**OUR RECYCLING
PROGRAMME!**

IT IS TIME TO **Rethink**

Our landfills are quickly running out of space as we throw away more and more items. We will soon have no where to take our waste to.

As part of our commitment to becoming a greener and more sustainable valley, we have a waste material recovery facility (MRF) located on Adam Tas Road. This state of the art facility serves as a place where our recyclables are sorted, baled and sent to recyclers to use as input in the production of new materials. This reduces the need for using virgin materials and prevents these valuable resources from ending up in landfill.

The facility also features a public drop-off area, which allows residents to bring waste to dispose of responsibly.

The MRF plays a significant role in preserving our environment and maximising landfill airspace for future generations.

Contact us

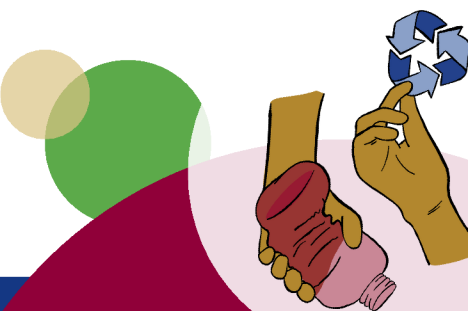

on the

Let's Fix It WhatsApp number:

076 951 0768

Please provide your address. We will issue you with one clear bag for recycling FREE of charge. Once it is filled with recyclables you put it out for collection. Your filled bag will be replaced with a new bag.

Recycling Guidelines

Ways to reduce waste and achieve
**A CLEAN,
GREEN
TOWN!**

REDUCE AND RECYCLE AT YOUR SCHOOL!

Starting a recycling centre at school can be one of the best ways to cut down on waste and educate learners and teachers alike. Finding clever and effective ways to reuse and reduce waste will save schools money and help cut down the volumes of waste being sent to landfills. Start today!

10

BENEFITS OF CIRCULAR ECONOMY AND RECYCLING

1

Keeps waste out of landfills

Landfills are harmful because of toxins seeping into the surrounding environment and toxic gases being emitted from the sites.

2

Reduces the need for new raw materials

By taking less from the environment and drawing on more recycled materials, the more we protect the environment.

3

Saves energy

Using recycled materials in the manufacturing process uses less energy than using new raw materials.

5

You can make some money from it

Many industries offer individuals a small financial incentive for turning in their recyclables. It's not a lot, but every rand counts!

6

Conservation of wildlife

By conserving natural resources, we preserve areas that are often the habitats of animals.

7

Creates jobs

Recycling is a massively growing industry and promotes the creation of new jobs.

8

Keeps groundwater clean

By keeping harmful materials away from landfills we reduce the contamination of groundwater.

9

Creates sustainable practices

To ensure a sustainable future, we need to start taking care of the planet for future generations.

10

Boosts the economy

By using recycled material, rather than a raw materials to make a new product, natural resources and energy are conserved.

GOOD REASONS TO RECYCLE!

The municipality provides a collection system where black wheelie bins and clear bags (containing recyclables) are collected once a week.

The most common recycling categories for household materials are:

What can I recycle?

Separate waste materials so that the recyclable products can be transformed into something new.

I CAN RECYCLE

- Paper, newspapers, magazines, flattened cardboard
- Glass/plastic bottles & jars
- Empty bags, containers, bread tags & cling wrap
- Food tins, cans, foil, scrap metal & empty aerosol cans
- Foil-lined juice boxes & milk containers
- Polystyrene products

I CAN'T RECYCLE

- Disposable nappies & sanitary items
- Hazardous household waste
- Wet or dirty items
- Adhesive & laminated paper
- Dry dog & cat food bags
- Cigarette butts
- Organic waste & food scraps
- Clothing & shoes
