****

1.	**OPENING AND WELCOME**

The Chairperson, The Executive Mayor welcomed everyone present at the Mayoral Committee Meeting.

2.	**COMMUNICATION BY THE EXECUTIVE MAYOR**

- The recent flash storm brought destruction to Stellenbosch municipality. On behalf of the Stellenbosch Council and residents, a huge thank you to our Disaster Management and Stormwater teams for their active response and ongoing support. Construction on the Kayamandi bridge will commence in the coming weeks. Clean up actions in various parts of the municipality are still underway.

- Ons het die plesier gehad om 'n afvaardiging van Ethiopië op 'n studiebesoek te huisves wat gefokus was op eiendomsbelastingontwerp en finansiële administrasie. Die besoek het praktiese insigte in ons waardasiemetodologieë,

assesseringstelsels en belanghebbendebetrokkenheidstrategieë gebied. 'n Goeie uitruil van kennis en ervaring!

- The Municipality would like to inform residents of a backlog in the issuing of driver's licence cards, caused by printing delays at the National Department of Transport. We understand the frustration and inconvenience this may cause and assure you that we are doing our best to support motorists while the matter is being resolved at a national level. Motorists whose three-month grace period is about to end are encouraged to apply for a Temporary Driving Licence at our Driving Licence Testing Centre (DLTC).

- Dankie aan al die inwoners wie aan die GOP en begrotings opedagsessie in die onderskeie wyke deelgeneem het. U insette en belangstelling word waardeer, inwoners het nog tot 29 April 2025 kans om insette te lewer. Raadpleeg die munisipale webblad.

- Refuse removal and recycling during the Easter break. Normal municipal recycling / refuse collection services will not be rendered on Good Friday, 18 April 2025. The affected areas will be serviced on Saturday, 19 April 2025.

- This Easter may your travels be blessed with safety and joy. As you journey to your destination, remember to be mindful of your surroundings and drive responsibly. May your Easter weekend be filled with peace, happiness, and wonderful memories with loved ones.

3.	**DISCLOSURE OF INTERESTS**

NONE

4.	**APPLICATIONS FOR LEAVE OF ABSENCE**

The following application for leave of absence was approved in terms of the Rules and Order By-law of Council: -

Deputy Executive Mayor, M Slabbert

5.	**CONFIRMATION OF PREVIOUS MINUTES**

5.1 The minutes of the Mayoral Committee Meeting held on 2025-03-24 were **confirmed as correct without any amendments.**

6.	STATUTORY MATTERS

6.1	GRANTS ADJUSTMENTS BUDGET 2024/2025

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **16 April 2025**

1. SUBJECT:GRANTS ADJUSTMENTS BUDGET 2024/2025

2. PURPOSE

Is to table the adjustments budget for the 2024/2025 financial year to Council for approval. The adjustments budget arises from the additional allocation, as per the Government Gazette No. 52381 issued by National Treasury, dated 25 March 2025.

3. DELEGATED AUTHORITY

FOR APPROVAL BY MUNICIPAL COUNCIL

4. EXECUTIVE SUMMARY

Approval was granted for additional funding for the Integrated National Electrification Programme (INEP).Attached as **APPENDIX 1** is an executive summary by the Accounting Officer.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 6.1

(a) that the Adjustments Budget for 2024/2025 as set out in **APPENDIX 1-5**, be approved;

(b) that the Adjustments Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in **APPENDIX 3**, be approved; and

(c) that the Service Delivery and Budget Implementation Plan be adjusted accordingly inclusive of the non-financial information (performance measurement).

6.2	**OVERSIGHT ROLE OF COUNCIL: SUPPLY CHAIN MANAGEMENT POLICY-REPORT ON THE IMPLEMENTATION OF THE SUPPLY CHAIN MANAGEMENT POLICY OF STELLENBOSCH MUNICIPALITY: QUARTER 3 (01 JANUARY 2025 – 31 MARCH 2025)**

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **16 April 2025**

1. SUBJECT:OVERSIGHT ROLE OF COUNCIL: SUPPLY CHAIN MANAGEMENT POLICY-REPORT ON THE IMPLEMENTATION OF THE SUPPLY CHAIN MANAGEMENT POLICY OF STELLENBOSCH MUNICIPALITY: QUARTER 3 (01 JANUARY 2025 – 31 MARCH 2025)

2. PURPOSE

To submit to Management a report for the period 01 January 2025 – 31 March 2025 on the implementation of Council's Supply Chain Management Policy. The report covers the performance of the various delegated functions and the implementation thereof.

3. FOR DECISION BY MUNICIPAL COUNCIL

Section 6 (3) & 4 of the SCM Policy 2024/2025 determines that the Accounting Officer must within 10 days at the end of each quarter; submit a report on the implementation of the SCM Policy to the Executive Mayor. This report must be made public in accordance with section 21A of the Municipal Systems Act (32 of 2000).

4. EXECUTIVE SUMMARY

On a quarterly basis the Accounting Officer must submit a report on the implementation of the Supply Chain Management Policy to the Executive Mayor. In terms of the SCM Regulations and Council's SCM Policy the SCM unit has been delegated to perform powers and functions that related to the procurement of goods and services, disposal of goods no longer needed, the selection of contractors to aid in the provision of municipal services.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 6.2

(a) that Council approves this report and **ANNEXURE A** attached to the report, and

(b) that the report be made public in accordance with section 21A of the Municipal Systems Act.

6.3	MFMA SECTION 52 REPORTING UP TO 31 MARCH 2025

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **16 April 2025**

1. SUBJECT: MFMA SECTION 52 REPORTING UP TO 31 MARCH 2025

2. PURPOSE

To comply with section 52(d) of the Municipal Finance Management Act and report to Council on the implementation of the budget; and service delivery budget plan of the Municipality for the 3rd quarter of the 2024/25 financial year.

3. DELEGATED AUTHORITY

THE EXECUTIVE MAYOR TO SUBMIT TO COUNCIL

In terms of section 52 (d) of the Municipal Finance Management Act:

"The mayor of a municipality—

(d) must, within 30 days of the end of each quarter; submit a report to the council on the implementation of the budget and the financial affairs of the municipality:"

4. EXECUTIVE SUMMARY

The Executive Mayor must provide general political guidance over the fiscal and financial affairs of the Municipality and is required by Section 52(d) of the Municipal Finance Management Act to submit a report on the implementation of the budget and the financial and non-financial performance of the Municipality, to the Council within 30 days after end of each quarter.

The Section 52 report is a summary of the budget performance. It compares the implementation of the budget to the commitments made and contained in the Service Delivery and Budget Implementation Plan (SDBIP) and is intended to enable Council to give effect to their oversight responsibility. This report provides the overall performance of the Municipality for the period 1 January 2024 to 31 March 2025.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 6.3

that Council notes Section 52 Report (including quarterly performance report) – Third Quarter.

6.4	MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR MARCH 2025

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **16 April 2025**

1 SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR MARCH 2025

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2024/2025 to report the deviations to Council.

3. DELEGATED AUTHORITY

Council.

For noting.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2024/2025) stipulate that SCM deviations be reported to Council. In compliance thereto, this report presents to the Council the SCM deviations that occurred during March 2025.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 6.4

that Council notes that there were no deviations approved for the month of March 2025.

7.3	CORPORATE SERVICES: (PC: CLLR L NKAMISA)

7.3.1	PROPOSED LEASE AGREEMENT: ERF 4 LA MOTTE: NEW APOSTOLIC CHURCH: LA MOTTE

Collaborator No: 783647
IDP KPA Ref No: Good Governance
Meeting Date: 16 April 2025

1. SUBJECT: PROPOSED LEASE AGREEMENT: ERF 4 LA MOTTE: NEW APOSTOLIC CHURCH: LA MOTTE

2. PURPOSE

To consider an application from Mr James Eksteen, the Leader of the New Apostolic Congregation in La Motte, to use the facility on Erf 4 La Motte, for church services.

3. DELEGATED AUTHORITY

In terms of the approved System of Delegations, the Executive Mayor, in consultation with the Executive Mayoral Committee, can consider applications for the lease of council-owned property for a period shorter than 10 years and a contract value of less than R5M.

The Municipal Manager has the delegated authority to sign lease agreements on behalf of the Municipality.

4. EXECUTIVE SUMMARY

During 2021 an application was received from the La Motte New Apostolic Congregation to use the facility on Erf 4 La Motte for church and religious purposes. An item was prepared and served before the Executive Mayoral Committee on 19 May 2021 where it was resolved that, *inter alia*, a month-to-month lease agreement be approved in principle until the transfer of the property into the name of the Municipality and that the item be brought back to council after the registration of the property to Council.

The property was donated to the Stellenbosch Municipality by the Cape Winelands District Council in May 2007, but was only registered in the name of the Stellenbosch Municipality in August 2023. The Municipality did however obtain confirmation from Cape Winelands District Municipality that it can enter into a month-to-month agreement with the Church during the time that the property was not yet registered in the name of the Stellenbosch Municipality.

Since the registration has now taken place and the previous resolution stated that the item should return after registration, the Executive Mayoral Committee should now consider extending the lease agreement to 9 years 11 months.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 7.3.1

(a) that Erf 4 La Motte is identified as a property not needed to provide the basic minimum municipal services;

(b) that the Municipality deals with the zoning requirements of the erf;

(c) that the New Apostolic Congregation be allowed, in-principle, to lease the premises for a period of 9 years 11 months;

(d) that a valuator be appointed to determine the monthly rental;

(e) that a public participation process be followed calling on the public to provide comments, inputs and alternative solutions whereafter the item be returned to the Executive Mayoral Committee for a final decision;

(f) that the Municipal Manager be mandated to determine the monthly rental based on the valuation report and in line with the Property Management Policy for a discounted rate.

7.3.2	RETURN ITEM: DISPOSAL OF ERF 748 FRANSCHHOEK

Collaborator No: 783649
IDP KPA Ref No: Good Governance
Meeting Date: 16 April 2025

1. SUBJECT: RETURN ITEM: DISPOSAL OF ERF 748 FRANSCHHOEK

2. PURPOSE

To provide feedback and obtain Council's final approval for the sale of erf 748 Franschhoek situated in Caberierre Street in Franschhoek.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

On 30 July 2024 Council considered an application by GH Building Supplies to lease Erf 748 Franschhoek for private business purposes. It was however resolved that the property was not needed to provide basic municipal services and that same should be sold on auction and a valuation needs to be obtained to determine a fair market value. A valuation report was obtained, and the auctioneer was instructed to proceed with the auction.

On 31 March 2025 an auction was held at the property by Ikapa Auctioneers and the highest bid received on the day was from Space Link Capital (Pty) Ltd in the amount of R2.55 million. The purchaser was able to pay the deposit on the day to secure the purchase. Council needs to consider and approve the sale of the property based on the offer received on the day in order for the purchase of the property to continue. Council should note that the offer to purchase is lower than the valuation as per the valuation report received.

The purchaser requested that a suspensive condition be added to the offer to purchase that the telecommunications tower that is currently on the property be removed. The telecommunications tower was initially erected by Eagle Towers who had a lease agreement with the Municipality which they ceded to Helios Towers. The agreement is currently running on a month-to-month basis and Helios Towers has been informed that the property might be sold on auction. Should Council approve the offer to purchase then Helios Towers will be informed to deconstruct the telecommunications base within 60 days.

5. RECOMMENDATIONS

(a) that Council takes note of the auction of Erf 748 Franschhoek which was held on 31 March 2025;

(b) that Council accepts the offer received from Space Link Capital (Pty) Ltd which is attached to the item as **APPENDIX 2** and approves the sale of Erf 748 Franschhoek; and

(c) that Council confirms that Helios Towers be informed that the lease agreement is terminated, and that the telecommunications tower needs to be deconstructed.

6. DISCUSSION / CONTENT

6.1 Background

Erf 748 Franschhoek is for the most part an undeveloped property situated in Caberierre Street in Franschhoek. It has a telecommunications tower on the property which Helios Towers is currently paying rent for. In July 2024 an item was prepared for consideration by the Executive Mayoral Committee for GH Building supplies to lease the property to make use of the premises for business purposes. The Executive Mayoral Committee recommended to Council that the property be sold on auction and on 30 July 2024 Council resolved that the property be sold to the highest bidder based on a valuation report to be obtained by the administration.

A valuation report was obtained, and the auction took place on 31 March 2025.

6.2. DISCUSSION

6.2.1 Valuation Report and Offer to Purchase

A valuation report was obtained and is attached hereto as **APPENDIX 1**. The valuation report indicates that the fair market value for the property is R 2 995 000.00. The zoning of the property is Light Industrial and there are not many other Light Industrial zoned properties in the area that the valuator could make use of the determine the fair market value. It appears from the valuation report that it was mostly compared to residential sales in the area.

On date of auction the highest bid that was received was R 2 550 000.00 which is below the market value indicated on the valuation report. A copy of the Offer to Purchase is attached hereto as **APPENDIX 2**. Several estate agents from the community attended the auction on the day and confirmed that it was a decent offer taking into consideration the location (right next to the river) and the flood damage from 2024. The valuation amount was not declared at the auction as it did not form part of the previous item and was therefore not public knowledge.

The purchaser has indicated that they are not of the intention of rezoning the property and that they intend on developing the property within the current zoning which means employment opportunities for the community.

6.2.2 Property description

Erf 748 Franschhoek is situated in Caberierre Street in Franschhoek as indicated below in Fig. 1 and Fig. 2.

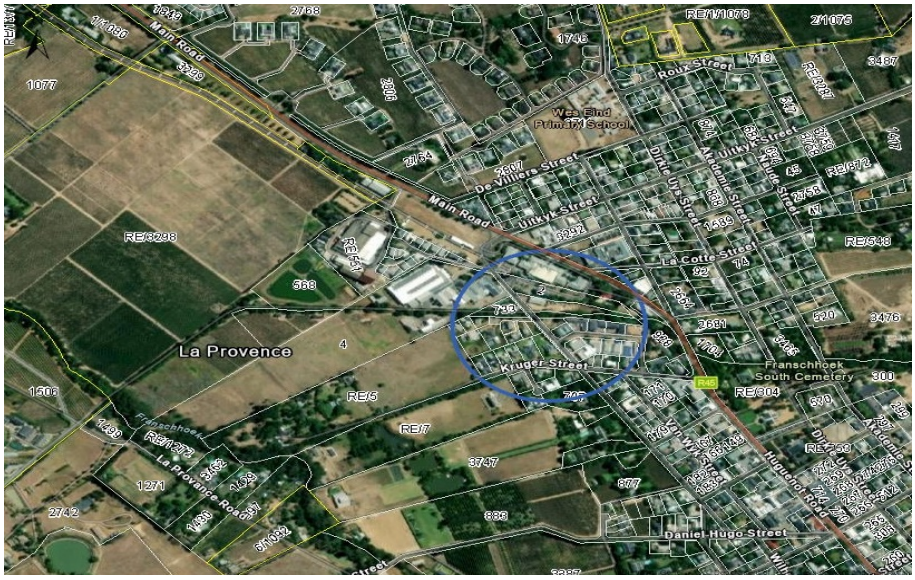

Fig. 1 Location and Context

Fig 2. The site

6.2.3 Ownership and Zoning

The ownership of the property vests with Stellenbosch Municipality since 1990 and the current zoning is Light Industrial.

6.2.4 Legal Framework

6.2.4.1: Municipal Finance management act, no 56 of 2003 (MFMA)

In terms of section 14(1) of the MFMA *"a municipality may not transfer ownership as a result of a sale or other transaction or otherwise permanently dispose of a capital asset needed to provide the minimum level of basic municipal services."*

Further, in terms of sub-section (2*)" a municipality may transfer ownership or otherwise dispose of a capital asset other than one contemplated in subsection (1), but only after the municipal council, in a meeting open to the public—*

(a) has decided on reasonable grounds that the asset is not needed to provide the

minimum level of basic municipal services; and

(b) has considered the fair market value of the asset and the economic and community value to be received in exchange for the asset."

In terms of subsection (5) *"any transfer of ownership of a capital asset in terms of subsection (2) must be fair, equitable, transparent, competitive and consistent with the supply chain management policy which the municipality must have and maintain in terms of section111."*

6.2.4.2 Municipal Asset Transfer Regulations(ATR)

In terms of Regulation 5 of the ATR :-

"1) A municipality may transfer or dispose of a non-exempted capital asset only after—

(a) the accounting officer has in terms of regulation 6 conducted a public participation process to facilitate the determinations a municipal council must make in terms of section 14(2)(a) and (b) of the Act; and

(b) the municipal council—

(i) has made the determinations required by section 14(2)(a) and (b) and*

(ii) has as a consequence of those determinations approved in principle that the capital asset may be transferred or disposed of.

*(2) Sub-regulation (1)(a) must be complied with only if the capital asset proposed to be transferred or disposed of is a high value *capital asset.* * i.e. in excess of R50M

6.2.4.3 Property Management Policy

In terms of par.7.2.1of the policy, "***unless otherwise provided for in this policy****, the disposal of Viable Immovable property shall be effected-*

(a) by means of a process of ***public competition****; and*

(b) ***at market value*** *except when the public interest or the plight of the poor demands*

Further, in terms of par.7.2.3, before alienating Immovable property or rights in Immovable property the Municipality shall be satisfied that ***alienation is the appropriate methodology and that reasonable economic, environmental and social return cannot be derived whilst ownership of the Immovable property or Property rights is retained by the Municipality****.*

In term of par.9.1 of the Policy, the Municipality may use any of the following methods, depending on the circumstances pertaining the specific Immovable property:

a) The type of a formal tender may vary, depending on the nature of the transaction:

i) Outright tender may be appropriate where the Immovable property ownership is not complex, and the Municipality is seeking obligations to be placed on the successful tenderer which are clear and capable of specification in advance.

ii) Qualified tenders/call for proposals will be appropriate where the Immovable property ownership position is complex or the development proposals for the Immovable property are insufficiently identified or otherwise incapable of detailed specification at the pre-tender stage.

iii) Call for proposals on a build-operate transfer (B.O.T) basis will be used if a developer is required to undertake the construction, including the financing, of a facility on Municipal-owned land, and the operation and maintenance thereof. The developer operates the facility over a fixed term during which it is allowed to charge facility users appropriate fees, rentals and charges not exceeding those proposed in its bid or as negotiated and incorporated in the contract, to enable the developer to recover its investment and operating and maintenance expenses in the project. The developer transfers the facility to the municipality at the end of the fixed term.

b) The nature of the formal tender process is that a legally binding relationship is formed between the parties when the Municipality accepts a tender in writing. It is essential therefore that every aspect of the disposal is specified in the tender documents. The tender documents could include a contract for sale or lease which could be completed with the tenderer's details, the tender price and be signed by the tenderer. A binding legal agreement is created upon the acceptance of the writing of a tender by the Municipality.

c) Such a process may, depending on the nature of the transaction, include a two-stage or two- envelope bidding process (proposal call) in terms of which only those bidders that meet the pre-qualification criteria specified in the first stage are entitled to participate in the second stage.

6.2.4.4 Public Auction

a) Disposal by public auction may be appropriate where there is no obvious potential purchaser and where speed and the best price can be obtained by auction.

b) The decision to dispose of Immovable property by way of public auction must be recorded in writing and must include-

(i) the reasons justifying a disposal by public auction;

(ii) the reserve price, if any, for the auction;

(iii) the authority for a staff member to attend the auction and to act on behalf of the Municipality.

c) The contract for sale or lease must be ready for exchange at the auction.

d) The binding contract will be made on the acceptance of the highest bid providing it has reached the reserve price. Contracts for the sale or lease will immediately be signed and exchanged.

e) The terms and conditions of each auction shall be determined on a project-by-project basis, appropriate to the specific characteristics and attributes of the Immovable property, and to the Municipality's strategic objectives.

f) Where the services of an auctioneer are utilised, the auctioneer's commission shall be payable by the successful bidder and shall not form part of the financial offer to the Municipality.

6.3 Financial Implications

The offer received on the day of the auction was for R2.55 million. The purchaser will pay all the transfer fees and auctioneer's commission so there will be no further expenses for the municipality. As this was on public auction no further Public Participation process is required, and Treasury's views also do not have to be solicited.

6.4 Legal Implications

The legal implications are discussed in the item and complied with.

6.5 Staff Implications

No additional staff implications.

6.6 Previous / Relevant Council Resolutions

24TH COUNCIL MEETING: 2024-07-30: ITEM 10.3.2

RESOLVED (majority vote with 1 abstention)

(a) that the land be identified as not required for the provision of basic Municipal Services;

(b) that the erf be sold on auction and that the market related price to be determined as the base price for the auction;

(c) that application to lease the property by GH Building Supplies is not approved.

6.7 Risk Implications

The risk of not accepting the offer is that the property will remain vacant and could be used as a dumping site or subjected to illegal invasion.

6.8 Comments from Senior Management

6.8.1 Director: Infrastructure

No objections from the Infrastructure Directorate.

6.8.2 Director: Planning and Economic Development

6.8.3 Director: Community and Protection Services

6.8.4 CFO

Further comments and input from CFO as per Mayco recommendation:

Council at the 24th Council Meeting: 2024-07-30 as per item 10.3.2 resolved as follow:

that the land be identified as not required for the provision of basic Municipal Services;

that the erf be sold on auction and that the market related price to be determined as the base price for the auction;

that application to lease the property by GH Building Supplies is not approved.

Council resolved that the property must be sold at auction at a base price equal to its fair market-related value. The offer received is less than this fair market-related value and does not comply with the Council resolution. Further to this, the approved Supply Chain Management Policy states that immovable property may only be sold at market-related prices, except when public interest or the plight of the poor demands otherwise.

Additionally, the Asset Transfer Regulations specify the following considerations when disposing of an asset below its fair market value:

13. Compensation for transfer of non-exempted municipal capital assets

(1) The compensation payable to a municipality or municipal entity for the transfer of a non-exempted capital asset must, subject to sub regulation (2) –

(a) be consistent with criteria applicable to compensation set out in the disposal management system of the municipality or municipal entity; and

(b) if regulation 12(2)(b) applies to the transfer, reflect fair market value.

(2) If a municipality or municipal entity on account of the public interest, in particular in relation to the plight of the poor, intends to transfer a non-exempted capital asset for less than its fair market value, the municipality or entity must, when considering the proposed transfert6, take into account –

(a) the interests of -

(i) the State; and

(ii) the local community;

the strategic and economic interests of the municipality or municipal entity, including the long-term effect of the decision on the municipality or entity;

the constitutional rights and legal interests of all affected parties;

whether the interests of the parties to the transfer should carry more weight than the interest of the local community, and how the individual interest is weighed against the collective interest; and

whether the local community would be better served if the capital asset is transferred at less than its fair market value, as opposed to a transfer of the asset at fair market value.

In my opinion, the disposal of this particular asset below fair market value does not meet the requirements of the Supply Chain Management Policy and the Asset Transfer Regulations. This will result in non-compliance with Council approved policy and the Asset Transfer Regulations.

Considering the Council resolution of 30 July 2024, the provisions in the Supply Chain Management Policy and the Asset Transfer Regulations, the offer from Space Link Capital (Pty) Ltd is not supported.

6.8.5 Municipal Manager

Municipal owned property in Franschhoek is very valuable. This property will be sold beneath market price. Council should consider this. Council is currently generating income from the cell tower which will now be lost. The cell tower is essential for connectivity in the modern world and with removal of this tower it will have an effect on connectivity. Council should take this into consideration when deciding on the acceptance of auction price including the fact that the price is beneath market value.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 7.3.2

(a) that the CFO comments or input be obtained before the item goes to Council;

(b) that this item be refined before it goes to Council in order for it to comply with the Asset transfer regulations; and

(c) that after refinement the item be taken straight to Council for a decision.

7.3.3	**RETURN ITEM: FEEDBACK ON PUBLIC PARTICIPATION PROCESS AFTER THE PUBLICATION OF THE INFORMATION STATEMENT OF THE INTENTION TO DISPOSE OF A PORTION OF FARM 528 AND A PORTION OF FARM 529C STELLENBOSCH, ALSO FORMERLY KNOWN AS MOUNTAIN BREEZE CARAVAN PARK**

Collaborator No: 783650
IDP KPA Ref No: Good Governance
Meeting Date: 16 April 2025

1. SUBJECT: RETURN ITEM: FEEDBACK ON PUBLIC PARTICIPATION PROCESS AFTER THE PUBLICATION OF THE INFORMATION STATEMENT OF THE INTENTION TO DISPOSE OF A PORTION OF FARM 528 AND A PORTION OF FARM 529C STELLENBOSCH, ALSO FORMERLY KNOWN AS MOUNTAIN BREEZE CARAVAN PARK

2. PURPOSE

To provide feedback to Council after a Public Participation Process was followed to advertise the intention of Council to dispose of portions of Farm 528 and 529C Stellenbosch, also known as Mountain Breeze Caravan Park.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

Mountain Breeze was a very successful caravan park which sometimes had up to 70 camping sites occupied over the weekend or school holidays. The previous tenant terminated her lease agreement in 2021, and the property has since then been mostly vacant and had no lease agreement in place since then. An item was prepared for Council to consider a way forward with the property in July 2021. At the Council meeting held on 28 July 2021, Council decided to provide an opportunity for the public to submit written inputs on the future use of portions of Farm 528 and 529 Stellenbosch, before deciding on a way forward. The public notice requested inputs on/before 3 September 2021. Various written submissions were received. After taking the comments received into consideration Council resolved on 30 March 2022 as follows:

(a) that Council take note of all the proposals received;
(b) that Council identifies Portions 528 and 529C, Stellenbosch as not currently needed for minimum municipal services;
(c) that a call for proposal for development of the facilities for Cycling, hiking groups, an Eco-education and Adventure centre for school groups along with overnight facilities be advertised;
(d) that the existing buildings and infrastructure be use for the above purpose;
(e) that the facility to be leased for a period of 5 years; and
(f) that successful lessee enter into a rental agreement with the municipality and be responsible for the security, maintenance and the payment of all services of the facility.

The administration reported to council in October 2024 that there are several challenges in implementing the Council resolution dated 27 March 2022. Council reviewed and rescinded the decision of 27 March 2022 and took a new decision:

26TH COUNCIL MEETING: 2024-10-30: ITEM 10.3.2
RESOLVED (majority vote with 3 abstentions)

(a) that the Council resolutions taken on 2022-07-27 be reviewed and rescinded;
(b) that Portions 528 and 529C, Stellenbosch (also known as Mountain Breeze Caravan Park) be identified as land not needed for basic Municipal Services;
(c) that an information statement be prepared for approval by council to indicate Council's intention to sell the property on auction to the highest bidder and that the item and information statement returns to Council for approval of the information statement;
(d) that provision be made for a fall-back clause if the buyer wants to sell the property within 10 years;
(e) that the property must be used as per the current zoning and will be sold voetstoots; and
(f) that an updated property valuation report be obtained before the item be resubmitted to Council.

A valuation report has been received by the administration and is attached to the item. The current zoning is agricultural. It is situated in a mainly agricultural area and opposite the airfield. It is also situated outside the urban edge.

An official Notice was published in Die Burger on 13 December and in Eikestad Nuus on 12 December 2025. Several comments were received from the public which is summarised hereunder as well as attached to the item for consideration by Council. The matter was before the Executive Mayoral Committee in February 2025 however the valuation report was not available, and the item was returned to the administration to obtain a valuation report before the matter returned to Council.

Two very important aspects to note before Council can make a final decision is the following:

1. The administration has not had sight of the Title Deeds and it is therefore not clear if there might be any restrictive conditions registered against the properties; and

2. This portion of Farm 529 has not been subdivided from the main farm and does not have a separate Title Deed and the property can therefore not be sold until a sub-division has been registered. This will have to be done before an auction can take place and the Municipality will have to attend to the application and costs of the sub-division.

THE EXECUTIVE MAYORAL COMMITTEE: 2025-04-16: ITEM 7.3.3

RESOLVED

that this item be referred to the Corporate Services section 80 committee for further discussion.

7.6.1	STATUS REPORT ON THE ALTERNATIVE ENERGY GENERATION PROGRAMME – APRIL 2025

Collaborator No: 783383
IDP KPA Ref No: Green & Sustainable Valley
Meeting Date: 16 April 2025

1. SUBJECT: STATUS REPORT ON THE ALTERNATIVE ENERGY GENERATION PROGRAMME – APRIL 2025

2. PURPOSE

For Council to note the progress of the Municipality's as well as Provincial Government initiatives regarding the Alternative Energy Programme projects which are underway at present.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

4.1 20 MW Independent Power Producer Contract: Tender conditionally awarded to successful bidder. A Legal Firm has been appointed by the Municipality and has interrogated the draft Power Purchase Agreement. Once the draft Power Purchase Agreement is finalised and signed off by both parties, development rights will commence.

4.2 50 MW Independent Power Producer Tender: The Request for Proposals was advertised on 29 March 2025.

4.3 The installation of the 66kV switchgear at Main and University substations, is planned to be completed in April 2025. This will then enable the installation of the Supervisory Control and Data Acquisition (SCADA) completion at those substations.

4.4 The new (SCADA) tender was advertised on 15 February 2025.The new tender is for the Supply, Delivery, Off-Loading, Installation, Setup, Configuration and Commissioning/Testing of Electrical Substation Telemetry Monitoring Equipment (SCADA System) and Supervisory Communication Network Installations. The department is awaiting a date from SCM on when the evaluated tender will serve at the Bid Evaluation Committee.

4.5 Fire Station Progress: The tender for the Stellenbosch Fire Station battery storage system was awarded and construction work will be completed by 30 June 2025.

4.6 NPK Building Progress: Tender documentation is being prepared at present for the retrofitting of the building with alternative energy equipment.

4.7 Main Building (Neethling Huis) Progress: Currently at detailed design and tender documentation stage (Electrical and Mechanical Fire Compliancy).

4.8 Energy Performance Certification: The frames have been delivered, and the certificates have been installed in all buildings except the NPK building. The delay in the NPK building is due to the final positioning of the frame not yet being confirmed.

4.9 Municipal Community Buildings Progress: Tender B/SM 34/25 Turnkey – Engineering, Procurement and Construction (EPC) of Hybrid Inverter with Battery Storage Systems at fourteen Stellenbosch Municipality Community Buildings. The tender was awarded and the successful bidder notified on 7 March 2025. Currently awaiting the 21-day appeal period.

4.10 Eskom Hot Water Load Control (HWLC) and RT 29-2024 Contracts for smart meters:

A new tender will be prepared with the objective of becoming effective on 1 July 2025.

4.11 The Municipality's load curtailment application is still with Eskom at present, and Eskom responded formally to the Municipality's request. The Municipality will still pursue this option but mitigating measures are in place should Eskom not allow it.

The above projects, 4.1 to 4.10, are still being pursued by the Municipality's Alternative Energy Program with the focus on securing cheaper and renewable energy, as well as the focus on business continuity during outages and ensuring that critical plants and systems are still operational.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 7.6.1

that Council notes the latest progress with the Alternative Energy Generation projects in implementation at present.

7.6.2	PROPOSED IMPLEMENTATION OF A ONE-WAY SYSTEM ALONG PIET RETIEF AND KOCH STREETS

Collaborator No: 783510
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 16 April 2025

1. SUBJECT: PROPOSED IMPLEMENTATION OF A ONE-WAY SYSTEM ALONG PIET RETIEF AND KOCH STREETS

2. PURPOSE

That Council takes note of this report and approves the proposals contained herein.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

The Municipality had previously received a request from the community to consider the implementation of a one-way system along Piet Retief and Koch Streets. This request was tabled before Council and it was resolved then that a traffic analysis be carried out, followed by a public participation process. It was also resolved that on conclusion of the public participation process, the results of such be brought back to Council for further consideration.

A consulting engineer specialising in transportation and traffic engineering was appointed to undertake the traffic impact analysis. The purpose of the analysis was to determine whether the one-way system would be appropriate for the context of the roads and surrounding land uses, and to determine whether the one-way system will in fact improve traffic flow. **See ANNEXURE A.**

Findings of the analysis indicated that should the proposed one-way system be implemented, there will not be a significant alleviation to traffic congestion, and existing bottlenecks such as those at the Piet Retief Street / Suidwal Road Intersection will remain. In addition, the increase in traffic volumes (and speeds) along Koch Street will increase traffic conflicts with existing residential accesses, scholars, and vehicles that drop off and pick up learners.

Recommendations of the analysis are to maintain the current system and to focus on interventions that reduce private vehicle useage within the town such as:

- Introducing Park and Ride Systems
- Promoting Non Motorized Transport and Public Transport

Other recommendations listed are the implementation of longer-term plans, specifically addressing the traffic bottleneck between Van Rheede Road, Suidwal Road and the central town area.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2025-04-16: ITEM 7.6.2

(a) that Council notes that a traffic impact analysis has been carried out, and that the analysis recommends that the current system be maintained See **ANNEXURE A**;

(b) that Council notes the findings and recommendations of the traffic impact analysis namely reducing private car usage and addressing the traffic bottleneck between Van Rheede Road, Suidwal Road and the central town area;

(c) that Council notes that a public participation process will therefore not be required since the current traffic system will be maintained for now; and

(d) that the Infrastructure Services Directorate notes the recommendation of the study namely:

- Maintain the current system and focus on interventions that reduce private vehicle usage within the town such as:
  - o Introducing Travel Demand and Park and Ride Systems
  - o Promoting Non Motorized Transport and Public Transport
- Further assessment and implementation of longer-term plans, as identified in the Roads Master Plan, specifically addressing the traffic bottleneck between Van Rheede Road, Suidwal Road and the central town area

6.1	**ADOPTION OF THE 3RD REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027**

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **21 May 2025**

1. SUBJECT:ADOPTION OF THE 3RD REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027

2. PURPOSE

To submit the following to the Council for adoption:

(a) The 3rd review of the 5th Generation Integrated Development Plan (IDP) 2022 – 2027, attached as **ANNEXURE A;** and

(b) The community input and comments, written submissions, and the Provincial Government SIME Assessment Report on the draft 3rd review of the 5th Generation IDP 2022 - 2027, attached as **ANNEXURE B.**

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

In terms of Section 34(a)(i)(ii) of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), each municipal council must review its Integrated Development Plan annually in accordance with an assessment of its performance measurements in terms of Section 41 of MSA and to the extent the changing circumstances so demand. Therefore, taking into account the changing circumstances in the municipal environment, including the community's needs and priorities.

The 3rd review of the 5th Generation IDP 2022 – 2027 informs the municipality's budget and details the municipality's actions to address the vision, mission, strategic objectives, and needs of the community.

The municipal IDP must be reviewed annually to ensure that:

- municipalities and communities keep track of progress in implementing development projects and spending the municipal budget;
- communities are presented with an opportunity to review their community needs and to recommend changes to the ward priorities outlined in the municipality's IDP;
- to ensure that the IDP remains relevant and responsive to the changing needs and priorities of the community; and
- ultimately helping to guide the municipality in achieving its long-term development goals effectively.

The period for public participation on the draft 3rd review of the 5th Generation IDP 2022 – 2027 and draft Budget 2025 - 2028 was open from 07 - 29 April 2025 (23 days). This

period of public participation was intended to give community members and stakeholders ample opportunity to submit verbal and written input / comments on the draft IDP and draft Budget.

In addition, area-based public participation open days were held from 08 – 14 April 2025 in the respective areas / wards. The open days offered an opportunity for community members to engage in one–on–one discussion with departmental representatives and submit verbal input. An IDP and Budget stakeholder engagement was held on 23 April 2025, attended by councillors, senior management, stakeholders, and role-players in the Stellenbosch municipal area.

5. RECOMMENDATIONS

(a) that the Stellenbosch Municipality's 3rd review of the 5th Generation IDP 2022 – 2027 be adopted in terms of Section 34 of the MSA, attached as **ANNEXURE A**;

(b) that the community inputs and written submissions on the draft 3rd review of the 5th Generation IDP 2022 – 2027 and the Provincial Government SIME Assessment Report, attached as **ANNEXURE B**, be noted;

(c) that a notice be placed on the official website of the municipality and in the local newspaper notifying the public that the 3rd review of the 5th Generation IDP 2022 – 2027 has been adopted by the Council; and

(d) that the adopted 3rd review of the 5th Generation IDP 2022 – 2027 be submitted to the MEC for Local Government, Environmental Affairs and Development Planning, Western Cape: Department of Local Government, Western Cape: Provincial Treasury, National Treasury, the Cape Winelands District Municipality, and the Office of the Provincial Speaker.

6. DISCUSSION

6.1 Background

In terms of the provisions of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA), each council must review its Integrated Development Plan in accordance with an assessment of its performance measurements in terms of Section 41 of the MSA and to the extent the changing circumstances so demand.

The key dates for the IDP review process form part of the integrated SDF / IDP / Budget Time Schedule approved by the Council in August 2024 to guide the planning, development, approval and adoption of the 3rd review of the 5th Generation IDP 2022 – 2027.

The following processes were followed in accordance with the Time Schedule:

Date	Action(s)
August 2024	▪ The Executive Mayor and Mayoral Committee recommend that the SDF/IDP/Budget Time Schedule / Process Plan (at least 10 months before the start of the budget year) be approved by the Council. ▪ The SDF / IDP / Budget Time Schedule were adopted by the Council on 23 August 2024.

Date	Action(s)
September 2024 – December 2024	• The IDP public participation period was open from 09 - 30 September 2024. • The area–based IDP public participation open days were held from 10 – 16 September 2024. • The IDP stakeholder engagement was held on 25 September 2024, attended by various stakeholders and role-players. • On the municipal website, an electronic submission form has been created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, *X*, WhatsApp, and through the Stellenbosch Citizen App. • Hard copies of the "Have Your Say' submission forms were also made available at all libraries and ward offices. • On 22 November and 02 December 2024, all-ward councillor sessions were held to reprioritise the ward priorities for 2022 - 2027, with the community input as baseline information.
January 2025 - February 2025	• Departmental sessions were held to review the IDP deliverables and targets for the 3rd review of the 5th Generation IDP 2022 – 2027. • MayCo and Management had a strategic session on 17 January 2025 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes/projects/activities and actions).
March 2025 - May 2025	• MayCo and Council considered the draft 3rd review of the 5th Generation IDP 2022 – 2027 and approved it on 31 March 2025 to obtain public input and comments. • A notice for public comment was published on 03 April 2025, in the local newspaper and on 02 April 2025 on the municipal website. • The approved draft 3rd review of the 5th Generation IDP 2022 – 2027 was submitted to the MEC, Department of Local Government, Western Cape Provincial Treasury, National Treasury, Office of the Provincial Speaker of Parliament, Cape Winelands District Municipality, Drakenstein Municipality and City of Cape Town for their input. • The IDP and Budget public participation period was open from 07 – 29 April 2025**.** • IDP and Budget open days were held from 08 – 14 April 2025. A total of 8 area–based open days were held. • Consultation and refinement of the IDP and Budget documents. • Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2025**. • Submit the adopted IDP to the Provincial Government and other role-players.

6.2 Financial Implications

The IDP and the Budget have been aligned, taking into account ward priorities and public needs identified through the public participation engagements outlined above.

6.3 Legal Implications

The recommendations in this report comply with the Council's policies and all applicable legislation.

Section 25(1):

The municipal council must, within a prescribed period after the start of its elected term, adopt a single, inclusive and strategic plan for the development of the municipality, which—

(a) links, integrates and coordinates plans and takes into account proposals for the development of the municipality;
(b) aligns the resources and capacity of the municipality with the implementation of the plan;
(c) forms the policy framework and general basis on which annual budgets must be based;
(d) complies with the provisions of this Chapter; and

(e) is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

Section 26:

An integrated development plan must reflect -

(a) the municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;
(b) an assessment of the existing level of development in the municipality, which must include an identification of communities which do not have access to basic municipal services;
(c) the council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
(d) the council's development strategies, which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
(e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;
(f) the council's operational strategies;
(g) applicable disaster management plans;
(h) a financial plan, which must include a budget projection for at least the next three years; and
(i) the key performance indicators and performance targets determined in terms of section 41.

Section 34:

"**Annual review and amendment of the integrated development plan**

A municipal council-

(a) must review its integrated development plan-

(i) annually in accordance with an assessment of its performance measurements in terms of Section 41; and

(ii) to the extent that changing circumstances so demand; and

(a) may amend its integrated development plan in accordance with a prescribed process."

Section 35(1):

An integrated development plan adopted by the council of a municipality—

(a) is the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning, management and development, in the municipality;
(b) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development

plan and national or provincial legislation, in which case such legislation prevails; and

(c) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

Section 36:

A municipality must give effect to its integrated development plan and conduct its affairs in a manner that is consistent with its integrated development plan.

The drafting and compilation of the 4th review of the 5th Generation IDP 2022 - 2027 will take place in the 2025/26 financial year.

6.4 Staff Implications

This report has no additional staff implications for the municipality.

6.5 Risk Implication

This report has no direct risk implications for the municipality.

6.6 Previous / Relevant Council Resolutions:

- Item 8.2 of the 5th Council Meeting held on 25 May 2022. "*Adoption of the 5th Generation Integrated Development Plan (IDP) 2022 - 2027"*; and
- Item 8.2 of the 12th Council Meeting held on 29 March 2023. "*Approval of the Draft 1st Review of the 5th Generation IDP 2022 - 2027"*.
- Item 8.1 of the 14th Council Meeting held on 24 May 2023. "*Adoption of the 1st Review of the 5th Generation IDP 2022 - 2027"*.
- Item 8.2 of the 16th Council Meeting held on 23 August 2023. "*Draft 1st Amendment of the 5th Generation IDP 2022 – 2027"*.
- Item 8.1 of the 17th Council Meeting held on 25 October 2023. "*Adoption of 1st Amendment of the 5th Generation IDP 2022 – 2027*".
- Item 8.3 of the 21st Council Meeting held on 27 March 2024. "*Approval of the Draft 2nd Review of the 5th Generation IDP 2022 - 2027"*.

6.4 Investments 120
6.4.1 Public Sector Investment 120
6.5 Environmental Risk and Vulnerability for the Cape Winelands District (CWD) 121
6.6 Intergovernmental Budgetary Allocation 122
6.7 Cape Winelands District (CWD) JDMA Implementation Plan 128
6.7.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations 129
6.7.2 Cape Winelands District Joint District Approach 130
6.8 Agricultural Interventions 132
6.9 Stellenbosch Municipality Operational Support Plan 132
6.10 Gender Mainstreaming 134
6.10.1 Gender Interventions 134
6.10.2 Gender Disaggregated Matrix 136

Chapter 7: Sector Plans and Implementation 139

7.1 Introduction 139
7.2 The relationship between the Sector Plans and Strategies 140
7.3 Sector Plans and Implementation Strategies 142
7.3.1 Air Quality Management Plan 142
7.3.2 Environmental Management Plan 143
7.3.3 Integrated Human Settlement 147
7.3.4 Comprehensive Integrated Transport Plan 160
7.3.5 Integrated Waste Management Plan (IWMP) 167
7.3.6 Electrical Master Plan 174
7.3.7 Water Services Development Plan 174
7.3.8 Water Demand Management (WDM) 181
7.3.9 Long-Term Water Conservation and Water Demand Management Strategy 185
7.3.10 Safety and Security Strategy 189
7.3.11 Disaster Management Plan 193
7.3.12 Local Economic Development Strategy 201
7.3.13 Community Development Strategy 208
7.3.14 Human Resource Strategy 213

7.3.15 ICT Strategy 214

Chapter 8: Council Term Projects 2022 – 2027 218

8.1 Smart City 218
8.1.1 Guiding Principles to Create Inclusive Smart Cities 218
8.1.2 A smart city as a holistic ecosystem 218
8.1.3 The Nature and Purpose of a Proposed Smart City Initiative 219
8.2 Political Leadership: Five–Year Plans 220
8.2.1 Executive Mayor 220
8.3 Mayoral Portfolios 244
8.3.1 Portfolio: Human Settlements 245
8.3.2 Portfolio: Rural and Environmental Management 255
8.3.3 Portfolio: Sport, Youth and Culture 257
8.3.4 Portfolio: Planning, LED, and Tourism 258
8.3.5 Portfolio: Financial Services 269
8.3.6 Portfolio: Protection Services 272
8.3.7 Portfolio: Corporate Services 275
8.3.8 Portfolio: Infrastructure Services 277
8.3.9 Portfolio: Parks and Open Spaces 283
8.3.10 Portfolio: Community Services 286

Chapter 9: Public Interest and Expression of Needs 289

9.1 Community Participation 289
9.2 Public Participation in the drafting of the 3rd review of the 5th Generation IDP 2022 – 2027 290
9.3 Public Participation Statistics: September 2024 and April 2025 294
9.4 Summary of Needs and Priorities 295
9.5 Ward Priorities 303
9.5.1 Ward Priorities: Ward 1 303
9.5.2 Ward Priorities: Ward 2 318
9.5.3 Ward Priorities: Ward 3 322
9.5.4 Ward Priorities: Ward 4 326
9.5.5 Ward Priorities: Ward 5 334
9.5.6 Ward Priorities: Ward 6 350
9.5.7 Ward Priorities: Ward 7 362
9.5.8 Ward Priorities: Ward 8 378
9.5.9 Ward Priorities: Ward 9 382
9.5.10 Ward Priorities: Ward 10 386
9.5.11 Ward Priorities: Ward 11 392
9.5.12 Ward Priorities: Ward 12 400
9.5.13 Ward Priorities: Ward 13 408
9.5.14 Ward Priorities: Ward 14 412
9.5.15 Ward Priorities: Ward 15 415
9.5.16 Ward Priorities: Ward 16 418
9.5.17 Ward Priorities: Ward 17 424
9.5.18 Ward Priorities: Ward 18 427

9.5.19 Ward Priorities: Ward 19 432
9.5.20 Ward Priorities: Ward 20 439
9.5.21 Ward Priorities: Ward 21 446
9.5.22 Ward Priorities: Ward 22 449
9.5.23 Ward Priorities: Ward 23 455

Chapter 10: Financial Plan 460

10.1 Introduction 460
10.2 Capital and Operating Budget Estimates 460
10.2.1 Budget Assumptions 460
10.2.2 Operating Budget Estimates 460
10.3 Financial Management Arrangements 462
10.4 Financial Strategies and Programmes 463
10.5 Medium – Term Capital Expenditure per Strategic Focus Area 464
10.6 Medium – Term Operational Expenditure 465
10.7 Medium–Term Operational Revenue per Strategic Focus Area 465
10.8 Capital Budget 2025/26 – 2027/28 per Directorate 466
10.8.1 Capital Budget 2025/26 – 2026/27: Office of the Municipal Manager 466
10.8.2 Capital Budget 2025/26 – 2027/28- Directorate: Planning and Economic Development 466
10.8.3 Capital Budget 2025/26 – 2027/28- Directorate: Community and Protection Services 468
10.8.4 Capital Budget 2025/26 – 2027/28- Directorate: Corporate Services 471
10.8.5 Capital Budget 2025/26 – 2027/28- Directorate: Infrastructure Services 472
10.8.6 Capital Budget 2025/26 – 2027/28- Directorate: Financial Services 479
10.9 National and Provincial Investment 480

Chapter 11: Organisational Scorecard (5 – years) 482

11.1 Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP) 482
11.2 SFA 1 – Valley of Possibility 483
11.3 SFA 2 – Green and Sustainable Valley 486
11.4 SFA 3 – Safe Valley 490
11.5 SFA 4 – Dignified Living 491
11.6 SFA 5 – Good Governance and Compliance 495

Chapter 12: Implementation, Monitoring and Review (1-year) 501

12.1 SFA 1 – Valley of Possibility 502
12.2 SFA 2 – Green and Sustainable Valley 503
12.3 SFA 3 – Safe Valley 505
12.4 SFA 4 – Dignified Living 506
12.5 SFA 5 – Good Governance and Compliance 509

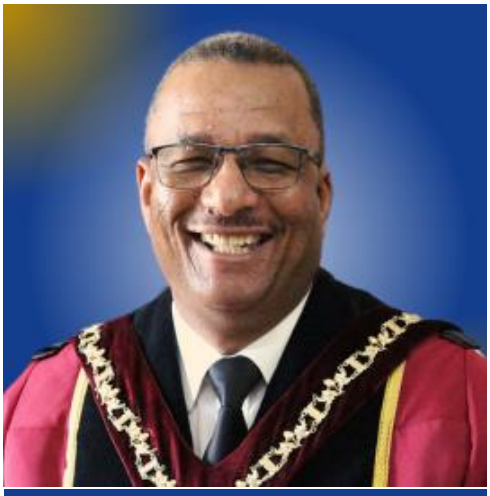
Integrated Development Plan for 2022 – 2027

Compiled in terms of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000)

The Integrated Development Plan is the municipality's principal five-year strategic plan that deals with the most critical development needs of the municipal area (external focus) and the organisation's most critical governance needs (internal focus).

The Integrated Development Plan –



- is adopted by the council within one year after a municipal election and remains in force for the council's elected term (five years);
- is drafted and reviewed annually in consultation with the local community as well as interested organs of state and other role players;
- guides and informs all planning and development, and all decisions concerning planning, management, and development;
- forms the framework and basis for the municipality's medium-term expenditure framework, annual budgets, and performance management system; and
- seeks to promote integration by balancing the economic, ecological, and social pillars of sustainability without compromising the institutional capacity required in the implementation, and by coordinating actions across sectors and spheres of government.

STRATEGIC OVERVIEW

Vision, Mission, and Values

FOREWORD BY THE EXECUTIVE MAYOR

Cllr Jeremy Fasser
Executive Mayor

It is an honour to serve as the Executive Mayor of Stellenbosch Municipality—an extraordinary place made beautiful not only by its stunning natural landscape but also by the people who live and work here. Our love for the community, our diversity, our ability to work together, and our will to succeed are what set us apart. As we embark on the 3rd review of the 5th Generation Integrated Development Plan (IDP), we stand at the threshold of a new era—one that builds on past achievements while forging a future of progress, inclusivity, and resilience.

The IDP remains our roadmap, a guiding document that aligns our vision with the aspirations of our residents. It is through this plan that we identify our priorities, allocate resources, and ensure that our municipality continues to grow sustainably. The needs of our residents are at the heart of this process, and public participation remains a cornerstone of our planning. I encourage all residents, businesses, and stakeholders to engage meaningfully in this process, as your input shapes the future of Stellenbosch and its surrounding communities.

Despite the challenges of recent years, our municipality has remained steadfast in delivering high-quality services, fostering economic growth, and maintaining good governance. Our commitment to transparency, accountability, and financial prudence remains unwavering. As we navigate new challenges, we do so with a focus on innovation and opportunity—ensuring that Stellenbosch remains a beacon of excellence in local government.

Housing, infrastructure development, economic empowerment, and sustainable energy solutions continue to be top priorities. We are committed to creating an enabling environment where businesses can thrive, job opportunities can expand, and all residents can benefit from a municipality that is well-run, inclusive, and future-focused. Our plans for energy co-generation, investment in public infrastructure, and support for local enterprises reflect our proactive approach to addressing both current and future needs.

This IDP review is not just a policy document—it is a reflection of our collective aspirations and our determination to build a better tomorrow. I extend my gratitude to the Deputy Mayor, the Mayoral Committee, our councillors, the Municipal Manager, and the dedicated officials who work tirelessly to bring this vision to life. Together, we will continue to make Stellenbosch a place of opportunity and innovation.

I invite all residents to join us on this journey, to engage with the process, and to help shape the future of this municipality we proudly call home. This invitation extends to all residents, regardless of whether they operate a small shop in Cloetesville or a large company in Technopark. Whether you are retired in Franschhoek or a young entrepreneur in Dorp Street just starting out. Whether you run a business in Kayamandi or work from home in Kylemore, engage with this document and have your say.

CLLR JEREMY FASSER
EXECUTIVE MAYOR

OVERVIEW BY THE MUNICIPAL MANAGER

Geraldine Mettler
Municipal Manager

Stellenbosch Municipality remains steadfast in its commitment to sound governance, financial sustainability, and service excellence. As we embark on the third review of our 5th Generation Integrated Development Plan (IDP), we reaffirm our dedication to strategic, community-driven planning that ensures inclusive and sustainable growth for our municipality.

Our strong financial position is the result of prudent financial management, effective revenue collection, and transparent governance. We express our sincere appreciation to our ratepayers, consumers, and all stakeholders who continue to meet their financial obligations, enabling us to provide essential services and invest in critical infrastructure. However, we remain aware of the challenges that could impact revenue streams, including water losses, illegal connections, escalating Eskom tariffs, load shedding, and broader national economic uncertainties. We are committed to mitigating these risks through robust financial controls, innovative solutions, and proactive planning.

The IDP serves as our guiding framework, aligning municipal priorities with community needs and available resources. It shapes our Medium-Term Revenue and Expenditure Framework (MTREF) and ensures that our financial and service delivery commitments remain sustainable and effective. Public participation is central to this process, and we continue to enhance avenues for community engagement. Through digital platforms, social media, email, WhatsApp, public meetings, and direct consultations, we empower residents to actively contribute to the decision-making process. Please make use of any of the available avenues to have your say.

Key strategic priorities in this IDP review include:

- Advancing e-governance and smart city initiatives;
- Upgrading bulk infrastructure to support economic development;
- Maintenance of existing bulk and road infrastructure;
- Enhancing road infrastructure for safety and accessibility;
- Promoting clean and sustainable energy solutions;
- Strengthening financial sustainability through long-term planning;
- Enforcing a zero-tolerance approach to corruption;
- Expanding social and gap housing opportunities;
- Finalising and implementing the Inclusionary Housing Policy;
- Accelerating land ownership through the title deed programme;
- Driving economic development through the Adam Tas Corridor project;
- Optimising municipal planning processes to enhance efficiency;
- Establishing a dedicated land invasion response unit; and
- Expanding surveillance networks to improve safety and security.

Our achievements are a testament to the commitment of our leadership, employees, and community stakeholders.

Through disciplined fiscal management, operational efficiency, and strategic partnerships, we are well-positioned to navigate challenges and seize new opportunities for development.

I extend my gratitude to Executive Mayor Jeremy Fasser, the Mayoral Committee, Councillors, Directors, municipal officials, and all stakeholders for their dedication to building a thriving and resilient Stellenbosch Municipality. As we move forward, we remain committed to fostering a municipality that is inclusive, prosperous, and responsive to the needs of all residents.

Together, we will continue to shape Stellenbosch as a place of opportunity, growth, and excellence.

It is my honour to present the third review of our 5th Generation Integrated Development Plan for positive interrogation and valued community inputs.

GERALDINE METTLER
MUNICIPAL MANAGER

CHAPTER 1:

Governance and Institutional Arrangements

1.1 Integrated Development Planning

The Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) mandates South African municipalities to formulate a five-year Integrated Development Plan (IDP) to inform the municipal budget and guide all development within the municipal area. The IDP is considered the municipality's principal strategic plan that deals with the most critical development needs of the municipal area as well as the most critical governance needs of the organisation.

As the principal planning instrument that guides and informs the municipal budget, the planning process has to provide a forum for identifying, unpacking, and resolving the real issues that face the residents of Stellenbosch Municipality. Identifying these issues in consultation with communities makes it possible for the municipality to propose realistic and workable solutions that can be budgeted for, implemented, and monitored in a controlled environment. These issues may be overarching issues that affect the whole municipality or may only affect specific communities. It is therefore crucially important that the IDP be developed after the completion of a public participation process in which community stakeholders were thoroughly consulted. The plan is also developed in partnership with the provincial and national governments as well as the district municipality.

At the heart of the IDP lies improvement in the provision of basic municipal services and expanding livelihood opportunities for the people of the Stellenbosch Municipality. The IDP also focuses on expanding and transforming municipal capacity, enterprise development, and, crucially, exploring new ways of working and living together. This is especially relevant in an ever-changing environment.

1.2 Compilation and Legal Status of the 5th Generation IDP 2022 – 2027

SECTION 35(1) OF THE MSA

(a) An IDP is adopted by the council of a municipality:
(b) is the principal strategic planning instrument that guides and informs all planning and development and all decisions with regard to planning, management, and development in the municipality;
(c) binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails; and
(d) binds all other persons to the extent that those parts of the integrated development plan that impose duties or affect the rights of those persons have been passed as a by-law.

CHAPTER 5 AND SECTION 26 OF THE MSA

Core components of IDPs: An integrated development plan must reflect-
(a) The municipal council's vision for the long-term development of the municipality, with special emphasis on the municipality's most critical development and internal transformation needs;
(b) An assessment of the existing level of development in the municipality, which must include an identification of communities that do not have access to basic municipal services;
(c) The council's development priorities and objectives for its elected term, including its local economic development aims and its internal transformation needs;
(d) The council's development strategies, which must be aligned with any national and provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
(e) A spatial development framework that must include the provision of basic guidelines for a land-use management system for the municipality;
(f) The council's operational strategies;
(g) Applicable disaster management plans;
(h) A financial plan, which must include a budget projection for at least the next three years; and
(i) The key performance indicators and performance targets are determined in terms of Section 41.

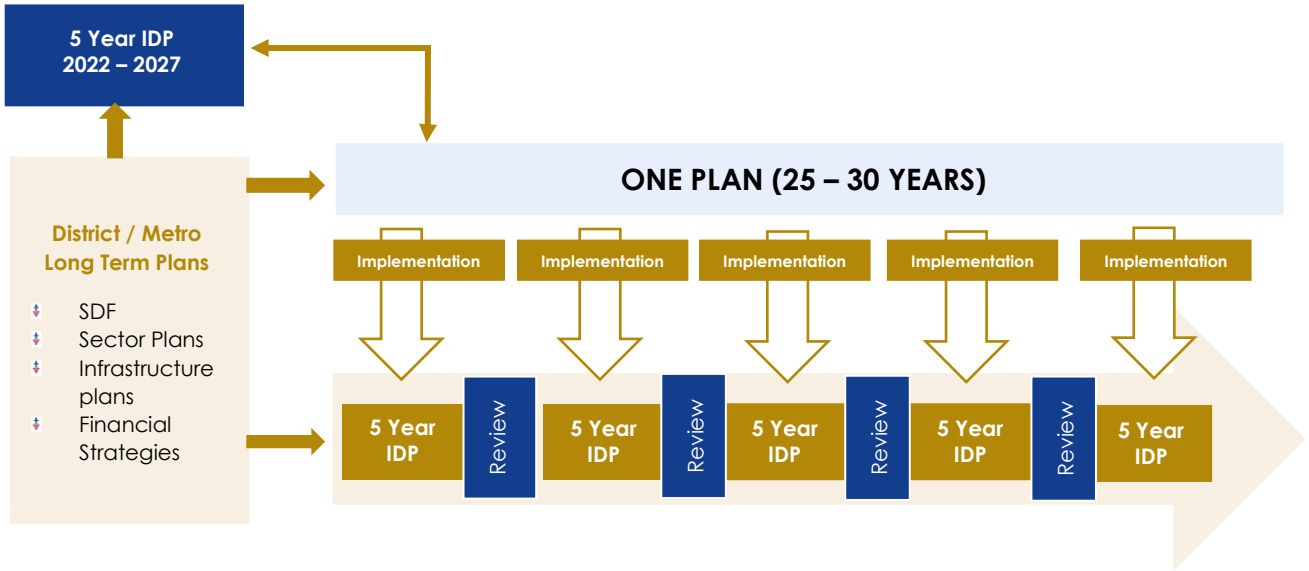
The IDP is informed by a leadership agenda, as contained in national and provincial policy documents, as well as the needs of local citizens and public, private, and community organisations. It directs and is informed by different aspects of the municipality's work, including how the municipality is structured politically and administratively, the municipal budget, the sector plans and service delivery and budget implementation plans of different municipal services, and how the municipality manages its performance.

The 3rd review of the 5th Generation IDP 2022 – 2027 outlines the following chapters:

- Chapter 1: Governance and Institutional Arrangements;
- Chapter 2: State of the Greater Stellenbosch Area;
- Chapter 3: The Strategic Policy Context;
- Chapter 4: Spatial Development Framework;
- Chapter 5: Performance Summary of the 5th Generation IDP 2022 – 2027;
- Chapter 6: One Plan: Service Delivery, Budget, Programme and Projects;
- Chapter 7: Sector Planning and Implementation;
- Chapter 8: Council Term Projects 2022 – 2027;
- Chapter 9: Public Interest and Expression of Needs (Community Participation);
- Chapter 10: Financial Plan;
- Chapter 11: Organisational Scorecard (5 Years); and
- Chapter 12: Implementation, Monitoring and Review (1-year).

1.3 Relationship between the IDP, Budget, Performance Management and Risk Management

The IDP process, together with the performance management process, should be seamlessly integrated, where the IDP ensures that the planning stage for performance management occurs, and performance management fulfils the implementation, monitoring, and evaluation of the IDP process. This is prescribed according to the Performance Management Guide for Municipalities, DPLG, 2001.



The role of the budget is to attach money to the objectives that are contained in the IDP, and the Budget gets monitored through the Service Delivery Budget Implementation Plan (SDBIP). The IDP, therefore, provides the strategic direction for the municipality, whereas the Budget should ensure the implementation of the IDP.

Risk management is one of management's core responsibilities according to Section 62 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) and is an integral part of the internal processes of a municipality. It is a systematic process to identify, evaluate, and address risks continuously before such risks can negatively impact the service delivery capacity of the Stellenbosch Municipality. Risk management provides reasonable assurance that the institution will be successful in achieving its goals and objectives.

1.4 Relationship between the IDP and One Plan

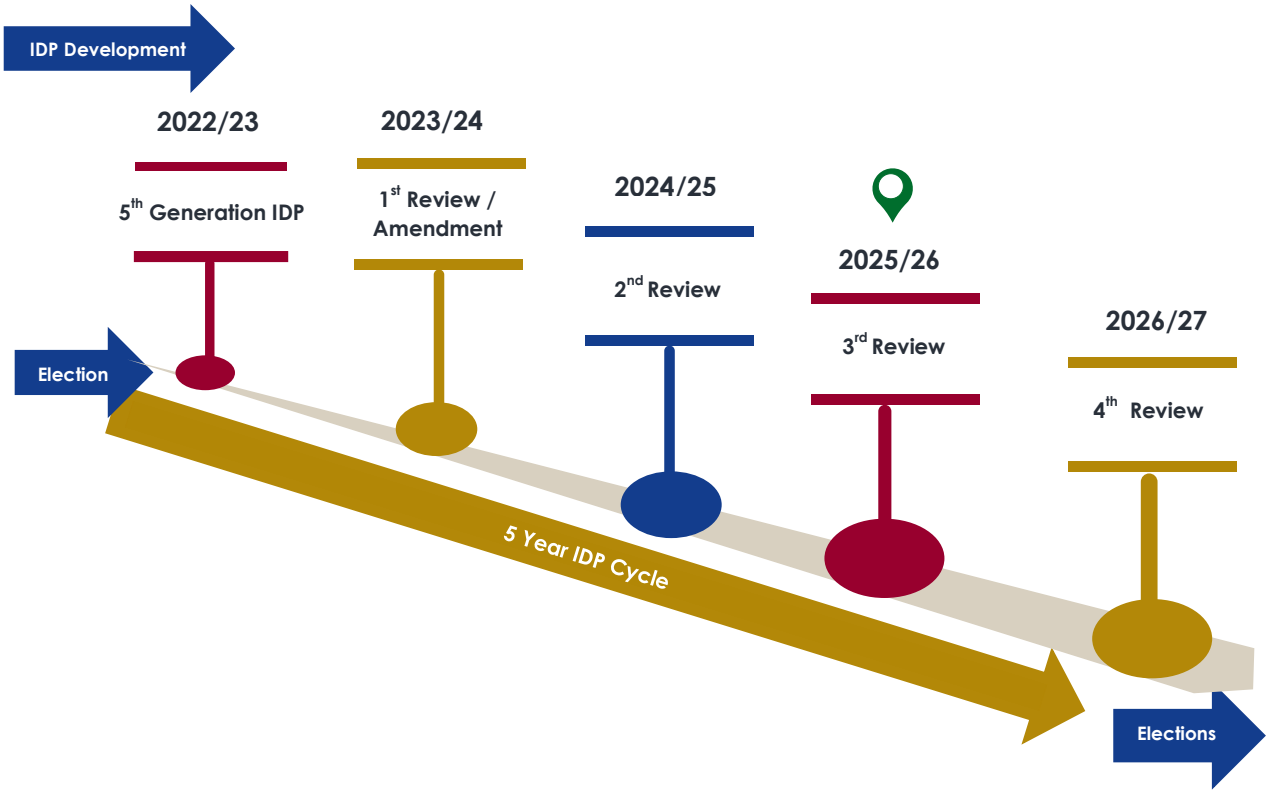
The One Plan does not replace the Integrated Development Plan (IDP) of the municipality as the "single, inclusive, and strategic plan for the development of the municipality." It is envisaged that the One Plan will strengthen and enhance the IDP and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDP. During the development of the One Plan, the IDP informed the One Plan. However, after approval of the One Plan, the IDP will be guided by the strategies and priorities outlined in the One Plan. In this regard, the IDP will be the vehicle through which the implementation of the One Plan will happen at the local government level.

Figure 1: Relationship between One Plan and IDP

1.5 The IDP and Ward Plans

The **twenty - three (23)** ward plans include:

- A consensus on priorities for the relevant ward(s);
- An implementation plan; and
- The capital budget is available for the relevant wards, including the small capital budget.



Ward plans help make sure that the IDP is more targeted and relevant to the needs of all groups, including the most vulnerable. These plans give ward committees a way to plan and carry out their roles and responsibilities in a systematic way. They are the basis for conversations between the municipality and ward committees about setting priorities and making budget requests. Ward committees will also use them to keep track of and evaluate progress throughout the year. The information is, however, on a detailed level and is not duplicated in the IDP, but a detailed ward plan is available on request.

1.6 The IDP Planning Process (five-year cycle)

According to the MSA, every new council that comes into office after the local government elections has to prepare an IDP that will guide them for the five years that they are in office. The IDP is, therefore, linked to the five-year term of office of councillors. This does, however, not restrict all proposals in the IDP to five years. The strategic goals that are part of the municipality's strategy all have a longer than five-year horizon, similar to the Spatial Development Framework (SDF) of the municipality.

A clear distinction must also be made between the main IDP, which is compiled every five years (or if a new council comes into power within the five-year period and does not accept the previous council's IDP), and the annual review of the IDP. The annual review is not a replacement for the five-year IDP, and its purpose is not to interfere with the long-term strategic orientation of the municipality. The annual review reflects, and progress reports made concerning the five-year strategy (and strategic goals) and proposes adjustments to the strategy, if necessary, because of changing internal and external circumstances that impact the appropriateness of the IDP.

Figure 2: Five–Year IDP Development and review cycle

1.7 Review of the Integrated Development Plan

Section 34 of the MSA prescribes that a municipality -

a) must review its integrated development plan –
   (i) annually following an assessment of its performance measurement in terms of section 41; and
   (ii) to the extent that changing circumstances so demand;

The review process serves as an institutional monitoring process where stakeholders can meet to discuss the successes and progress of the previous financial year. It is not designed to interfere with the long-term strategic objectives of the municipality. The review process is a strategic process to ensure the institution remains in touch with its intentions, informed of the varying needs of residents and up to date with the changing environment within which it functions.

The Stellenbosch Municipality, in collaboration with all relevant stakeholders and following the completion of the IDP public participation engagements during September and October 2024, must now review its IDP.

This is the **third review** to occur since the adoption of the 5th Generation IDP 2022 – 2027 in May 2022.

Importantly, this review does not seek to replace or rewrite the IDP that was adopted by the Council on 25 May 2022. The purpose of this review, as instructed by the MSA, is to examine the progress made on the implementation of the IDP and assess the municipality's strategic objectives and targets as set out in the IDP.

The priorities and key performance deliverables identified in this review of the IDP will seek to better inform the municipality's budget, and sector plans and streamline service delivery initiatives. This will ensure that the Stellenbosch Municipality remains on course to attain its strategic objectives.

1.8 Roles and Responsibilities

Section 53 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) stipulates, inter alia, that the respective roles and areas of responsibility of each political structure and political office bearer of the municipality and the municipal manager must be defined.

Figure 3: Roles and Responsibilities

Executive Mayor and Municipal Council	Proportional Councillors, Ward Councillors and	Municipal Manager and Management Team
In terms of the MSA and the MFMA, the Executive Mayor must: • Manage the drafting of the IDP; • Assign responsibilities in this regard to the Municipal Manager; • Submit the draft plan to the municipal council for adoption; and • Coordinate the annual revision of the IDP and determine how the IDP is taken into account or revised for the purposes of the budget. **The Municipal Council** • The Council is the ultimate decision-making authority. • Decisions to approve or amend the municipality's IDP may not be delegated and have to be taken by the full Council.	• Assist with the public participation process. • Assist the ward councillor (who is the chairperson) in identifying challenges and needs of residents. • Provide a mechanism for discussion and negotiation between different stakeholders in the ward; • Interact with other forums and organisations on matters affecting the ward; • Draw up a ward plan that offers suggestions on how to improve service delivery in the particular ward; • Disseminate information in the ward; and • Monitor the implementation process concerning its area.	• Provide technical / sector expertise and information; • Provide inputs related to the various planning steps; • Summarise / digest / process inputs from the participation process; • Discuss and comment on inputs from specialists; and • Address inputs from and give feedback to the community.

1.9 Municipal Council

The Council performs both legislative and executive functions. It focuses on legislative, oversight, and participatory roles and has delegated its executive function to the Executive Mayor and the Mayoral Committee. Its primary role is to debate issues publicly as well as facilitate political debates and discussions. Apart from their functions as policymakers, councillors are also actively involved with community work and in the various social programmes in the municipal area.

Stellenbosch Municipality is represented by 45 councillors, of whom 23 were elected directly as ward councillors. The rest of the councillors were elected based on the proportion of votes cast for the different political parties. The political composition of the Council is as follows:

Table 1: Council Political Representation

Political Party	Number of Councillors
Democratic Alliance (DA)	**28**
African National Congress (ANC)	**8**
GOOD	**3**
Economic Freedom Fighters (EFF)	**2**
African Christian Democratic Party (ACDP)	**1**
People's Democratic Movement (PDM)	**1**
Patriotic Alliance (PA)	**1**
Vryheidsfront Plus (VF)	**1**
Total	**45**

Below is a table that categorises the councillors within their respective political parties and wards.

Table 2: Ward Councillors and Proportional Councillors

No.	Name of Councillor	Capacity	Political Party	Ward Councillor and Proportional (PR)

1.10 Executive Mayor and Mayoral Committee (MayCo)

The Mayoral Committee assists the Executive Mayor of the municipality, who oversees the municipality's political executive branch. The Executive Mayor is at the centre of the system of governance since executive powers are vested in the Executive Mayor to oversee the day-to-day affairs. This encompasses an overarching strategic and political responsibility. The key element of the executive model is that executive power is vested in the Executive Mayor, in addition to delegated powers assigned by the Council. Although accountable for the strategic direction and performance of the municipality, the Executive Mayor operates in consultation with the Mayoral Committee.

Table 3: Executive Mayor and Mayoral Committee (MayCo)

Name of member	Portfolio
Cllr J Fasser	Executive Mayor
Cllr M Slabbert	Deputy Executive Mayor, including Planning, Local Economic Development and Tourism
Cllr R Pheiffer	MayCo member: Infrastructure Services
Cllr N Olayi	Acting MayCo member: Community Services
Cllr J Williams	MayCo member: Protection Services
Cllr L Nkamisa	MayCo member: Corporate Services
Cllr JC Anthony	MayCo member: Finance
Cllr N Olayi	MayCo member: Parks and Open Spaces
Cllr R du Toit	MayCo member: Human Settlements
Cllr C Manuel	MayCo member: Rural Management and Environment
Cllr T Kumm	MayCo member: Sport, Youth and Culture

Figure 4: Executive Mayoral Committee

1.11 The Administration

The Municipal Manager is the Chief Accounting Officer of the municipality. The Municipal Manager is the head of the administration and primarily must serve as the chief custodian of service delivery. The Municipal Manager is assisted by the Management Team, which reports directly to the Municipal Manager. The structure of the management team is outlined in the diagram below:

Figure 5: Municipal Management Team

Geraldine Mettler
Municipal Manager
Strategic Management; Internal Audit; Corporate Governance; Risk Management; Intergovernmental Relations; International Relations; Integrated Development Planning; Organisational Performance Management; Communications; and Knowledge Management.

Vacant
Director: Corporate Services
Administrative Services; Legal and Compliance; Human Resources Management; Individual Performance Management; Information and Communication Technology; Councillor's Support; Committee Services; Municipal Court; and Properties Management and Municipal Building Maintenance.

Anthony Barnes
Director: Planning and Economic Development
Development Management; Development Planning; Integrated Human Settlements; Building Management; Heritage Resource Management; Spatial Planning and Land Use Management; Local Economic Development and Tourism, Housing Development; Informal Settlements; and Housing

Kevin Carolus
Chief Financial Officer
Revenue Management; Expenditure Management; Budget Preparation and Management; Management of Financial Statements; Supply Chain Management; Financial Systems; and Asset Management.

Shane Chandaka
Director: Infrastructure Services
Roads, Transport and Storm Water; Water and Wastewater Services; Electrical Services; Waste Management; and Infrastructure Planning, Development, and Implementation.

