENT OF SECTION 80 COMMITTEES (PORTFOLIO COMMITTEES)

2. PURPOSE

Council must approve the established the section 80 committee and must appoint the members on these committees.

3. DELEGATED AUTHORITY

Council establishes the committees and appoints the members, whilst the Executive Mayor appoints the Chairpersons.

4. EXECUTIVE SUMMARY

In terms of Section 80 of the Structures Act, if a municipality has an Executive Mayor, it may appoint Committees of Councillors to assist the Executive Mayor.

Such Committees may not in number exceed the number of members of the Executive Committee (10, including the Deputy Executive Mayor).

The Executive Mayor, *inter alia*:-

- appoints a Chairperson for each Committee; and
- may delegate any powers and duties of the Executive Mayor to the Committee.

Such Committee(s) must assist the Executive Mayor in accordance with the directions of the Executive Mayor and in line with the provisions as indicated in section 80.

The members are appointed by council in accordance with the principle of representation amongst the amount of members allocated to each committee.

Council established the following section 80 Committee on 23 February 2022:

- Corporate Services;
- Planning
- Financial Services;
- Human Settlements;
- Infrastructure Services;
- Protection Services
- Local Economic Development and Tourism
- Rural Management
- Youth, Sport and Culture
- Parks, Open Spaces and Environment

The administration received an indication from the Speaker that amendments should be made to the Section 80 committees as well as the members of the committees to be appointed by Council.

The changes include the merging of the Planning Committee and the Local Economic Development and Tourism Committees and the creation of a Community Services Committee.

The latter will be dealing with Community development aspects such as:

Community Centres

Library Services

ECD's

The Elderly

Interaction with clinics and hospitals (where applicable);

Mayoral Skills Development program

Mayoral Community Programs

Any other matter in relation to community services that may be referred to the committee by the Executive Mayor

Some of these functions previously resided under Youth Sport and Culture Committee. The terms of reference will have to be amended by the committees for Planning, Local Economic Development and Tourism, Sport Youth and Culture and the newly established Community Services Committee.

Changes are also made to the numbers serving on the committees.

Protection Services (5 members) – unchanged (3 x DA, 2 x Opposition)

Youth, Sports and Culture Committee (5 members) – (3 x DA, 2 x Opposition)

Corporate Services (5 members) – **additional member** (3 x DA, 2 x Opposition)

Financial Services (5 members) – (3 x DA, 2 x Opposition)

Human Settlements (5 members) – (3 x DA, 2 x Opposition)

Infrastructure Services (5 members) - (3 x DA, 2 x Opposition)

Parks, Open Spaces and Environment (4 members) - (3 x DA, 1 x Opposition)

Planning, Local Economic Development and Planning (5 members) – (3 x DA, 2 x Opposition)

Rural Management (4 members) – (3 x DA, 1 x Opposition)

Community Services (5 members) – new (3 x DA, 2 x Opposition)

Council must now appoint the members to the committees and the Executive Mayor may appoint the Chairperson.

We have received a communication from the Municipal Manager indicating the appointment of the new portfolio holders of the Section 80 committees from 1 June 2023 (**APPENDIX 1**).

5. RECOMMENDATIONS

(a) that it be noted that Council approved the following Section 80 portfolio committees on 23 November 2021:

- Corporate Services;
- Planning
- Financial Services;
- Human Settlements;
- Infrastructure Services;
- Protection Services

- Local Economic Development and Tourism
- Rural Management
- Youth, Sport and Culture
- Parks, Open Spaces and Environment

(b) that Council approves the amendment of the establishment of the Section 80 Committees as follows:

1. **Corporate Services**, total 5 members:
 - DA – 3
 - Opposition – 2
2. **Planning**, Local Economic Development and Tourism, total 5 members:
 - DA – 3
 - Opposition – 2
3. **Financial Services**, total 5 members:
 - DA – 3
 - Opposition – 2
4. **Human Settlements**, total 5 members:
 - DA – 3
 - Opposition – 2
5. **Infrastructure Services**, total 5 members:
 - DA – 3
 - Opposition – 2
6. **Protection Services**, total 5 members:
 - DA – 3
 - Opposition – 2
7. **Rural Management**, total 4 members:
 - DA - 3
 - Opposition - 1
8. **Youth, Sport and Culture** , total 5 members:
 - DA – 3
 - Opposition – 2
9. **Parks, Open Spaces and Environment** total 4 members
 - DA – 3
 - Opposition – 1
10. **Community Services Committee** total 5 members:
 - DA – 3
 - Opposition - 2

(c) that it be noted that the Executive Mayor has amended the appointment of the chairpersons of committees as from 1 June 2023 as per appendix 1;

(d) that the terms of reference for the following Section 80 committees must be amended to reflect the changes in the committees:

Planning Local Economic Development and Tourism;

Community Services;

Youth Sports and Culture

- (e) That the amended terms of references be referred to the relevant section 80 committees for revision and adoption.
- (f) That Council appoint the members of the Section 80 Committees.

6. DISCUSSION / CONTENTS

6.1 Background

Composition of Committees

In terms of Section 160(8) of the Constitution of the Republic of South Africa, members of a municipal Council are entitled to participate in its proceedings and those of its Committees in a manner that, *inter alia*:-

- (a) allows parties and interests reflected within the Council to be fairly represented; and
- (b) is consistent with democracy.

The chairpersons of the section 80 Committees are appointed by the Executive Mayor and makes up the Mayoral Committee.

6.2 Discussion

In terms of Section 80 of the Structures Act, if a municipality has an Executive Mayor, it may appoint Committees of Councillors to assist the Executive Mayor.

Such Committees may not in number exceed the number of members of the Executive Committee (10, including the Deputy Executive Mayor).

The Executive Mayor, *inter alia*:-

- appoints a Chairperson for each Committee; and
- may delegate any powers and duties of the Executive Mayor to the Committee.

Such Committee(s) must assist the Executive Mayor in accordance with the directions of the Executive Mayor and in line with the provisions as indicated in section 80. Council approved the following committees on 23 November 2021.

- Corporate Services;
- Planning
- Financial Services;
- Human Settlements;
- Infrastructure Services;
- Protection Services
- Local Economic Development and Tourism
- Rural Management
- Youth, Sport and Culture
- Parks, Open Spaces and Environment

The members must be appointed by council in accordance with the principle of representation amongst the amount of members allocated to each committee.

The administration received an indication from the Speaker that amendments should be made to the section 80 committees as well as the members of the committees to be appointed by Council.

The changes include the merging of the Planning Committee and the Local Economic Development and Tourism Committees and the creation of a Community Services Committee.

The latter will be dealing with Community development aspects such as:

Community Centers

Library Services

ECD's

The Elderly

Interaction with clinics and hospitals(where applicable);

Mayoral Skills Development program

Mayoral Community Programs

Any other matter in relation to community services that may be referred to the committee by the Executive Mayor

Some of these functions previously resided under Youth Sport and Culture Committee. The terms of reference will have to be amended by the committees for Planning, Local Economic Development and Tourism, Sport Youth and Culture and the newly established Community Services Committee.

Changes are also made to the numbers serving on the committees.

Protection Services (5 members) – (3 x DA, 2 x Opposition)

Youth, Sports and Culture Committee (5 members) – (3 x DA, 2 x Opposition)

Corporate Services (5 members) – **additional member** (3 x DA, 2 x Opposition)

Financial Services (5 members) – (3 x DA, 2 x Opposition)

Human Settlements (5 members) – (3 x DA, 2 x Opposition)

Infrastructure Services (5 members) - (3 x DA, 2 x Opposition)

Parks, Open Spaces and Environment (4 members) - (3 x DA, 1 x Opposition)

Planning, Local Economic Development and Planning (5 members) – (3 x DA, 2 x Opposition)

Rural Management (4 members) – unchanged (3 x DA, 1 x Opposition)

Community Services (5 members) – new (3 x DA, 2 x Opposition)

Council must now appoint the members to the committees and the Executive mayor may appoint the Chairperson.

