1.	**OPENING AND WELCOME**

The Speaker, Cllr Q Smit welcomed all at the 20th Council meeting in the Council Chamber.

2.	MAYORAL ADDRESS

- Dit is met hartseer dat ek verslag moet doen oor die onlangse heengaan van wyle Cyril Jooste. Hy is gedurende Desember 2009 tot burgemeester van Stellenbosch verkies en was in die pos tot Junie 2011. Daarna het hy as Speaker van Stellenbosch Raad vanaf Junie 2011 gedien tot Augustus 2016. Hy was bekend as 'n baie streng Speaker en het geen ongehoorsaamheid aan die reëls. Ons gebede en gedagtes is by sy familie in hierdie tyd van hartseer.

- All councillors and residents - Higher stages of load shedding places tremendous pressure on water supply operations across the country. Please use water sparingly, as this assists in adequately replenishing reservoir levels.

  To report water interruptions, please send a WhatsApp to our dedicated Service Line on 0769510768. Residents can also send an email to **engineering. services@stellenbosch.gov.za**. It is vital that we all do our bit to conserve and save water. We know South Africa is considered a water scarce country.

  Residents are asked to use water sparingly because of the declining dam water levels in the Western Cape. The sweltering high temperatures we have experienced combined with high water usage in recent weeks has contributed to the slight decline of the dam levels in the province

- Ek wil almal inlig van die 7de Adam Small Fees wat vanaf 23 – 25 Februarie 2024 in Pniel plaasvind. Die Pniël Erfenis en Kultuurtrust en ATKV bied die fees aan, met die Adam Small gedenklesing wat op Saterdag, 24 Februarie 2024 deur Prof Hein Willemse gelewer word.

- In 2023, Stellenbosch Municipality participated in the Municipal Waste Recognition Programme (MWRP). The primary objective of this programme is to assess municipalities' adherence to the National Environmental Management: Waste Act and to address national and provincial waste management priorities.

  Stellenbosch Municipality proudly secured the 2nd prize in the MWRP. As part of their recognition, the top 3 municipalities received infrastructure in the form of shipping containers, aimed at enhancing waste management initiatives. We have now taken possession of the shipping container, which will be designated for the collection and storage of electronic waste.

  Electronic waste, commonly known as E-Waste, includes ICT equipment, consumer electronics and household appliances. Due to the presence of both valuable and potentially hazardous materials in E-Waste, it is essential to refrain from disposing of it in regular bins. Instead, residents are encouraged to utilise the designated E-Waste drop-off facility.

  Proper recycling can recover valuable components from E-Waste, while hazardous materials can be treated to ensure safe disposal. Stellenbosch Municipality urges all residents to contribute to responsible waste management by using the E-Waste drop-off located at the Stellenbosch Waste Drop-off, situated off Adam Tas Road in Devon Valley.

- The municipality is expanding our landfill site at a cost of R126 million. The 1st phase will be completed by the end of March 2024. This will extend the lifespan of the landfill site by ± 20 years for our growing towns.

- I attended the US Dream Walk on 1 February 2024. For thousands of Maties the Dream Walk symbolises the official start to their academic journey – for all practical reasons a dream coming true. The moment you pass underneath that banner of the Dream Walk hanging across Victoria Street, you know that you are now officially a Matie. Welcome to all the students to our beautiful town.

- On 2nd of February 2024, I visited Huguenot Fine Chocolates in Franschhoek accompanied by the Municipal Manager and colleagues from the Western Cape Department of Economic Opportunities. This local business received support from the municipality and the Department through its Alternative Energy Support Programme. The Alternative Energy Support Programme was established to assist Small, Medium, and Micro Enterprises (SMMEs) in adopting alternative energy solutions, ensuring their operational continuity during instances of load shedding. A budget of R12.5 million was allocated to the project for the fiscal year 2023/24. The department initiated a pilot project, installing 12 Solar Backup systems at municipal SMME trading hubs across seven municipalities.

- I was honoured to be part of the unveiling of the Blue Heritage Plaque at Rhenish Primary School, a prestigious recognition bestowed upon schools with a rich history and significant impact on the surrounding community. Initiated by the Centre for Conservation Education and the Stellenbosch Heritage Foundation in 2015, the Blue Plaque Schools Project honours educational heritage and celebrates its impact on our community.

  Rhenish Primary School also joins other local schools, such as Paul Roos Gymnasium, Hoër Meisieskool Bloemhof and Pieter Langeveldt Primary School in having a Blue Heritage Plaque.

- Veels geluk aan Huis Horison, wie hul 50ste bestaansjaar vier vanjaar. Meeste Stellenbossers is bekend met Huis Horison en die goeie werk wat daar gedoen word. Dit is ‘n residensiële en beskutte werksentrum in Stellenbosch wat spesialiseer in die versorging van volwassenes met intellektuele gestremdheid. Mag daar nog 50 wonderlike jare vir julle voorlê.

- President Ramaphosa het gisteraand die datum vir die 2024 Nasionale en Provinsiale verkiesings aangekondig. Die verkiesing vind plaas op 29 Mei 2024. Alle ongeregistreerde kiesers word aangemoedig om aanlyn te registreer voor die datum van die verkiesing in die Staatskoerant geproklameer word. Daarna sal geen meet registrasies kan plaasvind nie.

3.	COMMUNICATIONS BY THE SPEAKER

- Due to the announcement of the National Election Day as 29 May 2024, there will be a change in the Council meeting scheduled for 27 May 2024. A communication in this regard will be distributed in due time, after a discussion between the Speaker, the Executive Mayor and the Municipal Manager;

- Item 11.6.2 has been withdrawn from the Council Agenda;

- Amendments were received on items 11.3.3; 13.1 and 13.2;

- The All Wards Meeting will take place on 2024-02-23 at 10:00 in the Council Chamber. All Ward Committee Councillors are requested to attend this meeting.

- The Ward Committee Policy is currently under review and was sent out for internal comments. The closing dated for comments is 2024-02-22 at 12:00 whereafter the Policy, with track changes, will be presented at the All Wards Meeting on 2024-02-23, whereafter it will be distributed for public participation.

- The following Councillors celebrated their birthdays:

  Cllr WC Petersen – 8 February
  Cllr S Schafer – 21 February

Thank you."

4.	COMMUNICATIONS BY THE MUNICIPAL MANAGER

- "Good morning and a warm welcome to

  The Executive Mayor,

  The Deputy Executive Mayor,

  The Speaker,

  Councillors,

  Our guests; and

  Officials

- It is with great sadness that I have to inform you that one of our employees, Mr Sam Houman passed away on 11 February 2024. Mr Houman was in the services of Stellenbosch municipality for the past 25 years at the water waste services operation in Franschhoek. Please keep his family, friends and colleagues in prayer during this difficult time.

- It is the month of Lent, a very important period in the Christian calendar as it is a period of reflection, renewal of our spiritual life as well as a period of forgiveness. Please keep that in mind.

- Today is also International Mother Language Day, it is important for a very diverse linguistic country like South Africa where we celebrate our language and our diversity.

- A delegation from Sweden is currently visiting our municipality. Stellenbosch is very privileged to have learned from the Swedish, and they from us, because we are unique in what we do and how we address our problems as South Africans. The program that we are doing with our Swedish partnership is the Local Democracy Program which are focussing on Gender Based Violence. Gender based violence in South Africa is currently amongst the highest in the world and we need to look at innovative ways to address this issue. We are particularly focussing on creating safe urban spaces for women and children and to address gender based violence in that way, but most importantly it is about looking at lighting, renewable lighting, even in times of loadshedding.

- It is election time and I urge all Councillors to treat each other and officials with the utmost respect.

5.	DISCLOSURE OF INTERESTS

Cllr R Pheiffer disclosed his interest in Item 13.1 and Speaker gave permission that Councillor Pheiffer be recused when this item is dealt with.

6.	APPLICATION FOR LEAVE OF ABSENCE

6.1 The following applications for leave of absence were approved in terms of the Rules of Order By-law of Council:-

Cllr A Hanekom - 21 February 2024
Cllr O Jooste - 21 February 2024
Cllr RS Nalumango - 21 February 2024
Cllr J Andrews - 21 February 2024 (from 11:30 due to illness)

7.	CONFIRMATION OF THE MINUTES OF PREVIOUS MEETING/S

7.1	19TH COUNCIL MEETING: 2024-01-24

The minutes of the 19th Council meeting: 2024-01-24 **were confirmed as correct without any changes**.

8.	STATUTORY MATTERS

8.1	MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR JANUARY 2024

Collaborator No: 762914
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 14 February 2024 & 21 February 2024

1. SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR JANUARY 2024

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2023/2024 to report the deviations to Council.

3. DELEGATED AUTHORITY

Council

FOR NOTING.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2023/2024) stipulate that SCM deviations be reported to Council. In compliance thereto, this report presents to Council the SCM deviations that occurred during January 2024.

20TH COUNCIL MEETING: 2024-02-21: ITEM 8.1

NOTED

the deviations as listed for the month of January 2024.

No report submitted as outstanding resolutions serves at Section 80 Committees.

10.	ITEMS FOR NOTING

10.1	REPORT/S BY THE EXECUTIVE MAYOR

10.1.1	REPORT ON THE DECISIONS TAKEN BY THE EXECUTIVE MAYOR ON MATTERS RESOLVED UNDER AUTHORITY DELEGATED TO THE EXECUTIVE MAYOR IN CONSULTATION WITH THE MAYORAL COMMITTEE [OCTOBER 2023 – DECEMBER 2023]

Collaborator No:
IDP KPA Ref No: Good Governance
Meeting Date: 21 February 2024

1. SUBJECT: REPORT ON THE DECISIONS TAKEN BY THE EXECUTIVE MAYOR ON MATTERS RESOLVED UNDER AUTHORITY DELEGATED TO THE EXECUTIVE MAYOR IN CONSULTATION WITH THE MAYORAL COMMITTEE [OCTOBER 2023 – DECEMBER 2023]

2. PURPOSE

To inform Council of the decisions taken by the Executive Mayor on matters resolved under the authority delegated to the Executive Mayor, in consultation with the Mayoral Committee, for meetings from October 2023 to December 2023 **(**see **APPENDIX 1)**.

3. DELEGATED AUTHORITY

As per the delegations from Council and powers vested in the Executive Mayor by legislation. In terms of the Stellenbosch Municipality System of Delegations (2019) EM12 and section 56(5) of the Structures Act, the Executive Mayor must report to Council at such intervals as the latter may determine on decisions taken.

The Executive Mayor is herewith reporting on the decisions taken by the Executive Mayor in consultation the Mayoral Committee.

4. EXECUTIVE SUMMARY

In terms of the Municipal Structures Act 117 of 1998 Section 56 (5) it is stated that:

"An Executive Mayor must report to the municipal council on all decisions taken by the Executive Mayor."

20TH COUNCIL MEETING: 2024-02-21: ITEM 10.1.1

NOTED

the decisions by the Executive Mayor taken in consultation with the Mayoral Committee meeting from October 2023 until December 2023.

11.3.1	UPDATED REPORT ON OUTDOOR DINING AND CONSIDERATION OF GENERAL CONDITIONS FOR OUTDOOR DINING

Collaborator No:
IDP KPA Ref No: Good Governance
Meeting Date: 14 February 2024 & 21 February 2024

1. SUBJECT: UPDATED REPORT ON OUTDOOR DINING AND CONSIDERATION OF GENERAL CONDITIONS FOR OUTDOOR DINING

2. PURPOSE

To provide feedback on the Outdoor Dining Applications as well as to submit General Conditions for Outdoor Dining for consideration and approval.

3. DELEGATED AUTHORITY

In terms of the approved System of Delegations the Executive Mayor, in consultation with the Executive Mayoral Committee, has the delegated Authority to consider applications for Lease Agreements, up to a contract value not exceeding R5M and not exceeding a period of 10 years.

The approval of lease agreements of three (3) years and less has been delegated to the Municipal Manager. The council approves all policies.

4. EXECUTIVE SUMMARY

During the Council Meeting of June 2022, it was resolved that communication was to be handed to all restaurants and businesses indicating that they need to apply for lease agreements in order to comply with the Outdoor Dining Policy of the municipality.

The department delivered the communication (letters requesting all restaurants that are using council property for outdoor dining to apply for a lease) and the municipality received applications from a number of restaurants and businesses and items have been prepared for consideration by the Mayoral Committee. 40 applications have served before the Mayoral Committee since August 2023 and 35 other establishments have received the communication to apply but have failed to file applications. Attached hereto as **APPENDIX 1** is an update on all establishments who have received formal notifications.

Council further needs to consider the general conditions for Outdoor Dining attached hereto as **APPENDIX 2** for approval. If the conditions are approved Council may withdraw approval for outdoor dining if establishments do not comply within a specific time period of if they do not meet the provisions of their lease agreements.

A further meeting was held with the Hermitage Advisory Committee on Monday, 29 January 2024, and they undertook revert back to the department within a week. We have to date not received inputs.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.3.1

RESOLVED (majority vote with 6 abstentions)

(a) that Council takes note of the report; and

(b) that the amended General Conditions on Outdoor dining be approved.

11.3.2	CONSIDERATION OF THE REQUEST FROM THE DEPARTMENT OF WASTE MANAGEMENT TO USE THE BUILDING ON A PORTION OF FARM 1653, LA MOTTE ALSO KNOWN AS LA REFUGE FOR OFFICE SPACE

Collaborator No:
IDP KPA Ref No: Good Governance
Meeting Date: 14 February 2024 & 21 February 2024

1. SUBJECT: CONSIDERATION OF THE REQUEST FROM THE DEPARTMENT OF WASTE MANAGEMENT TO USE THE BUILDING ON A PORTION OF FARM 1653, LA MOTTE ALSO KNOWN AS LA REFUGE FOR OFFICE SPACE

2. PURPOSE

For Council to consider the request from the Department of Waste Management to use the building on a portion of Farm 1653, La Motte for office space, given that Council already resolved in February 2023 to sell the property on auction.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The property known as Farm 1653 La Motte was initially sold to the Stellenbosch Municipality by the Cape Winelands Municipality. One of the properties on this farm is a building where an NGO known as La Refuge requested to use the building as a safe house for abused women and children.

On 31 March 2021, after a public participation process was followed, a decision was made by the Mayoral Committee that the property can be leased out for 12 months to the non-profit organisation, subject to certain conditions. The non-profit organisation was unable to implement the centre due to financial issues. The organisation was unable to provide the municipality with any plan or acceptance of the council resolution and for this reason never took possession of the property.

In February 2023 the future use of the property served Council again as an in-committee item where it was decided that the property is no longer needed to provide basic municipal services and that the property should be sold by way of auction.

The department started the process to appoint the auctioneer and prepared the terms of reference for the auction and requested a valuation of the property to be used as the reserve price at the auction. The latter has recently been provided and we were awaiting dates for the auction.

On 23 January 2024 a memorandum was received from Infrastructure Directorate indicating that they have an interest in using the property for the Waste Management Department and Roads and Storm Water Department who are both looking for offices in the area. (**ANNEXURE A)**. Since this property was initially used as offices by the Cape Winelands Municipality no assessment was done by the property maintenance department on what is it required to be able to use it as offices. The premises are currently vacant and can be occupied as offices immediately if Council agrees. There is no money on the budget of properties to deal with any renovations in this building nor is there capacity with the project manager to handle the project. Should the request be approved, the Infrastructure Department will have to take full responsibility for the renovations, costs and future maintenance.

Should Council consider the request favourably, the Council resolution of February 2023 should be revied and rescinded.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.3.2

RESOLVED (majority vote with 6 abstentions)

(a) that the use of the property for Infrastructure Services be approved;

(b) that the Council resolution dated 2023-03-22, be reviewed and rescinded; and

(c) that the use of the rest of the property be investigated and a report be brought back to Council.

11.3.3	BOTMASKOP ESTATE DEVELOPMENT PROPOSED LAND SWOP: BOTMASKOP ESTATE DEVELOPMENT ERF 3363 AND REMAINDER OF FARM 333, STELLENBOSCH

Collaborator No:
IDP KPA Ref No: **Good Governance**
Meeting Date: **14 February 2024 and 21 February 2024**

1. SUBJECT: BOTMASKOP ESTATE DEVELOPMENT PROPOSED LAND SWOP: BOTMASKOP ESTATE DEVELOPMENT ERF 3363 AND REMAINDER OF FARM 333, STELLENBOSCH

2. PURPOSE

To consider the request on a possible land swap between the Municipality and Botmaskop Estate Development.

3. DELEGATED AUTHORITY

Council must consider the matter.

4. EXECUTIVE SUMMARY

The Botmaskop Development was approved by the Municipality several years ago. On 16 April 2018 an encroachment agreement was entered into between the municipality and the Reset Properties on the land they are now requesting to swap.

The developers of the Botmaskop Development has now requested that council consider a possible land swap for this encroached area (adjacent to the Botmanskop Estate Development), portions of erf 3363 and Remainder of Farm 333 Stellenbosch for a similar size portion of land higher up against the mountain portion of portion 2 of farm 490 Stellenbosch. Both portions of land are 4.69 hectares.

The matter served before the Mayoral Committee in November 2023 and was referred back to obtain a valuation report on the properties and for further refinement. A valuation report has now been received and is attached to the item as **APPENDIX 3.** It is evident from the valuation report that the properties in question are the same in hectares as well as value.

The Property Management Policy provide that an exchange of Land Agreements may be concluded, subject thereto that reasons for justifying such a step is recorded in writing. Because this will also be seen as an asset transfer the asset transfer regulations will also be applicable to such a transaction including a public participation process to indicate the intended land swap. This land that is requested for the swap currently forms part of the Botmanskop nature area. The developers wrote a letter **(APPENDIX 4**) further clarifying their intention with the area.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.3.3

RESOLVED (majority vote with 5 abstentions)

(a) that the land indicated be considered for a potential land swap, subject to public participation process; and

(b) that the matter be brought back to the Council after the public participation process.

11.6.1	STATUS REPORT ON ALTERNATIVE ENERGY PROGRAMMES

Collaborator No:
IDP KPA Ref No: Green & Sustainable Valley
Meeting Date: 14 February 2024 & 21 February 2024

1. SUBJECT: STATUS REPORT ON ALTERNATIVE ENERGY PROGRAMMES

2. PURPOSE

To inform Council about the progress from the Municipality as well as Provincial initiatives regarding the loadshedding mitigation initiatives underway, in order to ultimately reduce the impact of electricity loadshedding in the Municipality.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

4.1 Eskom advised the Municipality to prepare an application to serve at their Loadshedding Committee, for the Municipality to be considered as curtailment customer. Upon receipt of the said application, Eskom then rejected the application. The matter has been escalated to Province for intervention with Eskom as well.

4.2 The Municipality has advertised a tender on 03rd February 2024, for the possible purchase of 20MW of electricity from an Independent Power Producer (IPP), which closes on 02nd March 2024.

4.3 The Supervisory Control and Data Acquisition (SCADA) project is continuing with implementation and the fitting of main substations with the additional equipment.

4.4 Municipal Court Building: Contractor is on site busy with the completion of the snag list for the retrofitting of solar installation.

4.5 The Generator tender has been concluded and orders for 5 generators have been placed for critical infrastructure locations and the LaMotte Fire Station with available funding.

4.6 The Department has developed further strategies and estimates have been developed with respect to the upgrades of the existing network which for example R80 million for the substation upgrade and R22 million per megawatt of battery storage, pending positive outcomes from the above items.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.6.1

NOTED

the Alternative Energy Generation strategies identified by the AEG Committee and the progress with the Alternative Energy Generation projects initiated.

11.6.2	ELECTRICITY BULK CONTRIBUTION LEVY

Collaborator No: 762679
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 14 February 2024 & 21 February 2024

1. SUBJECT: ELECTRICITY BULK CONTRIBUTION LEVY

2. PURPOSE

To inform Council on the progress of the review of the Electricity Bulk Infrastructure Contribution Levy calculation. The basis upon which development charges will be determined i.t.o. electricity will be as per NRS 069: Code of practice for the recovery of capital costs for distribution network assets.

3. DELEGATED AUTHORITY

The Municipality must adjust the unit cost for each municipal infrastructure service on an annual basis during the budget preparation process referred to in Section 21 of the Local Government: Municipal Finance Management Act 56 of 2003, to take account of inflationary impacts and must publish the adjusted unit costs within two months of approving the municipal budget. The Municipality will use the Contract Price Adjustment Factor as prescribed in the SAICE General Conditions of Contract for Construction Works (as amended) to determine the annual effect of inflation.

Where possible, unit costs for each municipal infrastructure service should be recalculated every five years to take into account the current and planned capacity for each municipal infrastructure service at the date of re-calculation, and any other relevant factors.

4. EXECUTIVE SUMMARY

A Development Charge ('DC') also known as Development Contribution Levy is a once-off capital charge to recover the actual cost of external infrastructure required to accommodate the additional impact of a new development on engineering services. A DC calculation is triggered by a land use change/ development application that will, if approved, intensify the municipal infrastructure demand. The threshold is the level up to which a new land use is deemed to have the same infrastructure impact as the existing permissible use and is determined based on a technical assessment.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.6.2

The Speaker **RULED** that this matter be withdrawn from the agenda.

11.6.3	UPDATE OF THE ELECTRICITY MASTER PLAN REPORT

Collaborator No: 762680
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 06 February 2024 & 21 February 2024

1. SUBJECT: UPDATE OF THE ELECTRICITY MASTER PLAN REPORT

2. PURPOSE

To submit the updated Electricity Master Plan to Council in line with the Service Delivery Budget Implement Programme Key Performance Indicator (SDBIP KPI). The Electricity Master Plan needs to be reviewed every five years in line with the Municipality's Distribution License conditions.

3. DELEGATED AUTHORITY

In terms of the Electricity Regulation Act, 2000 (Act no 4 of 2000), the National Energy Regulator of South Africa (NERSA) must monitor the supply and demand balance of the electricity systems to achieve an efficient, effective, sustainable and orderly development and operation of the electricity network.

To achieve this objective, National Energy Regulator of South Africa (NERSA) through its licensing conditions require municipalities to perform master planning which is valid for and reviewed every five years.

4. EXECUTIVE SUMMARY

The Electricity Masterplan is the strategic planning document that informs the Electrical Services Department in terms of planning, management, and budgeting processes for current and future Electrical Services projects. The Electricity Masterplan also informs the operations and maintenance of the electricity network infrastructure to address the increase in electricity demand and supply in the WC024.

The current Electricity masterplan was updated in September 2015 and was valid for five years therefore the current Masterplan was due for review by September 2020.

However due to the changes in the electricity industry (load shedding, Alternative Energy Generation (AEG) initiatives) the municipality delayed the reviewing of the Electricity Master Plan in order to finalise the Energy Master Plan first. This was done in order for the outputs of the Energy Master Plan to be used as inputs for the Electricity Master Plan study. The finalisation and approval of the Spatial Development Framework (SDF) further played a vital role in the updating of the Electricity Master Plan.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.6.3

RESOLVED (majority vote with 5 abstentions)

(a) that the content of this report be noted; and

(b) that the Updated Electricity Masterplan dated November 2023, detailed in **ANNEXURE A**, be noted and approved as stipulated by National Energy Regulator of South Africa (NERSA) through its licensing conditions requirements.

11.6.4	THE INTEGRATED WASTE MANAGEMENT PLAN FOR STELLENBOSCH MUNICIPALITY

Collaborator No: 762681
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 14 February 2024 & 21 February 2024

1. SUBJECT: THE INTEGRATED WASTE MANAGEMENT PLAN FOR STELLENBOSCH MUNICIPALITY

2. PURPOSE

To obtain Council's approval to circulate the draft Integrated Waste Management plan (IWMP) for public comment (**APPENDIX 1**).

3. DELEGATED AUTHORITY

Municipal Council, however, the mayor may request the Portfolio Committee to render assistance in terms of Section 80 of the Local Government Municipal Structures Act, Act 117 of 1998, as amended.

4. EXECUTIVE SUMMARY

In terms of Section 25 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) each council must, within a prescribed period after the start of its elected term, adopt a single, inclusive, and strategic plan (IDP) for the development of the municipality. In relation to waste management, the IDP is required to include sectoral environmental plans which would be an IWMP for waste management.

Stellenbosch Municipality has appointed JG Afrika (Pty) Ltd to draft a fourth generation IWMP. This IWMP has been internally reviewed and requires public comment to be finalised.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.6.4

RESOLVED (majority vote with 5 abstentions)

(a) that Council accepts the draft Integrated Waste Management Plan and approve that the draft Integrated Waste Management Plan be circulated for public comment;

(b) that the draft Integrated Waste Management Plan be submitted to Department of Environmental Affairs & Development Planning for comment. In this process internal stakeholders will also be given an opportunity to comment; and

(c) that relevant comments be incorporated for final approval and adoption by Council in a return item after the public participation process.

11.9.1	GRANT IN AID POLICY REVIEW

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **14 February 2024 & 21 February 2024**

1. SUBJECT: GRANT IN AID POLICY REVIEW

2. PURPOSE

To obtain council approval for the reviewed Grant in Aid Policy.

3. DELEGATED AUTHORITY

For approval by Council.

4. EXECUTIVE SUMMARY

Feedback reports and comments received during the April 2023 period for comments on the draft budget raised concern and led the department to reconsider the Grant in Aid policy with specific reference to:

a. Consequences relating to misappropriation of funds and
b. The misuse of the comment/appeal period after the closing date for applications.

The recommended changes in the attached GiA Policy **(ANNEXURE A)** aims to address the above concerns.

After in-principle approval of the reviewed Grant in Aid Policy was obtained at the Special Council Meeting on 27-09-2023, same was advertised for public comment in the Eikestad News of 26 October 2023 as Notice 138/23 **(ANNEXURE B)** with a closing date of 24 November 2023.

By the closing date, no comments were received.

Further amendments to paragraph 8.5 of the policy to read “a period up to 5 (five) years” were made at the Executive Mayoral Committee on 2024-02-14 were included in the reviewed policy attached as **ANNEXURE A.**

that the revised Grant in Aid Policy be adopted and recommended for approval by Council with the amendment of paragraph 8.5 on page 12 of the Grants in Aid Policy to read "a period of up to 5 (five) years.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.9.1

RESOLVED (majority vote with 1 abstention)

that the revised Grant in Aid Policy be adopted and approved by Council with the amendment of paragraph 8.5 on page 12 of the Grants in Aid Policy to read "a period of up to 5 (five) years.

13.1	APPOINTMENT OF AN APPEAL COMMITTEE: THE FRANSCHHOEK CLAIMANTS TRUST / EXECUTIVE MAYOR STELLENBOSCH LOCAL MUNICIPALITY & OTHERS

Collaborator No:
IDP KPA Ref No: *Good Governance & Compliance*
Meeting Date: 21 February 2024

1. SUBJECT: APPOINTMENT OF AN APPEAL COMMITTEE: THE FRANSCHHOEK CLAIMANTS TRUST / EXECUTIVE MAYOR STELLENBOSCH LOCAL MUNICIPALITY & OTHERS

2. PURPOSE

For Council to consider the appointment of an appeal committee of councillors to consider and hear the appeals lodged by the Franschhoek Gegriefde Grondeisers Groep and Wards 1 and 2 Committees that was referred back to the Municipality.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Franschhoek Claimants Trust ("the Trust") submitted a planning application for Erf 1692 Franschhoek for the removal of a restrictive title deed condition, rezoning, subdivision and departures in terms of section 15(2) of the Stellenbosch Municipality Land Use Planning By-law ("the By-law"). The land use application was approved by the Municipal Planning Tribunal on 18 August 2020. The approval letter gave notification of a right to appeal the decision to the Appeal Authority in terms of section 79(2) of the By-law. Two groups lodged appeals in terms of section 79(2), namely the Franschhoek Gegriefde Grondeisers Groep and a Group referred to as Ward 1 and Ward 2 Committees.

The land use application was submitted by Headland Planners (Pty) Ltd, who was appointed by Surrey Holmes (Pty) Ltd, a development company appointed by the Trust to develop the property. The appointment of Surrey Holmes by the Trust was affected by means of a consent document signed by eight of the Trust's trustees, which authorized Surrey Holmes to undertake a proposed construction of the property. Headland Planners was appointed in terms of a special power of attorney, supported by resolution of Surrey Holmes authorizing Headland Planners to submit the application on behalf of the Trust.

The basis of the appeal of the Franschhoek Gegriefde Grondeisers Groep was that the land use application did not contain proof of any mandate given by the claimants of the Trust to the Trust's trustees to enter into an agreement with Surrey Holmes; and also, did not contain proof of approved minutes of an Annual General Meeting ("AGM") which was held by the Trust on 19 August 2017.

The basis for the appeal of Ward 1 and Ward 2 was that there was no consultation with the claimants, and that the trustees failed to follow proper procedure in authorizing Surrey Holmes to develop the property. It was stated that at the AGM of 19 August 2017 the claimants did not support the recommendation by the trustees to develop the property in terms of a proposal presented by Surrey Holmes.

20TH COUNCIL MEETING: 2024-02-21: ITEM 13.1

Cllr R Pheiffer recused himself for the duration of this matter.

RESOLVED (majority vote with 5 abstentions)

(a) that Council takes note of the obligation as per the Court decision to again hear the appeal from the two groups by an appeal authority consisting of a committee of Councillors other than the current appeal authority (Executive Mayor).

(b) that Council approves the appointment of an appeal committee consisting of the councillors listed below as Appeal Authority to consider the appeals submitted by the Franschhoek Gegriefde Grondeiser Groep and Ward 1 and 2 Committees:

- Cllr Carli van Wyk
- Cllr Mynard Slabbert
- Cllr Lwando Nkamisa
- Cllr Wilfred Pietersen
- Cllr Nombulelo Ntsunguzi

(c) that the Committee be assisted by the attorney as per the legal panel.

13.2	RETURN ITEM: PREFERENTIAL PROCUREMENT PPOLICY AND SUPPLY CHAIN MANAGEMENT POLICY

Collaborator No: *8/1*
BUDGET KPA Ref No: Good Governance and Compliance
Meeting Date: 21 February 2024

1. SUBJECT: RETURN ITEM: PREFERENTIAL PROCUREMENT POLICY AND SUPPLY CHAIN MANAGEMENT POLICY

2. PURPOSE

To request Council to approve the revised Preferential Procurement Policy and Supply Chain Management Policies.

3. DELEGATED AUTHORITY

COUNCIL

4. EXECUTIVE SUMMARY

Stellenbosch Municipality approved a new Preferential Procurement Policy on 12 January 2023. However, a difference in interpretation arose between the Auditor – General, Provincial Treasury as well as several Municipalities in the Western Cape pertaining to the allocation of specific goals for goods and services under R30 000.00 (Thirty Thousand Rand). To address the interpretation challenges and eliminate any ambiguity the Municipality's Preferential Procurement Policy will be revised to include the allocation of specific goals for procurement of goods and services under R30 000.00 (Thirty Thousand Rand).

Amendments to the Supply Chain Regulations as per Government Gazette of 14 December 2023, No, 49863, issued by National Treasury also requires a revision to the Municipality's Supply Chain Management Policy. These amendments are to ensure the effective functioning of our Supply Chain Management system.

The revised Preferential Procurement and Supply Chain Management Polices was tabled at Council on 24 January 2024 and thereafter advertised for public comment (**APPENDIX 3**). At the time of writing the item no comments were received.

20TH COUNCIL MEETING: 2024-02-21: ITEM 13.2

RESOLVED (majority vote with 5 abstentions)

(a) that Council takes note of the comments received during the public participation process as well as the municipality's response, attached hereto as Appendix 4;

(b) that Council approves the revised Preferential Procurement Policy attached as Appendix 1; and

(c) that Council approves the revised Supply Chain Management Policy attached as Appendix 2;

14.	**CONSIDERATION OF NOTICES OF QUESTIONS AND NOTICES OF MOTIONS RECEIVED BY THE SPEAKER**

14.1	**QUESTION BY CLLR R HENDRIKSE OF GOOD PARTY: WHAT IS THE STATUS QUO AND OUTCOME OF THE APPEAL TO THE SUPREME COURT REGARDING THE HIGH COURT JUDGEMENT?''**

A Notice of a Question, dated 2024-02-08, was received from Councillor R Hendrikse.

The said Question is attached as **APPENDIX 1** and the appropriate response as **APPENDIX 2.**

20TH COUNCIL MEETING: 2024-02-21: ITEM 14.1

It is noted that Cllr R Hendrikse was satisfied with the written response from the Municipal Manager, and she had no follow-up question.

14.2	**QUESTION BY CLLR R HENDRIKSE OF THE GOOD PARTY: WHAT WAS THE COST OF THE APPEAL TO THE SUPREME COURT REGARDING THE HIGH COURT JUDGEMENT?''**

A Notice of a Question, dated 2024-02-13, was received from Councillor R Hendrikse.

The said Question is attached as **APPENDIX 1** and the appropriate response as **APPENDIX 2.**

20TH COUNCIL MEETING: 2024-02-21: ITEM 14.2

It is noted that Cllr R Hendrikse was satisfied with the written response from the Municipal Manager, and she had no follow-up question.

14.3	**QUESTION BY CLLR C NOBLE OF GOOD PARTY: PRE-EMPT EITHER JUDICIAL OR QUASI-JUDICIAL DECISIONS THAT COULD BRING COUNCIL INTO DISREPUTE**

A Notice of a Question, dated 2024-02-13, was received from Councillor C Noble.

The said Question is attached as **APPENDIX 1** and the appropriate response as **APPENDIX 2.**

20TH COUNCIL MEETING: 2024-02-21: ITEM 14.3

It is noted that Cllr C Noble was satisfied with the written response from the Municipal Manager, and he had no follow-up question.

14.4	**QUESTION BY CLLR C NOBLE OF GOOD PARTY: LEGAL STATUS: MR PIET SMIT?"**

A Notice of a Question, dated 2023-06-13, was received from Councillor C Noble.

The said Question is attached as **APPENDIX 1** and the appropriate response as **APPENDIX 2.**

20TH COUNCIL MEETING: 2024-02-21: ITEM 14.4

It is noted that Cllr C Noble was satisfied with the written response from the Municipal Manager, and he had no follow-up question.

14.5	**QUESTION BY CLLR M VAN STADE OF GOOD PARTY: HOW MANY IMMOVABLE PROPERTIES OF THE MUNICIPALITY WERE DISPOSED OF BY WAY OF SALE, LETTING OR SERVITUDE REGISTRATION IN TERMS OF SECTION 14 OF THE MFMA AND THE MUNICIPAL ASSET TRANSFER REGULATIONS (MATR) UNDER THE FORMER PROPERTY MANAGER MR PIET SMIT?**

A Notice of a Question, dated 2024-02-13, was received from Councillor M Van Stade.

The said Question is attached as **APPENDIX 1** and the appropriate response as **APPENDIX 2.**

20TH COUNCIL MEETING: 2024-02-21: ITEM 14.5

It is noted that Cllr M Van Stade was not satisfied with the written response from the Municipal Manager and that he will submit his follow-up question in writing.

14.6	**QUESTION BY CLLR M VAN STADE OF GOOD PARTY: HOW MANY OF THESE PROPERTY TRANSACTION WERE LAWFUL AND FULLY COMPLIANT THE MFMA AND THE MUNICIPAL ASSET TRANSFER REGULATIONS?**

A Notice of a Question, dated 2024-02-13, was received from Councillor M Van Stade.

The said Question is attached as **APPENDIX 1** and the appropriate response as **APPENDIX 2.**

20TH COUNCIL MEETING: 2024-02-21: ITEM 14.6

It is noted that Cllr M Van Stade was not satisfied with the written response from the Municipal Manager and that he will submit his follow-up question in writing.

8.	STATUTORY MATTERS

8.1	MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR FEBRUARY 2024

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 20 March 2024 & 27 March 2024

1. SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR FEBRUARY 2024

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2023/2024 to report the deviations to Council.

3. DELEGATED AUTHORITY

Council

FOR NOTING.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2023/2024) stipulate that SCM deviations be reported to Council. In compliance thereto, this report presents to Council the SCM deviations that occurred during February 2024

5. RECOMMENDATION

that Council notes there were no deviations approved for the month of February 2024.

6. DISCUSSION / CONTENTS

6.1. Background/Legislative Framework

The regulation applicable is as follows:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations

Deviation from and ratification of minor breaches of, procurement processes

36. (1) A supply chain management policy may **allow the accounting officer**—
(*a*) To **dispense with the official procurement processes** established by the policy and to procure any required goods or services through any convenient process, which may include direct negotiations, but only—
(i) in an emergency;
(ii) if such goods or services are produced or available from a single provider only;
(iii) for the acquisition of special works of art or historical objects where specifications are difficult to compile;
(iv) acquisition of animals for zoos; or
(v) in any other exceptional case where it is impractical or impossible to follow the official procurement processes; and

(*b*) to ratify any minor breaches of the procurement processes by an official or committee acting in terms of delegated powers or duties which are purely of a technical nature.

(2) The accounting officer must record the reasons for any deviations in terms of sub regulation (1) (*a*) and (*b*) and **report them to the next meeting of the council**, or board of directors in the case of a municipal entity and include as a note to the annual financial statements.

6.2. Discussion

Reporting the deviations as approved by the Accounting Officer for February 2024:

No deviations were approved as indicated below:

None

6.3 Legal Implications

The regulation applicable is:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations: Deviations from and ratification of minor breaches of, procurement processes.

6.4 Staff Implications:

No additional staff implications

6.5 Previous / Relevant Council Resolutions

None.

6.6 Risk Implications

The Supply Chain regulations makes provision that deviations even provide a list of which deviations may be allowed and under what circumstances. The measures in place to deal with deviations mitigate the risk to an acceptable level. The auditor general also audit the deviations during the yearly audit.

6.6 Comments from Senior Management:

The item was not circulated for comment except to Municipal Manager.

6.7.1 Municipal Manager

Supports.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2024-03-20: ITEM 6.1

that Council notes there were no deviations for the month of February 2024.

8.2	ANNUAL REPORT OVERSIGHT REPORT 2022/23

Collaborator No: 3/4/5/2/32 X 8/1/2/6
IDP KPA Ref No: Good Governance and Compliance
Date: Council: 27 March 2024

1. SUBJECT: ANNUAL REPORT OVERSIGHT REPORT 2022/23

2. PURPOSE

To submit the Annual Report Oversight Report 2022/23 to Council for **Adoption**.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The draft Annual Report 2022/23 was referred by the Council on 24 January 2024, to the Municipal Public Accounts Committee (MPAC), which fulfilled the function of the Oversight Committee. The appointment and mandate of the MPAC / Oversight Committee were informed as per Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) Circular 32 of 2006.

Committee members, including the two co-opted members, have scrutinised the Draft Annual Report 2022/23 and requested, where required, responses from the relevant Directorates. The Annual Report 2022/23 was objectively reviewed by the MPAC Members to ascertain whether the Annual Report 2022/23 is a true and accurate reflection of the municipality's performance for the year under review.

The public was invited to attend a public hearing and to submit any representations on the Draft Annual Report 2022/23. All the councillors were also invited to attend the public hearing, which was held on 09 February 2024, and to deliberate on the Draft Annual Report 2022/23.

5. RECOMMENDATIONS

In accordance with Section 129(1) of the MFMA, it is **RECOMMENDED** to the Council:-

(a) that the Council, having fully considered the Annual Report Oversight Report 2022/23 of the Stellenbosch Municipality, **ADOPTS** the Annual Report Oversight Report 2022/23;

(b) that the Council, having fully considered the Annual Report 2022/23, attached as Annexure B to the Annual Report Oversight Report 2022/23, **APPROVES** the Annual Report 2022/23 without any reservations;

(c) that the Annual Report Oversight Report 2022/23 be made public in accordance with Section 129(3) of the MFMA, and;

(d) that the Annual Report Oversight Report 2022/23 be submitted in accordance with Sections 129(2) and 132(2) of the MFMA to the Auditor General of South Africa (AGSA), the Provincial Treasury: Western Cape, the Department of Local Government: Western Cape, and the Provincial Legislature: Western Cape.

6. DISCUSSION

6.1 Background

The format of the Annual Report 2022/23 is guided nationally by the MFMA Circular 63 of 2012, which seeks to establish uniform reporting by all municipalities. It is envisaged with this template that national and provincial governments can better benchmark municipalities when there is a single reporting framework.

The Draft Annual Report 2022/23 was completed and submitted to the Council on 24 January 2024 to be released for public comment. Consequently, the Draft Annual Report 2022/23 was released for public comment on 25 January 2024. Comments on the Draft Annual Report 2022/23 closed on 23 February 2024. No feedback from the community was received on or before 23 February 2024.

However, the Provincial Treasury made a written submission to the municipality on 23 February 2024. This submission was tabled in the MPAC on 29 February 2024.

All directorates were presented with the opportunity to review their information and provide feedback at the MPAC.

The MPAC's Annual Report Oversight Report 2022/23 is attached hereto as **ANNEXURE A.**

Commentaries from the MPAC and responses from the Directorates are incorporated as **ANNEXURE A** of the MPAC's Annual Report Oversight Report 2022/23.

The Final Annual Report 2022/23 is attached to the MPAC's Annual Report Oversight Report 2022/23 as **ANNEXURE B.**

6.2 Financial Implications

There are no financial implications beyond that which has been provided for in the 2022/23 MTREF Budget.

6.3 Legal Implications

In terms of Section 129(1) of the MFMA:

"The council of a municipality must consider the annual report of the municipality and of any municipal entity under the municipality's sole or shared control, and by no later than two months from the date on which the annual report was tabled in the council in terms of section 127, adopt an oversight report containing the council's comments on the annual report, which must include a statement whether the council has -

(a) approved the annual report with or without reservations;

(b) rejected the annual report; or

(c) referred the annual report back for revision of those components that can be revised."

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

Addressed in the item.

6.6 Previous / Relevant Council Resolutions

Item 8.1 of the 19th Meeting of the Council of Stellenbosch Municipality.

CHAPTER 1: EXECUTIVE MAYOR'S FOREWORD AND EXECUTIVE SUMMARY

COMPONENT A: EXECUTIVE MAYOR'S FOREWORD

It is a privilege to present the Annual Report of Stellenbosch Municipality for the 2022/23 financial year. This report continues the tradition of the municipality's transparent reporting and aligns with the latest governance standards, including the 2016 King Report on Corporate Governance for South Africa (King IV) and international integrated reporting standards.

The dedication of both our municipal team and our residents, who have embraced our vision of transforming into a true Valley of Opportunity and Innovation, has inspired me in my role as Executive Mayor over the previous financial year.

Our municipality, with its diverse towns, remains a beacon for the rest of South Africa, demonstrating what can be achieved through collaborative efforts towards a shared vision of a better future.

I extend my gratitude to the residents, stakeholders, investors, and visitors for their ongoing support and constructive engagement. Your commitment keeps us accountable and propels us forward in realising our goals.

Building on the accomplishments of the previous financial year, often in the face of significant challenges, I am confident that together the municipality will continue to make substantial progress in the years ahead. The Stellenbosch Municipality, both in its management and political dimensions, stands resilient, providing a solid foundation to enhance the well-being of our community.

This report offers insights into the municipality's financial, operational, social, and environmental performance from 01 July 2022 to 30 June 2023. It also reflects on our progress towards the objectives outlined in the Integrated Development Plan (IDP).

Stellenbosch Municipality maintains a robust position with stringent financial controls and a commitment to good governance. Our unwavering stance against misconduct and corruption ensures that every public penny contributes to the welfare of our citizens.

The Council remains steadfast in prioritising the maintenance, upgrade, and development of our infrastructure. Special attention has been given to bulk infrastructure upgrades and critical infrastructure maintenance to ensure sustainable service delivery.

Team Stellenbosch's resilience and collaborative spirit, both within the government and among residents, are commendable. I extend my appreciation to every municipal employee contributing to excellent service delivery, making our municipality even greater. May this report inspire us all to intensify our efforts to position Stellenbosch as one of the best-run and financially stable municipalities in the country.

The content of this report aligns with key deliverables in the municipality's IDP and sector plans, reflecting our commitment to addressing challenges within our strategic focus areas and long-term vision.

I believe the 2022/23 Annual Report provides a comprehensive overview of the administration's financial, operational, social, and environmental performance for the past 12 months.

_____

ADV GESIE VAN DEVENTER
EXECUTIVE MAYOR

COMPONENT B: MUNICIPAL MANAGER'S OVERVIEW

As we reflect on the accomplishments and challenges of the 2022/23 financial year, I am delighted to share that Stellenbosch Municipality has demonstrated commendable performance in service delivery, governance, and financial management.

The past year brought both trials and triumphs, with challenges like loadshedding testing the resilience of our residents, officials, management team, and stakeholders. Despite these hurdles, we collectively emerged stronger and more united.

This report offers insights into the municipality's performance over the past 12 months, highlighting our ability to navigate challenges and maintain essential services.

While unavoidable delays affected construction projects, essential municipal service delivery and emergency services remained uninterrupted. The transition between the two councils during the local government election was seamless, a testament to the maturity of our organisation and its leadership.

I take pride in the clean audit opinion once again received from the Auditor General of South Africa (AGSA). This achievement reflects good management, effective control measures, and compliance with audit requirements. My heartfelt appreciation goes to the management team, officials, and the Council for their dedication to maintaining our clean audit status.

The Draft Annual Report for 2022/23 highlights the fiscal health of Stellenbosch Municipality, with all senior management positions filled and all municipal departments fully operational, albeit with some capacity constraints in our planning department.

Our caring local government has continued to make sizable investments in infrastructure development, maintenance, and upgrades under the guidance of our values of innovation, integrity, accountability, and transformation. Key priorities include safety and security, ensuring dignified living opportunities, and fostering an environment conducive to economic growth.

Our commitment is not rooted in promises but in measurable outcomes. We remain open to resident scrutiny, monitoring commitments, and taking action if they are unfulfilled. My gratitude to all municipal employees, management, and executives for their diligence, passion, and hard work over the past year. It is an honour to be part of a municipality dedicated to making a positive difference in the lives of its constituents.

I extend special thanks to our directors and senior management for their exemplary leadership and guidance. Your strategic vision has been instrumental in navigating the challenges faced and achieving the successes outlined in this report.

Stellenbosch is steadfast in overcoming these challenges that are within our control despite a challenging economic environment that includes higher-than-normal inflation, supply chain disruptions, the effects of climate change, and energy security issues. Collaboration with stakeholders will be instrumental in building resilience.

I extend sincere appreciation to the Executive Mayor and Mayoral Committee, the entire Council, the Audit and Performance Audit Committee (APAC), my management team, and all officials for their contributions towards realising our vision of becoming a true Valley of Opportunity and Innovation for all.

May this Draft Annual Report 2022/23 serve as a reflection on the past year's challenges and achievements, motivating us to strive for even greater accomplishments as we navigate the future together.

_____

MS GERALDINE METTLER
MUNICIPAL MANAGER

COMPONENT C: EXECUTIVE SUMMARY AND MUNICIPAL OVERVIEW

1.1 Introduction

The Stellenbosch Municipal Draft Annual Report 2022/23 addresses the performance of the Stellenbosch Municipality in the Western Cape, South Africa, concerning its core legislative obligations. Local government must create a participatory framework that defines and enhances the relationship between elected leaders and their communities. This requires that the municipal councils provide regular and predictable reporting on programme performance and the general state of affairs in their locality.

The report reflects on the performance of the Stellenbosch Municipality for the period of 01 July 2022 to 30 June 2023. The layout of the annual report is prepared in terms of Section 121(1) of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA), in terms of which the municipality must prepare for each financial year.

The Annual Report comprises six chapters with the following broad overview:

- **Chapter 1:** An overview of the municipality's overarching strategy, accountability processes, social and demographic profile, and key highlights and challenges regarding finance, institutional transformation, and key basic service delivery.

- **Chapter 2:** Details about the governmental workings of the municipality and addressing the key aspects of good governance.

- **Chapter 3:** Highlights the municipality's performance for the year, with a focus on service delivery and the municipality's predetermined objectives.

- **Chapter 4:** Provides insight into the municipality's human resources and organisational management areas, focussing on organisational structure and legislation.

- **Chapter 5**: An overview of the municipality's financial performance, reflecting on the municipality's financial position, assets, cash flow, and intergovernmental grants received by the municipality.

- **Chapter 6:** An overview of the audit key findings as per the Auditor-General of South Africa.

The purpose is to establish a transformed and well-governed municipal environment that remains robust and will continue to stimulate the growth and well-being of the constituents of the Stellenbosch municipal areas.

STRATEGIC OVERVIEW

Vision, Mission, and Values

1.2 Strategic Focus Areas

The strategic focus areas within a municipality are the building blocks of the Council's strategy. The focus areas, as depicted in the diagram below, illustrate the expansion of the vision statement and create structure around how the municipality will achieve its strategic goals.

Table 1: Strategic focus areas

SFA 1: Valley of Possibility

Predetermined Objectives

1.1 Create an environment conducive to business development and job creation.
1.2 To facilitate and coordinate support for emerging entrepreneurs by utilising internal SCM processes and linking SMMEs with opportunities in the market.
1.3 To provide, upgrade, and maintain an effective engineering infrastructure to support effective service delivery.
1.4 To ensure the provision of non-motorised transport routes as a functional mode of transport.

SFA 2: Green and Sustainable Valley

Predetermined Objectives

2.1 Managing human use of the biosphere and its resources.
2.2 Enhancing the integrity of the environment is imperative for long-term sustainability.
2.3 Incorporating biodiversity into the environment is an imperative for long-term sustainability
2.4 Ensuring spatial sustainability.
2.5 Facilitate the efficient use of all forms of capital available to Stellenbosch.
2.6 Building human capacity and ability.
2.7 Efficient information management.

SFA 3: Safe Valley

Predetermined Objectives

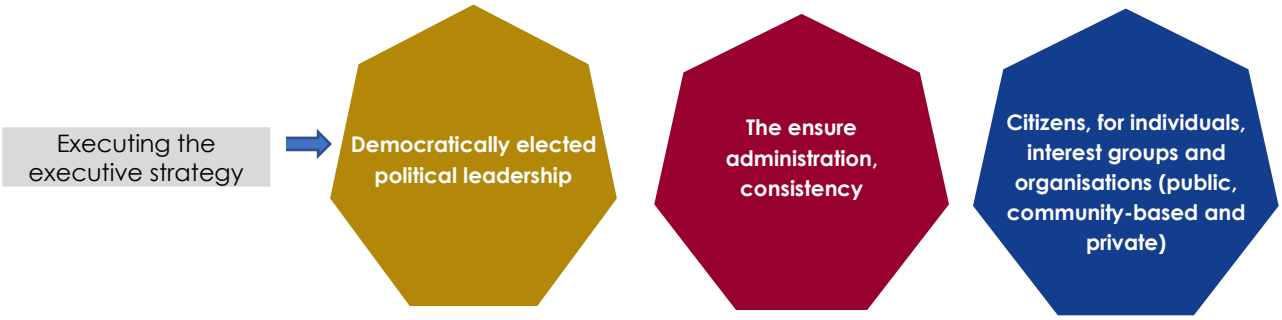
3.1 To implement an integrated safety strategy that incorporates multi-stakeholder engagement and social crime preventions.
3.2 To develop and implement institutional crime prevention strategies, with a focus on improved law enforcement and neighbourhood watches.

SFA 4: Dignified Living

Predetermined Objectives

4.1 To develop and maintain sustainable human settlements that will meet the diverse range of housing needs.
4.2 To develop and implement a social infrastructure master plan for the upgrading and maintenance of social facilities in all wards.
4.3 To involve and build the capacity of stakeholders in the planning and management (governance) of the areas where they live. (Promote participatory planning and integrated implementation).
4.4 To provide access to basic services for households in the WC024 area.

SFA 5: Good Governance and Compliance



Predetermined Objectives

5.1 To develop, align, and implement effective management information systems.
5.2 An effective asset management system to optimise the use of municipal assets.
5.3 To manage integrated development planning and the efficient measurement of predetermined objectives as per the regulatory framework.
5.4 To involve the community in the planning and management of programmes and projects impacting their ward(s),
5.5 To review municipal governance processes as per the Risk-Based Audit Plan
5.6 A skilled and capable workforce that supports the growth objectives of the municipal area
5.7 A responsive, accountable, effective, and efficient local government system
5.8 To implement an effective revenue management system.
5.9 To provide accurate and relevant financial information for decision-making.
5.10 To develop and implement a responsive, accountable, effective, and efficient customer care structure and system.

1.3 Core Principles in Executing the Strategy

This section refers to the linkage between political leadership, the administration, and the community. The diagram below illustrates the three components a municipality should encompass:

Figure 1: Core principles for executing the strategy

For sustainable municipal management, political leadership and the administration must work together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of its poorest communities is realised through extensive community input and ownership.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action with clear linkages to the IDP. These plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. These plans also help to fast-track the implementation of the IDP. This ensures that the focus areas of the IDP become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs, and all other stakeholders in the greater Stellenbosch.

Participatory processes present an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the ward priorities.

1.4 Alignment with Institutional Structures and Processes

The municipality focuses on prudent arrangements that provide internal and external alignment with its organisational strategies. This best supports the execution of the long-term goals and purposes, which require all stakeholder engagements, both external and internal, to be aligned with and committed to achieving the vision of the organisation. The administration strongly focuses on action against deliverables, which in turn creates effectiveness and efficiency in decision-making and delivering services to all citizens.

1.5 The tools of governance

Policy

Defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Indicating where resources should focus functionally or spatially, in what form, and when.

Plan Making

Legislation

Directing, constraining, and potentially rewarding the behaviour of different actors in society (in the interest of all citizens).

The process of directing, constraining, and potentially rewarding (potentially) the behaviour of various actors in society (in the best interests of all citizens).

Regulation

Fiscal Measures

Service fees, charges, and taxes are used to raise government revenue and direct action in support of policy and legislation (via fiscal "incentives").

The priorities and areas of government spending include investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policies and plans.

Financial Measures

Institutional Measures

Arrangements for decision-making, the allocation of powers, responsibilities, agreements, and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

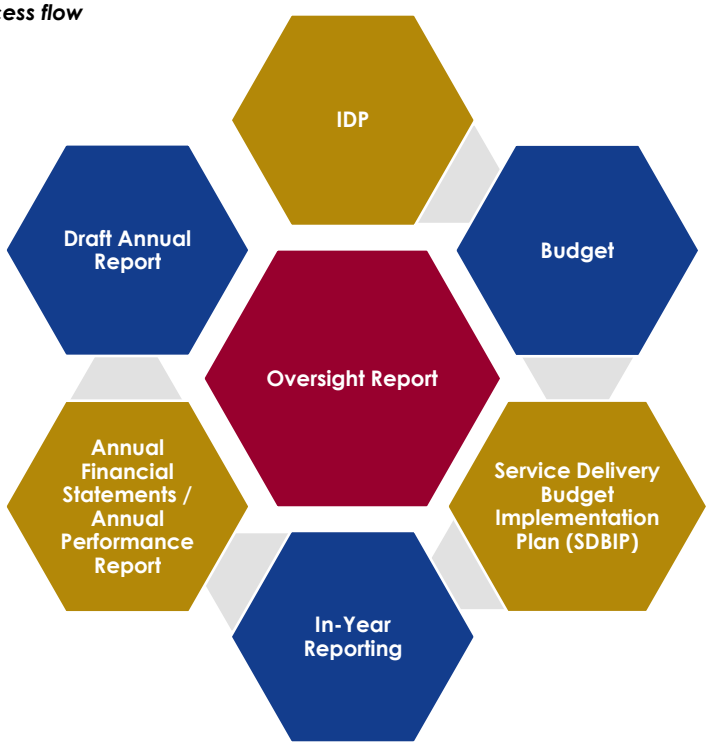
The approach taken to the management of government assets (land, public facilities, and so on).

Asset Management

Knowledge and information management

The government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

The "positive" and "negative" positions taken by the government on issues. This could be through the media, public meetings / engagements events, and so on.



Advocacy

Planning techniques are used to bridge the gap between local experiential knowledge, the technical needs of strategy development, and the demand for strategic frameworks to be ready to cope with rapid decision-making to reduce the risk of unforeseen issues.

Through extensive, organised information-sharing and planning workshops, this procedure aims to establish a starting position about how to guide the development and administration of the town. The strategy becomes the overarching strategic framework, which is then built on with technical work.

To ensure alignment between the Council's strategic processes is adhered to, the municipal accountability cycle needs to be implemented:

Figure 2: Accountability Process flow

1.6 Demographical Overview of the Greater Stellenbosch at a Glance

Table 2: Socio-economic summary

Population Estimates, 2022		Actual households, 2021	
Population	**175 411**	Households	**59 626**

Education	2022	Poverty	2022

Statistics South Africa 2022

1.7 State of the Greater Stellenbosch

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West / Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland.

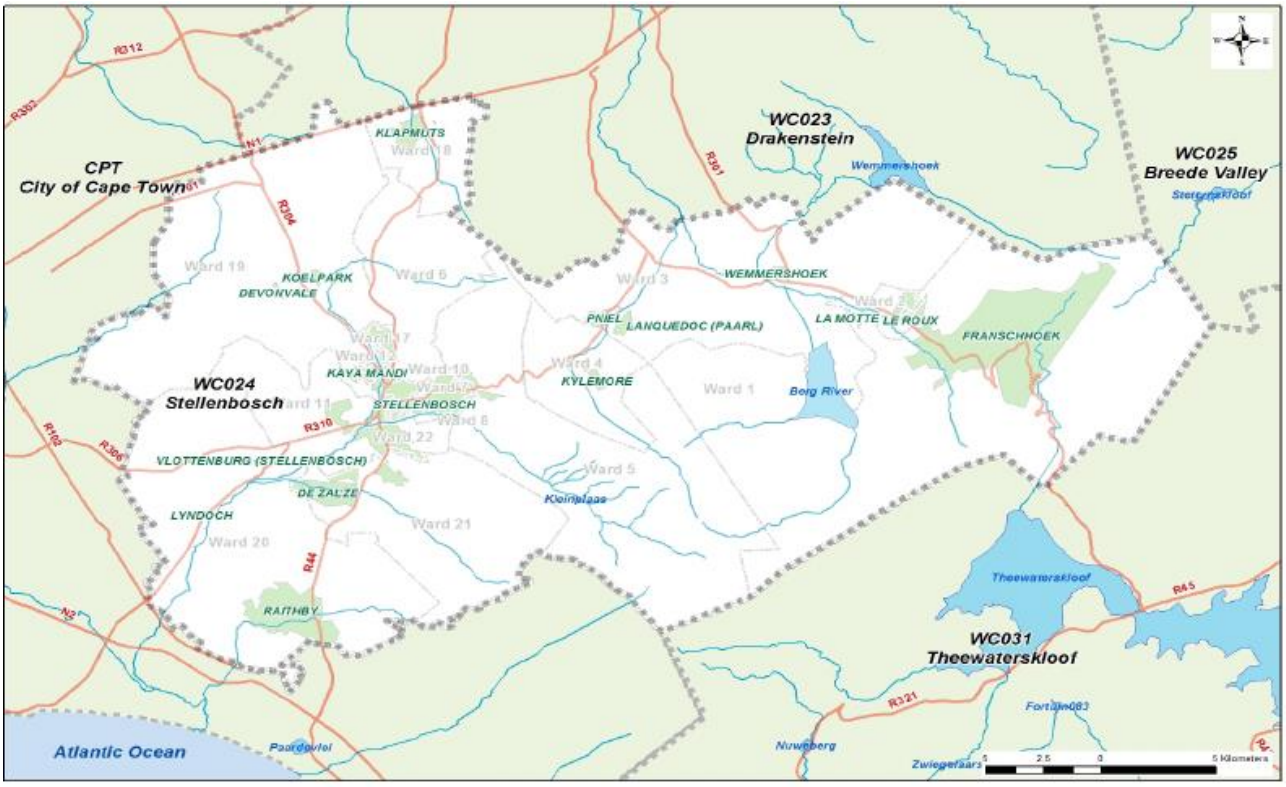
In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town harbour, the shipping portal to both the Atlantic and the Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km².

The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural communities such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as the Cape Dutch, Georgian, and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools as well as Boland College and the surrounding schools in the area. It has a strong business sector, varying from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first Wine Route in South Africa.



A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area is surrounded by arts and culture characters with facilities such as the Adam Small Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), Spier Amphitheatre, Dorp Street at Theatre, and Aan de Braak Theatre).

The following municipalities share their borders with Stellenbosch Municipality:

- The City of Cape Town (South);
- Drakenstein Municipality (North);
- Breede Valley Municipality (North-East); and
- The Theewaterskloof Municipality (South-West).

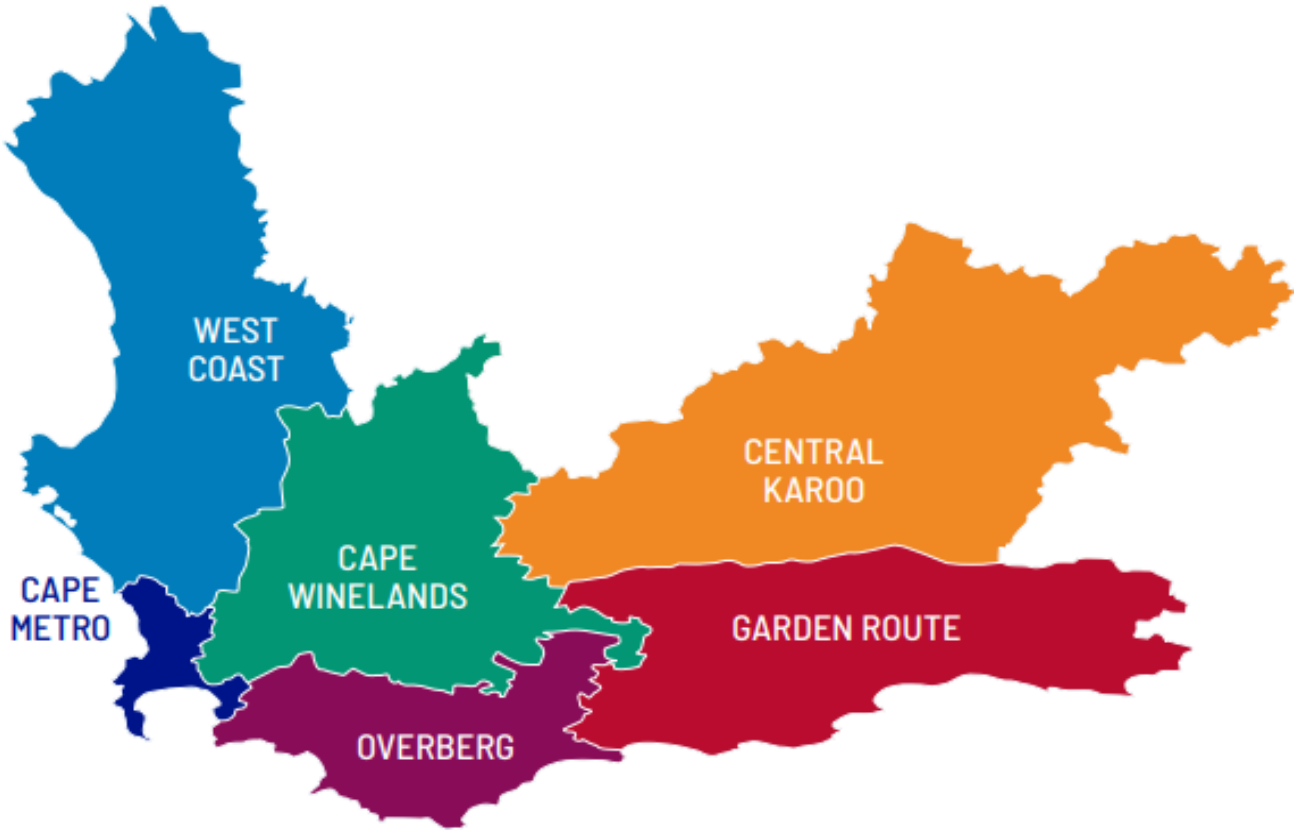
Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 1: Locality map of municipal boundaries

1.8 Ward Demarcation

The ward demarcation was structured according to the election outcomes on 01 November 2021 which increased from 22 to 23 wards for the year under review.

Table 3: Municipal Ward Demarcation



Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal, Domaine des Anges
3	Lanquedoc, Meerlust, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm, Maasdorp
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan (Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms, Kelsey Farm
7	Mostersdrift, Karindal, Rozendal, Uniepark, Simanswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland, Victoria Street, Bosman Street, Noordwal East, Riebeck Street
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Olienhout Street, Banghoek Rd, Acedemia, Bosman Street, Smuts Rd, Joubert Street, De Beer Rd, De Villiers Rd from Ryneveld Street to Cluver Rd on the left-hand side
11	Boundaries of the ward are: Kridge Rd, Herte Street, Skone Uitsig Rd onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Rd onto George Blake Street, Mark Street, Distillery Rd, Santhagen Rd, Swawel Avenue, Kanarie Rd, Tarentaal Rd, Bokmakierie Rd, Fisant Rd, Devon Valley Rd, Kiewiet Rd, Dagbreek Rd, Pelikaan Street, Patrys Rd, Hammerkop Rd, Loerie Rd, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A, Chris Hani Drive, 10th and 13th Street, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements (Thublitsha)
13	Kayamandi: Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4th and 5th Avenue, 10th, 12th and 14th Street, Long Street, Retreat Street, Forest Drive, School Crescent
16	The borders are Tenant Rd, Long Street, Crombi Rd to the end of Gabriels Rd. Asalea Rd, 2nd Road, Noble Rd, Bailey Rd, Eike Street, Curry Street, Hoop Rd, Pansy Rd, West Rd, Laai Rd, Anthony Rd, Carriem Rd, Archilles Rd, Bergstedt Rd, Davidse Rd, Cupido Rd, Pearce Rd, Robyn Rd, Gonzalves Rd, Hercules Rd, Chippendale Rd, Afrika Rd, Arnolds Rd, September Rd, Jakaranda Street, Short Rd, Quarry Rd, Middle Rd, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Rd towards Langstraat -Suid Rd, Kloof Street, Fir Street, Fontein Rd, Williams R towards Gabriels Rd towards February Rd, Valentyn Rd, Pool Rd, Raziet Rd, Ortell Rd, Rhode Rd, King Rd, Hine Rd, Hendrikse Rd, Rhode Rd), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Rd, Belladonna Street, Wildeklawer Welgevonden Boulevard, Olive Rd, Sonnedou Rd, Mountain Silver Rd, Silver Oak Rd, Froetang Rd, Katbos Rd, Everlasting, Fynbos Street, Sourfig Street, Scarlet Cresent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Streets.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmust Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate).

Ward	Areas
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultrey / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Street, Schroder Rd, Die Braak, Bird Street from Dorp Street, Dennesig area, Muller Rd, Banghoek Road, Reyneveld Street, Plankenburg Industrial area, and Kayamandi Corridor.

Below is a map of the Cape Winelands District concerning the provincial district boundaries:

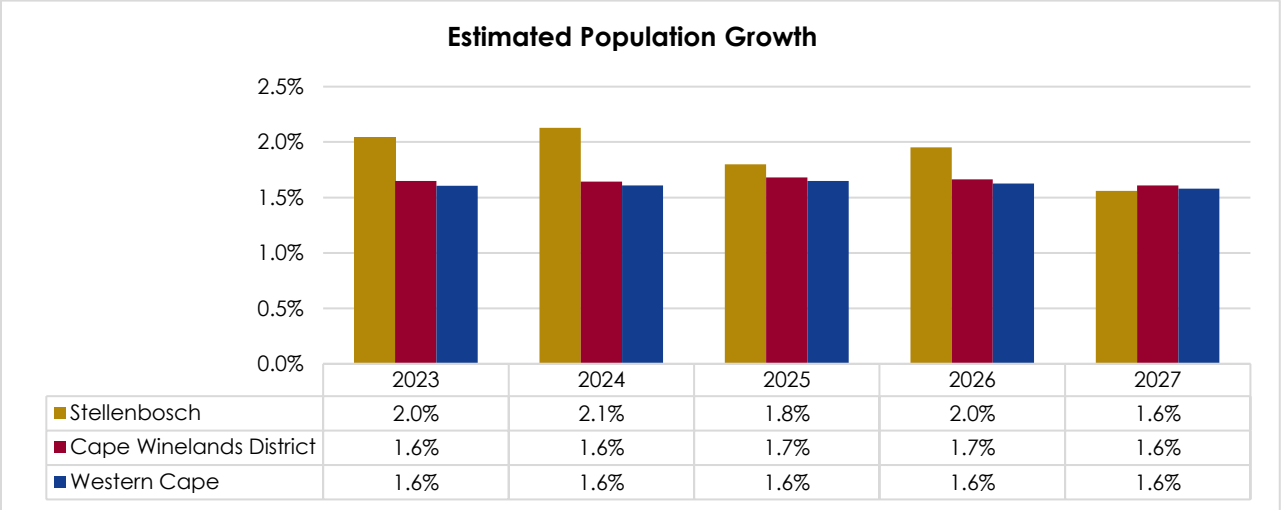
Map 2: Locality of Cape Winelands in relation to Provincial Boundaries

Below is a map of the municipalities of the Cape Winelands District:

Map 3: Locality map of Stellenbosch Municipality in relation to Cape Winelands District Boundaries

The Cape Winelands District Municipality is located close to the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg local municipalities.

1.9 Socio-Economic Context



The socio-economic information is primarily sourced from the census conducted by Statistics South Africa (Stats SA) for 2022, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer and Quantec.

The GDPR performance, risk, and vulnerability factors can be read in detail within the Local Government Socio-economic Profile 2023 for the Stellenbosch municipal area.

1.9.1 Population Growth and Household

In 2022, the Stellenbosch municipal area, a prominent region within the Cape Winelands, accommodated 21 per cent of the area's population, totalling **175 411** individuals. Projections indicate a steady rise, estimating a population of **192 951** residents by 2027, marking an average annual population growth rate of 2.0 per cent during this period. This growth rate surpasses the Cape Winelands District's average annual population growth rate of 1.7 per cent by 0.3 percentage points. The socio-economic implications of this demographic shift are multifaceted, impacting various sectors including housing, employment, and education within the region.

Graph 1: Estimated Population Growth

	2023	2024	2025	2026	2027
Stellenbosch	2.0%	2.1%	1.8%	2.0%	1.6%
Cape Winelands District	1.6%	1.6%	1.7%	1.7%	1.6%
Western Cape	1.6%	1.6%	1.6%	1.6%	1.6%

Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) Statistics South Africa 2022

Household size refers to the number of people per household.

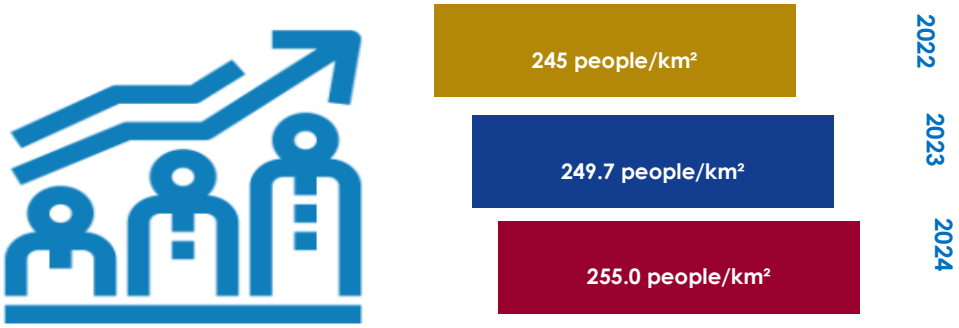
The average size of households is expected to remain an average of 2.9 individuals from 2022 to 2026. The trend of average household size could be attributed to a wide range of factors, including but not limited to underlying socio-economic factors like patterns in employment opportunities, educational access, and housing market dynamics that shape this trend.

Graph 2: Population and HH Growth

1.9.2 Population and urbanisation density

Population density is a vital metric, quantifying the number of individuals residing in a specific area. It is influenced by various factors such as economic conditions, social dynamics, connectivity, and accessibility, shaping the concentration of people within a defined region.

Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health, and service delivery risks. In 2022, the population density for WC024 was 245 recorded persons per square kilometer.



In order of highest to lowest, the table and figure depict the various local municipal areas compared as follows:

Table 4: Urbanisation Density per people/km2

Rapid Urbanisation density	Stellenbosch	Drakenstein	Breede Valley	Langeberg	Witzenberg
Population Density per people/**km²**	245	194	51	27	14

Source: Western Cape Local Government Social–Economic Profile 2023 (Stellenbosch Municipality) Statistics South Africa 2022

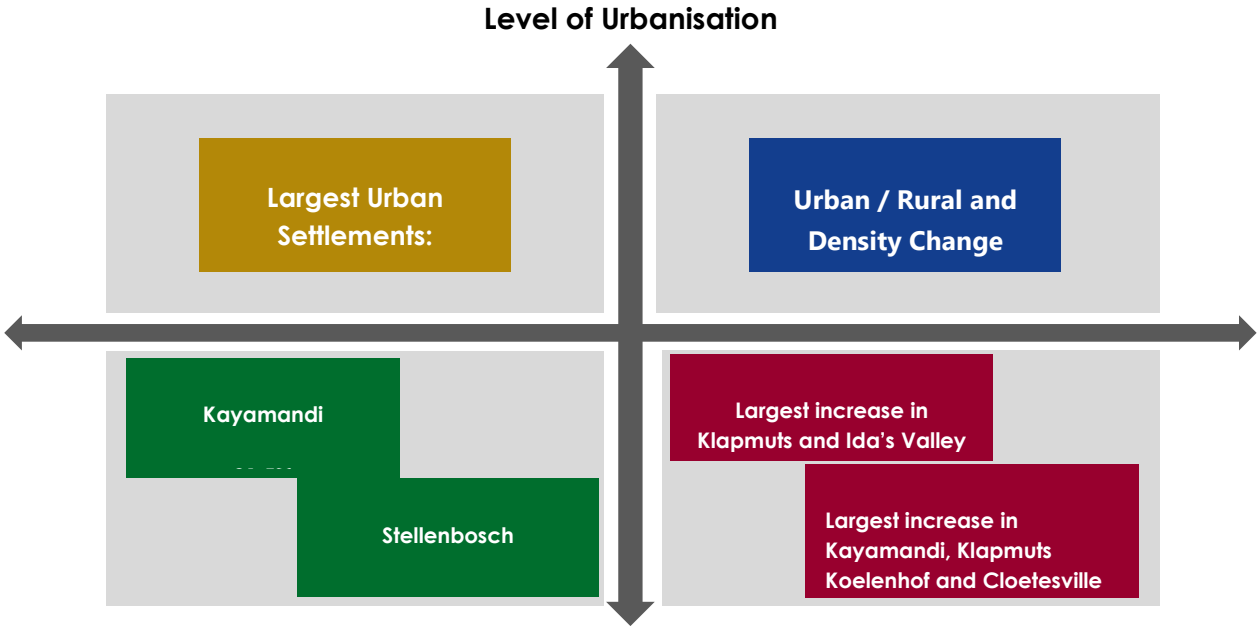
Figure 3: Urbanisation Density within WC024

Source: Western Cape Local Government Social–Economic Profile 2023 (Stellenbosch Municipality) Statistics South Africa 2022

According to the above comparison, Stellenbosch has the highest density in the Cape Winelands District. This is helped a lot by the fact that the Municipal Spatial Development Framework (MSDF) says that urban development should stay within the limits of the urban edge.

The Stellenbosch Local Municipality displays a significant urbanisation trend, with approximately 75.8 per cent of its population residing in urban areas. Out of a total population of around 200 000, roughly 50 000 individuals inhabit rurally classified regions, representing a quarter of the total populace.

Map 4: Urbanisation trend



Within the urban landscape, the greater Stellenbosch area accommodates approximately 100 000 residents, distributed across various suburbs, including Kayamandi (40 000 inhabitants), Stellenbosch town (over 22 000 residents), Cloetesville, Ida's Valley, and others.

Noteworthy urbanisation growth has been observed in specific areas such as Klapmuts, Ida's Valley, Koelenhof, Cloetesville, Paradyskloof, and Franschhoek, while a population decline has been noted in Dalsig.

The relatively modest change in urbanisation percentage between 2001 and 2021 can be attributed to several factors. Despite a population increase from 30 000 to 50 000 in rural regions, the proportion it represented remained relatively stable during this period. Although Kayamandi contributes significantly to the urban population, its relative share has diminished due to the substantial growth in smaller suburbs and locations, including Klapmuts, Ida's Valley, and Paradyskloof, among others. The urban edge surrounding Kayamandi is under pressure, raising concerns about potential population overflow into rural areas and necessitating further verification and quantification. It is important to note that the demarcation of suburb boundaries in Stellenbosch complicates the comparison of urbanisation trends, requiring possible regrouping for accurate analysis. This nuanced understanding of urban and rural dynamics is crucial for informed socio-economic planning and development initiatives within the Stellenbosch municipality.

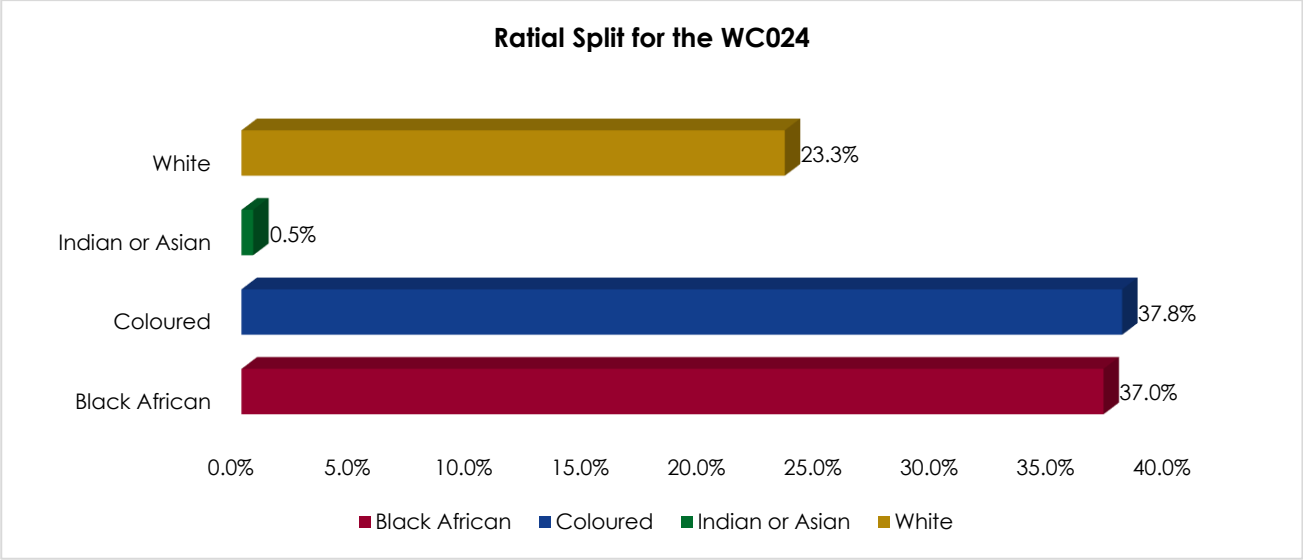
Figure 4: Level of urbanisation

Source: Western Cape Local Government Social–Economic Profile 2023 (Stellenbosch Municipality) Statistics South Africa 2022

1.9.3 Racial Split

The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. The population comprises Black African individuals, accounting for 37.0 per cent of the total, and the Coloured community, constituting 37.8 per cent. White residents make up 23.3 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 0.5 per cent.

This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.



The table and graph below indicate the ratio split within the Cape Winelands District.

Table 5: Racial Split

Race	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
Black African	28.2%	30.1%	27.6%	**37.0%**	29.1%	19.4%
Coloured	61.8%	64.1%	61.8%	**37.8%**	62.3%	70.6%
Indian or Asian	0.4%	0.2%	0.4%	**0.5%**	0.5%	0.3%
White	9.6%	5.7%	10.2%	**23.3%**	8.1%	9.6%

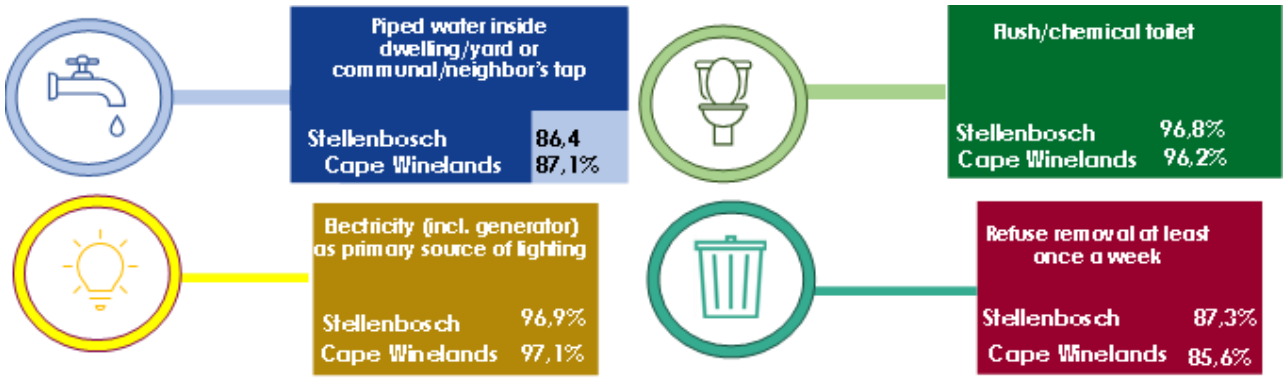
Source: Western Cape Local Government Social–Economic Profile 2023 (Stellenbosch Municipality) Statistics South Africa 2022

Graph 3: Racial split for the WC024

Source: Western Cape Local Government Social–Economic Profile 2023 and Statistics South Africa 2022

1.9.4 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources and refuse removal services, to ensure that households enjoy a decent standard of living.



This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2021. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

Housing and Household Services

During 2023, the Stellenbosch municipal area, which comprises 59 626 households, 87.3 per cent had access to formal housing, lower than the Cape Winelands District average of 88.8 per cent. The area also recorded a significantly higher proportion of informal dwellings, totalling 11.8 per cent, in contrast to the District's 10.3 per cent.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (86.4 per cent), flush or chemical toilet access (96.8 per cent), electricity access (including generators) for lighting (96.9 per cent), for lighting at 96.9 per cent and the removal of refuse at least weekly by the local authority at 87.3 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 5: Service delivery access levels (HH)

Source: Western Cape Local Government Social–Economic Profile 2023 and Statistics South Africa 2022

Free Basic Services

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total indigent households exclude all informal households and include formal households that have been registered as indigent households. The total i.t.o. free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. It also does not include the totals where the electricity distribution is conducted by ESKOM.

Per the approved Indigent Policy of the municipality, all households earning less than R6 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

The table below indicates the number of households receiving free basic services.

Table 6: Access to Free Basic Services

Year	Number of Households							
	Free Basic Water		Free Basic Sanitation		Free Basic Electricity		Free Basic Refuse Removal	
	Access	%	Access	%	Access	%	Access	%
2018/19	6 813	13.01	6 813	13.01	4 833	9.23	6 813	13.01
2019/20	6 666	100%	6 666	100%	4 932	100%	6 666	100%
2020/21	7 283	100%	7 283	100%	5 189	100%	7283	100%
2021/22	4 681	100%	4 681	100%	4 982	84.25%	4 681	100%
2022/23	5 744	100%	5 744	100%	5 744	100%	5 744	100%

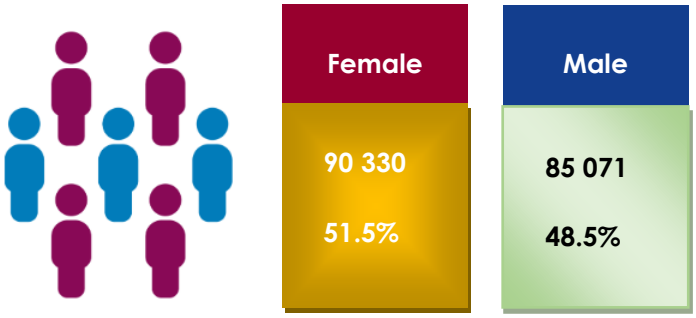
Source: Western Cape Local Government Social–Economic Profile 2023 and Statistics South Africa 2022

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2020. The strained economic conditions are anticipated to increase demand for these services, leading to a rise in the number of indigent households. However, this trend is area-specific and contingent on the qualifying criteria applied. These findings underscore the persistent challenges and socio-economic factors influencing housing and essential service access within the Stellenbosch municipal area, emphasising the need for targeted interventions to uphold citizens' constitutional rights and enhance overall living standards.

1.9.5 Gender Ratio

According to Stats SA, the Stellenbosch municipal area presented a gender ratio of 94.2, indicating that there are 94.2 men for every 100 women in the population. This ratio translates to 48.5 per cent males and 51.5 per cent females.

The slight increase in the ratio observed towards 2023 suggests a potential influx of working males to the area or a rise in female mortality rates. This demographic shift carries significant socio-economic implications, as it impacts workforce dynamics and social structures within the municipal area.



The table and figure below reflect the gender ratio within the Stellenbosch municipal area.

Table 7: Gender Ratio

Year	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2022	94,1	97.7	93.8	**94,2**	93.3	92.7
2023	98.7	110.0	98.4	**96.2**	94.4	96.9
2024	98.8	110.3	98.5	**96.3**	94.4	97.0
2025	98.9	110.6	98.6	**96.3**	94.3	97.1
2026	99.0	110.3	98.9	**96.3**	94.3	97.4

Source: Western Cape Local Government Social–Economic Profile 2023 and Statistics South Africa 2022

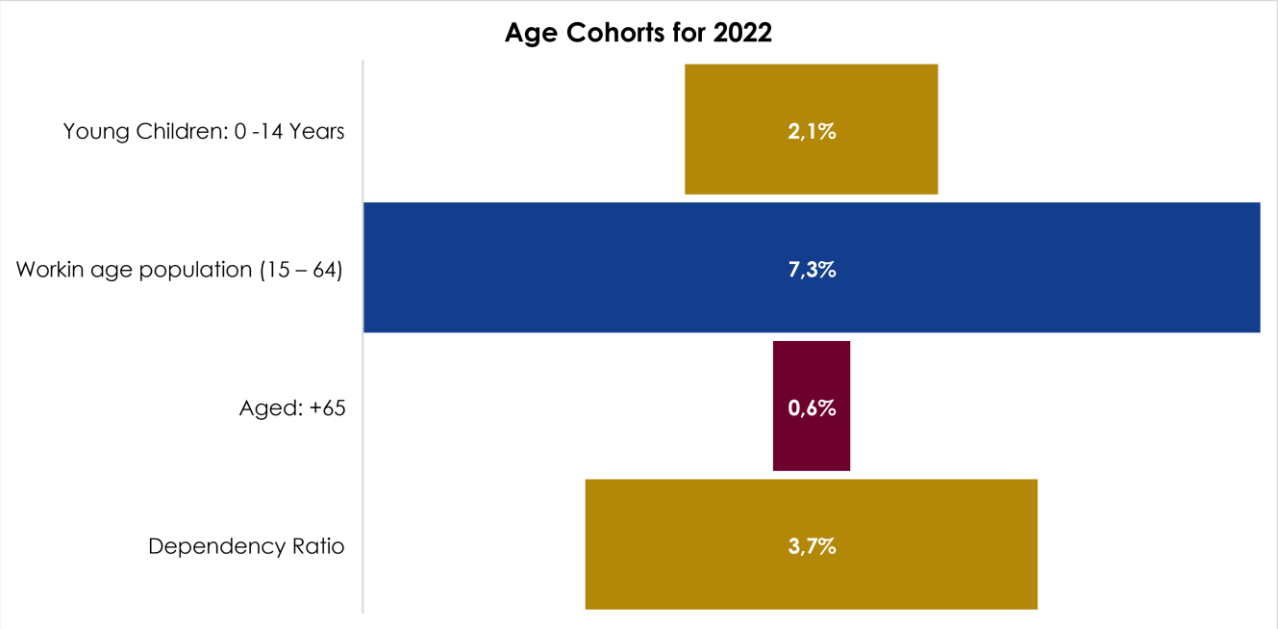


Figure 6: Ratio of % Females and Males

1.9.6 Age Cohorts

Within the Stellenbosch municipal area, a distinct age composition was apparent in 2022. The youth population was the largest, accounting for a substantial 73.1 per cent of residents.

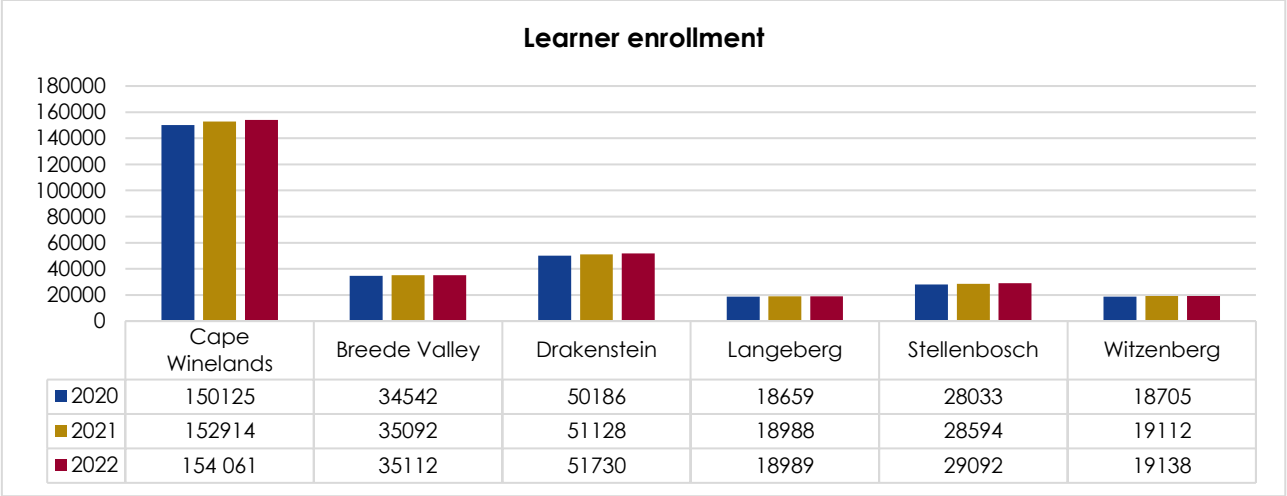
Figure 7: Age Cohorts

Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

Statistics South Africa 2022

1.9.7 Education

The socio-economic impact of education within municipalities is profound and complex, touching various aspects of community development and individual well-being. Quality education equips individuals with essential skills, knowledge, and critical thinking abilities, empowering them to participate meaningfully in the local economy. As the educational attainment level rises within a municipality, there is a corresponding increase in employment opportunities and higher earning potential for residents. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty.



All the data below are sourced from the Local Government Socio-economic Profile 2023 for the Stellenbosch municipal area.

1.9.8 The learner enrollment, learner-teacher ratio, and learner retention rate

Learner enrollment in Stellenbosch experienced a notable surge from 28 033 enrolments in 2020 to 29 092 in 2022 which reflects an increase of 1 059 learners. It is evident that the educational growth depicts a positive socio-economic trend within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities.

The graphs below depict the learner enrollments, learner-teacher ratio, and learner retention from 2020 to 2022.

Graph 4: Learner Enrollment

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	150125	34542	50186	18659	28033	18705
2021	152914	35092	51128	18988	28594	19112
2022	154 061	35112	51730	18989	29092	19138

It is crucial to establish healthy learner-teacher ratios to see the schools' capacity to accommodate the students. Lower learner-teacher ratios are associated with enhanced teacher-student interaction, fostering better-quality education. The 2022 Schools Realities Publications emphasise that government-paid teachers face high learner-teacher ratios, indicating larger class sizes. Despite a minor decrease from 26.8 students per teacher in 2020 to 26.6 in 2022, the ratio remains within the recommended range of 35:1 to 40:1.

This suggests relatively uncrowded classrooms, aligning with established standards and ensuring a conducive learning environment, ultimately impacting the socio-economic landscape positively.

Graph 5: Learner-teacher ratio

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	27.8	28.3	27.7	28.4	26.8	28.0
2021	28.0	28.0	28.0	28.4	27.2	28.0
2022	27.77	27.78	27.6	27.7	26.7	27.8

The learner retention rate measures the proportion of learners in Grade 12 who remained in Grade 10 two years prior. This can reflect essential socio-economic factors and personal circumstances that have a significant impact on education.

The inverse of the learner-retention rate is commonly referred to as the drop-out rate. The learner retention rates are influenced by a wide array of factors, including low socio-economic background, student attitudes towards education, overcrowded classrooms, critical thinking skills, study skills and other personal circumstances which can make it difficult for the learner to focus on education. Despite the learner retention rate progressing in the Stellenbosch municipal area improving from 79.1

per cent in 2021 to 82 per cent in 2022, 18 per cent of the learners did not complete their studies. Addressing these factors is necessary for encouraging a more conducive learning environment, ensuring higher retention rates, and ultimately enhancing the region's overall socio-economic landscape.

Graph 6: Learner retention rate

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	27.8	28.3	27.7	28.4	26.8	28.0
2021	28.0	28.0	28.0	28.4	27.2	28.0
2022	27.77	27.78	27.6	27.7	26.7	27.8

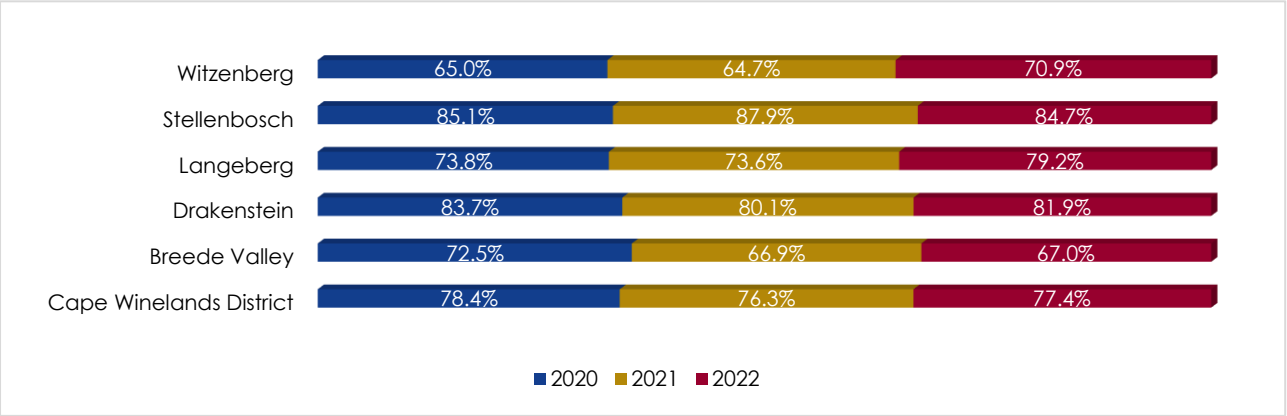
1.9.9 Education Infrastructure and Facilities

The number of schools within the Stellenbosch municipal area is recorded at 42 in 2022. Over the Medium-Term Expenditure Framework (MTEF), a substantial budget has been allocated for vital upgrades, additions, and the construction of new facilities in specific schools. This allocation is slated for use in enhancing the infrastructure of key educational institutions, including Aviation, Elsenburg Agri School, New Klapmuts Primary and High Schools, and New Stellenbosch Primary School. Such investments signify a proactive approach to bolstering the educational landscape, fostering an environment conducive to quality learning.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 66.7 per cent in 2022.

The provision of library facilities within schools emerges as a crucial factor in narrowing the academic achievement gap, granting students access to valuable information and directly correlating with improved educational outcomes, whereby 71.4 per cent are equipped with libraries.

1.9.10 Education Outcomes



Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market,

policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised.

The graph below depicts the Matric pass rates from 2020 to 2022.

Graph 7: Education Outcomes

1.9.11 Healthcare Facilities

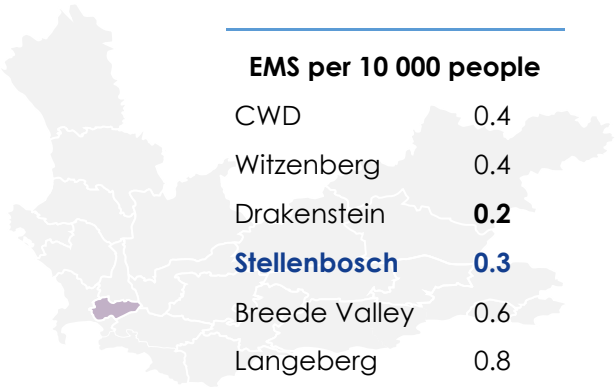
According to the LGSEP 2023, the Stellenbosch municipal area had 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites and 13 TB clinics. The municipal area has 14 out of the 78 primary healthcare facilities within the Cape Winelands District.

All the data below are sourced from the Local Government Socio-economic Profile 2023 for the Stellenbosch Municipal area and Department of Health.

The figure depicts the total healthcare facilities.

Figure 8: Healthcare facilities

1.9.12 Emergency Medical Services

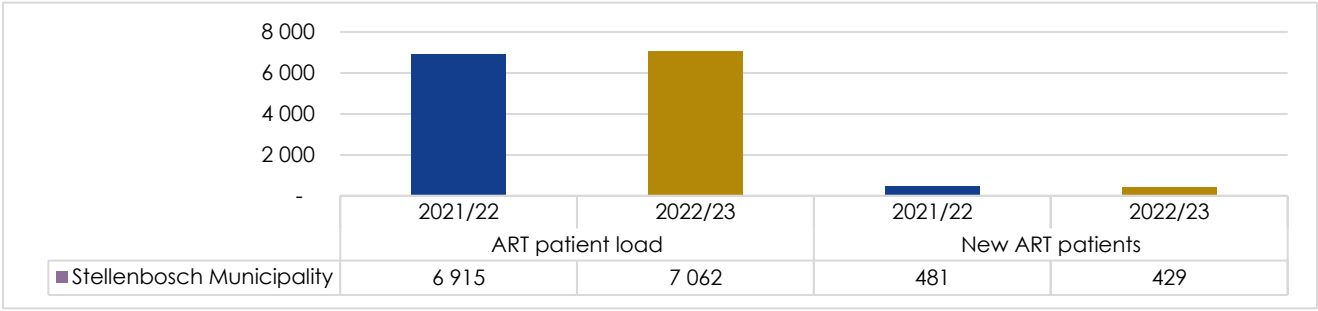


The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 9: EMS

Number of ambulances:

6



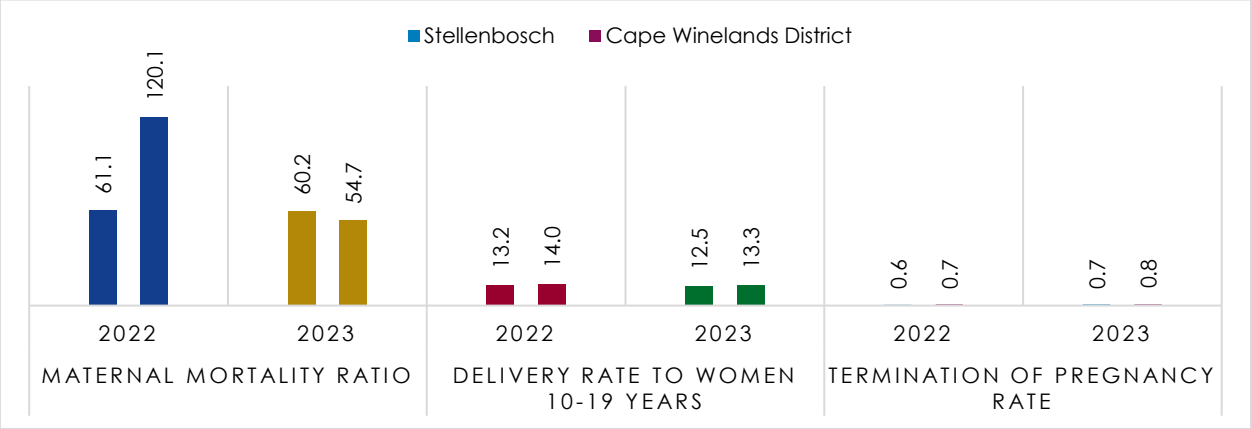
EMS per 10 000 people	
CWD	0.4
Witzenberg	0.4
Drakenstein	**0.2**
Stellenbosch	**0.3**
Breede Valley	0.6
Langeberg	0.8

1.9.13 HIV / AIDS and TB

The number of patients adhering to their ART treatment plans in the municipal area showed a slight increase, from 6 915 registered patients in 2021/22 to 7 062 in 2022/23, while the number of new patients receiving ART declined from 481 to 429 during the same period. Similarly, the number of registered patients receiving TB treatment exhibited an average annual decrease of 9.7 per cent between 2021/22 and 2022/23.

Graph 8: HIV/AIDS Management

1.9.14 Child Health



The immunisation coverage rate for children under the age of one in the municipal area worsened from 73.3 per cent to 64.5 per cent between 2021/22 and 2022/23. The overall Child Welfare and Development (CWD) rate also showed improvement, rising from 60.6 per cent to 62.2 per cent. However, there was a notable increase in malnourished children under the age of five, with severe acute malnutrition rising from 1.5 to 1.6 per 100 000 people between 2021/22 and 2022/23.

The CWD also increased from 1.8 per cent to 2.2 per cent while the provincial average changed from 0.9 to 1.3 per cent. The neonatal mortality rate (deaths per 1 000 live births before 28 days of life) for the municipal area declined from 6.3 in 2020/21 to 3.1 in 2021/22. The rate was still notably below the CWD average of 8.0. A total of 9.8 per cent of all babies born in a facility in the municipal area in 2021/22 weighed less than 2 500 grams, indicating possible challenges with long-term maternal malnutrition and poor health care during pregnancy.

1.9.15 Maternal Health

Graph 9: Maternal health

In 2021/22, the Stellenbosch municipal area recorded the lowest number of maternal deaths (61.1 per cent) and teenage pregnancies (13.2 per cent) in the CWD, however, this increased to 61.1 per cent (maternal deaths) and 13.2 per cent (teenage pregnancies) in 2021/22.

However, these numbers decreased to 60.2 per cent for maternal deaths and 12.5 per cent for teenage pregnancies in 2022/23. Meanwhile, the termination of pregnancy rate remained steady at 0.7 per cent during this period.

1.9.16 Safety and Security

All the data below are sourced from the Local Government Socio-economic Profile 2023 for the Stellenbosch Municipal area.

The dashboard below gives a snippet of the safety and security cases within the Cape Winelands Region:

Figure 10: Actual Numbers of reported crime

Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) and Department of Health

Drug-related Offences

Drug-related *crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.*

Drug-related crime within the Stellenbosch area increased from 1 224 cases in 2021/22 to 1 463 cases in 2022/23. The Cape Winelands District's drug-related offences surged from 6 047 in 2021/22 to 6 783 in 2022/23. When considering the rate per 100 000 people, with 734 drug-related offences per 100 000 people in 2022/23, the Stellenbosch area's rate is above the district's rate of 700 per 100 000 population.

Murder

Murder *is defined as the unlawful and intentional killing of another person.*

Within the Stellenbosch area, the number of murders de-escalated from 90 cases in 2021/22, reaching 77 cases in 2022/23. The Stellenbosch municipal area's murder rate (per 100 000 people) decreased from 46 in 2021/22 to 38 in 2022/23, reflecting a similar trend in the Cape Winelands District, where the rate increased from 45 to 41 for the same period.

Sexual Offences

Sexual offences *include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency, and human trafficking.*

In 2022/23, there were 207 sexual offences in the Stellenbosch area, compared to 989 reported cases in the Cape Winelands District. The incidence of sexual offences (per 100 000 people) in the Stellenbosch municipal area (104) was higher than that of the district (102) in 2022/23.

Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area declined from 262 in 2021/22 to 251 in 2022/23. This translates into a rate of 126 per 100 000 people in 2022/23, which is above the district's 79 per 100 000 people.

Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

Stellenbosch's rate of 436 residential burglaries per 100 000 people, which is well below the district's rate of 453 for 2022/23, indicates that the targeted strategies that were implicated to address these crime rates improved the safety and security in the community.

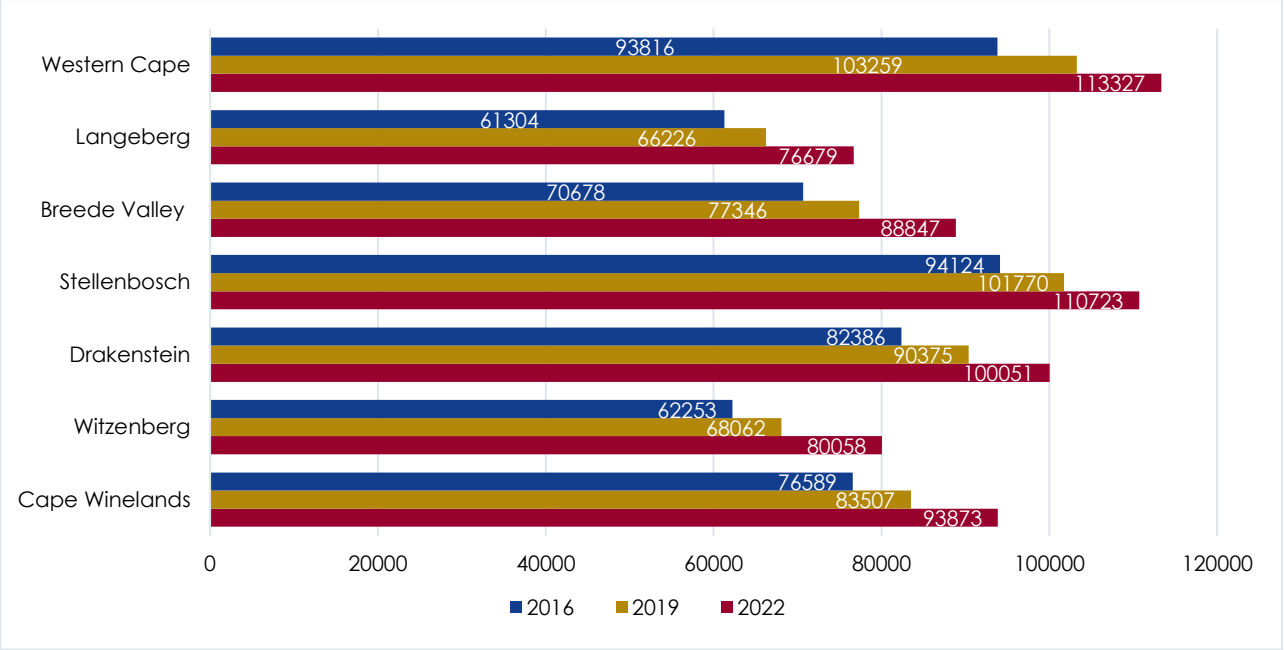
Common Assault

In Stellenbosch, the crime rate per 100 000 people for common assault showed a concerning upward trend with 510 reported incidents per 100 000 people, which increased from 527 in 2021/22 to 557 in 2022/23. This escalation in common assault cases per capita suggests a challenging security environment, which could potentially have socio-economic implications. Addressing this rising trend is vital to ensuring the safety and well-being of the community and fostering a secure environment for residents, businesses, and investors. Implementing effective crime prevention measures and community outreach initiatives may be essential to reversing this trend and creating a safer atmosphere conducive to economic growth and development.

Commercial Crime

In Stellenbosch, the crime rate per 100 000 people for commercial crime showed a steady upward trend over the analysed period. In 2020/21, there were 340 reported incidents per 100 000 people, which increased slightly to 443 in 2021/22 but then increased significantly to 528 in 2022/23. This fluctuation in commercial crime rates could indicate varying challenges faced by local businesses and law enforcement in combating economic offences. Addressing this issue is crucial as it directly impacts the business environment, investor confidence, and the overall economic stability of the municipality. Implementing robust measures to combat commercial crimes, such as fraud and embezzlement, is essential for fostering a secure and trustworthy business environment, supporting economic growth, and attracting investments in the Stellenbosch municipal area.

Damage to Property



A stable atmosphere is conducive to economic growth and development in Stellenbosch. In Stellenbosch, the crime rate per 100 000 people for malicious damage to property demonstrated a consistent downward trend over the analysed period. In 2020/21, there were 434 reported incidents per 100 000 people, which decreased to 414 in 2021/22 and slightly increased to 419 in 2022/23. This fluctuation indicates a positive development in addressing property damage-related crimes in the area. Lower incidents of malicious damage to property contribute to a more secure environment, instilling confidence in residents and potential investors, which can positively impact the socio-economic landscape. This trend reflects efforts to maintain public safety, enhance security measures, and promote business confidence across the municipality.

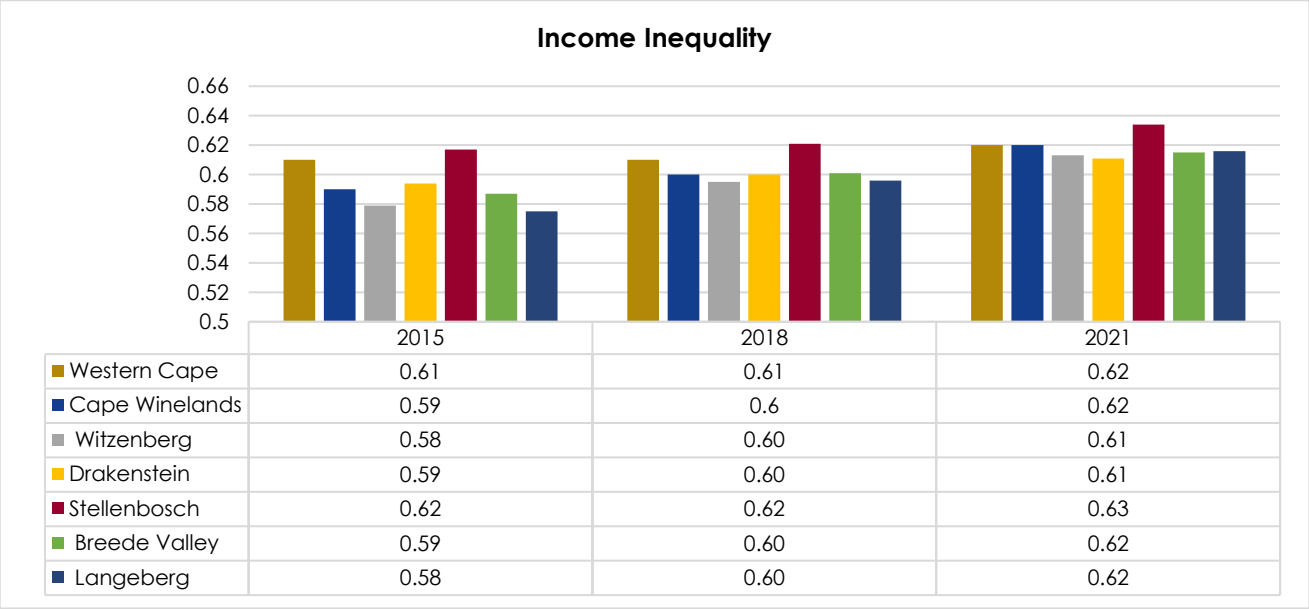
1.9.17 Poverty

GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the LGSEP 2023, the real GDPR per capita was R93 873, indicating that the Stellenbosch municipal area has grown significantly with a per capita income of R110 7, marking the highest figure in the Cape Winelands District for 2022. All the data below are sourced from the Local Government Socio-economic Profile 2023 for the Stellenbosch Municipal area.

Graph 10: GDPR per capita

Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)



Despite a moderate regression in the period between 2016 and 2022, this highlights the municipality's robust economic potential, particularly noteworthy considering the recent economic challenges posed by the recession and the global COVID-19 pandemic, which impacted economic activities regionally and globally.

Income Inequality

South Africa suffers amongst the highest levels of inequality in the world when measured by the commonly used Gini index. Inequality manifests itself through a skewed income distribution, unequal access to opportunities, and regional disparities.

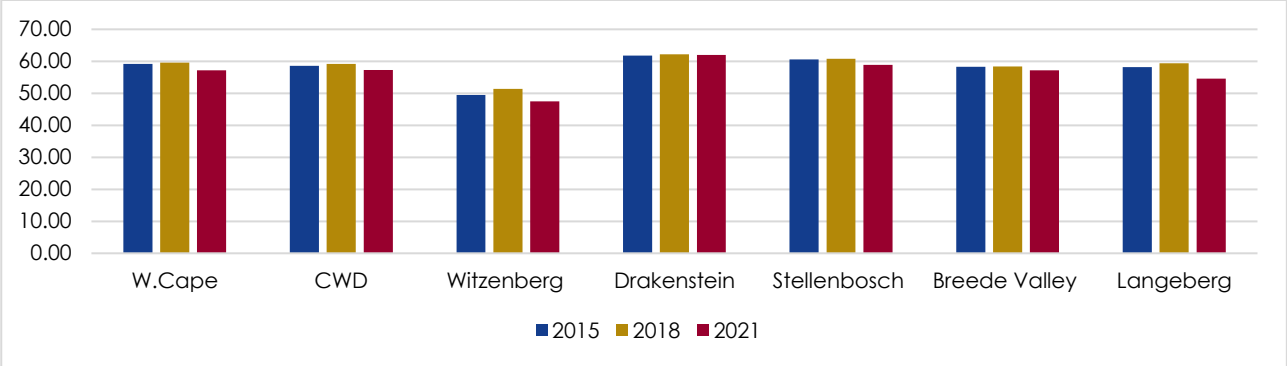
The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. In the Cape Winelands District, income inequality worsened to 0.69 in 2022, a trend expected to exacerbate due to the potential aftermath of the COVID-19 pandemic. Stellenbosch improved its income inequality, with inequality levels declining from 0.63 in 2021 to 0.61 in 2022, aligning below the district's trajectory.

Graph 11: Income Inequality

	2015	2018	2021
Western Cape	0.61	0.61	0.62
Cape Winelands	0.59	0.6	0.62
Witzenberg	0.58	0.60	0.61
Drakenstein	0.59	0.60	0.61
Stellenbosch	0.62	0.62	0.63
Breede Valley	0.59	0.60	0.62
Langeberg	0.58	0.60	0.62

Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

a) Poverty Line[1]



The Upper Bound Poverty Line[2] (UBPL) headcount ratio is the proportion of the population living below the UBPL i.e. that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

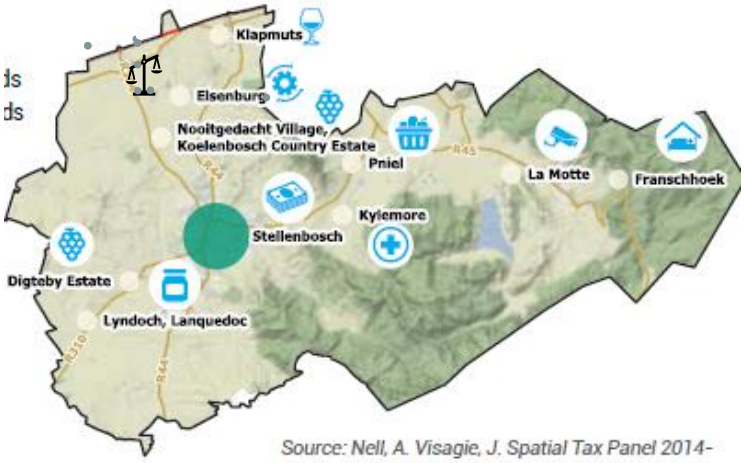
In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL. In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL, a slight improvement from 2016 and 2019. Stellenbosch and Drakenstein had the highest poverty rates in the Cape Winelands District, with Stellenbosch's 66.7 per cent slightly above the district's 64.8 per cent in 2022. Addressing these socio-economic challenges is essential for ensuring sustainable growth and development within the municipality.

[1] This refers to the amount of money that an individual will need to afford the minimum required daily energy intake. This is also commonly referred to as the "extreme" poverty line. *Source- STATSASA, Statistical Release, 2019. P0310.1*
[2] This refers to the food poverty line plus the average amount derived from non-food items of households whose food expenditure is equal to the food poverty line. *Source- STATSASA, Statistical Release, 2019. P0310.1*

Graph 12: Poverty Line

Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

1.9.18 Economy Labour Market Performance



In 2022, monetary intermediation emerged as the primary driver of formal employment in the Stellenbosch municipal area, employing **14 117** individuals. Beverage manufacturing, predominantly in the wine industry, followed closely, providing jobs for 7 142 people. All the data below are sourced from the Local Government Socio-economic Profile 2023.

Table 8: Top five sectors

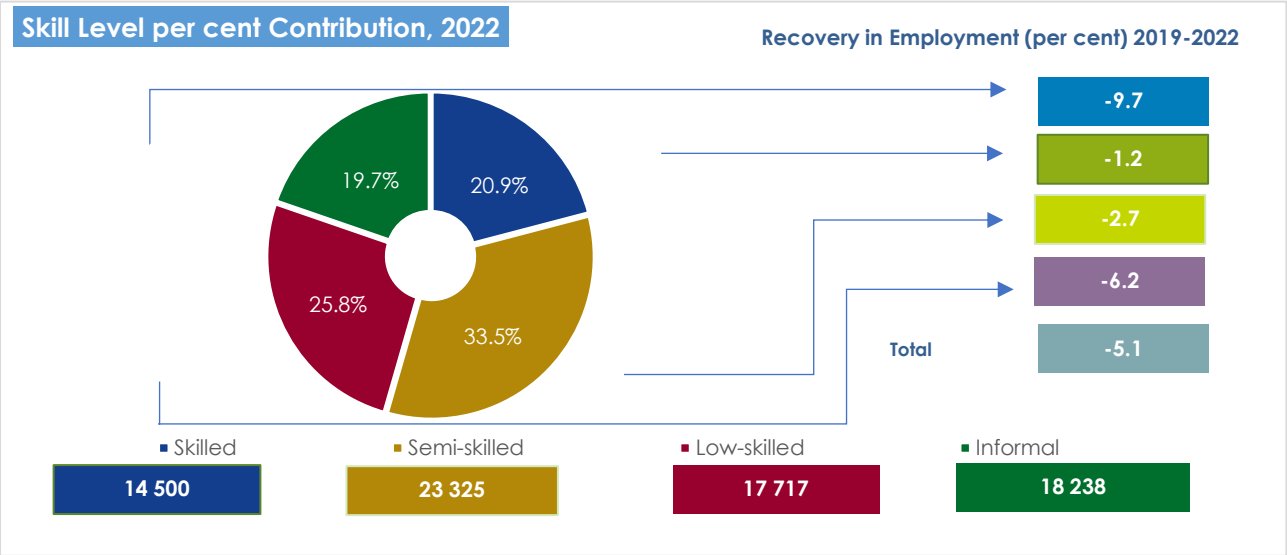
Sectors	Number of FTE Jobs
Monetary Intermediation	14 117
Manufacturing of beverages	7 142
Higher Education	5 450
Restaurants and mobile food service activities	4 864
Growing of perennial crops	4 761

5 Sectors Jobs

The significant disparity in median monthly incomes between these sectors, with figures of R27 446 and R8 940 respectively, vividly illustrates the pervasive socioeconomic inequality within the municipality.

Source: Nell, A. Visagie, J. Spatial Tax Panel 2014-

This inequality not only poses challenges to the well-being of residents but also carries implications for municipal revenue generation. Disparities in income levels can impact local tax revenues, potentially affecting the municipality's capacity to fund essential services and infrastructure projects.