Gary Boshoff
Director: Community and Protection Services
Community Development; Protection Services; Disaster Management and Fire Services, Traffic and Law Enforcement Services; Library Services; Parks and Cemeteries; Recreation, Sport, and Halls; and Environmental Management.

1.12 First-Year Process Followed

The table below reflects the preparation for the 5th Generation Integrated Development Plan 2022 – 2027.

Table 4: Preparation for the first year of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2021	• Approval of the *m*SDF / IDP / Budget Process Plan / Time Schedule. • Cape Winelands District Municipality hosted a discussion session on the Section 27 Framework.
September 2021 – November 2021	• With the Local Government Elections completed in November 2021, it was critical for the municipality to carefully manage the process to ensure compliance with legislation and the successful development of the 5th Generation IDP 2022 – 2027, therefore an Amended *m*SDF / IDP / Budget Process Plan / Time Schedule was submitted to the Council on 23 November 2021 for consideration and approval. • The IDP public participation period started on **29 November 2021** and ended on **12 January 2022**. • A link to access IDP pre-recorded videos was published on the municipal YouTube Channel, shared via Facebook, Twitter, WhatsApp, Stellenbosch Citizen App and on the municipal website. Feedback was also provided on the implementation of projects per ward. • An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the development of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the submission form were also made available at all libraries and ward offices.
December 2021 - February 2022	• An Online Sector Engagement was held on **11 January 2022** to determine the sector needs and collectively devise plans to address the needs. • MayCo and management had a strategic session from **13 – 14 January 2022** to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions). • Departmental sessions were held with all departments to set their 5–year implementation plans for the 5th Generation IDP 2022 – 2027.
March 2022 – April 2022	• The Process Plan for 2022 – 2027 to guide the planning, drafting, adoption and review of the 5th Generation IDP 2022 – 2027 was approved by the Council on **30 March 2022**, for public comment for 21 days. • A second revision of the SDF / IDP / Budget Time Schedule for 2022/23 was submitted to the Council on **30 March 2022** for consideration and approval, which in effect moved the adoption of the Process Plan to May 2022. This was done to ensure compliance and alignment between the MSA Section 27 Framework of the CWDM and the Process Plan for 2022 – 2027 of the Stellenbosch Municipality. • The draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 for Stellenbosch Municipality were submitted to the Council on **30 March 2022** for consideration and approval to be released for public comments. • The IDP and Budget public participation process within the Stellenbosch Municipal area commenced on **04 – 28 April 2022.** • Inputs and comments on the draft 5th Generation IDP 2022 – 2027 and draft MTREF 2022/23 – 2024/25 will be compiled and distributed to the directorates for consideration in finalising the IDP and Budget.
May – June 2022	• Adoption of the final IDP and Budget, Tariffs and Budget-related policies. • Submit the adopted IDP to the Cape Winelands District Municipality, Provincial Government and National Treasury. • Approval of SDBIP by the Executive Mayor within 28 days after adoption of the IDP and Budget.

1.13 Second-Year Process Followed

The table below reflects the preparation for the 1st review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2023/24 financial year.

Table 5: Preparation for the second year for the 1st review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2022	• Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2023/24
September 2022 – November 2022	• The IDP public participation period was open from 07 **– 28 September 2022**. • The hybrid public participation meetings were held from **19 – 22 September 2022**. • The online stakeholder engagement was held on **27 September 2022.** • An electronic written submission form was created on the municipal website for the community and stakeholders to provide input into the 1st Review of the 5th Generation IDP 2022 – 2027. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. • Hard copies of the "Have Your Say' submission form were also made available at all libraries and ward offices. • An all-ward councillor session was held on **7 October 2022**, for the reprioritisation of ward priorities for the 2023/24 financial year taking into account the community inputs as baseline information for the reprioritisation of ward priorities.
December 2022 - February 2023	• Departmental sessions were held to review the IDP deliverables and targets set for the period 2022 – 2027. • An Indaba 2 Engagement was attended on **7 February 2023** to provide the opportunity to the municipality to engage Western Cape Government (WCG) departments on planning priorities, service delivery challenges and WCG-planned projects / programmes. • Management strategic session on **15 and 16 February 2023** to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2023	• MayCo and Council considered the draft 1st Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. • The IDP and Budget public participation period has commenced on **03 April – 25 April 2023.** • A virtual Stakeholder Engagement was held on **20 April 2023** to provide feedback on major projects / programmes / initiatives. • The closing date for the IDP and Budget submission was **25 April 2023**. • Consultation and refinement of SDF, IDP and Budget documents. • Adoption of final IDP, Budget, Tariffs, and budget-related policies. • Submission of the adopted IDP to the Provincial Government and other role-players.

1.14 First Amendment Process Followed

The table below stipulates the key activities in preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027:

Table 6: Preparation for the 1st Amendment of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2023 - September 2023	• Submit the draft proposed amendments to the IDP to MayCo, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to recommend to the Council. • Submit the proposed draft IDP amendments, taking into consideration the requirements of the Municipal Planning and Performance Management Regulations, to the Council for approval to obtain public comment (21 days). • The proposed draft IDP amendments were advertised for a period of 21 days to allow for public comment on the municipal website and local newspaper. • The period for public comment on the proposed draft IDP amendments was 21 days. • Submit the proposed draft IDP Amendments to the MEC, Provincial Treasury, National Treasury, and other affected organs of state within 10 working days after the Council approval. • Submit the draft IDP Amendment to the District Municipality for input within 10 working days after the Council approval.
October 2023	• Submit the final amended IDP to the Council for adoption together with the memorandum in terms of Regulation 3. • The adopted IDP Amendment was published on the municipal website. • An electronic and hard copy of the adopted IDP Amendment was submitted to the MEC for local government as well as Provincial Treasury, National Treasury, and District Municipality within 10 days of the adoption or amendment of the plan. • A notice was published in the local newspaper to inform the public of the adoption of the amended IDP (within 14 days of the adoption of the plan) and to place hard copies in libraries and ward offices.

1.15 Third-Year Process Followed

The table below reflects the preparation for the 2nd review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2024/25 financial year.

Table 7: Preparation of the third year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
July / August 2023	▪ Approval of the Spatial Development Framework (SDF) / Integrated Development Plan (IDP) / Budget Time Schedule / Process Plan for 2024/25
September 2023 – November 2023	▪ The IDP public participation period was open from 04 September to 04 October 2023. ▪ The area–based IDP public participation open days were held from 12 September – 02 October 2023. ▪ The IDP stakeholder engagement was held on 04 October 2023. ▪ An electronic submission form was created on the municipal website for the community and stakeholders to provide their community needs and inputs. This website link (URL) was shared via Facebook, Twitter, WhatsApp, and the Stellenbosch Citizen App. ▪ Hard copies of the "Have Your Say' submission form were also made available at all libraries and ward offices. ▪ All-ward councillor sessions were facilitated from 14 to 16 November 2023, for the reprioritisation of the 2022 – 2027 ward priorities, taking into account community inputs as baseline information for the reprioritisation of ward priorities.
December 2023 - February 2024	▪ Departmental sessions were held to review the IDP deliverables and targets for the 2nd Review of the 5th Generation IDP 2022 – 2027. ▪ MayCo and Management had a strategic session on 12 January 2024 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March-May 2024	▪ MayCo and Council to consider the draft 2nd Review of the 5th Generation IDP 2022 – 2027 to obtain public input and comments. ▪ The IDP and Budget public participation period was conducted from **02 April – 23 April 2024**. ▪ A Stakeholder Engagement was held on **16 April 2024**. ▪ The Provincial SIME Engagement took place on **03 May 2024**. ▪ Consultation and refinement of the IDP and Budget documents. ▪ Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2024**. ▪ Submission of the adopted IDP to the Provincial Government and other role-players.

1.16 Fourth-Year Process Followed

The table below reflects the preparation for the draft 3rd review of the 5th Generation Integrated Development Plan 2022 – 2027 for the 2025/26 financial year.

Table 8: Preparation of the fourth year for the review of the 5th Generation IDP 2022 – 2027

Date	Action(s)
August 2024	▪ The Executive Mayor and Mayoral Committee recommend that the SDF/IDP/Budget Time Schedule / Process Plan (at least 10 months before the start of the budget year) be approved by the Council. ▪ The SDF / IDP / Budget Time Schedule were adopted by the Council on 23 August 2024.
September 2024 – December 2024	▪ The IDP public participation period was open from 09 - 30 September 2024. ▪ The area–based IDP public participation open days were held from 10 – 16 September 2024. ▪ The IDP stakeholder engagement was held on 25 September 2024, attended by various stakeholders and role-players. ▪ On the municipal website, an electronic submission form has been created for the community and stakeholders to submit feedback and input on community needs. This website link (URL) was shared on Facebook, *X*, WhatsApp, and through the Stellenbosch Citizen App. ▪ Hard copies of the "Have Your Say' submission form were also made available at all libraries and ward offices. ▪ On 22 November and 02 December 2024, all-ward councillor sessions were held to reprioritise the ward priorities for 2022 - 2027, with the community input as baseline information.

Date	Action(s)
January 2025 - February 2025	• Departmental sessions were held to review the IDP deliverables and targets for the 3rd review of the 5th Generation IDP 2022 – 2027. • MayCo and Management had a strategic session on 17January 2025 to consider the external and internal analysis and strategies around the 5-year development priorities and operational strategies (programmes / projects / activities and actions).
March 2025 - May 2025	• MayCo and Council approved the draft 3rd review of the 5th Generation IDP 2022 – 2027 on **31 March 2025** to obtain public input and comments. • The IDP and Budget public participation period were open from **07 – 29 April 2025** for public input and comments. • Area - based IDP and Budget public participation open days were held from **08 – 14 April 2025** which offered an opportunity for community members to engage in one–on–one discussions with departmental representatives and submit verbal input. • An IDP and Budget stakeholder engagement was held on **23 April 2025**, attended by councillors, senior management, stakeholders, and role-players in the Stellenbosch municipal area. • Consultation and refinement of the IDP and Budget documents. • Adoption of the final IDP, Budget, Tariffs, and budget-related policies by the Council in **May 2025**. • Submit the adopted IDP to the Provincial Government and other role-players.

1.17 Corporate Governance

Corporate governance is the set of processes, practices, policies, laws, and stakeholders affecting the way an institution is directed, administered, and controlled. Corporate governance also encompasses the relationships among the many stakeholders involved and the goals for which the institution is governed.

1.18 Risk Management

Section 62 of the MFMA, states that the Accounting Officer should take all reasonable steps to ensure that the municipality has and maintains effective, efficient, and transparent systems of financial and **risk management** and internal control, as well as the effective, efficient and economical use of the resources of the municipality.

Certain risks have also been revised to ensure that the municipality can appropriately respond to the impact of these risks on municipal service delivery, taking into account changing external and internal factors. Provision was also made for ineffective service delivery due to geopolitical instability and the impact of Ukraine and Russia war on global commodities, particularly fuel.

The top **5 strategic** risks identified include:

R **01** Availability and cost of electricity

I **02** Increase risk and land invasion

S **03** Economic downturn due to civil unrest and crime

K **04** Climate Change

S **05** Scarcity of Landfill Space

The municipal risks have been aligned with the Integrated Development Plan (IDP) through linkages to the Strategic Focus Areas (SFAs). The following table depicts these linkages:

Table 9: Risk and IDP Alignment

Strategic Risks						
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Directorate**
1	Availability and cost of electricity	Continuous and persistent load shedding; sustainability of the national power supplier	Green and Sustainable Valley Dignified Living	**10**	**10**	Directorate: Infrastructure Services
2	Increased risk of land invasion	Legal precedents are set under the disaster management declaration, limiting the municipal scope to evict. Illegal invasions and land grabs. Compromising housing development and housing opportunities	Dignified Living Safe Valley Good Governance and Compliance	**9**	**10**	All Directorates
3	Economic downturn due to civil unrest, crime, and continuous load-shedding	Increase in criminal activities, civil unrest, and reputational risk due to the perceived increase in the said activities. The impact of prolonged load shedding - not sufficient light at night as streetlights, CCTV cameras, and traffic lights are not functioning—can lead to more criminal activities.	Safe Valley Dignified Living	**10**	**8**	Directorate: Community and Protection Services
4	Climate Change	Changing weather patterns, unpredictable rainfall, flash floods, drought, natural disasters, fires (seasonal and other).	Green and Sustainable Valley Safe Valley	**10**	**8**	Office of the Municipal Manager
5	Scarcity of landfill space	Unavailability of suitable land; costs of SLAs and alternative waste disposal; legislative requirements, i.e., EIA applications and approvals, etc.	Green and Sustainable Valley	**8**	**8**	Directorate: Infrastructure Services
6	Increase in community unrest since the growth in demand for housing exceeds the resources available for development	Lack of bulk infrastructure, lack of identified and suitable land, unrealistic eviction judgments, housing backlogs, and migration.	Dignified Living Safe Valley	**8**	**8**	Directorate: Community and Protection Services
Operational Risks						
1	Timeous Capital Spending	A steady increase in budget allocation, growing population and demand for services; demand management.	Good Governance and Compliance	**10**	**4**	Directorate: Financial Services
2	Insufficient burial space in the greater Stellenbosch	Planning and funding; land availability. Insufficient funding.	Dignified Living	**8**	**8**	Directorate: Community and Protection Services

Strategic Risks						
Risk Item	**Risk Description**	**Risk Background**	**Strategic Focus Areas**	**Impact Rating**	**Likelihood Ratings**	**Directorate**
3	Water Security	* Lack of a sustainable source of water * Growing population - population and new development growth * Inadequate infrastructure systems * Polluted natural water sources * Dependency on external sources (CoC) * Limited water supply in region * Limited	Dignified Living	**8**	**5**	Directorate: Financial Services
4	High Vacancy Rate	A skilled and capable workforce is necessary to support growth objectives, and quality and timeous service delivery need to be provided by all departments.	Good Governance and Compliance	**8**	**4**	Directorate: Corporate Services
5	Material misstatements in the AFS that constitute noncompliance with Section 122 of the MFMA. System errors, transactions and events not recognised as they occur and accordingly nor recorded in the financial period it	Material misstatements in the AFS that constitute noncompliance with Section 122 of the MFMA. System errors, transactions, and events are not recognised as they occur and accordingly are not recorded in the financial period they occurred.	Good Governance and Compliance	**6**	**4**	Office of the Municipal Manager

1.19 Anti–Corruption and Anti–Fraud

SECTION 83(C) OF THE MSA

Refers to the implementation of effective bidding structures to minimise the possibility of fraud and corruption.

SECTION 115(1) OF THE MFMA

States that the accounting officer must take reasonable steps to ensure that mechanisms and separation of duties in a supply chain management system are in place to minimise the likelihood of corruption and fraud.

SECTION 62(1) OF THE MFMA

States the following: "The accounting officer of a municipality is responsible for managing the financial administration of the municipality and must, for this purpose, take all reasonable steps to ensure: –

(a) That the resources of the municipality are used effectively, efficiently, and economically;
(b) That the full and proper records of the financial affairs are kept in accordance with any prescribed norms and standards;
(c) That the municipality has and maintains effective, efficient, and transparent systems—
(d) Of financial and risk management and internal control;
(e) Of internal audit operating in accordance with any prescribed norms and standards;
(f) That unauthorised, irregular of fruitless and wasteful expenditure and other losses are prevented; and
(g) That disciplinary or, when appropriate, criminal proceedings are instituted against any official of the municipality who has allegedly committed an act of financial or an offence in terms of Chapter 15."

1.20 Audit and Performance Audit Committee (APAC)

The Municipal Audit and Performance Audit Committee (APAC) (refer to the table below for members of the Audit Committee), appointed in terms of Section 166 of the MFMA, has also been appointed as the Performance Audit Committee. Section 166(2) of the MFMA states that an audit committee is an independent advisory body that must:

(a) advise the municipal council, the political office-bearers, the accounting officer, and the management staff of the municipality on matters relating to: –

- internal financial control and internal audit;
- risk management;
- accounting policies;
- the adequacy, reliability, and accuracy of financial reporting information;
- performance management;
- effective governance;
- compliance with this Act, the annual Division of Revenue Act, 2013 (Act No. 2 of 2013), and any other applicable legislation;
- performance evaluation; and
- any other issues referred to it by the municipality.

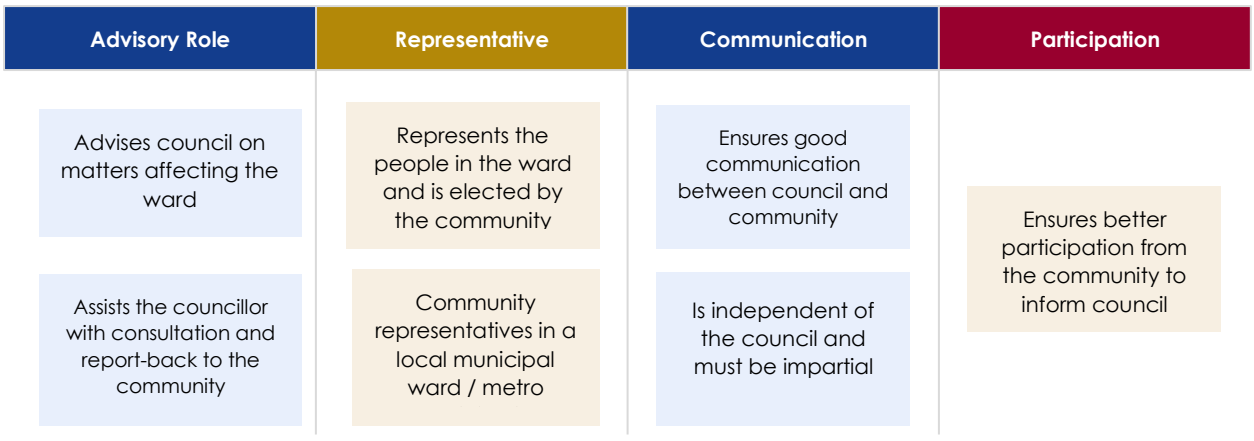

Table 10: Members of the Audit Committee

Name of representative	Capacity
Linda C Nene (Mr)	Chairperson
Len Mortimer (Mr)	Member
Reyhana Gani (Ms)	Member
Mervyn Burton (Mr)	Member

1.21 Ward Committees

Stellenbosch Municipality has a ward committee system in place, which plays a crucial role in achieving the aims of local governance and democracy, as mentioned in the Constitution of 1996. A ward committee is independent of the council and not politically aligned. The figure below depicts the main duties of the ward committees.

Figure 6: Main duties of the Ward Committee

1.22 Stakeholders

To ensure effective service delivery, high levels of cooperation must exist between all three spheres of government. Effective inter-governmental relations (IGR) structures are especially important to the developmental role of municipalities. This role can only be fulfilled through the active involvement of

all spheres of government in the setting of priorities, resource allocation, and development planning.

The demonstration of the importance of partnerships for the municipality is illustrated in the table below.

Table 11: Key Stakeholders

Name of Partner	Purpose of MOU / MOA
@ Heart	The @heart partnership is a long-standing relationship built on experience with youth work and HCT testing from a municipal facility.
City of Cape Town and Drakenstein Municipality	Partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Community structures (Forums, ECD centres, religious fraternities, etc.)	Aim to promote and implement: - platforms to share knowledge; - disaster risk reduction initiatives; - community safety programmes; and - campaigns to promote safe, resilient, sustainable communities.
CSIR (Council of Scientific and Industrial Research)	A partnership aimed at multidisciplinary research and development by supporting innovation in Stellenbosch.
Department of Education	Aims to promote a culture of prevention, preparedness, and resilience at all levels through knowledge, innovation, and education.
Department of Social Development, DCAS, Cape Winelands District Municipality	Joint implementation of programmes focusing on common issues within WC024.
Disaster Management Advisory Forum	An advisory forum on all safety issues, as well as remedial measures implemented to address and alleviate and / or minimise risks.
Executive Mayor and Rector Forum	A partnership with the University of Stellenbosch to ensure aligned development planning and that the municipality draws from the University's expertise and resources.
Memorandum of Cooperation between the Stellenbosch Municipality and Stellenbosch University (SU)	Cooperation in terms of closed-circuit television is in the interest of the security of the town and the campus, with a view to a crime-free university town.
Genius of Space	This initiative developed from and forms part of the Western Cape 110% Green Initiative. The Biomimicry Genius of Space project is a registered flagship project of 110% Green. This initiative combines two priorities of the Western Cape Government – the Berg River and the Green Economy – to find an innovative solution to water pollution in the Berg River.
Green Cape	The Green Cape partnership represents cooperation with the province's 110% green initiatives, focusing on alternative waste management initiatives and energy efficiency.
HeartFlow	Helping people on the fringes of society. Provide paper coupons that can be exchanged for a stay-at-the-night shelter, a blanket, or a meal. The programme was extended to include an electronic app through which said coupons can be bought to benefit people who are homeless.
ICLEI (International Council for Local Environmental Initiatives)	A partnership between the City of Cape Town, ECLEI and Stellenbosch Municipality to discuss developments in Transport, Waste and Electricity Generation, towards ensuring sustainability.
IMESA (Institute for Municipal Engineers South Africa)	A partnership with IMESA aimed at strengthening knowledge and capacity related to municipal infrastructure and service delivery.
Infrastructure Innovation Committee (IIC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring sustainable and innovative infrastructure provisions to meet the needs of the municipality and achieve future sustainability.
Integrated Development Committee (IDC)	A partnership with Stellenbosch University and other stakeholders aimed at exploring spatial and urban planning possibilities for Stellenbosch to meet the needs of the municipality and the University.
IPC (Integrated Planning Committee)	The Integrated Planning Committee is a working group between the City of Cape Town, Stellenbosch, Saldanha Bay, Overstrand, Theewaterskloof, and Drakenstein Municipality that discusses all transport-related matters to effectively promote regional planning.
Landfill Monitoring Committee	A partnership with the Devon Valley residents, whereby residents monitor the Stellenbosch landfill site.

Name of Partner	Purpose of MOU / MOA
LTAB (Land Transport Advisory Board)	A partnership was formed between political leaders to discuss Land Transport related matters that affect transport in the area.
NMT (Non-motorised Transport) Working Group	A working group that discusses all Non-Motorised Transport matters in the Stellenbosch area. The group consists of NMT users, officials, representatives from the University and the disabled fraternity.
Provincial Disaster Management Centre, Cape Winelands District Municipal Disaster Management Centre	Aims to promote the development, implementation, and maintenance of effective services within its area of jurisdiction.
Provincial Waste Management Officer's Forum	Quarterly Meetings (All designated Waste Management Officers of Western Cape engage with the Provincial Government's Waste Management Department (DEA&DP on issues relating to policy, best practice, etc.).
Ranyaka	Sustainable and integrated solutions to the challenges facing towns, neighbourhoods, and communities.
Roads Safety Management	Assisting with schools and education, special projects, e.g. Learner's license classes.
Safety Forum	An advisory forum to the Executive Mayor on all safety issues, as well as remedial measures implemented to address and alleviate threats.
SALGA Municipal Benchmarking Committee	A partnership aimed at improving efficiency and effectiveness through comparative process benchmarking, peer-to-peer operational knowledge sharing, and interactive performance improvements.
SCORE	Youth Sports Development at the Indoor Sports Centre, Franschhoek.
Stellenbosch Alternate Energy Research	A joint working relationship is being launched among the University of Stellenbosch, the Council for Scientific and Industrial Research, the Western Cape Government, and the municipality to investigate the generation of alternative electricity to combat load shedding from Eskom.
Visit Stellenbosch	A partnership with the umbrella tourism body for the Greater Stellenbosch area aimed at growing and sustaining the municipality's tourism industry and broadening tourism-related benefits.
Social Housing Regulatory Authority (SHRA)	An informal working partnership on promoting and implementing Social Housing within the Stellenbosch Municipal area.
Stellenbosch and Gotland Municipality Partnership	A partnership with Gotland municipality focusing on programmes in local economic development.
Stellenbosch Heritage Foundation	The initiative is aimed at providing support to the municipality on the interactive website of the Heritage Foundation and assisting with the compilation of the heritage inventory.
Stellenbosch Infrastructure Task Team (SITT)	A partnership with the University of Stellenbosch and other stakeholders aimed at exploring sustainable infrastructure provision to meet the needs of the municipality.
Stellenbosch Night Shelter	A partnership to enable appropriate management of the municipal night shelter.
Stellenbosch River Collaborative Steering Committee	A partnership was formed between various role-players to improve the water quality in the Eerste River catchment, with the focus being on the Plankenbrug River.
Mobility Forum and NMT Working Group	A Mobility Forum and NMT Working Group were established to discuss transport-related matters that affect Stellenbosch, including all relevant governmental institutions and other role-players.
University of Stellenbosch – Student Representative Council	A partnership with the University, whereby students provide: • relief aid (clothing, food); • placement of students to assist during incidents/disasters; and • awareness programmes.
University of Stellenbosch – Department of Geography and Environmental Studies	A partnership with the University and other stakeholders focusing on strengthening community-based risk assessment capabilities in disaster-prone areas.
University of Stellenbosch – Maties Sport: Community Interaction	A partnership striving for excellence in meeting the needs of the youth through innovative and sustainable programmes to disseminate information on risk avoidance, hazards and their effects, and preventative activities.
Western Cape Planning Heads Forum	A partnership with all local municipalities within the Western Cape and the Western Cape Government Department of Environmental Affairs and Development Planning is aimed at the sharing of best practices and improving coordination on matters related to the Spatial Planning and Land Use Management sector.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership around the implementation of the Adam Tas Corridor Catalytic initiative.

Name of Partner	Purpose of MOU / MOA
Western Cape Government Department of Environmental Affairs and Development Planning.	A Partnership around the development of an Inclusionary Housing Policy Framework for Stellenbosch Municipality.
Western Cape Government Department of Environmental Affairs and Development Planning.	A partnership through the Greater Cape Metro Regional Spatial Implementation Framework has been initiated to improve coordination around the development of the Klapmuts area.
Western Cape Department of Public Works, Roads, and Transport	As part of the Provincial Sustainable Transport Programme (PSTP), the Western Cape Department of Public Works, Roads, and Transport identified Stellenbosch as a priority municipality for the development of a sustainable transport system. The emphasis will be on the development of a public transport system and the development of infrastructure to improve non-motorised transport.
Western Cape Recycling Action Group Forum	Quarterly meetings (meetings involving the private sector, industries, and government in terms of waste minimisation initiatives).
WOF (Working on Fire)	A partnership aimed at promoting capacity building through various programmes helps to develop social cohesion.

CHAPTER 2:
State of the Greater Stellenbosch Area

2.1 Introduction

Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain Stellenbosch Municipality is located at the edge of the City of Cape Town but still manages to retain its distinct small-town character. This undoubtedly gives Stellenbosch a strong competitive advantage – sharply contrasting with similarly sized towns located 400 km or more from the nearest metropolis. Aside from being a mere 50 km from Cape Town's central business district (CBD) and being flanked by the N1 and N2 main routes, Stellenbosch is also just 30 km away from the sea (at Somerset West/Strand) and only a few kilometres away from one of the most attractive mountain ranges of the Boland. In addition, Stellenbosch is a mere 28 km from Cape Town International Airport, one of South Africa's top (air) links to the global economy, and not much further away from Cape Town Harbour, the shipping portal to both the Atlantic and Indian Oceans.

This convergence of environmental resources, scenic quality and business opportunities has two other mutually reinforcing spin-offs: The largest number of JSE-listed companies based in any small South African town have their headquarters in Stellenbosch, and the town is home to a disproportionately high number of corporate CEOs and executives, which in turn means that it can sustain a comparatively high level of economic activity and consumer services for a town of its size. This results in other benefits throughout the value-add chain and for employment. The municipal area covers approximately 900 km². The municipality's area of jurisdiction includes the towns of Stellenbosch and Franschhoek, as well as several rural hamlets such as Wemmershoek, La Motte, De Novo, Kylemore, Pniël, Johannesdal, Lanquedoc, Groot Drakenstein, Muldersvlei, Klapmuts, Elsenburg, Raithby, Jamestown, Koelenhof and Vlottenburg (most with a population of less than 5 000). Apart from formal settlement areas, the municipal area also includes several informal settlements. Franschhoek, known as the "French Corner", is celebrated for its exceptional culinary scene, offering a delectable fusion of French and South African flavours. It is a favourite among local and international tourists. Due to recent developments, Klapmuts is considered a regional growth node thanks to its regional connectivity.

Stellenbosch town is the second oldest town in South Africa, dating back to 1679 when an island in the Eerste River was named Stellenbosch by the then Governor of the Cape, Simon van der Stel. The first farming activities in the area were started in 1679. Today, the area has become primarily known for its extraordinary wines and fruits. The towns of Stellenbosch and Franschhoek are renowned for various architectural styles such as Dutch, Georgian, and Victorian, which reflect their heritage and traditions, but also divisions of the past.

The area houses excellent educational institutions, including the University of Stellenbosch and several prestigious schools. It has a strong business sector, ranging from major South African businesses and corporations to smaller enterprises and home industries. The tourism industry alone is responsible for the creation of about 18 000 jobs in the area. Wine farms and cellars abound, and the area is the home of the very first wine route in South Africa. A variety of sports facilities are available. Coetzenburg, with its athletics and rugby stadiums, has delivered star performances over many generations. The municipal area has a variety of theatres, which include Stellenbosch University's HB Thom Theatre,

Oude Libertas Amphitheatre (renowned for its summer season of music, theatre, and dance), and Spier Amphitheatre, as well as Klein Libertas Theatre, Dorp Street Theatre, and Aan de Braak Theatre.

2.2 Ward Demarcation

The Stellenbosch Municipality is currently structured into the following **23** wards:

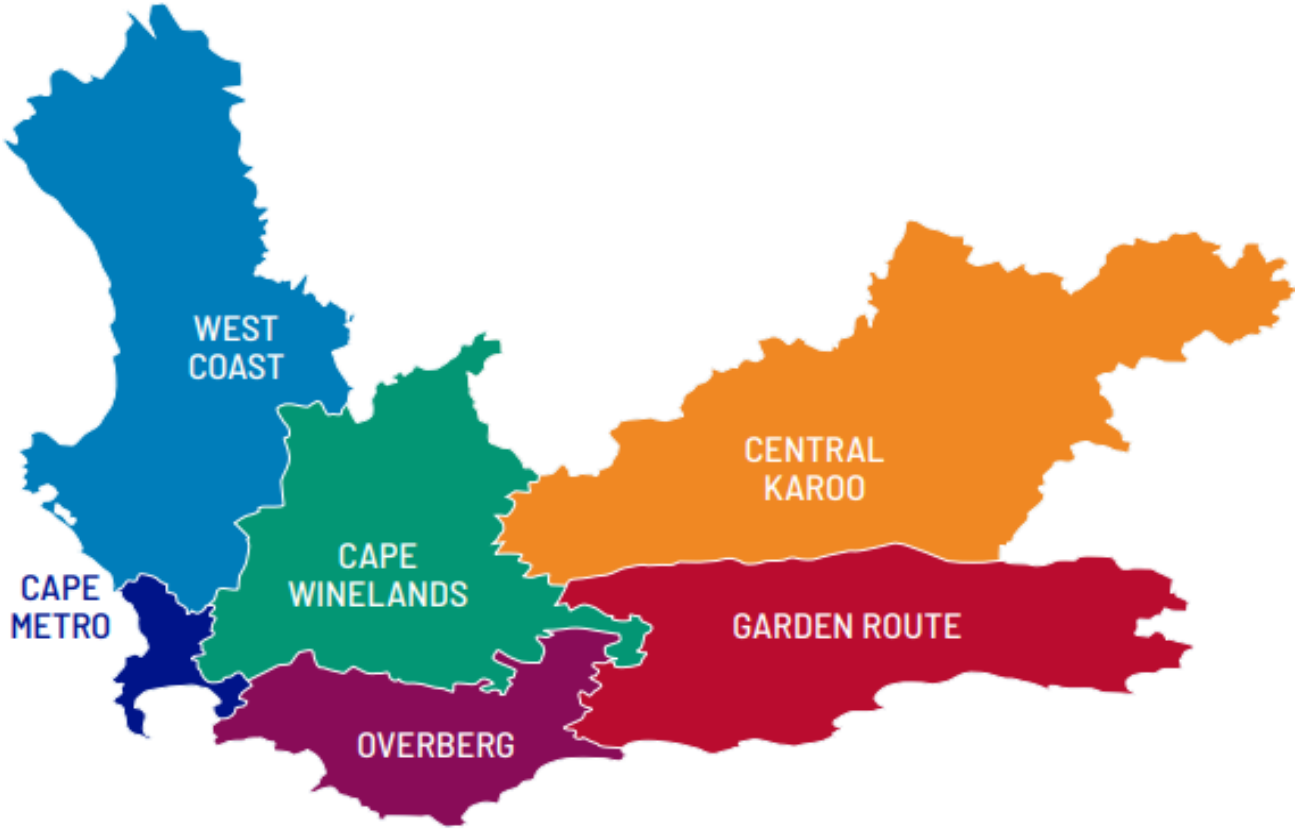

Table 12: Municipal ward demarcation

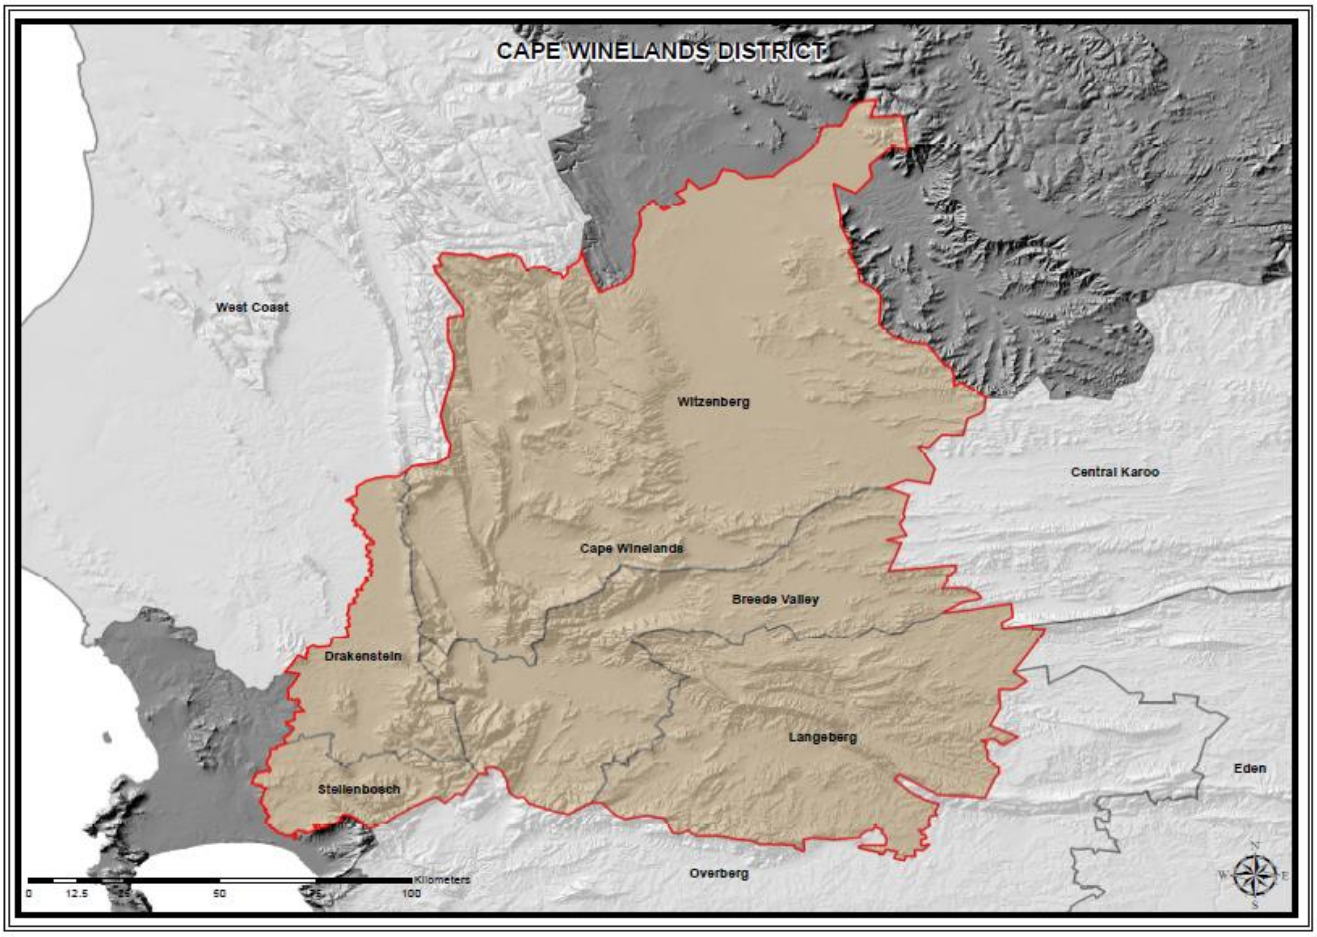
Ward	Areas
1	Mooiwater, Franschhoek Town and Surrounding Farms
2	Langrug, La Motte, Dennegeur, Groendal
3	Lanquedoc, Wemmershoek to La Motte Wine Farm and Leopards Leap Wine Farm
4	Kylemore, Johannesdal, Pniël and Surrounding Farms
5	Ida's Valley (Hillside Village, La Gratitude Park (Kreefgat), The Ridge, La Roche, Lindida, Bloekomlaan(Moses / Martin) Lindley)
6	On the corner of Moffat Street to the end of Lelie Street, the Corner of Moffat Street to Rustenburg Road, Desch Street to Rustenburg Road, Moffat Street, Hahn Street, Weber Street, Tindell Street, Juffernbruch Street, Kahler Street, Luckhoff Street, Erasmussmith Street, Baker Street, Desch Street, Lelie Street, Protea Street to Erasmusmith Street, Botmanskop Way, Dahlia Street, Speler Street, Rustenburg road of the corner of Helshoogte Road to Lelie Street; Glenelly Estate in Lelie Street; Helderfontein in Helshoogte Road; Nietvoorbij on R44; Blue Jay / Timberlea Trust Farm on R44; Kloofbosch on R44; Babin Farm on R44; Morgenhoff Wine Estate on R44; Remhoogte on R44; Groenhof on R44; Muratie Wine Estate on R44; Delheim Wine Estate on R44; Kanonkop on R44; Uitkyk on R44; Warrick on R44; Lievland on R44
7	Mostertsdrift, Karindal, Rozendal, Uniepark, Simonswyk and Universiteitsoord
8	Stellenbosch University campus and university residence area; Coetzenburg, (partially:) Koloniesland
9	Stellenbosch CBD, Part of the US campus (residential areas within both these areas), the Southern border is the Eerste River, the Northern border is Merriman Street, the Eastern border is Die Laan and the Western border is Bird Street
10	Tennantville, Lakay Street, Titus Street, Langsuid Street up to Lakay Street, Tennant Street, Lapan Street, Bell Street, Bird Street, La Colline (Dr Malan Street, Dan Pienaar Street, Paul Roos Street, Tobruk Park, Irene Park, La Colline Road, Conde Street, Taylor Street, Mount Albert Street), Kromrivier Road, Jan Celliers Street, Hammanshand, Ds Botha Street, Voorplein Street, Bird Street, Langenhoven Street, Du Toit Station, Ryneveld Street, Karee Street, Olienhout Street, Banghoek Road, Academia, Bosman Street, Smuts Road, Joubert Street, De Beer Road, De Villiers Road from Ryneveld Street to Cluver Road on the left-hand side
11	Boundaries of the ward are: Kridge Road, Herte Street, Skone Uitsig Road onto Alexander Street onto Du Toit Street toward Merriman Avenue towards Adam Tas Road onto George Blake Street, Mark Street, Distillery Road, Santhagen Road, Swawel Avenue, Kanarie Road, Tarentaal Road, Bokmakierie Road, Fisant Road, Devon Valley Road, Kiewiet Road, Dagbreek Road, Pelikaan Street, Patrys Road, Hammerkop Road, Loerie Road, Muldersvlei Landgoed, and all areas in Onder Papegaaiberg and businesses
12	Kayamandi: Zone A George Blake Street, Chris Hani Drive, 10th and 13th Street, School Crescent, Snake Valley, Enkanini, Watergang, Watergang TRA 2 and Watergang Informal Settlements
13	Kayamandi: Zone A Masithandane Street, Zone J, Red Bricks, Zone K and L, Hostels, Dairy and University Hostels, Old Bricks Houses Red Roofs, Zwelitsha, Costaland
14	Kayamandi: Zone P, I, F, D and O, Costaland, Marikana, Watergang TRA 1, Smarties (Mgabadeli Street), Monde Crescent
15	Kayamandi: Zone M, N, O, 4th and 5th Avenue, 10th, 12th and 14th Street, Long Street, Retreat Street, Forest Drive
16	The borders are Tenant Road, Long Street, Crombi Road to the end of Gabriels Road. Asalea Road, 2nd Road, Noble Road, Bailey Road, Eike Street, Curry Street, Hoop Road, Pansy Road, West Road, Laai Road, Anthony Road, Carriem Road, Archilles Road, Bergstedt Road, Davidse Road, Cupido Road, Pearce Road, Robyn Road, Gonzalves Road, Hercules Road, Chippendale Road, Afrika Road, Arnolds Road, September Road, Jakaranda Street, Short Road, Quarry Road, Middle Road, Primrose Street, Pine (Bo en Onder), North End, Vredelust, Gemsbok, Daffodil Single, Steps, Sylvia Street, Eiland Street, Last Street (White City), Frikkadel Dorp, September Street
17	A part of Cloetesville (Lakay Road towards Langstraat – Suid Road, Kloof Street, Fir Street, Fontein Road, Williams R towards Gabriels Road towards February Road, Valentyn Road, Pool Road, Raziet Road, Ortell Road, Rhode Road, King Road, Hine Road, Hendrikse Road, Rhode Road), as well as Welgevonden, Green Oaks, Stellita Park, Weltevrede, Welgevonden Estate (Red Oak Road, Belladonna Street, Wildeklawer Welgevonden Boulevard, Olive Road, Sonnedou Road, Mountain Silver Road, Silver Oak Road, Froetang Road, Katbos Road, Everlasting, Fynbos Street, Sourfig Street, Scarlet Cresent, Pin Oak Street, Evergreen, Autumn Close, Nenta, Cherrywood, Candelabra, Froetang, Candelabra, Kouter, Protea Street, Minaret, Gooseberry, Honeybush), Klein Welgevonden (La Belle Vie, Chablis) and the Municipal Flats in Rhode, Kloof and Long Streets, Bertha Wines and Weltevreden Estate, 15 Weltevreden Estate,) The borders of the ward are the R44 Klapmuts Road and Long Street.

Ward	Areas
18	Klapmuts Town Centre, Bennitsville, Weltevrede Park, Klapmuts New Houses, Mandela City and La Rochelle Informal Settlement, Klapmuts Farms (The Purple Windmill, Arra Vineyards, Hidden Gems Wines, Gravel Junction Wine and Spirits Company, Wine Estate Le Bonheur, Anura Vinyard, Dalewood Farms, Blueberry Bar, Klapmuts Transfer Station, Trophy SA, DKL Transport Pty, Welgelee Estate)
19	De Novo, Kromme Rhee, Vaaldraai, Muldersvlei, Koelenhof and surrounding Farms, Koelenhof Station, Slayley, Hunting, Koelenhof Farms, Poultrey / Mariendahl, De Hoop, Nooitgedacht Village, Bottelary and Surrounding Farms, De Waalshof, Weltevrede 1, Weltevrede 2, Smartie Town.
20	Vlottenberg, Raithby, Mooiberge, Lynedoch
21	Brandwacht Aan Rivier, Paradyskloof, Stellenbosch Golf Course, Blaauwklippen / Stellenzicht Farms, De Zalze, Jamestown, Mountainview, Stellenbosch Airfield
22	Die Boord, Dalsig, Brandwacht, Krigeville, Libertas Farm
23	Dorp Street, Krige, Hamman Street, Schroder Road, Die Braak, Bird Street from Dorp Street, Dennesig area, Muller Road, Banghoek Road, Ryneveld Street, Plankenburg Industrial area and Kayamandi Corridor.

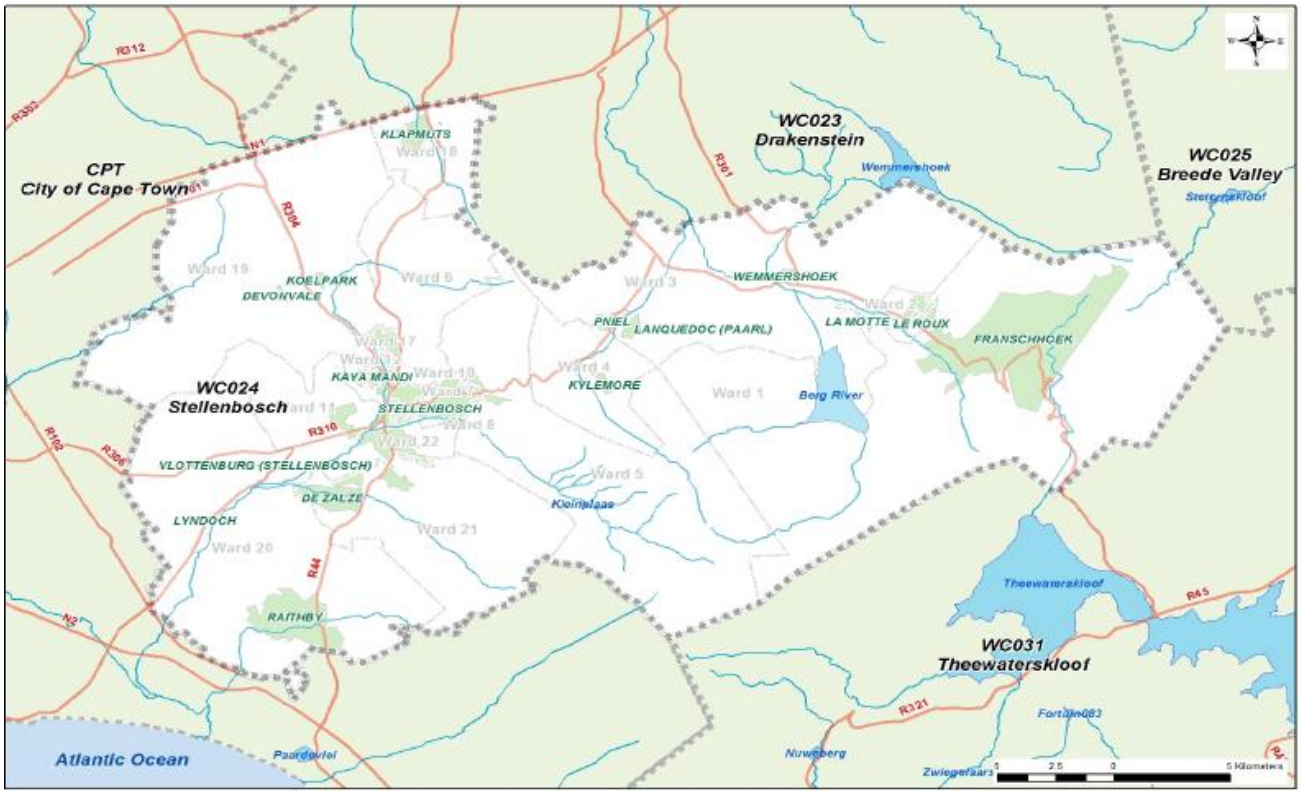
Below is a map of the Cape Winelands District concerning the provincial district boundaries:



Map 1: Locality of Cape Winelands concerning Provincial Boundaries

The Western Cape Province makes up 10.6% of the country's land surface and encompasses an area of 129 462 km2. The province's spatial area includes 1 metropolitan area (City of Cape Town), 5 district municipal areas (Central Karoo, Eden renamed Garden Route, Overberg, Cape Winelands, and West Coast), and 24 local municipalities.

Below is a map of the municipalities concerning the Cape Winelands District:



Map 2: Locality map of Stellenbosch Municipality concerning Cape Winelands District Boundaries

The Cape Winelands District Municipality is located within proximity of the City of Cape Town, which offers excellent access to trade opportunities, routes, and infrastructure such as expanding broadband networks, an international airport (with direct flights to international cities), the second-largest container port in the country, and a comprehensive road and rail network. This makes the Cape Winelands district ideally located as an investment destination. The Cape Winelands District municipal area incorporates Drakenstein, Stellenbosch, Breede Valley, Langeberg, and Witzenberg.

Below is a map of the Stellenbosch Municipality's area of jurisdiction:

Map 3: Locality map of municipal boundaries

Stellenbosch Local Municipality is located in the heart of the Cape Winelands and adjacent to the City of Cape Town and Drakenstein Municipality. Stellenbosch Municipality, as a local authority, governs the towns of Stellenbosch, Pniël, Klapmuts, Kylemore, Jamestown, Raithby, Ida's Valley, Cloetesville, Kayamandi, and Vlottenburg, as well as the surrounding rural areas. The area covers 831 square kilometres and adjoins the City of Cape Town (CoCT) to the west and south and the Breede Valley, Drakenstein, and Theewaterskloof municipalities to the east and north. Functionally, Stellenbosch Municipality (SM) forms part of the Greater Cape Town metropolitan area.

The main settlements in SM are the historic towns of Stellenbosch, Franschhoek, and Klapmuts. There are also several smaller villages, including Jamestown (contiguous with Stellenbosch town), Pniël, Johannesdal, Lanquedoc, Lynedoch, and Raithby. New nodes are emerging around agricultural service centres, for example, Koelenhof and Vlottenburg. Stellenbosch is a sought-after space, offering opportunity and quality of living while being near city life. This has placed the municipal area under constant development pressure.

2.3 Stellenbosch Municipality at a Glance

Table 13: Stellenbosch Municipality - Summarised Statistics

Population Estimates, 2024		Actual households, 2024	
Population	209 831	Households	57 520
			(Source: MYPE)

Education, 2023		Poverty, 2023	
Matric Pass Rate	80.2%	Gini-Coefficient	0.60
Learner Retention Rate	81.5%	Poverty Head Count Ratio (UBPL)	71.4%
Learner-Teacher Ratio	26.3		

Health, 2023/24			
Primary Health Care Facilities	Immunisation Rate	Maternal Mortality Ratio (per 100 000 live births)	Teenage Pregnancies – Delivery rate to women U/19
8 (excl. mobile / satellite)	58.1%	0.0	0.6%

Safety and Security	The annual number of reported cases in 2023/24			
Residential Burglaries	DUI	Drug-related Crimes	Murder	Sexual Offences
998	252	1470	79	255

Access to Basic Service Delivery	Percentage of households with access to basic services, 2022/23			
Water	Refuse removal	Electricity	Sanitation	Formal Housing
98.5%	87.6%	96.6%	96.2%	96.2%

Labour, 2023	Socio-economic Risks	
Unemployment Rate (narrow definition)	Risk 1	Job Losses
12.6%	Risk 2	Low Learner retention
	Risk 3	Low skills base (Labour)

Largest 3 sectors			Contribution to GDP, 2023
Finance, insurance, real estate and business services	Wholesale and retail trade, catering and accommodation	Manufacturing

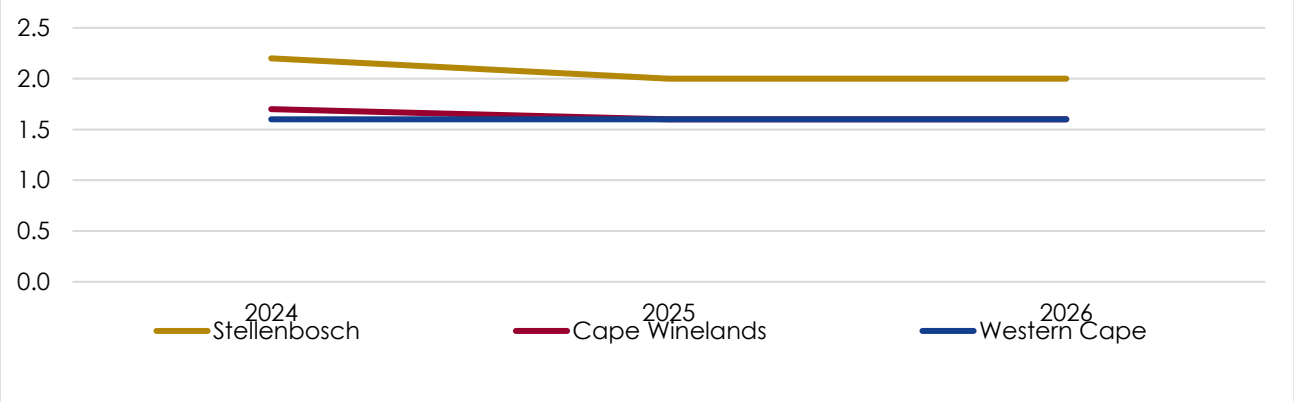
2.4 Socio – Economic Context

All socio-economic information is sourced from the Local Government Socio-Economic Profile 2024. The statistical data are primarily sourced from Statistics South Africa, administrative data from sector departments, the Municipal Review and Outlook (MERO), Global Insight Regional Explorer, and Quantec.

The GDPR performance, risk, and vulnerability factors can be read in detail within the Local Government Socio-economic Profile 2024 for the Stellenbosch municipal area.



2.4.1 Population Growth

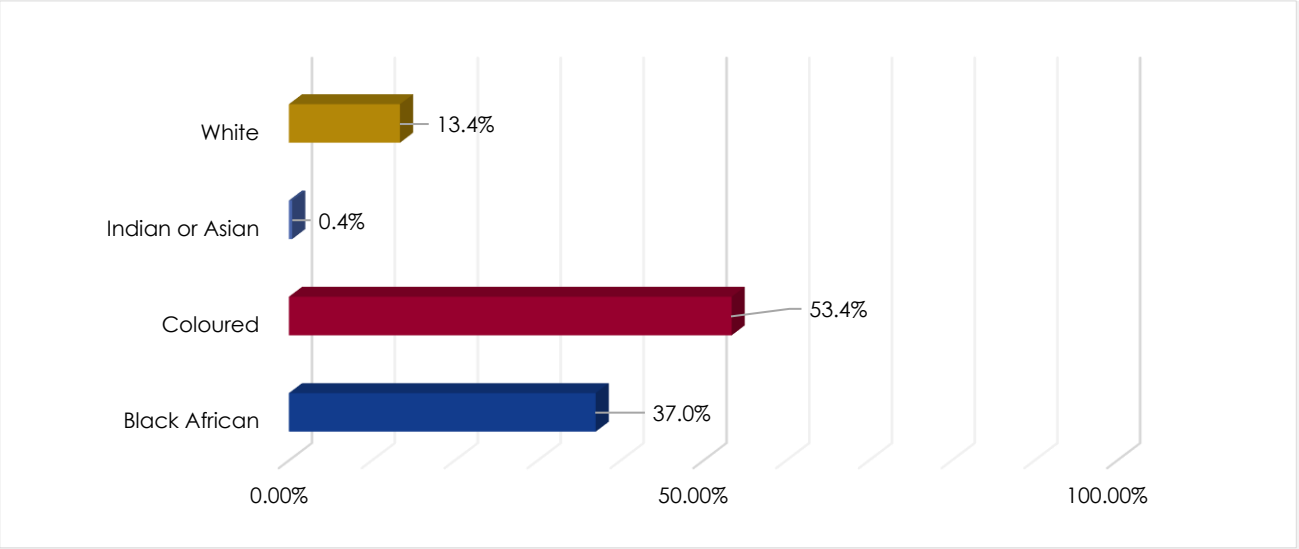
Stellenbosch's population is forecasted to increase from **209 831 in 2024** to **231 712 by 2029**, reflecting an annual growth rate of 1.7 per cent. This significant increase illustrates Stellenbosch's appeal, particularly due to its educational institutions and vibrant community atmosphere. Stellenbosch is experiencing a notable demographic influx. This growth necessitates strategic planning for infrastructure and local services to support the needs of a larger population.

In terms of households, Stellenbosch is projected to grow from **57 520 in 2024,** with an annual growth rate of approximately 2.4 per cent. This increase indicates a rising demand for housing that aligns with the growing population. Addressing this growth in households will be essential for maintaining service quality and community engagement.

The figure below depicts the estimated population growth from 2024 - 2026:

Table 14: Estimated Population Growth

Source: Western Cape, Draft Social–Economic Profile 2024 (Stellenbosch Municipality) and StatsSA 2022



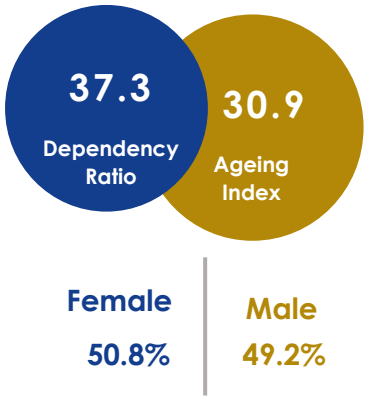
2.4.2 Racial Split

The race dynamics in the Stellenbosch municipal area present a diverse demographic landscape. Much of the population comprises Black African individuals, accounting for 32.8 per cent of the total, followed closely by the Coloured community, constituting 53.4 per cent. White residents make up 13.4 per cent of the population, while individuals categorised as Indian / Asian represent a smaller proportion at 0.4 per cent.

This cross-analysis highlights the intricate racial composition within the Stellenbosch community, underscoring the significance of cultural diversity and its potential impact on economic and social interactions.

The figure below indicates the ratio split within the Stellenbosch Municipality:

Figure 7: Racial Split for the WCO24



Source: Western Cape Local Government Social–Economic Profile 2024

2.4.3 Gender Ratio

Stellenbosch's sex ratio shows a balanced demographic pattern, with 49.2% males and 50.8% females. This implies that for every 100 men, there are roughly 101 women in the total population. This trend is expected to remain stable over the next few years with minimal variations anticipated through 2029. The fluctuations could be influenced by migration and employment trends, which. Understanding demographic dynamics is crucial for economic analysis and strategic planning.

The table below depicts the gender ratio within the Stellenbosch municipal area.

Figure 8: Ratio of % females and males

Source: Western Cape, Draft Social–Economic Profile 2023 and StatsSA 2022

2.4.4 Age Cohorts

Stellenbosch's age cohort distribution demonstrates a diversified demographic landscape. The population aged 0 - 14 is expected to increase slightly, from 43 515 in 2024 to 46 279 in 2029, indicating a need for expanded educational resources and childcare services. The working-age population (15–64) is predicted to stabilise, indicating a strong labour force. However, the large increase in the senior population (65 and older) demands targeted programs for healthcare and social support. This demographic shift suggests potential socioeconomic issues, such as higher healthcare expenses and

a greater need for age-appropriate services, necessitating proactive planning to provide an inclusive environment for all age groups.

2.4.5 Household Size

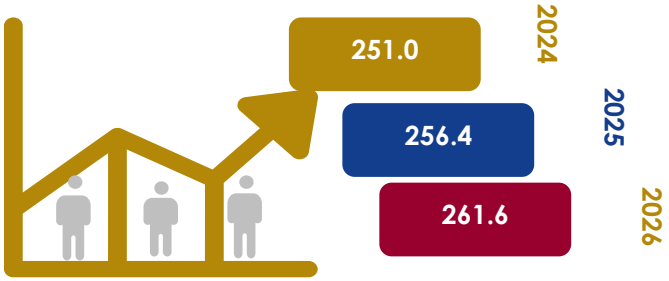
Household size refers to the number of people per household. The average size of households is expected to remain at an average of 2.9 individuals from 2022 to 2026. The trend of the average household size could be attributed to a wide range of factors, including but not limited to underlying socio-economic factors like patterns in employment opportunities, educational access, and housing market dynamics that shape this trend.

The table below depicts the household sizes from 2022 to 2026:

Figure 9: Household size

Source: Western Cape, Draft Social–Economic Profile 2024 (Stellenbosch Municipality)

2.4.6 Population Density



Amidst rapid urbanisation across the Western Cape, population density figures will aid public sector decision-makers in mitigating environmental, health, and service delivery risks. As of 2024, Stellenbosch's density is anticipated to increase to approximately 251 people per square kilometer, reflecting its growing population. In comparison, the Cape Winelands District's overall density is lower, with figures around 117 people per square kilometer. This significant difference necessitates effective planning to address housing, infrastructure, and service demands.

In order of highest to lowest, the various local municipal areas are compared as follows:

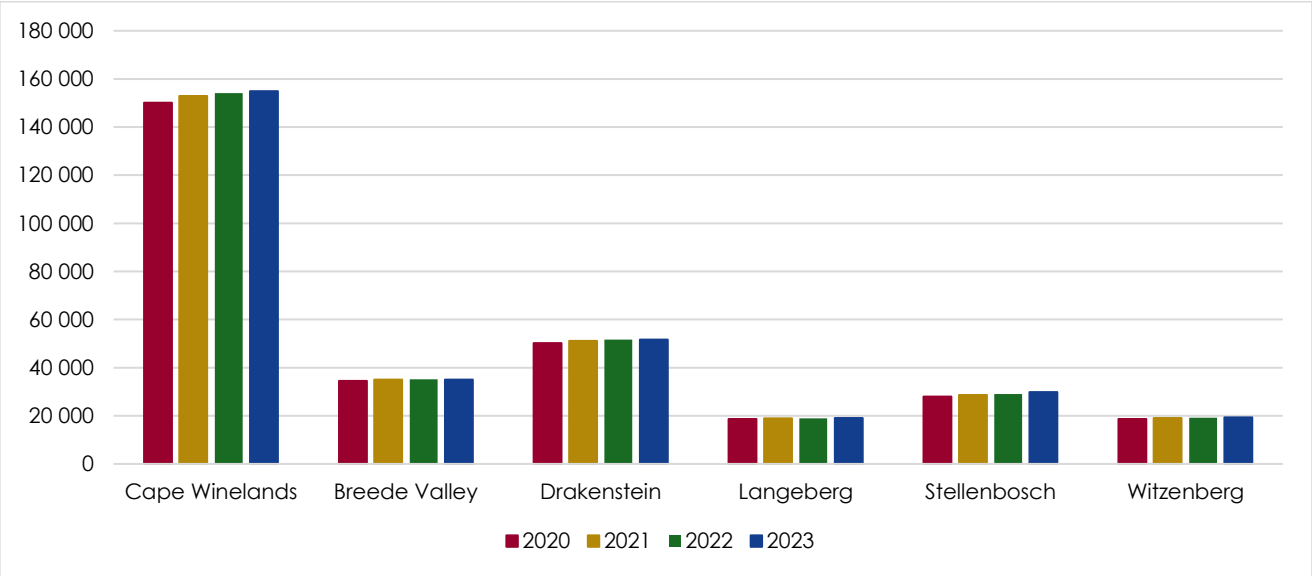
- Stellenbosch 251 people/km^2
- Drakenstein 203 people/km^2
- Breede Valley 53 people/km^2
- Langeberg 28 people/km^2
- Witzenberg 15 people/km^2

According to the above comparison, Stellenbosch has the **highest density** in the Cape Winelands District. This is helped a lot by the fact that the Municipal Spatial Development Framework (*m*SDF) says that urban development should stay within the limits of the urban edge.

Graph 1: Level of Urbanisation

Source: Western Cape, Draft Social–Economic Profile 2024 (Stellenbosch Municipality)

2.5 Education



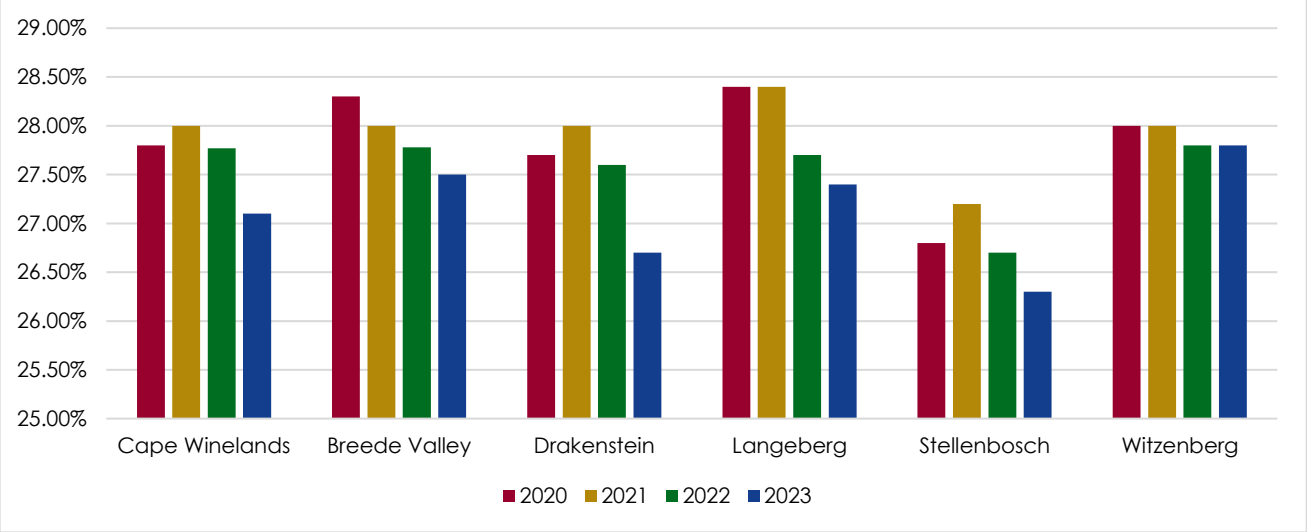
The socio-economic impact of education within municipalities is profound and complex, touching on various aspects of community development and individual well-being. Quality education equips individuals with essential skills, knowledge, and critical thinking abilities, empowering them to participate meaningfully in the local economy. As the educational attainment level rises within a municipality, there is a corresponding increase in employment opportunities and higher earning potential for residents. Additionally, an educated workforce attracts investments and industries, fostering economic growth and stability. Education also plays a pivotal role in reducing poverty and promoting social equity by breaking the cycle of intergenerational poverty.

2.5.1 Learner enrolment, the learner-teacher ratio and learner retention rate

Learner enrolment in Stellenbosch experienced a notable surge from 28 033 enrolments in 2020 to 29 092 in 2022, with a minor increase of 29 826 learners in 2023. It is evident that the educational growth depicts a positive socio-economic trend within the region, presenting an enhanced emphasis on education and potentially indicating improved access to educational facilities. Stellenbosch is a hub for both education and agriculture, luring families to the area. Compared to other municipalities in the Cape Winelands, Stellenbosch's enrollment is impressive, particularly given its relatively limited geographic area.

The graphs below depict learner enrollments, learner-teacher ratios, and learner retention from 2020 to 2023.

Graph 2: Learner Enrolment 2020- 2023

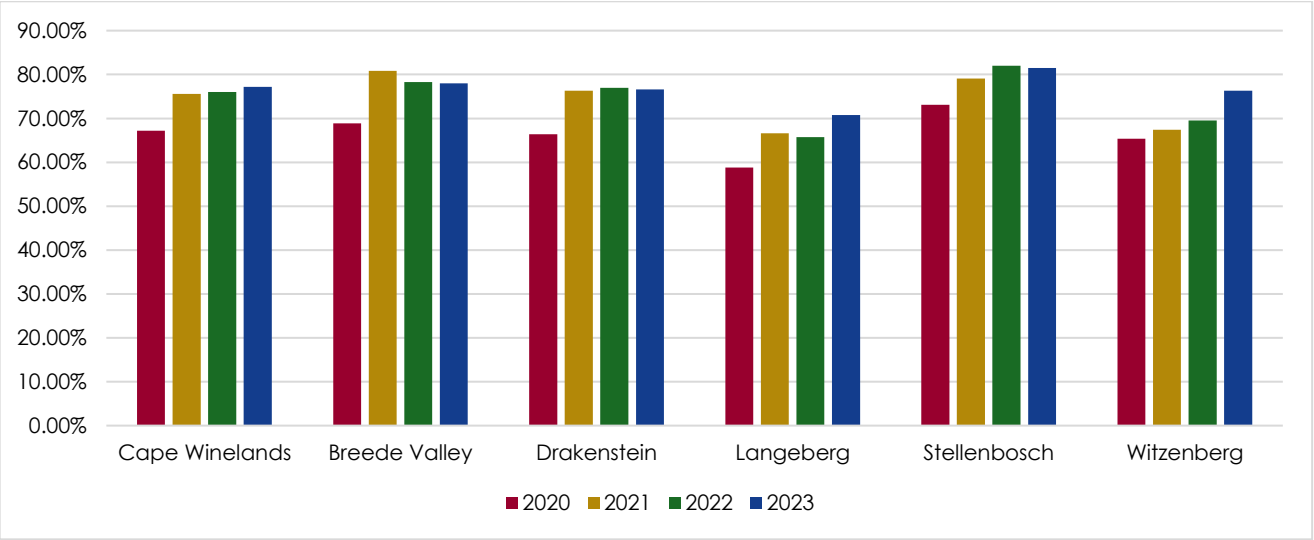


Source: Western Cape, Draft Social–Economic Profile 2024 (Stellenbosch Municipality)

It is crucial to establish healthy learner-teacher ratios to determine the schools' capacity to accommodate the students. Lower learner-teacher ratios are associated with enhanced teacher-student interaction, fostering better-quality education. Stellenbosch's learner-teacher ratio is 26.32, somewhat lower than the Cape Winelands regional average of 27.13. The 2022 Schools Realities Publications emphasise that government-paid teachers face high learner-teacher ratios, indicating larger class sizes. Despite a minor decrease from 26.8 students per teacher in 2020 to 26.6 in 2022 to 26.32 in 2023, the ratio remains within the recommended range of 35:1 to 40:1.

This suggests relatively uncrowded classrooms, aligning with established standards and ensuring a conducive learning environment, ultimately impacting the socio-economic landscape positively.

Graph 3: Learner–Teacher Ratio 2020 - 2023

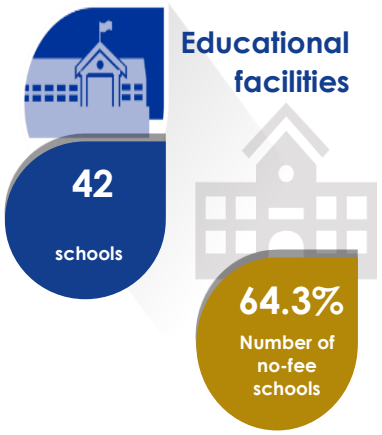


Source: Western Cape, Draft Social–Economic Profile 2024 (Stellenbosch Municipality)

The learner retention rate measures the proportion of learners in Grade 12 who were in Grade 10 two years prior. This can reflect essential socio-economic factors and personal circumstances that have a significant impact on education.

The inverse of the learner-retention rate is commonly referred to as the drop-out rate. Stellenbosch's learner retention rate in 2023 is 81.5 per cent, higher than the regional average of 77.2 per cent for Cape Winelands. The relatively high retention rate in Stellenbosch suggests that the majority of learners are able to complete their education through to matric, which is a positive reflection on the support systems available within the Stellenbosch municipal area. Learner retention rates are influenced by a wide array of factors, including low socio-economic background, learners attitudes towards education, overcrowded classrooms, critical thinking skills, study skills, and other personal circumstances that can make it difficult for the learner to focus on education. Addressing these factors is necessary for encouraging a more conducive learning environment, ensuring higher retention rates, and ultimately enhancing the region's overall socio-economic landscape.

Graph 4: Learner retention 2020 - 2023



Source: Western Cape, Draft Social–Economic Profile 2024 (Stellenbosch Municipality)

2.5.2 Number of schools and no-fee schools

Figure 10: Number of schools and no-fee schools

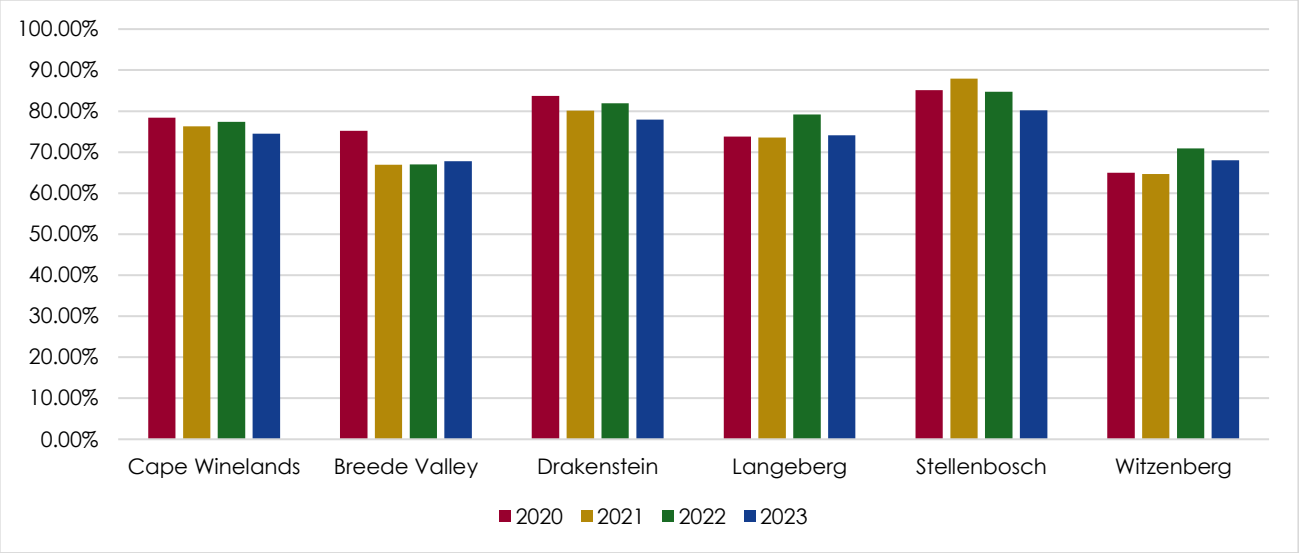
The number of schools within the Stellenbosch municipal area was recorded at 42 in 2023. 29 of the schools are equipped with libraries, however 30 per cent of the schools remains without a libraries face challenges in providing students with the same level of academic support, which could affect overall educational outcomes.