We have received a communication from the Municipal Manager indicating the appointment of the new portfolio holders of the section 80 committees from 1 June 2023 (appendix 1).

6.3 Financial Implications

Councillors are not remunerated additionally for attending the section 80 committee meetings. The intention is that the meetings mostly be on the electronic Teams platform. Councillors will only be allowed to claim for out of pocket expenses not already covered in their all-inclusive remuneration package. The chairpersons to the committees are full time councillors.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

3 support staff support the Mayco Councillors and Chief Whip

6.6 Previous / Relevant Council Resolutions:

ADJOURNED 1ST COUNCIL MEETING: 2021-11-23: ITEM 6.7

RESOLVED

(a) *that the establishment of the following Section 80 Portfolio Committees be approved:*

- *Community Services (Parks, Open Spaces and Environment)*
- *Corporate Services*
- *Financial Services*
- *Human Settlements*

APPENDIX 1

OFFICE OF THE EXECUTIVE MAYOR

MEMORANDUM TO : MS G METTLER (MUNICIPAL MANAGER)
MEMORANDUM FROM : CLLR GMM VAN DEVENTER – EXECUTIVE MAYOR
REFERENCE NUMBER : 3/9/R
DATE : 16 MAY 2023

RECONSIDERATION OF THE MAYORAL COMMITTEE – STELLENBOSCH MUNICIPALITY

PURPOSE

To inform the Municipal Manager of the reconsideration of the Mayoral Committee of the Stellenbosch Municipality.

BACKGROUND

There are presently 2 vacancies in Stellenbosch Mayoral Committee. (MAYCO). The first vacancy in the Portfolio Community protection was created due to the resignation of Rikus Badenhorst to take up a position as member of the NCOP. He also then resigned as the ward councillor of ward 21. After that, Cllr Zelda Dalling, Portfolio Chair for Infrastructure, indicated that she would like to exit as (MAYCO) member to rather focus on mediation in her spare time. Thus 2 vacancies exist in two very important portfolios.

The untimely death of the late Cllr Ansaaf Crombie also left a space in the PR councillor list, and this means that all the Section 80 committees and other committees will also have to be reviewed. The councillor representatives on the external bodies will also have to be reviewed.

Cllr Siegfried Schafer was appointed as successor for Cllr Crombie, and Cllr Maynard Slabbert was recently elected during a by-election to fill the ward vacancy of ward 21.

Having considered all these changes, the Executive Mayor realised that it will be prudent to re-assess and reconsider all the Mayco portfolios and Mayco positions. The following Portfolios and Portfolio Chairs have been approved, and new incumbents will take up the allocated portfolios on 1 June 2023.

NEW MAYORAL COMMITTEE	
Executive Mayor	Cllr GMM van Deventer
Deputy Mayor, incl Finance	Cllr Jeremy Fasser
Infrastructure	Cllr Peter Johnson
Planning, LED and Tourism	Cllr Carli van Wyk
Corporate Services	Cllr Lwando Nkamisa

Community Services	Cllr Xolile Kalipa
Human Settlements	Cllr Rozette du Toit
Rural management	Cllr Joseph Joon
Protection services	Cllr Reginald Pheiffer
Sport, Youth and Culture	Cllr John Cornelius Anthony
Parks, Open spaces and Environment	Cllr James Williams

Please ensure the relevant information is compiled in terms of the changing of the section 80 Portfolio Chairpersons, as well as the configuration of MPAC.

My office will ensure the incumbents receive their letter of appointment, and this will be provided to HR and your office for record purposes.

Your co-operation will be appreciated.