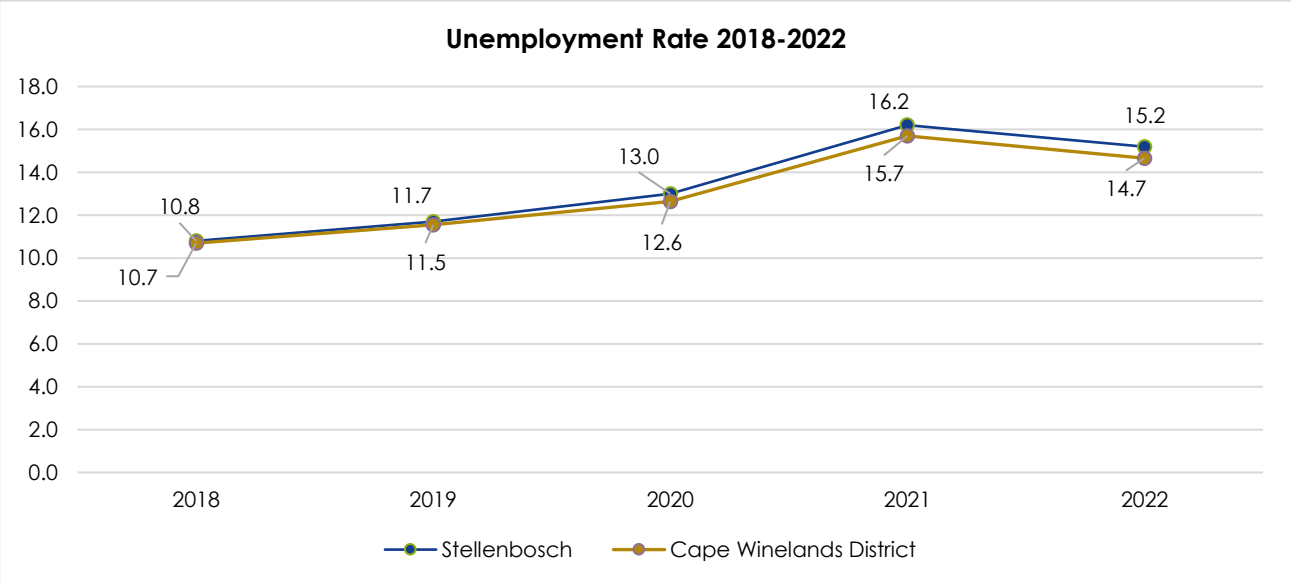
Addressing this inequality is crucial not only for social equity but also for sustaining a stable and prosperous municipal economy.

Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a diverse workforce composition, with 20.9 per cent classified as skilled workers and 33.5 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute

significantly to employment, accounting for 19.7 per cent of the workforce in 2021. However, a notable challenge exists for low-skilled workers, constituting 25.8 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic.

Graph 13: Skill level Contribution, 2022



Source: Western Cape Local Government Social–Economic Profile 2023 (Stellenbosch Municipality)

Unemployment

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for affected demographic areas.

Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

Graph 14: Unemployment Rate

Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

Free Basic Services per basic service

The provision of free basic services is summarised in the tables below.

Table 9: Free basic electricity to indigent HH

Electricity			
Financial year	Indigent Households		
	No. of HH	Unit per HH (kWh)	Value R'000
2017/18	6 453	100	6 216
2018/19	6 813	100	8 415
2019/20	4 932**	100	6 888
2020/21	5 198	100	7 711
2021/22	4 982	100	24 289
2022/23	5 744	100	24 822
*Average for the year **Only Indigent consumers who claimed free units

*Average for the year			

1.10 Basic Service Delivery Highlights and Challenges

1.10.1 Key Basic Services Delivery Highlights

It should be noted that the detailed highlights and challenges will be discussed in Chapter 3 under each respective service.

The following key basic service areas were achieved by the municipality:

Table 13: Key Basic Service Delivery Highlights

Service Area	Highlight	Description
Roads and Transport	The Distillery Road Bridge	This multi-disciplinary project had high historical significance and was completed on 28 February 2023, marking it the first bridge upgrade undertaken by the Stellenbosch Municipality.
Water and Wastewater Services	Capital Upgrades on Wastewater Treatment Works	Pniël WWTW Upgrade to 4.5MLD is completed. This WWTW is now able to treat current and future demand in the Dwarsriver Area, unlocking development.
	Capital Upgrades on Wastewater Treatment Works	Wemmerhoek WWTW Phase 1 Upgrade is completed. The Phase 1 upgrade allowed for redundancy in sludge handling and the ability to cope with the effect of loadshedding on sludge handling. Designs for the Phase 2 Upgrade (Quality and Capacity Improvement) are 90% complete, and funding is ready for implementation starting 28 February 2024.
	Capital Upgrades on Water Storage	Polkadraai Bulk Upgrade (Reservoirs and Pipelines) Phase 1 Upgrade: 70% complete, with Skilpadvlei Reservoir placed in operation. The Phase 1 upgrade will increase storage capacity in the area, and together with the Phase 2 upgrade (designs completed and ready for implementation in 2024/25), it will allow the transfer of water from Blackheath to Kayamandi.
	Improvements in disinfection	The introduction of improved operational procedures and minor dosing equipment upgrades have improved the disinfection of drinking water municipality-wide, with a corresponding reduction of risk to consumers.
Electricity	Installation of 1 300 electrical connections in Enkanini	2 300 of the 4 000 identified connections for Enkanini have been completed. The bulk infrastructure has also been upgraded to support the electrification of Enkanini.

Service Area	Highlight	Description
	Completion of the Cost of Supply Study	The cost of supply study enables the municipality to understand the real cost of providing electricity. This study also assists the municipality in determining the annual tariffs.
	Completion of the Energy Masterplan	The Energy Masterplan enables the municipality to understand the potential sources that can be utilised within the WC024 other than conventional means of electricity generation.
	Completion of the Electricity Infrastructure Masterplan	The Electricity Infrastructure Masterplan informs the municipality of the required network upgrades, network refurbishment, enabling new developments, and ensuring that the lifecycle of the infrastructure is optimally utilised.
	Appointment of a service provider to holistically investigate alternative energy generation initiatives	The service provider has been appointed to holistically investigate all possible options to mitigate the impact of loadshedding.
Waste Management	Street bins	Additional street bins were procured and delivered in February 2023.
	Builders' rubble diverted	Total builders' rubble diverted 17 667 tons.
	Garden waste	Total garden waste diverted: 5 460 tons.
	Recycling	Year on year increase in recycling collection was 23%.
	Appointments of Area Cleaning Assistant Superintendents and 3x general workers for refuse collection	Two assistant superintendents and three general workers for refuse collection were appointed to enhance service delivery within the WC024.
	Inclusion of Franschhoek in the Recycling Programme	An appointed contractor provides a door-to-door service for collecting recyclable waste. 39 tons of recyclable waste were collected during this financial year.

1.10.2 Key Basic Services Challenges

Despite the highlights, challenges were experienced by the municipality, as outlined below; however, actions were put in place to address these challenges:

Table 14: Key Basic Service Challenges

Service Area	Challenge	Actions to address
Roads, Transport and Stormwater	Increasing demand to address backlogs, undertake maintenance and repair, for infrastructure upgrades and new infrastructure, and not sufficient resources to address all needs and demands.	Prioritise projects and accept that not all needs and demands will be met in the short term and will be effected incrementally as budgets permit.
Water and Wastewater Services	Staff shortages and resignations / retirements are continuing to impact operations.	The department is in the process of reviewing its organogram and places a lot of effort into recruitment.
	Depots and Plants: Disciplinary Issues.	The department is continuously addressing the items with counselling sessions and disciplinary processes.
	Due to the continuous interruption of electricity supply because of loadshedding, the water and wastewater infrastructure was not designed to operate in such conditions.	Standby generators are used where possible.
	Infrastructure Vandalism: Vandalism of water and wastewater infrastructure is a challenge. There is an increase in vandalism cases during loadshedding.	The municipality is investigating the safeguarding of critical infrastructure, but it remains a challenge due to budget constraints.

Service Area	Challenge	Actions to address
	Procurement processes to procure services / goods which impact the operations and maintenance of infrastructure and the implementation of capital projects.	The municipality is considering more efficient means of procuring quickly and efficiently.
Electricity	Installation of hot water load control devices: access to properties to install the hot water load control devices remains a challenge.	Continuous visits and communication with these residents are ongoing.
	Token Identifier: Access to properties to reset meters remains a challenge.	Continuous visits and communication with these residents are ongoing.
	Installation of 1 300 electrical connections to **Enkanini**: The consultant underperformed, which caused a delay in the completion of the project.	Consultant was placed on terms that resulted in improved performance.
	Bulk upgrades to enable the **Enkanini Electrification project**: The medium-voltage route had to be altered due to the encroachment of houses onto the road reserve, which forced the department to install their electrical cables in the middle of the road. The re-routing resulted in delays and additional costs for the project.	The department embarked on a contract variation to complete the project.
	Staff shortages are impacting service delivery; although the impact is not experienced by the public, staff's wellbeing is severely affected, which is a great concern to the department's management. Even though the electricity infrastructure and customers have grown over the years, the staff complement has decreased.	Continuous engagement with executive management.
	Due to the continuous interruption of electricity supply because of loadshedding, the electricity infrastructure is starting to show signs of malfunctioning as it was not designed to operate in such conditions.	Investigations to improve the electricity infrastructure operations under these conditions are ongoing and attended to on an ad-hoc basis.
	Illegal connections: The installation of illegal connections persists despite engagement with stakeholders.	Engagement with stakeholders is ongoing, and on several occasions, the department embarked on an operation to remove these illegal connections.
	Infrastructure Vandalism: Vandalism of electricity infrastructure persists, and it appears that with loadshedding this act is on the increase.	The department has requested the safeguarding of the critical infrastructure, but it remains a challenge due to budget constraints.
Waste Management	Absence of a Youth Environmental Coordinator (YCOP) to assist with social engagement and awareness.	The municipality must explore filling the position within the department to increase social engagement and awareness.
	Increase in illegal dumping	Appointment of a Youth Environmental Coordinator (YCOP) to assist with social engagement and awareness.

Service Area	Challenge	Actions to address
	Staff Constraints	Effective and efficient recruitment and selection processes.

1.11 Financial Viability Highlights

Table 15: Municipal Viability Highlights

Highlight	Description
Long-Term Financial Plan	The municipality has developed a long-term financial planning tool that can be updated regularly for strategic planning.
Current Ratio	The municipality maintained a very good current ratio of 1.92:1. This compares well with the norm of 1.5 to 2:1.
Collection Rate	The municipality maintained a good collection rate for service debtors of 96%, which is above the norm of 95%. This indicates that the municipality's creditor control and debt collection processes are in place and the revenue is managed effectively.
Finance Charges	Finance charges represent 3.08% of the total operational expenditure. This compares favourably with the norm of 6% to 8%.
Liability Management	Capital costs (interest paid and redemption) represent 4.76% of total operating expenditure. This indicates that the municipality can take on additional financing from borrowing to invest in infrastructure projects.
mSCOA Specimen Financial Statements	The municipality implemented the National Treasury mSCOA specimen annual financial statements preparation template, where the financial statements are compiled utilising the data strings extracted from the financial system.
Debt Management	The municipality's total debt represents 26% of the total operational expenditure. This compares favourably with the norm of 45% and is an indication that the municipality can take on additional financing from borrowings.

1.12 Financial Viability Challenges

Table 16: Financial Viability Challenges

Challenge	Description
Financial Viability	The traceability of all debtors poses a challenge to the debt collection process. Low economic growth, an increase in unemployment, and above-inflation increases in the cost of water impact the affordability of municipal accounts.
Revenue Leakage	An integrated revenue enhancement approach was followed to combat revenue leakages.

1.13 Financial Overview

Table 17: Financial Viability and Management Financial Overview (000')

Details	Original budget	Adjustment Budget	Actual
	R'000		
Income			
Grants (Operating and Capital)	366 410	344 598	311 442
Taxes, Levies and Tariffs	1 666 592	1 632 137	1 582 733
Other	223 849	233 003	306 948
Sub-Total	2 256 851	2 209 738	2 201 123
***Less* Expenditure**	2 102 065	2 119 665	1 947 880
Net surplus / (deficit)	**154 786**	**90 073**	**253 243**

1.13.1 Operating Ratios

Table 18: Operating Ratios

Detail	Expected norm	Actual	Variance
Employee Cost	35%-40%	27.86%	-(9%-15%)
Repairs and Maintenance	15%	2.67%	-12.33%
Finance Charges	15%	3.08%	-11.95%

Employee cost is below the national norm of between 35% to 40%, representing a positive outcome. Repairs and maintenance are below the norm, which indicates that expenditure on repairs and maintenance would have to be increased in future budgets to properly maintain the Council's assets. Finance charges are 11.95% lower than the norm of 15%, this can be attributed mainly to the municipality's ability to fund its capital programmes to some extent from its resources (CRR) and not external finance.

1.13.2 Total Capital Expenditure

Table 19: Total Capital Expenditure (000')

Detail	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
	R'000							
Original Budget	452 759	463 792	418 057	528 041	558 276	375 751	406 054	409 273
Adjustment Budget	437 183	482 580	499 855	563 550	577 905	453 880	403 508	378 709
Actual	**348 861**	**410 562**	**433 682**	**493 303**	**405 931**	**392 941**	**347 610**	**321 506**

1.14 Municipal Standard Chart of Accounts

MFMA Circular No. 80: Municipal Financial Systems and Processes requirements in support of the Municipal Standard Chart of Accounts (mSCOA) issued in terms of the Local Government: Municipal Finance Management, 2003 (Act No. 56 of 2003) (MFMA). In the MFMA SCOA Circular 1, it was indicated that mSCOA is a business reform rather than a mere financial reform and requires a multi-dimensional relationship.

The mSCOA was implemented in Stellenbosch Municipality on 01 July 2017. The municipality is in continuous engagement with the service provider, National Treasury, and other municipalities through various working groups as well as online platforms to improve mSCOA compliance and functionality.

1.15 Organisational Development Overview

The municipality, regarding municipal transformation and organisational development, achieved the following highlights:

Table 20: Organisational development highlights

Highlight	Description
Filling of critical posts	Critical posts are filled as and when required with the availability of funds.
Organisational Stability	All staff placements were made in terms of the new organisational structure.

1.16 MFMA Competencies

In terms of Section 83(1) of the MFMA, the accounting officer, senior managers, chief financial officer, non-financial managers, and other financial officials of a municipality must meet the prescribed financial management competency levels that are key to the successful implementation of the MFMA. The National Treasury prescribed such financial management competencies in Government Notice 493, dated 15 June 2007.

To help the above officials get the required financial skills, the National Treasury created an outcome-based NQF Level 6 qualification in municipal finance management with the help of many stakeholders and key players in local government.

In terms of Government Notice 493 of 15 June 2007, "(1) No municipality or municipal entity may, with effect as of 1 January 2013 (exempted until 30 September 2015 as per Government Notice 179 of 14 March 2014), employ a person as a financial official if that person does not meet the competency levels prescribed for the relevant position in terms of these Regulations."

The table below provides details of the financial competency development progress as required by the regulation (Government Notice 493 of 15 June 2007):

Table 21: Financial Competency Development: Progress Report

Description	A Total number of officials employed by municipality (Regulation 14(4)(a) and (c))	B Total number of officials employed by municipal entities (Regulation 14(4)(a) and (c)	Consolidated: Total of A and B	Consolidated: Competency assessments completed (Regulation 14(4)(b) and (d))	Consolidated: Total number of officials whose performance agreements comply with Regulation 16 (Regulation 14(4)(f))	Consolidated: Total number of officials that meet prescribed competency levels (Regulation 14(4)(e))
Financial Officials						
Accounting Officer	1	0	1	1	1	1

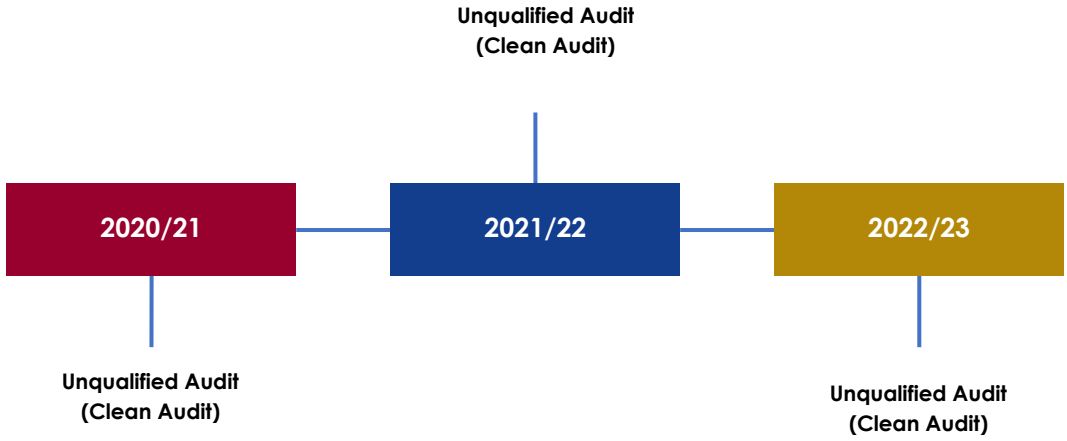
Supply Chain Management Officials						
Heads of supply chain management units	1	0	1	1	1	1
Supply chain management senior managers	2	0	2	2	2	1



1.17 Auditor General of South Africa's Report

The Auditor-General of South Africa has a constitutional mandate and, as the Supreme Audit Institution (SAI) of South Africa, exists to strengthen the country's democracy by enabling oversight, accountability, and governance in the public sector through auditing, thereby building public confidence. In short, the Auditor-General checks the spending of public money by looking at whether it has been used for the purposes intended. This process is concluded by annually checking all government spending.

The audit outcomes of a municipality are based on the fair presentation and absence of significant misstatements in financial statements, performance information for predetermined objectives that was reliable and credible, and all financial / non-financial information that complied with laws and regulations.

The diagram below indicates the audit outcome progress from 2020/21 to 2022/23.

Figure 11: Audit Outcome Progress 2020/21 - 2022/23

CHAPTER 2: GOOD GOVERNANCE AND PUBLIC PARTICIPATION

2.1 Introduction

Good governance is an approach to government that is committed to creating a system founded on strengthening democracy, promoting transparency, building public administrative capacity, responding to public needs, and respecting human rights. It is measured by eight factors: **participation, rule of law, transparency, responsiveness, consensus-oriented countability, effectiveness and efficiency, equitability, and inclusivity**. Within the context of good governance, corruption is minimised, the views of minorities are considered, and the voices of the most vulnerable in society are heard in decision-making. It is also responsive to the present and future needs of society.

2.2 National Key Performance Indicators - Good Governance and Public Participation

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and Performance Management Regulations 796 of 2001 and Section 43 of the MSA. This key performance indicator is linked to the National Key Performance Area: Good Governance and Public Participation.

Table 22: National KPI - Good Governance and Public Participation

KPA and Indicators	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan.	85.08%	86.5%	87.5%	70.25%	86.57%	84.29%	84.79%

2.3 Performance Highlights - Good Governance and Public Participation

Table 23: Highlights of Good Governance and Public Participation

Highlight	Description
Audit Outcomes	Finalised (unqualified with no findings)
MSA Sections 79 and 80 Committees of Council	The establishment of functional S.80 and S.79 Committees of the Council and held meetings regularly.
Public Participation	The new Council had the opportunity to participate in the IDP sessions held in January 2022 and April 2022 with all 23 wards.
Communication	The municipality stays abreast with communication trends. Public participation has been rolled out via online streaming at satellite offices.
Compliance	The municipality adhered to all laws and regulations in terms of compliance.

2.4 Challenges - Good Governance and Public Participation

Table 24: Challenges of Good Governance and Public Participation

Description	Actions to address
Fraud and Corruption Management	Active reporting has been sustained via the fraud hotline, direct phone calls received, and walk-in responses. Regrettably, it has come to light that the fraud hotline and the Regulations for Senior Managers (Misconduct and Financial Misconduct) are being exploited to target individuals and management unjustly.

2.5 Public satisfaction with municipal services

No formal community surveys were developed; the community makes use of the social space to state their satisfaction or dissatisfaction with services, and the municipality will try its utmost to address the needs of the public.

COMPONENT A: POLITICAL AND ADMINISTRATIVE GOVERNANCE

2.6 Political Governance Structure

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows from the previous Council and the newly elected Council:

2.6.1 Council – 01 July 2022 to 30 June 2023

Below is a table that categorises the councillors within their specific political parties and wards.

Table 25: Council for the period 01 July 2022 to 31 May 2023

26 April 2023	22	100%	-
24 May 2023	23	100%	3
27 June 2023	15	100%	7
26 July 2023	23	100%	6

2.7 Executive Mayoral Committee

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the executive mayor to oversee the day-to-day affairs of the municipality. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition, delegated powers by the Council were assigned. There was a reshuffle of the Mayco committee due to the resignation of Councillor Badenhorst. The new portfolios and committee were implemented on 01 May 2023.

Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

The Executive Mayoral Committee positions were occupied as follows:

Table 28: Executive Mayoral Committee

2.7.1 Portfolio Committees

In terms of Section 80 of the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998), if a council has an executive committee, it may, in terms of Section 79, appoint committees of councillors to assist the executive committee or executive mayor. Section 80 stipulates that committees are permanent committees that specialise in a specific functional area of the municipality and, in some instances, may make decisions on specific functional issues. They advise the executive committee on policy matters and make recommendations to the council.

The tables below show a comparison of the portfolio committees and meeting dates from 01 July 2022 until 31 May 2023 and the newly elected mayoral committee from 01 June 2022 until 30 June 2023.

2.8 Strategic Governance Structure

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily serves as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Table 57: Top Management Structure

Geraldine Mettler

Municipal Manager

Strategic Management; Internal Audit; Corporate Governance; Risk Management; Intergovernmental Relations; International Relations; Integrated Development Planning; Organisational Performance Management; Communications; and Knowledge Management.

Annalene de Beer

Director: Corporate Services

Administrative Services; Legal and Compliance; Human Resources Management; Individual Performance Management; Information and Communication Technology; Councillor's Support; Committee Services; Municipal Court; and Properties Management and

Anthony Barnes

Director: Planning and Economic Development

Development Management; Development Planning; Integrated Human Settlements; Building Management; Heritage Resource Management; Spatial Planning and Land Use Management; Local Economic Development and Tourism, Housing Development; Informal Settlements; and Housing Administration.

Kevin Carolus

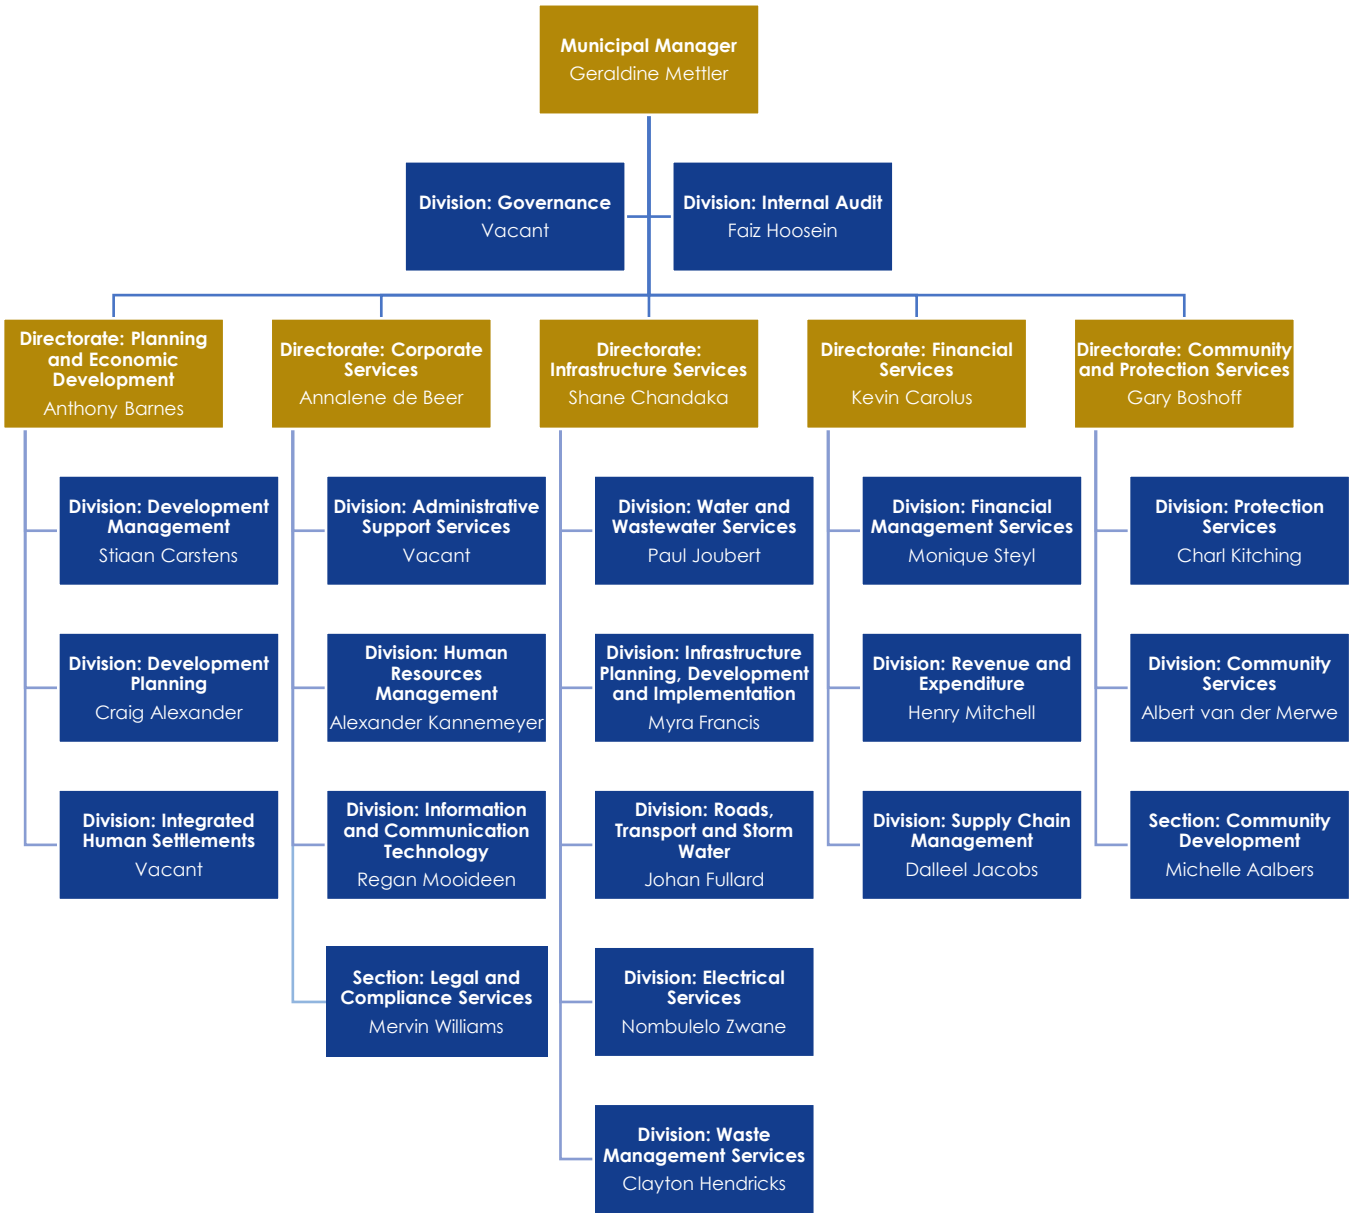
Chief Financial Officer

Revenue Management; Expenditure Management; Budget Preparation and Management; Management of Financial Statements; Supply Chain Management; Financial Systems; and Asset Management.

Shane Chandaka

Director: Infrastructure Services

Roads, Transport and Storm Water; Water and Wastewater Services; Electrical Services; Waste Management; and Infrastructure Planning, Development, and Implementation.



Gary Boshoff

Director: Community and Protection Services

Community Development; Protection Services; Disaster Management and Fire Services, Traffic and Law Enforcement Services; Library Services; Parks and Cemeteries; Recreation, Sport, and Halls; and Environmental Management.

Table 58: Macro Structure

COMPONENT B: PUBLIC ACCOUNTABILITY

MSA Section 15(b) requires a municipality to establish and organise its administration to facilitate a culture of accountability amongst its staff. Section 16(i) states that a municipality must develop a system of municipal governance that complements formal representative governance with a system of participatory governance. Section 18(i)(d) requires a municipality to supply its community with information concerning municipal governance, management, and development.

The participation outlined above is required in terms of the:

- preparation, implementation, and review of the IDP;
- establishment, implementation, and review of the performance management system;
- monitoring and review of performance, including the outcomes and impact of such performance; and
- preparation of the municipal budget.

2.9 Intergovernmental Relations

2.9.1 National Intergovernmental Structures

The Municipal Managers Forum, facilitated by the Department of Cooperative Government and Traditional Affairs (COGTA), meets twice per annum. New legislation and its implications, as well as challenges for local government, e.g., financial sustainability, professionalism, and oversight structures, are discussed.

The Directorate: Infrastructure Services is represented by the Director: Infrastructure Services as a member of the national WRC / SALGA Municipal Benchmarking Initiative in Water Services, which collaborates in a national programme towards the improvement of water services, co-driven by SALGA and the Water Research Commission (WRC) and in collaboration with eThekwini Municipality, MILE (Municipal Institute of Learning), representatives of other municipalities, the Institute of Municipal Engineers (IMESA), and the Department of Water and Sanitation (DWS).

2.9.2 Provincial Intergovernmental Structures

a) Office of the Municipal Manager

Stellenbosch Municipality is a keen participant in joint intergovernmental planning initiatives of the Provincial Government. MinMay (Provincial Ministers, Provincial Heads of Departments, Mayors, and Municipal Managers) and the Premier's Coordinating Forum are provincial forums for fruitful interaction regarding local government cooperation and challenges. These meetings are held biannually. The Provincial Municipal Managers Forum meets quarterly.

The Chief Audit Executive and Chief Risk Officer fora are held quarterly in conjunction with the Provincial Treasury, where all municipalities share best practices and consult on areas for improvement.

Stellenbosch is represented on the Provincial IDP Managers Forum and the Provincial Public Participation and Communication Forum, all of which are facilitated by the Provincial Department of Local Government.

b) Financial and Corporate Services

The Directorate: Financial Services participates in several provincial forums quarterly. The forums include the Supply Chain Management (SCM) Forum, the Municipal Property Rates Act Forum, the Management Accountants Forum, and the Chief Financial Officer Forum.

The Municipal Court is in full operation and collaborates with the Department of Justice regularly.

c) Planning and Economic Development

The municipality is represented by the Manager: Spatial Planning on the task team set up by DEA&DP to revise the Provincial Spatial Development Framework (PSDF). Through this inter-governmental process, Stellenbosch Municipality can provide input into the format and substance of this document that will have a legal bearing on all local municipalities in the Western Cape.

The DEA&DP and the municipality established a working group to consult monthly or more regularly as the need arises about environmental authorisation applications and land use (spatial planning) matters. Slow response times to applications by developers, entrepreneurs, farmers, service providers (Eskom, Telkom, cellular operators, etc.), waste management bodies, mining operators, and road authorities cause delayed investment and infrastructure provisions. This has negative effects on the economy, hence, the working group was established to increase the speed with which the applications are administered.

The working group consists of the technical role players, and it is overseen by the portfolio councillors of the municipality. This structure ensures prior commitment to and understanding of matters to be reported to the relevant portfolio committees or the council. The working group is administered by the DEA&DP, and meetings are in liaison with the Directorate: Planning and Economic Development, which must invite and ensure attendance by affected internal role players.

Monthly Technical Meetings between the PDoHS and Stellenbosch Municipality:

a) The PDoHS and the municipality meet monthly to discuss all housing development policies and budget-related matters in housing delivery. During the meeting, the overall performance of each municipality is discussed in detail as well as mitigating options if the need arises.
b) Applications for new and existing projects are also discussed with the PDoHS. The municipality receives information relating to beneficiary administration, outstanding approvals, informal settlement challenges, title deed transfers, farmworker evictions, and other matters concerning housing delivery. Legislation and court rulings are also discussed to ensure that senior officials are aware of any new implementation programmes, circulars, and legal precedents.
c) The Section: Informal Settlements also represents the municipality at the bi-monthly Informal Settlements Support Programme (ISSP) meetings of the Provincial Settlements (PDoHS). The latter programme aims to interpret national and provincial guidelines concerning the upgrading of informal settlements. The purpose of these monthly meetings is to discuss best practices in informal settlements within the Cape Winelands region; and
d) The Section: Informal Settlements furthermore collaborates between various municipal departments and Stats SA. The collaboration is aimed at regularising the municipality's data collection efforts into a format that is acceptable to Stats SA and that the collected data eventually will meet the standards as required by Stats SA.

e) Infrastructure Services

The Directorate participates in the Stellenbosch River Collaborative Steering Committee to develop a multi-stakeholder collaborative governance process within which to deal with issues of water quality and pollution in the Stellenbosch rivers. The participants include the Winelands Water Users Association, Stellenbosch Municipality, the Department of Water Affairs, the Department of Environmental Affairs, Cape Nature, the WWF, Wildlands, and key stakeholders in the wine industry such as Spier and the Distell Group.

The 3rd Generation Integrated Waste Management Plan (IWMP) gives direction regarding waste-to-energy, alternative waste management options, and waste management project proposals. This innovative approach was recognised by the DEA&DP when the municipality was requested to assist three other local municipalities in taking this approach. The municipalities of Beaufort West, Prins Albert, and Laingsburg were assisted in this manner by the visit of the Waste Management Department team, who trained their local officials as well as assisted with the first data collection exercise.

Stellenbosch Municipality is represented at the quarterly Waste Management Officers Forums, where best practices, changing legislation, feedback from national and provincial government policy changes, etc. are discussed to keep all municipalities in the Western Cape abreast of all issues about waste management. The Western Cape Recycling Action Group (RAG) quarterly forums, although more geared towards private-sector contributions to waste minimisation, also provide a platform for municipalities to engage with each other and the private sector for waste minimisation opportunities.

The Department: Electrical Services is extensively involved with other local municipalities' electricity departments through the Association of Municipal Electricity Utilities (AMEU). The AMEU promotes quality of service and management excellence amongst its members in the field of electricity supply and facilitates communication between its members and between members and the technical, economic, and political environment to influence that environment.

f) Community and Protection Services

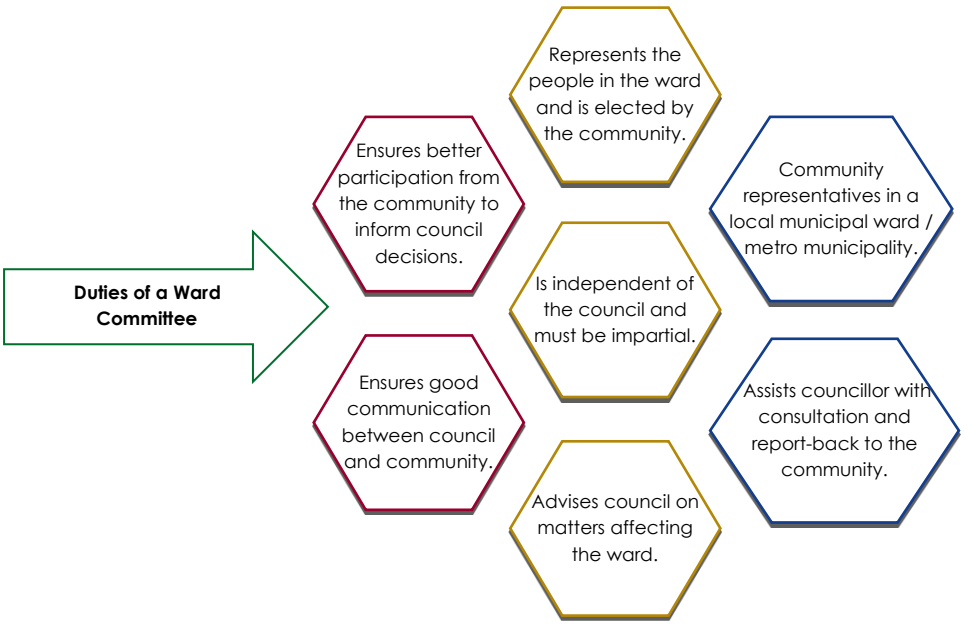
Traffic Services liaises with Western Cape Government: Department Transport and Public Works continuously on matters related to transport administration and licencing, traffic law administration (motor-vehicle licensing), and the issuing of learner and driving licences.

The department further engages with RTIA, RTMC, the Director of Public Prosecutions, and the Department of Justice regarding legislative requirements and adherence.

To execute the Safely Home Programme, the department interacts with various engineering entities, such as provincial engineers and Cape Winelands District Council. The Western Cape Government developed the Provincial Strategic Plan (PSP), which gave rise to policies, programmes, and projects forming partnerships among government, citizens, civil society, and business. Various spheres of government are being engaged to co-create a culture of wellness and safety in the workplace and to promote wellness and safety through integrated service delivery models to address the social determinants of health through interaction with the Department of Education (DoE), the Department of Health Department, and SAPS.

The municipality engages in numerous partnerships to facilitate service delivery.

Table 59: Municipal Partnerships



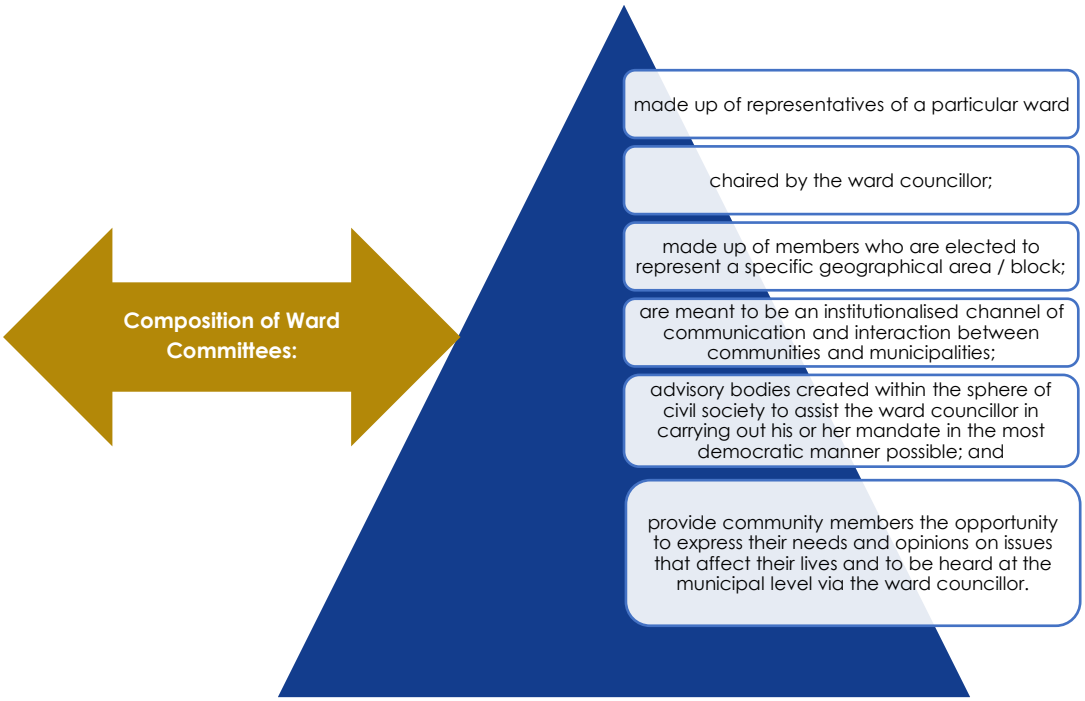
Name of Partner / Partnership	Purpose
Mayor / Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the university's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television in the interest of the security of the town and the campus with a view to a crime-free university town.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed to strengthen knowledge and capacity related to municipal infrastructure and service delivery.
Integrated Development Committee (IPC)	A partnership with the university and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and university.
Department of Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focussing on common issues within WC024.
SALGA Municipal Benchmarking Initiative	The partnership is aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and iterative performance improvements.
Bergriver Improvement Programme	The partnership was formed to improve the quality of the stormwater run-off from the Langrug Informal Settlement. The project entails the implementation of biomimicry, waste recycling, and a sustainable urban drainage lab.
LTAB	The partnership was formed between political leaders to discuss land transport-related matters that affect transport in the area.
Transport Working Group	The Transport Working Group was established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role players.
IPC	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
NMT Working Group	A working group that discusses all non-motorised transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the university, and the disabled fraternity.
Drought Steering Committee	This is a committee consisting of a panel of role players in the drought intervention plan, including consultants, to discuss, plan, manage, and act on the drought intervention strategies that culminated from various source documents, including WCWDM strategies, WSDP, audit reports, and various master plans and processes. It also oversees the SCM and construction phases of the plans.
GreenCape	The GreenCape partnership represents cooperation with the province's 110% green initiatives, focussing on alternative waste management initiatives and energy efficiency.
CSIR	The partnership is aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
General	Municipal Partnerships.
District Intergovernmental Structures	
District Coordinating Forum	This forum meets quarterly and seeks to promote and facilitate intergovernmental relations between the district municipality and the local municipalities in the district. The Stellenbosch Municipality participates in this forum and the Cape Winelands District Municipal Managers Forum and benefits from this involvement by being exposed to good practices in other municipalities and strengthening the relationship with the district municipality in forging joint partnerships in the interest of good governance and service delivery. The Cape Winelands District Municipality supports community development and uses indigenous sports to create social cohesion amongst communities in the district. Special focus and attention were given to communities in rural areas. The Stellenbosch, Drakenstein, and Breede Valley municipalities have participated in various indigenous

Name of Partner / Partnership	Purpose
	games that were hosted by the Cape Winelands Municipality. The relationship between Stellenbosch Municipality and the district municipality has improved, and the Department: Community Services has managed to exceed all expectations. A targeted approach was followed, and sports were used as a catalyst to cement this relationship with the district. The areas that the Department of Community Services targeted were communication, sharing of resources, capacity building, and financial resources. The improved relationship between the district municipality and Stellenbosch Municipality enabled the communities to also participate in the provincial and national Indigenous Games.

2.9.3 Ward Committees

Stellenbosch Municipality has a Ward Committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the Council and not politically aligned. The figure below depicts the main duties of the ward committees.

Table 60: Duties of Ward Committees



The dawn of democracy in 1994 brought about a new democratic local governance system that promotes certain basic values and principles. Such values and principles include transparency, accountability, an open and inclusive system of governance through community involvement in governance, and the planning and democratisation of development. This certainly placed South Africa on par with other democratic governments throughout the world and positioned it as a reputable reference for an effective decentralised system of government.

Participation remains a key pillar of good governance and constitutes an integral component in the policymaking process, development planning, and budgeting. Section 152 of the Constitution places the participation of communities at the centre of service delivery and other matters of local government. Correspondingly, the Local Government: Municipal Structures Act, 1998 (Act No. 117 of 1998) and the MSA provide the legislative framework for the establishment of ward committees by municipalities.

Section 42 of the MSA stipulates that a municipality, through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of said Act, must involve the local community in the development, implementation, and review of the municipality's performance management system and allow the community to participate in the setting of appropriate key performance indicators and performance targets for the municipality.

A general understanding has emerged that a ward committee is an area-based committee whose boundaries coincide with ward boundaries.

Ward committees ought to be elected by the constituents of the ward. The maximum number of members for a ward committee is ten, and women ought to be adequately represented. The ward councillor is a member and functions as the chairman of the ward committee. While lacking formal authority, ward committees guide the ward councillor, who subsequently presents detailed recommendations to the council. The establishment and yearly revision of the IDP for the region are tasks that these committees perform with vital importance.

The ward committee supports the ward councillor, who receives reports on development, participates in development planning processes, and facilitates wider community participation. The municipality constantly strives to ensure that all ward committees function optimally in terms of the provision of community information, convening meetings, ward planning, service delivery, IDP input, and performance feedback to communities.

Stellenbosch Municipality rolled out the establishment of the 23 ward committees from 24 January to 23 February 2022.

Ward committees in all 23 wards are operational, and all wards have access to a ward administrator, except Ward 5. During the review period of this annual report, the then-ward councillor for Ward 21, Rikus Badenhorst, resigned as ward councillor on 6 December 2022.

This left a vacancy in Ward 21, and the new ward councillor, Mynard Slabbert, was elected in a by-election on 8 March 2023. During this time (from the resignation of the ward councillor until the by-election), no ward committee meetings were held for Ward 21.

The filling of vacancies remains a problem for ward committees. Vacancies occur for a variety of reasons, and ward councillors find it difficult to fill the vacancies. The ward committee policy allows for the option of co-opting ward committee members. Vacancies must be filled within 60 days of the vacancy being declared, and all vacancies on ward committees for the review period were filled.

The tables below specify the ward committees from 1 July 2022 until 30 June 2023:

Ward 1: Franschhoek town, Bo-Hoek Farms, Mooiwater

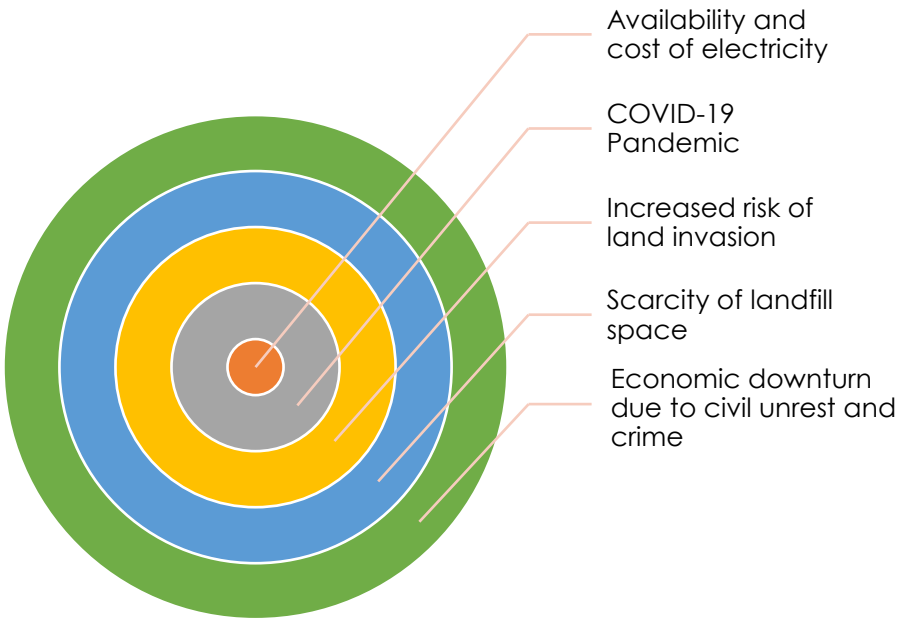
COMPONENT C: CORPORATE GOVERNANCE

Corporate governance is the set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, or controlled. Corporate governance also includes the relationships among the many stakeholders involved and the goals for which the institution is governed.

2.10 Risk Management

Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient, and transparent systems of financial and risk management and internal control, as well as the effective, efficient, and economical use of the resources of the municipality.

This responsibility was delegated to the Chief Risk Officer. During the year under review, the following was done:



- continuous awareness-raising throughout the municipality;
- the Risk Management Committee was established to facilitate and govern the risk management process, with a term of reference, and has been operational since January 2013;
- the Chief Audit Executive has a seat on the Risk Management Committee, where all risk and fraud management-related activities are reported;
- the Risk Management Committee reports to the APAC;
- risk registers have also been completed at an operational level;
- the previous year's strategic registers were revisited, and an acceptable risk appetite was determined;
- the revised risk register was adopted by the Council; and
- risks were also identified that could prevent the achievement of the predetermined objectives and were noted in the SDBIP.

Although the Chief Risk Officer is responsible for coordinating and facilitating risk management at all levels within the municipality, the municipal manager and management are the drivers of risk management and the mitigation of risk exposure in the municipality.

As the new financial year started, conversations and assessments turned to the impact of the ongoing electricity and energy crisis. This was necessary as the municipality started to focus on the impact of continuous and persistent loadshedding, the sustainability of the national power supply, and how to manage the availability and cost of electricity over the next decade and beyond.

During the financial year, the municipality implemented the Barn Owl system. It is an electronic risk management system to ensure more accuracy and detail with ratings, reporting, and assessments to assist in providing information and reports to management. This is to assist and better inform managers when using risk management in the decision-making process. The top 5 risks identified for 2022/23 are as follows:

Table 85: The top 5 risks identified for 2022/23

a) Likelihood rating scale

Table 86: Risk likelihood rating scale

Impact and Likelihood Rating		
Likelihood Grading		
10	Certain	91% - 100% chance of occurring
9	Almost Certain	81% - 90% chance of occurring
8	Expected	71% - 80% chance of occurring
7	Probable	61% - 70% chance of occurring
6	Possible	51% - 60% chance of occurring
5	Potential	41% - 50% chance of occurring
4	Occasional	31% - 40% chance of occurring
3	Remote	21% - 30% chance of occurring
2	Improbable	11% - 20% chance of occurring
1	Rare	0% - 10% chance of occurring
Impact Grading		
10	Catastrophic	A critical event resulting in the long-term cessation of the majority or all core organisational activities. Inability to achieve the municipality's strategy and objectives. Requires external support.
9	Critical	A critical event resulting in the long-term cessation of several core organisational activities. Drastically reduced ability to achieve the municipality's strategy and inability to achieve most of the objectives. Requires intervention from the Council.
8	Major	A major event resulting in the long-term cessation of a core organisational activity. Severely reduced ability to achieve the municipality's strategy and inability to achieve certain objectives. The material at the organisational level.

Impact and Likelihood Rating		
Likelihood Grading		
		Requires intervention from the Municipal Manager and Audit Committee involvement.
7	Significant	Significant long-term disruption of services. Significantly reduced ability to achieve the municipality's strategy and objectives. Requires intervention from the Director.
6	Moderate	Short / medium-term disruption of services. Reduced ability to achieve the municipality's strategy and objectives. Requires intervention from the Head of the Department.
5	Marginal	Disruption of normal operations / services. Limited effect on the achievement of the municipality's strategy and objectives. Requires intervention from the Line Manager.
4	Immaterial	Irritation in rendering or receiving services. No material impact on the achievement of the municipality's strategy and objectives. Can be dealt with by senior staff.
3	Minor	The impact will be coped with in the short term through normal operational processes performed by staff
2	Insignificant	The impact of adverse events is minimal.
1	Negligible	The impact of the adverse event has little (if any) impact on services.

The rating determines the risk exposure. Through this management gets to understand the extent to which potential events might impact their objectives on a scale from 1 as a minimum and 100 as a maximum.

b) Inherent risk exposure

Table 87: Inherent risk exposure grid

Inherent Risk Exposure: the inherent risk exposure is determined by comparing the inherent risk rating against the risk appetite		
Inherent Risk Exposure		
Inherent Risk	**Magnitude**	**Definition**
0 -25	**Low Risk**	Level of inherent risk is within the risk appetite – Low level of a control intervention required if any.
26 -50	**Moderate Risk**	Unacceptable level of risk – Moderate level of control intervention is required to achieve an acceptable level of residual risk.
51 – 75	**High Risk**	Unacceptable level of risk – High level of control intervention is required to achieve an acceptable level of residual risk.
76 – 100	**Extreme Risk**	The extreme level of risk – Immediate level of control. Intervention is required to achieve an acceptable level of residual risk.

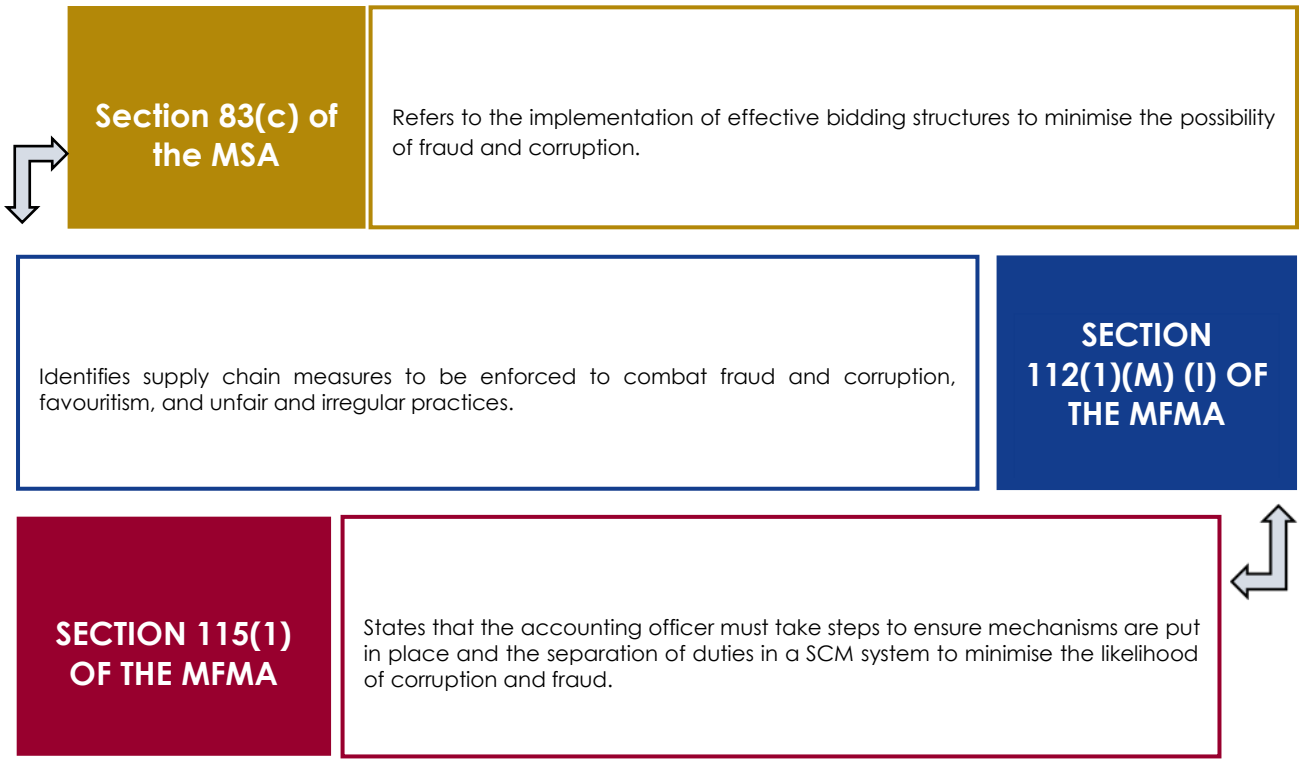
The strategic risk register below indicates all the focus areas, risks and mitigation measures taken to address these identified risks within the organisation.

2.10.1 Strategic Risks Identified

Table 88: Risk register

Strategic Risks							
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Inherent Risk Exposure/Risk Appetite (1-100)**	**Directorate**
1	Availability and cost of electricity	Continuous and persistent loadshedding; sustainability of the national power supplier	Green and Sustainable Valley, Dignified Living	**10**	**10**	**100**	Directorate: Infrastructure Services
2	Increased risk of a land invasion	Legal precedents are set under the disaster management declaration, limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities.	Dignified Living, Safe Valley, Financial Sustainability, Good Governance and Compliance	**9**	**10**	**90**	All Directorates
3	Economic downturn due to civil unrest, crime and continuous loadshedding.	Increase in criminal activities, civil unrest, and reputational risk due to the perceived increase in the said activities. The impact of prolonged loadshedding—not sufficient light at night as streetlights, CCTV cameras, and traffic lights are not functioning—can lead to more criminal activities.	Safe Valley, Dignified Living	**10**	**8**	**80**	Directorate Community and Protection Services
4	Scarcity of landfill space	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements, i.e., EIA applications and approvals, etc.	Green and Sustainable Valley	**8**	**8**	**64**	Directorate: Infrastructure Services
5	Increase in community unrest due to the fact that the growth in demand for housing exceeds the resources available for development.	Lack of bulk infrastructure; lack of identified and suitable land; unrealistic eviction judgements; housing backlogs; migration.	Dignified Living, Safe Valley	**8**	**8**	**64**	Directorate: Community and Protection Services
Operational Risks							
1	Insufficient burial space in the greater Stellenbosch	"Planning and funding; land availability. Insufficient funding. Compliance and impact of COVID-19 burials after experiencing a 2nd and 3rd wave."	Dignified Living	**8**	**8**	**64**	Directorate: Community and Protection Services

Strategic Risks							
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Inherent Risk Exposure/Risk Appetite (1-100)**	**Directorate**
2	Timeous Capital Spending	A steady increase in budget allocation; growing population and demand for services; demand management.	Good Governance and Compliance	**10**	**4**	**40**	Directorate: Financial Services
3	COVID-19 Pandemic	Manage the COVID-19 pandemic within the context of the prescribed regulations, taking the possible 4th wave and intensity of new infections into account.	Safe Valley, Dignified Living	**8**	**4**	**32**	Transversal
4	Climate Change	Changing weather patterns, unpredictable rainfall, flash floods, droughts, natural disasters, and fires (seasonal and other).	Green and Sustainable Valley; Safe Valley	**8**	**4**	**32**	Office of the Municipal Manager
5	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery need to be provided by all departments.	Good Governance and Compliance	**8**	**4**	**32**	Directorate: Corporate Services



2.10.2 Anti-Corruption and Anti-Fraud

Management and the Council have taken ownership of combating fraud and corruption throughout the municipality.

The Anti-Fraud and Corruption Prevention Plan was consulted with key internal stakeholders and the Audit and Audit Performance Committee. The Council approved a new plan in March 2023. The plan intends to strengthen fraud and corruption prevention at all levels within the municipality and re-invest in the management of fraud and corruption at all levels.

The fraud hotline, or tip-offline, is also fully functional and managed by an independent service provider. A toll-free number and e-mail service are available to members of the public to report any suspected fraudulent or corrupt activities.

Figure 12: Anti-Corruption and Anti-Fraud Legislation

2.11 Functions of the Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee's objectives and functions are based on Section 166(2)(a-e) of the MFMA, further supplemented by the Local Government: Municipal Planning and Performance Management Regulation, as well as the approved Audit and Performance Audit Committee Charter approved on 28 March 2018 by the Council.

The objectives of the APAC of the Stellenbosch Municipality are to:

- Assist the Council in discharging its duties relating to the safeguarding of the Council's assets;
- Develop and oversee the operation of an adequate internal process and control system;
- Oversee the preparation of accurate financial reporting and statements in compliance with all applicable legal requirements, corporate governance, and accounting standards;
- Provide support to the Council on the risk profile and risk management of the Council; and

- Ensure that there is an internal audit function in place and that the roles of the internal and external audit functions are coordinated.

The APAC is responsible for the oversight of internal controls, financial reporting, and compliance with regulatory matters and mainly makes recommendations to management.

The responsibilities of the APAC are further to review the:

- Effectiveness of the Council's system of internal control and risk management;
- Financial reporting and financial statements;
- Internal audit function;
- AGSA's report;
- Council's compliance with legislation and regulation;
- Compliance with the Council's Code of Conduct and Ethics; and
- Performance Management System to make recommendations in this regard to the Council.

The APAC members are as follows:

Table 89: Members of the Audit and Performance Audit Committee

Period 01 July 2022 – 30 June 2023	
Name of representative	**Capacity**
LC Nene	Chairperson (appointed 1 May 2022)
VJ Botto	Member (appointed 1 September 2017)
TW Lesihla	Member (appointed 1 September 2017)
J Williams (Ms)	Member (appointed 1 April 2019)

Table 90: APAC meetings held from 01 July 2022 to 30 June 2023

Period 01 July 2022 – 30 June 2023
Meeting dates
29 August 2022
29 November 2022
29 March 2023
29 June 2023
29 August 2022

The APAC advises the Council, political office-bearers, the Accounting Officer, and management of the municipality on matters concerning duties as described in the Audit and Performance Audit Committee Charter.

The APAC is also accountable for identifying major risks to which the Council is exposed and determining the extent to which those risks have been mitigated.

2.12 Internal Auditing

Section 165(2)(a), (b), and (c) of the MFMA requires that:

The internal audit unit of a municipality must:

a. prepare a risk-based audit plan and an internal audit programme for each financial year; and

b. advise the accounting officer and report to the Audit Committee on the implementation of the internal audit plan and matters relating to:

- internal audit;
- internal controls;
- accounting procedures and practices;
- risk and risk management;
- performance management;
- loss control; and
- compliance with this Act, the annual Division of Revenue Act, and other applicable legislation.

c. perform such other duties as may be assigned to it by the accounting officer.

Stellenbosch Municipality's internal audit function is performed by in-house staff. The main focus areas were compliance with applicable laws, regulations, policies, and procedures, which resulted in both assurances and consulting work. During the year under review, the internal audit activity was able to effectively execute 87% of the initially adopted risk-based audit plan.

In addition, process flowcharts for all identified audit areas have been documented, highlighting the key controls and / or control gaps for process owners / line managers to consider and implement. Follow-up reviews were conducted relating to previously reported matters during the previous financial year.

2.12.1 Risk Register and Three-Year Strategic Plan

Medium risk
Low risk
Compliance (Statutory requirement)

Risk assessment updates were performed during the 2022/23 financial year and all relevant risks were populated into an updated Risk Register for the municipality. This Risk Assessment Plan forms the basis of the **2022/23** financial year's Risk-Based Audit Plan. New updates to the Stellenbosch Municipality's risk profile were captured during **2022/23** in consultation with the Risk Management Committee. This will ensure that adequate audit coverage is obtained from Internal Audit in consultation with the AGSA and management.

2.12.2 Annual Risk-Based Audit Plan

The Risk-Based Audit Plan 2022/23 was implemented with the available resources. The table below provides details on audits completed.

Table 92: Annual Risk-Based Audit Plan

Audit Activity	Status
DoRA Compliance	Combined Assurance – AG
MGRO 1 and 2 (MGAP)	Report submitted to PT
Statutory audits	
Pre-determined Objectives	
Quarter 4	Final Report submitted
Quarter 1	Final Report submitted
Quarter 2	Final Report submitted
Quarter 3	Final Report submitted
Performance Reviews: MM and Directors (annual assessments)	Final Report submitted
Risk-based audits	
Office of the Municipal Manager: Pre-review of Municipal Manager and Directors performance evaluations	Finalised: Results submitted to Municipal Manager
Financial Services: Asset Management	Rolled over approved at APAC 29 March 2023

Ad hoc review(s) / Management requests / Consulting Activities: Visit Stellenbosch	Finalised

2.12.3 PMS Audits

The actual performance was subjected to an internal audit review, and the results of their findings were submitted to the APAC. Quarterly audits were performed and reported to the APAC.

2.13 Supply Chain Management

The Supply Chain Management (SCM) Policy applicable to the 2021/22 financial year was revised and adopted by the Council on 26 May 2021 (as Appendix 17 of the budget-related policies in the Council item) in terms of sections 17(1)–(3) of the MFMA.

The changes referred to above will ensure that the Department: SCM has the required legislative mandate to further streamline procedures and processes to promote more efficient and effective service delivery to all internal and external stakeholders.

2.13.1 Competitive bids over R200 000

The following table details the number of Bid Committee meetings held for the 2022/23 financial year:

Table 93: Bid Committee Meetings

Bid Specification Committee	Bid Evaluation Committee	Bid Adjudication Committee
46	220	64

The attendance figures of members of the Bid Specification Committee are as follows:

Table 94: Attendance of Members of the Bid Specification Committee

Member	% Attendance
Supply Chain Management Representative	100%
Relevant technical expert responsible for a function	100%

The attendance figures of members of the Bid Evaluation Committee are as follows:

Table 95: Attendance of Members of the Bid Evaluation Committee

Member	% Attendance
Supply Chain Management Representative	100%
Relevant technical expert responsible for a function	100%

The attendance figures of members of the Bid Adjudication Committee are as follows:

Table 96: Attendance of Members of Bid Adjudication Committee

Member	% attendance
Chief Financial Officer (Chairperson)	100%
Director Planning and Economic Development	100%
Director: Infrastructure Services	100%
Director: Community and Protection Services	100%
Director: Corporate Services	100%

The percentages indicated above include the attendance of those officials acting in the position of a bid committee member and / or chairperson.

2.13.2 Awards made by the Bid Adjudication Committee

The Bid Adjudication Committee awarded 72 bids with a value of R 159 363 190.41, excluding annual tenders awarded based on approved rates. The ten highest bids awarded by the bid adjudication committee are as follows:

Table 97: Ten Highest Bids Awarded by Bid Adjudication Committee

Bid Number	Title of bid	Directorate and Section	Successful Bidder	Value of bid awarded
B/SM 12/23	CONSTRUCTION OF NEW CELLS AND ASSOCIATED INFRASTRUCTURE AT STELLENBOSCH LANDFILL	Infrastructure Services	BURGER and WALLACE CONSTRUCTION (PTY) LTD	R91 230 000
B/SM 46/22	THE FRANSCHHOEK AREA OF STELLENBOSCH	Infrastructure Services	ADENCO CONSTRUCTION (PTY) LTD	R23 385 070.17
B/SM 17/23	ELECTRIFICATION OF INFORMAL HOUSES IN THE ENKANINI INFORMAL SETTLEMENT OF STELLENBOSCH FOR THE PERIOD ENDING JUNE 2024	Infrastructure Services	MONTHEO CONSTRUCTION GROUP	R22 316 374.38

2.13.3 Awards made by the Accounting Officer

In terms of paragraph 5.2 of the Council's SCM Policy, only the accounting officer may award a bid that is over R 10 million. The accounting officer may not sub-delegate the right to make such an award.

The table below indicates the bids awarded by the accounting officer:

Table 98: Awards made by the Accounting Officer

Bid Number	Title of bid	Directorate and Section	Value of bid awarded
B/SM 12/23	CONSTRUCTION OF NEW CELLS AND ASSOCIATED INFRASTRUCTURE AT STELLENBOSCH LANDFILL	Infrastructure Services	BURGER and WALLACE CONSTRUCTION (PTY) LTD
B/SM 46/22	THE FRANSCHHOEK AREA OF STELLENBOSCH	Infrastructure Services	ADENCO CONSTRUCTION (PTY) LTD
B/SM 17/23	ELECTRIFICATION OF INFORMAL HOUSES IN THE ENKANINI INFORMAL SETTLEMENT OF STELLENBOSCH FOR THE PERIOD ENDING JUNE 2024	Infrastructure Services	MONTHEO CONSTRUCTION GROUP

2.13.4 Objections Lodged

The table below indicates the total objections lodged during the year under review.

Table 99: Objections Lodged

Tender Nr	Description	Date of finalisation of the appeal
B/SM 26/22	Sindele Cleaning	2022-07-15
B/SM 53/22	Uhambo	2022-10-12
B/SM 59/22	Mailtronic	2022-11-24
B/SM 11/23	Max Amp Electrical	2023-03-29
B/SM 09/23	Grand Landscaping	2023-05-09
B/SM 59/23	Klaasen Cleaning	2023-06-30

The municipality also had six (6) appeals, which were resolved, along with one (1) objection, which was also dealt with.

2.13.5 Formal Quotations (above R30 000 and below R200 000) Procurement Processes

The number of formal quotations approved by the Snr. Manager: SCM for the year under review follows:

Table 100: Formal Quotations (above R 30 000 and below R 200 000)

Description	Financial Years					
	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Number of Awarded Formal Quotations	206	203	145	122	8	91
Total Formal Quotations advertised	264	249	159	139	131	124
Percentage awarded	**78.03%**	**81.53%**	**91.19%**	**88%**	**67.94%**	**73.39%**

2.13.6 Deviation from the normal Procurement Processes

Paragraph 4.36 of the Council's SCM Policy allows the Accounting Officer to dispense with the official procurement process. The following table indicates the number of certificates of emergencies and deviations approved in terms of Section 4.36 of the SCM Policy.

Table 101: Deviation from Normal Procurement Process

Description	Financial Years				
	2018/19	2019/20	2020/21	2021/22	2022/23
Certificate of Emergencies: Approved by the Directors i.t.o. Section 4.36.4 of the SCM Policy	0	0	0	0	0
Deviations: Approved by the Accounting Officer i.t.o. Section 4.36.1 of the SCM Policy	42	32	19	12	17
TOTAL	**42**	**32**	**19**	**12**	**17**

Deviations from the normal procurement processes have been monitored closely to mitigate the risk associated with them.

2.13.7 Disposal Management

The system of disposal management envisages the following:

- immovable property is sold only at market-related prices, except when the public interest or the plight of the poor demand otherwise;
- movable assets are sold either by way of written price quotations, a competitive bidding process, an auction, or at market-related prices, whichever is most advantageous;
- firearms are not sold or donated to any person or institution within or outside the Republic unless approved by the National Conventional Arms Control Committee;
- immovable property is let at market-related rates, except when the public plight of the poor demands otherwise;
- all fees, charges, rates, tariffs, scales of fees, or other charges relating to the letting of immovable property are annually reviewed;
- where assets are traded in for other assets, the highest possible trade-in price is negotiated; and
- in the case of the free disposal of computer equipment, the Provincial Department of Education is first approached to indicate within 30 days whether any of the local schools are interested in the equipment.

The municipality complies with Section 14 of the MFMA, which deals with the disposal of capital assets, as well as with the Asset Transfer Regulations.

2.13.8 Supply Chain Management Performance Management

The SCM Policy requires that an internal monitoring system be established and implemented to determine, based on retrospective analysis, whether the SCM processes were followed and whether the objectives of the SCM policy were achieved.

Monitoring internal processes is an ongoing process. Procedure manuals for various SCM processes have been developed, approved, and are being implemented.

2.13.9 Service Providers Strategic Performance

Section 76(b) of the MSA states that KPIs should inform the indicators set for every municipal entity and service provider with whom the municipality has entered into a service delivery agreement. According to the AGSA's office:

a) Service provider means a person or institution or any combination of persons and institutions that provide a municipal service;
b) External service provider means an external mechanism referred to in Section 76(b) that provides a municipal service for a municipality; and
c) A service delivery agreement means an agreement between a municipality and an institution or person mentioned in Section 76(b) in terms of which a municipal service is provided by that institution or person, either for its account or on behalf of the municipality.

Section 121(b) of the MFMA and Section 46 of the MSA further state that a municipality should include the following aspects related to service providers in its annual report:

- The performance of each service provider;
- A comparison of the performance with targets set for and performance in the previous financial year; and
- Measures are taken to improve performance.

2.13.10 B-BBEE Compliance Performance Information

Section 121(3)(k) of the MFMA indicates that the annual report of a municipality should include any other information as may be prescribed. The Broad-Based Black Economic Empowerment (B-BBEE) Act (Act 53 of 2003; as amended by Act 46 of 2013) read in conjunction with the B-BEE Regulations of 2016 states in Section 13G(1) that all spheres of government, public entities, and organs of state must report on their compliance with broad-based black economic empowerment in their annual financial statements and annual reports. Under the explanatory notice (Notice 1 of 2018) issued by the B-BBEE Commission, the following table provides details on the municipality's compliance concerning broad-based black economic empowerment, which only focuses on the organisational aspect of the compliance reform: It should be noted that a consultant is currently in the process of doing an in-depth rating of BBEE compliance in terms of supply chain and socio-economic activities.

a) Management Control

Table 102: B-BBEE Compliance Performance Information - Management Control

Category	% for each category	Race Classification			Gender		Disability
		A	C	W	F	M	
Directors	4 / 6 = 66.67%	0	4	2	2	4	0
Senior Management	18 / 25 = 72%	3	15	7	4	21	0

b) Skills Development

Table 103: B-BBEE Compliance Performance Information- Skills Development

Category	% for each category	Race Classification		Gender		Disability	Total amounts spend
		Category	Total	Category	Total		
Black Employees	278	A	996	F	79	None	Total Spent: R3 267 622 R3 071 564.68 (94% of the total spent)
		C	179	M	199		
		I	0				
Non-Black employees	19	W	19	F	2	None	R196 057.32 (6% of the total spent)
				M	17		
Black People on internships, apprenticeships, learnership	40	A	13	F	16	None	R424 790.86 (13% of total)
				M	24		
Unemployed black people on any programme under the learning programme matrix	2	C	2	M	2	None	R19 605.73 (0.6% of the total spent)
Black people absorbed at the end of learnership, internship and apprenticeship	0	0	0	0	0	None	0

2.14 By-laws and Policies

Section 11 of the MSA gives municipal councils the executive and legislative authority to pass and implement by-laws and policies.

By-laws and policies approved in the 2022/23 financial year are listed below.

Table 104: By-laws and Policies approved

2.15 Municipal Website

The municipal website is an integral part of a municipality's communication infrastructure and strategy. It serves as a tool for community participation, improves stakeholder involvement and facilitates stakeholder monitoring and evaluation of municipal performance. Section 75 of the MFMA requires that municipalities place key documents and information on their website, including the IDP, the annual budget, adjustments budgets and budget-related documents and policies.

Below is a website checklist to indicate compliance with Section 75 of the MFMA.

Table 105: Municipal Website Checklist

Documents Published on the Stellenbosch Municipality's Website	Yes / No	Publishing Date
Current annual and adjustments budgets and all budget-related documents	Yes	Within legislated period
All current budget-related policies	Yes	Within legislated period
Current annual and adjustment budgets and all budget-related documents	Yes	Within legislated period
All current budget-related policies	Yes	Within legislated period
The Annual Report 2022/23	-	Pending
All current performance agreements required in terms of section 57(1)(b) of the Municipal Systems Act for 2022/23	Yes	Within legislated period
All service delivery agreements for 2022/23	Yes	Within legislated period
All long-term borrowing contracts for 2022/23	Yes	Within legislated period
All supply chain management contracts above a prescribed value for 2022/23	Yes	Within legislated period
An information statement containing a list of assets over a prescribed value that have been disposed of in terms of section 14(2) or (4) during 2022/23	Yes	Within legislated period

2.16 Communication

According to Section 75 of the MFMA, the municipal website is a crucial part of its communication infrastructure and strategy because it is a key tool for fostering stakeholder involvement, encouraging community participation, and facilitating the monitoring and evaluation of municipal performance. This platform plays a pivotal role in ensuring transparency and accessibility to key documents and information.

Local government, as outlined in the Constitution of the Republic of South Africa Act 1996, Section 152(1)(e), has a statutory obligation to encourage community involvement in municipal affairs. The Municipal Systems Act (MSA) further supports this by endorsing community participation. Stellenbosch Municipality, in line with its Communication Policy adopted in July 2020, is committed to high levels of transparency, accountability, and participatory democracy.

Effective communication platforms played a vital role during the year, contributing to transparency and community engagement. The municipality ensured the timely dissemination of information through various channels, including the municipal website, social media platforms, and traditional media outlets. Comprehensive responses to media inquiries, proactive release of statements, and positive news stories contributed to enhancing the municipality's corporate identity and brand.

The municipal website, regularly updated with official notices, tenders, news stories, and meeting agendas, remains a central hub for public engagement. Plans are underway to enhance user-friendliness and navigation for increased customer satisfaction. Social media platforms, including Facebook, Twitter, Instagram, and LinkedIn, have become effective tools for reaching a wider audience, disseminating alerts, and diverting traffic to the website.

Embracing the Digital Age:

In the digital age, the municipality recognises the significance of reaching more customers and residents through online media, social media, the municipal website, and various handheld devices. These platforms enable us to connect with a broader audience, ensuring that important information is accessible anytime, anywhere. As the municipality navigates this digital landscape, it aims to leverage technology to enhance communication, foster engagement, and meet the evolving needs of its community.

The municipality's growing Instagram and LinkedIn profiles, along with its expanding social media and online footprint, signify the municipality's commitment to staying connected with the community. In addition to traditional communication channels, the municipality distributes newsletters with account updates monthly, providing a comprehensive overview of municipal activities.

Building a Strong Stellenbosch Brand and Corporate Identity:

Beyond communication, the municipality is actively participating in building a strong Stellenbosch brand and corporate identity. Its involvement extends to creating a positive and recognisable image that resonates with the municipality's community and stakeholders.

Leading in Social Media Presence:

The municipality is proud to announce that it now boasts the largest Facebook page of any municipality in the Western Cape, apart from the metro. This achievement reflects the municipality's commitment to effectively engaging with its community and keeping them informed through the most widely used social media platform.

Communication Checklist:

- Regular updates on the municipal website;
- Active engagement on social media platforms (Facebook, Twitter, Instagram, LinkedIn);
- Placement of municipal advertisements in community and regional newspapers;
- Executive Mayor's monthly newsletter, pamphlets, posters, notice boards, and regular IDP / Ward meetings for community communication; and
- Establishment of an interdepartmental communication forum for improved internal communication.

This comprehensive approach to communication ensures that Stellenbosch Municipality remains transparent, responsive, and actively engages with its community and stakeholders.

Below is a communication checklist for compliance with the communication requirements.

Table 106: Communication Activities

Communication activities	Yes / No
Communication Unit	Yes
Communication Strategy	Yes
Communication Policy	Yes
Customer satisfaction surveys	No
Functional complaint management systems	Yes
Newsletters distributed at least quarterly	Yes

CHAPTER 3: SERVICE DELIVERY PERFORMANCE

3.1 Overview of performance within the organisation

This section provides an overview of the key service achievements of the municipality that came to completion during the 2022/23 financial year in terms of the deliverables achieved compared to the key performance objectives and indicators in the IDP.

To improve performance planning, implementation, measurement, and reporting, the municipality implemented the following actions:

- Departmental operational plans were developed for monitoring and reporting operational programmes. An electronic performance management system is operational within the municipality. The same system forms the basis for performance evaluations of the directors the municipal manager; and
- The municipality endeavoured during the development of the TL SDBIP as well as with the development of the Departmental SDBIP that the "SMART" principle be adhered to in the setting of indicators and objectives. The emphasis was placed on ensuring that targets were specific and time-bound, thus making them measurable.

COMPONENT A: BASIC SERVICES

This component includes the municipal functions, basic service delivery highlights and challenges, details of services provided for water, wastewater (sanitation), electricity, waste management, housing services, and a summary of free basic services.

3.2 Municipal Functions

3.2.1 Analysis of Functions

The municipal functional areas are indicated below.

Table 107: Municipal Functional Areas i.t.o. the Constitution

Municipal Function	Yes / No
Constitution Schedule 4, Part B functions:	
Air pollution	Yes
Building regulations	Yes
Childcare facilities	Yes
Electricity and gas reticulation	Yes
Firefighting services	Yes
Local tourism	Yes
Municipal airports	No
Air pollution	Yes
Building regulations	Yes
Municipal planning	Yes
Municipal health services	No
Municipal public transport	Yes
Municipal public works only in respect of the needs of municipalities in the discharge of their responsibilities to administer functions specifically assigned to them under this Constitution or any other law	No

Municipal Function	Yes / No
Constitution Schedule 4, Part B functions:	
Pontoons, ferries, jetties, piers, and harbours, excluding the regulation of international and national shipping and matters related thereto	No
Stormwater management systems in built-up areas	Yes
Trading regulations	Yes
Water and sanitation services are limited to potable water supply systems and domestic wastewater and sewage disposal systems	Yes
Beaches and amusement facilities	Yes
Billboards and the display of advertisements in public places	Yes
Cemeteries, funeral parlours, and crematoria	Yes
Cleansing	Yes
Control of public nuisances	Yes
Control of undertakings that sell liquor to the public	Yes from 2013
Facilities for the accommodation, care, and burial of animals	Yes
Fencing and fences	Yes
Licensing of dogs	No
Licensing and control of undertakings that sell food to the public	No
Local amenities	Yes
Local sport facilities	Yes
Markets	Yes
Municipal abattoirs	No
Municipal parks and recreation	Yes
Municipal roads	Yes
Pounds	Yes
Public places	Yes
Refuse removal, refuse dumps and solid waste disposal	Yes
Street trading	Yes
Street lighting	Yes
Traffic and parking	Yes

3.3 National Key Performance Indicators – Basic Service Delivery

The following table indicates the municipality's performance in terms of the National Key Performance Indicators required in terms of the Local Government: Municipal Planning and the Performance Management Regulations of 2001 and section 43 of the MSA. These key performance indicators are linked to the following two National Key Performance Areas: Basic Service Delivery and Local Economic Development.

Table 108: Basic Service Delivery

KPA and Indicators	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Basic Service Delivery*								
The percentage of households earning less than R6 500 per month with access to free basic services (In the case of Stellenbosch Municipality- several registered Indigent households are being reported)	100%	100%	100%	100%	100%	100%	100%	100%

KPA and Indicators	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Basic Service Delivery*								
Service for water, sanitation and refuse removal (Average)	7 042	5 686	6 453	6 813	6 666	7 283	4 681	4 744

Source: The data emanates from the Indigent Register of the Stellenbosch Municipality

3.4 Water Provision

Water is the most fundamental and indispensable of all available natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Poverty reduction / alleviation and improved water management are closely linked. Schedule 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

Basic water is defined as 25 litres of potable water per day supplied within 200 meters of a household. Stellenbosch Municipality had no water restrictions in place during the year under review.

The municipality responded well to the rollout of further critical water and wastewater infrastructure, the expansion of supply for future storage and growth, as well as the upgrade and maintenance of existing systems. It was also required to successfully respond to emergency scenarios such as the flooding events in June 2023, which were the highest rainfall experienced in 43 years.

The municipality also successfully agreed with the Department of Water and Sanitation to participate in the Bergriver Voëlvlei Augmentation Scheme, which would essentially secure the municipality additional water once the scheme is completed. This would be fundamental for additional water security for the future of Stellenbosch, in an increasingly water-scarce and climate-sensitive environment sensitive to climate change and "El Nina-like" possible shocks to the system.

The municipality supplies water to the consumers in their area of jurisdiction through the following six water supply systems:

- Stellenbosch: Eerste River treated at Ida's Valley WTP (own source);
- Stellenbosch: DWS allocation from Western Cape Water Supply Scheme (WCMSS) via the tunnel treated at Paradyskloof WTP (Theewaterskloof Dam);
- Franschhoek: Du Toits River treated at Franschhoek WTP (own source);
- Dwarsrivier and rest of Franschhoek: potable water purchased from the City of Cape Town (Wemmershoek Line);
- Raithby, Klapmuts, Koelenhof, etc.: Potable water purchased from the City of Cape Town (Blackheath WTP, Faure WTP, and Wemmershoek Line); and
- Boreholes BH1: Die Braak, BH2: Meerlust, and BH3: Van der Stel, treated in Containerised Package Plants. This system was only used for a short while after the June floods caused damage to the bulk water supply line from the Wemmershoek Line. The Kylemore BH and Package Plant were then used to provide water to the Dwarsriver communities. The rest of the system wasn't utilised in the 2022/23 financial year.

Water is also supplied to an extensive industrial area as well.

The municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek, which is a microwater treatment plant. The potable water supply from these works amounted to 20.59 Ml/d, and a further 9.57 Ml/d was obtained from the City of Cape Town during the

2022/23 financial year, ensuring a supply of approximately 30.16 Ml/d to the municipality's area of responsibility.

Areas supplied by the Wemmershoek Dam and Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath Water Treatment Works include Polkadraai, Spier, and Vlottenburg.

Areas supplied by Faure Water Treatment Works (from Steenbras Dam – City of Cape Town) are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although the City of Cape Town manages these treatment projects, the Stellenbosch Municipality must monitor and consider their effects on water quality and quantity.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 118 reservoirs / holding tanks / sumps, and sumps; water towers; 69 water pump stations; 41 pressure-reducing valve installations; and 704 kilometres of pipeline. A telemetry system is in charge of fully operating and controlling the system.

The total bulk water input into the water network for the 2022/23 financial year was 11 009 Ml, with an annual average daily demand of 30 163 kl/day. 37.2% of the water supplied is purified from the municipality's water sources at the Ida's Valley and Franschhoek Water Treatment Plants. The balance is supplied by the City of Cape Town (31.7%) and from the treatment of raw water at Paradyskloof Water Treatment Plant, as supplied by the Department of Water and Sanitation (31.1%). Potable water supplied by the City of Cape Town is analysed monthly.

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. Maintenance of equipment for all three plants is outsourced to external contractors.

Based on the municipality's International Water Association (IWA) Water Balance sheet for the 2022/23 financial year under review, the municipality recorded 27.4% for "non-revenue" water, which is an increase of 5.5% from the previous financial year and 21.9% for "non-revenue" water. Refer to the municipality's International Water Association (IWA) Water Balance Sheet extract below.

System input volume (SIV): July 2022 to June 2023 ; kL — **10 827 196** — **100%**
(water demand in reticulation system)

Potable water system

Authorised consumption 85,01%	Revenue water 72,58%	Billed metered	7 858 877	72,58%
		Billed unmetered	0	0,00%
	Non-revenue water 27,42%	Un-billed	1 344 896	12,42%
Water losses 14,99%		Commercial losses		0,00%
		Physical losses	1 623 423	14,99%

Revenue water (Sales) kl	**7 858 877**	**72,58%**
Non-revenue water (NRW) ; kl	**2 968 319**	**27,42%**
Real network losses ; kl	**1 623 423**	**14,99%**

The real physical network losses are at 14.99%, which is close to the best practice value of 15%.

The table above is the International Water Association's table to compute the water balance and is also accepted in the Department of Water and Sanitation's reporting structure. This forms the basis of the information needed and what is currently used to calculate water losses. This is combined with

monitoring systems installed on all bulk water supply points to determine and ensure accurate data on the water provided. The consumption data for all water users is drawn from the financial system with a regular data download to determine the total water sold. The figure above is used as far as possible to reflect the water balance and water losses in the water systems. The water readings of all areas are also sent to the Department of Water and Sanitation on a quarterly basis to monitor and control water usage and allocations of water.

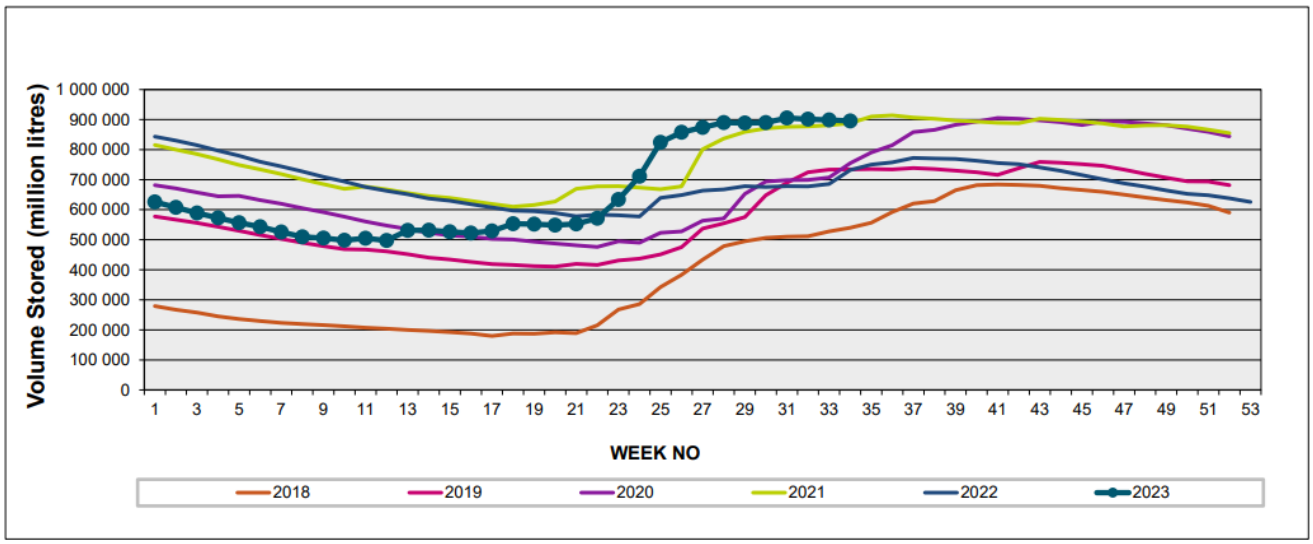
The municipality has developed a comprehensive Water Conservation and Water Demand Management (WC&WDM) strategy, which includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC&WDM and will ensure ongoing planning, management, monitoring, and an enabling environment. The WC&WDM initiatives include a Waterpipe Replacement Programme, indigent domestic leak repair and meter replacement programme, Stellenbosch water meter audit and Stellenbosch in-house water services operations and maintenance.

Stellenbosch Municipality is currently not implementing water restrictions. The current year has seen higher than average rainfall, and most bulk dams are full as at 30 June 2023. This, however, should not be seen as an indication that the probability of a future drought is low, and **the public should always be aware of the need to conserve water**.

The following table reflects the status of the dam levels supplying the WCWSS with water and the status of Stellenbosch's dam levels.

Table 109: Western Cape Dams

Major dams	2020	2021	2022	2023
	(%)	(%)	(%)	(%)
Berg River	81.2	100.8	87.9	100.9
Steenbras Lower	49.9	89.9	78.6	99.8
Steenbras Upper	99.6	84.6	85.8	100.5
Theewaterskloof	55.8	101.9	76.1	100.4
Voëlvlei	54.5	88.1	63.2	95.9
Wemmershoek	43.3	97.7	65.5	100.2
Total Stored (Ml)	**540 023**	**879 173**	**679 794**	**895 018**
% Storage	**59.7**	**97.4**	**75.2**	**99.6**



The table below depicts the Stellenbosch dams and overall water usage trends in the region (from the City of Cape Town Dam Levels Report, 21 August 2023):

Stellenbosch's own Dams

Table 110: Stellenbosch dams

WCWSS means Western Cape Water Supply System
MLD means million litres per day
More information on Water Saving and Restrictions is available on the City of Cape Town's 'ThinkWater' website

3.4.1 Service Statistics – Water Services

The table below outlines water usage totals per category:

Table 111: Total Use of Water

Total Use of Water (Mℓ)					
Year	Total Water into the System (Mℓ)	Total Water Sold (Mℓ)	Non-Revenue Water	% Non-Revenue Water	% Physical Water Loss
2014/15	14 876	11 556	3 320	22.3%	10.3%
2015/16	13 889	10 498	3 391	24.4%	12.4%
2016/17	12 220	9 572	2 648	21.8%	9.7%
2017/18	8 661	6 779	1 882	21.7%	8.2%
2018/19	8 058	6 380	1 676	20.8%	6.9%
2019/20	8 015	6 374	1 640	20.5%	6.5%
2020/21	10 003	7 701	1 815	18.1%	9.9%
2021/22	10 080	8 174	1 906	18.9%	9.7%
2022/23	10 827	7 858	2 968	27.4%	15%

The table below reflects the total use of water by sector in cubic meters:

Table 112: Total use of water by Sector (cubic meters)

Total use of water by Sector (cubic meters)					
Year	**Agriculture**	**Forestry**	**Industrial / Commercial**	**Domestic**	**Unaccountable water losses**
2022/23	0	0	2 895 329	4 963 773	2 621 624

3.4.2 Water Service Delivery Levels

As a priority, it is the responsibility of Stellenbosch Municipality to ensure that adequate and appropriate investments are made to ensure the progressive realisation of the rights of all people in its area of jurisdiction to receive at least a basic level of water and sanitation service. While the provision of basic water services is the most important and immediate priority, water services authorities are expected to provide intermediate and higher levels of services (for example, water on site) if it is practical and provided it is financially viable and sustainable to do so.

All water services provided by Stellenbosch Municipality to consumers within its borders are linked to the municipality's Tariff Policy and Tariff By-laws, and poor households are incorporated through the municipality's Indigent Policy. Many residents in the lowest income groups (living in informal areas) pose a major challenge to the municipality to provide suitable housing. Stellenbosch Municipality strives towards providing all households in the towns with a water connection inside the house and connecting all households to a waterborne sanitation system.

All the formal households in the urban areas of Stellenbosch Municipality's Management Area are provided with water connections and waterborne sanitation facilities inside households (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. The municipality is aware of the fact that communal standpipes represent in all likelihood the weakest part of a network's water supply services, and constantly repairs and monitors the system of operation and maintenance thereof.

The table below specifies the different water service delivery levels per household:

Table 113: Water Service Delivery Levels

Description	2015/16 *(audited)*	2016/17 *(audited)*	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Household								
***Water:* (above minimum level)**								
Piped water inside	37 902	37 989	38 027	40 321	42 615	38 120	38 120	49 420
Piped water inside the yard (but not in a dwelling)	3 596	3 596	3 596	3 596	3 596	3 596	3 596	1443 (479 standpipes on farms + 964-yard connections)

**2022/23 figures will be released upon the finalisation of the Water Services Development Plan (WSDP)								

The table below indicates the proportion of households who have access to water as at 30 June 2023.

Table 114: Access to Water

Access to water			
Year	**The proportion of households with access to water points***	**The proportion of households with access to piped water**	**The proportion of households receiving 6 kL free**
2022/23	20.16% (11 117- communal taps) + 479 (standpipe farms) + 964 (yard connection farms) = 12 560	79.30% (49 420 – formal house connections and backyard dwellers)	5 744

The table below indicates the capital expenditure for the Section: Water Services at 30 June 2023.

Table 115: Capital expenditure as at 30 June 2023: Section: Water Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
New Reservoir and Pipeline: Vlottenburg	63 036	60 895	3.40%
New Reservoir Rosendal	1 647	1 304	21%
Water Conservation and Demand Management	2 000	1 905	4.73%
Upgrade and replace water meters	2 900	2 675	8%
Waterpipe Replacement	4 000	2 605	35%
Only the five largest capital projects are listed.			

The Section: Water Services has spent, 89**% of** its capital budget for the financial year.

3.5 Wastewater (Sanitation) Provision

The main focus for the 2022/23 financial year was to implement the demands of the Stellenbosch Municipality's masterplan, fulfilling the development needs for the Stellenbosch Municipality's vision. Part of the demand was to complete the upgrade of the **Pniël Wastewater Treatment Works** and the operation and continued maintenance of the **Wemmershoek Wastewater Treatment Works**.

The construction of the 4.5 Ml/day Pniël WWTW upgrade commenced within the 2019/20 financial year. Delays caused by Eskom pushed the completion date into the 2022/23 financial year. The upgrade of the Wemmershoek WWTW Phase 1 commenced in the 2021/22 financial year and was completed on 30 November 2022. The Phase 2 design required a re-design, given the budget availability for Phase 2. The tendering process will commence in September 2023.

The table below specifies the different sanitation service delivery levels per household for the financial years 2016/17 – 2022/23.

Table 116: Sanitation service delivery levels

Description	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Household							
***Sanitation / sewerage*: (above the minimum level)**							
Flush toilet (connected to sewerage)	37 939	38 027	40 321	42 615	44 909	44 909	40 709
Flush toilet (with septic tank)	1 079	1 079	1 079	1 079	1 079	1 079	8 931

The table below indicates the capital expenditure for the Section: Sanitation Services at 30 June 2023.

Table 117: Capital expenditure as at 30 June 2023: Section: Sanitation Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Upgrade of the WWTW: Pniël and Decommissioning of Franschhoek	24 152	23 839	1.30%
Upgrade of the WWTW Wemmershoek	11 188	10 655	4.76%
Franschhoek Sewer Network Upgrade (Langrug / Mooiwater)	4 000	3 728	6.81%
Sewerpipe Replacement	1 500	593	60.46%
New Development Bulk Sewer Supply WC024	679	495	27.09%
Only the five largest capital projects are listed.			

The Section: Sanitation Services has spent 92% of its capital budget for the financial year.

The table below indicates all major projects implemented by the Department: Water and Wastewater Services.

Table 118: Number of employees in the Department: Water and Wastewater Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	1	0%
14 – 17	7	3	4	57%
9 – 13	44	32	12	27.2%
4 – 8	62	59	3	4.8%
3 – 0	111	102	9	8.1%
Total	**225**	**197**	**28**	**12.4**

3.6 Major projects implemented

The table below indicates all major projects implemented for the Department: Water and Wastewater Services.

Table 119: Major projects implemented

Project Name	Scope	Project Cost	Benefits, Impacts, and Goals Achieved	Other Comments
Capital Upgrades				
Water Treatment Works in Ida's Valley	Upgrading of existing works to increase the current treatment capacity.	R100M	Various upgrades and modifications to treatment works processes to increase treatment capacity.	Designs ceased after the concept design stage due to funding availability.
Phase 2: Upgrade to Wemmershoek (Franschhoek Valley) WWTW	The New Nereda Wemmershoek WWTW is unable to reliably produce compliant effluent and needs to be upgraded with tertiary treatment processes and increased treatment capacity.	R70M	Ensure allowance for future demand and economic growth and development in the greater Franschhoek and surrounding areas. Increase capacity from 3ML/day to 7ML/day in phases to eradicate Franschhoek WWTW challenges.	The tender for Phase 2 (capacity increase) is in the process of being advertised (the closing date of the tender is 29 January 2024). A service provider is assisting with the operations and maintenance of the plant as well as with staff training.
Upgrade of Pniël WWTW	The upgrade of existing WWTW.	R164M	Capacity increased to 4.5Ml/day.	Activated sludge process with a belt press and a new UV disinfection system. Practical Completion: 28 February 2023.
Phase 1: Polkadraai Reservoir and Pipeline	Construct 2 reservoirs and upgrade the pipeline.	R103M	Form part of the Blackheath Augmentation System to allow water transfer from CoCT to Stellenbosch and the use of its source during the winter for the Polkadraai area.	The contractor was appointed on 17 August 2022 for a 60-week construction period. Construction is to be completed in November 2023.
Phase 2: Polkadraai Reservoir and Pipeline	A new pipeline from Phase 1 reservoir to Papegaaiberg reservoir.	R30M	Form part of the Blackheath Augmentation System to allow water transfer from CoCT to Stellenbosch and the use of its source during the winter for the Polkadraai area.	The consultant design is complete. The tender will be advertised once the WUL is approved.

3.7 Electricity

The municipality's Electro-Technical Services Department continued to respond well to the challenges facing the electricity sector at present, with the rollout of bulk electrical infrastructure, the upgrading of informal settlements, and the upgrading and maintenance of current infrastructure.

Loadshedding continues to be experienced due to Eskom's challenges with the high number of increased stages of outages experienced during the year. The municipality has embarked on an alternative energy programme to investigate different aspects of alternative energy generation as well as a reduction in demand / usage, and / or shift towards renewable energy. As in the previous financial years, Stellenbosch Municipality continues to contribute to Eskom's electricity supply stability, mainly via the following projects:

a) The Demand-Side Management

The municipality continued during 2022/23 with the Energy and Demand Management project, replacing energy-inefficient streetlight fittings with energy-efficient (LED) fittings. The current identified projects will be completed, and the remaining ones will be re-prioritised.

To date, 95% of all conventional streetlight fittings in Franschhoek and 55% in Stellenbosch have been fitted with energy-efficient lights (LEDs).

Eskom handed over to the municipality all streetlight maintenance in Eskom areas of supply, with effect from February 2022. The Department is in the process of appointing a service provider to conduct a streetlight assessment and audit to prepare for the refurbishment of streetlight infrastructure as well as changing the conventional streetlights to energy-efficient streetlights. Due to the vast extent of the project, the municipality will implement it in a phased manner since the project is budget-dependent.

b) Hot Water Load Control Project

The municipality has installed hot water load control devices in the Franschhoek and Stellenbosch areas. To date, **8 852** devices have been installed in Stellenbosch and 795 in Franschhoek, which enable the shedding of all geysers during peak times, thereby realising energy savings. In addition, all new developments are being issued with load control devices to help manage the energy demand. The department is experiencing challenges with access to properties for various reasons but continues to follow up with residents by visiting the premises.

c) Alternative Energy

Under previous circumstances, the Constitution did not allow local government to enter into the generation of electricity, and the Electricity Regulation Act did not allow municipalities to purchase electricity from any company other than Eskom. Through the promulgation of the Electricity Regulation Act Regulations on 16 October 2020, this changed, and municipalities are now allowed to generate electricity and purchase electricity from electricity generators other than Eskom.

Stellenbosch Municipality is investigating several initiatives to reduce the impact of loadshedding, namely:

1. The initial application was submitted to Eskom to be considered for loadshedding mitigation;
2. The successful appointment of a lead consulting project management firm and an in-house project manager;
3. The award of the supervisory control and data acquisition (SCADA) telemetry system contract in 2023;
4. The Council's approval was obtained and an advertisement for public participation was made for three land parcels to possibly be used for the construction of alternative energy plants;
5. Investigation of solar photovoltaic and battery storage to ensure business continuation at critical municipal buildings and critical water and wastewater treatment plants;
6. The municipality's participation in the Western Cape Government Municipal Energy Resilience projects; and
7. Preparation for the issuing of a Request for Proposals (RFP) for independent power producers (IPPs).

Thus, the municipality is taking a measured, incremental approach towards loadshedding mitigation within available budgets and simultaneously ensuring that the municipality's infrastructure is ultimately ready to absorb the future scenario of mitigation.

d) Electrification of Informal Settlements

Since the inception of the electrification project in **Enkanini** in 2021, the Department has implemented the project in a phased approach as indicated below:

Table 120: Electrification of Informal Settlements

Financial year	Phase	Project Description	Total number of connections	Value of connections	Value of bulk infrastructure
2021/22	Phase 2	Enkanini Ph2 and Bulk Infrastructure	800	R14 300 000	-
2022/23	Phase 3	Enkanini Electrification Ph3 and Bulk (Enkanini to Watergang)	1 300	R24 400 000	R4 300 000

e) Pniël take-over

The municipality continued with the network upgrade in the 2022/23 financial year. The table below indicates the progress and value of the project to date.

Table 121: Electricity network upgrades

Financial Year	Project Description	Actual Amount Spend on Pniël Upgrade
2020/21	General upgrade of Pniël / Johannesdal 11kV and 400V networks. The work included the replacement of minisubs. Constructing the first 11 kV ring in Johannesdal.	R3 231 988
2021/22	General upgrade of Pniël / Johannesdal 11kV and 400V networks. Work included the building of a new 1 km, 11 kV overhead line, the replacement of the mini-substation, and the installation of metering units.	R3 500 000
2022/23	General upgrade of Pniël / Johannesdal 11kV and 400V networks. Work included the refurbishment of an 11 kV switching substation, the procurement of switchgear, and installation.	R3 491 923.98

Each financial year, the municipality prioritises projects identified from the network assessment report by starting / addressing the critical infrastructure first.

The appointed electrical contractor will continue with the network upgrading in the 2023/24 financial year.

As part of the network upgrades, the refurbishment of an 11 kV switching substation is in progress and will be commissioned by December 2023.

f) Token Identifier

In November 2024, all prepayment meters will no longer be able to accept pre-paid tokens, as indicated by the Standard Token Specification Association (STSA). To ensure that pre-paid meters are compliant post-November 2024, all pre-payment meters need to be reset.

The table below indicates the total number of meters to be reset:

Table 122: Total electricity meters to be reset

Status of the project	Number of Meters
Stellenbosch Municipality's total number of prepaid meters	31 076
Total number of meters visited and reset	21 061
Total number of meters outstanding	10 015

3.7.1 The Electricity Service Delivery Statistics

Stellenbosch Municipality has four intake points, as indicated in the table below.

Table 123: Stellenbosch Municipality notified demand per intake point

Major Towns	Notified Maximum Demand (NMD)	Maximum Demand Growth (NMD)	Maximum Demand Peak (NMD)
Stellenbosch	60 MVA	3.769 MVA	54.974 MVA
Franschhoek	10 MVA	2.172 MVA	11.602 MVA
Cloetesville	16 MVA	2.943 MVA	15.173 MVA
Pniël	9 MVA	0.054 MVA	6.96 MVA

3.7.2 Electricity Losses

The electricity losses as at 30 June 2023 were 4.24%.

The table below specifies the different electricity service delivery levels per household.

Table 124: Access to basic electricity

Description	2016/17 *(audited)*	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Household							
***Energy:* (above the minimum level)**

9 – 13	27	22	5	18.5%
4 – 8	46	40	6	13%
3 – 0	12	10	2	16.6%
Total	**89**	**76**	**13**	**14.6%**

3.8 Waste Management, Refuse Collections, Waste Disposal and Recycling

3.8.1 Waste Management

The Department: Waste Management's key responsibility is to keep the municipal area waste-free by removing illegal dumping and providing a refuse collection and waste disposal service for all residents. The department also encourages waste minimisation through waste treatment, recovery, and recycling solutions.

Stellenbosch Municipality's Waste Management Department is known for hosting municipalities from throughout the country to showcase its good waste management practices, and during this financial year, uMngeni Local Municipality, KwaZulu-Natal, was hosted.

Vacancies within the department are still a major challenge, but the municipality has filled a few vacancies, namely, 2x Assistant Superintendent positions in the Area Cleaning Section and 3x General Workers positions in the Refuse Collection Section. Other challenges have been the landfill reaching its capacity, and all waste must be hauled and disposed of at a private landfill in Vissershok in the Cape Town area at a huge expense. The construction of the landfill expansion has started this year, which will create additional space by the end of the 2023/24 financial year. Illegal dumping remains a challenge, but the Department is busy embarking on initiatives such as a swop shop to create

awareness around recycling and littering.

3.8.2 Area Cleaning

Area cleaning within the municipal area is provided using a contractor who is responsible for cleaning the Stellenbosch CBD and the use of EPWP personnel. Area cleaning is an essential service and all teams have worked throughout all the different lockdown levels. This section employed temporary employees from local communities that were sourced from the municipal unemployment database to perform cleaning services in the streets, open spaces and around waste removal skips.

Area cleaning service is provided using blue bags and black bags. Where the municipality faces excessive illegal dumping, it provides plant machinery (digger loaders and tipper trucks) to clean and clear such areas.

The municipality faced damage or misuse to its waste infrastructure which then forced the municipality to remove this useful infrastructure as it no longer served its intended use.

The Area Cleaning Section has seen an increase in the illegal dumping of builders' rubble and green waste within the hotspot areas.

The services rendered by the Area Cleaning Section include but are not limited to, street cleaning and emptying of litter bins.

Additional street bins were procured and delivered in the 2022/23 financial year. The specifications of these bins were amended to render a more robust bin with a small opening on top which makes it difficult to remove waste from the bin and prevent further littering.

Before

After

EPWP Employment Opportunities created in the 2022/23 financial year

The table below indicates the EPWP employment opportunities created in the 2022/23 financial year

Table 127: EPWP employment opportunities

July 22	Aug 22	Sept 22	Oct 22	Nov 22	Dec 22	Jan 23	Feb 23	Mar 23	Apr 23	May 23	June 23
204	200	200	233	243	276	216	263	229	229	332	406

3.8.3 Refuse Collection

Refuse collection is completed according to a weekly schedule for formal households, commercial properties, and industries. The municipality supplies 240 wheelie bins to all service points but excludes informal settlements where communal skips are provided and collected. This is a service that is provided 7 days a week.

Wheelie 240 litre bins

The following information is drawn from the available data regarding wheelie bin distribution during the 2022/23 financial year:

Wheelie 240 litre bins

The following information is drawn from the available data regarding wheelie bin distribution during the 2022/23 financial year:

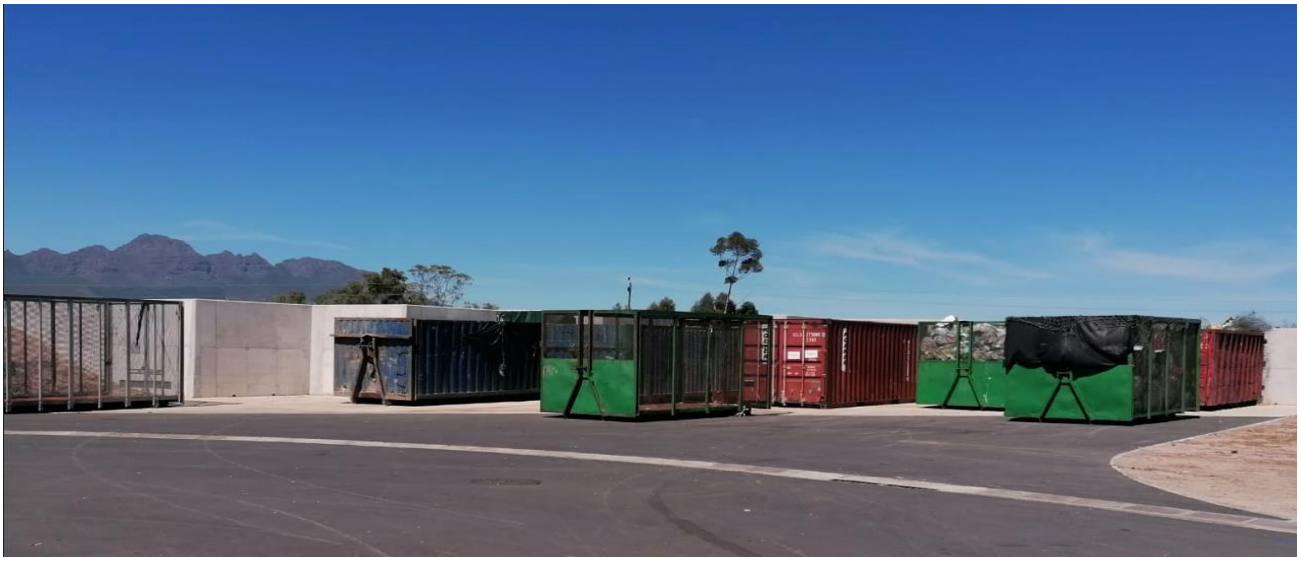
Table 128: Refuse bins distribution

Bins	Total
Broken bins	548
New bins	554
Total	**1 102**

3.8.4 Waste Disposal and Waste

Waste Minimisation and Disposal

Recycling



The Material Recovery Facility has been operational since 01 April 2021. For the period 01 July – 30 June 2023, volumes of recyclable waste managed and processed at the municipality's Material Recovery Facility varied from varied from 108 to 136 tons monthly. The highest volume was recorded in December 2022, with an average of 136 tons per month. Recyclables are being collected via a door-to-door collection service.

Figure 13: Operations underway inside the material recovery facility

The facility also features a public drop-off area, which will allow residents to bring garage and recyclable waste to dispose of responsibly.

Figure 14: Bins in Public Drop-Off area

An additional household hazardous waste unit was placed at the Material Recovery Facility for the public to drop off their household hazardous waste, free of charge.

Figure 15: Stellenbosch Landfill Site

The Stellenbosch Landfill, situated on Devon Valley Road, is in the care and maintenance phase and receives limited waste. Cell 3 has filled up since August 2019. An expansion of the current landfill is underway.

Due to the lack of landfill airspace in Stellenbosch, the transfer of all general waste to the private landfill situated in the City of Cape Town area at Vissershok Waste Management commenced in August 2019 and is still ongoing.

All waste that was delivered by either Stellenbosch Municipal-owned vehicles or by way of contractors working for Stellenbosch Municipality as well as private users was transferred from the Klapmuts Transfer Station to the Vissershok Waste Management Facility for disposal.

The table below shows the landfill statistics for waste in tons and refers to the incoming waste loads and waste removed using the weighbridge, or beneficiated, for the 2022/23 financial year.

Table 129: Stellenbosch Landfill Site tonnages of waste

Waste Description	July 22	Aug 22	Sept 22	Oct 22	Nov 22	Dec 22	Jan 23	Feb 23	Mar 23	Apr 23	May 23	June 23

												Volumes Out
Bricks	20	5	29	23	36	5	8	12	25	26	6	12
Crushed Material	6 240	758	656	44	157	15	0	9 403	2 168	1 059	2 180	3 883
Compost	1 486	374	36	590	408	591	597	822	550	66	829	1 179
Total	**7 745**	**1 137**	**722**	**657**	**601**	**611**	**605**	**10 237**	**2 742**	**1 152**	**3 014**	**5 074**

Only area cleaning volumes are landfilled, and all other waste types are either beneficiated, stockpiled, or used in another way on-site, e.g., soil as cover material and builders' rubble for the building of a road on-site.

Crushing is also being done as part of the tender awarded to the current contractor that operates and manages the landfill site.

Brick reclaiming takes place under the strict control of the site supervisor, who limits, keeps records, and ensures that anyone entering the landfill is wearing protective clothing and is registered on the site's database as such.

Builders' Rubble Crushing

Figure 16: Crushing of builders' rubble done on site

Green Waste Chipping

An appointed contractor is chipping green waste on-site at the Stellenbosch Landfill Site. Green waste is accepted at the landfill site, the Franschhoek drop-off, and now also at the Klapmuts Refuse Transfer Station. Green waste from the respective sites is all transported to the landfill site, where it is chipped.

Figure 17: Area allocated for chipping of Green Waste on Stellenbosch Landfill Site

Brick Reclaiming

Klapmuts Transfer Station

The Klapmuts Refuse Transfer Station has a design capacity of 150 tons of transfer capacity per day. Since August 2019, the Klapmuts Refuse Transfer Station has been utilised at near capacity to transfer waste to the Vissershok Waste Management Facility. Waste from all areas is transported in collection vehicles to the site and is transferred into open-top 30m3 bins for onward transport using three containers at a time by way of bulk transport to the Vissershok Waste Management Facility by an appointed contractor that renders this service.

The filling of bins is done with the use of two TLB machines and a hook-lift truck that replaces the filled bins with empty bins in the bays. Filled bins are then placed in a designated area, pending removal by the appointed contractor.

The transfer of waste to and through Klapmuts Refuse Transfer Station commenced in August 2019 and for the period from 01 July 2022 until 30 June 2023 a total of 38 722 tons of general waste were transferred.

Franschhoek drop-off

The Franschhoek Drop-off Facility continued to provide a free service to the residents of Franschhoek and its surrounding areas to dispose of garden waste and bulky goods. A contractor is appointed to transport garden waste to Stellenbosch Landfill and bulky waste to Vissershok Private Landfill.

a) Development of additional waste disposal cells project

The Stellenbosch Landfill reached capacity in August 2019. All Stellenbosch waste is now being transferred to the private Vissershok Landfill. This represents a huge additional expense for the municipality. Thus, the project to design and construct the new cells is an important, high-priority project.

Zutari (Pty) Ltd. has been appointed as the municipality's consulting engineer and is responsible for the design, contract administration, and construction supervision. Zutari (Pty) Ltd. has completed the landfill design report and submitted the designs to the Department of Water and Sanitation and the Department of Environmental Affairs and Development Planning for approval. Once the designs are approved, construction will commence.

b) Projects continued in the 2022/23 financial year but initiated in the previous financial year(s):

i) Landfill gas extraction, flaring and electricity generation

Several investigations into the use of the landfill for harvesting and the beneficial utilisation of landfill gas have been undertaken. The most recent study document in a report recommended that an active landfill gas extraction and flaring system could still be considered for the Stellenbosch Landfill, mainly to reduce anthropogenic emissions from the landfill site. Should a full-scale project of this nature be implemented, revenue to support the project could be derived from prevailing emission reduction markets, and factual operational data would provide further evidence upon which to accurately evaluate the potential for a power generation project component.

The municipality has appointed Ingerop (Pty) Ltd. to investigate and design landfill gas extraction and management infrastructure. The investigation will also determine if electricity generation will be feasible.

Compliance

For disposal facilities (landfills and transfer stations) to be operated in compliance with the relevant legislation, all landfills must be licenced and managed according to the conditions in the licence. Internal audits form part of these legal requirements. Audits were conducted quarterly in September, December 2022, March, and June 2023 by waste management staff. Audits were conducted at the Stellenbosch Landfill Site, Klapmuts Transfer Station, and the Materials Recovery Facility.

(ii) External audits

Management practices at all sites must also be compliant with the norms and standards in terms of the National Environmental Management Waste Act (NEMWA), as well as with certain sections of the Minimum Requirements for Waste Disposal by Landfill (DWAF, 1998) and other relevant regulations.

To be able to assess whether waste management practices are according to all stated conditions, landfill owners must, regularly (at least once per annum), obtain the services of an external auditor to do an independent landfill compliance audit.

To ensure compliance, external audits have been undertaken by an independent specialist consultant at the Stellenbosch landfill and the Klapmuts Transfer Station per the waste management licence conditions. A review of the audit findings to ascertain improvements was carried out after six months.

(iii) Monitoring Committee

All landfills are established and operated in terms of a Waste Management Licence (WML) issued by either the National or Provincial Department of Environmental Affairs and Planning. In terms of the waste management licence, landfills are required to establish a monitoring committee. The objective of the Monitoring Committee is to provide a forum to enable the community to effectively participate in and monitor the operation, rehabilitation, closure, and ongoing monitoring of a landfill.

The Stellenbosch landfill has an active monitoring committee. Monitoring Committee meetings are attended by Department of Environmental Affairs and Department Planning officials, as well as officials of various municipal departments as and when required. The independent external auditor also attends the meeting as and when required to report on the findings of the annual external audit and the review audit. Meetings were held in a hybrid format, which implies that attendees are present either in person or via the online platform.

c) Waste Managers Officers Forum

The Waste Management Officer (WMO) for the Stellenbosch Municipality is the Senior Manager: Waste Management. Quarterly meetings of the Provincial Waste Managers Officers Forum take place at various venues across the province. The Waste Management Officer attends the meeting and reports on activities within the municipality; this also provides a forum to receive information from provincial officials and further networking with Waste Management Officers from other municipalities within the province.

These forums are also held on a district level, where municipal representatives from the Cape Winelands discuss waste-related matters within the district.

d) Social Engagement and Environmental clean-ups

Various awareness activities were conducted during the 2022/23 financial year, which included:

- An educational presentation on the material recovery facility was done at an old age facility;
- The Material Recovery Facility;
- Awareness Campaign in Cloetesville;
- Compost Bin Roll Out in Franschhoek; and
- Swop Shop in Klapmuts.

During all these events, the focus was to minimise waste and present it in a way that the community could identify with and be convinced of the value of their contribution to responsible waste management.

The table below indicates the service levels of refuse removal as at 30 June 2023.

Table 130: Refuse removal service delivery levels

Description	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Household						
Refuse Removal: (Minimum level)						
Removed at least once a week	37 207	49 072	48 988	37 926	49 300	50 792
Minimum Service Level and Above Sub-Total	37 207	49 072	52 374	37 926	49 300	50 792
Minimum Service Level and Above Percentage	78.7	93.7	93.5	100%	100%	100%
Refuse Removal: (Below the minimum level)						
Removed less frequently than once a week	1 064	1 064	1 064	1 064	N/A	N/A
Using communal refuse collection	N/A	N/A	N/A	N/A	N/A	12 161
Using own refuse dump	5 358	6 453	2 323	N/A	N/A	N/A
Other rubbish disposal	766	N/A	N/A	N/A	N/A	N/A
No rubbish disposal	N/A	N/A	N/A	N/A	N/A	N/A
Below the Minimum Service Level Sub-Total	7 188	7 517	3 387	N/A	N/A	N/A
Below the Minimum Service Level Percentage	8.80	11.66	6.5	N/A	N/A	N/A
Total Number of Households	**44 395**	**56 589**	**5 5761**	**38 990**	**49 300**	**62 953**

The table below indicates the capital expenditure for the Department: Waste Management Services as at 30 June 2023.

Table 131: Capital expenditure as at 30 June 2021: Department: Waste Management Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Expansion of the landfill site (new cells)	4 154	4 560	-9.76%
Landfill Gas to Energy	3 900	1 993	48.90%
Street refuse bins	1 049	752	28.33%
Major Drop-Offs: Construction (Franschhoek)	500	133	73.37%
Formalise skip areas	441	441	0%
Only the five largest capital projects are listed.			

The Department: Waste Management Services has spent 79% of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Waste Management Services.

Table 132: Total number of employees in the Department: Waste Management Services

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0%
14 – 1 7	2	2	0	0%
9 – 13	7	3	4	57%
4 – 8	34	29	5	14.7%
3 – 0	28	28	0	0%
Total	**72**	**63**	**9**	**12.5%**

3.9 Integrated Human Settlements

3.9.1 Housing Development

The municipality has an important responsibility to plan for integrated human settlements by ensuring that all its citizens reside in developable, formalised, safe, and sustainable human settlements. This is accomplished by providing dignified living through national and provincial funding within closer proximity to employment opportunities, thereby improving the quality of life for all citizens.

The Department: Housing Development managed a capital expenditure budget of R6 989 620, which includes R3 265 534 from the allocated amount of R18 248 000 by the Provincial Department of Infrastructure (PDoI) (Human Settlements branch), previously known as the Provincial Department of Human Settlements (PDoHS). Furthermore, the municipality, using its funds, budgeted R3 724 086 to expedite future projects. A staggering 96% of the budget allocated to the Department: Housing Development was spent on future projects in the financial year under review.

Communication from the PDoI (Human Settlements Branch) on 22 April 2023 indicated the adjusted targets and funding allocation of the approved 2022/23 Human Settlement Development Grant (HSDG) and Informal Settlements Upgrade Partnership (ISUP) Grant Business Plans.

