To: City of Cape Town, Stellenbosch Municipality & Private Consumers on the Raw Water Supply (RSE)

RE: FAURE WATER TREATMENT PLANT, RESERVOIR & RSE SHUTDOWN

The City of Cape Town Water and Sanitation Directorate will shut down the Faure Water Treatment Plant and the Reservoir to accommodate maintenance work. The 2-week shutdown is scheduled for Monday, 18 August 2025, from 08h00 until 02 September 2025.

The Stellenbosch Municipality connection (Raithby) will be supplied from the domestic reservoir during this period. However, the storage on the domestic reservoir is limited, and Stellenbosch is requested to reduce consumption or use alternative supplies during this period.

Water will be rerouted from other reservoirs to supply the Eastern Areas of the City of Cape Town. No disruptions are expected; however, the public is requested to reduce consumption during this period.

RSE Pipeline Shutdown

The RSE (Raw Water Pipeline) will also be shut down to accommodate the installation of a 1600mm Valve at the Faure inlet. This shutdown is planned for Friday, 22 August 2025, from 08:00 until Sunday, 24 August 2025. During this period, consumers on the RSE will not have a water supply from the raw water pipeline. We advise you to make alternative arrangements for your non-potable water needs.

Please make the necessary arrangements to prepare for the shutdown. Please ensure that your reservoirs are filled to maintain your consumers' supply.

We sincerely appreciate your understanding and cooperation during this necessary maintenance work. Thank you.