The proportion of no-fee schools in the Stellenbosch municipal area remains at 64.5 per cent in 2023, whereby 71.4 per cent are equipped with libraries.

Source: Western Cape, Social–Economic Profile 2023

2.5.3 Schools with libraries / media centres

The Stellenbosch municipal area consists of 42 schools in 2023, of which 29 were equipped with libraries. The availability of library facilities within schools contributes towards narrowing the academic attainment gap by allowing students access to information, which is in turn directly linked to improved education outcomes.



2.5.4 Education outcomes (matric pass rate)

Education remains one of the key avenues through which the state is involved in the economy. In preparing individuals for future engagement in the labour market, policy choices and decisions in the sphere of education play a critical role in determining the extent to which future economic and poverty reduction plans can be realised. Stellenbosch has a matric pass rate of 80.2 per cent in 2023,

which is higher than the regional average of 74.5 per cent for Cape Winelands. This high pass rate indicates that a significant proportion of learners in Stellenbosch are completing their schooling and performing well in the matric exams.

The graph below depicts the Matric pass rates from 2020 to 2023.

Graph 5: Education outcomes (matric pass rate) 2020 - 2023

Source: Western Cape, Draft Social–Economic Profile 2024

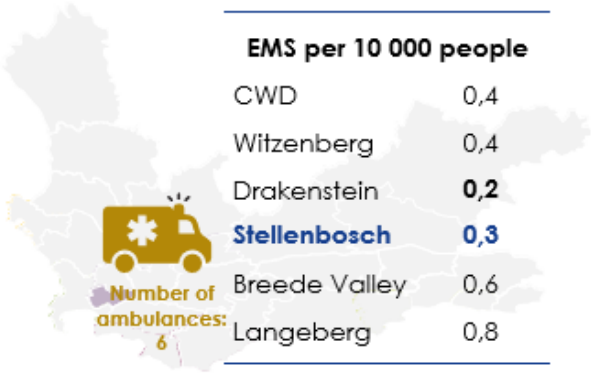
2.6 Health

2.6.1 Health Facilities

According to the LGSEP 2024, the Stellenbosch municipal area has 8 fixed primary healthcare facilities, comprising 7 fixed clinics, 1 community day centre, as well as 6 mobile / satellite clinics. In addition to these primary healthcare facilities, there is one district hospital, 9 ART treatment sites, and 12 TB clinics.

The table depicts the total healthcare facilities.

Table 15: Health facilities



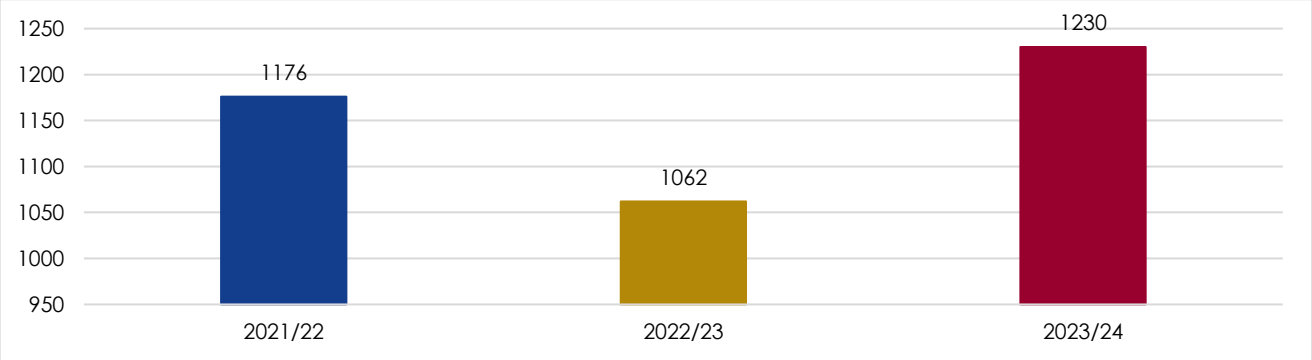
Source: Draft Western Cape, Social–Economic Profile 2024

2.6.2 Emergency Medical Services

The provision of more operational ambulances can provide greater coverage for emergency medical services. This number below only refers to provincial ambulances and excludes all private service providers, and it remained unchanged between 2021/22 and 2022/23.

Figure 11: Emergency Medical Services

2.6.3 HIV / AIDS and Tuberculosis



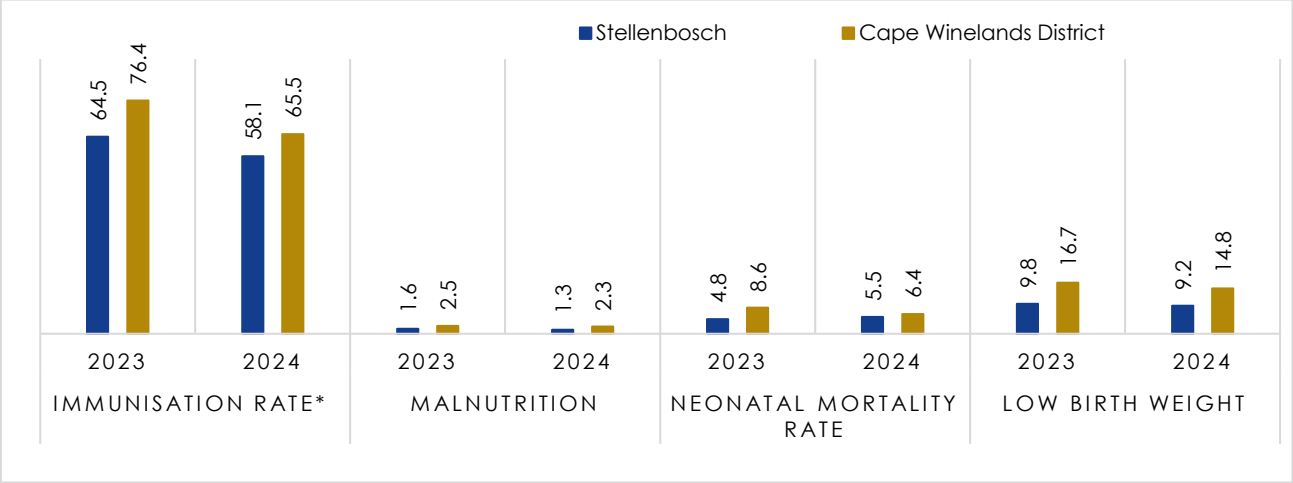
In Stellenbosch, the total number of registered patients receiving ART has increased steadily from 7 062 in 2022/23 to 7 321 in 2023/24. Similarly, the number of registered patients receiving TB treatment also slightly increased from 1062 in 2022/23 to 1230 in 2023/24.

Table 16: HIV/AIDS Management

Area	Registered patients receiving ART			Number of new ART patients		
	2021/22	2022/23	2023/24	2021/22	2022/23	2023/24
Stellenbosch	6 915	7 062	7 321	481	429	298

Source: Western Cape, Social–Economic Profile 2023

Graph 6: Number of TB patients registered on treatment

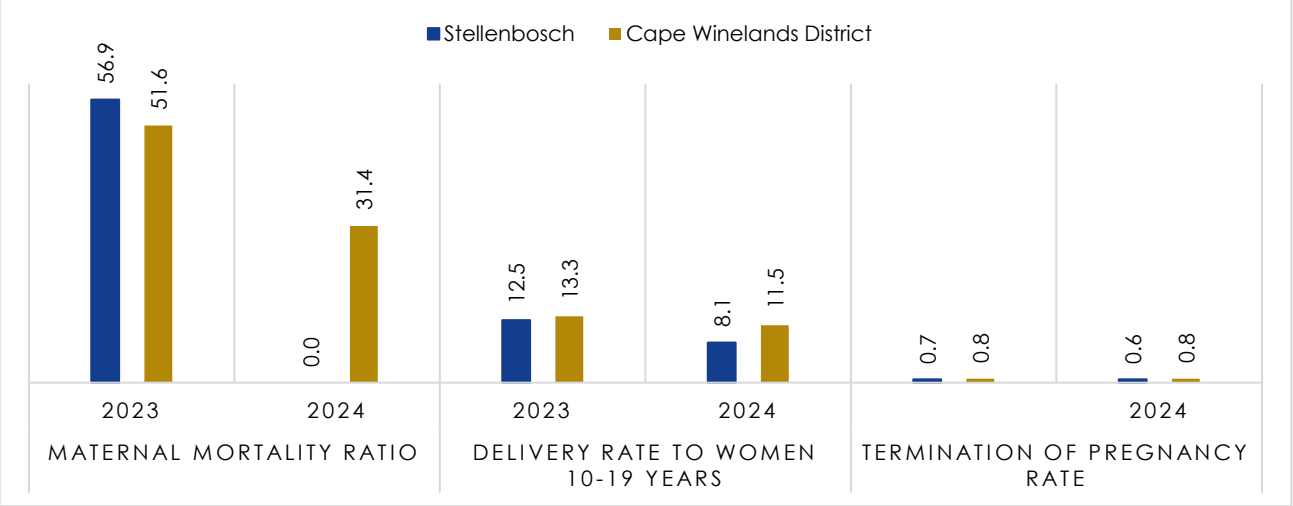


Source: Western Cape, Draft Social–Economic Profile 2024

2.6.4 Child Health

The immunisation coverage rate for children under the age of one in the municipal area worsened from 73.3 per cent to 58.1 per cent between 2021/22 and 2023/24. However, there was a notable improvement in malnourished children, with a decrease in malnutrition from 2.6 to 1.6 per cent between 2017/18 to 2023/24.

Graph 7: Child Health

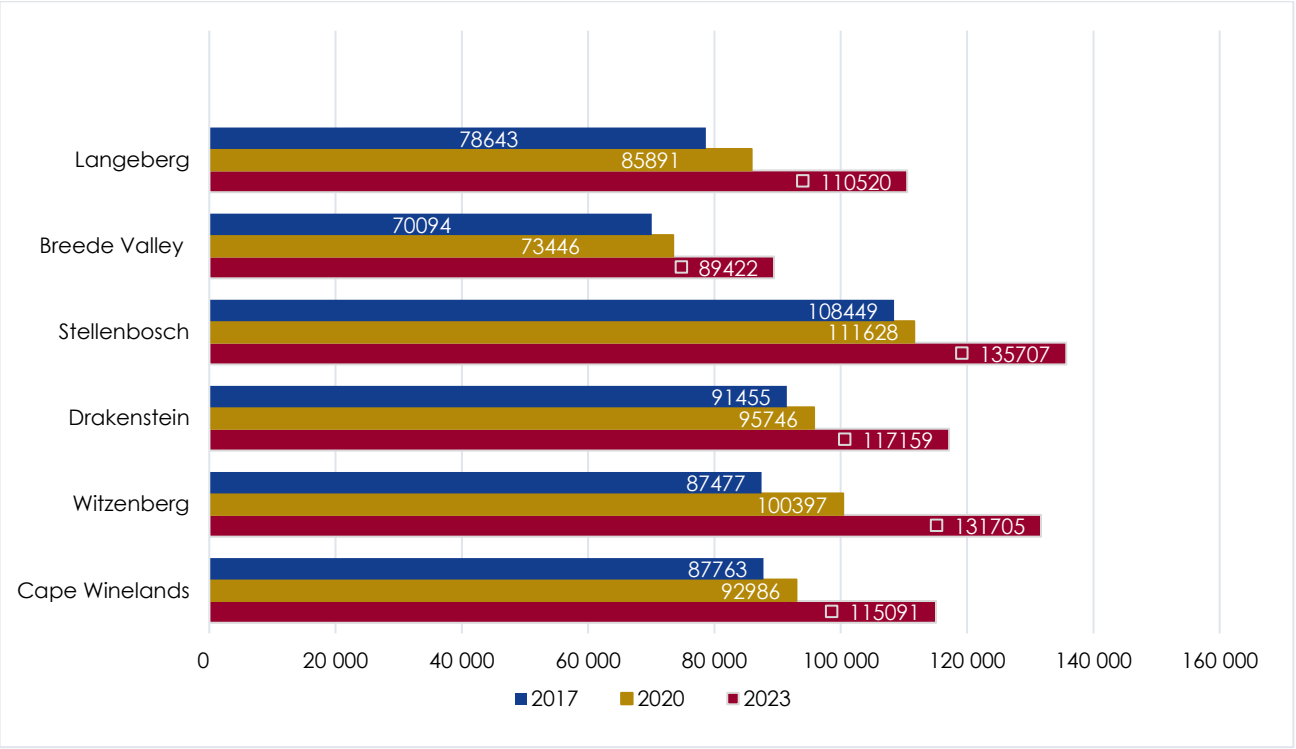


Source: Western Cape, Draft Social–Economic Profile 2024

2.6.5 Maternal Health

The maternal mortality ratio in Stellenbosch has steadily declined from 62.5 in 2018/19 to 0.0 in 2023/24, which is a considerable improvement; nonetheless, the rapid drop in recent years may need more verification to understand its underlying causes. However, the termination of pregnancy rate (0.7 per cent) remained unchanged across this period. In Cape Winelands, the termination of pregnancy rate has remained consistent, from 0.8 in 2022/23 to 0.8 in 2023/24, whereas in Stellenbosch it has risen from 0.5 in 2018/19 to 0.6 in 2023/24. Lower termination rates in Stellenbosch may be due to different socio-cultural contexts, access to reproductive health care, or family planning education programs compared to Cape Winelands, which could explain the observed variations.

Graph 8: Maternal Health



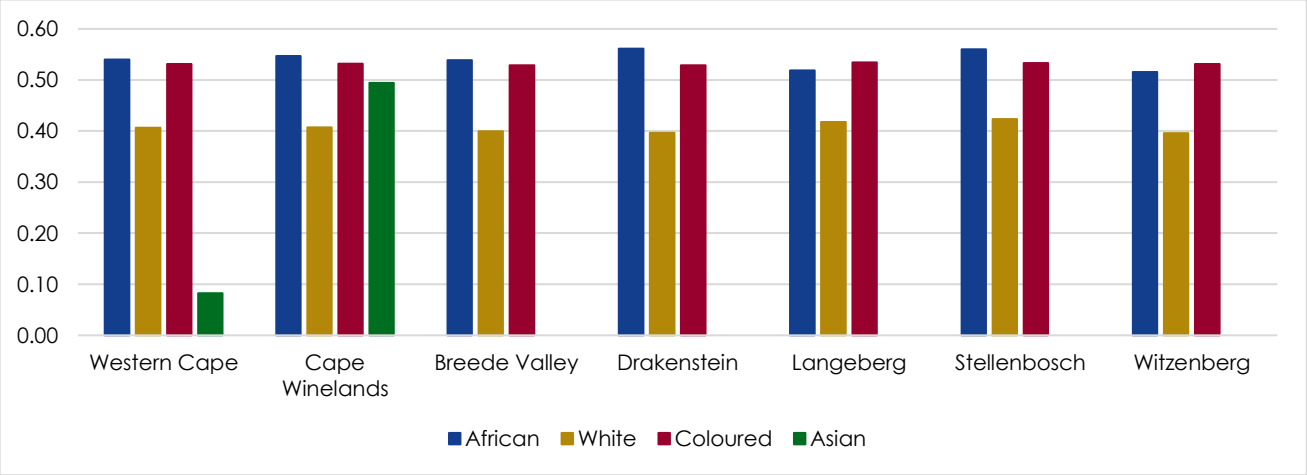
Source: Western Cape, Draft Social–Economic Profile 2024

2.7 Poverty

2.7.1 GDPR Per Capita

In terms of Gross Domestic Product per capita (GDPR), an increase is only witnessed when economic growth surpasses population growth. According to the LGSEP 2024, Stellenbosch's GDP per capita consistently exceeds the Cape Winelands region, indicating its economic growth. In 2017, it was R108 449, higher than the region's R87 763. By 2023, it reached R135 707, attributed to its strong sectors like education, agriculture, and tourism. The town's proximity to Cape Town, university status, and growing business hub contribute to its economic growth.

Graph 9: GDP Per Capita



Source: Western Cap: , Draft Social–Economic Profile 2024

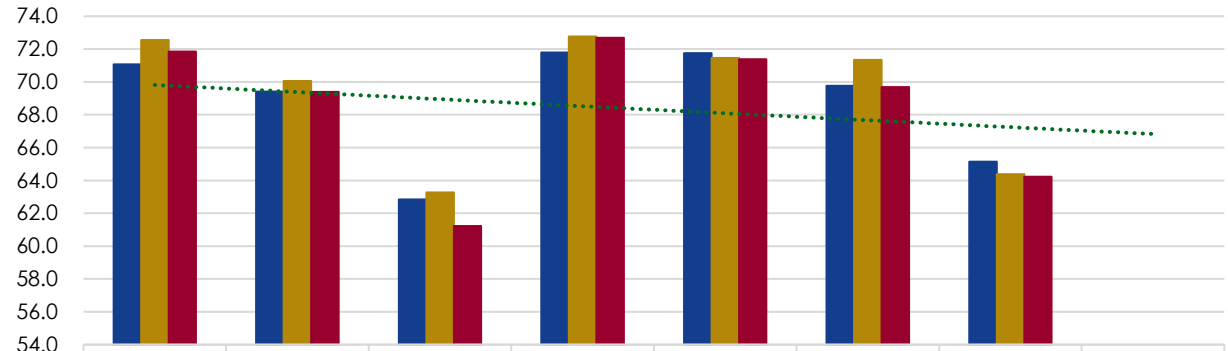
2.7.2 Income Inequality

According to the widely used Gini index, South Africa has one of the highest levels of inequality globally. Inequality is seen through a distorted distribution of income, unequal opportunities, and regional discrepancies.

The National Development Plan (NDP) has set a target of reducing income inequality in South Africa from a Gini coefficient of 0.7 in 2010 to 0.6 by 2030. The GDP per capita in Stellenbosch was R108 449, notably higher than the R87 763 of Cape Winelands. This trend continued over the years, with Stellenbosch showing a steady increase in GDP per capita, reaching R135 707 by 2023.

Graph 10: Income Inequality

Source: Western Cape, Draft Social–Economic Profile 2024



2.7.3 Poverty Line

The Upper Bound Poverty Line (UBPL) headcount ratio is the proportion of the population living below the UBPL, i.e., that cannot afford to purchase adequate levels of food and non-food items.

Poverty affects the social development of communities through lower life expectancy, malnutrition and food insecurity, higher exposure to crime and substance abuse, lower educational attainment, and poor living conditions.

In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL. In 2022, 66.7 per cent of Stellenbosch's population fell below the UBPL, a slight improvement from 2016 and 2019. Stellenbosch and Drakenstein had the highest poverty rates in the Cape Winelands District, with Stellenbosch's 71.4 per cent above the district's 69.4 per cent in 2023. Addressing these socio-economic challenges is essential for ensuring sustainable growth and development within the municipality.

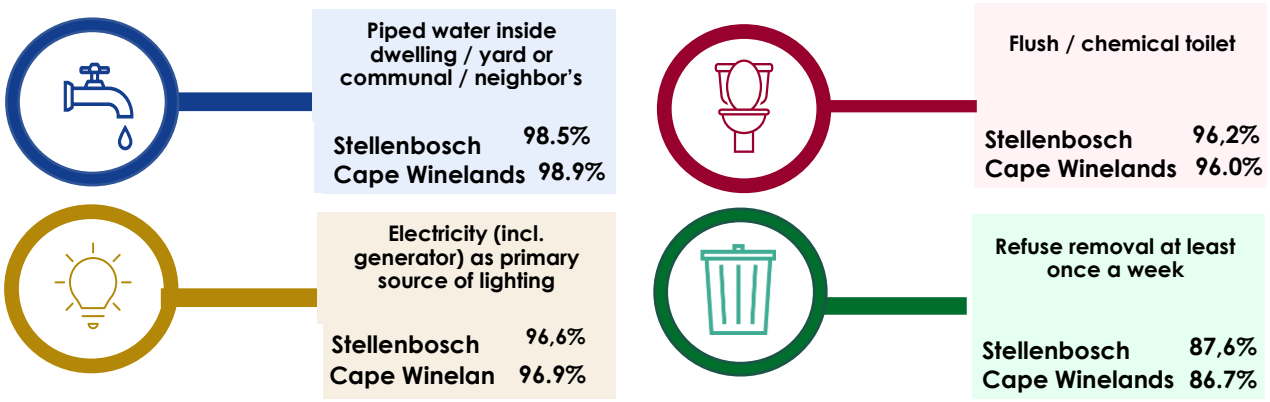
Graph 11: Poverty Line

	Western Cape	Cape Winelands	Witzenberg	Drakenstein	Stellenbosch	Breede Valley	Langeberg
2017	71.1	69.4	62.8	71.8	71.7	69.8	65.1
2020	72.6	70.1	63.3	72.8	71.5	71.3	64.4
2023	71.9	69.4	61.2	72.7	71.4	69.7	64.2

Source: Western Cape, Social–Economic Profile 2023

2.8 Basic Service Delivery

The Constitution stipulates that every citizen has the right to adequate housing access and that the state must take reasonable legislative and other measures within its available resources to achieve the progressive realisation of this right. Access to housing also includes access to basic services such as potable water, basic sanitation, safe energy sources, and refuse removal services, to ensure that households enjoy a decent standard of living.



This section considers to what extent this has been achieved by reflecting on the latest available information from Quantec Research for 2022. The latest official statistics were collected by Statistics South Africa for the 2016 Community Survey; the 2022 Census will provide the updated official statistics. The information on free basic services is obtained from Statistics South Africa's Non-Financial Census of Municipalities Survey findings.

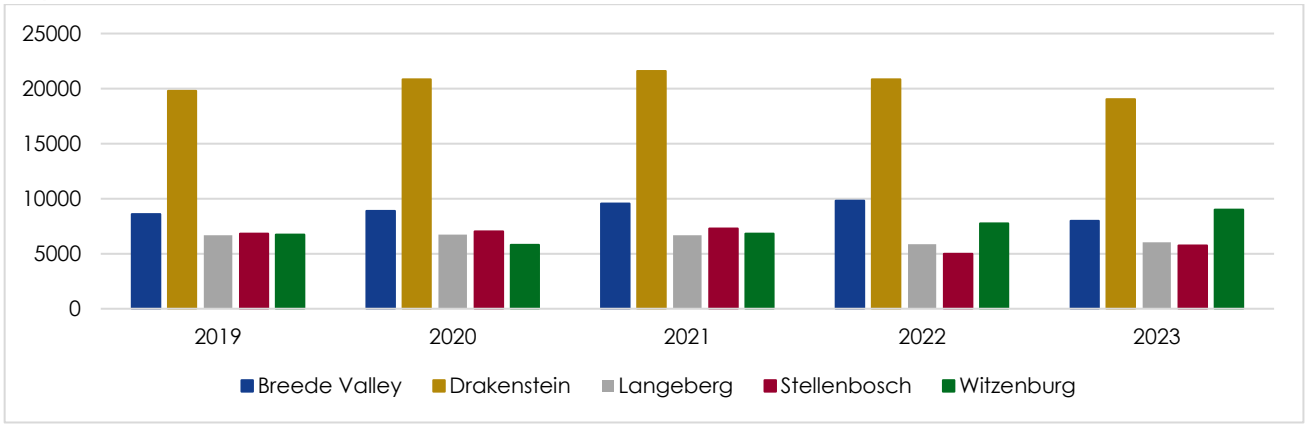
2.8.1 Housing and Household Services

During 2024, in the Stellenbosch municipal area, which comprises 42 186 households, 86.3 per cent had access to formal housing, lower than the Cape Winelands District average of 88.0 per cent. The area also recorded a significantly higher proportion of informal dwellings, totalling 13.5 per cent, in contrast to the District's 11.7 per cent.

Service delivery access levels within the municipal area were considerably higher than the access to formal housing, with access to piped water access (98.5 per cent), flush or chemical toilet access (96.2 per cent), electricity access (including generators) for lighting (96.9 per cent), for lighting at 96.9 per cent and the removal of refuse at least weekly by the local authority at 87.6 per cent of households. These access levels were above the District figures for electricity and refuse removal services.

Figure 12: Service delivery access levels (HH)

Source: Western Cape: Socio-Economic Profile 2023



2.8.2 Free Basic Services

The following table indicates the percentage of average registered indigent households that have access to free basic municipal services. The total number of indigent households excludes all informal households and includes formal households that have been registered as indigent households. The total i.t.o. of free basic electricity includes only indigent households claiming 100 kWh from the Stellenbosch Municipality. Additionally, it excludes the totals for areas where ESKOM manages the electricity distribution.

Per the approved Indigent Policy of the municipality, all households earning less than R6 500 per month will receive free basic services as prescribed by national policy and in terms of Stellenbosch Municipality's Indigent Policy.

The table below indicates the number of households receiving free basic services.

Graph 12: Access to Free Basic Services

Source: Western Cape Local Government Draft Social–Economic Profile 2024 and Statistics South Africa 2022

Municipalities offer free basic services to financially vulnerable households, and the number of households receiving these services in the Stellenbosch municipal area sharply declined in 2020. The strained economic conditions are anticipated to increase demand for these services, leading to a rise in the number of indigent households. However, this trend is area-specific and contingent on the qualifying criteria applied. These findings underscore the persistent challenges and socio-economic factors influencing housing and essential service access within the Stellenbosch municipal area, emphasising the need for targeted interventions to uphold citizens' constitutional rights and enhance overall living standards.

2.9 Safety and Security

All the data below are sourced from the Local Government Socio-Economic Profile for 2023 for the Stellenbosch Municipal area.

2.9.1 Murder

Murder *is defined as the unlawful and intentional killing of another person.*

Within the Stellenbosch area, the number of murders de-escalated from 45 per 100 000 in 2021/22 to 38 in 2023/24.

2.9.2 Sexual Offences

Sexual offences include rape (updated to the new definition of rape to provide for the inclusion of male rape), sex work, pornography, public indecency, and human trafficking.

Stellenbosch's sexual offences figures have fluctuated significantly, with a dramatic decrease from 123 per 100 000 in 2021/22 to 68 in 2022/23, followed by an increase to 121 in 2023/24. The sharp decline in 2022/23 may indicate improvements in victim reporting or a temporary reduction in incidents.

2.9.3 Common Assault

Stellenbosch has had significant variations in common assault rates, dropping from 518 in 2021/22 to 366 in 2022/23 before climbing again to 533 in 2023/24. This shows that frequent assault is a dynamic issue, probably influenced by social tensions, alcohol consumption, or other variables. In comparison, Cape Winelands has shown greater consistency, with a modest reduction from 660 in 2022/23 to 629 in 2023/24. The rise in assault rates in Stellenbosch shows an ongoing issue, which is most likely influenced by urbanisation, societal pressures, or a lack of conflict resolution methods in public settings. To address this issue, both municipalities must prioritise violence prevention, dispute resolution, and community engagement.

2.9.4 Commercial Crime

Stellenbosch has had a significant increase in commercial crime, from 348 in 2022/23 to 587 in 2023/24, indicating a growing worry about financial crimes in the corporate sector. This increase could indicate more sophisticated criminal behaviour targeting firms, or a shift toward financial crimes due to economic pressures. In comparison, Cape Winelands has seen a more gradual increase, rising from 236 in 2021/22 to 265 in 2023/24. Stellenbosch's high jump suggests that the municipality may be suffering commercial sector vulnerabilities, which could be worsened by urbanisation and increased company activity. Both communities must reinforce rules, boost corporate security, and increase law enforcement's ability to combat fraud, theft, and other financial crimes.

2.9.5 Drug–Related Offences

Drug-related *crimes refer to the situation where the perpetrator is found to have, been under the influence of, or selling illegal drugs.*

Stellenbosch has had a large increase in drug-related crimes, rising from 482 per 100,000 in 2022/23 to 700 in 2023/24. This significant growth indicates a serious drug problem in the region, most likely caused by rising demand or distribution networks that target local people. The growth contrasts with the more gradual increase recorded in Cape Winelands, which increased from 624 to 729 during the same time period. The dramatic increase in Stellenbosch implies that the municipality is at a higher risk of drug usage and trafficking, highlighting the need for stronger enforcement measures, better addiction treatment programmes, and community-focused preventative initiatives.

2.9.6 Driving under the influence (DUI)

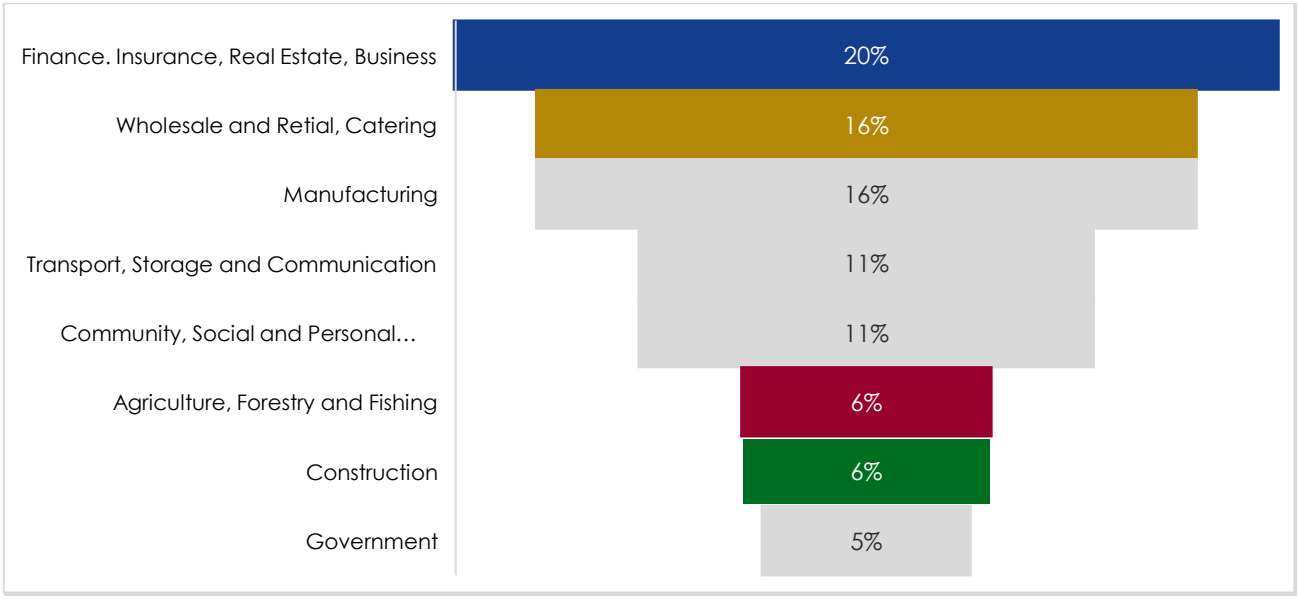
A situation where the driver of a vehicle is found to be over the legal blood alcohol limit.

The number of cases of driving under the influence of alcohol or drugs in the Stellenbosch area declined from 131 in 2021/22 to 83 in 2022/23, before rising to 120 in 2023/24. In contrast, Cape Winelands has shown a more consistent decline, from 90 in 2021/22 to 75 in 2023/24.

2.9.7 Residential Burglaries

The unlawful entry of a residential structure with the intent to commit a crime, usually theft.

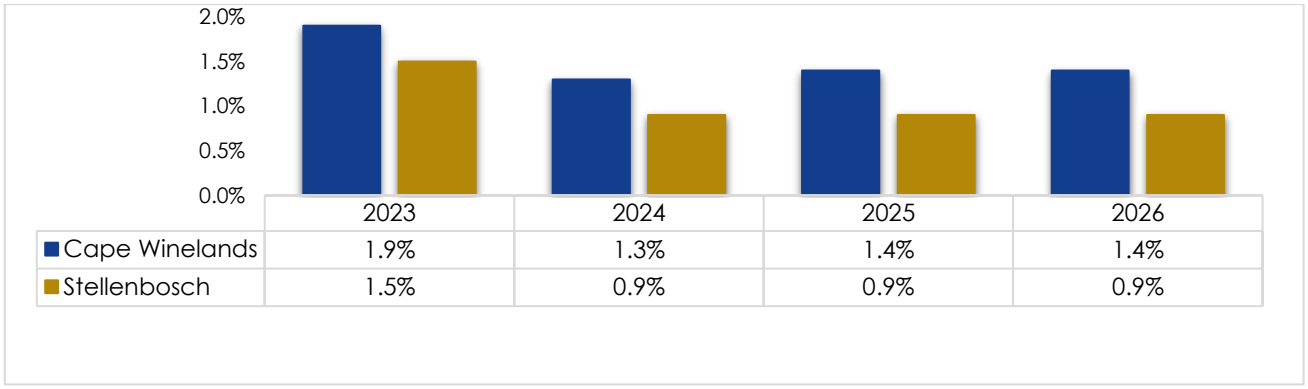
Stellenbosch's burglary rates have fluctuated dramatically, from 468 in 2021/22 to 287 in 2022/23, before rising again to 476 in 2023/24. Cape Winelands, by comparison, has seen a more gradual decrease from 440 in 2021/22 to 418 in 2023/24



2.10 Economy and Labour Market Performance

2.10.1 Sectoral Overview

In 2023, the economic landscape of the Stellenbosch municipal area boasted a Gross Domestic Product at the regional level (GDPR) totalling R16.405. The municipality's economy thrives on a robust agriculture sector, primarily specialising in grape cultivation for its globally acclaimed wineries, serving as a pivotal driver for trade and tourism. Additionally, Stellenbosch houses the corporate headquarters of influential entities such as Capitec, Remgro, and PSG, along with local branches of financial service providers including Citadel Wealth Management, Brenthurst, and Adviceworx. Notably, the finance sector emerged as the primary contributor to the local economy, constituting 29 per cent of the total GDPR, further solidifying the area's economic significance.



Moreover, the potential for overall Gross Domestic Product at the regional level (GDPR) growth was impeded by declines in the primary and secondary sectors. These contractions, driven by factors such as rising input costs, economic uncertainty, and external market challenges, hindered economic expansion. Addressing these setbacks through strategic interventions will be crucial for fostering sustainable growth and stability in the region.

Graph 13: Sectoral contribution to GDPR 2023

Source: Western Cape, Social–Economic Profile 2023

Graph 14: GDPR Forecast

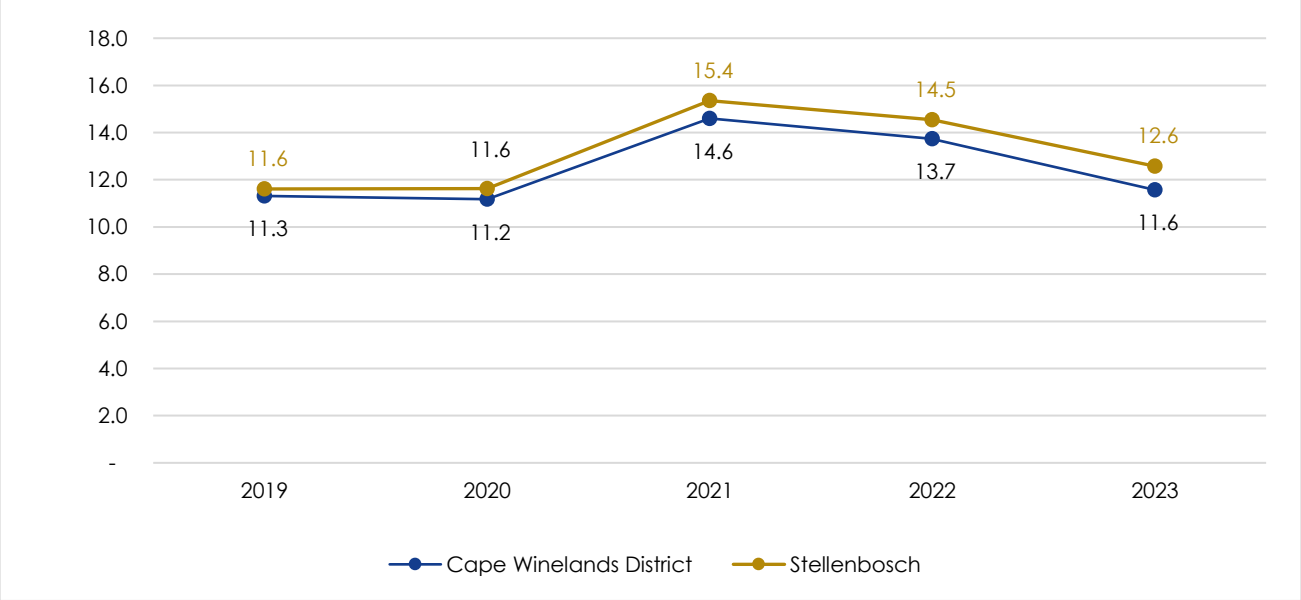
	2023	2024	2025	2026
Cape Winelands	1.9%	1.3%	1.4%	1.4%
Stellenbosch	1.5%	0.9%	0.9%	0.9%

Source: Western Cape, Social–Economic Profile 2024

2.10.2 Formal and Informal Employment

The presence of Stellenbosch University and the diverse industries in the area have led to a significant workforce composition, with 26.2 per cent classified as skilled workers and 42.5 per cent as semi-skilled workers. Informal sector activities, particularly in trade, agriculture, and personal services, contribute significantly to employment, accounting for 22.6 per cent of the workforce in 2022. However, a notable challenge exists for low-skilled workers, constituting 32.3 per cent of the workforce, as recent job creation trends have favoured semi-skilled and skilled workers, limiting opportunities for this demographic.

Graph 15: Skills Level Contribution, 2022



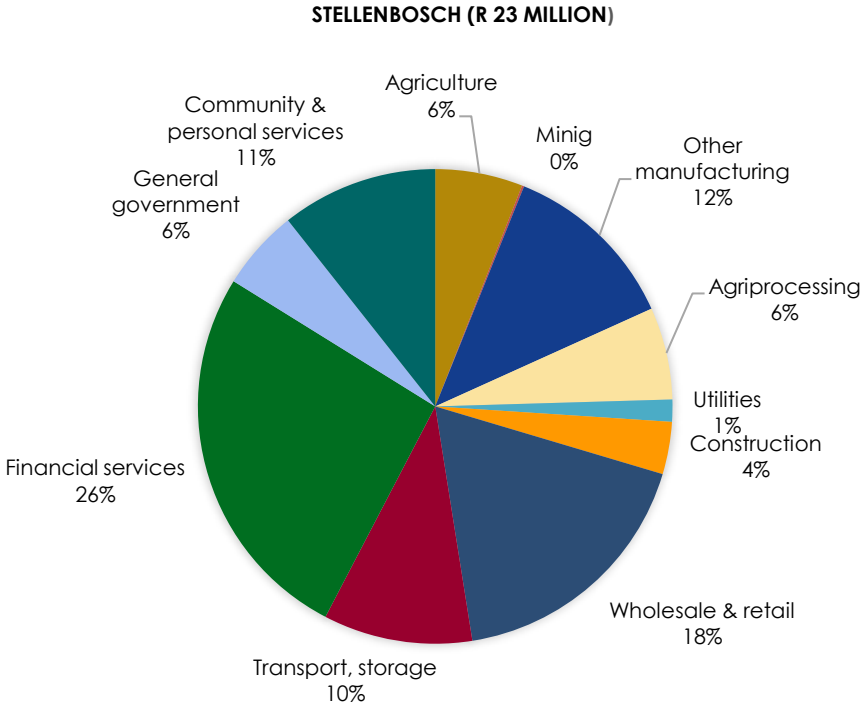
Source: Western Cape, Draft Social–Economic Profile 2024

2.10.3 Unemployment

It is crucial to facilitate access to education and skills development initiatives in communities where high unemployment rates occur. Social transformation needs to be promoted and provide enough relevant opportunities and resources for affected demographic areas.

Not only does this initiative enhance the socio-economic landscape, but it also has implications for municipal revenue. A skilled and educated workforce can contribute to a more vibrant local economy, generating higher tax revenues to support municipal projects and services.

Graph 16: Unemployment Rate

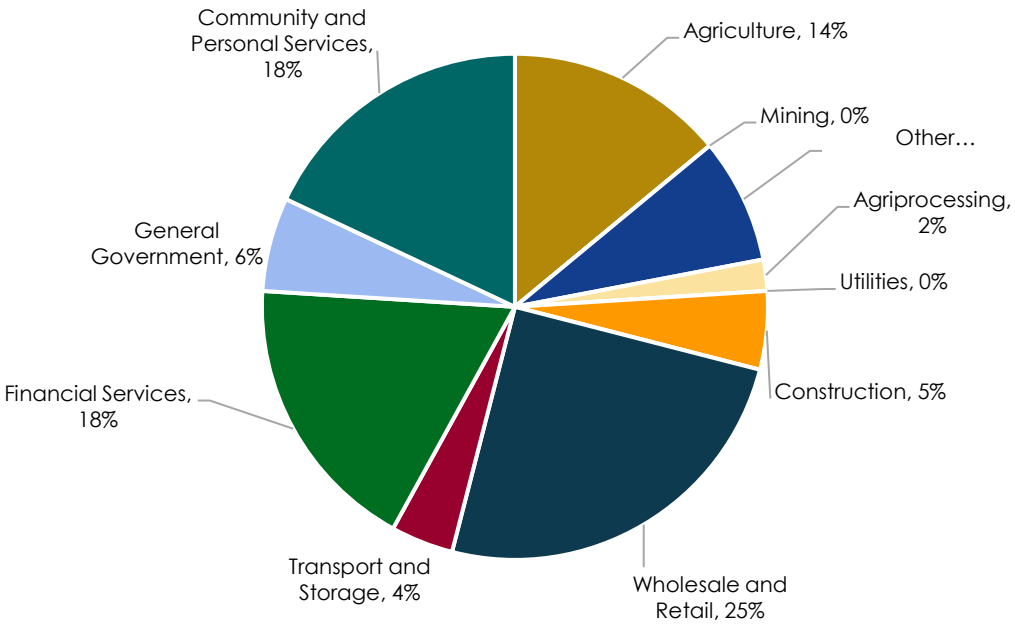


Source: Western Cape Local Government Social–Economic Profile 2022 and 2023 (Stellenbosch Municipality)

2.11 Agricultural Economic Overview

2.11.1 Economic and Employment Overview

Agriculture contributes 6% to GDP and Agri-processing another 6% in the Stellenbosch municipal area.



Graph 17: Stellenbosch Sectoral Share of GVA – 2023

Source: Western Cape Government Department of Agriculture: Quantec, 2024

The agricultural value chain employs 16% of the 77 322 labour force in Stellenbosch, as illustrated in the graphs below.

Graph 18: Stellenbosch Sectoral Employment of formal jobs - 2023

Chapter 3:
Strategic Policy Context

3.1 Municipal Vision and Strategy

Figure 13: Municipal Vision and Strategy

VISION

We describe the vision of where we want to be as a municipality and the Greater Stellenbosch area as the **"An Integrated Valley of Opportunity and Innovation"**

MISSION

Our mission is to deliver services in an enabling environment through sustainable, cost-effective and accountable services for our community

VALUES

In all our work and engagements with the community and other stakeholders, we subscribe to the following values:

Integrity: As servants of the public, we undertake to perform the functions and operations of the municipality honestly and ethically.

Accountability: As responsible public servants, we pledge to perform our duties in a manner that is open to oversight and public scrutiny. This commitment is shaped by our understanding of the need to give an account of our actions to individuals, groups, and organisations.

Transformation: We, as custodians of hope, will work tirelessly to transform our municipality, communities, and broader society by unlocking the endless possibilities that our valley holds and treasures. This commitment is shaped by our understanding of the historical, spatial, social, and economic inequalities in our valley.

Innovation: We will continuously review our systems, procedures, and processes to make them less bureaucratic and more responsive to customer needs. We will acknowledge and reward initiatives that show creativity and ingenuity.

Excellence: As a municipality, we will strive to deliver excellent services for all areas within the greater Stellenbosch.

Responsiveness: The municipality is a responsive municipal entity with zero tolerance for corruption and illegal actions.

3.2 Strategic Focus Areas (SFAs)

3.2.1 Strategic Focus Area 1: Valley of Possibility

The Stellenbosch area offers ample possibilities to their stakeholders. The unlocking of these possibilities to encourage opportunities for enterprise, creativity and business development in our cities, towns and villages is an urgent issue in South Africa. Unemployment, poverty, income inequality, and skills shortages are major concerns impacting the economy. This strategic focus area has three broad dimensions that address these challenges: The first relates to the provision of services to citizens and how these services can assist them in facilitating development and job creation. The second relates to the internal workings of the municipality and how municipal procurement of services aids in fostering opportunities for enterprise development and creativity. The third dimension asserts that efficient infrastructure and services lie at the heart of the municipality's mandate. Infrastructure and services of different kinds fulfil the basic needs of citizens and also enable enterprise and business development. Without appropriate, well-maintained infrastructure, the greater Stellenbosch area will fail as a place of living, work, and learning.

3.2.2 Strategic Focus Area 2: Green and Sustainable Valley

Several dimensions of the environment underpin its importance for the greater Stellenbosch area and the people living within it. The first is an ecological dimension, which recognises that the natural

environment and its processes provide the setting in which and the basic resources with which human life is played out.

The second is an economic and productive dimension, which recognises that the natural environment underpins vitally important tourism and agricultural economies. The third is a psychological, social, and recreational dimension, which recognises that human life is qualitatively affected by a sense of place and the need for places of 'escape' from urban life. The fourth is a cultural dimension, which recognises the inextricable relationship between the characteristics of a place, people's activities in that place, and the emergence of cultural expressions and forms.

There are at least three reasons why the spatial direction is important. Firstly, we live our lives in geographic spaces; how activities and infrastructure are organised in space fundamentally impacts people's access to opportunity. For example, prioritising new urban development on agricultural land may harm the overall viability of agriculture and the food security of an area. Another example is the location of housing for poor people far away from work opportunities, which impacts disposable income, work productivity, and transport infrastructure provision. Secondly, the municipal strategy has, over the last decade, taken a strong sectoral approach. The approach looks at development in sectors as reflected in the LED plans, plans for creative industries, small enterprises, tourism, and so on. Unfortunately, much of this work is silent on the impact of space on specific sectors and has helped to hide spatial inequity in our settlements. Thirdly, the municipal government has considerable influence over the space economy of settlements. Under its mandate, local government can determine the nature and location of key infrastructure and where settlement is to occur and where not. Local government cannot grow the economy, but it impacts economic success through the provision and maintenance of infrastructure and how activities are organised in space.

3.2.3 Strategic Focus Area 3: Safe Valley

Establishing safety and law-abiding behaviour in greater Stellenbosch is an absolute priority. All our efforts to improve services, opportunities, and sound financial position – including affordable rates – will come to nothing if by-laws are not respected, our assets are vandalised, or our neighbourhoods, roads, business areas, and recreational facilities are not safe. Safety and security, together with cleanliness, are often cited as the most important factors in getting investment into a city or town. A safe and secure greater Stellenbosch area is thus not only a functional necessity but also underpins elements of economic and social development strategies.

3.2.4 Strategic Focus Area 4: Dignified Living

All our citizens should have access to a dignified life, irrespective of their relative material wealth or their background. By a dignified life, we mean, inter alia, access to shelter, ethical administration of municipal housing, and sufficient choice in housing opportunities for different income groups, including young people. We also mean neighbourhoods with accessible public facilities and services. Support for vulnerable groups, including the youth, women, and elderly, is critical, as is a close working relationship with other government and social agencies that focus on the needs of these groups.

3.2.5 Strategic Focus Area 5: Good Governance and Compliance

As more people become urbanised, towns and cities have become increasingly important foci of political and economic power and service provision. As the 13th largest economy nationally, the greater Stellenbosch area and municipality is a significant seat of power and deliverer of services. Deciding what to do, when, where, and to whose benefit it is, however, is a difficult task. The range of services to be provided is wide in scope, and the needs of citizens and enterprises vary significantly. Given the depth of need in many communities and limited resources, tough choices have to be made. To succeed, municipalities have to develop appropriate policy and decision-making structures and plan carefully for the long and short term (across territorial areas and sectors). They should also

ensure synergy between the work of the political and administrative spheres of the municipality, their work, and that of other spheres of government, civil society, and the business sector. Municipalities should communicate well and monitor processes and procedures in a structured manner. It is also important that excellence in service delivery contributions, both external and internal to the organisation, be recognised and built upon.

We cannot serve the needs of our citizens without a skilled and customer-focused administration in all the different functional areas and at all levels of the municipality. Given the rapid change in all facets of society, the opportunity must exist for staff to develop their skills, whether in specific functional areas or management. To ensure the best use of public resources, regular performance management is essential. The information must be readily available and contact between citizens and the municipality should be responsive and as efficient as possible.

The facilities that house the administration also need to be organised in a manner that facilitates integrated and joint work among the staff themselves, and between staff, political leadership, and other sectors of the community.

A sound financial basis is central to implementing any strategy. The greater Stellenbosch area is no exception. To meet the needs of its citizens, the municipality is required to manage revenue streams sustainably. It also needs to ensure that funds available are utilised for identified projects and that value for money is achieved. In procuring goods and services, ethical conduct is essential to ensuring the integrity of the municipality. It is most important that the use of municipal resources supports agreed-upon objectives; in other words, the municipal budget and ongoing expenditure must be strategy-led.

3.3 Strategic Objectives and Predetermined Objectives

Figure 14: Strategic Focus Areas and Predetermined Objectives

SFA 1: Valley of Possibility

Predetermined Objectives

1.1 Create an environment conducive to business development and job creation.
1.2 To facilitate and coordinate support for emerging entrepreneurs by utilising internal SCM processes and linking SMMEs with opportunities in the market.
1.3 To provide, upgrade, and maintain an effective engineering infrastructure to support effective service delivery.
1.4 To ensure the provision of non-motorised transport routes as a functional mode of transport.

SFA 2: Green and Sustainable Valley

Predetermined Objectives

2.1 Managing human use of the biosphere and its resources.
2.2 Enhancing the integrity of the environment is imperative for long-term sustainability.
2.3 Incorporating biodiversity into the environment is an imperative for long-term sustainability.
2.4 Ensuring spatial sustainability.
2.5 Facilitate the efficient use of all forms of capital available to Stellenbosch.
2.6 Building human capacity and ability.
2.7 Efficient information management.

SFA 3: Safe Valley

Predetermined Objectives

3.1 To implement an integrated safety strategy that incorporates multi-stakeholder engagement and social crime preventions.
3.2 To develop and implement institutional crime prevention strategies, with a focus on improved law enforcement and neighbourhood watches.

SFA 4: Dignified Living

Predetermined Objectives

4.1 To develop and maintain sustainable human settlements that will meet the diverse range of housing needs.
4.2 To develop and implement a social infrastructure master plan for the upgrading and maintenance of social facilities in all wards.
4.3 To involve and build the capacity of stakeholders in the planning and management (governance) of the areas where they live. (Promote participatory planning and integrated implementation).
4.4 To provide access to basic services for households in the WC024 area.

SFA 5: Good Governance and Compliance

Predetermined Objectives

5.1 To develop, align, and implement effective management Information systems.
5.2 An effective asset management system to optimise the use of municipal assets.
5.3 To manage integrated development planning and the efficient measurement of predetermined objectives as per the regulatory framework.
5.4 To involve the community in the planning and management of programmes and projects impacting their ward(s),
5.5 To review municipal governance processes as per the Risk-Based Audit Plan.
5.6 A skilled and capable workforce that supports the growth objectives of the municipal area.
5.7 A responsive, accountable, effective, and efficient local government system.
5.8 To implement an effective revenue management system.
5.9 To provide accurate and relevant financial information for decision-making.
5.10 To develop and implement a responsive, accountable, effective, and efficient customer care structure and system.

3.4 Core Principles in Executing Strategy

The municipality comprises three core components:

- Democratically elected political leadership;
- The administration, comprising officials; and
- Citizens, as individuals, interest groups, and organisations (public, community-based and private).

For sustainable municipal management, political leadership, and the administration work closely together. Ultimately, democratically elected political leadership is responsible for policy direction. The administration provides advice and implements policy.

International best practice shows that the only way to carry out sustainable urban management is to engage in meaningful partnerships with communities, where communities take full responsibility for the development of their neighbourhoods. Stellenbosch Municipality is committed to ensuring that the real social and economic development of our poorest communities is realised through proper community input and ownership. It is not generally realised that communities are legally part of the municipality. This being the case, however, means that local communities cannot simply play the role of critics or passive bystanders. Local communities must play an active part in the planning and implementation of projects and programmes in their neighbourhoods.

A component of community participation focuses on ward-based planning, where the desired outcome is to have a ward-based plan for each of the 23 wards. Ward-based plans are a form of participatory planning designed to promote community action, with clear linkages to the IDP. Such plans mobilise communities and citizens to take responsibility for their destinies and capture what communities see as their desired outcomes. They also help to speed up the implementation of the IDP. This ensures that the IDP objectives become the collective responsibility of community members, ward councillors, ward committees, the business community, NGOs and CBOs, and all other stakeholders in the greater Stellenbosch. This presents an opportunity for visionary local leaders to implement a shared agenda and show tangible and measurable results through collectively addressing the above-mentioned ward priorities.

3.4.1 Alignment with institutional structures and processes

Conventional strategic planning processes aimed at guiding development and management decisions are time-consuming. Preparing a detailed strategic framework and implementation programme can take months. Unfortunately, these processes do not provide for the "now" – the need to guide decisions today. For municipalities, the "now" has become extremely important. Every month counts. We believe that our challenges have become so significant that if we do not find an integrated and commonly shared response to them fast, we may lose much of what is special about an area and be poorly prepared to meet future challenges successfully. We often find that the fact that a strategy is "under preparation" is used as an excuse for inaction or even poor decision-making. The arm's length approach also appears to neglect local experiential knowledge – what people know through working with service issues daily. With this in mind, we have provided for regular, informal, but structured engagements between the MayCo and Director's Forum to discuss strategic matters and how to best respond to these issues.

These planning methods bridge the gap between local experiential knowledge, the technical requirements of strategy preparation, and the need for strategic frameworks to be available to deal with immediate decision-making. This process is aimed at getting an initial position through intense, structured information-sharing and planning workshops on how to direct the development and management of the municipality. Written up as an initial strategy, provision is made for influencing the

decisions of today and the nature of further work in a manner that supports the strategy. The strategy becomes the broad strategic framework, elaborated on in further technical work.

3.4.2 The tools of governance

Policy: defining / framing the position of government and direction for action concerning issues where clear choices exist (for example, to focus on private or public transport, to grow a settlement outwards or contain it inwards).

Plan making: indicating where resources should focus functionally or spatially, in what form, and when.

Legislation: directing, constraining, and rewarding (potentially) the behaviour of different actors in society (in the interest of all citizens).

Regulation: elaborating on behaviour outlined in legislation through guidelines, standards, and so on.

Fiscal measures: fees, charges, and taxes for services as a means for raising government revenue and directing action in support of policy and legislation (through fiscal "incentives").

Financial measures: the priorities and areas of government spending, including investments in infrastructure, facilities, and programmes to support spatial and sectoral or functional area policy and plans.

Institutional measures: arrangements for decision-making, the allocation of powers, responsibilities, agreements, and relationships between government and other actors, human resource capacity / competency, and measurement systems within government and between government and other actors.

Asset management: the approach taken to the management of government assets (land, public facilities, and so on).

Knowledge and information management: the government's investment in and dissemination of knowledge about existing / anticipated conditions that require management.

Advocacy: the positions that the government takes on issues, "positive" and "negative." This could be through the media, public meetings / engagements, events, and so on.

3.5 Global Policy Direction

The Stellenbosch Municipality's strategic planning does not occur in a vacuum. Various key policy directives are being employed, ranging from a global reach to more specific directives applicable to the municipality and its neighbouring municipalities. All these directives are considered when framing future strategic planning and resource allocation. The sections below outline key policy directives considered when framing Stellenbosch Municipality's 3rd review of the 5th Generation IDP 2022 – 2027.

3.5.1 Sustainable Development Goals (SDGs)

Figure 15: Sustainable Development Goals (SDGs)

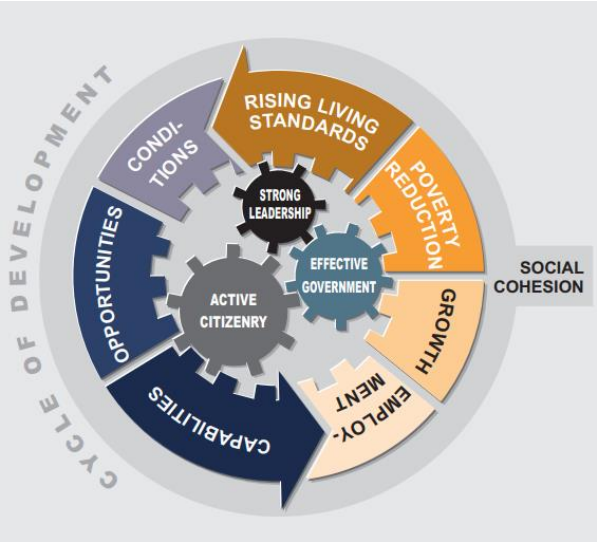
The Sustainable Development Goals (SDGs), officially known as *Transforming Our World: The 2030 Agenda for Sustainable Development* is a set of seventeen aspirational "Global Goals" with 169 targets between them. The Agenda is an action plan for people, the planet, and prosperity, with a focus on strengthening peace and partnerships. The SDGs are integrated and indivisible and balance the three dimensions of sustainable development: the **economic, social,** and **environmental**. The Goals are the following:

Sustainable Development Goals (SDGs) 2030

- Goal 1: End poverty in all its forms everywhere.
- Goal 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.
- Goal 3: Ensure healthy lives and promote well-being for all ages.
- Goal 4: Ensure inclusive and equitable quality education and promote life-long learning opportunities for all.
- Goal 5: Achieve gender equality and empower all women and girls.
- Goal 6: Ensure availability and sustainable management of water and sanitation for all.
- Goal 7: Ensure access to affordable, reliable, sustainable, and modern energy for all.
- Goal 8: Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all.
- Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialisation, and foster innovation.
- Goal 10: Reduce inequality within and among countries.
- Goal 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.
- Goal 12: Ensure sustainable consumption and production patterns.
- Goal 13: Take urgent action to combat climate change and its impacts.
- Goal 14: Conserve and sustainably use the oceans, seas, and marine resources for sustainable development.
- Goal 15: Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat deforestation, halt and reverse land degradation, and halt biodiversity loss.
- Goal 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all, and build effective, accountable, and inclusive institutions at all levels.
- Goal 17: Strengthen the means of implementation and revitalise the global partnership for sustainable development.

3.6 National Policy Direction

3.6.1 National Development Plan (NDP) – 2030



The President appointed a National Planning Commission in May 2010 to draft a vision and plan for the country. On 9 June 2011, the Commission released a diagnostic document and elements of a vision statement. On 11 November 2011, the vision statement and the plan were released for consideration. The Commission consulted widely on the draft plan. The National Development Plan was adopted by the Cabinet in September 2012.

An approach to change

The graphic below demonstrates the close link between capabilities, opportunities, and employment on social and living conditions. It shows how leadership, active citizenry and effective government can help drive development in a socially cohesive environment.

The plan focuses on the critical capabilities needed to transform the economy and society. Achieving these capabilities is not automatic, nor will they emerge if the country continues its present trajectory. Rising levels of frustration and impatience suggest that time is of the essence: failure to act will threaten democratic gains. In particular, South Africa must find ways to urgently reduce alarming levels of youth unemployment and provide young people with broader opportunities.

Figure 16: National Development Plan – An approach to change

Progress over the next two decades means doing things differently. Given the complexity of national development, the plan sets out six interlinked priorities:

- Uniting all South Africans around a common programme to achieve prosperity and equity.
- Promoting active citizenry to strengthen development, democracy, and accountability;
- Bringing about faster economic growth, higher investment, and greater labour absorption;
- Focusing on key capabilities of people and the state;
- Building a capable and developmental state; and
- Encouraging strong leadership throughout society to work together to solve problems.

The Plan in brief

By 2030

- Eliminate income poverty – Reduce the proportion of households with a monthly income below R419 per person (in 2009 prices) from 39% to zero; and
- Reduce inequality – The Gini coefficient should fall from 0.69 to 0.6.

Enabling milestones

- Increase employment from 13 million in 2010 to 24 million in 2030.
- Raise per capita income from R50 000 in 2010 to R120 000 by 2030.
- Increase the share of national income in the bottom 40% from 6% to 10%.
- Establish a competitive base of infrastructure, human resources, and regulatory frameworks.
- Ensure that skilled, technical, professional, and managerial posts better reflect the country's racial, gender, and disability makeup.
- Broaden ownership of assets to historically disadvantaged groups.
- Increase the quality of education so that all children have at least two years of preschool education and all children in grade 3 can read and write.
- Provide affordable access to quality health care while promoting health and well-being.
- Establish effective, safe, and affordable public transport.
- Produce sufficient energy to support the industry at competitive prices, ensuring access for poor households, while reducing carbon emissions per unit of power by about one-third.
- Ensure that all South Africans have access to clean running water in their homes.
- Make high-speed broadband internet universally available at competitive prices.

- Realise a food trade surplus, with one-third produced by small-scale farmers or households.
- Ensure household food and nutrition security.
- Entrench a social security system covering all working people, with social protection for the poor and other groups in need, such as children and people with disabilities.
- Realise a developmental, capable, and ethical state that treats citizens with dignity.
- Ensure that all people live safely, with an independent and fair criminal justice system.
- Broaden social cohesion and unity while redressing the inequities of the past.
- Play a leading role in continental development, economic integration, and human rights.

3.6.2 Medium-Term Development Plan (MTDP) 2024 – 2029

The MTDP is a high-level strategic document to guide the five-year implementation and monitoring of the National Development Plan (NDP) 2030. The MTDP replaces the Medium-Term Strategic Framework (MTSF) and is designed to focus on fewer, high-impact interventions to drive measurable results. It sets targets for the implementation of the priorities and interventions for the next five years and states the outcomes and indicators to be monitored.

The MTDP was approved by Cabinet Lekgotla on 29 January 2025 and is structured around three core strategic priorities:

The MTDP 2024 – 2029 will guide the work of the Government of National Unity for the next five years in pursuit of three strategic national priorities: **driving inclusive growth and job creation, reducing poverty and tackling the high cost of living,** and **building a capable, ethical and developmental state** through the three pillars of the NDP.

Figure 17: Three NDP Pillars

The Government of National Unity has set five goals for the next five years, which are:
Goal 1: A dynamic, growing economy;
Goal 2: A more equal society, where no person lives in poverty;
Goal 3: A capable state delivering basic services to all citizens;
Goal 4: A safe and secure environment; and
Goal 5: A cohesive and united nation.

The table below encapsulates the MTDP goals, strategic priorities and outcomes identified to achieve the goals and objectives:

Table 17: MTDP 2024 – 2029: Goals, Strategic Priorities and Outcomes

Medium Term Development Plan (MTDP) 2024-2029	
Strategic Priorities	**Outcomes**
MTDP Strategic Priority 1: Drive inclusive growth and job creation.	▪ Increased employment and work opportunities; ▪ Accelerated growth of strategic industrial and labour-intensive sectors; ▪ Enabling environment for investment and improved competitiveness through structural reforms; ▪ Increased infrastructure investment, access and efficiency; ▪ Improved energy security and a just energy transition; ▪ Increased trade and investment; ▪ A dynamic science, technology and innovation ecosystem for growth; ▪ Supportive and sustainable economic policy environment; and ▪ Economic transformation and equitable inclusion of women, youth and persons with disabilities for a just society.
MTDP Strategic Priority 2: Reduce poverty and tackle the high cost of living	▪ Reduced poverty and improved livelihoods; ▪ Improved coverage of social protection; ▪ Improved access to affordable and quality healthcare; ▪ Improved education outcomes and skills; ▪ Skills for the economy; and ▪ Social cohesion and nation-building.
MTDP Strategic Priority 3: Build a capable, ethical and developmental state.	▪ Improved service delivery in the local government sphere; ▪ Improved governance and performance of public entities; ▪ An ethical, capable and professional public service; ▪ Digital transformation across the state; ▪ Mainstreaming of gender, empowerment of youth and persons with disabilities; ▪ A reformed, integrated and modernised Criminal Justice System; ▪ Effective border security; ▪ Secured cyberspace; ▪ Increased feelings of safety of women and children in communities; ▪ Combat priority offences (economic, organised crime and corruption); ▪ Advance South African foreign policy for a better world; and ▪ Enhanced peace and security in Africa

3.6.3 National District Development Model and One Plan

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-oriented way to speed up service delivery to ensure that municipalities are properly supported and adequately resourced. The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its own distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

The objectives of the DDM are to:

- solve the silos at a horizontal and vertical level;
- maximise impact and align plans and resources at our disposal through the development of "One District, One Plan, and One Budget";
- narrow the distance between people and government by strengthening the coordination role and capacities at the district level;
- ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level;
- build government capacity to support municipalities;
- strengthen monitoring and evaluation at district and local levels;
- implement a balanced approach towards development between urban and rural areas;

- ensure sustainable development while accelerating initiatives to promote poverty eradication, employment, and equality; and
- exercise oversight over budgets and projects in an accountable and transparent manner.

Nationally, the DDM is expressed through the development of a One Plan. The One Plan is defined as an intergovernmental plan setting out a 25–30-year long-term strategic framework (consisting of short-, medium-, and long-term actions) to guide investment and delivery in each of the districts and metropolitan spaces. This plan for each space is to be jointly developed and agreed to by all three spheres of government.

3.6.4 Integrated Urban Development Framework (IUDF)

The National Development Plan (NPD) indicated that by 2030, South Africa should observe meaningful and measurable progress in creating more functionally integrated, balanced, and vibrant urban settlements. To attain this goal, the Department of Cooperative Governance, working in collaboration with other national departments and other role-players, developed the Integrated Urban Development Framework (IUDF) to transform and restructure South Africa's urban spaces.

The IUDF aims to guide the development of **inclusive**, **resilient**, and **liveable urban settlements** while directly addressing the unique conditions and challenges facing South Africa's cities and towns.

To achieve the transformation vision, four (4) overall strategic goals were introduced:

Figure 18: UIDF Strategic Goals and Levers

Source: Integrated Urban Development Framework

The IUDF strategic goals listed above create nine policy levers. These policy levers can only be used if they are added to tools for planning municipal development, like the Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

3.7 Provincial Policy Direction

3.7.1 The Western Cape Government Provincial Strategic Plan 2025 - 2030

The Western Cape Provincial Government (WCG), Provincial Strategic Plan (PSP) 2024 - 2030, outlines the strategic goals and priorities for the period 2025- 2030.

The overarching strategic direction for the provincial government over the features below:

Strategic:

The PSP outlines high-level priorities and goals for the provincial government to enhance residents' quality of life. PSP 2025-2030 focuses on shared, resident-centred outcomes which inform departmental and portfolio plans.

Resident-centric:

The PSP focuses on achieving meaningful changes for residents, applying the life course approach and systems theory to define impact, and theories of change to track progress.

Transversal:

The PSP promotes integration and collaboration across provincial departments, and a whole-of-society approach, to address complex challenges through transversal responses.

The PSP 2025 – 2023 builds on proven approaches from previous cycles, incorporating lessons and established strategies that guide government action. The Western Cape's Key Priorities for 2025 – 2030 are:

WCG Key Priority 1: Growth for Jobs

- Driving growth opportunities through investment
- Stimulating market growth through exports and domestic markets
- Energy resilience and transition to net-zero carbon.
- Water security and resilience
- Technology and innovation

WCG Key Priority 2: Safety

- Integrated Violence Prevention
- Safe and Secure Communities and Infrastructure
- An effective and responsive law enforcement

WCG Key Priority 3: Educated, Healthy and Caring Society

- Human Capital Development:
- Infrastructure and Spatial Transformation; and
- Resilience and Sustainability

WCG Key Priority 4: Innovation, Culture and Governance

- Supporting economic growth for job creation
  - Greater confidence and trust in the WCG;
  - Reliable, high-quality essential public goods
- Service delivery enablers;
  - Innovation;
  - Integration and collaboration;
  - Culture and people-centric delivery;
  - Futures thinking and informed decision making; and
  - Ease of doing government

3.8 The Cape Winelands District Municipality (CWDM) Strategic Focus

The Cape Winelands District Municipality has set the following strategic objectives for their District:

Table 18: CWDM Strategic Objective 2022 – 2027

SOs	Strategic Objective 2022 – 2027
SO 1	Creating an environment and forging partnerships that ensure social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SO 2	Promoting sustainable infrastructure services and a transport system which fosters social and economic opportunities.
SO 3	Providing effective and efficient financial and strategic support services to the Cape Winelands District Municipality.

3.9 Local Policy Direction

3.9.1 Stellenbosch Municipality

The intent of the strategic goals for the 3rd review of the 5th Generation IDP 2022 – 2027 will remain the same as the strategic goals of the 5th Generation IDP 2017 – 2022.

The table below indicates how the municipality's Strategic Focus Areas (SFAs) are aligned with national, provincial, and district plans.

Table 19: Horizontal Alignment Matrix

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	Medium-Term Development Plan	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 1 Valley of Possibility	Promote sustained, inclusive, and sustainable economic growth, full and productive employment, and decent work for all (8)	Drive inclusive growth and job creation (1)	Growth for Jobs (1)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 2 Green and Sustainable Valley	Take urgent action to combat climate change (13) Protect, restore, and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss (15)	Build a capable, ethical and developmental state (3)	Educated, Healthy and Caring Society (3) Innovation, Culture and Governance (4)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities including the empowerment of the poor in the Cape Winelands District through economic, environmental, and social infrastructure investment.
	Make cities and human settlements inclusive, safe, resilient, and sustainable (11)	Build a capable, ethical and developmental state (3)	Educated, Healthy and Caring Society (3)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.

Strategic Focus Areas (SFAs)	Sustainable Development Goals (SDGs)	Medium-Term Development Plan	Western Cape Provincial Government Strategic Plan	CWDM Strategic Objectives
SFA 3 Safe Valley	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Build a capable, ethical and developmental state (3)	Safety (2)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
SFA 4 Dignified Living	Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all (4) Ensure healthy lives and promote well-being for all at all ages (3)	Reduce poverty and tackle the high cost of living (2)	Educated, Healthy and Caring Society (3)	Creating an environment and forging partnerships that ensure the health, safety, social and economic development of all communities, including the empowerment of the poor in the Cape Winelands District.
	Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation (9)	Drive inclusive growth and job creation (1)	Innovation, Culture and Governance (4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
SFA 5 Good Governance and Compliance	Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable, and inclusive institutions at all levels (16)	Build a capable, ethical and developmental state (3)	Growth for Jobs (1) Innovation, Culture and Governance (4)	Promoting sustainable infrastructure services and transport systems which foster social and economic opportunities.
			Innovation, Culture and Governance (4)	To provide an effective and efficient financial and strategic support service to the Cape Winelands District Municipality.

3.11 Climate Change Adaptation

Climate change is described as the variation of global atmospheric weather patterns resulting from a rise in the temperature of the earth's surface. It is often referred to as 'global warming' and attributed directly or indirectly to human activity that alters the composition of the global atmosphere. This is in addition to natural climate variability observed over comparable time periods. South Africa is subject to climate variability and extreme weather, characterised by intense heatwaves, warm winters, cold and rainy summers, thunderstorms, wildfires, droughts, floods and tropical cyclones, resulting in challenges for people's livelihoods. Thus, climate change remains a development challenge of the 21st century internationally, and South Africa at a national, provincial and local government level is exploring diverse ways of adapting to and mitigating the impacts of climate change.