The list of projects, targets, and budgets for the Stellenbosch Municipality for the 2022/23 financial year are stipulated in the tables below, as extracted from the said letter.

3.9.1.1 Housing Development Capital Budget

Table 133: Department: Housing Development capital budget

Sites	2022/23 Planned	
	Funding Source	Budget
Housing Projects	CRR	1 094 666
Housing Projects (Ida's Valley Housing Project)	HSDG	400 000
Cloetesville (380) FLISP	HSDG	1 100 000
Erf 64, Kylemore	CRR	1 162 500
Erf 7001 and other possible sites for mixed-use development in Cloetesville	CRR	525 000
Farms 81/2 and 82/9, Stellenbosch	CRR	34 500
Jamestown: Housing	CRR	700 000
Kayamandi Town Centre	HSDG	486 998
Lapland Precinct	CRR	207 420
Northern Extension: Feasibility	HSDG	1 278 536
Total		**6 989 620**

3.9.1.2 Human Settlement Development Grant (HSDG)

Table 134: Human Settlement Development Grant (HSDG)

Stellenbosch Municipality	2022/23 Planned		
	Sites	Units	Funding R'000
Vlottenburg Longlands (106 increased to 144) IRDP	0	106	16 748 000
Cloetesville (380) FLISP	0	0	1 100 000
Stellenbosch Ida's Valley (204)			400 000
Total	**0**	**106**	**18 248 000**

3.9.1.3 Informal Settlements Upgrade Partnership Grant (ISUPG)

Table 135: Informal Settlements Upgrade Partnership (ISUPG)

Stellenbosch Municipality	2022/23 Planned		
	Sites	Units	Funding R'000
ISSP Kayamandi Zone O (711) UISP	78	0	5 850 000
Langrug Franschhoek Mooiwater Dam Rehab and Basic Services	0	0	4 500 000
Total	**78**	**0**	**10 350 000**

3.9.2 Housing multi-year projects

The Department: Housing Development, whose main function is to plan for future housing developments, resorts to the Housing Pipeline, which, amongst other things, focuses on the following multi-year projects:

3.9.2.1 Erven 412, 217 and 284 Groendal, Franschhoek

The Department: Housing Development, together with the Department: Property Management, undertook a process to formulate a Call for Proposals in line with the approved Council agenda item.

Figure 18: Aerial image of erven 412, 217 and 284, Groendal

A service provider was appointed to draft different site development options for the Council to consider for approval, after which the procurement process will continue.

Discussions with the Ward Councillors have been concluded as an enquiry was raised during the discussions on Erf 284. The user department has forwarded this enquiry to the PDoI (previously known as PDoHS) and to the Directorate Corporate Services for further investigation to address any legalities. When all comments have been received, the item will be referred to the Council.

3.9.2.2 Farms 81/2 and 81/9, Stellenbosch

In terms of the implementation of social housing programmes, the Stellenbosch Municipality has identified Portions 2 and 9 of Farm No. 81 Stellenbosch. This site is located between the Cloetesville and Kayamandi settlements.

The R304 to the west and the railway line to the east serve as its boundaries. The Plankenburg River traverses the site along its eastern boundary. The southern boundary of the property includes portions of the Kayamandi Tourism Centre as well as a bridge over the railway line. The Mount Simon residential development frames the northern boundary.

The Department: Housing Development liaised with the PDoI, the Social Housing Regulation Authority (SHRA), and the National Association of Social Housing Organisations (NASHO) to obtain input in the finalisation of the specifications and criteria for a Call for Proposal.

Service providers were appointed to undertake a geotechnical investigation, a flood line study, and a traffic impact assessment on the site during the 2020/21 financial year.

The user department compiled a Request for Proposal (RFP) to invite delivery agents that can access SHRA Capital grants (Social Housing Institutions (SHIs) and / or Other Development Agency's (ODAs)) to submit a concept proposal to develop social housing on Farm 81/2 and Farm 81/9, Stellenbosch.

The amended tender was re-advertised on 02 September 2022, and the closing date for the tender was on 03 October 2022. Thereafter, a SCM procurement process followed, whereby the user department was instructed to verify the net profit value (NPV) calculation of the bidders.

Figure 19: Aerial image of Farms 81/2 and 81/9, Stellenbosch

For the tender to be further evaluated, a registered and accredited service provider assisted the Stellenbosch Municipality with the verification of the NPV, which has been appointed by the **National Association of Social Housing Organisations (NASHO)**. The final report was anticipated to be received before the end of June 2023 to allow the user department to submit the NPV report to SCM for evaluation and appointment of a suitable SHI and / or ODA.

3.9.2.3 Erf 7001, Cloetesville

The goal of this development is the delivery of medium- to upper-GAP housing and is not aimed at BNG housing units (free houses). There is an urgent need for the property to be developed to create an integrated urban development (Cloetesville), providing housing.

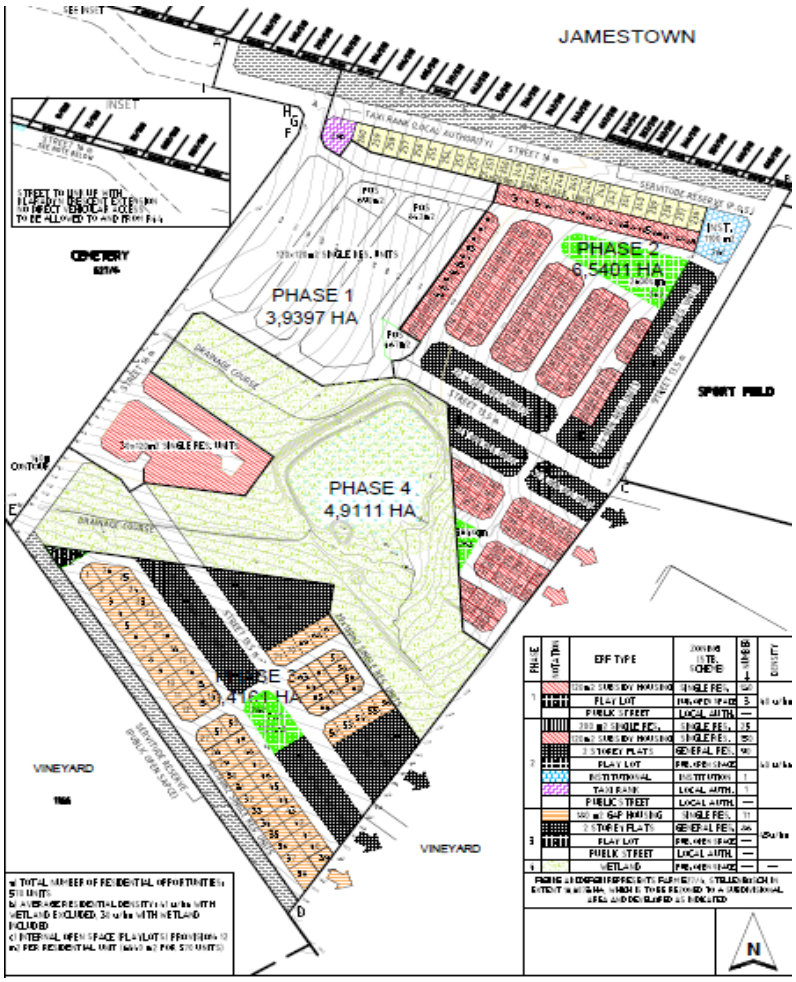
Figure 20: Aerial image of Erf 7001, Cloetesville

Stellenbosch Municipality is essentially making the land available (via the ATR processes) to a developer to develop housing opportunities in the GAP market.

The PDoI (Human Settlements Branch) approved the funding for the outer years after the business plan was gazetted in March 2022. Therefore, the user department could only appoint a service provider in May 2022, and the service level agreement was concluded in July 2022.

The service provider finalised the different conceptual urban designs, and three layout concepts were presented to the user department in December 2022. After input from the user department, the amended urban design and layout plan has been finalised and submitted to the Department: Land Use Planning to obtain development rights. The normal planning process will continue, whereby it will be referred to the Municipal Planning Tribunal (MPT) for a decision.

3.9.2.4 Farm 527, Jamestown (Phases 2 and 3)



The subject property is located on the southern edge of the suburb of Jamestown, east of the R44 between Stellenbosch and Somerset West. It is flanked by an existing cemetery on its western boundary and a sports field located centrally on its northern edge.

The site falls within an area characterised by medium- to high-density residential as well as non-residential uses that serve the local community of Jamestown.

Phase 1 of the development, consisting of 162 subsidised housing opportunities, was completed in November 2016.

It is therefore proposed that Phases 2 and 3 of Portion 7 of Farm 527 (site and service, 2-story walk-ups, GAP housing, high-income housing, and public open space) be made available simultaneously for development in the short to medium term.

Map 5: Proposed layout plan of Farm 527, Jamestown

The municipality went out on a procurement process seeking the services of a multidisciplinary team of professionals to undertake a broad conceptual urban design framework and to obtain town planning and development rights.

The process and timeframe for Phases 2 and 3 will be concluded over a period of two (2) years.

The PDoI (Human Settlements Branch) approved the funding for the outer years after the business plan was gazetted in March 2022. Therefore, the user department could only appoint a service provider in June 2022. The service level agreement is in the process of being concluded.

The service provider compiled the land use application for phases 2 and 3.

The rezoning and subdivision application was submitted on 09 December 2022 to the Department: Land Use Planning, and the public participation process for the town planning application was concluded on 15 May 2023.

After several objections were received, the consultant and user departments submitted their comments for further evaluation. The application will be submitted to the MPT for a decision.

3.9.2.5 Kayamandi Town Centre

A service provider with the necessary multi-disciplinary team of professional consultants was appointed to conduct a feasibility study to assess the redevelopment of the town centre of Kayamandi and provide a holistic development picture of Kayamandi. The latter resulted in a framework for possible future development opportunities in Kayamandi and its environs.

The proposed typology mix is such that it will enhance the beauty and character of the Kayamandi Town Centre in that it will provide a mix of typologies to accommodate the old and the young. The proposal for walk-up units is also to provide maximum densification within the limited space available.

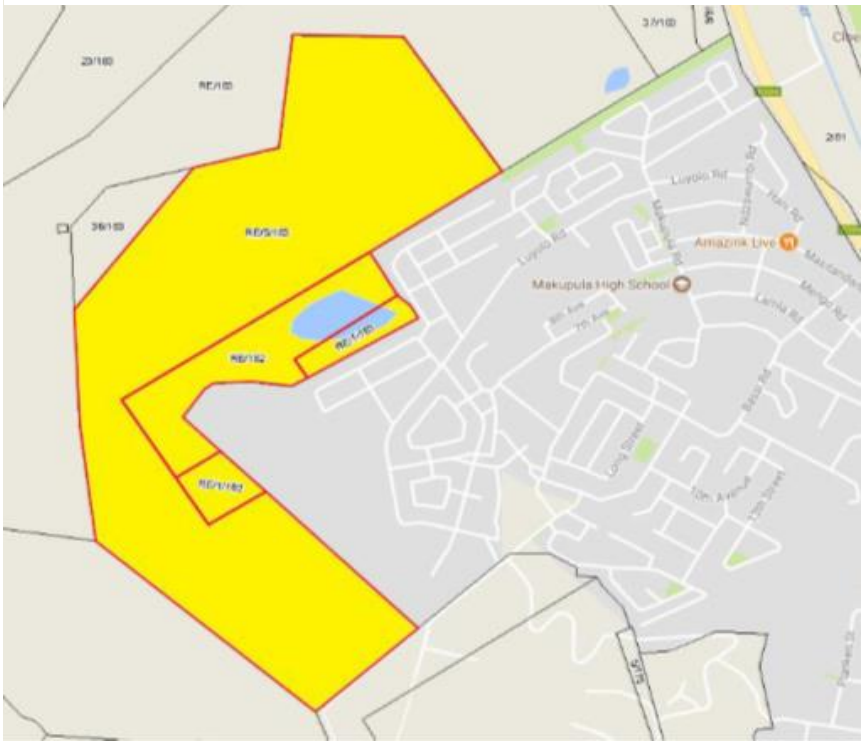
The proposed town planning layout consists of ±1 800 housing opportunities (2 to 3-story BNG walk-ups). The development parameters will include a mix of housing typologies, business units, and community facilities. This design methodology was utilised to suit the demand and the needs of the affected community.

The service provider submitted the Land Use Planning application in November 2022 to the Department: Land Use Planning for approval.

A request for exemption from the public participation provisions / requirements in terms of Section 60(1)(b) and (c) of the Western Cape Land Use Planning Act, 2014 (Act 3 of 2014) [LUPA] was approved, and the urban design proposals were circulated to internal departments for comment.

On 12 May 2023, comments were received from the Directorate: Infrastructure Services requesting a meeting and presentation with the service provider and the user department to explain the various aspects of the development.

Map 6: New urban design of the project



A new urban design concept has been proposed to deal with the multi-storey upgrading (3-storey walk-up units) of the Kayamandi Town Centre and was presented to the Directorate: Planning and Economic Development as well as to relevant officials for comments and inputs.

The planning application process is anticipated to be completed during the 2023/24 financial year.

3.9.2.6 Northern Extension, Stellenbosch

The Northern Extension of Stellenbosch is situated north of Kayamandi, adjacent to Cloetesville and the Welgevonden Estate. The sites are located on the western side of the R304 (the main arterial from the north) to Stellenbosch.

Map 7: Location of the proposed development of the Northern Extension

The specific site has been earmarked to provide a mixed-use development that could yield ±4 000 – 5 000 residential opportunities to address the housing need experienced in Stellenbosch.

It should be noted that a portion of the development of the northern extension has been identified as a possible relocation area for the redevelopment of the Kayamandi Town Centre and other related projects.

All specialist studies have been completed. The draft market analysis study that was undertaken by DEA&DP was concluded in May 2022 and has been incorporated into the draft conceptual design layouts. The different conceptual design layout options were workshopped with various internal departments during June and August 2022, and Heritage Western Cape comments were received in September 2022.

A Notice of Intent was submitted to Heritage Western Cape, and the service provider was informed that two additional specialist studies are required, namely an archaeological impact assessment and a visual impact assessment on the cultural landscape.

Consultants submitted the land use application to obtain development rights and await an MPT decision. It is envisaged that the development rights could be obtained during the 2023/24 financial year.

3.9.2.7 Erf 64, Kylemore

The identified property is 15.5ha, of which the municipality requires ±8ha for residential purposes.

A Special Power of Attorney was provided in November 2021 by the National Department of Public Works and Infrastructure (NDoPW&I) to HDA.

It should be noted that pre-feasibility studies were conducted more than 10 years ago and need to be reviewed and amended where necessary.

The Housing Development Agency (HDA) has been appointed to assist with the transfer of land from the NDoPW&I to the Stellenbosch Municipality. Furthermore, the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General, and the relevant funding applications to the PDoI were attended to.

Figure 21: Site layout of Erf 64, Kylemore

A public meeting was held on 01 September 2022, to inform the community of the status of the land transfer from the NDoPW&I and the process to obtain the development rights for the housing development on Erf 64. A Project Steering Committee (PSC) was elected at the public meeting to participate in the process.

A PSC Social Compact workshop was held on 16 November 2022, with the elected PSC in Kylemore. A site inspection took place with the PDoI (Human Settlements Branch) on 27 January 2023. The purpose of the site visit was to assess the property against the funding application that has been submitted to the PDoI.

The HDA appointed a service provider in December 2022 to assist the HDA with the township establishment application. The environmental consultant commenced with the Basic Environmental Study process in May 2023 and has erected site notices for interested and affected parties to register for any comments.

The HDA has appointed various sub-consultants and is currently continuing with the specialist studies as per the scope of work. According to the project programme, the draft layout plan and motivation were submitted at the end of June 2023.

3.9.2.8 Langrug, Franschhoek

Figure 22: Aerial image of Langrug

These projects aim to incrementally upgrade Langrug and formalise existing development patterns to upscale the provision of basic services. The density of structures impeded the implementation of these planning interventions. Land invasions at Langrug exacerbated the implementation of these projects. To implement the in-situ upgrading projects, a decanting site is required to relocate households to create enough space for upgrading.

In the long term, the municipality plans to undertake detailed planning studies to unlock housing development opportunities, develop a phased approach implementation plan premised on detailed designs for the provision of basic services and formalisation of Langrug, apply for development rights and installation of basic services, and identify suitable land for decanting.

The departments Housing Development, Informal Settlements, and the Project Management Unit, in collaboration with the PDoI (Human Settlements Branch), have started technical engagements in May 2023 regarding the Langrug dam.

The meetings entail applying for funding to finalise the detailed planning of the rehabilitation of the freshwater dam and implement an in-situ upgrading project in Langrug.

There is currently no funding available on the business plan of the PDoI for the 2022/23 financial year to plan and implement the project. The PDoI will discuss making funding available during their adjustment budget in September 2023. Should funding become available, the studies will commence.

3.9.2.9 La Motte, Franschhoek

Figure 23: Identified portions of land in Franschhoek

La Motte is a former Bosbou Hamlet situated approximately 3.5 km northwest of Franschhoek town on the Robertsvlei Road, close to where it intersects the R45. Originally built to house forestry workers, the village is made up of the original dwellings and a range of community facilities. During the construction phase of the Berg River Water Scheme, new houses were built adjacent to the existing settlement to temporarily house the construction workers; these houses are being transferred to identified beneficiaries.

The NDoPW&I, as custodians of the relevant portions of land, has been engaged to start the necessary procedures that would lead to the transfer

of the subject properties into the name of Stellenbosch Municipality for housing purposes. The municipality is currently awaiting feedback from the National Department of Public Works and Infrastructure.

The HDA has been appointed via an Implementation Protocol Agreement to assist with the transfer of land from the NDoPW&I to the Stellenbosch Municipality and to further attend to the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General, and the relevant applications to the PDoI (Human Settlements Branch).

The HDA submitted a new request for the state land release for the subject property by NDoPW&I to HDA through a power of attorney.

The HDA is to submit a Project Feasibility Report (PFR) requesting funding for land use rights for the project on the release of the property. The submission to PDoI will allow funding flow for the 2023/24 financial year.

The HDA estimates that the land may be transferred to the municipality in the 2024/25 financial year. Planning studies and approvals will be finalised when the appropriate Power of Attorney (PoA) is received.

3.9.2.10 Meerlust, Franschhoek

Portion 1 of Farm Meerlust No. 1006, in the Franschhoek Valley, known as Meerlust, has been identified for residential purposes. Ownership of the property currently vests with the NDoPW&I.

The site is located on the southern edge of the R45, close to the intersection of the R45 and the R310, and lies between Werda in the northwest and Allee Bleue, Lekkerwyn, and the Pickstones to the east.

A portion of this land currently accommodates the Meerlust Forestry Village (home to around 34 households), and the redevelopment of this village is an integral part of this project. Portion 1 of Farm Meerlust No. 1006 included in this proposed development concept is zoned agriculture, and an application therefore still needs to be made to obtain development rights for urban / residential development. The development of this area is therefore only possible in the medium to long term, as also indicated in the Stellenbosch Municipality Housing Pipeline (Annual Review 2017–2020). It will therefore be required of the prospective developer to do the necessary detailed feasibility studies (in addition to those already completed) and obtain the relevant planning and other approvals to enable township establishment for the proposed development.

The NDoPW&I, as custodians of the relevant portions of land, has been engaged to commence with the necessary procedures that would lead to the transfer of the subject properties into the name of Stellenbosch Municipality for housing development purposes.

The HDA is appointed to facilitate the transfer of land from the NDoPW&I to the Stellenbosch Municipality, guided by the desired development option, and to further attend to the required applications to obtain land use rights, the registration of diagrams / general plans with the Surveyor General, and the relevant applications to the PDoI (Human Settlements Branch).

The PDoI requested that a new Project Initiation Document (PID) be prepared for evaluation. The HDA will submit the PID application during the 2023/24 financial year to PDoI, and if approved, the municipality will then be able to receive funding for planning progress.

3.9.2.11 Erf 2183, La Rochelle, Klapmuts

Erf 2183, Klapmuts, is located along Gomas Street, Klapmuts, approximately 1.5km off the R310 that links Stellenbosch to the N1. The site is located on the south-eastern edge of the town of Klapmuts and is bordered by vacant land to its southern and eastern boundaries, with a proposed new housing development on the western and northern boundaries towards Mandela City, Klapmuts.

Figure 24: Erf 2183, La Rochelle, Klapmuts

To provide for the dire housing need in the Klapmuts area, especially for current backyarders, this property was identified as a possible option for a "site-and-service" housing project.

A service provider has been appointed to undertake a subdivision application and registration of the diagrams in the Surveyor General's Office for Erf 2183, La Rochelle, Klapmuts.

The user department requested that the Ward Councillor engage with the Ward Committee and affected communities to provide three street names as requested by the Department: Land Use Planning.

A meeting was held on 29 August 2022, in Klapmuts with the La Rochelle Committee. The La Rochelle Committee provided the user department with possible street names as per the Street Name Policy of the Stellenbosch Municipality.

Erf 2183 Klapmuts is a zoned subdivisional area for the following uses: less formal residential zone, public open space zone, public road, and parking zone. A team of professional service providers has been appointed to attend to the subdivision of the property into residential ervens of approximately 40m² to 50m², the submission of all diagrams to the Surveyor-General's office for approval and registration, as well as the submission of all documents to the PDoI (Human Settlements Branch) to obtain the relevant funding for this incremental housing project.

The service provider drafted conceptual subdivisional layouts and presented them to various internal departments for input.

The land use application has been submitted, and a formal public participation process will follow. Await an MPT decision.

3.9.2.1 Five housing projects in Kayamandi, Stellenbosch

A service provider was appointed to finalise township establishment by obtaining the necessary land use rights for each of the five projects situated in Kayamandi, Stellenbosch as well as submission of all diagrams in the Surveyor-General's office for registration and approval.

Table 136: Five housing projects in Kayamandi

Project Name	Site Area per ward	Development Provision	Comments
Project 4A (Erven 1080 to 1112, Kayamandi)	Ward 12	146 rental stocks	Township establishment was obtained, and all diagrams were submitted to the Surveyor General Office for registration.
Project 4 B (Red Bricks Hostels - Erven 112, 114, 115, 116)	Ward 13	51 units and 5 public open spaces	Township establishment was obtained, and all diagrams were submitted to the Surveyor General Office for registration.
Project 5A (175 Units - Erven 1123 – 1154)	Ward 15	175 higher-density units and public open spaces	Township establishment was obtained, and all diagrams were submitted to the Surveyor General Office for registration.
Project 5B (137 Units – Erven 513-522, 67 and 69 and a portion of Erf 523)	Wards 12 and 15	42 units	It should be noted that no power of attorney can be obtained for Project 5B since Erf 66 within Project 5B is private property. Therefore, the said matter has been referred to the Directorate: Corporate Services await the outcome
Project 8 (Mpelazwe, Remainder Erf 288 Kayamandi, 65 units)	Ward 13	54 units	Township establishment was obtained, and all diagrams were submitted to the Surveyor General Office for registration.

3.9.2.2 Maasdorp Village

The Maasdorp Forest Village, which comprises portions 27 and 28 of Farm La Motte No. 1041 Paarl, is located north of the intersection of Main Road 191 (R45) and Divisional Road 1351, approximately four kilometres northeast of Franschhoek.

The site currently accommodates approximately 32 formal houses and outbuildings. The property is currently zoned for agricultural purposes and must be rezoned and subdivided to enable a formal township establishment accommodating the existing households, as otherwise determined by further investigations and community engagements.

In June 2018, a service provider was appointed to attend to the township establishment process for Maasdorp Forest Village, Franschhoek: portions 27 and 28 of Farm La Motte No 1041 Paarl, and future expansion on Portions 3 and 7 of Farm La Motte No 1041, Franschhoek; the project has later been referred to only as the detailed planning and design for the Township Establishment of Maasdorp Forest Village.

The lengthy process of the project is due to multiple challenges throughout the project. The survey process with the community and the collection of survey data has been completed. The outcome of the survey was presented to the Department: Housing Development in September 2021 and factored into the Land Use Planning Application.

The service provider submitted the Land Use Planning Application to the Department: Land Use Planning, which was advertised for public participation in February 2023. The Department: Land Use Planning circulated the said application to internal departments for comments, whereby the service provider is addressing the comments received before the application can serve at the MPT for decision-making.

Planning decisions anticipated to be obtained during the 2023/24 financial year.

3.9.2.3 LAP Precinct

Stellenbosch Municipality, as identified in the approved Housing Pipeline, is progressively investigating the densification of existing rental stock. An investigation into the remainder of Erf 2149, better known as Lapland (Lavanda, Aurora, and Phyllaria), in Stellenbosch, was conducted.

Figure 25: Locality map of Remainder of Erf 2149, Municipal Flats, Stellenbosch

The Department: Housing Development appointed service providers to conduct three (3) special studies to investigate the suitability of the site for possible further development, namely structural integrity, geotechnical investigation, and the Traffic Impact Assessment (TIA). The studies were budgeted for during the 2022/23 financial year.

The first study was to conduct a survey or assessment of the structural integrity / need for structural maintenance of the rental stock and to advise and report to the municipality on the estimates of maintenance / upgrade costs.

The second study was a geotechnical investigation to examine all aspects of the feasibility of establishing a high-density residential development (8 storey walk-ups) on Remainder of Erf 2149, Stellenbosch.

The third study was a Traffic Impact Assessment (TIA) to examine all aspects of the proposed high-density residential development (8 storey walk-ups), the impact on the surrounding road network, and possible mitigation of the anticipated traffic impact. The study also assessed the proposed site accesses and non-motorised and public transport aspects.

When a comprehensive feasibility study has been completed, the proposal will be referred to the Council for a decision.

3.9.3 Strategic document: Integrated Human Settlement Plan for Stellenbosch Municipality

The Stellenbosch Municipality must draft an Integrated Human Settlement Plan (IHSP) in line with the Western Cape Government: Department of Human Settlements.

The PDoI guidelines require that the Housing Pipeline be informed by an IHSP aligned with the MSDF and the IDP.

A service provider was appointed to compile an Integrated Human Settlement Plan for Stellenbosch Municipality.

The draft Integrated Human Settlement Plan has been submitted to the Council for approval to advertise the IHSP on 27 June 2023. This will allow the Department: Housing Development to advertise, during the first quarter of the 2023/24 financial year, the draft IHSP for public participation to obtain comments from external and internal stakeholders.

3.9.4 Informal Settlements

The Department: Informal Settlements is responsible for managing twenty-nine (29) informal settlements within the jurisdiction of the Stellenbosch Municipality. Recent surveys conducted by the Department: Informal Settlements and independent service providers indicate that the population of residents in these informal settlements is approximately 25 317 (Department: Informal Settlements Matrix, 2023). Notably, this population represents roughly one-sixth (1/6) of the overall municipal population, which stands at approximately 175 411 residents (the Socio-Economic Profile: Stellenbosch 2023).

Consequently, the Department: Informal Settlements plays a vital role in addressing the demands for basic services within these informal settlements. It collaborates with other departments to execute upgrading projects and provide essential services to the residents living in informal settlements.

One such initiative is the Enkanini Electrification Project, which entailed the electrification of 2 300 informal structures. The project encompassed a door-to-door verification of structures to determine beneficiaries, followed by the administration of 2 300 application forms for residents in Sections G, H, I (Phase 2), B, C, D, and F (Phase 3) to be registered on the municipal electrical system. Notably, the projects were a success due to the collaboration with the community of Enkanini.

Lastly, the Department: Informal Settlements is actively engaged in monitoring and reporting on the growth of informal settlements within the Stellenbosch municipal area, as well as the delivery of basic services to the informal settlements.

3.9.4.1 Survey of Backyard Dwellers in Kayamandi

Verification and administration of 2 300 electrification application forms for Sections B, C, D, F, G, H, and I in Enkanini. The Department: Informal Settlements completed in Phases 2 and 3 the verification of 2 300 households at Enkanini, Kayamandi.

The tables below reflect the verification of households.

Table 137: Verification of households

Phase 2	Phase 3	Phase 4
1 000	1 300	1 000

This process resulted in 2 300 households receiving electricity for the first time since the establishment of Enkanini in 2006.

The Department: Informal Settlements is further engaged in a new process to verify and produce a beneficiary list for Phase 4, which is planned to yield a further 1 000 electrical connections in Enkanini. The electrification project from Phase 1 to Phase 4 on completion would have yielded 3 300 electrical connections to households residing in Enkanini, resulting in 100% coverage of structures.

3.9.4.2 Relocations

The Department: Informal Settlements was tasked with relocating families in Longlands and Kayamandi, respectively, for the Department: Project Management Unit (PMU) to implement the municipality's planned housing projects in both settlements.

Longlands, Vlottenburg

The department has completed the relocation of 80 households and provided new wendy houses with access to basic services like water, sanitation, and electricity (see image).

Figure 26: The temporary relocation units (wendy houses) with access to basic services

Zone O, Kayamandi

The relocation of 55 households in Zone O, Kayamandi, had two phases. Phase 1 entailed the relocation of thirty-three (33) households to Watergang TRA2, which has been completed. The households were provided with new Wendy houses with access to water, sanitation, and electricity.

Phase 2 entailed the relocation of 22 households, which were repositioned due to insufficient space at Watergang TRA2.

3.9.4.3 Provision of basic services

The Department: Informal Settlements facilitated the provision of new ablution services to residents at informal settlements.

Table 138: Number of ablution services

Watergang TRA 2	Mandela City	Watergang Informal Settlements	Longlands	Total
10 toilets 2 taps	10 toilets 4 taps	36 Toilets 21 taps	76 Toilets 76 taps	**132 toilets and 103 taps**

3.9.4.4 Survey of backyard dwellers in Franschhoek

The user department under tender B/SM 101/21 has completed the technical proposal document that will be forwarded to SCM, seeking to appoint a service provider from Panel C to undertake a demographic survey of backyarder dwellers in Groendal and Mooiwater, Franschhoek, in the 2023/24 financial year.

3.9.4.5 Informal Settlements – provision of basic service requirements

The Department: Informal Settlements continues to monitor and report on the provision of basic services in informal settlements. The table below illustrates the basic services required to meet the national standard of access to basic services.

Table 139: Provision of basic services

Item	Number of ablution facilities provided by the Council	Number of taps and tanks provided by the Council	Informal settlements with grid electricity	Number of Informal Settlements	Performance comment
Number of informal settlements recognised by the Council	-	-	-	27	-
Number of informal settlements not recognised by the Council	-	-	-	2 (Klapmuts Farm, Klapmuts, and COVID informal settlement, Lanquedoc)	Klapmuts farm- Settlement not recognised, land initially used for livestock farming with 32 structures. Over time more households erected structures. (2018 in-house survey). COVID is an illegal invasion of private property (2020).
Number of structures	-	-	-	21 202	-
Number of households	-	-	-	24 377	-
Number of structures	-	-	-	21 202	-
Number of households	-	-	-	24 377	-
Number of toilets provided	1 153	-	-	-	-
Number of toilets required	2 199	-	-	-	Shortfall of 1 046
Number of chemical toilets	119	-	-	-	
Number of water taps provided	-	648	-	-	
Number of water taps required	-	466	-	-	Surplus of 182
Number of water tanks	-	28	-	-	-
Electricity supplied	-	-	22		-
Electricity not supplied	-	-	7	-	-

3.9.4.6 Disaster and Emergencies

The Department: Informal Settlements assists the Department: Disaster Management in emergencies by verifying the data that is collected about the disaster victims against the data obtained during periodic surveys. These emergencies are mostly fire incidents in informal settlements and / or in the backyards of formal housing units. These incidents, to a lesser extent, also include flooding incidents and excessively strong winds.

Table 140: Total number of structures impacted by incidents in all areas. All verifications completed within 48 hours

Incidents reported during the period July 2022 – June 2023	Number of fires verified	Number of structures affected by fire	Number of people affected by fire	Number of structures affected by floods or Wind
Formal settlements (Backyard structures)	15	47	98	2
Informal settlements	60	212	938	0
Total number of fires and structures impacted by incidents in all areas	75	259	1 036	2

3.9.4.7 Evictions

The municipality engages every week with families that are being evicted through court proceedings. This process of meaningful engagement(s) includes the applicant, the respondent(s), the Chief: Legal Advisor of the municipality, the Manager: Informal Settlements and the Administrative Officer: Emergency Housing. The objective is to find an amicable solution, taking into consideration the municipality's Constitutional obligations.

Find below table indicates the number of eviction matters as at 30 June 2023.

Table 141: Number of evictions matters

Notices of evictions received	Number of meaningful engagements held	Court orders issued
20	15	5

3.9.4.8 Development proposals / strategy

The Department: Informal Settlements outlined a development strategy for every informal settlement within the municipal area. The full respective strategies are included under Cluster 1 to Cluster 5.

The strategy is premised on three pillars:

- a synopsis of existing basic services. This synopsis includes an analysis of the shortfalls in service provision;
- Cryptic demographic information of the heads of households, as well as a desktop risk analysis of the settlement; and
- the third pillar / component consists of development proposals. These proposals are aligned with three strategic documents, i.e., the IDP, the Spatial Development Framework (SDF), and the Housing Pipeline.

The development proposals are furthermore aligned with the budget cycle of the municipality, as is the Housing Pipeline, which is aligned, among others, with the provincial budget cycle.

3.9.5 Housing Administration

3.9.5.1 Transfer of housing stock

During the period under review, the municipality continued with the process of dealing with the historic backlog and transfer of properties to beneficiaries of state-subsidised houses. A process action plan was devised in terms of which administrative procedures would be streamlined. A panel of attorneys was appointed to assist with the transfer of the identified properties. A total of 194 title deeds were transferred for the 2022/23 financial year. The transfers were completed in the following areas:

Table 142: Transfer of housing stock

Area	Total
Cloetesville	11
Kayamandi	94
Klapmuts	5
Kylemore	3
Pniël	1
Longlands	80
Total	**194**

The Department: Housing Administration is conducting continuous Housing Consumer Education (HCE) programmes with affected beneficiaries and addressing issues around title deeds. The municipality also appointed temporary field workers to assist with beneficiary administration, which includes tracing beneficiaries and conducting occupation surveys to ensure that title deeds are registered correctly.

The municipality partnered with an NGO that assists municipalities in dealing with the historic backlog in terms of property transfers. The NGO provides funding for the temporary appointment of staff to enhance capacity and provides funding to the municipality of R500 per title deed registered. The donation is used to appoint field workers to assist with the beneficiary administration of the transfer processes.

A total of 127 title deeds were handed over in the 2022/23 financial year.

Table 143: Total properties registered at the deeds office (during 2022/23)

Total properties registered at deeds office (during 2022/23)	
Historical project title deeds registered	114
New project title deeds registered*	80
Total erven	194

* Funding for the title deeds was provided through the Title Deed Restoration Programme. It is only given for houses of subsidies approved.

Figure 27: Title deed handover in Klapmuts on 24 November 2022

3.9.5.2 Housing Waiting list administration

The Department: Housing Administration continues with the "data-cleaning" process of applications that appear on the housing waiting list where vital information is outstanding. An area-based approach was used where staff members went out to the various areas and invited applicants to workshops during which the applicant's information was updated. The entire Stellenbosch municipal area was covered during this programme.

The agreement with the PDoI (previously known as the Provincial Department of Human Settlements (PDoHS)) to assist with the data clean-up of the Stellenbosch municipal waiting list continues. The waiting list is updated and verified regularly by the PDoI to ensure that the number of people deemed to be on a "waiting status" is a true reflection of those persons who still require housing assistance within the greater Stellenbosch area.

The Western Cape Housing Demand Database has undergone an upgrade allowing online applications, as well as the additional functions of adding documentary proof. Stellenbosch Municipality has aligned itself with this software in the capturing of all housing demand data applications. The Housing Demand Database System is being updated regularly to ensure that the Council has credible data for planning for future housing projects to be implemented.

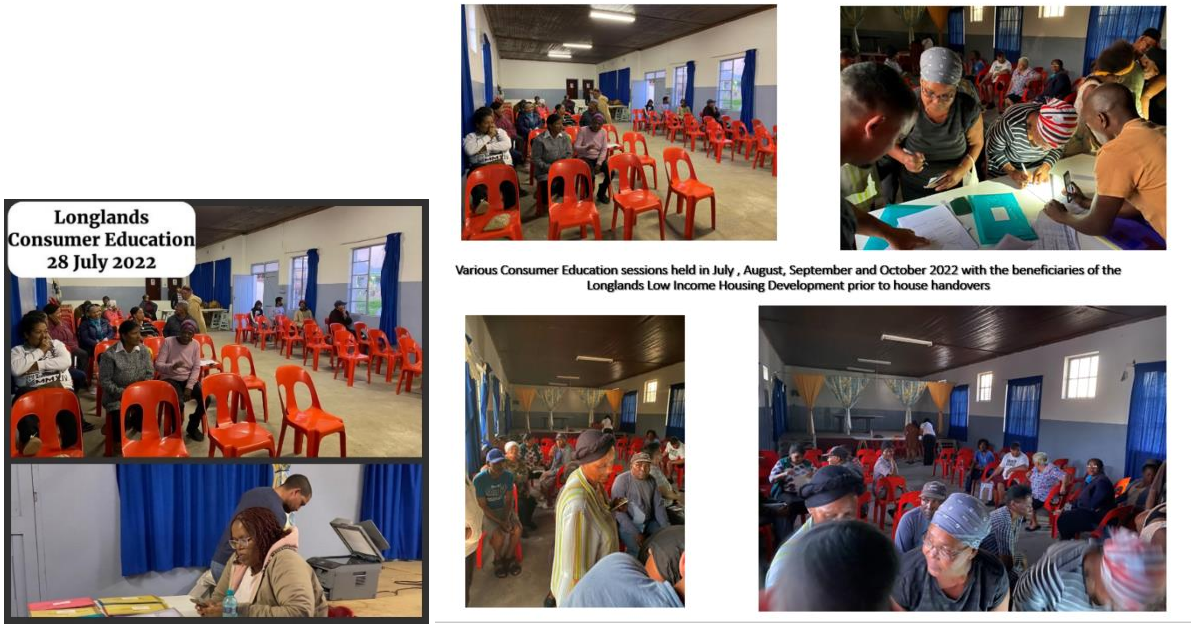
Housing beneficiary administration is also a key concern of the Department: Housing Administration in respect of new housing developments. The Longlands low-income housing development has been one of the developments that benefited in the 2022/23 financial year. A total of 98 houses were built and handed over to their successful beneficiaries in the 2022/23 financial year.

Figure 28: Houses handed over in Longlands Low-Income Housing Development

Houses handed over in Longlands by Minister Tertuis Simmers and Executive Mayor Gesie van Deventer on 4 October 2022

3.9.5.3 Administration of Public Rental Stock

On 25 June 2014, the Council adopted a policy for the Administration of Public Rental Stock. This document was the culmination of a collaboration between stakeholder departments within the municipality. The purpose of the policy is to ensure effective management and well-maintained assets that will improve the quality of life for residents. The Department: Housing Administration is busy with the review of the Human Settlements Administration and Allocation Policy, which will include the allocation and management of the public rental stock. This policy will be referred to the Council for adoption after due public participation processes have been completed.



A caretaker programme was implemented in all public rental stock to deal with the increase in anti-social behavioural problems. This programme was implemented to ensure that communities "take" their neighbourhoods back into their own hands and to improve communication between the municipality and the tenants. The total number of caretakers appointed for all the public rental flats was eleven (11).

Anti-social behaviour and breach of contract complaints involving tenants of rental units are referred to the Department: Legal Services for action.

3.9.5.4 Housing Consumer Education (HCE)

The HCE programmes were also held for beneficiaries of houses that were built between 1994 and 2010. These are houses that form part of the Title Deeds Restoration Programme. These beneficiaries are advised about the security of tenure, issues of inheritance, and the drafting of a will. A total of seventeen (17) HCE workshops were held during the 2022/23 financial year, inclusive of those held before formal title deed handovers, outreaches for the signing of deeds of sale, and completion of subsidy applications for the Longlands Housing Project. This total excludes those HCE sessions held with individual recipients of title deeds.

Figure 29: HCE and Public Participation

The Department: Housing Administration completed an audit of all its rental stock, both staff and public rental units, concerning the occupancy of the units. For the Department: Housing Administration to update its records where necessary, interviews were conducted with affected households, resulting in the conclusion of lease agreements with the next of kin of deceased tenants. The Department: Housing Administration compared the findings of the surveys with regards to the legal occupancy of the rental units with existing information obtained from the records of the Finance Department. Interviews were conducted with occupants of flats where there appeared to be discrepancies, and detailed questionnaires were completed for every household. This enabled the Department: Housing Administration to evaluate whether the illegal occupants qualified for legalisation in terms of the criteria set out in the approved policy on the Unlawful Occupation of Municipal Rental Stock.

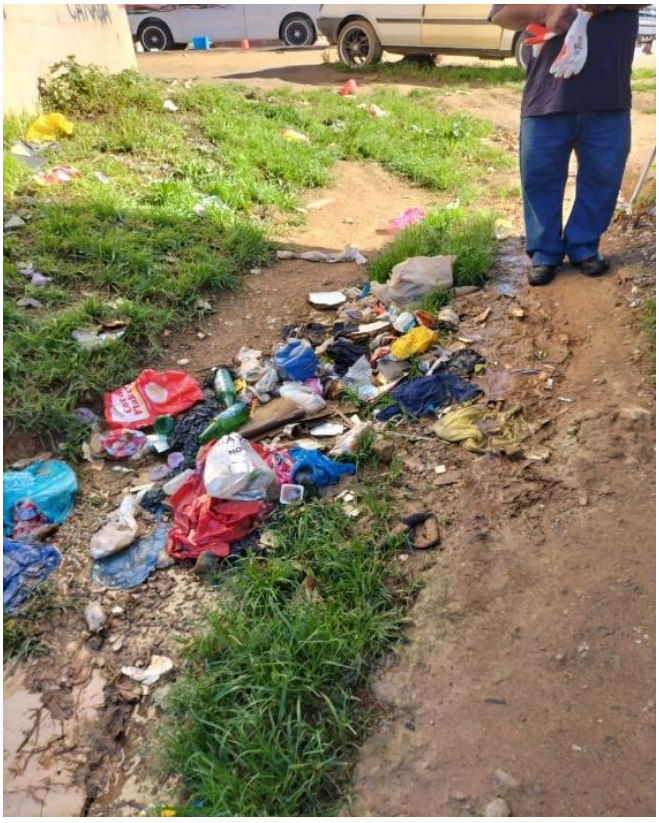
3.9.5.5 Maintenance of Rental Stock

The Department: Housing Administration integrated the complaints system of the Council, and all complaints about rental stock can now be monitored. Maintenance of all municipal stock resorted under the Directorate: Corporate Services. It was decided that the Department: Housing Administration is henceforth responsible for all maintenance of rental stock and that the Directorate: Corporate Services is responsible for all maintenance of municipal buildings.

Budgetary constraints were often the main reason why maintenance issues at rental stock could not be resolved. However, it should be mentioned that the Department: Housing Administration is now equipped with a budget to resolve the backlog on maintenance.

Two artisans for plumbing and carpentry are appointed to attend to the day-to-day complaints generated through the complaints system as well as those on an ad hoc or emergency basis.

3.9.5.6 Cleaning of Rental Stock



The rental stock was cleaned with the assistance of an appointed Expanded Public Works Programme (EPWP) workers, and the rental units are in pristine condition. Grass-cutting teams are deployed in

public rental areas monthly to revitalise and beautify the areas, specifically Jan Cilliers Street (Lavanda, Aurora, and Phyllaria flats), Longstreet blocks F-J, Kloof Street blocks A-D, Rhode Street (Melody, Monteray Mountview, and Monte Christo), Maisonettes (Eike Street, Primrose Street, Pine Street, and Jakaranda Street).

Figure 30: Cleaning services rendered at Rental Stock

3.9.5.7 TRA Management

The municipality is mandated, in respect of various pieces of legislation, to administer all matters relating effectively and professionally to informal settlements.

The Department: Housing Administration, in conjunction with informal settlements, effectively manages and controls 7 TRAs in the Stellenbosch municipal area to furnish every informal settler with a potential home.

The number of households in TRAs:

Table 144: TRA Statistics

Area	Number of households
Mandela City, Klapmuts	243
La Rochelle, Klapmuts	35
Devon Valley	30
Longlands, Vlottenburg	80
Mountainview, Jamestown	180
Watergang TRA 1, Kayamandi	262
Watergang TRA 2, Kayamandi	180
Meer lust Bosbou, Franschhoek	33

The Department: Housing Administration facilitates evictions, surveys, all levies, and service assistance by channelling complaints to the correct user departments and all types of assistance until relocation to a project.

Currently, the municipality is assisting service providers with the relocation of families and fire victims in these TRAs.

Figure 31: TRAs raised in fires

3.9.5.8 Job Creation

A job creation programme was initiated via the EPWP, and as a result, 41 job opportunities were created, listed below:

- Twenty-one (21) EPWP workers were appointed to assist with the cleaning of the rental units, and this resulted in a decrease in complaints received from tenants as properties were in a neater state;
- Four (4) temporary field workers were also appointed to assist with the surveys of rental stock, temporary residential areas, and emergency housing. This was to ensure that the correct tenants occupied the flats and to identify issues like sub-letting or illegal activities; and
- Eight (8) Title Deeds Restoration Programmes were also initiated to assist with the transfer of state-subsidised houses and to eradicate the historic backlog in terms of the transfer of these houses.
- Two (2) administrative assistants were appointed to deal with complaints and document management.
- Two (2) team leaders were appointed to assist with task assignments and leadership with the general workers;
- Four (4) artisan assistants were appointed to assist the artisan carpenter and artisan plumber in the execution of their respective duties.

The table below indicates the capital expenditure for the Sections: Housing Administration and Housing Development as at 30 June 2023.

Table 145: Capital Expenditure as at 30 June 2023: Section: Housing Development

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Housing Projects (Social Housing Planning)	1 495	1 479	1.05%
Northern Extension: Feasibility	1 279	1 089	14.85%
Erf 64, Kylemore	1 163	1 153	0.80%
Erf 7001 Cloetesville (380) FLISP	1 100	1 100	0%
Jamestown: Housing	700	698	0.31%
Only the five largest capital projects are listed.			

The Section: Housing Development has spent 96% of its capital budget for the financial year.

The tables below indicate the total number of employees in the Department: Integrated Human Settlements as at 30 June 2023.

3.10 Property Management

This section is also responsible for the contract management (leasing) and maintenance of all council-owned buildings and the construction / project management of all upgrading and / or new facilities. Some of the highlights of the past financial year include the following:

- Completion of Tender B/SM 99/21 on the upgrade / conversion of the residential unit into office space in Simonsberg Road / Stellenbosch;
- Completion on Tender B/SM B/SM 40/22: Internal refurbishment of the NPK Building on Erf 1852, Stellenbosch, for administrative offices for Stellenbosch Municipality; and
- Various fencing projects, including new fencing at Papplaas.

The planning phase of the following projects started or was finalised:

- New Hygienic Services Tender;
- New Furniture Tender;
- New Plumbing and Irrigation Materials Tender;
- Appointment of an architect / draftsperson for the alterations, renovations, and additional offices on Hofmann Street;
- Renovation of Municipal Courts Strongroom and Foyer Floor;
- Replacement roof sheets at Lavanda Flat in Lapland;
- Replacement of Lapland Ward Office Roof sheets;
- Installation of Floors at Traffic Department Offices in Joubert Street;
- Installation of mechanical ventilation and storage shelves at the Beltana Road Engineering Workshop;
- Renovations and construction of the divider wall at Beltana SCM Stores;
- Installation of hydroboils at the NPK Building;
- New drainage connection at Community Services Offices at 21 Simonsberg Road;
- Plastering and painting of internal and external walls at the Park Services Offices on Reservoir Street;

- Upgrading of Makapula Hall;
- Upgrading of the van der Stel Complex;
- Structural upgrading of Plein Street Complex;
- Structural upgrade to Jamestown Ward Office / Library; and
- Structural upgrade of the Ida's Valley Pavilion.

The following projects are in ongoing phases:

- Tender B/SM 24/22;
- Tender B/SM 66/22;
- Tender B/SM 27/22 - Upgrading of Dorp Street Flats; and
- FQ 70/22 77/23 Ramps at Lapland Flats.

Various projects / acquisitions were processed under the following term tenders:

- Furniture, tools, and equipment; the tender ended on 30 June 2023;
- Hygienic services: the tender ended on 30 June 2023;
- The tender for air conditioner maintenance and replacement ended on 30 June 2023; and
- The rental of indoor plants ended on 30 June 2023.

The following term tenders / quotations were awarded:

- Tender 66/23: Structural Maintenance and Upgrading of the Stellenbosch Town Hall Complex;
- FQ 77/23 Ramps at Lapland Flats;
- Tender B/SM 31/23: Appointment of a Professional Architect to Monitor and Oversee Heritage Building Works / Alterations / Upgrades and to submit a close-out report for the Various heritage buildings;
- Tender B/SM 76/223 Lift Service Providers as Prescribed by Section 1 of the Lift, Escalator, and Passenger Conveyer Regulation, 2008 Issued in Terms of the Occupational Health and Safety Act of 1993 for a 2-Year Maintenance Contract until 30 June 2025 for the Lift at the Klapmuts Multi-Purpose Centre;
- FQ 79/22: Appointment of a Draughtsperson / Architectural Technologist to Draw As-Built Plans, Beltana Depot; and
- FQ 89/22: Appointment of a Draughtsperson / Architectural Technologist to Draw As-Built Plans—Rhenish Complex.

The table below indicates the service data statistics from the 2016/17 to 2022/23 financial years:

Table 150: Service Data Statistics – Property Management

Details	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23

Total	**9**	**6**	**3**	**33.3%**

COMPONENT B: ROADS, TRANSPORT AND STORMWATER

3.11 Roads

This component includes roads, transport, traffic engineering, and stormwater.

To facilitate effective mobility throughout the municipal area, a municipality can employ various modes of transport to reduce congestion and enhance access times for residents, the underprivileged sector, tourists, students, as well as the business and industrial sectors. This serves as a strategic lever for accelerated economic growth. Additionally, the municipality's transport strategies must account for growth shifts and enablement projects taking place in the vicinity of the WC024 area, such as the widening of the R310 Baden Powell Drive and other vital routes for transport.

Roads enable safety aspects such as access to fire and disaster scenes, as well as safety elements for those who are using non-motorised means of transport or walking. The team also responded well to the flood-hit regions and transport infrastructure during June 2023. Some riverbanks were broken, foundations were exposed and at risk, some bridges were washed away, and some roads and piers were destabilised. The damage estimated by the flood-hit areas is more than R100 million, but the municipality moved quickly to stabilise and repair what needed to be urgently attended to, while the longer-term rehabilitation is set to take place.

3.11.1 Strategic Planning

Comprehensive Integrated Transport Plan (CITP)

The CITP presents the municipality's long-term transport vision and objectives, as well as provides annual action plans and projects that would enable the municipality to realise its transport vision. The CITP will be synchronised with the annual updating of the IDP.

A current review (2022 – 2027) of the CITP represents the 5-yearly overhaul of the plan and requires, inter alia, that:

- Every aspect of the previous CITP must be re-examined to see if it is still up-to-date;
- The previous CITP is revised and updated where necessary, and relevant new aspects are added,
- An update of the Transport Register be prepared;
- It reflects revisions of the municipality's SDF, Roads Master Plan, and NMT Master Plan;
- It provides a revised Public Transport Plan dealing with the restructuring of the public transport network of services; and
- It provides an update on progress made with previously proposed action plans and projects and proposes additional plans and projects.

The 2022 – 2027 review of the CITP is currently being finalised and is intended to serve before the Council in October 2023.

3.11.2 Transport Studies

The municipality commissioned the following transport studies:

- The municipality has concluded initial draft studies towards the development of a business model for an inclusive public transport service for persons with disabilities in Stellenbosch;

- ATC Transport Studies are currently underway to ensure that the required levels of accessibility within the corridor are achieved and the required levels of mobility on the provincial roads are maintained. The ATC Transport Studies will therefore align with the approved ATC MSDF and guidelines, promoting public transport and non-motorised transport within the corridor; and
- A Freight Strategy Study is currently underway to assess the routes typically utilised by freight vehicles in, around, and through the Stellenbosch Municipal Area, including Franschhoek, and to develop a strategic freight network for the area.

3.11.3 Master Planning and Projects

The municipality has approved its Non-Motorised Transport (NMT) Master Plan and Policy. The NMT Master Plan and Policy is a review, consolidation, and update of the NMT policy and NMT network and cycle plans, which were compiled in 2015.

The NMT Master Plan and Policy strive to promote and encourage alternative modes of transport, such as walking and cycling. They also aim to analyse the capacity of the current network, identify current and future NMT needs, and recommend improvements that will ensure an effective NMT network.

The NMT Master Plan and Policy further strives to position NMT as a consistent long-term municipal priority. The strategic objective of the NMT Master Plan is the implementation of a coherent, logical, and integrated NMT network for Stellenbosch.

The municipality is in the process of compiling a Sidewalk Accessibility Policy, where the municipality aims to improve sidewalk management and strive towards a safe environment for all sidewalk users. The policy therefore sets procedures in place that would improve safety and make sidewalks more accessible and user-friendly for pedestrians.

The main road networks through Stellenbosch currently operate at capacity and at times beyond capacity, resulting in traffic congestion. Analysis of the road networks and assessments of the public transport operations and facilities are periodically carried out to identify shortcomings and opportunities for improvements. The municipality has approved its Road Master Plan (RMP), which analyses the capacity of the current network and current and future needs and recommends infrastructure improvements that will aid in establishing an effective road network.

The municipality has compiled its draft Road Transport Safety Master Plan (RTSMP). The draft Road Transport Safety Master Plan is a review, consolidation, and update of the Transport Safety Master Plan (TSMP), which was compiled in 2015. The TSMP includes an audit of traffic safety interventions and identifies priority projects with low- to medium-cost engineering measures such as traffic calming, speed monitoring, roundabouts, etc. for implementation.

Extensive investigations, assessments, and analyses are undertaken when compiling master plans. The outputs of master planning are used to inform strategic plans, such as the CITP. Outputs from master plans also aid other municipal decision-making processes.

3.11.4 Road Construction and Intersection Upgrades

To reduce the effects of congestion, improve traffic flow, and increase traffic safety at intersections within Stellenbosch, various intersections were upgraded by the municipality through the Intersection Improvement Programme that commenced about 10 years ago.

The following has been completed in the 2022/23 financial year:

- Construction of R304 / Newinbosch Intersection.

The following intersection and road upgrades are currently in various stages of planning and design:

- Lower Dorp Street and its intersection with Strand Road (R44) and Adam Tas (R310);
- Adam Tas and R44 / Alexander;
- Adam Tas and R44 / Merriman;
- Phase 2: R44 / Helshoogte;
- Dualling Bird Street between R44 and Kayamandi;
- R45 / Le Roux Street Intersection;
- Extension of Wildebosch Road to Trumali;
- Techno-Park and Adam Tas Link Road;
- Minor Road Improvement Klapmuts; and
- Road development at the Jamestown Schools precinct.

3.11.4.1 Road Rehabilitation

During the 2022/23 financial year, the municipality resealed portions of the following roads in WC024:

Table 153: Road Rehabilitation

	Name	Length (m)	Width (m)	Area (m2)
Stellenbosch	Adam Tas Road	195	8	1 560
	Strand Street (R44)	127.6	12.2	1 556.72
		142	11	1 562
	Pappegaai Road	140	11.2	1 568
	Die Laan	360	6	2 160
	Mark Street	350	11.2	3 920
	Skone Uitsig Street	77	8.6	662.2
	Soeteweide Street	210	7.2	1 512
	Webersvalley Road	37.5	9	337.5
	Pajorolaan	400	6	2 400
	Fresno Street	270	6	1 620
		2 309.1		**18 858.42**
Pniël	Silvermyn Street	450	7.5	3 375
	Lumley Avenue	420	6.5	2 730

	Pine Street	470	5.6	2 632
	Oak Street	130	5	650
	Hill Street	200	5.6	1 120
		2 090		**12 859**
Ida's Valley	Rustenberg Street	600	11.2	6720
	Desch Road	197	6.2	1221.4
	Sonnebloem Street	240	8.6	2 064
		1 037		**10 005.4**
	Total L(m)=	**5 436.1m**	**Total Area(m2)=**	**41 722.82**

3.11.4.2 Non-Motorised Transport (NMT)

In line with the municipality's NMT Master Plan, NMT infrastructure was rolled out and implemented to ensure continuous expansion of the NMT network.

During the 2022/23 financial year, sidewalks were constructed along portions of the following roads:

Stellenbosch CBD and Surrounding:
- Koch Road; and
- Strand Street, R44.

Technopark:
- Techno Ave.

Raithby:
- Herman Street.

Plankenbrug:
- George Blake Street.

3.11.4.3 Parking

The municipality embarked upon several interventions to improve the provision of parking in Stellenbosch CBD and Franschhoek. These interventions comprise the following:

- Reviewing and improving the parking management model; and the possible leasing of parking areas for improved management of these facilities;
- Construction and upgrading of identified parking areas in Stellenbosch and Franschhoek; and
- Feasibility studies and associated works for the establishment of a possible public-private partnership (PPP) project to implement and manage a bulk parking facility in Stellenbosch.

3.11.4.4 Traffic Signals

Stellenbosch Municipality, in collaboration with Stellenbosch University, continues with research and development to establish a real-time traffic signal control system for Stellenbosch. This research project will assist in addressing everyday congestion through the application of Smart Transportation Technology namely Traffic-Adaptive-Signal-Control (TASC). TASC refers to the real-time control of signalised intersections and enables the real-time adjustment of traffic signal timing to increase vehicle flows through the intersection, thereby reducing congestion.

During the 2022/23 financial year, traffic signal systems were upgraded, and devices were installed that would improve vehicle detection at the following intersections:

- R44 and Van Rheede;
- R44 and Saffraan;
- R44 and Dorp;
- R44 (Strand) and R310 (Adam Tas);
- R310 and George Blake;
- R310 and Merriman; and
- R44 and R310 (Helshoogte Road).

3.11.4.5 Pedestrian Crossing

During the 2022/23 financial year, white pedestrian crossing block paving was implemented on the following roads:

Franschhoek

- Hugenote 1x pedestrian crossing.
- De Villiers 1x pedestrian crossing.
- Groendal 1x pedestrian crossing.
- Le Roux 1x pedestrian crossing.

Stellenbosch

- Merriman 2x pedestrian crossings.
- Jannasch 1x pedestrian crossing.
- Dr Malan 2x pedestrian crossings.
- Papegaai 1x pedestrian crossing.
- Tarentaal 1x pedestrian crossing.
- George Blake 1x pedestrian crossing.

Cloetesville

- Lang Street 1x pedestrian crossing.

Ida's Valley

- Old Helshoogte 1x pedestrian crossing.

3.11.4.6 Traffic Calming Implementation

During the 2022/23 financial year, traffic calming interventions were implemented along the following roads:

Franschhoek

- Reservoir-East 1x raised intersection and 1 raised pedestrian.
- Stiebeuel Street 1x raised pedestrian crossing.
- La Motte 3x speedhumps.

Pniël

- Hill 1x speedhumps.
- Silwermyn 1x speedhump rebuild.

Kylemore

- Swart Street 1x speedhump rebuild.

Stellenbosch

- Omega 1x speedhump.
- Krige 1x speedhump.

Cloetesville

- Cupido 2x speedhumps.
- Pine 3x speedhumps.
- Silvia 1x speedhump.

Paradyskloof

- Paradyskloof 1x speedhumps and 1x raised pedestrian crossing.

Jamestown

- Webersvalley 1x raised pedestrian crossing.
- Stellenberg 1x speedhump.

- Rooiberg 1x speedhump.
- Overberg 1x speedhump.
- Coetzenberg 1x speedhump.

3.11.4.7 Bridges

The Distillery Road Bridge crosses the Plankenbrug River and is located on the western edge of Stellenbosch, near the point where Adam Tas Road / R310 crosses the railway line. The Distillery Road Bridge is approximately 20m in length and consists of a single carriageway. It is the only access road into Bosman's Crossing, a small mixed-development area within Stellenbosch comprising various commercial developments and apartment complexes.

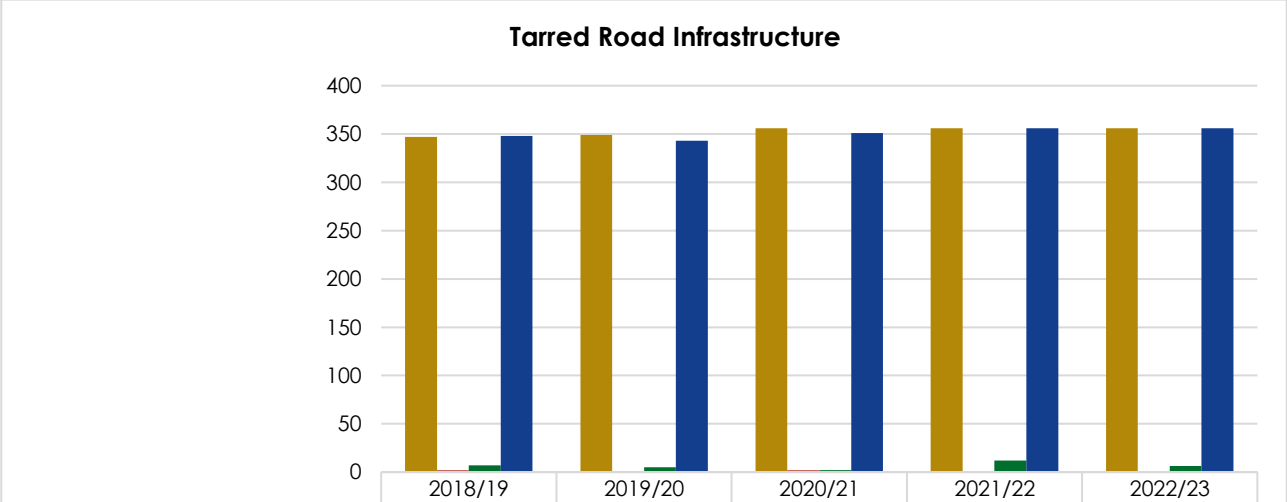
Construction of the Distillery Road Bridge commenced early in 2022 and was completed in March 2023. The structure's historical significance has been carefully considered in the design of the upgraded bridge. Heritage considerations included the retention and detail integration of the existing central stone pier (non-structural), the re-use of the stonework salvaged from the embankments for landscaping, and the design of cantilever walkways that are a visual reminder of the original bridge. One of the existing bollards located at the approach of the existing bridge was repainted, reinstated, and used as a spatial marker with a plaque conveying the historical importance of the site and the retention of the stone pier.

Permanent access into the Bosman's Crossing area was maintained by a half-width construction sequence, where a single traffic lane remained open while the adjacent construction work was performed. The 20m single-span bridge largely avoids complex construction works within the river and their impacts and improves the hydraulic capacity of the structure. In addition to this, there were significant cost and time savings due to the implementation of precast beams that were launched into place.

Provision was made for a wider road surface and sidewalk for both bridge approaches to accommodate two lanes of vehicles and pedestrian / non-motorised traffic in accordance with the planning requirements for this urban area. In support of the National Department of Public Works' EPWP, all unskilled workers were sourced from the identified local community and received training that was financed through the construction contract.

To preserve the picturesque treescape that characterises Stellenbosch, seven new indigenous trees were planted on the project site, and all disturbed areas were rehabilitated.

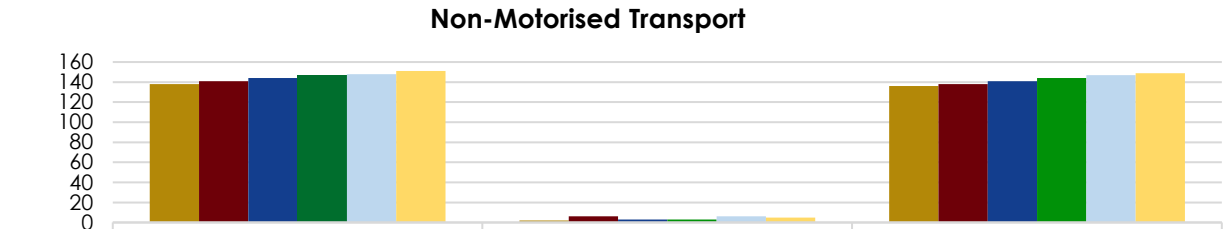
Figure 32: New Bridge constructed



The construction of a new bridge on the Lanquedoc Access Road that would better serve the Lanquedoc community is earmarked to commence in 2024.

The Kayamandi Pedestrian Bridge will link the communities of Kayamandi and Cloetesville and provide safe passage over the railway line and Plankenburg River. Construction of phase 1 of the bridge, i.e., its crossing over the railway line and Plankenburg River, is earmarked to commence in 2024.

3.11.5 Roads Statistics



The following graphs provide an overview of the total kilometres of road infrastructure and non-motorised transport from 2017/18 until 2022/23.

Figure 36: Tarred Road Infrastructure

	2018/19	2019/20	2020/21	2021/22	2022/23
Total tarred roads	347	349	356	356	356
New tarred and paved roads	2	1	2	0	0.3
Existing tar roads re-tarred	7	5	2	12	7
Tar roads maintained	348	343	351	356	356

Figure 37: Non-Motorised Transport

	Total of NMT Facilities	Kms of new sidewalks constructed	Kms of sidewalks upgraded and maintained
2017/18	138	2	136
2018/19	141	6	138
2019/20	144	3	141
2020/21	147	3	144
2021/22	148	6	147
2022/23	151	5	149

The table below indicates the capital expenditure for the Section: Roads, Transport and Stormwater Services as at 30 June 2023.

Table 154: Capital Expenditure as at 30 June 2023: Roads, Transport and Stormwater Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Bridge Construction	19 394	19 394	0%
Ad hoc reconstruction of roads (WC024)	7 037	6 005	14.66%
Non-motorised transport implementation	4 689	4 466	4.76%
Reseal Roads: Stellenbosch and surrounding	4 200	4 941	-17.64%
Adam Tas, Technopark Link Road	2 200	2 129	3.24%
Only the five largest capital projects are listed.			

The Section: Roads and Stormwater has spent 96% of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Roads, Stormwater, Transport, and Traffic Engineering as at 30 June 2023.

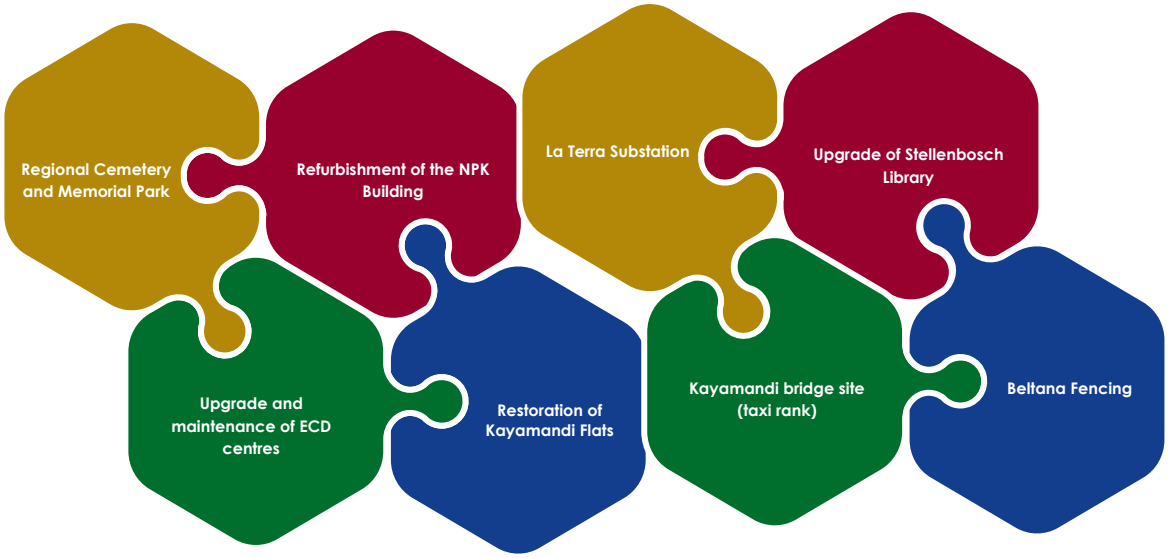
Table 155: Total number of employees in the Department: Roads, Stormwater, Transport and Traffic Engineering

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0%
14 – 17	3	3	0	0%
9 – 13	21	17	4	19%
4 – 8	15	15	0	0%
3 – 0	71	62	9	12.6%
Total	**111**	**98**	**13**	**11.7%**

3.12 Development Services and Project Management Development Services, Asset Management and Systems and Project Management Unit (PMU)

The Department: Asset Management and Systems, Development Services and Project Management Unit (PMU) are responsible for technical information management, asset management, wayleave management, development services, and project / programme management in the Directorate: Infrastructure Services.

During the 2022/23 financial year, the Section: Development Services facilitated the approval of land use applications and building plans, which led to a development contribution revenue of R28.6 million (cash payments). This revenue can be used on bulk infrastructure engineering projects to create capacity to accommodate further development and broaden the municipal income base in terms of property rates and taxes. The section also managed development contribution projects (projects implemented by developers in lieu of the payment of cash development contributions to the value of R192 million). The department continued to provide operational services in terms of wayleave applications, building plan assessments, land use applications, and project management.



3.12.1 Project Management Unit (PMU)

The Project Management Unit (PMU) is a unit within the municipality that is dedicated to managing capital infrastructure projects. The unit is responsible for providing support to municipal departments to manage capital projects during the implementation, planning, and construction phases of new housing, informal settlements, infrastructure, and municipal facilities projects, including:

- Develop and maintain project management systems, procedures, and processes for the life cycle of implementing infrastructure projects;
- Specialise in rendering life-cycle project management services for all types of infrastructure projects;
- Manage cross-functional projects in conjunction with relevant departments;
- Engage with departments in the medium- to long-term planning and budgeting of capital projects;
- Assist with the compilation of the long-term budget for the Directorate;
- Manage and report on infrastructure implementation projects; and
- Management of Grant Funding programmes (CAPEX / RSEP / IUDG).

During the 2022/23 financial year, the Project Management Unit managed a capital expenditure budget of R10 870 099 (of which R6 018 379 was an allocation from the Informal Settlements Upgrading Partnership Grant (ISUPG)). The Project Management Unit achieved a capital expenditure of R9 029 381 (83.07%) at the end of the 2022/23 financial year.

The PMU managed the following major projects for external directorates during the 2022/23 Financial year:

Herewith is a brief overview of the highlights of major multi-year projects that were managed by PMU during the 2022/23 financial year:

Longlands Housing Project

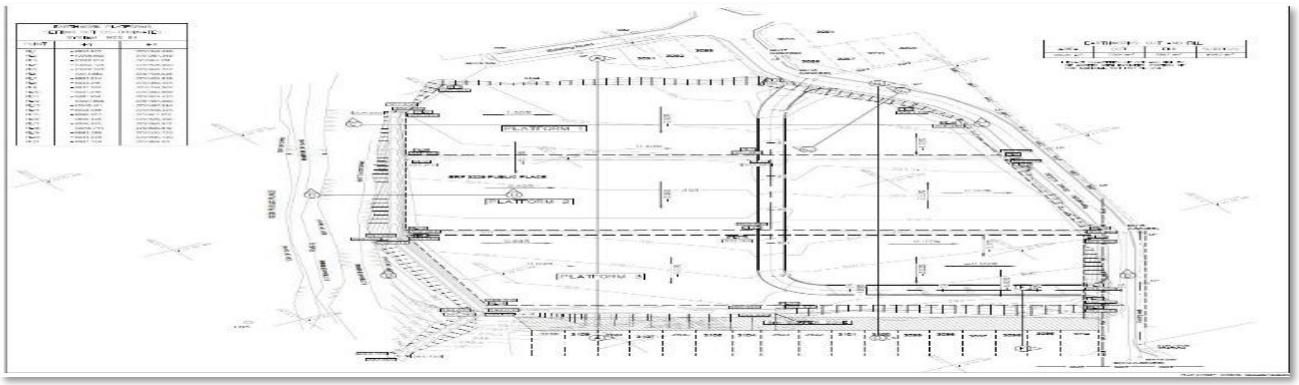
The Longlands housing project was approved by the Department of Human Settlements as a Development-Driven Individual Subsidy Programme (DDISP). The project was completed in November 2022 and comprises the construction of an access road from Vlottenburg Road, tarred streets, stormwater control, and individual water, sanitation, and electricity connections to 145 stands. The property has been transferred to the Stellenbosch Municipality during the year as part of the agreement between the parties.

Figure 33: Ministerial Handover Ceremony

Ninety-eight (98) subsidised top structures were constructed for beneficiaries residing on the property and beneficiaries from the waiting list who qualified for housing subsidies, with an additional 8 Enhanced Service Sites for beneficiaries who do not qualify for the top structure. The development also provided a Temporary Relocation Area (TRA) that accommodated 76 temporary wooden house structures. All families from the triangle site were relocated to the TRA.

Ida's Valley Housing Project, Erf 9445 Oak Tree Village

Figure 34: GAP Housing Project



Before the project, no development in Ida's Valley had occurred, which led to a massive need in the community for housing opportunities. The Stellenbosch Council made the land available for the development of a turnkey developer. The housing project was approved by the Department of Human Settlements as a second phase of the Ida's Valley housing project in terms of the Integrated Residential Development Programme (IRDP) for the installation of civil engineering services for the development of 166 sites. The final variation of the services was completed in March 2023. The construction of 166 GAP houses is still in progress, with an expected completion date of November 2023. 100 houses have been completed and handed over to the new owners during June 2023.

Rehabilitation of Erf 3229, Franschhoek

Figure 35: Site rehabilitation and construction of bulk earthworks

The objective of this project is to establish a temporary relocation site to relocate families impacted by the proposed rehabilitation of the dam wall at Langrug Informal Settlement. Erf 3229 is currently used for illegal dumping of solid waste material and builder's rubble. Studies recently undertaken by the municipality indicated that the subject property is feasible for the proposed development of a decanting site. Approximately 236 sites will be serviced. The services include water, sanitation, and electrification of households.

The project is currently in the procurement stage. The estimated cost of the project is R18 million. The project is funded by the Department of Infrastructure and the Department of Mineral Resources and Energy.

Installation of Basic Services Kayamandi Watergang

Figure 36: Construction of basic services, Watergang Informal Settlement

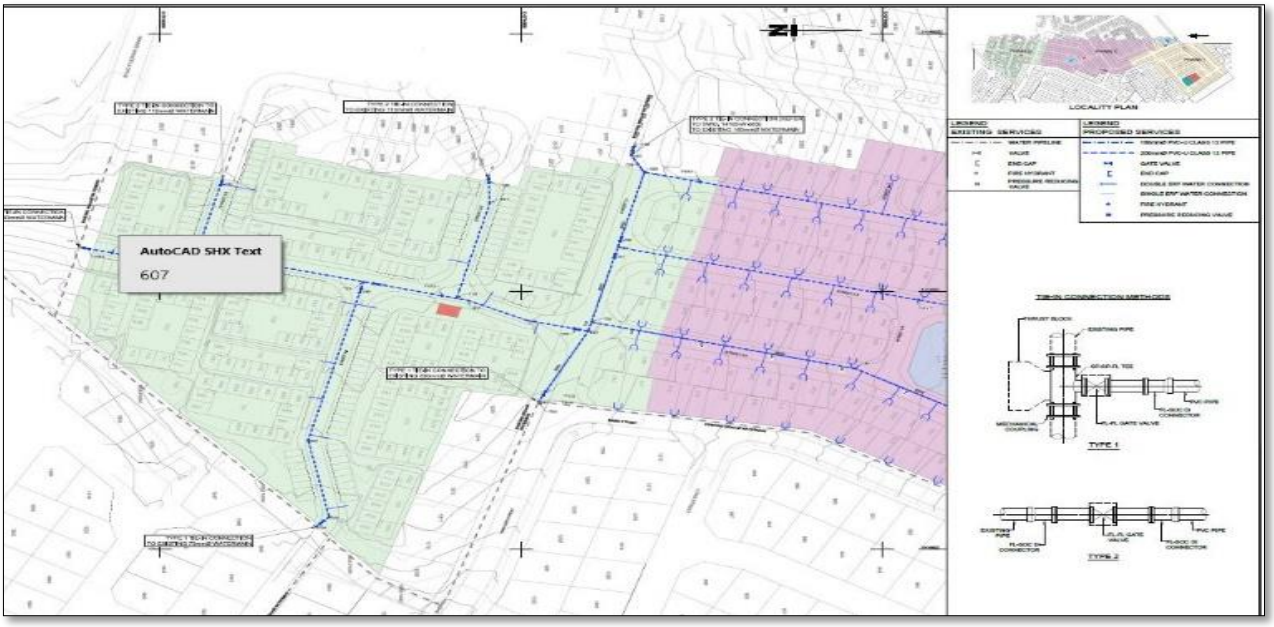
The project entailed the provision of water taps and waterborne toilets. It was completed in December 2022. The project output was 36 waterborne toilets, 28 wash troughs, 26 water taps, and underground infrastructure (water and sewer pipes).

Upgrading of The Steps / Orlean Lounge

The project entails upgrading the 161 houses at Cloetesville.

Figure 37: Upgrading of the Steps / Orlean Lounge

The project is funded through municipal funding from the Capital Replacement Reserve (CRR). The project is multi-year; it commenced in January 2020. The project cost is R17 million.



Currently, 139 houses have been completed, and the families have moved back into their homes.

Kayamandi: Zone O, Housing Development

The budget of R13 350 000 was moved to the 2023/24 financial year due to the site not being established.

In the 2022/23 financial year, the Project Management Unit provided project / programme management support to municipal departments during the planning and implementation stages of capital projects mentioned below.

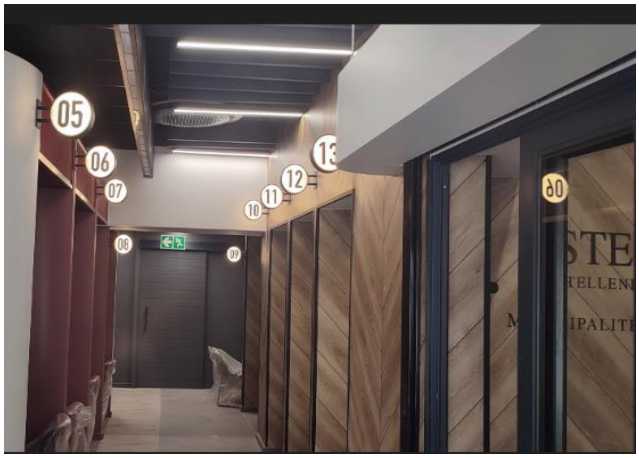


Figure 38: The upgrade of Zone O informal settlement

Upgrading of new office space: Ryneveld Street

The refurbishment is aimed at using the floor space to ensure that the maximum number of public officials can be accommodated within the building and reserving the ground floor area to accommodate a Customer Interface Centre (One-Stop-Shop) which is aimed at providing a high-tech and high-quality customer-orientated centre to provide fast, effective, and efficient municipal services to citizens.

Figure 39: Cashiers and enquiries

The project was completed, and the final completion certificate was issued.

Construction of the La Terra 11kv Switching Station, Franschhoek (Directorate: Electrical Services)

The Franschhoek distribution network has been identified as requiring expansion and strengthening to meet demand requirements, increase the reliability of the network, and de-load the existing electrical infrastructure.

The distribution network is fed from the Franschhoek 66/11 kV substation and supplies the load in the Franschhoek area.

The construction for the establishment of a new La Terra 11kV switching station is expected to be completed by November 2023.

Calcatta Bos Memorial Park (Directorate: Community and Protection Services)

The project is in the planning stage. The project output will be 40 000 grave sites. The cost to implement the project is estimated at R196 million. The consultants are busy with detailed designs and statutory approvals.

The project below is currently funded through the IUDG funding.

Map 8: Establishment of a Regional Public Cemetery and Memorial Park

Taxi Rank: Kayamandi (Bird Street): Section Transport Planning and Public Transport

The Project Management Unit is responsible for the management and administration of the Integrated Urban Development Grant (IUDG). The Integrated Urban Development Framework (IUDF) marks a new deal for South Africa's cities and towns. It sets a policy framework to guide the development of inclusive, resilient, and liveable urban settlements while addressing the unique conditions and challenges of integration facing South Africa's cities and towns. The key outcomes of the IUDF are spatial transformation and the creation of a growth model of compact, connected, coordinated, and integrated cities and towns.

Within the IUDF's Intermediate City Municipality (ICM) programme, which targets 39 municipalities, support is provided for the municipalities in the middle size and density range of the continuum. The purpose of the Intermediate City Municipality's support strategy is to help translate the Integrated Urban Development Framework Policy into practical programmes of action in the Intermediate City Municipalities. Stellenbosch Municipality achieved **99.42%** IUDG expenditure **(an allocation of R65 747 000)** for the 2022/23 financial year.

Table 156: Completed new taxi rank (Bird Street)

Practical completion was achieved on 30 May 2023. Final completion is scheduled for July 2023.

3.12.2 Asset Management and Systems

The Asset Management and Systems Unit is a dual-function unit within the Infrastructure Directorate, and its functions are concerned with the financial and physical accountability of all infrastructure assets (Asset Management). The other function (Wayleave Management) seeks to ensure protection (from damage, loss, etc.) of all existing infrastructure assets / services through regular inspections and monitoring of all works conducted on and around the municipality's assets. Additionally, this function aids in the documentation of internal (municipal-owned) and external services or assets that are located within the road reserve of the municipal land.

This unit seeks to maximise municipal infrastructure management to support the current Strategic Focus Area 5: Good Governance and Compliance. As one of the largest economies nationally, the greater Stellenbosch area and municipality are significant providers of services. Deciding what to do, when, where, and for whose benefit is the difficult task that Infrastructure Asset Management addresses. Enhanced infrastructure capabilities also augment the achievement of the other four Strategic Focus Areas, i.e. 1: Valley of Possibility, 2: Green and Sustainable Valley, 3: Safe Valley, and 4: Dignified Living.

Municipalities are not only responsible for the provision of essential engineering services that include potable water supply, sanitation, electricity reticulation, the provision of roads and stormwater, and solid waste collection and disposal but also for housing and shared community assets like cemeteries, parks, sports grounds, libraries, etc. While municipalities also have obligations towards governance, community safety and health, and development services, the success or failure of a municipality is substantially measured by the availability and quality of infrastructure services. As such, a municipality is an asset-intensive business.

The unit strives to comply with the recently introduced Generally Recognised Accounting Practice (GRAP) standard for local governments, which focuses attention on asset management. Additionally, this unit ensures compliance with the issued National Treasury asset management practices and reporting requirements. These requirements include identifying, componentising, valuing, and tracking the health of the municipal-owned assets, establishing programmes, providing resources to care for those assets, and reporting the status recorded of existing and new assets for sustainable development.

The collective value of the municipality's infrastructure assets, installed mainly in the public road reserve and on other municipal land, amounts to a considerable value. Without the collective support and coordination by the Asset Management and Systems' (Asset and Wayleaves Management) Unit, the financial and physical accountability and protection of the existing municipal infrastructure assets would be difficult, if not practical, to manage by the individual infrastructure department. This unit

strives to continuously improve its functions and systems to provide better and more efficient support to the internal departments and the public. Through these continuous improvement goals, this unit has improved its overall efficiency in Wayleave Management from 88% to 90% in the financial year 2022/23.

The table below provides a summary of the functional statistics of the Wayleave applications.

Table 157: Wayleave Applications

Activity	2022/23												Total
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	
Wayleave Applications - Received	22	46	31	32	33	3	26	20	19	27	56	30	**345**
Wayleave Applications - Commented on	21	41	28	28	27	3	26	17	15	26	48	29	**309**
Wayleave Applications - Approved	21	41	28	28	27	3	26	17	15	26	48	29	**309**
%													
Wayleave Approval Rate	95	89	90	88	82	100	100	85	79	96	86	97	**90**
Wayleave Cancellation or Refusal Rate	5	11	10	13	18	0	0	15	21	4	14	3	**10**

3.12.3 Development Services

The Section: Development Services is a section within the municipality that is responsible for managing the approval of engineering services and the implementation stages of all new developments in the municipality to ensure that the impact on municipal services and the environment is adequately and responsibly mitigated. Additionally, this section is required to facilitate development to promote economic growth, stimulate job creation, expand the municipal revenue stream (Development Contributions (DCs) and new property rates), and ensure development contributes to the achievement of the strategic goals of the municipality, using the following activities:

- The approval of new developments and monitoring and control of engineering projects implemented by developers;
- Provides ongoing technical support and guidance to ensure responsible and successful development;
- Plan, organise, coordinate, and control the activities, procedures, and outcomes associated with the evaluation and approval of land use and building plan applications, as well as the calculation and coordination of bulk infrastructure development charges;
- Plan, organise, coordinate, and control the activities, procedures, and outcomes associated with the engineering side of the rate clearance applications;
- Manages the implementation of specific developments and development contribution-linked infrastructure projects to ensure capacity for new developments; and
- Develops and provides input into strategic documents, policies, and guidelines related to the engineering aspects of development.

During the 2022/23 financial year, the Section: Development facilitated the approval of land use applications and building plans, which led to a DC revenue of **R28.6 million incl**. VAT (cash payments). This revenue can be used on bulk infrastructure engineering projects to create capacity to accommodate further development and broaden the municipal income base in terms of property rates and taxes.

The images below depict the projects for the 2022/23 financial year (all amounts stated are including VAT).

Devon Valley / Adam Tas Road and Vredenburg / Adam Tas Road re-alignment (Woodmill) R36m

Figure 40: Devon Valley /Adam Tas Road and Vredenburg / Adam Tas Road re-alignment (Woodmill)

Klapmuts Road intersection Upgrade (Potbelly and Mont Vernon) R2.8m

Figure 46: R304 intersection upgrade (Newinbosch)

Outfall Sewer upgrade (Newinbosch) R5.7m

Figure 47: Outfall Sewer upgrade (Newinbosch)

During the 2022/23 financial year, the Section: Development Services initiated, facilitated, and managed development contribution projects (projects implemented by developers in lieu of the payment of cash development contributions) to the value of **R192 million (incl. VAT).**

To provide more perspective on the above, the monthly and annual applications are summarised in the table below:

Table 158: Building Plans and Land Use Applications

Activity	2022/23												Total
	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	
Building Plans: Received	131	102	152	97	190	109	23	102	136	72	114	119	1 347
Building Plans: Commented on within 14 days	22	57	84	69	141	43	9	30	34	4	5	49	546
% within the deadline (target = 50%)	17%	40%	55%	71%	74%	39%	39%	29%	25%	6%	4%	40%	55%
Land-use Applications: Received	19	15	25	20	15	24	0	14	25	14	12	17	200
Land-use Applications: Commented on within 30 days	17	6	5	13	12	10	0	12	20	6	8	10	119
% within the deadline (target = 35%)	89%	40%	20%	65%	80%	42%	0	86%	80%	43%	67%	59%	60%

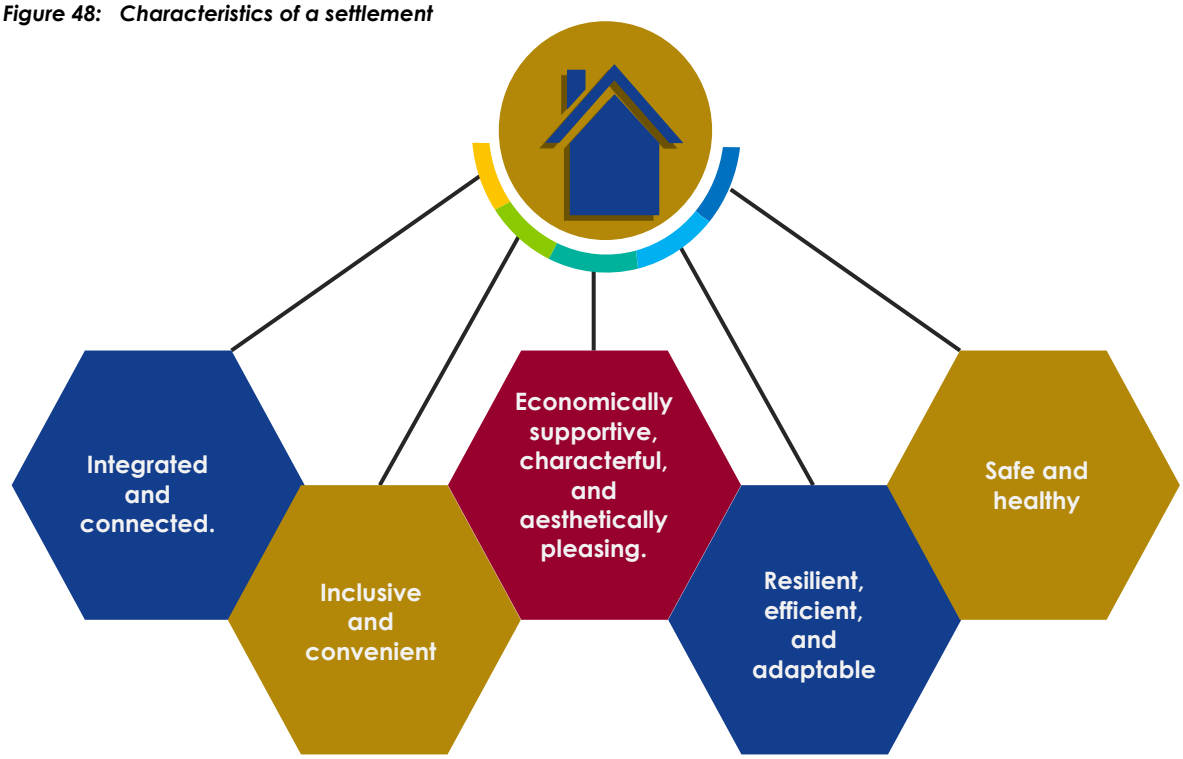
Despite all the highlights some of the challenges were identified in the department:

Table 159: DC Challenges

Service Area	Challenge	Actions to address
Development	Vacant posts could not meet service delivery targets.	Two technician posts and one clerk post have recently been advertised.
Development	Dependence on other service departments to meet service delivery targets	Vacancies in other service departments have a negative effect on response times to development.
Development	Frequent Challenges in DC Calculations by Developers	Problematic areas in DC Policy need to be addressed. Collaboration with the Section: Land Use Planning is required. Inconsistencies regarding DCs between the DC Policy and the Land Use Planning By-law must also be addressed.
Development	DCs payable by schools and other social institutions are problematic for the developers of these facilities, frequently stating that they render the school, etc. unfeasible. This has a domino effect if the school / social facility is not built because the underlying social issue cannot be addressed.	The Council considers if an automatic DCs exemption will apply to these types of land uses. This can be addressed in the next revision of the DC Policy (2024/25).

COMPONENT C: PLANNING AND ECONOMIC DEVELOPMENT

3.13 Spatial and Infrastructure Planning



a) Integrative Spatial Planning Approach

Spatial planning is critical for delivering economic, social, and environmental benefits by creating more stable and predictable conditions for investment and development, securing community benefits from development, and promoting prudent use of land and natural resources for development. Spatial planning is therefore an important lever for promoting sustainable development and improving the quality of life.

Integrative spatial planning is informed by universal planning approaches and concepts, normative and developmental planning principles, norms, and standards. These informants provide clarity on the scope and focus for achieving spatial planning outcomes / benefits for creating positively performing areas that are generally regarded as successful and liveable settlements.

The characteristics of a desirable and successful settlement tend to be:

Figure 48: Characteristics of a settlement

To achieve these positively performing, successful, liveable settlements the following requirements are required of the planning system, namely:

- To achieve a greater mix of land uses and densities in the urban structure that provides a full range of urban functions—housing, employment, and services—in a pattern that minimises the need to travel great distances to work, shop, or conduct business. The efficient use of land needs to be compatible with social well-being and healthy environmental objectives;
- To initiate urban regeneration in inner city areas and main streets with high-density concentrations of mixed employment, residential, and other uses. These areas, with adequate investment in modernisation and renovation of the existing stock and infrastructure, can provide housing closer to services and a wider range of lifestyle opportunities;
- To enhance and support the regeneration of housing estates through innovative financing, technological and regulatory initiatives, and demonstration projects. Focusing on the elimination of barriers to investment will facilitate small-scale urban renewal through cooperative efforts and self-help;
- To enhance broad participation, improve community involvement, and build support for sustainable planning policies and programmes; to promote community identity through the creation of meeting places, public spaces, pedestrian networks, and the preservation of historic buildings and attractive streetscapes;
- To provide a range of cultural and recreational opportunities that correspond to diverse needs through efficient use of natural areas for passive recreation and cultural purposes; to maintain a system of integrated and interconnected open spaces, parks, and river valleys; and to protect the natural habitat and resources in the areas;
- To provide water and sewerage infrastructure that accommodates the needs of the local community while meeting the objectives of a healthy environment; to undertake considerable improvement of existing infrastructure to reduce the amount of untreated urban runoff wastewater discharge; and to increase the capacity of the existing infrastructure to accommodate urban growth and intensification; and
- To improve and expand the transport system to meet the challenges of readjustment in the urban economy and to sustain the competitiveness of public transport. To maximise efficiency, supplement conventional public transit with specialised services directed at specific market segments; and promote energy efficiency and alternative modes of transport.

b) The system of Integrative Spatial Planning

One of the legislated spatial planning system tools available to urban and regional planners is SDFs, a strategic and integrated spatial planning policy that must outline specific arrangements for prioritising, mobilising, sequencing, and implementing public and private infrastructural and land development investment in the priority spatial structuring areas as identified in these SDFs to give effect to the vision, goals, and objectives of the municipal IDP or related business plans of the government.

The MSDF covers the jurisdictional area of the municipality. In the case of the Stellenbosch Municipality, the MSDF must answer the following questions: "How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place, where will it take place, and who will be responsible for what aspect of the development? What are the non-negotiables and fixes necessary to achieve the proposed development path, and which areas require more detailed studies / precinct plans?" all while maintaining the best and most sustainable use of resources.

With the reform in planning law, a shift in focus to an integrative spatial planning approach was facilitated. This shift results in:

- More effective coordination of sectoral actions that have a cross-sectional spatial dimension;
- Greater responsibility for operating the system for authorities at regional and local levels, while ensuring conformity and adequate support;
- More effective participation by local communities and other stakeholders;
- The ability of planning authorities to recoup a proportion of the financial gain from the allocation of development rights to private developers to provide or pay for externality effects and provide local community benefits; and
- The responsible consideration of environmental impacts of development so that any adverse impacts are mitigated and / or compensated for.

c) The local spatial strategy informants to the MSDF, its review and proposed amendments (2022/23)

The approved MSDF for 2019 was informed by various specialists and spatial strategies, namely:

- The development of scenarios of land demand to inform the development of a preferred 20-year growth strategy, development path, and nodal development concepts for SM. This work culminated in the status quo and Urban Development Strategy (UDS) documents in 2017;
- The Rural Area Plan (RAP), which provides an analysis and synthesis of the rural areas of Stellenbosch Municipality;
- Heritage surveys and inventories of large-scale landscape areas in the rural domain of the municipality inform proposed heritage areas (complementing previous inventory work completed for urban areas);
- Approved heritage inventory;
- Area-based planning investigations for parts of the municipality, notably Stellenbosch town, Klapmuts, and the area north of Kayamandi; and
- Capital Expenditure Framework, 2019.

Since the approval of the MSDF (2019), related work has focused on:

- Area-based planning investigations for the Adam Tas Corridor, located in Stellenbosch town, culminated in the approval and adoption of the Adam Tas Corridor Local Area SDF (ATC LASDF), 2022, and Development Guidelines. The catalytic initiative was done in partnership with the WCG: DEA&DP;
- In parallel, the Adam Tas Corridor Overlay Zone was developed, finalised, and adopted in May 2023;
- To confirm the spatial vision and implementation of the ATC LASDF, SM and the ATC's collective landowners signed a Memorandum of Understanding (MOU) in 2022. The Council approved the MOU in August 2022;
- As part of the IUDG in 2020 and 2021, the Capital Expenditure Framework (CEF) was updated to align with the municipal spatial vision, functional areas (FAs), and priority development areas (PDAs) for the municipality. This was done so that a socio-economic and developmental profile could be made for the municipality as well as for each of the FAs and PDAs. This input enabled extensive spatial demand quantification and the setting of programmatic long-term infrastructure investment targets required to realise the spatial vision of the municipality;

- A Capital Planning Forum (CPF) was established to coordinate sector plans, prioritising, mobilising, sequencing, and implementing public infrastructural and land development investment in the priority spatial structuring areas;
- An updated CEF was commissioned in 2023 due to the approval of the ATC LASDF, 2022, and the Development Guidelines. The updated CEF for 2023 has been adopted simultaneously with the amended MSDF process for 2023/24;
- The Inclusionary Zoning Policy identified in the MSDF implementation framework was completed and has been published for public comment. The intention is to finalise the policy in 2023. This was done in partnership with the WCG, DEA&DP, Development Action Group (DAG), City of Cape Town, and other metropolitan municipalities considering the development of the policy;
- Investigation of the Rhenish complex for economic development opportunities has been concluded in 2021/22. This is linked to the proposed urban revitalisation of Mill Square and its surrounds, as initiated by the Council in 2022. The precinct plan has undergone public participation, and the final policy will be submitted for adoption by the Council;
- The Klapmuts Concept Plan was approved as part of the MSDF in 2019 and confirmed by the Council in 2021. Support was given for the creation of an intergovernmental initiative for the development of Klapmuts by the Greater Cape Metropolitan Regional Spatial Implementation Framework (GCMRSIF) Intergovernmental Steering Committee. This was done so that the node could be planned and built together by Stellenbosch, Drakenstein, WCG through DEA&DP, and other government departments that were affected.
- Significant progress has been made in planning and land use decisions for an "Innovation Precinct" or "Smart City District" directly west of and adjacent to Klapmuts South. A land agreement with the University of Stellenbosch (US) to possibly establish university-related activities in this area is currently being negotiated. Phase 1–3 has been approved, and some amendments to land use approvals are currently under consideration;
- To support the cross-border catalytic project identified in the MSDF to unlock development in Klapmuts North and to make it possible for large manufacturing, logistics, and warehousing companies to move from Stellenbosch town (connected to the ATC LASDF) to Klapmuts, the Stellenbosch Municipality applied to the Demarcation Board in 2022 to change the municipal boundaries. The Council approved the submission in 2022, and the re-determination process is currently in progress, with feedback expected in 2023/24;
- The Council adopted the correction of Tables 20 and 28 within the approved MSDF in 2022;
- The amendment and adoption of the review of the Stellenbosch By-law on Municipal Land Use Planning have been finalised during 2022/23;
- The Housing Pipeline Review was approved in 2022, and the IHSP is being updated. The intention is to finalise and adopt the policy in 2023; and
- The CITP has been updated, and the intention is to finalise and adopt the policy in 2023.

In parallel to MSDF work, considerable progress has been made in collaboration with the Western Cape Government (WCG) through participation in the Greater Cape Metropolitan Regional Spatial Implementation Framework (GCMRSIF) Intergovernmental Steering Committee—continuously—with adjoining municipalities to discuss regional spatial development trends, cross-border challenges, opportunities, risks, and infrastructural constraints.

Continued partnership with all local municipalities within the Western Cape and the WCG: DEA&DP to share best practices and improve coordination on matters related to spatial planning and land use management through the Western Cape Planning Heads Forum.

The table below indicates the capital expenditure for the Department: Planning and Development Services as at 30 June 2023.

Table 160: Capital Expenditure as at 30 June 2023: Department: Planning and Development

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Furniture, Tools, and Equipment: Spatial Planning	163 18	16 318	0%

The Departments: Planning and Development have spent 100% of its capital budget for the financial year.

The table below indicates the total number of employees in the Department: Development Planning as at 30 June 2023.

Table 161: Total number of employees in the Department: Development Planning

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0
14 – 17	2	2	0	0

4 – 8	5	5	0	0
3 – 0	0	0	0	0
Total	**14**	**14**	**0**	**0**

The table below indicates the highlights and challenges experienced within the department as at 30 June 2023.

Table 162: Performance Highlights- Department: Development Planning

Highlight	Description
Local Spatial Development Framework for the Adam Tas Corridor	The local spatial development and development guidelines for the Adam Tas Corridor (ATC LSDF), which is a catalytic project listed in the MSDF, have been finalised and adopted by the Council in 2022.
Adam Tas Overlay Zone	The preparation of the ATC LSDF included drafting a concept overlay zone. The Council approved the overlay zone, and its promulgation is currently underway.
Review and amendments to the MSDF and CEF	The department embarked on a process to ensure a better alignment of the strategic and higher-order plans of the municipality with the approved MSDF, which required the review and amendment of the MSDF (including the Capital Expenditure Framework CEF). The Council approved the final amended MSDF and CEF on 27 June 2023.
Inclusionary Zoning (Housing) Policy	The MSDF proposed that an Inclusionary Zoning (Housing) policy be drafted through which the delivery of more affordable housing within new developments and / or targeted areas can be achieved. The Inclusionary Zoning Policy was adopted by the Council on 27 June 2023. Stellenbosch Municipality is the first intermediate city to adopt a policy of this nature.
Feasibility studies for land / building acquisition	Four studies for properties that could potentially be obtained by the Council, three of which are in the Adam Tas Corridor, were completed and submitted to management for consideration.
Precinct plan for the Rhenish complex	An urban design study and precinct plan for the Rhenish Complex in Stellenbosch, setting out the potential measures to preserve, develop, and activate the Rhenish Complex, was drafted, and published for public participation. The comments are currently being reviewed, and the amended policy will be transmitted to Council for approval during the latter part of 2023.
Intergovernmental relations	DEA&DP took the initiative to arrange for quarterly intergovernmental relations meetings for municipalities falling within the Greater Cape Metropole. The meetings have the mandate to discuss common issues and cross-boundary matters. All the department's senior staff attend the meetings.

3.14 Performance Challenges

Table 163: Performance Challenges- Department: Development Planning

Challenge	Actions to address
Approval of the Inclusionary Housing Zoning Policy	Stellenbosch is the first municipality (except the City of Johannesburg) to approve an Inclusionary Zoning Policy. The policy will require that developers contribute a certain percentage of the housing delivery to a specific income band (affordable) in exchange for offset incentives (i.e., up-zoning, density bonuses, etc.). There is a real risk that developers will view this requirement as a penalty, and considerable opposition can be expected from some developments. The process of implementing the policy will be challenging and may be challenged in a court of law.
Capacity	The total staff component of the Section: Spatial Planning amounts to four (4) officials, consisting of a manager, a senior planner, and a spatial and administrative officer. With the increase in projects undertaken in-house, as well as the need to develop LSDFs for each smaller town, as well as for the "Bosdorpe," and to facilitate and lead the implementation of the MSDF. Catalytic projects and the LSDF are currently placing the department under severe pressure. The Department: Development Planning notes that the organogram approved in 2017 does not meet the requirements to successfully fulfil the functions and mandate required by the Section and must be urgently reviewed and amended.

3.15 Local Economic Development (LED)

The table below indicates the highlights within the Section: LED and Tourism.

Table 164: LED Achievements

Achievement / Highlight	Description	Financial years				
		2018/19	2019/20	2020/21	2021/22	2022/23
Business Interventions	Business registrations	37	37	29	n/a	n/a
	Municipal Jobseekers Database Registrations	27	n/a	181	1 767	7 903
	Advice to walk-ins	1 795	n/a	334	19	24
	Workshops	12	15	1	0	n/a
	Business Licences	13	2	22	19	24
Informal Trading	The Section: Economic Development and Tourism has several informal trading sites: • Cloetesville; • Kayamandi; • Klapmuts; and • Ida's Valley. The only site not operational yet is Groendal, but this will be operational within the 2023/24 financial year.	n/a	n/a	n/a	3	4
Enterprise Development and Support	Training for Stellenbosch-based entrepreneurs did exceptionally well in the 2022/23 financial year. The municipality partnered with Ranyaka and Stellenbosch Network and provided eleven (11) SMME training and mentoring workshops during the 2022/23 financial year. The types of training and mentorship programmes delivered were as follows: • SALGA training: Rural Entrepreneurship Development Programme; • Construction Information Session; • SARS Workshop; • 5 x Google Workshops; • Canva Training; • Costing and Pricing Workshop; and • Marketing Workshop. The unit has also been very active with the processing of informal trading permits, ensuring active microbusiness trading in Stellenbosch.	n/a	n/a	3	11	22

Achievement / Highlight	Description	Financial years				
		2018/19	2019/20	2020/21	2021/22	2022/23
Vacant Agricultural Property	In the 2022/23 financial year, Mayco resolved that the vacant municipal land that was advertised in 2020 be re-advertised and that the applicants who previously applied would still be eligible for the land. Four (4) portions of land were advertised on 25 May 2023 in line with the Policy for Management of Municipal Agricultural Land. In total, there are 27 applications, of which 16 were received and scored in the first round and 11 were received in the second round, which have also been scored. The awarding of four portions of land will be awarded during the 2023/24 financial year.	n/a	n/a	2	n/a	n/a

3.15.1 Economic Development and Tourism Challenges

The table below gives a brief description of all the challenges within the Section: Economic Development and Tourism during 2022/23.

Table 165: LED Challenges

Description	Actions to address
Human resources are insufficient to drive an effective economic development and tourism programme.	The Directorate: Planning and Economic Development has since filled two critical positions within the unit, namely the Senior Economic Development Officer: Rural Development and Agricultural Support position and the Senior Economic Development Officer: Business Development position. The only concern now is that the current salary offering does not retain the required experienced, qualified, and well-trained staff to enable the Section to perform its functions for a substantial period.

3.15.2 EPWP Job Creation 2022/23

The EPWP met the expected target of 1 400 as planned for the year 2022/23 with an actual of **1 449** job opportunities created.

The table below illustrates job creation through the EPWP for the 2022/23 financial year.

Table 166: Job Creation through EPWP Projects

3.15.3 Tourism

Aim and function of the Tourism Section:

- Contextualise the strategic goals of tourism promotion and development funding;
- Regularise the operational functioning of external bodies appointed or supported by the municipality in its constitutional mandate towards both tourism and economic development;
- Ensure coordination of the activities of the funded entities;
- Ensure efficient oversight of funding and outcomes;
- Acknowledge and leverage private sector and independent initiatives;
- Develop sustainable tourism events and brands;
- Enable sponsorship opportunities for the commercialisation of events, brands, and other opportunities;
- Smooth cyclical tourism numbers by establishing, developing, and implementing off-peak tourism products and initiatives;
- Develop and package opportunities and venues for business tourism;
- Enable market participation for local businesses;
- Enable training, mentorship, and employment opportunities for local citizens; and
- Quantify the return on investment in events and funded entities.

Highlights:

During the 2022/23 financial year, the Economic Development and Tourism Unit submitted to the Department: Economic Development and Tourism for the Municipal Ease of Doing Business Fund. The municipality was successful in its application, and the Department funded the following projects:

Additional LTO funding for Visit Stellenbosch

During the Adjustment Budget for the 2022/23 financial year, an additional amount of R787 950 was allocated to Visit Stellenbosch.

Job Seekers Database Outreach Programme

Several Job Seekers Outreach Programmes were run during the financial year. The Economic Development and Tourism Unit conducted seven outreach sessions to register more members of the community on the database between 13 February and 29 March 2023. The various sessions were held in the following wards: 1, 2, 3, 4, 5, 6, 16, and 17.

Stellenbosch University: Learning Practice Alliance:

- Stellenbosch University, through the Learning Practice Alliance Unit, applied for a short-term lease agreement on Farm Portion No. 502BH, where they are involved in a project assessing the potential value of seven technologies to enhance the productivity of emerging farmers in the Stellenbosch Municipality.

The launch of the Car Guard initiative in Stellenbosch

- A non-profit organisation partnered with Stellenbosch Municipality, SAPS, and leading private security companies in the area to launch the informal car guard project in Stellenbosch. The initiative aims to address the pressing issue of informal parking attendants. The primary objective is to enhance security and provide a safer environment for both residents and visitors in the Stellenbosch Central Business District.

The table below indicates the capital expenditure for the Section: Economic Development Tourism as at 30 June 2023.

Table 168: Capital Expenditure as at 30 June 2023: Section: Economic Development and Tourism

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Establishment of the Kayamandi Informal Trading Area	5 022	4 400	12.40%
Furniture, Tools, and Equipment: LED	557	508	8.91%
Only the five largest capital projects are listed.			

The Section: Local Economic Development and Tourism has spent 88% of its capital budget for the financial year.

The table below indicates the total number of employees in the Section: Economic Development and Tourism as at 30 June 2023.

Table 169: Total number of employees in the Section: Section: Economic Development and Tourism

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	0	0	0	0%
14 – 17	1	1	0	0%

4 – 8	2	1	1	50%
3 – 0	0	0	0	0%
Total	**8**	**6**	**1**	**12.5%**

3.15.4 Heritage and Resource Management

The Section: Heritage Resources Management is mandated to enable, facilitate, and manage cultural heritage development within the Stellenbosch municipal area through the formulation and implementation of long-term cultural heritage plans, strategies, policies, and guidelines that are appropriately integrated with the applicable sectoral plans of the municipality and aligned with the requirements of the National Heritage Resources Act, Act 25 of 1999.

Part of this work was to update the Stellenbosch Municipality Heritage Inventory, which was done in partnership with the Stellenbosch Heritage Foundation. The municipality intends to further expand on this partnership to ensure that the heritage inventory is continually updated.

The Section has also undertaken a process to review and amend the Stellenbosch Municipality Signage, Advertising, and Poster By-law with the Directorate: Engineering Services. This by-law will be adopted and promulgated during the 2022/23 financial year.

3.15.5 Geographic Information Systems (GIS)

The Section is responsible for managing, coordinating, and controlling the professional and technical processes associated with Geographic Information Systems (GIS) in respect of the municipality, Management of Information Systems (MIS) through research and evaluation of best practices and cost-effective approaches, and providing guidance and advice on the functionalities to internal departments to ensure that broader goals and service delivery objectives are accomplished and quality and professional standards maintained per agreed timeframes, budgets, and appropriate legislation.

The Section has assisted the Directorate: Planning and Economic Development with the development of electronic and online submissions of building plans and land use applications. Through this process, the Section has developed the Building Plan Application Management System ("BPAMS") and the Town Planning Application Management System ("TPAMS"). These systems will allow residents and potential developers to submit their development applications online and monitor the progress of their respective applications.

Currently, BPAMS is fully operational and will be launched with TPAMS during the next financial year.

COMPONENT D: COMMUNITY AND SOCIAL SERVICES

3.16 Libraries

Libraries play an important role in learning. The resources libraries provide help communities find the information they need. These days, people are turning more and more to the internet for information, but search engines like Google only provide information about the way questions are formulated. Often, this does not provide the user with the relevant information. With the plethora of information on the internet, it is becoming more and more difficult to find information than in a library catalogue. This only cements the fact that a library's core services are becoming much more important and should be funded as an essential service that uplifts communities and develops them holistically.

Over the last year, Stellenbosch Public Libraries have attempted to strive to maintain and record local history, offer free educational and recreational resources, build communities, contribute to the economy, and build partnerships with community organisations and businesses to assist with the promotion of literacy and numeracy as well as youth upliftment programmes.

In the promotion of educational resources, training, and development, the Stellenbosch Public Libraries have played an important role in supporting education and literacy. The municipality has provided countless resources, such as educational materials, training, courses, etc., to communities. These days, patrons enter public libraries to borrow recreational and self-development resources, to ask questions about job applications and resume writing, or to fill out government forms, including tax, academic institution applications, and health insurance paperwork. All these questions are answered by library staff without charge.

"Google can bring you back 100 000 answers. A librarian can bring you back the right one." – Neil Gaiman

Numerous outreach programmes were developed over the last year to rebuild communities after the COVID-19 pandemic. People come to libraries not only looking for information but also to uplift and develop themselves and their communities. Libraries have developed programmes such as Mothers and Baby Storytimes, reading clubs, and helping elderly people attend events and find ways to connect with people. While teenagers meet up in libraries with their study groups for team-building or school projects, the municipality is also seeing the development of libraries as community centres for communities to meet.

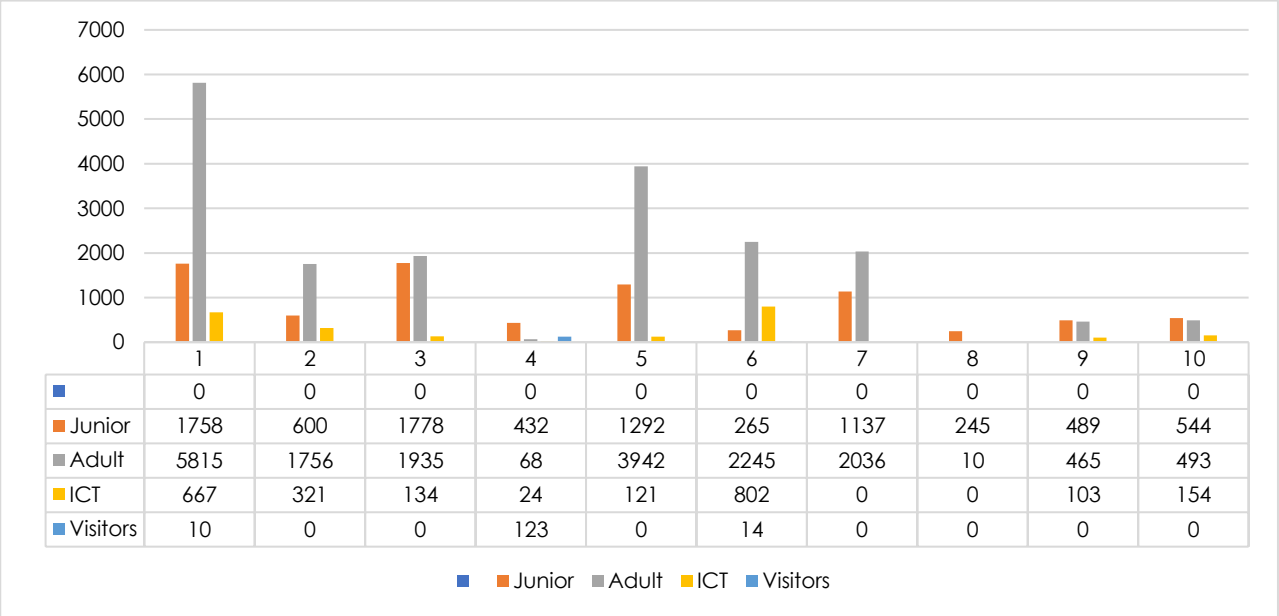
Libraries contribute to the economy of the town. Even though libraries are free to use for patrons, the role they play in developing communities is greatly underestimated. Public libraries provide access to information about business planning, market research, and finance opportunities for entrepreneurs who are looking for spaces to network, conduct research, use technology, and arrange meetings.

Technology in libraries can be innovative, offering access to expensive training programmes and skills courses that otherwise would not be available to everyone. Online training and development courses are available to communities through free wi-fi, and the internet services provided through the Premier's Office Rural Connectivity Programme. This programme allows communities access without spending enormous amounts of money on programmes they would otherwise not be able to access.

As a local authority responsible for the social and economic upliftment of its citizens, the municipality needs to develop flourishing, well-resourced libraries, thereby ensuring that future generations live productive, safe, and fulfilling lives. Libraries assist communities to reach their highest potential and

become responsible members of the community. This responsibility can only be addressed if libraries are seen as a vital part of the goals the municipality has set out to achieve.

Table 170: Total number of libraries



Item	Description	Total number
Libraries in the WCO24 Area	**Public Libraries:** • Kayamandi, Cloetesville, Ida's Valley, Jamestown, Stellenbosch, Pniël, Groendal, and Franschhoek	8

	Library Aid / Cleaner	3
	IT Cadet	1
	Admin Assistant	1

Municipal public libraries continue to recuperate from the COVID-19 pandemic's repercussions. Regrettably, the Western Cape Public Libraries' database (SLims) experienced a catastrophic failure in July 2022. Consequently, membership and library circulation figures were profoundly impacted. The municipality resumed operations in August 2022, and library patrons are gradually resuming their visits; however, the figures have not yet recovered to pre-COVID-19 levels.

The public e-book service is gradually increasing in prominence. Once more, patrons are utilising library halls during library hours. Libraries have been required to rebrand their services in the past year. To maintain community interest in the libraries' resources and services, outreach and marketing initiatives have been expanded.

The graph below illustrates the membership statistics for the year under review.

Table 171: Libraries membership statistics

	1	2	3	4	5	6	7	8	9	10
	0	0	0	0	0	0	0	0	0	0

Visitors	10	0	0	123	0	14	0	0	0	0

Libraries have over the last year endeavoured to strengthen the existing public and private partnerships with the communities within the WCO24 Area.

Table 172: Libraries partnerships

Library Partnerships		
Cloetesville		
Chennels Day Care	Day Care	A partnership with the Day Care to create a love for books through literacy activities in the form of storytelling, puppet shows, and song and dance activities.
Little builders crèche	Crèche	Assist with the promotion of literacy and numeracy by introducing 3–5-year-old toddlers to books and other ECD activities such as puzzles, lego, and storytelling.
Kayamandi		
Loxtion Foundation		The Loxtion Foundation assists the Kayamandi community. They create opportunities to discover talent amongst township youth and give them a platform to grow.
Pniël		
Dwarsrivier Tourism		Partnering to bring services to the community of Dwarsrivier. Hosting the event to enrich the community.
Community development		The partnership aimed to bring various services to the community of Dwarsrivier. Hosting the event to enrich the lives of the community.
Groendal Library		
Inceba Trust	Mother and Child Book Sharing	Focus on training illiterate parents to do book sharing with their children / grandchildren by looking at the pictures and telling the story.
Inceba Trust	Training of ECD employees	The Inceba Trust is responsible for the training, while the Groendal Library assists with storytelling and recommends books per theme.
Adopt-A-Crèche	Outreach to underprivileged children from an informal settlement	Teaching children basic hygiene, literacy, and numeracy skills by exposing them to ECD / crèche activities. Inceba trains the parents about the Parent and Child Book Sharing Programme.
Inceba Trust Toy Library	ECD Toy Library	The aim is to incorporate the toys into the ECD section at Groendal Library. As part of this initiative, free training will be presented to Stellenbosch Library staff, i.e., ECD programmes / activities and the usage of educational toys.

Library Partnerships		
ECD / Crèches	Wemmershoek, La Motte, Groendal, Langrug, and Bosbou areas	17 crèches are receiving block loans for books linked to their weekly theme. 2 visits per month for block loans and 1 storytelling / outreach per month are presented at each crèche.
CWP Community Work Programme	Unemployed people are employed through the CWP initiative.	The Community Work Programme (CWP) is a government programme aimed at alleviating poverty and curbing unemployment. The work rendered by the CWP workers includes cleaning the library, tidying shelves, and assisting with the preparation of new library material (covering of books, tattle-tape, etc.). The workers also maintain and clean the garden and outdoor areas.
READ-TO-LEAD	Literacy Project in Partnership with BED students: Stellenbosch University	A group of postgraduate Bachelor of Education students assist learners at schools to promote literacy and numeracy at schools.
Franschhoek Literacy Festival / Nali'Bali	Storytelling workshop	The workshop is aimed at exchanging ideas / guidelines for pre-school and primary educators / librarians, and authors.
ECD / Crèches	ECD creches in the Groendal area: "Informal creches "	ECD centers / crèches are invited to make use of the educational toys / books at the Groendal Library.
Groendal Housebound members	Book exchanges with housebound / elderly patrons	Bringing the library to the community. Visits are done twice a month to deliver library material to the housebound. Visit new potential members to form part of the outreach.
Community of Groendal	Friends of the Library	Currently in the process of establishment: "Friends of the Groendal Library."
Maker-space	Children Gr R – Gr 12	Currently in discussions with Groendal Primer and retired educators in the Groendal / Franschhoek area to assist with the rollout of the "Maker-space "programme. The focus will be on S.T.E.M (science, technology, electronics, and mathematics). The idea is to expose the children to science, mathematics, technology, and electronics. The programme will be linked to the school curriculum.
Hospice Stellenbosch		Partnering to bring services to the community of Dwarsrivier. Hosting activity events to enrich the lives of the hospice community. And promote wellness within the community.
Stellenbosch Traffic Department		Partnership with the traffic department to teach young children about the importance of road safety.
Read to Rise		Partnering with the Read to Rise organisation to promote reading among young children.
Franschhoek		
Dennegeur Agri Village	Crèche	Bringing the library to the farm children. Storytelling and activities are done twice a month.