Kind regards,

Cllr GMM van Deventer
EXECUTIVE MAYOR

8.11.1	ESTABLISHMENT OF SECTION 80 COMMITTEES (PORTFOLIO COMMITTEES)
--------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance and Compliance

16 February 2022

1. SUBJECT: ESTABLISHMENT OF SECTION 80 COMMITTEES (PORTFOLIO COMMITTEES)

2. PURPOSES

Council must approve the established the section 80 committee and must appoint the members on these committees.

3. DELEGATED AUTHORITY

Council establishes the committees and appoints the members, whilst the Executive Mayor appoints the Chairpersons.

4. EXECUTIVE SUMMARY

In terms of Section 80 of the Structures Act, if a municipality has an Executive Mayor, it may appoint Committees of Councillors to assist the Executive Mayor.

Such Committees may not in number exceed the number of members of the Executive Committee (10, including the Deputy Executive Mayor).

The Executive Mayor, *inter alia*:-

- appoints a Chairperson for each Committee; and
- may delegate any powers and duties of the Executive Mayor to the Committee.

Such Committee(s) must assist the Executive Mayor in accordance with the directions of the Executive Mayor and in line with the provisions as indicated in section 80.

The members are appointed by council in accordance with the principle of representation amongst the number of members allocated to each committee.

The previous council accepted terms of references for each committee which are now outdated and needs to be revised.

13.6	FILLING OF VACANCY ON MUNICIPAL PUBLIC ACCOUNTS COMMITTEE (MPAC) AND OVERSIGHT COMMITTEE
------	---

Collaborator No:

IDP KPA Ref No:

Meeting Date:

Good Governance & Compliance

24 May 2023

1. SUBJECT: FILLING OF VACANCY ON MUNICIPAL PUBLIC ACCOUNTS COMMITTEE (MPAC) AND OVERSIGHT COMMITTEE

2. PURPOSE OF REPORT

To inform Council of a vacancy on the Municipal Public Accounts Committee (MPAC) and Oversight Committee and to request that the vacancy be filled.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

On 10 December 2021, a Municipal Public Accounts Committee (MPAC) in accordance with Section 79 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), and as per the "Guideline for Establishment of Municipal Public Accounts Committees" issued by the Department of Cooperative Governance (CoGTA) and National Treasury was established.

Council resolved to appoint 7 councillors to the Municipal Public Accounts Committee (MPAC): 4 DA (Cllr Crombie, Cllr Ferns, Cllr Kalipa and Cllr Olayi), 1 ANC (Cllr Mananga-Gugushe), 1 PDM (Cllr Pietersen, who was also appointed as Chairperson) and 1 ACDP (Cllr Jooste). Council also resolved to determine their secondi to serve on the Municipal Public Accounts Committee (MPAC). 4 DA, 1 ANC, 1 PDM and 1 ACPD. With the passing of Councillor Crombie, Council on 24 April 2023 resolved to fill the vacancy with Councillor Schäffer.

On 17 May 2023 the Executive mayor announced changes to the Mayoral committee and Councillor Kalipa has been appointed as Chairperson of the Community Services section 80 committee and therefore now a member of the Executive Mayoral Committee. A councillor who serves as a member of MPAC may not hold other positions on any other committee. A vacancy has therefore occurred due to the appointment of Councillor Kalipa as a member of the Executive Committee, who served as a member of the Municipal Public Accounts Committee. This vacancy must now be filled by Council. In terms of the 10 December 2021 resolution the DA should nominate the person that should fill the vacancy.

5. RECOMMENDATIONS

For consideration.

6. DISCUSSION / CONTENTS

6.1 Background

In terms of Section 79 of the Structures Act, a municipal council may establish one or more Committees necessary for the effective and efficient performance of any

of its functions or the exercise of any of its powers and appoint the members of such Committee(s) from among its members.

The Municipal Public Accounts Committee also acts as an oversight committee to exercise oversight over the executive obligations of council.