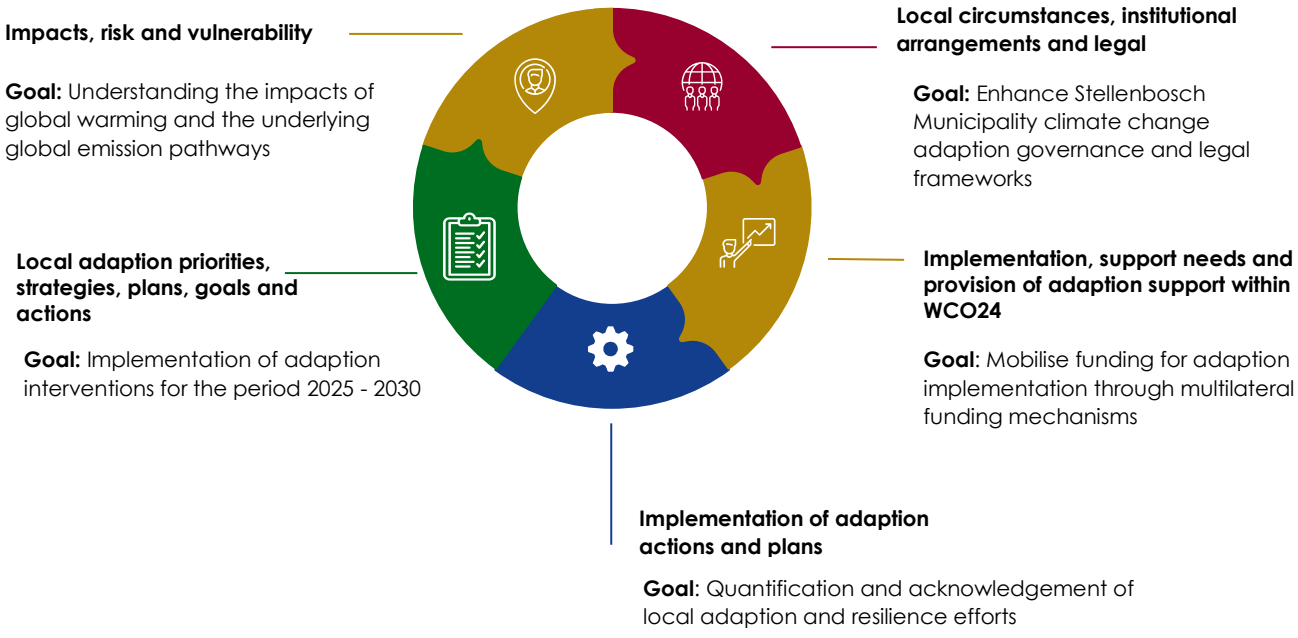
A status quo report on climate change in the Western Cape (June 2005) states that the future climate of the Western Cape is likely to be warmer and drier than at present, according to several current model projections. In support of these projections, recent temperature trends reveal appreciable warming in the Western Cape over the past three decades. Rainfall trends are not as clearly identifiable. A future that is warmer, and possibly drier, will encompass a range of consequences that will affect the economy, the livelihoods of people and the ecological integrity of the region. Therefore, it can be ascribed that climate is indeed a driver of instability in various ways.

Figure 19: ***Climate as a driver of instability***

Source: https://www.envirosecurity.org/publications/climate-change-implications-for-defenceH

The Western Cape already experiences regular severe weather events, which will become more extreme. Despite an overall drying trend, it is likely that more storms and flooding are anticipated. Stellenbosch is characterised by a Mediterranean climate, characterised by warm, dry summers and cold, wet winters. The municipality receives approximately 80% of its annual rainfall in the winter months, typically as cyclonic rain from cold fronts, and 20% during its summer months. Summers are generally hot with temperatures averaging between 25° and 30°C. Hence, for Stellenbosch Municipality to respond to the adaptation to climate change, high priority is given to the formulation of a framework and plan concerning climate change adaptation and to provide support to citizens and key stakeholders in adapting to the current and future impacts of climate change (climate resilience) in the municipal area.

Legislative Framework of Climate Change



The Climate Change Act, 2024 (Act No. 22 of 2024) is a pivotal legislative measure aimed at addressing the urgent global challenge of climate change through comprehensive and impactful strategies. The objectives of the Act. The overarching goal is to support South Africa's transition to a low-carbon, climate-resilient economy and society while promoting sustainable development.

The objectives of the Climate Change Act 22 of 2024 are described as:

- Promotes the formalisation of adaptation processes through policy interventions;
- Mandates clear adaptation road maps based on scenarios to assist with planning and resourcing;
- Promotes coordination through different tiers of government;
- Allows for sectoral-specific interventions that focus on interventions, particularly for vulnerable sectors;
- Encourages mainstreaming of climate adaptation through policy and planning tools;
- Aims to facilitate effective resourcing through the establishment of financial mechanisms to support the response;
- Encourages stakeholder engagement in planning to tap into local knowledge and create buy-in;
- Support South Africa's international obligations under the Paris Agreement, ensuring that national adaptation efforts contribute to global climate goals;
- It establishes mechanisms for tracking progress on adaptation actions; and
- To provide a feedback mechanism for future planning and decision–making.

For Stellenbosch Municipality to respond to the objectives set out in the Climate Change Act, the following areas of focus will be explored for the period 2025/26 – 2026/27, with an annual review to consider the changing circumstances and progress on the formulation and compilation of a framework and plan.

Figure 20: Climate Change Adaptation Focus Areas and Goals

The success of climate change adaptation in the Stellenbosch municipal area will be evaluated based on the key IDP deliverables outlined in the table below for the period 2022 – 2027.

Table 22: Summary Results: Municipal Manager Priority IDP Deliverables 2022 - 2027

CHAPTER 4:
Spatial Development Framework

4.1 The Purpose of the Spatial Development Framework

Spatial Development Frameworks (SDFs) serve to provide strategic direction and align the efforts of all government spheres as they apply within the municipal area. The SDF serves to give a coherent spatial direction to the municipal Integrated Development Plan (IDP) and provide a planned and integrated approach to achieve the shared spatial development vision, goals, and objectives for sector plans of government over the short-term (5 years) as well as over the strategically longer term (10 – 20 years) to achieve the desired spatial growth and development pattern of the municipality. Most importantly, the SDF outlines the municipality's spatial agenda for its service departments, ensuring that their sector plans, programmes, and projects are grounded in sound and common spatial logic.

In essence, the SDF is a spatial contract between all spheres of government as well as the private sector, which is binding and must assist in integrating, coordinating, aligning, and expressing development efforts. It should be actively supported through the specific arrangement of prioritising, mobilising, sequencing, and implementing investment in priority spatial structuring areas to achieve the legislated development principles of sustainable development. Therefore, the SDF and the Capital Expenditure Framework (CEF) indicate where and how the municipality intends to channel public investment, influence, and other resources at its disposal. In broad terms, this includes where infrastructure and public facility investment will be prioritised, where private sector partners will be sought in development, and how the municipality will view development applications through its spatial planning and land use management system.

4.2 The relationship between the IDP and SDF

Figure 21: Relationship: IDP and SDF

At its core, SDFs deal with the art and science of shaping places at different scales (or areas of influence, from large regions to municipal jurisdictions or neighbourhood precincts). The SDF aims to:

- Enable a long-term spatial vision for the future of regions and places to be best developed over

time that is based on evidence, local distinctiveness, and community-derived objectives;
- Translate this vision into a set of strategic municipal planning, policies, priorities, programmes, and land allocations, together with the public-sector resources (budget) to deliver them;
- Create a framework for private investment and regeneration that promotes economic, environmental, and social well-being for a specific region or area, i.e., the Adam Tas Corridor Local Areas Spatial Development Framework and Development Guidelines (October 2022); and
- Coordinate and deliver the public-sector components of this vision with other agencies and processes to ensure implementation through its CEF (medium-term) and IDP (short-term).

In the case of Stellenbosch Municipality, the SDF, CEF, and IDP must answer the following questions: "How is Stellenbosch going to develop over the next ten to thirty years? What kind of development will take place, where will it take place, and who will be responsible for what aspect of the development?"

4.3 The Legislative Framework of Municipal SDFs

With the enactment of the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), a new planning regime was introduced in South Africa. The coherent legislative system has been designed to spatially transform the country in its democratic era. In broad terms, SPLUMA differentiates between two components of the planning system:

- Spatial Development Frameworks; and
- The Land Use Management System (LUMS).

Section 12(1) of SPLUMA sets out general provisions that apply to the preparation of all scales of SDFs. These provisions require that all SDFs must:

- Interpret and represent the spatial development vision of the responsible sphere of government and competent authority;
- Be informed by a long-term spatial development vision;
- Represent the integration and trade-off of all relevant sector policies and plans;
- Guide planning and development decisions across all sectors of government;
- Guide a provincial department or municipality in taking any decision or exercising any discretion in terms of this Act or any other law relating to spatial planning and land use management systems;
- Contribute to a coherent, planned approach to spatial development in the national, provincial, and municipal spheres;
- Provide clear and accessible information to the public and private sectors and provide direction for investment purposes;
- Include previously disadvantaged areas, areas under traditional leadership, rural areas, informal settlements, slums, and land holdings of state-owned enterprises and government agencies, and address their inclusion and integration into the spatial, economic, social, and environmental objectives of the relevant sphere;
- Address historical spatial imbalances in development;
- Identify the long-term risks of spatial patterns of growth and development and the policies and strategies necessary to mitigate those risks;
- Provide direction for strategic developments, and infrastructure investment;
- Promote efficient, sustainable, and planned investments by all sectors;
- Indicate priority areas for investment in land development;
- Promote a rational and predictable land development environment to create trust and stimulate investment;
- Take cognisance of any environmental management instrument adopted by the relevant environmental management authority;
- Give effect to national legislation and policies on mineral resources and sustainable utilisation

and protection of agricultural resources; and

- Consider and, where necessary, incorporate the outcomes of substantial public engagement, including direct participation in the process through public meetings, public exhibitions, public debates and discourses in the media, and any other forum or mechanisms that promote such direct involvement.

Chapter 2 of SPLUMA sets out the development principles that must guide the preparation, adoption, and implementation of any SDF, policy, or by-law concerning spatial planning and the development or use of land. The table below summarises the five SPLUMA principles and what they mean.

Table 24: SPLUMA and Development Principles

Principle	Meaning
Spatial justice	• Past spatial and other development imbalances must be redressed through improved access to and use of land. • SDFs (and associated policies) must address the inclusion of persons and areas that were previously excluded, with an emphasis on informal settlements and areas characterised by widespread poverty and deprivation. • Spatial planning mechanisms, including zoning scheme by-laws, must incorporate provisions that enable redress in access to land by disadvantaged communities and persons. • Land use management systems must include all areas of a municipality and specifically include provisions that are flexible and appropriate for the management of disadvantaged areas and informal settlements. • Land development procedures must include provisions that accommodate access to secure tenure and the incremental upgrading of informal areas. • In considering an application, a Municipal Planning Tribunal may not impede or restrict the exercise of its discretion solely because the value of land or property is affected by the outcome of the application.
Spatial sustainability	• Promote land development that is within the fiscal, institutional, and administrative means of government. • Give special consideration to the protection of prime and unique agricultural land. • Uphold the consistency of land use measures under environmental management instruments. • Promote and stimulate the effective and equitable functioning of land markets. • Consider all current and future costs to all parties for the provision of infrastructure and social services in land developments. • Promote land development in sustainable locations, limit urban sprawl, and result in viable communities.
Efficiency	• Land development must optimise the use of existing resources and infrastructure. • Decision-making procedures must be designed to minimise negative financial, social, economic, or environmental impacts. • Development application procedures must be efficient and streamlined, and timeframes must be adhered to by all parties.
Spatial resilience	• The flexibility of spatial plans, policies, and land use management systems is necessary to ensure sustainable livelihoods in communities most likely to suffer the impacts of economic and environmental shocks.
Good administration	• All spheres of government must ensure an integrated approach to land use and land development, guided by spatial planning and land use management systems. • All government departments must provide their sector inputs and comply with any other prescribed requirements during the preparation or amendment of SDFs. • The requirements of any law relating to land development and land use must be met timeously. • Transparent processes of public participation are incorporated into the preparation and amendment of spatial plans, policies, land use schemes, and development applications to allow all parties to provide input on matters affecting them. • Policies, legislation, and procedures must be set up to inform and empower members of the public.

At the municipal sphere of government, aligned with SPLUMA, and the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), the Stellenbosch Municipal Land Use Planning By-law (dated 9 June 2023) further outlines minimum standards for SDFs, both in the preparation process and content. In support of SPLUMA, the Department of Rural Development and Land Reform (now known as the Department of Agriculture, Land Reform, and Rural Development) prepared a detailed process and content entitled "Guidelines for the Development of Provincial, Regional and Municipal Spatial Development Frameworks and Precinct Plans." The Stellenbosch Municipality follows these legislative frameworks and guidelines in its work on the municipal and local SDFs, which is subject to an extensive review every five years, with less comprehensive reviews annually.

4.4 Stellenbosch Municipality's work on its SDF, Annual Reviews as part of the IDP review process

Background on the 1st Annual Review, Amendment, and Adoption of the Stellenbosch IDP / MSDF / CEF, 2023, as part of the IDP Process Plan 2023/24.

The need for all municipalities (metropolitan, local, and district) to have Spatial Development Frameworks (MSDFs) as core components of their Integrated Development Plans (IDPs) has been a legislative requirement for the past 24 years, since the implementation of the Municipal Systems Act, Act 32 of 2000 (MSA). Over the past 24 years, our understanding of the importance of MSDFs has improved. In this period, three further pieces of legislation have been introduced, namely the Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) (SPLUMA), the Western Cape Land Use Planning Act, 2014 (Act No. 3 of 2014) (LUPA), and the Stellenbosch Municipality Land Use Planning By-law (2023), which have further clarified the role and importance of MSDFs. Specifically, these legislations have provided further needed detail on the content of MSDFs and the administrative processes to be followed for review, amendment, and adoption of MSDFs.

Given that the MSA makes it clear that an MSDF (including the Capital Expenditure Framework (CEF) is a core component of an IDP, it follows that the process requirements prescribed by the MSA in respect of an IDP, must apply to an MSDF. In the Stellenbosch Municipality context, Council approved the commencement of the **proposed review and amendment process** of the Municipal Spatial Development Framework, 2019 (MSDF) and Capital Expenditure Framework, 2021(CEF) to achieve strategic, spatial, and financial alignment and to enable the coordination of policies within the municipality. In doing so, an integrative strategic, spatial and financial planning approach was followed to avoid the duplication of efforts and to ensure maximum positive impact from the investment of resources with specific consideration to the adoption of the catalytic projects as approved in the Adam Tas Corridor Local Area Spatial Development Framework, 2022 (ATC LASDF). This resulted in a reviewed and amended MSDF and CEF which was supported and adopted at a Council Meeting held on 27 June 2023.

The final adopted IDP / MSDF / CEF were incorporated and adopted within the 2022-2027 IDP on 30 October 2023, with confirmation from the Western Cape Provincial MEC for Local Government, Environmental Affairs and Development Planning on compliance with the relevant legislative requirements received on 28 November 2023.

Legislative requirements and process for the 2nd Annual Review of the Amended IDP / MSDF / CEF (2023), as part of the IDP Process Plan 2024/25.

Section 34(a)(i) and (ii) of the MSA speaks directly to the need to "review" an MSDF annually in terms of the performance of the municipality concerning the guidance provided in its MSDF, as well as at any time deemed necessary in response to changing circumstances. The annual review allows for proactive monitoring of the implementation of the MSDF while highlighting the need for actions that need to be taken to support the MSDF implementation on a sustained basis. It is also important to note that an annual review of the MSDF does not necessarily lead to or require an amendment of the MSDF.

Section 34(b) of the MSA goes on to say that this review of the Amended IDP/MSDF/CEF may result in there needing to be an amendment to the MSDF. If an amendment is required, the process prescribed in Regulation 3 of the Local Government: Municipal Planning and Performance Management Regulation, 2001, must be followed. In addition, the requirements of section 20(3) in SPLUMA, and sections 10, 11, 12, or 13, and 14 of LUPA, and sections 3, 4, or 5 and 10 of Stellenbosch Municipality Land Use Planning By-law (2023) must also be satisfied. It is important to note that when an amendment process is required due to recommendations from the review, or decision by the Council, this process should be planned for and included in the IDP process plan developed in terms of sections

28 and 29 of the MSA. Furthermore, it should be noted that the timeframe normally associated with an amendment process for the IDP / SDF / CEF ranges between 24 to 36 months, and upon conclusion **does not give any development rights** and the necessary land development applications should still be submitted with the Division: Development Management for assessment and decision.

To support municipalities with unpacking the legislative requirements and administrative processes, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP) and the national Department of Cooperative Governance have issued a practice note and revised IDP guidelines. For the annual review of the Amended IDP/MSDF/CEF (2023), this internal review was part of the IDP process plan 2024/25 and was undertaken based on the mentioned practice note and guidelines. Accordingly, and concerning this internal desktop review of the MSDF, the following factors have been considered regarding the performance of a municipality concerning its MSDF, namely:

- Are the goals and objectives of the MSDF being reached by the municipality?
- Is the direction provided by the MSDF being brought into the compilation or amendments of relevant sector plans, e.g., the Integrated Transport Plan (ITP), Water Services Development Plan, Integrated Waste Management Plan, Air Quality Management Plan, Engineering Services master plans, the Human Settlements plan, etc.?
- Is the municipal budget spent in line with the priority development areas identified in the MSDF?
- What substantive development permissions (rezoning and subdivisions) has the municipality given in the past financial year?
- Are these development permissions aligned with the objectives, principles, and policies set out in the MSDF?
- What site-specific deviations did the Municipal Planning Tribunal (MPT) permit? What is the impact of these on the Municipal IDP/Budget/MSDF?
- Are implementation actions identified by the MSDF (including the CEF) being brought forward into the IDP, and SDBIPs and where relevant, budgeted for?
- Are implementation actions identified by the MSDF (including the Capital Investment Framework) included in the Strategic Plans and/or Annual Performance Plans and Budgets of relevant provincial and national government departments and state-owned entities?
- Do prior amendments suggest the municipality needs to commence with a compilation of a new MSDF?

The purpose of the annual review report will be to start highlighting and building up a list of what should inform the review of the amended IDP in years 4 and 5 and what should be addressed in the next generation IDP (and MSDF/CEF) to be adopted for the next 5-year term of office. Hence, the review will compile a list of issues to be dealt with when compiling the MSDF for the period 2028-2032.

Methodology and Performance Measurement Assessment for the 2nd Annual Review of the Amended IDP / MSDF / CEF (2023).

One of the contributing factors to the lack of spatial transformation is that strategic policy seldom leads the implementation agenda of municipalities. Ideally, the infrastructure and built environment programmes of municipalities should align with the spatial objectives of the MSDF, which is the 20-year plan for the management of the physical growth and development of the municipality. The MSDF, as the strategic and integrative spatial planning policy, outlines the municipality's spatial agenda to its service directorates, ensuring that their sector plans, programmes, and projects are grounded in a sound common spatial logic, while the CEF, the municipality's capital planning framework over the 10-year planning horizon, enables specific arrangements for prioritisation, mobilising, sequencing and implementing public and private infrastructural and land development investment ensuring maximum positive impact from the investment of scarce resources as agreed to by all stakeholders, while ensuring financial sustainability.

The Stellenbosch Municipality has, over the last few years, made deliberate efforts to improve municipal policy coherence and the vertical alignment in its intra-municipal planning sphere through a collaborative approach using the Capital Planning Forum (CPF) and the MSDF/CEF mechanisms. This approach enables the municipality's long-term strategic development vision to direct infrastructure implementation in the functional areas and priority development areas of the municipality (i.e., Stellenbosch, Klapmuts, and Franschhoek), whilst remaining conscious of the municipality's financial position and infrastructure planning needs.

The 2nd annual review for the 2024/25 cycle of the MSDF deals with the performance monitoring of the implementation programme of the MSDF around specific spatial imperatives and associated development themes i.e. planning, environment, local economic development, housing, mobility, infrastructure, and community development. The successful implementation of the seven (7) spatial imperatives (also referred to as principles) and guidelines is dependent on related spatial and non-spatial supportive policies, which have specific implications on intra-municipal sector planning. This implies policy alignment across municipal functional areas and services.

Each of the spatial imperatives highlights the supportive intra-municipal directorates and their implications on sector planning across the MSDF implementation programme. For this 2nd annual review process of the implementation programme of the MSDF, which is coordinated by the Directorate: Planning and Economic Development (D: P&ED), Council resolutions adopted by the municipality from 27 September 2023 to date (05/2024) were also analysed. The MSDF 2nd Annual Review Report also evaluated inputs received during the 2023/24 IDP public participation process. One of the inputs received from a consultant requested the inclusion of the Libertas Development Proposal within the urban edge. The report from the consultant further explains the site-specific reasons for the deviation from the Council's spatial policy and the reasons for considering a very specific type of development that the amended IDP/MSDF/CEF did not consider, and which hasn't been catered for within Stellenbosch town. The comments received by the consultant require an assessment of performance measurements (sections 34(a)(i) and 41 of the MSA), and the extent that changing circumstances demand an amendment (section 34(a)(ii)) to the Municipal Council. It is important to note that **changing circumstances generally refers to circumstances that are out of the control of the municipality that have a substantive impact on the MSDF policies and proposals, and could include e.g., changes in legislation, policy, norms or standards, disasters, trigger points being reached in terms of certain parameters, significant proposal for development in the municipal area that will result in significantly changed human settlement needs, socio-economic needs or altered natural environments, change in population growth, change in political leadership and new information etc**.

In addition, the consultant has submitted the required land development applications however, it is important to state that the motivation for the site-specific deviation forms part of the land development application, which is currently being processed by the Division: Development Management. Accordingly, the comments and recommendations expressed in the MSDF review report focus on the assessment of performance measurements as stipulated in sections 34(a)(i) and (ii) of the MSA, and it **does not** deal with the merits of the site-specific deviation application. The submissions from the consultants were assessed in terms of the performance measurements as detailed in the Implementation Programme (refer to Chapter 6) of the Amended MSDF/CEF, 2023.

The second annual review report of the Amended IDP/MSDF/CEF, 2023 served before the Council on 30 October 2024. Council was requested to consider, support and adopt the report, and to adopt the recommendation to not commence with the amendment process in terms of Section 34(b) of the MSA to amend the MSDF/CEF (2023). Council resolved to adopt the second annual review report and to not commence with the administrative process to amend the MSDF/CEF (2023) in terms of Section 34(b) of the MSA.

The sections below provide an overview of the spatial challenges, opportunities, strategies, and programmes as reflected in the SDF over the longer term. The spatial challenges and opportunities identified in the SDF:

The Stellenbosch Municipality's SDF attempts to address the spatial dimensions of varied challenges, documented in this IDP and numerous studies and documents produced to date, dealing with spatial and non-spatial matters.

Framed as a question, the key challenge revolves around how to achieve, through managing the spatial distribution and form of development—primarily land use activities and associated structures, both new and existing—shared and inclusive growth, increased access to opportunities (particularly for disadvantaged citizens), improved sustainability by minimising ecological footprints, and maintenance of the unique sense of place of the settlements and surrounding lands that constitute the municipality.

In addressing these challenges, the SDF has two tasks. The first relates to how activities should be organised and accommodated in space to best address challenges. The second is to guide how other sectors, services, or functional areas should adjust their focus and work to support the recommended organisation and accommodation of activities in space.

Without re-stating the varied challenges of the municipality outlined in full in the IDP and sector documents, the table below lists specific spatial challenges addressed by the SDF, following the broad themes contained in the SDF Guidelines.

Table 25: Spatial Challenges

Theme	Spatial Challenges
Biophysical context	The degradation of key ecological assets and the loss of productive agricultural land have been ongoing. The condition of the river systems within the municipality has deteriorated. Climate change is likely to have a significant impact on the natural resource base of the municipal area, which will include a reduction in water, increased temperatures, increased fire risks, and increased incidences of extreme weather events. This in turn will impact agricultural production, scenic landscapes, the liveability of urban areas, and the ability to provide basic services such as water and sewerage treatment.
Socio-economic context	The population in the municipality will continue to grow above the average provincial rate, and urbanisation rates will increase with settlements absorbing the bulk of growth. The ability of the economy to absorb growth, particularly concerning job creation, is concerning. The informal sector will continue to provide livelihoods to a significant proportion of residents. The growing youthful population, large student population, and seasonal influx of labour are likely to increase the municipality's dependency ratio, in addition to a smaller base from which the municipality can collect revenue to provide services and opportunities that will improve the lives of the poor. Inequality in the municipal area, and particularly in historic towns such as Stellenbosch and Franschhoek, remains significant, and current development patterns are not addressing the issue. Crime rates remain high, and the market response, i.e., private security provision for those who can afford it, is likely to exacerbate inequality. Upgrading and providing basic services and housing will remain the focus of the municipality, including other government agencies, for the foreseeable future. The focus on these priority areas can lead to foregoing investment in other areas that would likely have more socio-economic spin-offs and result in improved place-making. The municipality's inability to provide basic services (e.g., refuse removal) leads to dumping, environmental degradation, and resulting health-related problems.
Built environment context	Infrastructure backlogs—especially in poor areas—and essential municipal infrastructure require significant investment and maintenance. This applies to all basic services (electricity, water supply, wastewater management, and solid waste disposal). The need for housing and shelter—both for the lower-income groups and those with employment—has not been adequately met. The existing housing pipeline will not meet the needs of those requiring state assistance, and little is built that is affordable to ordinary workers. A pattern of intermittent land invasions and associated responsive basic infrastructure provision, as well as the daily inward commuting of ordinary workers and students, is likely to continue. Property and land are inordinately expensive in the municipality, locking out both the poor and lower / middle-income workers from the property market. Without significant intervention in the property market, this situation is likely to worsen.

Theme	Spatial Challenges
	↓ Inequality in the municipality is particularly evident in the structure of settlements, with low-density development accommodating the wealthy, while the poor are accommodated in high-density, poor-quality peripheral areas. Significant numbers of people live in informal shelters. Many new developments reinforce a pattern of low overall densities and are located in peripheral areas, entrenching dependency on private transport, among other inefficiencies. ↓ The new high-density development mostly focuses on the student market and target groups using private vehicles. ↓ Numerous heritage resources located within the settlements are assets of immense value. Many of these are underutilised and have the potential to become vehicles for innovative development that can contribute to creating a more inclusive economy. ↓ The existing industrial / manufacturing operations and land holdings in the centre of Stellenbosch town impede large-scale restructuring of the settlement. ↓ The planned move of Distell – occupying large tracts of strategic land in Stellenbosch town – to Klapmuts presents very significant opportunities for the future development of Stellenbosch, Klapmuts, and the broader regional space economy. If not rigorously managed as a shared initiative between the public and private sectors, the opportunity may be lost. The municipality should focus maximum effort on utilising the opportunity presented to address the needs of the town. ↓ Transport planning practice at the provincial level has maintained a regional mobility lens with the bulk of planning effort and funding allocated to road infrastructure rehabilitation and expansions that provide for and respond to demand-side growth, largely attributed to unconstrained low occupancy private vehicles at the cost of local mobility. Too little focus is placed on progressively improving the efficiency of the use of existing road space through shifting modes and altering travel patterns. ↓ This regional mobility and growth approach's focus has very high financial, economic, social, and environmental costs, as it is unsustainable and exclusionary for most of the population. The regional focus on private vehicle growth has an adverse consequence for managing transport at the localised level where trips are generated. ↓ The provision of public transport, non-motorised modes, and travel demand management programmes is generally considered a local municipal function and not a core responsibility or competency of the provincial government. Given the extent of transport issues in the municipality, the municipality has limited institutional capacity and funding for the management of transport issues. As a result, sustainable transport approaches have been extensively overlooked in favour of traditional engineering solutions. ↓ The municipality continuously updates the online housing demand database and associated mobile applications to provide a valuable source for planning and delivery.
Institutional context	↓ The limited capital budget of the municipality, given the extent and depth of community needs. ↓ Limited funds to address critical issues, especially those related to infrastructure augmentation and maintenance, place the municipality in a tenuous position to reverse backlogs or negative trends in shelter or infrastructure needs. ↓ Private sector investment is not structured to contribute to the long-term maintenance of common assets or address the developmental needs of the municipal area. ↓ The growth in rates of income will largely be used to maintain existing infrastructure and services and will likely not focus on new productive investments. ↓ The limited professional resources of the municipality, specifically concerning the rigorous and dedicated full-time management of large-scale projects. ↓ Sector planning remains fragmented, and most developments follow a business-as-usual pattern.

4.5 The Spatial Proposals of the SDF

4.5.1 Spatial development 20 - year vision statement

In line with the SM's vision as the "valley of opportunity and innovation" (as contained in the IDP), the vision for spatial development and management is described as follows:

"We envisage a municipal area even more special than it is today; a place of natural beauty, rich in the way it preserves and exposes elements of history and culture, its produce from the land, the quality of its institutions, and the mindfulness and innovations of its people.

It is a future Stellenbosch municipal area that remains familiar; it has retained what differentiates the municipality from other places, its landscapes, historic buildings and settlement patterns, and the specialness of its institutions. It is resilient; it has adapted to the needs of today without losing what is special from the past. It is inclusive; it has accommodated the needs of citizens from all walks of life without fear. It is diverse and therefore productive. Adapting to new needs, and accommodating

new people, it becomes the stage for new expressions of culture, new businesses, and new ways of doing.

In form, it comprises a set of compact settlements, large and small, surrounded by natural and productive landscapes, and linked using public transport. Internally, settlements are relatively dense, cyclable and walkable. Each portrays a unique character, closely linked to its surrounding landscape, the reach and extent of its public institutions, and the capacity and opportunity of its infrastructure. Each provides for a range of citizens from all walks of life, with significant choice in place of residence."

4.5.2 Strategic Focus and Spatial Alignment between the IDP and SDF

The table below illustrates how work on the SDF relates – in terms of its focus and contribution – to achieving the five municipal strategic focus areas as contained in the IDP.

Table 26: IDP Strategic Focus Areas and the SDF

IDP Strategic Focus Area	Related concerns of the SDF	SDF Strategic Direction
SFA1: Valley of Possibility	The way settlements, nature, and agriculture are spatially developed and managed to enhance individual and collective livelihood opportunities and enterprise development and overcome inequity and exclusion.	Containment of settlements to protect nature / agricultural areas and enable public and non-motorised transport and movement. A focus on public and non-motorised transport and movement.
SFA2: Green and Sustainable Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to maintain and enhance natural resources and ensure a future balance between human settlement and its use of natural resources and opportunities.	Protection of natural areas, agricultural areas, and river corridors.
SFA3: Safe Valley	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective safety in living, in movement, at work, in institutions, and in play.	Denser settlements with diverse activity to ensure surveillance.
SFA4: Dignified Living	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure equal access to shelter, facilities, and services, notwithstanding material wealth, age, gender, or physical ability.	A specific focus is on the needs of "ordinary" citizens, who experience limited access to opportunity because of restricted material resources.
SFA5: Good Governance and Compliance	The way settlements, nature, and agricultural areas are spatially developed and managed to ensure individual and collective participation – based on accessible information and open processes – in matters related to spatial planning and land use management.	Presenting information, including opportunities and choices, in a manner that assists its internalisation by all.

4.5.3 Spatial Proposals and Structuring Elements of the SDF

The conceptual framework extracted from the SDF shows the expression of the seven key principles, which include:

Maintain and grow the assets of Stellenbosch Municipality's natural environment and farming areas

- The spatial policies that relate to this principle focus on protective actions, also called urban management.
- The intent is to protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality.
- Resist the subdivision of viable agricultural land, unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives (including settlement hierarchy) and rural guidelines.
- Support compatible and sustainable rural activities outside the urban edge (including tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the

ability of the municipality to deliver on its mandate.

Respect, preserve, and grow our cultural heritage

- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., scenic landscapes, scenic routes, and special places of arrival, while also focusing on improving the landscape and public amenities associated with these cultural assets.
- The intent is to preserve significant cultural and historic assets within the municipality and to grow the opportunity for new or emerging forms of cultural expression through expanding the use of cultural assets or supporting new uses for areas or structures of historic value.
- As far as possible, protect cultural landscape assets—including undeveloped ridgelines, view corridors, scenic routes, and vistas—from development.

Direct growth to areas of lesser natural and cultural significance as well as movement opportunity

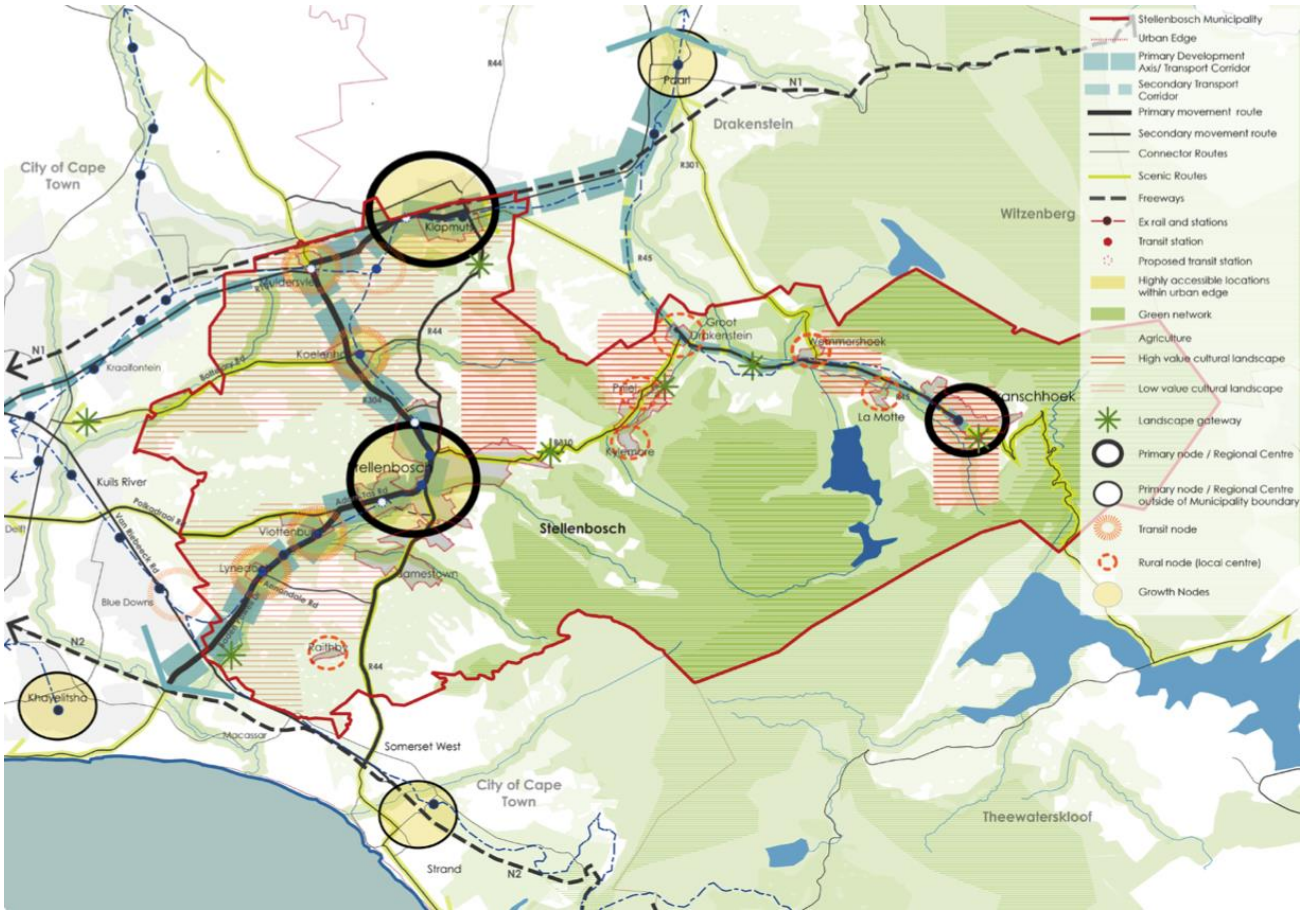
- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy.
- In addition to the abovementioned, spatial policies are directed at urban restructuring and spatial transformation (also referred to as change and new development actions) and include informal settlement upgrading, residential densification and infill development, mixed land use and improved economic opportunity, improved access and mobility, improved access to community facilities, and improved landscaping and public amenities.

The spatial policies are spatially targeted in priority development areas and include Baden Powell and the Adam Tas-R304 corridor for growth and new development; Stellenbosch town and Klapmuts.

- The spatial policies that relate to this principle focus on protective actions around specific spatial elements, e.g., maintaining the urban edge and following the defined settlement hierarchy. In clarifying and respecting the different roles and potentials for settlements within the municipality, the natural and cultural assets are protected while ensuring that the capacity of existing infrastructure can accommodate change and growth.
- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements focus on new growth and development primarily in larger settlements (as referenced in principle 3 above) to:
  a) Minimise associated impacts on the environment, agricultural land, and natural resources.
  b) Maximise the livelihood opportunity (also referred to as quality of life) by building on the availability of existing public facilities and commercial opportunities.
  c) Maximise the sustainability of new facilities and commercial opportunities.
  d) Enable the provision of infrastructure most efficiently and cost-effectively.
  e) Minimise the need for inter-settlement movement.
  f) Maximise opportunity for and use of non-motorised and public transport.
  g) Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily).
  h) Maintain and enhance the unique historic, cultural, and settlement characteristics of different settlements.

Clarify and respect the roles and functions of different elements of the movement structure

- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements ensure a balanced approach to transport in the municipality that appropriately serves regional mobility needs and local-level accessibility improvements.
- The spatial policies actively promote compact, dense, mixed-use development, which reduces and promotes non-motorised and public transport.



Ensure balanced, sustainable communities

- The spatial policies that are directed at urban restructuring and spatial transformation within the hierarchy of settlements (including maintaining the urban edge) work towards and maintain, for each settlement, a compact urban form and structure to achieve better efficiency in service delivery and resource use, the viability of non-motorised and public transport, and facilitate inclusion, integration, and entrepreneurship development.
- Adopting a conservative view towards the extension of existing urban edges over the SDF period.
- Actively support infill development and adaptive reuse of existing structures.
- Support increased densities in new, infill, and redevelopment projects.
- Rationalise space standards – especially for social facilities – and release surplus land for other uses, specifically housing.
- Support the general upgrading and transformation of existing informal settlements.
- Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.
- Provide and maintain a system of accessible social facilities, integrated with public space and non-motorised transport (NMT) routes.
- Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets.
- Ensure work and commercial opportunities are accessible through public transport and NMT to all communities and provide opportunities to emerging and small entrepreneurs.
- Ensure that all settlements are balanced and sustainable, providing for different groups, maintaining minimal development footprints, ensuring walkability, and so on.

Focus collective energy on a few catalytic areas that offer extensive opportunity and address present risk

- The spatial policies focus on major development efforts concerning new mixed-use, industrial, and residential developments, and significant changes in access and mobility are spatially targeted in the Adam Tas Corridor (Stellenbosch town) and Klapmuts.

Figure 22: Consolidated Concept for the Municipal Area (Approved November 2019 and 27 June 2023)

4.6 SDF and CEF Implementation Frameworks

The SPLUMA guidelines require, as part of the SDF, a high-level implementation framework setting out the required measures that will support the adoption of the SDF proposals while aligning the capital investment and budgeting processes moving forward. The SDF and CEF Implementation Framework comprise the following sections:

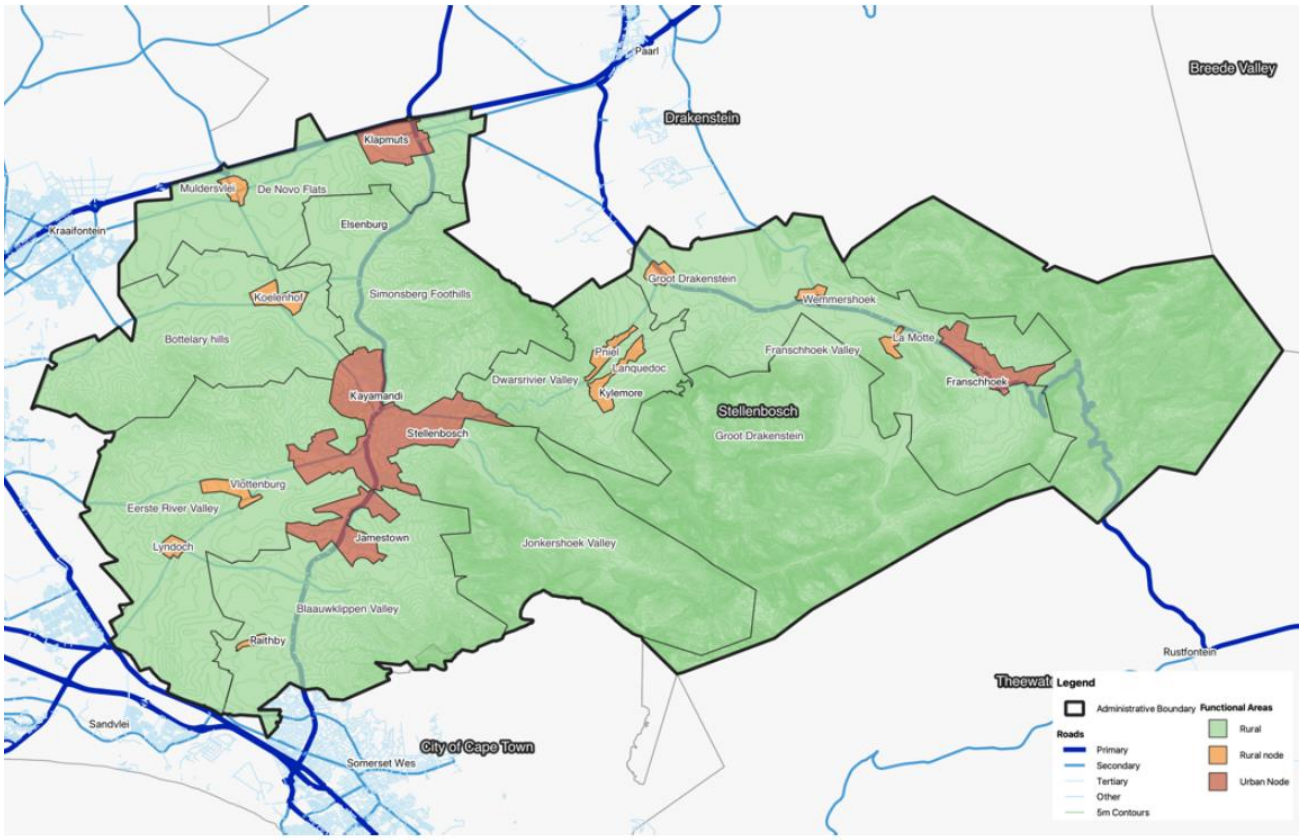
- A proposed settlement hierarchy to inform and guide the investment rationale (linked to plans and settlement proposals);
- Priority development areas and themes;
- A policy framework (linked to strategies);
- Guidelines, studies, and information supporting the policies;
- Implications for sector planning and specific development themes, including:
  - Environmental and rural area management
  - Movement;
  - Housing; and
  - Local economic development;
- Land use management guidelines and regulations;
- Implications for inter-municipal planning;
- Catalytic initiatives;
- Further planning work;
- Institutional arrangements;
- Checklists in support of decision-making;
- A municipal leadership and advocacy agenda related to spatial development and management;
- Capital Expenditure Framework; and

- Monitoring and review.

4.6.1 Settlement hierarchy, priority development areas and themes

In terms of the SDF concept, prioritisation of development—at a broad level—is done through two main spatial structuring elements. The first is spatial and targeted at significant future growth in functional and priority development areas. The second is sectoral or thematic, focused on the kind of development to be prioritised.

The functional and priority development areas are categorised into urban and rural nodes and are depicted in the figure below, with the detailed description provided in the table:



The spatial areas for priority development over the *SDF* planning period are:

- Stellenbosch Town;
- Klapmuts; and
- Franschhoek (maintenance).

In terms of sectoral or thematic focus, the spatial development priority in all settlements should be to:

- Upgrade the servicing and transformation of informal settlements;
- Provide housing for lower-income groups in well-located areas (specifically through infill of vacant and underutilised land or redevelopment of existing building footprints);
- Expand and improve public and NMT routes;
- Improve public and community facilities and places (e.g., through clustering, framing them with infill development to improve edges and surveillance, prioritising landscaping, and so on); and
- Expand the recognition, restoration, and exposure of historically and culturally significant precincts and places (both in the form and use of precincts and places).

Figure 23: Functional and priority development areas (CEF, June 2023)

The proposed settlement hierarchy for SM, supporting the spatial plan and proposals for the settlement, is a significant centre comprising extensive education, commercial, and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities outlined in the table below.

Table 27: Proposed settlement hierarchy for the Stellenbosch Municipality

Settlement	Role	Development and Land Use Management Focus
Primary urban settlements		
Stellenbosch town	A significant centre comprising extensive education, commercial and government services with a reach both locally and beyond the borders of the municipality, tourism attractions, places of residence, and associated community facilities.	▪ Broadening of residential opportunities for lower-income groups, students, and the lower to middle housing market segments. ▪ Upgrade of informal settlements. ▪ Retention of university functions in the town. ▪ Enablement of the Adam Tas Corridor. ▪ Sensitive residential infill and compaction. ▪ Drive to establish "balanced" precincts. ▪ Public transport development, travel demand management, parking controls, and NMT improvements.
Klapmuts	Focus on economic development (using a favourable location for manufacturing, logistics, and warehousing enterprises) and associated residential opportunities.	▪ Support for the development of RE / Farm 736 as a lever to economic development, utilising a favourable location for manufacturing, logistics, and warehousing enterprises. ▪ Balanced housing provision in Klapmuts South is focused on those who can benefit from employment provision through unlocking Klapmuts North. ▪ Establishing the Klapmuts town centre. ▪ NMT improvements.
Franschhoek	Secondary service centre, significant tourist destination, and place of residence.	▪ Upgrade of informal settlements. ▪ NMT improvements. ▪ Sensitive infill within the urban edge provides inclusive housing and extended commercial opportunity (also for small and emerging entrepreneurs). ▪ Retention of historic character.
Secondary urban settlements		
La Motte	Contained rural settlement.	▪ Diversification of existing activities to curtail the need for movement. ▪ Sensitive location of diversified uses closer to the R45. ▪ Limited further housing development.
Wemmershoek	Contained rural settlement.	▪ Possible extension of residential opportunity linked to re-use of the sawmill site and local employment opportunity.
Groot Drakenstein	Contained rural settlement.	▪ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Dwars River Valley	Contained historic rural settlements.	▪ Accommodation of sensitive private and public sector initiatives offering expanded livelihood (including tourism) and residential opportunities.
Jonkershoek	Contained, but a dispersed collection of institutional, recreational, and residential uses.	▪ Potential future consolidated, inclusive settlement linked to rail / bus.
Muldersvlei	Contained rural settlement.	▪ Potential future consolidated, inclusive settlement linked to rail / bus.
Koelenhof	Contained rural settlement.	▪ Potential future consolidated, inclusive settlement linked to rail / bus.
Vlottenburg	Contained rural settlement.	▪ Gradual expansion of a unique development model based on sustainable living and education.
Lynedoch	Contained village and institutional clusters.	▪ Containment and limited expansion of existing offerings.
Spier	Contained tourism and cultural centre.	▪ Protection of unique historic settlement structure and form.
Raithby	Contained historic rural settlement.	▪ Potential future consolidated, inclusive settlement linked to rail/ bus.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg / Lynedoch along the Baden Powell-Adam Tas-R304 could accommodate more growth and be established as inclusive settlements

offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing an opportunity for a range of income groups) and integration with the corridor in terms of public transport. They are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups (in gated developments) and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

The focus on Stellenbosch town and Klapmuts does not exclude all development efforts in Franschhoek and the smaller settlements. Rather, it is argued that these settlements should not accommodate significant growth, as the preconditions for accommodating such growth do not exist to the same extent as in Stellenbosch town and Klapmuts.

What should be emphasised in Franschhoek, and smaller settlements is improving conditions for existing residents and natural growth within the context of retaining what is uniquely special in each (from the perspective of history, settlement structure and form, relationship with nature and agriculture, and so on).

4.6.2 Policy Framework

The table below sets out specific spatial policies to support the SDF concept and settlement plans. In using the policy framework, it is important to note that one specific policy or guideline should not be highlighted or used exclusively to support a specific initiative. Rather, each policy supports the other; each "frames" the other. Thus, initiatives or proposals should be evaluated in terms of the policy framework as a whole.

Further, the successful implementation of spatial policies and guidelines is often dependent on related, supportive, non-spatial policies. This implies policy alignment across municipal functional areas and services.

The table also includes specific work guidelines that begin to frame the work to be undertaken or continued in support of proposed policies.

Table 28: Specific work guidelines

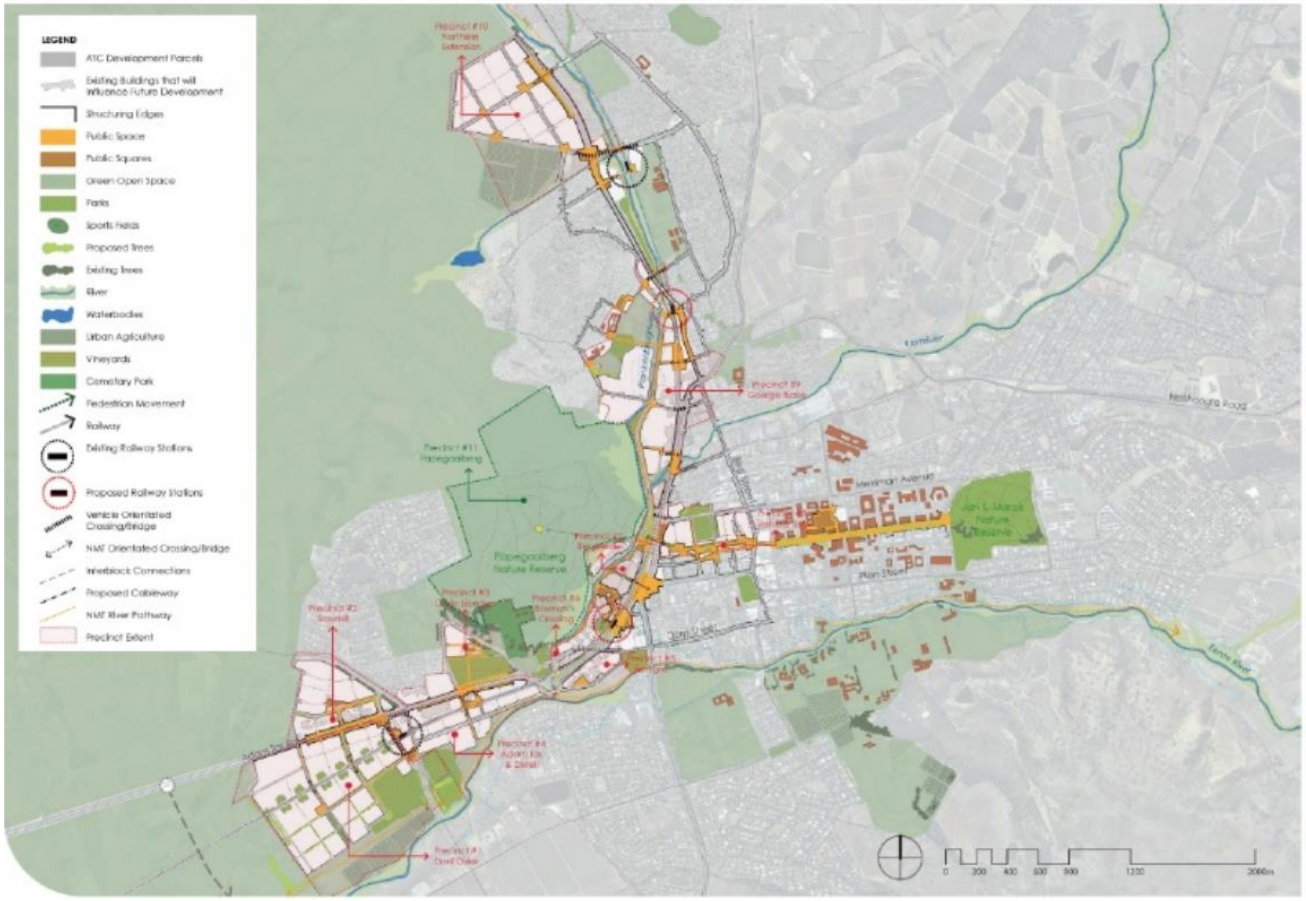
No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
1.	Maintain and grow the assets of SM's natural environment.	• As far as possible, protect and expand priority conservation areas, establish ecological linkages, and preserve high-potential agricultural land within the municipality. • Resist the subdivision of viable agricultural land unless it forms part of a new balanced, integrated, and inclusive settlement supportive of the SDF objectives, an agri-village in line with provincial policy for the settlement of farmworkers, or the formalisation of the "urban" component of existing forestry settlements (for example, Jonkershoek and La Motte). • Support compatible and sustainable rural activities outside the urban edge (including	• Proactively maintain and upgrade municipal infrastructure services to limit / mitigate the risk to ecological services. • Support initiatives to protect water resources, rehabilitate degraded aquatic systems, retrofit or implement water demand management systems, and mainstream water conservation. • Support energy diversification and energy efficiency initiatives to enable a transition to a low-carbon, sustainable energy future. • Support initiatives to extend public access to natural assets without compromising the integrity of natural areas or ecological services. • Support initiatives by the private sector to extend environmental stewardship. • Assist in initiatives to diversify, strengthen, and open up new opportunities and jobs in the rural economy, including the identification of strategically	• Prepare and implement management plans for municipal nature reserves and other ecological assets. • Prepare and implement invasive species control plans for municipal properties. • Prepare and implement initiatives for the rehabilitation of rivers and wetlands in urban areas. • Develop resource-efficient strategies for all municipal services and land and building development (e.g., compulsory green energy installations in building development, greywater circulation, sustainable urban drainage, etc.). • Utilise and contribute to municipal and provincial mapping and planning initiatives that inform land-use decision-making supportive of ecological

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		tourism) if these activities are of a nature and form appropriate in a rural context, generate positive socio-economic returns, and do not compromise the environment, agricultural sustainability, or the ability of the municipality to deliver on its mandate.	located land for land reform purposes. • Support initiatives to utilise municipal-owned agricultural land for small-scale agriculture, forge partnerships with non-governmental or public benefit organisations to assume management responsibilities for commonages and provide basic agricultural services to commonages.	integrity, secure natural resources, and protect agricultural land of high value. • Delineate and manage urban edges and watercourse setbacks in a manner that diverts urban growth pressures away from important natural and agricultural assets. • Apply biodiversity offsets in cases where development in areas of endangered and irreplaceable biodiversity cannot be avoided. • Actively engage with adjoining municipalities and provincial governments to ensure that the integrity of SM's natural environment is maintained (specifically regarding land use management in adjoining municipal areas).
2.	Respect, preserve and grow the cultural heritage of SM.	• Preserve significant cultural and historic assets within the municipality and grow the opportunity for new or emerging forms of cultural expression through expanding the use of existing cultural assets or supporting new uses for areas or structures of historic value. • As far as possible, protect cultural landscape assets—including undeveloped ridgelines, view corridors, scenic routes, and vistas—from development. • Support alternative uses for historic structures and places that will enable their preservation (subject to adherence to the general SDF strategy and policies).	• Support the transfer of municipal assets of cultural and historic value to organisations geared to manage these assets sustainably in the interest of the broader community. • Manage heritage places and structures in terms of the recommendations of municipal heritage studies.	• Maintain and utilise municipal and intergovernmental evaluation and mapping initiatives to inform land-use decision-making supportive of cultural integrity and secure historic places and structures. • Actively engage—continuously—with adjoining municipalities and the provincial government to ensure that the integrity of SM's heritage is maintained (specifically regarding land use management in adjoining municipal areas).

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
3.	Direct significant growth or new development in SM to areas: • Not identified as having the most critical natural or cultural significance. • Where the most opportunity exists in existing infrastructure investment, whether reconfigured, augmented, or expanded.	• Prioritise the targeted settlements on the Baden Powell-Adam Tas-R304 corridor for growth / new development. • Over the SDF period, focus on Stellenbosch town and Klapmuts to accommodate significant new growth.	• Align the policy and planning of all municipal services to support accommodating significant growth and new development as proposed in specific areas. • Progressively utilise the municipality's significant asset of land as a resource to direct major growth or new development to areas not identified as of the most critical natural or cultural significance. • Allocate municipal funds for land acquisition in areas identified as most suitable for growth or new development (specifically for development as lower-income housing).	• Together with the WCG, undertake inter-service investigations to determine the exact location, size, nature, and form of new settlement areas to accommodate new growth. • Develop specific framework planning, land use management, infrastructure, financial, and urban design provisions, and directives to ensure the optimal development of identified settlement areas to accommodate new growth.
4.	Clarify and respect the different roles and potentials of settlements in SM and maintain the identity of each.	• Ensure that each settlement – large and small – remains a distinct entity, surrounded by natural open space and agricultural land. • Maintain a clear hierarchy of settlements that (in general terms) focuses on new growth and development in larger settlements to: – Minimise associated impacts on the environment, agricultural land, and natural resources. – Maximise livelihood opportunities by building on the availability of existing public facilities and commercial opportunities. – Maximise the sustainability of new facilities and commercial opportunities. – Enable the provision of infrastructure most efficiently and cost-effectively. – Minimise the need for inter-settlement movement. – Maximise the opportunity for and use of non-motorised and public transport. • Minimise growth in smaller settlements where opportunity is limited while improving access to local services and facilities (required daily). • Maintain and enhance the unique historic,	• Align the policy and planning of all municipal services to support the proposed settlement hierarchy and development / management approach. • Reinforce the role of Stellenbosch town as a regional service and tourism centre focused on higher-order educational, health, government, and commercial uses, as well as unique historic assets. • Reinforce the role of Klapmuts as a potential regional logistics / warehousing / manufacturing hub – with associated residential opportunity—based on its location at the intersection of the N1 and regional north / south movement routes. • Maintain Franschhoek as a centre for tourism and culture with limited growth potential.	• Support the re-location of land extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town to Klapmuts. • Maintain the nature and form of small rural settlements while enabling small changes towards improving livelihood opportunities.

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		cultural, and settlement characteristics of different settlements.		
5.	Ensure a balanced approach to transport in SM, that appropriately serves regional mobility needs and local-level accessibility improvements.	• Actively promote compact, dense, mixed-use development that reduces car dependence and enables and promotes the use of public and NMT.	• Shift municipal resources to include a greater focus on non-motorised, shared vehicle travel and public transport solutions. • Establish measures to ensure that there is an inter-service agreement on the settlement hierarchy, settlement roles, associated functions, modes of transport to be carried out, and the development / management approach to be followed concerning different sections of the municipal movement network. • Work with the provincial and national governments to affirm the proposed categorisation of movement forms and associated infrastructure and management needs in Stellenbosch. • Proactively seek management of travel demand among key stakeholders in SM in such a manner that significantly higher passenger volumes are gradually achieved from existing transport infrastructure. • Proactively allocate resources to improve NMT in the municipal area. • Strengthen the role played by rail-based public transport, including advocating for a new, lighter, frequent rail service on the Eerste River / Klapmuts rail line as the backbone of transport movement along the Baden Powell-Adam Tas-R304 corridor.	• Assess future transport development / improvements concerning the impact on the complete settlement system. • Guard against needed / required vehicular routes of necessity resulting in the development of undeveloped land traversed by the route.
6.	Develop all settlements as balanced, inclusive, appropriately serviced, communities, negotiable through NMT and exhibiting a positive relationship with surrounding nature and agricultural land.	• Work towards and maintain – for each settlement in the municipality – a compact form and structure to achieve better efficiency in service delivery and resource use, the viability of public and NMT, and facilitate inclusion, integration, and entrepreneurship development. • Adopt a conservative view towards the extension of existing urban edges over the SDF period. • Actively support infill development and the adaptive reuse of existing structures. • Support increased densities in new, infill, and redevelopment projects. • Rationalise space standards – especially for social facilities – and	• Proactively drive transport demand management programmes (specifically in and around Stellenbosch town) to curtail private vehicle use. • Shift more transport resources to the development and operation of effective public transport services and the comprehensive provision of NMT.	• Review the delineation of restructuring zones to support the mSDF objectives. • Support development that emphasises public transport / NMT as opposed to private vehicular use. • Integrate spatial planning, transport planning (emphasis on public and NMT), and social facility planning. • Move away from self-reinforcing conditions for development in terms of car parking minimum standards, and ensure the active participation and collaboration between landowner, developer, and municipality towards the provision of alternatives to car use. • Actively engage – continuously – with adjoining municipalities and provincial government to ensure that the integrity

No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
		release surplus land for other uses, specifically housing.		of SM's settlements as contained, and balanced communities is maintained (specifically about land use management in adjoining municipal areas).
		Support the general upgrading and transformation of existing informal settlements.	• Prioritise basic residential services for poor households, specifically in informal settlements and backyard dwellings, and a minimum level of basic services for marginalised rural settlements. • Resist existing informal settlements as the only viable settlement option for poor households by supporting the identification and servicing of alternative areas for settlement. • Ensure that asset management best practices are followed to maintain existing infrastructure investments and prevent greater replacement costs in the future. • Reinforce basic service delivery with good-quality urban management to support household and economic asset development.	• Put in place an inter-governmental portfolio of land (existing and earmarked for purchase), an agreed land preparation programme, and a release strategy, for publicly assisted, lower-income housing (including the BNG, FLISP, social / rental, and GAP markets). • Identify alternative settlement locations for poor households, over and above existing informal settlements. • To assist the municipality in housing provision, and support initiatives to house farmworkers on farms (in a manner that secures tenure).
		Expand housing opportunities for a broader range of groups – including lower-income groups and students – particularly in settlements forming part of the Baden Powell-Adam Tas-R304 corridor.	• The planning of infrastructure and social facilities should accommodate the likelihood of back-yarding and its contribution to livelihood strategies.	• Develop an inclusionary housing policy and guidelines. • Prioritise infill housing opportunities on public land for the BNG, FLISP, social / rental, and GAP markets. • Where possible, proactively plan for back-yarding opportunities in lower-income housing projects. • Actively support the development of student housing in Stellenbosch town.
		Provide and maintain a system of accessible social facilities, integrated with public space and public and NMT routes.	• Reinforce social facilities with good quality urban management to ensure service excellence and sustainability. • Focus on fewer but better social facilities.	• Cluster social facilities. • Locate facilities in association with public space and public and NMT routes.
		Provide and maintain an urban open space / public space system integrated with public transport / NMT, social facilities, and linked to natural assets (e.g., river corridors).	• Prioritise open / public space development in poor and denser neighbourhoods of the municipality. • Reinforce open / public space with good quality urban management to ensure use and safety.	Ensure that the edges between building development and open spaces promote activity and passive surveillance.
		Ensure work and commercial opportunities are accessible through public and NMT to all communities and provide opportunities for emerging and small entrepreneurs.		• Avoid large retail malls and office parks in peripheral locations reliant on private vehicular access, which detract from the viability of established commercial and work areas and lock out small entrepreneurs.



No.	Strategy	Spatial Policy	Non-Spatial, Supportive Policy	Work Guidelines
7.	Actively seek conditions to enable the private and community sectors to align their resources and initiatives with the SDF principles and proposals.	Conscious of public resource constraints, actively seek and support private and community sector partnerships to expand livelihood opportunities, settlement opportunities for ordinary citizens, and the national imperative to expand participation in the economy.	Develop an incentive package to support private and community sector partnerships in achieving the SDF principles and proposals.	• Enable private and community sector participation by making known the municipality's spatial principles and intent in user-friendly communique and guidelines. • Require private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on.
8.	Focus major development energy in SM on a few catalytic development areas that offer extensive, inclusive opportunities.	Focus major development effort in SM on: • Unlocking development in Klapmuts North. • The Adam Tas Corridor (in Stellenbosch Town).	• Communicate municipal objectives and principles – across functional areas and services – for development and urban management in catalytic areas. • Seek landowner, provincial government, and national government support to develop catalytic areas in the best public interest. • Support the establishment of institutional arrangements solely dedicated to enabling the development of catalytic areas and proceed with work to detail the broader plan and activity programme. • Align municipal infrastructure and social services planning to support development in catalytic areas. • Use municipal and government-owned land assets to support development in catalytic areas.	• Ensure that catalytic areas are developed as inclusive, appropriately serviced communities, negotiable through NMT, and exhibit a positive relationship with surrounding nature and agricultural land. • Prepare land use management measures to enable development in catalytic areas. • Define catalytic areas as "restructuring" or other special-measure areas to enable benefit from national and provincial support and incentives.

4.7 Catalytic Initiatives - Adam Tas Corridor (ATC) Local Areas Spatial Development Framework, Development Guidelines (October 2022) and overlay zone (March 2023)

Large industrial spaces, including land that was formerly home to Cape Sawmills and Distell facilities, make up the most strategically located land in Stellenbosch town. A significant proportion of these have been vacated or will be vacated in the foreseeable future in response to changes in the operating context of manufacturing enterprises. Thoughtful redevelopment of these spaces, at scale, can contribute meaningfully to meeting existing challenges and SDF objectives.

In simple terms, the concept is to launch a process of re-imagining and re-purposing the land around Adam Tas Road within Stellenbosch town to enable the maximum potential of this space. This will entail the redevelopment of the Adam Tas Corridor, which includes the area stretching along the R310 and R44 along the foot of Papegaaiberg, from the disused Cape Sawmills site to the west of Kayamandi and Cloetesville along the northern part of this corridor.

Figure 24: Adam Tas Corridor Local Areas SDF (October 2022)

It forms the western edge of the town but is not well integrated with the rest of Stellenbosch, largely because of the barrier / severance effect of the R44 and the railway line. Much of the area was historically used for light industrial and manufacturing purposes. It includes the disused Sawmill site, the government-owned Droë Dyke area, Distell's Adam Tas facility, Oude Libertas, various Remgro property assets, Bosman's Crossing, the rail station, the Bergkelder complex, the Van der Stel sports complex, the George Blake Road area, and parts of Kayamandi and Cloetesville. Under-utilised and disused land in the area measures more than 300ha.

Conceptually, a linear new district within Stellenbosch is envisaged adjacent to and straddling (in places) Adam Tas Road, the R44, and the railway line. Overall, development should be residentially led with a strong mixed-use basis and high density and should favour non-motorised ("NMT") access to the centre of Stellenbosch Town. It is estimated that the Adam Tas Corridor, through a preliminary development conceptual framework, will produce approximately 3 million square metres of bulk within a 293-hectare area, with 69% earmarked for residential usage.

A central movement system (with an emphasis on public transport and NMT) forms the spine of the area and is linked to adjacent districts south and west of the corridor. The corridor retains west-east and north-south vehicular movement (both destined for Stellenbosch town and through movement), as well as the rail line. Remote parking facilities will enable ease of access within the corridor concept, with passengers transferring via public transport, cycling, and walking to reach destinations within the town of Stellenbosch.

The corridor is not envisaged as homogenous along its length, with uses and built forms responding to existing conditions and its relationship with surrounding areas. Conceptually, three (3) areas could be defined, each linked through a sub-district.

- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;

- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Rethink and reconstruct infrastructure, particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift the new development focus to the west of town, with the Die Braak and Rhenish complex forming the centre and seam between the new west and east of Stellenbosch town;
- Investigating options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on NMT;
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, while also assisting in establishing a compact, less sprawling town, public transport, and NMT; and
- Increases land value east of the R44 and in the area between Kayamandi and the Bergkelder complex.

Along the corridor as a whole – depending on local conditions – significant re-use of existing buildings is envisaged. This is seen as a fundamental prerequisite for diversity, in-built character, and activity (as re-purpose offers the opportunity for a great variety of spaces). Aspects of the industrial history of the area should remain visible. A range of housing typologies accommodates different income groups and family types.

Redevelopment, in terms of the concept, offers the opportunity to:

- Re-imagine the future use of the land encompassed in the ATC;
- Grow Stellenbosch town – and accommodate existing demand – in a manner that prevents sprawl and creates conditions for efficient, creative living and working;
- Stimulate and act as a catalyst for the development of improved public transport and NMT;
- Reconstruct infrastructure, and particularly the movement system, including the possible partial grade separation of east-west and north-south movement systems, in turn, integrating the east and west of town and releasing land for development;
- Integrate Kayamandi and Stellenbosch town seamlessly;
- Shift new development focus to the west of town, with Die Braak and Rhenish complexes forming the centre and seam between the new west and east of Stellenbosch town;
- Investigate options for alternative parking provision initiatives in and around the town while the corridor provides for and promotes a greater focus on non-motorised transport; and
- Accommodate uses that meet urgent needs, specifically higher density housing and university expansion, as well as assisting in establishing a compact, less sprawling town, public transport, and NMT.

Existing manufacturing businesses can gradually relocate to the north, closer to the N1 logistics corridor (as Distell has planned for their operations).

A Local Spatial Development Framework ("LSDF") for the Adam Tas Corridor as well as comprehensive development guidelines were formally approved by the Council in October 2022 and will be used as the enabling planning framework to realise the implementation of the Adam Tas Corridor over the next 3–20 years. This LSDF includes an implementation framework that will guide the following:

- Most appropriate land use strategy;
- Action Areas / Catalytic Projects;
- Framework for Investment; and
- Other enabling interventions.

Following the implementation framework, the overlay zone for the Adam Tas Corridor has been approved (24 May 2023) and has been included as a local area overlay zone in the Stellenbosch Municipality Zoning Scheme Bylaw, 2023 (17 November 2023). The purpose of the overlay zone is to

award the zoning rights envisaged by the Adam Tas Corridor LASDF to the individual land portions, together with the conditions applicable to each property, for the landowner to take up these rights. This initiative was awarded with the WCG Service Excellence Awards 2024 in the category "Ease of Doing Business" on the 19th of April 2024.

Institutional arrangements are critical, which include all spheres of government, private stakeholder involvement, and established partnerships. It would include a broad agreement between landowners and the municipality to pursue the corridor development concepts. The landowners collectively and the municipality entered into a Memorandum of Understanding (MOU) confirming the spatial vision and implementation of the ATC LASDF. The Council approved the MOU in August 2022.

To assist Stellenbosch Municipality in coordinating the implementation of the Adam Tas Corridor LASDF and development guidelines, a project facilitation unit (PFU) needs to be established. The purpose of the PFU is to coordinate, plan, and assist with the implementation of development along the Adam Tas Corridor. The purpose of the PFU is to provide additional capacity and expertise to manage and implement the vision of the Adam Tas Corridor. The establishment of the unit is currently being investigated and was earmarked to be set up by 30 June 2024, however, challenges arose, and the set-up of the PFU is still ongoing. The Western Cape Economic Development Partnership (EDP) was appointed by the Council to assist the municipality in setting up the PFU and Steering Committee.

Considering the capital infrastructure investment requirements for the ATC, the municipality and the landowners collectively agreed on the phasing of the ATC over the next 10 years. Over the short term (1-5 years), the first phase of the ATC was agreed to be precincts 2–6, including a portion of precinct 10, whilst the planning and infrastructure demand quantification for the rest of the precincts (including the remaining extent of precinct 10) are considered in the CEF's capital expenditure programme (2023) and the capital infrastructure investment portfolio. The amendment of the CEF as part of the MSDF, 2023, and the current review (2024) enable the municipality to strategically plan based on an understanding of the catalytic projects that are necessary to meet the needs of the municipality, including ensuring the allocation of resources is financially sustainable whilst also achieving the goals of the municipality. Refer to the Council Item 7.2, which served at the Special Meeting of Council on 31 May 2024, for the detailed reports and annexures.

4.7.1 Development of Klapmuts

The Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF) contains very specific policy directives related to Klapmuts, aimed at addressing pressing sub-regional and local space economy issues. Key policy objectives include:

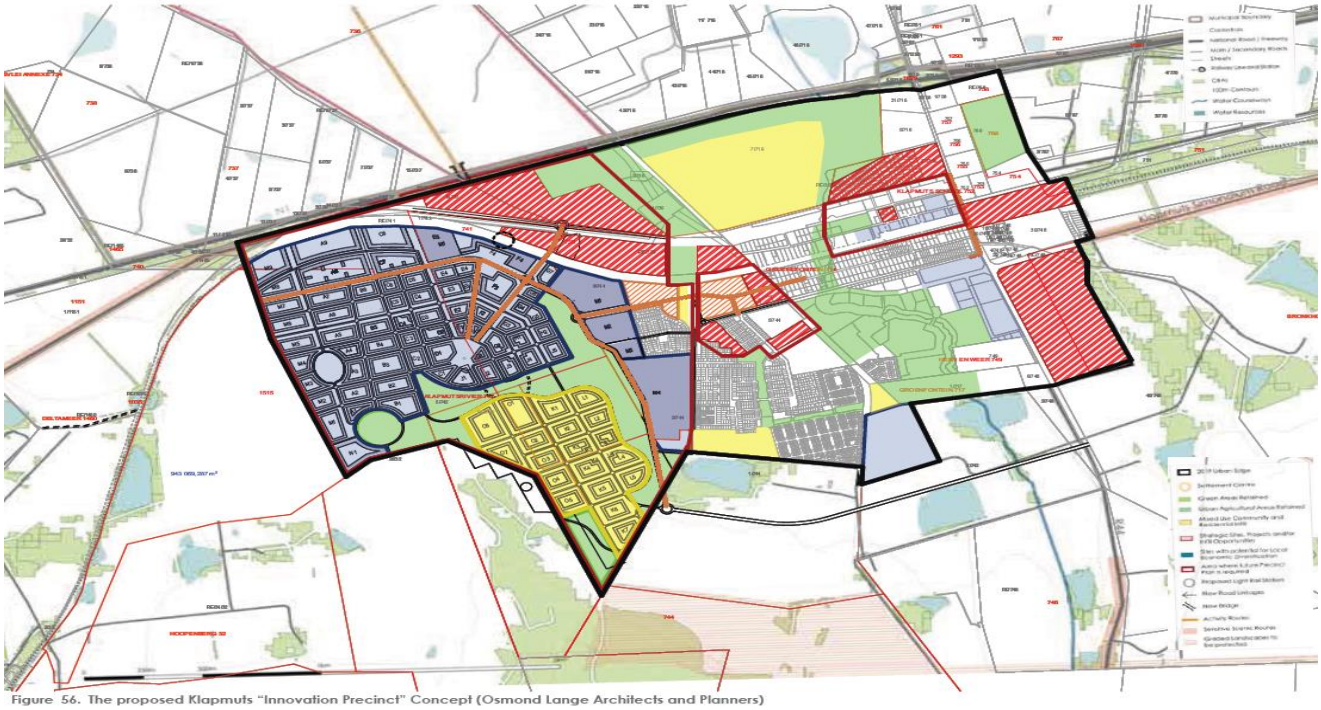
- Using infrastructure assets (e.g., key movement routes) as "drivers" of economic development and job creation;
- Recognition that existing infrastructure in the area (i.e., N1, R101, R44, and the Paarl-Bellville railway line and station) dictates the location of certain transport, modal change, or break-of-bulk land uses;
- Recognition of the Klapmuts area as a significant new regional economic node within the metropolitan area and spatial target for developing a "consolidated platform for the export of processed agri-food products (e.g., inland packaging and containerisation port)" and "an inter-municipal growth management priority";
- The consolidation of and support for existing and emerging regional economic nodes as they offer the best prospects to generate jobs and stimulate innovation;
- The clustering of economic infrastructure and facilities along public transport routes;
- Maintaining valuable agricultural and natural assets; and
- Providing work opportunities in proximity to living areas.