Challenges facing Libraries

With the assistance of Provincial Library Services, the municipality can offer an e-book service to its patrons. However, additional funding is needed to sustain this service. Unfortunately, being an underfunded mandate, the municipality is not able to invest additional funding in this vital service.

The municipality continues to be faced with the challenge of a lack of qualified and skilled staff. Libraries are highly under-resourced in terms of qualified personnel. The lack of sufficient funds and the moratorium on filling the numerous vacant positions within the section, coupled with the inadequate physical and digital resources, have ultimately resulted in low patronage of library facilities.

Unfortunately, even though many realise the importance of libraries within communities, there are many challenges that prevent libraries from fulfilling the community's needs. There are three major challenges. These are (a) "underfunded mandate," (b) staff vacancies, and (c) repairs and maintenance of library buildings. The most challenging is that of employing trained, qualified staff in vacant positions, as well as the number of vacant positions that remain in municipal libraries. This situation does not allow libraries to function optimally.

The table below indicates the capital expenditure for the Section: Library Services as at 30 June 2023.

Table 174: Capital Expenditure as at 30 June 2023: Section: Library Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Upgrade the Stellenbosch Library	3 874	69	98.21%
Upgrading: Cloetesville Library	164	132	19.55%
Library Books	153	116	23.93%
Cloetesville: Furniture, Tools, and Equipment	16	11	33.39%
Only the five largest capital projects are listed.			

The Section: Libraries has spent 8% of its capital budget for the financial year.

The table below indicates the total number of employees in the Section: Library Services as at 30 June 2023.

3.17 Cemeteries

Stellenbosch Municipality is responsible for the maintenance and management of six cemeteries in greater Stellenbosch. Jamestown, Pniël, and Groendal have reached their capacity, while Wemmershoek and Franschhoek South and North are fully operational. Onder-Papegaaiberg Cemetery is also at capacity; only reserved graves are available. A new cemetery in Kylemore is currently being established. The Jamestown cemetery suffered harm because of high underground water levels during this year's flood that hit Stellenbosch in June 2023. It became practically impossible for new graves to be dug in the area. Simultaneously, the municipality could not do any reopening of graves due to the underlying high-water levels.

Consultants were appointed (3 years + project) to assist Stellenbosch Municipality with the identification and planning of two regional cemetery sites to address the critical need for burial space within the municipality. This project is at an advanced stage of acquiring the required environmental, water, and land use approvals. All licenses have been received for the commencement of the new Stellenbosch Memorial Park situated alongside the R304 planned at the site known as the Calcatta bush.

The objective of the Section: Cemeteries is to provide adequate burial space and ensure a dignified burial.

The table below indicates the availability of burial space within the WC024 as at 30 June 2023:

Table 176: Cemetery space availability

Cemetery	Airspace	Status		
		Open	Full	Closed
Jamestown	Open	✓		
Onderpapegaaiberg	Open	✓		
Pniël	Reopening		✓	
Groendal	Reopening		✓	
Franschhoek South	Open	✓		
Kylemore	Not open yet			✓
Calcatta	Not open yet			✓

3.17.1 Income – Cemeteries

The table below indicates the income generated from the financial years of 2018/19 – 2022/23.

Table 177: Cemeteries Income

Gravesite locations	2018/19		2019/20		2020/21		2021/22		2022/23	
	Number of Burials	Income	Number of Burials	Income	Number of Burials	Income	Number of Burials	Income	Number of Burials	Income
Onder-Papegaaiberg	24	R50 389	103	R87 791	35	R25 033.80	45	R47606.76	65	R612 431.84

Challenges:

- There is a shortage of burial space;
- Strategic vacant positions cause a lack of skill transfer;
- There is a risk of skills not being transferred on time when staff retire / resign;
- to convert burial records to electronic soft copies (in progress as per the five-year plan);
- to promote alternative burial methods, such as, e.g., cremations, amongst various religious groups; and
- Shortages of cemetery training, especially formalised training.

The table below indicates the capital expenditure for the Section: Cemetery and Parks Services as at 30 June 2023.

Table 178: Capital Expenditure as at 30 June 2023: Cemetery and Parks Services

Capital Projects	Adjustment Budget	Actual Expenditure	Variance from the Adjustment Budget
	R'000		
Extension of Cemetery Infrastructure	1 000	870	13.04%
Only the five largest capital projects are listed.			

The Section: Cemeteries has spent 87% of its capital budget for the financial year.

3.18 Child Care; Aged Care; Social Programmes–Community Development

The Department: Community Development is thankful to the municipal council for not cutting the departmental budget, which makes serving vulnerable communities still possible. The impact of the economic situation in the country is visible in local households and on the local streets. This is evident in the increased expectations from local government to deliver services not received from other spheres of government and the number of people trying to make a living being homeless.

Table 180: Service Statistics – Childcare, Aged Care, Social Programmes

Focus area	Description	Ward	Activity
Early Childhood Development Services / Children	• Capacity building of ECD practitioners; • Initiatives in awareness programmes (ECD children); • ECD Registration Compliance; • Strengthening and establishing ECD forums; • Transversal committees / ad hoc committees; and • Awareness Programmes.	All	• 45 ECD stakeholder organisations and the DoE participated in collective planning and information sharing to shape the ECD training and registration programmes according to local needs.
		All	• ECD Registration Drive with 117 organisations in the ECD sector to identify and prioritise registration compliance obstacles experienced by ECDs and service organisations.
		All	• The above drive and understanding shaped the Stellenbosch Municipality ECD Registration SOP.
		All	• The SOP was workshopped along with other registration requirements at quarterly ECD workshops, resulting in a record number of 37 ECDs registered.
		18	• 40 ECDs assisted with financial management and governance training.
		13, 15, 18	• 25 ECD practitioners were trained in learning programmes and teaching aid development.
		11, 13-16, 21	• 17 ECD practitioners attended the Remgro-sponsored policy development training.
		12-15	• General health and safety training was provided to 20 ECD practitioners.
		All	• Emergency First Aid Respondent (EFAR) training was provided to 39 practitioners.

Focus area	Description	Ward	Activity
		ALL	The registration status of 128 ECD facilities was plotted on the GIS system.
		3-5, 12-16, 18	Holiday programmes reached 1 700 children.
		5, 11, 20	Back to School programme reaching 2 006 children.
		1-6, 10-15, 18, 20, 21	26 foster parents and children participated in the parenting training session with DSD.
		1-2	Awareness session on bullying and the effects thereof was conducted with 1 815 children.
		12-15	400 learners participated in the Help a Girl Child campaign at Ikhaya Primary.
		6, 16, 18, 19	400 children participated in the Child Protection Week activities.
Persons with Disabilities	Awareness and Wellness programmes Universal Access	All	115 people with disabilities participated in the disability sports day.
		All	The municipality participated in and published a link to the review of the Disability Information Portal on the municipal website.
		4-6, 11-13, 16-18, 20	55 youths from the community were trained in sign language.
		7-11, 16, 17	45 people with disabilities participated in the Know Your Rights programme.
		12-15	28 people with disabilities participated in the Heritage Day celebrations.
		All	285 people and various organisations participated in the Walk with Disability Awareness programme on World Disability Day.
		1, 2, 12-17	70 people with disabilities attended the information session on how to access EMS services.
		4	46 carers were involved in an appreciation day for carers of people with disabilities.
		All	Five training sessions have been completed with the internal UA Champions, and two information sessions were done with internal departments.
Older Persons	Special Events, Awareness programmes and Capacity Building	3, 5-6, 12-14, 67-17, 20	148 elderly people participated in the Indigenous Games programme.
		4-6, 12-17	111 elderly people and people with disabilities participated in a mental health programme.
		1-6, 12, 14, 16-17, 20	Nine clubs participated in regular Elderly Forum meetings where planning for services was done collaboratively.
		1-6, 12, 14, 16-17, 20	28 people from nine elderly clubs participated in a follow-up capacity-building session.
		1-6, 12-17, 20	288 elderly people participated in the regional Golden Games.

Focus area	Description	Ward	Activity
		4-6, 12-13, 16-17, 20	Members of nine elderly clubs benefited from the CWDM Adult Diaper Relief Programme.
		4	14 elderly people from the Pniël club completed an ICT training session on basic MS programmes, internet searching, and email writing.
		1-6, 12-17, 20	100 elderly people participated in the Elderly Abuse Awareness Day.
Gender	Special Events and Awareness programmes	All	Women's Day with 333 women.
		13-15, 18	Fatherhood Programme with 62 men
		1, 2, 13-16, 18	110 widows participated in an empowerment programme.
		12-15	Wellness day attended by 55 diabetics.
		3	Seven men and women participated in the breast cancer and men's health programmes.
		1-4, 12-19, 20-21	16 Days of Activism: The launch was attended by 102 people as part of the transfer of deeds ceremony. 493 male and female youth participated in the GBV programme, Courageous Conversations. 36 mothers and daughters participated in the inter-generational dialogue on womanhood and GBV. 19 foster care parents completed the GBV training during 16 days of activism.
		All	Officials attended Roses on the River, the World Aids Day commemoration of @heart.
		All	285 women participated in the GBV and SUD awareness programmes.
		1, 2, 13-15, 18	70 women attended the Human Rights Programme.
		12-15	61 foster parents participated in the parenting programme.
Youth	Youth Empowerment programmes Youth Capacity Building Transversal committees / Ad hoc programmes	4	Life Skills Training by the National Youth Development Agency for 20 youths.
		1-4, 12-15	38 youth were trained at the e-Centre in basic MS applications.
		3-4	11 youth participated in an entrepreneurship training.
		1, 2, 12-15	125 youth participated in the DCAS Cape Winelands Drama Festival.
		1-3, 5-6, 12-17, 19	Accredited training to 24 youths in 5-star table attendance. Accredited training to 13 youths in plumbing. Accredited building maintenance training was done with 13 youths.
		1-6, 10-21, 23	46 youths were afforded an opportunity in the learner and driver's licence programme.
		3, 4, 12-15, 18	123 youth participated in the job-readiness programme in partnership with DSD.

Focus area	Description	Ward	Activity
		1-6, 10-21	• Youth Day was celebrated by 125 youth.
		1-2	• 68 Youths participated in a GBV dialogue.
Grant in Aid	Donations to community organisations serving among others: youth, gender, ECDs, Old Age Homes, Health Organisations, and sports clubs	All	• 1 financial management workshop with 15 organisations. • 3 compulsory clarification workshops with 211 organisations. • 61 organisations attended the MOA signing workshop. • See the table below regarding the approved donations. • GiA Policy and SOP reviewed. • A Know Your Status workshop was conducted with 16 community-based organisations.
People on the Street	Development, awareness raising through collaboration and services rendered	All	• Mandela Day: Motivation and marketing of the public to support the Give Responsibly Campaign along with the NGOs associated with the campaign.
		All	• 1 survey among people who are homeless was conducted.
		All	• 69 people attended the Conversations Around Homelessness to increase civil society participation and understanding. • One forum was established with monthly meetings to continue the conversations and develop action plans.
		All	• Give Responsibly marketing via Facebook and during the festive season safety campaign.
		All	• 201 parking marshals were trained on Give Responsibly to assist with communication with the public. • 18 shops participate in the programmes through the sale of coupons. • One mini-site on Give Responsibly was established on the Visit Stellenbosch website to make the information on Give Responsibly available to tourists through a QR code. • 467 work opportunities were provided to people on the street through the Animal Welfare Walk a Dog project and the Stellenbosch Night Shelter Cleaning project.
		11-12, 15-16, 21	• 130 women on the street benefited from a breast cancer wellness campaign. • 50 women benefitted from a women's hygiene and wellness programme.
Social Relief of Distress	Provision of food parcels, blankets, mattresses, vanity packs and warm food according to the need due to disaster incidences	ALL	• 1 880 individuals were assisted.

The table below indicates the number of Grant in Aid applications recommended and approved for the year under review:

Table 181: Number of Grant in Aid applications recommended and approved

Subcategory	Applications Recommended and approved	Recommended Amount R

COMPONENT E: ENVIRONMENTAL PROTECTION

3.19 Pollution Control, Bio-Diversity, Beautification, Open Spaces and Parks

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned. To this effect, Stellenbosch Municipality developed the Stellenbosch Environmental Management Framework in 2018, administered by the Department: Community Services.

Stellenbosch Municipality is compiling dedicated Environmental Management Plans (EMPs) for all its declared nature reserves as well as nature areas. The Council adopted the Mont Rochelle Nature Reserve EMP in 2022. Papegaaiberg Nature Reserve has an approved EMP, currently under review along with Jan Marais Park's EMP. The Council accepted the Paradyskloof Nature Area in 2019. A first draft EMP has been completed for the Ida's Valley Dam- / Botmaskop area, which will be advertised for public input by 31 December 2022. Stellenbosch Municipality has also completed an Invasive Alien Plant Management Plan, as required in terms of the National Environmental Management: Biodiversity Act (10 of 2004), and an Integrated Fire Management Plan to assist in the management of large vacant nature areas under the management of the Council.

An Air Quality Control By-law as well as a Noise Control Policy have been developed and adopted by the Council. The latter is implemented by a dedicated Air Quality / Noise Control Officer appointed within the Department: Community Services.

Air quality and noise complaints are captured in a central database and dealt with within the required timeframes. The following statistics included both air quality-related matters and noise complaints. All noise complaints are investigated in terms of the Western Cape Noise Control Regulations PN200/2013.

Table 183: Air Quality Complaints 2018

2018 Complaints	1st Quarter	2nd Quarter	3rd Quarter	4th Quarter

- Total noise complaints for 2021 = **72**
- Total noise complaints for 2022 = **122**
- Total noise complaints for 2023 = **197**

3.19.1 Environmental Implementation

Stellenbosch Municipality works closely with the Department of Environmental Affairs and Development Planning in reporting on illegal activities as well as administering the rehabilitation action of Section 30 (National Environmental Management Act, 107 of 1998) for emergency incidents.

3.19.2 Urban Forestry

The aim of the Urban Forestry Sub-section is to facilitate the planting, protection, blanking, maintenance, and long-term management of all trees located on municipal property through tree management (arboricultural) practices, thus promoting a sustainable development approach. This approach is geared towards making Stellenbosch Municipality the greenest municipality in South Africa through urban forestry practices, which guide investors towards future sustainable development.

The table below indicates the total number of employees in the Section: Environmental Management.

Table 188: Total number of employees in the Section: Environmental Management

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)
	Number			
18 – 22	1	1	0	0%
14 – 17	2	2	0	0%
9 – 13	2	1	1	50%

3 – 0	9	8	1	11.1%
Total	**25**	**22**	**3**	**12%**

COMPONENT E: SECURITY AND SAFETY

3.20 Law Enforcement

The primary role of Law Enforcement is by-law enforcement and the protection of municipal assets and staff. The function includes the monitoring and prevention of invasions of municipal land, for which the responsibility is shared between Community and Protection Services and the Section: Informal Settlements.

A 24/7 control room is in place, as is the monitoring of crime-hot areas through CCTV cameras. Licence Plate Recognition Cameras (LPR) have been installed at all entrances / exits to Stellenbosch and Franschhoek towns, with several LPR cameras installed on minor roads that are used regularly by thoroughfare traffic to avoid congested areas during peak times. This has proven to be very successful in the combatting of crime and crime prevention initiatives.

Highlights:

- Weekly operational planning with key stakeholders (SAPS and other safety partners).
- Revamp of control room concluded and operational to ensure more efficient service delivery; and
- Purchasing a multi-purpose armoured vehicle to effectively deal with land invasions - tender process in progress.

Challenges:

- To render a 24/7 law enforcement patrol service;
- Increase and maintain surveillance of key places;
- Prevent land invasions;
- There is insufficient staff to fulfil operational requirements; and
- There is insufficient office space to accommodate departmental staff.

Law Enforcement attended to the following from 01 July 2022 to 30 June 2023:

Table 189: Law Enforcement highlights

Type of activity	2021/22	2022/23
Fines issued Section 56's and 341's	1 136	5 196
Liquor Compliance Inspections	83	51
Scrap metal / Bucket Shop Inspections	77	67
Law Enforcement Awareness sessions	40	33

3.20.1 Traffic Law Enforcement

Traffic Services is performing its functions as guided by the National Road Safety Strategy, with its main objective being to achieve traffic safety on municipal roads, including the functions as defined in the municipality's IDP.

The National Road Safety Strategy provides all-year-round road safety initiatives. The municipality has increased its enforcement strategy in collaboration with stakeholders and affected parties. Operations like automatic number-plate recognition are conducted to improve compliance with and payment of traffic fines.

On-going objectives are to improve road user behaviour; reduce the incidence of traffic offences; speeding; drunk-driving and driving under the influence of narcotics; dangerous overtaking; remove

of unfit road users from traffic; roadworthiness of vehicles; public transport compliance concerning vehicles and drivers; provide sufficient and coordinated regulation of traffic on strategic roads; provide pedestrian education and compliance; eradicate corruption; ensure administrative compliance; and overall improve enforcement systems. This includes additional hours and Saturday operations at the Admin Section and a new approach to law enforcement strategies.

3.20.2 Highlights and Challenges for Traffic Law Enforcement

Traffic law enforcement strategies have managed to yield good results.

In the 2022/23 financial year, Traffic Service continued with the delivery of its Traffic and Pedestrian Safety Programme, which entails a team of two traffic officers who focus on the education of learners and farm workers regarding road safety issues. Lectures were presented at schools, and training was provided in respect of correct bicycle etiquette and the registration, training, and monitoring of scholar patrols throughout the municipality. Fifty-four (54) awareness initiatives on public safety were held at targeted schools in the municipal area.

Another area of concern was the education of farm workers in the municipal area. The focus was on traffic rules for pedestrians, which included safe road crossing and the wearing of visible clothing, especially during winter, early in the mornings and late at night.

Jaywalking (which occurs when a pedestrian walks in or crosses a roadway that has traffic other than at a suitable crossing point disregarding traffic rules) has been another intervention, as many pedestrians are killed or injured while jaywalking.

Challenges:

- Inadequate Human Resources: Limited Staff;
- The capacity of the DLTC restricted the municipality to performing limited tests; and
- Vehicle Testing Station infrastructure challenges and staff shortages.

Stellenbosch is rapidly becoming a preferred business and employment hub. The resources required to provide a quality service to the residents and business sector are inadequate and pose a significant challenge for the future. This limitation will have a negative impact on service delivery.

Service Statistics – Traffic Services

Table 190: Service Data for Traffic Services

Details	2021/22	2022/23
Drivers License Tests	2 2 11	2 095
Learner Driver License Tests	3 118	4 471

3.21 Fire and Disaster Management

The Republic of South Africa's 1996 Constitution imposes legal obligations on the government to protect the health and safety of its citizens. Section 41(1)(b) determines that all spheres of government are required to "secure the well-being of the people of the Republic," while Section 152(1)(d) requires that local government "ensures a safe and healthy environment."

Consistent with South Africa's primary approach to adapting to the impact of climate change by strengthening the nation's resilience, the fire services must embrace climate adaptation by identifying and putting into effect appropriate policies, strategies, and measures. While there are several interventions that the fire service can put in place to contribute to this vision, the following are some of the measures that are being pursued by the Stellenbosch Municipal Fire Service:

- Construction of green and environmentally friendly fire stations and facilities;
- Better use of water for firefighting purposes, as well as usage of alternate environmentally friendly extinguishing mediums;
- Utilisation of less harmful and environmentally friendly foam;
- Reduction of emissions, especially during prolonged fire incidents; and
- Factoring climate change impacts in land-use planning; including the effects of urbanisation on flood characteristics and the urban island heat phenomena created by urban development.

Schedule 4, Part A of the Constitution, determines that disaster management is a functional area of concurrent national and provincial legislative competence, meaning that both national and provincial governments have a legal imperative to implement disaster management according to the requirements of the Constitution and the Disaster Management Act. This does not mean that municipalities (the local sphere of government) are exempt from disaster management responsibilities. Section 156 (4) of the Constitution determines that national and provincial governments must assign to a municipality, by agreement and subject to any conditions, the administration of a matter listed in Part A, Schedule 4 (e.g., disaster management), which necessarily relates to local government, if that matter would most effectively be administered locally and if the municipality has the capacity to administer it.

The elevated levels of poverty in disadvantaged communities are an especially important factor in the progression of vulnerability to hazards. The most effective sphere of implementation and planning for disaster management is, without doubt, the local government (municipal) sphere. Disaster management is therefore a crucial function of the local government. Certain functions that are closely related to disaster management are included in Schedules 4 and 5 of Part B of the Constitution as functions that local government must provide, e.g., air pollution management, building regulations, firefighting services, municipal planning, municipal health care, and water and sanitation services.

It is therefore safe to say that disaster management forms an integral part of South African public services, and the primary responsibility for disaster management in the Republic rests with the government (in all the governments' spheres).

Highlights:

- Procurement of a mobile incident command vehicle.
- Commencement of the planning for the Jamestown satellite fire station.

Challenges:

- Fire risk in expanding informal settlements, compounded by loadshedding.

COMPONENT F: SPORT AND RECREATION

3.22 Holiday resorts and campsites

The Stellenbosch Municipality is responsible for the management and maintenance of one picnic site, the Jonkershoek Picnic Site. This site is situated in the Jonkershoek Valley on the banks of the Eerste River. The picnic site attracts up to 15 840 visitors per annum due to its natural beauty and tranquillity set at the foothills of the Jonkershoek mountains and provides outdoor leisure for visitors, catering for braai and picnics along the river course.

3.22.1 Sports Facilities and Swimming Pools

Table 201: Service Statistics – Holiday Resorts and Campsites

The Stellenbosch Municipality is responsible for the management and maintenance of seventeen (17) sports grounds in its municipal area. The picturesque beauty of the Stellenbosch Mountains surrounds these grounds. Ten (10) are in urban areas, and seven are in rural areas.

It is the municipality's goal to create active, healthy communities and to provide a sporting hub for all its residents and visitors by offering a wide range of well-maintained and well-managed sporting facilities.

Stellenbosch Municipality manages and maintains one swimming pool in the greater Stellenbosch area. The swimming pool is situated in Cloetesville and can accommodate two hundred and seventy-five (275) people at any time per day. The existing facility can host swimming galas and aims to further sports development and recreation.

3.22.2 Service Statistics Sport - Grounds and Swimming Pools

3.23 Community Halls and Facilities

Stellenbosch Municipality is the proud owner of two top-class town halls and nine community facilities that cater to residents and both national and international visitors.

The facilities are available throughout the year (365 days per annum) and can be booked for events such as meetings, weddings, training sessions, conferences, and community and social events.

Table 203: Total functions: Community Halls and Facilities

3.25 Human Resources Services

Stellenbosch Municipality views the Human Resources Management component as the governance of the organisation's employees. More commonly, human resources per se refer to the people or human capital appointed or employed by the organisation whose skills are used to reduce risk and maximise return on investment. The vision of the Department: Human Resources Management is undoubtedly to build partnerships with management at all levels of the organisation, to create a culture or working environment where employees are valued or appreciated, and to ensure a diverse, qualified, healthy, and highly motivated workforce focused on achieving critical outcomes through the development and administration of cost-effective and results-oriented human resources. Accordingly, the mission of the Department: Human Resources Management is to address and achieve the goals and challenges of Stellenbosch Municipality by providing services that promote a work environment that is characterised by fair treatment of staff, open communications, personal accountability, trust, and mutual respect. The municipality will seek and provide solutions to workplace issues that support and optimise the operating principles of the organisation.

The Department: Human Resources Management objectives for Stellenbosch Municipality include, but are not limited to:

- Helping the organisation achieve its goals;
- Ensuring effective utilisation and maximum development of human resources;
- Ensuring respect for human beings;
- Identifying and satisfying the needs of individuals;
- Ensuring reconciliation of individual goals with those of the organisation;
- Achieving and maintaining high morale among employees;
- Providing the organisation with well-trained and well-motivated employees;
- Increasing employees' job satisfaction and self-actualisation;
- Developing and maintaining the quality of work-life;

- Being ethically and socially responsive to the needs of the community;
- Developing the overall personality of each employee in its multidimensional aspect;
- Enhancing employees' capabilities to perform the present job; and
- Ensuring service excellence for the Stellenbosch municipal area.

Human resources services include:

- Strategic Human Resources Management;
- Labour Relations;
- Recruitment and Selection;
- Training and Development;
- Employee Assistance;
- Occupational Health and Safety;
- Employment Equity; and
- All Human Resources Administration.

Each director, manager, departmental head, superintendent, assistant superintendent, and foreman is responsible for setting objectives, delegating responsibilities and tasks, motivating staff, disciplining staff, developing skills and career paths, measuring performance, and generally guiding their staff. In these endeavours, management and line management are assisted by the Department: Human Resources Management, which provides policies, guidelines, support, systems, and specialised inputs.

The highlights for the Department: Human Resources Management in 2022/23 are the following:

- **269** employees were trained;
- **12** employees attended learnerships on construction roadworks;
- **3** employees have completed the Municipal Minimum Competency training;
- **15** students were placed in various directorates to gain practical work experience to obtain their qualifications. The amount spent was **R282 405;**
- **28** internal bursaries were awarded in the amount of **R527 015;**
- **8** external bursaries (Provincial Treasury) were awarded in the amount of **R319 000;**
- An amount of **R4 362 594** was spent on seminars, conferences, and workshops (Training);
- The total amount that was spent on training activities for the whole municipality was **R5 491 014** which is **0.90%** of the payroll budget spent.

The challenges for the Department: Human Resources Management in 2022/23 were the following:

- Shortage of conducive training venues; and
- The implementation of the Municipal Staff Regulations as promulgated (excluding Chapters 2 and 4) was implemented, and due to many and various interpretations, it will become challenging as it is implemented.

The table below indicates the total number of employees in the Department: Human Resource Management as at 20 June 2023:

Table 208: Total number of employees in the Department: Human Resources Management

Job Level	Posts	Employees	Vacancies (full-time equivalents)	Vacancies (as a % of total posts)

3.26 Information and Communication Technology (ICT) Services

The Department of ICT committed its time in the 2022/23 financial year to reviewing ICT contracts and the purchase and replacement of computer software and hardware to further enable the various municipal business units.

a) Highlights:

- High-site wireless hardware links were procured and delivered during this time, with the plan to upgrade the municipal network to the outer-lying areas under the WC024 area. A rate tender for WAN infrastructure was approved to assist in shortening the municipality's turnaround time in commissioning new sites and improving current location services;
- Providing a critical support role in the Memorandum of Understanding (MOU) entered between Remgro and the municipality to provide needed communication infrastructure for the camera coverage of the Eerste River Footpaths rehabilitation project;
- The Department: ICT spent a large amount of its effort on once again reducing printing and office automation costs by participating in the newly approved National Treasury RT3-2022 contract. As a result of this contract, the municipality will continue to reduce its printer footprint and begin to centrally manage usage across printers. The many stand-alone office printers will continue to be replaced with shared departmental printers, further assisting in reducing costs;
- Successfully drafted and awarded a tender for the upgrade of the Council Chambers' audio and conferencing electronic system;
- Enhanced security levels against malware attacks and the like by implementing and successfully commissioning the supply and installation of next-generation firewalls with unified threat management and licensing;
- Implemented and successfully commissioned the network and communication network across all 4 floors of the newly acquired NPK building. This required that all data and voice communications be configured to be available and secured at all times and further enable communications from the building to the data centre for needed system / server access;
- Supported and enabled the installation of the queue management system to electronically enhance the customer interface centre, which is to be based on the ground floor of the NPK building to provide fast, effective, and efficient municipal services to citizens;
- Successfully extended the services of the municipality's e-mail protection and injection system, Mimecast, by introducing DMARC (Domain-based Message Authentication, Reporting, and Conformance), which is a standard that prevents spammers from using the municipality's domain to send email without its permission—also known as spoofing;
- Introduced and successfully rolled out security awareness training using Mimecast for all computer-enabled staff by way of guided security video clips to help harden the municipality's

security posture against malware attacks;

- The Global Information System ESRI GIS, in its 2nd year, developed a customer care module and revived the TREE APPLICATION MANAGEMENT SYSTEM (TRAMS). ESRI GIS continued with the upgrade of the BPAMS and TPAMS and began the development of incorporating the SAMRAS electronic signature to improve turnaround times in approval across all stages with the submission of plans;
- The upgrade of the backup infrastructure to accommodate and include all critical systems to ensure the sustainability of the ICT services continues to be streamlined and secured after the successful upgrade in the previous financial year;
- ICT continued streamlining and securing the Microsoft Office 365 and Windows 10 migration to improve collaboration within and between directorates by introducing added functionality within Teams and One Drive;
- Four quarterly GIS Forum meetings took place during the 2022/23 financial year; and
- Four quarterly ICT Steering Committee meetings took place during the 2022/23 financial year.

3.27 Legal Services

The Section: Legal Services, in conjunction with user departments, ensures and manages the implementation, monitoring, evaluation, and reporting of key service delivery objectives concerning Legal Services. During the year under review, 45 cases were registered at the High Court, Labour Court, and Magistrate's Court.

a) The main objectives are the following:

- Advise and manage litigations instituted by the municipality and against it;
- Provide legal advice, opinions, and input on policies, contracts, agreements, memoranda, legislation, by-laws, and regulations;
- Advising the Municipal Council, Mayco, and Portfolio Committees on items submitted to meetings;
- Ensuring by-laws are promulgated after consultation with user departments and approved by the Council; and
- Attend to new legislation and proclamations for comment as and when required.

b) Challenges:

- To deal with urgent requests for legal input to the Sections 79 and 80 committees;
- Lack of skilled administrative support for the Chief Legal Advisor; and
- Availability of a well-maintained legal library and reference resources.

The table below indicates the total number of employees in the Section: Legal Services as at 30 June 2023.

Table 212: Total number of employees in the Section: Legal Services

3.28 Municipal Court – Additional Court - Stellenbosch

The Municipal Court is responsible for the following prosecutions:

- Traffic by-laws;
- Provincial traffic by-laws;
- SAPS by-laws;
- Law enforcement by-laws;
- Fire by-laws;
- Building and Land Use Regulations, and all other by-law contraventions;
- Electrical By-laws; and
- Noise pollution.

a) Mission Statement of the Municipal Court

The Municipal Court aims to: -

- promote justice and service delivery;
- enhance revenue to invest in the community;
- "*Let Justice be seen to be done*"; and
- minimise crime and have a safer Stellenbosch.

The Municipal Court was established to:

- Support and secure good governance;
- Ease the burden on regular courts;
- Increase the speed of services;
- Allow for more successful prosecutions by applying specialist knowledge;
- Improve communications between the by-law prosecutors and enforcers;
- Support by-law enforcement;
- Ensure a user-friendly court; and
- Keeps members of the public who committed a minor crime (such as a traffic offence) away from hardened criminals.

The municipality is also looking into having an ad hoc court in Franschhoek / Klapmuts in the near future. This could be another boost for the Municipal Court's service to the community. Prosecuting some of the cases in the Paarl Magistrate's Court is also currently being considered.

The introduction of the Municipal Court has been an essential, strategic implementation that will benefit the whole community of Stellenbosch.

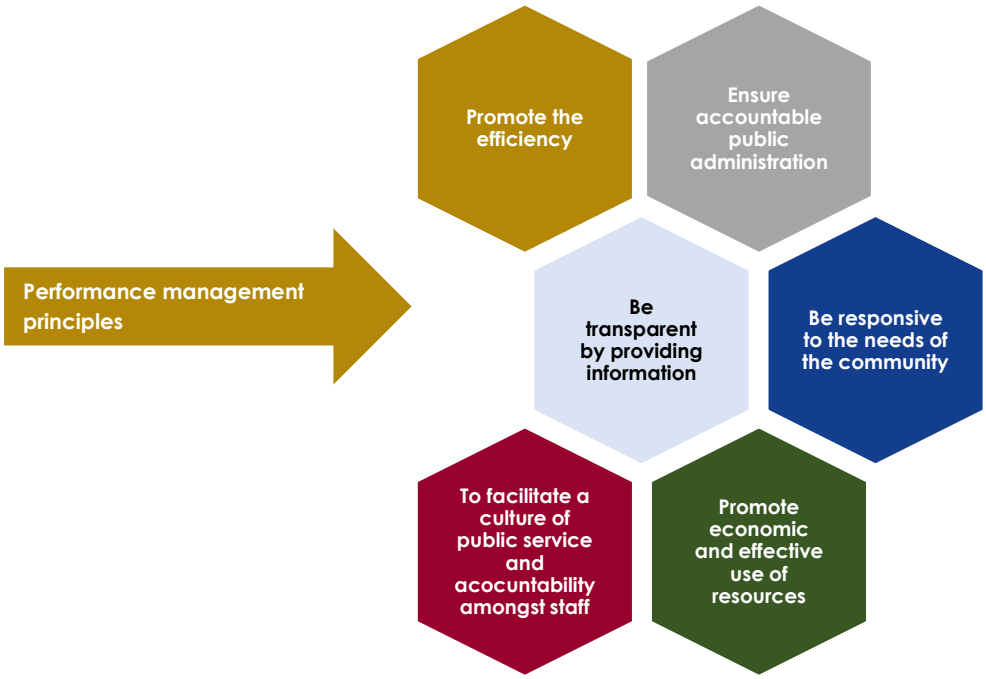
COMPONENT H: ORGANISATIONAL PERFORMANCE SCORECARD



3.29 Performance Management

Performance management is a process that measures the implementation of the organisation's strategy as captured within the IDP. It is also a management tool to plan, monitor, measure, and review performance indicators to ensure efficiency, effectiveness, and the impact of service delivery by the municipality.

At a local government level, performance management is institutionalised through the legislative requirements of the performance management process. Performance management provides the mechanism to measure whether targets are met in line with strategic goals as set by the organisation.

Section 152 of the Constitution of the Republic of South Africa, 1996, deals with the objectives of local government and paves the way for performance management. The idea of an accountable government is important to meet the needs of Stellenbosch. The democratic values and principles in terms of Section 195(1) of the Constitution are also linked with the concept of performance management, concerning the principles of the following, among others:

Figure 49: Performance Management Principles

It is a statutory requirement, according to the MSA, to establish a performance management system and an IDP that must be aligned with the municipal budget. The monitoring of the organisational performance of the budget must be done against the IDP every quarter via the Service Delivery and Budget Implementation Plan (SDBIP). The report is made public after the council has been informed of the quarterly progress against set targets.

In addition, Regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations of 2001 states that "A Municipality's Performance Management System entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting, and improvement will be conducted, organised, and managed, including determining the roles of the different role players."

Performance management is not only relevant to the organisation but also to the individuals employed in the organisation, as well as the external service providers and municipal entities. This framework, inter alia, reflects the linkage between the IDP, the Budget and the SDBIP.

3.29.1 Legislative requirements

In terms of Section 46(1)(a) of the MSA, a municipality must prepare a performance report for each financial year that reflects the municipality's and any service provider's performance during the financial year. The report must furthermore indicate the development and service delivery priorities, the performance targets set by the municipality for the following financial year, and measures that were or are to be taken to improve performance.

3.29.2 Organisational performance

A strategic performance assessment indicates how well the municipality is meeting its objectives and which policies and processes are working. All government institutions must report on strategic performance to ensure that service delivery is efficient, effective, and economical. Municipalities must develop strategic plans and allocate resources for their implementation. The implementation must be monitored on an ongoing basis, and the results must be reported to various role players during the financial year to enable them to implement corrective measures when and where required.

This report highlights the strategic performance in terms of the municipality's Top-layer Service Delivery and Budget Implementation Plan (SDBIP), high-level performance in terms of the strategic objectives of the municipality, and performance on the National Key Performance Indicators prescribed in terms of Section 43 of the MSA.

The Performance Management Policy 2021/22 is currently under review to be aligned with the new Staff Regulation 809.

3.29.3 Governance Framework for the IDP, Budget and Performance Management

The draft review of the 5th Generation IDP was tabled in March 2022 and advertised for public comment thereafter. Stellenbosch Municipal Council adopted the 5th Generation IDP (2022 / 2027) together with the 2022/23 MTREF Budget on 25 May 2022.

The IDP is the principal planning instrument that guides and informs the municipal budget. The MSA requires each municipality in South Africa to prepare a strategic plan to guide all development and management within the municipal area. The IDP sets out the development priorities of Stellenbosch Municipality over the next five years. The IDP must guide and determine municipal planning and project implementation. The 2022/23 budget was based on the IDP and other spheres of government and service providers.

The IDP is a strategic tool that guides all the activities of local government in consultation with residents and stakeholders. In keeping with the more evolved and strategic approach to this IDP, the implementation plan focuses on only the key strategic programmes, projects, and initiatives that will support the achievement of the priorities during the five-year term of office. Its focus is on development in a broader sense, and it is a structured plan that informs budget priorities, decision-making, and the allocation of resources.

The focus of the IDP is varied and includes the provision of basic municipal services, measures for building and transforming municipal capacity, measures to assist in expanded livelihood opportunities for citizens, enterprise development, building dignified and safe living environments, and, crucially, exploring new ways of working and living together. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The three-year budget sets out the revenue-raising and expenditure plan of the municipality for approval by the Council under the MFMA. The allocation of funds needs to be aligned with the priorities in the IDP.

The IDP must be reflected in the performance agreements of the relevant staff and, through the budget, in the service delivery and budget implementation plan (SDBIP). The key performance management instrument of the municipality is the SDBIP. Linked to the IDP, the SDBIP forms the basis of the performance contracts of directors and quarterly, mid-year, and annual performance reviews of senior management, directorates, and the municipality.

3.29.4 Service Delivery and Budget Implementation Plan

The organisational performance is evaluated using a municipal scorecard (Top-layer SDBIP). Performance objectives, as reflected in the municipal scorecard, are required to be practical, measurable, and based on the key performance indicators.

It also allocates responsibility to directorates to deliver the services in terms of the IDP and the budget.

The purpose of performance reporting is to report specifically on the implementation and achievement of IDP outcomes. This section should provide an overview of the achievements of a municipality in terms of the strategic intent and deliverables achieved as stated in the IDP. The Top-layer (strategic) SDBIP is the municipality's strategic plan and shows the strategic alignment between the different documents (IDP, budget, and performance agreements).

The organisational performance is evaluated using a Municipal Scorecard (TL SDBIP) at an organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators of how, where, and when the strategies, objectives, and normal business processes of the municipality are implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and Budget.

MFMA Circular No. 13 is a clarification of the Municipal Budget and Reporting Regulations, Schedule A 1, GenN 393 in GG32141 of 2009 and prescribes that the:

- IDP and Budget must be aligned;
- The Budget must address the strategic priorities;
- SDBIP should indicate what the municipality is going to do during the next 12 months; and
- SDBIP should form the basis for measuring the performance against goals set during the budget / IDP processes.

3.29.5 The municipal Scorecard (Top-layer SDBIP)

The municipal scorecard (Top-layer SDBIP) consolidates service delivery targets set by the Council as advised by senior management and provides an overall picture of the performance of the municipality, reflecting performance in its strategic priorities for the 2022/23 financial year. The scorecard is the performance evaluation tool and is used during informal and formal performance reviews.

Components of the Top-layer SDBIP include:

A one-year detailed plan with the following components:

- Monthly projections of revenue to be collected from each source;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Ward information for expenditure and service delivery; and
- A detailed capital works plan broken down by ward over three years.

Top-layer KPIs were prepared based on the following:

- Key performance indicators (KPIs) for the programmes / activities identified to address the strategic objectives as documented in the IDP in cooperation with the community, which identify developmental priorities;
- KPIs identified during the IDP and KPIs that need to be reported to key municipal stakeholders; and
- KPIs to address the required national minimum reporting requirements.

3.29.6 Amendment of the Top-layer SDBIP

The TL SDBIP 2022/23 was reviewed once during the financial year under review and submitted to the Council for approval on 22 June 2022 and revised on 30 January 2023.

The municipality utilises an electronic web-based, real-time performance-based system on which KPI owners update actual performance monthly. KPI owners report on the results of the KPI by documenting the following information on the performance system:

- The actual result in terms of the target set;
- A performance comment; and
- Actions to improve performance include the submission of corrective measures to meet the set target for the reporting interval in question if the target is not achieved.

It is the responsibility of every KPI owner to maintain a portfolio of evidence to support actual performance results updated and provide it to the internal auditor and AGSA upon request during the quarterly and annual audit testing.

3.29.7 Monitoring of the Service Delivery and Budget Implementation Plan (SDBIP)

Municipal performance is measured as follows:

In terms of section 72(1)(a) of the MFMA:

- The accounting officer must, by 25 January of each year, assess the performance of the municipality during the first half of the financial year;
- A report on such an assessment must, in terms of Section 72(1)(b) of the MFMA, be submitted to the Mayor, Provincial and National Treasury; and
- Once the Mayor has considered the report, it must be submitted to the Council by 31 January in terms of Section 54 of the MFMA.

Quarterly assessment i.t.o. Section 52(d) of the MFMA:-

Assess the performance of the municipality during the first half of the financial year.

The Executive Mayor, who must provide general political guidance over the fiscal and financial affairs of the municipality, is required by Section 52(d) of the MFMA to submit a report on the implementation of the budget and the financial situation of the municipality to the Council within 30 days after the end of each quarter.

The actual performance was audited by the Department: Internal Audit (IA), and the results of their findings were submitted to the APAC:

- Quarter 1 (July to September);
- Quarter 2 (October to December);
- Quarter 3 (January to March); and
- Quarter 4 (April to June).

Other municipal personnel

The municipality has implemented individual performance management for employees at the three highest levels of management.

Municipal Manager and Managers Directly Accountable to the Municipal Manager

The MSA prescribes that the municipality must enter into performance-based agreements with the municipal manager and managers directly reporting to the municipal manager, i.e., MSA Section 56 managers. Performance agreements must be reviewed annually and published in the public interest. This process and the format are further regulated by Regulation 805 (August 2006), MSA.

The revised (latest) performance plans for the municipal manager and MSA Section 56 appointments for the 2022/23 financial year were signed on 02 March 2023 as prescribed. They include performance agreements for the:

- Municipal Manager;
- Chief Financial Officer;
- Director: Corporate Services;
- Director: Planning and Local Economic Development;
- Director: Community and Protection Services; and
- Director: Infrastructure Services.

Table 216: Performance Management Governance

	Performance Management Policy	All MSA s57/56 Performance contracts signed	Audit Committee	Municipal Public Accounts Committee (MPAC)	Quarterly Performance Reporting to the Council	Annual Performance Reporting to the Council
In place?	√	√	√	√	√	√

In the paragraphs below, the performance achieved is illustrated against the Top-layer SDBIP according to the IDP strategic objectives. The following table explains the method by which the overall assessment of actual performance against targets set for the key performance indicators (KPIs) of the SDBIP is measured:

Table 217: Performance Assessment Criteria

Colour	Category	Explanation
	KPI Not Yet Measured	KPIs with no targets or actual results for the selected period
	KPI Not Met	Actual vs. target less than 75%
	KPI Almost Met	Actual vs. target between 75% and 100%
	KPI Met	Actual vs. target 100% achieved
	KPI Well Met	Actual vs. target more than 100% and less than 150% achieved
	KPI Extremely Well Met	Actual vs. target of more than 150% achieved

The TL SDBIP (the Municipal Scorecard) consolidates service delivery targets set by the Council / Senior Management and provides an overall picture of performance for the municipality, reflecting performance on its strategic priorities.

3.29.8 Overall Performance per Municipal Strategic Focus Area

The following table illustrates the municipality's overall performance per Municipal Strategic Focus Area (SFA). The Annual Performance Report 2022/23 was submitted to the Stellenbosch Municipal Council as well as the AGSA in terms of the MSA, Sections 46(1) and (2).

The graph and table below give a clear indication of what was reported to the Council on the municipality's performance in terms of the five (5) National Government's Key Performance Areas for local government, which are (1) Basic Service Delivery; (2) Local Economic Development; (3) Municipal Institutional Transformation and Development; (4) Municipal Financial Viability and Management; and (5) Good Governance and Public Participation.

Graph 15: Percentage of performance summary per SFA

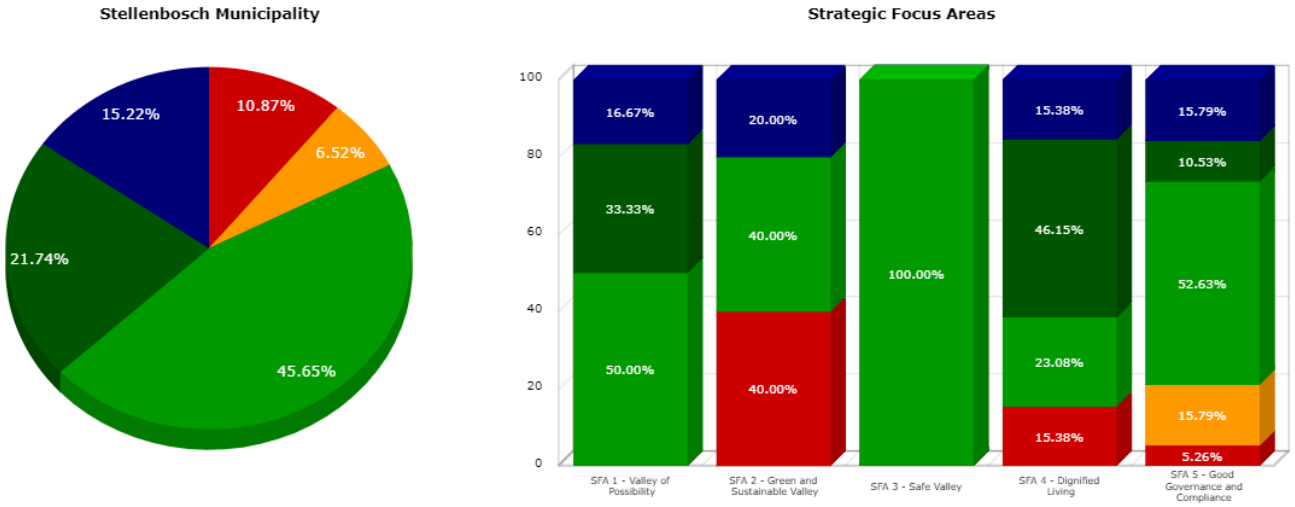


Table 218: Performance summary per Municipal Strategic Focus Area (SFA)

Stellenbosch Municipality		Municipal Strategic Focus Areas (SFAs)				
		SFA 1 - Valley of Possibility	SFA 2 - Green and Sustainable Valley	SFA 3 - Safe Valley	SFA 4 - Dignified Living	SFA 5 - Good Governance and Compliance

CHAPTER 4: ORGANISATIONAL DEVELOPMENT PERFORMANCE

4.1 Introduction to the Municipal Workforce

Stellenbosch Municipality, as of 30 June 2023, employed **1 147** officials (excluding councillors and non-permanent positions) who individually and collectively contributed to the achievement of the municipality's objectives. The primary objective of Human Resource Management is to render an innovative HR service that addresses both skills development and an administrative function.

4.2 Employment Equity

The Employment Equity Act (1998), Chapter 3, Section 15(1), states that affirmative action measures are measures designed to ensure that suitably qualified people from designated groups have equal employment opportunities and are equitably represented in all occupational categories and levels in the workforce of a designated employer. The national performance indicator also refers to the "number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan". The following table provides clarity on the employment equity status.

Table 219: EE Targets / Actual by Racial Classification

Financial Year	African			Coloured			Indian			White		
	Target June	Actual June	Target reached	Target June	Actual June	Target reached	Target June	Actual June	Target reached	Target June	Actual June	Target reached

Non-permanent employees (incl. EPWP, conditional grants, and provincial grants)	16	22	0	1	25	31	0	0	**95**
Grand total	**266**	**471**	**4**	**51**	**181**	**271**	**1**	**42**	**1 287**

4.5 Vacancy Rate

The approved organogram for the municipality had **1 120 (funded)** posts based on the 2017/18 financial year. On 01 July 2018, the approved organogram of 25 October 2017 was implemented, which brought about a total post compliment of **1 873** posts and was further reviewed and revised with another **123** posts, which made the total post compliment **1 996** posts on 27 February 2019. The actual positions filled in the 2022/23 financial year are indicated in the tables below by post-level and functional level.

A total of **142** posts were vacant and funded at the end of 2022/23, resulting in a vacancy rate of **11%.**

The table below indicates the vacancies within the municipality:

Table 223: Vacancy rate per post and functional level

Per Post Level		
Post Level	**Filled**	**Vacant**
Top Management (MM and MSA section 57 Managers)	6	0
Senior Management	14	0
Middle management	85	11
Skilled technical and academically qualified workers, junior management, supervisors, foremen and superintendents	359	65
Semi-skilled	411	44
Unskilled and defined decision-making	272	22
Total	**1 147**	**142**
Per Functional Level		
Functional area	**Filled**	**Vacant**
Office of the Mayor	45	0
Office of the Municipal Manager	16	0
Financial Services	126	10
Planning and Economic Development	83	15
Corporate	73	11
Community and Protection Services	392	32
Infrastructure Services	457	74
Total	**1 192**	**142**

4.6 Turnover rate

A high turnover rate may be costly to a municipality and might negatively affect productivity, service delivery, and institutional memory / organisational knowledge. Below is a table that shows the turnover rate in the municipality.

The table below indicates the turnover rate over the last four financial years.

Table 224: Turn-over Rate

Financial year	Total no appointments at the end of each Financial Year	New appointments	Number of terminations during the year	Turn-over Rate
2018/19	1 121	55	39	3.47%
2019/20	1 158	60	51	4.40%
2020/21	1 142	48	61	5.34%
2021/22	1 140	82	82	7.19%
2022/23	1137	96 (incl promotion)	71	62

4.7 Managing the Municipal Workforce

Managing the municipal workforce refers to analysing and coordinating employee behaviour.

An occupational injury is a personal injury, disease, or death resulting from an occupational accident. Compensation claims for such occupational injuries are calculated according to the seriousness of the injury / disease and can be costly to a municipality. An occupational injury will influence the loss of man-hours and, therefore, financial and productivity performance.

Table 225: Injuries per Directorate

Directorates	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23
Office of the Municipal Manager	1	1	0	0	0	0	0
Financial Services	3	0	0	2	4	0	0
Planning and Economic Development Services	0	3	3	2	10	12	10
Corporate Services	1	1	1	7	9	5	7
Community and Protection Services	54	73	49	36	21	35	64
Infrastructure Services	64	42	32	42	77	57	69
Total	**130**	**125**	**86**	**92**	**121**	**109**	**150**

Injuries in operational services are normally higher due to the nature of work and the constant handling of equipment and machinery.

4.8 Sick Leave

The number of sick days taken by employees has an impact on costs and service delivery. The monitoring of sick leave identifies certain patterns or trends. Once patterns of concern are identified, corrective actions are taken.

The total number of employees that have taken sick leave during the 2022/23 financial year shows a decrease of **1096.71** working days when compared to the 2021/22 financial year.

The table below indicates the total number of sick leave days taken within the different directorates.

Table 226: Table 185: Sick Leave as at 30 June 2023

Directorate	2021/22	2021/22 (%)	2022/23	2022/23 (%)
Office of the Municipal Manager	129	30.23	83	19.45
Financial Services	812	26.25	667	21.75
Planning and Economic Development	436	20.19	449	21.59
Corporate Services	572.44	28.62	480.79	25.76
Community and Protection Services	2 386	23.12	1 915.93	19.21
Infrastructure Services	2 538.5	20.69	2 181.51	19.20
Total	**6 873.94**	**22.71**	**5 777.23**	**21.16**

4.9 Human Resources Policies and Plans

Policies and plans guide fair and consistent staff treatment and a consistent approach to the management of staff.

The table below shows the status of the Human Resources policies and plans:

Table 227: Approved Policies for the year under review

Name of policy	Date approved / revised
Employment Equity Policy	23 November 2022
Work From Home Policy	26 July 2023

Table 228: Policies still to be developed

Policies still to be developed	
Name of policy	**Proposed date of approval**
HIV / Aids Policy (review)	In the 2023/24 financial year
Incapacity due to ill health / Injury Policy	In the 2023/24 financial year
Sexual Harassment Policy	In the 2023/24 financial year

The Department: Human Resources Management submits policies to the Local Labour Forum regularly for review purposes.

4.10 Capacity Building of the Municipal Workforce

The Skills Development Act, 1998 (Act No. 97 of 1998) and the MSA require that employers supply employees with the necessary training to develop their human resource capacity. Section 55(1)(f) states that, as head of administration, the Municipal Manager is responsible for the management, utilisation, and training of staff.

4.11 Skills Matrix

The table below indicates the number of employees who received training in the year under review.

Table 229: Number of employees that received training

Management level	Gender	Number of employees identified for training at the start of the year	Number of employees that received training
MM and S57	Female	0	0
	Male	0	1
Legislators, senior officials, and managers	Female	8	4
	Male	9	8
Professionals	Female	1	5
	Male	2	6
Associate professionals and Technicians	Female	16	8
	Male	33	7
Community and Personal Services	Female	0	0
	Male	0	0
Clerks	Female	24	10
	Male	4	4
Service and sales workers	Female	43	30
	Male	81	53
Skilled, Agricultural, Fishery, Craft and Related Trades Workers	Female	11	7
	Male	51	35
Plant and machine operators and assemblers	Female	0	0
	Male	26	14
Elementary occupations	Female	28	7

Management level	Gender	Number of employees identified for training at the start of the year	Number of employees that received training
	Male	178	70
Sub-total	**Female**	**131**	**71**
	Male	**384**	**198**
Total		**515**	**269**

4.12 Skills Development – Training Provided and Budget Allocation

The table below indicates that a total of **R4 805 444** was spent on the workplace skills plan. This represents **0.82%** when compared to the total salary budget of the municipality in the 2022/23 financial year.

Municipalities are required, in terms of the Skills Development Act, to spend at least 1% of their salary budget on their workplace skills plan.

Table 230: Budget allocated and spent for skills development

Year	Total personnel budget	Total Allocated	Total Spend	% Spent
	R	R	R	
2020/21	R 532 497 021	R 532 497 021	R 3 300 217	0.62%
2021/22	R 598 305 199	R 5 838 508	R 3 267 622	0.55%
2022/23	R 588 075 877	R 4 500 000	R 4 805 444	0.82%

4.13 Managing the Municipal Workforce Expenditure

4.13.1 Personnel Expenditure

The percentage of personnel expenditure is essential in the budgeting process as it reflects current and future efficiency. The table below indicates the percentage of the municipal budget that was spent on salaries and allowances for the past five financial years, and the municipality is well below the national norm of between 35 to 40%.

Table 231: Personnel Expenditure as % of Total Operating Expenditure

Financial year	Total expenditure salary and allowances	Total operating expenditure	Percentage
	R		%
2017/18	407 801	1 307 335	31%
2018/19	444 711	1 508 629	29%
2019/20	481 583	1 661 441	29%
2020/21	544 391	1 809 977	30%
2021/22	550 719	1 925 898	29%
2022/23	542 779	1 947 880	28%

Below is a summary of Councillor and staff benefits for the year under review.

Table 232: Councillor and staff benefits

Financial year	2021/22	2022/23		2022/23
Description	Actual	Original Budget	Adjusted Budget	Actual
	R'000			
Councillors (Political Office Bearers Plus Other)

CHAPTER 5: FINANCIAL PERFORMANCE

COMPONENT A: STATEMENTS OF FINANCIAL PERFORMANCE

The Statement of Financial Performance provides an overview of the financial performance of the municipality and focuses on the financial health of the municipality.

5.1 Financial Summary

The table below indicates a summary of the financial performance for the 2022/23 financial year.

Table 233: Financial Performance

Description	2021/22	2022/23			2022/23 Variance

In this table, operational income is offset against operational expenditure leaving a net operational expenditure total for each service. Variances are calculated by dividing the difference between the actual and original / adjustments budget by the budget.						

5.5 Financial Performance Per Municipal Function

The tables below indicate the financial performance per municipal function for the 2022/23 financial year.

5.5.1 Water Services

Table 238: Financial Performance: Water Services

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(159 914)	-181 107	-186 866	-174 277	7%
Expenditure:					
Employees	35 941	36 962	33 962	30 863	9%
Repairs and Maintenance	2 842	7 411	6 211	5 541	11%
Other	97 105	89 577	106 223	123 556	-16%
Total Operational Expenditure	**135 888**	133 949	146 396	159 960	-9%
Net Operational (Service)	**(24 026)**	**-47 158**	**-40 470**	**-14 317**	**-3%**
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.2 Sanitation Services

Table 239: Financial Performance: Sanitation Services

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(142 904)	-149 836	-151 151	-149 402	1%
Expenditure:					
Employees	39 179	46 980	42 980	39 837	7%
Repairs and Maintenance	12 162	8 325	9 525	6 219	35%
Other	84 874	123 330	106 746	97 368	9%
Total Operational Expenditure	**136 215**	178 634	159 251	143 425	10%
Net Operational (Service)	**(6 689)**	**28 797**	**8 100**	**-5 977**	**174%**
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.3 Electricity Services

Table 240: Financial Performance: Electricity Services

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(794 640)	-919 816	-896 140	-850 173	5%
Expenditure:					
Employees	30486	32 234	32 234	33 196	-3%
Repairs and Maintenance	5552	10 995	9 757	8 881	9%
Other	591071	628 724	617 948	808 953	-31%
Total Operational Expenditure	**627 110**	671 953	659 940	851 029	-29%
Net Operational (Service)	**(167 530)**	**-247 862**	**-236 200**	**856**	**100%**
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.4 Waste Management Services (Refuse collections, Waste disposal and Recycling)

Table 241: Financial Performance: Waste Management Services (Refuse Collections, Waste Disposal, and Recycling)

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(119 478)	-133 289	-134 256	-130 709	3%
Expenditure:					
Employees	26 551	34 283	34 283	32 039	7%
Repairs and Maintenance	4 294	3 751	5 192	4 732	9%
Other	100 344	94 489	103 198	80 817	22%
Total Operational Expenditure	**131 189**	132 524	142 674	117 588	18%
Net Operational (Service)	**11 711**	**-765**	**8 418**	**-13 121**	**256%**
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.5 Integrated Human Development

Table 242: Financial Performance: Integrated Human Settlement Personnel Expenditure

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(23 185)	-12 136	-11 061	-20 609	-86%
Expenditure:					
Employees	17 495	21 886	20 886	18 089	13%
Repairs and Maintenance	916	493	587	-76	113%
Other	4 733	9 593	12 209	375	97%
Total Operational Expenditure	23 144	31 972	33 682	18 389	45%
Net Operational (Service)	**-41**	**19 836**	**22 622**	**-2 221**	**110%**
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.6 Roads and Stormwater

Table 243: Financial Performance: Roads and Stormwater

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget
	R'000				%
Total Operational Revenue	(59 638)	-545	-4 295	-9 321	-117%
Expenditure:					
Employees	32 029	34 989	34 989	33 109	5%
Repairs and Maintenance	18 875	18 731	16 306	16 114	1%
Other	57 881	61 595	63 893	-40 495	163%
Total Operational Expenditure	108 786	115 315	115 188	8 728	92%
Net Operational (Service)	**49 148**	**114 771**	**110 893**	**-593**	**101%**
Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.5.7 Town and Spatial Planning

Table 244: Financial Performance: Town and Spatial Planning

Description	2021/22	2022/23			
	Actual (Audited Outcome)	Original Budget	Adjustment Budget	Actual	Variance to Budget

Variances are calculated by dividing the difference between the actual and original budget by the actual.					

5.6 Grants

5.6.1 Grant Performance

The municipality had a total amount of **R225 million** for operational expenditure available that was received in the form of grants from the national and provincial governments during the 2022/23 financial year. The performance in the spending of these grants is summarised as follows:

Table 261: Grant Performance

Description	2021/22	2022/23			2022/23 Variance	
	Actual	Budget	Adjustment Budget	Actual	Original Budget	Adjustment Budget

5.6.2 Level of Reliance on Grants and Subsidies

Table 262: Reliance on Grants

Financial year	Total grants and subsidies received	Total Operating Revenue	Percentage
	R'000		%
2016/17	227 752	1 534 354	14.84
2017/18	211 190	1 609 728	13.12
2018/19	233 433	1 541 685	15.14
2019/20	285 026	1 742 596	16.36
2020/21	264 637	1 805 680	14.66
2021/22	289 061	2 028 289	14.25
2022/23	317 123	2 201 123	14.41

Developers' contributions have been excluded from the grant item to express only allocations and not policy-related revenue, which NT allocates to capital revenue. It would distort the reliance on grant calculation if excluded from the above ratio.

5.7 Asset Management

Asset management is practised within the organisation based on a comprehensive Asset Management Policy. The Asset Management Policy provides direction for the management, accounting, and control of property, plant, and equipment (assets) owned or controlled by the municipality to ensure the following:

- Implementation of the approved Asset Management Policy as required in terms of section 63 of MFMA;
- Verify assets in the possession of the Council annually, during the financial year;
- Keep a complete and balanced record of all assets in the possession of the Council;
- Report in writing all asset losses, where applicable, to the Council; and
- Those assets are valued and accounted for under a statement of GRAP.

CHAPTER 6: AUDITOR GENERAL OF SOUTH AFRICA AUDIT FINDINGS

6.1 Introduction

This chapter provides allowances details on the audit outcomes for the past two financial years with the corrective steps implemented.

COMPONENT A: AUDITOR-GENERAL OF SOUTH AFRICA OPINION 2021/22

6.2 Auditor General of South Africa Report 2021/22

Table 277: Auditor General of South Africa Report 2020/21

2021/22	
Audit Report Status:	**Finalised (unqualified with no findings)**
2021/22	
Issue raised	**Corrective step implemented**
Emphasis of matter:	
Restatement of corresponding figures	
As disclosed in note 63 to the financial statements, the corresponding figures for 30 June 2021 were restated as a result of errors in the financial statements of the municipality at, and for the year ended, 30 June 2022.	None required
Material Impairments	
As disclosed in note 5 to the financial statements, the municipality provided for the impairment of receivables from exchange transactions of R204,3 million (2020/21: R167,1 million).	None required
As disclosed in note 6 to the financial statements, the municipality provided for the impairment of receivables from non-exchange transactions of R187,6 million (2020/21: R173,2 million).	None required
Material losses	
None	
Material Non-Compliance	
None	
Annual financial statements	
I have audited the financial statements of the Stellenbosch Municipality set out on pages 7 to 131, which comprise the statement of financial position as at 30 June 2022, the statement of financial performance, the statement of changes in net assets, the cash flow statement, and the statement of comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.	None required
In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2022 and its financial performance and cash flows for the year ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 9 of 2021 (Dora).	None required

COMPONENT B: AUDITOR-GENERAL OPINION 2022/23

6.3 Auditor General of South Africa Report 2022/23

Table 278: Auditor General of South Africa Report 2021/22

2022/23	
Audit Report Status:	**Finalised (unqualified with no findings)**
2022/23	
Issue raised	**Corrective step implemented**
Emphasis of matter:	
Restatement of corresponding figures	
As disclosed in note 64 to the financial statements, the corresponding figures for 30 June 2022 were restated as a result of errors in the financial statements of the municipality, and for the year ended 30 June 2023.	None required
Material Impairments	
As disclosed in note 5 to the financial statements, the municipality provided for the impairment of trade and other receivables from exchange transactions of R238,8 million (2021/22: R204,3 million).	None required
As disclosed in note 6 to the financial statements, the municipality provided for the impairment of trade and other receivables from non-exchange transactions of R230,1 million (2021/22: R187,6 million).	None required
Material losses	
None	
Material Non-Compliance	
None	
Annual financial statements	
I have audited the financial statements of the Stellenbosch Municipality set out on pages 6 to 130, which comprise the statement of financial position as at 30 June 2023, statement of financial performance, statement of changes in net assets, cash flow statement, and statement of comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.	None required
In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2023, and its financial performance and cash flows for the year ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 5 of 2022 (Dora).	None required

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Stellenbosch Municipality

Annual Financial Statements for the year ended 30 June 2023

Accounting Officer's Responsibiities and Approval

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the Accounting Officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements were prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) as well as relevant interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I, as the Accounting Officer acknowledges that I am ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable me to meet these responsibilities, I have set standards for internal control aimed at reducing the risk of error or deficit in a cost-effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

I am of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

Although, I am primarily responsible for the financial affairs of the municipality, this is supported by the municipality's external auditors.

I would like to bring the following material matters to your attention:

I certify that the salaries, allowances and benefits of councillors as disclosed in note 36 to these annual financial statements are within the upper limits of the framework envisaged in section 219 of the Constitution of the Republic of South Africa, read with the Remuneration of Public Office Bearers Act, Act 20 of 1998 and the Minister of Provincial and Local Government's determination in accordance with the Act.

The external auditors, being the Auditor-General of South Africa (AGSA), are responsible for independently reviewing and reporting on the municipality's annual financial statements.

The annual financial statements set out in terms of Section 126(1) of the Municipal Finance Management Act (Act 56 of 2003), which have been prepared on the going concern basis, I have signed on behalf of the municipality on 31 August 2023:

Accounting Officer
Geraldine Mettler

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

The annual financial statements of Stellenbosch Municipality for the year ended 30 June 2023 were authorised for issue by the Accounting Officer on 31 August 2023.

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives, issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

The annual financial statements have been prepared in accordance with the Finance Management Act (MFMA) and effective Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal FinanceManagement Act, (Act No 56 of 2003)

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5.

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

1. Summary of significant accounting policies

1.1 Going concern assumption

These annual financial statements were prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.2 Housing development reserve

The Housing Development Fund was established in terms of the Housing Act, (Act No. 107 of 1997). Loans from national and provincial government used to finance housing selling schemes undertaken by the municipality were extinguished on 1 April 1998 and transferred to a Housing Development Fund. Housing selling schemes, both complete and in progress as at 1 April 1998, were also transferred to the Housing Development Fund. In terms of the Housing Act, all proceeds from housing developments, which include rental income and sales of houses, must be paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund can be used only to finance housing developments within the municipal area subject to the approval of the Provincial MEC responsible for housing.

1.3 Capital replacement reserve (CRR)

In order to finance the acquisition of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of the Annual Budget. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

1.4 Self-insurance reserve

The municipality has a Self-insurance reserve to set aside amounts to offset potential losses or claims that cannot be insured externally. The balance of the self-insurance fund is invested in short-term investments. Claims are settled by transferring a corresponding amount from the self-insurance reserve to the accumulated surplus.

1.5 Accumulated surplus

The accumulated surplus/deficit represent the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited/debited against accumulated surplus/deficit. Prior year adjustments, relating to income and expenditure, are debited/credited against accumulated surplus when retrospective adjustments are made.

1.6 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.6 Materiality (continued)

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.7 Significant judgements and estimates

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are insignificant to the annual financial statements are set out below:

Sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.t

Revenue recognition

Accounting Policy 1.23.1 on Revenue from Exchange Transactions and Accounting Policy 1.23.2 on Revenue from Non-exchange Transactions describes the conditions under which revenue will be recorded by the management of the municipality

In concluding judgement, management considered the detailed criteria for recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and, in particular, whether the municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate

The IGRAP 1 amendments did not have any impact on Traffic Fines revenue issued in terms of the current Criminal Proceedings Act system but will only have an effect on fines issued in terms of the Amended Act (AARTO) that is expected to become effective on 1 July 2021. As the legislation is new, the possible impact cannot at this stage be determined. The legislation itself will significantly increase Traffic Fines revenue based on higher fine amounts being pronounced in Schedule 3 of the Amendment Act.

The iGRAP 20 interpretation is not regarded as having an effect, as the principles of revising revenue (e.g., incorrect tariff or appeal) is already applied by the municipality.

Impairment of financial assets

Accounting Policy 1.13 Financial Instruments, referring to the paragraph on impairment of financial assets, describes the process followed to determine the value with which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in GRAP 104: Financial Instruments - Recognition and Measurement. The management of the municipality is satisfied that impairment of financial assets recorded during the year is appropriate. Details of the impairment loss calculation are provided in the applicable notes to the annual financial statements.

Useful lives of assets

As described in Accounting Policy 1.10 and 1.11 the municipality depreciates its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful life, which is determined when the assets are brought into use. The review of useful life and residual values of assets are only reviewed if one of the indicators of potential review is triggered.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.7 Significant judgements and estimates (continued)

Employee benefit obligation

The municipality obtains actuarial valuations of its employee benefit obligations. The employee benefit obligations of the municipality that were identified are post-retirement health benefit obligations and long-service awards. The estimated liabilities are recorded in accordance with the requirements of GRAP 25. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in the applicable notes to the annual financial statements.

The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Impairment of non-financial assets

The recoverable amounts of cashgenerating units have been determined based on the higher of valueinuse calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The recoverable amounts of individual assets have been determined based on the higher of valueinuse calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

It is reasonably possible that the assumptions may change which may then impact our estimations and may then require a material adjustment to the carrying value of tangible assets.

Value in use of cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including economic factors such as inflation and interest

Value in use of non-cash generating assets

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that the impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

Allowance for slow moving, damaged and obsolete stock

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 22 - Provisions.

A qualified environmental engineer calculates the provision. The provision represents the best estimate or net present valueof the expected future cash flows to rehabilitate the landfill site at yearend. The professional engineer determines the cost of rehabilitation and the remaining useful life of each site. Interest rates linked to prime were used to calculate the effect of the time value of money.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

1.7 Significant judgements and estimates (continued)

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

Impairment of statutory receivables

If there is an indication that a statutory receivable, may be impaired, the municipality measures the impairment loss. The impairment loss is measured as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, are reduced, either directly or through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

In estimating the future cash flows, the municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable, or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable are revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows

Pre-paid electricity

Pre-paid electricity is only recognised as income once the electricity is consumed. The pre-paid electricity balance (included under payables) represents the best estimate of electricity sold at year-end, which is still unused.

1.8 Biological assets that form part of an agricultural activity

The municipality recognises biological assets that form part of an agricultural activity or agricultural produce when and only when:

- the municipality controls the asset as a result of past events;
- it is probable that future economic benefits or service potential associated with the asset will flow to the municipality; and
- the fair value or cost of the asset can be measured reliably

Biological assets that form part of an agricultural activity are measured at their fair value less costs to sell.

A gain or loss arising on initial recognition of biological assets that form part of an agricultural activity or agricultural produce at fair value less costs to sell and from a change in fair value less costs to sell of a biological assets that form part of an agricultural activity, is included in surplus or deficit for the period in which it arises.

Where market determined prices or values are not available, the present value of the expected net cash inflows from the asset, discounted at a current market-determined pre-tax rate where applicable, is used to determine fair value.t

Where fair value cannot be measured reliably, biological assets are measured at cost less any accumulated depreciation and any accumulated impairment losses.

The municipality classifies biological assets as consumables which consist of timber in the form of pine trees. All biological assets are held for sale.

Agricultural produce harvested from an entity's biological assets shall be measured at its fair value less costs to sell at the point of harvest. Such measurement is the cost at that date when applying GRAP 12 or another applicable Standard of GRAP.

Item	Useful life
Trees in plantation forest	indefinite

1.9 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services; or for
- Administrative purposes, or
- Sale in ordinary course of operations.

AUDITOR-GENERAL SOUTH AFRICA

Accounting Policies

1.9 Investment property (continued)

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that is associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Subsequent measurement – cost model

Investment property is, subsequent to initial measurement, carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property-Land	indefinite
Property-buildings	30-99 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 10).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 10).

When classification is difficult, the criteria used to distinguish investment property from owner -occupied property and from property held for sale in the ordinary course of operations, are as follows:

All properties held to earn market-related rentals or for capital appreciation or both and that are not used for administrative purposes, and that will not be sold within the next 12 months are classified as Investment Properties

A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases

Transfers to, or from, investment property shall be made when, and only when, there is a change in use, evidenced by:

(a) commencement of owner-occupation, for a transfer from investment property to owner-occupied property;

(b) commencement of development with a view to sale, for a transfer from investment property to inventories;

(c)end of owner-occupation, for a transfer from owner-occupied property to investment property; or

(d) commencement of an operating lease (on a commercial basis) to another party, for a transfer from inventories to investment property.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.10 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period. The municipality elected the cost model for Property, plant and equipment.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if

- if it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and
- the cost or fair value of the item can be measured reliably.

Initial recognition and measurement

Property, plant and equipment are initially recognised at cost on its acquisition date. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it’s deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components} of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and standby equipment which are expected to be used for more than one period are included in property,plant and equipment. In addition, spare parts and standby equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.Subsequent to initial measurement property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Incomplete construction work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is available for use

Impairment

Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable service amount, it is written down immediately to its recoverable service amount and an impairment loss is charged to the statement of financial performance.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.10 Property, plant and equipment (continued)

Depreciation

Property, plant and equipment are depreciated on the straightline basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Land	Straight-line	indefinite
Machinery and equipment	Straight-line	1-66
Furniture and office equipment	Straight-line	2-24
Transport assets	Straight-line	4-21
Computer equipment	Straight-line	5-23
Community assets	Straight-line	4-50
Other property, plant and equipment	Straight-line	6-99
Capital restoration asset	Straight-line	5-30
Electrical infrastructure	Straight-line	10-100
Water supply infrastructure	Straight-line	10-100
Solid waste infrastructure	Straight-line	10-50
Roads infrastructure	Straight-line	10-100
Information and communication infrastructure	Straight-line	3-15
Waste water network	Straight-line	10-100
Stormwater infrastructure	Straight-line	10-50

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 11).

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.11 Intangible assets

Initial recognition and measurement

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations. A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be neasured reliably

The municipality assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern. Such changes shall be accounted for as changes in accounting estimates in accordance with GRAP 3.

Subsequent measurement

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated goodwill, brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

If the expected useful life of the asset is different from previous estimates, the amortisation period shall be changed accordingly. If there has been a change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the amortisation method shall be changed to reflect the changed pattern. Such changes shall be accounted for as changes in accounting estimates in accordance with GRAP 3.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Depreciation method	Average useful life
Internally generated: Capital development	Straight-line	5 - 7 years
Computer software	Straight-line	3 - 30 years
Service operating and land rights	Straight-line	5 - 30 years

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.11 Intangible assets (continued)

Derecognition

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset shall be included in surplus or deficit when the asset is derecognised.

1.12 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Initial recognition and measurement

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

Where the municipality holds a heritage asset, but on initial recognition it does not meet the recognition criteria because it cannot be reliably measured, information on such a heritage asset is disclosed in note 14 Heritage assets.

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

Subsequent to initial measurement classes of heritage assets are carried at cost less any accumulated impairment losses.

Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Reference to impairment paragraphs can be made to note 1.17, 1.18 and 1.19.

Compensation from third parties for heritage assets that have been impaired, lost or given up, shall be included in surplus or deficit when the compensation becomes receivable.

Dererecognition

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

Transfers

Transfers from heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage assets are only made when the asset meets the definition of a heritage asset.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.13 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity. Financial instruments are classified into three categories namely, financial instruments at fair value, financial instruments at amortised cost or financial instruments at cost. The municipality determines the classification of its financial instruments at initial recognition.

1.13.1 Classification of financial instruments

Financial assets

A financial asset is any asset that is a cash or contractual right to receive cash. In accordance with GRAP 104 the Financial Assets of the municipality are classified as follows into the three categories allowed by this standard:

Financial asset at amortised cost being a non-derivative financial asset with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current assets.

Financial assets measured at fair value being financial assets that meet either of the following conditions:

- Derivatives;
- Combined instruments that are designated at fair value;
- Instruments held for trading;
- Non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; or
- Financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Financial assets measured at cost being investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

The municipality has the following types of financial assets as reflected on the face of the Statement of financial position or in the notes thereto:

Type of financial asset	Classification in terms of GRAP 104
Long-term receivables	Financial assets at amortised cost
Consumer debtors	Financial assets at amortised cost
Other debtors	Financial assets at amortised cost
Short-term investment deposit - Call	Financial assets at amortised cost
Bank balances and cash	Financial assets at amortised cost

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the Cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets at amortised cost.

Financial liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity.

The following main categories of financial liabilities and the classification determining how they are measured exist:

- Financial liabilities measured at amortised cost; or
- Financial liabilities measured at fair value.

The municipality has the following types of financial liabilities as reflected on the face of the Statement of financial position or in the notes thereto:

Type of financial liability	Classification in terms of GRAP 104
Long-term liabilities	Financial liability at amortised cost
Current portion of long-term liabilities	Financial liability at amortised cost
Other creditors	Financial liability at amortised cost

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.13 Financial instruments (continued)

1.13.2 Initial and subsequent measurement

Initial recognition and measurement

A financial instruments is recognised, when the municipality becomes a party to the contractual provisions of the instrument, and are initially measured at fair value. In the case of a financial instruments not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial instruments are added or deducted from the fair value, as appropriate on initial recognition.

Subsequent measurement – Financial assets

Financial assets consist of cash and cash equivalents, deposits, receivables and investments.

Receivables are subsequently measured at amortised cost using the effective interest rate method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate.

A provision for impairment of receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. Changes in the carrying amount of the provision is recognised in the Statement of financial performance. When a receivable is considered uncollectible, it is written off against the provision. Any gains or losses arising from the change in fair value of investments measured at fair value are recognised in the Statement of financial performance.

Trade and other receivables (excluding Value Added Taxation, prepayments and operating lease receivables), loans to municipal entities and loans that have fixed and determinable payments that are not quoted in an active market are classified as financial assets at amortised cost.

Financial assets measured at fair value are initially measured at fair value plus directly attributable transaction costs. They are subsequently measured at fair value with unrealised gains or losses recognised directly in equity until the investment is derecognised, at which time the cumulative gain or loss recorded in equity is recognised in the Statement of financial performance, or determined to be impaired, at which time the cumulative loss recorded in equity is recognised in the Statement of financial performance.

Subsequent measurement – Financial Liabilities

Financial liabilities consist of payables, interest bearing loans and bank overdrafts. These liabilities are subsequently measured at amortised cost, using the effective interest rate method. Finance costs are expensed in the Statement of financial performance in the period in which they are incurred except where stated otherwise (see accounting policy on borrowing costs).

Bank borrowings, consisting of interest-bearing short-term bank loans, repayable on demand and overdrafts are recorded at the proceeds received. Finance costs are accounted for using the accrual basis and are added to the carrying amount of the bank borrowing to the extent that they are not settled in the period that they arise.

Prepayments are carried at cost less any accumulated impairment losses.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.13 Financial instruments (continued)

1.13.3 Derecognition

Financial assets

The municipality derecognises financial assets only when the contractual rights to the cash flows from the asset expires or it transfers the financial assets and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of financial assets due to non-recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial assets, the municipality continues to recognise the financial assets and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The municipality derecognises financial liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as having extinguished the original financial liability, and a new financial liability recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it (whether or not attributable to the financial difficulty of the debtor) shall be accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a nonexchange transaction, are accounted for in accordance with GRAP 23.

1.13.4 Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instruments is not active, the municipality establishes fair value using a valuation technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on municipality-specific inputs.

1.14 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately

Entity as lessee - operating leases

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight- line basis.

Any contingent rent is expensed in the period in which they are incurred.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.15 Inventory

Initial measurement:

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Inventories shall be recognised as an asset if, and only if:
(a) it is probable that future economic benefits or service potential
associated with the item will flow to the entity;
(b) and the cost of the inventories can be measured reliably.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs. The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.16 Landfill site

Site restoration and dismantling cost - The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as ‘decommissioning, restoration and similar liabilities’. The cost of an item of property, plant and equipment includes:

- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located;
- changes in the measurement of an existing decommissioning, restoration and similar liability that result from change in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in discount rate; and
- the obligation the municipality incurs for having used the items during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

(a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;

(b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and

(c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.17 Impairment of property, plant and equipment, investment property, intangible assets and heritage assets

The municipality classifies all assets held with the primary objective of generating a commercial return as cash-generating assets. A commercial return means that the return charged by the entity is commensurate with the risk associated with holding the asset and the asset is intended to generate positive cash inflows. All other assets are classified as non-cash-generating assets.

1.18 Impairment of cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity

Cash generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Management has judged all assets as non cash generating assets.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.18 Impairment of cash-generating assets (continued)

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.18 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

In assessing whether there is any indication that an asset may be impaired, the municipality will consider, as a minimum, the following indications:

External sources:
(a) During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use.
(b) Significant changes with an adverse effect on the entity have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which an asset is dedicated.
(c) Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially

Internal sources:
(d) Evidence is available of obsolescence or physical damage of an asset.
(e) Significant changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite.
(f) A decision to halt the construction of the asset before it is complete or in a usable condition.
(g) Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

Accounting Policies

1.19 Impairment of non-cash-generating assets

Non cash generating assets are assets other than cash generating assets

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

In assessing whether there is any indication that an asset may be impaired, an entity shall consider, as a minimum, the following indications:

External sources of information
(a) Cessation, or near cessation, of the demand or need for services provided by the asset.
(b) Significant long-term changes with an adverse effect on the entity have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the entity operates.

Internal sources of information
(c) Evidence is available of obsolescence or physical damage of an asset.
(d) Significant long-term changes with an adverse effect on the entity have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date and reassessing the useful life of an asset as finite rather than indefinite.
(e) A decision to halt the construction of the asset before it is complete or in a usable condition.
(f) Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the current reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

30 November 2023
Auditing to build public confidence

Accounting Policies

1.19 Impairment of non-cash-generating assets (continued)

Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.20 Employee benefits

Employee benefits are all forms of consideration given by a municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party of the reporting municipality, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting municipality's own creditors (even in liquidation) and cannot be paid to the reporting municipality, unless either:

the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or

the proceeds are returned to the reporting municipality to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

a municipality's decision to terminate an employee's employment before the normal retirement date; or

an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide postemployment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.20 Employee benefits (continued)

A constructive obligation is an obligation that derives from a municipality's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the municipality has indicated to other parties that it will accept certain responsibilities and as a result, the municipality has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

wages, salaries and social security contributions;

short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;

bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and

non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and

as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the municipality has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service.

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year-end is based on the bonus accrued at year-end for each employee.

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrues to Section 57 employees. Municipal entities' performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

Leave pay

Liabilities for annual leave are recognised as they accrue to employees. Liability is based on the total accrued leave days owing to employees and is reviewed annually.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.20 Employee benefits (continued)

Post-employment benefits: Defined contribution plans

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognises the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefit plans other than defined contribution plans. In this aspect defined contribution plans can be considered as the pension fund.

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognises past service cost as an expense in the reporting period in which the plan is amended.

Plan assets comprise assets held by a long-term employee benefit fund and qualifying insurance policies.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The return on plan assets is interest, dividends or similar distributions and other revenue derived from the plan assets, together with realised and unrealised gains or losses on the plan assets, less any costs of administering the plan (other than those included in the actuarial assumptions used to measure the defined benefit obligation) and less any tax payable by the plan itself.

The entity account not only for its legal obligation under the formal terms of a defined benefit plan, but also for any constructive obligation that arises from the entity's informal practices. Informal practices give rise to a constructive obligation where the entity has no realistic alternative but to pay employee benefits. An example of a constructive obligation is where a change in the entity's informal practices would cause unacceptable damage to its relationship with employees.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement

The amount determined as a defined benefit liability may be negative (an asset). The entity measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.20 Employee benefits (continued)

The entity determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the audited annual financial statements do not differ materially from the amounts that would be determined at the reporting date.

The entity recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability)

The entity uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, a entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, a entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The entity recognises gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises:

- any resulting change in the present value of the defined benefit obligation; and
- any resulting change in the fair value of the plan assets.

Before determining the effect of a curtailment or settlement, the entity re-measure the obligation (and the related plan assets, if any) using current actuarial assumptions (including current market interest rates and other current market prices).

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The entity offsets an asset relating to one plan against a liability relating to another plan when the entity has a legally enforceable right to use a surplus in one plan to settle obligations under the other plan and intends either to settle the obligations on a net basis, or to realise the surplus in one plan and settle its obligation under the other plan simultaneously.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.20 Employee benefits (continued)

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
- Those changes were enacted before the reporting date; or
- past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Other long term employee benefit

The municipality provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

Long term service awards is payable after 10 years of continuous service and after every 5 years thereafter to employees. Additional to this employees shall be entitled to a 14th cheque for continuous employment on their 30th and every 5th year onward. Furthermore a retirement gift is payable on retirement to employees with 10 years or more service. The provision is an estimate of the long service award based on historical staff turnover based on historical staff turnover. No other long service benefits are provided to employees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The municipality also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions are recognised in the Statement of financial performance in the period that it occurs.Interestcost on employee benefit obligation is recognised as part of employee related cost.

The amount recognised as a liability for other long-term employee benefits is the net total of the following amounts:

the present value of the defined benefit obligation at the reporting date;

minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

current service cost;

interest cost;

the expected return on any plan assets and on any reimbursement right recognised as an asset;

actuarial gains and losses, which shall all be recognised immediately;

past service cost; and

the effect of any curtailments or settlements.

Termination benefits

The municipality recognises termination benefits as a liability and an expense when the entity is demonstrably committed to either:

terminate the employment of an employee or group of employees before the normal retirement date; or

provide termination benefits as a result of an offer made in order to encourage voluntary redundancy.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.20 Employee benefits (continued)

The municipality is demonstrably committed to a termination when the entity has a detailed formal plan for the termination and is without realistic possibility of withdrawal. The detailed plan includes [as a minimum]:

the location, function, and approximate number of employees whose services are to be terminated;

the termination benefits for each job classification or function; and

the time at which the plan will be implemented.

Implementation begins as soon as possible and the period of time to complete implementation is such that material changes to the plan are not likely.

Where termination benefits fall due more than twelve months after the reporting date, they are discounted using an appropriate discount rate. The rate used to discount the benefit reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the benefit.

In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits shall be based on the number of employees expected to accept the offer.

1.21 Provisions

Provisions are recognised when:
- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised. Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.21 Provisions (continued)

Environmental rehabilitation provisions

At year end a provision is raised for the rehabilitation of landfill sites. The provision is the net present value of the future cash flows to rehabilitate damaged land at year end.

As the related asset is measured using the cost model:

changes in the liability is added to, or deducted from, the cost of the related asset in the current period;

the amount deducted from the cost of the asset does not exceed it carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit;

if the adjustments results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may be fully recoverable. If there is such an indication, the municipality tests the asset for the impairment by estimating its recoverable amount or recoverable service amount, and accounts for any impairment loss, in accordance with the accounting policy on impairment of assets as described in the accounting policy on impairment of cash-generating assets and/ or impairment of non-cash generating assets.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur.

1.22 Contingent assets and contingent liabilities

Contingent liabilities represent a possible obligation that arises from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

A contingent liability can also arise as a result of a present obligation that arises from past events but which is not recognised as a liability either because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets represent possible assets that arise from past events and whose existence will be confirmed only by an occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the municipality.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the municipality.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.23 Revenue

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction

Recognition and measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

1.23.1 Revenue from exchange transactions

Service charges

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the billings done during July and August. The billing and invoiced amounts done in July are recognized in total as an accrual as all billing in July pertains to services rendered prior 30 June. An estimate is then made based on August billing pertaining to services rendered up until 30 June.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the number of sewerage connections on each developed property using the tariffs approved from Council and are levied monthly.

The municipality accounts for availability charges as an exchange transaction.

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction shall be recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:
(a) the amount of revenue can be measured reliably;
(b) it is probable that the economic benefits or service potential associated with the transaction will flow to the entity
(c) the stage of completion of the transaction at the reporting date can be measured reliably; and
(d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

interest is levied on outstanding debtors using the effective interest rate method.

Rentals on facilities and equipment are recognised on the straight-line basis over the term of the lease agreement

Pre-paid electricity

Revenue from the sale of electricity prepaid units is recognised when all the following conditions have been satisfied:

The municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.

The municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

The amount of revenue can be measured reliably.

It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

1.23 Revenue (continued)

The costs incurred or to be incurred in respect of the transaction can be measure reliably.

Interest earned and rentals received

Interest earned on investments is recognised in the statement of financial performance on the time proportionate basis that takes into account the effective yield on the investment.

Traffic charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licences and permits.

Income from agency services

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue recognition of unclaimed deposits

Unclaimed deposits older than three (3) years are recognised as revenue.

1.23.2 Revenue from non-exchange transactions

Rates and taxes

Other than services in-kind not recognised in terms of paragraph .99, an inflow of resources from a non-exchange transaction that meets the definition of an asset shall be recognised as an asset when, and only when:
(a) it is probable that the future economic benefits or service
potential associated with the asset will flow to the entity; and
(b) the fair value of the asset can be measured reliably.

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources.

Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

Rebates and discounts are offset against the revenue. As per iGRAP 1, there is no intention to collect this revenue

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.23 Revenue (continued)

Fines

Fines constitute both spot fines and camera fines. Fines are recognised when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. It is measured at the best estimate, based on past experience, of the amount of revenue the municipality is entitled to collect.

Subsequent to initial recognition and measurement, the municipality assess the collectability of the revenue and recognises a separate impairment loss where appropriate.

Donations and contributions

Donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Transfers and subsidies

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Unconditional grants

Equitable share allocations are recognised in revenue at the start of the financial year.

Conditional grants

Conditional grants recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Interest earned on grants received and invested is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of financial performance.

Interest earned on unspent grants and receipts

Interest earned on unspent grants and receipts is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality’s interest it is recognised as interest earned in the Statement of financial performance in accordance with GRAP 9.

Services received in-kind

Services in-kind that are significant to the municipality's operations and/or service delivery objectives are recognised as assets and the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality’s operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

Accounting Policies

1.24 Statutory receivables

1.24.1 Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

The cost method is the method used to account for statutory receivables that requires such receivables to be measured at their transaction amount, plus any accrued interest or other charges (where applicable) and, less any accumulated impairment losses and any amounts derecognised.

Nominal interest rate is the interest rate and/or basis specified in legislation, supporting regulations or similar means.

The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means.

In estimating the future cash flows, an entity considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, an entity discounts the estimated future cash flows using a rate that reflects the current risk free rate and, if applicable, any risks specific to the statutory receivable or group of statutory receivables, for which the future cash flow estimates have not been adjusted.

1.24.2 Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

1.24.3 Measurement

The municipality initially measures statutory receivables at their transaction amount.

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the accounting policy on Revenue from exchange transactions or the accounting policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

Other charges

Where the municipality is required or entitled to levy additional charges in terms of legislation, supporting regulations, by-laws or similar means on overdue or unpaid amounts, these charges are accounted for in terms of the municipality's accounting policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (taxes and transfers).

1.24.4 Impairment

The municipality assesses at each reporting date whether there is any indication that a statutory receivable, or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

1.24 Statutory receivables (continued)

significant financial difficulty of the receivable, which may be evidenced by an application for debt counselling, business rescue or an equivalent.

it is probable that the receivable will enter sequestration, liquidation or other financial re-organisation.

a breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied).

adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced through the use of an allowance account. The amount of the losses is recognised in surplus or deficit.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable, or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

1.24.5 Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers control of the statutory receivable and substantially all the risks and rewards of ownership of the asset to another entity; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
  - derecognise the receivable; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The entity considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

1.25 Principal-agent arrangements

Identification

An agent is an entity that has been directed by another entity (a principal), through a binding arrangement, to undertake transactions with third parties on behalf of the principal and for the benefit of the principal.

A principal is an entity that directs another entity (an agent), through a binding arrangement, to undertake transactions with third parties on its behalf and for its own benefit.

A principal-agent arrangement results from a binding arrangement in which one entity (an agent), undertakes transactions with third parties on behalf, and for the benefit of, another entity (the principal).

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.25 Principal-agent arrangements (continued)

Identifying whether an entity is a principal or an agent

When the municipality is party to a principal-agent arrangement, it assesses whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement.

The assessment of whether a municipality is a principal or an agent requires the municipality to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

Binding arrangement

The municipality assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

Where the terms of a binding arrangement are modified, the parties to the arrangement re-assess whether they act as a principal or an agent.

Assessing which entity benefits from the transactions with third parties

When the municipality in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If the municipality concludes that it is not the agent, then it is the principal in the transactions.

The municipality is an agent when, in relation to transactions with third parties, all three of the following criteria are present:

- It does not have the power to determine the significant terms and conditions of the transaction.
- It does not have the ability to use all, or substantially all, of the resources that result from the transaction for its own benefit.
- It is not exposed to variability in the results of the transaction.

Where the municipality has been granted specific powers in terms of legislation to direct the terms and conditions of particular transactions, it is not required to consider the criteria of whether it does not have the power to determine the significant terms and conditions of the transaction, to conclude that is an agent. The municipality applies judgement in determining whether such powers exist and whether they are relevant in assessing whether the municipality is an agent.

Recognition

The municipality, as a principal, recognises revenue and expenses that arise from transactions with third parties in a principal-agent arrangement in accordance with the requirements of the relevant Standards of GRAP.

The municipality, as an agent, recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal in accordance with the requirements of the relevant Standards of GRAP.

The municipality recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of the relevant Standards of GRAP.

1.26 Borrowing costs

Borrowing costs are interest and other expenses incurred by an municipality in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the Statement of financial performance in the period in which they are incurred.

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalised to the cost of the asset. All other borrowing costs are recognised as an expense in the period in which it is incurred. The capitalisation rate used to determine the amount of borrowing costs eligible for capitalisation is disclosed in the notes below.

1.27 Comparative of actual information to budgeted information

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 61 for detail.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.28 Unauthorised expenditure

Unauthorised expenditure means:
- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.29 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the Statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the Statement of financial performance.

1.30 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

All expenditure relating to irregular expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.31 Related parties and related party transactions

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

An entity is related to the Municipality if any of the following conditions apply:
- the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others).
- one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member).
- both entities are joint ventures of the same third party.
- one entity is a joint venture of a third entity, and the other entity is an associate of the third entity.
- the entity is a post-employment benefit plan for the benefit of employees of either the Municipality or an entity related to the Municipality. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity.
- the entity is controlled or jointly controlled by a person identified in (a).
- a person identified in (a) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

A person is considered to be a close member of the family of another person if they:
- are married or live together in a relationship similar to a marriage or are separated by no more than two degrees of natural or legal consanguinity or affinity.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.31 Related parties and related party transactions (continued)

Management (formerly known as “Key Management”) includes all persons having the authority and responsibility for planning, directing and controlling the activities of the Municipality, including:
- all members of the governing body of the Municipality;
- a member of the governing body of an economic entity who has the authority and responsibility for planning, directing and controlling the activities of the Municipality;
- any key advisors of a member, or sub-committees, of the governing body who has the authority and responsibility for planning, directing and controlling the activities of the Municipality; and
- the senior management team of the Municipality, including the chief executive officer or permanent head of the Municipality, unless already included in (a).

Management personnel include:
- All directors or members of the governing body of the Municipality, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee. Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting Municipality being the Municipal Manager, Chief Financial Officer, and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Key management as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management are those persons responsible for planning, directing and controlling the activities of the municipality including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity’s financial statements to understand the effect of related party transactions on its annual financial statements.

1.32 Change in accounting policies, estimates and errors

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the periodspecific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the periodspecific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

1.33 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.33 Commitments (continued)

Disclosures are required in respect of unrecognised contractual commitments.

Commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and the contract has been awarded at the reporting date; and
- where disclosure is required by a specific standard of GRAP.

1.34 Value Added Tax

The municipality accounts for Value Added Tax on the cash (receipt) basis.

1.35 Budget information

The approved budget is prepared on a accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2022/07/01 to 2023/06/30.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Material variances are determined in accordance with the municiapalities materiality framework. These material didfferences will be explained in the financial statements under note for budget differences referenced to the statement of budget comparison.

1.36 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.37 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.38 Contruction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of subcontractors. The term “contractor” thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

1.39 Segment information

A segment is an activity of an entity:

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

Accounting Policies

1.39 Segment information (continued)

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported on in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

Segmental information was based and identified on the MFMA S71 monthly budget statement/reports that are reviewed by senior management and council to make strategic decisions and in monitoring segment performance. The disclosure of information about segments in these reports is organised around the type of service delivered, in a standardised format, namely the C2 schedule.

The municipality manages its assets and liability as a whole and is not reviewed on a segregated basis for each town. Segment reporting per geographical area is not deemed relevant.

Measurement

The amount of each segment item reported is the measure reported to management for the purposes of making decisions about allocating resources to the segment and assessing its performance. Adjustments and eliminations made in preparing the entity's financial statements and allocations of revenues and expenses are included in determining reported segment surplus or deficit only if they are included in the measure of the segment's surplus or deficit that is used by management. Similarly, only those assets and liabilities that are included in the measures of the segment's assets and segment's liabilities that are used by management are reported for that segment. If amounts are allocated to reported segment surplus or deficit, assets or liabilities, those amounts are allocated on a reasonable basis.

If management uses only one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities in assessing segment performance and deciding how to allocate resources, segment surplus or deficit, assets and liabilities are reported in terms of that measure. If management uses more than one measure of a segment's surplus or deficit, the segment's assets or the segment's liabilities, the reported measures are those that management believes are determined in accordance with the measurement principles most consistent with those used in measuring the corresponding amounts in the entity's financial statements.

1.40 Offsetting

Financial assets and liabilities are offset and the net amount reported on the Statement of financial position only when there is a legally enforceable right to set off the recognised amount, and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

1.41 Current year comparatives

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are also reclassified and restated, unless such comparative reclassification and / or restatement is not required by a Standard of GRAP. The nature and reason for such reclassifications and restatements are also disclosed.

Where material accounting errors, which relate to prior periods, have been identified in the current year, the correction is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable and the prior year comparatives are restated accordingly.

The presentation and classification of items in the current year is consistent with prior periods.

1.42 Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash and are subject to an insignificant risk of change in value. Cash and cash equivalents are carried at amortised cost. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are carried at amortised cost.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.42 Cash and cash equivalents (continued)

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts.

1.43 Housing arrangements

The Accounting Standards Board issued the guideline on Accounting for Arrangements Undertaken in terms of the National Housing Programme.

Where the municipality acts as a project manager in a housing arrangement, it is regarded as an agent in terms of the principles of GRAP 109 - Accounting by Principals and Agents.

Where the municipality is regarded as an agent, costs related to the construction of top structures and the related recovery thereof (revenue) is not be recognised in the Statement of financial performance of the municipality.

Where the municipality is identified as a project developer, the construction of the houses is performed by the municipality or by the appointment of a sub-contractor to undertake the construction on the municipality's behalf. The municipality applies the GRAP 11, Construction Contracts to account for these construction activities.

Where the municipality is regarded as the project developer and if the outcome of the construction contract can be estimated reliably, then contract revenue is recognised in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed with reference to surveys of work performed. Otherwise, contract revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable. Contract revenue will be in the form of a grant from the Department of Human settlements and presented and disclosed under transfers and subsidies in the Statement of financial performance.

Contract costs are recognised as an expense in the period in which they are incurred. When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Contract revenue shall comprise: (a) the initial amount of revenue agreed in the contract; and (b) variations in contract work, claims and incentive payments to the extent that: (i) it is probable that they will result in revenue; and (ii) they are capable of being reliably measured.

Contract costs shall comprise: (a) costs that relate directly to the specific contract; (b) costs that are attributable to contract activity in general and can be allocated to the contract on a systematic and rational basis; and (c) such other costs as are specifically chargeable to the customer under the terms of the contract.

An expected deficit on a construction contract to which paragraph .49 applies shall be recognised as an expense immediately in accordance with paragraph .49.

1.44 Grants-in-aid

The municipality transfers money to individuals, organizations and other sectors of government from time to time. When making these transfers, the municipality does not:

- Receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- Expect to be repaid in future; or
- Expect a financial return, as would be expected from an investment.

These transfers are recognised in the annual financial statements as expenses in the period that the events giving rise to the transfer occurred.

1.45 Consumer deposits

The municipality recognises consumer deposits as a current liability when the municipality becomes a party to the contract i.e. when the deposit is made. The consumer deposit is recognised as a liability as the municipality has an obligation to pay the money back to the consumer once the consumer account is closed. As the timing of when a consumer will close their account is unknown, the consumer deposits are classified as a current liability.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Accounting Policies

1.46 Unspent conditional grants

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent where the obligations have not been met, a liability is recognised.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023

Annual Financial Statements for the year ended 30 June 2023

Notes to the Annual Financial Statements

		2023 R	2022 R
5. Receivables from exchange transactions			
Consumer receivables from exchange transactions	5.1		
Electricity		153 776 401	108 881 514
Waste management		8 386 476	7 580 904
Waste water management		8 361 990	8 133 394
Water		44 517 033	42 986 897
Service charges		1 940 655	1 582 321
		216 982 555	**169 165 030**
Other consumer receivables from exchange transactions	5.2		
Property rental debtors		647 188	728 555
Total receivables from exchange transactions		**217 629 743**	**169 893 585**

The amount disclosed in this note is net of impairment. Refer to note 5.1 & 5.2 for the amount before the provision (gross) and the actual value of the provision.

Stellenbosch Municipality incorrectly billed a debtor for electricty provided and requested payment of the outstanding amount of R45 276 728. The debtor has now declared a dispute and indicated that they are only liable for payment of up to 6 months and not 3 years as the Municipality alleged. The disputed amount only relates to electricity and has been included as part of the electricity gross balance.

5.1 Consumer receivables

The average credit period for consumer receivables is 30 days. No interest is charged on trade receivables for the first 30 days from the date of the invoice. Thereafter interest is charged at the prime rate per annum on the outstanding balance. The municipality strictly enforces its approved credit control policy to ensure the recovery of consumer receivables.

The management of the municipality is of the opinion that the carrying value of consumer receivables approximate their fair values.

The fair value of consumer receivables was determined after considering the standard terms and conditions of agreements entered into between the municipality and consumer receivables as well as the current payment ratio's of the municipality's consumer receivables.

The Council regards receivables from exchange transactions to be due for outstanding amounts more than 30 days to be past due.

The water and electricity accrual is in respect of consumption between the last meter reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers. The estimate of the consumption are being recorded as revenue without being invoiced.

Statutory receivables general information

Transaction(s) arising from statute

Property rates related transactions arise in terms of the Municpal Property Rates Act, 6 of 2004, Municipal Finance Management Act, 56 of 2003, as well as the Property Rates Policy of the municipality approved by Council as part of the Budget Process.

Traffic fines arise from the National Road Traffic Act 93 of 1996, National Road Traffic Regulations 2000, National Land Transport Act 5 of 2009 and Criminal Procedure Act 51 of 1971. Prosecutor performs prosecutorial functions in terms of a general delegation awarded by the National Prosecuting Authority and is subject to the control of the Control Prosecutor at the Magistrate's Court in Stellenbosch.

VAT transactions arise from the Value Added Tax Act 89 of 1991. VAT is an indirect tax on the consumption of goods and services in the economy. VAT is levied on all goods and services subject to certain exemptions, exceptions, deductions and adjustments provided for in the Value Added Tax Act 89 of 1991.

Determination of transaction amount

Property rates transaction amounts are determined in line with the Annual Tariff List of the municipality approved by Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003.

The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of
these discounts or reductions being taken up by receivables.

VAT transactions amounts are determined in line with the Value Added Tax Act 89 of 1991. VAT increased from 14% to 15% from 1 April 2018.

Interest or other charges levied/charged

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Notes to the Annual Financial Statements

	2023 R	2022 R

6. Receivables from non-exchange transactions (continued)

Interest or other charges levied on Property rates balances are in line with the Annual Tariff List of the municipality approved by
Council as part of the Budget Process in terms of the Municipal Finance Management Act, 56 of 2003. "Interest" means a charge levied, on all arear accounts calculated at an interest rate which is one percent higher than the prime interest rate.

Traffic fines: Additional charges includes contempt of court fees / warrant of arrest fee determined in terms of the Criminal Procedure Act.

The rates and interest charges are determined by the Value Added Tax Act 89 of 1991.

Basis used to assess and test whether a statutory receivable is impaired

The basis used to assess Property Rates receivables is to look at the extent to which debtors on an individual basis defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

The basis used to assess Traffic fine receivables is to look at the extent to which debtors per group of fines (Municipal fines, Provincial fines) defaulted on payments already due and an assessment of their ability to make payments based on their historical collection trend.

No impairment on VAT Receivable, balance expected to be fully recoverable

Discount rate applied to the estimated future cash flows

Interest is calculated using the nominal interest rate as stipulated in the municipal by-laws (Prime plus 1%). This rate is also considered an appropriate discount rate.

Main events and circumstances that led to the recognition or reversal of impairment losses on statutory receivables

Significant impairment losses recognised or reversed

Traffic Fines: Impairment Recognised: Annually the outstanding receivables are assessed in terms of the value of fines issued in comparison to the receipts generated from such fines. The remaining balance is considered recoverable based on this payment percentage.

7. Inventories

Consumables	390 563	799 798
Materials and supplies	9 830 691	2 918 628
Water	2 562 783	1 889 813
Housing stock	9 100 000	9 275 000
Land	14 146 828	14 146 828
Total Inventories	**36 030 865**	**29 030 067**

R 64 172 062 (2022: R 44 620 431) of total inventory was recognised as an expense in the current year.

The amount of write-down of inventories recognised as an expense and a reduction in inventory carrying value is
R 389 807 (2022: R 115 859). The circumstances relating to the write down is as a result of stock adjustments and shortages on general stock items as reported and approved accordingly.

No inventories were pledged as securities.

13. Biological assets (continued)

2023 - Nature and quantities of each biological asset	Opening Balance	Decrease due to harvest	Fair value movement	Total
Botmanskop Plantation	293 463	-	-	293 463
Paradyskloof Plantation	4 849 313	-	-	4 849 313
	5 142 776	**-**	**-**	**5 142 776**

2022 - Nature and quantities of each biological asset	Opening Balance	Decrease due to harvest	Fair value movement	Total
Botmanskop plantation	293 463	-	-	293 463
Paradyskloof Plantation	4 849 313	-	-	4 849 313
	5 142 776	**-**	**-**	**5 142 776**

The determination of fair value was as follows:

Principle:

Price determination was done on the basis of current sale value of the tender for the current year i.e. R602.10/m3 excluding 15% VAT . This value was given to all trees as the estimated yield takes into consideration the age of the trees. The harvestable age starts from 20 years old where the minimum estimated yield would be 100m3/ha.

It must also be noted that this yield is based on optimum growing conditions and the existing microclimates, and thus the yield might vary per compartment. Refer to the Forestry Handbook p204 which can be obtained at the municipal offices.

Description of the Biological Assets

Botmanskop plantation (Block E)

Some compartments remain which can be harvested at a later stage due to the age of the trees.

Paradyskloof plantation (Block G)

Some compartments remain which can be harvested at a later stage due to the age of the trees.

Strategy to mitigate risks

The strategy to mitigate risks attached to this category of assets is to prevent the spread of runaway veld fires by maintaining fire breaks.

Pledged as security

There were no items of biological assets pleadged as security in the current financial year.

17.1 Post employment health care benefits

The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service) is entitled to remain a continued member of such medical aid fund on retirement, in which case the municipality is liable for a certain portion of the medical aid membership fee. The municipality operates an unfunded defined benefit plan for these qualifying employees. The plan is treated as a defined benefit plan under GRAP 25. No other post-retirement benefits are provided to these employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2023 by C Weiss of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The members of the Post-employment Health Care Benefit Plan are made up as follows:

	Number	Number
In-service members (Employees)	688	673
Continuation members (Retirees)	168	175
In service employees (Non-members)	454	472
Total members	**1 310**	**1 320**

The liability in respect of past service has been estimated as follow:

In-service members (Employees)	66 382 000	67 805 000
In-service non-members (Employees)	7 341 000	8 309 000
Continuation members (Retirees)	102 433 001	113 044 001
Total liability	**176 156 001**	**189 158 001**
Non-current	166 384 001	179 494 000

Continuation of Membership

With the appointment of ARCH Actuarial Consulting for the year ending 30 June 2023.

17.2 Long-service awards benefits

Provision for long-service awards	17.2.1	27 958 020	27 729 020
Less: Transfer to current portion		(3 142 020)	(3 122 303)
Total non-current benefit		**24 816 000**	**24 606 717**
Non-current		24 816 000	24 606 717
Current		3 142 020	3 122 303
Total liability		**27 958 020**	**27 729 020**

Long-service awards

The municipality operates a funded defined benefit plan for all its employees. Under the plan, a Long Service Award is payable after 10 years of continuous service and every 5 years thereafter to employees. The provision is an estimate of the long-service based on historical staff turnover. No other long-service benefits are provided to employees.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2023 by Arch consulting. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

At year end 1142 (2022: 1145) employees were eligible for Long Services Awards.

The principal assumptions used for the purposes of the actuarial valuations were as follows:

Discount rate	11.38%	11.12%
General Salary inflation	6.62%	7.3%
Net effective discount rate	4.47%	3.56%

GRAP 25 defines the determination of the Discount Rate Assumption to be used as follows:

The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve.

Leasing arrangements

The municipality as a lessee

Operating Leases relate to Property, Plant and Equipment with lease terms not longer than 5 years, with an option to extend for a further period. All operating lease contracts contain market review clauses in the event that the municipality exercises its option to renew. The municipality does not have an option to purchase the leased asset at the expiry of the lease period.

21. Payables from non-exchange transactions (continued)

The nature and extent of government grants recognised in the annual financial statements and an indication of other forms of government assistance from which the municipality has directly benefited and unfulfilled conditions and other contingencies attaching to government assistance that has been recognised.

These amounts are invested in a ring-fenced investment until utilised.

An amount of R3 873 630 in relation to provincial grants: libraries was approved to be rolled over from the 2021/2022 financial year. The split was as follows:

R2 065 169.69 Capital; and
R1 808 460.21 Operating.

From this rollver,the user department requested and received approval from the transferring department that the operating funds be utilised as Capital. The total amount approved for roll-over was the transferred to the Capital opening balance in the note disclsoed above.

22. Provisions

Landfill sites

Non-current

22.1 Landfill sites

Opening Balance	160 533 093	141 497 318
Increases/ (Decreases)	(77 151 099)	9 130 963
Increases (Passage of Time/Discounted Rate)	12 039 982	9 904 812
Closing balance	**95 421 976**	**160 533 093**

Landfill site provision

The municipality has a present obligation to rehabilitate the landfill site which stems from licensing agreements 16/2/7/G203/D16/Z1/P331) issued in terms of the Environmental Conservation Act, 1989 (Act 73 of 1989)

In terms of the licensing of the landfill refuse sites, the municipality will incur licensing and rehabilitation costs of R95 421 976 (2022: R160 533 093) to restore the site at the end of its useful life.

The unwinding of the provision for landfill site for the current year was R12 039 982 (2022: R9 904 812) was included in the finance cost in the statement of financial performance.

Cells 1 and 2 have reached full capacity and must be rehabilitated. The expected future cash outflows for cells 1 and 2 should commence in the 2025/2026 financial year. Cell 3 has come into use at the end of 30 June 2013 financial year and is the current landfill site in use. The expected future cash outflows is between July 2044 and July 2048 for cell 3.

The provision has been determined based on an independent valuation performed by a firm of consulting engineers as at 30 June 2023

Key cost parametres:

- Estimated post closure rehabilitation time 3 years
- Inflation rate 5.6% (2022: 7.4%)
- Discount rate 11.25% (2022: 7.75%)

Refer to note 47 for contribution to the provision.

Annual Financial Statements for the year ended 30 June 2023

Notes to the Annual Financial Statements

	2023 R	2022 R
23. Property rates		
Agricultural property	19 435 922	18 490 474
Business and commercial properties	157 319 688	166 626 428
Public benefit organisations	38 949	24 424
Public service purposes properties	9 564 881	9 290 588
Residential properties	243 560 455	216 061 713
Vacant land	14 115 461	3 952 269
Total	**444 035 356**	**414 445 896**

Assessment Rates are levied on the value of land and improvements, which valuation is performed every four years. Interim valuations are processed on an annual basis to consider any changes in individual property values, due to amendments. The current Valuation Roll came into effect on 01 July 2021. With reference to Section 78 of the Local Government: Municipal Property Rates Act, No. 6,2004, five reviews have been finalised and one supplementary valuation has been performed during the financial year and implemented accordingly.

The following assessment rates were charged for the period ending June 2023:

Residential Property – R 0.004759

Business and Commercial Property – R 0.009993

Agricultural Property – R 0.001189

Public Service Purposes – R 0.009993

Public Service Infrastructure – R 0.001189

Public Benefit Organization – R 0.001189

Vacant Residential – R 0.009518

Vacant other – R 0.019035

Property Rates are levied monthly on property owners' accounts and are payable the 7th of each month. Property owners may request to pay their Rates annually, which amount will be levied in July and must be paid by the 7th of October annually. Interest on outstanding accounts for Property Rates is levied as per Council's Credit Control and Debt Collection Policy.

Relief Measures

The relief measures on property rates are generally described in paragraph 8 of the approved Property Rates Policy of the Municipality. This includes the specific under mentioned relief measures:

Rebate and gross monthly household income for Qualifying senior citizens and Disabled persons:

Gross monthly household income %

Up to R8 000 - 100%
From R8 001 to R 10 000 - 75%
From R10 001 to R12 000 - 50%
From R12 001 to R15 000 - 25%

Municipal valuation threshold value

On qualifying residential properties, property owners will receive a rebate up to a maximum value of R250 000, which amount includes a value of R15 000 as per Section 17(1)(h) of the Local Government: Municipal Property Rates Act, No. 6, 2004, and an additional value of R235 000 reduction granted as per paragraph 8.2.1(ii) of the approved Property Rates Policy.

Paragraph 8.2.1 (ii) is only applicable on properties with valuations up to R5 000 000.

The following principle agent arrangements were in place in relation to the expenditure as contained in note 45 to the annual financial statements:

Pay@ (Agent) provides the Municipality with payment service solutions on behalf of the Municipality. Pay@ pays over the monies generated from the payment services to the Municipality. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the fee to be paid to Pay@ (as stipulated in the relevant service schedule or based on Pay@'s standard prevailing rates),is recognized as an expense.

EasyPay (Agent) is a payment platform used to collect municipal service payments from third parties. These payments are accepted by EasyPay on behalf of the Municipality (Principal), from third parties. A service charge is levied by EasyPay for collection of the payments. This fee is recognised as commisions paid.

SPS (Agent) collects parking tariffs from motorists on behalf of the Municipality. SPS pays over the tariffs collected to the Municipality, minus the service charge levied. The municipality recognises 100% of the tariff as revenue from exchange transactions and the service charges incurred to SPS is recognized as an expense. This service provider was only utilised in the prior year (2021-2022).

45. Operational Cost (continued)

Syntell (Agent) sells and collects money from the sale of prepaid electricity on behalf of the Municipality. Syntell pays over the monies collected to the Municipality, minus the collection fee levied, determined at a rate specific in the Service Level Agreement. The municipality recognises 100% of the money's collected as revenue from exchange transactions and the collection fee paid to Syntell (which includes costs incurred on debit or credit card electricity sales and cash handling fees incurred),is recognized as an expense.

TMT (Agent) manages the collection of traffic fines (both legacy fines issue before 1 July 2017 and fines issued after this date), on behalf of the Municipality. TMT pays over the monies collected to the Municipality. The municipality recognises 100% of the money's collected as revenue from non - exchange transactions and the fee incurred to TMT is recognized as an expense.

These arrangements are subject to standard terms and conditions upon termination.

None of the municipalities assets are under the custodianship of the agents.

52. Risk management

Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Council, which has built an appropriate liquidity risk management framework for the management of the municipality's short, medium and long-term funding and liquidity management requirements. The municipality manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amount disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2023	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Consumer deposits	23 688 825	-	-	-
Borrowings	104 080 467	104 080 467	278 469 805	244 345 506

At 30 June 2022	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Consumer deposits	22 160 472	-	-	-
Borrowings	92 860 606	92 860 606	259 571 387	266 345 634
Payables from exchange transactions	236 931 678	-	-	-

We draw to the users attention the following prior period error which refers to the maturity analysis disclosed in this note. The amount previously disclosed did not include the undiscounted interest as disclosed below.		
Borrowings: Less than 1 year - Undiscounted interest previously excluded	-	40 958 345
Borrowings: Between 1 and 2 years - Undiscounted interest previously excluded	-	42 002 718
Borrowings: Between 2 and 5 years - Undiscounted interest previously excluded	-	93 979 516
Borrowings: More than 5 years - Undiscounted interest previously excluded	-	55 961 702
	-	**232 902 281**

Risk from biological assets

The municipality is exposed to financial risks arising from changes in wood prices. The municipality does not anticipate that wood prices will decline significantly in the foreseeable future. The municipality has not entered into derivative contracts to manage the risk of a decline in wood prices. The municipality reviews its outlook for wood prices regularly in considering the need for active financial risk management.

Interest rate risk management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well established financial institutions of high credit standing. No investment with a tenure exceeding twelve months shall be made without consultation with the councillor responsible for financial matters.

In the case of receivables whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Notes to the Annual Financial Statements

	2023 R	2022 R

52. Risk management (continued)

Long-term receivables and other debtors are individually evaluated annually at the reporting date for impairment or discounting. A report on the various categories of receivables are drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

The municipality is not exposed to interest rate risk as the municipality borrows funds at fixed interest rates.

The municipality's exposures to interest rates on Financial Assets and Financial Liabilities are detailed in the Credit Risk Management section of this note.

Interest Rate Sensitivity Analysis

The municipality had no variable rate long-term financial instruments at year-end requiring an Interest Rate Sensitivity Analysis.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

	2023 R	2022 R

52. Risk management (continued)

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality. The municipality has a sound credit control and debt collection policy and obtains sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The municipality uses other publicly available financial information and its own trading records to assess its major customers. The municipality's exposure of its counterparties are monitored regularly.

Potential concentrations of credit rate risk consist mainly of long-term receivables, consumer debtors, other debtors, bank and cash balances.

The municipality limits its counterparty exposures from its investment operations (financial assets that are neither past due nor impaired) by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction / exposure limits, which are included in the municipality's Investment Policy. These limits are reviewed annually by the Chief Financial Officer and authorised by the Council.

Receivables from exchange transactions comprise of a large number of ratepayers, dispersed across different industries and
geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from exchange transactions are presented net of the allowance for impairment.

Receivables from non-exchange transactions comprise of a large number of ratepayers, dispersed across different industries and geographical areas within the jurisdiction of the municipality. Ongoing credit evaluations are performed on the financial condition of these receivables. Receivables from non - exchange transactions are presented net of the allowance for impairment.

The municipality establishes an allowance for impairment that represents its estimate of anticipated losses in respect of receivables. Receivables are provided for based on estimated irrecoverable amounts, determined by reference to a non payment rate.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

Payment to accounts of consumer debtors who are unable to pay, are renegotiated as an ongoing customer relationship in response to an adverse change in the circumstances of the customer.

The municipality does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The municipality defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings.

There is no collateral held for security in respect of consumer debtors.

The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:	2023	2022
Cash and cash equivalents	248 529 665	137 877 710
Short term investments	331 767 247	305 522 446
Receivables from exchange transactions	217 629 743	169 893 585
Other receivables from exchange transactions	6 431 810	5 852 606
Receivables from non-exchange transactions	10 460 788	18 645 756
Long term receivable	4 598 731	6 720 631

Foreign currency risk management

The municipality's activities do not expose it to the financial risks of foreign currency and therefore has no formal policy to hedge volatilities in the interest rate market.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Notes to the Annual Financial Statements

	2023 R	2022 R

52. Risk management (continued)

Other price risks

The municipality is not exposed to equity price risks arising from equity investments as the municipality does not trade these investments.