6.2 Discussion

On 10 December 2021, a Municipal Public Accounts Committee (MPAC) was established by Council in accordance with Section 79 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), and as per the “Guideline for Establishment of Municipal Public Accounts Committees” issued by the Department of Cooperative Governance (CoGTA) and National Treasury was established.

Council resolved to appoint 7 councillors to the Municipal Public Accounts Committee (MPAC): 4 DA (Cllr Crombie, Cllr Ferns, Cllr Kalipa and Cllr Olayi), 1 ANC (Cllr Mananga-Gugushe), 1 PDM (Cllr Pietersen, who was also appointed as Chairperson) and 1 ACDP (Cllr Jooste). Council also resolved to determine their secondi to serve on the Municipal Public Accounts Committee (MPAC). 4 DA, 1 ANC, 1 PDM and 1 ACPD.

Councillor Ansaaf Crombie, who served on the Municipal Public Accounts Committee, was replaced with Councillor Schäffer on 24 April 2023 after her passing.

On 17 May 2023 the Executive mayor announced changes to the Mayoral committee and Councillor Kalipa has been appointed as Chairperson of the Community Services section 80 committee and therefore now a member of the Executive Mayoral Committee. A councillor who serves as a member of MPAC may not hold other positions on any other committee. A vacancy has therefore occurred due to the appointment of Councillor Kalipa as a member of the Executive Committee, who served as a member of the Municipal Public Accounts Committee. This vacancy must now be filled by Council. In terms of the 10 December 2021 resolution the DA should nominate the person that should fill the vacancy.

6.3 Financial Implications

Councillors are not remunerated additionally for attending the Municipal Public Accounts Committee (MPAC).

Councillors will only be allowed to claim for out-of-pocket expenses not already covered in their all-inclusive remuneration package.

6.4 Legal Implications

The recommendation in this report complies with Council’s policies and all applicable legislation.

6.5 Staff Implications

The administration assists when needed with the administrative tasks around a sitting of the committee.

6.6 Previous / Relevant Council Resolutions:**SPECIAL COUNCIL MEETING: 2021-12-10: ITEM 8.1**

Nominations were called for the Chairperson of the MPAC. The ANC nominated Cllr N Mananga-Gugushe (Ms) and the DA nominated Cllr WF Pietersen. **(duly nominated forms attached)**. The Speaker RULED that voting be done by the raising of hands, resulting in 8 in favour of Cllr N Mananga-Gugushe (Ms) and 28 voting in favour of Cllr WF Pietersen.

RESOLVED (nem con)

- (a) that Council establishes a Municipal Public Accounts Committee (MPAC) in accordance with Section 79 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), and as per the "Guideline for Establishment of Municipal Public Accounts Committees" issued by the Department of Cooperative Governance (CoGTA) and National Treasury;
- (b) that the function of an oversight committee in relation to the Annual Report be incorporated into the roles and responsibilities of MPAC;
- (c) that Council determines the amount of Councillors and their secundi to serve on the Municipal Public Accounts Committee (MPAC), based on the following principles:

- (i) that the composition of the Municipal Public Accounts Committee (MPAC) be a total of 7 members of which the DA has 4 members, and the Opposition has 2 members, namely:

DA: Cllr Crombie (Ms)
Cllr Ferns (Ms)
Cllr Kalipa
Cllr N Olayi

ANC: Cllr N Mananga-Gugushe (Ms)

PDM: Cllr WF Pietersen

ACDP: Cllr O Jooste

- (ii) MPAC must be represented by a wide range of experience and expertise available in Council and should reflect the various political parties represented in Council;
 - (iii) The Executive Mayor, Deputy Executive Mayor, Speaker, Whip or a member of the Mayoral Committee be excluded from membership of MPAC;
- (d) that Council elects Councillor WF Pietersen as Chairperson for the Municipal Public Accounts Committee (MPAC); and
- (e) that the Chairperson of this Committee be designated as a full-time Councillor.