There is no doubt that Klapmuts is a potentially significant centre for economic activity and residence within the metropolitan region and SM, as it is located on the N1 transport corridor, which carries 93% of metropolitan freight traffic. To date, the settlement is characterised by residential use and limited commercial and work-related activity.

The MSDF targets significant new mixed-use development, new residential development, and the associated access and mobility infrastructure provisions to reinforce the significant new regional economic role of Klapmuts as identified by the Greater Cape Metro Regional Spatial Implementation Framework (GCMRSIF). The GCMRSIF and the MSDF reinforce Klapmuts as a potential regional logistics / warehousing / manufacturing hub—with associated residential opportunities – based on its location at the intersection of the N1 and regional north/south movement routes. From a contextual perspective, it is also important to note that to unlock the development potential of the ATC, the municipality must actively support the relocation of land for extensive manufacturing, logistics, and warehousing enterprises from Stellenbosch town towards Klapmuts.

One of the catalytic initiatives identified and supported by the MSDF is the "Innovation Precinct" or "Smart City" in Klapmuts South. The proposed urban development concept by Osmond Lange Architects and Planners has been incorporated into the MSDF since 2019, and significant progress has been made over the MSDF review process.

Figure 25: Concept Development Framework



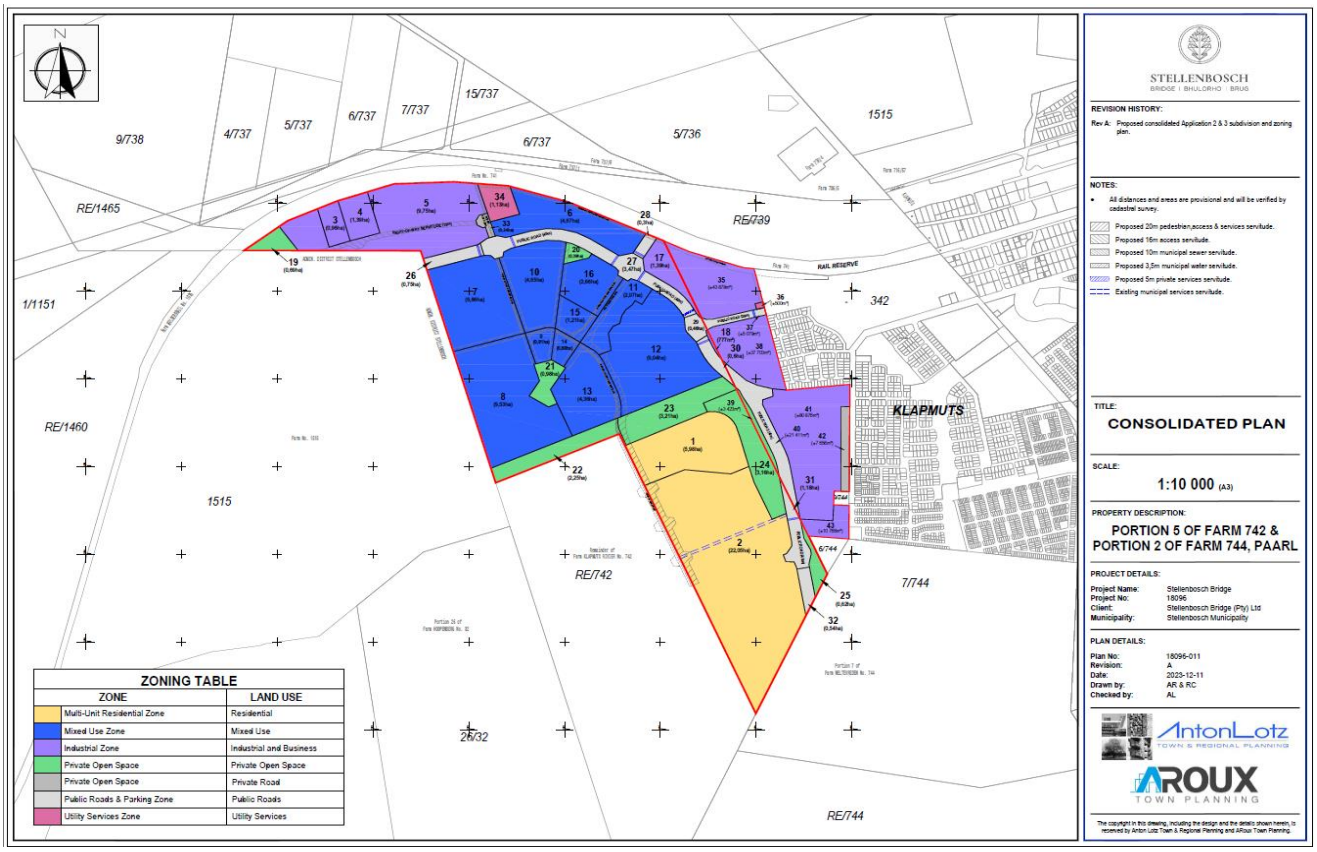


Figure 56. The proposed Klapmuts "Innovation Precinct" Concept (Osmond Lange Architects and Planners)

Based on the development framework, the following development management applications have been considered by the Directorate: Planning and Economic Development over the review period as part of the planning and implementation of the smart city catalytic initiative – now known as "Stellenbosch Bridge". The development rights approved by the municipality are reflected in figure below:

Figure 26: Portion of Farm 742 and Portion of Farm 744

Phase 1 of the Stellenbosch Bridge is scheduled for implementation during 2024/25, with groundwork already underway for the establishment of the Industrial Park, located next to the N1.

Through the land use planning process, it was highlighted that the urban edge does not fully align with the final approved development. The amendment of the urban edge is minor as it only encompasses the inclusion of Portion 19 (0.69 ha) as indicated on the approved consolidated plan. The phasing of the development provides for sufficient time to incorporate this as part of the future amendment MSDF process.

Several inter-municipal and inter-governmental issues require specific care in managing the development of Klapmuts over the short to medium term.

- Various supporting functions across the intergovernmental spheres are required to reinforce the significant new regional economic role of Klapmuts. A critical issue related to Klapmuts is the split administration between Drakenstein Municipality (DM) and Stellenbosch Municipality (SM). One of the supporting actions considered and identified by the MSDF includes the application to the Municipal Demarcation Board (MDB) for the redetermination of the municipal boundaries in a manner where Klapmuts North (DM administration) and Klapmuts South (SM administration) fall within one municipal demarcation. In this regard, Klapmuts is functionally more related to SM; extensive investments have been made in infrastructure and social services for the community in Klapmuts by SM. Accordingly, when the municipal redetermination process commenced in 2023, the Council considered and made representations to the MDB for the inclusion of Klapmuts North into the Stellenbosch municipal area. One of the outcomes that the municipality tried to achieve with the municipal redetermination process was to ensure integrated and coordinated planning and infrastructure delivery by all relevant stakeholders. Unfortunately, the process was unsuccessful and accordingly, other appropriate remedies to resolve the critical intergovernmental cross-boundary issues and conflicts need to be investigated. It is also critically important to note that the DM through the amendment of the MSDF (Drakenstein MSDF 2024/25) has further extended its urban edge adjacent to Klapmuts

with 1600 ha of greenfield development for the purpose of extensive new developments. Substantial infrastructure investments will be required as the area currently lacks bulk infrastructure services;

- The second is the linkages between Klapmuts north and south, specifically along Groenfontein Road, and a possible NMT crossing over the N1, linking residential areas south of the N1 directly with Farm 736/RE. Without these linkages, residents to the south of the N1 will not be able to benefit from the opportunities enabled north of the N1; and
- The third is a speculative higher-income residential development in the Klapmuts area, based on the area's regional vehicular accessibility. Higher-income development is not a problem in and of itself, but ideally, it should not be in the form of low-density gated communities.

In addition to the municipal cross-boundary development planning earmarked for Klapmuts, it is important to note that various intergovernmental joint planning is currently being undertaken through the Intergovernmental Steering Committee (ISC) of the GCMRSIF. Due to the increased urban development demand for the N1 from the City of Cape Town, Stellenbosch Municipality, and Drakenstein Municipality, the Western Cape Department of Environmental Affairs and Development Planning (DEA&DP)—custodian of the regional spatial implementation framework—has, in collaboration with the National Department of Agriculture, Land Reform and Rural Development (DALR&RD), initiated discussions on funding a regional spatial development framework in line with one of the key actions contained in the Greater Cape Town Region National Spatial Action Area (GCTR NSAA). The parties concerned have agreed that due to the existence of the GCMRSIF, the funding allocated should further involve technical work around an infrastructure analysis, including localised inter-municipal scenario planning exercises for the N1 corridor. The completion of this study is extremely important as the urgent need to coordinate an agreed long-term strategic vision, including the coordination, prioritisation, and sequencing of investments, will unlock the development potential of Klapmuts and the Cape Functional Region.

4.7.2 Alternative rail service along the Baden Powell Drive-Adam Tas-R304 corridor

As indicated above, it is critical, both for the Adam Tas Corridor and the broader Baden Powell-Adam Tas-R304 development corridor, to explore the feasibility of introducing a more frequent and reliable rail service along the Eerste River-Stellenbosch-Muldersvlei-Klapmuts rail line. The aim should be to have a more frequent passenger service along the corridor, connecting larger and smaller settlements. Lighter rail stock—possibly in the form of a "tram" system—has been suggested, offering the advantage of safe at-grade crossing of the rail line and other modes of transport, in turn, enabling "lighter" infrastructure support for settlement development and concomitant cost savings. Alternatively, the viability of regular bus service along this route should be explored. The SM should commence engagements with PRASA in this regard.

As argued elsewhere in this document, Stellenbosch town and Klapmuts should be the focus of significant settlement growth. It is here, by settlement location concerning broader regional networks and existing opportunities within settlements, that the needs of most people can be met, in a compact settlement form while protecting the municipality's natural and agricultural assets.

Over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, much work needs to be done to ensure the appropriate make-up of these settlements (including each providing an opportunity for a range of income groups) and integration with the corridor in terms of public transport.

The smaller settlements are therefore not prioritised for significant development over the SDF period. Should significant development be enabled in these areas now, it is likely to be focused on private vehicular use and higher-income groups and will in all probability reduce the potential of initiatives to transform Stellenbosch town and Klapmuts.

4.8 Institutional Arrangements

The SM has dedicated staff resources for spatial planning, land use management, and environmental management organised as the Planning and Economic Development Directorate. Work occurs within the framework set by annually approved Service Delivery and Budget Implementation Plans (aligned with the IDP), decision-making processes and procedures set by the Council, and a suite of legislation and regulations guiding spatial planning, land use management, and environmental management (including SPLUMA, LUPA, and the National Environmental Management Act, 1998 (Act No. 107 of 1998)).

The Planning and Economic Development Directorate will facilitate the implementation of the SDF in terms of institutional alignment, including:

- The extent to which the main argument and strategies of the SDF are incorporated into the Capital Expenditure Framework, annual reports, annual IDP reviews, future municipal IDPs, and so on;
- The annual review of the SDF is part of the IDP review process;
- The extent to which the main argument and strategies of the SDF inform sector planning and resource allocation;
- The extent to which the main argument and strategies of the SDF inform land use management decision-making;
- Alignment with and progress in implementing the municipality's Human Settlement Plan and Comprehensive Integrated Transport Plan; and
- The mutual responsiveness of the SDF and national, provincial, and regional plans, programmes, and actions (including the extent to which SDF implementation can benefit from national and provincial programmes and funding).

Over and above the institutional arrangements in place, it appears that two aspects require specific focus in support of the SDF.

4.8.1 Inter-municipal planning

The first relates to inter-municipal planning. As indicated elsewhere in the SDF, SM (and other adjoining municipalities) appear to be experiencing increasing challenges related to development pressure in Cape Town. This pressure is of different kinds. The first is pressure on the agricultural edges of Stellenbosch through residential expansion within Cape Town. The second is migration to SM (whether in the form of corporate decentralisation or both higher and lower-income home seekers), leading to pressure on available resources, service capacity, and land within and around the settlements of SM. While municipal planners do liaise on matters of common concern, there appears to be a need for greater high-level agreement on spatial planning for "both sides" of municipal boundaries. The spatial implications of pressure related to migration to SM could be managed locally, should there be an agreement to redevelop existing settlement footprints rather than enabling further greenfield development (as a general rule). However, the municipality's increased resource needs to accommodate new growth – a non-spatial issue – should be acknowledged and addressed.

4.8.2 Private Sector Joint Planning

The second relates to joint planning and action resourced by the private sector, increasingly needed for several reasons:

- The municipal human and financial resource base are simply too small to achieve the vision of the SDF or implement associated strategies and plans;
- Many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives;

- It is increasingly evident that individual landowners are finding it difficult to develop—to make the most of what they have—individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration;
- Individual landowners do not necessarily control the extent of land required to undertake inclusive development, focusing on opportunities for a range of income groups. Inclusive development often requires cross-subsidisation, in turn, enabled by larger land parcels and development yields; and
- The municipality's focus is often – and understandably so – on the "immediate", or shorter-term challenges. Much of what is needed to implement the SDF or catalytic projects requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed objectives. Further, partnerships are required between individual corporations and owners of the land. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak, and Rhenish complex—in a manner that contributes to agreed objectives for developing Stellenbosch town—is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on. The municipality simply does not have the resources – and is overburdened with varied demands in different locations – to lead the work and investment involved.

4.8.3 Further Planning Work

As indicated above, over the longer term, Muldersvlei / Koelenhof and Vlottenburg along the Baden Powell-Adam Tas-R304 corridor could accommodate more growth and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage. Critical preconditions for significant development include:

- The measures required to ensure that settlements provide for a range of housing types and income groups (in a balanced manner);
- Establishing regular public transport services between settlements, including services between the expanded smaller settlements and Stellenbosch town; and
- Understanding to what extent settlements can provide local employment and, in this way, minimise the need for transport to other settlements.

4.8.4 Other Local Planning Initiatives

Ideally, each of the settlements in SM should have an LSDF, applying the principles of the SDF in more detail. The position and function of settlements in the SM settlement hierarchy should determine the priority for LSDFs. The municipality aims to procure the services of a service provider to compile a series of local spatial development frameworks over the next three years for ten of the priority nodes (both urban and rural). The aim is to compile localised planning and development outcomes that need to address the following:

- Spatial and design frameworks, plans, and strategies;
- Social service delivery plans and interventions; and
- Innovative and interactive engagement and public participation processes.

These localised spatial planning initiatives require public and private landowners in key areas to plan and coordinate development collectively (beyond individual property boundaries and interests) to ensure appropriate infrastructure arrangements, the provision of inclusionary housing, public facilities, and so on. Based on consultations with the Division: Development Management and upon review of the land use application being submitted, the current top priority LSDF is identified for Koelenhof, followed by the Dwars River area.

In addition to the aforementioned, a number of precinct plans for specific areas as identified in the MSDF have been completed and are in the process of being finalised by initiatives driven by the municipality and private property owners. The Rhenish Complex and Surroundings Precinct Plan was initiated by the municipality and adopted by the Council on 29 November 2023. The precinct plan includes an urban design framework that aims to guide the future utilisation, preservation, and development of the study area with a specific view to unlocking the potential of the area, which plays an important role as a key site of cultural and heritage significance.

The Franschhoek Development Framework contained in the MSDF further identified an area in Groendal for "strategic sites, projects, and / or infill opportunities", and the development of a precinct plan. A spatial and urban design framework for a specific area within the strategic site has been commissioned by the landowners of Klein La Provence. In the drafting of the proposed spatial and urban design framework, the municipality required that the precinct plan consider the relationship of the site to its broader context and setting while also being replicable across similar contexts. The precinct plan is currently being finalised and will be public participated in due course.

4.8.5 Checklists in Support of Decision-Making

To further assist in aligning day-to-day land use and building development management decision-making and detailed planning—public and private—with the SDF, it is proposed that a "checklist" of questions be employed.

If the initiators of development proposals, applicants, officials, and decision-makers all, in general terms, address the same questions in the conceptualisation, assessment, and decision-making related to proposals, a common, shared "culture" could be established where key tenets of the SDF are considered and followed continuously.

Although focused on the location, nature, and form of activities in space, the checklist incorporates questions addressing issues beyond space, including matters of resource management, finance, institutional sustainability, and so on.

It is not envisaged that the checklist be followed slavishly in considering every development proposal. Yet, its use is important in ensuring that relevant issues are addressed and discussed to enable decision-making in line with the SDF and broader provincial and national planning policies. If, in assessing a proposal or project, posing a question results in a negative answer, the proposal probably requires very careful consideration, further work, or change.

The checklist should not be viewed as static. Rather, it should be reviewed periodically and in parallel with the SDF review – perhaps under the leadership of the Municipal Planning Tribunal and with input from all stakeholders – to reflect the municipal spatial planning agenda and challenges.

It is proposed that the questions – together with the SPLUMA principles, and the key SDF strategies and policies, be packaged in an easy-to-use and accessible form to facilitate wide usage.

4.8.6 Partnerships

Arguably, the municipal budget is simply too small to achieve the vision of the SDFs or implement associated strategies and plans. Also, many matters critical to implementing the SDF fall outside the direct control or core business of the municipality. For example, the municipality does not necessarily own the land associated with projects critical to achieving SDF objectives.

Even if the municipal budget is increased tenfold, or its staff resources are significantly enhanced, it would still not have the control to do what is needed to drive critical projects. The municipality's focus is often—and understandably so—on the "immediate," or the shorter-term challenges. Much of what is needed requires a longer-term view, a committed focus on one challenge, and cushioning from the daily and considerable demands of municipal management.

Partnerships are needed, with different agencies and individuals working in concert with the municipality to implement agreed-upon objectives. Further, partnerships are required between individual corporations and owners of the land. It is increasingly evident that individual landowners are finding it increasingly difficult to develop and make the most of what they have—individually. Specifically, the transport and movement implications of individual proposals require strong and dedicated integration. The Adam Tas corridor is a prime example: making the most of the disused sawmill site, Bergkelder complex, Van der Stel complex, Die Braak, and Rhenish complex—in a manner that contributes to agreed objectives for developing Stellenbosch town—is only possible if various landowners, the municipality, the university, and investors work together, including undertaking joint planning, the "pooling" of land resources, sharing of professional costs, infrastructure investment, and so on.

The municipality simply does not have the resources—and is overburdened with varied demands in different locations—to lead the work and investment involved.

There appears to be an opportunity to establish a new partnership with businesses on the side of the municipality to drive major integrated projects, specifically the Adam Tas Corridor. Fortunately, Stellenbosch has established (private sector) institutions with an astounding track record of achieving urban development / management objectives (e.g., Historiese Huise). Their work can be expanded to assist in meeting new challenges, in partnership with the municipality.

A formal Memorandum of Agreement exists between Stellenbosch municipality and the Stellenbosch Heritage Foundation to host the Heritage Inventory on the GIS system and to give free public access to the system until such a time that the municipality can do so. A tender was advertised in January 2024 for the updating of the Heritage Inventory on the GIS system and to assist Stellenbosch municipality in undertaking heritage assessments in areas under severe development pressure.

To strengthen the ability of the Directorate: Planning and Economic Development to manage development taking place within the Franschhoek and Stellenbosch historical cores and along the scenic routes in the rural landscape, the Council appointed an advisory committee to evaluate, consider, and make recommendations to the directorate with respect to new developments and alterations to the existing built environment. This committee consists of registered architects and experts in the field of cultural and historic environments.

The municipality owns several significant historical properties in Stellenbosch that require proper maintenance and appropriate uses that should support and enhance the tourism sector. To assist the municipality in managing these assets, the Council is in the process of outsourcing the responsibility to maintain, manage, and lease some of the buildings to Historiese Huise of South Africa. This partnership will ensure the proper maintenance of historical landmarks and appropriate use that will ensure public access, and the support of the tourism sector will be obtained.

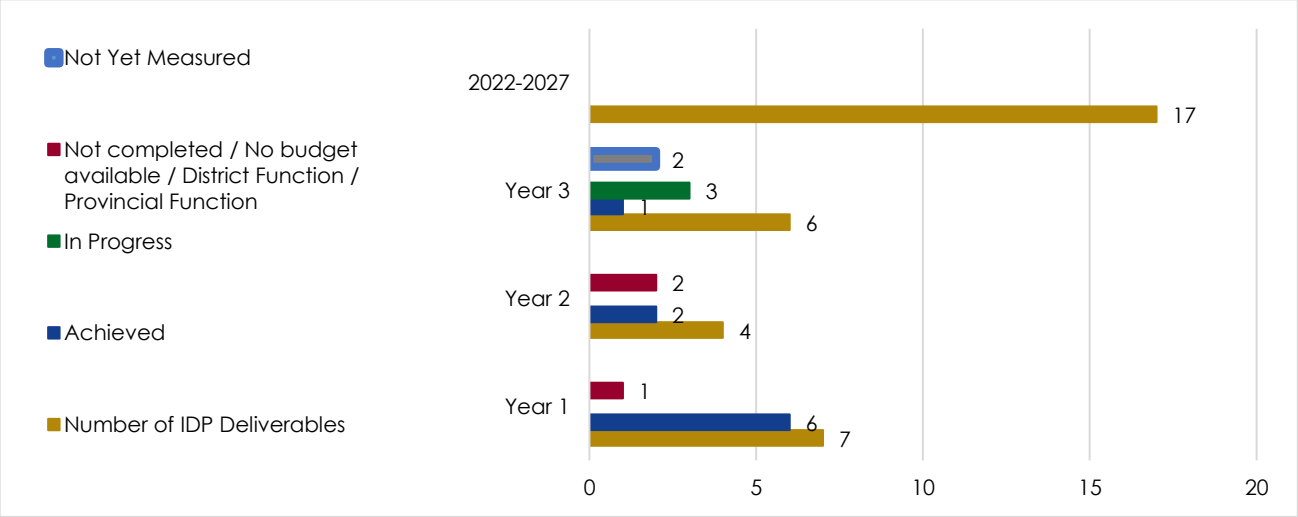
CHAPTER 5:

Performance Summary of the 5th Generation IDP 2022 – 2027

5.1 Introduction

The performance reporting on the IDP deliverables for the period 2022 – 2027 of the 5th Generation IDP 2022 – 2027 covers the period from 01 July 2022 to 30 June 2027.

The reporting focuses on the implementation of the Municipal Manager, Mayoral, Mayoral Portfolio, and Sector Plans priorities encapsulated throughout the various sections in the IDP document, and the format reflects the IDP deliverables per priority area. The IDP deliverables were revised in January / February 2025 to allow for adequate planning and implementation in the 2025/26 financial year and the outer financial years.



The overall assessment of actual performance against targets set for the IDP deliverables as documented in the various sections of the IDP document is illustrated below:

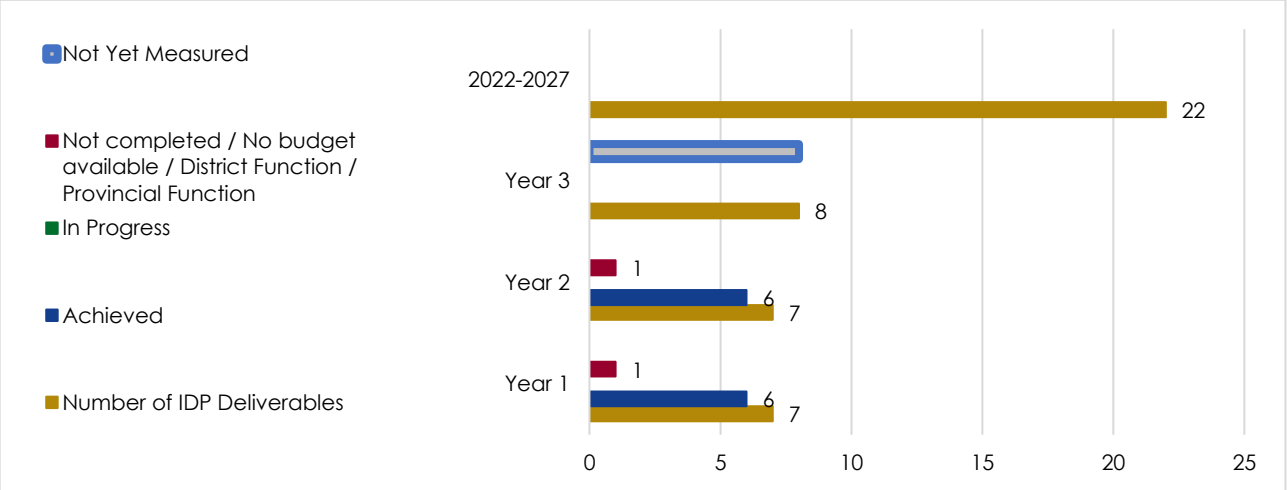
5.2 IDP Performance Reporting: Municipal Manager IDP Priorities for 2022 - 2027

Seventeen (17) IDP deliverables are linked to the Municipal Manager's Priorities across directorates and will be measured for the period 2022 – 2027. In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, while 1 (14.29 per cent) was not achieved. In Year 2 (2023/24), 2 (50 per cent) of the four IDP deliverables were completed and 2 (50 per cent) were not achieved.

In addition, six (6) IDP deliverables were recorded for **Year 3** (2024/25), of which 1 (16.67 per cent) has been achieved, 3 (50 per cent) are in progress and 2 (33.33 per cent) are to be reported on by 30 June 2025.

Graph 19: Number of Municipal Manager Priorities achieved for 2022 – 2027

5.3 IDP Performance Reporting: Executive Mayor Priorities for 2022 - 2027



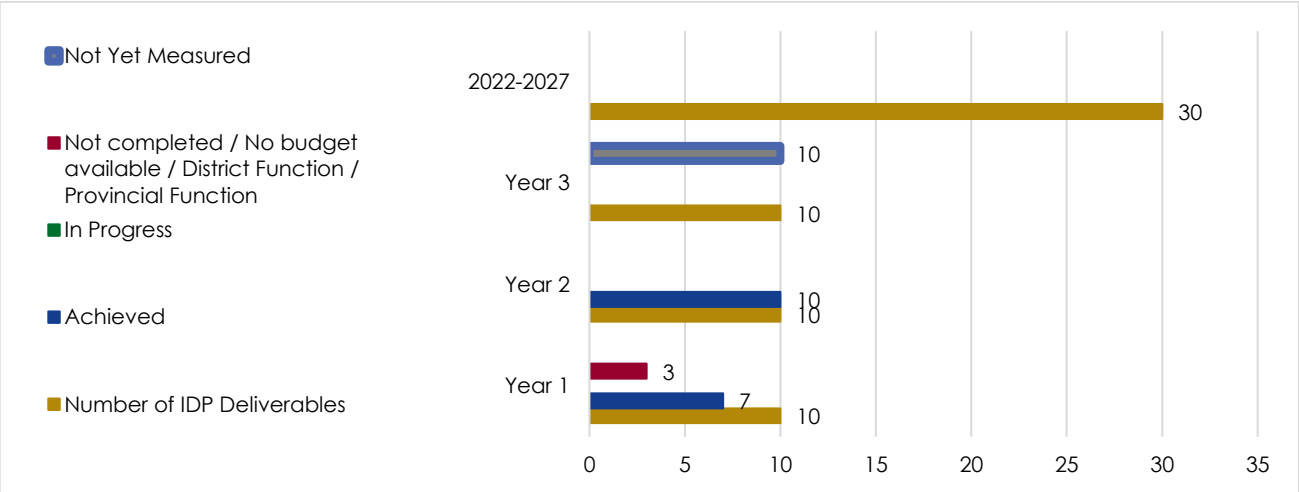
The **Executive Mayoral** 5–year plan has a total of 132 IDP deliverables linked to nine (9) mayoral outcomes which are applicable for the 5th Generation IDP 2022 – 2027.

Executive Mayoral Outcome 1: Clean, accountable, and responsive local government has a total of 22 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not met. In Year 2 (2023/24), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not achieved.

In Year 3 (2024/25), all 8 (100%) of the IDP deliverables have not yet been measured and will be reported on by 30 June 2025.

Graph 20: Executive Mayoral Outcome 1: Implementation Progress 2022 – 2027

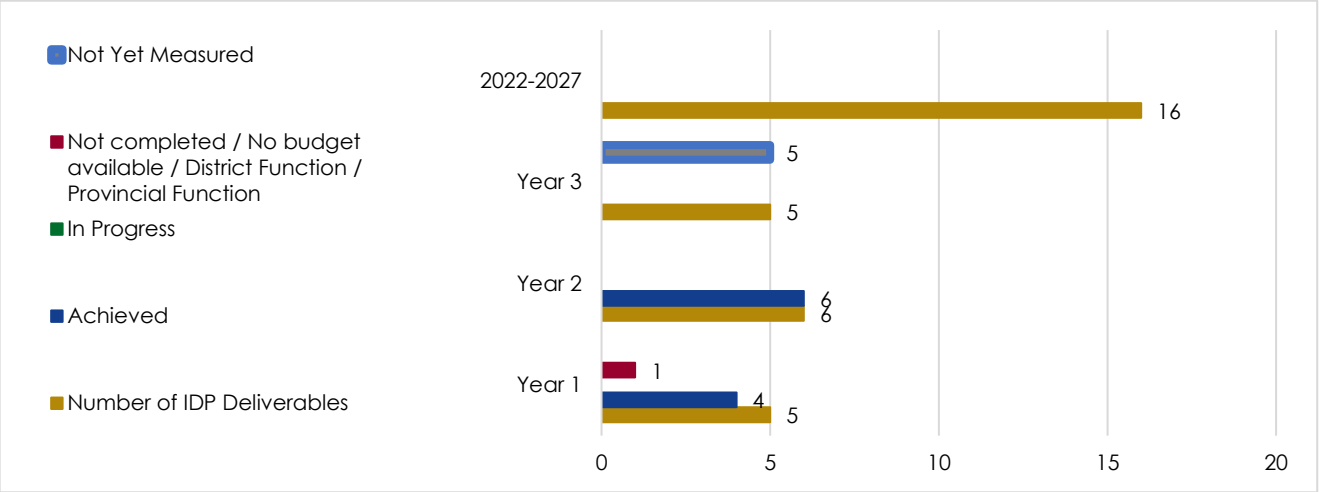


Executive Mayoral Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area has a total of 30 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 7 (70 per cent) of the ten (10) IDP deliverables were achieved, and 3 (30 per cent) were not met. In Year 2 (2023/24), 100 per cent of the ten (10) IDP deliverables were achieved.

In Year 3 (2024/25), 100 per cent of the 10 IDP deliverables will be reported on by 30 June 2025.

Graph 21: Executive Mayoral Outcome 2: Implementation Progress 2022 – 2027

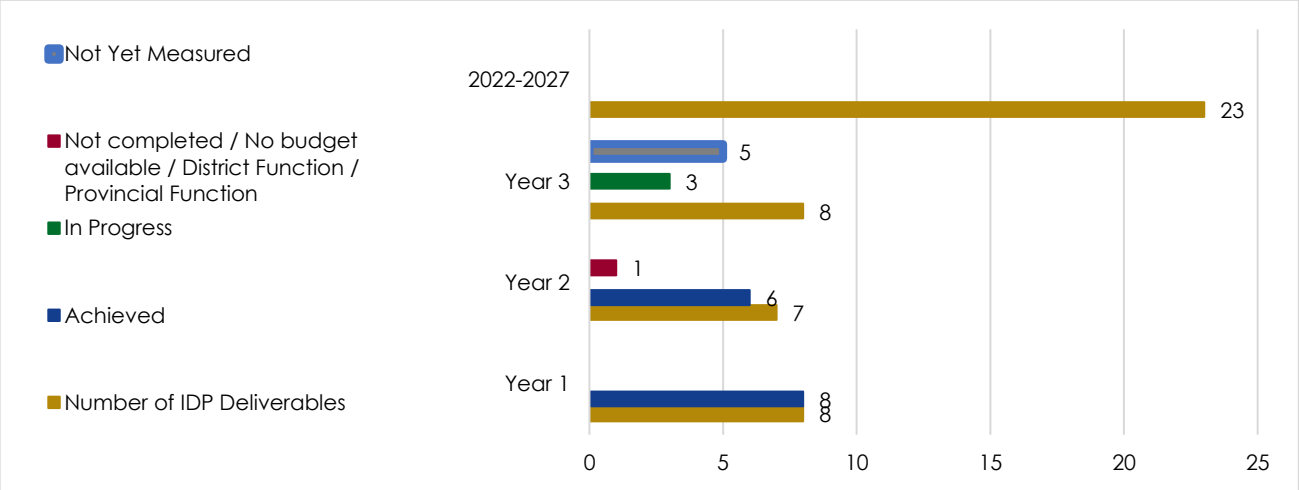


Executive Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers, has a total of 16 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (80 per cent) of the five (5) IDP deliverables were achieved, and 1 (20 per cent) was not met. In Year 2 (2023/24), all 6 (100 per cent) of the 6 (six) IDP deliverables were achieved.

In Year 3 (2024/25), 100 per cent of the 5 (five) are in progress and will be reported on by 30 June 2025.

Graph 22: Executive Mayoral Outcome 3: Implementation Progress 2022 – 2027

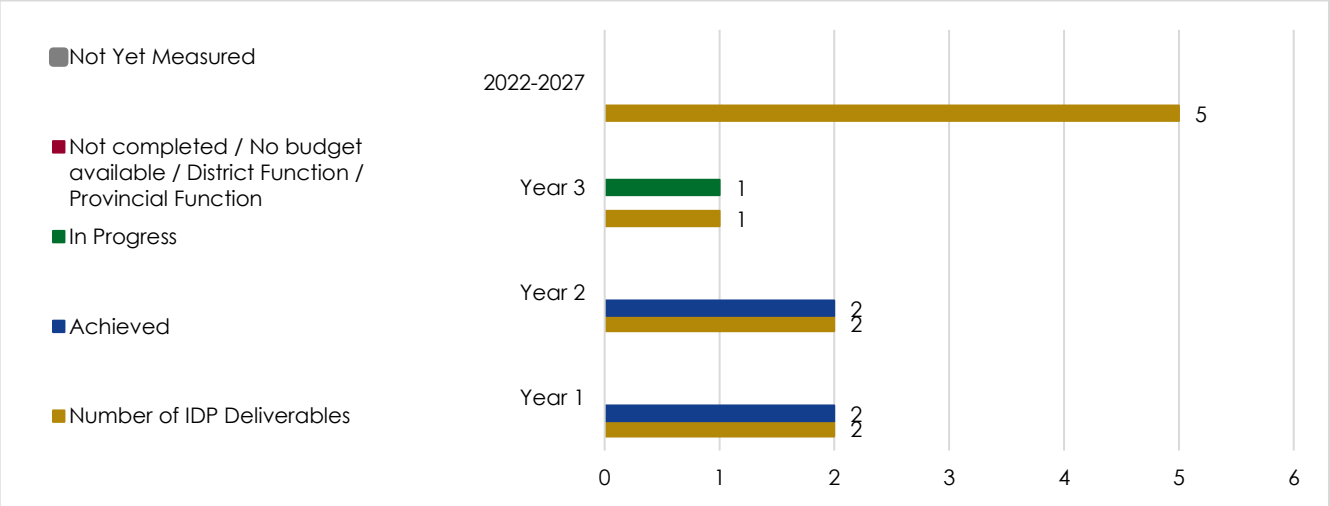


Executive Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements, and mixed-use developments) has a total of 23 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 100 per cent of the IDP deliverables were achieved. In Year 2 (2023/24), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) has not been met.

In Year 3 (2024/25), 3 (37.5 per cent) of the eight (8) IDP deliverables are in progress, and 5 (62.5 per cent) will be reported by 30 June 2025.

Graph 23: Executive Mayoral Outcome 4: Implementation Progress 2022 – 2027

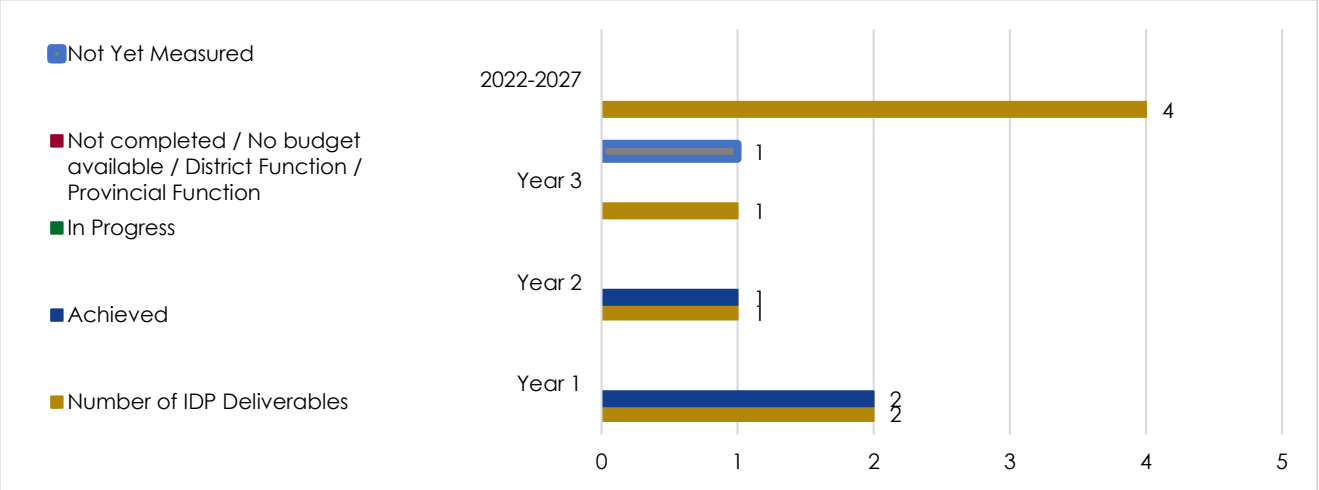


Executive Mayoral Outcome 5: The development of the Adam Tas Corridor and the town establishment of all ten dorpies across the municipality area has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 100 per cent of the IDP deliverables were achieved. In Year 2 (2023/24), 100 per cent of the two (2) IDP deliverables were achieved.

In Year 3 (2024/25), 100 per cent of the one (1) IDP deliverable is in progress and will be reported on by 30 June 2025.

Graph 24: Executive Mayoral Outcome 5: Implementation Progress 2022 – 2027

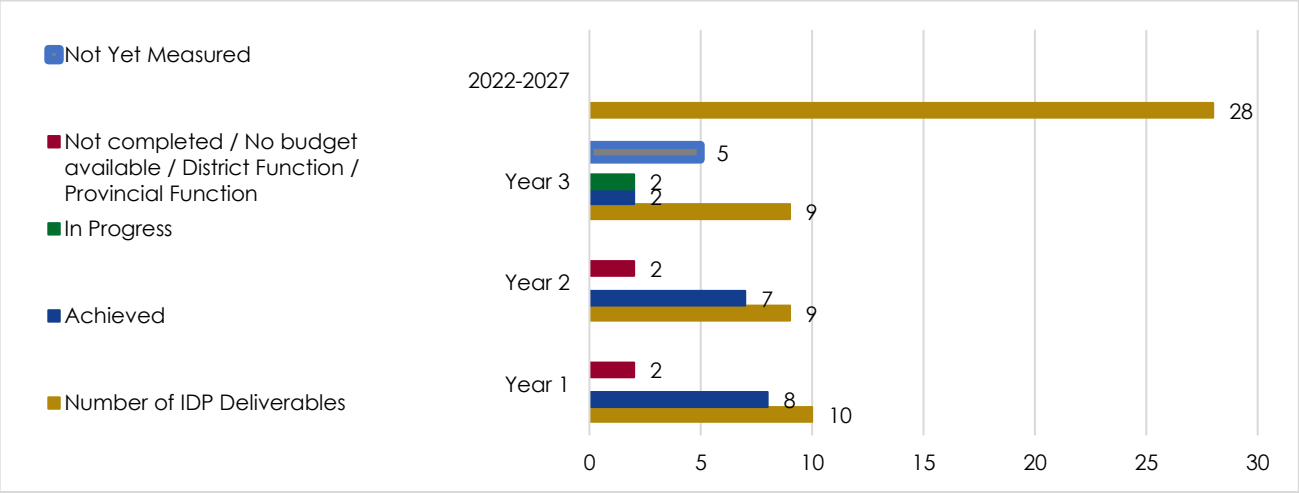


Executive Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth has a total of 4 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 2 (100 per cent) IDP deliverables were achieved. In Year 2 (2023/24), 100 per cent of the IDP deliverable was achieved.

In Year 3 (2024/25) 100 per cent of the IDP deliverables have not yet been measured.

Graph 25: Executive Mayoral Outcome 6: Implementation Progress 2022 – 2027

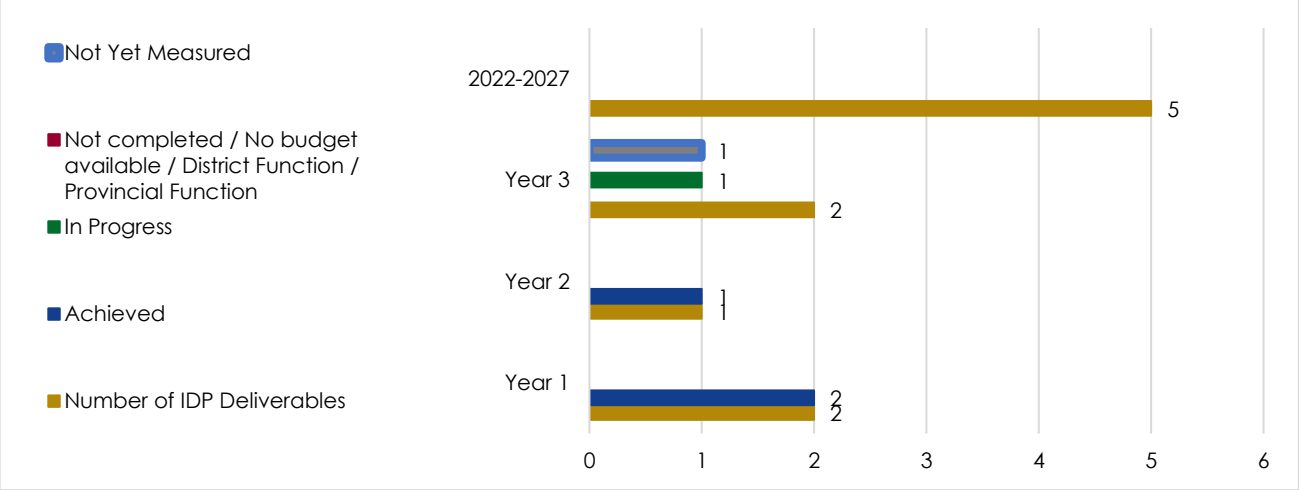


Executive Mayoral Outcome 7: To create safer environments in our communities, there are a total of 28 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 8 (80 per cent) of the ten (10) IDP deliverables were achieved, and 2 (20 per cent) were not met. In Year 2 (2023/24), 7 (77.78 per cent) of the nine (9) IDP deliverables were achieved, and 2 (22.22 per cent) was not met.

In Year 3 (2024/25), 2 (22.22 per cent) of the nine (9) IDP deliverables were achieved, 2 (22.22 per cent) are in progress, and 5 (55.56 per cent) will be reported by 30 June 2025.

Graph 26: Executive Mayoral Outcome 7: Implementation Progress 2022 – 2027



Executive Mayoral Outcome 8: The expansion of the green economy with innovative projects, creating a new reality of service delivery and job creation, has a total of 5 IDP deliverables for the period 2022 – 2027.

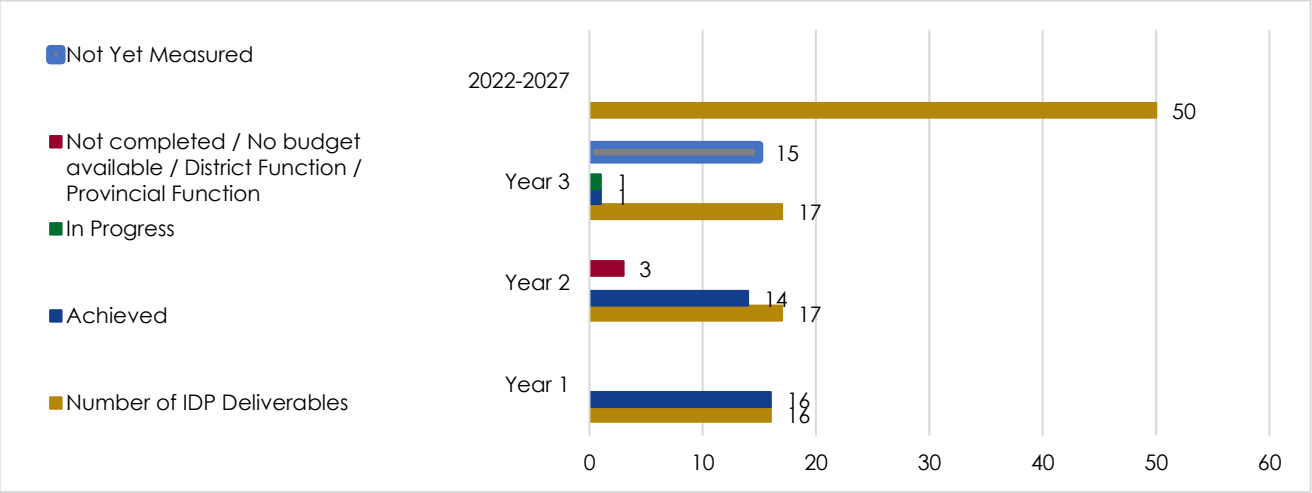
In Year 1 (2022/23), 2 (100 per cent) of the two (2) IDP deliverables were achieved. In Year 2 (2023/24), 1 (100 per cent) IDP deliverable was achieved.

In Year 3 (2024/25), 1 (50 per cent) of the IDP deliverables is in progress and 1 (50 per cent) has not yet been measured.

Graph 27: Executive Mayoral Outcome 8: Implementation Progress 2022 – 2027

5.4 IDP Performance Reporting: Mayoral Portfolios for 2022 - 2027

The 10 (ten) Mayoral Portfolios each have a 5-year plan with specific IDP deliverables and targets applicable for the period 2022 - 2027.



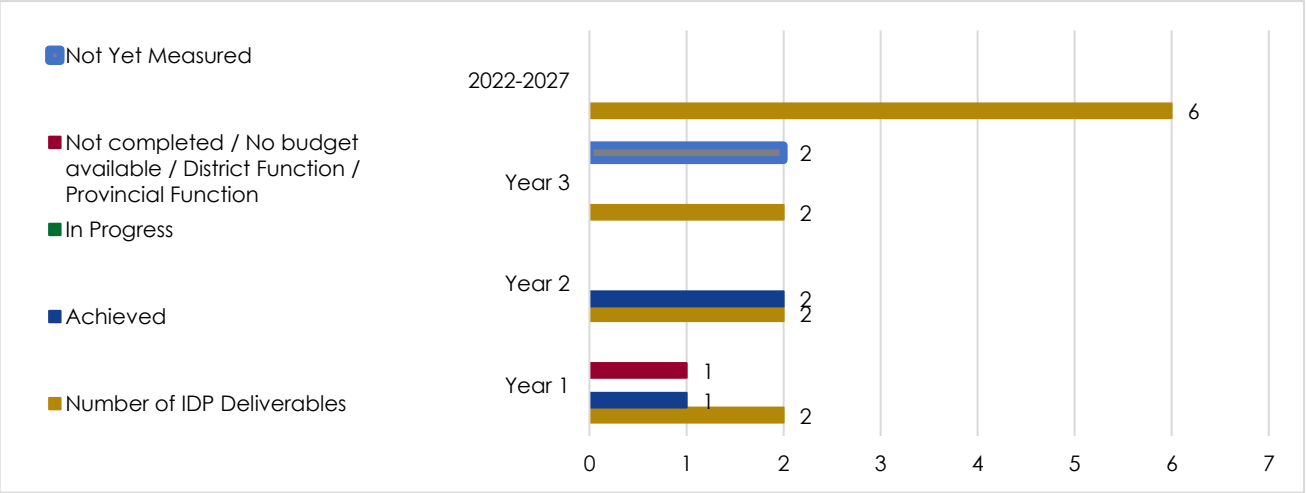
A total of 197 IDP deliverables are linked to ten (10) mayoral portfolios for the period 2022 - 2027.

The Mayoral Portfolio Human Settlements has a total of 50 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 16 (100 per cent) of the deliverables were achieved. In Year 2 (2023/24), 14 (82.35 per cent) of the seventeen (17) IDP deliverables were met, and 3 (17.65 per cent) were not achieved.

In Year 3 (2024/25), 1 (5.88 per cent) was achieved of the 17 IDP deliverables, 1 (5.88 per cent) is in progress, and 15 (88.24) will be reported on by 30 June 2025.

Graph 28: Mayoral Portfolio – Human Settlements 2022 – 2027

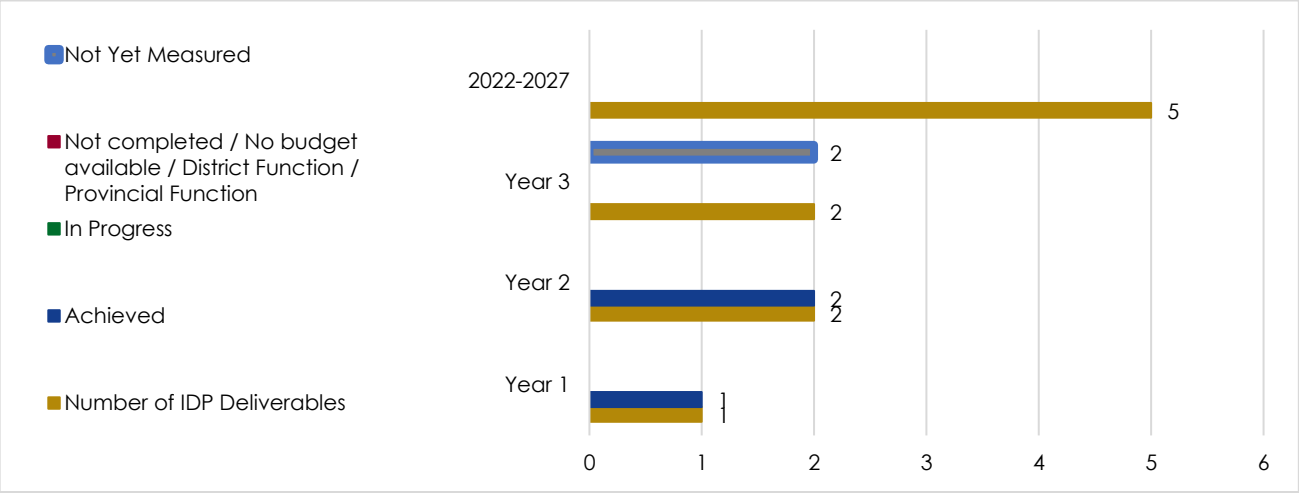


The Mayoral Portfolio Rural and Environmental Management has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (50 per cent) of the two (2) IDP deliverables were achieved, and 1 (50 per cent) was not met. In Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved.

In Year 3 (2024/25), 2 (100 per cent) of the IDP deliverables have not yet been measured.

Graph 29: Mayoral Portfolio – Rural and Environmental Management

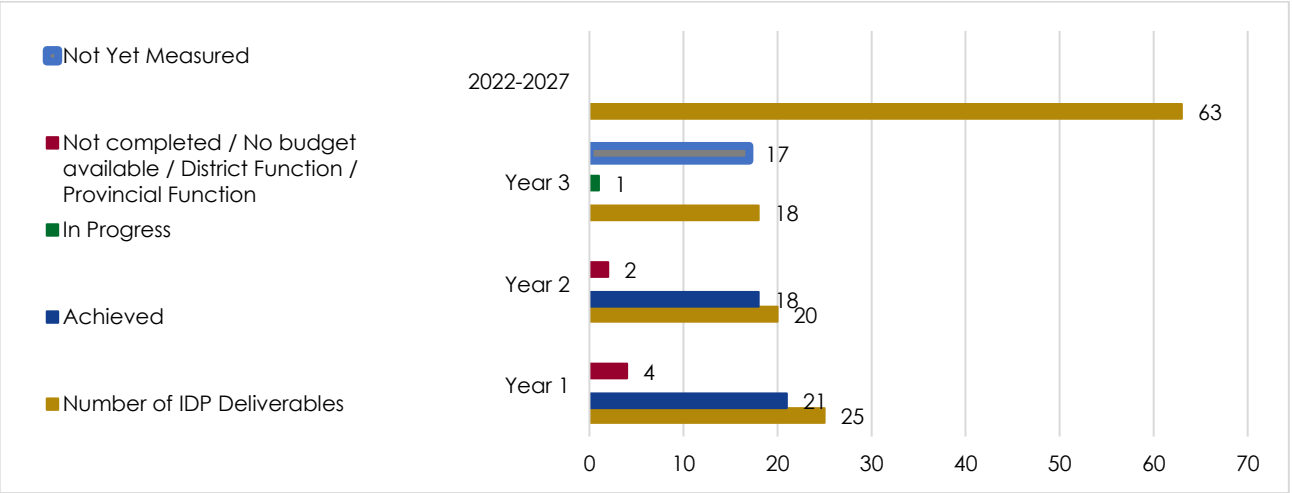


The Mayoral Portfolio Sport, Youth, and Culture has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 2 (100 per cent) of the two (2) IDP deliverables were achieved.

In Year 3 (2024/25), 2 (100 per cent) of the IDP deliverables have not yet been measured.

Graph 30: Mayoral Portfolio – Sport, Youth and Culture

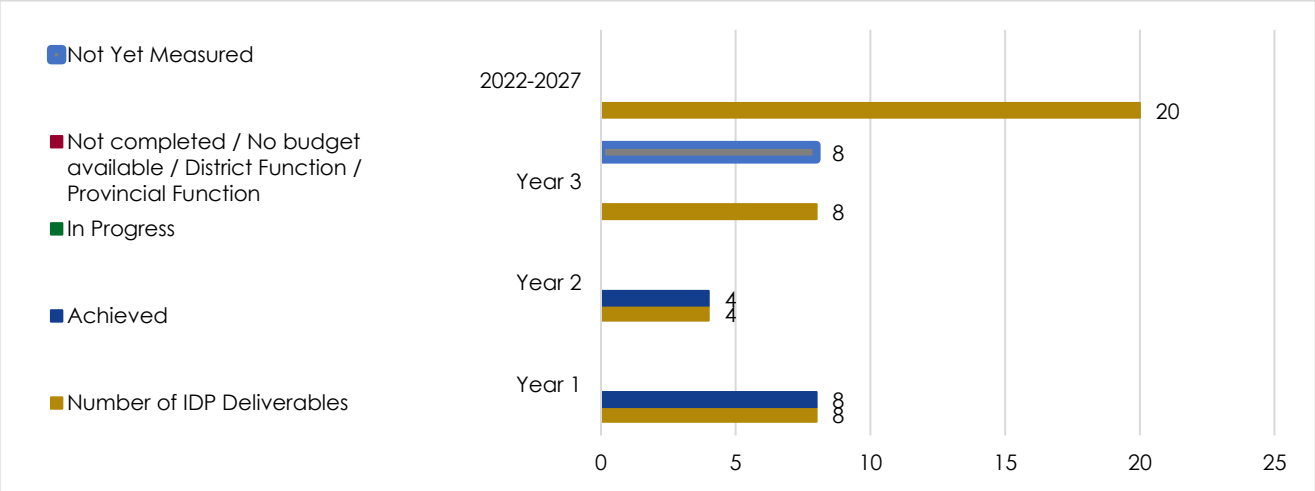


The Mayoral Portfolio Planning, LED and Tourism has a total of 63 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 21 (84 per cent) of the 25 IDP deliverables were achieved, and 4 (16 per cent) were not met. In Year 2 (2023/24), 18 (90 per cent) of the 20 IDP deliverables were achieved, and 2 (10 per cent) have not been met.

In Year 3 (2024/25), 1 (5.56 per cent) of the 18 IDP deliverables is in progress, and 17 (94.44 per cent) will be reported on 30 June 2025.

Graph 31: Mayoral Portfolio – Planning, LED and Tourism

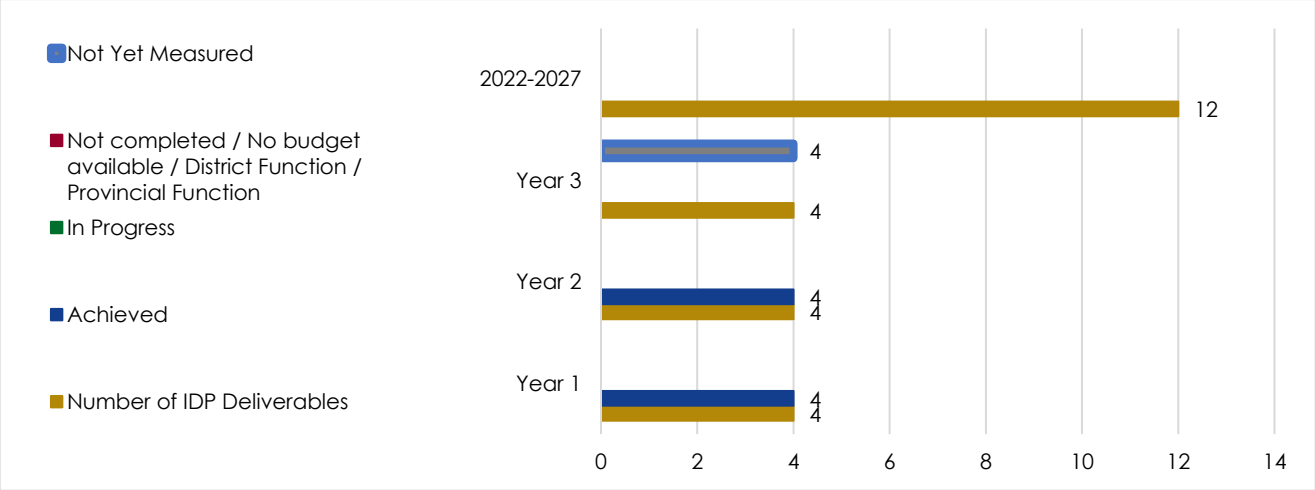


The Mayoral Portfolio Community Services has a total of 20 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 8 (100 per cent) of the 8 IDP deliverables were achieved. In Year 2 (2023/24), 4 (100 per cent) of the IDP deliverables were achieved.

In Year 3 (2024/25), 8 (100 per cent) IDP deliverables have not yet been measured and will be reported on by 30 June 2025.

Graph 32: Mayoral Portfolio – Community Services

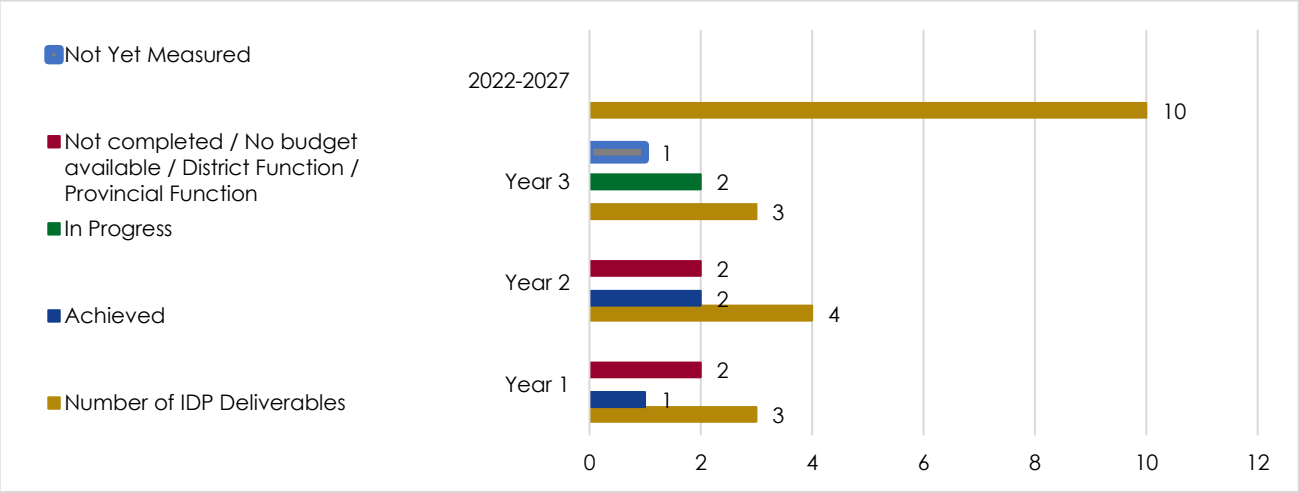


The Mayoral Portfolio Financial Services has a total of 12 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the four (4) IDP deliverables were achieved.

In Year 3 (2024/25), 100 per cent of the 4 IDP deliverables have not yet been measured.

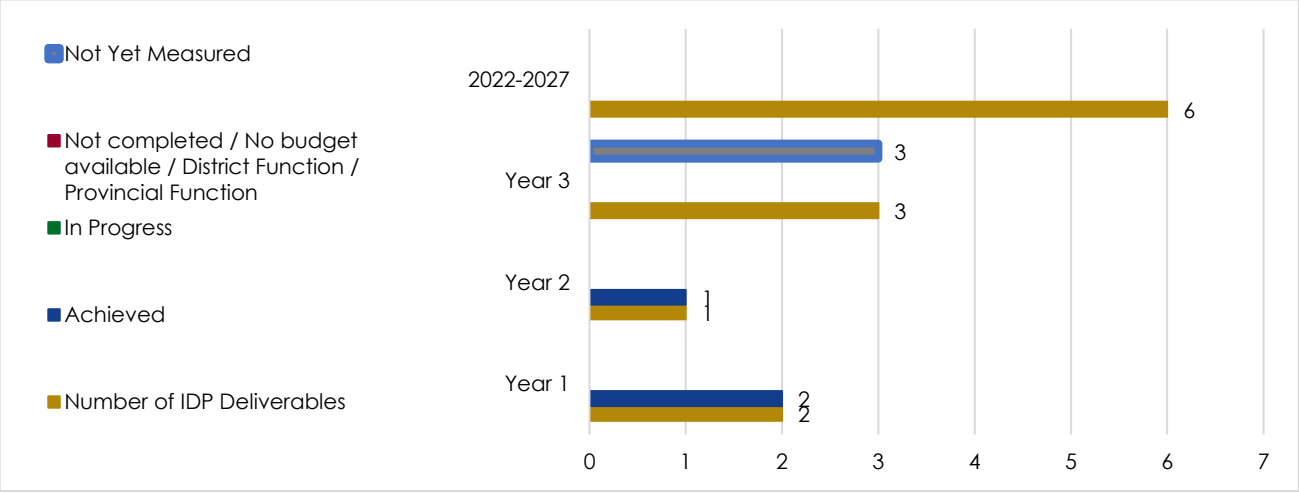
Graph 33: Mayoral Portfolio – Financial Services



The Mayoral Portfolio Protection Services has a total of 10 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 1 (33.33 per cent) of the three (3) IDP deliverables were achieved, and 2 (66.67 per cent) were not met. In Year 2 (2023/24), 2 (50 per cent) of the four (4) IDP deliverables were achieved and 2 (50 per cent) were not achieved.

In Year 3 (2024/25, 2 (66.67 per cent) of the 3 IDP deliverables are in progress and 1 (33.33 per cent) is to be reported on by 30 June 2025.

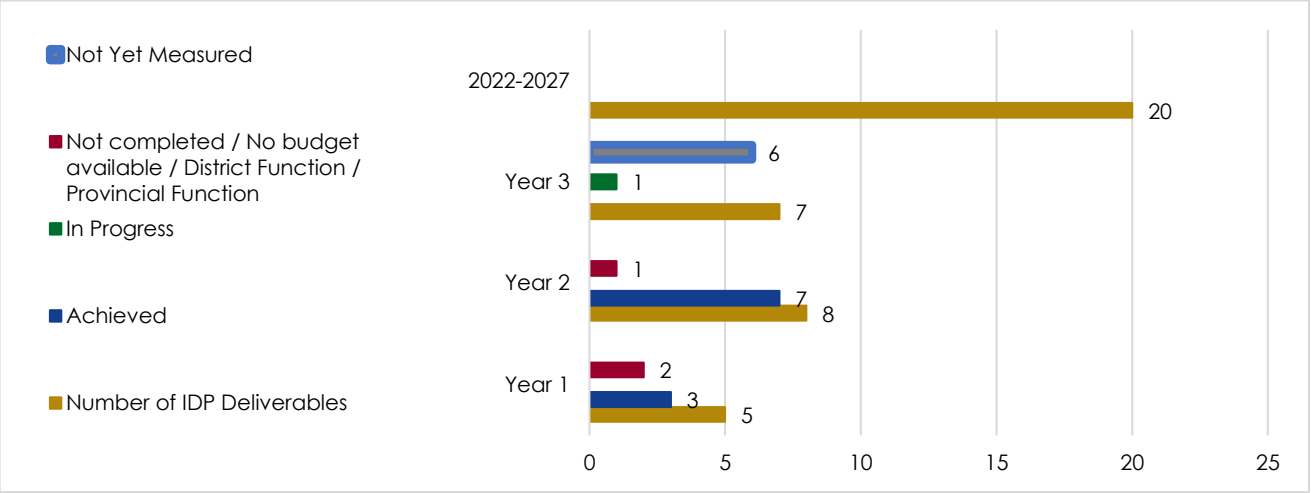


Graph 34: Mayoral Portfolio – Protection Services

The Mayoral Portfolio Corporate Services has a total of 6 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved. In Year 3, 100 per cent of the 3 IDP deliverables have yet to be measured.

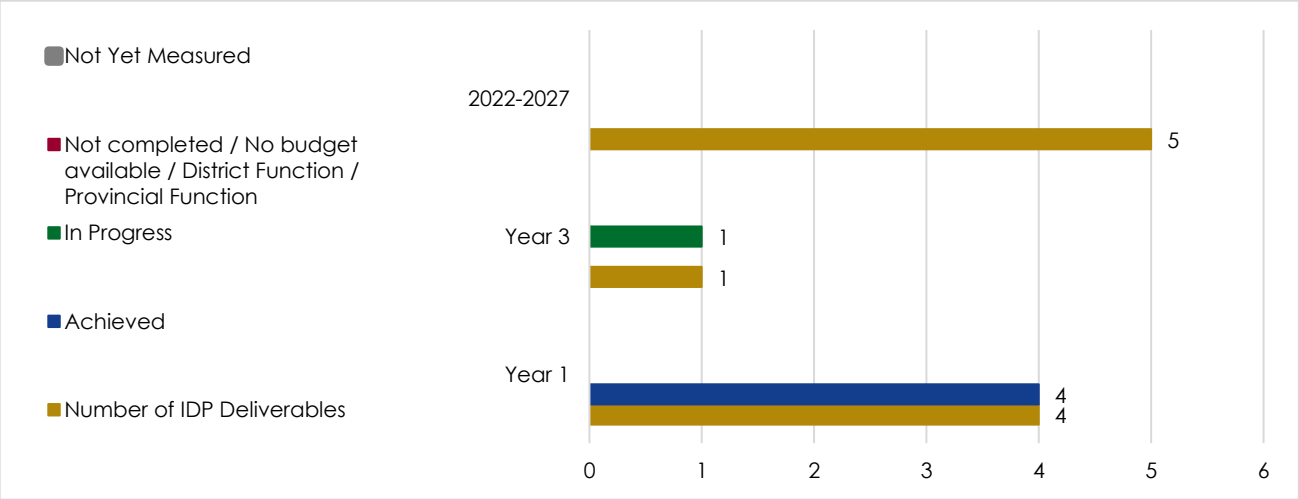
Graph 35: Mayoral Portfolio – Corporate Services



The Mayoral Portfolio Infrastructure Services has a total of 20 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 3 (60 per cent) of the five (5) IDP deliverables were achieved, and 2 (40 per cent) were not met. In Year 2 (2023/24), 7 (87.5 per cent) of the eight (8) IDP deliverables were achieved, and 1 (12.5 per cent) not achieved.

In Year 3 (2024/25), 1 (14.29 per cent) of the 7 IDP deliverables is in progress, and 6 (85.71) have not yet been measured.

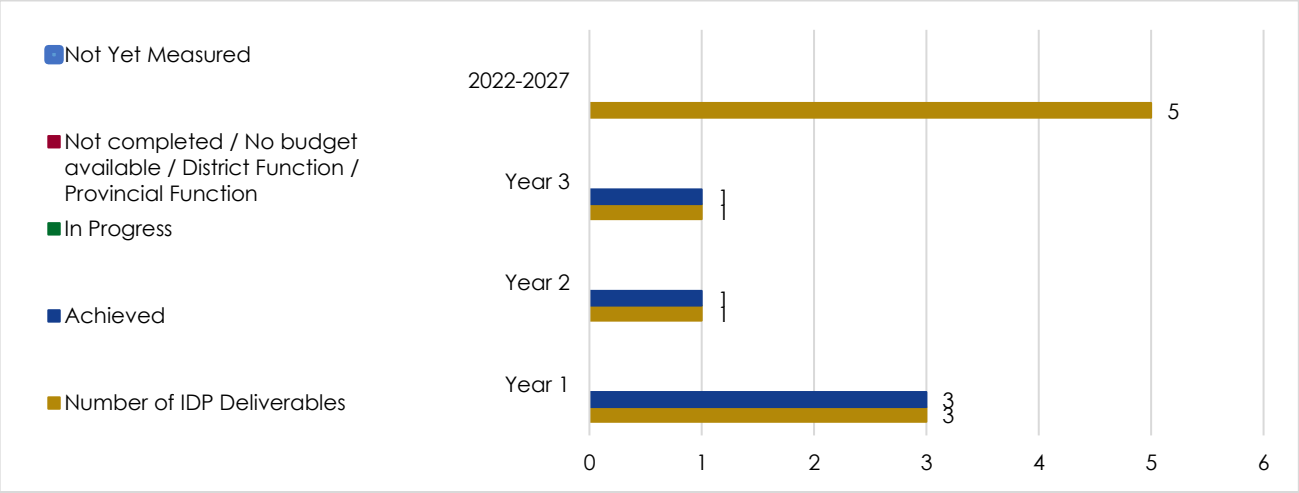


Graph 36: Mayoral Portfolio – Infrastructure Services

The Mayoral Portfolio Parks and Open Spaces has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 4 (100 per cent) of the four (4) IDP deliverables were achieved, and in Year 2 (2023/24), no IDP deliverables had to be accounted for. In Year 3 (2024/25), 1 (100 per cent) IDP deliverable is in progress.

Graph 37: Parks, Open Spaces and Environment



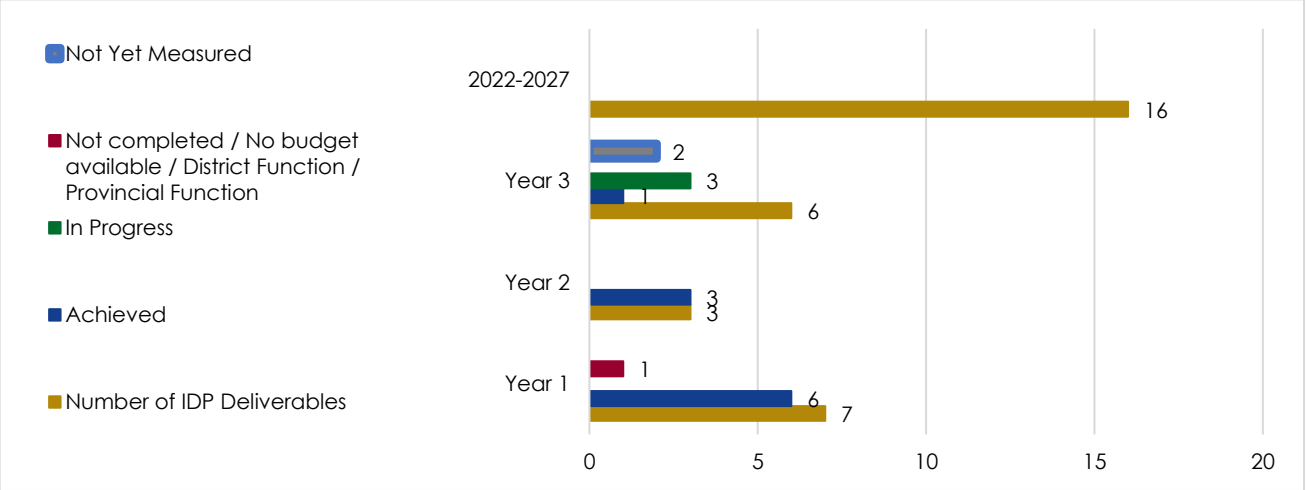
5.5 IDP Performance Reporting: Sector Plans Implementation for 2022 - 2027

The seven (7) sector plans below each have a 5–year implementation plan with specific IDP deliverables and targets for the period 2022 - 2027.

The **Environmental Management Plan** has a total of 5 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), Year 2 (2023/24), and Year 3 (2024/25), 100 per cent of the IDP deliverables were achieved.

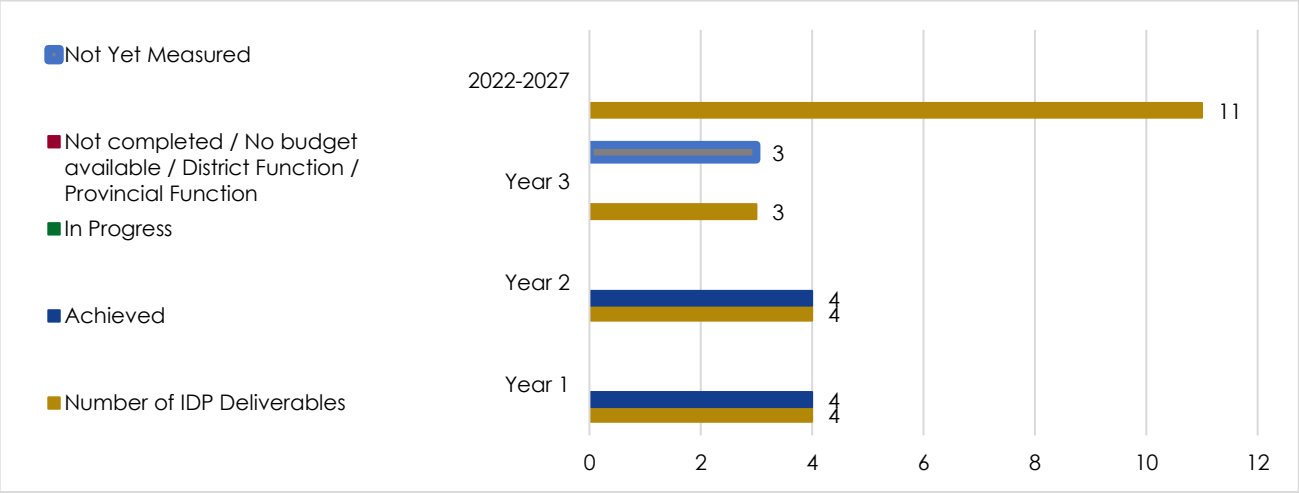
Graph 38: Environmental Management Plan – Implementation Plan Progress 2022 – 2027



The section on **Integrated Human Settlements** that highlights priority housing projects and upgrading of informal settlements has a total of 16 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 6 (85.71 per cent) of the seven (7) IDP deliverables were achieved, and 1 (14.29 per cent) was not achieved. In Year 2 (2023/24), 100 per cent of the three (3) IDP deliverables were achieved.

In Year 3 (2024/25), 1 (16.67 per cent) of the six (6) IDP deliverables were achieved, 3 (50 per cent) are in progress and 2 (33.33 per cent) will be reported on by 30 June 2025.

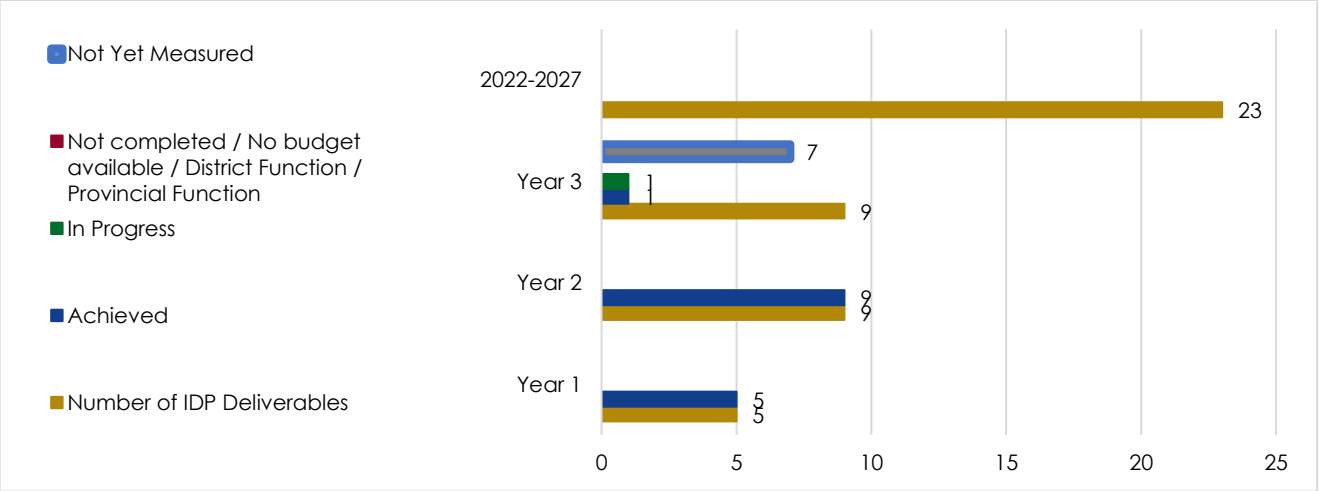


Graph 39: Integrated Human Settlements – Implementation Plan Progress 2022 - 2027

The **Comprehensive Integrated Transport Plan** has a total of 11 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved. In Year 3 (2024/25), 3 (100 per cent) of the IDP deliverables have yet to be measured.

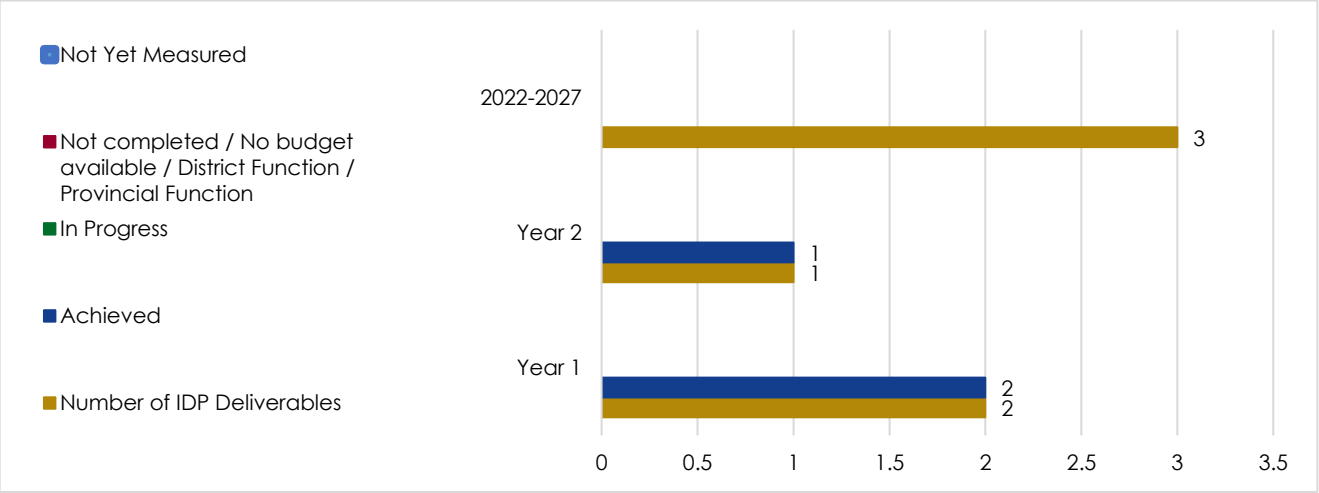
Graph 40: Comprehensive Integrated Transport Plan – Implementation Plan Progress 2022 - 2027



The **Integrated Waste Management Plan (IWMP)** has a total of 23 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23), 5 (100 per cent) of the IDP deliverables were achieved. In Year 2 (2023/24), 9 (100 per cent) of the ten (10) IDP deliverables were achieved.

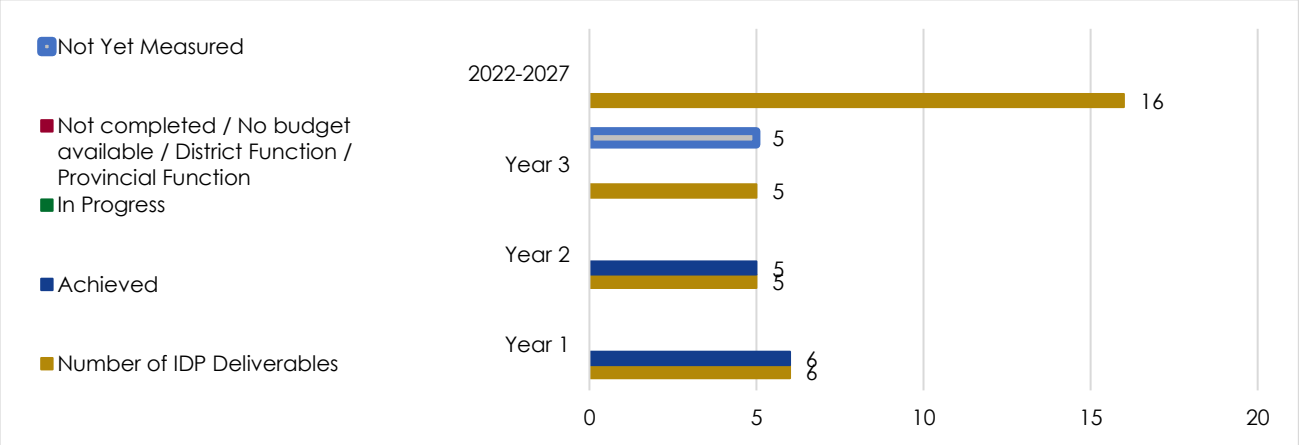
In Year 3 (2024/25), 1 (11.11 per cent) of the nine (9) IDP deliverables were achieved, 1 (11.11 per cent) is in progress, and 7 (77.78 per cent) will be reported on by 30 June 2025.



Graph 41: Integrated Waste Management Plan – Implementation Plan Progress 2022 – 2027

The **Water Services Development Plan (IWMP)** has a total of 3 IDP deliverables for the period 2022 – 2027.

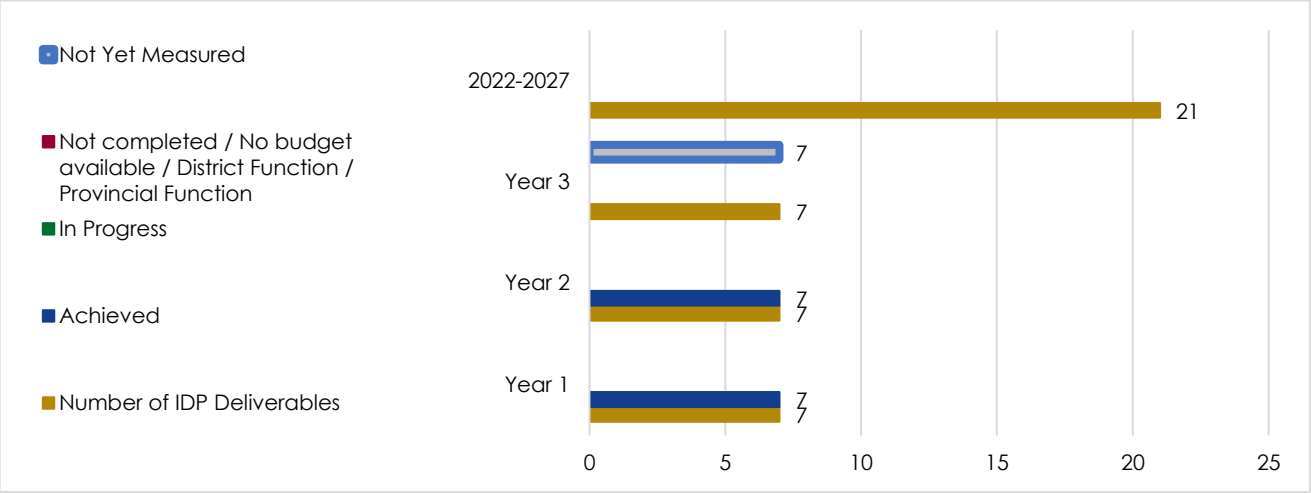
In Year 1 (2022/23) and Year 2, 100 per cent of the IDP deliverables were achieved. In Year 3 (2024/25), no IDP deliverables were documented for the IWMP.



Graph 42: Water Services Development Plan – Implementation Plan Progress 2022 – 2027

The **Disaster Management Plan (DMP)** has a total of 16 IDP deliverables for the period 2022 – 2027.

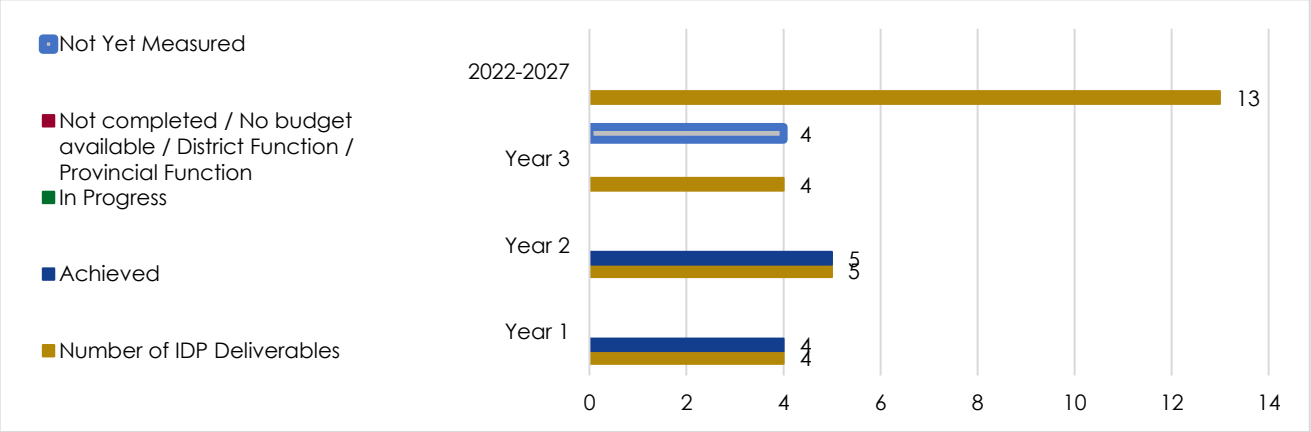
In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved. In Year 3 (2024/25), 5 (100 per cent) of the IDP deliverables will be reported on by 30 June 2025.



Graph 43: Disaster Management Plan – Implementation Plan 2022 – 2027

The **Local Economic Development Strategy** has a total of 21 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 7 (100 per cent) of the IDP deliverables were achieved. In Year 3 (2024/25), 100 per cent of the IDP deliverables will be reported on by 30 June 2025.



Graph 44: Local Economic Development – Implementation Plan 2022 – 2027

The **Community Development Strategy** has a total of 4 IDP deliverables for the period 2022 – 2027.

In Year 1 (2022/23) and Year 2 (2023/24), 100 per cent of the IDP deliverables were achieved. In Year 3 (2023/24), 4 (100 per cent) of the IDP deliverables will be reported on by 30 June 2025.

Graph 45: Community Development – Implementation Plan 2022 – 2027

CHAPTER 6:

One Plan: Service delivery, budget, programmes, and projects

6.1 Introduction

Cabinet approved the District Development Model (DDM) as an All of Government and Society Approach, providing a method by which all three spheres of government and state entities work in unison in an impact-orientated way, where there is higher performance and accountability for coherent and effective service delivery and development outcomes.

The DDM is an intergovernmental approach focusing on 44 districts and 8 metropolitan spaces for more effective joint planning, budgeting, and implementation over multi-year planning and electoral cycles. Although each sphere, sector, or entity has its distinct constitutional powers, functions, and responsibilities, they cooperate and undertake collaborative planning, budgeting, and implementation processes, converging developmental efforts at the district / metropolitan level.

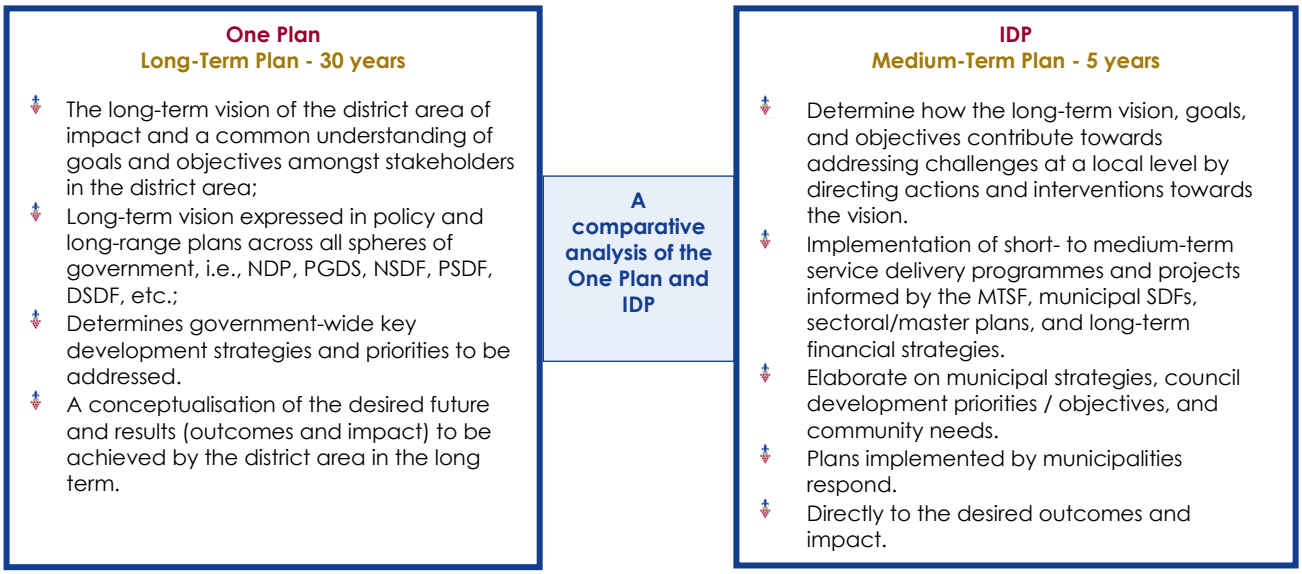
It is acknowledged that the DDM introduced a new planning instrument in the form of the **One Plan**. This process comes into a planning environment where there are existing planning instruments at local, provincial, and national levels of government. However, the One Plan is not meant to replace any of the existing prescribed development, departmental strategic, and annual performance plans that each sphere, department, and state entity is responsible for or required to develop. The One Plan is rather informed by these plans, and once in place, it will guide the review of these plans and budgets.

The Western Cape Government-specific approach to the DDM is called the **Joint District and Metro Approach (JDMA)**. The JDMA envisages the three spheres of government to converge, using intergovernmental (IGR) engagements, to develop similar Western Cape strategic, development, and planning priorities with aligned budgets and accelerated implementation for service delivery.

The **Joint District and Metro Approach (JDMA)** -

- is a geographical (district), team-based, and citizen-focused approach;
- has the output of a single implementation plan to provide planning and strategic priorities, developmental initiatives, service delivery, and capacity building;
- has the desired outcome of improving the living conditions (lives) of citizens;
- has a horizontal interface (between provincial departments) and a vertical interface (national, provincial, and local government spheres);
- does not exclude local municipalities;
- is not a functions and power debate; and
- promotes collaboration using the District Coordinating Forum as the governance instrument for co-planning, co-budgeting, and co-implementation to strengthen service delivery to communities.

This chapter will provide details from all three spheres of government to give effect to the objectives and strategies contained in the 5th Generation Integrated Development Plan.



6.2 Relationship between the One Plan and Integrated Development Plan (IDP)

The One Plan does not replace the Integrated Development Plans of municipalities as the "single, inclusive, and strategic plan for the development of the municipality," but is meant to strengthen and

enhance the IDPs and other plans of the municipalities. It is foreseen to provide greater certainty and direction for the IDPs. The IDP will be the vehicle through which implementation of the One Plan will happen at the local government level.

Below is a comparative analysis of the One Plan and IDP:

Figure 27: Comparative analysis of the One Plan and IDP

6.3 National and Provincial Government Priorities

6.3.1 State of the Nation Address (SONA) 2025

President Cyril Ramaphosa presented the State of the Nation Address (SONA) on 06 February 2025 with the theme '**Harnessing Parliamentary Diplomacy for Realisation of Global Solidarity, Equality, and Sustainability.**' The theme underscores the transformational potential of parliamentary efforts in promoting inclusive, sustainable, and collaborative approaches to address global challenges, thus advancing shared prosperity.

SoNA 2025 outlined major plans to drive South Africa's economic growth, improve infrastructure, and enhance social welfare programs. The following are key highlights from the SONA:

Economic Growth and Investment

- The government aims to lift economic growth above 3%, with over R940 billion allocated for infrastructure investment over the next three years. A second wave of SOE reform will drive efficiency and attract private sector participation.

Energy and Water Infrastructure

- The Electricity Regulation Amendment Act came into effect on 1 January, marking the transition to a competitive electricity market. To tackle the water crisis, the government has secured R23 billion for seven major water infrastructure projects and will soon establish the National Water Resource Infrastructure Agency to unlock further investment in water security.

Public Sector Reform

- A graduate recruitment scheme will attract top talent to public service, while digital transformation efforts will improve government efficiency through a revamped gov.za platform and a national digital identity system.

Business and Trade

- A modernised industrial policy will focus on localisation, diversification, digitisation, and de-carbonisation. The visa system will also be streamlined with the launch of an Electronic Travel Authorisation System to boost tourism and foreign investment.

Social Development and Housing

- The Social Relief of Distress Grant will serve as a foundation for a more sustainable income support system. Housing policies will be redesigned to encourage affordable inner-city housing and the repurposing of underutilised state properties.

Justice and anti-corruption

- Reforms to South Africa's anti-corruption framework will enhance whistleblower protections and strengthen enforcement against money laundering and financial crimes.

Medium-Term Development Plan (MTDP)

- Establishing an ambitious programme for the next five years to drive inclusive growth and job creation, and build a capable, ethical state.

6.3.2 State of the Province Address (SOPA) 2025

Premier Alan Winde presented the State of the Province Address (SOPA) on 26 February 2025.

The following are key highlights from the SOPA 2025:

The Western Cape Government is committed to set-up and leading in times of uncertainty.

Challenges faced and overcome:

- The province has faced major challenges such as funding shortfalls, water crises, and pandemics.
- Through innovation and collaboration, the Western Cape has proven its ability to adapt and respond effectively.

Key Achievements:

- Partnership with municipalities and the private sector to add 5 700 MW of renewable energy by 2035.
- Expansion of law enforcement efforts to enhance community safety.
- Rapid construction of schools in less than 100 days.

Focus for the Future:

- Commitment to driving economic growth and job creation over the next five years.
- Emphasis on supporting businesses to create more job opportunities for residents.
- Continued efforts to address high unemployment rates and promote economic growth.

Building Strong Relationships:

- Strengthening international partnerships to support economic growth and development.
- Hosting key events like the G20 Summit to amplify the province's voice on global platforms.

Education and Workforce Development:

- Celebrating educational achievements, including high matric pass rates and job creation initiatives.
- Supporting skills development and job opportunities for youth through various programmes.

Infrastructure Investment:

- Significant investment in infrastructure projects to stimulate economic growth.
- Focus on road maintenance, urban development, and healthcare infrastructure upgrades.

Safety and Security:

- Collaboration with law enforcement agencies to combat crime and ensure community safety.
- Investment in disaster management and response teams to address natural disasters effectively.

Sustainable Funding and Financial Management:

- Exploring new funding approaches to support critical investments.
- Maintaining a strong record of governance to attract external partners and investments.

Building a future – fit province

- Commitment to building a future-fit province through innovation, collaboration, and responsive governance.
- Encouraging all residents to step up and work together to create a better Western Cape.

6.4 Investments

This section reflects on investment priorities within the Stellenbosch area for 2024/25.

6.4.1 Public Sector Investment

The 2024/25 capital expenditure budget in the CWD's municipalities saw a notable growth to R127.1 billion compared to the R107.0 billion in the 2023/24. The increase in expenditure is directed towards higher expenditure in the trading and services sector, particularly in Drakenstein, which has the highest expenditure for trading services equal to R590.8 million.

Furthermore, significant funds are directed towards wastewater management, driven by a major upgrade project at the Paarl Wastewater Treatment Works (WWTW). This project aims to improve wastewater treatment processes and protect the Berg River, a vital regional water source. Additionally, the initiative seeks to enable future green energy generation through biogas production at the facility. The National Treasury has provided a significant grant to support these wastewater and sanitation upgrades in the Paarl / Wellington area.

Following suit is Stellenbosch which has a total capital expenditure of R599.4 million in 2024/25. Of this, the most substantial expenditure was directed towards trading services, with a budget of R351.8 million. Water management constitutes the largest portion of this trading services expenditure, with a spend of R156.9 million. This significant investment is driven by the increasing water demand within the municipality amidst diminishing natural water sources. Projections indicate that the District will be at high risk of drought by 2040. In response to these challenges, municipal authorities have been exploring alternative water sources, including urban wastewater recycling (UWWR), as part of an integrated urban water management (IUWM) approach.

While the overall total expenditure for municipalities in the CWD has increased due to several factors, key contributors include rising costs associated with infrastructure investments, particularly in response to the need for improved service delivery and maintenance. Additionally, the increase in the import costs of essential resources, such as crude petroleum, has significantly impacted municipal budgets. Municipalities are investing heavily in infrastructure to support economic growth and improve service delivery, encompassing projects related to transportation, water supply, and sanitation.

6.5 Environmental Risk and Vulnerability for the Cape Winelands District (CWD)

The CSIR developed a vulnerability index for all 25 municipalities in the Western Cape that assesses their vulnerability in four areas—socio-economic, economic, physical, and environmental. The analysis reveals that the municipal areas in the CWD are particularly vulnerable to physical and environmental risks. These are as follows:

- Drakenstein stands out with the lowest socio-economic vulnerability but faces significant environmental challenges;
- Stellenbosch has a high environmental vulnerability, which could be a critical area for intervention;
- Breede Valley and Witzenberg have higher physical vulnerabilities, indicating potential challenges in infrastructure and connectivity; and
- Langeberg, while moderate in socio-economic and economic vulnerabilities, has a relatively lower environmental vulnerability, suggesting the need to balance development and environmental preservation.

To better understand the province's environmental vulnerabilities, the Department of Environmental Affairs and Development Planning (DEADP) initiated a project aimed at tracking the environmental vulnerabilities and risks in the Western Cape, with a particular focus on water security and the impacts of climate change.

The project is aimed at developing an environmental risk map that highlights areas in the Western Cape where compound risks threaten people, their livelihoods, and / or infrastructure. The risk maps can then be leveraged to provide insights that can support decision-making, planning, and budgeting related to sustainable economic growth and enhance human well-being.

The thematic areas contributing to the final combined environmental risk and vulnerability maps include:

- Ecosystem Deterioration;
- Coastal Erosion and Flooding;
- Terrestrial Flooding;
- Water Security;
- Air Quality and Health;
- Solid Waste Management; and
- Wildfires.

The analysis by the provincial government indicates that the CWD is vulnerable to several environmental risks. Ecosystem deterioration is due to the sensitivity of the remaining natural areas and the complexity of managing these sensitivities along with diverse human activities such as waste management, air pollutants, and increased wildfires.

Water scarcity is a concern given that future drying adds to the water security risk in the Western part of the province, especially in areas like Cederberg where the vulnerability is generally high. The CWD region may also face water security challenges due to climate change projections.

Lastly, the CWD faces increased wildfire hazards, particularly in the mountainous areas. The higher population density in these areas may lead to more fire ignition events, increasing the risk of wildfires. Air quality and health are impacted by pollutants and increased wildfires. The CWD, particularly the mountainous areas, may face challenges related to air quality due to these factors.

The environmental vulnerabilities in the CWD can have far-reaching implications for both the people and the economy. These vulnerabilities can lead to health and safety risks, property damage, economic losses, and increased socio-economic disparities. Effective governance, disaster management, and targeted interventions are essential to mitigate these impacts and support the resilience of the CWD.

6.6 Intergovernmental Budgetary Allocation

The infrastructure projects and related capital projects listed below are in various stages of implementation, with certain projects being in the planning phases, others in implementation with construction in progress, and some in the close-up phase of the project.

Table 29: Provincial Infrastructure Projects and Programmes MTEF period 2025/26 – 2027/28

Provincial Department (Sector)	Value of infrastructure projects and programmes (Rand)						MTREF Totals

6.7 Cape Winelands District (CWD) JDMA Implementation Plan

A CWDM JDMA profile was developed in 2020 and updated in September 2023. The Cape Winelands District Profile—2020 Perspective is a first-generation knowledge product to provide information and evidence to government stakeholders and also to:

- Provide an information source that, at a glance, highlights what needs to be maintained, the strengths and challenges facing the Cape Winelands District (i.e., sets the context and provides the government with an intergovernmental understanding of key development trends and patterns within the District); and
- Assist in informing catalytic or strategic projects for the Joint District and Metro Approach Implementation Plan for the longer-term development of this geographical area that is both focused and targeted, but also implementation-ready, resilient, coordinated, and integrated.

Given the above, the following strategic priorities have been identified for inclusion in the CWD JDMA Implementation Plan and approved by the District Coordinating Forum (DCF).

- Waste minimisation and management solutions
  - Regional Landfill
  - Waste Minimisation Strategies
  - Integrated Waste Management Plan
  - Waste Workshop
- Resource Resilience
  - Climate Change, Water Management and Wildfire Urban Interphase Risks
  - **Municipal Energy Resilience Programme**
- Infrastructure management and development
  - N1 Eastern by-pass
  - ESKOM Infrastructure delays (Witzenberg)
- Economic Recovery and Unemployment
  - Economic Recovery Plan - Implementation
- Urbanisation
  - Develop a guide to inform future developments
  - Monitor mega human settlement projects to inform the Guide
  - Address Land invasions
  - Provision of Basic Services for Prioritised Informal Settlements
- Community Safety
  - District Plan
  - Area-based Plan (Witzenberg)
  - SANTAM (fire and IT equipment, PPE, and smoke alarms)
- Municipal Business Sustainability
  - Financial Sustainability
  - Revenue Collection: ESKOM

- Shared Services: Development of 4 Models

- External Stakeholder involvement
- Communication and IGR
- Data governance and profile update
    - The development of a dynamic profile to inform JDMA Implementation Plan developmental priorities and projects.
- Digital Transformation Strategy.

6.7.1 The Municipal Energy Resilience Project and Small-Scale Embedded Generations

The Municipal Energy Resilience (MER) Project was developed following an amendment to Schedule 2 of the Electricity Regulation Act in 2020, allowing municipalities to generate electricity. The key objectives of the MER Project are development, support, and capacity building to implement renewable energy projects in municipalities across the province for municipalities, businesses, and households to generate, procure, and sell electricity. The project aims to secure reliable electricity supplies for the province and increase economic resilience. The project includes four approaches: creating space for small-scale embedded generation (SSEG), providing assistance in procurement processes for municipalities to source energy from independent power producers (IPPs), building a business case for utility-scale to-power generation, and finally, reforming the sector. The Stellenbosch Municipality and five other candidate municipalities are participating in the first phase of the MER Project.

This project will look at several innovative renewable energy technologies and scales, as well as cost options, the size of the investment needed, location issues, risks, municipal readiness needs, infrastructure needs, timelines for getting capacity onto the grid, transaction and procurement mechanisms, and regulatory issues.

SSEG enables solar photovoltaic (PV) systems to be grid-tied and feed in any excess electricity generated. Registering a feed-in system allows one to export excess electricity to the grid and receive credit based on the SSEG tariff. This is structured to support PV system owners while covering the cost of their electricity services.

6.7.2 Cape Winelands District Joint District Approach

The following Strategic Projects apply to the Stellenbosch municipal area:

Figure 28: Cape Winelands District Joint District Approach

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH					
Municipal Priority	**Key Initiative (s)**	**Municipalities Involved**	**Project**	**Project lead and team ((link to existing technical structures and / or projects)**	**Progress**
Provincial Priority– Growth and Jobs					
Waste minimisation and management solutions (priority project)	Waste Minimisation Strategies	All municipalities	Review of Integrated Waste Management Plan	CWDM and DEADP	All local municipalities have approved waste minimisation plans. Continued further awareness to be created.
	Establishment of a Regional Waste Management Facility	All municipalities	Regional Waste Management Facility: Conduct a section 78 investigation and implement the recommendations		Eastern side: The contractor is on site. The anticipated completion date is May 2025. Western side: The planning / discussions is in progress.
Resource Resilience	Climate Change, Biodiversity and Water Management Framework Wildfire Urban Interface: Mitigation of Risks WCG Energy Programme	All municipalities	Municipal Energy Resilience Programme	DLG, DEDAT, Stellenbosch Municipality and Drakenstein Municipality	In progress: Conversation to be set up to consolidate resource resilience aspect, including climate change, disaster management, water, and energy. Completed: Municipalities received funds to procure generators.
Economic Recovery, long term unemployment and its consequences	Address factors associated with Youth unemployment	All municipalities	Economic Recovery Plan	CWDM and all local municipalities; with WESGRO and DEDAT	LED Maturity Assessment has been finalised. Ongoing collaboration with stakeholders is necessary.
Municipal Business Sustainability	Saving costs across certain functions	All municipalities	Shared Service Model Development	CWDM and all local municipalities, DLG and IGNITE	Shared Services Models has been developed. Currently exploring further additions to the shared service project.
			Digital Transformation Strategy	CWDM and all local municipalities, DLG	This project is in progress.
Data Governance and JDMA Profile	Towards developing a Dynamic Profile and sharing data	All municipalities	Compilation of overall data governance strategy	DLG, CWDM and all local municipalities, DEADP, DotP, DSD	Municipal interface structures are being finalised. Data sharing MoUs are being drafted, with consultations underway. The CWDM Data Management Plan was developed.

IMPLEMENTATION PLAN: CAPE WINELANDS DISTRICT JOINT DISTRICT APPROACH					
Municipal Priority	**Key Initiative (s)**	**Municipalities Involved**	**Project**	**Project lead and team ((link to existing technical structures and / or projects)**	**Progress**
Provincial Priority– Growth and Jobs					
					Gaps in the 2020 profile were identified. The project is in progress.
Community Safety, Risk Reduction and improved Disaster Response	Compilation of a disaster plan	All municipalities	District Plan Area based Plan (Witzenberg)	CWDM	To be reviewed, annually.
Urbanisation	Towards a regional human settlement strategy	All municipalities	Develop a guide to inform future development	DoI, CWDM and DEA&DP	Recommended: Closing out urbanisation guide with available data and focusing on a regional human settlement strategy.
			Monitor mega Human Settlement projects (TRANSHEX, Vlakkeland and Vredebes)		This project is ongoing. Challenges: Bulk electricity and long-term planning for phase 2 of Transhex.
Infrastructure management and development	N1 Eastern bypass	Breede valley	N1 Eastern bypass	DoI and CWDM	This project is in the detailed design phase.
Agriculture	Brandvlei Storage Dam	Breede valley	Brandvlei Storage Dam: Licensing	DoA and DWS	Project is in progress.
Communications and IGR	JDAM	All municipalities	Institutionalising of the JDMA	CWDM and DLG	Ongoing awareness campaigns.
Operational Support	Compilation of Operational Support Plans	All municipalities	Operational Support Plans	CWDM	Support plans for Breede Valley and Langeberg are in progress. Support plan for Stellenbosch, Witzenberg and Drakenstein has been completed Specific projects have been elevated to JDMA level. Ongoing projects: Maintenance of infrastructure, high mass lighting and rooftop solar projects.

6.8 Agricultural Interventions

In support of the Western Cape Department of Agriculture Strategic Plan, the municipality has identified two priority interventions on which the municipality will embark in the **period 2022 – 2027**.

Table 31: Agricultural Interventions for 2022 – 2027

Project Rating					
☺	Project completed.	😐	Project in progress.	☹	Not completed / No budget available / District Function / Provincial Function

Table 32: Agricultural Interventions / Projects

Proposed Municipal Actions in Support of the Strategic Focus Areas of the Western Cape Department of Agriculture					Target and Progress Rating					Performance Comment
Priority Area	**Desired Municipal Deliverable**	**Status Quo within Municipality**	**Proposed Local Intervention (appropriate municipal action)**	**Timeframe to deliver (Short / medium / long term or ongoing)**	**2022/23**	**2023/24**	**2024/25**	**2025/26**	**2026/27**	
Farmer Support	Lease agreement for use of commonage land (e.g. Terms of the lease, roles and responsibilities of each party, preference for individual agreements, and need for longer leases)	In 2020, two (2) land parcels were identified and advertised for emerging farmers. The process is to be finalised.	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers	Medium / long term	2	2	2	2	2	In 2023/24 an item was prepared for the Council, and the four portions of land were approved and allocated to the successful applicants. In the first quarter of 2024, the Executive Mayor and a representative from the Office of the Minister conducted the official handover. The Section: Economic Development and Tourism will be advertising three (3) new portions of land during the 2024/25 financial year.
					☺	☺	n/a	n/a	n/a	
Market Access	Infrastructural development that supports agriculture development value chain and market access	Through the Municipal Agricultural Land Policy, the municipality aims to identify and allocate an additional 10 parcels of land for emerging farmers.	Ensuring vibrant, equitable and sustainable rural communities with food security for all	Medium / long term	2	2	2	2	2	
					☺	☺	n/a	n/a	n/a	

6.9 Stellenbosch Municipality Operational Support Plan

The projects listed in the table below were identified as projects / programmes / initiatives that would require assistance and funding from other spheres of government:

Table 33: Stellenbosch Municipality Operational Support Plan

Responsible Internal Department / Agency	Project / Programme / Initiative	Action(s)
Department Community Service	Climate Change Adaptation Strategy (Alien Clearing, River Management and Wildfire Management	Implementation of Alien Clearing, River Management and Wildfire Management Plans.
Department: Housing Development	Mega-human settlement project monitoring	Kayamandi Town Centre: To obtain development rights/township establishment. Jamestown: Housing (Phases 2, 3, and 4): To obtain development rights / township establishment. Erf 7001 and other possible sites for mixed-use development in Cloetesville: To obtain development rights / township establishment.
Municipality / DLG / Water Services	Stellenbosch Municipality:	Financial support is required for the development of pico hydropower units.
Stellenbosch Municipality and DLG	Resource Resilience: Municipal Energy Resilience	Financial support is required for the development of real-time management control centres.
Department: Roads, Stormwater and Transport	Stellenbosch Municipality:	Upgrading and implementing new taxi and bus stops in rural and semi-rural areas within the Stellenbosch municipal area.
Department: Roads, Stormwater and Transport	Resource Management Resilience: Water Management Resilience	Construction of sidewalks and NMT facilities in rural and semi-rural residential settlements located within the Stellenbosch Municipal area.
Department: Development Planning (Spatial Planning)	Improvements to public transport facilities in rural and semi-rural areas within the Stellenbosch Municipal area	Compilation of a Local SDF for the Adam Tas Corridor Study Area. The compilation of a Land Use Framework to develop a Development Incentive Overlay Zone (Urban Development Zone).
Department: Development Planning (Spatial Planning)	Improvements to the NMT network in rural and semi-rural residential settlements located within the Stellenbosch Municipal area	Inclusion of Klapmuts within the Cape Metro Regional Spatial Implementation Framework ("RSIF") in partnership with WCG, CoCT, Cape Winelands District, and Drakenstein Municipality, which focuses on the following themes: • Smart City Concept; • Economic Development and Job Creation; and • Cost-effective Services
Department: Development Planning (Spatial Planning)	Compilation of the Adam Tas Corridor Local Spatial Development Framework	Draft Economic Development Strategy (an Approach to Stimulate Economic Growth). • Inclusionary Housing Policy. • Jamestown Housing Project. • De Novo. • Vaaldraai. • Jonkershoek. • Erf 7001, Stellenbosch (Soekmekaar).

6.10 Gender Mainstreaming

Gender mainstreaming is the process of assessing the impact on women and men of any planned development projects, including policies and programmes. It is a strategy for making women's as well as men's concerns and experiences an integral dimension in the planning, implementation, monitoring, and evaluation of projects and programmes in all areas of governance, economics, basic services, and social spheres. The ultimate goal of gender mainstreaming in the municipality is to achieve gender equality at all levels of service delivery. The United Nations Organisation defines gender equality as equal rights, responsibilities, and opportunities for women and men. It implies that the interests, needs, and priorities of both women and men are taken into consideration in the planning, decision-making, and performance of organisational functions.

Gender mainstreaming is one of the SDGs and District Development Model (DDM) objectives. The SDG (Gaol 5) and DDM advocate that the government should aim for gender equality, empower all women and girls, and ensure inclusivity through gender-responsive budgeting based on the needs and aspirations of our people and communities at a local level. In support of the SDG and DDM objectives, the Stellenbosch Municipality aims to establish an environment that encourages gender mainstreaming interventions at the municipal level. Although priority issues identified by the different segments of the community cannot be addressed at once due to insufficient resources, the municipality is implementing interventions as a start to address gender and gender mainstreaming.

Gender mainstreaming will require the municipality to shift in organisational cultures and ways of thinking, as well as in the goals, structures, and allocation of resources. Through the IDP and in support of the SDG and DDM objectives, the Stellenbosch Municipality will make an effort to incorporate gender into each phase of planning. As a stepping stone to incorporating gender in municipal planning, it will take the form of identifying key gender indicators linked to the projects and programmes encapsulated in the 5th Generation IDP 2022 – 2027. The table below on the gender matrix is in alignment with the principles of gender mainstreaming as stipulated below:

- Gender-sensitive language;
- Gender-specific data collection and analysis;
- Equal access to and utilisation of services;
- Women and men are equally involved in decision–making; and
- Equal treatment is integrated into steering processes.

The benefits of incorporating gender outcomes into the IDP will be:

- Positive impact on individuals, organisations, and at a societal level;
- Acceleration of the implementation of Sustainable Development Goals (SDGs);
- Higher rate of growth and development;
- Improved resource management;
- Improved productivity; and
- By examining the overall situation of women and men across municipalities, a stronger analysis could provide a basis for identifying their specific needs and assessing whether certain groups of women and men could be adversely affected by development programmes and projects.

6.10.1 Gender Interventions

In terms of integrated planning and streamlining governance processes, the Department: Community Development and the Provincial Department: Social Development signed an MOU to collectively focus on various programmes with gender as one of the focal points. This includes the implementation of empowering programmes for women, reaching out to single mothers, hosting the 16 Days of Activism / Gender-Based Violence, and establishing a Gender-Based Violence Forum.

The implementation of gender-specific programmes is depicted in the table below:

Table 34: Gender-Based Interventions

Key Activity / Project / Programme / Initiative (measurable action)	Description of Unit of Measurement	Performance Comment
Establishment of the Greater Stellenbosch GBV Forum	Number of Greater Stellenbosch GBV Forums established by 30 June 2024	The GBV Forum has been established by the Department of Social Development (DSD) in the 2023/24 financial year.
Hosting of 16 days of activism event	Number of 16 days of activism events hosted by 30 November	The 16 Days of Activism event will be hosted each financial year for the period 2022 – 2027. This programme is linked to the Mayoral Outcome to create safer environments for communities. Implementation and monitoring of the programme will be on a departmental level.

6.10.2 Gender Disaggregated Matrix[1]

Disaggregating information by gender, count males and females separately when gathering information on projects and programmes. Gender-disaggregated data is important because it will assist the municipality in determining whether an initiative is successful at targeting and benefiting women and men. The indicators specify that all data about target groups and beneficiaries will be gender disaggregated.

Table 35: Gender Disaggregated Matrix

Directorate	Department	Indicator Description		5-Year Target 2022 – 2027		Target 2022/23		Target 2023/24		Target 2024/25		Target 2025/26		Target 2026/27

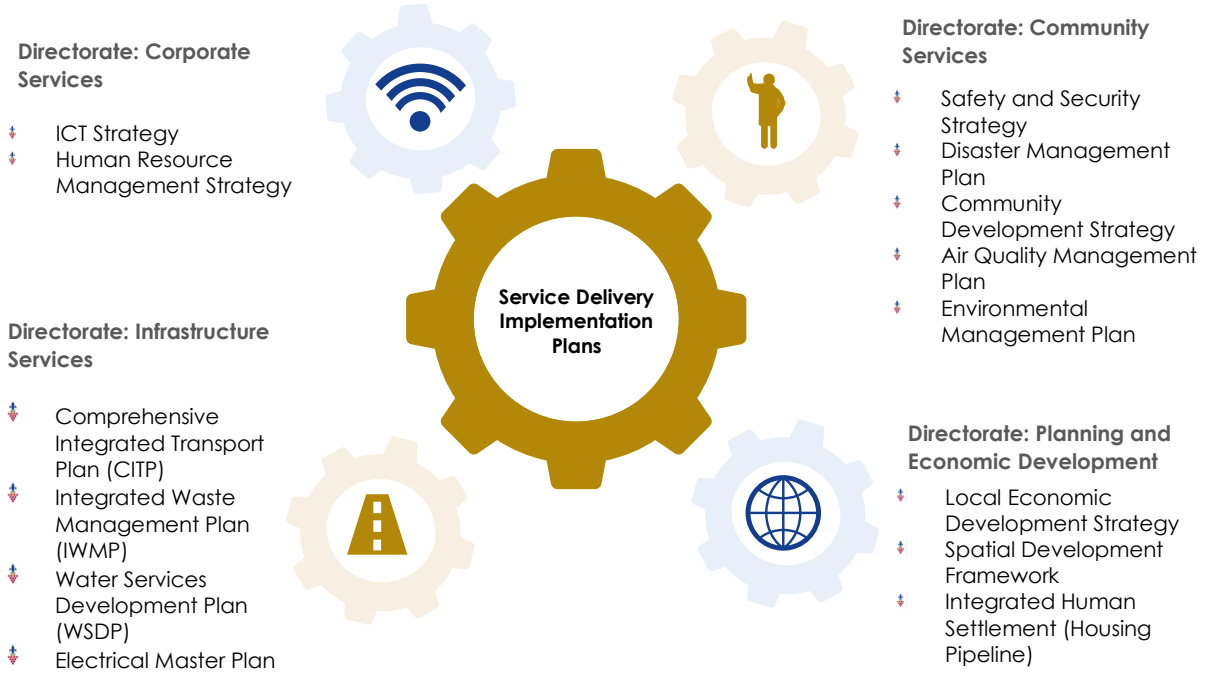
***Note**: All residents, regardless of gender, benefit from the installation of ablution facilities and water points in an informal settlement. The facilities are gender-neutral and hence 100% beneficial to all genders.*

CHAPTER 7:

Sector Plans and Implementation



7.1 Introduction

The municipality has several medium- and longer-term sector plans that direct the implementation of the different functional areas. These plans form an integral part of the Integrated Development Plan (IDP).

Although the time periods for sector plans and the IDP differ (e.g., the mSDF has a 20-year horizon, the IDP has a 5-year horizon, and sector plans can be revised annually), the IDP and sector plans inform each other mutually. Like the IDP, sector plans are subject to periodic review. Alignment between sector plans and the IDP allows for more effective budgeting integration.

Other service delivery implementation processes include:

Figure 29: **Service Delivery Implementation Plans**

7.2 The relationship between the Sector Plans and Strategies

Sector plans need to support and reinforce each other to have meaning and assist in the sustainable development of the municipal area. The table below illustrates how different key sector plans inform and direct each other.

Table 36: The relationship between sector plans

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
Municipal Spatial Development Framework (mSDF)		• Identifies areas for the satisfaction of human settlement needs. • Designates areas for developmental needs. • Indicates areas desirable for a specific nature and form of urban development. • Indicates areas desirable for conservation. • Spatially, it reflects the distribution of community facilities. • Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). • Designates housing priority / restructuring areas. • Integrates settlement patterns with infrastructure plans.	• Identifies areas for the satisfaction of human settlement needs. • Indicates areas desirable for conservation. • Spatially, it reflects the distribution of community facilities. • Identifies areas to be protected from the settlement (e.g., heritage, agriculture, and natural). • Designates housing priority / restructuring areas. • Indicates areas desirable for densification / specific land use / integrated networks. • Spatially, it reflects the Council's approved nature and form of urban development.	• Identifies municipal growth direction. • Identifies areas to be protected from development (e.g. heritage, agriculture and natural). • Identifies priority development areas. • Identifies infrastructure priority areas.
Human Settlements Plan	• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement needs. • Quantifies the extent of demand for various housing typologies.		• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement needs. • Quantifies the extent of demand for various housing typologies.	• Identifies current settlements and interventions that should be accommodated in future planning. • Determines settlement infrastructure needs. • Quantifies the extent of demand for services according to various housing typologies.
Integrated Transport Plan	• Determines the most efficient responses to transport challenges. • Identifies transport and traffic priority areas. • Shapes future planning according to the most appropriate modal changes and challenges.	• Identifies transport and road priority areas. • Determines development parameters, e.g., parking ratios, access, and standards • Shapes settlement planning according to the most appropriate modal changes and challenges.		• Determines most efficient responses to transport challenges. • Identifies transport and traffic priority areas. • Shapes future planning according to the most appropriate modal changes and challenges.

Sector Plan	Spatial Development Framework	Human Settlements Plan	Integrated Transport Plan	Infrastructure Master Plans
	• Identifies the need for services not provided by the municipality, e.g., SANRAL, Provincial Roads, PRASA, and Transnet.			
Infrastructure Master Plans	• Identifies existing infrastructure capacity / constraints. • Identifies interventions required to support growth / infill. • Designates priority infrastructure development areas / corridors. • Provides for services not provided by the municipality, e.g., Telkom, Eskom, and raw water supply.	• Identifies existing infrastructure capacity or / constraints. • Identifies interventions required to support growth / infill. • Provides for services not provided by the municipality, e.g. Telkom, Eskom, raw water supply.	• Identifies existing infrastructure capacity or / constraints. • Identifies interventions required to support growth / infill. • Provides for services not provided by the municipality, e.g., SANRAL, provincial roads, PRASA, and Transnet.	

7.3 Sector Plans and Implementation Strategies

7.3.1 Air Quality Management Plan

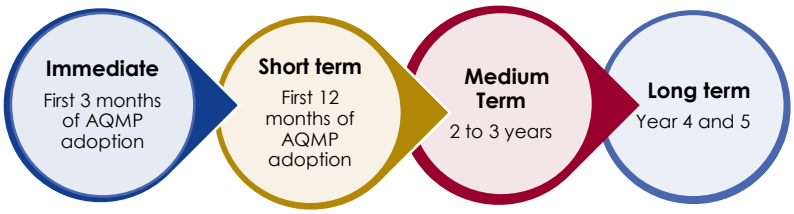
Stellenbosch Municipality's 3rd Generation Air Quality Management Plan (AQMP) has been approved by the Council in 2022. This document follows the adoption of the original document approved in 2013 and its first revision in 2018.

7.3.1.1 Vision, Mission, and Goals

Aligned with the Cape Winelands District Municipality's (CWDM) vision for air quality management, the vision for the Stellenbosch Municipality, as defined in the AQMP, is that air quality in the Stellenbosch Municipality is clean and healthy.

The mission statement for achieving the stated vision is:

Air quality in the Stellenbosch Municipality is cooperatively managed for the benefit of present and future generations according to the principles of sustainable development to safeguard health and quality of life, promoting economic and social development.



The goals to achieve the mission of the AQMP are listed below and their linkages to the Western Cape Provincial AQMP (DEA&DP, 2010) and the CWDM AQMP (CWDM, 2012) are highlighted. The three goals for the Stellenbosch Municipality AQMP are:

- **Goal 1:** Air quality governance meets the requirements to effectively implement the AQMP: This goal addresses the regulatory framework, and the institutional capacity required in the Stellenbosch Municipality to carry out the air quality function. This links directly to the goal of the AQMP for the Western Cape to 'ensure effective and consistent air quality management and the goal in the CWDM AQMP of 'effective air quality management;
- **Goal 2:** Reduce atmospheric emissions of harmful pollutants: This goal aims to manage activities that impact air quality to reduce the emissions of harmful pollutants and associated impacts on human health and well-being. This links directly to the provincial AQMP goal to 'Ensure effective and consistent compliance monitoring and enforcement and 'To ensure that health-based air quality standards are attained and continually met'. It also links to the CWDMAQMP goal of 'Effective air quality management through an 'Emission reduction strategy; and
- **Goal 3:** Systems and tools are established to effectively implement the AQMP: This goal refers to the systems and tools required for effective AQMP implementation, the cornerstone of which is an Air Quality Management System (AQMS). The development of AQMS links directly to the provincial AQMP goal, 'To ensure effective and consistent air quality management through the development of AQM systems. It also links to the CWDM AQMP goal of developing an AQMS. An AQMS is a fundamental unit in the management of air quality in an area, incorporating the necessary technical elements that provide information on the status of air quality (D: EA&DP, 2010). Included in this goal is the need for stakeholders to actively participate in AQM in the Stellenbosch Municipality, which links to the provincial AQMP goal 'To continually engage with stakeholders to raise awareness concerning air quality. It also links to the CWDM AQMP goal to 'Promote communication concerning air quality management.
- **Goal 4:** This goal aims to improve the understanding of the impact that climate change is likely to have on the municipality and to implement measures to mitigate such an impact.

7.3.1.2 Time frames

The timeframes defined for the Implementation of the AQMP are:

Figure 30: **AQMP Time frames**

The following immediate items were included in the AQMP:

Table 37: Items in AQMP

Nr.	Objective	Activity	Responsibility
1.	Sufficient capacity and competence exist to perform the air quality management function.	Identify capacity and competency needs.	Council
2.	The AQMP is included in the IDP.	Prepare air quality input for inclusion in the IDP. Ensure adequate funding in the IDP for AQMP implementation.	Air Quality Officer, Council
3.	A regulatory framework exists in the municipality for air quality management.	Develop an air quality by-law	Air Quality Officer, Council
4.	Emissions from waste burning are reduced.	Enforcement of the by-law	Air Quality Officer
5.	An Air Quality Management System exists in Stellenbosch Municipality, including an emission inventory, ambient air quality monitoring, and reporting	Prepare an annual report on progress with AQMP implementation and the state of air quality, including emissions, ambient data, and complaints.	Air Quality Officer
6.	Stakeholders participate in AQ management	Participate and provide input / comment on development planning (e.g., EIA, SDF, SEMF).	Air Quality Officer
7.	Dust management	Respond to and attend to odour and dust complaints.	Air Quality Officer
8.	Noise pollution management	Respond and attend to noise complaints.	Air Quality Officer

Stellenbosch Municipality developed an Air Quality by-law in 2018, which, together with the above AQMP, is implemented and enforced by the local Air Quality Control Officer.

Stellenbosch Municipality relies on data from the province's monitoring station situated at CWDM in Stellenbosch town to determine air quality or atmospheric emissions. This data is reported on by the relevant Environmental Health Official from CWDM.

7.3.2 Environmental Management Plan

Stellenbosch Municipality is continuously developing its capacity to protect the environment within its boundaries and to strive towards a municipality and communities that recognise the vital importance of their rich natural capital and manage these in a manner that ensures sustainability and fulfils the needs of all concerned.

To this effect, Stellenbosch Municipality has developed the Stellenbosch Environmental Management Framework (SEMF), approved by the Council as a sector plan for the Municipal Spatial Development

Framework. The SEMF is a municipal strategic environmental management policy that responds to and complies with the relevant statutes and directives.

Stellenbosch Municipality also implemented its Invasive Alien Plant Management Plan (IAP Management Plan), prepared in terms of the National Environmental Management: Biodiversity Act, 2004 (Act No. 10 of 2004), completed during the 2017/18 financial year. This document has been reviewed and adopted by the Council in 2022 and the Department of Forestry, Fisheries, and the Environment (DFFE). Stellenbosch Municipality reports annually to DFFE on the implementation of its IAP Management Plan.

The Stellenbosch Municipality owns various properties regarded as nature areas. Three of these areas have formally been designated as conservation areas. These are Mont Rochelle Nature Reserve, Jan Marais Park (a nature reserve), and Papegaaiberg Nature Reserve. The Stellenbosch Municipality is in the process of putting environmental management plans (EMPs) in place for all these areas, including areas that are not formally declared as protected areas. The status of these is as follows:

- Mont Rochelle Nature Reserve: approved by the Council in 2022;
- Papegaaiberg Nature Reserve: An approved EMP is in place and is currently up for a 5-year review;
- Jan Marais Nature Reserve: Final draft EMP prepared;
- Paradyskloof Nature Area: approved by the Council in 2019 and reviewed in 2024; and
- Ida's Valley / Botmaskop Nature Area: Approved by the Council in 2023, to be reviewed in 2027.

In 2024, Stellenbosch Municipality also drafted a Nature Reserve and Nature Area By-Law. This by-law was made public before a final draft was presented to the Council in 2025.

7.3.2.1 Implementation Plan: Environmental Management Plan

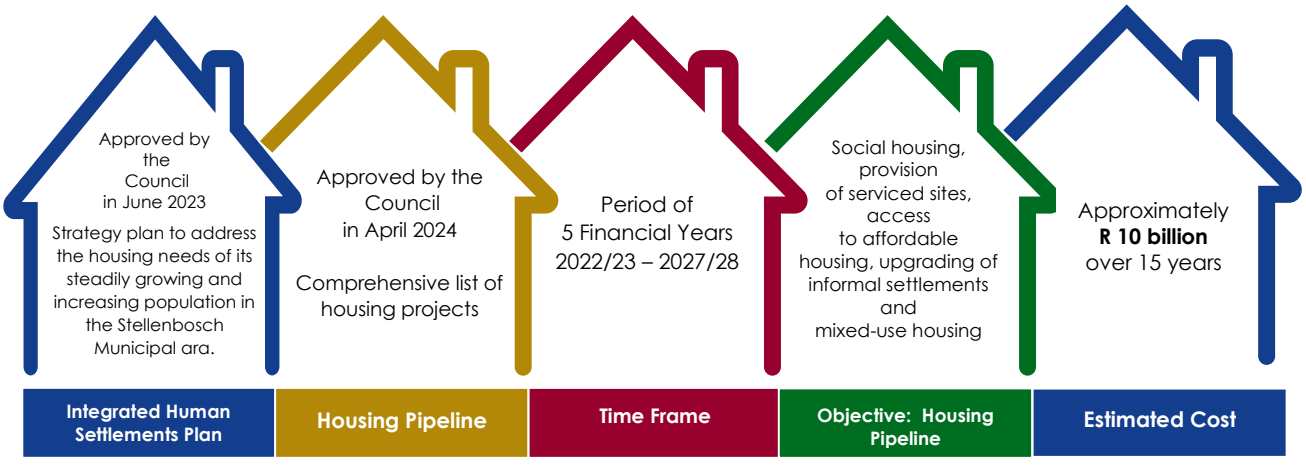
7.3.3 Integrated Human Settlement

7.3.3.1 Overview

An Integrated Human Settlement Plan (IHSP) is the road map for the provision of all forms of housing within a municipal area. This plan is closely linked to the municipal IDP and the Municipal SDF.

The aim of the Integrated Human Settlements Plan (IHSP) is therefore to:

- To outline the municipality's implementation plan for providing for the housing needs of its steadily growing and increasing population.
- To enable the municipality to prepare funding applications for submission to the Provincial Department of Infrastructure (branch Human Settlements) (PDoI) that are consistent with funding conditions and included in the municipal IDP and Housing Pipeline as per Provincial Department of Infrastructure guidelines is a requirement; and
- To inform the municipal Housing Pipeline spanning over ten years, reflected in five-year periods, the funding required in the Provincial Department of Infrastructure's Business Plan.



The IHSP will therefore not only comply with the requirements of the National Housing Act, whereby the municipality is obliged to facilitate the delivery of housing opportunities as part of their municipal function but will also develop a credible Housing Pipeline and operational models for human settlement development within the WC024.

7.3.3.2 Housing Pipeline

The PDoI requires that every municipality have a Housing Pipeline. The Housing Pipeline is premised on a **five-year horizon** and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each municipality's Housing Pipeline is an integral component of the Provincial Department of Human Settlements Business Plan.

It is required that the Housing Pipeline be reviewed annually. The latest review of the Housing Pipeline was approved by the Council in April 2024. This revision includes the following:

Figure 31: Housing Pipeline Time Frame, Objective and Estimate Cost

The objective of the Housing Pipeline is to place more emphasis on the following housing types or programmes:

- Social housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in November 2016;
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Upgrading of informal settlements; and
- Mixed-use housing (which includes formalised homeownership, especially employer housing).

The estimated cost of this programme will be approximately **R10 billion** over **15 years**.

- Upgrading of informal settlements (La Rochelle, Klapmuts, Langrug, and Franschhoek);
- Access to basic services (ABS);
- Jamestown, Farm 527 (Phases 2, 3, and 4);
- Upgrading of Zone O, Kayamandi;
- Enumeration of people on farms and backyarders;
- Erf 64, Kylemore;
- Erf 7001, Cloetesville (known as "Soek-mekaar");
- Upgrade of the Kayamandi CBD;
- Adam Tas Corridor Precinct 10 (Northern Extension); and
- Social Housing.

7.3.3.3 Upgrading of Informal Settlements

The municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- In-situ upgrading of informal settlements;
- Upgrade informal settlements through the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with the Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

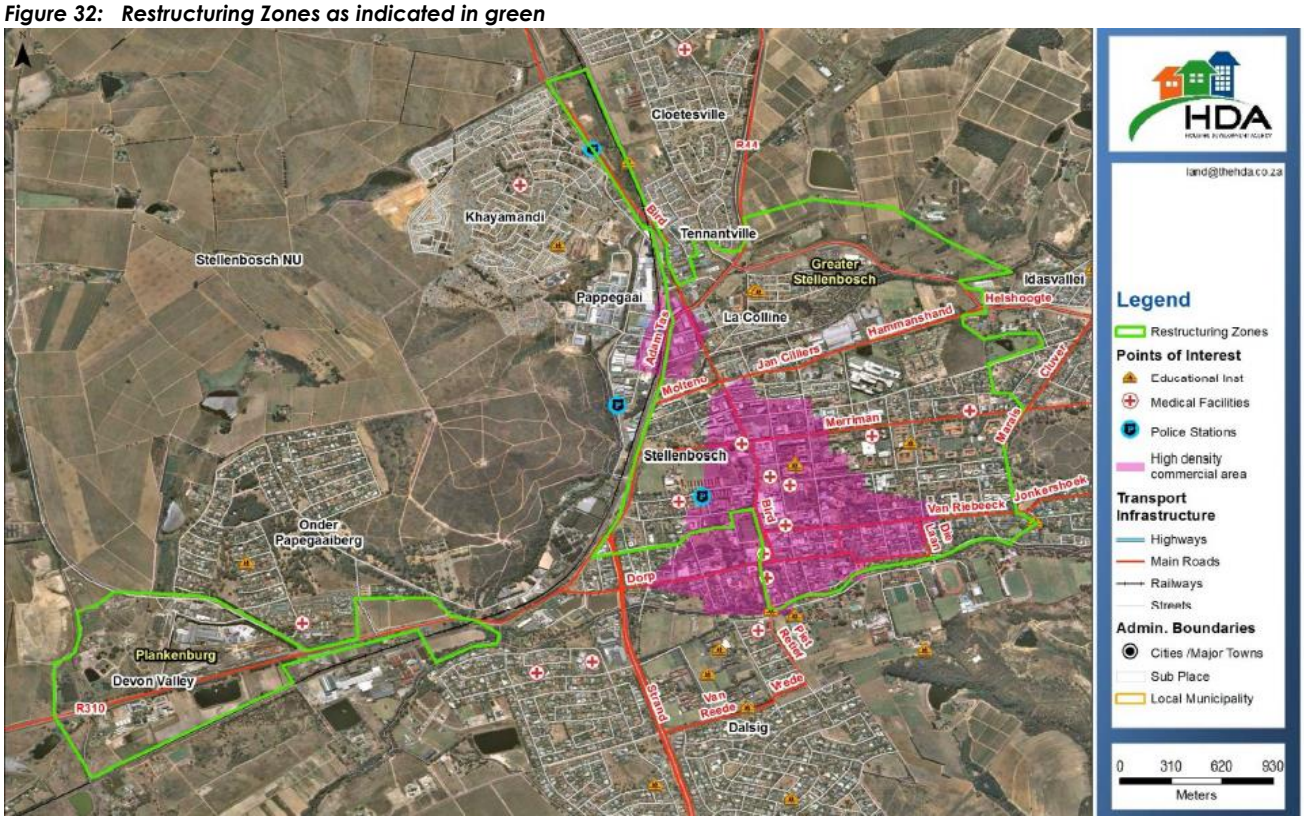
7.3.3.4 Informal Backyard Dwellings

The municipality, through the Housing Pipeline, is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database, and hopefully, this will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious, and the chance of actually obtaining a formal house is very slim. Therefore, the Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes, especially Social Housing (affordable rental).

7.3.3.5 Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017 by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the municipality, and the latter culminated in a Council decision instructing the

administration to attract social housing institutions (SHIs) and / or other development agencies (ODAs) to effect the municipality's social housing programme.



This programme aims to ensure improved quality of life for communities through a rental housing programme. This process of integration speaks to the importance of:

- Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium-density housing stock, etc.;
- Social sustainability: social integration between various income groups, access to educational, recreational, and health facilities, etc.; and
- Ecological sustainability: conservation of scarce resources.

The aim and objective of Social Housing is to offer safe and affordable rental units for families with monthly incomes ranging from R1 850 to R22 000.

The figure below depicts areas that have been declared **restructuring zones** for Stellenbosch Municipality.

Figure 32: Restructuring Zones as indicated in green

7.3.3.6 Priority Human Settlements and Housing Development Areas (PDSHDA)

In 2020, the Minister of Human Settlements gazetted the declaration of Priority Human Settlements and Housing Development Areas (PHSHDAs). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households, and overcome apartheid spatial patterns by fostering integrated urban forms.

The current status of the PHSHDA for Stellenbosch Municipality, namely:

- The "Stellenbosch Urban Core" Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazetted on **15 May 2020** (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi, and Central Stellenbosch;
- To date, the Housing Development Agency (HDA), with assistance from the Provincial Department of Infrastructure (PDoI), have undertaken a Status Quo Analysis in preparation for the drafting of the Stellenbosch PHSHDA Development Plan. The Status Quo Analysis has been completed and will inform the Development Plan drafting going forward;
- The HDA appointed Plan Associates Development Planners to prepare a Development Plan for Stellenbosch Urban Core PHSHDA (Priority Human Settlement and Housing Development Area) located within the jurisdiction of the Stellenbosch Municipality. The first inception meeting (Phase 1) took place on **15 April 2024**;
- As a first step in Phase 2 (Situational Analysis and Vision Directives), the project team will conduct a literature study and multi-sectoral situational analysis of the study area, looking at the current situation within the study area. This will include the following components:
    - An assessment of the current regional development context of the study area and focus areas.
    - An assessment of historic and contextual documentation consisting of the following:
        - National Development Plan (NDP);
        - Western Cape Provincial Spatial Development Plan;
        - Spatial Planning and Land Use Management Act (SPLUMA);
        - Western Cape Multi-Year Housing Development Plan and Business Plan;
        - Municipal Housing Sector Plan;
        - Precinct Plans;
        - Strategic Integrated Projects (SIPS);
        - Key legislative requirements;
        - Approved development rights; and
        - Identified properties falling within the Priority Housing Development Area (PHSHDA) and immediate surrounds.

It should be noted that phases 1 and 2 were completed by 30 June 2024.

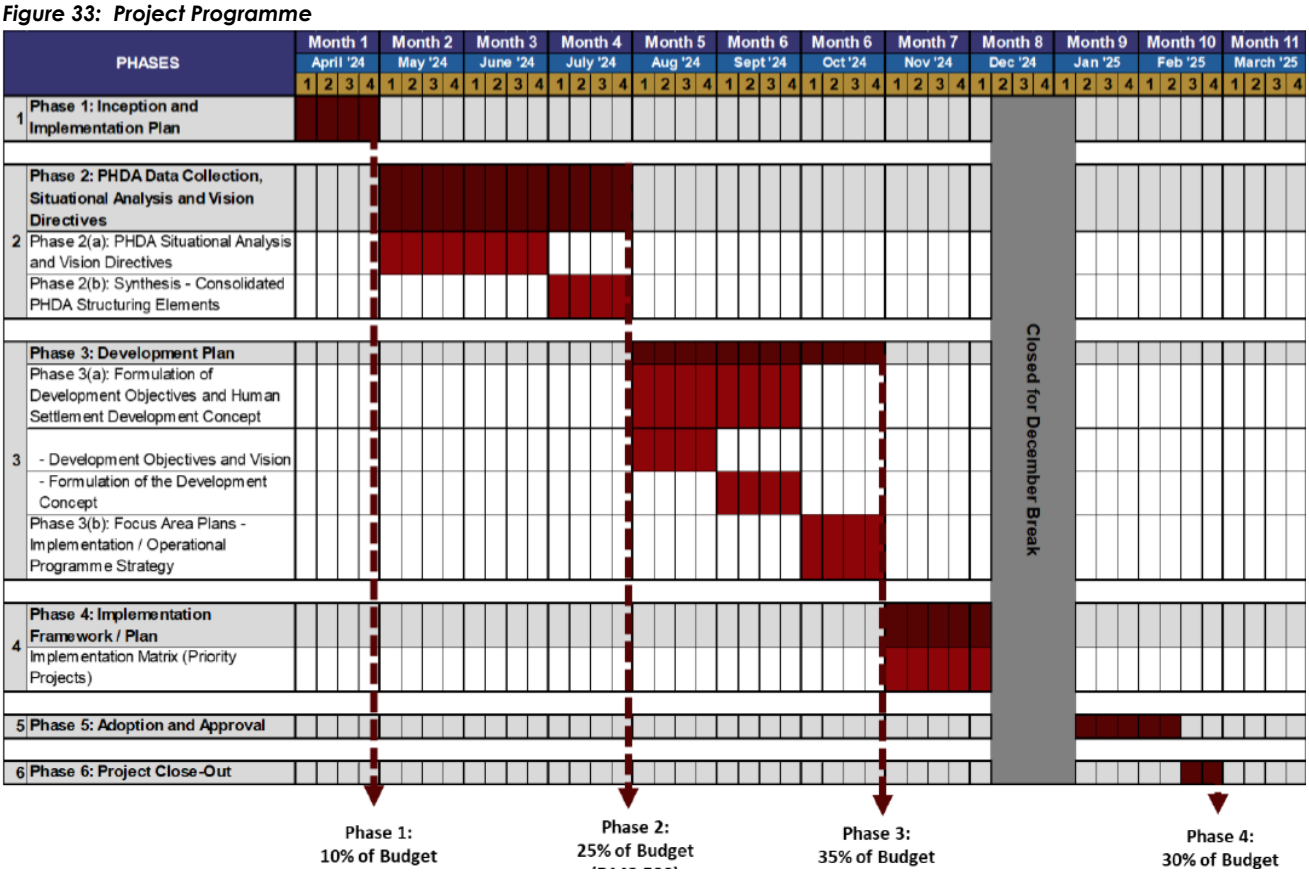
Phase 2(b) of the project involves formulating a synthesis based on the information collected as part of the situational analysis. As part of the synthesis, the project team will formulate the identified development opportunities and constraints about the study area, highlight the factors that attract business or investments to the area, and identify the factors that drive investment away from the area.

This information will be based on the technical information collected in Phase 2 and on the input received from the public during the public liaison programme. It is anticipated that Phase 2(b) would take about four weeks to complete.

The draft vision formulated in Phase 3(a) will be refined, informed by the previous phases. The objectives will strongly link to the outcome of the Situational Analysis and Synthesis and will specifically focus on the development issues, opportunities, and challenges identified to ensure that the final plan incorporates all the form-giving elements identified.

Based on the philosophy and the objectives referred to above, the project team will then design the Development Concept and the detailed Development Plan for the study area.