53. Commitments

57. Additional disclosure in terms of Municipal Finance Management Act (continued)

Councillors' arrear consumer accounts

There were no councillor arear accounts more than 90 days as at 30 June 2023.

Distribution Losses

In terms of section 125(2)(d)(i) of the Municipal Finance Management Act, the municipality experienced the following distribution losses for the year under review.

Electrical distribution losses (KW)		
System Input	344 236 600	393 194 417
Sales	(329 632 095)	(355 429 150)
	14 604 505	**37 765 267**

Electricity losses are calculated as 4.24% (2022: 9.6%). Electricity losses are within the industry norm.

Water distribution losses (KL)		
System Input	10 827 196	10 660 846
Sales	(7 858 877)	(8 669 713)
	2 968 319	**1 991 133**

Water losses are calculated as 27.42% (2022: 18.7%). Water losses are within the industry norm.

58. Retirement benefit information

The municipality makes provision for post-retirement benefits to eligible Councillors and employees who belong to different pension schemes. These funds are governed by the Pension Funds Act and include both defined benefit and defined contribution schemes.

The only obligation of the municipality with respect to the retirement benefit plans is to make the specified contributions. Where councillors / employees leave the plans prior to full vesting of the contributions, the contributions payable by the municipality are reduced by the amount of forfeited contributions.

These schemes are subject to a tri-annual, bi-annual or annual actuarial valuation as set out hereunder.

SALA Pension fund

The SALA Pension Fund operates both as a defined benefit and defined contribution scheme.

The statutory valuation performed as at 1 July 2021 stated that the net assets of the fund amounted to R12 238 000 (30 June 2018: R14 299 000), with funding levels of 85.5% (30 June 2018: 96%). The actuary recommended that employers continue to contribute at the current rate of 19.18% of pensionable salary.

The actuaries are satisfied with the investment strategy of the fund.
The nature of the assets is, in their opinion, suitable for the nature of the liabilities of the Fund as defined in the rules of the fund.The matching of assets with the liabilities of the Fund is adequate; and the insurance arrangements are appropriate compared to the cover provided can be regarded as financially sound at the valuation date.

AUDITOR-GENERAL SOUTH AFRICA
30 November 2023
Auditing to build public confidence

	2023 R	2022 R

58. Retirement benefit information (continued)

LA retirement Fund (Previously Cape Joint Pension Fund)

The LA RETIREMENT FUND operates both as a defined benefit and defined contribution scheme.

Defined benefit scheme

The contribution rate of the defined benefit scheme is 27%; 9% by the members and 18% by their councils. The actuarial valuation report at 30 June 2022 disclosed an actuarial valuation amounting to R1 391 841 000 (30 June 2021: R1 486 110 000), with a net accumulated surplus of R144 158 000 (2021: R69 420 000), with a funding level of 111,6% (2021: 104.9%).

Defined contribution scheme

The actuarial valuation report at 30 June 2021 indicated that the defined contribution scheme of the fund is in a sound financial position, with net assets amounting to R1 976 184 (2021: R2 082 488 000) and with a funding level of 100% (2021: 100%).

Cape Joint Retirement Fund (CRF)

The most recent statutory valuation performed as at 30 June 2022 revealed that the assets of the fund amounted to R36 502 914 (2021:R34 148 000 000), with funding levels of 131,6% and 100,4% (2021:133% and 100.5%) for the Pensions Account and the Share Account respectively. The contribution rate paid by the members 9% and the municipalities 18% is sufficient to fund the benefits accruing from the fund in the future. The actuary certified that the structure of the assets is appropriate relative to the nature of the liabilities, given normal circumstances and that the Fund is in a sound financial condition as at the valuation date.

Municipal Councillors Pension Fund

The Municipal Councillors Pension Fund operates as a defined contribution scheme. The statutory valuation performed as at 30 June 2018 stated that the net assets of the fund amounted to R1 798 030 000 (30 June 2017: R1 480 549 000), with funding levels of 103.26% (30 June 2017: 101.31%). The contribution rate paid by the members (13,75 %) and council (15 %) is sufficient to fund the benefits accruing from the fund in the future. The Actuary certified that the Fund was in a sound financial condition as at 30 June 2018, in that the assets of the fund were sufficient to cover the accrued service liabilities including the recommended Contingency Reserves in full.

The Municipal Workers Retirement Fund (Previously South African Municipal Workers Union National Provident Fund)

The Municipal Workers Retirement Fund is a defined contribution scheme. Members contribute at a rate of not less than 7.5% of salaries, as required by the Rules. The employers contribute at a total rate of not less than 18%.From 1 July 2017, members and employers that fall under other bargaining councils or forums are not bound by the above minimum contribution rates. The statutory valuation performed as at 30 June 2021 stated that the assets of the fund amounted to R 10 866 257 0000 (30 June 2020: R9 021 008 000), with funding levels of 100% (30 June 2020: 100%). As a percentage of members' Fund Credits, the investment smoothing reserve has increased to 6.5% over the valuation period.

AUDITOR-GENERAL SOUTH AFRICA
Auditing to build public confidence

Notes to the Annual Financial Statements

	2023 R	2022 R

58. Retirement benefit information (continued)

National Fund for Municipal Workers

The fund operates as a defined contribution fund and in terms of the rules of the fund category A and category C members contribute at a rate as agreed upon by the Local Authority and the member, subject to an absolute minimum contribution of 2% and 5% of their remuneration respectively. Category C-Members, appointed after 1 July 2012, who are not part of the Schedule shall make monthly contributions to the Fund equal to 7.5% of their pensionable salary.

The most recent statutory valuation performed as at 30 June 2019 stated that the net assets of the fund amounted to R17 107 067 000 (30 June 2018: R15 393 671 000), with funding levels of 100.40% (30 June 2018: 100.46%). The actuary certified that the assets of the fund are sufficient to cover 100.40% of the members' liabilities, also that it can be expected that the funding level of a fund of this nature will fluctuate around 100%, for example due to timing differences in investment and receipt of monies, slight mismatching of assets and liabilities and processing errors.

The Local Authority must contribute in respect of category A and category C members such an amount as agreed between the Local Authority and the fund, subject to a minimum contribution rate of 2% and 5% of their remuneration respectively. Category B members are members who belong to both category A and C and the Local Authority must, on behalf of such members, not contribute less than 7% of their remuneration. The contribution rates stipulated above include the amount payable towards the insured risk benefits policy.

Auditing to build public confidence

	2023 R	2022 R

59. Going concern

We draw attention to the fact that at 30 June 2023, the municipality had an accumulated surplus of R 5 623 651 021.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

60. Deviations from SCM regulations - SCM Regulation 36

In terms of section 36 of the municipality SCM regulations, any deviations from SCM policy needs to be approved by the accounting officer and noted by Council. The awards listed below have been approved by the accounting officer and noted by Council.

All deviations considered by the accounting officer are processed in terms of the SCM regulations and the municipality's SCM
policy. This process entails being assessed by the SCM Bid Adjudication Committee in terms of the stipulated criteria for emergency procurements and circumstances where it is impractical or not possible to follow the official procedure.

Deviation from, and ratification of minor breaches of, the procurement processes

In terms of section 36(2) of the Supply Chain Management Policy approved by Council it is stipulated that bids where the formal procurement processes could not be followed, must be noted in the annual financial statements.

SCM paragraph reverence			
36 (1)(a) i	Dispense with the official procurement processes in an emergency	6 298 623	3 563 056
36 (1)(a) ii	Dispense with official procurement processes if such goods or services are produced or available from a single source or sole provider.	335 943	9 139 368
36 (1)(a) v	Dispense with official procurement processes in any other exceptional case where it is impractical or impossible to follow the official procurement processes.	26 804 533	30 902 451
Total deviations		**33 439 099**	**43 604 875**

The deviations rand value disclosed is representative of the award value. In the event of a rates based award, an estimate is utilised based on certain projected provisions. In the event that an award value in not present, nor an estimate due to certain conditions, the actual expenditure incurred will be disclosed.

A prior period disclosure error has been corrected in the comparative disclosed figures. The error was caused by certain awards that were erroneously included. The effects of the disclosure can be seen below:

61. Budget information

The budget has been prepared on the accrual basis of accounting in accordance with the prescripts of the Municipal budget regulations as well as MFMA budget circulars. In accordance with the Municipal budget regulations, the classification basis the municipality presents its budget is per economic as well as per functional classification (per Vote (Department) and GFS classification). It should be noted that minor budget differences between the basis the budget is prepared (accrual basis and prescripts of NT guidance) and actual financial results (accrual basis in accordance with GRAP) exists, mainly related to technical GRAP adjustments required. These differences are not material and as the basis of preparation is the same (accrual basis) no restatements have been made to the financial information compared to the budgeted amounts, but where found to be material is explained below:

Explanation of variances between approved and final budget amounts

The materiality framework of the municipality informs the determining base ranges. The framework outlines all principles and guiding practices to allow management to enforce a consistent application of the framework's guidelines. With regard to reporting, the understandability and transparency to users of the financial statements was a determining factor when deciding on the base %.

BD1 - Service Charges - Revenue from Service Charges: Electricity: Industrial was R34mil less than anticipated due to loadshedding being implemented

BD2 - Other Revenue - Development Charges revenue is R25mil more than budgeted. Development Charges to the amount of R20.9 million were receipted from December 2022 until June 2023

BD3 - Employee related cost -Included in the Actual of Employee related Cost is a R30.6mil actuarial gain on post employment medical benefit which was not budgeted for. This therefore reduces the total Employee related cost expenditure by R30.6mil overall

BD4 - Debt Impairment - The variance is due to the actual Contribution to impairment loss on receivables for non-exchange and exchange transactions being more than anticipated

BD5 Depreciation - The variance is due to the addition of legacy assets and the unbundled historical work-in-progress assets

BD6 - Contracted services - Savings were identified on Contractors to the value of R27.7mil.

BD7 - Other expenditure- The material variance is due to the negative R69.7mil contributions from provisions

BD8 - Cash - Loan repayments were only effected in the new financial year.

BD9 - Property, plant and equipment - Legacy assets movements were effected in the current year.

BD10 - Trade and other payables - An increase in payables was due to an increase in eskom bulk electricity and loan repayments which were not effected in the current financial year.

BD11 - Provisions - A decrease in material costs and change in interest rate caused the variance to grow larger.

BD12- Borrowings - An additional loan was taken up in the current financial year

BD13- Reserves - An increase in the surplus for the current financial year has contribution to this variance.

CF1 - . The muncipality overcollected in the current year

AUDITOR-GENERAL SOUTH AFRICA

Auditing to build public confidence

Notes to the Annual Financial Statements

	2023 R	2022 R

61. Budget information (continued)

CF2 - The muncipality under collected this period.

CF3 - The difference strems from amounts in relation to rollver funding that was recepited and budgeted for in the prior year.

CF4 - The municipality had a underspending on employee related cost, bulk purchases and paid less suppliers than anticipalted

CF5 - The municipality had an underspending on its capital expenditure budget.

CF6 - The municipality required less funding than anticipated from borrowings

CF7 - Over estimation during forecasting of other revenue.

62. Contingent liabilities

SHAHIEDA JACOBSS/ STELLENBOSCH MUNICIPALITY	200 000	200 000
Shahieda Jacobs instituted legal proceedings against Stellenbosch Municipality and a municipal official for alleged sexual harassment and unfair discrimination in the Labour Court.The Municipality filed its Statement of Response to the Plaintiff's Statement of Claim. .		
RICMAL GREEN (PTY) LTD & ANOTHER / THE UNLAWFUL OCCUPIERS & OTHERS	200 000	200 000
Ricmal Green (Pty) Ltd applied for an interdict that the National Minister of Agriculture, Deputy Minister of Agriculture and the National Government be interdicted and restrained from placing any third parties in occupation of the Property or in any way encouraging, promoting, supporting and or allowing any persons to come onto the farm to occupy the Property. That the persons attempting to occupy the Property be interdicted and restrained from entering onto or remaining on the Property and erecting or attempting to erect any form of structure, be it temporary, permanent or semi-permanent of nature on the Property. Ricmal Green (Pty) Ltd also applied for an urgent eviction application in terms of rule 6(12) against all unlawful occupiers of the Property listed in Annexure A to be ordered to vacate the Property and should they fail/refuse that the Sheriff be ordered to evict them from the Property. Stellenbosch Municipality is sited as Seventh Respondent to the matter. No relief is sought against the Municipality unless the Municipality oppose the application. The Municipality was joined as the Property is situated within its jurisdiction and its statutory and/or constitutional obligations as regards the occupiers. The Municipality is supporting the application of the Applicants and filed an explanatory affidavit		
ANGELA ADELINE MOGOLEGENG / STELLENBOSCH MUNICIPALITY	100 000	100 000
Angela Adeline Mogolegeng applied for Default Judgment against Stellenbosch Municipality for alleged unfair labour practice in relation to failure to promote and/or demotion and alleged that she is being unfairly discriminated against		
SPS / STELLENBOSCH MUNICIPALITY	100 000	100 000
MZ Loghdey t/a Street Parking Solutions submitted a tender, which was awarded to him. The tender was implemented on or about 1 April 2019. A dispute arose between the parties around various issues in terms of the tender. Clause 27.1 of the GCC provides that if any dispute or difference of any kind whatsoever arises between the purchaser and the supplier in connection with or arising out of the contract, the parties shall make every effort to resolve amicably such dispute or difference by mutual consultation. Clause 27.2 provides further if, after thirty (30) days, the parties have failed to resolve their dispute or difference by such mutual consultation, then either the purchaser or the supplier may give notice to the other party of his intention to commence with mediation. No mediation in respect of this matter may be commenced unless such notice is given to the other party. Clause 27.3 provides that should it not be possible to settle a dispute by means of mediation, it may be settled in a South African court of law. Notwithstanding the above clause 27.4 provides that notwithstanding any reference to mediation and/or court proceedings herein the parties shall continue to perform their respective obligations under the contract unless they otherwise agree and the purchaser shall pay the supplier any monies due for goods delivered and/or services rendered according to the prescripts of the contract.Both SPS and the Municipality alleged that certain conditions of the tender/contract was breached and that mediation is required to solve the dispute. A mediator was appointed and a date for the mediation need to be set to argue the matter.

WASTEWANT WASTE MANAGEMENT (PTY) LTD / STELLENBOSCH MUNICIPALITY AND RESOURCE INNOVATIONS AFRICA (PTY) LTD	-	200 000
Wastewant Waste Management (Pty) Ltd ("Wastewant") instituted review proceedings against the decision of Stellenbosch Municipality ("the Municipality"), wherein the Municipality set aside the decision by the Bid Adjudication Committee ("BAC") to award Tender B/SM12/21 to Wastewant. Reviewing the decision of the Municipality dated 23 February 2021, wherein the Municipality awarded tender B/SM12/21 to Resource Innovations Africa (Pty) Ltd. Reviewing and declaring invalid the Appeal Authority's decision in terms of Section 62(3) of the Systems Act, to revoke the decision of the BAC, as same detracted from the rights, which accrued to Wastewant.		
STELLENBOSCH MUNICIPALITY/ILLEGAL OCCUPIERS OF THE OPEN SPACE CLOSE TO THE R44	100 000	100 000
Illegal structures were erected on the open space next to Rietenbos Primary School, Cloetesville ("the Property") close to R44. The Municipality is in the process of instituting eviction proceedings against the illegal occupiers.		
STELLENBOSCH MUNICIPALITY / SURITA LAYMAN & OTHERS	200 000	200 000
Erf 7802 Stellenbosch was incorrectly transferred to Surita Layman. Stellenbosch Municipality is applying for a rectification transfer directing that the transfer of the immovable property situated at Erf 7802 Stellenbosch to Surita Layman be set aside and an order directing the Municipality to transfer the Property to both Surita Layman and Margaret Louisa Layman		
MICHAEL SACHAR /STELLENBOSCH MUNICIPALITY	129 030	129 030
Mr Michael Sachar alleged that his Land Rover Discovery 4 3.0 TD/SD V6 Se motor vehicle on 6 August 2020 collided with a large pot hole at or near Main Road (R45 near BP Garage) Franschhoek..		
STELLENBOSCH MUNICIPALITY / THE CHILDREN MR BESS AND LLEGAL OCCUPIERS	100 000	100 000
Eviction application against the children of Mr Johnny Bess, who was employed by Stellenbosch Municipality and retired from the employ of the Municipality on or about 31 July 2006. Mr Bess passed on and his children continued to occupy the house. There are various complaints from community members that the children who are currently occupying the house are involved in alleged drug dealing and anti-social behaviour. The house is vandalised and not maintained. The surrounding homeowners handed in a petition demanding that the children be evicted from the house due to an increase in illegal activities from the house, which is making living with them unbearable.		
STELLENBOSCH MUNICIPALITY / ILLEGAL OCCUPIERS OF ERF 290 RAITHBY ALSO KNOWN AS PORTION C(TRANSPORT ZONE II – PUBLIC ROAD)	100 000	100 000
Erf 150 Raithby was subdivided in terms of section 25 of the Land Use Planning Ordinance, 15 of 1985 ("LUPO") into three portions namely, Portion A, Portion B, Portion C and Remainder Portion. Portion C will be utilized for road purposes. Erf 150 Raithby was divided into Erf 288 Raithby, Erf 289 Raithby, Remainder Erf 150 Raithby and Erf 290 Raithby the zoning which is Transport Zone II for a public road. The Municipalitry is in the process of instituting eviction and demolition prpceedings against the illegal occupiers.

FUSION PROPERTIES 233 CC / THE MUNICIPALITY OF STELLENBOSCH	33 465 000	33 465 000
This matter involves a summons issued against the Municipality for alleged damages pursuant to the sale of certain immovable property belonging to the Municipality. The amount claimed is R32 115 000.00 together with interest calculated at the rate of 9% per annum from 28 July 2015. The Municipality is defending the action. Pleadings have closed, however, the action is currently stayed. The Plaintiff, having been unsuccessful in its appeals against the High Court's judgment to furnish security, must now furnish security prior to proceeding with the action. The Plaintiff's attorneys of record have, however, withdrawn and the Plaintiff has not taken any steps to advance the matter since February 2021..		
INDEPENDENT SCHOOLS ASSOCIATION OF SOUTHERN AFRICA / ETHEKWINI MUNICIPALITY / STELLENBOSCH MUNICIPALITY & OTHERS	-	250 000
This matter involves an application on behalf of the Municipality to be joined as co-applicant together with eThekwini Municipality in an application for the review and setting aside of the Amended Municipal Property Rates Regulations promulgated on 12 March 2010. The Municipality has been joined successfully as co-applicant.		
STELLENBOSCH MUNICIPALITY / KLAPMUTS MEDIATION	250 000	250 000
Municipality under obligation to provide emergency housing to evictees of various eviction orders in Klapmuts. Klapmuts community has threatened violence against evictees and destruction of property should the municipality proceed to utilise Klapmuts housing facilities for evictees rather than for members of the Klapmuts community. Independent expert mediator appointed to facilitate mediation which is currently pending. Mediator had meetings with the community and a committee was elected to discuss the matter and proposals made. The chairperson of the Committee was not available for a period to attend meetings and new proposed dates were arrange by the mediator for such meetings. The community still refuse the Municipality to implement emergency housing.		
STELLENBOSCH MUNICIPALITY/ NE PROPERTIES (PTY) LTD	200 000	200 000
Application to declare the dissolution of NE Industries void in terms of section 83(4) of the Companies Act and to direct the Companies and Intellectual Property Commission of South Africa to restore NE Industries' name to the register of companies. NE Industries was deregistered and its name was removed from the register of companies on 16 July 2010 due to its failure to file its annual returns. NE Industries is the single largest debtor on the Municipality's debtor's book. The Municipality wants to collect the outstanding amount due to it but established that NE Industries was deregistered as a result of its failure to file its annual returns and its name was removed from the register of companies.		
STELLENBOSCH MUNICIPALITY / IMATU ON BEHALF OF EMPLOYEES	-	200 000

LJ TURNKEY INVESTMENTS (PTY) LTD / STELLENBOSCH MUNICIPALITY	1 552 000	1 552 000
LJ Turnkey Investments (Pty) Ltd ("LJ Turnkey") issued summons against Stellenbosch Municipality for alleged damages suffered by LJ Turnkey as a result of the Municipality allegedly refusing to consider its application submitted for a determination of zoning as contemplated in section 15(2)(m) of the Land Use Planning By-law.		
STELLENBOSCH MUNICIPALITY / LJ TURNKEY INVESTMENTS (PTY) LTD	250 000	250 000
The owner of Portion 9 of Farm 100 Stellenbosch (“the Property”) applied for a declaratory order that the Property is being utilised for residential purposes and thus effectively allows them to utilise the Property for student accommodation.The Municipality opposed the declaratory order and filed its answering affidavit. The Municipality has instituted a counter-application in the form of, amongst others, interdict proceedings against the owner’s illegal utilisation of the property for student and/or any other rental accommodation. The Municipality has also instituted a chamber book application to compel the owner, LJ Turnkey Investments (Pty) Ltd, to serve and file its answering affidavit in the counter-application. LJ Turnkey Investments (Pty) Ltd has now served its replying affidavit in the main application as well as it answering affidavit in the counter (interdict) application. LJ Turnkey Investments (Pty) Ltd also filed a Notice of Intention to Amend and an application to have certain parts or paragraphs of the Municipality's affidavits struck out. The Municipality has filed its replying affidavit in the counter-application and the matter has been set down for hearing on 17 October 2022. This matter does not involve any amounts claimed.

STELLENBOSCH MUNICIPALITY // CABZUS (PTY) LTD	200 000	-

Cabzus (Pty) Ltd instituted review proceedings against the Municipality reviewing and setting aside the decision taken on 13 April 2022 requiring Cabzus to pay an alternative building plan fee in the amount of R652 801.41 and or the refusal as communicated to Cabzus on 24 June 2022 to reconsider the imposition of the alternative building plan fee and ordering the Municipality to repay the amount of R652 801.41 including interest thereon.
The Municipality opposed the application and filed its notice of opposition. The Rule 53 record was also filed.
We await Cabzus supplementary affidavit in this matter.

STELLENBOSCH MUNICIPALITY/ FRANSCHHOEK JEUGSENTRUM TRUST	100 000	-

Legal opinion requested from attorneys to establish whether the trustees including Mr Van der Westhuizen were entitled to amend the trust deed and clause 12 thereof without a resolution from Stellenbosch Municipal Council and if not what legal steps can be taken against them.
Opinion obtained to apply to Court for a declaratory order.

MUNICIPAL LANDFILL SITE	-	-

The municipality has a present obligation to rehabilitate the landfill site which stems from licensing agreements 16/2/7/G203/D16/Z1/P331) issued in terms of the Environmental Conservation Act, 1989 (Act 73of 1989),E13/2/10/7-B4/37-WL0077/11 issued in terms of the National Environmental Management: Waste Act, 2008 (Act no. 59 of 2008) (NEMWA) and license number 19/2/5/1/B4/46/WL0118/14 issued in terms of NEMWA. The obligation is immediately enforceable upon closure of the landfill site. As part of these licensing obligations, the municipality is responsible for post-closure obligations namely, ground water monitoring, decommissioning, monitoring committee and gas monitoring. The duration of the time for the cost to be incurred is contingent on the decision making of the regional director as stipulated in the licence conditions. At 30 June 2023, a decision has not been made by the regional director on the post-closure obligations for the municipality as per the licence agreements, as a result thereof, a reliable estimate of the costs to be incurred cannot be reliable estimated due to the uncertainty of the key events contained within the licencing conditions. .

STELLENBOSCH MUNICIPALITY/ ELIZABETH RHODA	200 000	-

Unfair discrimination referred by Elizabeth Rhoda to the CCMA under case number WECT4519-18 on or during 13 March 2018 under section 10(2) of the Employment Equity Act. Rhoda submitted that the discrimination was ongoing since 2015 and that no condonation was required. She did not apply for condonation and the commissioner found against her. Rhoda took the matter on review and the Labour Court found in her favour. Rhoda applied for a date to set her unfair discrimination dispute under case number WECT4519-18 down for hearing and to have the directive of 12 August 2021 reviewed and set aside.
The matter was argued before the CCMA and pursuant thereto set down for conciliation. The dispute remains unresolved and a certificate was issued by the CCMA that the dispute remains unresolved and that same should be referred to the Labour Court.

63. Segment information

General information

Identification of segments

The municipality is organised and reports to management on the basis of four major functional areas. These four functional segments are governance and administration, community and public safety,economic and enviromental services as well as trading services. The segments were organised around the type of service delivered and the target market.

Information reported about these segments is used by management as a basis for evaluating the segments' performances and for making decisions about the allocation of resources. The disclosure of information about these segments is also considered appropriate for external reporting purposes.

Reportable segments are identified based on activities performed of the municipality that generates economic benefits or service potential including internal services that contribute to achieving the municipality's objectives without necessarily generating net cash inflows.

Management has only identified segment information for which data is reported on and reviewed during the decision making process of the municipality. Aspects relating to GRAP 18 paragraph 21 (a) - (j) which does not form part of the review process of the management reports will not form part of the segment information.

Segmental reporting was based and identified on the MFMA S71 monthly budget statements/reports that are reviewed by senior management and council to make strategic decisions and in monitoring segment performance. The disclosure of information about segments in these reports are organised around the type of service delivered, in a standardised format namely the C2 schedule. This is considered appropriate for external reporting purposes to achieve the objectives of GRAP 18.

Types of goods and/or services by segment

These reportable segments as well as the goods and/or services for each segment are set out below:

Reportable segment	Goods and/or services
Community and public safety	Primary services providing community safety, crime prevention and law enforcement.
Governance and administration	Primary services in relation to financial management,financial and governance decision making.
Economic and environmental services	Urban and developmental planning in accordance with therelevent laws and regulations. Environmental planning andprotection for long term sustainibility.
Trading services	Primary basic service provision including water, electricity,sanitation and refuse.

Measurement of segment surplus or deficit, assets and liabilities

Basis of accounting for transactions between reportable segments

The accounting policies of the segments are the same as those described in the summary of significant accounting policies..

Information about geographical areas

All the municipality's operations are located in the Republic of South Africa in the Cape Winelands area. Information to report on different geographical areas is not available would be expensive and impractical to develop.:

64. Prior period error and reclassification (continued)

64.3 Correction of errors

The following prior period errors adjustments occurred:

Property, plant and equipment

Items of property, plant and equipment was identified as not present on the fixed asset register. Consequently these items were capitalised on the fixed asset register.Movable items were also not found during the annual stock take, these items consequently disposed of in the fixed asset register. There were also changes in residual values in the current year. The effect of these items are presented below:

Nature of error		
Amount previously reported	-	5 562 988 212
Correction of error - Accumalated surplus	-	18 749 630
Correction of error - Payables from exchange	-	74 381
Correction of error - Depreciation reversal	-	(7 670 070)
	-	**5 574 142 153**

Investment property

Investment property items were erroneously excluded from the fixed asset register.

Nature of error		
Amount previously reported	-	411 892 012
Addtions to the fixed asset register - Accumalated surplus	-	16 330 000
Disposals of property, plant and equipment	-	(481 500)
Correction of error - Depreciation	-	(448)
	-	**427 740 064**

Employee Benefits

An amount of R1 164 517 was incorrectly paid out an incorrect vote. This was subsequently corrected. The contra leg for this correction was the employee related cost.

Nature of error		
Amount previously reported	-	60 750 863
Correction of error - Employee related costs	-	(1 164 517)
	-	**59 586 346**

Payables from non-exchange transactions

Revenue recognised erroneously in relation of grants received.

Nature of error		
Amount previously reported	-	31 403 223
Correction of error - Transfers and subsidies	-	(1 706 950)
	-	**29 696 273**

Notes to the Annual Financial Statements

65. Additional disclosure in terms of the Broad-Based Black Economic Empowerment Act

Information on compliance with the Broad-Based Black Economic Empowerment Act (B-BBEE) is included in the Annual Report under the section titled Employment Equity.

66. Events after the reporting date

The subsequent approval of the upper limits in relation to remuneration of councillors provides evidence of a condition that existed at the reporting date, which is the unrecognised contingent liability as well as the councilors performing the services during the year. The above event constitutes an adjusting event after the reporting period in terms of paragraph 7 of GRAP 14 and will affect the payables from exchange transactions and the remuneration of councillors line items in the annual financial statements.

1. PURPOSE

The Annual Performance Report 2022/23 is hereby submitted to the Stellenbosch Municipal Council in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), Sections 46(1) and (2). The report covers the municipality's performance information from 01 July 2022 to 30 June 2023 and focuses on the implementation of the Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2022/23, concerning the objectives as encapsulated in the municipality's Integrated Development Plan (IDP) for the year under review.

The format of the report will reflect the Stellenbosch Municipality's Key Performance Indicators (KPIs) per Strategic Focus Area (SFA).

This report will also endeavour to report to the Council on the municipality's performance in terms of the five (5) National Government's Key Performance Areas for local government, which are (1) Basic Service Delivery; (2) Local Economic Development; (3) Municipal Institutional Transformation and Development; (4) Municipal Financial Viability and Management; and (5) Good Governance and Public Participation.

2. LEGISLATIVE REQUIREMENTS

This Annual Performance Report has been compiled in compliance with the requirements of Section 46(1) of the MSA, which stipulates that:

(1) A municipality must prepare for each financial year a performance report reflecting—
- (a) the performance of the municipality and each external service provider during that financial year;
- (b) a comparison of the performance referred to in paragraph (a) with targets set for performance in the previous financial year; and
- (c) measures taken to improve performance.

In addition, regulation 7(1) of the Local Government: Municipal Planning and Performance Management Regulations, 2001 states that "a municipality's performance management system entails a framework that describes and represents how the municipality's cycle and processes of performance planning, monitoring, measurement, review, reporting, and improvement will be conducted, organised, and managed, including determining the roles of the different role players." Performance management is not only relevant to the organisation as a whole but is also applicable to the individuals employed in the organisation as well as the external service providers.

3. MUNICIPAL OVERVIEW

Stellenbosch town is the second-oldest town in South Africa, dating back to 1679, when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area started that year. Today, the area has become primarily known for its extraordinary wines, fruit, world-renowned cultural landscapes, and exceptional scenic quality. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian, and Victorian, which reflect their rich heritage and traditions but also the divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch, Boland College, sports and culinary institutions, and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. The area's numerous wine farms and cellars are very popular, and the area is the home of the very first wine route in South Africa.

The town boasts a variety of sports facilities. Coetzenburg, with its athletics and rugby stadiums, has hosted star performances over many generations, while the Danie Craven Stadium is the home of Maties Rugby, the largest rugby club in the world. The municipal area has several theatres, which include the University's HB Thom Theatre, Spier Amphitheatre, Dorpstraat Theatre, Aan de Braak Theatre, and Oude Libertas Amphitheatre, all well-known for their summer seasons of music, theatre, and dance.

Limited municipal resources require an increase in multi-sectoral partnerships to address the broad spectrum of needs in the community. The municipality cannot address the challenges of Stellenbosch on its own, not only because of limited resources but also because it does not control all the variables impacting the growth and development of the town. Welfare and community organisations play a leading role in helping to meet the needs of previously neglected communities. The business sector also plays a key role in shaping the economic development of the municipal area.

4. PERFORMANCE MANAGEMENT OVERVIEW

To improve planning, implementation, measurement, and reporting, the municipality implemented the following actions:

- Departmental operational plans were developed for monitoring and reporting operational programmes;
- An electronic performance management system is operational within the municipality. The same system forms the basis of the performance evaluations of the Directors and the Municipal Manager; and
- The municipality endeavoured during the development of the TL SDBIP as well as with the development of the Departmental SDBIP that the "SMART" principle be adhered to in the setting of indicators and targets. Emphasis was placed on ensuring that indicators and targets were specific and time-bound, thus making them measurable.

4.1 Top Layer Service Delivery and Budget Implementation Plan

The organisational performance is evaluated using a Municipal Scorecard (the TL SDBIP) at the organisational level and through the Service Delivery and Budget Implementation Plan (SDBIP) at the directorate and departmental levels.

The SDBIP is a plan that converts the IDP and Budget into measurable indicators of how, where, and when the municipality's strategies, objectives, and normal business processes are implemented. It also allocates responsibilities to directorates to deliver the services in terms of the IDP and Budget.

The MFMA Circular No. 13 prescribes that:

- The IDP and budget must be aligned;
- The budget must address the strategic priorities;
- The SDBIP should indicate what the municipality is going to do during the next 12 months; and
- The SDBIP should form the basis for measuring performance against goals set during the budget / IDP processes.

The TL SDBIP 2022/23 was prepared as described in the paragraphs below and approved by the Executive Mayor on 22 June 2022.

The approved TL SDBIP 2022/23 was revised in February 2023. These revisions were made in line with the adjustment budget, internal audit findings, and (if any) recommendations made by the Auditor General of South Africa (AGSA).

The overall assessment of actual performance against targets set for the Key Performance Indicators as documented in the SDBIP is illustrated in terms of the following assessment methodology:

Table 5: Performance Assessment Criteria

Colour	Category	Explanation
N/A	KPI Not Yet Measured	KPIs with no targets or actual results for the selected period
R	KPI Not Met	Actual vs. target less than 75%
O	KPI Almost Met	Actual vs. target between 75% and 100%
G	KPI Met	Actual vs. target 100% achieved
G2	KPI Well Met	Actual vs. target more than 100% and less than 150% achieved
B	KPI Extremely Well Met	Actual vs. target more than 150% achieved

The TL SDBIP (the Municipal Scorecard) consolidates service delivery targets set by Council / Senior Management and provides an overall picture of performance for the municipality as a whole, reflecting performance on its strategic priorities. The TL SDBIP is a detailed one-year plan, and the necessary components should include:

- Monthly projections of revenue to be collected for each source;
- Expected revenue to be collected, not billed;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Non-financial, measurable performance objectives in the form of targets and indicators; and
- A detailed capital project plan broken down by ward over three years.

4.2 Departmental Service Delivery and Budget Implementation Plan

The Departmental Service Delivery and Budget Implementation Plan (the detailed SDBIP) captures each Directorate's performance. Unlike the TL SDBIP, which reflects on the strategic performance of the municipality, the Departmental SDBIP 2022/23 provides a comprehensive picture of the performance per directorate, department, and section. It was compiled by the directors and senior managers for their respective departments and sections and consists of objectives, indicators, and targets derived from the approved TL SDBIP 2022/23.

5. PLANNED TARGETS VS ACTUAL RESULTS FOR THE 2022/23 FINANCIAL YEAR

This section of the Annual Performance Report 2022/23 will report on the municipality's actual performance against the planned targets as derived from the municipality's IDP. Because the municipality has developed five (5) Strategic Focus Areas (SFAs), the performance reporting will follow these themes.

5.1 Municipal Performance per National Key Performance Indicator

5.1.1 Municipal Transformation and Institutional Development

Table 6: NKPA- Municipal Transformation and Institutional Development

INDICATOR	MUNICIPAL ACHIEVEMENT 2021/22	MUNICIPAL ACHIEVEMENT 2022/23
The number of people from employment equity target groups employed in the three highest levels of management in compliance with a municipality's approved employment equity plan	3	3
The percentage of a municipality's budget actually spent on implementing its workplace skills plan	R 2 567 666 / R 598 305 199 x 100 = 0.43%	R 5 491 014 / R 611 731 735 = 0.89%

5.1.2 Basic Service Delivery

Table 7: NKPA- Basic Service Delivery

INDICATOR	MUNICIPAL ACHIEVEMENT 2021/22*	MUNICIPAL ACHIEVEMENT 2022/23*
The percentage of households earning less than R6,500 per month with access to free basic services (In the case of Stellenbosch Municipality- the percentage of registered Indigent households is being reported)	100%	100%
The percentage of households with access to basic level of water	100%	100%
The percentage of households with access to basic level of sanitation	100%	100%
The percentage of households with access to basic level of electricity	100%	100%
The percentage of households with access to basic level of solid waste removal	100%	100%

** The percentage of households with access to a basic level of water, sanitation, electricity and solid waste services is based on formal households only. The information on informal households and backyard dwellings was not taken into account.*

5.1.3 Local Economic Development

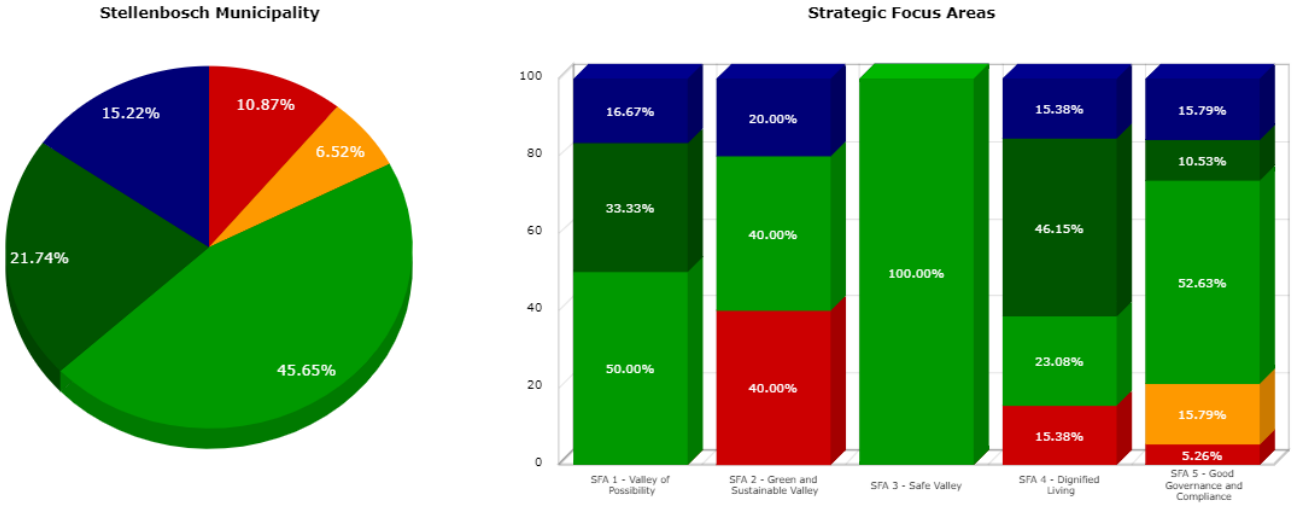
Table 8: NKPA- Local Economic Development

INDICATOR	MUNICIPAL ACHIEVEMENT 2021/22	MUNICIPAL ACHIEVEMENT 2022/23
The number of jobs created through the municipality's local economic development initiatives including capital projects	1 439	1 449

5.1.4 Municipal Financial Viability and Management

Table 9: NKPA- Municipal Financial Viability and Management

INDICATOR	MUNICIPAL ACHIEVEMENT 2021/22	MUNICIPAL ACHIEVEMENT 2022/23
Debt coverage ((Total operating revenue - operating grants received) / Debt service payments due within the year)	17.55%	33.22%
Service debtors to revenue (Total outstanding service debtors / Annual revenue received for services)	15.56%	30%
Cost coverage ((Available cash + investments) / Monthly fixed operating expenditure)	3	4.04



5.1.5 Good Governance and Public Participation

Table 10: NKPA- Good Governance and Public Participation

INDICATOR	MUNICIPAL ACHIEVEMENT 2021/22	MUNICIPAL ACHIEVEMENT 2022/23
The percentage of a municipality's capital budget actually spent on capital projects identified for a particular financial year in terms of the municipality's integrated development plan	84.29%	84.79%

5.2 Overall Performance per Municipal Strategic Focus Area

The following graph and table illustrate the Municipality's overall performance per Municipal Strategic Focus Area (SFA).

Stellenbosch Municipality		Municipal Strategic Focus Areas (SFAs)				
		SFA 1 - Valley of Possibility	SFA 2 - Green and Sustainable Valley	SFA 3 - Safe Valley	SFA 4 - Dignified Living	SFA 5 - Good Governance and Compliance
KPI Not Yet Measured	-	-	-	-	-	-

MUNICIPALITY • UMASIPALA • MUNISIPALITEIT

Report of the Audit and Performance Audit Committee

This report of the Audit and Performance Audit Committee of Stellenbosch Municipality is in respect of the 2022/2023 financial year. The Audit and Performance Audit Committee has complied with its responsibilities in terms of Section 166 of the MFMA and applicable National Treasury Regulations. The Committee has also regulated its affairs and discharged its responsibilities concordant to the approved Audit Committee Charter. The Committee's operation is guided by the MFMA, the King IV report on Corporate Governance and International Institute of Internal Auditor's Standards.

The Committee consisted of four independent members, elected by the Council: Linda Nene (Chairperson), Tsepo Lesihla, Vincent Botto and June Williams. Members Lesihla and Botto's term came to an end on 31 August 2023. Council appointed Ms Ruth Strydom and Ms Reyhana Gani on 27 September 2023 to fill these vacancies. The Municipal Manager, Chief Financial Officer, Directors, Chief Audit Executive, Senior Manager Governance, Chief Risk Officer, MPAC Chairperson, and External Auditors are permanent invitees to the Committee meetings.

Execution of Functions

The Audit and Performance Audit Committee has executed its duties and responsibilities during the financial year in accordance with its terms of reference as they relate to the Council's accounting, external and internal auditing processes, internal control, governance, predetermined objectives and performance monitoring, compliance with laws and regulations, risk management, combined assurance and information technology governance and financial reporting practices.

During the year under review, the Committee, amongst other matters,

1.1 In respect of the External Auditors and the External Audit

i. Approved the External Auditors' (Auditor-General of RSA) terms of engagement and strategy, the audit plan and budgeted audit fees payable;
ii. Engaged and interrogated extensively the Audit report and management report of the Auditor General at the Audit and Performance Audit Committee meeting dated 28th November 2023;
iii. Considered the audit outcome of the Municipality extensively and communicated the Audit and Performance Audit Committee's satisfaction and congratulated the Accounting Officer and Management on the Clean Audit Outcome;

iv. Based on the audit outcome recommendations were made by the Audit and Performance Audit Committee on the other important matters as well as control deficiencies identified in the Auditor-Generals' management report;
v. Management have been requested by the Audit and Performance Audit Committee to improve business processes impacting the annual financial statements compilation and reconciliations of transactions, more specially to limit repeat findings relating to errors on the AFS;
vi. Management are urged to strengthen controls to adequately monitor non-compliance with laws and regulations on a timely basis;
vii. Management were requested to concentrate on accurate presentation and review of the annual financial statements submitted to the Auditor General for audit;
viii. The supervision and review process needs to be interrogated to prevent, detect and correct misstatements on a timely basis and the controls designed to monitor compliance with regulations that are not always able to prevent or report the instances of non-compliance in a timely manner to allow for corrective action; and
ix. The quality of submitted financial statements can still be improved on; thus, management is encouraged to develop action plans early to allow for the improvement in the next reporting cycle.

1.2 In respect of the Annual Financial Statements (AFS)

i. Confirmed the going concern as the basis of preparation of the annual financial statements;
ii. Examined, reviewed and interrogated the annual financial statements, performance report as well as financial information disclosed to the public prior to submission and approval by Council;
iii. Reviewed reports on the adequacy of the portfolio and specific impairments and impairment of other assets;
iv. Ensured that the annual financial statements fairly represented the financial position of the Stellenbosch Municipality as at the end of the financial year in accordance with South African Standards of GRAP and in the manner required by the MFMA and DORA;
v. Considered the appropriateness of accounting treatments, significant unusual transactions and management accounting judgements;
vi. Considered the appropriateness of the accounting policies adopted by Management and changes thereto;
vii. Through the Chairperson, met separately over the course of the year with the Chief Audit Executive and the Municipal Manager;
viii. Reviewed any significant legal and tax matters that could have a material impact on the financial statements; and
ix. Noted that there were no material reports or complaints received concerning accounting practices, internal financial controls, content of annual financial statements, internal controls and related matters.

1.3 In respect of Internal Control and Internal Audit

i. Reviewed and approved the internal audit mandate, annual and three-year rolling audit plans and evaluated the independence, effectiveness and performance of the Internal Audit Department and compliance with its mandate;
ii. Considered reports of the Internal and external auditors on Council's system of internal control, including internal financial controls and maintenance of effective internal control systems;
iii. Reviewed significant issues raised by the internal audit process and the adequacy of corrective action in response to such findings;
iv. Reviewed significant differences of opinion between the internal audit function and Management and noted that there were no material issues of difference raised and all matters were addressed and resolved;

v. Assessed the adequacy of the performance of the internal audit function and found it to be effective in providing assurance;
vi. Reviewed and monitored the quality assurance and improvement plan submitted by internal audit as required by the IIA Standards;
vii. Assessed the adequacy and sufficiency of available internal audit resources and found these to be limited, as more resources would be required to evaluate the control weaknesses and high-risk areas identified in both the corporate strategic risk, external audit and the audit universe;
viii. Received limited assurance that proper and adequate accounting records were maintained and that systems have been integrated to compile accurate AFS free of errors which needed adjustments after the AGSA's review;
ix. Based on the above, the Committee's opinion at the date of this report is that there were some breakdowns in internal control, including internal financial controls, for the year under review in the following areas (it is noted that management are in the process of addressing these concerns):

- Revenue Management – Income and debtors
- Recruitment and Selection
- Pre-determined objectives
- Monthly or regular reconciliations of assets, debtors, and creditors
- Compilation of mid-year or interim AFS

x. In addition, the Committee noted Management's improved responses to conclude on internal findings from the prior and current year as reported in the internal audit follow up reports.

1.4 In respect of Legal and Compliance with Laws and Regulations

i. Reviewed with management matters that could have a material impact on Council;
ii. Monitored compliance with the MFMA and other key legislation applicable to the Municipality, requirements of National and Provincial Treasury, Council's policies, and all other applicable legislation and codes of good governance;
iii. Reviewed reports from the internal and external auditors detailing the extent of compliance.

1.5 In respect of Risk Management, Combined Assurance and Information Technology

During the period under review, Management presented Strategic and Operational Risk profiles for the Municipality to the Audit and Performance Audit Committee who:

i. Considered and reviewed reports from Management on risk management, including fraud risks and information technology risks as they pertain to financial reporting and the going concern assessment;
ii. In respect of the coordination of assurance activities, the Committee reviewed the plans and work outcomes of the external and internal auditors and concluded that these were adequate to address all significant financial, operational and compliance risks facing the Municipality;
iii. Noted the progress made in terms of Combined Assurance and the co-ordination between assurance providers to mitigate the top 10 strategic risks facing the Municipality as well as the emerging risks;
iv. The Audit and Performance Audit Committee took cognisance that Information Technology and IT systems controls improved in the Auditor General's Management report. Member Tsepo Lesihla, ICT expert, has been appointed to the ICT committee to support management in this respect.

1.6 In respect of Pre-Determined Objectives (PDO's)

The Audit and Performance Audit Committee:

i. The quality of submitted performance information in the Management report is indicated as satisfactory. There were no material findings reported on performance information by the Auditor General and Internal Audit, respectively.
ii. Internal audit has also provided the Audit and Performance Audit Committee with reports on performance on a quarterly basis and no critical findings have been raised.

1.7 In respect of the Finance Function

The Audit and Performance Audit Committee:

i. Considered the existing expertise, resources and experience of the organisation-wide finance functional capacity and has noted that the improvement year on year on the quality of the annual financial statements submitted to the Committee and the AGSA. The number of misstatements corrected on the annual financial statements are noted and impact of external factors recognised. Management intends to report on an action plan in this respect.

ii. The Chief Financial Officer should continue to ensure appropriate measures are in place for the accurate and timeous submission of information to the Office of the Auditor-General.

1.8 Independence of the External Auditors

The Audit and Performance Audit Committee is satisfied that the Audit General of RSA (AGSA) were independent of the Council. This conclusion was arrived at, inter alia, after taking into account the following factors:

i. The presentations made by the Auditor-General to the Audit and Performance Audit Committee;
ii. The Auditors' independence was not impaired by any consultancy, advisory or other work undertaken by the auditors; and

1.9 General

i. The Audit and Performance Audit Committee has monitored quarterly the Municipality's implementation plan for audit issues raised in the prior year and are satisfied that the matters have been adequately addressed and resolved. Of all the matters raised in the 2022/2023 audit outcome, one (1) has been repeat a finding. The Audit and Performance Committee has raised its concern around the repeat findings and the other important matters raised in the Auditor-General's Management Report. The Municipal Manager has given assurance that all of these will be addressed as urgent and tracked for the 2023/2024 financial year.

ii. The Audit and Performance Audit Committee concurs and accepts the conclusions of the External Auditor on the annual financial statements and is of the opinion that the audited annual financial statements be accepted and read together with the report of the Auditor-General.

Stellenbosch Municipality has increasingly been stable in the areas of second and third levels of assurance and governance over a three-year period. There has also been stability in the leadership over the past five financial years. The areas for concern, and where attention is required are highlighted above. The Audit and Performance Committee has made recommendations in these areas which management have committed to.

1.10 Conclusion

I am extremely grateful to the members of the Committee for their dedication and high levels of professionalism and diligence in their duties, as well as their flexibility in accommodating last-minute calls to duty. We are fortunate to have the diversity of skills and expertise available to the Municipality. It would be amiss not to convey on behalf of the Committee our appreciation to the Mayor, the entire Council and its Committees for the leadership, support and oversight they have provided during the year.

Finally, the Audit and Performance Audit Committee would like to express its appreciation to Management, Internal Audit, Risk Management and the Auditor General of South Africa for the support and co-operation extended during the financial year and for providing the relevant information to enable the Audit and Performance Audit Committee to compile this report. This past year was again challenging, however Stellenbosch Municipality should be proud of its elected and appointed leaders for taking control and driving an agenda of sustainability and service delivery and improving its audit results in the process, during a time of great fluidity.

On behalf of the Audit and Performance Audit Committee.

Mr Linda C. Nene FIIA SA, CPrac (SA), CCSA, CRMA
Chairperson Audit and Performance Audit Committee
11 January 2024

ANNEXURE D: REPORT OF THE AUDITOR GENERAL OF SOUTH AFRICA 2022/23

Report of the auditor-general to the Western Cape Provincial Parliament and council on the Stellenbosch Municipality

Report on the audit of the financial statements

Opinion

1. I have audited the financial statements of the Stellenbosch Municipality set out on pages 6 to 130, which comprise the statement of financial position as at 30 June 2023, statement of financial performance, statement of changes in net assets, cash flow statement and statement of comparison of budget and actual amounts for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.

2. In my opinion, the financial statements present fairly, in all material respects, the financial position of the Stellenbosch Municipality as at 30 June 2023 and its financial performance and cash flows for the year then ended in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) and the requirements of the Municipal Finance Management Act 56 of 2003 (MFMA) and the Division of Revenue Act 5 of 2022 (Dora).

Basis for opinion

3. I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the responsibilities of the auditor-general for the audit of the financial statements section of my report.

4. I am independent of the municipality in accordance with the International Ethics Standards Board for Accountants' *International code of ethics for professional accountants (including International Independence Standards)* (IESBA code) as well as other ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA code.

5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Emphasis of matters

6. I draw attention to the matters below. My opinion is not modified in respect of these matters.

Restatement of corresponding figures

7. As disclosed in note 64 to the financial statements, the corresponding figures for 30 June 2022 were restated as a result of errors in the financial statements of the municipality at, and for the year ended 30 June 2023.

Material Impairments

8. As disclosed in note 5 to the financial statements, the municipality provided for the impairment of trade and other receivables from exchange transactions of R238,8 million (2021-22: R204,3 million).

9. As disclosed in note 6 to the financial statements, the municipality provided for the impairment of trade and other receivables from non-exchange transactions of R230,1 million (2021-22: R187,6 million).

Other matter

10. I draw attention to the matter below. My opinion is not modified in respect of this matter.

Unaudited disclosure notes

11. In terms of section 125(2)(e) of the MFMA, the municipality is required to disclose particulars of non-compliance with the MFMA in the financial statements. This disclosure requirement did not form part of the audit of the financial statements and, accordingly, I do not express an opinion on it.

Responsibilities of the accounting officer for the financial statements

12. The accounting officer is responsible for the preparation and fair presentation of the financial statements in accordance with the GRAP and the requirements of the MFMA and Dora, and for such internal control as the accounting officer determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

13. In preparing the financial statements, the accounting officer is responsible for assessing the municipality's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern, and using the going concern basis of accounting unless the appropriate governance structure either intends to liquidate the municipality or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the auditor-general for the audit of the financial statements

14. My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

15. A further description of my responsibilities for the audit of the financial statements is included in the annexure to this auditor's report.

Report on the audit of the annual performance report

16. In accordance with the Public Audit Act 25 of 2004 (PAA) and the general notice issued in terms thereof, I must audit and report on the usefulness and reliability of the reported performance against predetermined objectives for the selected strategic focus area presented in the annual performance report. The accounting officer is responsible for the preparation of the annual performance report.

17. I selected the following strategic focus area presented in the annual performance report for the year ended 30 June 2023 for auditing. I selected a strategic focus area that measures the municipality's performance on its primary mandated functions and that is of significant national, community or public interest.

Strategic focus area	Page numbers	Purpose
Strategic focus area 4 – dignified living	15 to 17	Provision of basic services to all citizens in the greater Stellenbosch area to ensure that everyone has access to a dignified life, sustainable human settlements and develop and implement social infrastructure.

18. I evaluated the reported performance information for the selected strategic focus area against the criteria developed from the performance management and reporting framework, as defined in the general notice. When an annual performance report is prepared using these criteria, it provides useful and reliable information and insights to users on the municipality's planning and delivery on its mandate and objectives.

19. I performed procedures to test whether:

- the indicators used for planning and reporting on performance can be linked directly to the municipality's mandate and the achievement of its planned objectives
- the indicators are well defined to ensure that they are easy to understand and can be applied consistently, as well as verifiable so that I can confirm the methods and processes to be used for measuring achievements
- the targets can be linked directly to the achievement of the indicators and are specific, time bound and measurable to ensure that it is easy to understand what should be delivered and by when, the required level of performance as well as how performance will be evaluated
- the indicators and targets reported on in the annual performance report are the same as those committed to in the approved initial or revised planning documents
- the reported performance information is presented in the annual performance report in the prescribed manner
- there is adequate supporting evidence for the achievements reported and for the measures taken to improve performance.

20. I performed the procedures for the purpose of reporting material findings only and not to express an assurance opinion or conclusion.

21. I did not identify any material findings on the reported performance information for the selected strategic focus area.

Other matter

22. I draw attention to the matter below.

Achievement of planned targets

23. The annual performance report includes information on reported achievements against planned targets and measures taken to improve performance.

24. The municipality plays a key role in delivering services to South Africans. The table that follows provides information on the achievement of planned targets and lists the key service delivery indicators that were not achieved as reported in the annual performance report. Measures taken to improve performance are included in the annual performance report on pages 15 to 17.

Strategic focus area 4 – dignified living

Targets achieved: 85% *Budget spent: 109%*		
Key service delivery indicator not achieved	**Planned target**	**Reported achievement**
TL23 - Installation of new standpipes	50	26
TL28 - Limit unaccounted water to less than 25%	<25%	27,42%

Report on compliance with legislation

25. In accordance with the PAA and the general notice issued in terms thereof, I must audit and report on compliance with applicable legislation relating to financial matters, financial management and other related matters. The accounting officer is responsible for the municipality's compliance with legislation.

26. I performed procedures to test compliance with selected requirements in key legislation in accordance with the findings engagement methodology of the Auditor-General of South Africa (AGSA). This engagement is not an assurance engagement. Accordingly, I do not express an assurance opinion or conclusion.

27. Through an established AGSA process, I selected requirements in key legislation for compliance testing that are relevant to the financial and performance management of the municipality, clear to allow consistent measurement and evaluation, while also sufficiently detailed and readily available to report in an understandable manner. The selected legislative requirements are included in the annexure to this auditor's report.

28. I did not identify any material non-compliance with the selected legislative requirements.

Other information in the annual report

29. The accounting officer is responsible for the other information included in the annual report. The other information referred to does not include the financial statements, the auditor's report and the selected strategic focus area presented in the annual performance report that have been specifically reported on in this auditor's report.

30. My opinion on the financial statements, the report on the audit of the annual performance report and the report on compliance with legislation do not cover the other information included in the annual report and I do not express an audit opinion or any form of assurance conclusion on it.

31. My responsibility is to read this other information and, in doing so, consider whether it is materially inconsistent with the financial statements and the selected strategic focus area presented in the annual performance report or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

32. I did not receive the other information prior to the date of this auditor's report. When I do receive and read this information, and if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the other information be corrected. If the other information is not corrected, I may have to retract this auditor's report and re-issue an amended report as appropriate. However, if it is corrected this will not be necessary.

Internal control deficiencies

33. I considered internal control relevant to my audit of the financial statements, annual performance report and compliance with applicable legislation; however, my objective was not to express any form of assurance on it.

34. I did not identify any significant deficiencies in internal control.

Other reports

35. I draw attention to the following engagements conducted by various parties. These reports did not form part of my opinion on the financial statements or my findings on the reported performance information or compliance with legislation.

36. During the 2021-22 financial year the public protector investigated allegations of improper conduct and maladministration at the Stellenbosch Municipality. These allegations related to irregularities in the appointment of two senior officials at the municipality. The public protector's report was submitted to the municipality on 30 March 2022. On 21 June 2022, the municipality submitted a response to the public protector and pursued a review application. The review application was heard by a high court on 28 November 2022. The high court set aside the findings of the public protector. This matter has therefore been concluded.

37. On 18 October 2022 the municipality appointed a service provider to investigate instances of irregular and fruitless and wasteful expenditure that was included in notes 55.2 and 55.3 to the 2021-22 financial statements. This expenditure was incurred on information technology licences procured from various service providers. The investigation was to determine whether unauthorised, irregular and/or fruitless and wasteful expenditure was incurred as a result of the software upgrades of licences purchased, whether legislated procurement processes were followed with the respective service providers and whether evidence of misconduct by officials for the appointment of the service providers exist. The investigation was concluded during August 2023. Recommendations were made to the municipality to improve its current supply chain management control environment relating to filing of procurement documentation, bid specification committee minutes and the supply chain management checklist. It also recommended a review of its information and communication technology strategic plan as it relates to the identification of technology needs. Irregular expenditure was confirmed on one of the contracts and the other contracts were confirmed to not result in irregular or fruitless and wasteful expenditure. This has been appropriately disclosed in notes 56.2 and 56.3 to the 2022-23 financial statements. This matter has therefore been concluded.

Auditor - General

Cape Town

30 November 2023

AUDITOR-GENERAL
SOUTH AFRICA

Auditing to build public confidence

Annexure to the auditor's report

The annexure includes the following:

- The auditor-general's responsibility for the audit
- The selected legislative requirements for compliance testing

Auditor-general's responsibility for the audit

Professional judgement and professional scepticism

As part of an audit in accordance with the ISAs, I exercise professional judgement and maintain professional scepticism throughout my audit of the financial statements and the procedures performed on reported performance information for the selected strategic focus area and on the municipality's compliance with selected requirements in key legislation.

Financial statements

In addition to my responsibility for the audit of the financial statements as described in this auditor's report, I also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error; design and perform audit procedures responsive to those risks; and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the municipality's internal control
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made
- conclude on the appropriateness of the use of the going concern basis of accounting in the preparation of the financial statements. I also conclude, based on the audit evidence obtained, whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the ability of the municipality to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify my opinion on the financial statements. My conclusions are based on the information available to me at the date of this auditor's report. However, future events or conditions may cause a municipality to cease operating as a going concern
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and determine whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Communication with those charged with governance

I communicate with the accounting officer regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the accounting officer with a statement that I have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on my independence and, where applicable, actions taken to eliminate threats or safeguards applied.

Compliance with legislation – selected legislative requirements

The selected legislative requirements are as follows:

Legislation	Sections or regulations
Municipal Finance Management Act 56 of 2003	Section 1 – paragraph (a), (b) & (d) of the definition: irregular expenditure Section 1 – definition: service delivery and budget implementation plan Sections 11(1), 13(2), 14(1), 14(2)(a), 14(2)(b), 15, 24(2)(c)(iv), 29(1) Sections 29(2)(b), 32(2), 32(2)(a), 32(2)(a)(i), 32(2)(a)(ii), 32(2)(b) Sections 32(6)(a), 32(7), 53(1)(c)(ii), 54(1)(c), 62(1)(d), 62(1)(f)(i) Sections 62(1)(f)(ii), 62(1)(f)(iii), 63(1)(a), 63(2)(a), 63(2)(c), 64(2)(b) Sections 64(2)(c), 64(2)(e), 64(2)(f), 64(2)(g), 65(2)(a), 65(2)(b), 65(2)(e) Sections 72(1)(a)(ii), 112(1)(j), 116(2)(b), 116(2)(c)(ii), 117, 122(1) Sections 126(1)(a), 127(2), 127(5)(a)(i), 127(5)(a)(ii) Sections 129(1), 129(3), 133(1)(a), 133(1)(c)(i), 133(1)(c)(ii), 170 Sections 171(4)(a), 171(4)(b)

8.3	DRAFT 2ND REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027 AND THE IDP AND BUDGET OPEN DAYS SCHEDULE FOR APRIL 2024

Collaborator No:
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 20 March 2024 & 27 March 2024

1. SUBJECT: DRAFT 2nd REVIEW OF THE 5th GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027 AND THE IDP AND BUDGET OPEN DAYS SCHEDULE FOR APRIL 2024

2. PURPOSE

To table to the Council for consideration:

(a) the draft 2nd review of the 5th Generation IDP 2022–2027, attached as **ANNEXURE A**, to be released for public comment; and

(b) the IDP and Budget Open Days Schedule, April 2024, attached as **ANNEXURE B**.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

In terms of Section 34(a)(i)(ii) of the Local Government: Municipal Systems Act, 2000 (Act. No. 32 of 2000) (MSA), each municipal council must review its Integrated Development Plan annually in accordance with an assessment of its performance measurements in terms of Section 41 of MSA and to the extent the changing circumstances so demand. Therefore, considering the changing circumstances in the municipal environment, including the community's needs and priorities.

The draft 2nd Review of the 5th Generation IDP 2022 – 2027 informs the budget of the municipality and details the municipality's actions to address the vision, mission, strategic objectives, and needs of the community.

The municipal IDP must be reviewed annually to ensure that:

- municipalities and communities monitor the progress in the implementation of development projects and the spending of the municipal budget; and
- communities are provided with an opportunity to review their community needs and to recommend changes to the ward priorities outlined in the municipality's IDP.

The Council should take note that the Disaster Management and Safety and Security Plan information will be updated in the final IDP document, which will be presented to the Council in May 2024.

At an all-ward councillor meeting on Friday, 23 February 2024 it was resolved that the Stellenbosch Municipality will conduct public participation open days in April 2024. Therefore, area-based open days will be held in the respective areas of the Stellenbosch municipal area, see attached **ANNEXURE B** for the IDP and Budget open days schedule.

The public participation period will comprise the period 02 – 23 April 2024, to allow members of the community and stakeholders ample time to provide written inputs and or comments on the draft 2nd Review of the 5th Generation IDP 2022 – 2027. The area-based public participation open days will be held from 09 – 15 April 2024, in the respective areas. The open-day schedule includes a detailed transport plan.

The listed public participation platforms below will be made available for the community and stakeholders to provide input and comments on the draft 2nd Review of the 5th Generation IDP 2022 – 2027:

- A link to an electronic submission form will be active from 02 – 23 April 2024 on the municipal website: www.stellenbosch.gov.za;
- The link to the electronic form will be broadcast via WhatsApp and published on Facebook, X and the Stellenbosch Citizen App;
- '*Have your Say'* boxes will be placed at ward offices and libraries; and
- Written submissions may also be made via:

    - Email: idp@stellenbosch.gov.za;
    - WhatsApp: 067 427 1556;
    - Stellenbosch Citizen App: Download from Google Play Store, iStore, Windows Store and Java.

5. RECOMMENDATIONS

(a) that the draft 2nd review of the 5th Generation IDP 2022 – 2027 of Stellenbosch Municipality be approved in terms of Section 34 (a)(i)(ii) of the MSA for the purpose of obtaining public input and comments, attached as **ANNEXURE A**;

(b) that an advertisement be placed on the official website of the municipality and the local newspaper notifying the public that the draft 2nd review of the 5th Generation IDP 2022 – 2027 is open for public input and comments for a period of 21 days;

(c) that the draft 2nd review of the 5th Generation IDP 2022 – 2027 be submitted to the MEC for Local Government, Environmental Affairs and Development Planning, Western Cape: Department of Local Government, Western Cape: Provincial Treasury, the Cape Winelands District Municipality, and the Office of the Provincial Speaker; and

(d) that the IDP and Budget open days schedule for April 2024 be approved, attached as **ANNEXURE B**.

6. DISCUSSION

6.1 Background

In terms of the provisions of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), each council must review its Integrated Development Plan in accordance with an assessment of its performance measurements in terms of Section 41 of MSA and to the extent the changing circumstances so demand.

The key dates and activities for the IDP review process form part of the integrated SDF / IDP / Budget Time Schedule adopted by the Council in August 2023 to guide the planning, drafting and review of the 2nd Review of the 5th Generation IDP 2017 – 2022.

The key activities stipulated in the table below were followed in accordance with the adopted SDF / IDP / Budget Time Schedule:

Date	Action(s)
July / August 2023	▪ Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2024/25
September 2023 – November 2023	▪ The IDP public participation period was open from 04 September to 04 October 2023. ▪ The area–based IDP public participation open days were held from 12 September – 02 October 2023. ▪ The IDP stakeholder engagement was held on 04 October 2023. ▪ An electronic submission form was activated on the municipal website for the community and stakeholders to provide their community needs and inputs. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. ▪ Hard copies of the "Have Your Say' submission forms were also made available at all libraries and ward offices. ▪ All-ward councillor sessions were facilitated from 14 to 16 November 2023, for the reprioritisation of the 2022 – 2027 ward priorities considering community inputs as baseline information for the reprioritisation of ward priorities.
December 2023 - February 2024	▪ Departmental sessions were held to review the IDP deliverables and targets for the draft 2nd Review of the 5th Generation IDP 2022 – 2027. ▪ MayCo and Management had a strategic session on 12 January 2024 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2024	▪ The MayCo and the Council to consider the draft 2nd review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. ▪ The IDP and Budget public participation period is scheduled to commence on Tuesday, 02 – 23 April 2024. ▪ A Stakeholder Engagement will be held on Tuesday, 16 April 2024. ▪ Consultation and refinement of the IDP and Budget documents. ▪ Adoption of final IDP, Budget, Tariffs, and budget-related policies in May 2024. ▪ Submission of the adopted IDP to the Provincial Government and other role-players.

6.2 Financial Implications

There are no financial implications beyond that which was approved in the 2023/24 MTREF Budget.

6.3 Legal Implications

The recommendations in this report comply with all applicable legislation.

Section 25(1):

The municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive, and strategic plan for the development of the municipality which—

(a) links, integrates and co-ordinates plans and takes into account proposals for the development of the municipality;

(b) aligns the resources and capacity of the municipality with the implementation of the plan;

(c) forms the policy framework and general basis on which annual budgets must be based;

(d) complies with the provisions of this Chapter; and

(e) is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

Section 26:

An integrated development plan must reflect—

(a) the municipal council's vision for the long-term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;

(b) an assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;

(c) the council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;

(d) the council's development strategies which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;

(e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;

(f) the council's operational strategies;

(g) applicable disaster management plans;

(h) a financial plan, which must include a budget projection for at least the next three years; and

(i) the key performance indicators and performance targets determined in terms of section 41.

Section 34:

"**Annual review and amendment of the integrated development plan**

A municipal council-

(a) must review its integrated development plan-

(i) annually in accordance with an assessment of its performance measurements in terms of Section 41; and

(ii) to the extent that changing circumstances so demand; and

(a) may amend its integrated development plan in accordance with a prescribed process."

Section 35(1):

An integrated development plan adopted by the council of a municipality—

(a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;

(b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and

(c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

Section 36:

A municipality must give effect to its integrated development plan and conduct its affairs in a manner that is consistent with its integrated development plan.

The 3rd Review of the 5th Generation IDP 2022 – 2027 will be consulted and drafted during the 2024/25 financial year.

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

This report has no direct risk implications for the municipality.

6.6 Previous / Relevant Council Resolutions

None.

Integrated Development Plan for 2022 – 2027

Compiled in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)

The Integrated Development Plan is the municipality's principal five-year strategic plan that deals with the most critical development needs of the municipal area (external focus) and the organisation's most critical governance needs (internal focus).

The Integrated Development Plan–

- is adopted by the council within one year after a municipal election and remains in force for the council's elected term (five years);
- is drafted and reviewed annually in consultation with the local community as well as interested organs of state and other role players;
- guides and informs all planning and development, and all decisions concerning planning, management, and development;
- forms the framework and basis for the municipality's medium-term expenditure framework, annual budgets, and performance management system; and
- seeks to promote integration by balancing the economic, ecological, and social pillars of sustainability without compromising the institutional capacity required in the implementation, and by coordinating actions across sectors and spheres of government.

STRATEGIC OVERVIEW

Vision, Mission, and Values

FOREWORD BY THE EXECUTIVE MAYOR

Cllr Adv Gesie van Deventer
Executive Mayor

DRAFT

As we embark on the 2nd review of the 5th Generation Integrated Development Plan (IDP), we delve into Stellenbosch Municipality's vision for the upcoming five-year term. This comprehensive assessment not only reflects on our achievements but also critically evaluates our current status and outlines the tasks that lie ahead. Over the past few years, we have not only met but often surpassed our goals, triumphing over numerous challenges along the way.

Our overarching strategy centers on implementing pragmatic solutions, delivering exceptional services to our residents, prioritising economic and social development, and fortifying our reputation for good governance practices and sound financial management. Beyond a mere document or report, this IDP is deeply personal to me. It encapsulates the essence of the Stellenbosch Council's plans, actions, and accomplishments, detailing our government's endeavours to create a clean, safe, and prosperous environment that attracts investment, fosters job creation, and uplifts communities out of poverty. Local government is the closest conduit to our residents and communities. As elected councillors, we are entrusted with the responsibility of serving the needs of all communities, including the 14 "dorpies," equitably and sustainably.

Public participation in the IDP and Budget processes is of paramount importance. Thankfully, our residents in Stellenbosch have actively engaged with the municipality, contributing insights into their needs and priorities. This engagement aids us in meticulous planning and ensures sustainable growth throughout the municipal area (WC024).

The IDP serves as the foundational framework for the municipality to fulfil its mandate and execute its budget. Additionally, it aids us in continuously planning ahead, working diligently, and delivering the services we are accountable for.

Among the key priorities for this term, we are steadfast in ensuring an efficient and effective local government that is accountable and responsive. Our zero-tolerance approach to corruption is unwavering, and we consistently demonstrate our commitment to act decisively when the need arises.

Our commitment to running a clean and transparent government is resolute, with a focus on optimising every public fund for service improvement, maintenance, upgrades, and development. Notably, we are progressing well in our plans to co-generate electricity to shield our communities from the adverse effects of load shedding.

The crucial matter of housing for all our residents remains a top priority. While housing is not a municipal competency, we continue to maximise our resources to provide housing opportunities across various categories, from rental stock to BNG and GAP housing, upgrades of informal settlements, and mixed-use developments.

We will continue to build a municipality of opportunity that creates an enabling environment for economic growth and job creation, and to aid those who need it most. We will also continue to provide quality services to all residents and serve the residents of the Greater Stellenbosch in a well-run, corruption-free administration.

I extend my gratitude to the Deputy Mayor, Councillor Jeremy Fasser, the members of my Mayoral Committee, all our councillors, and the Municipal Manager and Administration for crafting this updated roadmap. Our commitment to realising the vision of becoming a Valley of Opportunity and Innovation for all residents remains steadfast. This document symbolises our unwavering dedication to creating meaningful opportunities for everyone in our community.

CLLR ADV GESIE VAN DEVENTER
EXECUTIVE MAYOR

OVERVIEW BY THE MUNICIPAL MANAGER

Geraldine Mettler
Municipal Manager

DRAFT

In the realm of local governance, I take pride in Stellenbosch Municipality's commitment to delivering essential services amidst considerable pressure and uncertainty. Our ability to adapt and respond to the ever-changing dynamics of the world has been a testament to our resilience as an organisation and our capability as a local government.

The IDP is a strategic tool that guides all the activities of local government in consultation with residents and stakeholders. Its focus is on development in a broader sense and is a structured plan that informs budget priorities, decision-making, and the allocation of resources. Since local government exists to provide municipal services to all residents, it is essential that it interact with the people living in the city and obtain their input in their elected government's plans and vision.

This IDP articulates a set of focused objectives aimed at directing public funds towards programmes and projects that provide the greatest benefit to the public in an equitable manner. The inputs from our communities form the bedrock of the entire IDP and budgeting processes.

Residents now have multiple avenues to express their views on the IDP and articulate their priorities for their wards. Interactive pages on our municipal website, emails, a dedicated WhatsApp line, a variety of social media platforms, and traditional written submissions have become invaluable tools for engaging with our communities. Coupled with community meetings across the entire municipal area, these tools have provided residents with ample opportunities to actively participate in the IDP and Budget processes.

The IDP serves as our roadmap, outlining our current position and future aspirations. It facilitates the evaluation of community needs, the identification of ward priorities, and the reaffirmation of our strategic objectives. Crucially, the IDP informs the municipal budget, aligning practical plans with identified needs. This underscores the importance of reaching as many residents as possible and encouraging active involvement in the decision-making process.

Key priorities outlined for the administration in the 5th Generation IDP encompass various facets:

- E-governance (SMART CITY);
- Bulk infrastructure upgrades for economic development;
- Critical road infrastructure upgrades for safety and development;
- Clean, green electricity generation for economic sustainability;
- Financial viability and sustainability through long-term planning;
- Zero-tolerance approach to corruption;
- Focus on social and gap housing;
- Finalising the Inclusionary Housing Policy;
- Continuing wealth creation through the title deed programme;
- The Adam Tas Corridor development;
- Improvements in business processes in the Planning Department;
- Establishment of a land invasion unit; and
- Enhancements to safety through expanded surveillance networks.

The municipality's achievements are a testament to our commitment to collaboration, good governance practices, transparency, and organisational stability. Fiscal discipline, operational restraint, and sound corporate governance have positioned the municipality to resiliently weather any storm.

Our effective partnerships with industry, investors, residents, and community organisations continue to strengthen, and I extend my gratitude to all partners and stakeholders for their contributions. I anticipate that opportunities for even stronger partnerships and collaboration will flourish during the implementation of this new IDP.

Special thanks to our Executive Mayor, Mayoral Committee, Councillors, and Directors for their guidance and significant contributions in enhancing the functionality of our administration for all residents. Together with the residents and stakeholders of the Stellenbosch Municipality, we can transform our towns into places of excellence and opportunity for all.

GERALDINE METTLER
MUNICIPAL MANAGER

CHAPTER 1:
Governance and Institutional Arrangements

1.1 Integrated Development Planning

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) mandates South African municipalities to formulate a five-year Integrated Development Plan (IDP) to inform the municipal budget and guide all development within the municipal area. The IDP is considered the municipality's principal strategic plan that deals with the most critical development needs of the municipal area as well as the most critical governance needs of the organisation.

As the principal planning instrument that guides and informs the municipal budget, the planning process has to provide a forum for identifying, unpacking, and resolving the real issues that face the residents of Stellenbosch Municipality. Identifying these issues in consultation with communities makes it possible for the municipality to propose realistic and workable solutions that can be budgeted for, implemented, and monitored in a controlled environment. These issues may be overarching issues that affect the whole municipality or may only affect specific communities. It is therefore crucially important that the IDP be developed after the completion of a public participation process in which community stakeholders were thoroughly consulted. The plan is also developed in partnership with the provincial and national governments as well as the district municipality.

At the heart of the IDP lies improvement in the provision of basic municipal services and expanding livelihood opportunities for the people of the Stellenbosch Municipality. The IDP also focuses on expanding and transforming municipal capacity, enterprise development, and, crucially, exploring new ways of working and living together. This is especially relevant in an ever-changing environment.

1.2 Compilation and Legal Status of the 5th Generation IDP 2022 – 2027

SECTION 35(1) OF THE MSA

An IDP is adopted by the council of a municipality:

(a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;

(b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and

(c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

CHAPTER 5 AND SECTION 26 OF THE MSA

Core components of IDPs: An integrated development plan must reflect-

(a) The municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;

(b) An assessment of the existing level of development in the municipality, which must include an identification of communities that do not have access to basic municipal services;

(c) The council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;

(d) The council's development strategies, which must be aligned with any national and provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;

(e) A spatial development framework that must include the provision of basic guidelines for a land-use management system for the municipality;

(f) The council's operational strategies;

(g) Applicable disaster management plans;

(h) A financial plan, which must include a budget projection for at least the next three years; and

(i) The key performance indicators and performance targets are determined in terms of Section 41.

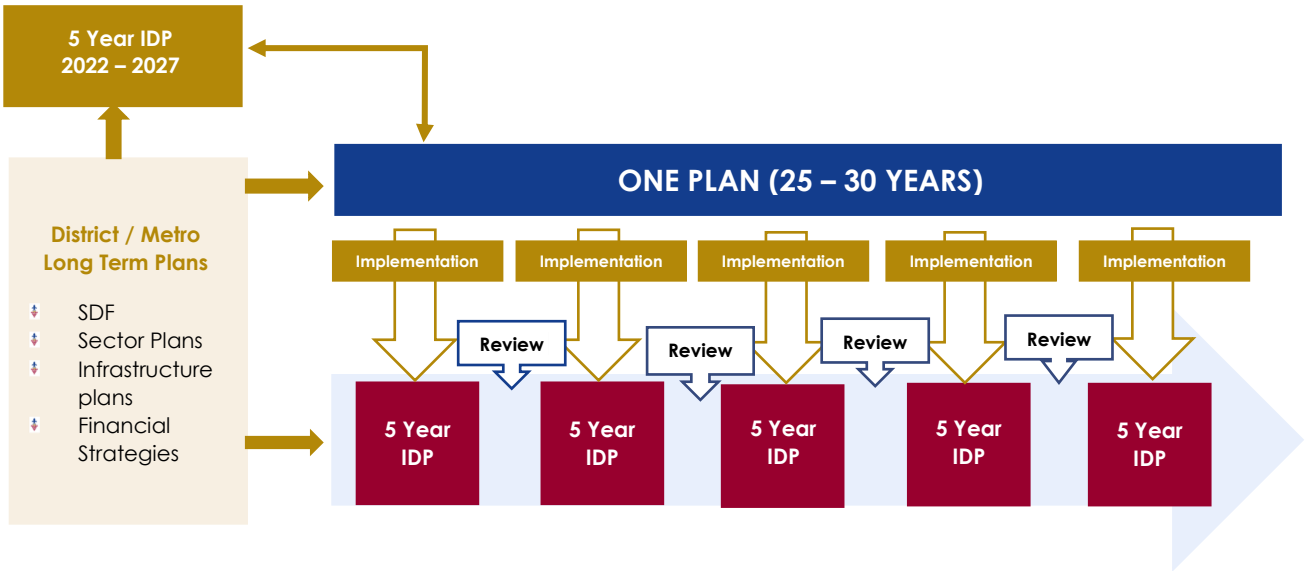
The IDP is informed by a leadership agenda, as contained in national and provincial policy documents, as well as the needs of local citizens and public, private, and community organisations. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The 2nd Amendment of the 5th Generation IDP 2022 – 2027 outlines the following chapters:

- Chapter 1: Governance and Institutional Arrangements;
- Chapter 2: State of the Greater Stellenbosch Area;
- Chapter 3: The Strategic Policy Context;
- Chapter 4: Spatial Development Framework;
- Chapter 5: Performance Summary of the 5th Generation IDP 2022 – 2027;
- Chapter 6: One Plan: Service Delivery, Budget, Programme and Projects;
- Chapter 7: Sector Planning and Implementation;
- Chapter 8: Council Term Projects 2022 – 2027;
- Chapter 9: Public Interest and Expression of Needs (Community Participation);
- Chapter 10: Financial Plan;
- Chapter 11: Organisational Scorecard (5 Years); and
- Chapter 12: Implementation, Monitoring and Review (1- year).

1.3 Relationship between the IDP, Budget, Performance Management and Risk Management

The IDP process, together with the performance management process, should be seamlessly integrated, where the IDP ensures that the planning stage for performance management occurs, and performance management fulfils the implementation, monitoring, and evaluation of the IDP process. This is prescribed according to the Performance Management Guide for Municipalities, DPLG, 2001.



The role of the Budget is to attach money to the objectives that are contained in the IDP, and the Budget gets monitored through the Service Delivery Budget Implementation Plan (SDBIP). The IDP, therefore, provides the strategic direction for the municipality, whereas the Budget should ensure the implementation of the IDP.

Risk management is one of management's core responsibilities according to Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate, and address risks continuously before such risks can negatively impact the service delivery capacity of the Stellenbosch Municipality. Risk management provides reasonable assurance that the institution will be successful in achieving its goals and objectives.

1.4 Relationship between the IDP and One Plan

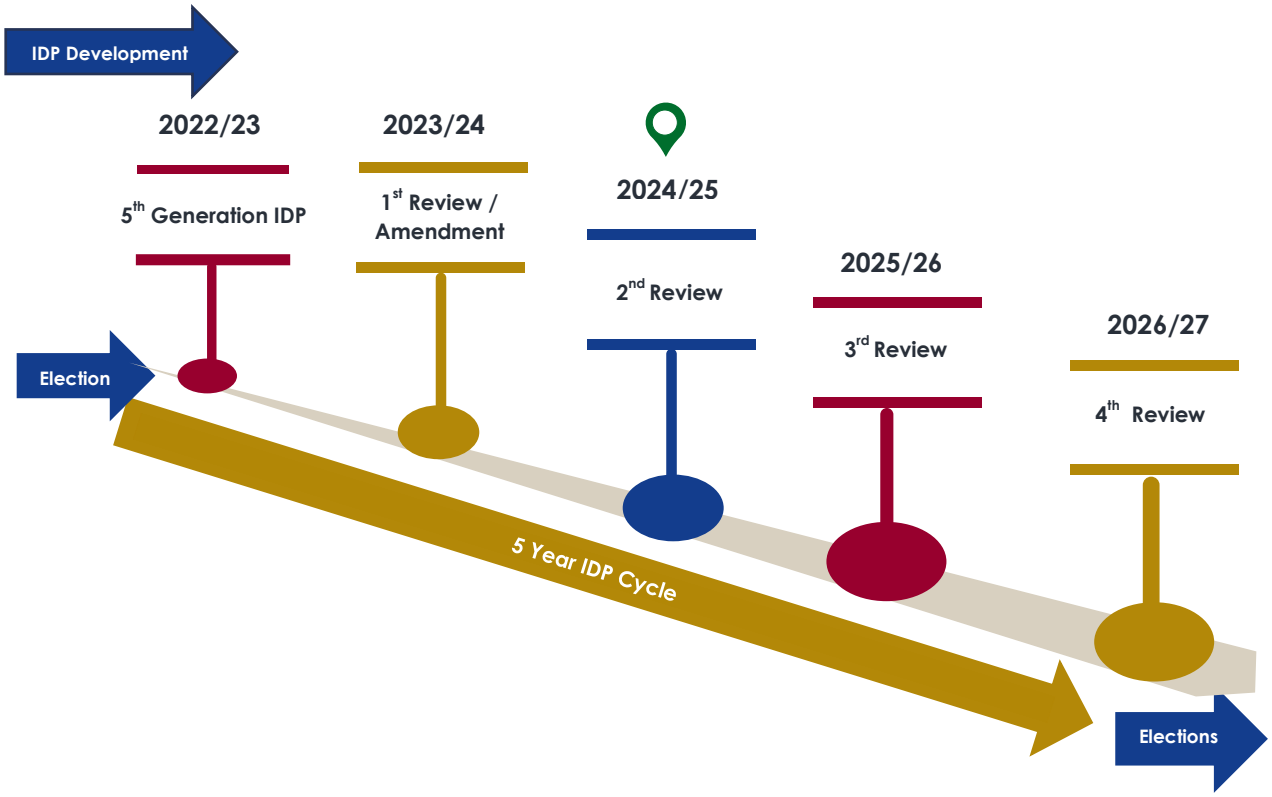
The One Plan does not replace the Integrated Development Plan (IDP) of the municipality as the "single, inclusive, and strategic plan for the development of the municipality." It is envisaged that the One Plan will strengthen and enhance the IDP and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDP. During the development of the One Plan, the IDP informed the One Plan. However, after approval of the One Plan, the IDP will be guided by the strategies and priorities outlined in the One Plan. In this regard, the IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Figure 1: Relationship between One Plan and IDP

1.5 The IDP and Ward Plans

The **twenty - three (23)** ward plans include:

- A consensus on priorities for the relevant ward(s);
- An implementation plan; and
- The capital budget is available for the relevant wards, including the small capital budget.



Ward plans help make sure that the IDP is more targeted and relevant to the needs of all groups, including the most vulnerable. These plans give ward committees a way to plan and carry out their roles and responsibilities in a systematic way. They are the basis for conversations between the municipality and ward committees about setting priorities and making budget requests. Ward committees will also use them to keep track of and evaluate progress throughout the year. The information is, however, on a detailed level and is not duplicated in the IDP, but a detailed ward plan is available on request.

1.6 The IDP Planning Process (five-year cycle)

According to the MSA, every new council that comes into office after the local government elections has to prepare an IDP that will guide them for the five years that they are in office. The IDP is, therefore, linked to the five-year term of office of councillors. This does, however, not restrict all proposals in the IDP to five years. The strategic goals that are part of the municipality's strategy all have a longer than five-year horizon, similar to the Spatial Development Framework (SDF) of the municipality.

A clear distinction must also be made between the main IDP, which is compiled every five years (or if a new council comes into power within the five-year period and does not accept the previous council's IDP), and the annual review of the IDP. The annual review is not a replacement for the five-year IDP, and its purpose is not to interfere with the long-term strategic orientation of the municipality. The annual review reflects, and progress reports made concerning the five-year strategy (and strategic goals) and proposes adjustments to the strategy, if necessary, because of changing internal and external circumstances that impact the appropriateness of the IDP.

Figure 2: Five–Year IDP Development and review cycle

1.7 Review of the Integrated Development Plan

Section 34 of the MSA prescribes that a municipality -

a) must review its integrated development plan –
   (i) annually following an assessment of its performance measurement in terms of section 41; and
   (ii) to the extent that changing circumstances so demand;

The review process serves as an institutional monitoring process where stakeholders can meet to discuss the successes and progress of the previous financial year. It is not designed to interfere with the long-term strategic objectives of the municipality. The review process is a strategic process to ensure the institution remains in touch with its intentions, informed of the varying needs of residents and up to date with the changing environment within which it functions.

The Stellenbosch Municipality, in collaboration with all relevant stakeholders and following the completion of the IDP public participation engagements during September 2023, must now review its IDP.

This is the second review to occur since the adoption of the 5th Generation IDP 2022 – 2027 in May 2022.

Importantly, this review does not seek to replace or rewrite the IDP that was adopted by the Council on 25 May 2022. The purpose of this review, as instructed by the MSA, is to examine the progress made on the implementation of the IDP and assess the municipality's strategic objectives and targets as set out in the IDP.

The priorities and key performance deliverables identified in this review of the IDP will seek to better inform the municipality's budget, and sector plans and streamline service delivery initiatives. This will ensure that the Stellenbosch Municipality remains on course to attain its strategic objectives.

1.8 Roles and Responsibilities

Section 53 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) stipulates, inter alia, that the respective roles and areas of responsibility of each political structure and political office bearer of the municipality and the Municipal Manager must be defined.

Figure 3: Roles and Responsibilities

Executive Mayor and Municipal Council

In terms of the MSA and the MFMA, the Executive Mayor must:
- Manage the drafting of the IDP;
- Assign responsibilities in this regard to the Municipal Manager;
- Submit the draft plan to the municipal council for adoption; and
- Co-ordinate the annual revision of the IDP and determine how the IDP taken into account or revised for the purposes of the Budget.

The Municipal Council
- The Council is the ultimate decision-making authority.
- Decisions to approve or amend the municipality's IDP may not be delegated and have to be taken by the full Council.

Proportional Councillors, Ward Councillors and Ward Committee Members
- Assist with public participation process.
- Assist the ward councillor (who is the chairperson) in identifying challenges and needs of residents.
- Provide a mechanism for discussion and negotiation between different stakeholders in the ward;
- Interact with other forums and organisations on matters affecting the ward;
- Draw up a ward plan that offers suggestions on how to improve service delivery in the particular ward;
- Disseminate information in the ward; and
- Monitor the implementation process concerning its area

Municipal Manager and Management Team
- Provide technical / sector expertise and information;
- Provide inputs related to the various planning steps;
- Summarise / digest / process inputs from the participation process;
- Discuss and comment on inputs from specialists; and
- Address inputs from and give feedback to the community.

1.9 Municipal Council

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows:

Table 1: Council Political Representation

Political Party	Number of Councillors
Democratic Alliance (DA)	**28**
African National Congress (ANC)	**8**
GOOD	**3**
Economic Freedom Fighters (EFF)	**2**
African Christian Democratic Party (ACDP)	**1**
People's Democratic Movement (PDM)	**1**
Patriotic Alliance (PA)	**1**
Vryheidsfront Plus (VF)	**1**
Total	**45**

Below is a table that categorises the councillors within their respective political parties and wards.

Table 2: Ward Councillors and Proportional Councillors

No.	Name of Councillor	Capacity	Political Party	Ward Councillor and Proportional (PR)

45.	I De Taillefer (Ms)	Part-time	VF Plus	PR

1.10 Executive Mayor and Mayoral Committee (MayCo)

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the executive mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition to delegated powers assigned by the Council. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

Table 3: Executive Mayor and Mayoral Committee (MayCo)

Name of member	Portfolio
Alderman G van Deventer	Executive Mayor
Cllr J Fasser	Deputy Executive Mayor, including Financial Services
Cllr P Johnson	MayCo member: Infrastructure Services

1.11 The Administration

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily must serve as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Figure 5: Municipal Management Team

Geraldine Mettler
Municipal Manager
Strategic Management; Internal Audit; Corporate Governance; Risk Management; Intergovernmental Relations; International Relations; Integrated Development Planning; Organisational Performance Management; Communications; and Knowledge Management.

Annalene de Beer
Director: Corporate Services
Administrative Services; Legal and Compliance; Human Resources Management; Individual Performance Management; Information and Communication Technology; Councillor's Support; Committee Services; Municipal Court; and Properties Management and Municipal Building Maintenance.

Anthony Barnes
Director: Planning and Economic Development
Development Management; Development Planning; Integrated Human Settlements; Building Management; Heritage Resource Management; Spatial Planning and Land Use Management; Local Economic Development and Tourism, Housing Development; Informal Settlements; and Housing Administration.

Kevin Carolus
Chief Financial Officer
Revenue Management; Expenditure Management; Budget Preparation and Management; Management of Financial Statements; Supply Chain Management; Financial Systems; and Asset Management.

Shane Chandaka
Director: Infrastructure Services
Roads, Transport and Storm Water; Water and Wastewater Services; Electrical Services; Waste Management; and Infrastructure Planning, Development, and Implementation.

Gary Boshoff
Director: Community and Protection Services
Community Development; Protection Services; Disaster Management and Fire Services, Traffic and Law Enforcement Services; Library Services; Parks and Cemeteries; Recreation, Sport, and Halls; and Environmental Management.

1.12 First-Year Process Followed

The table below reflects the preparation for the 5th Generation Integrated Development Plan 2022 – 2027.

Table 4: Preparation for the first year of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2021	• Approval of the *m*SDF / IDP / Budget Process Plan / Time Schedule. • Cape Winelands District Municipality hosted a discussion session on the Section 27 Framework.
September 2021 – November 2021	• With the Local Government Elections completed in November 2021, it was critical for the municipality to carefully manage the process to ensure compliance with legislation and the successful development of the 5th Generation IDP 2022 – 2027, therefore an Amended *m*SDF / IDP / Budget Process Plan / Time Schedule was submitted to Council on 23 November 2021 for consideration and approval. • The IDP public participation period started on **29 November 2021** and ended on **12 January 2022**. • A link to access IDP pre-recorded videos was published on the municipal Youtube Channel, shared via Facebook, Twitter, WhatsApp, Stellenbosch Citizen App and on the municipal website. Feedback was also provided on the implementation of projects per ward. • An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the development of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the submission form were also made available at all libraries and ward offices.
December 2021 - February 2022	• An Online Sector Engagement was held on **11 January 2022** to determine the sector needs and collectively devise plans to address the needs. • MayCo and management had a strategic session from **13 – 14 January 2022** to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions). • Departmental sessions were held with all departments to set their 5–year implementation plans for the 5th Generation IDP 2022 – 2027.
March 2022 – April 2022	• The Process Plan for 2022 – 2027 to guide the planning, drafting, adoption and review of the 5th Generation IDP 2022 – 2027 was approved by the Council on **30 March 2022**, for public comment for 21 days. • A second revision of the SDF / IDP / Budget Time Schedule for 2022/23 was submitted to the Council on **30 March 2022** for consideration and approval, which in effect moved the adoption of the Process Plan to May 2022. This was done to ensure compliance and alignment between the MSA Section 27 Framework of the CWDM and the Process Plan for 2022 – 2027 of the Stellenbosch Municipality. • The draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 for Stellenbosch Municipality was submitted to the Council on **30 March 2022** for consideration and approval to be released for public comments. • The IDP and Budget public participation process within the Stellenbosch Municipal area commenced on **04 – 28 April 2022.** • Inputs and comments on the draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 will be compiled and distributed to the directorates for consideration in finalising the IDP and Budget.
May – June 2022	• Adoption of the final IDP and Budget, Tariffs and Budget-related policies. • Submit adopted IDP to Cape Winelands District Municipality, Provincial Government and National Treasury. • Approval of SDBIP by the Executive Mayor within 28 days after adoption of the IDP and Budget.

1.13 Second-Year Process Followed

The table below reflects the preparation for the 1st Review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2023/24 financial year.

Table 5: Preparation for the second year for the 1st Review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2022	• Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24
September 2022 – November 2022	• The IDP public participation period was open from **07 – 28 September 2022.** • The hybrid public participation meetings were held from **19 – 22 September 2022.** • The online stakeholder engagement was held on **27 September 2022.** • An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1st Review of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the "Have Your Say' submission form was also made available at all libraries and ward offices. • An all-ward councillor session was held on **7 October 2022**, for the reprioritisation of ward priorities for the 2023/24 financial year taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 - February 2023	• Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. • An Indaba 2 Engagement was attended on **7 February 2023** to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. • Management strategic session on **15 and 16 February 2023** to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2023	• MayCo and Council considered the draft 1st Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. • The IDP and Budget public participation period has commenced on **03 April – 25 April 2023.** • A virtual Stakeholder Engagement was held on **20 April 2023** to provide feedback on major projects / programmes / initiatives. • The closing date for the IDP and Budget submission was **25 April 2023**. • Consultation and refinement of SDF, IDP and Budget documents. • Adoption of final IDP, Budget, Tariffs, and budget-related policies. • Submission of the adopted IDP to the Provincial Government and other role-players.

1.14 First Amendment Process Followed

The table below stipulates the key activities in preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027:

Table 6: Preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2023 - September 2023	• Submit the draft proposed amendments to the IDP to MayCo, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to recommend to the Council. • Submit the proposed draft IDP amendments, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to the Council for approval for the purpose of obtaining public comment (21 days). • The proposed draft IDP amendments were advertised for a period of 21 days to allow for public comment on the municipal website and local newspaper. • The period for public comment on the proposed draft IDP amendments was 21 days. • Submit the proposed draft IDP Amendments to the MEC, Provincial Treasury, National Treasury, and other affected organs of state within 10 working days after the Council approval. • Submit the draft IDP Amendment to the District Municipality for input within 10 working days after the Council approval.
October 2023	• Submit the final amended IDP to the Council for adoption together with the memorandum in terms of Regulation 3. • The adopted IDP Amendment was placed on the municipal website. • An electronic and hard copy of the adopted IDP Amendment was submitted to the MEC for local government as well as Provincial Treasury, National Treasury, and District Municipality within 10 days of the adoption or amendment of the plan. • A notice was published in the local newspaper to inform the public of the adoption of the amended IDP (within 14 days of the adoption of the plan) and to place hard copies in libraries and ward offices.

1.15 Third-Year Process Followed

The table below reflects the preparation for the review and proposed 2nd Amendment of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2024/25 financial year.

Table 7: Preparation of the third year for the review and amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2023	• Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2024/25
September 2023 – November 2023	• The IDP public participation period was open from 04 September to 04 October 2023. • The area–based IDP public participation open days were held from 12 September – 02 October 2023. • The IDP stakeholder engagement was held on 04 October 2023. • An electronic submission form was created on the municipal website for the community and stakeholders to provide their community needs and inputs. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the "Have Your Say' submission form was also made available at all libraries and ward offices. • All-ward councillor sessions were facilitated from 14 to 16 November 2023, for the reprioritisation of the 2022 – 2027 ward priorities, taking into account community inputs as baseline information for the reprioritisation of ward priorities.
December 2023 - February 2024	• Departmental sessions were held to review the IDP deliverables and targets for the 2nd Review of the 5th Generation IDP 2022 – 2027. • MayCo and Management had a strategic session on 12 January 2024 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2024	• MayCo and Council to consider the draft 2nd Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. • The IDP and Budget public participation period is scheduled to commence on **02 April – 23 April 2024.** • A Stakeholder Engagement will be held on **16 April 2024.** • Consultation and refinement of the IDP and Budget documents. • Adoption of the final IDP, Budget, Tariffs, and budget-related policies in May 2024. • Submission of the adopted IDP to the Provincial Government and other role-players.

1.16 Corporate Governance

Corporate governance is the set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, and controlled. Corporate governance also encompasses the relationships among the many stakeholders involved and the goals for which the institution is governed.

1.17 Risk Management

Section 62 of the MFMA, states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient and transparent systems of financial and **risk management** and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

Certain risks have also been revised to ensure that the municipality can appropriately respond to the impact of these risks on municipal service delivery, taking into account changing external and internal factors. Provision was also made for ineffective service delivery due to geopolitical instability and the impact of Ukraine and the Russian war on global commodities, particularly fuel.

The top **5 strategic** risks identified include:

- R | 01 Availability and cost of electricity
- I | 02 Increased risk of land invasion
- S | 03 Economic downturn due to civil unrest and crime
- K | 04 Scarcity of landfill space
- S | 05 Increase in community unrest since growth in demand for housing exceeds the resources available for development

The municipal risks have been aligned with the Integrated Development Plan (IDP) through linkages to the Strategic Focus Areas (SFAs). The following table depicts these linkages:

Table 8: Risk and IDP Alignment

Strategic Risks						
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Directorate**
1	Availability and cost of electricity	Continuous and persistent load shedding; sustainability of the national power supplier	Green and Sustainable Valley Dignified Living	**10**	**10**	Directorate: Infrastructure Services
2	Increased risk of land invasion	Legal precedents are set under the disaster management declaration, limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities	Dignified Living Safe Valley Good Governance and Compliance	**9**	**10**	All Directorates
3	Economic downturn due to civil unrest, crime, and continuous load-shedding	Increase in criminal activities, civil unrest, and reputational risk due to the perceived increase in the said activities. The impact of prolonged load shedding - not sufficient light at night as streetlights, CCTV cameras, and traffic lights are not functioning—can lead to more criminal activities.	Safe Valley Dignified Living	**10**	**8**	Directorate: Community and Protection Services
4	Scarcity of landfill space	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements, i.e., EIA applications and approvals, etc.	Green and Sustainable Valley	**8**	**8**	Directorate: Infrastructure Services
5	Increase in community unrest since the growth in demand for housing exceeds the resources available for development	Lack of bulk infrastructure; lack of identified and suitable land, unrealistic eviction judgements, housing backlogs, migration.	Dignified Living Safe Valley	**8**	**8**	Directorate: Community and Protection Services

Strategic Risks						
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Directorate**
Operational Risks						
1	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	**8**	**8**	Directorate: Community and Protection Services
2	Timeous Capital Spending	A steady increase in budget allocation; growing population and demand for services; demand management.	Good Governance and Compliance	**10**	**4**	Directorate: Financial Services
3	COVID-19 Pandemic	Manage the COVID-19 pandemic within the context of the prescribed regulations, taking the possible 4th wave and intensity of new infections into account.	Safe Valley Dignified Living	**8**	**4**	All Directorates
4	Climate Change	Changing weather patterns, unpredictable rainfall, flash floods, drought natural disasters, fires (seasonal and other).	Green and Sustainable Valley Safe Valley	**8**	**4**	Office of the Municipal Manager
5	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery need to be provided by all departments.	Good Governance and Compliance	**8**	**4**	Directorate: Corporate Services

1.18 Anti–Corruption and Anti–Fraud

SECTION 83(C) OF THE MSA

Refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption.

SECTION 115(1) OF THE MFMA

States that the accounting officer must take reasonable steps to ensure that mechanisms and separation of duties in a supply chain management system are in place to minimise the likelihood of corruption and fraud.

SECTION 62(1) OF THE MFMA

States the following "the accounting officer of a municipality is responsible for managing the financial administration of the municipality, and must for this purpose take all reasonable steps to ensure: –

(a) That the resources of the municipality are used affectively, efficiently and economically;
(b) That the full and proper records of the financial affairs are kept in accordance with any prescribed norms and standards;
(c) That the municipality has and maintains effective, efficient and transparent systems –
  (i) Of financial and risk management and internal control;
  (ii) Of internal audit operating in accordance with any prescribed norms and standards;
(d) That unauthorised, irregular of fruitless and wasteful expenditure and other losses are prevented; and
(e) That disciplinary or, when appropriate, criminal proceedings are instituted against any official of the municipality who has allegedly committed an act of financial or an offence in terms of Chapter 15."

1.19 Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee (APAC) (refer to Table below for members of the Audit Committee), appointed in terms of Section 166 of the MFMA, has also been appointed as the Performance Audit Committee. Section 166(2) of the MFMA states that an audit committee is an independent advisory body that must:

(a) advise the municipal council, the political office-bearers, the accounting officer and the management staff of the municipality, on matters relating to: –

- internal financial control and internal audit;
- risk management;
- accounting policies;
- the adequacy, reliability, and accuracy of financial reporting information;
- performance management;
- effective governance;
- compliance with this Act, the annual Division of Revenue Act, 2013 (Act No. 2 of 2013) and any other applicable legislation;
- performance evaluation; and
- any other issues referred to it by the municipality.

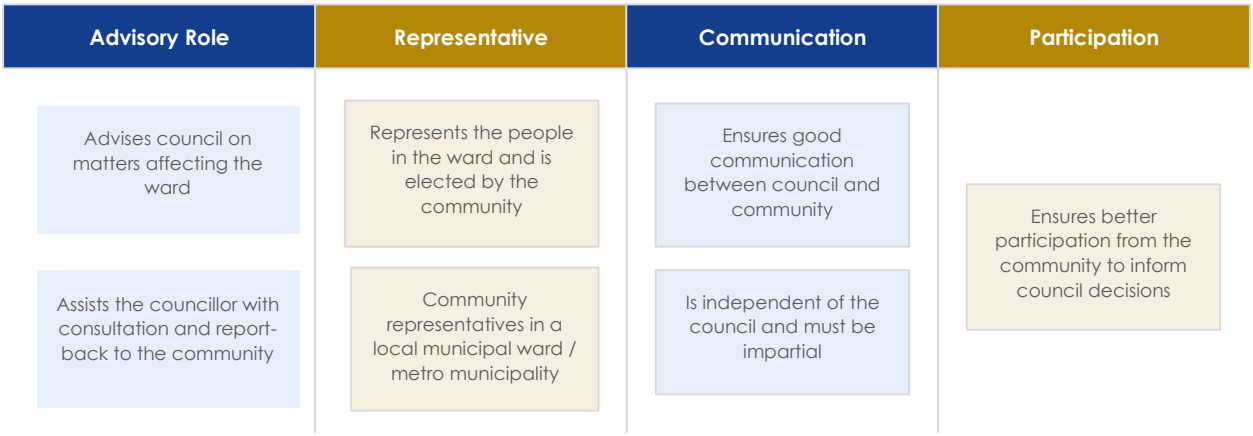

Table 9: Members of the Audit Committee

Name of representative	Capacity
LC Nene (Mr)	Chairperson
J Williams (Ms)	Member
V Botto (Mr)	Member
TW Lesihla (Mr)	Member

1.20 Ward Committees

Stellenbosch Municipality has a ward committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 6: Main duties of the Ward Committee

1.21 Stakeholders

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective inter-governmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of

all spheres of government in the setting of priorities, resource allocation, and development planning.

The demonstration of the importance of partnerships for the municipality is illustrated in the table below.

Table 10: Key Stakeholders

Name of Partner	Purpose of MOU / MOA
@ Heart	The @heart partnership is a long-standing relationship built on experience with youth work and HCT testing from a municipal facility.
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote and implement: - platforms to share knowledge; - disaster risk reduction initiatives; - community safety programmes; and - campaigns to promote safe resilient sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness, and resilience at all levels through knowledge, innovation and education.
Department Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the University's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television in the interest of the security of the town and the campus with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the Province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay at the night shelter, a blanket, or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people who are homeless.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, Waste and Electricity Generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Infrastructure Innovation Committee (IIC)	A partnership with the Stellenbosch University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with the Stellenbosch University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and University.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.

Name of Partner	Purpose of MOU / MOA
LTAB (Land Transport Advisory Board)	A partnership was formed between political leaders to discuss Land Transport related matters that affect transport in the area.
NMT (Non-motorised Transport) Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the University and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation, and maintenance of effective services within its area of jurisdiction.
Provincial Waste Management Officer's Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.).
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods, and communities.
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learners' license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sports Development at the Indoor Sports Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, the Council for Scientific and Industrial Research, the Western Cape Government, and the municipality to investigate the generation of alternate electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing Social Housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug River.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the University, whereby students provide: • relief aid (clothing, food); • placement of students to assist during incidents/disasters; and • awareness programmes.
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects, and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.

Name of Partner	Purpose of MOU / MOA
Western Cape Government Department of Environmental Affairs and Development Planning.	A Partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Western Cape Department of Public Works, Roads and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads, and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly meetings (meetings involving the private sector, industries, and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

CHAPTER 2:
State of the Greater Stellenbosch Area

2.1 Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town Harbour, the shipping portal to both the Atlantic and Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first wine route in South Africa. A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area has a variety of theatres, which include Stellenbosch University's HB Thom Theatre, Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street Theatre, and Aan de Braak Theatre.

2.2 Ward Demarcation

The Stellenbosch Municipality is currently structured into the following **23** wards:

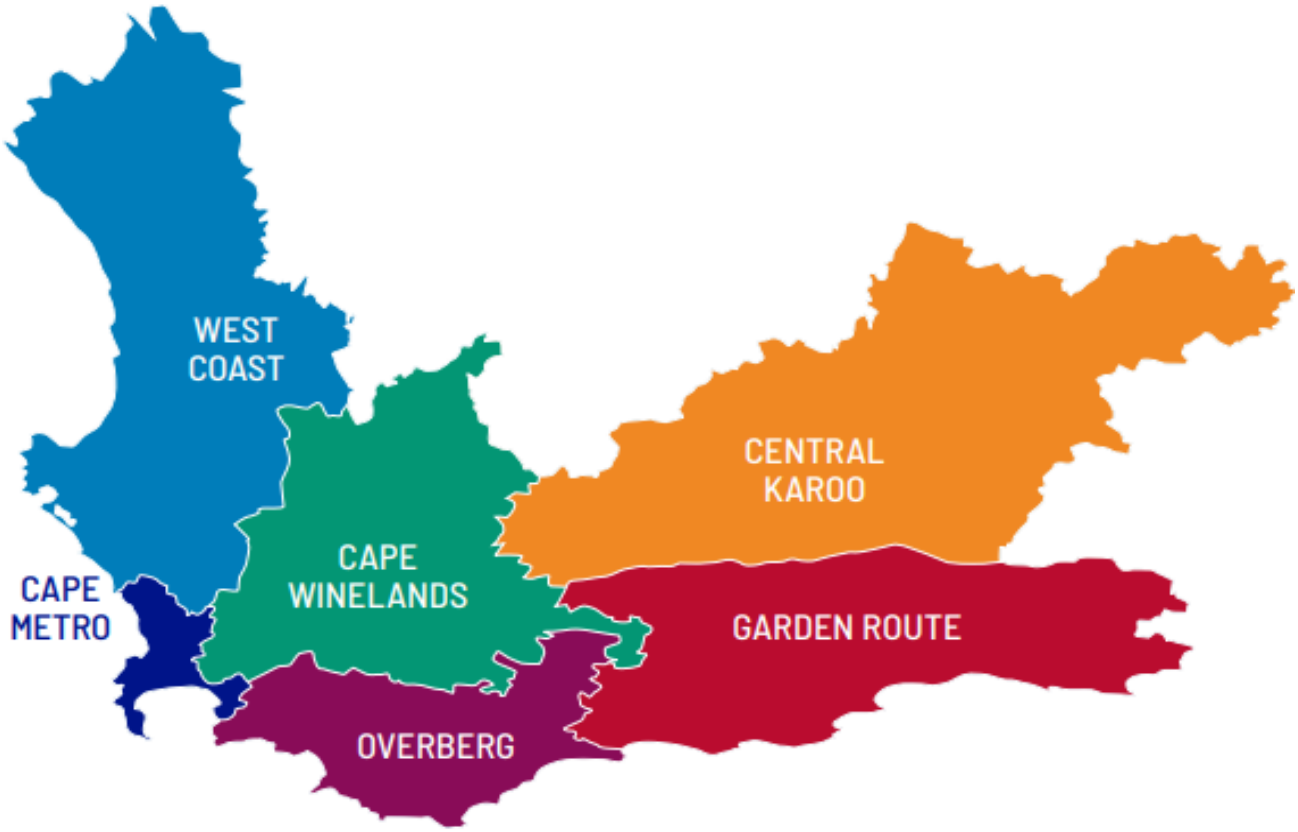

Table 11: Municipal ward demarcation

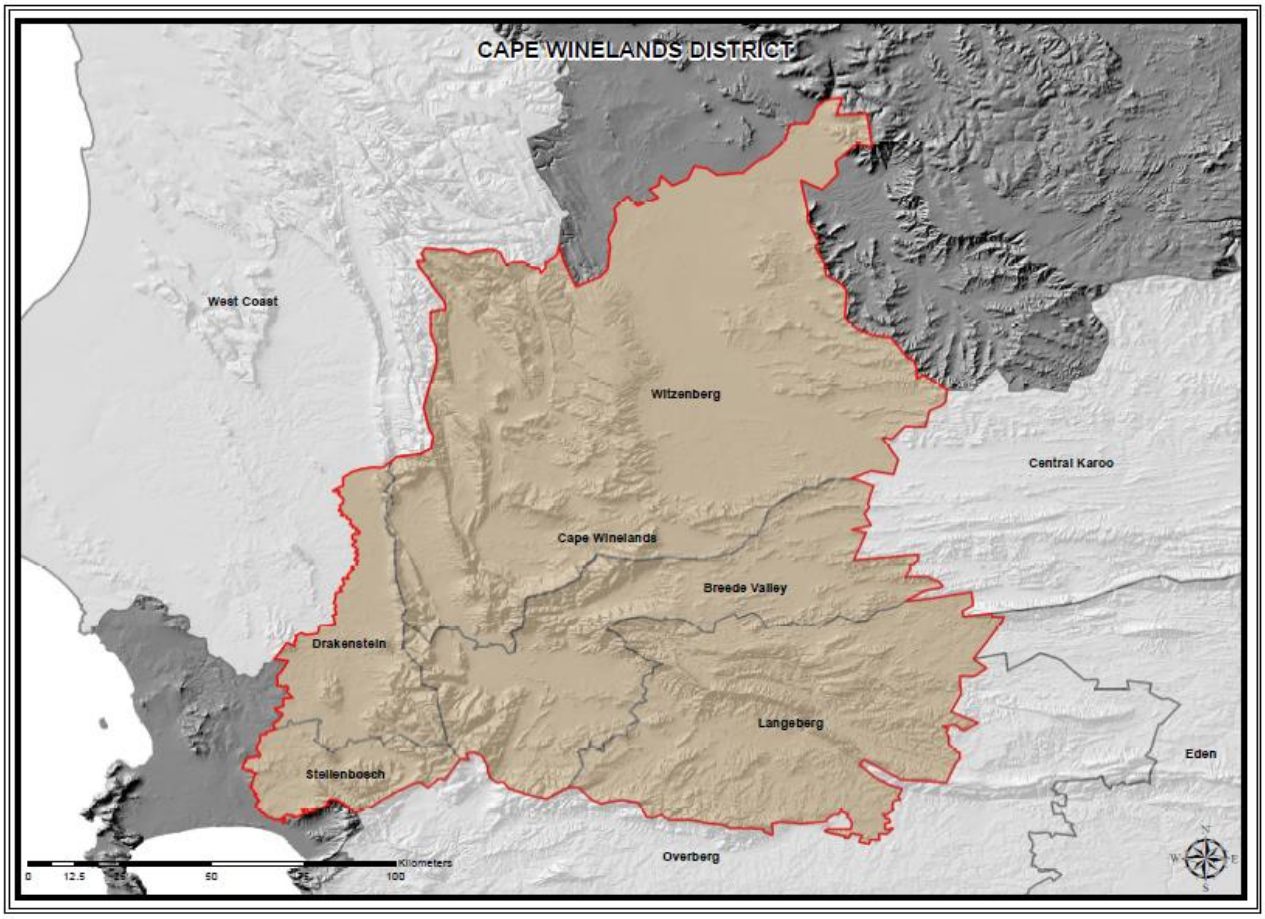
Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan(Moses / Martin) Lindley)
6	The Hydro, Rustenberg and Surrounding Farms
7	Mostertsdrift, Karindal, Rozendal, Uniepark, Simonswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Olienhout Street, Banghoek Road, Academia, Bosman Street, Smuts Road, Joubert Street, De Beer Road, De Villiers Road from Ryneveld Street to Cluver Road on the left-hand side
11	Boundaries of the ward are: Kridge Road, Herte Street, Skone Uitsig Road onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Road onto George Blake Street, Mark Street, Distillery Road, Santhagen Road, Swawel Avenue, Kanarie Road, Tarentaal Road, Bokmakierie Road, Fisant Road, Devon Valley Road, Kiewiet Road, Dagbreek Road, Pelikaan Street, Patrys Road, Hammerkop Road, Loerie Road, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4th and 5th Avenue, 10th, 12th and 14th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Road, Long Street, Crombi Road to the end of Gabriels Road. Asalea Road, 2nd Road, Noble Road, Bailey Road, Eike Street, Curry Street, Hoop Road, Pansy Road, West Road, Laai Road, Anthony Road, Carriem Road, Archilles Road, Bergstedt Road, Davidse Road, Cupido Road, Pearce Road, Robyn Road, Gonzalves Road, Hercules Road, Chippendale Road, Afrika Road, Arnolds Road, September Road, Jakaranda Street, Short Road, Quarry Road, Middle Road, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Road towards Langstraat – Suid Road, Kloof Street, Fir Street, Fontein Road, Williams R towards Gabriels Road towards February Road, Valentyn Road, Pool Road, Raziet Road, Ortell Road, Rhode Road, King Road, Hine Road, Hendrikse Road, Rhode Road), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Road, Belladonna Street, Wildeklawer Welgevonden Boulevard, Olive Road, Sonnedou Road, Mountain Silver Road, Silver Oak Road, Froetang Road, Katbos Road, Everlasting, Fynbos Street, Sourfig Street, Scarlet Cresent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Street.
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultrey / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm

Ward	Areas
23	Dorp Street, Krige, Hamman Street, Schroder Road, Die Braak, Bird Street from Dorp Street, Dennesig area, Muller Road, Banghoek Road, Ryneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

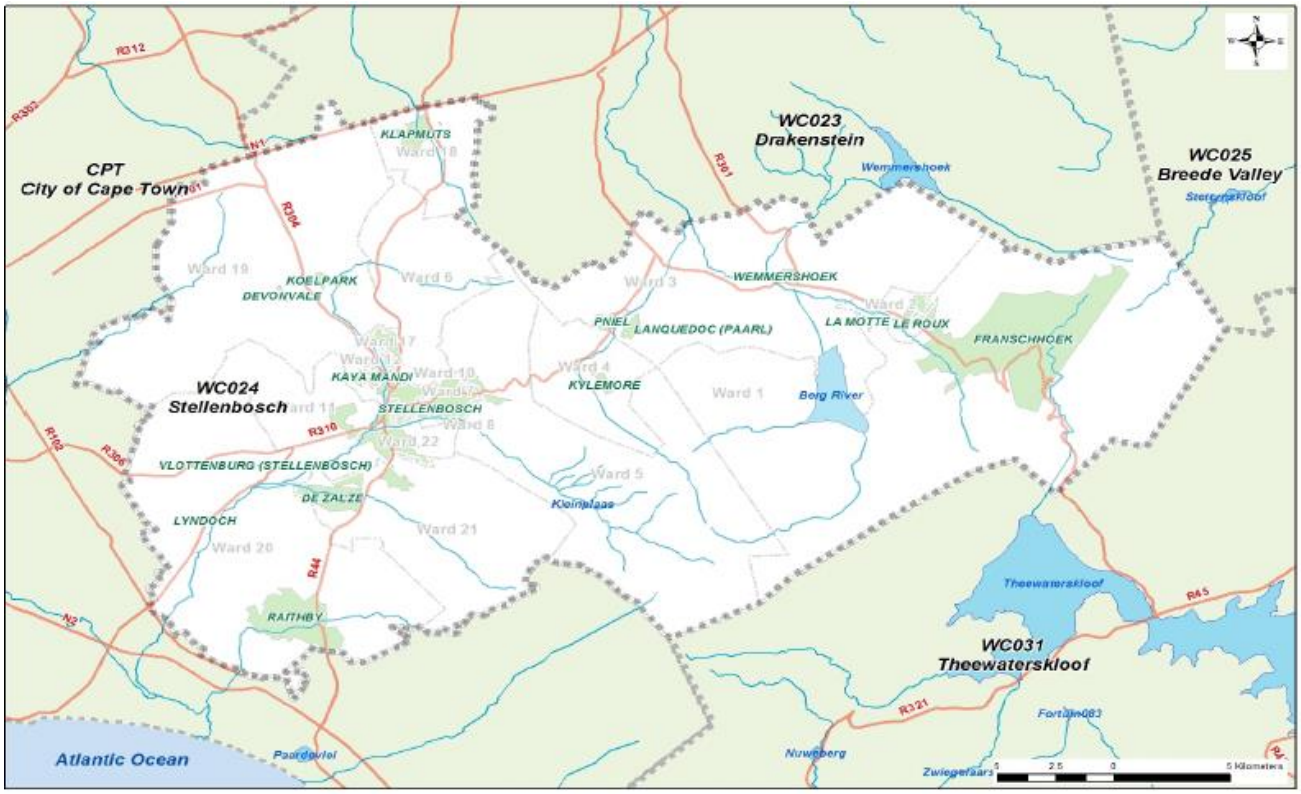
Below is a map of the Cape Winelands District concerning the provincial district boundaries:



Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km2. The province's spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands, and West Coast), and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:



Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. Stellenbosch Municipality, as a local authority, governs the towns of Stellenbosch, Pniël, Klapmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi, and Vlottenburg, as well as the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein, and Theewaterskloof Municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch, Franschhoek, and Klapmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlottenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living while being near city life. This has placed the municipal area under constant development pressure.