13TH CONCIL MEETING: 2023-04-26: ITEM 13.1**RESOLVED** (majority vote with abstentions)

that Councillor Siegfried Schäfer be appointed to fill the vacancy of the MPAC and Oversight Committee.

Collaborator No:

IDP KPA Ref No:

Good Governance

Meeting Date:

Council: 24 May 2023

**1. SUBJECT: QUARTERLY REPORT – WARD COMMITTEE FUNCTIONING
3rd QUARTER**

2. PURPOSE

For Council to take note of the Functioning of Ward Committees within the Stellenbosch municipal areas.

3. DELEGATED AUTHORITY

For Notification by Municipal Council

4. EXECUTIVE SUMMARY

In terms of section 73 of the Local Government: Municipal Structures Act, no 117 of 1998 and Regulations, Ward Committees must be established for each ward within the municipal area within 120 days after the election.

The system of delegations of the Stellenbosch Municipality (S6 and S7) designates the Speaker of Stellenbosch Municipality to facilitate the establishment of Ward Committees in line with the provisions and stipulations of the Municipal Structures Act and Council's policy for the establishment of Ward Committees.

At the Council meeting of 30 March 2022, Council noted the establishment of Ward Committees for all 23 wards within the Stellenbosch Municipality.

Wards who did not have the full complement of Ward Committees members were allowed to co-opt members in line with Council Policy and Procedures for Ward Committees. Ward 3 co-opted 4 new members in September 2022. All ward committees are fully functional and are performing all duties as set out in the Policy and Procedures for Ward Committees.

Attached herewith as **ANNEXURE A** is a table outlining the functioning of all Ward Committees for the period January – March 2023, including dates and number of Ward Committee meetings held to date.

5. **RECOMMENDATIONS**

- (a) that Council note the functioning of Ward Committees in all 23 wards
- (b) that Council take note of the number of Ward Committee and Sector meetings held to date in all 23 wards from January – March 2023.

6. **DISCUSSION / CONTENTS**

6.1 **Background**

In terms of the Policy and Procedures for Ward Committees amended and adopted by Council on 23 November 2021, the Speaker of Council is the custodian of Ward Committees. The Speaker must, in collaboration with Ward Councillors, regulate and monitor the frequency of ward committee and community report back meetings and must through his/her office ensure functionality of ward committees, as outlined in paragraphs 15(1) and 15(3 and 4) of Council's Policy and Procedures for Ward Committees.

In terms of section 73 of the Local Government: Municipal Structures Act, no 117 of 1998 and Regulations, Ward Committees must be established for each ward within the municipal area within 120 days after the election.

6.2 **Discussion**

At the meeting of 30 March 2022 Council noted the establishment of Ward Committees for all 23 wards within the Stellenbosch Municipality.

Wards who did not have the full complement of Ward Committees members were allowed to co-opt members in line with Council Policy and Procedures for Ward Committees. Ward 3 co-opted 4 new members in the 3rd quarter of 2022. All ward committees are fully functional and are performing all duties as set out in the Policy and Procedures for Ward Committees.

Attached herewith as ANNEXURE A is a table outlining the functioning of all Ward Committees, including dates and number of Ward Committee meetings for the period January – March 2023.

6.5. **Financial Implications**

As per the approved budget.

6.4 **Legal Implications**

The recommendations in this report comply with approved delegations, legislation and Council policies.

6.5 Staff Implications

Ward Administrators have been appointed to assist with the functioning of Ward Committees. Where vacancies exist, there are processes in place to fill the vacancies.

6.6 Previous / Relevant Council Resolutions:

6TH COUNCIL MEETING: 2022-07-27: ITEM 13.2

- (a) that Council notes the final report on the establishment of the ward committees and the current vacancies on ward committees;
- (b) that Council notes the filling of vacancies during the 2nd round of elections for wards 15 and 19;
- (c) that it be noted that Ward Committees may co-opt members where vacancies exists and inform council accordingly.

6.7 Risk Implications

This report addresses the risk implications for the Municipality.

6.8 Comments from Senior Management:
