RE: FAURE WATER TREATMENT PLANT SHUTDOWN – EXTENDED TO 27 OCTOBER 2024

The City of Cape Town, Water and Sanitation Directorate, had planned a shutdown for the Faure Water Treatment Plant and the RSE from Monday, 21 October 2024, until Friday, 25 October 2024, as per the previous notice issued. The 1800mm meter installation has been completed. However, due to delays in other maintenance work at the Plant, the work is now anticipated to be completed **on Sunday, 27 October 2024**.

The Faure domestic reservoir will remain offline during this period. Stellenbosch Municipality is requested only to use the water supply from the main Faure reservoir. **During this period, consumers on the RSE will still not have a water supply from the raw water pipeline** and are advised to make alternative arrangements for their non-potable water needs.

We sincerely appreciate your cooperation and understand the inconvenience this extended shutdown may cause. Your understanding and support are invaluable to us.