2.3 Stellenbosch Municipality at a Glance

Table 12: Stellenbosch Municipality - Summarised Statistics

Population Estimates, 2022		Actual households, 2022	
Population	175 411	Households	59 626

Education	2022	Poverty	2022
Matric Pass Rate	84.7%	Gini-Coefficient	0.61
Learner Retention Rate	82.0%	Poverty Head Count Ratio (UBPL)	66.68%
Learner-Teacher Ratio	26.7		

Health				2022/23
Primary Health Care Facilities	Immunisation Rate	Maternal Mortality Ratio (per 100 000 live births)	Teenage Pregnancies – Delivery rate to women U/18	
8 (excl. mobile / satellite)	64.5%	60.2	12.5%	

Safety and Security				The annual number of reported cases in 2022/23
Residential Burglaries	DUI	Drug-related Crimes	Murder	Sexual Offences
869	251	1463	77	207

Access to Basic Service Delivery				Percentage of households with access to basic services, 2022/23
Water	Refuse Removal	Electricity	Sanitation	Housing
86.4%	87.3%	96.9%	96.8%	87.3%

Road Safety 2021/22		Labour, 2023	Socio-economic Risks	
Fatal Crashes	31	Unemployment Rate (narrow definition)	Risk 1	Job Losses
Road User Fatalities	39	15.2%	Risk 2	Low Learner retention
			Risk 3	Low skills base (Labour)

Largest 3 sectors			Contribution to GDP, 2021
Finance, insurance, real estate and business services	Wholesale and retail trade, catering and accommodation	Manufacturing	
25.7%	18.1%	17.2%	

Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4 Socio – Economic Context

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2022 and 2023. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The GDPR performance, risk, and vulnerability factors can be read in detail within the Local Government Socio-economic Profile 2023 for the Stellenbosch municipal area.

2.4.1 Population Growth

In 2022, the Stellenbosch municipal area, a prominent region within the Cape Winelands, accommodated 21 per cent of the area's population, totalling **175 411** individuals. Projections indicate a steady rise, estimating a population of **192 951** residents by 2027, marking an average annual population growth rate of 2.0 per cent during this period. This growth rate surpasses the Cape Winelands District's average annual population growth rate of 1.7 per cent by 0.3 percentage points. The socio-economic implications of this demographic shift are multifaceted, impacting various sectors including housing, employment, and education within the region.

The table below depicts the population growth from 2022 to 2027:

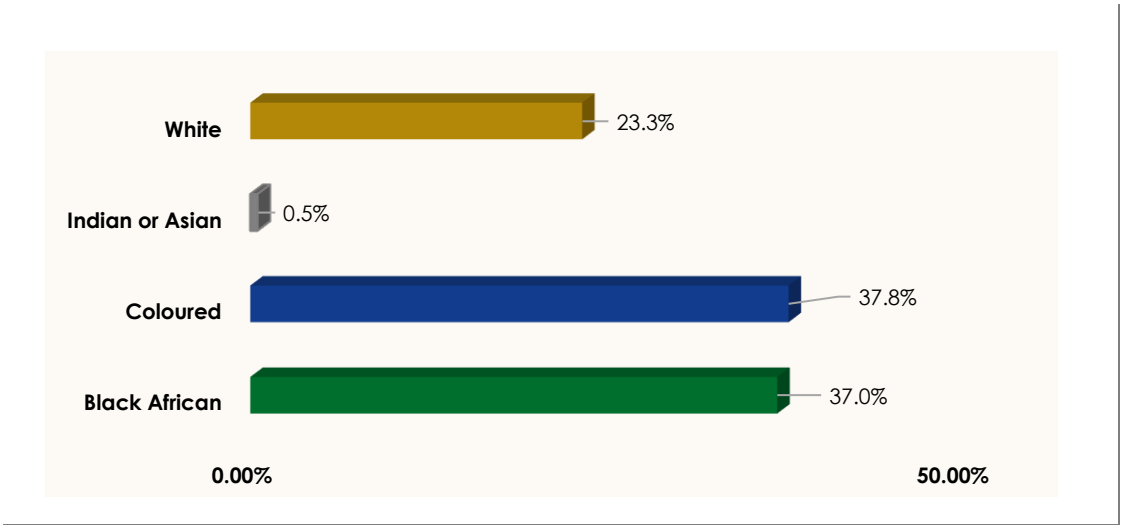
Table 13: Estimated Population Growth

Area	2022	2023	2024	2025	2026	2027
		%				
Stellenbosch	**3.3**	**2.0**	**2.1**	**1.8**	**2.0**	**1.6**
Cape Winelands	2.7	1.6	1.6	1.7	1.7	1.6
Western Cape	2.9	1.6	1.6	1.6	1.7	1.6

Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4.2 Racial Split

The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. Much of the population comprises Black African individuals, accounting for 37.0 per cent of the total, followed closely by the Coloured community, constituting 37.8 per cent. White residents make up 23.3 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 0.5 per cent.



This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The table and graph below indicate the ratio split within the Cape Winelands District.

Table 14: Racial Split

Race	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
Black African	28.2%	30.1%	27.6%	**37.0%**	29.1%	19.4%
Coloured	61.8%	64.1%	61.8%	**37.8%**	62.3%	70.6%
Indian or Asian	0.4%	0.2%	0.4%	**0.5%**	0.5%	0.3%
White	9.6%	5.7%	10.2%	**23.3%**	8.1%	9.6%

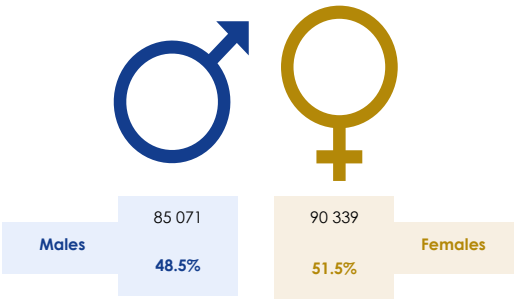
Figure 7: Racial Split for the WCO24

Source: Western Cape Local Government Social–Economic Profile 2023 and Statistics South Africa 2022

2.4.3 Gender Ratio

According to Stats SA, the Stellenbosch municipal area presented a gender ratio of 94.2, indicating that there are 94.2 men for every 100 women in the population. This ratio translates to 48.5 per cent males and 51.5 per cent females.

The slight increase in the ratio observed towards 2023 suggests a potential influx of working males to the area or a rise in female mortality rates. This demographic shift carries significant socio-economic implications, as it impacts workforce dynamics and social structures within the municipal area.



The table below depicts the gender ratio within the Stellenbosch municipal area.

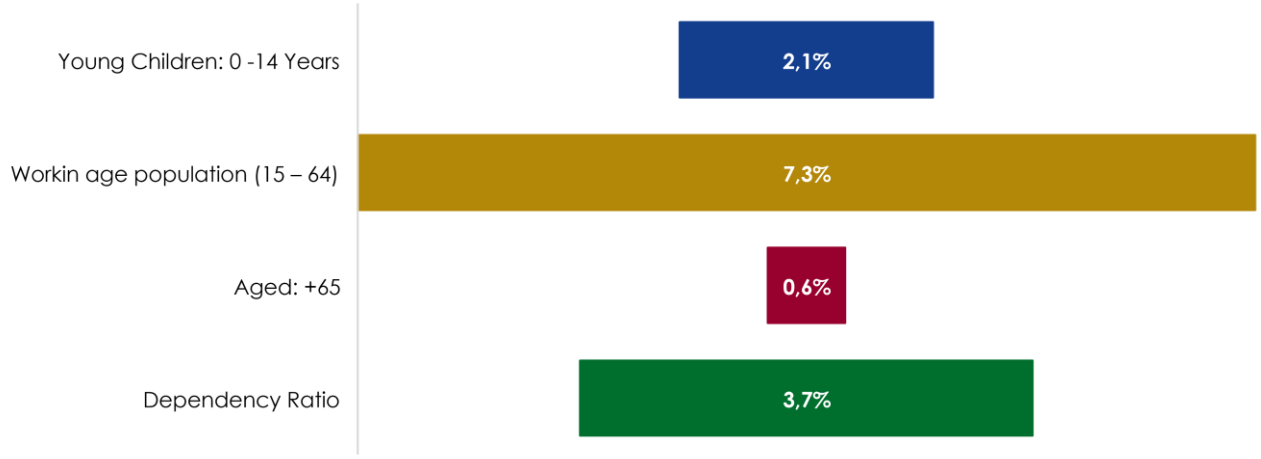
Table 15: Gender Ratio

Year	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2022	94.1	97.7	98.8	**94.2**	93.3	92.7
2023	98.7	110.0	98.4	**96.2**	94.4	96.9
2024	98.8	110.3	98.5	**96.3**	94.4	97.0
2025	98.9	110.6	98.6	**96.3**	94.3	97.1
2026	99.0	110.3	98.9	**96.3**	94.3	97.4

Source: Western Cape, Social–Economic Profile 2023 and StatsSA 2022

Figure 8: Ratio of % females and males

Source: Western Cape, Social–Economic Profile 2023 and StatsSA 2022



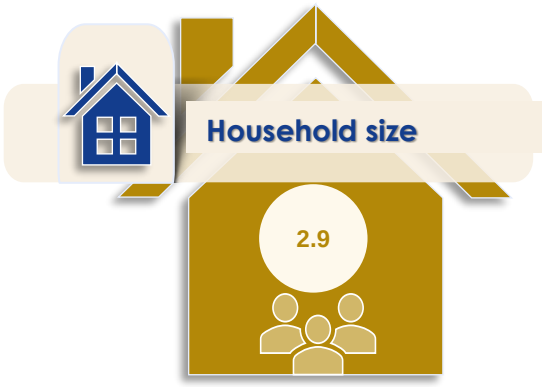
2.4.4 Age Cohorts

Within the Stellenbosch municipal area, a distinct age composition was apparent in 2022. The youth population was the largest, accounting for a substantial 73.1 per cent of residents.

Following closely behind were those between the ages of 35 and 64, who constituted 31.5 per cent of the population. This composition is primarily attributed to the presence of the acclaimed Stellenbosch University, which attracts students from across South Africa and around the world.

Additionally, the age composition of the population is analysed through dependency ratios, which highlight the proportion of individuals within the working age group (15 – 64) supporting dependents, including children and senior citizens. The higher dependency ratio in the graph below places increased strain on social systems and essential service delivery.

Graph 1: Age Cohorts for 2022



Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4.5 Household Size

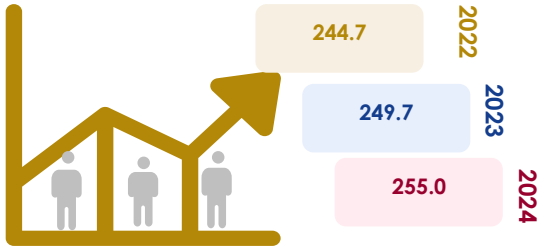
Household size refers to the number of people per household. The average size of households is expected to remain an average of 2.9 individuals from 2022 to 2026. The trend of the average household size could be attributed to a wide range of factors, including but not limited to underlying socio-economic factors like patterns in employment opportunities, educational access, and housing market dynamics that shape this trend.

The table below depicts the household sizes from 2022 to 2026:

Figure 9: Household size

Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.4.6 Population Density



Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health, and service delivery risks. In 2022, the population density of the Cape Winelands District was 45 persons per square kilometer. In order of highest to lowest, the various local municipal areas are compared as follows:

In order of highest to lowest, the various local municipal areas compare as follows:

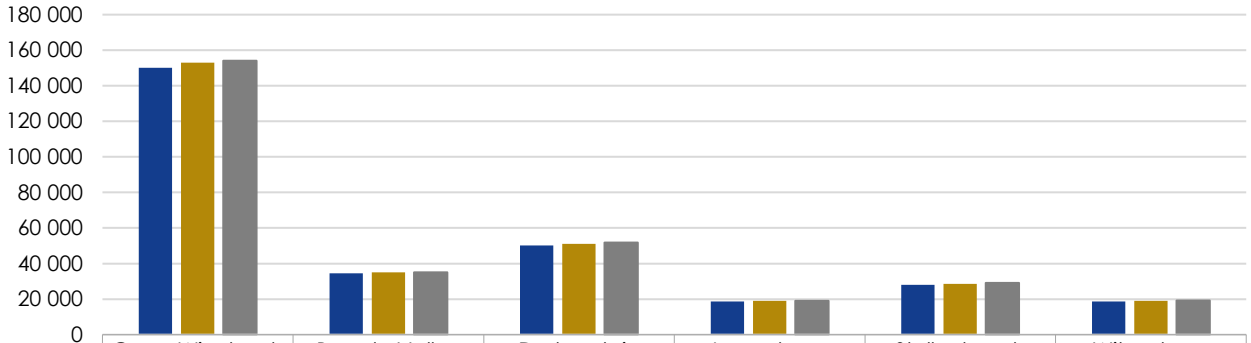
- Stellenbosch 245 people/km2;
- Drakenstein 194 people/km2;
- Breede Valley 51 people/km2;
- Langeberg 27 people/km2; and
- Witzenberg 14 people/km2.

According to the above comparison, Stellenbosch has the **highest density** in the Cape Winelands District. This is helped a lot by the fact that the Municipal Spatial Development Framework (*m*SDF) says that urban development should stay within the limits of the urban edge.

Graph 2: Level of Urbanisation

Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality) and StatsSA 2022

2.5 Education



The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Quality education equips individuals with essential skills, knowledge, and critical thinking abilities, empowering them to participate meaningfully in the local economy. As the educational attainment level rises within a municipality, there is a corresponding increase in employment opportunities and higher earning potential for residents. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty.

2.5.1 Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch experienced a notable surge from 28 033 enrolments in 2020 to 29 092 in 2022, which reflects an increase of 1 059 learners. It is evident that the educational growth depicts a positive socio-economic trend within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities.

The graphs below depict learner enrollments, learner-teacher ratios, and learner retention from 2020 to 2022.

Graph 3: Learner Enrolment

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	150 125	34 542	50 186	18 659	28 033	18 705
2021	152 914	35 092	51 128	18 988	28 594	19 112
2022	154 061	35 112	51 730	18 989	29 092	19 138

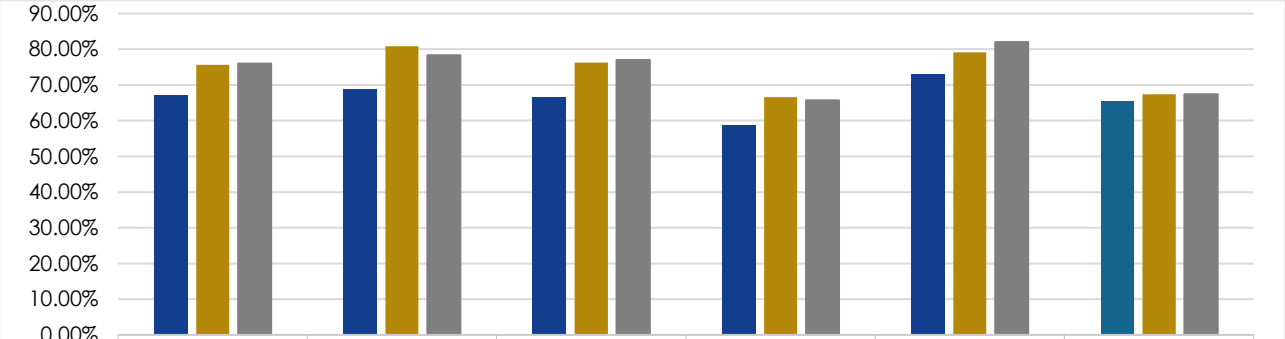
Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

It is crucial to establish healthy learner-teacher ratios to determine the schools' capacity to accommodate the students. Lower learner-teacher ratios are associated with enhanced teacher-student interaction, fostering better-quality education. The 2022 Schools Realities Publications emphasise that government-paid teachers face high learner-teacher ratios, indicating larger class sizes. Despite a minor decrease from 26.8 students per teacher in 2020 to 26.6 in 2022, the ratio remains within the recommended range of 35:1 to 40:1.

This suggests relatively uncrowded classrooms, aligning with established standards and ensuring a conducive learning environment, ultimately impacting the socio-economic landscape positively.

Graph 4: Learner–Teacher Ratio

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	27.80%	28.30%	27.70%	28.40%	26.80%	28.00%
2021	28.00%	28.00%	28.00%	28.40%	27.20%	28.00%
2022	27.77%	27.78%	27.60%	27.70%	26.70%	27.80%



Source: Western Cape, Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior. This can reflect essential socio-economic factors and personal circumstances that have a significant impact on education.

The inverse of the learner-retention rate is commonly referred to as the drop-out rate. Learner retention rates are influenced by a wide array of factors, including low socio-economic background, student attitudes towards education, overcrowded classrooms, critical thinking skills, study skills, and other personal circumstances that can make it difficult for the learner to focus on education. Despite the learner retention rate progressing in the Stellenbosch municipal area, improving from 79.1 per cent in 2021 to 82 per cent in 2022, 18 per cent of the learners did not complete their studies. Addressing these

factors is necessary for encouraging a more conducive learning environment, ensuring higher retention rates, and ultimately enhancing the region's overall socio-economic landscape.

Graph 5: Learner retention

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	67.20%	68.90%	66.40%	58.80%	73.10%	65.40%
2021	75.60%	80.80%	76.30%	66.60%	79.10%	67.40%

2.5.2 Number of schools and no-fee schools

Figure 10: Number of schools and no-fee schools

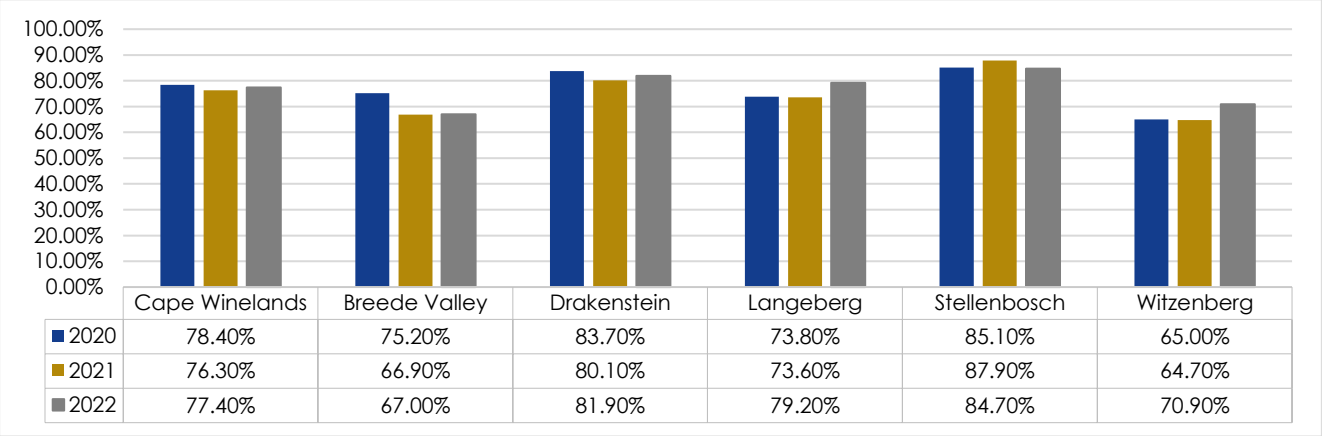
The number of schools within the Stellenbosch municipal area was recorded at 42 in 2022. Over the Medium-Term Expenditure Framework (MTEF), a substantial budget has been allocated for vital upgrades, additions, and the construction of new facilities in specific schools. This allocation is slated for use in enhancing the infrastructure of key educational institutions, including Aviation, Elsenburg Agri School, New Klapmuts Primary and High Schools, and New Stellenbosch Primary School. Such investments signify a proactive approach to bolstering the educational landscape, fostering an environment conducive to quality learning.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 66.7 per cent in 2022, whereby 71.4 per cent are equipped with libraries.

Source: Western Cape, Social–Economic Profile 2023

2.5.3 Schools with libraries / media centres

The Stellenbosch municipal area consists of 42 schools in 2022, of which 30 were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information, which is in turn directly linked to improved education outcomes.



2.5.4 Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised.

The graph below depicts the Matric pass rates from 2020 to 2022.

Graph 6: Education outcomes (matric pass rate)

	Cape Winelands	Breede Valley	Drakenstein	Langeberg	Stellenbosch	Witzenberg
2020	78.40%	75.20%	83.70%	73.80%	85.10%	65.00%
2021	76.30%	66.90%	80.10%	73.60%	87.90%	64.70%
2022	77.40%	67.00%	81.90%	79.20%	84.70%	70.90%

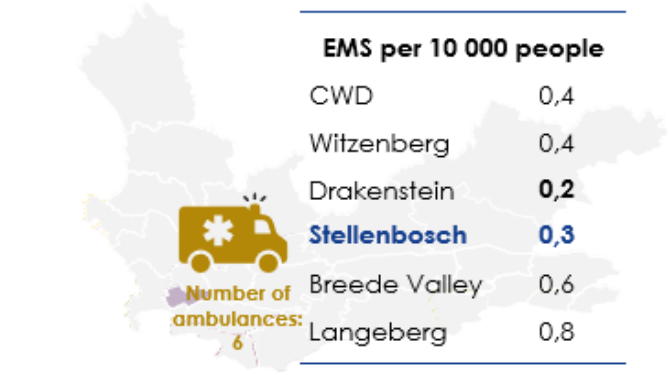
2.6 Health

2.6.1 Health Facilities

According to the LGSEP 2022, in 2021, the Stellenbosch municipal area had 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre, as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, nine ART treatment sites, and 13 TB clinics. The municipal area has 14 (17.9 per cent) out of the 78 primary healthcare facilities within the Cape Winelands district.

The table depicts the total healthcare facilities.

Table 16: Health facilities



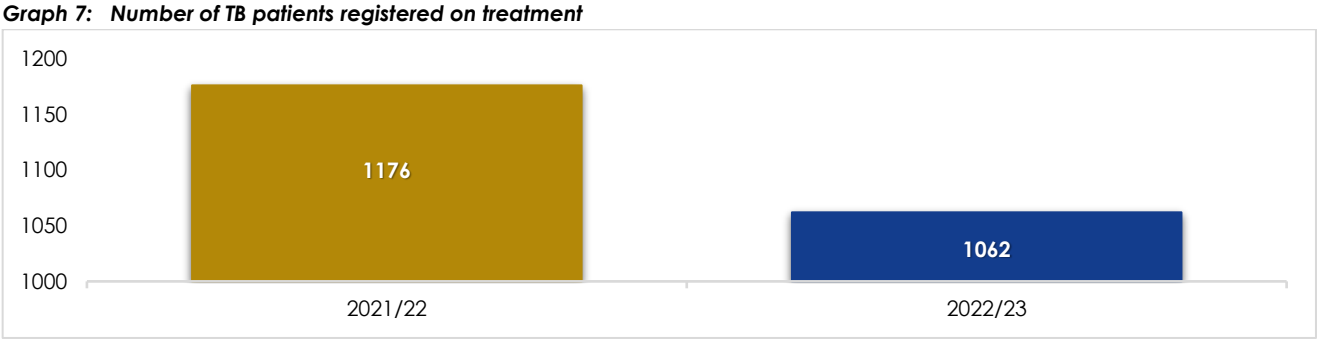
Source: Western Cape, Social–Economic Profile 2023

2.6.2 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 11: Emergency Medical Services

2.6.3 HIV / AIDS and Tuberculosis



The number of clients (patients) that remain committed to their antiretroviral treatment (ART) plan in the Stellenbosch municipal area increased from 6 915 registered patients in 2021/22 to 7 062 in 2022/23, while the number of new patients receiving ART declined from 481 to 429 during the same period. Similarly, the number of registered patients receiving TB treatment exhibited an average annual decrease of 9.7 per cent between 2021/22 and 2022/23.

Table 17: HIV/AIDS Management

Area	Registered patients receiving ART		Number of new ART patients	
	2021/22	2022/23	2021/22	2022/23
Stellenbosch	6915	7062	481	429

Source: Western Cape, Social–Economic Profile 2023

Graph 7: Number of TB patients registered on treatment

Source: Western Cape, Social–Economic Profile 2023

2.6.4 Child Health

The immunisation coverage rate for children under the age of one in the municipal area worsened from 73.3 per cent to 64.5 per cent between 2021/22 and 2022/23. The overall Child Welfare and Development (CWD) rate also showed improvement, rising from 60.6 per cent to 62.2 per cent. However, there was a notable increase in malnourished children under the age of five, with severe acute malnutrition rising from 1.5 to 1.6 per 100 000 people between 2021/22 and 2022/23.

The CWD also increased from 1.8 per cent to 2.2 per cent while the provincial average changed from 0.9 to 1.3 per cent. The neonatal mortality rate (deaths per 1 000 live births before 28 days of life) for the municipal area declined from 6.3 in 2020/21 to 3.1 in 2021/22. The rate was still notably below the CWD average of 8.0. A total of 9.8 per cent of all babies born in a facility in the municipal area in 2021/22 weighed less than 2 500 grams, indicating possible challenges with long-term maternal malnutrition and poor health care during pregnancy.

Table 18: Child Health

Area	Low Birth Weight		Neonatal Mortality Rate per 1000		Acute Malnutrition Rate (Under 5) per 100 000		Immunisation Rate (Under 1)	
	2022	2023	2022	2023	2022	2023	2022	2023

Source: Western Cape, Social–Economic Profile 2023

2.6.5 Maternal Health

In 2021/22, the Stellenbosch municipal area recorded the second lowest number of maternal deaths (61.1 per cent) and the lowest teenage pregnancies (13.2 per cent) in the CWD; however, these numbers decreased to 60.2 per cent (maternal deaths) and 12.5 per cent (teenage pregnancies) in 2022/23. However, the termination of pregnancy rate (0.7 per cent) remained unchanged across this period.

Table 19: Maternal Health

Area	Maternal Mortality Rate		The delivery rate of women 10- 19 years		Termination of pregnancy rate	
	2022	2023	2022	2023	2022	2023

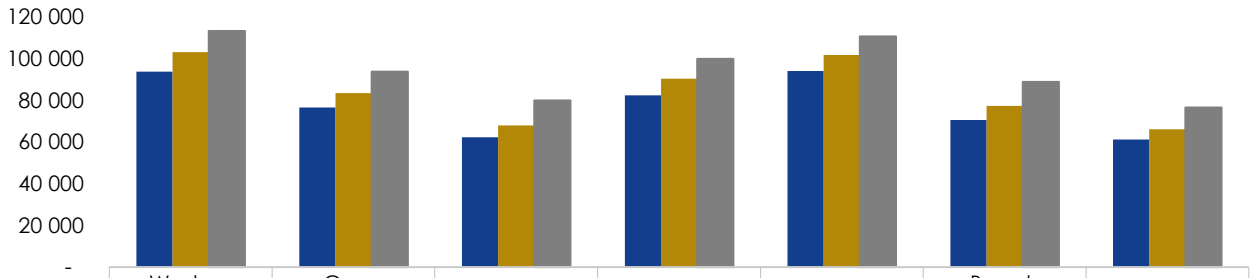
Cape Winelands District	**120.1**	**54.7**	**14.0**	**13.3**	**0.7**	**0.8**

Source: Western Cape, Social–Economic Profile 2023



2.7 Poverty

2.7.1 GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the LGSEP 2023, the real GDPR per capita was R93 873 whereby the Stellenbosch municipal area has grown significantly with a per capita income of R110 7, marking the highest figure in the Cape Winelands District for 2022. All the data below are sourced from the Local Government Socio-economic Profile 2023 for the Stellenbosch Municipal area.

Despite a moderate regression in the period between 2016 and 2022, this highlights the municipality's robust economic potential, particularly noteworthy considering the recent economic challenges posed by the recession and the global COVID-19 pandemic, which impacted economic activities regionally and globally.

Graph 8: GDP Per Capita

	Western Cape	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2016	93 816	76 589	62 253	82 386	94 124	70 678	61 304
2019	103 259	83 507	68 062	90 375	101 770	77 346	66 226
2022	113 327	93 873	80 058	100 051	110 723	88 847	76 679

Source: Western Cape, Social–Economic Profile 2022

2.7.2 Income Inequality

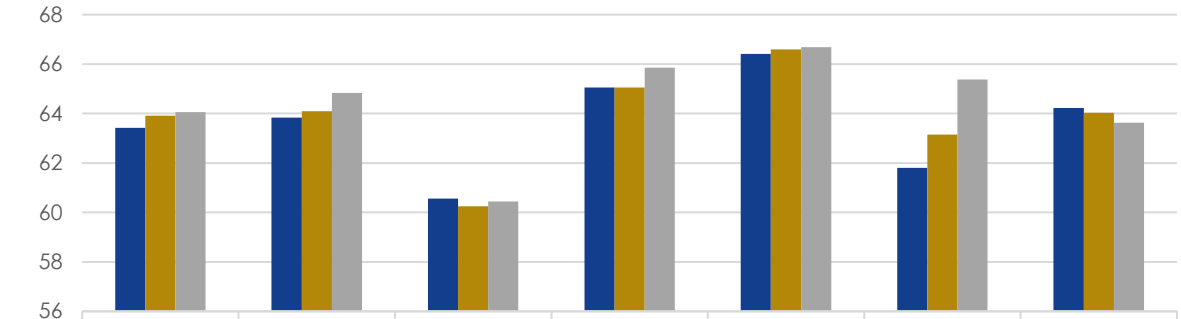
According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen through a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. In the Cape Winelands District, income inequality worsened to 0.69 in 2022, a trend expected to exacerbate due to the potential aftermath of the COVID-19 pandemic. Stellenbosch improved its income inequality, with inequality levels declining from 0.63 in 2021 to 0.61 in 2022, aligning below the district's trajectory.

Graph 9: Income Inequality

	2015	2018	2021
Western Cape	0.61	0.61	0.62
Cape Winelands	0.59	0.6	0.62
Witzenberg	0.58	0.60	0.61
Drakenstein	0.59	0.60	0.61
Stellenbosch	0.62	0.62	0.63
Breede Valley	0.59	0.60	0.62
Langeberg	0.58	0.60	0.62

Source: Western Cape, Social–Economic Profile 2022



2.7.3 Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL. In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL, a slight improvement from 2016 and 2019. Stellenbosch and Drakenstein had the highest poverty rates in the Cape Winelands District, with Stellenbosch's 66.7 per cent slightly below the district's 64.8 per cent in 2022. Addressing these socio-economic challenges is essential for ensuring sustainable growth and development within the municipality.

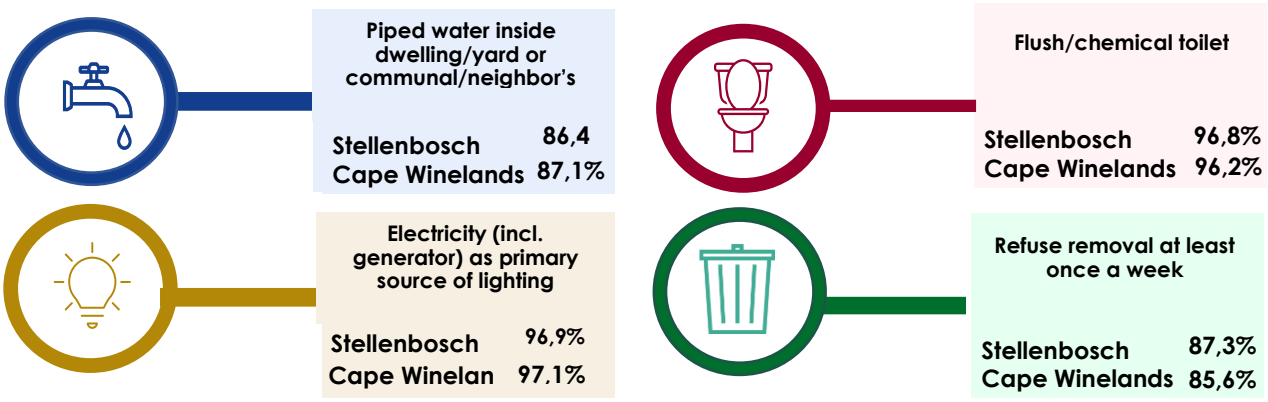
Table 20: Poverty Line

	WC	CWD	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2016	63.42	63.84	60.56	65.05	66.41	61.8	64.22
2019	63.91	64.1	60.25	65.05	66.59	63.15	64.03
2022	64.05	64.83	60.44	65.86	66.68	65.37	63.63

Source: Western Cape, Social–Economic Profile 2023

2.8 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.



This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2021. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2021 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

2.8.1 Housing and household services

During 2023, the Stellenbosch municipal area, which comprises 59 626 households, 87.3 per cent had access to formal housing, lower than the Cape Winelands District average of 88.8 per cent. The area also recorded a significantly higher proportion of informal dwellings, totaling 11.8 per cent, in contrast to the District's 10.3 per cent.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (86.4 per cent), flush or chemical toilet access (96.8 per cent), electricity access (including generators) for lighting (96.9 per cent), for lighting at 96.9 per cent and the removal of refuse at least weekly by the local authority at 87.3 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 12: Service delivery access levels (HH)

Source: Western Cape: Socio-Economic Profile 2023

2.8.2 Free Basic Services

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total number of indigent households excludes all informal households and includes formal households that have been registered as indigent households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R6 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

The table below indicates the number of households receiving free basic services.

Table 21: Access to Free Basic Services

Year	Number of Households							
	Total no. of HH	Free Basic Water		Free Basic Sanitation		Free Basic Electricity		Free Basic Refuse Removal	
		Access	%	Access	%	Access	%	Access	%
2018/19	52 374	6 813	13.01	6 813	13.01	4 833	9.23	6 813	13.01
2019/20	52 374	6 666	100%	6 666	100%	4 932	100%	6 666	100%
2020/21	50 328	7 283	100%	7 283	100%	5 189	100%	7 283	100%
2021/22	50 328	4 681	100%	4 681	100%	4 982	84.25%	4 681	100%
2022/23	59 626	5 744	100%	5 744	100%	5 744	100%	5 744	100%

Source: Western Cape Local Government Social–Economic Profile 2023 and Statistics South Africa 2022

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2020. The strained economic conditions are anticipated to increase demand for these services, leading to a rise in the number of indigent households. However, this trend is area-specific and contingent on the qualifying criteria applied. These findings underscore the persistent challenges and socio-economic factors influencing housing and essential service access within the Stellenbosch municipal area, emphasising the need for targeted interventions to uphold citizens' constitutional rights and enhance overall living standards.

2.9 Safety and Security

All the data below are sourced from the Local Government Socio–Economic Profile for 2023 for Stellenbosch Municipal area.

2.9.1 Murder

Murder *is defined as the unlawful and intentional killing of another person.*

Within the Stellenbosch area, the number of murders de-escalated from 90 cases in 2021/22, reaching 77 cases in 2022/23. The Stellenbosch municipal area's murder rate (per 100 000 people) decreased from 46 in 2021/22 to 38 in 2022/23, reflecting a similar trend in the Cape Winelands District, where the rate increased from 45 to 41 for the same period.

2.9.2 Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency, and human trafficking.

In 2022/23, there were 207 sexual offences in the Stellenbosch area, compared to 989 reported cases in the Cape Winelands District. The incidence of sexual offences (per 100 000 people) in the Stellenbosch municipal area (104) was higher than that of the district (102) in 2022/23.

2.9.3 Common Assault

In Stellenbosch, the crime rate per 100 000 people for common assault showed a concerning upward trend, with 510 reported incidents per 100 000 people, which increased from 527 in 2021/22 to 557 in 2022/23. This escalation in common assault cases per capita suggests a challenging security environment, which could potentially have socio-economic implications. Addressing this rising trend is vital to ensuring the safety and well-being of the community and fostering a secure environment for residents, businesses, and investors. Implementing effective crime prevention measures and community outreach initiatives may be essential to reversing this trend and creating a safer atmosphere conducive to economic growth and development.

2.9.4 Commercial Crime

In Stellenbosch, the crime rate per 100 000 people for commercial crime showed a steady upward trend over the analysed period. In 2020/21, there were 340 reported incidents per 100 000 people, which increased slightly to 443 in 2021/22 but then increased significantly to 528 in 2022/23. This fluctuation in commercial crime rates could indicate varying challenges faced by local businesses and law enforcement in combating economic offences. Addressing this issue is crucial as it directly impacts the business environment, investor confidence, and the overall economic stability of the municipality. Implementing robust measures to combat commercial crimes, such as fraud and embezzlement, is essential for fostering a secure and trustworthy business environment, supporting economic growth, and attracting investments in the Stellenbosch municipal area.

2.9.5 Drug–Related Offences

Drug-related *crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.*

Drug-related crime within the Stellenbosch area increased from 1 224 cases in 2021/22 to 1 463 cases in 2022/23. The Cape Winelands District's drug-related offences surged from 6 047 in 2021/22 to 6 783 in 2022/23. When considering the rate per 100 000 people, with 734 drug-related offences per 100 000 people in 2022/23, the Stellenbosch area's rate is above the district's rate of 700 per 100 000 population.

2.9.6 Driving under the influence (DUI)

A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

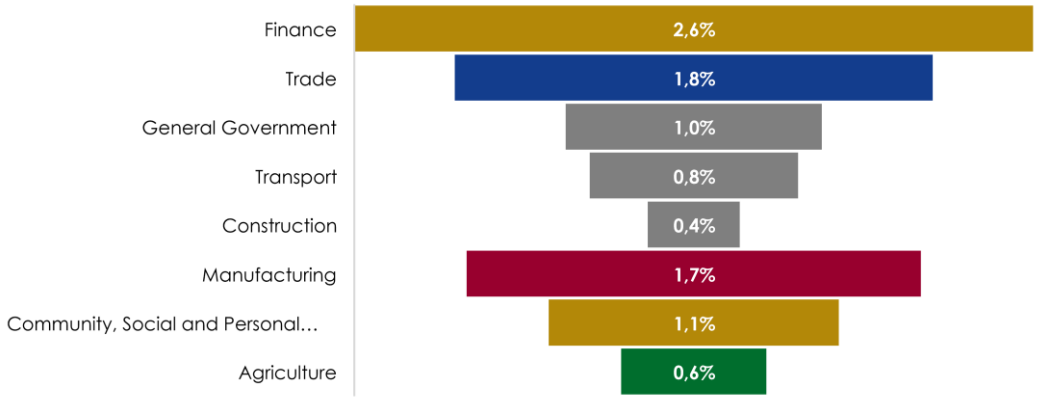
The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area declined from 262 in 2021/22 to 251 in 2022/23. This translates into a rate of 126 per 100 000 people in 2022/23, which is above the district's 79 per 100 000 people.

2.9.7 Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

Stellenbosch's rate of 436 residential burglaries per 100 000 people, which is well below the district's rate of 453 for 2022/23, indicates that the targeted strategies that were implicated to address these crime rates improved the safety and security in the community.

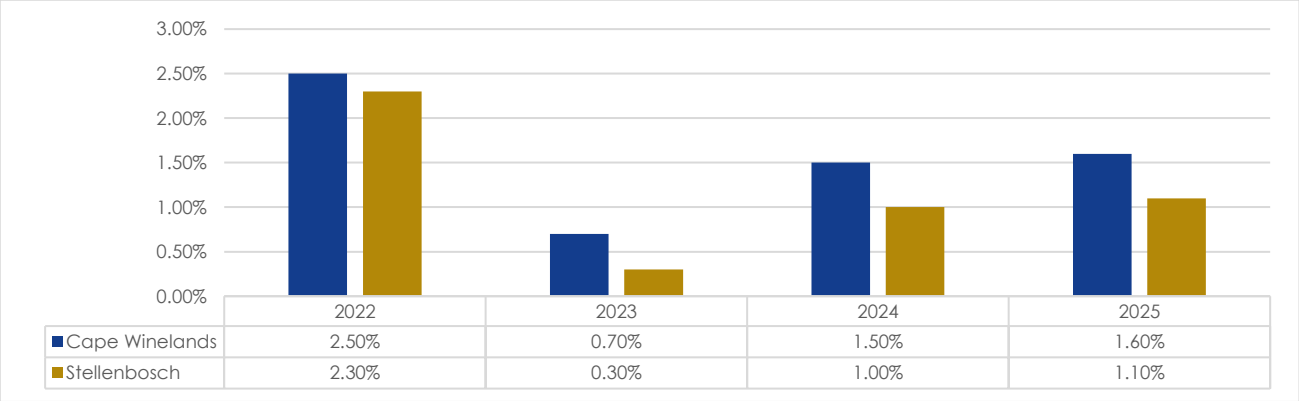
2.10 Economy and Labour Market Performance



2.10.1 Sectoral Overview

In 2021, the economic landscape of the Stellenbosch municipal area boasted a Gross Domestic Product at regional level (GDPR) totaling R20.6 billion and provided gainful employment to 69 012 individuals. The municipality's economy thrives on a robust agriculture sector, primarily specialising in grape cultivation for its globally acclaimed wineries, which serves as a pivotal driver for trade and tourism. Notably, the finance sector emerged as the primary contributor to the local economy, generating R5.3 billion in 2021 and constituting 25.7 per cent of the total GDPR, further solidifying the area's economic significance. The sectors that contributed to GDPR growth in 2022 were finance and transport, both accounting for 1.0 percentage point, followed by trade, which contributed a 0.6 percentage point.

Moreover, the potential for overall Gross Domestic Product at the regional level (GDPR) growth was impeded by declines in the primary and secondary sectors. Apart from agriculture, which experienced growth rates of 20.3 per cent in 2020 and 5.0 per cent in 2021, these sectors have yet to recover to their 2019 levels. The occurrence of load-shedding in 2022 had adverse effects on both farmers and manufacturers, diminishing their production capacities significantly.

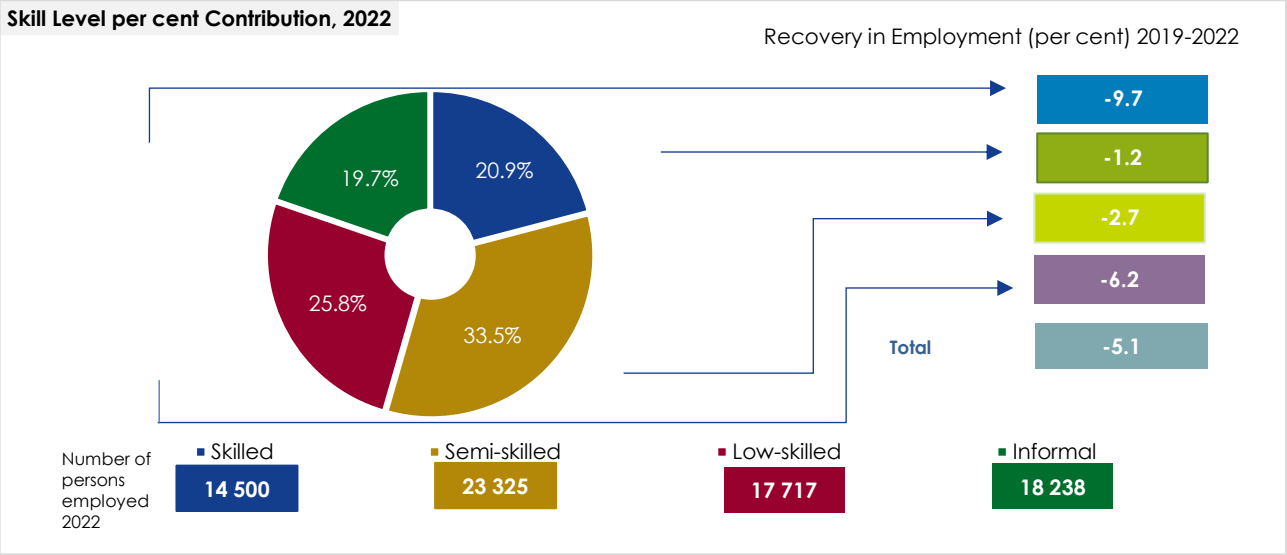


In the current economic landscape of South Africa, marked by challenges such as load-shedding, constrained consumer spending, and diminished business confidence, the Stellenbosch municipal area is predicted to experience near-stagnant Gross Domestic Product at regional level (GDPR) growth of 0.3 per cent in 2023, as indicated on the graph below. Several sectors, including agriculture, manufacturing, construction, general government, and personal services, are expected to underperform due to the macroeconomic pressures dampening overall business activities. However, there is a more optimistic outlook for GDPR growth in 2024, projected at 1.0 per cent. This optimism is rooted in the anticipation of increased tourist activities and robust growth in the finance sector, which are poised to bolster the local economy.

Figure 13: Sectoral contribution to GDPR 2021

Source: Western Cape, Social–Economic Profile 2023

Graph 10: GDPR Forecast

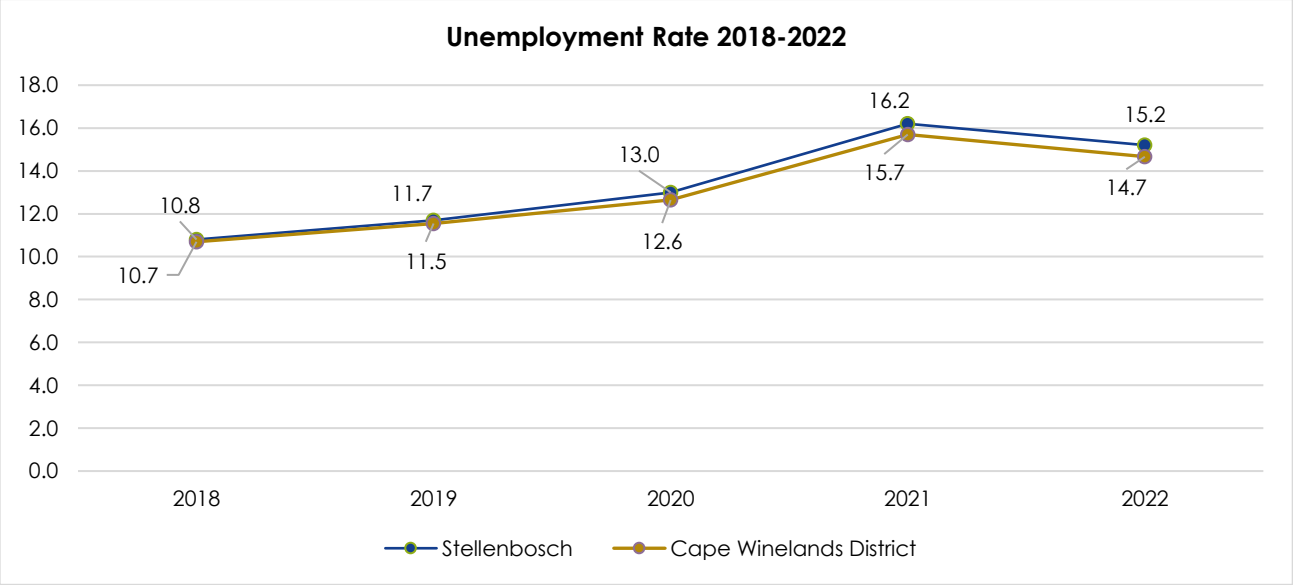


Source: Western Cape, Social–Economic Profile 2023

2.10.2 Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a significant workforce composition, with 20.9 per cent classified as skilled workers and 33.5 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute significantly to employment, accounting for 19.7 per cent of the workforce in 2021. However, a notable challenge exists for low-skilled workers, constituting 25.8 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic.

Graph 11: Skills Level Contribution, 2022



Source: Western Cape, Social–Economic Profile 2023

2.10.3 Unemployment

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for affected demographic areas.

Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

CHAPTER 3:

Strategic Policy Context

3.1 Municipal Vision and Strategy

Figure 14: Municipal Vision and Strategy

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the **"An Integrated Valley of Opportunity and Innovation"**

MISSION

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality honestly and ethically.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding of the need to give an account of our actions to individuals, groups, and organisations.

Transformation: We, as custodians of hope, will work tirelessly to transform our municipality, communities, and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social, and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures, and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness: The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

3.2 Strategic Focus Areas (SFAs)

3.2.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunities for enterprise, creativity and business development in our cities, towns and villages is an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that address these challenges: The first relates to the provision of services to citizens and how these services can assist them in facilitating development and job creation. The second relates to the internal workings of the municipality and how municipal procurement of services aids in fostering opportunities for enterprise development and creativity. The third dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens and also enable enterprise and business development. Without appropriate, well-maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work, and learning.

3.2.2 Strategic Focus Area 2: Green and Sustainable Valley

Several dimensions of the environment underpin its importance for the greater Stellenbosch area and the people living within it. The first is an ecological dimension, which recognises that the natural environment and its processes provide the setting in which and the basic resources with which human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins vitally important tourism and agricultural economies. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, people's activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why the spatial direction is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impacts people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and the food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts disposable income, work productivity, and transport infrastructure provision. Secondly, the municipal strategy has, over the last decade, taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has helped to hide spatial inequity in our settlements. Thirdly, the municipal government has considerable influence over the space economy of settlements. Under its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts economic success through the provision and maintenance of infrastructure and how activities are organised in space.

3.2.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law-abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunities, and sound financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas, and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure greater Stellenbosch area is thus not only a functional necessity but also underpins elements of economic and social development strategies.

3.2.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life, we mean, inter alia, access to shelter, ethical administration of municipal housing, and sufficient choice in housing opportunities for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women, and elderly, is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

3.2.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where, and to whose benefit it is, however, is a difficult task. The range of

services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also ensure synergy between the work of the political and administrative spheres of the municipality, their work, and that of other spheres of government, civil society, and the business sector. Municipalities should communicate well and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, both external and internal to the organisation, be recognised and built upon.

We cannot serve the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given the rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure the best use of public resources, regular performance management is essential. The information must be readily available and contact between citizens and the municipality should be responsive and as efficient as possible.

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership, and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To meet the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensuring the integrity of the municipality. It is most important that the use of municipal resources supports agreed-upon objectives; in other words, the municipal budget and ongoing expenditure must be strategy-led.

3.3 Strategic Objectives and Predetermined Objectives

Figure 15: Strategic Focus Areas and Predetermined Objectives

SFA 1: Valley of Possibility

Predetermined Objectives
1.1 Create an environment conducive to business development and job creation.
1.2 To facilitate and coordinate support for emerging entrepreneurs by utilising internal SCM processes and linking SMMEs with opportunities in the market.
1.3 To provide, upgrade, and maintain an effective engineering infrastructure to support effective service delivery.
1.4 To ensure the provision of non-motorised transport routes as a functional mode of transport.

SFA 2: Green and Sustainable Valley

Predetermined Objectives
2.1 Managing human use of the biosphere and its resources.
2.2 Enhancing the integrity of the environment is imperative for long-term sustainability.
2.3 Incorporating biodiversity into the environment is an imperative for long-term sustainability.
2.4 Ensuring spatial sustainability.
2.5 Facilitate the efficient use of all forms of capital available to Stellenbosch.
2.6 Building human capacity and ability.
2.7 Efficient information management.

SFA 3: Safe Valley

Predetermined Objectives
3.1 To implement an integrated safety strategy that incorporates multi-stakeholder engagement and social crime preventions.
3.2 To develop and implement institutional crime prevention strategies, with a focus on improved law enforcement and neighbourhood watches.

SFA 4: Dignified Living

Predetermined Objectives
4.1 To develop and maintain sustainable human settlements that will meet the diverse range of housing needs.
4.2 To develop and implement a social infrastructure master plan for the upgrading and maintenance of social facilities in all wards.
4.3 To involve and build the capacity of stakeholders in the planning and management (governance) of the areas where they live. (Promote participatory planning and integrated implementation).
4.4 To provide access to basic services for households in the WC024 area.

SFA 5: Good Governance and Compliance

Predetermined Objectives
5.1 To develop, align, and implement effective management Information systems.
5.2 An effective asset management system to optimise the use of municipal assets.
5.3 To manage integrated development planning and the efficient measurement of predetermined objectives as per the regulatory framework.
5.4 To involve the community in the planning and management of programmes and projects impacting their ward(s),
5.5 To review municipal governance processes as per the Risk-Based Audit Plan.
5.6 A skilled and capable workforce that supports the growth objectives of the municipal area.
5.7 A responsive, accountable, effective, and efficient local government system.
5.8 To implement an effective revenue management system.
5.9 To provide accurate and relevant financial information for decision-making.
5.10 To develop and implement a responsive, accountable, effective, and efficient customer care structure and system.

3.4 Core Principles in Executing Strategy

The municipality comprises three core components:

- Democratically elected political leadership;
- The administration, comprising officials; and
- Citizens, as individuals, interest groups, and organisations (public, community-based and private).

For sustainable municipal management, political leadership, and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critics or passive bystanders. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs, and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

3.4.1 Alignment with institutional structures and processes

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the "now" – the need to guide decisions today. For municipalities, the "now" has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is "under preparation" is used as an excuse for inaction or even poor decision-making. The arm's length approach also appears to neglect local experiential knowledge – what people know through working with service issues daily. With this in mind, we have provided for regular, informal, but structured engagements between the MayCo and Director's Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct the development and management of the municipality. Written up as an initial strategy, provision is made for influencing the

decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

3.4.2 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining, and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: elaborating on behaviour outlined in legislation through guidelines, standards, and so on.

Fiscal measures: fees, charges, and taxes for services as a means for raising government revenue and directing action in support of policy and legislation (through fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policy and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements, and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the positions that the government takes on issues, "positive" and "negative." This could be through the media, public meetings / engagements, events, and so on.

3.5 Global Policy Direction

The Stellenbosch Municipality's strategic planning does not occur in a vacuum. Various key policy directives are being employed that range from a global reach to more specific directives applicable to the municipality and its neighbouring municipalities. All these directives are considered when framing future strategic planning and resource allocation. The sections below outline key policy directives considered when framing Stellenbosch Municipality's 2nd Review and Amendment of the 5th Generation IDP 2022 – 2027.

3.5.1 Sustainable Development Goals (SDGs)

Figure 16: Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs), officially known as *Transforming Our World: The 2030 Agenda for Sustainable Development* is a set of seventeen aspirational "Global Goals" with 169 targets between them. The Agenda is an action plan for people, the planet, and prosperity, with a focus on strengthening peace and partnerships. The SDGs are integrated and indivisible and balance the three dimensions of sustainable development: the **economic, social,** and **environmental**. The Goals are the following:

Sustainable Development Goals (SDGs) 2030

- Goal 1: End poverty in all its forms everywhere.
- Goal 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.
- Goal 3: Ensure healthy lives and promote well-being for all ages.
- Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.
- Goal 5: Achieve gender equality and empower all women and girls.
- Goal 6: Ensure availability and sustainable management of water and sanitation for all.
- Goal 7: Ensure access to affordable, reliable, sustainable, and modern energy for all.
- Goal 8: Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.
- Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation.
- Goal 10: Reduce inequality within and among countries.
- Goal 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.
- Goal 12: Ensure sustainable consumption and production patterns.
- Goal 13: Take urgent action to combat climate change and its impacts.
- Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development.
- Goal 15: Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat deforestation, halt and reverse land degradation, and halt biodiversity loss.
- Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable, and inclusive institutions at all levels.
- Goal 17: Strengthen the means of implementation and revitalise the global partnership for sustainable development.

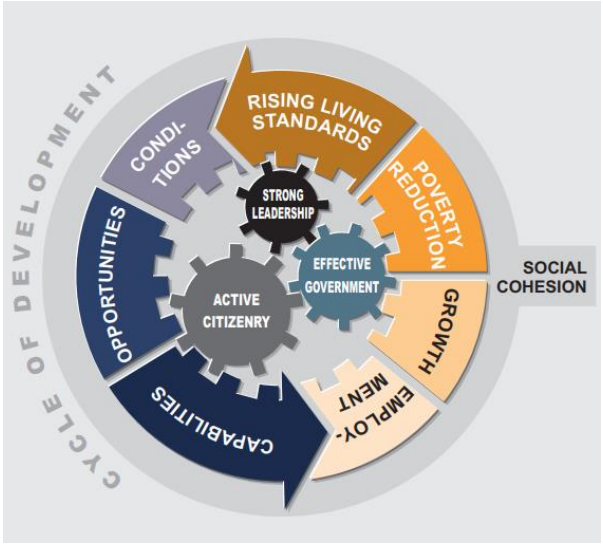
3.6 National Policy Direction

Based on the national government's election manifesto and Medium-Term Strategic Framework, a set of twelve outcomes was developed through extensive consultation and discussion at both the ministerial and administrative levels. These outcomes reflect the desired development impacts sought nationally, given the government's policy priorities indicated below:

National Strategic Outcomes

- Goal 1: Improved quality of basic education.
- Goal 2: A long, healthy life for all South Africans.
- Goal 3: All people in SA are and feel safe.

- Goal 4: Decent employment through inclusive economic growth.
- Goal 5: A skilled and capable workforce to support an inclusive growth path.
- Goal 6: An efficient, competitive, and responsive economic infrastructure network.
- Goal 7: Vibrant, equitable and sustainable rural communities with food security for all.
- Goal 8: Sustainable human settlements and improved quality of household life.
- Goal 9: A responsive, accountable, effective, and efficient local government system.
- Goal 10: Environmental assets and natural resources that are well protected and continually enhanced.
- Goal 11: Create a better SA and contribute to a better and safer Africa and World.
- Goal 12: An efficient, effective, and development-oriented public service and an empowered, fair, and inclusive citizenship.



3.6.1 National Development Plan (NDP) – 2030

The President appointed a National Planning Commission in May 2010 to draft a vision and plan for the country. On 9 June 2011, the Commission released a diagnostic document and elements of a vision statement. On 11 November 2011, the vision statement and the plan were released for consideration. The Commission consulted widely on the draft plan. The National Development Plan was adopted by the Cabinet in September 2012.

An approach to change

The graphic below demonstrates the close link between capabilities, opportunities, and employment on social and living conditions. It shows how leadership, active citizenry and effective government can help drive development in a socially cohesive environment.

Figure 17: National Development Plan – An approach to change

The plan focuses on the critical capabilities needed to transform the economy and society. Achieving these capabilities is not automatic, nor will they emerge if the country continues on its present trajectory. Rising levels of frustration and impatience suggest that time is of the essence: failure to act will threaten democratic gains. In particular, South Africa must find ways to urgently reduce alarming levels of youth unemployment and provide young people with broader opportunities.

Progress over the next two decades means doing things differently. Given the complexity of national development, the plan sets out six interlinked priorities:

- Uniting all South Africans around a common programme to achieve prosperity and equity.

- Promoting active citizenry to strengthen development, democracy, and accountability;
- Bringing about faster economic growth, higher investment, and greater labour absorption;
- Focusing on key capabilities of people and the state;
- Building a capable and developmental state; and
- Encouraging strong leadership throughout society to work together to solve problems.

The Plan in brief

By 2030

- Eliminate income poverty – Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39% to zero; and
- Reduce inequality – The Gini coefficient should fall from 0.69 to 0.6.

Enabling milestones

- Increase employment from 13 million in 2010 to 24 million in 2030.
- Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- Increase the share of national income in the bottom 40% from 6% to 10%.
- Establish a competitive base of infrastructure, human resources, and regulatory frameworks.
- Ensure that skilled, technical, professional, and managerial posts better reflect the country's racial, gender, and disability makeup.
- Broaden ownership of assets to historically disadvantaged groups.
- Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- Provide affordable access to quality health care while promoting health and well-being.
- Establish effective, safe, and affordable public transport.
- Produce sufficient energy to support the industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- Ensure that all South Africans have access to clean running water in their homes.
- Make high-speed broadband internet universally available at competitive prices.
- Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- Ensure household food and nutrition security.
- Entrench a social security system covering all working people, with social protection for the poor and other groups in need, such as children and people with disabilities.
- Realise a developmental, capable, and ethical state that treats citizens with dignity.
- Ensure that all people live safely, with an independent and fair criminal justice system.
- Broaden social cohesion and unity while redressing the inequities of the past.
- Play a leading role in continental development, economic integration, and human rights.

3.6.2 Medium-Term Strategic Framework 2019 – 2024 (MTSF)

The MTSF is a high-level strategic document to guide the five-year implementation and monitoring of the National Development Plan (NDP) 2030. It identifies the priorities to be undertaken during the 2019 – 2024 period to put the country on a positive trajectory towards the achievement of the 2030 vision. It sets targets for the implementation of the priorities and interventions for the next five years and states the outcomes and indicators to be monitored.

The implementation of the MTSF 2019–2024 was, however, disrupted by the outbreak of the COVID-19 pandemic and the declaration of a National State of Disaster on 15 March 2020. The government had to reprioritise its plans and budgets in response to the pandemic, which has had a devastating impact on the health, social, and economic aspects of the lives of South Africans. The President launched the Economic Reconstruction and Recovery Plan (ERRP) on 15 October 2020, which sought to restore much-needed economic growth and employment. The combination of all these factors

has meant that the MTSF 2019–2024 had to be revised to include critical interventions that are part of the government's relief and recovery efforts.

The Revised MTSF 2019–2024 also prioritises government commitments to prevail over the coronavirus pandemic and to work towards recovery. These commitments are to defeat the coronavirus pandemic, accelerate our economic recovery, implement economic reforms to create sustainable jobs and drive inclusive growth, and lastly, fight corruption and strengthen the capacity of the state. These commitments are included in the revised MTSF for 2019–2024 and will provide the focus for annual and strategic plans.

The MTSF 2019 – 2024 aims to address the challenges of **unemployment**, **inequality**, and **poverty** through the three pillars of the NDP.

Figure 18: Three NDP Pillars

The priorities, which will be achieved through more focused implementation, coordination, and integration by the various levels of government, including state-owned enterprises, the private sector, and civil society, are as follows:

Priority 1: A capable, ethical, and developmental state;
Priority 2: Economic transformation and job creation;
Priority 3: Education, skills, and health;
Priority 4: Consolidating the social wage through reliable and quality basic services;
Priority 5: Spatial integration, human settlements, and local government;
Priority 6: Social cohesion and safe communities; and
Priority 7: A better Africa and world.

3.6.3 National District Development Model and One Plan

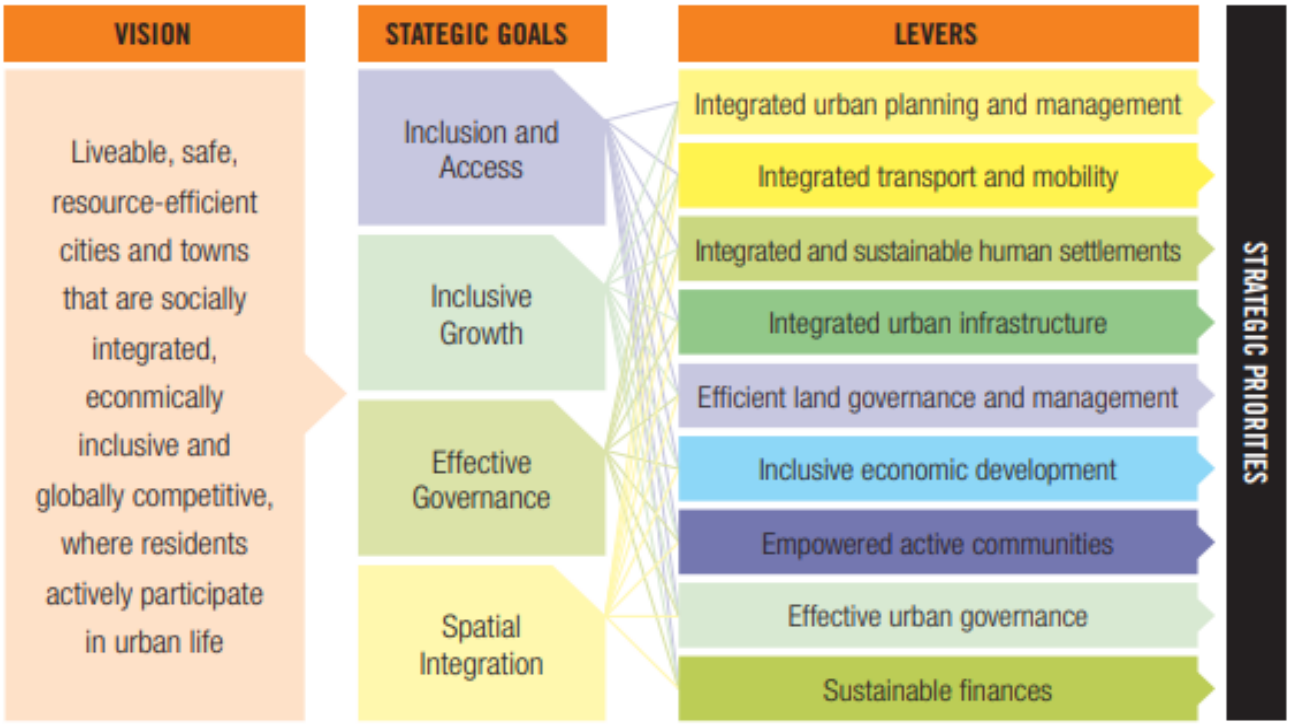
Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way to speed up service delivery to ensure that municipalities are properly supported and adequately resourced. The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

The objectives of the DDM are to:

- solve the silos at a horizontal and vertical level;
- maximise impact and align plans and resources at our disposal through the development of "One District, One Plan, and One Budget";

- narrow the distance between people and government by strengthening the coordination role and capacities at the district level;
- ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level;
- build government capacity to support municipalities;
- strengthen monitoring and evaluation at district and local levels;
- implement a balanced approach towards development between urban and rural areas;
- ensure sustainable development while accelerating initiatives to promote poverty eradication, employment, and equality; and
- exercise oversight over budgets and projects in an accountable and transparent manner.

Nationally, the DDM is expressed through the development of a One Plan. The One Plan is defined as an intergovernmental plan setting out a 25–30-year long-term strategic framework (consisting of short, medium, and long-term actions) to guide investment and delivery in each of the districts and metropolitan spaces. This plan for each space is to be jointly developed and agreed to by all three spheres of government.



3.6.4 Integrated Urban Development Framework (IUDF)

The National Development Plan (NPD) indicated that by 2030, South Africa should observe meaningful and measurable progress in creating more functionally integrated, balanced, and vibrant urban settlements. To attain this goal, the Department of Cooperative Governance, working in collaboration with other national departments and other role-players, developed the Integrated Urban Development Framework (IUDF) to transform and restructure South Africa's urban spaces.

The IUDF aims to guide the development of **inclusive**, **resilient,** and **liveable urban settlements** while directly addressing the unique conditions and challenges facing South Africa's cities and towns.

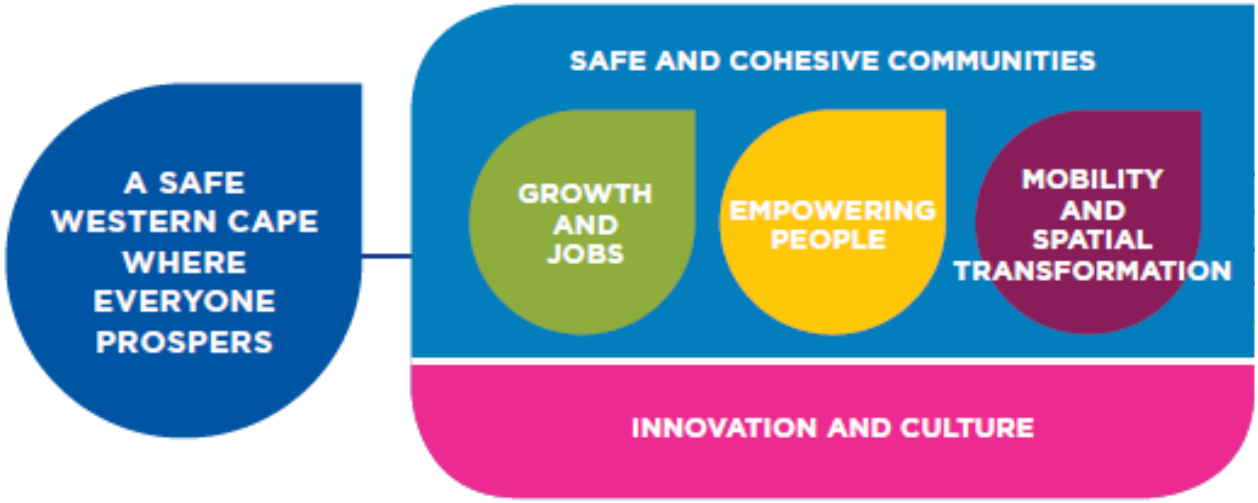
To achieve the transformation vision, four (4) overall strategic goals were introduced:

Figure 19: UIDF Strategic Goals and Levers

Source: Integrated Urban Development Framework

The IUDF strategic goals listed above create nine policy levers. These policy levers can only be used if they are added to tools for planning municipal development, like the Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

3.7 Provincial Policy Direction



3.7.1 The Western Cape Government Provincial Strategic Plan 2019 – 2024

The Western Cape Provincial Government (WCG) committed itself, through its recently adopted Vision Inspired Priorities (VIPs), to building a values-based competent state that enables opportunity and promotes responsibility in a safer Western Cape.

The VIPs are as follows:

1. Safe and Cohesive Communities **(VIP 1)**;
2. Growth and Jobs **(VIP 2)**;
3. Empowering People **(VIP 3)**;
4. Mobility and Spatial Transformation **(VIP 4)**; and
5. Innovation and Culture **(VIP 5)**.

Figure 20: WCG: Vision Inspired Priorities (VIPs)

3.8 The Cape Winelands District Municipality (CWDM) Strategic Focus

The Cape Winelands District Municipality has set the following strategic objectives for their District:

Table 22: CWDM Strategic Objective 2022 – 2027

SOs	Strategic Objective 2022 – 2027
SO 1	Creating an environment and forging partnerships that ensure social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SO 2	Promoting sustainable infrastructure services and a transport system which fosters social and economic opportunities.
SO 3	Providing effective and efficient financial and strategic support services to the Cape Winelands District Municipality.

3.9 Local Policy Direction

3.9.1 Stellenbosch Municipality

The intent of the strategic goals for the 1st Review of the 5th Generation IDP 2022 – 2027 will remain the same as the strategic goals of the 5th Generation IDP 2017 – 2022.

The table below indicates how the municipality's Strategic Focus Areas (SFAs) are aligned with national, provincial, and district plans.

Table 23: Horizontal Alignment Matrix

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	National Strategic Outcomes	Medium-Term Strategic Framework	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 1- Valley of Possibility	Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all (8)	Ensuring decent employment through inclusive economic growth (4)	Economic transformation and job creation (2)	Growth and Jobs (VIP 2)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 2- Green and Sustainable Valley	Take urgent action to combat climate change (13) Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss (15)	Ensuring that the environmental assets and natural resources are well protected and continually enhanced (10)	Social cohesion and safe communities (6) Spatial integration, human settlements, and local government (5)	Empowering People (VIP 3)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District through economic, environmental, and social infrastructure investment.
	Make cities and human settlements inclusive, safe, resilient, and sustainable(11)	Ensuring vibrant, equitable and sustainable rural communities with food security for all (7) Promoting sustainable human settlements and improved quality of household life (8)	Social cohesion and safe communities (6)	Mobility and Spatial Transformation (VIP 4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 3- Safe Valley	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Ensuring all people in South Africa are and feel safe (3)	Social cohesion and safe communities (6)	Safe and Cohesive Communities (VIP 1)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District.

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	National Strategic Outcomes	Medium-Term Strategic Framework	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 4- Dignified Living	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4) Ensure healthy lives and promote well-being for all at all ages (3)	Providing improved quality of basic education (1) Enabling a long, healthy life for all South Africans (2)	Education, skills, and health (3)	Growth and Jobs (VIP 2)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
	Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation (9)	Setting up an efficient, competitive, and responsive economic infrastructure network (6)	A capable, ethical, and developmental state (1)	Empowering People (VIP 3)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 5- Good Governance and Compliance	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Achieving an accountable, effective, and efficient local government system (9) Creating a better South Africa and a better and safer Africa and the world (11) Building an efficient, effective, and development-oriented public service and an empowered fair and inclusive citizenship (12)	A capable, ethical, and developmental state (1) Education, skills, and health (3) Social cohesion and safe communities (6)	Innovation and Culture (VIP 5)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
		Achieving a responsive, accountable, effective, and efficient local government system (9)	A capable, ethical, and developmental state (1)	Embed good governance and integrated service delivery through partnerships and spatial alignment (5)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

CHAPTER 4:
Spatial Development Framework

4.1 The Purpose of the Spatial Development Framework

Spatial Development Frameworks (SDFs) serve to provide strategic direction and align the efforts of all government spheres as they apply within the municipal area. The SDF serves to give a coherent spatial direction to the municipal Integrated Development Plan (IDP) and provide a planned and integrated approach to achieve the shared spatial development vision, goals, and objectives for sector plans of government over the short term (5 years) as well as over the strategically longer term (10–20 years) to achieve the desired spatial growth and development pattern of the municipality. Most importantly, the SDF outlines the municipality's spatial agenda for its service departments, ensuring that their sector plans, programmes, and projects are grounded in sound and common spatial logic.

In essence, the SDF is a spatial contract between all spheres of government as well as the private sector, which is binding and must assist in integrating, coordinating, aligning, and expressing development efforts. It should be actively supported through the specific arrangement of prioritising, mobilising, sequencing, and implementing investment in priority spatial structuring areas to achieve the legislated development principles of sustainable development. Therefore, the SDF and the Capital Expenditure Framework (CEF) indicate where and how the municipality intends to channel public investment, influence, and other resources at its disposal. In broad terms, this includes where infrastructure and public facility investment will be prioritised, where private sector partners will be sought in development, and how the municipality will view development applications through its spatial planning and land use management system.

4.2 The relationship between the IDP and SDF

Figure 21: Relationship: IDP and SDF

At its core, SDFs deal with the art and science of shaping places at different scales (or areas of influence, from large regions to municipal jurisdictions or neighbourhood precincts). The SDF aims to:

- Enable a long-term spatial vision for the future of regions and places to be best developed over time that is based on evidence, local distinctiveness, and community-derived objectives;
- Translate this vision into a set of strategic municipal planning, policies, priorities, programmes,

and land allocations, together with the public-sector resources (budget) to deliver them;
- Create a framework for private investment and regeneration that promotes economic, environmental, and social well-being for a specific region or area, i.e., the Adam Tas Corridor Local Areas Spatial Development Framework and Development Guidelines (October 2022); and
- Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation through its CEF (medium-term) and IDP (short-term).

In the case of Stellenbosch Municipality, the SDF, CEF, and IDP must answer the following questions: "How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place, where will it take place, and who will be responsible for what aspect of the development?"

4.3 The Legislative Framework of Municipal SDFs

With the enactment of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), a new planning regime was introduced in South Africa. The coherent legislative system has been designed to spatially transform the country in its democratic era. In broad terms, SPLUMA differentiates between two components of the planning system:

- Spatial Development Frameworks; and
- The Land Use Management System (LUMS).

Section 12(1) of SPLUMA sets out general provisions that apply to the preparation of all scales of SDFs. These provisions require that all SDFs must:

- Interpret and represent the spatial development vision of the responsible sphere of government and competent authority;
- Be informed by a long-term spatial development vision;
- Represent the integration and trade-off of all relevant sector policies and plans;
- Guide planning and development decisions across all sectors of government;
- Guide a provincial department or municipality in taking any decision or exercising any discretion in terms of this Act or any other law relating to spatial planning and land use management systems;
- Contribute to a coherent, planned approach to spatial development in the national, provincial, and municipal spheres;
- Provide clear and accessible information to the public and private sectors and provide direction for investment purposes;
- Include previously disadvantaged areas, areas under traditional leadership, rural areas, informal settlements, slums, and land holdings of state-owned enterprises and government agencies, and address their inclusion and integration into the spatial, economic, social, and environmental objectives of the relevant sphere;
- Address historical spatial imbalances in development;
- Identify the long-term risks of spatial patterns of growth and development and the policies and strategies necessary to mitigate those risks;
- Provide direction for strategic developments, and infrastructure investment;
- Promote efficient, sustainable, and planned investments by all sectors;
- Indicate priority areas for investment in land development;
- Promote a rational and predictable land development environment to create trust and stimulate investment;
- Take cognisance of any environmental management instrument adopted by the relevant environmental management authority;
- Give effect to national legislation and policies on mineral resources and sustainable utilisation and protection of agricultural resources; and

- Consider and, where necessary, incorporate the outcomes of substantial public engagement, including direct participation in the process through public meetings, public exhibitions, public debates and discourses in the media, and any other forum or mechanisms that promote such direct involvement.

Chapter 2 of SPLUMA sets out the development principles that must guide the preparation, adoption, and implementation of any SDF, policy, or by-law concerning spatial planning and the development or use of land. The table below summarises the five SPLUMA principles and what they mean.

Table 26: SPLUMA and Development Principles

Principle	Meaning
Spatial justice	• Past spatial and other development imbalances must be redressed through improved access to and use of land. • SDFs (and associated policies) must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements, and areas characterised by widespread poverty and deprivation. • Spatial planning mechanisms, including zoning scheme by-laws, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons. • Land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas and informal settlements. • Land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas. • In considering an application, a Municipal Planning Tribunal may not impede or restrict the exercise of its discretion solely because the value of land or property is affected by the outcome of the application.
Spatial sustainability	• Promote land development that is within the fiscal, institutional, and administrative means of government. • Give special consideration to the protection of prime and unique agricultural land. • Uphold the consistency of land use measures under environmental management instruments. • Promote and stimulate the effective and equitable functioning of land markets. • Consider all current and future costs to all parties for the provision of infrastructure and social services in land developments. • Promote land development in sustainable locations, limit urban sprawl, and result in viable communities.
Efficiency	• Land development must optimise the use of existing resources and infrastructure. • Decision-making procedures must be designed to minimise negative financial, social, economic, or environmental impacts. • Development application procedures must be efficient and streamlined, and timeframes must be adhered to by all parties.
Spatial resilience	• The flexibility of spatial plans, policies, and land use management systems is necessary to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.
Good administration	• All spheres of government must ensure an integrated approach to land use and land development, guided by spatial planning and land use management systems. • All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of SDFs. • The requirements of any law relating to land development and land use must be met timeously. • Transparent processes of public participation are incorporated into the preparation and amendment of spatial plans, policies, land use schemes, and development applications to allow all parties to provide input on matters affecting them. • Policies, legislation, and procedures must be set up to inform and empower members of the public.

At the municipal sphere of government, aligned with SPLUMA, and the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), the Stellenbosch Municipal Land Use Planning By-law (dated 9 June 2023) further outlines minimum standards for SDFs, both in the preparation process and content. In support of SPLUMA, the Department of Rural Development and Land Reform (now known as the Department of Agriculture, Land Reform, and Rural Development) prepared a detailed process and content entitled "Guidelines for the Development of Provincial, Regional and Municipal Spatial Development Frameworks and Precinct Plans." The Stellenbosch Municipality follows these legislative frameworks and guidelines in its work on the municipal and local SDFs, which is subject to an extensive review every five years, with less comprehensive reviews annually.

4.4 Stellenbosch Municipality's work on its SDF, Review and Proposed Amendments

The Council approved the commencement of the proposed amendment to the Municipal Spatial Development Framework, 2019 due to the following pertinent factors:

- The review of the MSDF highlighted the need for minor amendments to the MSDF to incorporate previous Council resolutions to ensure continued strategic support and guidance from an integrated spatial and financial planning perspective.
- The proposed amendment process of the MSDF was initiated through Council decisions and actions as part of the implementation framework of the MSDF and other strategic / master planning documents, which include the Housing Pipeline, the Integrated Waste Management Plan, and the Capital Expenditure Framework.

In essence, the amendment process of the MSDF was initiated to achieve strategic, spatial, and financial alignment and to enable the coordination of policies within the municipality. Following the integrative spatial and financial planning approach helps to avoid duplication of efforts and ensure maximum positive impact from the investment of resources.

Accordingly, the review and amendment process of the MSDF was initiated and approved by the Council in November 2021. The amendment was included in the Integrated Development Plan (IDP) and Budget Process Plan for 2022-2027 and the revised SDF/IDP/Budget Time Schedule for 2022/2023. The Council also supported and approved the process as stipulated in terms of Section 11(b) of LUPA; Section 3(1)(b) of the MPBL for amending the MSDF. Therefore, Council approved the establishment of a municipal project steering committee (PSC) and the publication of the proposed amended MSDF for a sixty-day period for public commenting to all organs of the state and the public. The standard operating procedure for the amendment of the MSDF without an Intergovernmental Steering Committee (ISC), as contained in the WCG: DEA&DP Circular, was used as a guideline, and the steps were recorded in the IDP and Budget Time Schedule / Process Plan (as referenced above) in terms of Section 28 of the MSA.

In preparing the review and amendment of the MSDF, previous studies, new and updated policy documents, and plans have been considered and continue to form the basis of the MSDF, 2019 and its subsequent proposed and adopted amendment (27 June 2023). The methodology comprised primary and secondary data collection and intensive consultation with local, national, and provincial government actors as well as the communities. The collected data were triangulated with a desktop review of multiple literature sources, including academic sources. A set of spatial analyses were conducted from regional, municipal, and neighbourhood scales to define the major challenges and opportunities to inform the implementation plans (including the CEF). These socio-economic, spatial profiles, and spatial demand quantification were initiated during the CEF process in 2021 and updated in the 2023/24 document with specific consideration for the adoption of the catalytic projects as approved in the ATC LASDF (2022). These profiles and spatial outcomes were reviewed and validated with the strategic assessment and primary actors in the project. The profiles inform and confirm the status quo of the MSDF in 2019 and the spatial transformation vision and targets reflected in the spatial strategies of the MSDF.

In the drafting of the proposed draft amended MSDF, some of the sections of the MSDF, 2019 were found not necessary to be updated due to no changes being noted since the adoption of the MSDF (2020) and its subsequent reviews (2022/23). The sections listed below were updated to reflect the current status quo:

- Part 1: Introduction, which reflects the approach and actions of the amendment to the MSDF process.
- Part 2: Legislative and Policy Context (partially updated) to reflect the updated 5th Generation IDP 2022-2027.

- Part 5: Plans and Settlement Proposals (partially updated) to reflect the corrected Tables 20 and 28 as adopted by Council on 25 May 2022.
- Part 7: Capital Expenditure Framework as updated and adopted by the Council on 31 March 2021. Currently, the CEF is being updated as a result of the approval and implementation of the catalytic project, Adam Tas Corridor, and the new updated and adopted CEF (which is a core component of the SDF) will be attached in Appendix G.
- Appendix F: Reviewed Housing Pipeline was updated and adopted by the Council on 25 May 2022. The yearly review and update will be attached to the first draft amended MSDF in Appendix F for public participation.

In addition to the abovementioned process, the public was also invited to submit any development proposals for consideration in September 2022. Submissions received consisted of strategic catalytic and infrastructure projects committed to by the Council in previous decisions and sector planning policies, as well as a few private sector development representations for urban edge amendments. These proposals were considered by the Planning Steering Committee (PSC), consisting of the Municipal Manager, Chief Financial Officer, and Directors and Senior Managers of municipal departments – Corporate Services (specifically IDP); Planning and Economic Development; Infrastructure Services; and Community and Protection Services. The MSDF Project Steering Committee (PSC) considered and made recommendations on the proposals that were incorporated within the first amended MSDF. These recommendations and the first draft amended MSDF were presented to the Council, and they were supported at the 12th Council Meeting dated 29 March 2023, and the amended MSDF was accordingly advertised for public comment for a period of sixty (60) days.

During this second round of public participation, general comments were received from various interested and affected parties, including property owners requesting amendments to the urban edges. These proposals for the amendment of the urban edge were submitted during the comment period for the proposed draft amended MSDF during April - May 2023 and accordingly, they were not submitted timeously for consideration as part of the amended MSDF, inclusive of the amendment and review of the CEF. Although the proposals were submitted outside of the timeframe, they were captured and considered using the principles of the MSDF, spatial alignment criteria applicable within the CEF, and a high-level strategic environmental assessment using applicable policies (i.e., SEMF, Heritage Inventory, Biodiversity Spatial Plan) and spatial datasets normally associated with these policies. The aforementioned criteria were broadly used to ascertain if, in terms of adopted and approved municipal spatial policies, a form of compliance, conformance, and / or deviation was found between the proposals and policy. The outcome of the preliminary analysis demonstrated that the proposals currently deviate from the Council policy and principles, and accordingly, the recommendations that these proposals should not be recommended were supported by a Council Meeting dated 27 June 2023. It is also important to note that, should these proposals be considered, they will have a material impact on the spatial strategies of the MSDF as well as the spatial targeting of the capital expenditure framework. Accordingly, both documents will have to procedurally follow another amendment process as prescribed by the applicable legislation.

The sections below provide an overview of the spatial challenges, opportunities, strategies, and programmes as reflected in the SDF over the longer term. The spatial challenges and opportunities identified in the SDF

The Stellenbosch Municipality's SDF attempts to address the spatial dimensions of varied challenges, documented in this IDP and numerous studies and documents produced to date, dealing with spatial and non-spatial matters.

Framed as a question, the key challenge revolves around how to achieve, through managing the spatial distribution and form of development—primarily land use activities and associated structures, both new and existing—shared and inclusive growth, increased access to opportunities (particularly for disadvantaged citizens), improved sustainability by minimising ecological footprints, and

maintenance of the unique sense of place of the settlements and surrounding lands that constitute the municipality.

In addressing these challenges, the SDF has two tasks. The first relates to how activities should be organised and accommodated in space to best address challenges. The second is to guide how other sectors, services, or functional areas should adjust their focus and work to support the recommended organisation and accommodation of activities in space.

Without re-stating the varied challenges of the municipality outlined in full in the IDP and sector documents, the table below lists specific spatial challenges addressed by the SDF, following the broad themes contained in the SDF Guidelines.

Table 27: Spatial Challenges

Theme	Spatial Challenges
Biophysical context	The degradation of key ecological assets and the loss of productive agricultural land have been ongoing. The condition of the river systems within the municipality has deteriorated. Climate change is likely to have a significant impact on the natural resource base of the municipal area, which will include a reduction in water, increased temperatures, increased fire risks, and increased incidences of extreme weather events. This in turn will impact agricultural production, scenic landscapes, the liveability of urban areas, and the ability to provide basic services such as water and sewerage treatment.
Socio-economic context	The population in the municipality will continue to grow above the average provincial rate, and urbanisation rates will increase with settlements absorbing the bulk of growth. The ability of the economy to absorb growth, particularly concerning job creation, is concerning. The informal sector will continue to provide livelihoods to a significant proportion of residents. The growing youthful population, large student population, and seasonal influx of labour are likely to increase the municipality's dependency ratio, in addition to a smaller base from which the municipality can collect revenue to provide services and opportunities that will improve the lives of the poor. Inequality in the municipal area, and particularly in historic towns such as Stellenbosch and Franschhoek, remains significant, and current development patterns are not addressing the issue. Crime rates remain high, and the market response, i.e., private security provision for those who can afford it, is likely to exacerbate inequality. Upgrading and providing basic services and housing will remain the focus of the municipality, including other government agencies, for the foreseeable future. The focus on these priority areas can lead to foregoing investment in other areas that would likely have more socio-economic spin-offs and result in improved place-making. The municipality's inability to provide basic services (e.g., refuse removal) leads to dumping, environmental degradation, and resulting health-related problems.
Built environment context	Infrastructure backlogs – especially in poor areas – and essential municipal infrastructure require significant investment and maintenance. This applies to all basic services (electricity, water supply, wastewater management, and solid waste disposal). The need for housing and shelter – both for the lower-income groups and those with employment – has not been adequately met. The existing housing pipeline will not meet the needs of those requiring state assistance, and little is built that is affordable to ordinary workers. A pattern of intermittent land invasions and associated responsive basic infrastructure provision, as well as the daily inward commuting of ordinary workers and students, is likely to continue. Property and land are inordinately expensive in the municipality, locking out both the poor and lower / middle-income workers from the property market. Without significant intervention in the property market, this situation is likely to worsen. Inequality in the municipality is particularly evident in the structure of settlements, with low-density development accommodating the wealthy, while the poor are accommodated in high-density, poor-quality peripheral areas. Significant numbers of people live in informal shelters. Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, amongst other inefficiencies. The new high-density development mostly focuses on the student market, and target groups using private vehicles. Numerous heritage resources located within the settlements are assets of immense value. Many of these, are underutilised and have the potential to become vehicles for innovative development that can contribute to creating a more inclusive economy. The existing industrial / manufacturing operations and land holdings in the centre of Stellenbosch town impede large-scale restructuring of the settlement. The planned move of Distell – occupying large tracts of strategic land in Stellenbosch town – to Klapmuts presents very significant opportunities for the future development of Stellenbosch, Klapmuts, and the broader regional space economy. If not rigorously managed as a shared initiative between the public and private sectors, the opportunity may be lost. The municipality should focus maximum effort on utilising the opportunity presented to address the needs of the town.

Theme	Spatial Challenges
	▪ Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns. ▪ This regional mobility and growth approach's focus has very high financial, economic, social, and environmental costs, as it is unsustainable and exclusionary for most of the population. The regional focus on private vehicle growth has an adverse consequence for managing transport at the localised level where trips are generated. ▪ The provision of public transport, non-motorised modes, and travel demand management programmes is generally considered a local municipal function and not a core responsibility or competency of the provincial government. Given the extent of transport issues in the municipality, the municipality has limited institutional capacity and funding for the management of transport issues. As a result, sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions. ▪ The municipality continuously updates the online housing demand database and associated mobile applications to provide a valuable source for planning and delivery.
Institutional context	▪ The limited capital budget of the municipality, given the extent and depth of community needs. ▪ Limited funds to address critical issues, especially those related to infrastructure augmentation and maintenance, place the municipality in a tenuous position to reverse backlogs or negative trends in shelter or infrastructure needs. ▪ Private sector investment is not structured to contribute to the long-term maintenance of common assets or address the developmental needs of the municipal area. ▪ The growth in rates of income will largely be used to maintain existing infrastructure and services and will likely not focus on new productive investments. ▪ The limited professional resources of the municipality, specifically concerning the rigorous and dedicated full-time management of large-scale projects. ▪ Sector planning remains fragmented, and most developments follow a business-as-usual pattern.

4.5 The Spatial Proposals of the SDF

4.5.1 Spatial development 20 -year vision statement

In line with the SM's vision as the "valley of opportunity and innovation" (as contained in the IDP), the vision for spatial development and management is described as follows:

"We envisage a municipal area even more special than it is today; a place of natural beauty, rich in the way it preserves and exposes elements of history and culture, its produce from the land, the quality of its institutions, and the mindfulness and innovations of its people.

It is a future Stellenbosch municipal area that remains familiar; it has retained what differentiates the municipality from other places, its landscapes, historic buildings and settlement patterns, and the specialness of its institutions. It is resilient; it has adapted to the needs of today without losing what is special from the past. It is inclusive; it has accommodated the needs of citizens from all walks of life without fear. It is diverse and therefore productive. Adapting to new needs, and accommodating new people, it becomes the stage for new expressions of culture, new businesses, and new ways of doing.

In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape, the reach and extent of its public institutions, and the capacity and opportunity of its infrastructure. Each provides for a range of citizens from all walks of life, with significant choice in place of residence."

4.5.2 Strategic Focus and Spatial Alignment between the IDP and SDF

The table below illustrates how work on the SDF relates – in terms of its focus and contribution – to achieving the five municipal strategic focus areas as contained in the IDP.

Table 28: IDP Strategic Focus Areas and the SDF

IDP Strategic Focus Area	Related concerns of the SDF	SDF Strategic Direction
SFA1: Valley of Possibility	The way settlements, nature, and agriculture are spatially developed and managed to enhance individual and collective livelihood opportunities and enterprise development and overcome inequity and exclusion.	▪ Containment of settlements to protect nature / agricultural areas and enable public and non-motorised transport and movement. ▪ A focus on public and non-motorised transport and movement.
SFA2: Green and Sustainable Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to maintain and enhance natural resources and ensure a future balance between human settlement and its use of natural resources and opportunities.	Protection of natural areas, agricultural areas, and river corridors.
SFA3: Safe Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective safety in living, in movement, at work, in institutions, and play.	Denser settlements with diverse activity to ensure surveillance.
SFA4: Dignified Living	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure equal access to shelter, facilities, and services, notwithstanding material wealth, age, gender, or physical ability.	A specific focus is on the needs of "ordinary" citizens, who experience limited access to opportunity because of restricted material resources.
SFA5: Good Governance and Compliance	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective participation – based on accessible information and open processes – in matters related to spatial planning and land use management.	Presenting information, including opportunities and choices, in a manner that assists its internalisation by all.

4.5.3 Spatial Proposals and Structuring elements of the SDF

The conceptual framework extracted from the SDF shows the expression of the seven key principles, which include:

Maintain and grow the assets of Stellenbosch's natural environment and farming areas

- The spatial policies that relate to this principle, focus on protective actions, also called urban management.
- The intent is to protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality.
- Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives (including settlement hierarchy), and rural guidelines.
- Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.

Respect, preserve, and grow our cultural heritage

- The spatial policies that relate to this principle, focus on protective actions around specific spatial elements, e.g., scenic landscapes, scenic routes, and special places of arrival, while also focusing on improving the landscape and public amenities associated with these cultural assets.
- The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.
- As far as possible, protect cultural landscape assets – including undeveloped ridgelines, view corridors, scenic routes, and vistas – from development.

Direct growth to areas of lesser natural and cultural significance as well as movement opportunity

- The spatial policies that relate to this principle, focus on protective actions around specific spatial elements e.g. maintaining the urban edge and following the defined settlement hierarchy.
- In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include, informal settlement upgrading; residential densification and infill development; mixed land use and improved economic opportunity; improved access and mobility; improved access to community facilities; and improved landscaping and public amenities.

The spatial policies are spatially targeted in priority development areas and include Baden Powell Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts.

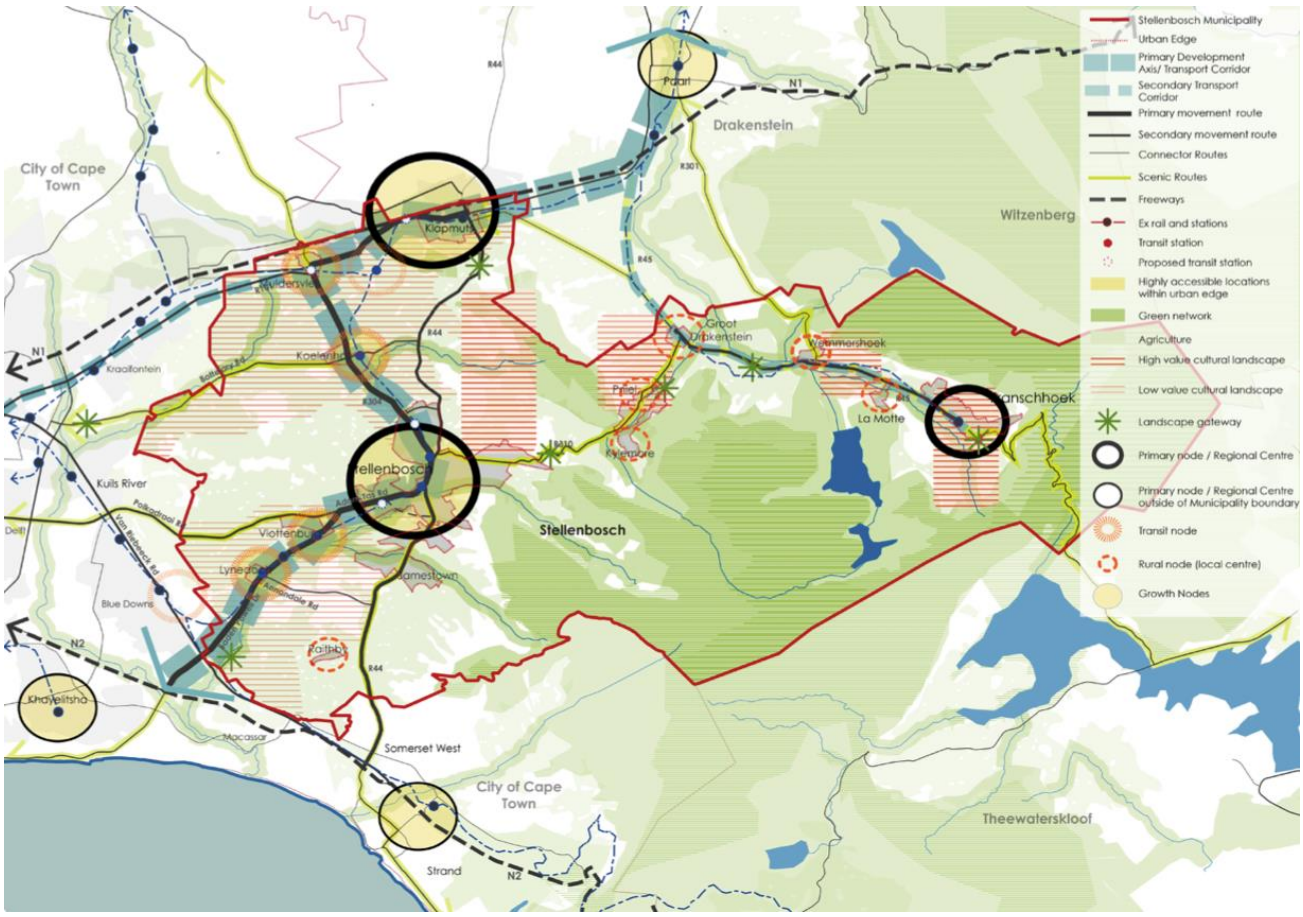
- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected while ensuring that the capacity of existing infrastructure can accommodate change and growth.
- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements focus on new growth and development primarily in larger settlements (as referenced in principle 3 above), to:

  a) Minimise associated impacts on the environment, agricultural land, and natural resources.
  b) Maximise the livelihood opportunity (also referred to as quality of life) by building on the availability of existing public facilities and commercial opportunities.
  c) Maximise the sustainability of new facilities and commercial opportunities.
  d) Enable the provision of infrastructure most efficiently and cost-effectively.
  e) Minimise the need for inter-settlement movement.
  f) Maximise opportunity for and use of non-motorised and public transport.
  g) Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
  h) Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.

Clarify and respect the roles and functions of different elements of the movement structure

- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensure a balanced approach to transport in the municipality that appropriately serves regional mobility needs and local-level accessibility improvements.
- The spatial policies actively promote compact, dense, mixed-use development, which reduces and promotes non-motorised and public transport.

Ensure balanced, sustainable communities



- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge) work towards and maintain, for each settlement, a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- Adopting a conservative view towards the extension of existing urban edges over the SDF period.
- Actively support infill development and adaptive reuse of existing structures.
- Support increased densities in new, infill, and redevelopment projects.

- Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.
- Support the general upgrading and transformation of existing informal settlements.
- Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.
- Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- Ensure work and commercial opportunities are accessible through public transport and NMT to all communities and provide opportunities to emerging and small entrepreneurs.
- Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, ensuring walkability, and so on.

Focus collective energy on a few catalytic areas that offer extensive opportunity and address present risk

- The spatial policies focus on major development efforts concerning new mixed-use, industrial, and residential developments, and significant changes in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klapmuts.

Figure 22: Consolidated Concept for the Municipal Area (Approved November 2019 and 27 June 2023)

4.6 SDF and CEF Implementation Frameworks

The SPLUMA guidelines require, as part of the SDF, a high-level implementation framework setting out the required measures that will support the adoption of the SDF proposals while aligning the capital

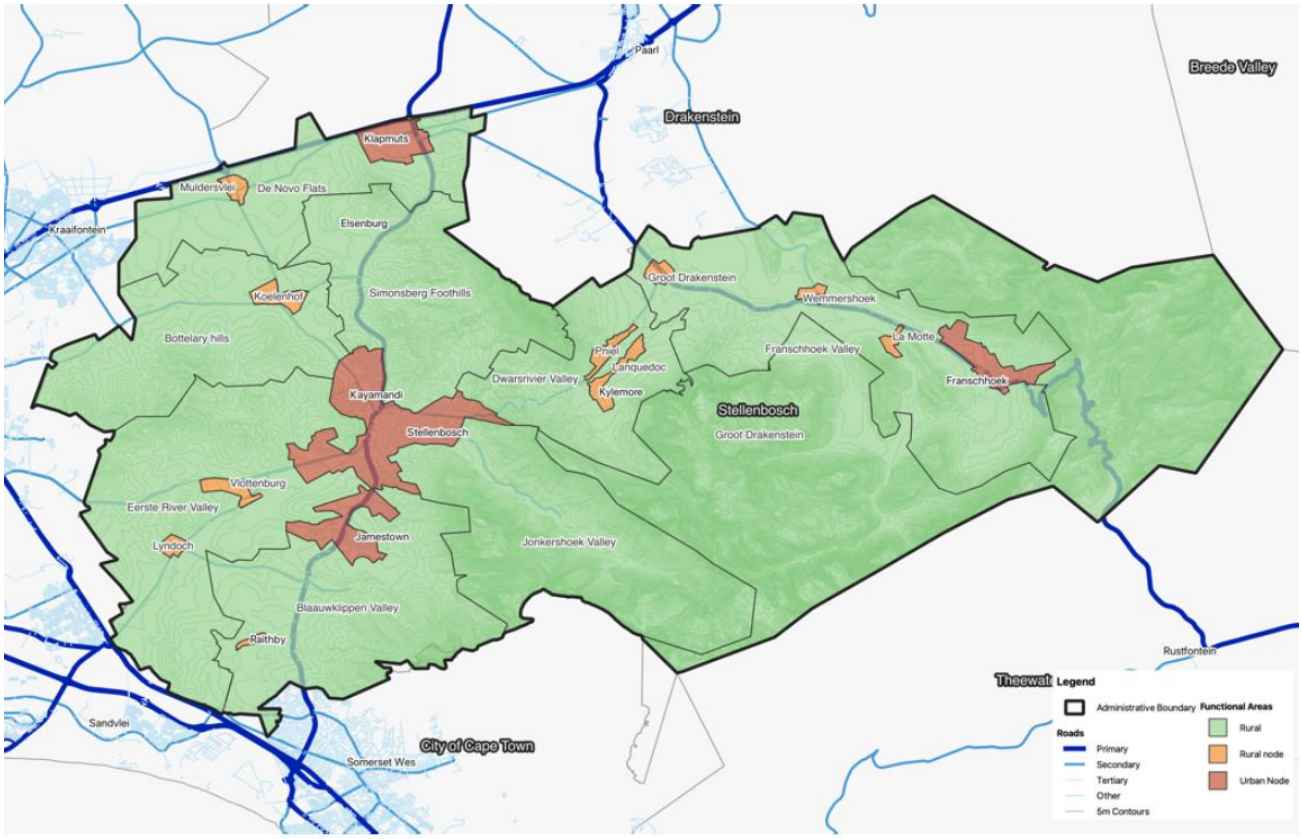
investment and budgeting processes moving forward. The SDF, and CEF Implementation Framework comprise the following sections:

- A proposed settlement hierarchy to inform and guide the investment rationale (linked to plans and settlement proposals);
- Priority development areas and themes;
- A policy framework (linked to strategies);
- Guidelines, studies, and information supporting the policies;
- Implications for sector planning and specific development themes, including:
  - Environmental and rural area management
  - Movement;
  - Housing; and
  - Local economic development;
- Land use management guidelines and regulations;
- Implications for inter-municipal planning;
- Catalytic initiatives;
- Further planning work;
- Institutional arrangements;
- Checklists in support of decision-making;
- A municipal leadership and advocacy agenda related to spatial development and management;
- Capital Expenditure Framework; and
- Monitoring and review.

4.6.1 Settlement hierarchy, priority development areas and themes

In terms of the SDF concept, prioritisation of development – at a broad level – is done through two main spatial structuring elements. The first is spatial and targeted at significant future growth in functional and priority development areas. The second is sectoral or thematic, focused on the kind of development to be prioritised.

The functional and priority development areas are categorised into urban and rural nodes and are depicted in the figure below, with the detailed description provided in the table:



The spatial areas for priority development over the *SDF* planning period are:

- Stellenbosch Town;
- Klapmuts; and
- Franschhoek (maintenance).

In terms of sectoral or thematic focus, the spatial development priority in all settlements should be to:

- Upgrade the servicing and transformation of informal settlements;
- Provide housing for lower-income groups in well-located areas (specifically through infill of vacant and underutilised land or redevelopment of existing building footprints);
- Expand and improve public and NMT routes;
- Improve public and community facilities and places (e.g., through clustering, framing them with infill development to improve edges and surveillance, prioritising landscaping, and so on); and
- Expand the recognition, restoration, and exposure of historically and culturally significant precincts and places (both in the form and use of precincts and places).

Figure 23: Functional and priority development areas (CEF, June 2023)

The proposed settlement hierarchy for SM, supporting the spatial plan and proposals for the settlement, is A significant centre comprising extensive education, commercial, and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities outlined in the table below.

Table 29: Proposed settlement hierarchy for the Stellenbosch Municipality

Settlement	Role	Development and Land Use Management Focus
Primary urban settlements		
Stellenbosch town	A significant centre comprising extensive education, commercial and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities.	▪ Broadening of residential opportunities for lower-income groups, students, and the lower to middle housing market segments. ▪ Upgrade of informal settlements. ▪ Retention of university functions in the town. ▪ Enablement of the Adam Tas Corridor. ▪ Sensitive residential infill and compaction. ▪ Drive to establish "balanced" precincts. ▪ Public transport development, travel demand management, parking controls, and NMT improvements.
Klapmuts	Focus on economic development (using a favourable location for manufacturing, logistics, and warehousing enterprises) and associated residential opportunities.	▪ Support for the development of RE / Farm 736 as a lever to economic development utilising a favourable location for manufacturing, logistics, and warehousing enterprises. ▪ Balanced housing provision in Klapmuts South is focused on those who can benefit from employment provision through unlocking Klapmuts North. ▪ Establishing the Klapmuts town centre. ▪ NMT improvements.
Franschhoek	Secondary service centre, significant tourist destination, and place of residence.	▪ Upgrade of informal settlements. ▪ NMT improvements. ▪ Sensitive infill within the urban edge provides inclusive housing and extended commercial opportunity (also for small and emerging entrepreneurs). ▪ Retention of historic character.
Secondary urban settlements		

Settlement	Role	Development and Land Use Management Focus
La Motte	Contained rural settlement.	↓ Diversification of existing activities to curtail the need for movement. ↓ Sensitive location of diversified uses closer to the R45. ↓ Limited further housing development.
Wemmershoek	Contained rural settlement.	↓ Possible extension of residential opportunity linked to re-use of the saw-mill site and local employment opportunity.
Groot Drakenstein	Contained rural settlement.	↓ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Dwars River Valley	Contained historic rural settlements.	↓ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Jonkershoek	Contained, but a dispersed collection of institutional, recreational, and residential uses.	↓ Potential future consolidated, inclusive settlement linked to rail / bus.
Muldersvlei	Contained rural settlement.	↓ Potential future consolidated, inclusive settlement linked to rail / bus.
Koelenhof	Contained rural settlement.	↓ Potential future consolidated, inclusive settlement linked to rail / bus.
Vlottenburg	Contained rural settlement.	↓ Gradual expansion of a unique development model based on sustainable living and education.
Lynedoch	Contained village and institutional clusters.	↓ Containment and limited expansion of existing offerings.
Spier	Contained tourism and cultural centre.	↓ Protection of unique historic settlement structure and form.
Raithby	Contained historic rural settlement.	↓ Potential future consolidated, inclusive settlement linked to rail/ bus.

Over the longer term, Muldersvlei / Koelenhof, and Vlottenburg / Lynedoch along the Baden Powell-Adam Tas-R304 could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing opportunity for a range of income groups) and integration with the corridor in terms of public transport. They are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

The focus on Stellenbosch town and Klapmuts does not exclude all development efforts in Franschhoek and the smaller settlements. Rather, it is argued that these settlements should not accommodate significant growth, as the pre-conditions for accommodating such growth do not exist to the same extent as in Stellenbosch town and Klapmuts.

What should be emphasised in Franschhoek, and smaller settlements is improving conditions for existing residents and natural growth within the context of retaining what is uniquely special in each (from the perspective of history, settlement structure and form, relationship with nature and agriculture, and so on).

4.6.2 Policy Framework

The table below sets out specific spatial policies to support the SDF concept and settlement plans. In using the policy framework, it is important to note that one specific policy or guideline should not be highlighted or used exclusively to support a specific initiative. Rather, each policy supports the other; each "frames" the other. Thus, initiatives or proposals should be evaluated in terms of the policy framework as a whole.

Further, the successful implementation of spatial policies and guidelines is often dependent on

related, supportive, non-spatial policies. This implies policy alignment across municipal functional areas and services.

The table also includes specific work guidelines that begin to frame the work to be undertaken or continued in support of proposed policies.

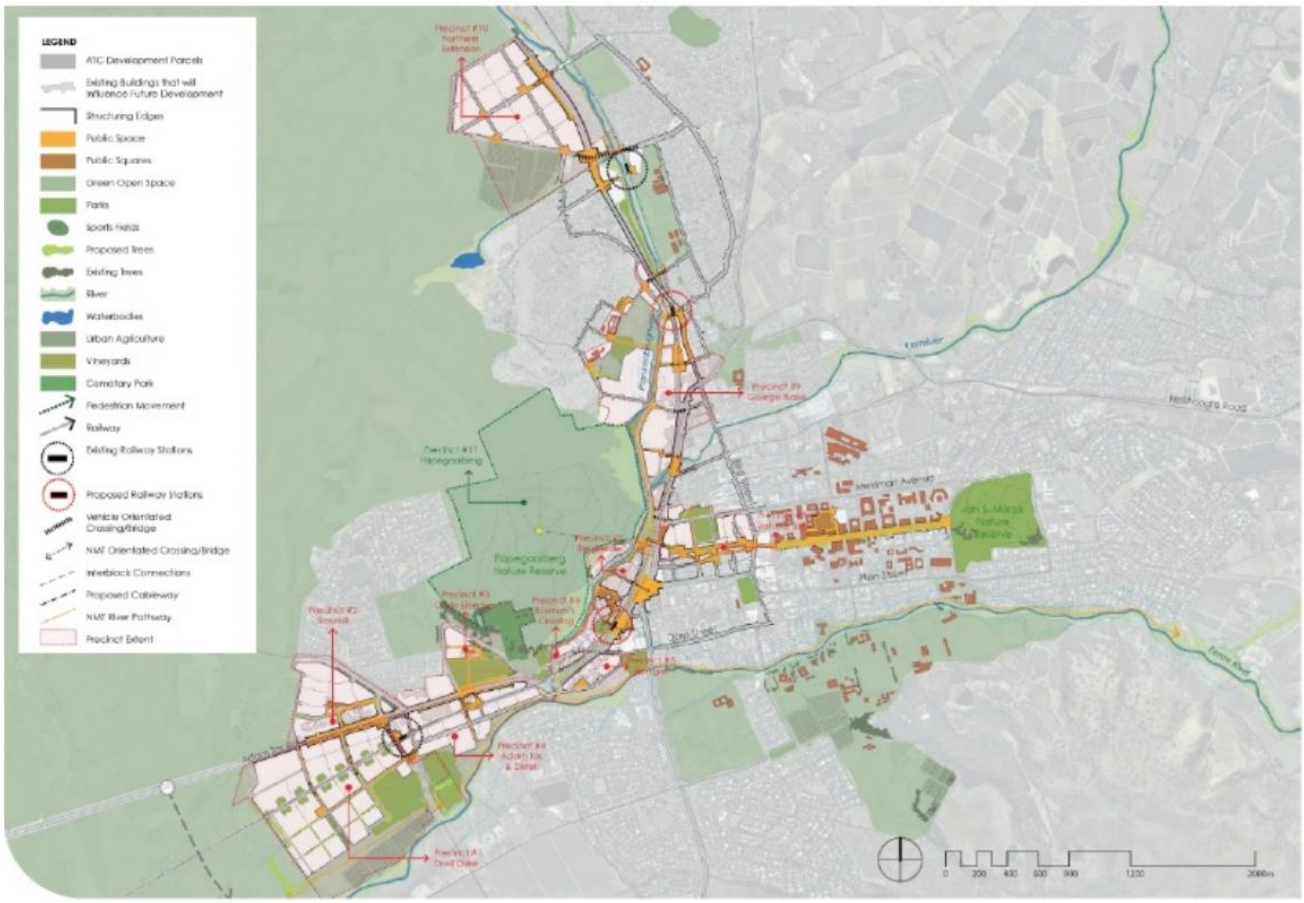
Table 30: Specific work guidelines

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
1.	Maintain and grow the assets of SM's natural environment.	• As far as possible, protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality. • Resist the subdivision of viable agricultural land unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives, an agri-village in line with provincial policy for the settlement of farmworkers, or the formalisation of the "urban" component of existing forestry settlements (for example, Jonkershoek and La Motte). • Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.	• Proactively maintain and upgrade municipal infrastructure services to limit / mitigate the risk to ecological services. • Support initiatives to protect water resources, rehabilitate degraded aquatic systems, retrofit or implement water demand management systems, and mainstream water conservation. • Support energy diversification and energy efficiency initiatives to enable a transition to a low-carbon, sustainable energy future. • Support initiatives to extend public access to natural assets without compromising the integrity of natural areas or ecological services. • Support initiatives by the private sector to extend environmental stewardship. • Assist in initiatives to diversify, strengthen, and open up new opportunities and jobs in the rural economy, including the identification of strategically located land for land reform purposes. • Support initiatives to utilise municipal-owned agricultural land for small-scale agriculture, forge partnerships with non-governmental or public benefit organisations to assume management responsibilities for commonages and provide basic agricultural services to commonages.	• Prepare and implement management plans for municipal nature reserves and other ecological assets. • Prepare and implement invasive species control plans for municipal properties. • Prepare and implement initiatives for the rehabilitation of rivers and wetlands in urban areas. • Develop resource-efficient strategies for all municipal services and land and building development (e.g., compulsory green energy installations in building development, greywater circulation, sustainable urban drainage, etc.). • Utilise and contribute to municipal and provincial mapping and planning initiatives that inform land-use decision-making supportive of ecological integrity, secure natural resources, and protect agricultural land of high value. • Delineate and manage urban edges and watercourse setbacks in a manner that diverts urban growth pressures away from important natural and agricultural assets. • Apply biodiversity offsets in cases where development in areas of endangered and irreplaceable biodiversity cannot be avoided. • Actively engage with adjoining municipalities and provincial governments to ensure that the integrity of SM's natural environment is maintained (specifically regarding land use management in adjoining municipal areas).

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
2.	Respect, preserve and grow the cultural heritage of SM.	• Preserve significant cultural and historic assets within the municipality and grow the opportunity for new or emerging forms of cultural expression through expanding the use of existing cultural assets or supporting new uses for areas or structures of historic value. • As far as possible, protect cultural landscape assets – including undeveloped ridgelines, view corridors, scenic routes, and vistas – from development. • Support alternative uses for historic structures and places that will enable their preservation (subject to adherence to the general SDF strategy and policies).	• Support the transfer of municipal assets of cultural and historic value to organisations geared to manage these assets sustainably in the interest of the broader community. • Manage heritage places and structures in terms of the recommendations of municipal heritage studies.	• Maintain and utilise municipal and inter-governmental evaluation and mapping initiatives to inform land-use decision-making supportive of cultural integrity and secure historic places and structures. • Actively engage – continuously – with adjoining municipalities and the provincial government to ensure that the integrity of SM's heritage is maintained (specifically regarding land use management in adjoining municipal areas).
3.	Direct significant growth or new development in SM to areas: • Not identified as having the most critical natural or cultural significance. • Where the most opportunity exists in existing infrastructure investment, whether reconfigured, augmented, or expanded.	• Prioritise the targeted settlements on the Baden Powell-Adam Tas-R304 corridor for growth / new development. • Over the SDF period, focus on Stellenbosch town and Klapmuts to accommodate significant new growth.	• Align the policy and planning of all municipal services to support accommodating significant growth and new development as proposed in specific areas. • Progressively utilise the municipality's significant asset of land as a resource to direct major growth or new development to areas not identified as of the most critical natural or cultural significance. • Allocate municipal funds for land acquisition in areas identified as most suitable for growth or new development (specifically for development as lower-income housing).	• Together with the WCG, undertake inter-service investigations to determine the exact location, size, nature, and form of new settlement areas to accommodate new growth. • Develop specific framework planning, land use management, infrastructure, financial, and urban design provisions, and directives to ensure the optimal development of identified settlement areas to accommodate new growth.
4.	Clarify and respect the different roles and potentials of settlements in SM and maintain the identity of each.	• Ensure that each settlement – large and small – remains a distinct entity, surrounded by natural open space and agricultural land. • Maintain a clear hierarchy of settlements that (in general terms) focuses on new growth and development in larger settlements to: – Minimise associated impacts on the environment, agricultural land, and natural resources. – Maximise livelihood opportunities by building on the availability of existing public facilities and	• Align the policy and planning of all municipal services to support the proposed settlement hierarchy and development / management approach. • Reinforce the role of Stellenbosch town as a regional service and tourism centre focused on higher-order educational, health, government, and commercial uses, as well as unique historic assets. • Reinforce the role of Klapmuts as a potential regional logistics / warehousing / manufacturing hub – with associated residential opportunity – based on its location at the intersection of the N1 and regional north / south movement routes.	• Support the re-location of land extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town to Klapmuts. • Maintain the nature and form of small rural settlements while enabling small changes towards improving livelihood opportunities.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		commercial opportunities. – Maximise the sustainability of new facilities and commercial opportunities. – Enable the provision of infrastructure most efficiently and cost-effectively. – Minimise the need for inter-settlement movement. – Maximise the opportunity for and use of non-motorised and public transport. • Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily). • Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.	• Maintain Franschhoek as a centre for tourism and culture with limited growth potential.	
5.	Ensure a balanced approach to transport in SM, that appropriately serves regional mobility needs and local-level accessibility improvements.	• Actively promote compact, dense, mixed-use development that reduces car dependence and enables and promotes the use of public and NMT.	• Shift municipal resources to include a greater focus on non-motorised, shared vehicle travel, and public transport solutions. • Establish measures to ensure that there is an inter-service agreement on the settlement hierarchy, settlement roles, associated functions, modes of transport to be carried out, and the development / management approach to be followed concerning different sections of the municipal movement network. • Work with the provincial and national governments to affirm the proposed categorisation of movement forms, and associated infrastructure and management needs in Stellenbosch. • Proactively seek management of travel demand among key stakeholders in SM in such a manner that significantly higher passenger volumes are gradually achieved from existing transport infrastructure. • Proactively allocate resources to improve NMT in the municipal area. • Strengthen the role played by rail-based public transport, including advocating for a new, lighter, frequent rail service on the Eerste River / Klapmuts rail line as the backbone of transport movement along the Baden Powell-Adam Tas-R304 corridor.	• Assess future transport development / improvements concerning the impact on the complete settlement system. • Guard against needed / required vehicular routes of necessity resulting in the development of undeveloped land traversed by the route.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
6.	Develop all settlements as balanced, inclusive, appropriately serviced, communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land.	• Work towards and maintain – for each settlement in the municipality – a compact form and structure to achieve better efficiency in service delivery and resource use, the viability of public and NMT, and facilitate inclusion, integration, and entrepreneurship development. • Adopt a conservative view towards the extension of existing urban edges over the SDF period. • Actively support infill development and the adaptive reuse of existing structures. • Support increased densities in new, infill, and redevelopment projects. • Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.	• Proactively drive transport demand management programmes (specifically in and around Stellenbosch town) to curtail private vehicle use. • Shift more transport resources to the development and operation of effective public transport services and the comprehensive provision of NMT.	• Review the delineation of restructuring zones to support the mSDF objectives. • Support development that emphasises public transport / NMT as opposed to private vehicular use. • Integrate spatial planning, transport planning (emphasis on public and NMT), and social facility planning. • Move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use. • Actively engage – continuously – with adjoining municipalities and provincial government to ensure that the integrity of SM's settlements as contained, and balanced communities is maintained (specifically about land use management in adjoining municipal areas).
		Support the general upgrading and transformation of existing informal settlements.	• Prioritise basic residential services for poor households, specifically in informal settlements and backyard dwellings, and a minimum level of basic services for marginalised rural settlements. • Resist existing informal settlements as the only viable settlement option for poor households by supporting the identification and servicing of alternative areas for settlement. • Ensure that asset management best practices are followed to maintain existing infrastructure investments and prevent greater replacement costs in the future. • Reinforce basic service delivery with good-quality urban management to support household and economic asset development.	• Put in place an inter-governmental portfolio of land (existing and earmarked for purchase), an agreed land preparation programme, and a release strategy, for publicly assisted, lower-income housing (including the BNG, FLISP, social / rental, and GAP markets). • Identify alternative settlement locations for poor households, over and above existing informal settlements. • To assist the municipality in housing provision, and support initiatives to house farmworkers on farms (in a manner that secures tenure).
		Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.	• The planning of infrastructure and social facilities should accommodate the likelihood of back-yarding and its contribution to livelihood strategies.	• Develop an inclusionary housing policy and guidelines. • Prioritise infill housing opportunities on public land for the BNG, FLISP, social / rental, and GAP markets. • Where possible, proactively plan for back-yarding opportunities in lower-income housing projects. • Actively support the development of student



No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
				housing in Stellenbosch town.
		Provide and maintain a system of accessible social facilities, integrated with public space and public and NMT routes.	• Reinforce social facilities with good quality urban management to ensure service excellence and sustainability. • Focus on fewer but better social facilities.	• Cluster social facilities. • Locate facilities in association with public space and public and NMT routes.
		Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets (e.g., river corridors).	• Prioritise open / public space development in poor and denser neighbourhoods of the municipality. • Reinforce open / public space with good quality urban management to ensure use and safety.	Ensure that the edges between building development and open spaces promote activity and passive surveillance.
		Ensure work and commercial opportunities are accessible through public and NMT to all communities and provide opportunities for emerging and small entrepreneurs.		• Avoid large retail malls and office parks in peripheral locations reliant on private vehicular access, which detract from the viability of established commercial and work areas and lock out small entrepreneurs.
7.	Actively seek conditions to enable the private and community sectors to align their resources and initiatives with the SDF principles and proposals.	Conscious of public resource constraints, actively seek and support private and community sector partnerships to expand livelihood opportunities, settlement opportunities for ordinary citizens, and the national imperative to expand participation in the economy.	Develop an incentive package to support private and community sector partnerships in achieving the SDF principles and proposals.	• Enable private and community sector participation by making known the municipality's spatial principles and intent in user-friendly communique and guidelines. • Require private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on.
8.	Focus major development energy in SM on a few catalytic development areas that offer extensive, inclusive opportunities.	Focus major development effort in SM on: • Unlocking development in Klapmuts North. • The Adam Tas Corridor (in Stellenbosch Town).	• Communicate municipal objectives and principles – across functional areas and services – for development and urban management in catalytic areas. • Seek landowner, provincial government, and national government support to develop catalytic areas in the best public interest. • Support the establishment of institutional arrangements solely dedicated to enabling the development of catalytic areas and proceed with work to detail the broader plan and activity programme. • Align municipal infrastructure and social services planning to support development in catalytic areas. • Use municipal and government-owned land assets to support development in catalytic areas.	• Ensure that catalytic areas are developed as inclusive, appropriately serviced communities, negotiable through NMT, and exhibit a positive relationship with surrounding nature and agricultural land. • Prepare land use management measures to enable development in catalytic areas. • Define catalytic areas as "restructuring" or other special-measure areas to enable benefit from national and provincial support and incentives.

4.7 Catalytic Initiatives - Adam Tas Corridor (ATC) Local Areas Spatial Development Framework, Development Guidelines (October 2022) and overlay zone (March 2023)

Large industrial spaces, including land that was formerly home to Cape Sawmills and Distell facilities, make up the most strategically located land in Stellenbosch town. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces – at scale – can contribute meaningfully to meeting existing challenges and SDF objectives.

In simple terms, the concept is to launch a process of re-imagining and re-purposing the land around Adam Tas Road within Stellenbosch town to enable the maximum potential of this space. This will entail the redevelopment of the Adam Tas Corridor, which includes the area stretching along the R310 and R44 along the foot of Papegaaiberg, from the disused Cape Sawmills site to the west of Kayamandi and Cloetesville along the northern part of this corridor.

Figure 24: Adam Tas Corridor Local Areas SDF (October 2022)

It forms the western edge of the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier / severance effect of the R44 and the railway line. Much of the area was historically used for light industrial and manufacturing purposes. It includes the disused Sawmill site, the government-owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, the Bergkelder complex, the Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloetesville. Under-utilised and disused land in the area measures more than 300ha.

Conceptually, a linear new district within Stellenbosch is envisaged adjacent to and straddling (in places) Adam Tas Road, the R44, and the railway line. Overall, development should be residentially led with a strong mixed-use basis and high density and should favour non-motorised ("NMT") access to the centre of Stellenbosch Town. It is estimated that the Adam Tas Corridor, through a preliminary

development conceptual framework, will produce approximately 3 million square metres of bulk within a 293-hectare area, with 69% earmarked for residential usage.

A central movement system (with an emphasis on public transport and NMT) forms the spine of the area and is linked to adjacent districts south and west of the corridor. The corridor retains west-east and north-south vehicular movement (both destined for Stellenbosch town and through movement), as well as the rail line. Remote parking facilities will enable ease of access within the corridor concept, with passengers transferring via public transport, cycling, and walking to reach destinations within the town of Stellenbosch.

The corridor is not envisaged as homogenous along its length, with uses and built forms responding to existing conditions and its relationship with surrounding areas. Conceptually, three (3) areas could be defined, each linked through a sub-district.

- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Rethink and reconstruct infrastructure, particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift the new development focus to the west of town, with the Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- Investigating options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on NMT;
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, while also assisting in establishing a compact, less sprawling town, public transport, and NMT; and
- Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Along the corridor as a whole – depending on local conditions – significant re-use of existing buildings is envisaged. This is seen as a fundamental prerequisite for diversity, in-built character, and activity (as re-purpose offers the opportunity for a great variety of spaces). Aspects of the industrial history of the area should remain visible. A range of housing typologies accommodates different income groups and family types.

Redevelopment, in terms of the concept, offers the opportunity to:

- Re-imagine the future use of the land encompassed in the ATC;
- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift new development focus to the west of town, with Die Braak and Rhenish complexes forming the centre and seam between the new west and east of Stellenbosch town;
- Investigate options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on non-motorised transport; and
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, as well as assisting in establishing a compact, less sprawling town, public transport, and NMT.

Existing manufacturing businesses can gradually relocate to the north, closer to the N1 logistics corridor (as Distell has planned for their operations).

A Local Spatial Development Framework ("LSDF") for the Adam Tas Corridor as well as comprehensive development guidelines were formally approved by the Council in October 2022 and will be used as the enabling planning framework to realise the implementation of the Adam Tas Corridor over the next 3–20 years. This LSDF includes an implementation framework that will guide the following:

- Most appropriate land use strategy;
- Action Areas / Catalytic Projects;
- Framework for Investment; and
- Other enabling interventions.

Following the implementation framework, the overlay zone for the Adam Tas Corridor has been approved (24 May 2023) and has been included as a special zone in the Stellenbosch Municipality Zoning Scheme Bylaw, 2023 (17 November 2023). The purpose of the overlay zone is to award the zoning rights envisaged by the Adam Tas Corridor LSDF to the individual land portions, together with the conditions applicable to each property, for the landowner to take up these rights.

Institutional arrangements are critical and include all spheres of government, private stakeholder involvement, and established partnerships. It would include a broad agreement between landowners and the municipality to pursue the corridor development concepts. The landowners collective and the municipality entered into a Memorandum of Understanding (MOU) confirming the spatial vision and implementation of the ATC LASDF. The Council approved the MOU in August 2022.

To assist Stellenbosch Municipality in coordinating the implementation of the Adam Tas Corridor LSDF and development guidelines, a project management unit (PMU) needs to be established. The purpose of the project management unit (PMU) is to coordinate, plan, and assist with the implementation of development along the corridor. The PMU will be formed on an equal basis between the municipality and the private sector involved with the Adam Tas corridor. The purpose of the PMU is to provide additional capacity and expertise to manage and implement the vision of the Adam Tas corridor. The establishment of the unit is currently being investigated and will be set up by 30 June 2024. The Council appointed the Economic Development Partnership (EDP) to help the municipality set up the PMU and Steering Committee.

Considering the capital infrastructure investment requirements for the ATC, the municipality and the landowners collectively agreed on the phasing of the corridor over the next 10 years. Over the short term (1–5 years), the first phase of the ATC was agreed to be Precincts 2–6, and a portion of Precinct 10, while the planning and infrastructure demand quantification for the rest of the precincts are considered in the CEF's capital expenditure programme (2023) and the capital infrastructure investment portfolio. The amendment of the CEF as part of the MSDF, 2023, and the review (2024) enable the municipality to strategically plan based on an understanding of the projects that are necessary to meet the needs of the municipality, including ensuring the allocation of resources is financially sustainable while also achieving the goals of the municipality.

4.7.1 Development of Klapmuts

The Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF) contains very specific policy directives related to Klapmuts, aimed at addressing pressing sub-regional and local space economy issues. Key policy objectives include:

- Using infrastructure assets (e.g., key movement routes) as "drivers" of economic development and job creation;
- Recognition that existing infrastructure in the area (i.e., N1, R101, R44, and the Paarl-Bellville railway line and station) dictates the location of certain transport, modal change, or break-of-

bulk land uses;

- Recognition of the Klapmuts area as a significant new regional economic node within the metropolitan area and spatial target for developing a "consolidated platform for the export of processed agri-food products (e.g., inland packaging and containerisation port)" and "an inter-municipal growth management priority";
- The consolidation of and support for existing and emerging regional economic nodes as they offer the best prospects to generate jobs and stimulate innovation;
- The clustering of economic infrastructure and facilities along public transport routes;
- Maintaining valuable agricultural and natural assets; and
- Providing work opportunities in proximity to living areas.

There is no doubt that Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM, as it is located on the N1 transport corridor, which carries 93% of metropolitan freight traffic. To date, the settlement is characterised by residential use and limited commercial and work-related activity.

Public sector resource constraints have prevented the infrastructure investment required to enable and unlock the full potential of the area for private sector economic development, as envisaged in the GCM RSIF.

The decision by Distell Limited to relocate to and consolidate its operations in Klapmuts is critical to the more balanced development of the settlement. Distell Limited proposes to develop a beverage production, bottling, warehousing, and distribution facility on Paarl Farm 736/RE, located north of the N1, consolidating certain existing cellars, processing plants, and distribution centres in the Greater Cape Town area. The farm measures some 200 ha in extent. The beverage production, bottling, warehousing, and distribution facility will take up approximately 53 ha.

The project proposal includes commercial and mixed-use development on the remainder of the site, which is not environmentally sensitive, to provide opportunities for both Distell's suppliers to co-locate and for other business development in the Klapmuts North area. The site does not have municipal services, and the proposed development will therefore require the installation of bulk service infrastructure, including water, wastewater treatment, stormwater electricity, and internal roads.

Significant progress has been made in planning for an "Innovation Precinct" or "Smart City" district west of but contiguous to Klapmuts south. This includes a land agreement with the University of Stellenbosch to possibly establish university-related activities in this area. The urban edge has been adjusted in recognition of the opportunity associated with this initiative (see the figure below for the concept of the development framework).

Figure 25: Concept Development Framework

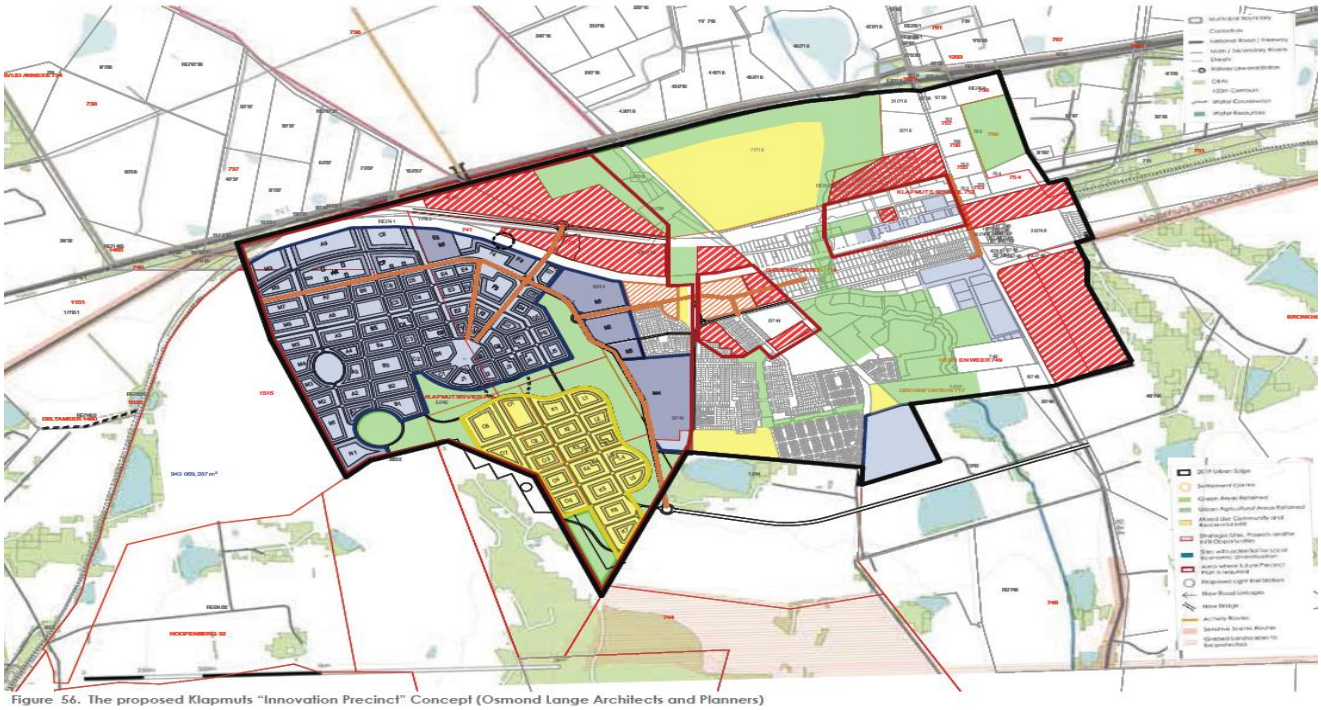


Figure 56. The proposed Klapmuts "Innovation Precinct" Concept (Osmond Lange Architects and Planners)

Several issues require specific care in managing the development of Klapmuts over the short to medium term.

- The first is speculative applications for land use change on the back of the proposed Distell development. Already, a draft local plan prepared by DM has indicated very extensive development east of Farm 736/RE. Distell will not fund the extensive infrastructure required to unlock development here, and arguably, land use change to the east of Farm 736/RE could detract from the opportunity inherent in Farm 736/RE;
- The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road, and a possible NMT crossing over the N1, linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunities enabled north of the N1; and
- The third is a speculative higher-income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.

Given that management of Klapmuts is split between DM and SM (respectively responsible for the area north and south of the N1), special arrangements will be required to ensure that the settlement as a whole develops responsibly in a manner that ensures thoughtful prioritisation, infrastructure investment, and opportunity for a range of income groups.

Arguably, recent LSDF planning work commissioned by DM for the area east of Farm 736/RE begins to illustrate the problem of insufficiently coordinated planning. The LSDF envisages a very significant extent of development for Klapmuts North. Specifically, in terms of a 20-year growth trajectory, commercial office development of 912 354m² is envisaged, commercial retail development of 187 839m², and general light industrial development of 370 120m². Several issues emerge:

Firstly, the realism of these land use projections within the context of the regional economy is questioned. To Illustrate:

- Considering the envisaged commercial office allocation, it is noted that Cape Town CBD currently has some 940 000m² of office space, Sandton in Gauteng is larger at over 1,2m m² of commercial office space, Midrand at some 640 000m², and Century City (some 20 years in the making) at some 340 000m²;

- Concerning commercial retail space, it is noted that more of this use is envisaged for Klapmuts North than Century City's current 140 000m²;
- While 370 120m² is provided for general light industrial development, the proposed Distell distribution centre alone will comprise 125 000m², and many new logistic centres recently completed in the Kraaifontein / Brackenfell area range in size between 45 000m² and 120 000m². The master plan prepared as part of the acquisition process of Farm 736/RE foresees a significantly lighter industrial floor area than the 370 120m² indicated in the LSDF.

Secondly, these land use allocations need to be viewed against the policy context, which sees Klapmuts as a regional freight / logistics hub – with a focus on job creation – and establishing a balanced community. It would appear that the LSDF over-emphasises commercial office and retail development, "exploiting" the areas' access to regional vehicular routes, and private vehicular access, at the expense of job creation at scale – and establishing a regional light industrial hub – serving an existing poorer community in proximity to a freight movement corridor.

Thirdly, it is maintained that the infrastructure service requirements – and affordability – of the projected land use allocations are understated. For example, it is known that any development north of the N1 over and above the proposed Distell distribution centre of 125 000m² will involve very costly reconfiguration and augmentation of intersections with the N1. It would be irresponsible to create expectations around land use without these associated requirements being resolved to a fair degree of detail.

Finally, Farm 736/RE is remarkably unique; comprising some of the least valuable agricultural lands within the Paarl / Stellenbosch area. It would appear that the LSDF, given the development process for Farm 736/RE, assumes that adjacent land to the east, of higher agricultural value, should also be developed.

4.7.2 Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, it is critical, both for the Adam Tas Corridor and the broader Baden Powell-Adam Tas-R304 development corridor, to explore the feasibility of introducing a more frequent and reliable rail service along the Eerste River-Stellenbosch-Muldersvlei-Klapmuts rail line. The aim should be to have a more frequent passenger service along the corridor, connecting larger and smaller settlements. Lighter rail stock – possibly in the form of a "tram" system has been suggested - offering the advantage of safe at grade crossing of the rail line and other modes of transport, in turn, enabling "lighter" infrastructure support for settlement development and concomitant cost savings. Alternatively, the viability of regular bus service along this route should be explored. The SM should commence engagements with PRASA in this regard.

As argued elsewhere in this document, Stellenbosch town and Klapmuts should be the focus of significant settlement growth. It is here, by settlement location concerning broader regional networks and existing opportunities within settlements, that the needs of most people can be met, in a compact settlement form while protecting the municipality's natural and agricultural assets.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing opportunity for a range of income groups) and integration with the corridor in terms of public transport.

The smaller settlements are therefore not prioritised for significant development over the *SDF* period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

4.8 Institutional Arrangements

The SM has dedicated staff resources for spatial planning, land use management, and environmental management organised as the Planning and Economic Development Directorate. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act, 1998 (Act No. 107 of 1998)).

The Planning and Economic Development Directorate will facilitate the implementation of the SDF in terms of institutional alignment, including:

- The extent to which the main argument and strategies of the SDF are incorporated into the Capital Expenditure Framework, annual reports, annual IDP reviews, future municipal IDPs, and so on;
- The annual review of the SDF is part of the IDP review process.
- The extent to which the main argument and strategies of the SDF inform sector planning and resource allocation;
- The extent to which the main argument and strategies of the SDF inform land use management decision-making;
- Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- The mutual responsiveness of the SDF and national, provincial, and regional plans, programmes, and actions (including the extent to which SDF implementation can benefit from national and provincial programmes and funding).

Over and above the institutional arrangements in place, it appears that two aspects require specific focus in support of the SDF.

4.8.1 Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the SDF, SM (and other adjoining municipalities) appear to be experiencing increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation, or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for "both sides" of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule). However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

4.8.2 Private Sector Joint Planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- The municipal human and financial resource base are simply too small to achieve the vision of the SDF or implement associated strategies and plans;
- Many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives;

- It is increasingly evident that individual landowners are finding it difficult to develop – to make the most of what they have – individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- The municipality's focus is often – and understandably so – on the "immediate", or shorter-term challenges. Much of what is needed to implement the SDF or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak and Rhenish complex – in a manner which contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

4.8.3 Further Planning Work

As indicated above, over the longer term, Muldersvlei / Koelenhof, and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical pre-conditions for significant development include:

- The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- Understanding to what extent settlements can provide local employment and, in this way, minimising the need for transport to other settlements.

4.8.4 Other local planning initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the SDF in more detail. The position and function of settlements in the SM settlement hierarchy should determine the priority for LSDFs. The municipality aims to procure the services of a service provider to compile a series of local community investment plans in the form of local spatial development frameworks over the next three years for ten of the priority nodes (both urban and rural). The aim is to compile localised planning and development outcomes that need to address the following:

- Spatial and design frameworks, plans, and strategies;
- Economic development intervention business plans;
- Social service delivery plans and interventions; and
- Innovative and interactive engagement and public participation processes.

In addition to the aforementioned, a number of precinct plans for specific areas as identified in the MSDF have been completed and are in the process of being finalised by initiatives driven by the municipality and private property owners. The Rhenish Complex and Surroundings Precinct Plan was initiated by the municipality and adopted by the Council on 29 November 2023. The precinct plan

includes an urban design framework that aims to guide the future utilisation, preservation, and development of the study area with a specific view to unlocking the potential of the area, which plays an important role as a key site of cultural and heritage significance.

The Franschhoek Development Framework contained in the MSDF further identified an area in Groendal for "strategic sites, projects, and / or infill opportunities", and the development of a precinct plan. A spatial and urban design framework for a specific area within the strategic site has been commissioned by the landowners of Klein La Provence. In the drafting of the proposed spatial and urban design framework, the municipality required that the precinct plan consider the relationship of the site to its broader context and setting while also being replicable across similar contexts. The precinct plan is currently being finalised and will be public participated in due course.

4.8.5 Checklists in Support of Decision-Making

To further assist in aligning day-to-day land use and building development management decision-making and detailed planning – public and private – with the SDF, it is proposed that a "checklist" of questions be employed.

If the initiators of development proposals, applicants, officials, and decision-makers all, in general terms, address the same questions in the conceptualisation, assessment, and decision-making related to proposals, a common, shared "culture" could be established where key tenets of the SDF are considered and followed continuously.

Although focused on the location, nature, and form of activities in space, the checklist incorporates questions addressing issues beyond space, including matters of resource management, finance, institutional sustainability, and so on.

It is not envisaged that the checklist be followed slavishly in considering every development proposal. Yet, its use is important in ensuring that relevant issues are addressed and discussed to enable decision-making in line with the SDF and broader provincial and national planning policies. If, in assessing a proposal or project, posing a question results in a negative answer, the proposal probably requires very careful consideration, further work, or change.

The checklist should not be viewed as static. Rather, it should be reviewed periodically and in parallel with the SDF review – perhaps under the leadership of the Municipal Planning Tribunal and with input from all stakeholders – to reflect the municipal spatial planning agenda and challenges.

It is proposed that the questions – together with the SPLUMA principles, and the key SDF strategies and policies, be packaged in an easy-to-use and accessible form to facilitate wide usage.

4.8.6 Partnerships

Arguably, the municipal budget is simply too small to achieve the vision of the SDFs or implement associated strategies and plans. Also, many matters critical to implementing the SDF, fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives.

Even if the municipal budget is increased ten-fold, or its staff resources are significantly enhanced, it would still not have the control to do what is needed to drive critical projects. The municipality's focus is often – and understandably so – on the "immediate," or the shorter-term challenges. Much of what is needed requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed-upon objectives. Further, partnerships are required between individual corporations and owners of the land. It is increasingly evident that individual landowners are finding it increasingly difficult to develop and make the most of what they have – individually.

Specifically, the transport and movement implications of individual proposals require strong and dedicated integration. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak and Rhenish complex – in a manner that contributes to agreed objectives for developing Stellenbosch town – is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on.

The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

There appears to be an opportunity to establish a new partnership with businesses, on the side of the municipality to drive major integrated projects, specifically the Adam Tas Corridor. Fortunately, Stellenbosch has established (private sector) institutions with an astounding track record of achieving urban development / management objectives (e.g., Historiese Huise). Their work can be expanded to assist in meeting new challenges, in partnership with the municipality.

A formal Memorandum of Agreement exists between Stellenbosch municipality and the Stellenbosch Heritage Foundation to host the Heritage Inventory on the GIS system and to give free public access to the system until such a time that the municipality can do so. A tender was advertised in January 2024 for the updating of the Heritage Inventory on the GIS system and to assist Stellenbosch municipality to undertake heritage assessments in areas under severe development pressure.

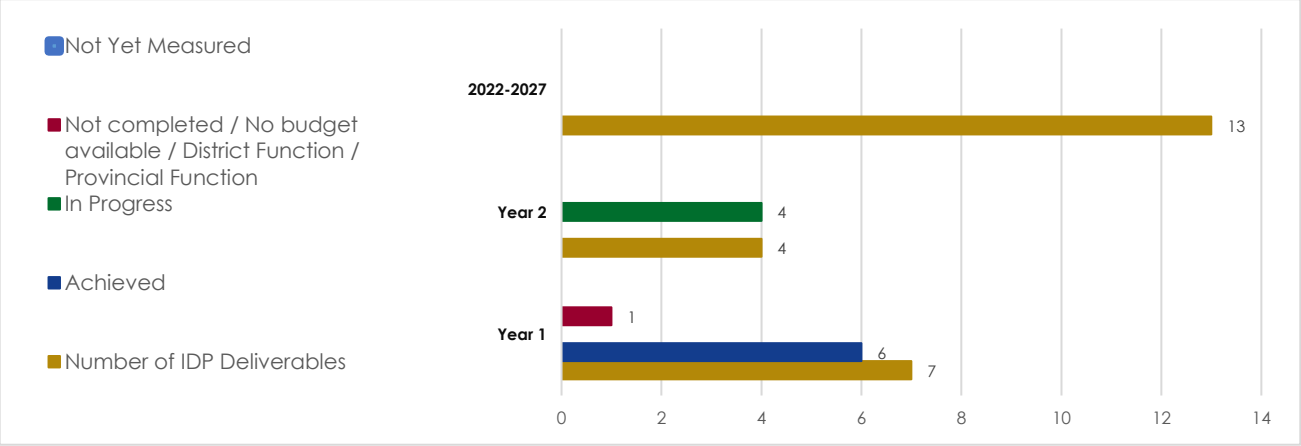
To strengthen the ability of the Directorate: Planning and Economic Development to manage development taking place within the Franschhoek and Stellenbosch historical cores and along the scenic routes in the rural landscape, the Council appointed an advisory committee to evaluate, consider, and make recommendations to the directorate with respect to new developments and alterations to the existing built environment. This committee consists of registered architects and experts in the field of cultural and historic environments.

The municipality owns several significant historical properties in Stellenbosch that require proper maintenance and appropriate uses that should support and enhance the tourism sector. To assist the municipality in managing these assists, the Council is in the process of outsourcing the responsibility to maintain, manage, and lease some of the buildings to Historiese Huise of South Africa. His partnership will ensure the proper maintenance of historical landmarks and appropriate use that will ensure public access, and the support of the tourism sector will be obtained.

CHAPTER 5:
Performance Summary of the 5th Generation IDP 2022 – 2027

5.1 Introduction

The performance reporting on the IDP deliverables for the period 2022 – 2027 of the 5th Generation IDP 2022 – 2027 covers the period from 01 July 2022 to 30 June 2027.



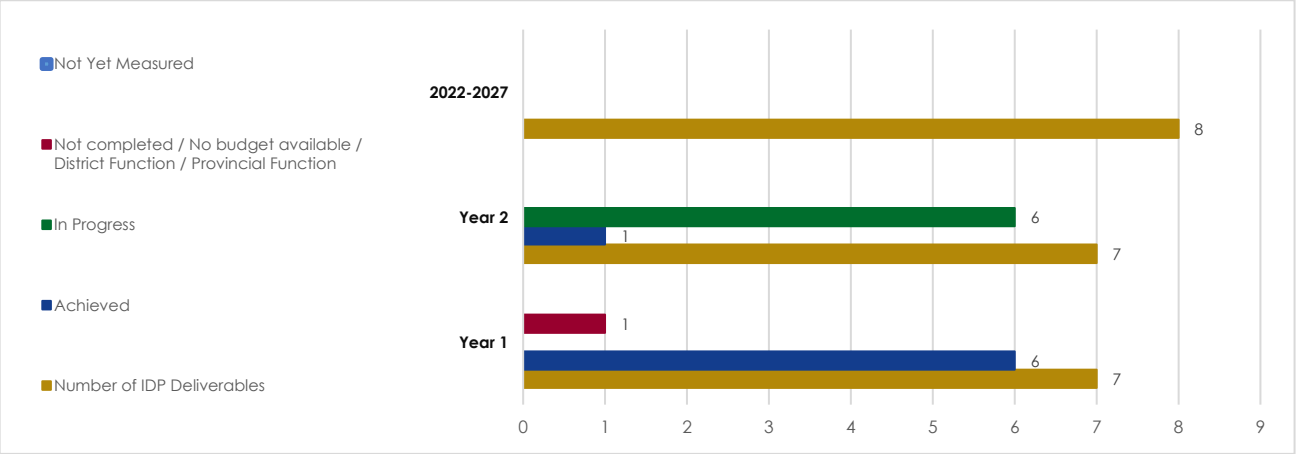
The reporting focuses on the implementation of the Municipal Manager, Mayoral, Mayoral Portfolio, and Sector Plans priorities encapsulated throughout the various sections in the IDP document, and the format reflects the IDP deliverables per priority area. The IDP deliverables were revised in January / February 2023 to allow for adequate planning and implementation in the 2024/25 financial year and the outer financial years.

The overall assessment of actual performance against targets set for the IDP deliverables as documented in the various sections of the IDP document is illustrated below:

5.2 IDP Performance Reporting: Municipal Manager IDP Priorities for 2022 - 2027

Thirteen (13) IDP deliverables are linked to the Municipal Manager's Priorities across directorates and will be measured for the period 2022 – 2027. In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, while 1 (14.29 per cent) were not achieved. Furthermore, in Year 2 (2023/24), four (100 per cent) IDP deliverables are in progress and will be reported on by 30 June 2024.

Figure 26: Number of Municipal Manager Priorities achieved for 2022 – 2027

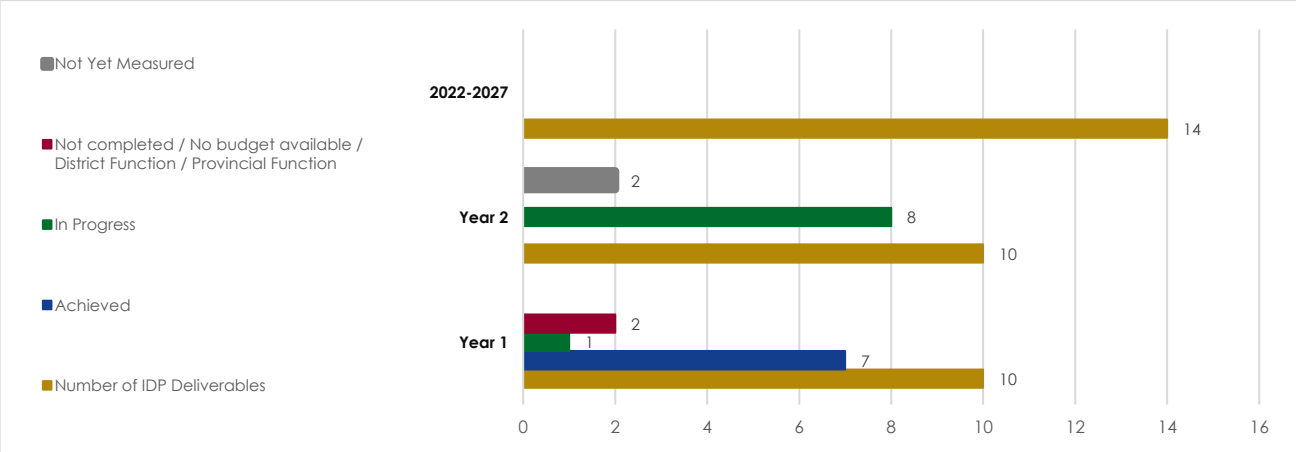


5.3 IDP Performance Reporting: Executive Mayor Priorities for 2022 - 2027

The **Executive Mayoral** 5 – year plan has a total of 68 IDP deliverables linked to nine (9) mayoral outcomes which are applicable for the 5th Generation IDP 2022 – 2027.

Executive Mayoral Outcome 1: Clean, accountable, and responsive local government has a total of 8 IDP deliverables for the period 2022 – 2027.

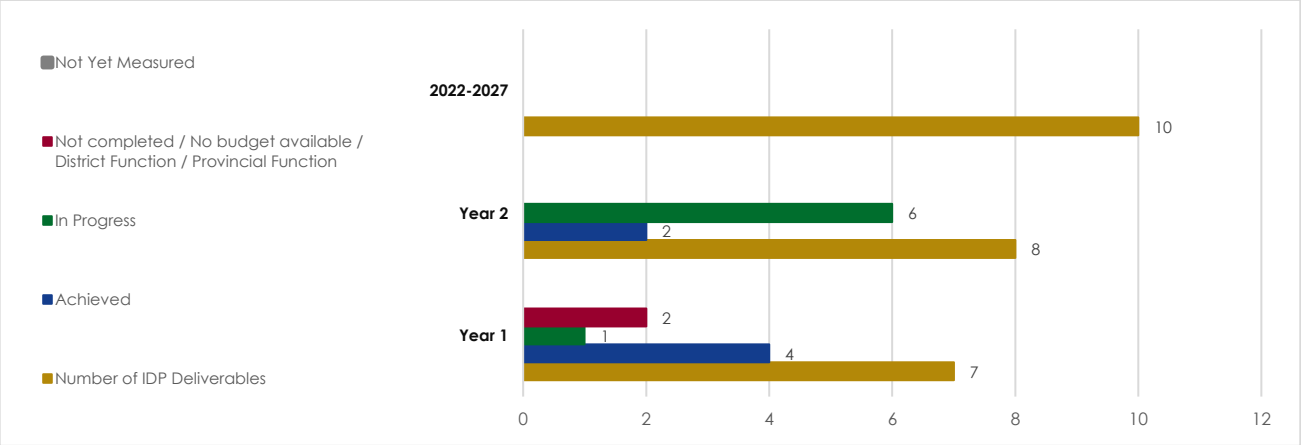
In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved and 1 (14.29 per cent) was not met. In Year 2 (2023/24), 1 (14.29 per cent) of the seven (7) IDP deliverables were achieved, and 6 (85.71 per cent) was in progress and will be reported on by 30 June 2024.



Graph 13: Executive Mayoral Outcome 1: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area has a total of 14 IDP deliverables for the period 2022 – 2027.

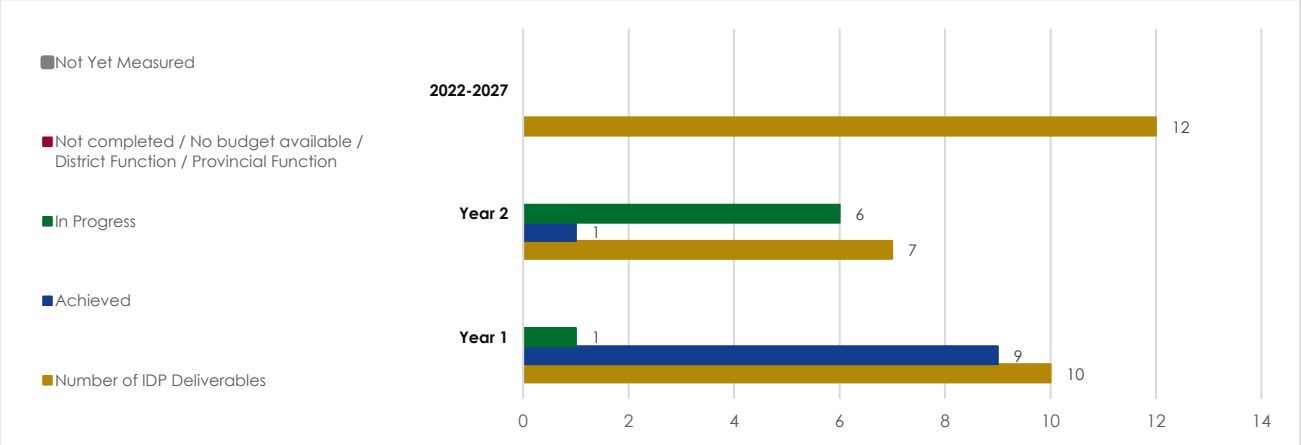
In Year 1 (2022/23), 7 (70 per cent) of the ten (10) IDP deliverables were achieved, 1 (10 per cent) is in progress, and 2 (20 per cent) were not met. In Year 2 (2023/24), 8 (80 per cent) of the ten (10) IDP deliverables are in progress and will be reported on by 30 June 2024, and 2 (20 per cent) are not measured yet.



Graph 14: Executive Mayoral Outcome 2: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers has a total of 10 IDP deliverables for the period 2022 – 2027.

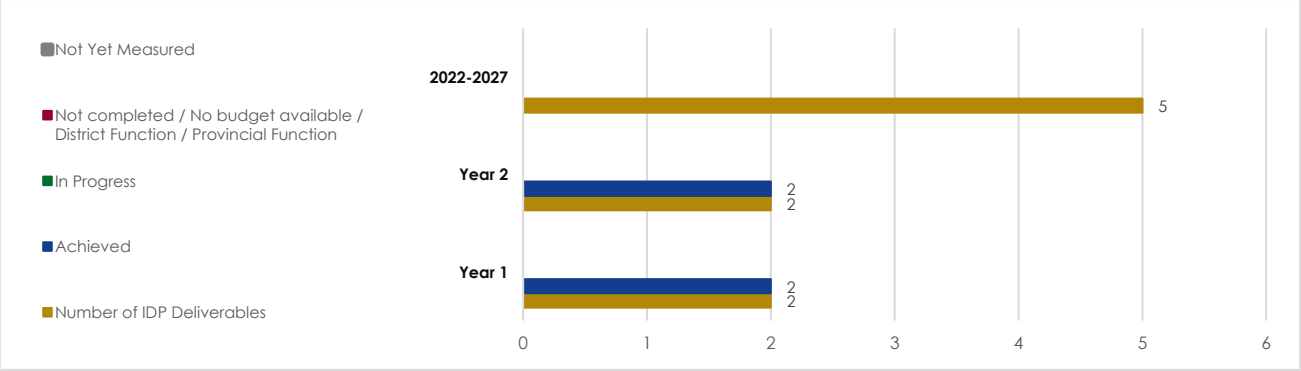
In Year 1 (2022/23), 4 (57.14 per cent) of the seven (7) IDP deliverables were achieved, 1 (14.29 per cent) is in progress, and 2 (28.57 per cent) were not met. In Year 2 (2023/24), 6 (75 per cent) of the eight (8) IDP deliverables are in progress and will be reported on by 30 June 2024, and 2 (25 per cent) were achieved.



Graph 15: Executive Mayoral Outcome 3: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements, and mixed-use developments) has a total of 12 IDP deliverables for the period 2022 – 2027.

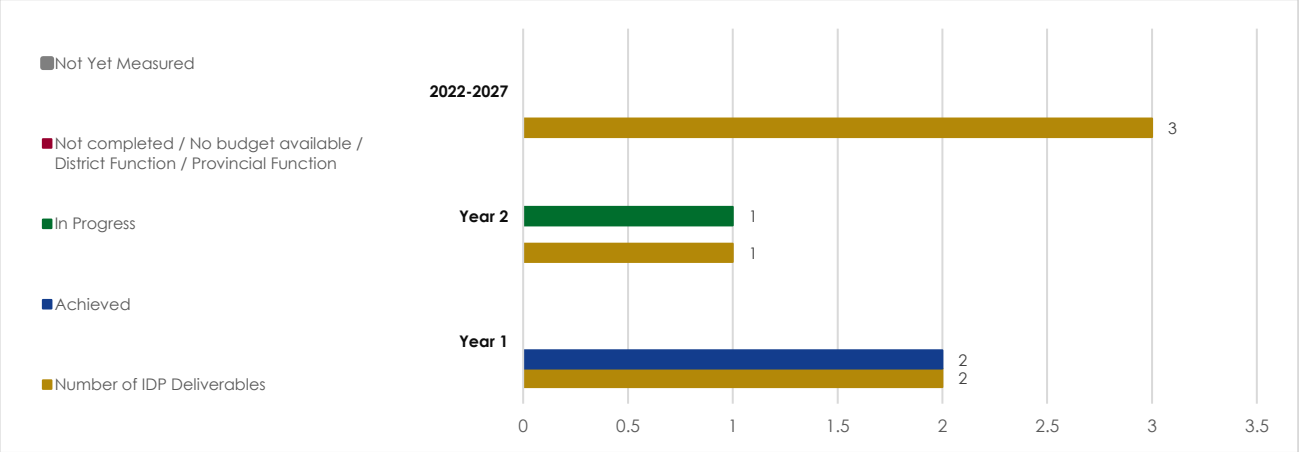
In Year 1 (2022/23), 9 (90 per cent) of the ten (10) IDP deliverables were achieved, and 1 (10 per cent) are in progress with anticipated completion by 30 June 2024. In Year 2 (2023/24), 6 (85.71 per cent) of the seven (7) IDP deliverables are in progress, and 1 (14.29 per cent) will be reported by 30 June 2024.



Graph 16: Executive Mayoral Outcome 4: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpies across the municipality area has a total of 5 IDP deliverables for the period 2022 – 2027.

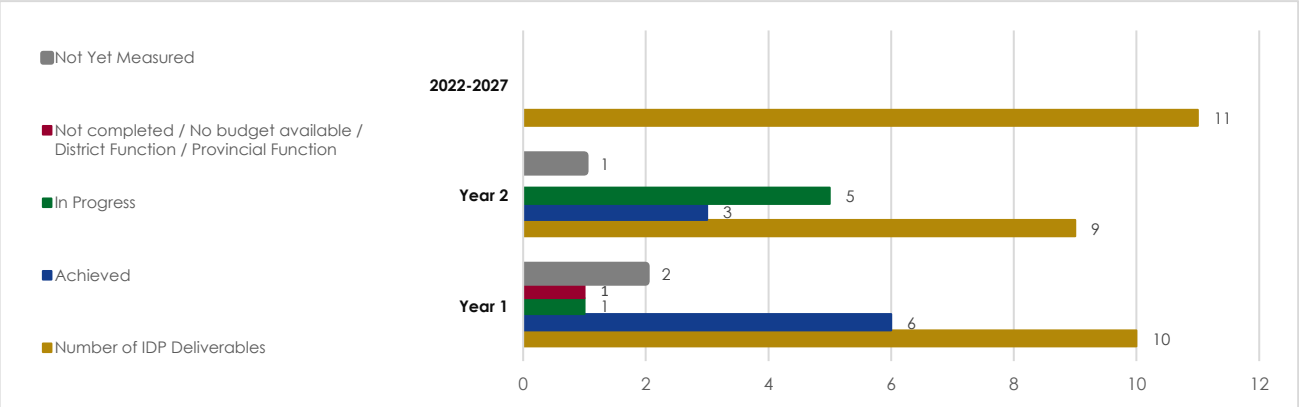
In Year 1 (2022/23), 2 (100 per cent) of the two (2) IDP deliverables were achieved. In Year 2 (2023/24), 2 (100 per cent) of the two (2) IDP deliverables were achieved.



Graph 17: Executive Mayoral Outcome 5: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth has a total of 3 IDP deliverables for the period 2022 – 2027.

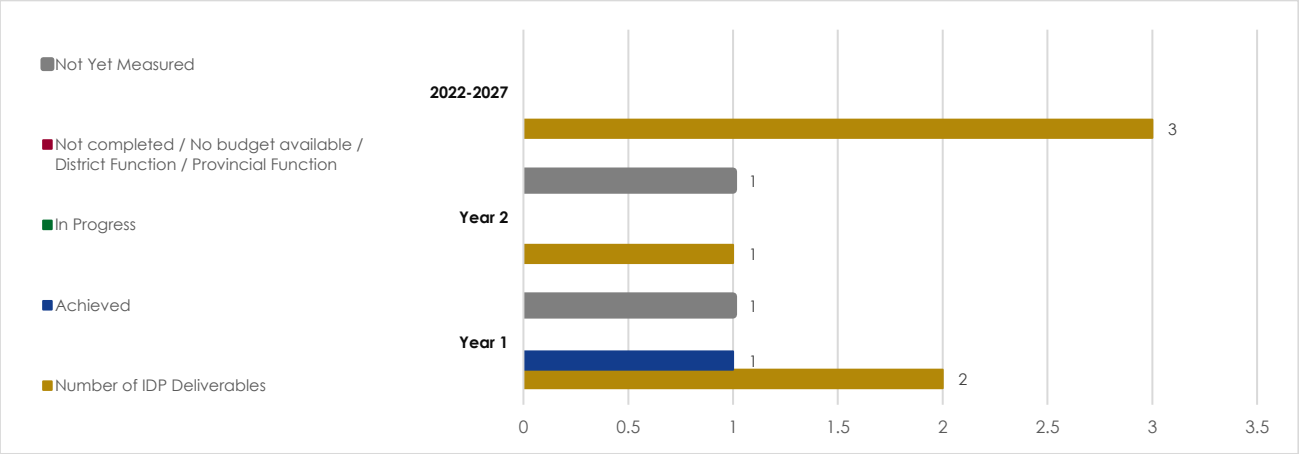
In Year 1 (2022/23), 2 (100 per cent) IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) IDP deliverable was in progress and will be reported on by 30 June 2024.



Graph 18: Executive Mayoral Outcome 6: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 7: To create safer environments in our communities has a total of 11 IDP deliverables for the period 2022 – 2027.

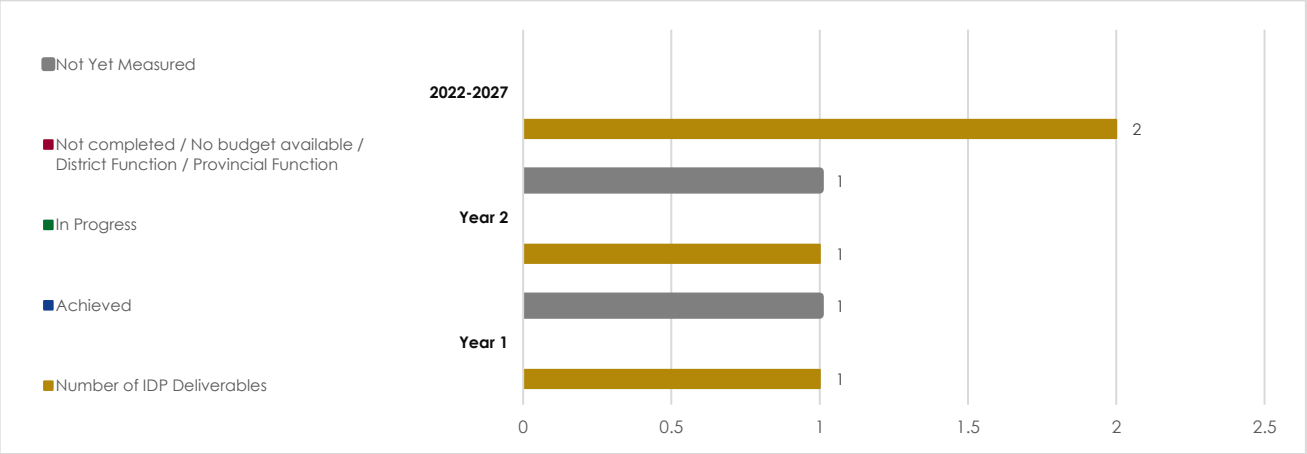
In Year 1 (2022/23), 6 (60 per cent) of the ten (10) IDP deliverables were achieved, 1 (10 per cent) is in progress, 1 (10 per cent) was not met, and 1 (10 per cent) was not yet measured. In Year 2 (2023/24), 5 (55.56 per cent) of the nine (9) IDP deliverables are in progress and will be reported on by 30 June 2024, 3 (33.33 per cent) were achieved, and 1 (11.11 per cent) was not yet measured.



Graph 19: Executive Mayoral Outcome 7: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation has a total of 3 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) were not yet measured. In Year 2 (2023/24), 1 (100 per cent) IDP deliverable was not yet measured.



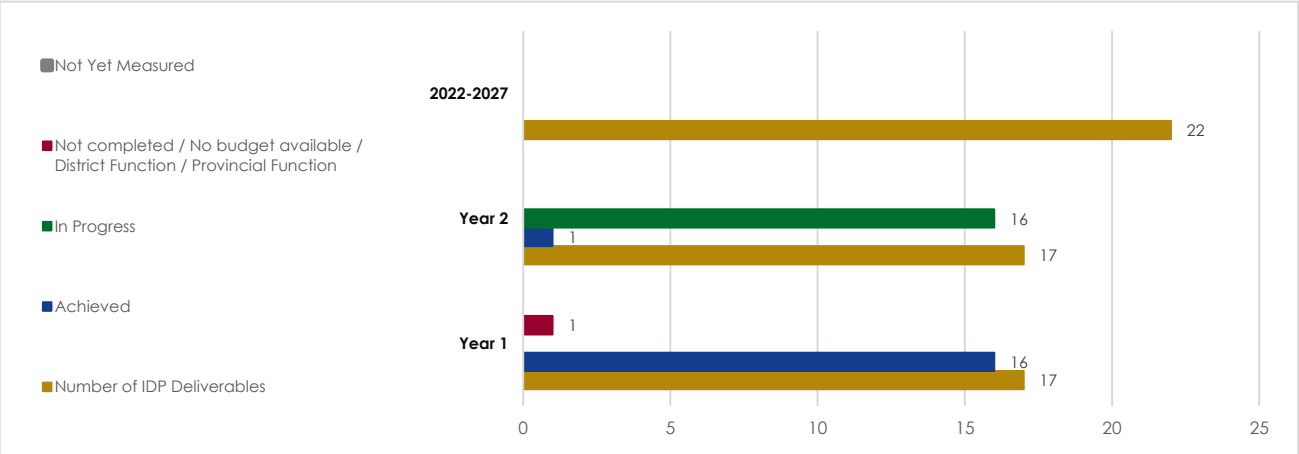
Graph 20: Executive Mayoral Outcome 8: Implementation Progress 2022 – 2027

Executive Mayoral Outcome 9: Alternative Energy has a total of 10 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were not yet measured.

Graph 21: Executive Mayoral Outcome 9: Implementation Progress 2022 – 2027

5.4 IDP Performance Reporting: Mayoral Portfolios for 2022 - 2027

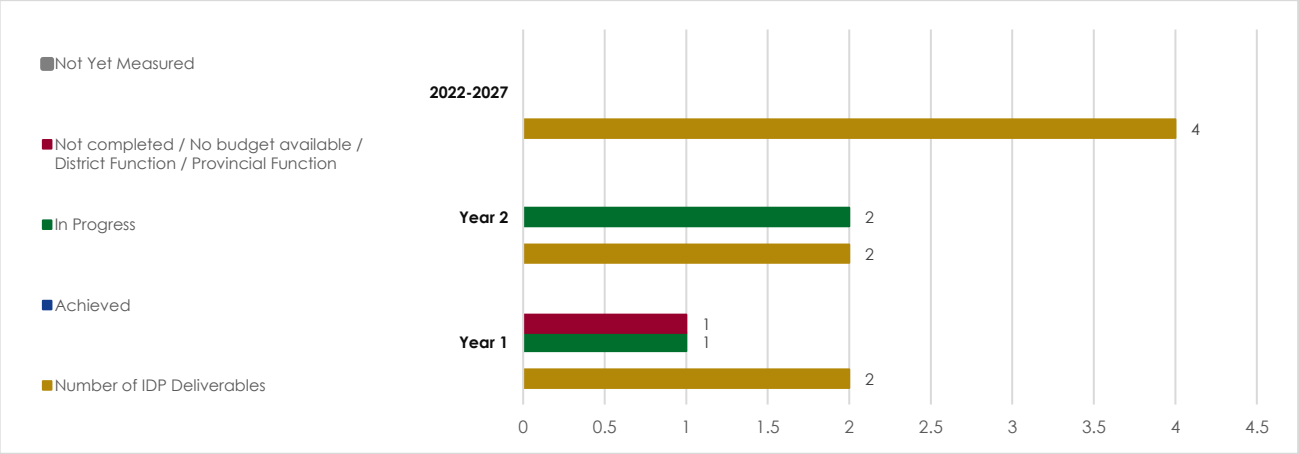


The 10 (ten) **Mayoral Portfolio's** each have a 5 – year plan with specific IDP deliverables and targets applicable for the period 2022 - 2027.

A total of 89 IDP deliverables are linked to ten (10) mayoral portfolios that were applicable for the 2022/23 financial year.

Mayoral Portfolio Human Settlements has a total of 22 IDP deliverables for the period 2022 – 2027.

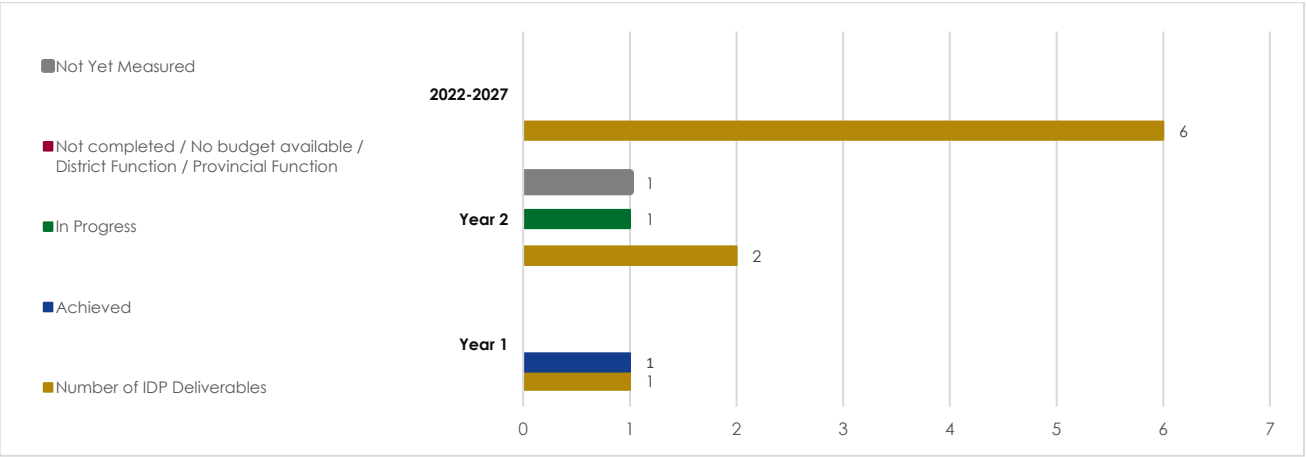
In Year 1 (2022/23), 16 (94.12 per cent) of the seventeen (17) IDP deliverables were achieved, and 1 (5.88 per cent) were not met. In Year 2 (2023/24), 16 (94.12 per cent) of the seventeen (17) IDP deliverables are in progress and will be reported on by 30 June 2024 and 1 (5.88 per cent) were achieved.



Graph 22: Mayoral Portfolio – Human Settlements 2022 – 2027

Mayoral Portfolio Rural Management has a total of 4 IDP deliverables for the period 2022 – 2027.

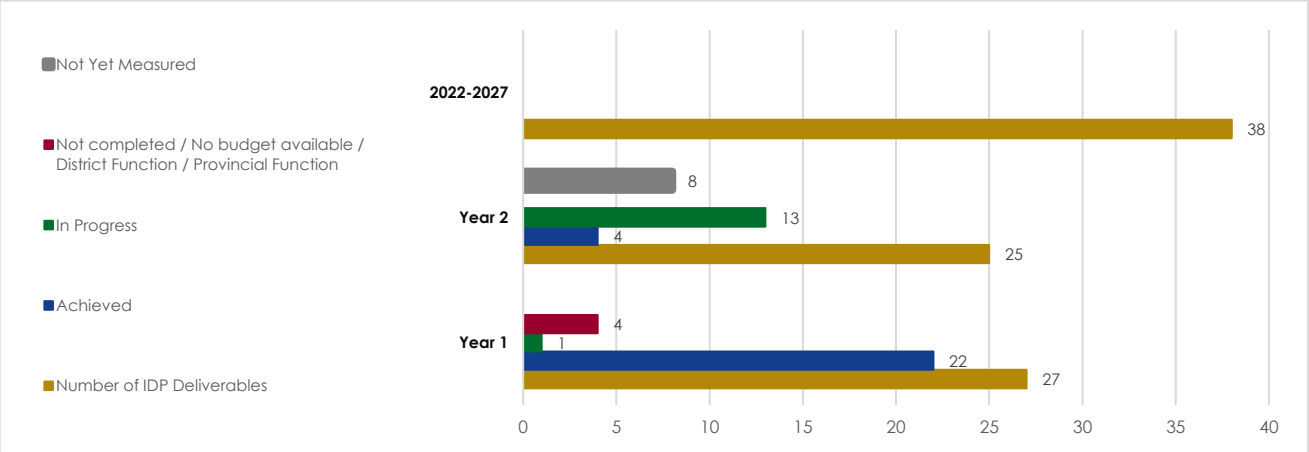
In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) were not met. In Year 2 (2023/24), 2 (100 per cent) of the two (2) IDP deliverables are in progress and will be reported on by 30 June 2024.



Graph 23: Mayoral Portfolio – Rural Management

Mayoral Portfolio Youth, Sport and Culture has a total of 6 IDP deliverables for the period 2022 – 2027.

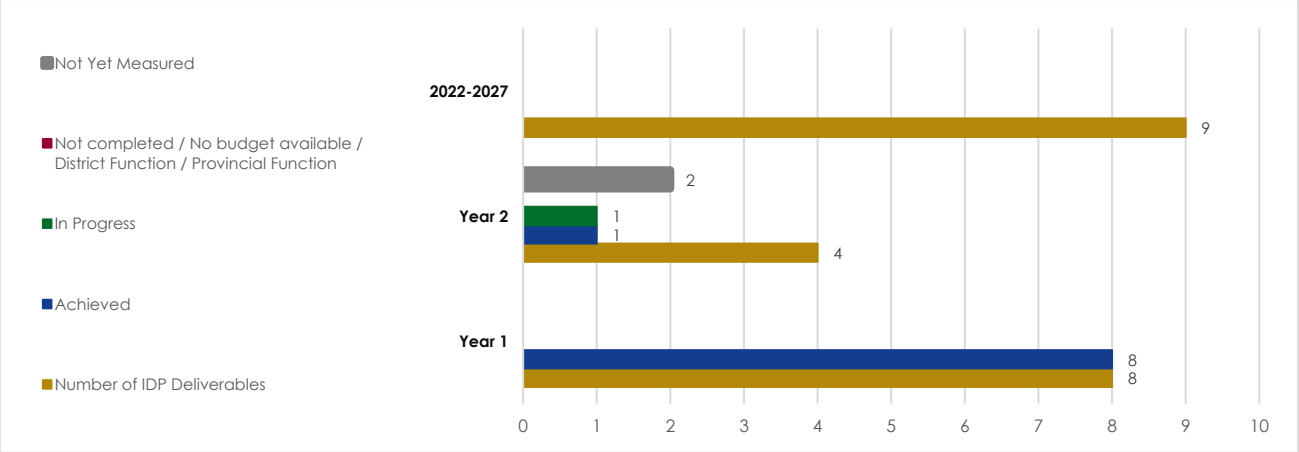
In Year 1 (2022/23), 1 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 1 (50 per cent) of the two (2) IDP deliverables is in progress, and 1 (50 per cent) has yet to be measured.



Graph 24: Mayoral Portfolio – Youth, Sport, and Culture

Mayoral Portfolio Planning, LED and Tourism has a total of 38 IDP deliverables for the period 2022 – 2027.

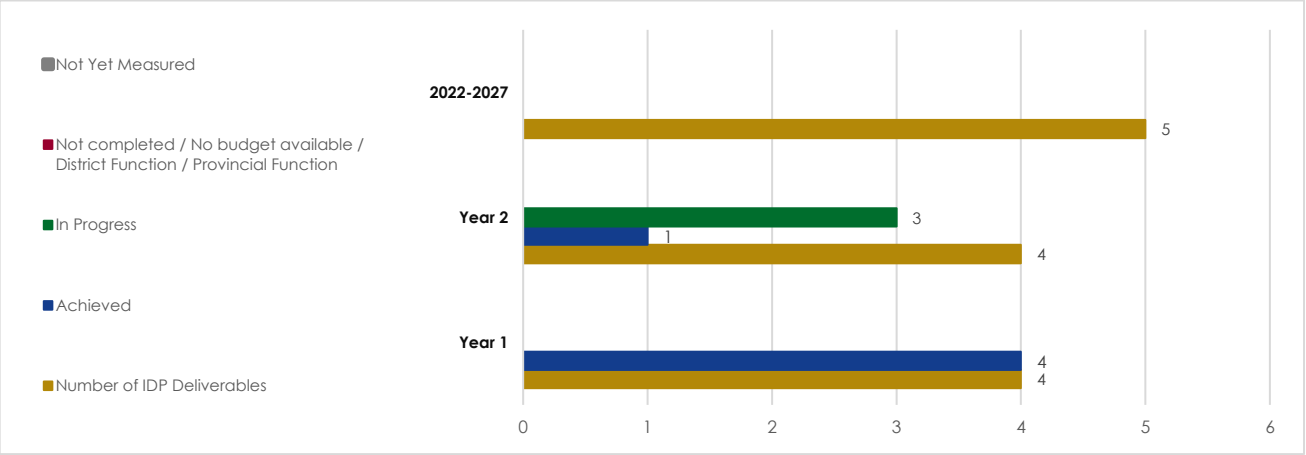
In Year 1 (2022/23), 22 (81.48 per cent) of the 27 IDP deliverables were achieved, 1 (3.70 per cent) is in progress, and 4 (14.82 per cent) were not met. In Year 2 (2023/24), 4 (16 per cent) of the 25 IDP deliverables were achieved, 13 (52 per cent) are in progress to be reported on by 30 June 2024 and 8 (32 per cent) has not yet been measured.



Graph 25: Mayoral Portfolio – Planning, LED and Tourism

Mayoral Portfolio Community Services has a total of 9 IDP deliverables for the period 2022 – 2027.

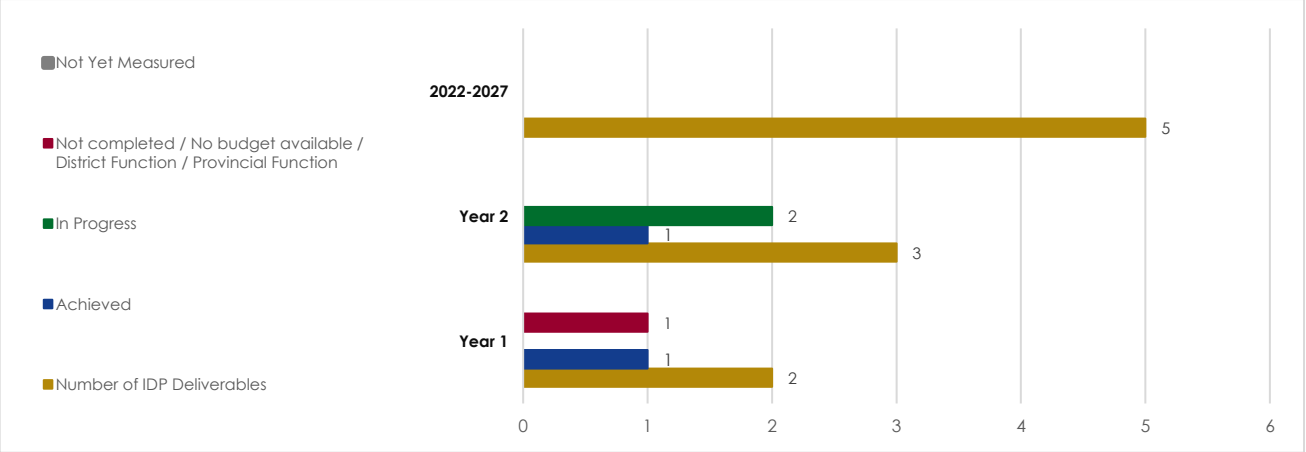
In Year 1 (2022/23), 8 (100 per cent) of the 8 IDP deliverables were achieved. In Year 2 (2023/24), 1 (25 per cent) of the 4 IDP deliverables were achieved, 1 (25 per cent) are in progress to be reported on by 30 June 2024 and 2 (50 per cent) has not yet been measured.



Graph 26: Mayoral Portfolio – Community Services

Mayoral Portfolio Financial Services has a total of 5 IDP deliverables for the period 2022 – 2027.

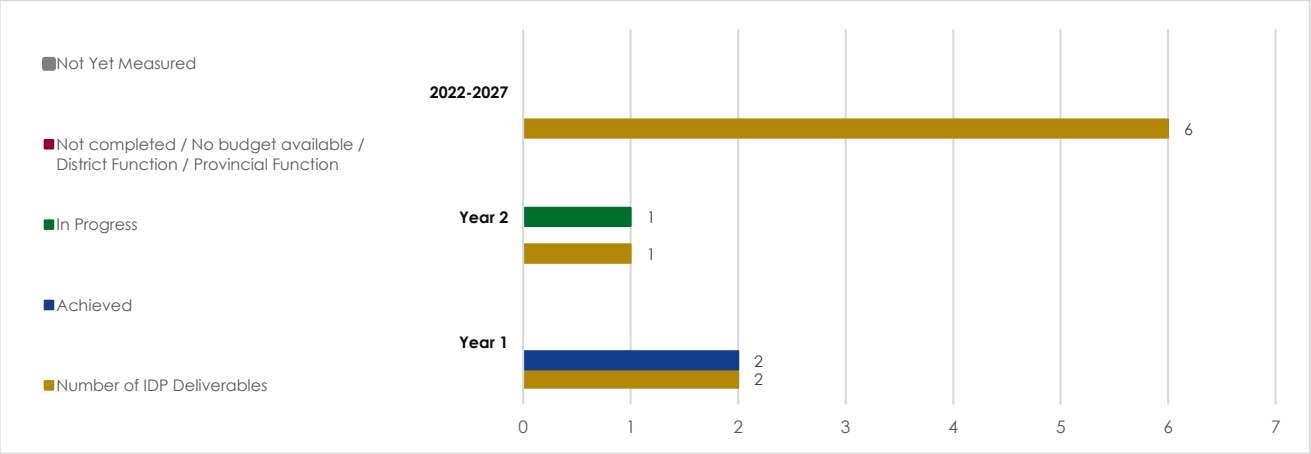
In Year 1 (2022/23), 4 (100 per cent) of the four (4) IDP deliverables were achieved. In Year 2 (2023/24), 3 (75 per cent) of the four (4) IDP deliverables are in progress and will be reported on by 30 June 2024, and 1 (25 per cent) were achieved.



Graph 27: Mayoral Portfolio – Financial Services

Mayoral Portfolio Protection Services has a total of 5 IDP deliverables for the period 2022 – 2027.

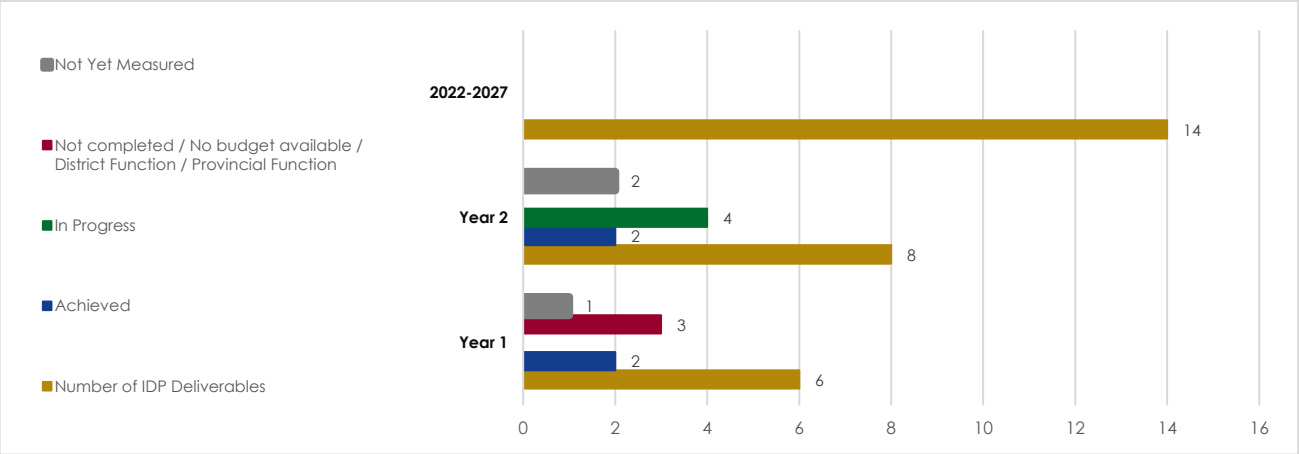
In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) were not met. In Year 2 (2023/24), 2 (66.67 per cent) of the three (3) IDP deliverables are in progress and will be reported on by 30 June 2024, and 1 (33.33 per cent) were achieved.



Graph 28: Mayoral Portfolio – Protection Services

Mayoral Portfolio Corporate Services has a total of 6 IDP deliverables for the period 2022 – 2027.

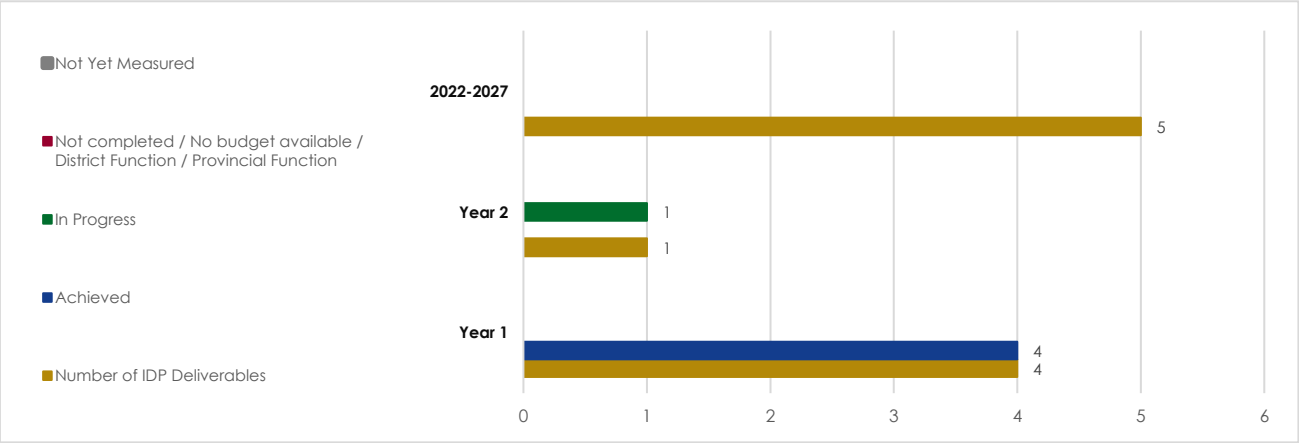
In Year 1 (2022/23), 2 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.



Graph 29: Mayoral Portfolio – Corporate Services

Mayoral Portfolio Infrastructure Services has a total of 14 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (33.33 per cent) of the six (6) IDP deliverables were achieved, 1 (16.67 per cent) has not yet been measured, and 3 (50 per cent) were not met. In Year 2 (2023/24), 4 (50 per cent) of the eight (8) IDP deliverables are in progress and will be reported on by 30 June 2024, 2 (25 per cent) were achieved, and 2 (25 per cent) has not yet been measured.

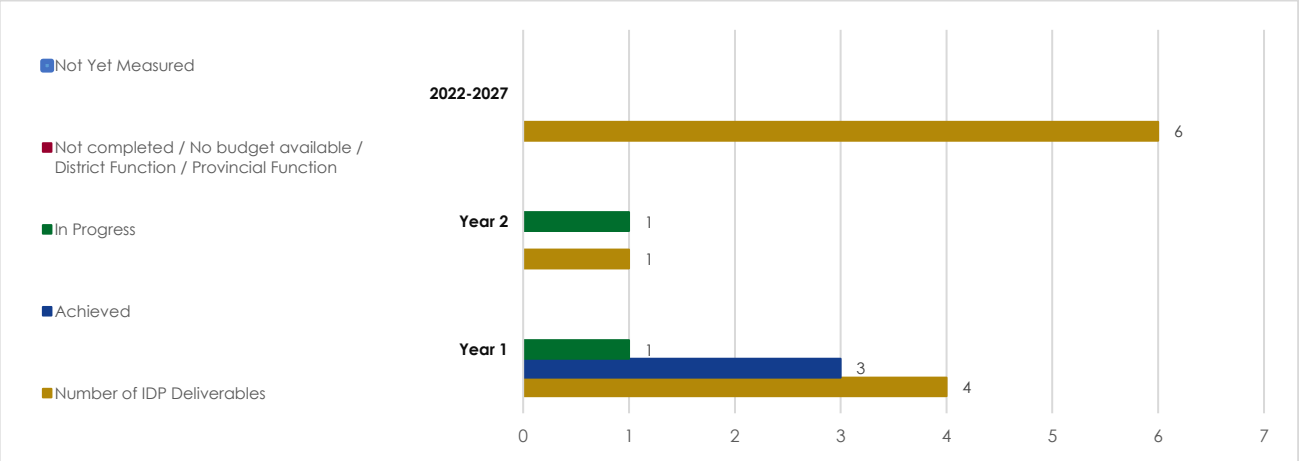


Graph 30: Mayoral Portfolio – Infrastructure Services

Mayoral Portfolio Parks, Open Spaces and Environment has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (100 per cent) of the four (4) IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 31: Parks, Open Spaces and Environment

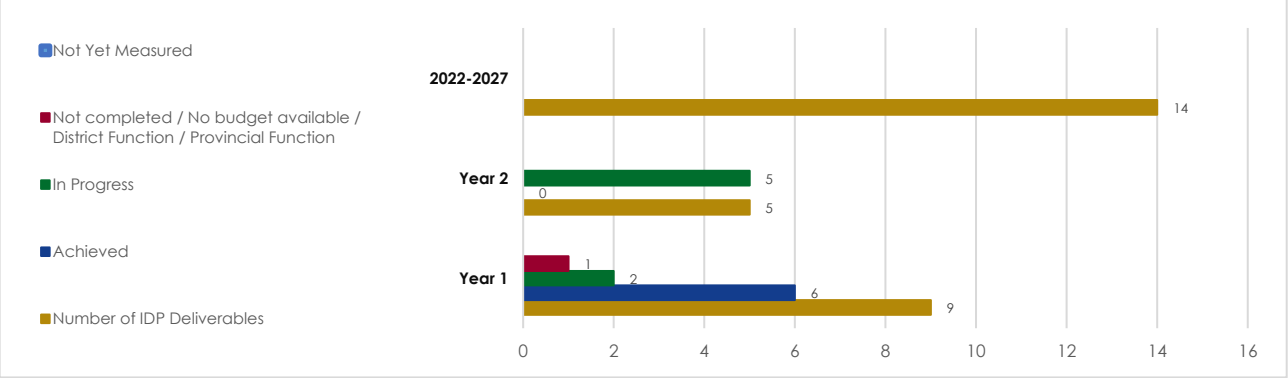


5.5 IDP Performance Reporting: Sector Plans Implementation for 2022 - 2027

The seven (7) sector plans below each have a 5 – year implementation plan with specific IDP deliverables and targets for the period 2022 - 2027.

The **Environmental Management Plan** has a total of 6 IDP deliverables for the period 2022 – 2027.

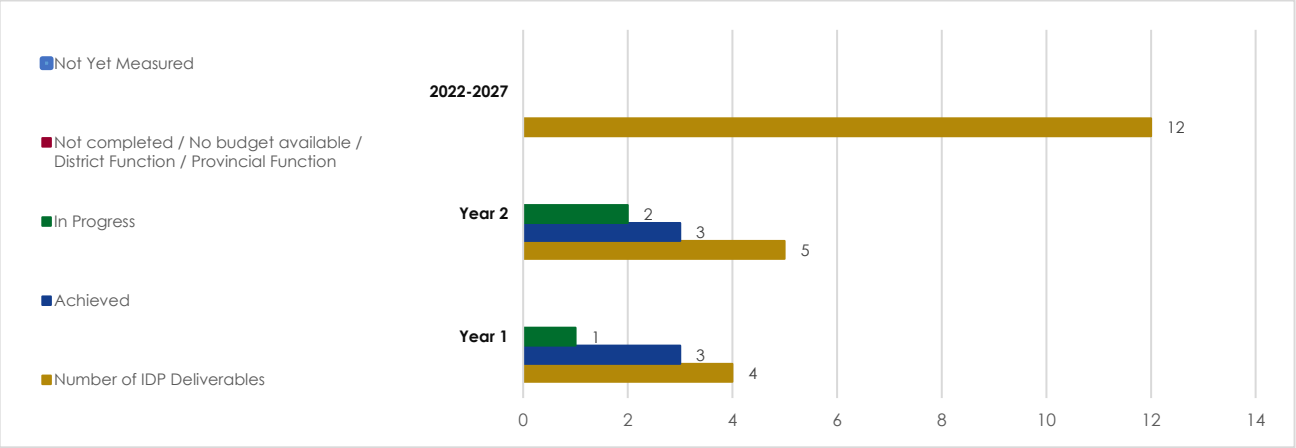
In Year 1 (2022/23), 3 (75 per cent) of the four (4) IDP deliverables were achieved and 1 (25 per cent) is in progress to be completed by 30 June 2024. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.



Graph 32: Environmental Management Plan – Implementation Plan Progress 2022 – 2027

The section on **Integrated Human Settlements** that highlights priority housing projects and upgrading of informal settlements has a total of 14 IDP deliverables for the period 2022 – 2027.

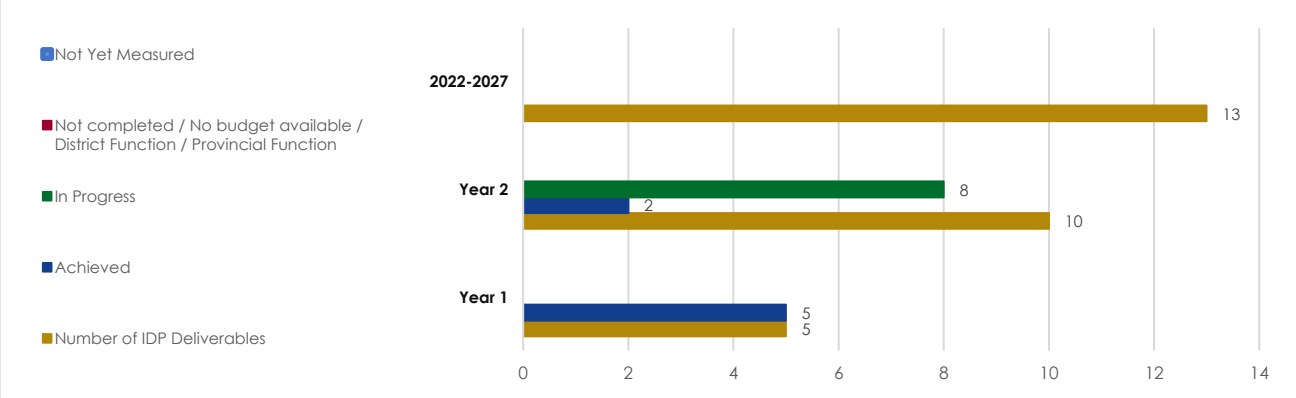
In Year 1 (2022/23), 6 (66.67 per cent) of the nine (9) IDP deliverables were achieved, 2 (22.22 per cent) is in progress to be completed by 30 June 2024 and 1 (11.11 per cent) not achieved. In Year 2 (2023/24), 100 per cent of the five (5) IDP deliverables are in progress to be reported on by 30 June 2024.



Graph 33: Integrated Human Settlements – Implementation Plan Progress 2022 - 2027

The **Comprehensive Integrated Transport Plan** has a total of 12 IDP deliverables for the period 2022 – 2027.

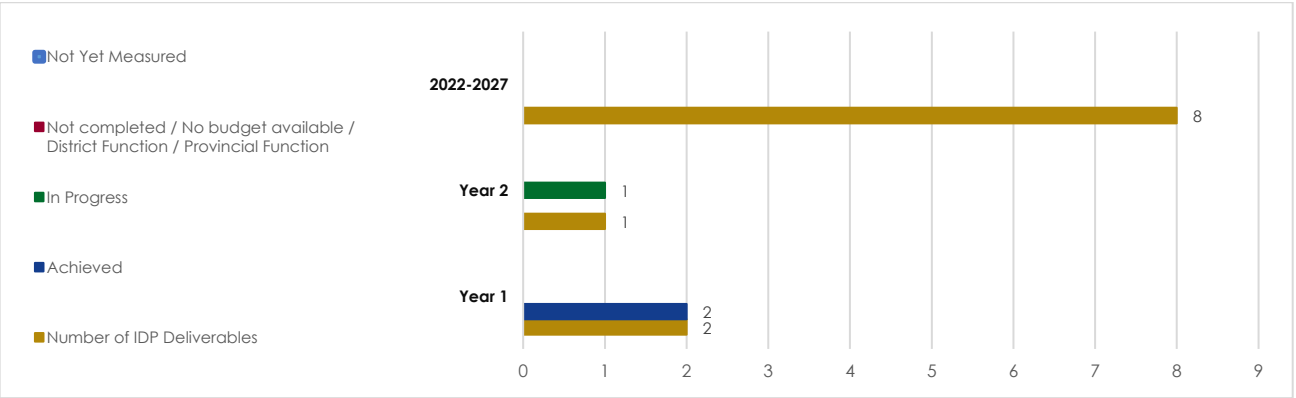
In Year 1 (2022/23), 3 (75 per cent) of the four (4) IDP deliverables were achieved, and 1 (25 per cent) is in progress to be completed by 30 June 2024. In Year 2 (2023/24), 2 (40 per cent) of the five (5) IDP deliverables are in progress to be reported on by 30 June 2024 and 3 (60 per cent) IDP deliverables were achieved.



Graph 34: Comprehensive Integrated Transport Plan – Implementation Plan Progress 2022 - 2027

The **Integrated Waste Management Plan (IWMP)** has a total of 13 IDP deliverables for the period 2022 – 2027.

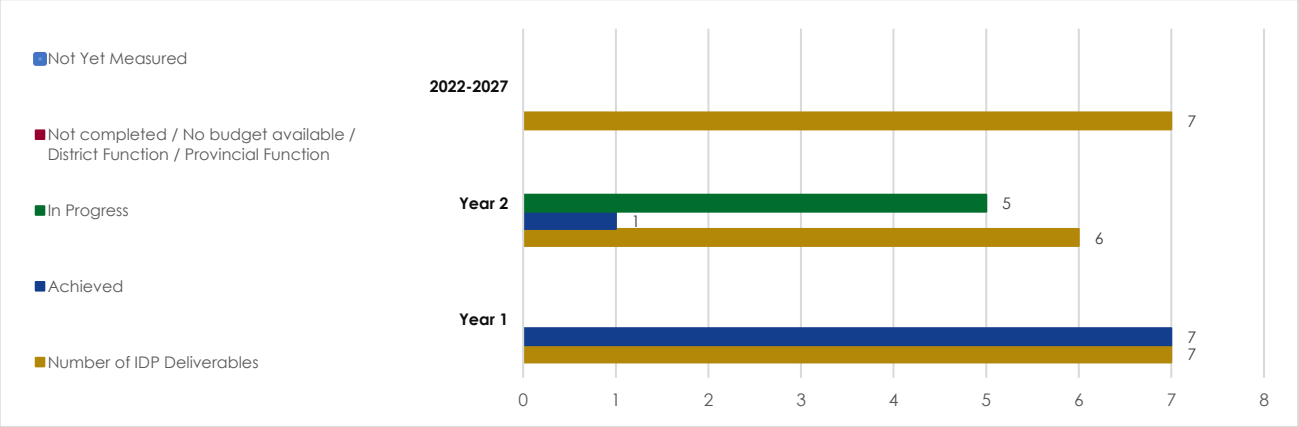
In Year 1 (2022/23), 5 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 8 (80 per cent) of the ten (10) IDP deliverables are in progress and will be reported on by 30 June 2024 and 2 (20 per cent) IDP deliverables were achieved.



Graph 35: Integrated Waste Management Plan – Implementation Plan Progress 2022 – 2027

The **Water Services Development Plan (IWMP)** has a total of 8 IDP deliverables for the period 2022 – 2027.

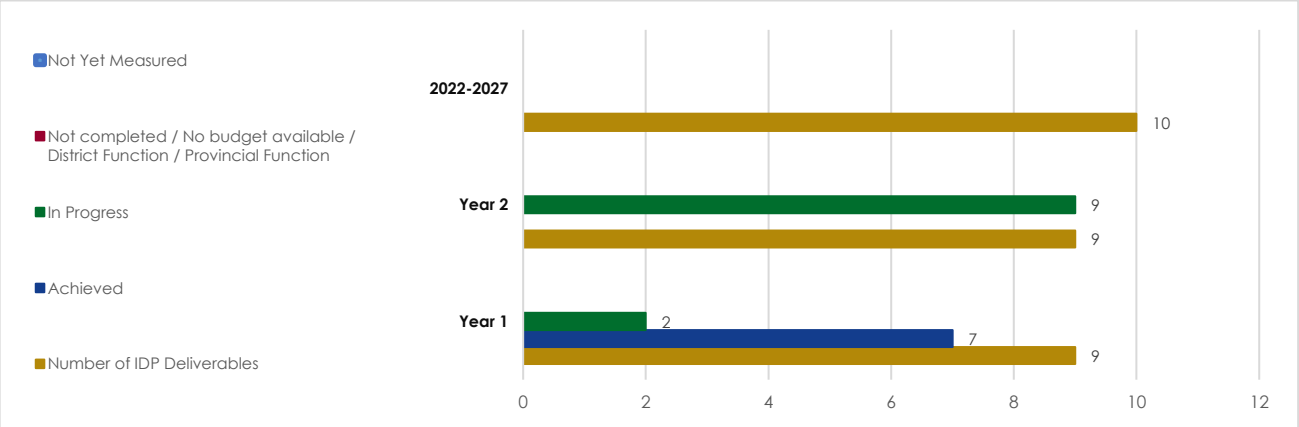
In Year 1 (2022/23), 2 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.



Graph 36: Water Services Development Plan – Implementation Plan Progress 2022 – 2027

The **Disaster Management Plan (DMP)** has a total of 7 IDP deliverables for the period 2022 – 2027.

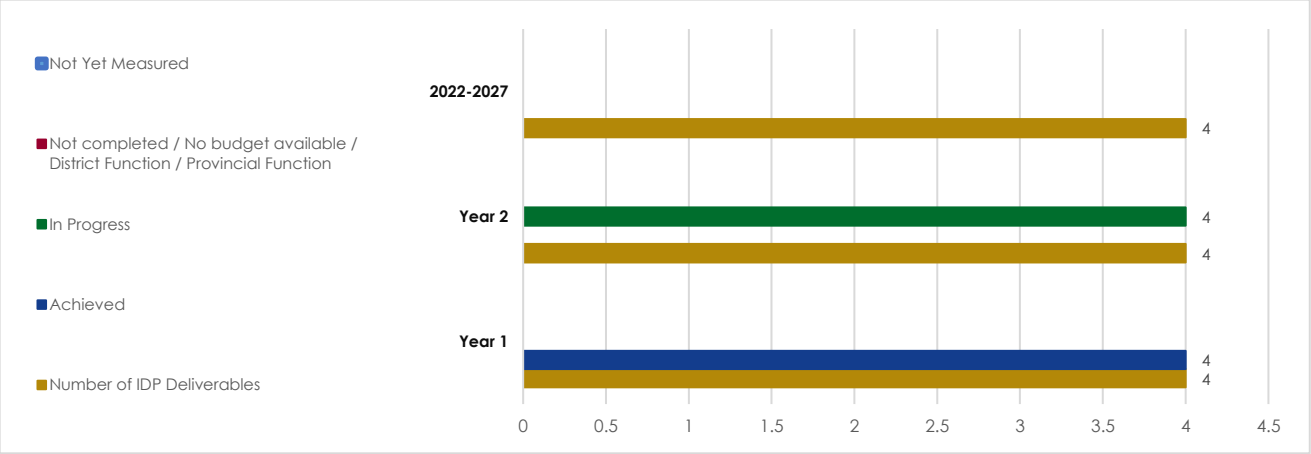
In Year 1 (2022/23), 7 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 5 (83.33 per cent) of the six (6) IDP deliverables are in progress and will be reported on by 30 June 2024 and 1(16.67 per cent) IDP deliverables were achieved.



Graph 37: Disaster Management Plan – Implementation Plan 2022 – 2027

The **Local Economic Development Strategy** has a total of 10 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (77.78 per cent) of the nine (9) IDP deliverables were achieved and 2 (22.22 per cent) is in progress to be completed by 30 June 2024. In Year 2 (2023/24), 9 (100 per cent) of the IDP deliverables are in progress to be reported on by 30 June 2024.



Graph 38: Local Economic Development – Implementation Plan 2022 – 2027

The **Community Development Strategy** has a total of 4 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 4 (100 per cent) of the IDP deliverables are in progress and will be reported on by 30 June 2024.

Graph 39: Community Development – Implementation Plan 2022 – 2027

CHAPTER 6:
One Plan: Service delivery, budget, programmes, and projects

6.1 Introduction

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way, where there is higher performance and accountability for coherent and effective service delivery and development outcomes.

The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

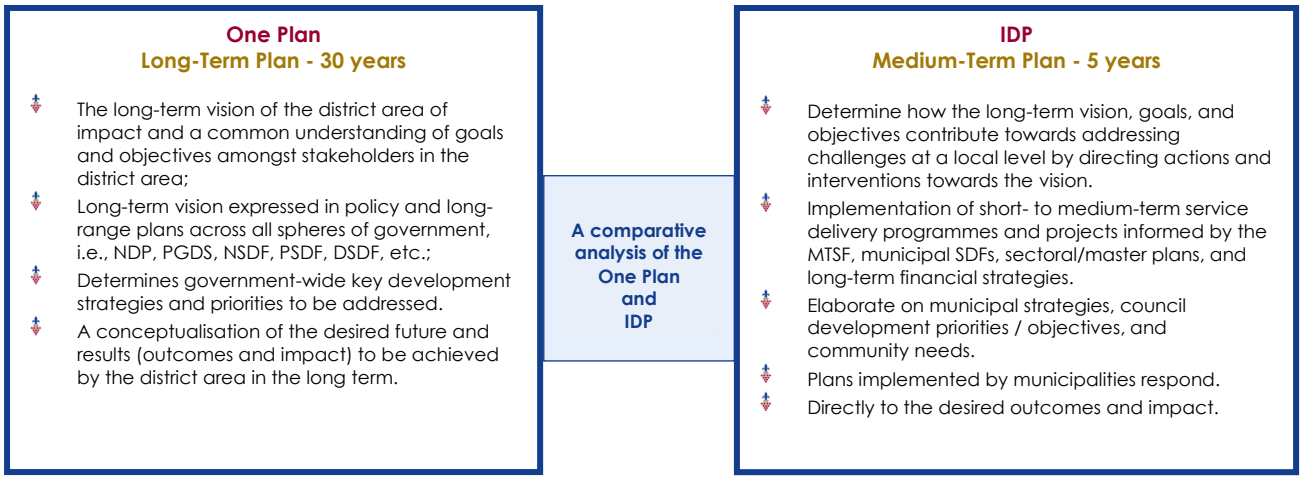
It is acknowledged that the DDM introduces a new planning instrument in the form of the **One Plan**. This process comes into a planning environment where there are existing planning instruments at local, provincial, and national levels of government. However, the One Plan is not meant to replace any of the existing prescribed development, departmental strategic, and annual performance plans that each sphere, department, and state entity is responsible for or required to develop. The One Plan is rather informed by these plans, and once in place, it will guide the review of these plans and budgets.

The Western Cape Government-specific approach to the DDM is called the **Joint District and Metro Approach (JDMA)**. The JDMA envisages the three spheres of government to converge, using intergovernmental (IGR) engagements, to develop similar Western Cape strategic, development, and planning priorities with aligned budgets and accelerated implementation for service delivery.

The **Joint District and Metro Approach (JDMA)** -

- is a geographical (district) and team-based and citizen-focused approach;
- has the output of a single implementation plan to provide planning and strategic priorities, developmental initiatives, service delivery, and capacity building;
- has the desired outcome of improving the living conditions (lives) of citizens;
- has a horizontal interface (between provincial departments) and a vertical interface (national, provincial, and local government spheres);
- does not exclude local municipalities;
- is not a functions and power debate; and
- promotes collaboration using the District Coordinating Forum as the governance instrument for co-planning, co-budgeting, and co-implementation to strengthen service delivery to communities.

This chapter will provide details from all three spheres of government to give effect to the objectives and strategies contained in the 5th Generation Integrated Development Plan.



6.2 Relationship between the One Plan and Integrated Development Plan (IDP)

The One Plan does not replace the Integrated Development Plans of municipalities as the "single, inclusive, and strategic plan for the development of the municipality," but is meant to strengthen and enhance the IDPs and other plans of the municipalities. It is foreseen to provide greater certainty and

direction for the IDPs. The IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Below is a comparative analysis of the One Plan and IDP:

Figure 27: Comparative analysis of the One Plan and IDP

6.3 National and Provincial Government Priorities

6.3.1 State of the Nation Address (SONA) 2024

President Cyril Ramaphosa presented the State of the Nation Address (SONA) on 08 February 2024. President Ramaphosa's SoNA 2024 highlighted both achievements and challenges, emphasising the need for continued efforts to build a stronger, more inclusive South Africa.

The following are key highlights from the SONA:

South Africa has had to:

- revitalise the economy after more than a decade of poor economic performance;
- rebuild public institutions after the era of state capture;
- recover from a devastating global pandemic that caused great misery and hardship, closed businesses, and cost jobs; and
- confront and overcome a debilitating electricity crisis that, despite significant improvement in recent months, continues to hold back the economy.

South Africa has come a long way in the last five years. Government has:

- built on the achievements of the last three decades, and it has taken decisive measures to address the immediate challenges facing South Africans;
- restored the independence and capability of law enforcement agencies to tackle corruption and crime;
- worked to advance the rights of persons with disability;
- The government took great pride in making South African Sign Language, the 12th official language of the country;
- safeguarded and promoted the basic rights in the
- Constitution, such as the freedom of speech, association, and belief;
- defended media freedom and the independence of the judiciary;
- protected and advanced the rights of members of the lesbian, gay, bisexual, transgender, queer / questioning and intersex communities, and continue to combat all forms of prejudice and intolerance; and
- made significant progress on measures to grow the economy, create jobs, and reduce poverty.

While the government has set in motion the process of renewal and reform, there is more work to be done to see these reforms through to the end. Government will:

- see through the work underway with partners to end load-shedding and revive the performance of ports and rail network;
- continue to strengthen law-enforcement institutions, tackle GBV, and fight corruption to make South Africa a safe place for all;
- continue to strengthen local government, professionalise the public service, and ensure that public officials are held accountable for their actions;
- continue to position the economy to grow and compete in a fast-changing world, to support small businesses, to give young people economic opportunities, and to provide social protection to the vulnerable;
- continue the work to improve the country's fiscal position and hold firm to a sound macroeconomic trajectory;
- use the opportunities provided by the AfCFTA to increase trade and expand industries; and
- continue to build an inclusive economy, focusing on the empowerment of black and female South Africans, advancing workers' rights, intensifying land reform, and pursuing a just energy transition that leaves no one behind.

6.3.2 State of the Province Address (SOPA) 2024

Premier Alan Winde presented the State of the Province Address (SOPA) on 16 February 2023.

The following are key highlights from the SOPA:

Power of our People

- Ensure to create the space for diverse views to be shared and expressed and that the rule of law is adhered to.
- Focus on our residents' critical needs, like safety, growing the economy and enabling jobs, and ending load shedding.

The Western Cape Government "FOR YOU"

- The WCG is the first provincial government in the world to be awarded the Top Employer Certification.
- To serve with dignity and humility, placing the needs of our residents above everything.

Devolution of critical services for you our residents

- Fix Cape Town's central line and get trains back on track.
- Attract private investors to the Port of Cape Town so it can again be an efficient logistics hub that helps create jobs and fuel our economic growth.

Looking after the most vulnerable citizens

- 365-day approach to addressing gender-based violence, and the aim is to do everything to ensure that survivors of violence get the support and assistance they need.

Feeding those in need

- Continued our school feeding schemes.
- School Nutrition Programme at Western Cape Government schools.
- Continued support for community nutrition and development centres and soup kitchens across the province.

Job Creation

- Highlights the importance of job creation and economic growth in the Western Cape, emphasising the government's efforts to empower citizens through employment opportunities.
- The focus on building an enabling job ecosystem, as outlined in the Growth for Jobs (G4J) strategy, has led to a significant decrease in the unemployment rate in the province.
- The Western Cape Government's initiatives, such as the Red Tape Reduction Unit and the SMME Booster Fund, aim to support businesses and promote economic development.

Tourism

- Introduced the G4J Tourism Challenge Fund which invests in the development of new tourism infrastructure and experiences to stimulate private sector investment.

Infrastructure – led economic growth

- Infrastructure projects will be a key artery for many more jobs in the future.

Education

- Exploring additional models of public-private partnerships and drawing private investment into the education sector through Edu Invest.

Agriculture

- Private sector involvement and more control of the port.
- High-quality support for emerging farmers.

Safety

- Safety cannot be achieved in isolation. Creating jobs has become as critical as fighting crime. A safe community is a prosperous one.
- Launched the Getting YOU to Work project, an exciting new initiative that offers jobseekers free travel to job interviews using Golden Arrow Bus Services.

Load shedding

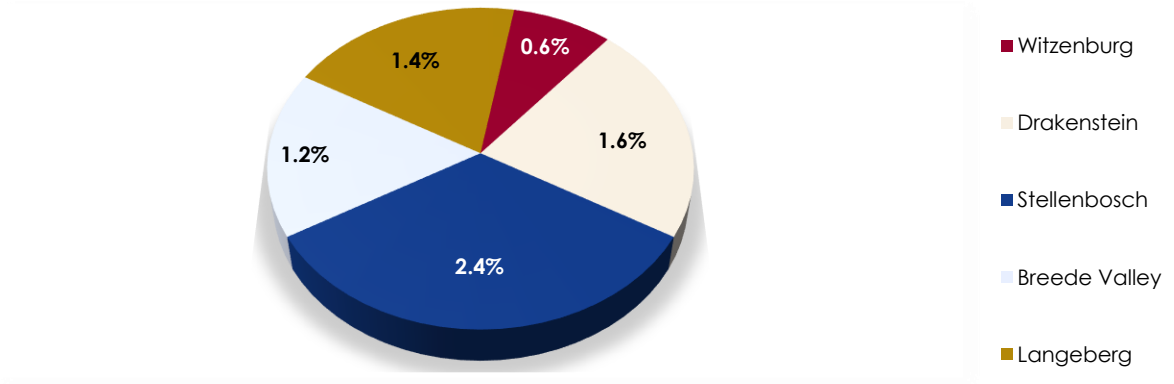
- The ongoing crisis significantly hinders the economic development of the Western Cape, worsening unemployment rates and affecting the safety and dignity of our residents.
- The Western Cape is well on its way to becoming the first load shedding-free province in the country.
- Building an energy ecosystem to bring more private sector role players into the fold will help us overcome the power crisis.
- Handed out load shedding relief packs to vulnerable groups, starting with facilities funded by the Western Cape Department of Social Development.

Clean Governance and corruption

- The power of good governance has profound and far-reaching repercussions that help enable job creation. It is therefore a key building block of economic growth.
- Assisting struggling municipalities.

6.4 Investments

This section reflects on investment priorities within the Stellenbosch area for 2023/24.



6.4.1 Public Sector Investment

In the farming towns and tourist hubs of the CWD region, strategic investment by the provincial and local governments plays a significant role in maintaining a suitable environment for businesses to operate and communities to live in, ensuring social welfare and economic growth. In the short term, the injection of funds breathes life into the local economy, as communities reap the rewards of increased capital expenditure and prospects for new job opportunities. However, the true reward unfolds in the long run when the resultant operational activities of these investments stimulate growth that echoes across the district. Constraints on public sector investment have become more prevalent, with challenges such as load shedding, high poverty levels, and sluggish economic growth negatively affecting local governments' revenue-generating capabilities. However, in the face of adversity, the resolve of the local municipalities has proven to be unyielding, and investing in infrastructure remains a priority.

The pressing challenges presented by ageing water supply infrastructure and load shedding have significantly impacted sustainable water provision in the CWD. Given the District's economic reliance on agriculture and its growing population, the Witzenberg (R19.4 million) and **Stellenbosch (R117.2 million)** municipal areas have put water management as one of the priority items within their annual budgets. Moreover, wastewater management is under pressure throughout the district.

As load shedding continues and concerns about productivity and economic stability rise, many municipal areas are seeking alternative energy sources to minimise the effects of electricity constraints. The Stellenbosch municipal area has allocated much of its budget (R113.2 million) to energy infrastructure. Energy infrastructure projects in the Stellenbosch municipal area include high-voltage substations valued at R75.0 million provided for in the 2023/24 MTREF budget period and medium-voltage substations and networks valued at R72.8 million envisaged for the same period.

6.6 Cape Winelands District (CWD) JDMA Implementation Plan

A **CWDM JDMA profile** was developed in 2020 and updated in September 2023. The Cape Winelands District Profile - 2020 Perspective is a first-generation knowledge product to provide information and evidence to government stakeholders and also to:

- Provide an information source that, at a glance, highlights what needs to be maintained, the strengths and challenges facing the Cape Winelands District (i.e., sets the context and provides the government with an intergovernmental understanding of key development trends and patterns within the District); and
- Assist in informing catalytic or strategic projects for the Joint District and Metro Approach Implementation Plan for the longer-term development of this geographical area that is both focused and targeted, but also implementation-ready, resilient, coordinated, and integrated.

Given the above, the following strategic priorities have been identified for inclusion in the CWD JDMA Implementation Plan and approved by the District Coordinating Forum (DCF).

- Waste minimisation and management solutions
  - Regional Landfill
  - Waste Minimisation Strategies
  - Integrated Waste Management Plan
  - Waste Workshop
- Resource Resilience
  - Climate Change, Water Management and Wildfire Urban Interphase Risks
  - **Municipal Energy Resilience Programme**
- Infrastructure management and development
  - N1 Eastern by-pass
  - ESKOM Infrastructure delays (Witzenberg)
- Economic Recovery and Unemployment
  - Economic Recovery Plan - Implementation
- Urbanisation
  - Develop a guide to inform future developments
  - Monitor mega human settlement projects to inform the Guide
  - Address Land invasions
  - Provision of Basic Services for Prioritised Informal Settlements
- Community Safety
  - District Plan
  - Area-based Plan (Witzenberg)
  - SANTAM (fire and IT equipment, PPE and smoke alarms)
- Municipal Business Sustainability
  - Financial Sustainability
  - Revenue Collection: ESKOM

- Shared Services: Development of 4 Models

- External Stakeholder involvement
- Communication and IGR
- Data Governance and Profile update
    - The development of a dynamic profile to inform JDMA Implementation Plan developmental priorities and projects.
- Digital Transformation Strategy

6.6.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations

The Municipal Energy Resilience (MER) Project was developed following an amendment to Schedule 2 of the Electricity Regulation Act in 2020, allowing municipalities to generate electricity. The key objectives of the MER Project are development, support, and capacity building to implement renewable energy projects in municipalities across the province for municipalities, businesses, and households to generate, procure, and sell electricity. The project aims to secure reliable electricity supplies for the province and increase economic resilience. The project includes four approaches: creating space for small-scale embedded generation (SSEG), providing assistance in procurement processes for municipalities to source energy from independent power producers (IPPs), building a business case for utility–scale to-power generation, and finally, reforming the sector. The Stellenbosch Municipality and five other candidate municipalities are participating in the first phase of the MER Project.

This project will look at several innovative renewable energy technologies and scales, as well as cost options, the size of the investment needed, location issues, risks, municipal readiness needs, infrastructure needs, timelines for getting capacity onto the grid, transaction and procurement mechanisms, and regulatory issues.

SSEG enables solar photovoltaic (PV) systems to be grid–tied and feed in any excess electricity generated. Registering a feed–in system allows one to export excess electricity to the grid and receive credit based on the SSEG tariff. This is structured to support PV system owners while covering the cost of their electricity services.

6.6.2 Cape Winelands District Joint District Approach

The following Strategic Projects apply to the Stellenbosch municipal area:

Figure 29: Cape Winelands District Joint District Approach

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH						
Municipal Priority	**Key Initiative (s)**	**Municipalities Involved**	**Project**	**Project lead and team ((link to existing technical structures and / or projects)**	**Action/s**	**Progress**
Provincial Priority (Vision Inspired Priority 2) – Growth and Jobs						
Waste minimisation and management solutions (priority project)	Integrated Waste Management Plan	All municipalities	Review of Integrated Waste Management Plan	CWDM and DEADP	Update the JDMA Implementation Plan in terms of DEADP lead on Waste. Western Cape Provincial Government to assist with supply chain management challenges. A waste management conference will be arranged as soon as the new council is fully functional.	Integrated Waste Management Plan Project has commenced.
Waste minimisation and management solutions (priority project)	Establishment of a Regional Waste Management Facility	All municipalities	Regional Waste Management Facility: Conduct a section 78 investigation and implement the recommendations			The project has commenced.
Resource Resilience	Water Governance and Water Service Development Plan Joint Strategy: Bulk Storage Facilities (to provide for drought) Local Economic Development / Growth and Development Strategy (for the District to address risks associated with Climate Change / Water Security)	All municipalities	Municipal Energy Resilience Programme	DLG, DEDAT, Stellenbosch Municipality and Drakenstein Municipality	Specific pioneering projects for Drakenstein and Stellenbosch were identified. DEDAT did a proxy for the cost-supply studies required by NERSA. The next step is to compile a roadmap for the pioneering projects and their implementation thereof. DEDAT to establish a MER Fund to assist municipalities in preparing for the studies and enable them to look at new generation capacity specifically for renewable energy. Wheeling support for individual municipalities is in the process of being finalised.	During the Municipal Energy Resilience Programme, Stellenbosch and Drakenstein progressed as per stakeholder agreements. Initial engagements facilitated with WESGRO / Invest SA and DEDAT: ESKOM infrastructure delays (Witzenberg).

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH						
Municipal Priority	**Key Initiative (s)**	**Municipalities Involved**	**Project**	**Project lead and team ((link to existing technical structures and / or projects)**	**Action/s**	**Progress**
Provincial Priority (Vision Inspired Priority 2) – Growth and Jobs						
Economic Recovery, long term unemployment and its consequences (priority project)	Address factors associated with Youth unemployment	All municipalities	Economic Recovery Plan	CWDM and all local municipalities; with WESGRO and DEDAT	• Further offline discussions will be held regarding unemployment.	• Quarterly updates are done on projects in the Economic Recovery Plan. • Implementation is ongoing while further discussions are underway to understand the address of long-term unemployment challenges.
Municipal Business Sustainability (priority project)	Saving costs across certain functions	All municipalities	Shared Service Model Development	CWDM and all local municipalities, DLG and IGNITE	Follow up on progress with the appointed service provider.	• Audited completed.
Data Governance and JDMA Profile	Towards developing a Dynamic Profile and sharing data	All municipalities	Data Governance and JDMA Profile	DLG, CWDM and all local municipalities, DEADP, DotP, DSD	• Data governance is a transversal JDMA Project. • CEI is busy drawing up a Memorandum of Understanding (MOU) for Metros and non-Metros. • Provincial governance structures are being set up and aligned with local government in the Western Cape. This is being done with support from the Department of the Premier and will address monitoring and evaluation.	• Municipal interface structures are being finalised. • Data-sharing MoUs are being drafted, with consultations underway. • The CWDM Data Management Plan was developed. • Gaps in the 2020 profile were identified.

6.7 Agricultural Interventions

In support of the Western Cape Department of Agriculture Strategic Plan, the municipality has identified two priority interventions on which the municipality will embark in the **period 2022 – 2027**.

Table 33: Agricultural Interventions for 2022 – 2027

Project Rating					
☺	Project completed.	😐	Project in progress.	☹	Not completed / No budget available / District Function / Provincial Function

Table 34: Agricultural Interventions

Proposed Municipal Actions in Support of the Strategic Focus Areas of the Western Cape Department of Agriculture					Target and Progress Rating					Performance Comment
Priority Area	Desired Municipal Deliverable	Status Quo within Municipality	Proposed Local Intervention (appropriate municipal action)	Timeframe to deliver (Short / medium / long term or ongoing)	2022/23	2023/24	2024/25	2025/26	2026/27	
Farmer Support	Lease agreement for use of commonage land (e.g. Terms of the lease, roles and responsibilities of each party, preference for individual agreements, and need for longer leases)	In 2020, two (2) land parcels were identified and advertised for emerging farmers. The process is to be finalised.	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers	Medium / long term	2	4	2	2	2	Sixteen (16) farming applications have been received. Assessments of farming applications have been completed. Four applications were shortlisted for potential allocation on the two portions of available land. An item was prepared for the council, and the four portions of land were approved and allocated to the successful applicants. In the first quarter of 2024, the Executive Mayor and a representative from the Office of the Minister will conduct an official handover.
					😐	😐	n/a	n/a	n/a	
Market Access	Infrastructural development that supports agriculture development value chain and market access	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers.	Ensuring vibrant, equitable and sustainable rural communities with food security for all	Medium / long term	2	4	2	2	2	
					😐	😐	n/a	n/a	n/a	

6.8 Stellenbosch Municipality Operational Support Plan

The projects listed in the table below were identified as projects / programmes / initiatives that would require assistance and funding from other spheres of government:

Table 35: Stellenbosch Municipality Operational Support Plan

Project / Programme / Initiative	Responsible Internal Department / Agency	Action/s	Estimated Funds
Climate Change Adaptation Strategy (Alien Clearing, River Management and Wildfire Management	Department Community Service	Implementation of Alien Clearing, River Management and Wildfire Management Plans.	R2 000 000
Mega-human settlement project monitoring	Department: Housing Development	Kayamandi Town Centre: To obtain development rights/township establishment. Jamestown: Housing (Phase 2, 3 and 4): To obtain development rights / township establishment. Erf 7001 and other possible sites for mix-used development in Cloetesville: To obtain development rights / township establishment.	R2 000 000 R1 500 000 R1 000 000
Stellenbosch Municipality: Resource Resilience: Municipal Energy Resilience	Municipality / DLG / Water Services	Financial support is required for the development of pico hydropower units.	n/a
Stellenbosch Municipality: Resource Management Resilience: Water Management Resilience	Stellenbosch Municipality and DLG	Financial support is required for the development of real-time management control centres.	n/a
Improvements to public transport facilities in rural and semi-rural areas within the Stellenbosch Municipal area	Department: Roads, Stormwater and Transport	Upgrading and implementing new Taxi and Bus stops in rural and semi-rural areas within the Stellenbosch municipal area.	n/a
Improvements to the NMT network in rural and semi-rural residential settlements located within the Stellenbosch Municipal area	Department: Roads, Stormwater and Transport	Construction of Sidewalks and NMT facilities in rural and semi-rural residential settlements located within the Stellenbosch Municipal area.	n/a
Compilation of the Adam Tas Corridor Local Spatial Development Framework	Department: Development Planning (Spatial Planning)	Compilation of a Local SDF for the Adam Tas Corridor Study Area. The Compilation of a Land Use Framework to develop a Development Incentive Overlay Zone (Urban Development Zone).	n/a
Compilation of a Klapmuts Local Spatial Development Framework	Department: Development Planning (Spatial Planning)	Inclusion of Klapmuts within the Cape Metro Regional Spatial Implementation Framework ("RSIF") in partnership with WCG; CoCT; Cape Winelands District and Drakenstein Municipality which focuses on the following themes: - Smart City Concept; - Economic Development and Job Creation; and - Cost-effective Services	n/a
Other Projects, policies, frameworks, programmes, and housing pipeline projects outside of the priority areas	Department: Development Planning (Spatial Planning)	Draft Economic Development Strategy (an Approach to Stimulate Economic Growth). - Inclusionary Housing Policy. - Jamestown Housing Project. - De Novo. - Vaaldraai. - Jonkershoek. - Erf 7001, Stellenbosch (Soekmekaar).	n/a

6.9 Gender Mainstreaming

Gender mainstreaming is the process of assessing the impact on women and men of any planned development projects, including policies and programmes. It is a strategy for making women's as well as men's concerns and experiences an integral dimension in the planning, implementation, monitoring, and evaluation of projects and programmes in all areas of governance, economics, basic services, and social spheres. The ultimate goal of gender mainstreaming in the municipality is to achieve gender equality at all levels of service delivery. The United Nations Organisation defines gender equality as equal rights, responsibilities, and opportunities for women and men. It implies that the interests, needs, and priorities of both women and men are taken into consideration in the planning, decision-making, and performance of organisational functions.

Gender mainstreaming is one of the SDGs and District Development Model (DDM) objectives. The SDG (Gaol 5) and DDM advocate that the government should aim for gender equality, empower all women and girls, and ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level. In support of the SDG and DDM objectives, the Stellenbosch Municipality aims to establish an environment that encourages gender mainstreaming interventions at the municipal level. Although priority issues identified by the different segments of the community cannot be addressed at once due to sufficient resources, the municipality is implementing interventions as a start to address gender and gender mainstreaming.

Gender mainstreaming will require the municipality to shift in organisational cultures and ways of thinking, as well as in the goals, structures, and allocation of resources. Through the IDP and in support of the SDG and DDM objectives, the Stellenbosch Municipality will make an effort to incorporate gender into each phase of planning. As a stepping stone to incorporating gender in municipal planning, it will take the form of identifying key gender indicators linked to the projects and programmes encapsulated in the 5th Generation IDP 2022 – 2027. The table below on the gender matrix will be revised during the 3rd Review of the 5th Generation IDP 2022 – 2027 to allow directorates the opportunity to shift to a level of implementing projects, programmes, and policies that take into account the principles of gender mainstreaming as stipulated below:

- Gender-sensitive language;
- Gender-specific data collection and analysis;
- Equal access to and utilisation of services;
- Women and men are equally involved in decision–making; and
- Equal treatment is integrated into steering processes.

The benefits of incorporating gender outcomes into the IDP will be:

- Positive impact on individuals, organisations, and at a societal level;
- Acceleration of implementation of Sustainable Development Goals (SDGs);
- Higher rate of growth and development;
- Improved resource management;
- Improved productivity; and
- By examining the overall situation of women and men across municipalities, a stronger analysis could provide a basis for identifying their specific needs and assessing whether certain groups of women and men could be adversely affected by development programmes and projects.

6.9.1 Gender Interventions

In terms of integrated planning and streamlining governance processes, the Department: Community Development and the Provincial Department: Social Development signed an MOU to collectively focus on various programmes with gender as one of the focal points. This includes the implementation

of empowering programmes for women, reaching out to single mothers, hosting the 16 Days of Activism / Gender-Based Violence, and establishing a Gender-Based Violence Forum.

The implementation of gender-specific programmes is depicted in the table below:

Table 36: Gender-Based Interventions

Key Activity / Project / Programme / Initiative (measurable action)	Description of Unit of Measurement	Performance Comment
Establishment of the Greater Stellenbosch GBV Forum	Number of Greater Stellenbosch GBV Forums established by 30 June 2024	The IDP deliverable was omitted from the DSD MOU. However, DSD is to establish a GBV Forum. This will be included in an addendum to the MOU.
Hosting of 16 days of activism event	Number of 16 days of activism events hosted by 30 November	The 16 days of activism event will be hosted each financial year for the period 2022 – 2027. This programme is linked to the Mayoral Outcome, to create safer environments for communities. Implementation and monitoring of the programme will be on a departmental level.

6.9.2 Gender Disaggregated Matrix[1]

Disaggregating information by gender, count males and females separately when gathering information on projects and programmes. Gender-disaggregated data is important because it will assist the municipality to see whether an initiative is successful at targeting and benefiting women and men. The indicators specify that all data about target groups and beneficiaries will be gender disaggregated.

Table 37: Gender Disaggregated Matrix

Directorate	Department	Indicator Description		5-Year Target 2022 – 2027		Target 2022/23		Target 2023/24		Target 2024/25		Target 2025/26		Target 2026/27

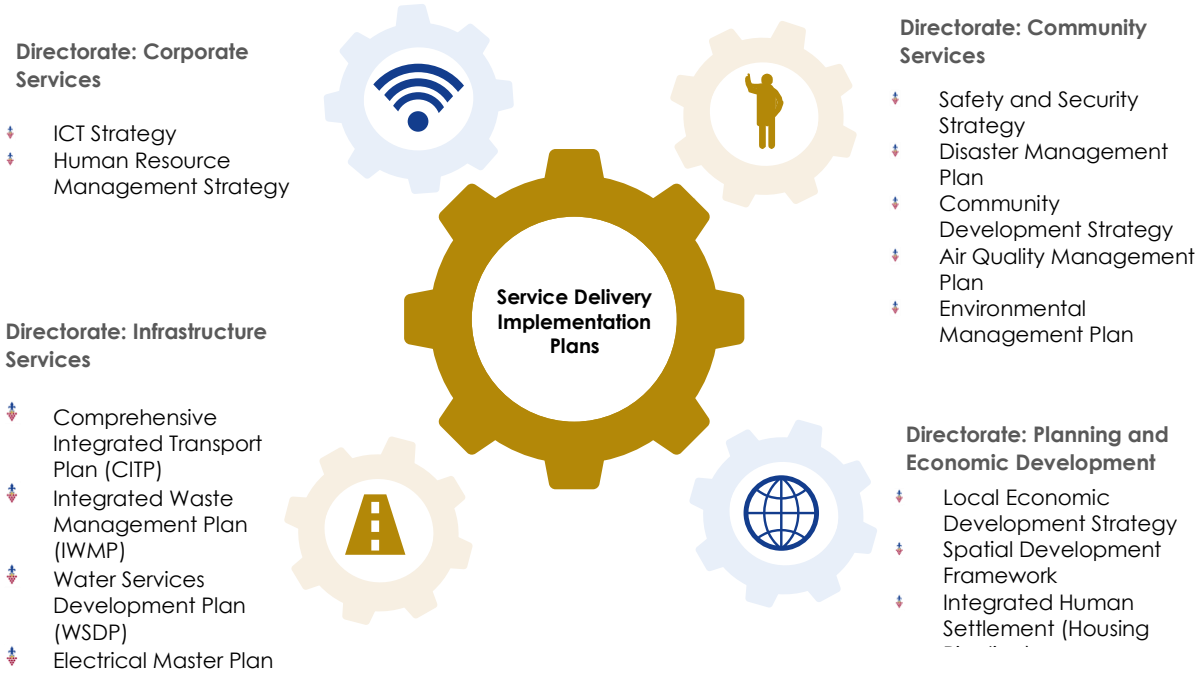
***Note**: All residents, regardless of gender, benefit from the installation of ablution facilities and water points in an informal settlement. The facilities are gender-neutral and hence 100% beneficial to all genders.*

CHAPTER 7:

Sector Plans and Implementation



7.1 Introduction

The municipality has several medium- and longer-term sector plans that direct the implementation of the different functional areas. These plans form an integral part of the Integrated Development Plan (IDP).

Although the time periods for sector plans and the IDP differ (e.g., the mSDF has a 20-year horizon, the IDP has a 5-year horizon, and sector plans can be revised annually), the IDP and sector plans inform each other mutually. Like the IDP, sector plans are subject to periodic review. Alignment between sector plans and the IDP allows for more effective budgeting integration.

Other service delivery implementation processes include:

Figure 30: **Service Delivery Implementation Plans**

7.2 The relationship between the Sector Plans and Strategies

Sector plans need to support and reinforce each other to have meaning and assist in the sustainable development of the municipal area. The table below illustrates how different key sector plans inform and direct each other.

Table 38: The relationship between sector plans

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
Municipal Spatial Development Framework (*m*SDF)		• Identifies areas for the satisfaction of human settlement needs • Designates areas for developmental needs. • Indicates areas desirable for a specific nature and form of urban development. • Indicates areas desirable for conservation. • Spatially, it reflects the distribution of community facilities. • Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). • Designates housing priority / restructuring areas. • Integrates settlement patterns with infrastructure plans.	• Identifies areas for the satisfaction of human settlement needs. • Indicates areas desirable for conservation. • Spatially, it reflects the distribution of community facilities. • Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). • Designates housing priority / restructuring areas. • Indicates areas desirable for densification / specific land use / integrated networks. • Spatially, it reflects the Council's approved nature and form of urban development.	• Identifies municipal growth direction • Identifies areas to be protected from development (e.g. heritage, agriculture and natural) • Identifies priority development areas • Identifies infrastructure priority areas
Human Settlements Plan	• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement needs. • Quantifies the extent of demand for various housing typologies.		• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement needs. • Quantifies the extent of demand for various housing typologies.	• Identifies current settlements and interventions which should be accommodated in future planning • Determines settlement infrastructure needs • Quantifies the extent of demand for services according to various housing typologies
Integrated Transport Plan	• Determines the most efficient responses to transport challenges. • Identifies transport and traffic priority areas. • Shapes future planning according to the most appropriate modal changes and challenges.	• Identifies transport and road priority areas. • Determines development parameters, e.g., parking ratios, access, and standards • Shapes settlement planning according to the most appropriate modal changes and challenges.		• Determines most efficient responses to transport challenges. • Identifies transport and traffic priority areas. • Shapes future planning according to the most appropriate modal changes and challenges.

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
	▪ Identifies the need for services not provided by the municipality, e.g., SANRAL, Provincial Roads, PRASA, and Transnet.			
Infrastructure Master Plans	▪ Identifies existing infrastructure capacity / constraints. ▪ Identifies interventions required to support growth / infill. ▪ Designates priority infrastructure development areas / corridors. ▪ Provides for services not provided by the municipality, e.g., Telkom, Eskom, and raw water supply.	▪ Identifies existing infrastructure capacity or / constraints. ▪ Identifies interventions required to support growth / infill. ▪ Provides for services not provided by the municipality, e.g. Telkom, Eskom, raw water supply.	▪ Identifies existing infrastructure capacity or / constraints. ▪ Identifies interventions required to support growth / infill. ▪ Provides for services not provided by the municipality, e.g., SANRAL, Provincial Roads, PRASA, and Transnet.	

7.3 Sector Plans and Implementation Strategies

7.3.1 Air Quality Management Plan

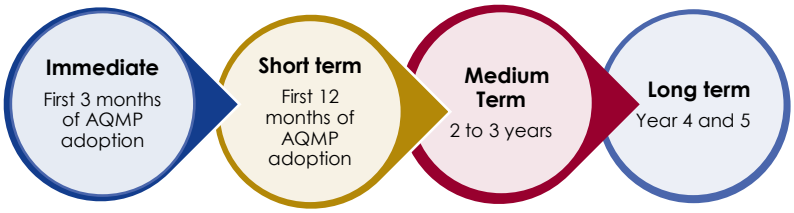
Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) has been approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018.

7.3.1.1 Vision, Mission, and Goals

Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is co-operatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.



The goals to achieve the mission of the AQMP are listed below and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The three goals for the Stellenbosch Municipality AQMP are:

- **Goal 1:** Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory framework and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'Ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'Effective air quality management;
- **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDMAQMP goal of 'Effective air quality management through an 'Emission reduction strategy; and
- **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management.
- **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such an impact.

7.3.1.2 Time frames

The timeframes defined for the Implementation of the AQMP are:

Figure 31: **AQMP Time frames**

The following immediate items were included in the AQMP:

Table 39: Items in AQMP

Objective	Activity	Responsibility
Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law.	Air Quality Officer, Council
Emissions from waste burning are reduced.	Enforcement of the by-law.	Air Quality Officer
An Air Quality Management System exists in Stellenbosch Municipality, including an emission inventory, ambient air quality monitoring, and reporting.	Prepare an annual report on progress with AQMP implementation and the state of air quality, including emissions, ambient data, and complaints.	Air Quality Officer
Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g. EIA, SDF, SEMF).	Air Quality Officer
Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

7.3.2 Environmental Management Plan

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned.

To this effect, Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF), approved by the Council as a sector plan for the Municipal Spatial Development Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (IAP Management Plan), prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), completed during the 2017/18 financial year. This document has been reviewed and adopted by the Council in 2022 and the Department of Forestry, Fisheries, and the Environment (DFFE). Stellenbosch Municipality reports annually to DFFE on the implementation of its IAP Management Plan.

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park (a nature reserve), and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- Mont Rochelle Nature Reserve: approved by the Council in 2022 and will be reviewed in 2026;
- Papegaaiberg Nature Reserve: An approved EMP is in place and is currently up for a 5-year review;
- Jan Marais Nature Reserve: Final draft EMP prepared;
- Paradyskloof Nature Area: approved by the Council in 2019 and will be reviewed in 2024; and
- Ida's Valley / Botmaskop Nature Area: Approved by Council in 2023, to be reviewed in 2027.

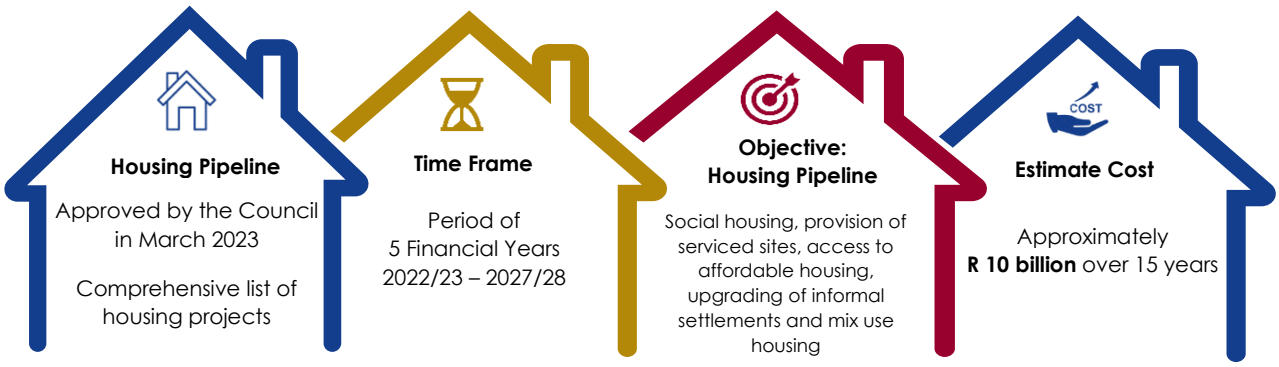
7.3.3 Integrated Human Settlement

7.3.3.1 Overview

An Integrated Human Settlement Plan (IHSP) is the road map for the provision of all forms of housing within a municipal area. This plan is closely linked to the municipal IDP and the Municipal SDF.

The aim of the Integrated Human Settlements Plan (IHSP) is therefore to:

- To outline the municipality's implementation plan for providing for the housing needs of its steadily growing and increasing population.
- To enable the municipality to prepare funding applications for submission to the Provincial Department of Infrastructure (branch Human Settlements) (PDoI) that are consistent with funding conditions and included in the municipal IDP and Housing Pipeline as per Provincial Department of Infrastructure guidelines is a requirement; and
- To inform the municipal Housing Pipeline spanning over ten years, reflected in five-year periods, the funding required in the Provincial Department of Infrastructure's Business Plan.



The IHSP will therefore not only comply with the requirements of the National Housing Act, whereby the municipality is obliged to facilitate the delivery of housing opportunities as part of their municipal function but will also develop a credible Housing Pipeline and operational models for human settlement development within the WC024.

7.3.3.2 Housing Pipeline

The PDoI requires that every municipality must have a Housing Pipeline. The Housing Pipeline is premised on a **five-year horizon** and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each municipality's Housing Pipeline is an integral component of the Provincial Department of Human Settlements' Business Plan.

It is required that the Housing Pipeline must be reviewed annually. The latest review of the Housing Pipeline was approved by the Council in March 2023. This revision includes the following:

Figure 32: Housing Pipeline Time Frame, Objective and Estimate Cost

The objective of the Housing Pipeline is to place more emphasis on the following housing types or programmes:

- Social housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in November 2016);
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Upgrading of Informal settlements; and

- Mixed-use housing (which includes formalised homeownership especially employer housing).

The estimated cost of this programme will be approximately **R10 billion** over **15 years**.

- Upgrading of informal settlements, (La Rochelle, Klapmuts, Langrug, and Franschhoek);
- Access to basic services (ABS);
- Jamestown, Farm 527 (phases 2, 3, and 4);
- Upgrading of Zone O, Kayamandi;
- Enumeration of people on farms and backyarders;
- Rectification of Cloetesville subsidy houses at The Steps and Orlean Lounge;
- Erf 7001, Cloetesville (known as "Soek-mekaar");
- Upgrade of the Kayamandi CBD; and
- Northern Extension.

7.3.3.3 Upgrading of Informal Settlements

The municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

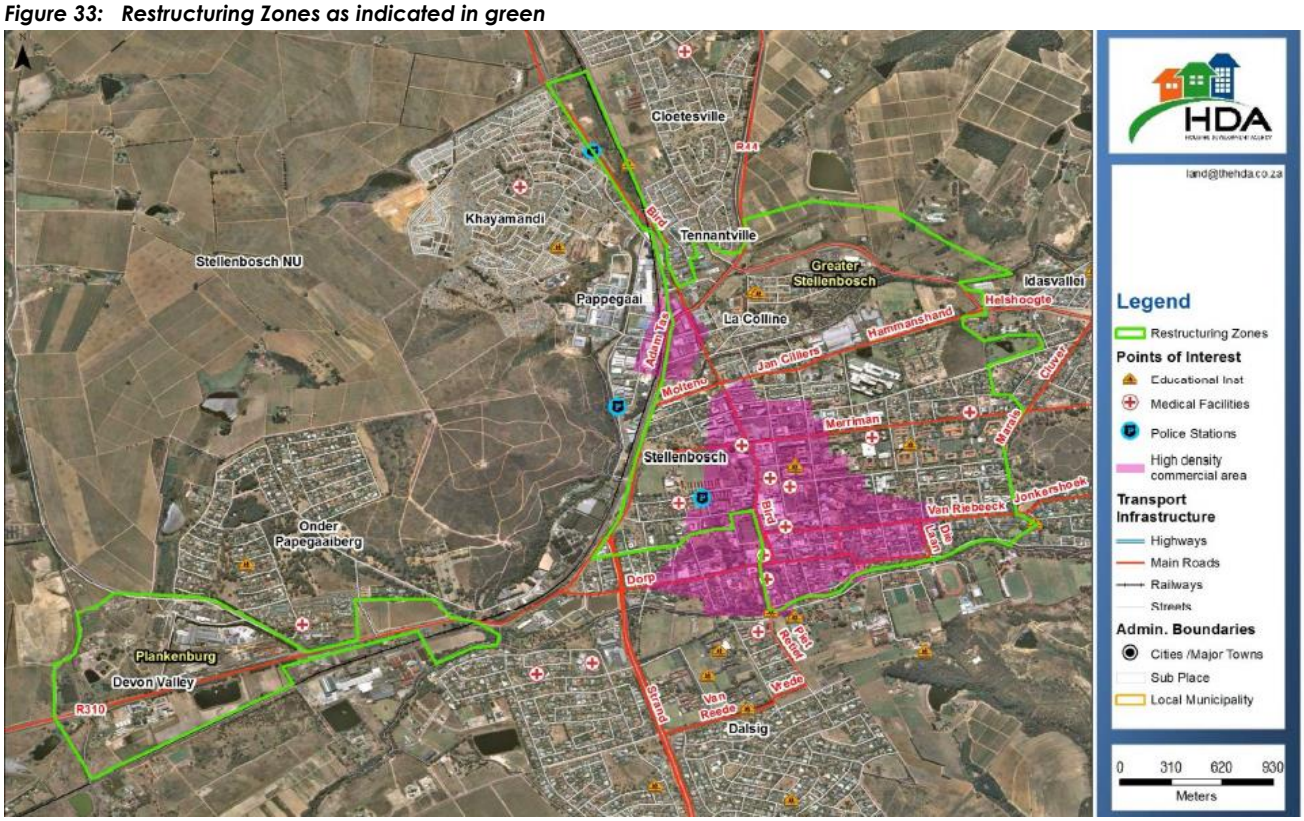
- In-situ upgrading of informal settlements;
- Upgrade informal settlements through the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with the Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

7.3.3.4 Informal backyard dwellings

The municipality, through the Housing Pipeline is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database, and hopefully, this will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious, and the chance of actually obtaining a formal house is very slim. Therefore, the Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes, (especially Social Housing (affordable rental)).

7.3.3.5 Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017 by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the municipality, and the latter culminated in a Council decision instructing the administration to attract social housing institutions (SHIs) and / or other development agencies (ODAs) to effect the municipality's social housing programme.



This programme aims to ensure improved quality of life for communities through a rental housing programme. This process of integration speaks to the importance of:

- Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium-density housing stock, etc.;
- Social sustainability: social integration between various income groups, access to educational, recreational, and health facilities, etc.; and

- Ecological sustainability: conservation of scarce resources.

The figure below depicts areas that have been declared **restructuring zones** for Stellenbosch Municipality.

Figure 33: Restructuring Zones as indicated in green

7.3.3.6 The Western Cape Housing Delivery Model

In 2020, the National Department of Human Settlements (NDoHS) issued a letter to the Provincial Department of Human Settlements (PDoHS) regarding the new directives for human settlement projects. The letter stated that the delivery of top structures was fiscally unsustainable, and therefore there is a need to downscale the delivery of top structures to prioritise the delivery of enhanced service sites. The **four newly prioritised categories** for the top structure of the letter were:

- The elderly;
- Military veterans;
- Persons with disabilities; and
- Child-headed households.

Considering the correspondence received from the NDoHS, the PDoHS added it to the above-existing **priority categories**:

- Backyard residents; and
- Person, longest on the waiting list.

After consultation with the National Department, the PDoHS confirmed that all new project applications received from municipalities, which include top structures, must adhere to the above criteria. All the supporting applicable beneficiary approval information must be attached to the top structure project application.

7.3.3.7 Priority Human Settlements and Housing Development Areas (PDSHDA)

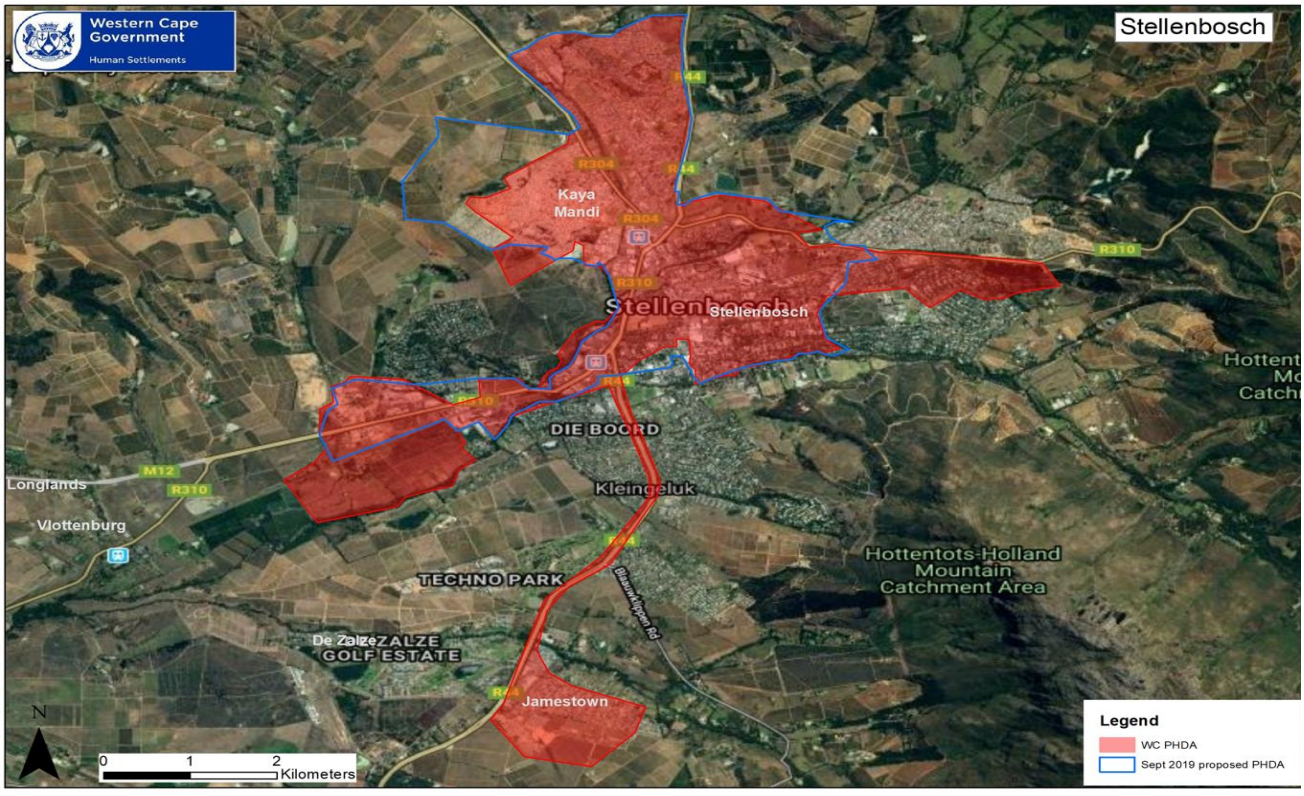
In 2020, the Minister of Human Settlements Gazetted the declaration of Priority Human Settlements and Housing Development Areas (PHSHDAs). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households, and overcome apartheid spatial patterns by fostering integrated urban forms.

The PHSHDAs are underpinned by the principles of the National Development Plan (NDP) and the allied objectives of the National Spatial Development Framework (NSDF) and the Integrated Urban Development Framework (IUDF), which include:

- **Spatial Justice:** reversing segregated development and creating poverty pockets in the peripheral areas, integrating previously excluded groups, and resuscitating declining areas;
- **Spatial efficiency:** consolidating spaces and promoting densification and efficient communication patterns;
- **Access to connectivity, economic and social infrastructure:** ensure the attainment of basic services, job opportunities, transport networks, education, recreation, health, and welfare to facilitate and catalyse increased investment and productivity;
- **Access to adequate accommodation:** the emphasis is on the provision of affordable and fiscally sustainable shelter in areas of high need; and
- **Provision of quality housing options:** ensure that different housing typologies are delivered to attract different market segments of appropriate quality and innovation.

The emphasis is placed on synchronising national housing programmes in these priority human settlements and housing development areas, namely:

- **Integrated Residential Development Programme** provides a tool to plan, fund, and develop integrated settlements that include all the necessary land uses, housing types, and price categories to create integrated communities. It provides for subsidised as well as finance-linked housing, social and rental housing, and commercial, institutional, and other land use to be developed.
- **Social Housing Programme in Restructuring Zones** provides for social housing located in specific, defined localities (mostly urban), which have been identified as areas of opportunity (largely economic) where the poor have limited or inadequate access to accommodation and where the provision of social housing can contribute to redressing structural, economic, social, and spatial dysfunctionalities. It is also aimed at improving and contributing to the overall functioning of the housing sector, and particularly the rental sub-component thereof, especially insofar as social housing can contribute to widening the range of housing options available to the poor.
- **Informal Settlements Upgrading Programme** provides for the structured in situ upgrading of informal settlements to address the social and economic exclusion of communities. It remains evident that informal settlements provide new migrants and the urban poor with an affordable point of access to towns and cities, although they are also associated with high degrees of physical and social vulnerability.
- **Finance Linked Individual Subsidy Programme** provides for the creation of an inclusive and vibrant residential property market that can provide state assistance to households who are unable to independently access housing credit to become upwardly mobile and progress up the housing ladder.
- **The Special Presidential Package (SPP) Programme on Revitalisation of Distressed Mining Communities** by developing and implementing human settlement spatial transformation plans for identified mining areas.



- **Enhanced People's Housing Process** provides for a process in which beneficiaries actively participate in decision-making over the housing process and housing product and make a contribution in such a way that:
  - Beneficiaries are empowered individually and collectively;
  - Various partnerships are created;
  - Social capital is retained and expanded upon, and 4) housing is valued as an asset far beyond its monetary value; and
  - Housing is valued as an asset far beyond its monetary value.

The current status of the PHSHDA for Stellenbosch Municipality, namely:

- The "Stellenbosch Urban Core Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazetted on 15 May 2020 (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi, and Central Stellenbosch;
- To date, the Housing Development Agency (HDA), with assistance from the Provincial Department of Human Settlements (PDoHS), has undertaken a Status Quo Analysis in preparation for the drafting of the Stellenbosch PHSHDA Development Plan. The Status Quo Analysis has been completed and will inform the drafting of the Development Plan going forward; and
- The PDoHS, Stellenbosch Municipality, and the HDA will proceed with the drafting of the Stellenbosch PHSHDA Development Plan shortly.

The figure below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

Figure 34: Priority Human Settlements and Housing Development Areas (PDSHDA)

The approved Housing Pipeline is available on request at the Directorate: Planning and Economic Development, on 021 808 8462 or via email at: lester.vanstavel@stellenbosch.gov.za.

n/a* - After obtaining development rights, implementation of the project is dealt with by the Department: Project Management Unit.

7.3.4 Comprehensive Integrated Transport Plan

The National Land Transport Act, 2009 (Act No. 5 of 2009) (NLTA) requires "Type 1" planning authorities (the country's major cities and towns (including Stellenbosch Municipality)) to prepare a Comprehensive Integrated Transport Plan (CITP). Generally, a CITP is considered a mechanism by which planning authorities can plan for, develop, manage, integrate, and provide for all modes of transport in their areas of jurisdiction.

The vision for the municipality's 2023–2028 CITP is as follows: Stellenbosch Municipality has an integrated, effective, and sustainable transport system that unlocks economic opportunities and is accessible, safe, reliable, and affordable to all communities serviced by the municipality.

Pursuant to achieving the vision and addressing user needs, issues, and gaps, the objectives for the transport system for Stellenbosch Municipality over the next 5 years and beyond are as follows (Chapters 2.3 and 2.4 of the CITP):

Figure 35: Objectives for the Stellenbosch Municipality Comprehensive Integrated Transport Plan (CITP)

7.3.5 Integrated Waste Management Plan (IWMP)

This third-generation IWMP was developed in 2020. The development of the IWMP is necessary, as it is an integral tool to identify current needs and act as a guide towards sustainable waste management. With regular updates to this document, changing needs and progress in the waste management sector can be tracked, and strategies can be adjusted as needed.

Figure 36: Integrated Waste Management (IWMP) Purpose, Scope, and Status Quo

7.3.5.1 Implementation Plan: Integrated Waste Management Plan (IWMP)

Based on the gaps and needs identified, the aligned goals of the IWMP, and planned projects by the municipality, the plan contains the objectives, timeline, and resources required for the implementation of the IWMP. The gaps and needs identified are linked to the main goals contained in the Western Cape Provincial IWMP.

7.3.6 Electrical Master Plan

With the approval of the SDF in November 2019, which was almost within the time that the Master Plan was due for an update, the review was not done. The complete update was planned for September 2020, but due to the COVID-19 pandemic, the updating of the Masterplan was delayed.

In October 2020, the Minister of DME announced that municipalities would be allowed to purchase electricity from other sources and also generate their own electricity in the future. This drastically changed the whole concept of the Stellenbosch Municipality's Masterplan. Where the municipality previously had one supplier of electricity, it would have major intake points from this one supplier. As networks flow from these points to consumers, the size of the cables will depend on the demands of these consumers for electricity. Because the municipality may now receive electricity from multiple sources, the municipal network design will no longer be compatible with this new policy. The entire Master Plan must now change, as cables in certain areas may now be too big and in a few places too small. The whole system of intake points must first be established, and once that is known, the network itself must be redesigned with the knowledge of existing and future intake points and methods of energy acquisition.

To understand what the energy sources for electricity would look like, an **Energy Masterplan** has been launched and conducted by the Council for Scientific and Industrial Research (CSIR), which forms the basis for how electricity is likely to be generated or purchased. The Energy Master Plan was finalised in December 2022 and the **Electricity Masterplan** by June 2023.

The plans aim to provide the Stellenbosch Municipality with a clear view and a long-term plan for the development of the electrical infrastructure required to support the envisaged demand growth in Stellenbosch and surrounding areas. The municipality also evaluated the long-term viability of existing infrastructure and the expansion and refurbishment requirements thereof, where new infrastructure should be located, and which components, either existing or new, will be required.

Apart from spatial changes, the **Electrical Masterplan** is to contain the following main elements:

- Documented assessments of primary equipment at all 66/11 kV substations and 11 kV switching substations within the municipal area;
- Site-specific assessments to provide a systematic estimate of the life remaining in substation facilities and planning to extend the life of facilities to meet future needs;
- Development of a geographical load forecast based on regional demographic and historical load growth patterns, as informed by the SDF. (The anticipated long-term load forecast was directly used as input to the expansion plan.);
- Development of network strengthening and expansion options and technical evaluations to ensure that load and performance criteria are met over the short, medium, and term (2028);
- Preparation of cost estimates for the technically viable expansion and strengthening options; and
- The Electrical Master Plan is updated every five years and is used in medium-term project planning, prioritisation, and budgeting.

7.3.7 Water Services Development Plan

As a Water Services Authority (WSA), the Stellenbosch Municipality has a duty, in terms of sections 12 and 13 of the Water Services Act, 1997 (Act No. 108 of 1997), to prepare and maintain a Water Services Development Plan (WSDP). The municipality prepared a comprehensive WSDP in 2007, 2012, and 2019 that is valid for a period of five years. The revision and updating of the WSDP commenced in the 2022/23 financial year and will be completed in the 2023/24 financial year.

The Department of Water and Sanitation is responsible for looking after South Africa's water resources. Stellenbosch Municipality's Water Services sees itself as an extension of this caretaking. Water Services is responsible for acting in line with the Water Services Act and the implementation of municipal by-laws, policies, and procedures.

As part of the WSDP package, the municipality maintains:

- Water and Sewer Master Plans;
- Water Resources Study;
- Annual water audit;
- A Water Safety Plan;
- A drinking water quality sampling programme;
- Water and sewer pipe replacement prioritisation programme; and
- A Water Demand Management (WDM) Strategy.

The Water Master Plan, Sanitation Master Plan, Bulk Water Resources / Drought Intervention Plan, Asset Register, and Pipe Replacement Prioritised Programme were updated in 2019.

A new master plan has commenced and will be completed in the 2023/24 financial year. Since water management has drastically changed with the advent of drought, the use of greywater, and the increasing cleansing of rivers, it needed to be redone. It will also align the Water Master Plan with the latest changes to the SDF.

The Water Conservation and Water Demand Management (WC and WDM) strategy is a comprehensive study that includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC and WDM and will ensure ongoing planning, management, monitoring, and an enabling environment. The WC and WDM initiatives include a water pipe replacement programme, indigent domestic leak repair and meter replacement programme, Stellenbosch water meter audit, and Stellenbosch in-house water services operation and maintenance.

Poverty reduction and improved water management are closely linked. Section 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

Access to basic water is defined as 25 liters of potable water per day supplied within 200 meters of a household.

Due to the severe drought experienced recently and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions that were lifted in recent years. The Western Cape has been fortunate in the last two years with above-average rainfall, and thus no water restrictions have needed to be implemented since the previous drought ended. No water restrictions are currently envisioned for 2024.

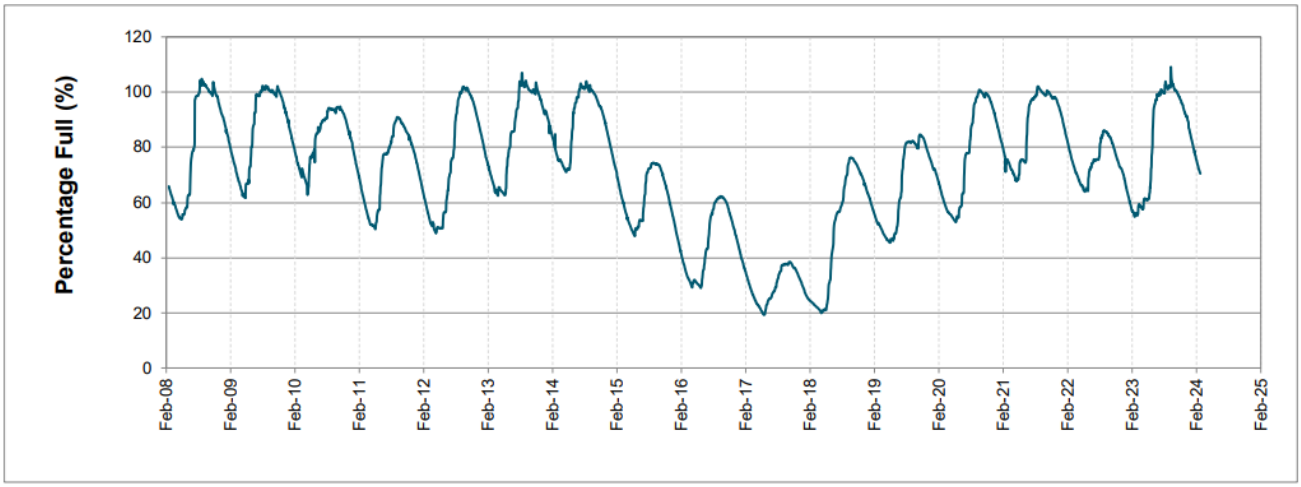
Stellenbosch Municipality supplies water to its consumers through the following water supply systems:

- Stellenbosch (Jonkershoek and Theewaterskloof Tunnel);
- Franschhoek;
- Wemmershoek (treated water imported from the City of Cape Town);

- Blackheath (treated water imported from the City of Cape Town);
- Faure (treated water imported from the City of Cape Town); and
- Other sources (boreholes).

The total population supplied with water in the Stellenbosch Municipal Area amounts to approximately 186 094 residents. Water is also supplied to a fairly extensive industrial area.

Emergency water is supplied to farm communities that do not get water from the farms that they stay on.



Stellenbosch Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek. The potable water supply from these works amounts to 20.0 Ml/d on average, and a further 9.6 Ml/d was obtained from the City of Cape Town during the 2022/23 financial year, ensuring a supply of approximately 29.6 Ml/d to the municipal area.

Areas supplied by the Wemmershoek Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier, and Vlottenburg. Areas supplied by the Faure Water Treatment Works are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact on water quality and quantity needs to be monitored and considered by Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 48 reservoirs / holding tanks, and water towers, 36 water pump stations, 44 pressure-reducing valve installations; 734 kilometers of pipeline; and 84 water supply zones. The network is fully controlled and operated by a telemetry system.

The bulk water input into the water network for 2022/2023 was 10 801 183 kl, with an annual average daily demand of 29.592 kl/day. About 36% of the water supplied is purified from its water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the City of Cape Town and the Paradyskloof Water Treatment Plant, where raw water supplied by the Department of Water and Sanitation is purified. Potable water supplied by the City of Cape Town is analysed every month by the City of Cape Town.

Figure 37: WCWSS Storage Record (2008 – present)

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities, and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. Maintenance of equipment is performed in-house and by specialist contractors.

7.3.7.1 Basic Services and Level of Services

- There is no backlog of basic water and sanitation services in the urban areas of the municipality. A small number of households on farms are still without basic water and sanitation services.
- The clinics, hospitals, and schools in the municipal area have adequate and safe water supply and sanitation services.
- All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.
- All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.
- A sustainable type of water and sanitation facility needs to be provided to the households on those farms with current services below the minimum service level standard. Stellenbosch Municipality is committed to supporting the private landowners as far as possible concerning addressing the current service backlog on farms, as identified through the Cape Winelands Rural Survey of Service Levels.
- From a water services perspective, the most significant challenges are the augmentation of the existing water sources, the replacement and upgrading of old infrastructure to accommodate development, the provision of sustainable basic services to informal settlements, and ensuring the provision of basic services to rural communities located on private farms.

7.3.7.2 Maintenance of Infrastructure

Both water infrastructure and sanitation infrastructure require serious remedial investment. About a third of the water supply infrastructure is in poor or very poor condition, and the condition backlog is more than R300 million. The bulk of the backlog is made up of the old Asbestos Cement (AC) water reticulation pipeline assets. The update to the Pipe Replacement Prioritisation study will indicate what percentage of sanitation infrastructure is in poor or very poor condition and what the condition backlog is. The bulk of the backlog consists of the old Asbestos Cement (AC) and Pic Fibre sewer reticulation assets in the Stellenbosch area.

Wastewater Treatment Works

An Infrastructure Asset Register is in place for all water and sanitation infrastructure. An Infrastructure Asset Management Plan must be developed and implemented, based on the principle of preventative maintenance to ensure that damage to assets is prevented before it occurs. Assets must be rehabilitated and / or replaced before the end of their economic life and the necessary capital funds must be allocated for this purpose. Maintenance activities have been increasingly focused on reactive maintenance as opposed to preventative maintenance.

7.3.8 Water Demand Management (WDM)

Stellenbosch Municipality is actively implementing their adopted WDM Strategy to reduce the current percentage of non-revenue water and to keep future water demand as low as possible. The municipality has a block-step tariff system that discourages wasteful or inefficient use of water. The restriction of water use by indigent households and non-payers was prioritised with the implementation of the Leak Repair Programme, which includes repairs to private leaks and the installation of water demand management vices. These devices restrict users to 400 litres of water per day. More than 1 753 devices have been installed, saving over 493 084 litres of water per day.

7.3.8.1 Climate Change

In terms of adapting to climate change, water systems will need to be more robust, and newer or alternative sources of supply may need to be found. Increased skills will be required from water managers, and long-term water projections are required. Although an overall decrease in rainfall is not generally forecast, increased variability in the climate and frequency of extreme events, as well as increased temperature and wind, could have an impact on water sources, particularly surface waters. It is, therefore, advisable for the municipality to maintain a conservative approach to the management of water sources, including the following actions:

- Establish assurance of the supply levels of all water sources;
- Increase assurance of the supply of water resources by ensuring that there is at least 10% additional capacity (headroom) when considering the maximum 24-hour demand in the peak month of the year;
- Do not undertake new developments unless a proper investigation of the implications for water sources and sustainability in the long term has been undertaken.
- Vigorous implementation of WDM measures, especially in terms of increased water efficiency, frequent monitoring of the water supply system from the sources to the consumers, and regular and adequate system maintenance and repairs; and
- The IRIS monitoring system, including the Blue Drop Awards system, is active in the municipality. The municipality did not receive a Blue Drop Award for the recent Blue Drop assessment period.

7.3.8.2 Level of Service

In the rural area, the responsibility lies with the landowner to manage stormwater over his land. In the urban area, the responsibility lies with the local municipality. The objective in stormwater management is to be able to accommodate a 1:5-year storm in the residential areas and 1: 2 in the urban areas as contemplated in the Guideline for Human Settlements Planning and Design. The Water Act, 1998 (Act No. 36 of 1998) determines that flood lines should be indicated on development plans.

Flood line determination has been done in the past, but this information is outdated. The municipality is currently busy compiling a hydrological model to determine the latest flood lines on the rivers in Stellenbosch and Franschhoek for the urban area. It is a development condition for all future developments to do a flood-line determination.

7.3.8.3 Risk Mitigation – Drought Response Plan

Water is probably the most fundamental and indispensable of all natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Due to the threat of re-occurring droughts and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality implemented water restrictions to lower water consumption.

The success of this initiative is largely dependent on the consumer's cooperation in taking ownership of the new smart meter. The use of the water demand management device (smart meter) has been implemented nationally with huge success and a reduction in water losses.

The project is currently underway and has received a positive reaction from the community.

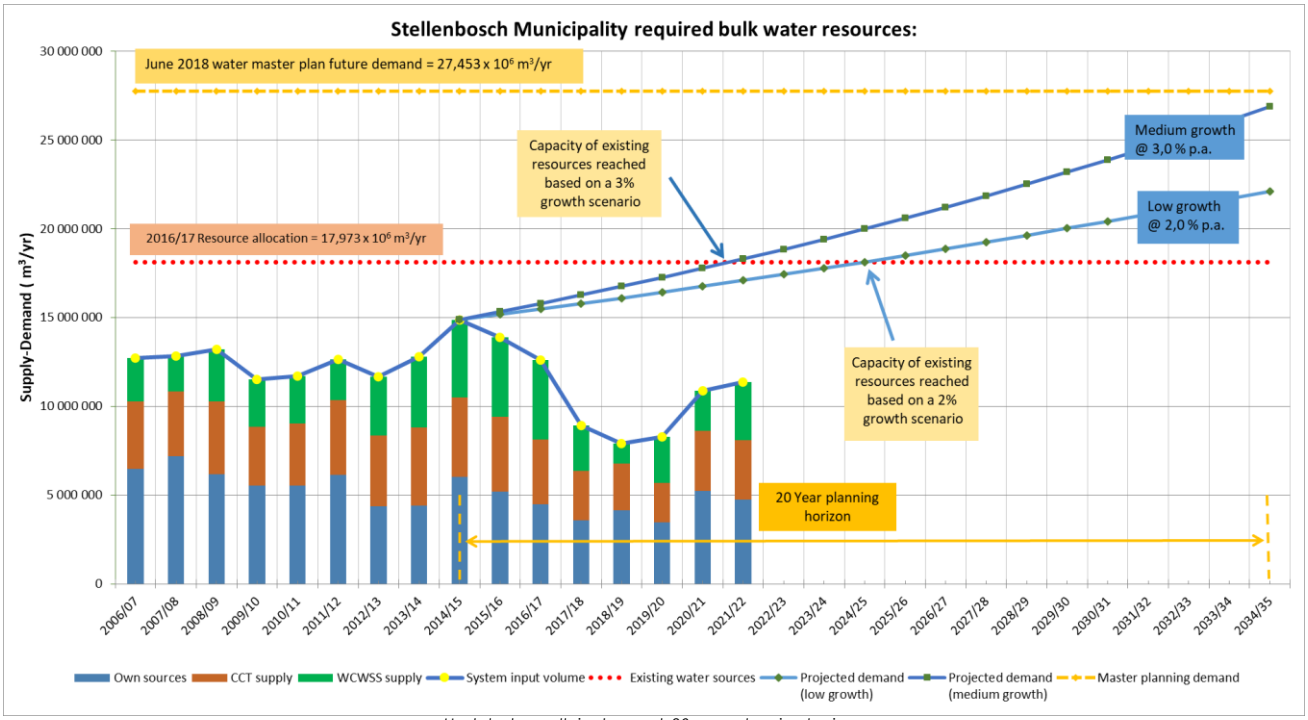
An update to the Water Services By-Laws will be undertaken in the 2024/25 financial year to be approved by the Council and promulgated. This will contribute to increasing the management and control of water and sanitation-related aspects within the municipality.

The following planning documents are continuously updated to include the latest planning: the Water Master Plan, Water Services Audit Report, and the Pipe Replacement Study and Model, and all projects and daily operations are done in line with the aforementioned studies and guidelines.

7.3.8.4 Backlogs in Water and Sanitation Services

A municipality as a Water Services Authority (WSA) has a duty to all its customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical, and sustainable access to water and sanitation services to promote sustainable livelihoods and economic development. To ensure this, it is important that the backlogs within the water and sanitation infrastructure be addressed. Backlogs could be defined in three broad categories:

- Backlogs regarding access to basic water and sanitation services. (Basic water and sanitation services in terms of national norms and standards);
- Conditional backlogs (lack of maintenance); and
- Capacity backlogs (increase in consumers).



7.3.8.5 Backlogs – Access to Basic Levels of Services

All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.

All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.

A sustainable type of water and sanitation facility needs to be provided to households with current service levels below RDP standards. Stellenbosch Municipality is committed to supporting private landowners as far as possible in addressing the current service backlog on farms.

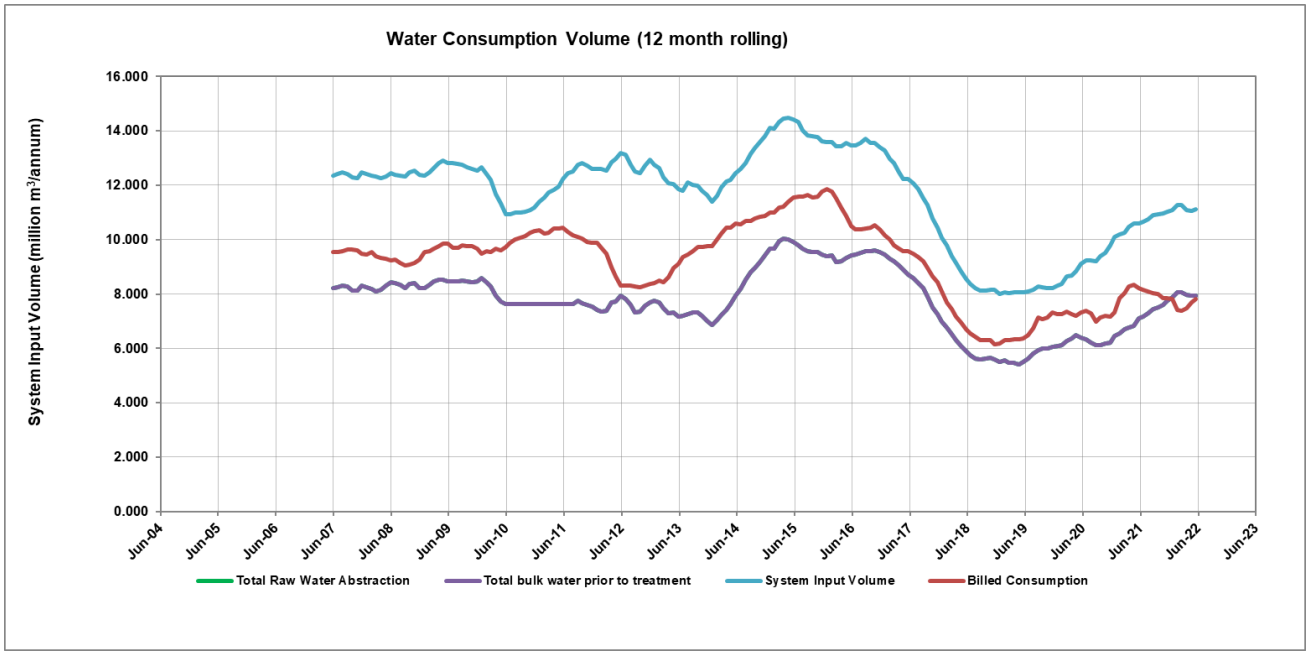
Figure 38: Water supply and accommodating growth (Total for WCO24)

Updated growth in demand: 20-year planning horizon

Detailed water balance and future water demand projection models were developed as part of the WSDP process to adequately plan for the augmentation of the existing water sources.
Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Based on the municipality's IWA Water Balance Sheet for the 2022/23 financial year, the municipality recorded 28.2% for "non-revenue" water, which is a decrease of 1.5 % from the previous financial year, and 13.3% for real network losses. The no-revenue water for the 2022/23 financial year is 28.2%, which is above the target set of 25%. The real physical network losses are 13.3%, which is below the best practice value of 15%.

Figure 39: Water Losses from July 2022 to June 2023



System input volume (SIV): Jul 2023 to Jun 2024 ; kL (water demand in reticulation system)				**10 862 620**	**100%**
Potable water	Authorised consumption 84.0%	Revenue water 71.8%	Billed metered	7 795 404	71.8%
			Billed unmetered	0	0.0%
		Non-revenue water 28.2%	Unbilled metered	0	0.0%
			Unbilled unmetered	1 330 637	12.2%
	Water losses 16.0%		Apparent losses	295 218	2.7%
			Real network losses	1 441 361	13.3%

Non-revenue water (NRW) ; kL	**3 067 216**	**28.2%**
Real network losses ; kL	**1 441 361**	**13.3%**

7.3.8.6 Borehole Drilling in WCO24

Part of the drought mitigation plan was to manufacture and install water purification plants in the Stellenbosch Municipality water networks at strategic positions. The containerised water purification plants treat water up to SANS 241 standards before it is included in the water supply networks. This water is, however, more expensive compared to our Ida's Valley WTP supply and is not used unless necessary.

Figure 40: Stellenbosch Bulk Water Consumption

7.3.9 Long-Term Water Conservation and Water Demand Management Strategy

A comprehensive Water Conservation and Water Demand Management (WC and WDM) Strategy which includes a 10-year financial plan, has been developed. The strategy has two goals. The municipality will:

- Prioritise the implementation of the WC and WDM Strategy; and
- Ensure ongoing planning, management, monitoring, and enabling environment.

This long-term WC and WDM Strategy was approved by the Council on Tuesday, 25 February 2014 and has since been implemented. Water Conservation and Water Demand Management (WC/WDM) are more cost-effective and have a lower environmental impact when compared with developing new sources of supply, provided there is scope for implementing WC / WDM measures. The payback period for the implementation of WC / WDM in this municipality is 3 years, which is considerably less than the 20 years that one would expect with major infrastructure projects. The updating of the long-term plan is underway.

The results of the successful implementation of the strategy are evident, with declining input volumes and lower water losses recorded since implementation started. The active Leak Repair Programme, the installation of the Water Demand Management Device, the active replacement of faulty water meters and the replacement of asbestos cement pipelines all contributed to below-average Real Network Losses and non-revenue water losses. It is, therefore, an effective way of delaying the development of infrastructure for new water resources and reducing the need to upgrade or construct new bulk water infrastructure.

WC / WDM involves measures which:

Figure 41: WC / WDM Measures

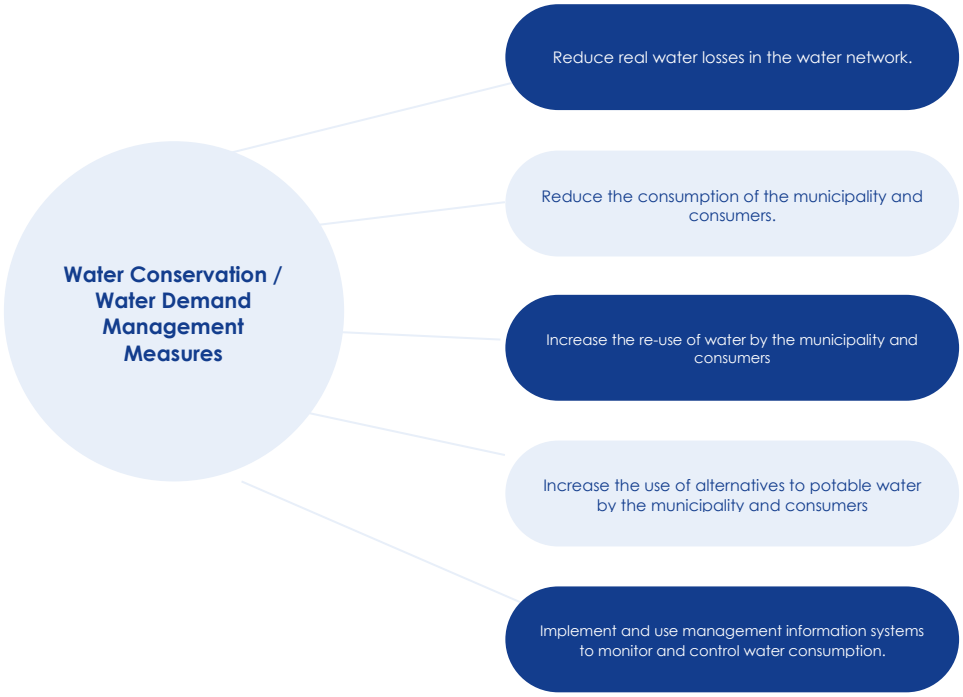


Figure 42: Stellenbosch Bulk Water input volumes

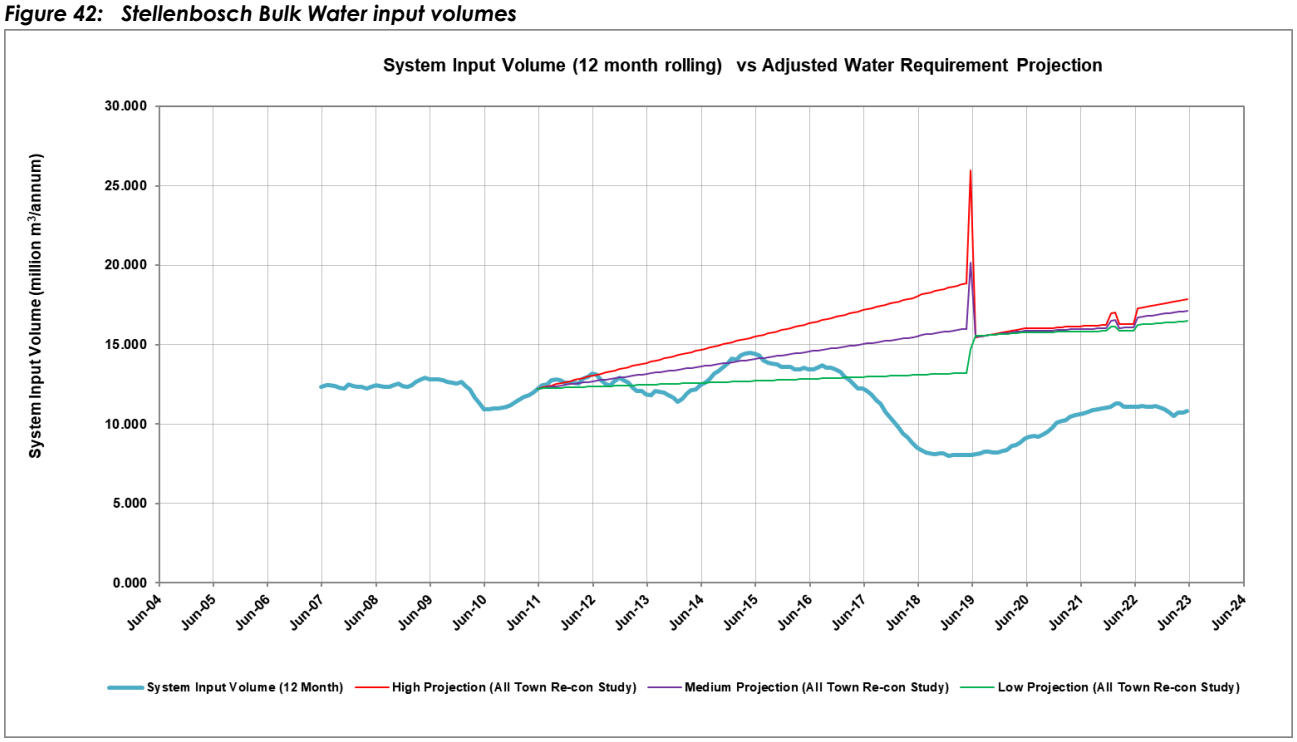

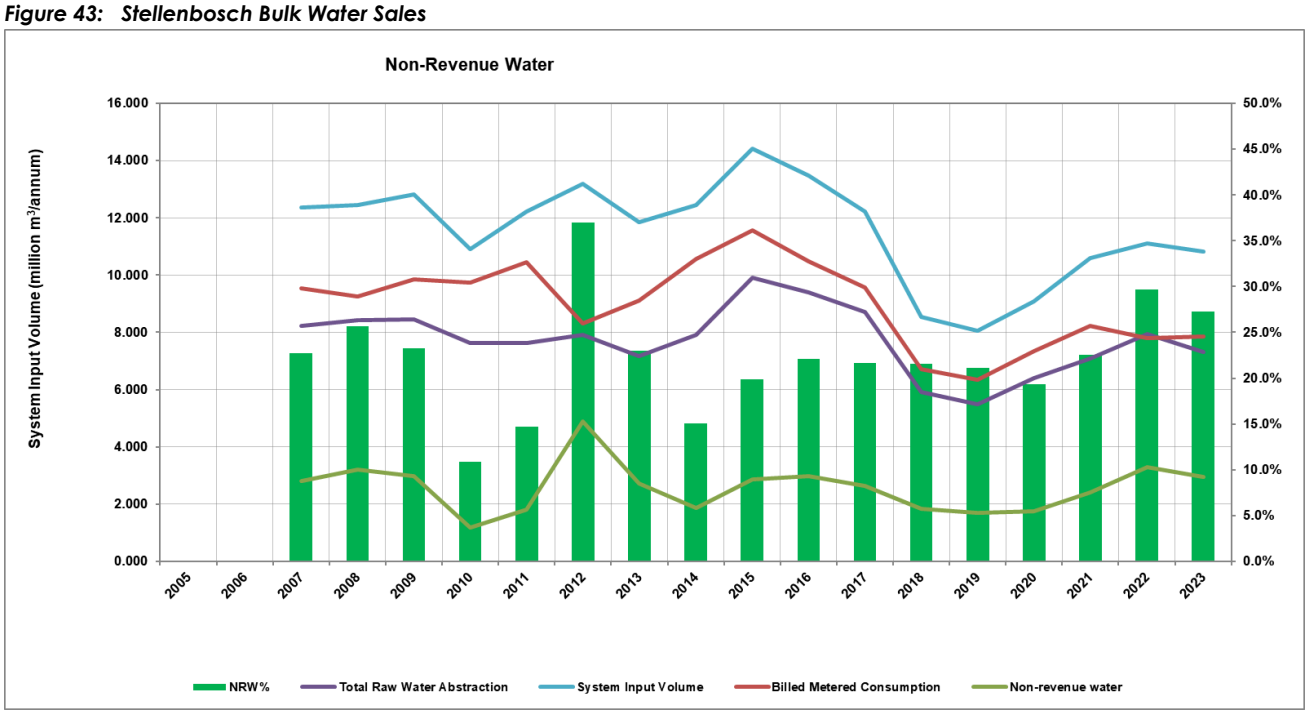

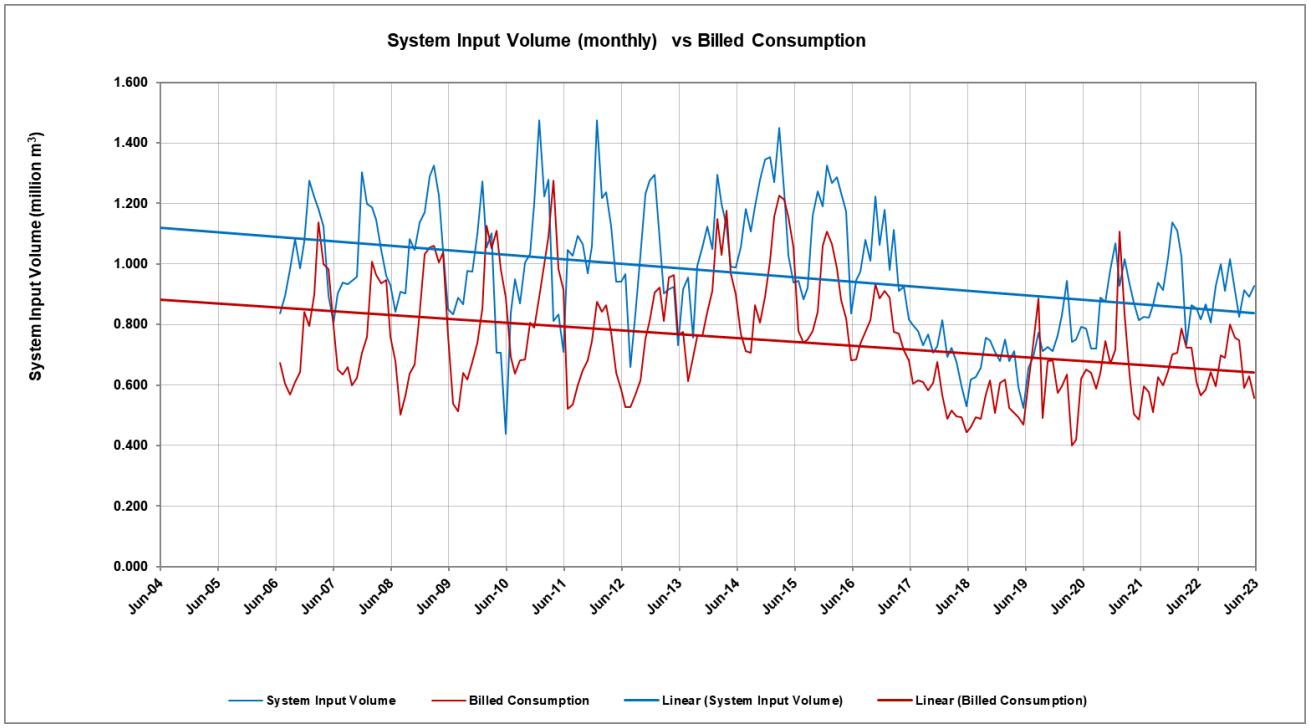

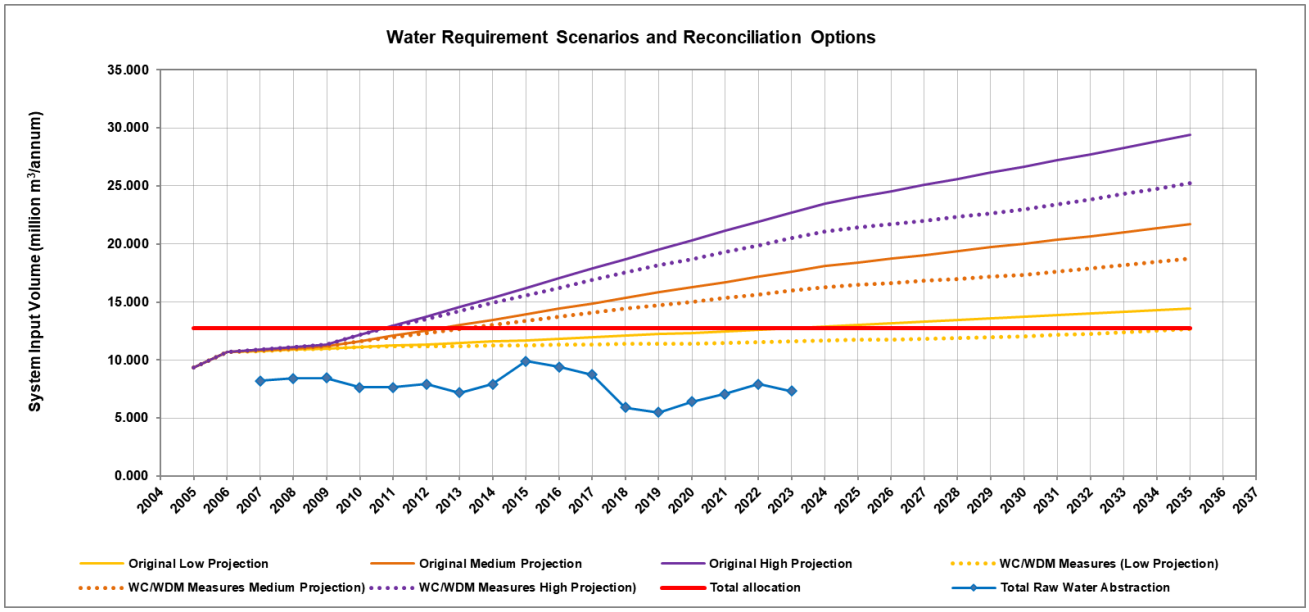

Figure 43: Stellenbosch Bulk Water Sales

The unrestricted growth in water demand versus the growth in water demand assuming WC and WDM are implemented as shown in the figure below.

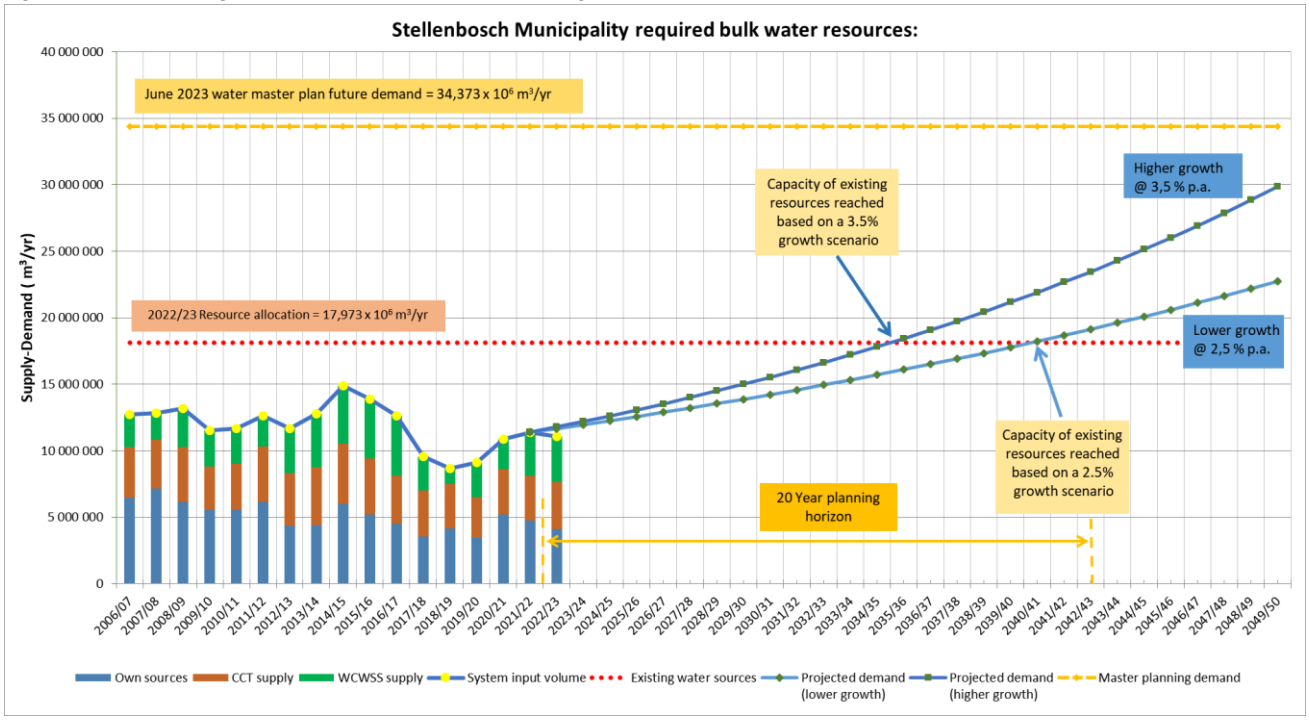

Figure 44: Unrestricted versus WDM growth in demand

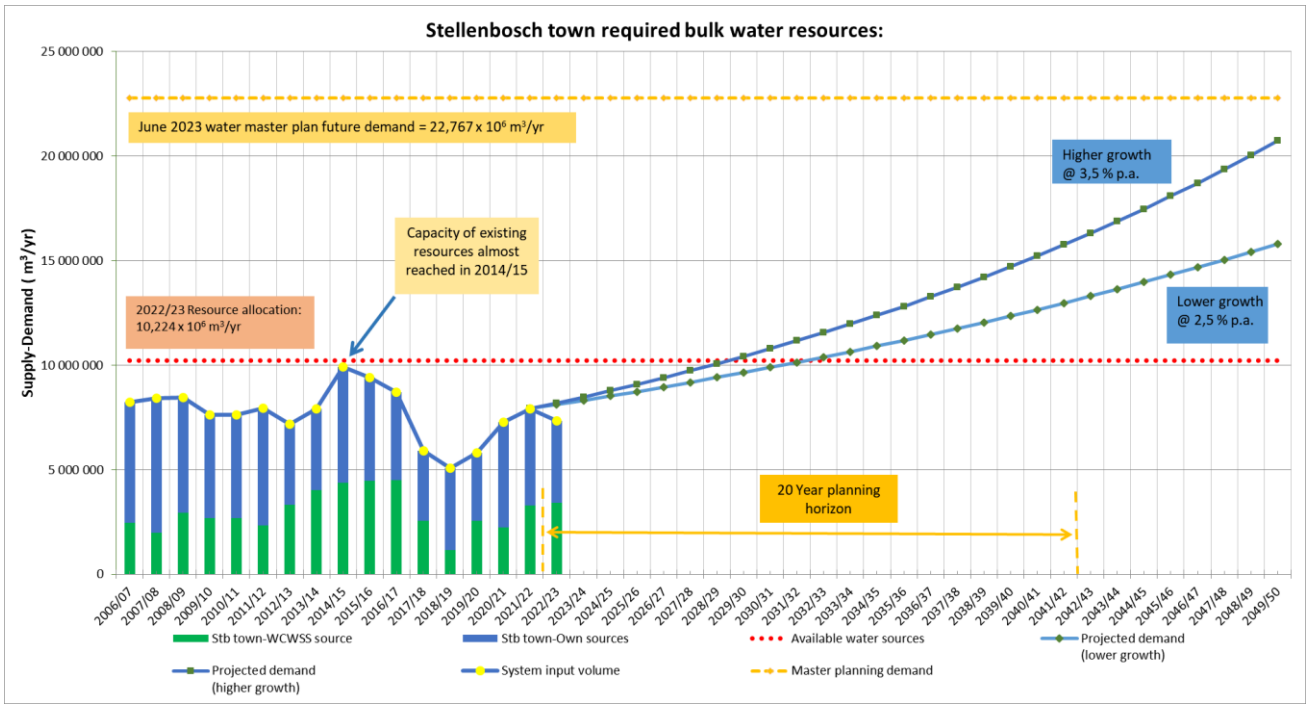


Note that each town in the municipality has water supplies independent of each other. When implementing WC / WDM in the municipality, it is critical to implement it in those towns where the existing supply will become inadequate for the demand as soon as possible. This will enable the municipality to delay the implementation of expensive infrastructure. The estimated budget required is about R80 million over 10 years.

The municipality embarked on a Drought Intervention Programme that accelerated and expanded some of the WC / WDM plans and programmes.

Figure 45: Updated growth in demand 20-year planning horizon

7.3.10 Safety and Security Strategy

The purpose of the Safety and Security Strategy is thus to reduce crime and increase safety through an integrated, multi-pronged approach. The strategy is revised annually to ensure that it remains relevant to the real challenges of the day. To this end, the municipality partners with a range of stakeholders ranging from the Western Cape Government, the Cape Winelands District Municipality, SAPS, and Stellenbosch University, as well as various private, public, and community-based safety and security organisations and institutions.

The Stellenbosch Safety Partnership (SSP) serves as an operational platform for safety and security entities to plan and operationalise enforcement plans. It's very important to break down barriers between departments and private organisations that have similar goals. Without an integrated, multidisciplinary approach that includes everyone, no strategy will work. This method has been shown to work in reducing crime. The SSP is open to any registered entity that contributes towards safety and security initiatives in the Stellenbosch Municipality.

The Stellenbosch Municipality has and continues to invest in and support neighbourhood watches (NHWs) and mobilise communities to support them. This includes direct assistance to NHWs to formalise their registration with the Department of Police Oversight and Community Safety (DPOCS) so that they can qualify for financial support and participate in sanctioned safety projects. The NHWs form a critical part of the community-based safety focus of the municipality in that they are located in the communities and understand the particular challenges faced by those communities. In addition to the support received from DOCS, the municipality continues to provide training for under-resourced neighbourhood watches and provides them with radios for swift and effective communication with the municipal control room as and when required. To achieve this, the following role players have been identified as key stakeholders and partners for success:

- South African Police Services (SAPS);
- Department of Community Safety (DOCS);
- Cape Winelands District Municipality (CWDM);
- Neighbourhood watches and farm watches;
- Community Policing Forums (CPFs);
- Private and corporate businesses;
- Private security companies;
- Winelands Safety Initiative (WSI);
- Department of Correctional Services (DCS);
- Department of Justice (DoJ);
- University of Stellenbosch (Campus Control); and
- Stellenbosch Municipality
  - Law Enforcement
  - Traffic Services
  - Fire and Rescue
  - Disaster Management.

Building collaborative relationships with our community stakeholders and highlighting the Council's commitment to maintaining strong partnerships with primary law enforcement agencies remains the foundation of ensuring safety throughout the Greater Stellenbosch.

The control room is fully functional and situated at the Stellenbosch Fire Department. The municipality still strives and will continue to, as part of the strategy, to provide a space where all safety and security stakeholders can jointly monitor and communicate with each other on safety and security matters. This includes the monitoring of municipal bylaw transgressions, criminal activity, emergency response in case of disasters, emergencies, and a range of other safety and security-related incidents.

One dedicated emergency number is available to residents within the municipal boundaries, which will mobilise all relevant units in response to alerts received on this number: **021 808 8999.** Additionally, the control room also monitors a dedicated WhatsApp number for general and safety complaints within the municipal boundaries of Stellenbosch. The WhatsApp number is **079 622 4722.**

All registered NHWs and security companies registered with the SSP have been and are in the process of being allocated space in the control centre.

Awareness initiatives have been and will continue to be launched as they contribute to making communities aware of crime prevention tips and other preventative tips, for example, fire safety and what to do in case of disasters. This will be a joint approach between role-players, supplemented based on crime patterns and situations experienced. Training will also be provided to enhance safety initiatives, for example, road safety (crossing of roads).

The Community Safety Forum (CSF) was approved by the Council on 30 March 2022. The CSF is a multi-stakeholder forum that will address matters of community safety and security in the WC024 area. The purpose of the CSF is to promote the development of communities in a safe environment and provide access to high-quality services at the local government level through multi-agency collaboration between the different spheres of government and communities. The CSF, as a multi-sectoral structure, would champion the coordination, integration, and implementation of crime and violence prevention and community safety initiatives. The CSF has three clusters, namely: Law Enforcement, Social Cohesion and Crime Prevention through Environmental Design.

Fire Services

The Stellenbosch Municipal Fire and Rescue section is dedicated to the provision of services that seek to safeguard the public against fire and other natural and man-made disasters and emergencies.

The role of the Fire and Rescue Services is to deal proactively and reactively with the following:

- The proactive provision of general fire safety guidance and assistance with respect to venues and their users;
- Protection and rescue of life and property from any threatening danger;
- Prevent the outbreak or spread of fire;
- Extinguish fire;
- Any other duties as stipulated in the Fire Brigade Services Act;
- Through the Department of Planning and Development and Building Department, consolidate initial structural damage assessments from other departments, conduct evaluations of structures, and support the efforts of property owners to address structural issues;
- Assist SAPS with inspections at licensed premises to combat illegal activities identified by crime intelligence;
- Determine slide (land) danger areas of informal settlements, oversee the direction, management, and cordoning off identified slopes, and stabilise;
- Activate the Disaster Management Unit in case of any life-threatening incident, for example, flooding, loss of residence due to fire, etc; and
- Conduct annual evacuation drills at designated buildings and premises.

Traffic Services

Stellenbosch Municipality has a legislative mandate to provide traffic services to the general public and its community and to ensure safe road usage in the municipal area. Traffic Services is committed to managing, controlling, and improving road safety in the municipal area by providing effective Traffic Administration and Traffic Law Enforcement services.

This will be achieved through the implementation of specific operational activities throughout the year, which focus on enforcement and education. The enforcement of public transport violations, speed violations, and sustained education at schools will be a specific focus for this year.

Another focus is also to improve the smart policing concept by optimally utilising technology for our officers, fine devices, and other policing techniques to provide effective and efficient services at our Motor Vehicle Registration and Licensing, Driver License Testing Centre, and our Vehicle Testing Centre.

The Traffic Management Plan contains the full spectrum of road safety programmes and projects across all functions, stakeholders, and users in WC024. The plan describes the various challenges to road safety and presents a range of action plans to address or mitigate these challenges.

Traffic Services is committed to:

- Ensure the road safety of all members of the community by providing quality traffic services in all its divisions (Traffic Administration, Traffic Law Enforcement, Licensing, Education and Accident Statistics);
- Reducing the accident rate, which will result in fewer fatalities and injuries;
- Increase the voluntary compliance of road users with respect to the rules, legislation, and regulations of the road;
- Improve management practises throughout all traffic services divisions; and
- Provide a safe environment by integrating best practices with internal and external agencies and role-players.

Traffic Services will focus on,

- Ensure the constant free flow of traffic;
- Enforcement of the National Road Traffic Act and the National Land Transport Act;
- To achieve a measurable improvement in road user behaviour, including the skill level of drivers, safer decision-making, and better regard for other road users;
- To reduce the incidence of traffic offences, including speeding, dangerous driving, drunk-driving, driving under the influence of a narcotic substance, dangerous overtaking, moving violations, etc;
- Parking enforcement / management;
- To ensure that un-roadworthy (including overloaded) vehicles are removed from the road;
- Point duty during the morning, midday, and evening peak at critical locations, during loadshedding, as well as school points;
- Special operations team to focus on driving under the influence of alcohol or drugs, illegal racing, and transportation of illegal substances;
- Road safety training and education are provided for crèches, nurseries, schools, primary / high schools, colleges, and universities, as well as for pedestrians, cyclists, farm workers, rehabilitation centres and youth groups. Training also includes learner's license programmes for youth and scholar patrol and level-crossing awareness;
- Events (road closures, escort duties);
- Public transport activities and checking of roadworthy status buses and minibuses;
- ANPR (automatic number-plate recognition) focusing on offenders with outstanding fines;
- Conducting driving and learner's license testing;
- Conducting driver's license conversions / renewals;
- Accepting and processing Professional Driving Permit (PrDP) applications;
- Conducting vehicle testing (all classes of vehicles); and
- Vehicle registration and licensing.

Law Enforcement

With the review of the Safety Strategy, the municipality has had to adapt to the changing environment of crime in its area and actively pursue closer working relationships with SAPS, private security, and neighbourhood watches active in the WC024 area to be able to make an impact. It is common knowledge that criminals become smarter and migrate from neighbourhood municipalities, which means that the municipality has to think smarter to always be one step ahead.

The municipality has completed all three phases of the action plan as identified during the previous review. This includes the installation of License Plate Recognition cameras (LPR) at all the main entrances and exits to Stellenbosch and Franschhoek towns. These LPR cameras are supplemented with additional LPR cameras within residential areas, which make it possible to track the direction of suspect vehicles linked to crimes picked up by these. The municipality continuously invests in CCTV to enhance safety. The municipality also has a CCTV Masterplan, which is a ''living'' document and is frequently updated based on needs identified concerning safety.

The use of neighbourhood watches to enhance public safety within the CBD's under the auspice of the "eyes and ears" project has assisted with crime prevention and is deemed to be a successful project.

The focus of Law Enforcement

- Effective monitoring and surveillance of CCTV cameras with reaction units to respond immediately;
- Establishment and implementation of the CBD Safety Project—a zero tolerance approach;
- Weekly operational planning with SAPS and safety partners;
- Amendment of the structure of Law Enforcement to accommodate identified needs;
- Establishment of a Tactical Response Unit (TRU);
- Strengthening coordination of communication strategies between neighbouring municipalities;
- Social Crime Prevention Strategies in conjunction with the Section: Community Development in terms of the Council's Street People Policy and Social Justice SOP;
- Consult with the CWDM in terms of sharing resources and information flow;
- Use of innovative technology to improve enforcement strategies;
- Compile a Security and Safety Camera Master Plan for WC024;
- Completion of the municipal control room, Joint Operating Centre (JOC);
- Issuing of radios to all neighbourhood watches to be able to communicate with and through the Stellenbosch Municipality control room (JOC);
- Provide training to neighbourhood watches;
- Implementation of the externally funded Law Enforcement (Rent-a-Cop) Policy; and
- Implementation of the Reservist policy.

7.3.11 Disaster Management Plan

The National Disaster Management Centre (NDMC) provided a set of guidelines, developed in terms of Section 19(a) of the Disaster Management Act, 2002 (Act No. 57 of 2002) (DMA) and Section 3.6 of the National Disaster Management Framework, 2005 (NDMF), that provide a uniform structure and checklist to organs of state to develop a Disaster Management Plan.

This plan confirms the arrangements for managing disaster risks and for preparing for and responding to disasters within the Greater Stellenbosch Municipality as required by the Disaster Management Act, 2002 (Act 57 of 2002).

SECTION 53(1) DISASTER MANAGEMENT ACT, 2002 (ACT NO. 57 OF 2002)

a) Prepare a disaster management plan for its area according to the circumstances prevailing in the area;
b) Coordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and
c) Regularly review and update its plan; and through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.

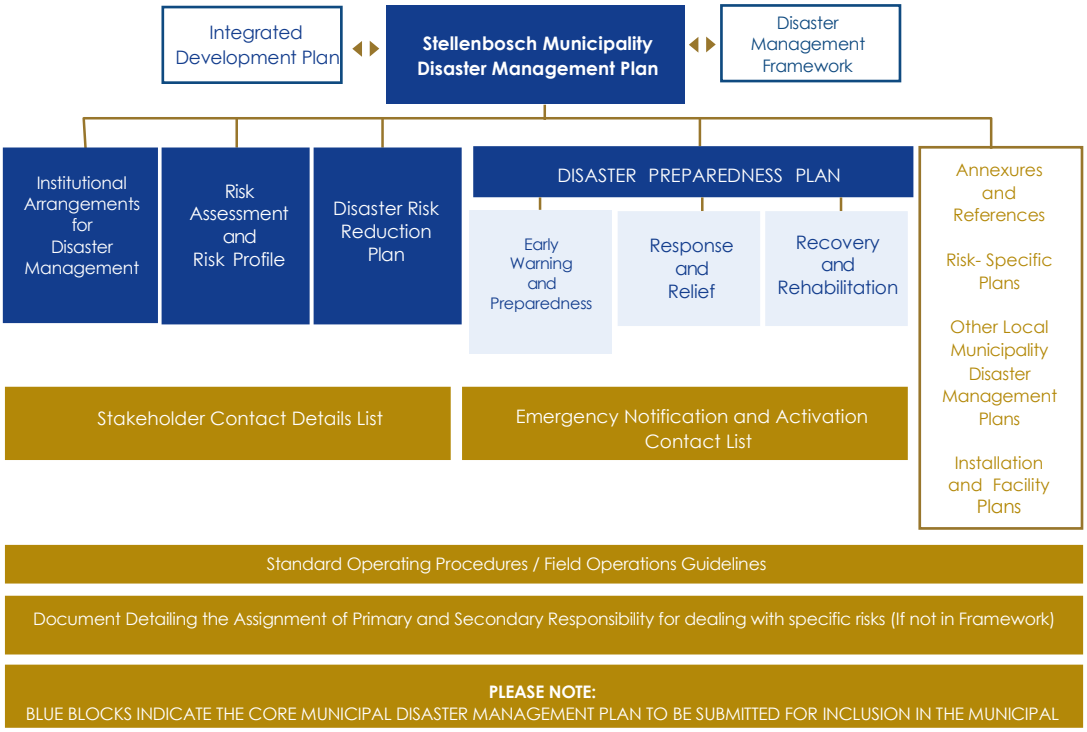
7.3.11.1 The Key Outcome of the Disaster Management Plan

The Disaster Management Plan (DMP) seeks to achieve the following key outcomes:

- integration of Disaster Risk Management into the strategic and operational planning and project implementation of all line functions and role-players within the municipality;
- resilient communities; and
- an integrated, fast, and efficient response to emergencies and disasters by all role-players.

7.3.11.2 Linkage to Stellenbosch Municipality's IDP

The MSA and the Disaster Management Act require the inclusion of the Disaster Management Plan into the Integrated Development Plan (IDP) of the Stellenbosch Municipality as a core component of the IDP document. However, it is not practical to include the entire Disaster Management Plan with annexures within the IDP of the Stellenbosch Municipality. Therefore, a summary of the key points is encapsulated in the IDP.



7.3.11.3 Linkage to the Disaster Management Framework of the CWDM

The Stellenbosch Municipality must prepare and execute its Disaster Management Plan within the Disaster Management Framework of the Cape Winelands District Municipality. The National, Western Cape Provincial, and Cape Winelands' frameworks guide the development of the municipal Disaster Management Plan and future versions of this plan.

7.3.11.4 Structure of the Disaster Management Plan

The municipal Disaster Management Plan of Stellenbosch Municipality consists of the components as indicated in the figure below:

Figure 46: Structure of Disaster Management Plan

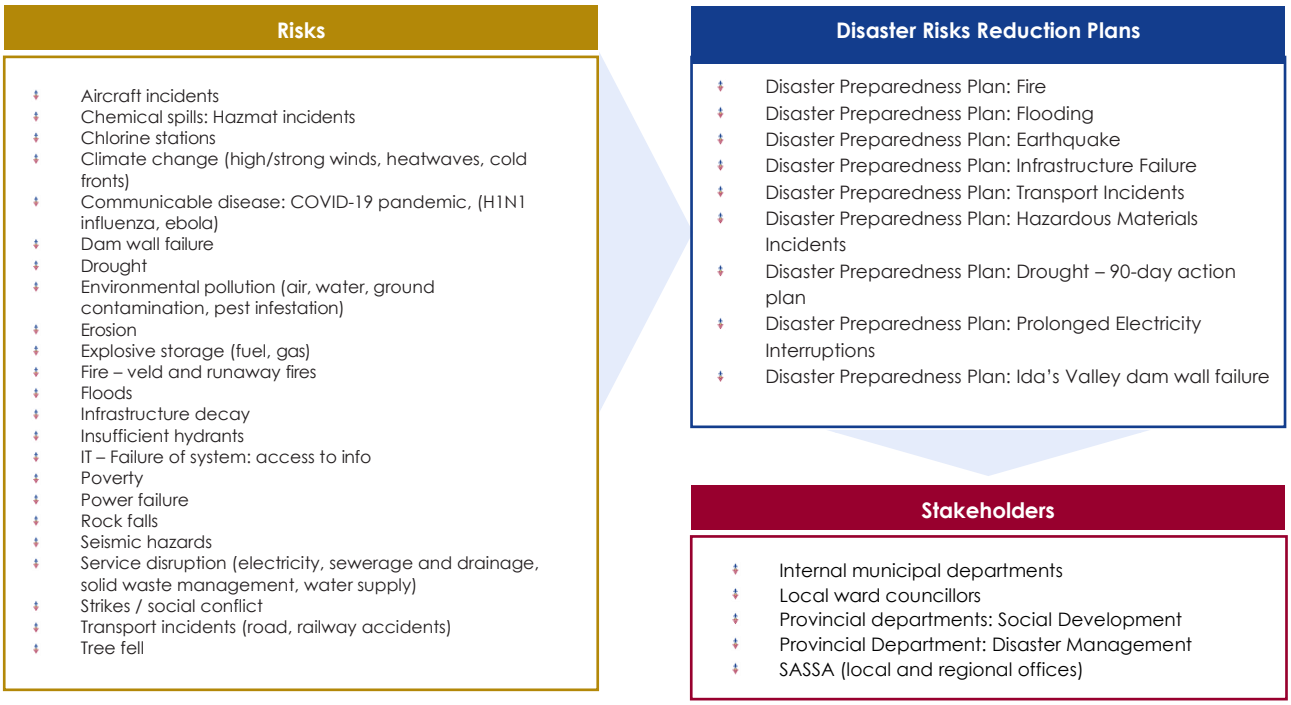
7.3.11.5 The Purpose of the Stellenbosch Municipality Disaster Management

The purpose of Stellenbosch Municipality Disaster Management is to ensure coordination of multi-disciplinary and multi-sectorial risk reduction through the integrated institutional capacity for disaster risk management, risk assessment, response and recovery, and implementation of measures aimed at:

- Preventing or reducing the risk of disasters;
- Mitigating the severity or consequences of disasters;
- Emergency preparedness;
- Rapid and effective response to disasters; and
- Post-disaster recovery and rehabilitation.

7.3.11.6 Risk assessment throughout WCO24

An all-ward-based Disaster Risk Assessment was conducted in collaboration with the Cape Winelands District Municipality to identify all possible hazards that could impact the community and environment of Greater Stellenbosch was undertaken and completed. As the environment is dynamic and constantly changing, so are the risks that affect our communities. In the period since the risk assessments took place, some of these risks would have been addressed by projects implemented by municipalities; however, new risks might have also emerged. Therefore, it is necessary to regularly review the risk assessments. Several risks were identified; however, six were identified as high-priority risks.



High-priority risks identified that pose a risk to the WCO24 are listed in the table below.

Table 50: High-Priority Risks Identified

High Priority Risks	Description of risks
A. Inability to control urbanisation	"Urbanisation: the increase in the number of people living in towns and cities, resulting in the growth of urban populations." Several disadvantages occur with rapid and unplanned urban growth. These disadvantages include, but are not limited to, poor infrastructure / inadequate housing, water and sanitation, waste disposal and pollution, and transport and healthcare services.
B. Increased poverty and unemployment	Poverty and unemployment directly correlate with the quality of life of the members of the community. The risk is exacerbated by the expansion of the informal sector and a low-skilled population.
C. Access to basic services	The lack of basic services results in major personal and environmental health concerns. Lack of formal electrical infrastructure results in structural fire risks within informal settlements.
D. Safety and Security	Human-induced hazards such as crime (which includes theft, robbery, rape, and murder), gangsterism, and alcohol and drug abuse remain one of the top hazards in most wards within the Stellenbosch municipal area.
E. Poor / no electricity	Inadequate electricity supply is not only a result of cable theft but also of continuing population growth, specifically within the informal settlements. Increased population growth leads to the increased erection of informal structures that require electricity. In most cases, electricity is obtained illegally through illegal electrical connections. Cable theft is becoming more common in larger parts of South Africa, and the Stellenbosch municipal area is not excluded from this phenomenon. This hinders the operations of businesses, households, and transportation systems.
F. Illegal dumping	Illegal dumping poses great environmental and health risks. Not only are these locations where infectious diseases spread, but they also attract unwanted pests such as cockroaches, mice, and rats. In most cases, illegal dumping occurs in highly populated informal settlements due to a lack of proper and frequent waste disposal.

The figure below illustrates the types of disasters that pose the highest risks within the area of the Stellenbosch Municipality, the disaster risk reduction plans, and stakeholders in the event of a disaster. The municipality engages on numerous platforms by partnering with stakeholders to gain access to new resources, information, expertise, and skills to facilitate service delivery.

7.3.12 Local Economic Development Strategy

Local Economic Development (LED) is not an explicit municipal function as defined in the Constitution of the Republic of South Africa, 1996. Instead, it is an obligation imposed on local government in terms of sections 152 and 153 of the Constitution that stipulates the objectives of local government are to promote social and economic development within its financial and administrative capacity.

Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction and should play the leading role in municipal sector planning.

The focus on individual economic sectors and spatial planning as the key focus areas, rather than on social and economic development results tends to delink economic growth benefits (increase in indicators like GDP, per capita income, etc.) into local economic development benefits (improvement in the life expectancy rate, infant mortality rate, literacy rate, and poverty rate).

Local economic development is the means of systematic identification, development, and utilisation of economic opportunity to benefit local businesses and create opportunities for local communities to improve the lives of residents.

The growth of the informal economy reduces the demand for jobs while increasing the number of entrepreneurs and potential contributors to private sector demand.

The health of the entire economy is important. The economy does not divide neatly into the 'formal sector' and the 'informal sector'. Rather, the different sectors, such as manufacturing, tourism, services, and construction, are on a continuum that has a more formal and a more informal end.

The great challenge to local government, in its support for economic development, is to enable job opportunities at different points along the continuum while ensuring health and safety, orderly planning, and management. All work, whether on the more formal or more informal ends of the continuum, has to be valued, especially when unemployment is high and when there is a highly probable link between unemployment and crime. The number of people relying on the informal economy for work can and will increase, while the formal economy struggles to grow and make meaningful progress in global markets.

Given the above, local economic development is therefore a multi-stakeholder effort in support of creating economic opportunities for both the private sector and the local community.

7.3.12.1 Strategic approach

The strategic approach to LED in general is to create economic opportunities for all citizens residing in the Stellenbosch Municipal Area. It is imperative that the municipality, in partnership with role players in society, review its strategy going forward to ensure better resilience in its economy to deal with future challenges and contribute towards better livelihoods for all.

Technology changes, especially connectivity, have become more important for businesses and the government to do business. This was highlighted by the lockdown experience that forced the municipalities to work remotely.

The following ways of doing business must be seen within the context of the "new normal":

- To maximise prospects for sustained economic growth, stakeholders must be permitted to strengthen their competitiveness and collaboration within the local business environment.

Networking, local government responsiveness to business needs, effective service delivery, and business-oriented organisational structuring will be used to address this aspect;

- New business development or investment and expansion of existing businesses will be actively promoted, as the consequence of increased investment more often than not resulting in new jobs and local economic growth. Spatial development framework planning, the Integrated Zoning Scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect;
- It appears that the formal economy is rapidly becoming more informal, as seen in the increase in the number of occupational practices and businesses run from residential premises. The informal economy offers diverse opportunities for absorbing those who have lost their jobs and for new entrants into the economy. The integrated zoning scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect;
- Create an enabling environment. An enabling environment refers to "a set of policies, institutions, support services, and other conditions that collectively improve or create a general business setting where enterprises and business activities can start, develop, and thrive." Spatial Development Framework planning, the integrated zoning scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect; and
- The formal and informal parts of the economy are mutually interdependent. The good health of one depends on the good health of the other. It is difficult to promote the growth of smaller enterprises if the overall rate of economic growth is slow. Dedicated networking projects to create opportunities for the informal economy to contribute to the demands of the formal economy will be used to address this aspect.

7.3.13 Community Development Strategy

Moreover, Schedules 4b and 5b list the functions of local government to include the following, which have relevance to community development functions:

- Childcare facilities;
- Building regulations (concerning SANS 10400S);
- Municipal Planning (concerning ECD registration applications and provisions to be made for social infrastructure, inclusive of education and health services);
- Municipal public works (accessibility);
- Local amenities (concerning the contribution to social development);
- Local sports fields (regarding their contribution to social development);
- Municipal parks and recreation (regarding the contribution to social development); and
- Municipal roads (accessibility).

INTERGOVERNMENTAL RELATIONS FRAMEWORK ACT, 2005 (ACT NO. 13 OF 2005) (IGRFA)

The IGRFA, which defines the relationship between the three spheres of government and facilitates coordination in the implementation of policy and legislation, includes coherent government, effective provision of services, monitoring implementation of policy and legislation, and realisation of national policies. Because these services are primarily provided by the national and provincial spheres of government but significantly affect local communities and residents, this department / function plays a pivotal role.

LOCAL GOVERNMENT: MUNICIPAL SYSTEMS ACT, 2000 (ACT NO. 32 OF 2000) (MSA)

The MSA further demonstrates in Chapter 4 the mandate of the municipality to develop a culture of community participation (16(1)(b)) in order to contribute to building the capacity of— (i) the local community to enable it to participate in the affairs of the municipality (networks and forums) and must do so with specific emphasis on the inclusion of (17(2)) the specific needs of (a) people who cannot read or write; (b) people with disabilities; (c) women; and (d) other disadvantaged groups.

The White Paper on Local Government (1998:23–26) identifies four interrelated characteristics of the role and function of local government related to community development:

- Maximising social development and economic growth: The role and function of the local government are to promote the development of communities so that the basic needs of the poor and vulnerable are met. It involves the regulation of service delivery. This means that the local government is not directly responsible for services but rather takes steps (i.e., strategies) to encourage good service delivery that addresses the specific needs of the specific community. It could therefore be viewed as a facilitation role. Partnerships between organisations could be encouraged, training opportunities could be provided, and facilities could be developed to support existing service providers in the community;
- Integrating and coordinating: Coordination should include national and provincial departments, trade unions, community groups, and private sector institutions. "Developmental local government must provide a vision and leadership for all those who have a role to play in achieving local prosperity." An IDP could contribute to proper coordination;
- Democratising Development: Local Government practices should be aimed at the involvement of "…citizens and community groups in the design and delivery of municipal programmes".

Coordination should lead to democratic "…leadership, encouragement, practical support, and resources for community action." Another key aspect is that democratic development should aim to involve all community groups; and

- Leading and learning: Community development should lead to networks, partnerships, and coalitions. To this extent, a Memorandum of Understanding (MOU) was signed with DSD.
- It includes training opportunities and awareness programmes. The ultimate aim is to empower communities and create opportunities for sustainable change and growth. The emphasis is therefore on capacity building within communities.

The above characteristics are aimed at improving service delivery within the constraints of available resources. As mentioned before, partnerships with businesses and non-profit organisations (NGOs) become a key aspect of this developmental model (White Paper on Local Government, 1998:35). These services are aimed at specific vulnerable groups, and social issues are also highlighted in policy documents.

Further to the above, the department gives effect to the strategic goal of Dignified Living in the IDP of Stellenbosch Municipality through:

- The implementation of critical key performance areas and processes associated with the creation of a conducive environment for community / social development, forging relations with national, provincial, and local stakeholders, and the generation of current social data; and
- The development of six vulnerable groups (youth, gender, children, elderly, people who are homeless, and people living with disabilities) within the municipal area through strategy and policy development and monitoring and reporting on the intended goals of the department's key performance areas.

7.3.14 Human Resource Strategy

High quality and a responsive Stellenbosch Municipality, with a focus on skills identification, supply, demand, retention, employability, and social mobility, is essential if the municipality is to realise its IDP ambitions. As such, Stellenbosch Municipality needs to be pre-emptive in terms of its human resource requirements and more responsive to service delivery improvement and best practices. The strategic role of Human Resource Management and Development (HRM&D) is ultimately to facilitate performance improvement through people. The table below provides a clarification of roles and involves the following:

- Understanding the business environment within which HRM&D operates;
- Partnering with management in effective people practices;
- Enabling change and transition;
- Engaging constructively with internal and external stakeholders' groups; and
- Delivering service-level commitments.

Table 57: Clarifying the role of HRM&D vis-à-vis Manager and employees

HRM	Line Managers	Employees
• Develops HRM&D strategies, principles, policies, and procedures in line with business requirements. • Ensures consistency and standardisation of processes and practices across the municipality. • Provides expert advisory services. • Ensure the application of appropriate best practice HRM&D service. • Partners line management in effective people practices • Enables change and transition. • Facilitates the assimilation of culture and values. • Build the capacity of line managers to effectively manage people. • Ensure good corporate governance around HRM&D practices. • Delivers on service level agreements. • Measures and reports on the effectiveness of HRM&D services within the municipality. • Interaction and negotiations with trade unions and feedback.	• Partners with HRM&D in developing and implementing HRM&D strategies to achieve results. • Manage people according to HRM&D principles, policies, and procedures. • Complies with HRM&D legal requirements. • Proactively engages and partners with HRM&D around business and people challenges and solutions. • Initiate and lead change. • Drives the organisational values. • Takes responsibility for being informed of HRM&D matters and building their own people management skills. • Follows fair and procedural HRM&D practices and processes. • Ensures high performance through effective performance management and retention practices. • Communicates and gives feedback on service level expectations. • Tracks and measures the impact of HRM&D strategies in functional areas. • Measure and report on the effectiveness of people management within functional areas.	• Partners with line and HRM&D to: • Remain relevant to local; government by taking responsibility for own performance development and career planning; • Taking advantage of appropriate opportunities for development; • Remain informed of HRM&D policy and procedure; • Discuss expectations; • Take personal accountability for and support change initiatives; • Live the organisational values; • Participate in HRM&D surveys and feedback mechanisms; and • Provides feedback to / and liaises with Unions and relevant employee forums.

This HRM&D Framework provides Stellenbosch Municipality with the structure to plan, implement, monitor, and improve its HRM&D standards. This framework does not operate in isolation and will be central to all activities involving the human resources of Stellenbosch Municipality. It is, therefore, not an HR document but must be "owned" by the Council, management, staff, and trade unions. Since the field of HR management is a dynamic discipline, it is envisaged that this framework will change and develop over time to reflect the realities of the municipality's environment.

Table 58: Key Strategies

Strategic Focus Area (SFA)	Key strategies	Alignment with HR Standards
SFA 1: Valley of Possibility	Ensuring that infrastructure and service planning and resourcing occur sustainably over the long term and draw on the expertise of other service delivery agencies, the private sector, and the university.	Strategic HR Management.
SFA 2: Green and Sustainable Valley	Focusing more strongly on the environmental planning and management function, including appropriate resourcing.	Strategic HR Management. Talent Management. Learning and Development.
SFA3: Safe Valley	Securing adequate permanently employed HR, facilities, and equipment (specifically fleet) to undertake the specialist functions of traffic management, fire and rescue services, and disaster and event management on a 24/7 basis and to comply with legal standards. Establishing adequate, integrated law enforcement capacity is present in every ward of the municipality.	Strategic HR Management. Learning and Development.
SFA 4: Dignified Living	Ensuring the delivery of a comprehensive range of services to vulnerable groups and the coordinated cooperation of service providers at all levels in the delivery and management of services to these groups.	Learning and Development.
SFA 5: Good Governance and Compliance	Ensuring that functional areas have the capacity and readiness to deliver services in terms of short-, medium-, and long-term objectives and targets. Ensuring that all staff have the opportunity for leadership development within their functional areas and municipal management generally. Ensuring regular performance management of staff at all levels within the organisation. Undertaking strategic planning for the longer and shorter terms, the municipality, and local areas Implementing regular auditing of processes. Celebrating excellence in service delivery, both external and internal to the municipality. Renewing intergovernmental efforts to establish a municipal court in Stellenbosch.	Strategic HR Management. Talent Management. Learning and Development. Performance Management/ Reward and Recognition. Strategic HR Management. HR Risk Management. Reward and Recognition. Talent Management.

7.3.15 ICT Strategy

7.3.15.1 Background

Information and Communication Technology (ICT) Systems and Services are playing an ever-increasing role as a strategic enabler of organisational transformation and service delivery in the public sector. There is also a growing acknowledgement at the corporate governance level that ICT services and systems form an integral part of the municipal service delivery value chain.

The continuous alignment of ICT services and systems with the strategic goals and objectives of the municipality, as well as statements of direction from the National Government and the Western Cape Provincial Government, impose major challenges on the Department: ICT and its resources.

This document aims to articulate and describe changes in the Stellenbosch Municipality's ICT Strategy with the view of ensuring alignment with the municipality's strategy. The emphasis is placed on identifying the municipality's new requirements and opportunities for information and communication technology to move towards meeting the ICT-related requirements of the municipality and management. The municipality intends to review and update the ICT Strategy for approval in the 2023/24 financial year.

The successful implementation of the municipality's IDP and the achievement of its strategic objectives are highly dependent on several critical enabling resources to be managed effectively to support the IDP, including finances, human resources, and information technology.

The achievement of the strategic objectives of the municipality's IDP is indirectly dependent on various information technology services, without which the core and supporting functions of the municipality will not be able to operate. The vital ICT-related services include:

- Provisioning of Municipal Financial Management and Payroll Management software applications;
- Hosting of the municipal website;
- E-mail and internet services;
- Data storage;
- Data recovery;
- ICT planning;
- Provisioning of the network, wireless networks, and telephony services;
- End-user support for the ICT environment;
- Disaster Recovery Management;
- Business Continuity;
- ICT Risk Management;
- ICT contract management; and
- Public Wi-Fi.

7.3.15.2 The Mission and Vision of ICT

ICT's mission is to deliver cost-effective ICT infrastructure and ICT business solution services that will provide the most enabling environment to assist the Stellenbosch Municipality in delivering sustainable services that are operationally efficient and cost-effective to all its stakeholders and communities, which includes:

- Cost-effective solutions;
- Quality Service Delivery;
- Ongoing performance monitoring; and
- Aligned to business processes.

The vision of the ICT Department is to become a trusted and reliable information and communication technology partner to enable Stellenbosch Municipality's management and end-users to build a better town using cutting-edge ICT technology solutions.

7.3.15.3 Success Factors to Adopt in getting closer to the community

The Department: ICT will continue to strive to achieve its goals of closing the gap between the municipality and the community by improving services and engagement. These goals include:

- Understanding the needs of the community;
- Always deliver a consistent and quality service; and
- Manage the relationships with vendors and stakeholders providing a service to the public.

CHAPTER 8:
Council Term Projects 2022 – 2027

8.1 Smart City

As cities compete for global investment and talent in efficient cities with fewer red tape barriers, ICT competitiveness comes centre stage. A smart city is adaptable to change and demands that emanate from growth and, in response, applies information and communication technologies to enhance performance and urban services to respond to demand while reducing consumption, waste, and costs. Smart cities need to capitalise on digital technology to facilitate the speed of information, support more efficient delivery of goods and services, and contribute to the greater vibrancy of cities.

A smart city is a municipality that uses information and communication technologies to increase operational efficiency, share information with the public, and improve both the quality of government services and citizen welfare.

8.1.1 Guiding Principles to create inclusive smart cities

For a smart city to be inclusive, it should adhere to six interdependent principles. The principles provide guidance when decisions must be made regarding the identification, planning, and implementation of smart initiatives and technologies.

Decisions on the nature and purpose of a smart initiative or technology should be guided by the following principles:

1. It should be smart for all;
2. It should use technology as an enabler rather than a driver;
3. It should be shaped by and respond to the local context;
4. It should be informed by the real needs of the community;
5. It should embrace innovation, partnership, and collaboration; and
6. It should be sustainable, resilient, and safe.

8.1.2 A smart city as a holistic ecosystem

Global best practices recommend three primary categories when determining the benefits and priorities for the design and implementation of the smart city roadmap. The smart city roadmap includes the following:

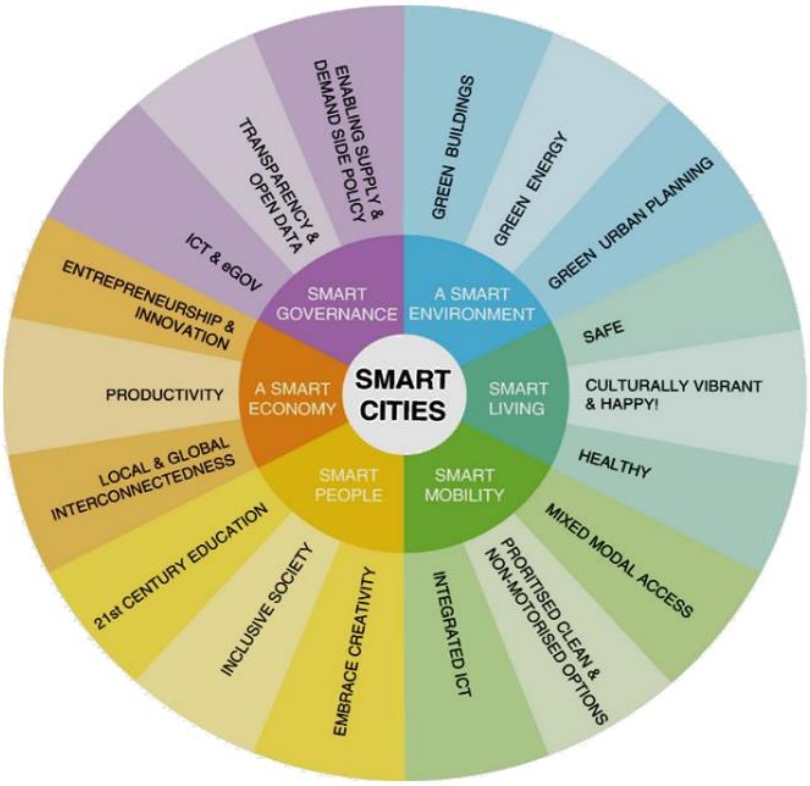
Smart Governance

Transform the institutional systems, processes, and organisational structure into one of the high-performance organisations to effectively deliver basic services.

Smart Livelihood

Implementation and integration of innovative digital platforms to enable social upliftment.

Smart Economy



Grow and diversify the local economy through the attraction of new investment, skills development, and facilitation of an enabling environment for small business growth and job creation.

8.1.3 The Nature and Purpose of a proposed smart city initiative

The implementation of smart city initiatives should be guided by a clear understanding of the nature and purpose of the proposed interventions. These initiatives could be focussed on benefitting different target services in municipal-driven smart city initiatives, addressing the needs of the entire city (municipal area). Smart City initiatives should be aimed at improving the lives of the people residing in the city, especially in the different services that are delivered to the residents in the municipal area.

Smart city initiatives can be placed within a specific smart city theme, the figure below indicates the different smart city themes:

Figure 48: Smart City components and initiatives

Source: A South African Smart Cities Framework

Realising the goal and implementation of smart city initiatives will require the collaboration of internal and external stakeholders. Within the next five years (2022 – 2027), Stellenbosch Municipality will emphasise smart governance with a focus on e-governance. The aim is to formulate a Smart City Framework for approval by the Council in the 2023/24 financial year.

The purpose of the Smart City Framework will be to guide decision-making and provide internal stakeholders with a structured framework when identifying, planning, and implementing smart city initiatives that are appropriate to the theme of smart governance.

The legacy projects will be undertaken by the administration and political leadership, which will remain applicable for the duration of the political term under the leadership of the Executive Mayor and the respective portfolios of the Mayoral Committee Members.

8.2 Political Leadership: Five–Year Plans

8.2.1 Executive Mayor

In developing the proposed 2nd Amendment of the 5th Generation IDP 2022 – 2027, the Stellenbosch Municipality ensured proper alignment and integration with the IDP, Budget, SDF and sector plans. There is no fundamental shift in the outstanding projects / programmes and initiatives that were planned in the 5th Generation IDP 2022 - 2027.

The 5th Generation IDP 2022 – 2027 will be the Municipality's road map for the next five years and track the progress on the implementation of projects / programmes and initiatives. It is an exciting journey in working together with the administration, communities, and other spheres of government in making greater Stellenbosch a valley of opportunity. For this to happen, the following mayoral outcomes for the period 2022 – 2027 have been set and are reviewed on an annual basis.

Mayoral Outcome 1: Clean, accountable, and responsive local government;

Mayoral Outcome 2: Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area;

Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers;

Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements and mixed-use developments);

Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpies across the municipality area;

Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth;

Mayoral Outcome 7: To create safer environments in our communities;

Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation;

Mayoral Outcome 9: Alternative Energy.

8.2.1.1 Mayoral Outcome 1: Clean, accountable and responsive local government

8.3 Mayoral Portfolios

The mayoral portfolios are a tool for the Executive Mayor to use to reach the mayoral goals for 2022 – 2027. In support of the mayoral outcomes, each portfolio has set performance-based strategic priorities that are aligned and will give effect to the mayoral outcomes. The performance-based strategic priorities for the 1st Review of the 5th Generation IDP 2022 – 2027, have a focused approach on the implementation of the strategic projects / programmes and initiatives with set targets and time frames.

The following portfolio performance-based implementation plans are listed below:

1. Portfolio: Human Settlements;
2. Portfolio: Rural Management;
3. Portfolio: Youth, Sport, and Culture;
4. Portfolio: Planning, LED, and Tourism;
5. Portfolio: Community Services;
6. Portfolio: Financial Services;
7. Portfolio: Protection Services;
8. Portfolio: Corporate Services;
9. Portfolio: Infrastructure Services; and
10. Portfolio: Parks, Open Spaces and Environment.

8.3.1 Portfolio: Human Settlements

CHAPTER 9:
Public Interest and Expression of Needs

9.1 Community Participation

Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) requires municipalities to create a culture of community participation. According to Section 16(1)(a)(i) of the MSA, "A municipality must develop a culture of municipal governance that complements formal representative government with a system of participatory governance and must, for this purpose, encourage and create conditions for the local community to participate in the affairs of the municipality, including in the preparation, implementation, and review of its integrated development plan in terms of Chapter 5". It is therefore essential to have effective public participation structures in place.

The SDF, IDP, Budget, and sector plans, as well as major municipal policies, by-laws, and decisions, should be engaged to ensure that they are designed and implemented for and with the community. This also adds to the credibility of the needs reflected in the IDP, the Budget calculated to address these needs, and the SDBIP drafted to implement programmes and projects that reflect the communities' needs.

The growing trend of mature and constructive discussions from the public, the level of complexity, and the investment made in understanding the municipality's business are encouraging. The direct participation and involvement of the ward councillors, communities, and stakeholders in the identification of ward-based priorities and their involvement in the public participation process have added great value to the maturity and quality of the discussions between the public and the municipality. Ward councillors are a critical link in connecting the municipality with the public. As members of the Council and recipients of all the decisions taken by the Council, it positions Councillors strategically to ensure that the municipality not only understands the needs of the community better but also to provide the public with honest and accurate feedback on the municipality's initiatives. These endeavours are supported by well-functioning ward committees. Councillors are, however, encouraged to always adhere to the code of ethics for councillors and to always act with the utmost integrity and accountability towards their constituents and the municipality, as this is the only way in which to form a responsible local government.

Public participation takes place through various means and platforms and is often tailored to suit a specific audience or community. Importantly, communities from different socio-economic backgrounds use different platforms to communicate. It is important to cater for all scenarios and to utilise all available platforms to their optimum potential, given that a certain degree of apathy exists in certain communities.

The maturity level that the public participation process has achieved during the COVID-19 pandemic has reached new heights for both the community members and the administration. Further feedback will be provided on the comments captured in written submissions made via the various platforms created for public participation. To ensure that the public participation process is a two-way process, all comments have been carefully considered and discussed with internal departments.

9.2 Public Participation in the drafting of the 2nd Review of the 5th Generation IDP 2022 – 2027

Stellenbosch Municipality implemented a IDP Open Days from **04 September - 04 October 2023** during the analysis phase to determine the needs of the community in developing the 2nd Review of the 5th Generation IDP 2022 – 2027.

A notice was published in the local newspaper and on the municipal website to announce the start of the public participation process for the development of the 2nd Review of the 5th Generation IDP 2022 – 2027. At the start of the process, a link to an **electronic submission form** was made available on the municipal website, the Stellenbosch Citizen App, and broadcast via WhatsApp, Facebook, and email. Have Your Say forms were made available at the ward office, municipal libraries, and satellite offices.

Members of the community and other interested and affected parties were encouraged to attend the IDP Open Days for their ward / area. The IDP public participation Open Days severed as a one-stop municipal desk for the community to get information on municipal services and to have a one–on–one discussion with municipal departments of their choice to raise their community needs and ask questions. Community members were encouraged to visit any of the IDP Public Participation Open Days at the various specified venues. The concept of the open days was more of a decentralised meeting at the various service desks that were set – up per directorate. The IDP Open Days were implemented per area; for example, Wards 1 and 2 were clustered as one (1) area. No registration of indigent customers, housing demand, or unemployment databases was done on the open days, but information on these services was shared with communities at the service desk.

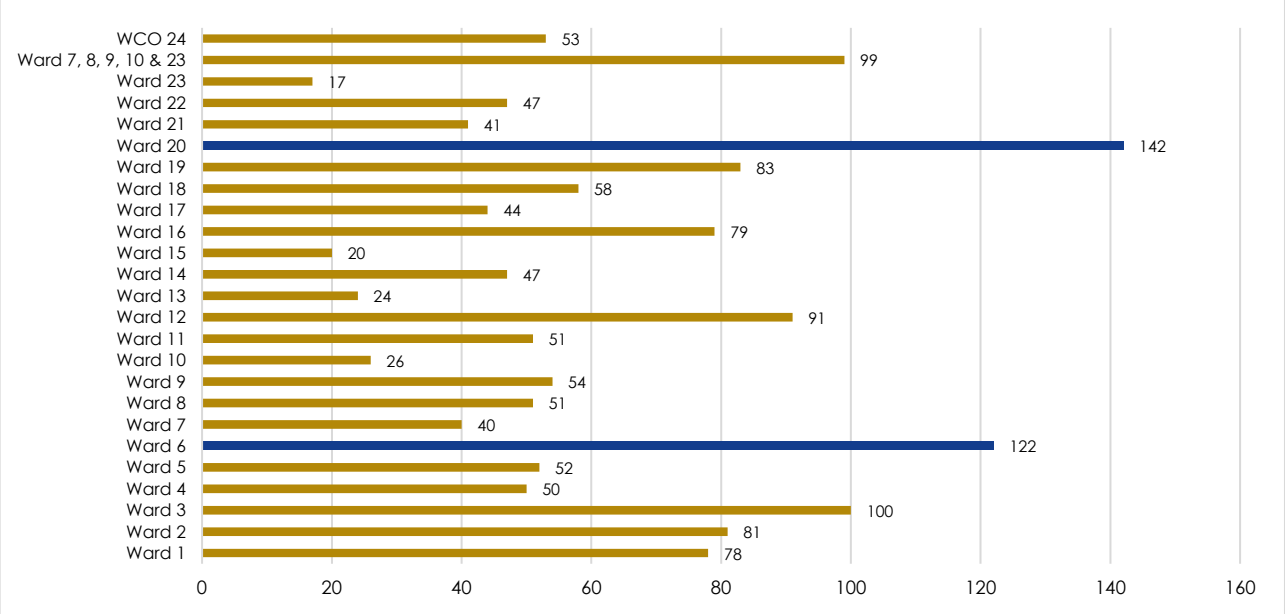
The graphs below indicate the number of individual line-item submissions received on the various communication platforms.



Graph 40: Total number of individual submissions per platform (Sept 2023)

As noted from the graph above, the electronic form, which was made available on the municipal website, and input recorded in the IDP Open Day minutes were the most popular platforms used by the community and stakeholders to submit their needs and priorities in September 2023. A total of **984** individual line items were recorded during the **IDP Open Days in September 2023**, with the electronic form on the municipal website as the second most popular platform with **388** individual line-item submissions recorded.

The graph (dark blue) below indicates that **Ward 06** and **Ward 20** have the highest number of line items / inputs per ward received and captured during the public participation period for September 2023.

Graph 41: Total number of Ward inputs per ward (Sept 2023)

9.4 Summary of Needs and Priorities

The graphs below present a summary of the key priorities and needs raised by communities during the public participation period in September 2023. It is evident from both graphs that the **top 5 priorities** identified for WCO24 by community members are listed below:

1. Roads, Transport and Stormwater;
2. Safety and Security;
3. Recreation and Sport;
4. Electrical Services; and
5. Housing Administration.

Graph 42: Number of community inputs per priority area in Sept 2023

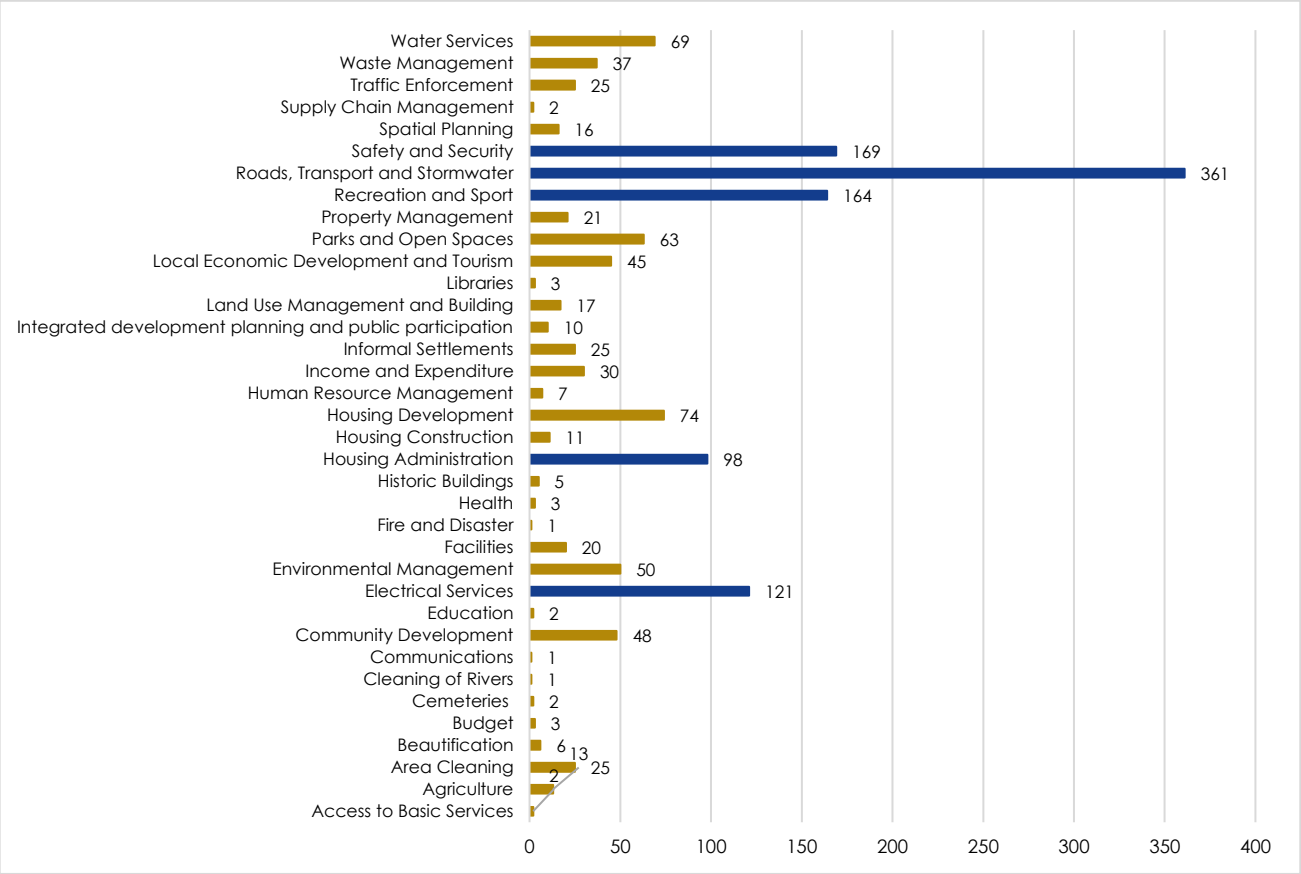


Table 100: Number of Attendees disaggregated by Gender, September 2023

Wards	Area	September 2023			
		Male	Female	Unspecified	Total Attendees
12, 13, 14 and 15	Kayamandi	47	44	4	**95**
5 and 6	Ida's Valley	21	19	2	**42**
1 and 2	Franschhoek	19	25	1	**45**

		Construction of recreational facilities at the open space near the Stellenbosch Correctional Service (Prison)	An investigation will be conducted to determine the feasibility	Not Applicable	Community and Protection Services	Community Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	A progress report is to be provided during the April 2024 public participation process.

CHAPTER 10:

Financial Plan

The Stellenbosch Municipality's medium-term financial planning and the extent to which it is possible to align the budget to all the priorities of the wards, given our financial constraints and the need to concentrate on basic service delivery.

10.1 Introduction

The long-term financial viability of municipalities depends largely on:

- the extent to which improved and sustainable revenue capacity can be achieved; and
- the sound **financial management of its resources.**

These imperatives necessitate proper multi-year financial planning. Future impacts of revenue and expenditure streams and the financial implications for the community (i.e., the potential influence on rates, tariffs, and service charges) must be identified and assessed to determine the sustainability of planned interventions, programmes, projects, and sundry service delivery actions.

10.2 Capital and Operating Budget Estimates

10.2.1 Budget Assumptions

The selected key assumptions relating to this budget are as follows:

- Government grants for the years 2024/25 to 2026/27 are as per the Division of Revenue Act and Provincial Gazette (capital and operational); and
- The inflation **rate has been estimated at 4.9% for 2024/25.**

10.2.2 Operating Budget Estimates

A municipality is a non-profit organisation, and it should break even after contributing to the different funds and reserves and meeting normal operating expenses. With the structuring of rates and tariffs, both the user-pay principle and the full cost recovery principle are applied. It should be noted that the surplus is calculated in terms of the accrual principle and therefore is not 100% cash-backed.

Table 125: Operating Budget Estimates

	(Current) 2023/24 Budget	Year 1 2024/25 Budget	Year 2 2025/26 Budget	Year 3 2026/27 Budget

10.3 Financial Management Arrangements

For the effective and efficient financial management of the municipality, all role-players, including the municipal councillors, must provide an environment conducive to good management. Local government legislation and National Treasury circulars articulate and provide regulatory structure. The council and officials define this environment by developing and accepting policy guidelines to govern financial decision-making and fiscal discipline.

The management arrangements of Stellenbosch Municipality are reflected in the policy documents listed in the table below:

Table 127: Management Arrangements

Document	Purpose	Status
Delegation Register	To provide for administrative, managerial, and institutional arrangements in respect of the delegation of responsibilities.	In place
Credit Control and Debt Collection Policy	• To establish consolidated, sound, and practically executable credit control measures to be applied in respect to all property owners and consumers. • To regulate the actions about arrear accounts, including extensions granted, written arrangements to pay off arrears, the monitoring thereof, and legal actions associated with unpaid accounts.	In place
Indigent Policy	To subsidise indigent households with a specified level of income. enabling them to pay for a basic package of municipal services.	In place