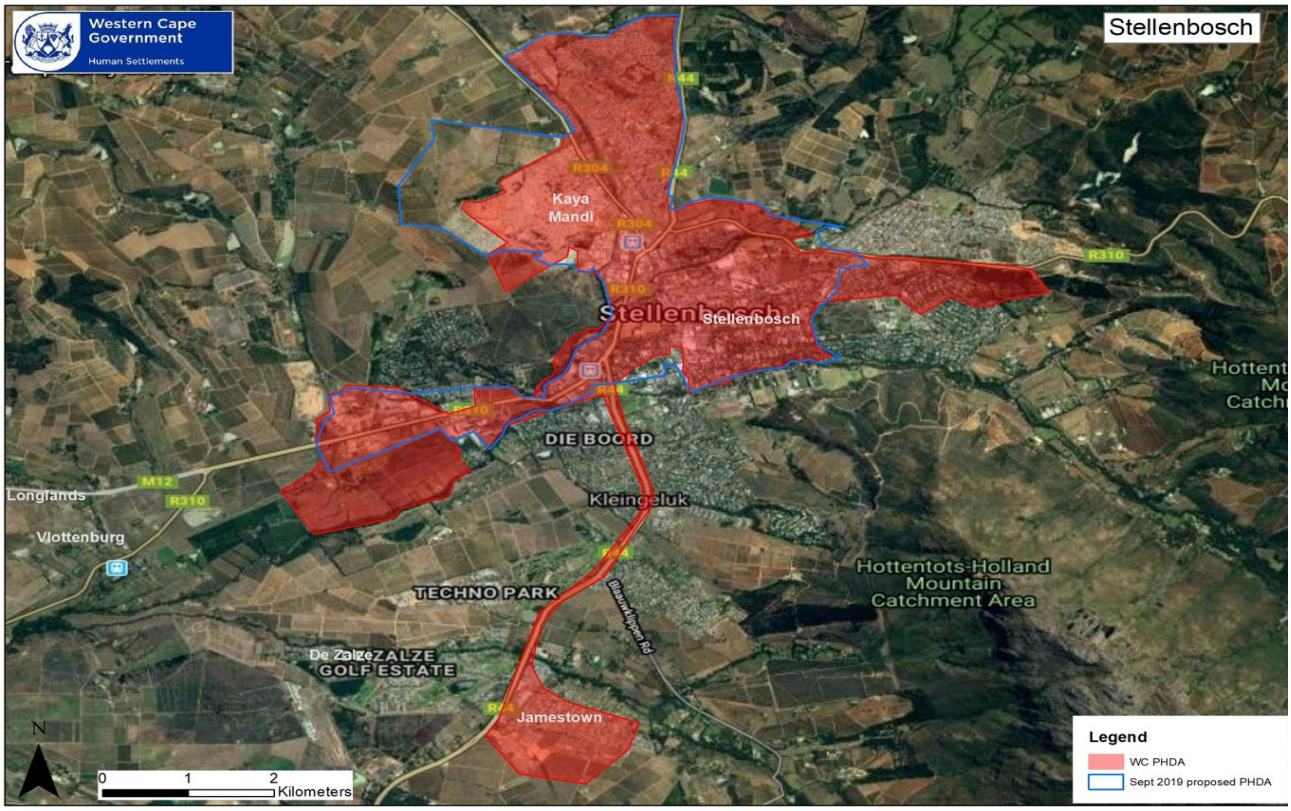
The Focus Area Plans (Phase 3b) will provide more detail on the specific areas within the overall PHSHDA Development Plan.



The implementation programme (Phase 4) will provide clear separate phases that can allow for multi-year phased implementation. A priority matrix will be included in the implementation plan to provide a guide to which projects need to be implemented in the short, medium, and long-term.

The final Development Plan (Phase 5) will be presented to the various decision-making bodies in preparation for the adoption of the plan by the Council. The PHSHDA Plan will be advertised for public input once the Council has adopted the Plan. The Stellenbosch Municipality will drive the formal public participation with the assistance of Plan Associates.

Phase 6 will consist of the submission of the close-out report.



It was agreed upon with all stakeholders that the development plan be rolled out in different phases. The project programme below illustrates the different phases in which the project will be executed and the time frames linked to each milestone.

Figure 33: Project Programme

The figure below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

Figure 34: Priority Human Settlements and Housing Development Areas (PDSHDA)

The approved Housing Pipeline is available on request at the Directorate: Planning and Economic Development, on 021 808 8758 or via email at: lester.vanstavel@stellenbosch.gov.za.

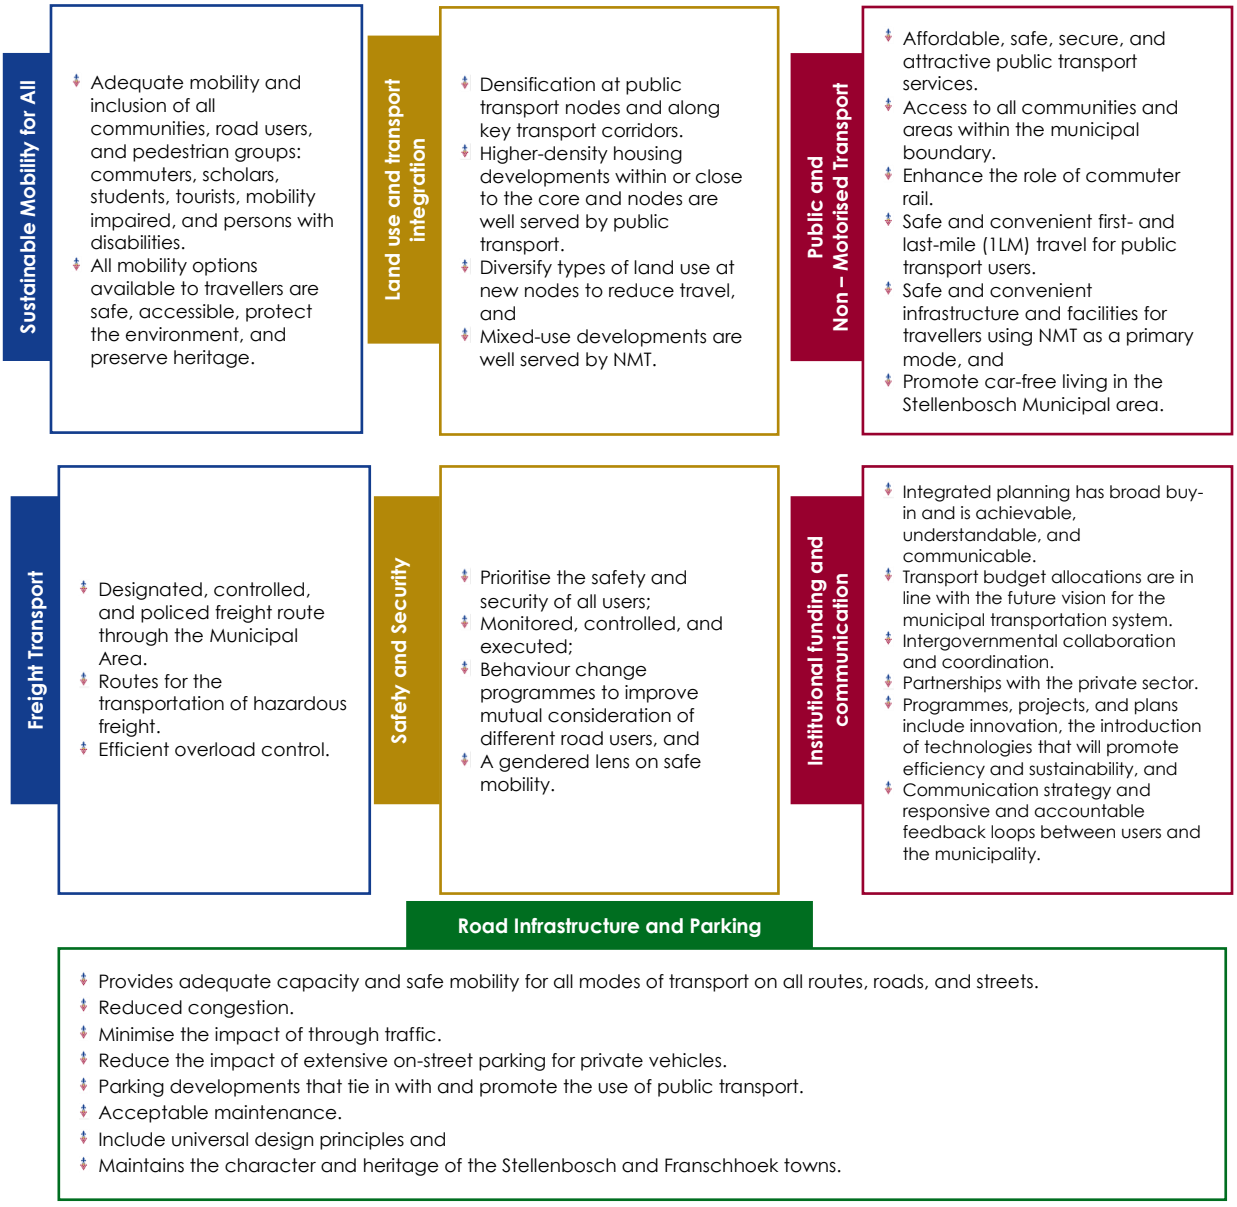
n/a* - After obtaining development rights, implementation of the project is dealt with by the Department: Project Management Unit.



7.3.4 Comprehensive Integrated Transport Plan

The National Land Transport Act, 2009 (Act No. 5 of 2009) (NLTA) requires "Type 1" planning authorities (the country's major cities and towns (including Stellenbosch Municipality)) to prepare a Comprehensive Integrated Transport Plan (CITP). Generally, a CITP is considered a mechanism by which planning authorities can plan for, develop, manage, integrate, and provide for all modes of transport in their areas of jurisdiction.

The vision for the municipality's 2023–2028 CITP is as follows: Stellenbosch Municipality has an integrated, effective, and sustainable transport system that unlocks economic opportunities and is accessible, safe, reliable, and affordable to all communities serviced by the municipality.

Pursuant to achieving the vision and addressing user needs, issues, and gaps, the objectives for the transport system for Stellenbosch Municipality over the next 5 years and beyond are as follows (Chapters 2.3 and 2.4 of the CITP):

Figure 35: Objectives for the Stellenbosch Municipality Comprehensive Integrated Transport Plan (CITP)

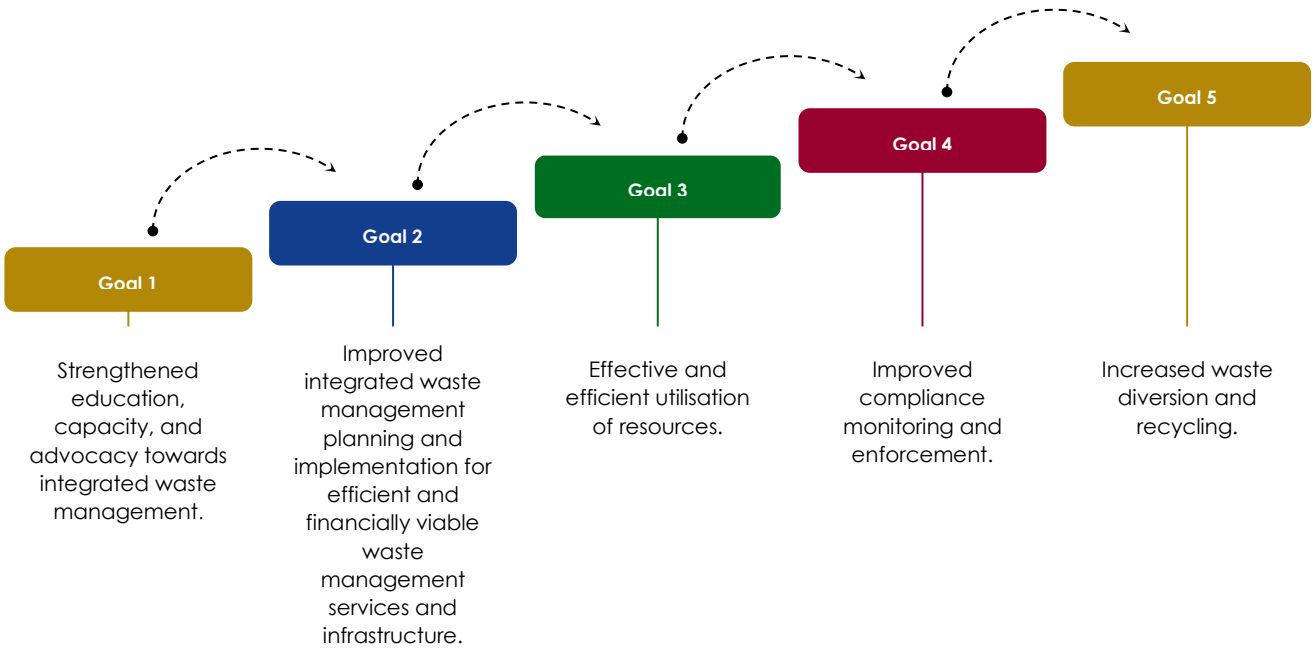
7.3.5 Integrated Waste Management Plan (IWMP)

The third-generation IWMP, developed in 2020, was replaced with the 4th Generation Integrated Waste Management Plan (IWMP) as approved by the Council in 2024.

The development of the IWMP is necessary, as it is an integral tool to identify current needs and act as a guide towards sustainable waste management. The IWMP must be incorporated as part of each municipality's Integrated Development Plan (IDP), although it is submitted as a separate document. The IWMP also indicates the alignment of its goals with the Western Cape IWMP, the District Municipality IWMP and the National Waste Management Strategy, 2020 (NWMS).

Stellenbosch Municipality's 4th Generation IWMP examined the 2023 state (Status Quo Analysis) of the solid waste management system of the Stellenbosch Municipality and provided an overview thereof. This overview includes the various aspects of, and the factors impacting the solid waste management system. These range from relevant legislation; the socioeconomic context of the Stellenbosch Municipality, waste types and quantities generated, waste management systems and infrastructure; education and awareness initiatives, and financing.



The analysis of the status quo assessment is utilised to identify the gaps and needs of Stellenbosch Municipality's waste management system. The scope also includes the formulation of goals and objectives required to address the gaps and needs. The goals and objectives are limited to implementation at the local authority level. The implementation plan to improve the waste management system and to achieve the identified goals is coupled with a monitoring and review programme to ensure the successful implementation of the IWMP. The IWMP will be implemented over the period 2024 - 2029 and will be reviewed annually.

With regular updates to this document, changing needs and progress in the waste management sector can be tracked, and strategies can be adjusted as needed.

7.3.5.1 Goals and Objectives

Five goals were identified for the Stellenbosch Municipality. The development of these goals has been informed by the previous IWMP, situational analysis, and gap and needs assessment, as follows:

Figure 36: Goals and objectives of the IWMP

7.3.5.2 Waste Management Systems and Infrastructure

The waste management division within the municipality provides the following services: collections, recycling, disposal to landfill site, wheelie bins (240 L), hiring of wheelie bins (for special events), emptying of skips, and drop-offs.

The Stellenbosch Municipality serves approximately 38 500 households with solid waste management services. The 28 751 collection points are spread across the WCO24. The refuse collection breakdown is approximately 20 000 wheelie bins and 4 000 standard refuse bags as of 2019. The refuse bins are used to collect from formal areas, while the refuse bags are used to collect from informal and farm / rural areas. The municipality utilises 11 refuse collection trucks that are operated by more than 60 crew members in a 30-hour working week.

The municipality renders an area cleaning service 5 days a week from Monday to Friday. The area cleaning staffing structure consists of 2 teams. The first team covers area cleaning for Stellenbosch, and the second team covers area cleaning for Franschhoek, Dwarsrivier, and Klapmuts.

The municipality provides a two-bag collection system in middle- to high-income areas where black bags and clear bags are collected once a week. Households are required to separate and sort waste at source into two streams, namely general landfill waste (black bags) and recyclable waste (clear bags).).

Figure 37: Waste types and waste sources addressed in the IWMP

Waste **types** addressed in the **IWMP**	Waste **sources** addressed in the **IWMP**
Domestic waste, garden waste, construction and demolition waste, household hazardous waste, and hazardous waste (including health care risk waste).	Residential; Business; Industry; Farms / rural areas; Illegal dumping; Street cleaning

7.3.5.3 Monitoring and Review of the IWMP

To ensure corrective action is taken where necessary, and that long-term strategic goals are met, it is imperative that the monitoring focuses on the short-term objectives of the IWMP. The monitoring of the IWMP also makes provision for the adjustment of the IWMP.

The effectiveness of the Stellenbosch Municipality 4th Generation IWMP will be reviewed 5 years after its implementation date. Within 3 months of the end of the 5-year IWMP implementation period, a review report of the IWMP must be documented for formal submission to the Stellenbosch Municipal Council and to the DEA&DP.

7.3.5.4 Implementation Plan: Integrated Waste Management Plan (IWMP)

Based on the gaps and needs identified, the aligned goals of the IWMP, and planned projects by the municipality, the plan contains the objectives, timeline, and resources required for the implementation of the IWMP. The gaps and needs identified are linked to the main goals contained in the Western Cape Provincial IWMP.

7.3.6 Electrical Master Plan

With the approval of the SDF in November 2019, which was almost within the time that the masterplan was due for an update, the review was not done. The complete update was planned for September 2020, but due to the COVID-19 pandemic, the updating of the masterplan was delayed.

In October 2020, the Minister of DME announced that municipalities would be allowed to purchase electricity from other sources and also generate their electricity in the future. This drastically changed the whole concept of the Stellenbosch Municipality's Masterplan. Where the municipality previously had one supplier of electricity, it would have major intake points from this one supplier. As networks flow from these points to consumers, the size of the cables will depend on the demands of these consumers for electricity. Because the municipality may now receive electricity from multiple sources, the municipal network design will no longer be compatible with this new policy. The entire masterplan must now change, as cables in certain areas may now be too big and in a few places too small. The whole system of intake points must first be established, and once that is known, the network itself must be redesigned with the knowledge of existing and future intake points and methods of energy acquisition.

To understand what the energy sources for electricity would look like, an **Energy Masterplan** has been launched and conducted by the Council for Scientific and Industrial Research (CSIR), which forms the basis for how electricity is likely to be generated or purchased. The Energy Masterplan was finalised in December 2022 and approved by the Council in March 2023, and the Electricity Masterplan was completed in June 2023 and approved by the Council in February 2024.

The plans aim to provide the Stellenbosch Municipality with a clear view and a long-term plan for the development of the electrical infrastructure required to support the envisaged demand growth in Stellenbosch and surrounding areas. The municipality also evaluated the long-term viability of existing infrastructure and the expansion and refurbishment requirements thereof, where new infrastructure should be located, and which components, either existing or new, will be required.

Apart from spatial changes, the **Electrical Masterplan** is to contain the following main elements:

- Documented assessments of primary equipment at all 66/11 kV substations and 11 kV switching substations within the municipal area;
- Site-specific assessments to provide a systematic estimate of the life remaining in substation facilities and planning to extend the life of facilities to meet future needs;
- Development of a geographical load forecast based on regional demographic and historical load growth patterns, as informed by the SDF. (The anticipated long-term load forecast was directly used as input to the expansion plan);
- Development of network strengthening and expansion options and technical evaluations to ensure that load and performance criteria are met over the short, medium, and long term (2028);
- Preparation of cost estimates for the technically viable expansion and strengthening options; and
- The Electrical Master Plan is updated every five years and is used in medium-term project planning, prioritisation, and budgeting.

7.3.7 Water Services Development Plan

As a Water Services Authority (WSA), the Stellenbosch Municipality has a duty, in terms of sections 12 and 13 of the Water Services Act, 1997 (Act No. 108 of 1997), to prepare and maintain a Water Services Development Plan (WSDP). The municipality prepared a comprehensive WSDP in 2007, 2012, and 2019 that is valid for a period of five years. The revision and updating of the WSDP commenced in the 2022/23 financial year and will be completed in the 2024/25 financial year.

The Department of Water and Sanitation is responsible for looking after South Africa's water resources. Stellenbosch Municipality's Water Services sees itself as an extension of this caretaking. Water Services is responsible for acting in line with the Water Services Act and the implementation of municipal by-laws, policies, and procedures.

As part of the WSDP package, the municipality maintains:

- Water and Sewer Master Plans;
- Water Resources Study;
- Annual water audit;
- A Water Safety Plan;
- A drinking water quality sampling programme;
- Water and sewer pipe replacement prioritisation programme; and
- A Water Demand Management (WDM) Strategy.

The Water Master Plan, Sanitation Master Plan, Bulk Water Resources / Drought Intervention Plan, Asset Register, and Pipe Replacement Prioritised Programme were updated in 2019.

A new master plan has commenced and will be completed in the 2024/25 financial year. Since water management has drastically changed with the advent of drought, the use of greywater, and the increasing cleansing of rivers, it needs to be redone. It will also align the Water Master Plan with the latest changes to the SDF.

The Water Conservation and Water Demand Management (WC and WDM) strategy is a comprehensive study that includes a 10-year financial plan. The strategy has two goals: the municipality will prioritise the implementation of WC and WDM and will ensure ongoing planning, management, monitoring, and an enabling environment. The WC and WDM initiatives include a water pipe replacement programme, an indigent domestic leak repair and meter replacement programme, a Stellenbosch water meter audit, and an in-house water services operation and maintenance programme.

Poverty reduction and improved water management are closely linked. Section 4B of the Constitution lists water and sanitation services, limited to potable water supply systems and domestic wastewater and sewerage disposal systems, as a local government function.

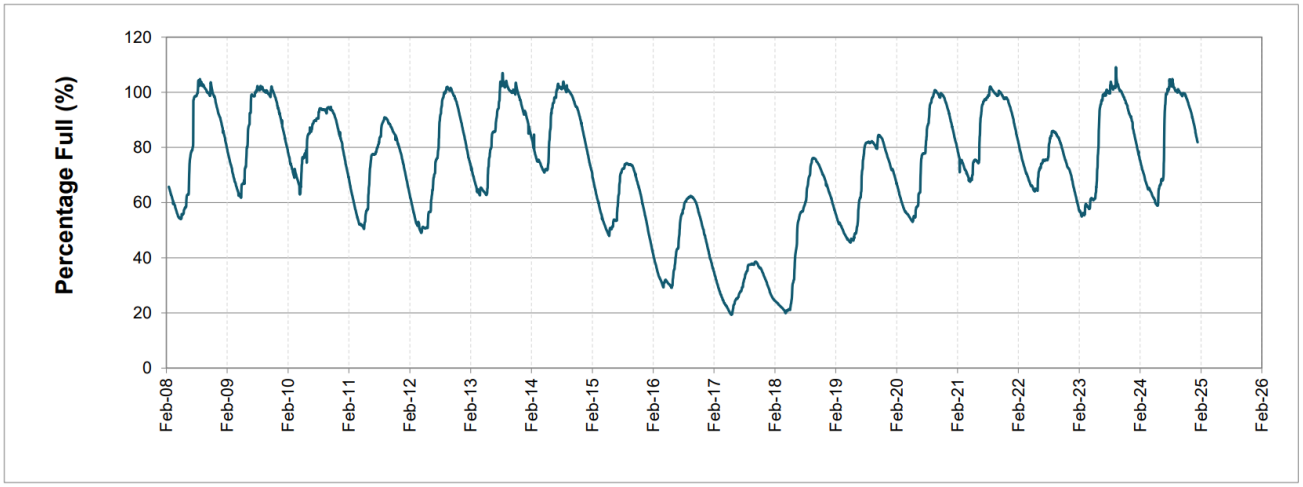
Access to basic water is defined as 25 liters of potable water per day supplied within 200 meters of a household.

Due to the severe drought experienced recently and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions that were lifted in recent years. The Western Cape has been fortunate in the last two years with above-average rainfall, and thus no water restrictions have needed to be implemented since the previous drought ended. No water restrictions are currently envisioned for the 2024/25 financial year.

Stellenbosch Municipality supplies water to its consumers through the following water supply systems:

- Stellenbosch (Jonkershoek and Theewaterskloof Tunnel);
- Franschhoek;
- Wemmershoek (treated water imported from the City of Cape Town);
- Blackheath (treated water imported from the City of Cape Town);
- Faure (treated water imported from the City of Cape Town); and
- Other sources (boreholes).

The total population supplied with water in the Stellenbosch Municipal Area amounts to approximately 186 094 residents. Water is also supplied to a fairly extensive industrial area. Emergency water is supplied to farm communities that do not get water from the farms that they stay on.



Stellenbosch Municipality manages three water treatment works, namely Ida's Valley, Paradyskloof, and Franschhoek. The potable water supply from these works amounts to 23.5 Ml/d on average, and a further 11.1 Ml/d was obtained from the City of Cape Town during the 2023/24 financial year, ensuring a supply of approximately 34.6 Ml/d to the municipal area.

Areas supplied by the Wemmershoek Water Treatment Works include half of Franschhoek town, La Motte, Wemmershoek, Pniël, Boschendal, Johannesdal, Kylemore, Lanquedoc, Klapmuts, Koelenhof, Elsenburg, Devon Valley, and Muldersvlei. Areas supplied by Blackheath water treatment works include Polkadraai, Spier, and Vlottenburg. Areas supplied by the Faure Water Treatment Works are Faure, Jamestown, De Zalze, Raithby, and Lynedoch. Although these water treatment works fall within the sphere of responsibility of the City of Cape Town, their impact on water quality and quantity needs to be monitored and considered by Stellenbosch Municipality.

Stellenbosch Municipality supplies potable water to the entire municipal area through a network and infrastructure consisting of 48 reservoirs / holding tanks, and water towers, 36 water pump stations, 44 pressure-reducing valve installations; 734 kilometers of pipeline; and 84 water supply zones. The network is fully controlled and operated by a telemetry system. The telemetry system is outdated and is currently planned for an upgrade in the following three financial years.

The bulk water input into the water network for 2023/24 was 12 623 309 kl, with an annual average daily demand of 34.584 kl/day. About 34.3% of the water supplied is purified from its water sources at the Ida's Valley and Franschhoek water treatment plants. The balance is supplied by the City of Cape Town and the Paradyskloof Water Treatment Plant, where raw water supplied by the Department of Water and Sanitation is purified. Potable water supplied by the City of Cape Town is analysed every month by the City of Cape Town.

Figure 38: WCWSS Storage Record (2008 – present)

Ida's Valley and Paradyskloof Water Treatment Works are equipped with some analytical capabilities, and routine plant analyses are performed in-house. A full water quality monitoring programme is further performed for the municipality by an accredited external laboratory / contractor. The maintenance of equipment is performed in-house and by specialist contractors.

7.3.7.1 Basic Services and Level of Services

- There is no backlog of basic water and sanitation services in the urban areas of the municipality. A small number of households on farms are still without basic water and sanitation services.
- The clinics, hospitals, and schools in the municipal area have adequate and safe water supply and sanitation services.
- All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.

- All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.
- A sustainable type of water and sanitation facility needs to be provided to the households on those farms with current services below the minimum service level standard. Stellenbosch Municipality is committed to supporting the private landowners as far as possible concerning addressing the current service backlog on farms, as identified through the Cape Winelands Rural Survey of Service Levels.
- From a water services perspective, the most significant challenges are the augmentation of the existing water sources, the replacement and upgrading of old infrastructure to accommodate development, the provision of sustainable basic services to informal settlements, and ensuring the provision of basic services to rural communities located on private farms.

7.3.7.2 Maintenance of Infrastructure

Both water infrastructure and sanitation infrastructure require serious remedial investment. About a third of the water supply infrastructure is in poor or very poor condition, and the condition backlog is more than R300 million. The bulk of the backlog is made up of the old Asbestos Cement (AC) water reticulation pipeline assets. The update to the Pipe Replacement Prioritisation study will indicate what percentage of sanitation infrastructure is in poor or very poor condition and what the condition backlog is. The bulk of the backlog consists of the old Asbestos Cement (AC) and Pic Fibre sewer reticulation assets in the Stellenbosch area.

Wastewater Treatment Works

An Infrastructure Asset Register is in place for all water and sanitation infrastructure. An Infrastructure Asset Management Plan must be developed and implemented, based on the principle of preventative maintenance to ensure that damage to assets is prevented before it occurs. Assets must be rehabilitated and / or replaced before the end of their economic life, and the necessary capital funds must be allocated for this purpose. Maintenance activities have historically been focused on reactive maintenance as opposed to preventative maintenance. The Stellenbosch Municipality has, in recent years, increased its focus on preventative maintenance, and there are early signs of a positive effect on the failure rate of equipment on treatment works.

7.3.7.3 Implementation Plan: Water Services Development Plan

7.3.8 Water Demand Management (WDM)

Stellenbosch Municipality is actively implementing their adopted WDM Strategy to reduce the current percentage of non-revenue water and to keep future water demand as low as possible. The municipality has a block-step tariff system that discourages wasteful or inefficient use of water. The restriction of water use by indigent households and non-payers was prioritised with the implementation of the Leak Repair Programme, which includes repairs to private leaks and the installation of water demand management devices. These devices restrict users to 400 litres of water per day. More than 1 753 devices have been installed, saving over 493 084 litres of water per day.

7.3.8.1 Climate Change

In terms of adapting to climate change, water systems will need to be more robust, and newer or alternative sources of supply may need to be found. Increased skills will be required from water managers, and long-term water projections are required. Although an overall decrease in rainfall is not generally forecast, increased variability in the climate and frequency of extreme events, as well as increased temperature and wind, could have an impact on water sources, particularly surface waters. It is, therefore, advisable for the municipality to maintain a conservative approach to the management of water sources, including the following actions:

- Establish assurance of the supply levels of all water sources;
- Increase assurance of the supply of water resources by ensuring that there is at least 10% additional capacity (headroom) when considering the maximum 24-hour demand in the peak month of the year;
- Do not undertake new developments unless a proper investigation of the implications for water sources and sustainability in the long term has been undertaken.
- Vigorous implementation of WDM measures, especially in terms of increased water efficiency, frequent monitoring of the water supply system from the sources to the consumers, and regular and adequate system maintenance and repairs; and
- The IRIS monitoring system, including the Blue Drop Awards system, is active in the municipality. The municipality did not receive a Blue Drop Award for the recent Blue Drop assessment period. The municipality received a No Drop score of 57% in the most recent No Drop audit per by DWS in 2023.

7.3.8.2 Level of Service

In the rural area, the responsibility lies with the landowner to manage stormwater over his land. In the urban area, the responsibility lies with the local municipality. The objective in stormwater management is to be able to accommodate a 1:5-year storm in the residential areas and 1:2 in the urban areas as contemplated in the Guideline for Human Settlements Planning and Design. The Water Act, 1998 (Act No. 36 of 1998) determines that flood lines should be indicated on development plans.

Flood line determination has been done in the past, but this information is outdated. The municipality is currently busy compiling a hydrological model to determine the latest flood lines on the rivers in Stellenbosch and Franschhoek for the urban area. It is a development condition for all future developments to do a flood-line determination.

7.3.8.3 Risk Mitigation – Drought Response Plan

Water is probably the most fundamental and indispensable of all natural resources—fundamental to life, the environment, food production, hygiene, and power generation.

Due to the threat of reoccurring droughts and the very low rainfall recorded in recent years, the municipalities in the Western Cape had to enforce water restrictions. Stellenbosch Municipality

implemented water restrictions to lower water consumption. No water restrictions are currently implemented by the Stellenbosch Municipality, and there is no indication that restrictions are needed prior to December 2025. A determination on future restrictions is normally made at the end of the rainy season.

The success of this initiative is largely dependent on the consumer's cooperation in taking ownership of the new smart meter. The use of the water demand management device (smart meter) has been implemented nationally with huge success and a reduction in water losses.

The project is currently underway and has received positive reaction from the community.

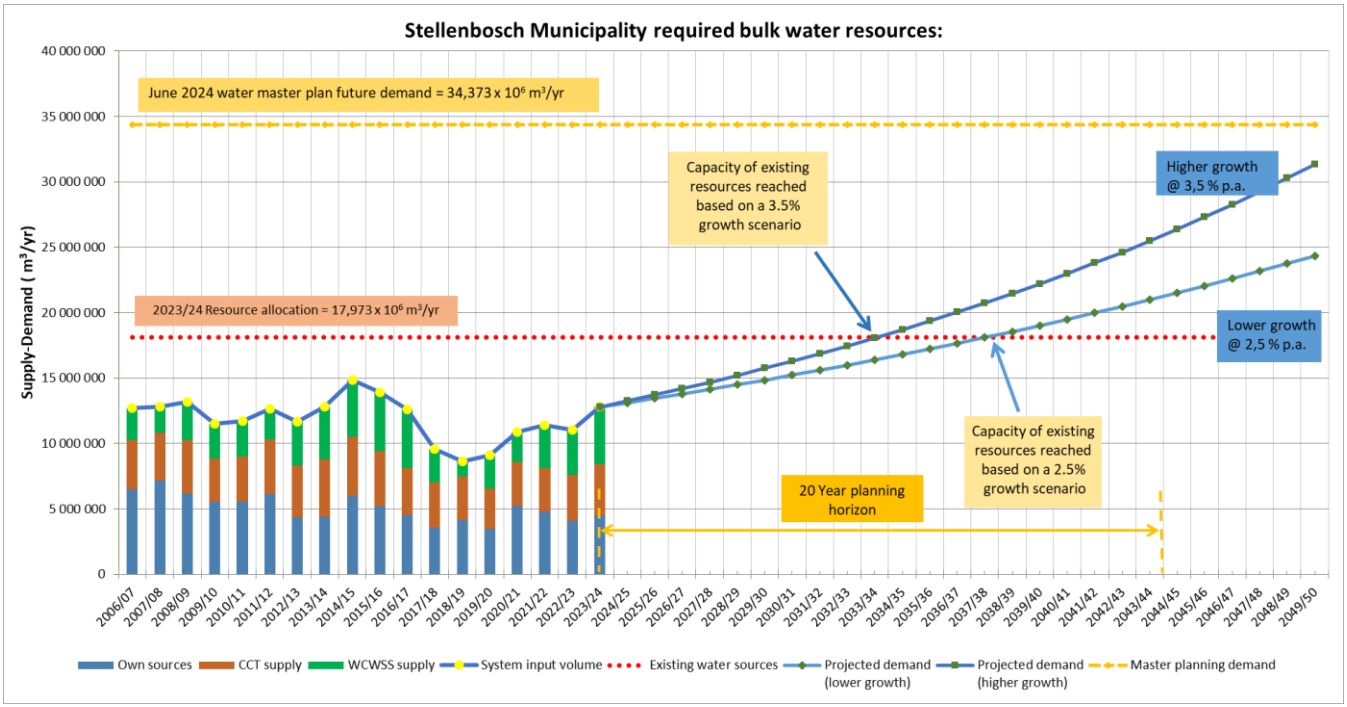
An update to the Water Services By-Laws will be undertaken in the 2024/25 financial year to be approved by the Council and promulgated. This will contribute to increasing the management and control of water and sanitation-related aspects within the municipality.

The following planning documents are continuously updated to include the latest planning: the Water Master Plan, Water Services Audit Report, and the Pipe Replacement Study and Model, and all projects and daily operations are done in line with the aforementioned studies and guidelines.

7.3.8.4 Backlogs in Water and Sanitation Services

A municipality as a Water Services Authority (WSA) has a duty to all its customers or potential customers in its area of jurisdiction to progressively ensure efficient, affordable, economical, and sustainable access to water and sanitation services to promote sustainable livelihoods and economic development. To ensure this, it is important that the backlogs within the water and sanitation infrastructure be addressed. Backlogs could be defined in three broad categories:

- Backlogs regarding access to basic water and sanitation services (basic water and sanitation services in terms of national norms and standards);
- Conditional backlogs (lack of maintenance); and
- Capacity backlogs (increase in consumers).



7.3.8.5 Backlogs – Access to Basic Levels of Services

All indigent households receive free basic water (the first six kilolitres of water) and sanitation services.

All the formal households in urban areas of the municipality are provided with water connections and waterborne sanitation facilities inside the houses (higher level of service). Communal standpipes and ablution facilities are provided in the informal areas as a temporary emergency service. Communal standpipes represent the weakest part of a network's water supply services. Standpipes are often constructed in ways that cannot withstand excessive use (and abuse) and are often neglected in terms of operation and maintenance, adversely affecting the health of their already vulnerable and poor users.

A sustainable type of water and sanitation facility needs to be provided to households with current service levels below RDP standards. Stellenbosch Municipality is committed to supporting private landowners as far as possible in addressing the current service backlog on farms.

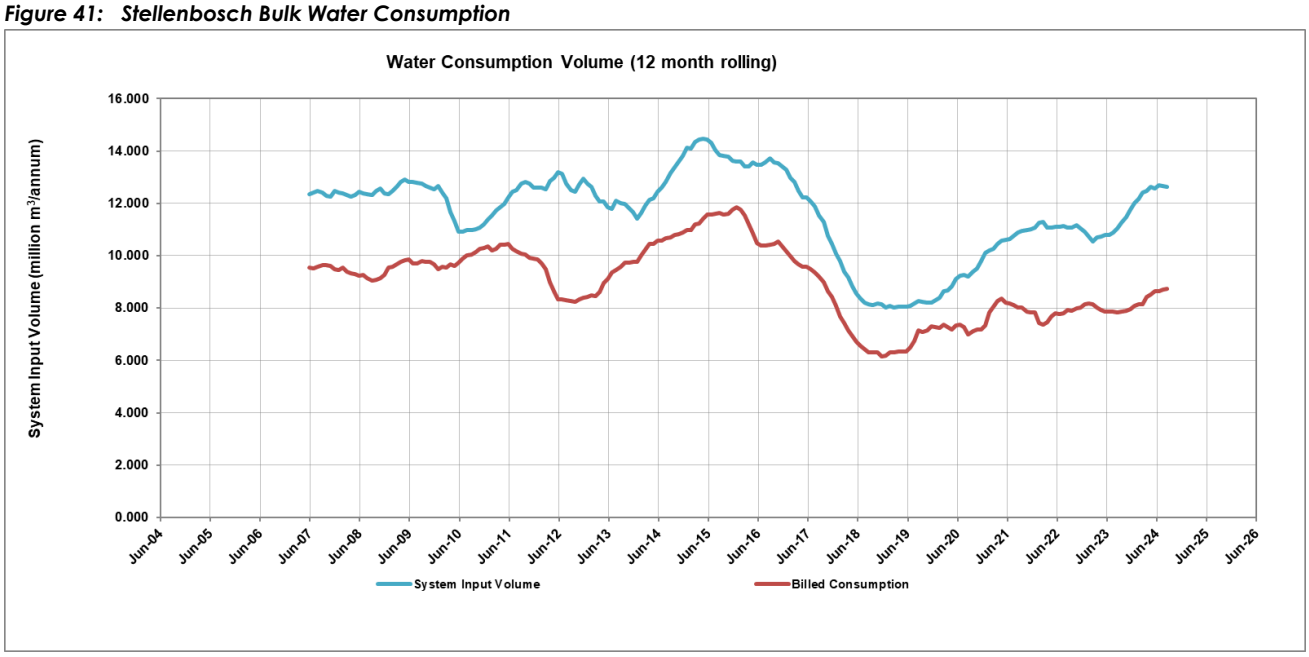
Figure 39: Water supply and accommodating growth (Total for WCO24)

Updated growth in demand: 20-year planning horizon

Detailed water balance and future water demand projection models were developed as part of the WSDP process to adequately plan for the augmentation of the existing water sources. Groundwater is now seen as a potential water source and will be investigated and evaluated after the new water resources study is completed.

Based on the municipality's IWA Water Balance Sheet for the 2023/24 financial year, the municipality recorded 31.2% for "non-revenue" water, which is an increase of 3.0% from the previous financial year, and 17.1% for real network losses. The non-revenue water for the 2023/24 financial year is 31.2%, which is above the target set of 25%. The real physical network losses are 17.1%, which is above the best practice value of 15%.

Figure 40: Water Losses from July 2022 to June 2023



System input volume (SIV): Jul 2023 to Jun 2024 ; kL (water demand in reticulation system)				**12 554 132**	**100%**
Potable water	Authorised consumption 79.4%	Revenue water 68.8%	Billed metered	8 631 963	68.8%
			Billed unmetered	0	0.0%
		Non-revenue water 31.2%	Unbilled metered	0	0.0%
			Unbilled unmetered	1 334 032	10.6%
	Water losses 20.6%		Apparent losses	439 983	3.5%
			Real network losses	2 148 154	17.1%

Non-revenue water (NRW) ; kL	**3 922 170**	**31.2%**
Real network losses ; kL	**2 148 154**	**17.1%**

7.3.8.6 Borehole Drilling in WCO24

Part of the drought mitigation plan was to manufacture and install water purification plants in the Stellenbosch Municipality water networks at strategic positions. The containerised water purification plants treat water up to SANS 241 standards before it is included in the water supply networks. This water is, however, more expensive compared to our Ida's Valley WTP supply and is not used unless necessary.

Figure 41: Stellenbosch Bulk Water Consumption

7.3.9 Long-Term Water Conservation and Water Demand Management Strategy

A comprehensive Water Conservation and Water Demand Management (WC and WDM) Strategy, which includes a 10-year financial plan, has been developed. The strategy has two goals. The municipality will:

- Prioritise the implementation of the WC and WDM Strategy; and
- Ensure ongoing planning, management, monitoring, and enabling environment.

This long-term WC and WDM Strategy was approved by the Council on Tuesday, 25 February 2014, and has since been implemented. Water Conservation and Water Demand Management (WC/WDM) are more cost-effective and have a lower environmental impact when compared with developing new sources of supply, provided there is scope for implementing WC / WDM measures. The payback period for the implementation of WC / WDM in this municipality is 3 years, which is considerably less than the 20 years that one would expect with major infrastructure projects. The updating of the long-term plan is underway.

The results of the successful implementation of the strategy are evident, with declining input volumes and lower water losses recorded since implementation started. The active Leak Repair Programme, the installation of the Water Demand Management Device, the active replacement of faulty water meters and the replacement of asbestos cement pipelines all contributed to below-average Real Network Losses and non-revenue water losses. It is, therefore, an effective way of delaying the development of infrastructure for new water resources and reducing the need to upgrade or construct new bulk water infrastructure.

WC / WDM involves measures which:

Figure 42: WC / WDM Measures

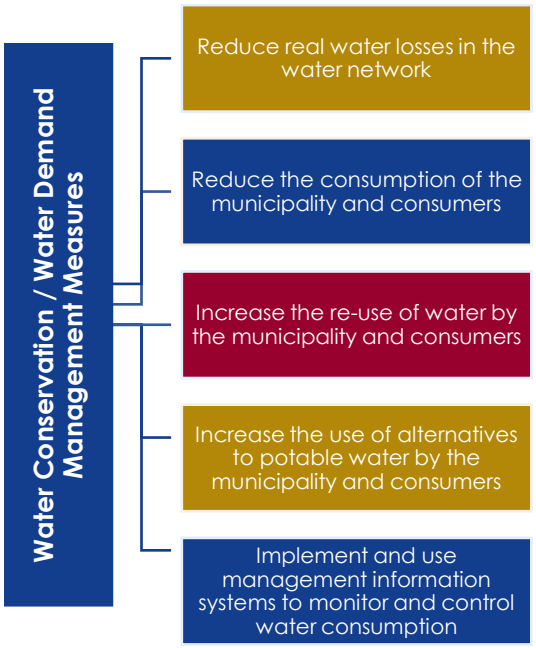


Figure 43: Stellenbosch Bulk Water input volumes

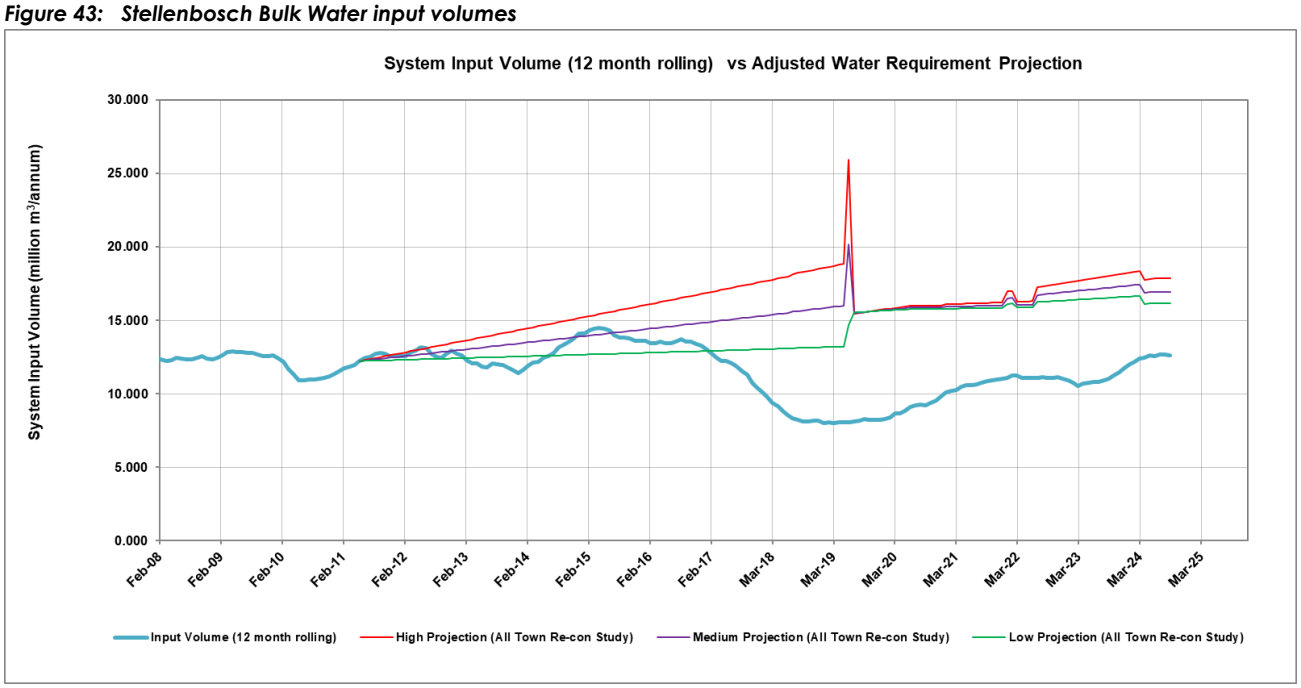

Figure 44: Stellenbosch Bulk Water Sales

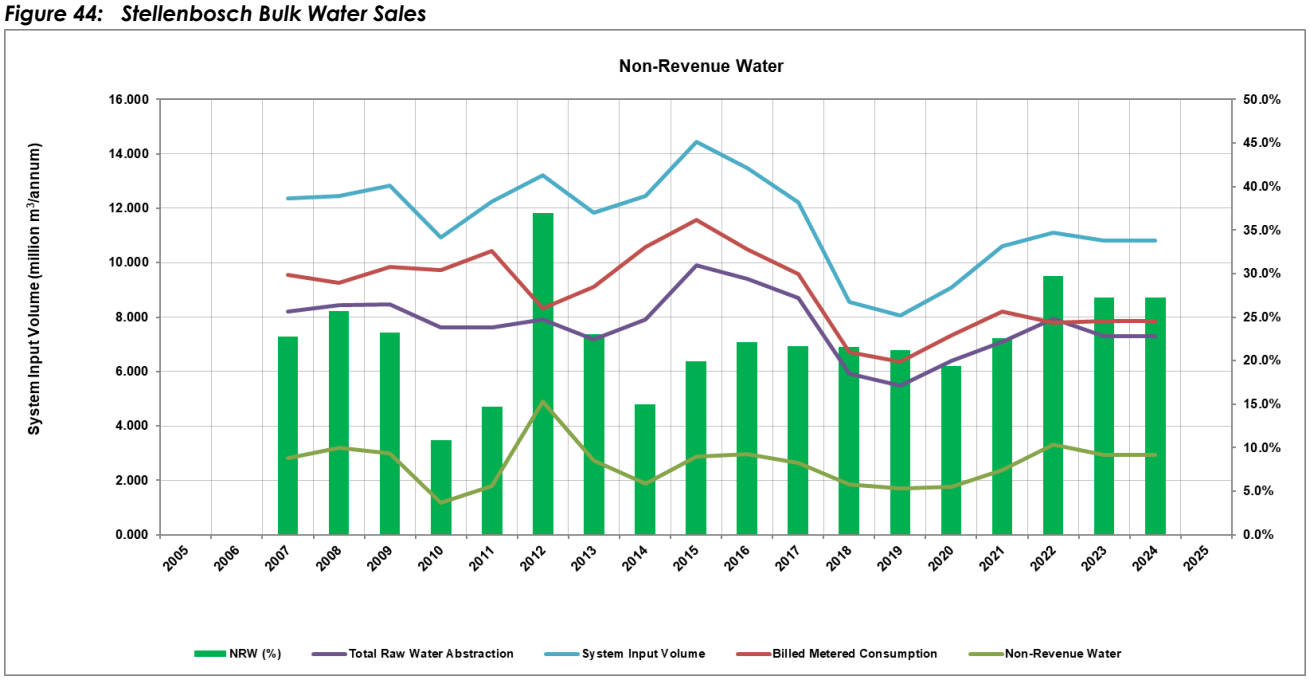

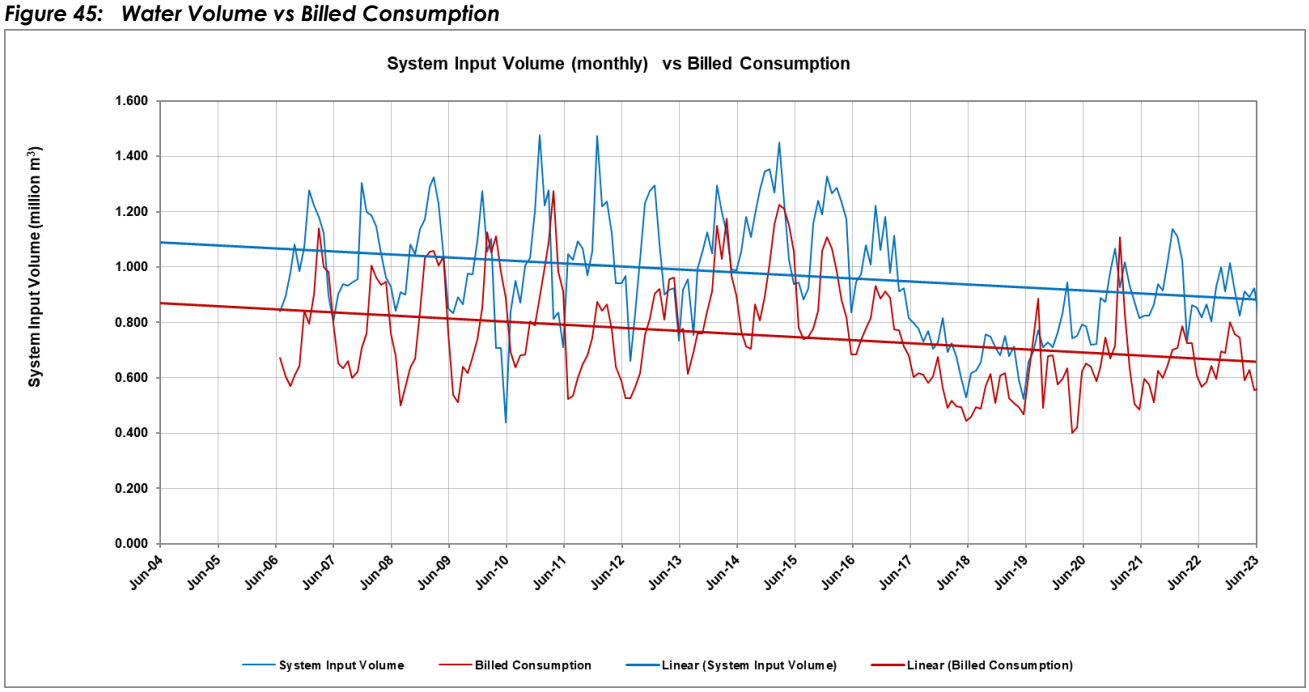

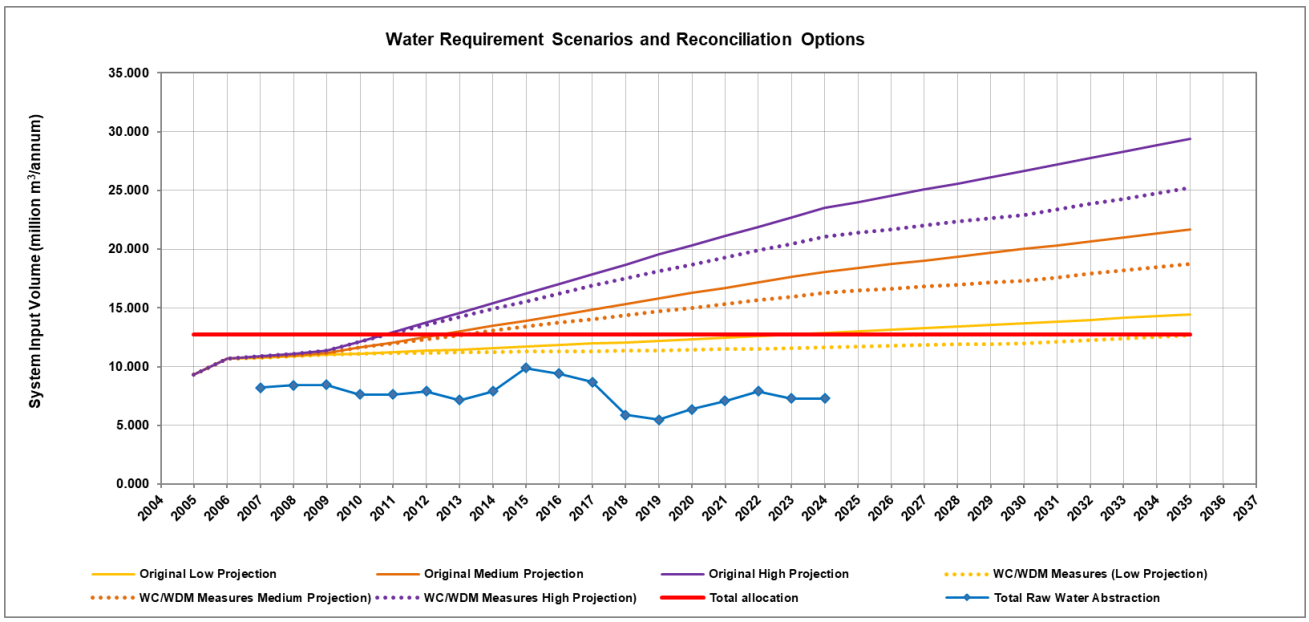

Figure 45: Water Volume vs Billed Consumption

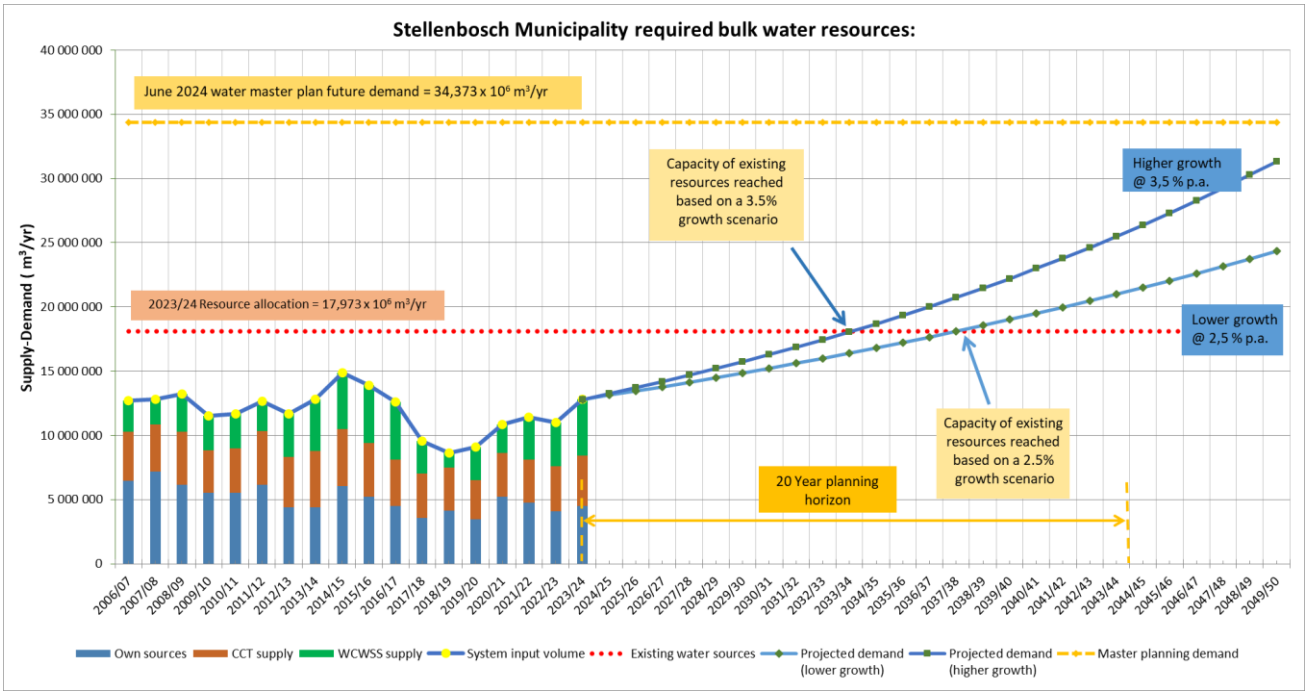
The unrestricted growth in water demand versus the growth in water demand assuming WC and WDM are implemented as shown in the figure below.

Figure 46: Unrestricted versus WDM growth in demand

Note that each town in the municipality has water supplies independent of each other. When implementing WC / WDM in the municipality, it is critical to implement it in those towns where the existing supply will become inadequate for the demand as soon as possible. This will enable the municipality to delay the implementation of expensive infrastructure. The estimated budget required is about R80 million over 10 years.

The municipality embarked on a Drought Intervention Programme that accelerated and expanded some of the WC / WDM plans and programmes.

Figure 48: Updated growth in demand 20-year planning horizon



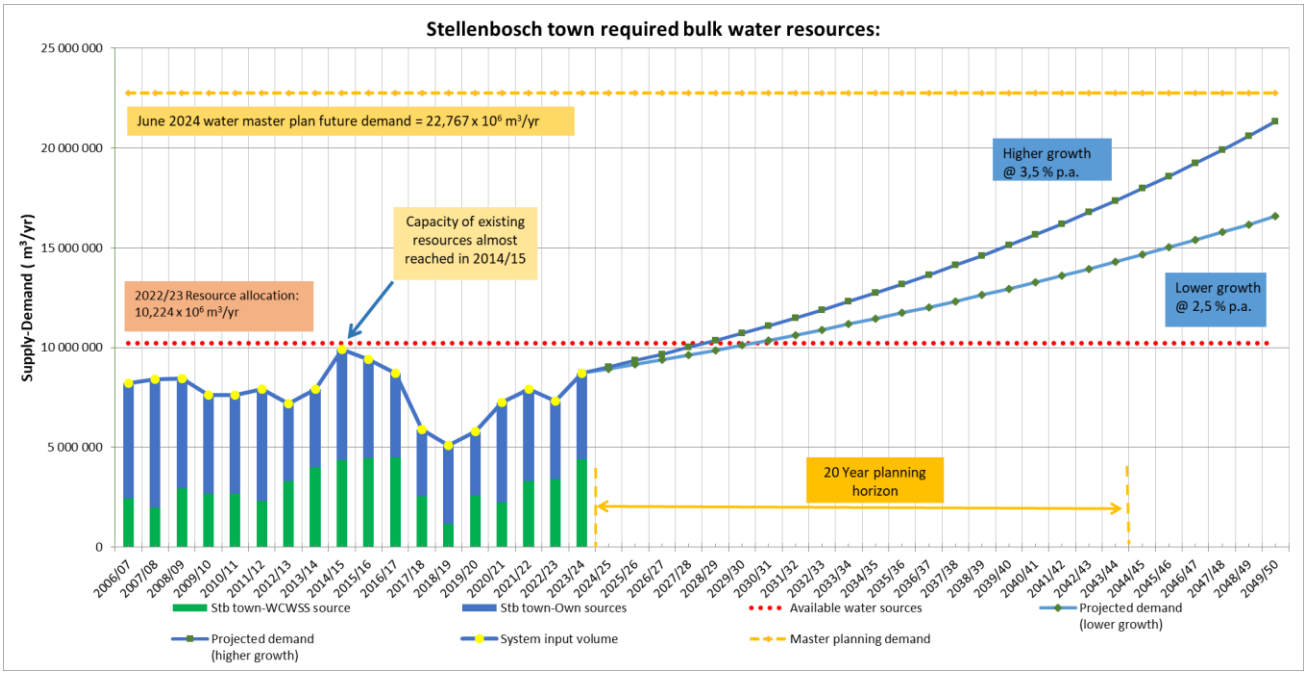


Figure 47: Bulk Water Resources

7.3.10 Safety and Security Strategy

The purpose of the Safety and Security Strategy is thus to reduce crime and increase safety through an integrated, multi-pronged approach. The strategy is revised annually to ensure that it remains relevant to the real challenges of the day. To this end, the municipality partners with a range of stakeholders, ranging from the Western Cape Government, the Cape Winelands District Municipality, SAPS, and Stellenbosch University, as well as various private, public, and community-based safety and security organisations and institutions.

The Stellenbosch Safety Partnership (SSP) serves as an operational platform for safety and security entities to plan and operationalise enforcement plans. It's very important to break down barriers between departments and private organisations that have similar goals. Without an integrated, multidisciplinary approach that includes everyone, no strategy will work. This method has been shown to work in reducing crime. The SSP is open to any registered entity that contributes towards safety and security initiatives in the Stellenbosch Municipality.

The Stellenbosch Municipality has and continues to invest in and support neighbourhood watches (NHWs) and mobilise communities to support them. This includes direct assistance to NHWs to formalise their registration with the Department of Police Oversight and Community Safety (POCS) so that they can qualify for financial support and participate in sanctioned safety projects. The NHWs form a critical part of the community-based safety focus of the municipality in that they are located in the communities and understand the particular challenges faced by those communities. In addition to the support received from POCS, the municipality continues to provide training for under-resourced neighbourhood watches and provides them with radios for swift and effective communication with the municipal control room as and when required. To achieve this, the following role players have been identified as key stakeholders and partners for success:

- South African Police Services (SAPS);
- Department of Police Oversight and Community Safety (POCS);
- Cape Winelands District Municipality (CWDM);
- Neighbourhood watches and farm watches;
- Community Policing Forums (CPFs);
- Private and corporate businesses;
- Private security companies;
- Winelands Safety Initiative (WSI);
- Department of Correctional Services (DCS);
- Department of Justice (DoJ);
- University of Stellenbosch (Campus Security); and
- Stellenbosch Municipality
  - Law Enforcement
  - Traffic Services
  - Fire and Rescue
  - Disaster Management.

Building collaborative relationships with our community stakeholders and highlighting the Council's commitment to maintaining strong partnerships with primary law enforcement agencies remains the foundation of ensuring safety throughout the Greater Stellenbosch.

The control room is fully functional and situated at the Stellenbosch Fire Department. The municipality still strives and will continue to, as part of the strategy, to provide a space where all safety and security stakeholders can jointly monitor and communicate with each other on safety and security matters. This includes the monitoring of municipal bylaw transgressions, criminal activity, emergency response in case of disasters, emergencies, and a range of other safety and security-related incidents.

One dedicated emergency number is available to residents within the municipal boundaries, which will mobilise all relevant units in response to alerts received on this number: **021 808 8999.** Additionally, the control room also monitors a dedicated WhatsApp number for general and safety complaints within the municipal boundaries of Stellenbosch. The WhatsApp number is **079 622 4722.**

All registered NHWs and security companies registered with the SSP have been and are in the process of being allocated space in the control centre.

Awareness initiatives have been and will continue to be launched as they contribute to making communities aware of crime prevention tips and other preventative tips, for example, fire safety and what to do in case of disasters. This will be a joint approach between role-players, supplemented based on crime patterns and situations experienced. Training will also be provided to enhance safety initiatives, for example, road safety (crossing of roads).

The Community Safety Forum (CSF) was approved by the Council on 30 March 2022. The CSF is a multi-stakeholder forum that will address matters of community safety and security in the WC024 area. The purpose of the CSF is to promote the development of communities in a safe environment and provide access to high-quality services at the local government level through multi-agency collaboration between the different spheres of government and communities. The CSF, as a multi-sectoral structure, would champion the coordination, integration, and implementation of crime and violence prevention and community safety initiatives. The CSF has three clusters, namely: Law Enforcement, Social Cohesion and Crime Prevention through Urban Design.

7.3.10.1 Fire Services

The Stellenbosch Municipal Fire and Rescue section is dedicated to the provision of services that seek to safeguard the public against fire and other natural and man-made disasters and emergencies.

The role of the Fire and Rescue Services is to deal proactively and reactively with the following:

- Integrated development planning towards uniform services;
- Coordination and regulation of local authority fire services, designated fire authorities, and volunteer fire associations;
- Development of specialised fire services capacity to deal with specialised fire risks prevalent in the area, such as veldfires, chemical fires, informal settlements fires, etc.;
- Development of specialised dangerous goods incident response capacity to perform incident stabilisation and perform oversight of cleaning operations;
- Development of specialised rescue services capacity focusing on the rescue disciplines prevalent in the area of jurisdiction as a priority;
- Coordination of the standardisation of infrastructure, vehicles, equipment, and operational procedures;
- Facilitation and coordination of the training and development of practitioners;
- Development and facilitation of the implementation of standardised municipal by-laws;
- Coordinate planning for the provision of fire safety and prevention;
- Development, implementation, and maintenance of mutual aid agreements amongst the local fire services, designated fire authorities, Fire Protection Associations, and volunteer fire associations;
- Development, support and implementation of community-based fire safety and prevention programmes;
- Establishment and maintenance of a District Fire Service Coordination Forum;
- Preventing the outbreak and or spread of a fire, by making arrangements amongst others for: -
    a. the provision of information, publicity, training, education, and encouragement in respect of the steps to be taken to prevent fires and death, or injury by fire.

- the giving of advice, on request, about – how to prevent fires and restrict their spread in buildings and other property; the means of escape from buildings and other property in case of fire;
- conducting regular and random fire safety inspections at any premises where the Chief Fire Officer or his or her designate deems necessary.
- providing advice on the means of escape from buildings and other property in case of fire;

- Fighting and extinguishing a fire; by making arrangements amongst others for: -
  - having sufficient staff, equipment, and vehicles at its disposal to deal with the fire risks in its area of jurisdiction – a risk-based approach.
  - the development and implementation of standard operating procedures for use during firefighting operations; and
  - call taking and dispatching facilities training for dealing with incoming calls to report fires and summoning personnel amongst others.
- Control and stabilisation of dangerous goods incidents.
- Protection of life and or property against fire or other related danger.
- Rescue of life and or property from fire or another form of entrapment.
- Rendering of emergency medical care.
- Performance of fire safety activities.
- Participation in special events planning.
- Provision of fire resilience training to fire practitioners and civil society at large.
- Maintenance of fire service equipment, infrastructure and or materials.
- Conducting fire risk assessments.
- Provision of training to fire services practitioners.
- Procurement of equipment, materials and other supplies required to perform the functions optimally.
- Provision of support in the implementation of Disaster Management Act, 2002 (Act No. 57 of 2002.
- Performance of any other function connected with any of the matters contemplated in paragraphs (m) to (v).

7.3.10.2 Disaster Management

This unit primarily performs a coordinating function and to implement measures aimed at:

- Preventing or reducing the risk of disasters;
- Mitigating the severity or consequences of disasters;
- Emergency preparedness;
- A rapid and effective response to disasters; and
- Post-disaster recovery and rehabilitation.

7.3.10.3 Traffic Services

Stellenbosch Municipality has a legislative mandate to provide traffic services to the general public and its community and to ensure safe road usage in the municipal area. Traffic Services is committed to managing, controlling, and improving road safety in the municipal area by providing effective Traffic Administration and Traffic Law Enforcement services.

This will be achieved through the implementation of specific operational activities throughout the year, which focus on enforcement and education. The enforcement of public transport violations, speed violations, and sustained education at schools will be a specific focus for this year.

Another focus is also to improve the smart policing concept by optimally utilising technology for our officers, fine devices, and other policing techniques to provide effective and efficient services at our Motor Vehicle Registration and Licensing, Driver License Testing Centre, and the Vehicle Testing Centre.

The Traffic Management Plan contains the full spectrum of road safety programmes and projects across all functions, stakeholders, and users in WC024. The plan describes the various challenges to road safety and presents a range of action plans to address or mitigate these challenges.

Traffic Services is committed to:

- Ensure the road safety of all members of the community by providing quality traffic services in all its divisions (Traffic Administration, Traffic Law Enforcement, Licensing, Education, and Accident Statistics);
- Reducing the accident rate, which will result in fewer fatalities and injuries;
- Increase the voluntary compliance of road users with respect to the rules, legislation, and regulations of the road;
- Improve management practices throughout all traffic services divisions; and
- Provide a safe environment by integrating best practices with internal and external agencies and role players.

Traffic Services will focus on:

- Ensure the constant free flow of traffic;
- Enforcement of the National Road Traffic Act and the National Land Transport Act;
- To achieve a measurable improvement in road user behaviour, including the skill level of drivers, safer decision-making, and better regard for other road users;
- To reduce the incidence of traffic offences, including speeding, dangerous driving, drunk driving, driving under the influence of a narcotic substance, dangerous overtaking, moving violations, etc.;
- Parking enforcement / management;
- To ensure that un-roadworthy (including overloaded) vehicles are removed from the road;
- Point duty during the morning, midday, and evening peak at critical locations, during loadshedding, as well as school points;
- Special operations team to focus on driving under the influence of alcohol or drugs, illegal racing, and transportation of illegal substances;
- Road safety training and education are provided for crèches, nurseries, schools, primary / high schools, colleges, and universities, as well as for pedestrians, cyclists, farm workers, rehabilitation centres and youth groups. Training also includes learner's license programmes for youth and scholar patrol and level-crossing awareness;
- Events (road closures, escort duties);
- Public transport activities and checking of roadworthy status buses and minibuses;
- ANPR (automatic number-plate recognition) focusing on offenders with outstanding fines;
- Conducting driving and learner's license testing;
- Conducting driver's license conversions / renewals;
- Accepting and processing Professional Driving Permit (PrDP) applications;
- Vehicle registration and licensing;
- Ensure effective court section functioning with the assistance of the appointed external service provider to process all notices; and
- Sound financial management of the court section.

7.3.10.4 Law Enforcement

With the review of the Safety Strategy, the municipality has had to adapt to the changing environment of crime in its area and actively pursue closer working relationships with SAPS, private security, and neighbourhood watches active in the WC024 area to be able to make an impact. It is common knowledge that criminals become smarter and migrate from neighbourhood municipalities, which means that the municipality has to think smarter to always be one step ahead.

The municipality has completed all three phases of the action plan as identified during the previous review. This includes the installation of License Plate Recognition cameras (LPR) at all the main entrances and exits to Stellenbosch and Franschhoek towns. These LPR cameras are supplemented with additional LPR cameras within residential areas, which make it possible to track the direction of suspect vehicles linked to crimes picked up by these. The municipality continuously invests in CCTV to enhance safety. The municipality also has a CCTV Masterplan, which is a ''living'' document and is frequently updated based on needs identified concerning safety.

The use of neighbourhood watches to enhance public safety within the CBDs under the auspice of the "eyes and ears" project has assisted with crime prevention and is deemed to be a successful project.

7.3.10.5 The focus of Law Enforcement

- Effective monitoring and surveillance of CCTV cameras with reaction units to respond immediately;
- Establishment and implementation of the CBD Safety Project—a zero-tolerance approach;
- Weekly operational planning with SAPS and safety partners;
- Amendment of the structure of Law Enforcement to accommodate identified needs;
- Establishment of a Tactical Response Unit (TRU);
- Strengthening coordination of communication strategies between neighbouring municipalities;
- Social Crime Prevention Strategies in conjunction with the Section: Community Development in terms of the Council's Street People Policy and Social Justice SOP;
- Consult with the CWDM in terms of sharing resources and information flow;
- Use of innovative technology to improve enforcement strategies;
- Compile a Security and Safety Camera Master Plan for WC024;
- Issuing of radios to all neighbourhood watches to be able to communicate with and through the Stellenbosch Municipality control room (JOC);
- Provide training to neighbourhood watches;
- Implementation of the externally funded Law Enforcement (Rent-a-Cop) Policy; and
- Implementation of the Reservist policy.

7.3.11 Disaster Management Plan

The National Disaster Management Centre (NDMC) provided a set of guidelines, developed in terms of Section 19(a) of the Disaster Management Act, 2002 (Act No. 57 of 2002) (DMA) and Section 3.6 of the National Disaster Management Framework, 2005 (NDMF), that provide a uniform structure and checklist to organs of state to develop a Disaster Management Plan.

This plan confirms the arrangements for managing disaster risks and for preparing for and responding to disasters within the Greater Stellenbosch Municipality as required by the Disaster Management Act, 2002 (Act 57 of 2002).

SECTION 53(1) DISASTER MANAGEMENT ACT, 2002 (ACT NO. 57 OF 2002)

a) Prepare a disaster management plan for its area according to the circumstances prevailing in the area;
b) Coordinate and align the implementation of its plan with those of other organs of state and institutional role-players; and
c) Regularly review and update its plan, and through appropriate mechanisms, processes, and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.

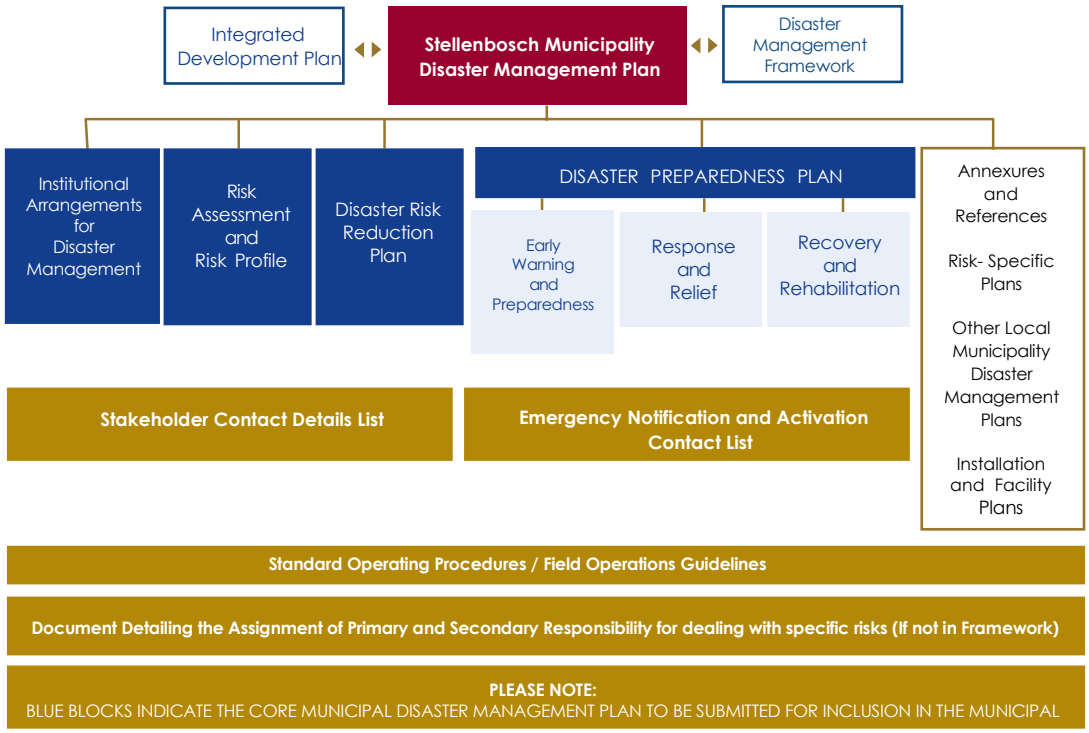
7.3.11.1 The Key Outcome of the Disaster Management Plan

The Disaster Management Plan (DMP) is reviewed annually and:

- anticipates the types of disasters that are likely to occur in its area of jurisdiction and their possible effect;
- places emphasis on measures that reduce the vulnerability of disaster-prone areas, communities, and households at risk;
- promotes disaster management research;
- identifies and addresses weaknesses in capacity to deal with disasters;
- provides for appropriate prevention and mitigation strategies;
- facilitates a rapid and effective response to disaster; and
- Post-disaster recovery and rehabilitation.

7.3.11.2 Linkage to Stellenbosch Municipality's IDP

The MSA and the Disaster Management Act require the inclusion of the Disaster Management Plan into the Integrated Development Plan (IDP) of the Stellenbosch Municipality as a core component of the IDP document. However, it is not practical to include the entire Disaster Management Plan with annexures within the IDP of the Stellenbosch Municipality. Therefore, a summary of the key points is encapsulated in the IDP.



7.3.11.3 Linkage to the Disaster Management Framework of the CWDM

The Stellenbosch Municipality must prepare and execute its Disaster Management Plan within the Disaster Management Framework of the Cape Winelands District Municipality. The National, Western Cape Provincial, and Cape Winelands' frameworks guide the development of the municipal Disaster Management Plan and future versions of this plan.

7.3.11.4 Structure of the Disaster Management Plan

The municipal Disaster Management Plan of Stellenbosch Municipality consists of the components as indicated in the figure below:

Figure 49: Structure of Disaster Management Plan

7.3.11.5 The Purpose of the Stellenbosch Municipality Disaster Management

The purpose of Stellenbosch Municipality Disaster Management is to ensure coordination of multi-disciplinary and multi-sectorial risk reduction through the integrated institutional capacity for disaster risk management, risk assessment, response and recovery, and implementation of measures aimed at:

- Preventing or reducing the risk of disasters;
- Mitigating the severity or consequences of disasters;
- Emergency preparedness;
- Rapid and effective response to disasters; and
- Post-disaster recovery and rehabilitation.

7.3.11.6 IDP and Disaster Management Plan Integration

Table 48: IDP and Disaster Management Plan Integration

Integrated Development Plan (IDP)	Disaster Management Integration
Phase 1: Analysis	**Phase 1: Analysis**
Compilation and reconciliation of the following: - Existing information on what is available in terms of development. - Community and stakeholder analysis—who should be consulted. - Municipal-wide analysis in terms of spatial development, gender, environment, and economic	Compile disaster management information by means of: - Doing a hazard assessment (ward-based). - Communities at risk of a particular hazard.

Integrated Development Plan (IDP)	Disaster Management Integration
and institutional analysis. • The municipality must also determine what the current prevailing trends are concerning the aforementioned. The outcome of the analysis should result in the formulation of priorities, and it should also conduct an in-depth analysis of these priority issues.	
Phase 2: Strategy	**Phase 2: Strategy**
This involves the following: 1. The vision and mission of the municipality. 2. Strategic objectives as set out in Phase 1. 3. Localised strategic guidelines such as: • Spatial planning; • Poverty and gender; • Environmental; • Economic; • Institutional; and • Development of strategy for each priority issue.	1. This involves the formulation of disaster strategies such as: • Prevention and mitigation strategies; • Vulnerability reduction strategies; • Capacity building; • Contingency building; and • Emergency preparedness. 2. Operationalised disaster management in the municipality by means of identifying projects such as setting up the relevant structures • Creating community awareness • Establishing volunteer structures (DM act, no 57 of 2002, section 53.1 (a-d), section 53.2 (a)) Completed by 30 October 2021 Responsible official: Manager, Fire and Disaster
Phase 3: Projects	**Phase 3: Projects**
• This phase deals with processes involving project design. • The identified projects are a result of a consultative process followed and must be in terms of the specifications required.	1. This phase deals with the design of disaster management projects. 2. Whatever projects identified by disaster management must be listed here. (DM act, no 57 of 2002, section 53.1 (a-d), section 53.2 (a)) Completed by 30 December 2022 Responsible official: Manager, Fire and Disaster
Phase 4: Integration	**Phase 4: Integration**
This phase deals with the compilation of integrated plans and programmes developed such as: • All sector programmes / plans • The five-year financial plan • Five-year capital investment programmes • Five-year action programmes • Integrated spatial development programmes • Integrated local economic development programme • Integrated environmental programme • Integrated poverty alleviation programme • Institutional plan • Integrated HIV plan • Development and performance management indicators • Disaster Management Plan	Compilation of Disaster Management Plan including the following: • The risk profile of the municipality • The risk reduction strategy • Disaster response strategy • Field operation guides • SOPs • Emergency preparedness • Electronic database • Communicators (DM act, no 57 of 2002, section 53.1 (a-d), section 53.2 (a)) Completed by 28 February 2022 Responsible official: Manager, Fire and Disaster

7.3.11.7 Implementation Plan: Disaster Management

7.3.12 Local Economic Development Strategy

Local Economic Development (LED) is not an explicit municipal function as defined in the Constitution of the Republic of South Africa, 1996. Instead, it is an obligation imposed on local government in terms of sections 152 and 153 of the Constitution that stipulates the objectives of local government are to promote social and economic development within its financial and administrative capacity.

Stellenbosch Municipality is thus legally compelled to promote social and economic development in its area of jurisdiction and should play the leading role in municipal sector planning.

The focus on individual economic sectors and spatial planning as the key focus areas, rather than on social and economic development results, tends to delink economic growth benefits (an increase in indicators like GDP, per capita income, etc.) from local economic development benefits (an improvement in the life expectancy rate, infant mortality rate, literacy rate, and poverty rate).

Local economic development is the means of systematic identification, development, and utilisation of economic opportunity to benefit local businesses and create opportunities for local communities to improve the lives of residents.

The growth of the informal economy reduces the demand for jobs while increasing the number of entrepreneurs and potential contributors to private sector demand.

The health of the entire economy is important. The economy is not neatly divided into the "formal" and "informal" sectors. Rather, the different sectors, such as manufacturing, tourism, services, and construction, are on a continuum that has a more formal and a more informal end.

The great challenge to local government, in its support for economic development, is to enable job opportunities at different points along the continuum while ensuring health and safety, orderly planning, and management. All work, whether on the more formal or more informal ends of the continuum, has to be valued, especially when unemployment is high and when there is a highly probable link between unemployment and crime. The number of people relying on the informal economy for work can and will increase while the formal economy struggles to grow and make meaningful progress in global markets.

Given the above, local economic development is therefore a multi-stakeholder effort in support of creating economic opportunities for both the private sector and the local community.

7.3.12.1 Strategic approach

The strategic approach to LED in general is to create economic opportunities for all citizens residing in the Stellenbosch Municipal Area. It is imperative that the municipality, in partnership with role players in society, review its strategy going forward to ensure better resilience in its economy to deal with future challenges and contribute towards better livelihoods for all.

Technology changes, especially connectivity, have become more important for businesses and the government to do business. This was highlighted by the lockdown experience that forced the municipalities to work remotely.

The following ways of doing business must be seen within the context of the “new normal”:

- To maximise prospects for sustained economic growth, stakeholders must be permitted to strengthen their competitiveness and collaboration within the local business environment.

Networking, local government responsiveness to business needs, effective service delivery, and business-oriented organisational structuring will be used to address this aspect;

- New business development or investment and expansion of existing businesses will be actively promoted, as the consequence of increased investment more often than not results in new jobs and local economic growth. Spatial development framework planning, the Integrated Zoning Scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect;
- It appears that the formal economy is rapidly becoming more informal, as seen in the increase in the number of occupational practices and businesses run from residential premises. The informal economy offers diverse opportunities for absorbing those who have lost their jobs and for new entrants into the economy. The integrated zoning scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect;
- Create an enabling environment. An enabling environment refers to "a set of policies, institutions, support services, and other conditions that collectively improve or create a general business setting where enterprises and business activities can start, develop, and thrive." Spatial Development Framework planning, the Integrated Zoning Scheme, aligned municipal infrastructure services provision, and municipal financial management tools will be used to address this aspect; and
- The formal and informal parts of the economy are mutually interdependent. The good health of one depends on the good health of the other. It is difficult to promote the growth of smaller enterprises if the overall rate of economic growth is slow. Dedicated networking projects to create opportunities for the informal economy to contribute to the demands of the formal economy will be used to address this aspect.

7.3.13 Community Development Strategy

Moreover, Schedules 4b and 5b list the functions of local government to include the following, which have relevance to community development functions:

- Childcare facilities;
- Building regulations (concerning SANS 10400S);
- Municipal Planning (concerning ECD registration applications and provisions to be made for social infrastructure, inclusive of education and health services);
- Municipal public works (accessibility);
- Local amenities (concerning the contribution to social development);
- Local sports fields (regarding their contribution to social development);
- Municipal parks and recreation (regarding the contribution to social development); and
- Municipal roads (accessibility).

INTERGOVERNMENTAL RELATIONS FRAMEWORK ACT, 2005 (ACT NO. 13 OF 2005) (IGRFA)

The IGRFA, which defines the relationship between the three spheres of government and facilitates coordination in the implementation of policy and legislation, includes coherent government, effective provision of services, monitoring implementation of policy and legislation, and realisation of national policies. Because these services are primarily provided by the national and provincial spheres of government but significantly affect local communities and residents, this department / function plays a pivotal role.

LOCAL GOVERNMENT: MUNICIPAL SYSTEMS ACT, 2000 (ACT NO. 32 OF 2000) (MSA)

The MSA further demonstrates in Chapter 4 the mandate of the municipality to develop a culture of community participation (16(1)(b)) in order to contribute to building the capacity of— (i) the local community to enable it to participate in the affairs of the municipality (networks and forums) and must do so with specific emphasis on the inclusion of (17(2)) the specific needs of (a) people who cannot read or write; (b) people with disabilities; (c) women; and (d) other disadvantaged groups.

The White Paper on Local Government (1998:23–26) identifies four interrelated characteristics of the role and function of local government related to community development:

- Maximising social development and economic growth: The role and function of the local government are to promote the development of communities so that the basic needs of the poor and vulnerable are met. It involves the regulation of service delivery. This means that the local government is not directly responsible for services but rather takes steps (i.e., strategies) to encourage good service delivery that addresses the specific needs of the specific community. It could therefore be viewed as a facilitation role. Partnerships between organisations could be encouraged, training opportunities could be provided, and facilities could be developed to support existing service providers in the community;
- Integrating and coordinating: Coordination should include national and provincial departments, trade unions, community groups, and private sector institutions. "Developmental local government must provide a vision and leadership for all those who have a role to play in achieving local prosperity." An IDP could contribute to proper coordination. To this extent, a Community Safety Forum includes a Social Cohesion committee to promote community safety.
- Democratising Development: Local Government practices should be aimed at the involvement of "…citizens and community groups in the design and delivery of municipal programmes".

Coordination should lead to democratic "…leadership, encouragement, practical support, and resources for community action." Another key aspect is that democratic development should aim to involve all community groups; and

- Leading and learning: Community development should lead to networks, partnerships, and coalitions. To this extent, a Memorandum of Understanding (MOU) was signed with DSD.
- It includes training opportunities and awareness programmes. The ultimate aim is to empower communities and create opportunities for sustainable change and growth. The emphasis is therefore on capacity building within communities.

The above characteristics are aimed at improving service delivery within the constraints of available resources. As mentioned before, partnerships with businesses and non-profit organisations (NGOs) become a key aspect of this developmental model (White Paper on Local Government, 1998:35). These services are aimed at specific vulnerable groups, and social issues are also highlighted in policy documents.

Further to the above, the department gives effect to the strategic goal of Dignified Living in the IDP of Stellenbosch Municipality through:

- The implementation of critical key performance areas and processes associated with the creation of a conducive environment for community / social development, forging relations with national, provincial, and local stakeholders, and the generation of current social data; and
- The development of six vulnerable groups (youth, gender, children, elderly, people who are homeless, and people living with disabilities) within the municipal area through strategy and policy development and monitoring and reporting on the intended goals of the department's key performance areas.

The target has been adjusted for the 2024/25 financial year. Tenders for accredited skills training matured on 30/06/2024. To replace these tenders, a procurement process was started in January 2024. These tenders needed to be cancelled due to the migration from Seta accreditation to QCTO accreditation. One Seta-accredited course (which received an accreditation extension) was advertised along with two other QCTO courses (for which confirmation of accreditation was obtained) during the first half of the 2024/25 financial year. No bids were received for the Seta tender, and two bids were successful for the QCTO courses. Training for these two courses starts in January and February 2025 to accommodate the maximum number of learners the service providers can accommodate. 26 in total for both.

7.3.14 Human Resource Strategy

High quality and a responsive Stellenbosch Municipality, with a focus on skills identification, supply, demand, retention, employability, and social mobility, is essential if the municipality is to realise its IDP ambitions. As such, Stellenbosch Municipality needs to be pre-emptive in terms of its human resource requirements and more responsive to service delivery improvement and best practices. The strategic role of Human Resource Management and Development (HRM&D) is ultimately to facilitate performance improvement through people. The table below provides a clarification of roles and involves the following:

- Understanding the business environment within which HRM&D operates;
- Partnering with management in effective people practices;
- Enabling change and transition;
- Engaging constructively with internal and external stakeholders' groups; and
- Delivering service-level commitments.

Table 55: Clarifying the role of HRM&D vis-à-vis Manager and employees

HRM	Line Managers	Employees
• Develop HRM&D strategies, principles, policies, and procedures in line with business requirements. • Ensures consistency and standardisation of processes and practices across the municipality. • Provides expert advisory services. • Ensure the application of appropriate best practice HRM&D service. • Partners line management in effective people practices • Enables change and transition. • Facilitates the assimilation of culture and values. • Build the capacity of line managers to effectively manage people. • Ensure good corporate governance around HRM&D practices. • Delivers on service level agreements. • Measures and reports on the effectiveness of HRM&D services within the municipality. • Interaction and negotiations with trade unions and feedback.	• Partners with HRM&D in developing and implementing HRM&D strategies to achieve results. • Manage people according to HRM&D principles, policies, and procedures. • Complies with HRM&D legal requirements. • Proactively engages and partners with HRM&D around business and people challenges and solutions. • Initiate and lead change. • Drives the organisational values. • Takes responsibility for being informed of HRM&D matters and building their own people management skills. • Follows fair and procedural HRM&D practices and processes. • Ensures high performance through effective performance management and retention practices. • Communicates and gives feedback on service level expectations. • Tracks and measures the impact of HRM&D strategies in functional areas. • Measure and report on the effectiveness of people management within functional areas.	• Partners with line and HRM&D to: • Remain relevant to local; government by taking responsibility for your own performance development and career planning; • Taking advantage of appropriate opportunities for development; • Remain informed of HRM&D policy and procedure; • Discuss expectations; • Take personal accountability for and support change initiatives; • Live the organisational values; • Participate in HRM&D surveys and feedback mechanisms; and • Provides feedback to / and liaises with Unions and relevant employee forums.

This HRM&D Framework provides Stellenbosch Municipality with the structure to plan, implement, monitor, and improve its HRM&D standards. This framework does not operate in isolation and will be central to all activities involving the human resources of Stellenbosch Municipality. Therefore, the Council, management, staff, and trade unions must "own" this framework, making it not just an HR document. Since the field of HR management is a dynamic discipline, it is envisaged that this framework will change and develop over time to reflect the realities of the municipality's environment.

Table 56: Key Strategies

Strategic Focus Area (SFA)	Key strategies	Alignment with HR Standards
SFA 1: Valley of Possibility	Ensuring that infrastructure and service planning and resourcing occur sustainably over the long term and draw on the expertise of other service delivery agencies, the private sector, and the university.	Strategic HR Management.
SFA 2: Green and Sustainable Valley	Focusing more strongly on the environmental planning and management function, including appropriate resourcing.	Strategic HR Management. Talent Management. Learning and Development.
SFA3: Safe Valley	Securing adequate permanently employed HR, facilities, and equipment (specifically fleet) to undertake the specialist functions of traffic management, fire and rescue services, and disaster and event management on a 24/7 basis and to comply with legal standards. Establishing adequate, integrated law enforcement capacity is present in every ward of the municipality.	Strategic HR Management. Learning and Development.
SFA 4: Dignified Living	Ensuring the delivery of a comprehensive range of services to vulnerable groups and the coordinated cooperation of service providers at all levels in the delivery and management of services to these groups.	Learning and Development.
SFA 5: Good Governance and Compliance	Ensuring that functional areas have the capacity and readiness to deliver services in terms of short-, medium-, and long-term objectives and targets. Ensuring that all staff have the opportunity for leadership development within their functional areas and municipal management generally. Ensuring regular performance management of staff at all levels within the organisation. Undertaking strategic planning for the longer and shorter terms, the municipality, and local areas Implementing regular auditing of processes. Celebrating excellence in service delivery, both external and internal to the municipality. Renewing intergovernmental efforts to establish a municipal court in Stellenbosch.	Strategic HR Management. Talent Management. Learning and Development. Performance Management / Reward and Recognition. Strategic HR Management. HR Risk Management. Reward and Recognition. Talent Management.

7.3.15 ICT Strategy

7.3.15.1 Background

Information and Communication Technology (ICT) systems and services are playing an ever-increasing role as a strategic enabler of organisational transformation and service delivery in the public sector. There is also a growing acknowledgement at the corporate governance level that ICT services and systems form an integral part of the municipal service delivery value chain.

The continuous alignment of ICT services and systems with the strategic goals and objectives of the municipality, as well as statements of direction from the National Government and the Western Cape Provincial Government, imposes major challenges on the Department: ICT and its resources.

This document aims to articulate and describe changes in the Stellenbosch Municipality's ICT Strategy with the view of ensuring alignment with the municipality's strategy. The emphasis is placed on identifying the municipality's new requirements and opportunities for information and communication technology to move towards meeting the ICT-related requirements of the municipality and management. The revised ICT Strategy were submitted to the ICT Steering Committee on 14 March 2024.

The successful implementation of the municipality's IDP and the achievement of its strategic objectives are highly dependent on several critical enabling resources to be managed effectively to support the IDP, including finances, human resources, and information technology.

The achievement of the strategic objectives of the municipality's IDP is indirectly dependent on various information technology services, without which the core and supporting functions of the municipality will not be able to operate. The vital ICT-related services include:

- Provisioning of Municipal Financial Management and Payroll Management software applications;
- Hosting of the municipal website;
- E-mail and internet services;
- Data storage;
- Data recovery;
- ICT planning;
- Provisioning of the network, wireless networks, and telephony services;
- End-user support for the ICT environment;
- Disaster Recovery Management;
- Business Continuity;
- ICT Risk Management;
- ICT contract management; and
- Public Wi-Fi.

7.3.15.2 The Mission and Vision of ICT

ICT's mission is to deliver cost-effective ICT infrastructure and ICT business solution services that will provide the most enabling environment to assist the Stellenbosch Municipality in delivering sustainable services that are operationally efficient and cost-effective to all its stakeholders and communities, which includes:

- Cost-effective solutions;
- Quality Service Delivery;
- Ongoing performance monitoring; and
- Aligned to business processes.

The vision of the ICT Department is to become a trusted and reliable information and communication technology partner to enable Stellenbosch Municipality's management and end-users to build a better town using cutting-edge ICT technology solutions.

7.3.15.3 Success Factors to Adopt in getting closer to the community

The Department: ICT will continue to strive to achieve its goals of closing the gap between the municipality and the community by improving services and engagement. These goals include:

- Understanding the needs of the community;
- Always deliver a consistent and quality service; and
- Manage the relationships with vendors and stakeholders providing a service to the public.

CHAPTER 8:
Council Term Projects 2022 – 2027

8.1 Smart City

As cities compete for global investment and talent in efficient cities with fewer red tape barriers, ICT competitiveness comes centre stage. A smart city is adaptable to change and demands that emanate from growth and, in response, applies information and communication technologies to enhance performance and urban services to respond to demand while reducing consumption, waste, and costs. Smart cities need to capitalise on digital technology to facilitate the speed of information, support more efficient delivery of goods and services, and contribute to the greater vibrancy of cities.

A smart city is a municipality that uses information and communication technologies to increase operational efficiency, share information with the public, and improve both the quality of government services and citizen welfare.

8.1.1 Guiding Principles to Create Inclusive Smart Cities

For a smart city to be inclusive, it should adhere to six interdependent principles. The principles provide guidance when decisions must be made regarding the identification, planning, and implementation of smart initiatives and technologies.

Decisions on the nature and purpose of a smart initiative or technology should be guided by the following principles:

1. It should be smart for all;
2. It should use technology as an enabler rather than a driver;
3. It should be shaped by and respond to the local context;
4. It should be informed by the real needs of the community;
5. It should embrace innovation, partnership, and collaboration; and
6. It should be sustainable, resilient, and safe.

8.1.2 A smart city as a holistic ecosystem

Global best practices recommend three primary categories when determining the benefits and priorities for the design and implementation of the smart city roadmap. The smart city roadmap includes the following:

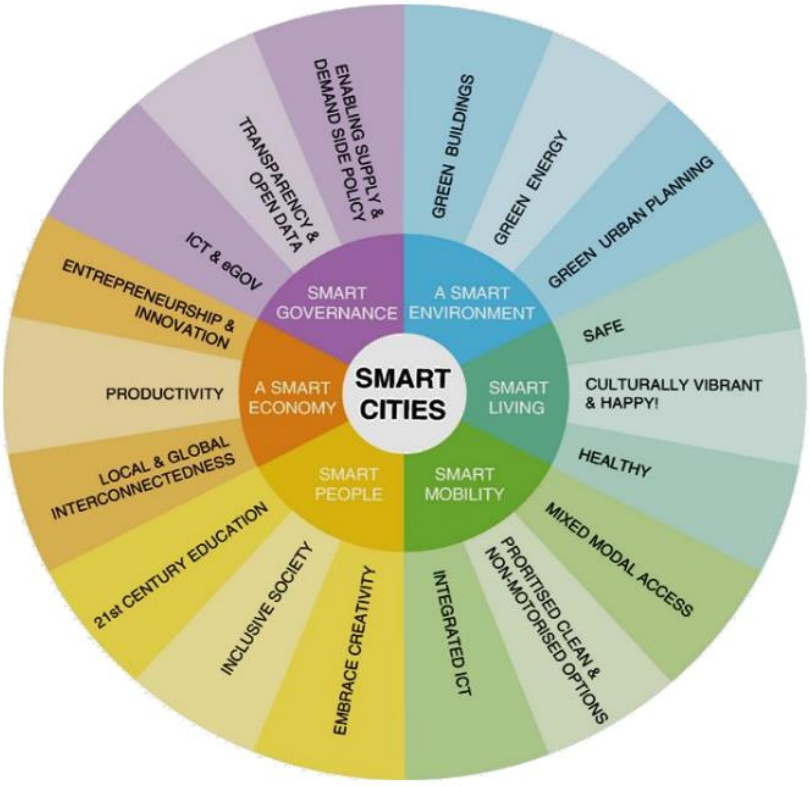
Smart Governance

Transform the institutional systems, processes, and organisational structure into one of the high-performance organisations to effectively deliver basic services.

Smart Livelihood

Implementation and integration of innovative digital platforms to enable social upliftment.

Smart Economy



Grow and diversify the local economy through the attraction of new investment, skills development, and facilitation of an enabling environment for small business growth and job creation.

8.1.3 The Nature and Purpose of a Proposed Smart City Initiative

The implementation of smart city initiatives should be guided by a clear understanding of the nature and purpose of the proposed interventions. These initiatives could be focussed on benefitting different target services in municipal-driven smart city initiatives, addressing the needs of the entire city (municipal area). Smart City initiatives should be aimed at improving the lives of the people residing in the city, especially in the different services that are delivered to the residents in the municipal area.

Smart city initiatives can be placed within a specific smart city theme, the figure below indicates the different smart city themes:

Figure 50: Smart City components and initiatives

Source: A South African Smart Cities Framework

Realising the goal and implementation of smart city initiatives will require the collaboration of internal and external stakeholders. Within the next five years (2022 – 2027), Stellenbosch Municipality will emphasise smart governance with a focus on e-governance. The aim is to formulate a Smart City Framework for approval by the Council in the 2024/25 financial year.

The purpose of the Smart City Framework will be to guide decision-making and provide internal stakeholders with a structured framework when identifying, planning, and implementing smart city initiatives that are appropriate to the theme of smart governance.

The legacy projects will be undertaken by the administration and political leadership, which will remain applicable for the duration of the political term under the leadership of the Executive Mayor and the respective portfolios of the Mayoral Committee Members.

8.2 Political Leadership: Five–Year Plans

8.2.1 Executive Mayor

In developing the proposed 3rd review of the 5th Generation IDP 2022 – 2027, the Stellenbosch Municipality ensured proper alignment and integration with the IDP, Budget, SDF and sector plans. There is no fundamental shift in the outstanding projects / programmes and initiatives that were planned in the 5th Generation IDP 2022 - 2027.

The 5th Generation IDP 2022 – 2027 will be the municipality's roadmap for the next five years and track the progress on the implementation of projects / programmes and initiatives. It is an exciting journey in working together with the administration, communities, and other spheres of government in making greater Stellenbosch a valley of opportunity. For this to happen, the following mayoral outcomes for the period 2022 – 2027 have been set and are reviewed on an annual basis.

Mayoral Outcome 1: Clean, accountable, and responsive local government;

Mayoral Outcome 2: Outcome 2: Excellent service delivery in all areas within the Greater Stellenbosch Municipal Area;

Mayoral Outcome 3: LED post the COVID-19 Pandemic and transfer of land to new farmers;

Mayoral Outcome 4: Provide housing opportunities for all residents in all housing categories (rental stock, BNG, GAP housing, upgrade of informal settlements and mixed-use developments);

Mayoral Outcome 5: Development of the Adam Tas Corridor and town establishment of all ten dorpies across the municipality area;

Mayoral Outcome 6: Streamline planning systems and procedures to facilitate desirable growth;

Mayoral Outcome 7: To create safer environments in our communities;

Mayoral Outcome 8: Expansion of the green economy with innovative projects, creating new reality of service delivery and job creation;

Mayoral Outcome 9: Alternative Energy.

8.3 Mayoral Portfolios

The mayoral portfolios are a tool for the Executive Mayor to use to reach the mayoral goals for 2022 – 2027. In support of the mayoral outcomes, each portfolio has set performance-based strategic priorities that are aligned and will give effect to the mayoral outcomes. The performance-based strategic priorities for the 3rd review of the 5th Generation IDP 2022 – 2027, have a focused approach on the implementation of the strategic projects / programmes and initiatives with set targets and time frames.

The following portfolio performance-based implementation plans are listed below:

1. Portfolio: Human Settlements;
2. Portfolio: Rural Management and Environmental Management;
3. Portfolio: Sport, Youth, and Culture;
4. Portfolio: Planning, LED, and Tourism;
5. Portfolio: Community Services;
6. Portfolio: Financial Services;
7. Portfolio: Protection Services;

CHAPTER 9:
Public Interest and Expression of Needs

9.1 Community Participation

Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) requires municipalities to create a culture of community participation. According to Section 16(1)(a)(i) of the MSA, "A municipality must develop a culture of municipal governance that complements formal representative government with a system of participatory governance and must, for this purpose, encourage and create conditions for the local community to participate in the affairs of the municipality, including in the preparation, implementation, and review of its integrated development plan in terms of Chapter 5." It is therefore essential to have effective public participation structures in place.

The SDF, IDP, Budget, and sector plans, as well as major municipal policies, by-laws, and decisions, should be engaged to ensure that they are designed and implemented for and with the community. This also adds to the credibility of the needs reflected in the IDP, the Budget calculated to address these needs, and the SDBIP drafted to implement programmes and projects that reflect the communities' needs.

The growing trend of mature and constructive discussions from the public, the level of complexity, and the investment made in understanding the municipality's business are encouraging. The direct participation and involvement of the ward councillors, communities, and stakeholders in the identification of ward-based priorities and their involvement in the public participation process have added great value to the maturity and quality of the discussions between the public and the municipality. Ward councillors are a critical link in connecting the municipality with the public. As members of the Council and recipients of all the decisions taken by the Council, it positions Councillors strategically to ensure that the municipality not only understands the needs of the community better but also provides the public with honest and accurate feedback on the municipality's initiatives. These endeavours are supported by well-functioning ward committees. Councillors are, however, encouraged to always adhere to the code of ethics for councillors and to always act with the utmost integrity and accountability towards their constituents and the municipality, as this is the only way in which to form a responsible local government.

Public participation takes place through various means and platforms and is often tailored to suit a specific audience or community. Importantly, communities from different socio-economic backgrounds use different platforms to communicate. It is important to cater for all scenarios and to utilise all available platforms to their optimum potential, given that a certain degree of apathy exists in certain communities.

Further feedback will be provided on the comments captured in written submissions made via the various platforms created for public participation. To ensure that the public participation process is a two-way process, all comments have been carefully considered and discussed with internal departments.

9.2 Public Participation in the drafting of the 3rd review of the 5th Generation IDP 2022 – 2027

Stellenbosch Municipality implemented the IDP public participation process from **9 - 30 September 2024**, with physical IDP open days from **10 – 16 September 2024**. This public participation process was carried out during the analysis phase of the IDP cycle to identify the community's needs for drafting the draft 3rd review of the 5th Generation IDP 2022 – 2027 and draft Budget (MTREF). The draft IDP and Budget were open for public comment from **07 – 29 April 2025,** with the municipal open days from **08 – 14 April 2025**.

Notices were published in the local newspaper and on the municipal website to announce the commencement of the public participation process for the drafting of the 3rd review of the 5th Generation IDP 2022 - 2027. At the outset of each public participation period, a link to an electronic submission form is posted on the municipal website, and shared via WhatsApp, Facebook, and email. Hard copy 'Have Your Say' forms are distributed to ward offices, municipal libraries, and satellite offices for community members to have access to electronic platforms to fill out the forms by hand.

Community members and other interested or affected parties are urged to participate in the physical IDP open days in their respective wards or areas. The open days function as a comprehensive municipal service desk for the community to get information on municipal services and engage in direct dialogue with municipal departments to express concerns and pose enquiries. The community can participate in any of the open days at the specified venues as published in the different communication platforms. The open days are more of a decentralised meeting at the many service desks established by each directorate. While services including indigent registration, housing demand registration, and unemployment database enrolment are not provided during the open day, information regarding these services is accessible to communities at the service desk.

The electronic and verbal submissions made available on the various platforms created for public participation followed the process below:

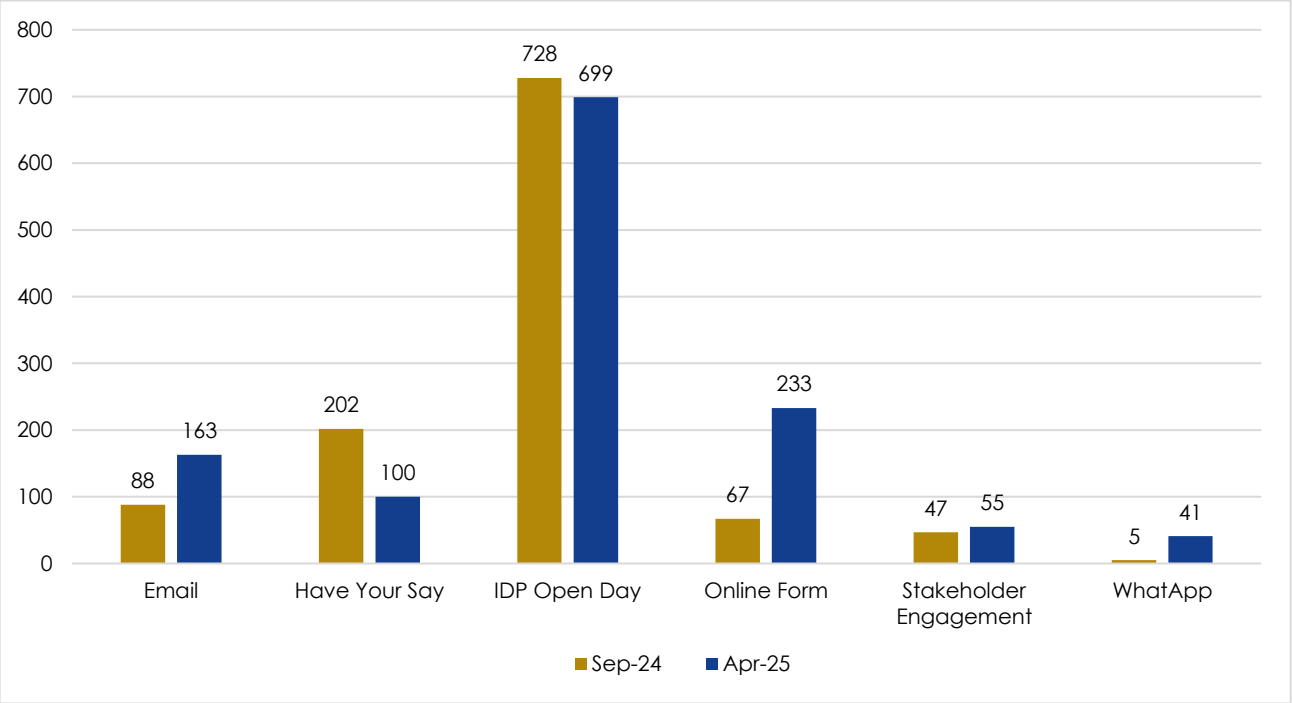

Figure 52: Process Flow for electronic and verbal submissions

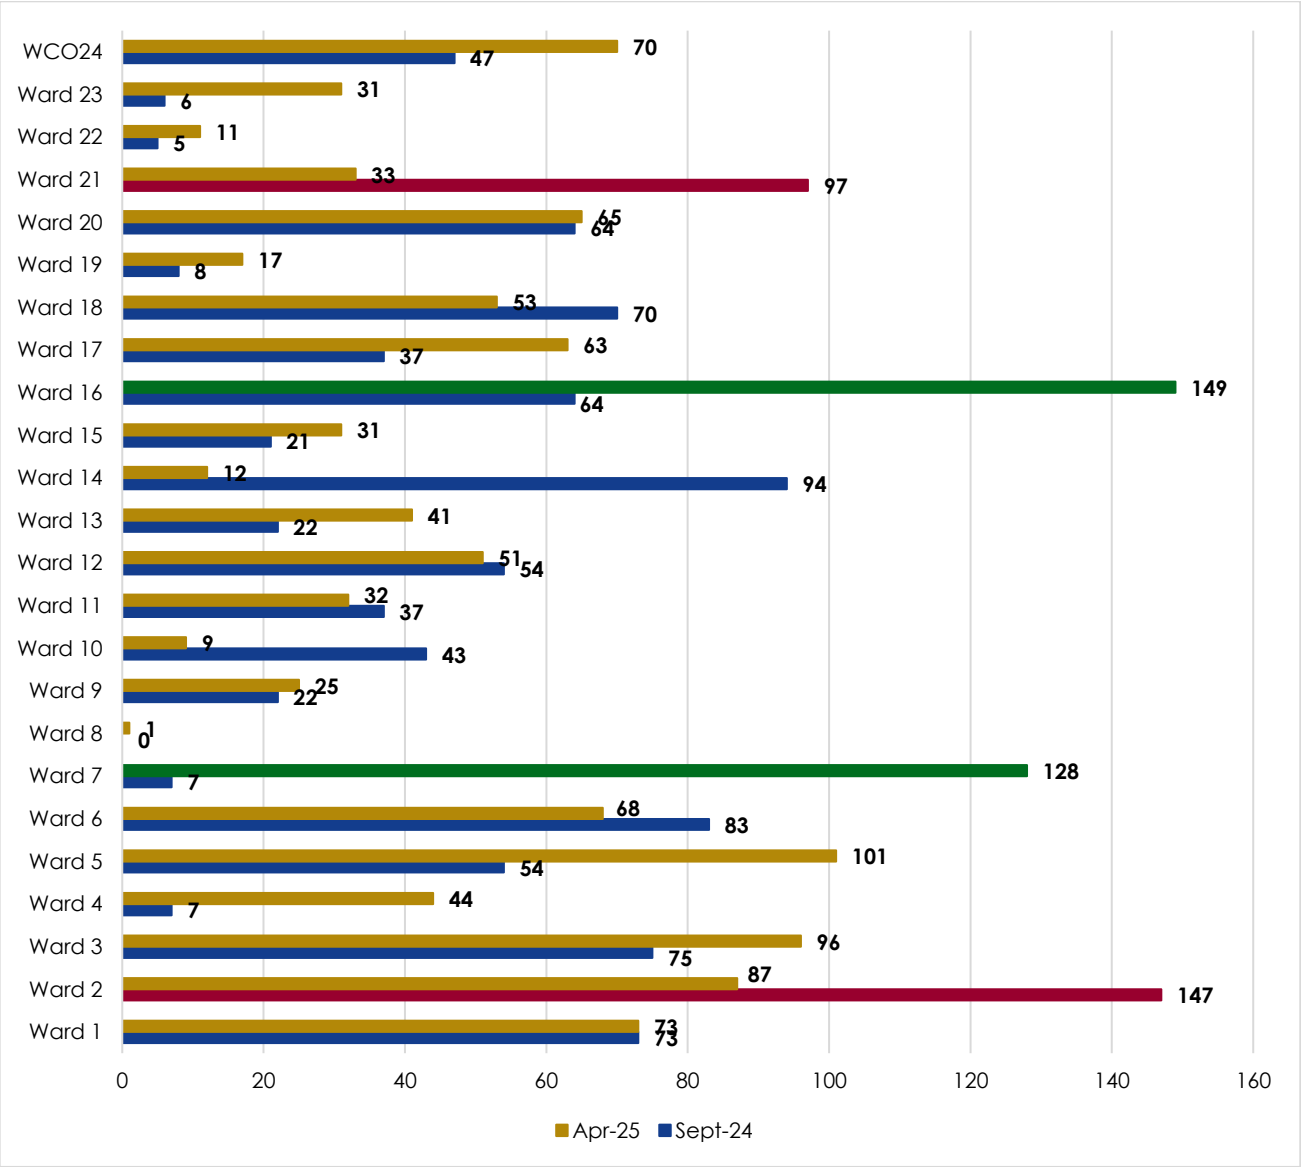
9.3 Public Participation Statistics: September 2024 and April 2025

The graphs below indicate the number of individual line-item submissions received on the various communication platforms.

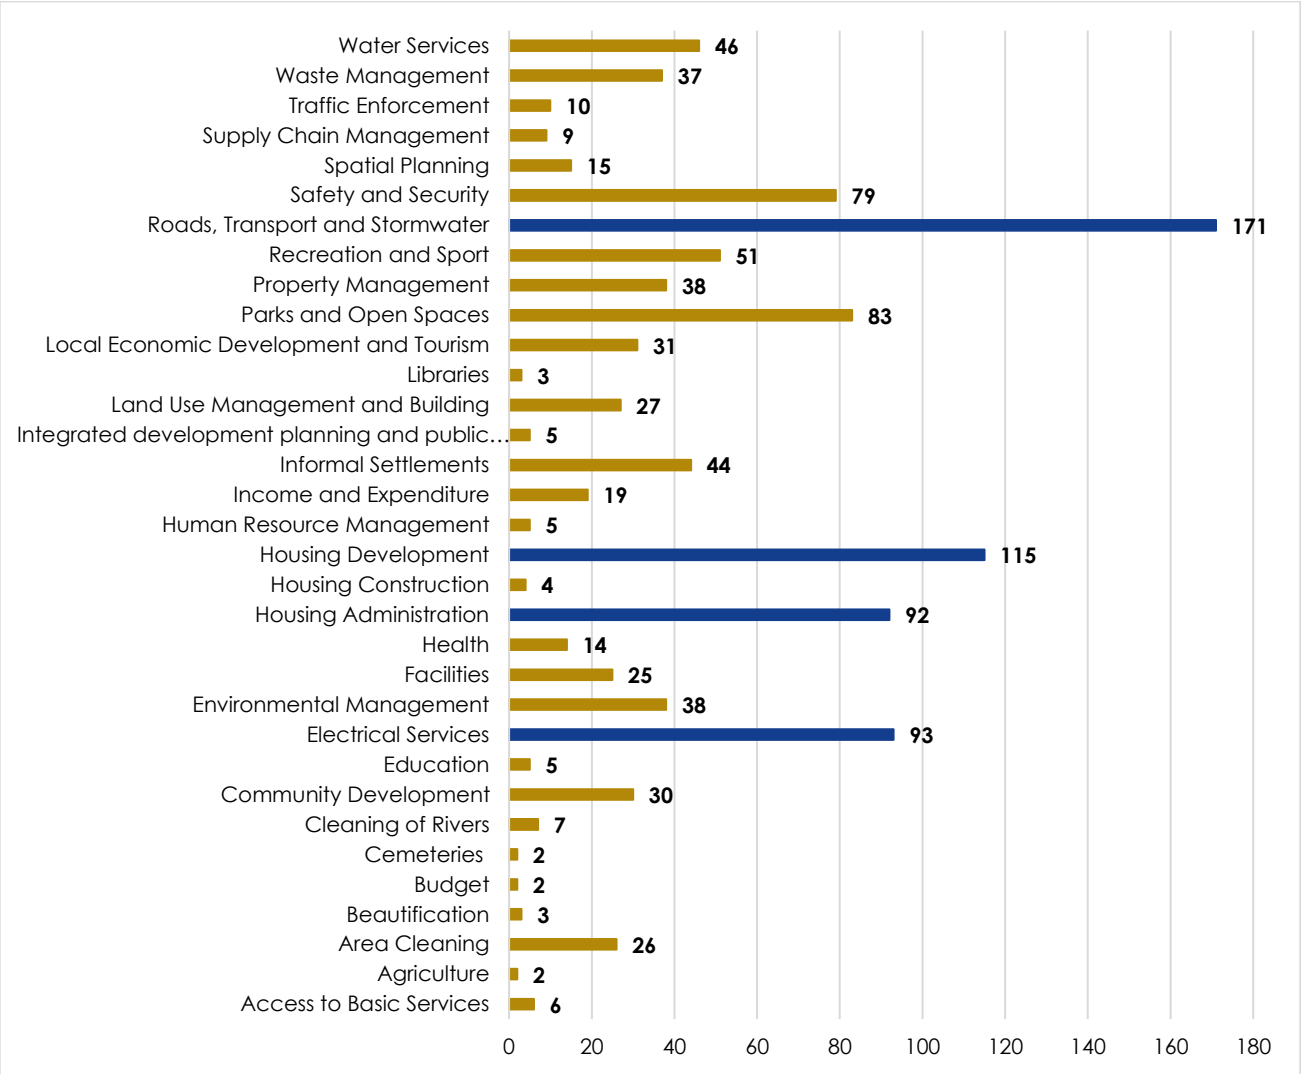


Graph 46: Total number of individual submissions per platform Sept 2024 and April 2025

As displayed in the graph above, the 'Have Your Say' form, which was made available in municipal libraries and ward offices, and the input that was recorded in the IDP Open Day minutes were the most popular platforms used by the community and stakeholders to submit their needs and priorities in September 2024. The physical IDP Open Days in September 2024 recorded a total of **72,** and for April 2025, a total of **699** individual line items were recorded. Input through the 'Have Your Say' form is the second most input, with **202** individual line-item submissions recorded in September 2024, and the online electronic form on the municipal website is the second most popular platform, with **233** individual line-item submissions recorded in April 2025.

The graph (dark red) below illustrates that **Ward 02** and **Ward 21** received and captured the most line items / inputs per ward during the public participation period in September 2024, whereas **Ward 07** and **Ward 16** had the most inputs in April 2025 (dark green).

Graph 47: Total number of Ward input per ward September 2024 and April 2025



9.4 Summary of Needs and Priorities

The graphs below summarise the key priorities and needs raised by communities during the public participation period from September 2024 to April 2025. The graphs clearly indicate the top **five (5) priorities** indicated by community members for WCO24 in September 2024 and April 2025, as follows:

Table 99: Top 5 priorities identified in September 2024 and April 2025

Number	Top 5 priorities identified for WCO24 by community members	
	September 2024	April 2025
1.	Roads, Transport and Stormwater	Roads, Transport and Stormwater
2.	Housing Development	Safety and Security
3.	Electrical Services	Housing Administration
4.	Housing Administration; and	Recreation and Sport
5.	Parks and Open Spaces	Housing Development

Graph 48: Number of community inputs per priority area in Sept 2024

Graph 49: Number of community inputs per priority area in April 2025

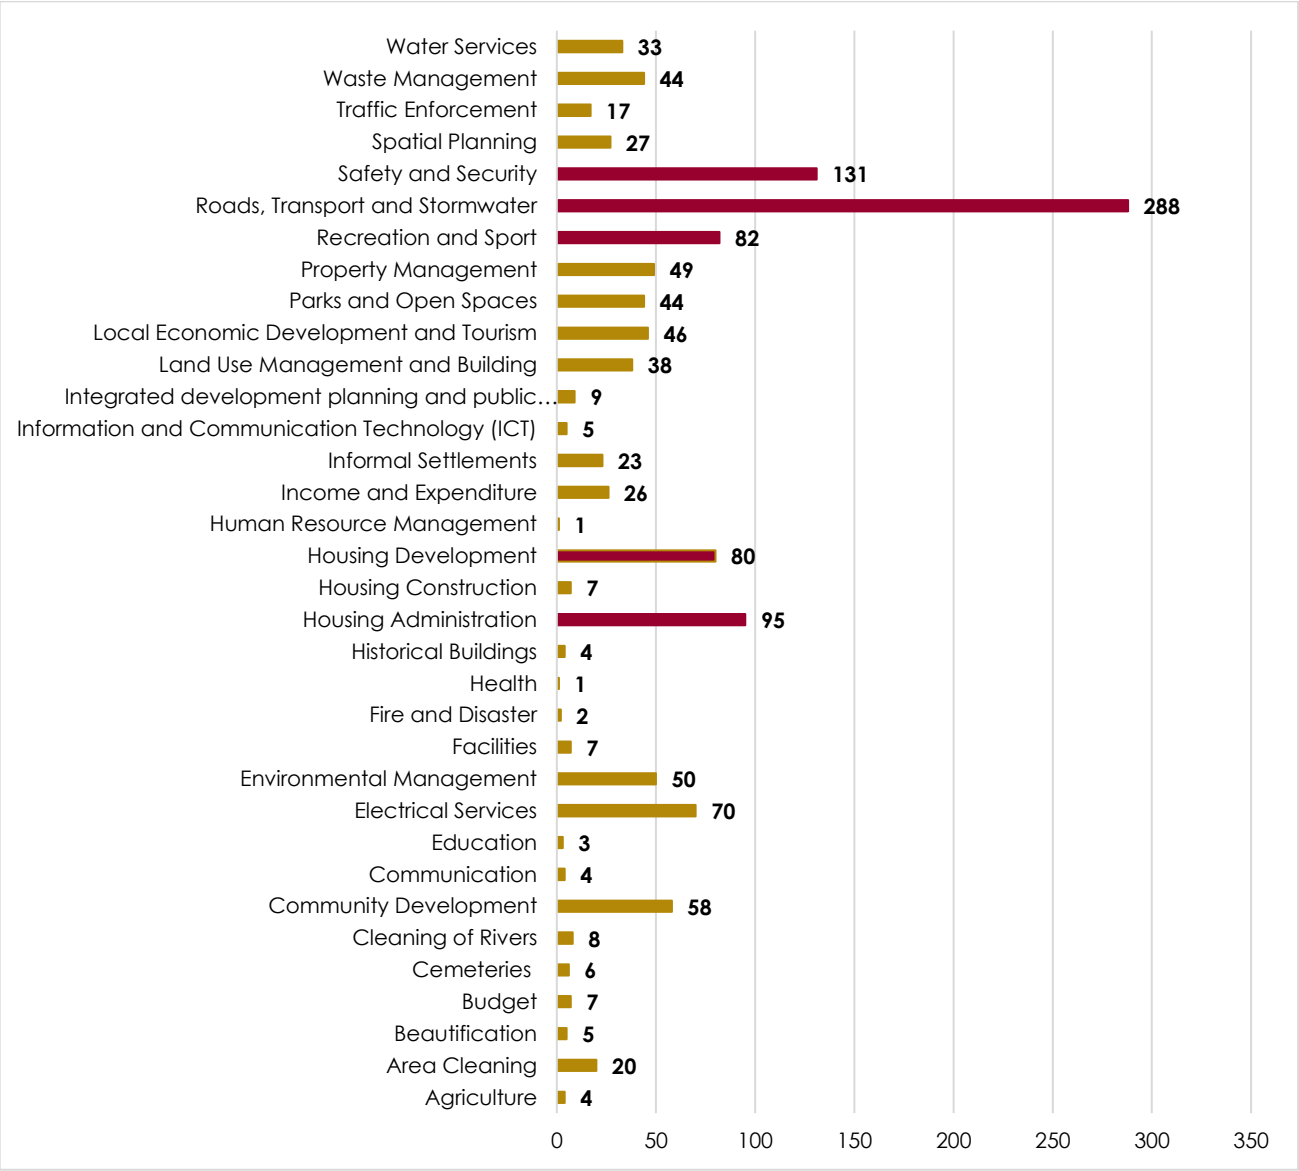


Table 100: Number of Attendees disaggregated by Gender, September 2024 and April 2025

Wards	Area	September 2024				April 2025			
		Male	Female	Unspecified	Total Attendees	Male	Female	Unspecified	Total Attendees

9.5 Ward Priorities

Emanating from community needs and inputs, the following **key priorities per ward** were identified by the ward councillor for the period 2022 – 2027. During the annual IDP review, these key priorities may be reviewed and reprioritised.

Ward 1: Cllr. Reginald Pheiffer

9.5.1 Ward Priorities: Ward 1

Table 102: Ward 1 – Ward Priorities

Project Rating					
☺	Project completed.	😐	Project in progress.	☹	Not completed / No budget available / District Function / Provincial Function

WARD PRIORITIES: WARD 1																	Departmental Comment
Ward Priority	Description of Ward Priority	Key Performance Deliverables (KPI)	Unit of Measurement	Linkage to Directorate	Linkage to Department	(National / Provincial / District / Local)	Deliverable Target					Performance Rating					
							2022/23	2023/24	2024/25	2025/26	2026/27	2022/23	2023/24	2024/25	2025/26	2026/27	
Priority 1: Housing	Provision of mixed-development housing projects in the greater Franschhoek Valley Area	Obtaining development rights for mixed-use development for the La Motte housing project	Percentage of the La Motte Capital Budget actually spent by 30 June	Planning and Economic Development	Integrated Human Development	Local	n/a	n/a	90%	90%	90%	n/a	n/a	n/a	n/a	n/a	The La Motte mixed-use housing development will provide a variety of housing opportunities / typologies for different income categories in the Franschhoek Valley that qualify for a housing subsidy. A task team consisting of representatives from the NDoPW&I, Public Works regional office Western Cape, Stellenbosch Municipality, and HDA specifically to deal with properties within the WC024 belonging to the NDoPW&I has been established. The Gazetted budget has been approved during the adjustment budget of the 2024/25 financial year and will be rolled over to the 2025/26 financial year due to the outstanding PoA. The transfer of the land from NDoPW&I to the Stellenbosch Municipality is under discussion.

WARD PRIORITIES: WARD 1																	
Ward Priority	Description of Ward Priority	Key Performance Deliverables (KPI)	Unit of Measurement	Linkage to Directorate	Linkage to Department	(National / Provincial / District / Local/	Deliverable Target					Performance Rating					Departmental Comment
							2022/23	2023/24	2024/25	2025/26	2026/27	2022/23	2023/24	2024/25	2025/26	2026/27	
	Complete the housing project on the vacant plots near Dalubuhle Primary. The infrastructure of the plots, near Dalubuhle Primary School, has been severally vandalised	An investigation needs to be conducted by a competent engineer to determine the exact cost to re-install the damaged services	Not Applicable	Planning and Economic Development	Integrated Human Development	Local	n/a	n/a	n/a	n/a	n/a	n/a	☹	n/a	n/a	n/a	This matter is being dealt with by the Directorate: Corporate Services (Property Management).
Priority 2: Infrastructure Services	Repair damaged infrastructure caused by the 2023 Floods in the ward	Repair and reinstatement of riverbanks and walkways	Not Applicable	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	😐	☺	n/a	n/a	Completed.
	Repainting of road markings in ward 1	Painting of road marks in ward 1	Percentage of road marks painted in ward 1	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	☺	n/a	n/a	n/a	Completed.
	Develop traffic calming measures at Uitkyk Street and Main Road intersection, Franschhoek (e.g. Raised Intersection or 4-way stop)	Conduct an assessment on the feasibility of developing traffic calming measures at the Uitkyk Street and Main Road intersection	Number of assessments conducted by 30 September	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	1	n/a	n/a	n/a	n/a	n/a	n/a	n/a	Earmarked as a priority project for implementation within the next five (5) years.
	Removal of the decommissioned ablution facility in Klein Mooiwater Informal Settlement	A report provided by the Section: Building Control proposed that the toilet structure be demolished.	Number of investigations conducted on the investigation on removal of the decommissioned ablution facility in Klein Mooiwater Informal Settlement by 30 April	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	1	n/a	n/a	n/a	n/a	n/a	n/a	n/a	This report was tabled at the Director's meeting on Tuesday, 18 February 2025, which endorsed the proposal. However, processes have been commenced to appoint service providers for the demolition of the existing ablution structures and the provision of
	Repair paving / sidewalks in Franschhoek Town	Repair paving / sidewalks in Franschhoek CBD	Not Applicable	Infrastructure Services	Roads, Transport and Storm Water (RTS)	Local	n/a	n/a	n/a	n/a	n/a	n/a	☺	n/a	n/a	n/a	Completed.

Priority 1: Housing	Housing as well as land for housing in Ward 2	To obtain development rights for La Motte	Percentage of the La Motte capital budget actually spent by 30 June	Planning and Economic Development	Integrated Human Settlements	Local	n/a	n/a	90%	90%	90%	n/a	n/a	n/a	n/a	n/a	The La Motte mixed-use housing development will provide a variety of housing opportunities / typologies for different income categories in the Franschhoek Valley that qualify for a housing subsidy. A task team consisting of representatives from the NDoPW&I, Public Works regional office Western Cape, Stellenbosch Municipality, and HDA specifically to deal with properties within the WC024 belonging to the NDoPW&I has been established. The Gazetted budget has been approved during the adjustment budget of the 2024/25 financial year and will be rolled over to the 2025/26 financial year due to the outstanding PoA. The transfer of the land from NDoPW&I to the Stellenbosch Municipality is under discussion.

	Water tariffs: Fair treatment is required concerning the municipal reading of water meters. Residents should first be informed by the municipality about irregular readings instead of just billing them. Unknown underground leaks may be the cause of the problem and not just over-usage. The current water tariff scale should be revised urgently to acceptable levels for all. Correct and consistent water meter readings are required. Municipal officials should be more helpful when residents approach them for assistance with a bill that is incorrect.	All underground leaks are covered via the Leak Rebate policy, provided that the applicant complies with policy stipulations	Not Applicable	Infrastructure Services	Water and Wastewater Services	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The current water tariffs for Stellenbosch residences are far lower than those of City of Cape Town, which also supply a large part of our water needs at rates higher than most of our tariff scale. The Municipality must use a step tariff to ensure residents take water saving seriously, as the Western Cape is a water-scarce area. Our water tariffs and our Leak Rebate Policy are consistently and fairly applied to all users.

Priority 1: Affordable Housing	Completion of phases 2, 3 and 4 of the mixed housing projects in Mountain View, Jamestown	Construct phases 2, 3 and 4 of the mixed housing projects in Mountain View	Not Applicable	Planning and Economic Development	Development Planning	Local	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	The Municipal Planning Tribunal (MPT) approved the project, and the appeal was finalised on 23 August 2024, which means that development rights for Phases 2 and 3 have now been established. The funding to service these sites will only be part of the municipal budget from 01 July 2025. If the SCM procurement process goes well and a suitable service provider is appointed, the contractor will be on site no later than November 2025. The administration is in the process of advertising to appoint an implementing agent for the installation of services and construction of top structures. No development rights have been obtained for Phase 4 of the project, as further feasibility studies on the designated area are being undertaken.

CHAPTER 10:

Financial Plan

The Stellenbosch Municipality's medium-term financial planning and the extent to which it is possible to align the budget to all the priorities of the wards, given our financial constraints and the need to concentrate on basic service delivery.

10.1 Introduction

The long-term financial viability of municipalities depends largely on:

- the extent to which improved and sustainable revenue capacity can be achieved; and
- the sound **financial management of its resources.**

These imperatives necessitate proper multi-year financial planning. Future impacts of revenue and expenditure streams and the financial implications for the community (i.e., the potential influence on rates, tariffs, and service charges) must be identified and assessed to determine the sustainability of planned interventions, programmes, projects, and sundry service delivery actions.

10.2 Capital and Operating Budget Estimates

10.2.1 Budget Assumptions

The selected key assumptions relating to this budget are as follows:

- Government grants for the years 2025/26 to 2027/28 are as per the Division of Revenue Act and Provincial Gazette (capital and operational); and
- The inflation rate has been estimated at **4.4% for 2025/26**.

10.2.2 Operating Budget Estimates

A municipality is a non-profit organisation, and it should break even after contributing to the different funds and reserves and meeting normal operating expenses. With the structuring of rates and tariffs, both the user-pay principle and the full cost recovery principle are applied. It should be noted that the surplus is calculated in terms of the accrual principle and therefore is not 100% cash-backed.

Table 125: Operating Budget Estimates

	(Current) 2024/25 Budget	Year 1 2025/26 Budget	Year 2 2026/27 Budget	Year 3 2027/28 Budget

10.3 Financial Management Arrangements

For the effective and efficient financial management of the municipality, all role-players, including the municipal councillors, must provide an environment conducive to good management. Local government legislation and National Treasury circulars articulate and provide regulatory structure. The Council and officials define this environment by developing and accepting policy guidelines to govern financial decision-making and fiscal discipline.

The management arrangements of Stellenbosch Municipality are reflected in the policy documents listed in the table below:

Table 127: Management Arrangements

Document	Purpose	Status
Delegation Register	To provide for administrative, managerial, and institutional arrangements in respect of the delegation of responsibilities.	In place
Credit Control and Debt Collection Policy	• To establish consolidated, sound, and practically executable credit control measures to be applied in respect to all property owners and consumers. • To regulate the actions about arrear accounts, including extensions granted, written arrangements to pay off arrears, the monitoring thereof, and legal actions associated with unpaid accounts.	In place
Indigent Policy	To subsidise indigent households with a specified level of income. enabling them to pay for a basic package of municipal services.	In place
Irrecoverable Debt Policy	To provide a framework for the writing off of irrecoverable debt, to ensure that Council is in a position where it is not carrying debt that has been prescribed, or which is irrecoverable on its books.	In place
Tariff Policy	To provide a framework to determine rates and tariffs to finance expenditure.	In place
Rates Policy	To ensure that all the stipulations of the Municipal Property Rates Act are effected administratively and also layout and stipulate all the requirements for rebates for all qualifying property owners.	In place
Special Rating Areas Policy	To strike an appropriate balance between facilitating self / funded community initiatives that aim to improve and/or upgrade neighbourhoods.	In place
Supply Chain Management Policy	To provide a system of procurement that gives effect to the principles of: • Fairness; • Equity; • Transparency; • Competitiveness; and • Cost-effectiveness.	In place
Budget Implementation and Monitoring Policy	• Set out the budgeting principles Stellenbosch Municipality will follow in preparing each annual budget. • To give effect to the requirements and stipulations of the Municipal Finance Management Act (MFMA) and Municipal Budget and Reporting Framework in terms of the planning, preparation, and approval of the annual and adjustments budgets.	In place
Borrowing, Funding and Reserves Policy	To provide a framework to ensure that the annual budget of Stellenbosch Municipality is fully funded and that all funds and reserves are maintained at the required level to avoid future year non-cash-backed liabilities.	In place
Cash Management and Investment Policy	To regulate and provide directives in respect of the investment of funds and to maximise returns from authorised investments, consistent with the primary objective of minimising risk.	In place
Travel and Subsistence Policy	To set out the basis for the payment of subsistence, travel allowance, and hourly rate when applying for official travelling.	In place
Accounting Policy	To provide the accounting framework applicable to the finances of the municipality and is informed by the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003).	In place

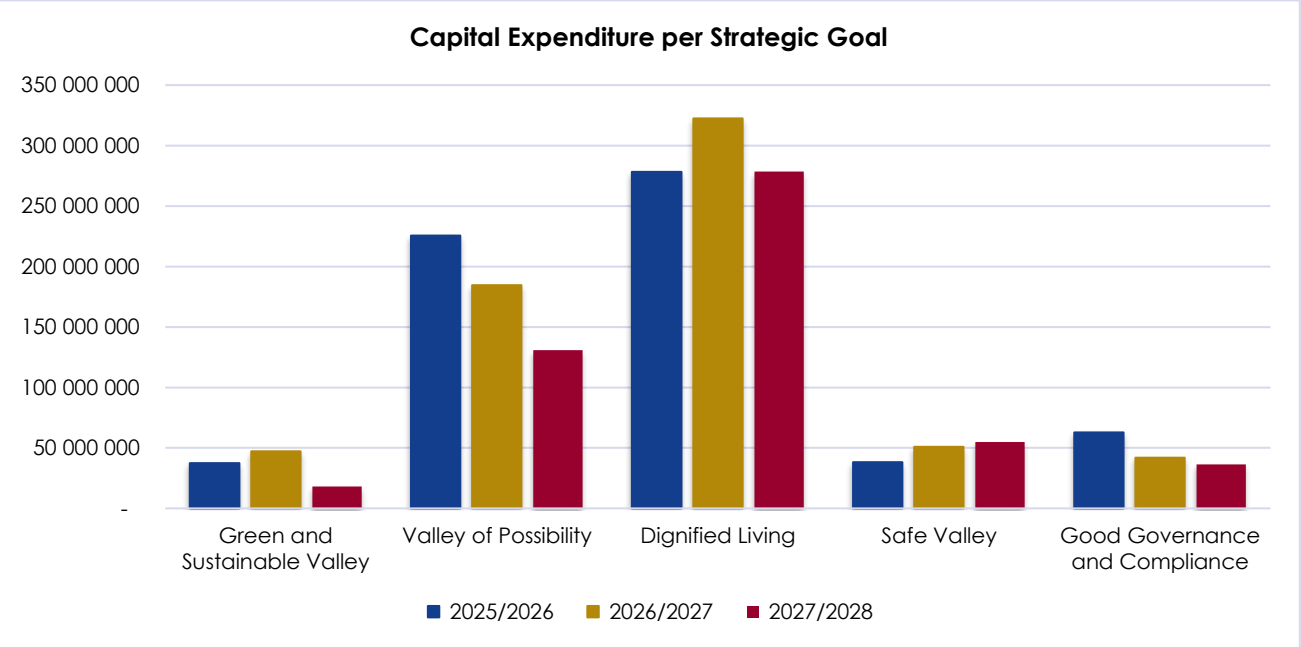
Document	Purpose	Status
Grant-in-aid Policy	To provide the framework for grants-in-aid to NGOs, CBOs or NPOs and bodies that are used by the government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by Sections 12 and 67 of the MFMA.	In place
Development Contributions for Bulk Engineering Services	• Local government has the discretionary power when granting development approvals to impose conditions about the provision of engineering services and the payment of money that is directly related to requirements resulting from those approvals in respect of the provision of the necessary services to the land to be developed. • To provide the framework for the calculation of these contributions.	In place
Petty Cash Policy	To stipulate clear processes and procedures to ensure that all transactions are processed effectively and efficiently in a bid to ensure prudent financial control. All purchases below R2 000 are regulated by this policy.	In place
Asset Management Policy	The Municipal Manager as Accounting Officer of municipal funds, assets and liabilities is responsible for the effective implementation of the asset management policy which regulates the acquisition, safeguarding, maintenance of all assets and disposal of assets where the assets are no longer used to provide a minimum level of basic service as regulated in terms of section 14 of the MFMA.	In place
Liquidity Policy	The documented policy sets out the minimum risk management measures that Stellenbosch Municipality has to implement and adhere to ensure that its current and future liquidity position is managed prudently.	In place
Virement Policy	The policy sets out the virement principles and processes which the Stellenbosch Municipality will follow during a financial year. These virements will represent a flexible mechanism to effect budgetary amendments within a municipal financial year.	In place

10.4 Financial Strategies and Programmes

The optimal use of available resources, the maximum raising of revenue, and the sustainable delivery of services are the key elements of a successful financial strategy. The municipality has developed and implemented various strategies in this regard. The table below summarises the key strategies:

Table 128: Key Financial Strategies

Strategy	Currently in Place
Financial viability and sustainability through long-term financial planning	• Long-term financial planning tool effective implementation and monitoring.
Clean Audit	• Audit Action Plan • Annual Financial Statement compilation standard operating procedure • Monthly Reconciliations • Training Sessions • Participation in Forums
Staffing	• Revised Organogram • Fill critical vacancies
Capital expenditure	• Implementation of Project Management System including in-year reporting
Revenue Enhancement Strategy	• Implementation of Revenue Enhancement Strategy • Roll-out of WMD and Pre-payment Water Meters • Data cleansing • Validity of registered indigent households
Billing system enhancement	• Web-based billing system • Review of Municipal Account Layout • Investigate payment methods
Debt management	• Debt Review Committee • Quarterly Report on Debt and Possible Debt to be written off



10.5 Medium – Term Capital Expenditure per Strategic Focus Area

The proposed capital expenditure per strategic focus area over the medium term is illustrated in the table below:

Table 129: Capital Expenditure per Strategic Focus Area

Strategic Goal	2025/26	2026/27	2027/28
SFA 1 - Valley of Possibility	225,699,088	184,465,897	130,951,022
SFA 2 - Green and Sustainable Valley	37,523,970	47,287,156	18,048,425
SFA 3 - Safe Valley	38,311,340	50,939,800	55,000,086
SFA 4 - Dignified Living	278,268,161	322,537,143	278,494,778
SFA 5 - Good Governance and Compliance	62,687,617	41,961,935	36,233,673

Figure 53: Capital Expenditure per Strategic Focus Area

Source: Capital Budget 2025/26

The most capital-intensive strategic focus area is Dignified Living, with an allocation of R278,3 million in the upcoming financial year, totalling R879,3 million excluding VAT over the MTREF. Water and Wastewater Services: Sanitation projects dominate this strategic objective, receiving an investment of R87,3 million in 2025/26, and it is increasing over the outer financial years.

The second most capital-intensive strategic focus area is Valley of Possibility, with a total allocation of R541 million for the duration of the MTREF period. Project highlights include:

- Bien don 66/11kV substation new
- Electrification INEP;
- Kayamandi (Costa grounds) new substation 11 kV switching station;
- Bulk Water Supply Pipe and Reservoir: Stellenbosch; and
- Bulk Water Supply and Pipeline: Franschhoek

The Safe Valley strategic focus area receives the 3rd highest capital investment, with the total MTREF budget amounting to R144,2 million. Projects highlighted include:

- Fire Station - Jamestown
- Adam Tas - Technopark Link Road
- Ad Hoc Provision of Streetlighting
- Non-Motorised Transport Implementation
- Park and Ride (Transport Interchange)

The municipality is also making a concerted effort to improve ICT infrastructure platforms, allocating R34,5 million for this purpose over the multi-year budget period.

10.6 Medium – Term Operational Expenditure

The proposed Operational Expenditure per Strategic Focus Area over the medium term is illustrated in the table below.

Table 130: Operational Expenditure per Strategic Focus Area

Operational Expenditure	2025/26	2026/27	2027/28
SFA 1 - Valley of Possibility	99,407,214	107,296,251	105,931,273
SFA 2 - Green and Sustainable Valley	5,531,598	5,683,675	5,840,867
SFA 3 - Safe Valley	180,357,455	188,679,548	197,354,837
SFA 4 - Dignified Living	376,065,871	426,660,619	436,580,673
SFA 5 - Good Governance and Compliance	2,065,988,904	2,229,509,950	2,405,255,453

10.7 Medium–Term Operational Revenue per Strategic Focus Area

The proposed Operational Revenue per Strategic Focus Area over the medium term is illustrated in the table below.

10.9 National and Provincial Investment

The following tables depict the National and Provincial allocations to the municipality over the MTREF period. It should be noted that the information is subject to change depending on fiscal constraints and the availability of resources.

The table below sets out the allocations by the national government for the MTREF period for Stellenbosch Municipality.

As indicated in the table below, the total National allocation for Stellenbosch amounts to **R312,4 million** for the 2025/26 financial year.

Table 138: National and Provincial Investment

National Allocations / Provincial	2025/26	2026/27	2027/28
Stellenbosch Municipality			
Equitable Share	231,793,000	246,166,000	257,298,000
Integrated Urban Development Grant	64,530,000	46,603,000	48,691,000
Integrated National Electrification Programme (Municipal) Grant (Schedule 5)	6,188,000	9,943,000	10,392,000
Energy Efficiency and Demand Side Management Grant	5,000,000	5,000,000	
Local Government Financial Management Grant	1,700,000	1,800,000	1,900,000

CHAPTER 11:

Organisational Scorecard (5 – years)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between the Council, administration, and the community. It gives effect to the IDP and budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly, and annual performance reports must also be submitted to the Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one-year detailed implementation plan that gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council, and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis for measuring the performance in service delivery against end-year targets and implementing the budget.

Indicators developed for the Stellenbosch Municipality address the Strategic Focus Areas (SFAs) of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers its service delivery mandate by indicating clear indicators and targets. These indicators also form the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The five necessary components are:

1. Monthly projections of revenue to be collected for each month;
2. Monthly projections of expenditure (operating and capital) and revenue for each vote;
3. Quarterly projections of service delivery targets and performance indicators;
4. Ward information for expenditure and service delivery; and
5. Detailed capital works plan broken down by ward over three years

11.1 Five-Year Top-Level Service Delivery and Budget Implementation Plan (SDBIP)

The SDBIP gives effect to the Integrated Development Plan (IDP) and is essentially the management and implementation tool setting out the quarterly service delivery targets.

The Top Layer SDBIP includes the main service delivery indicators of the municipality. The following table reflects the 5-year Implementation Plan of the Integrated Development Plan:

Note: The Five-year Municipal Scorecard will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP). The TL SDBIP must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget, to be tabled in the Council during May.

CHAPTER 12:

Implementation, Monitoring and Review (1 – year)

The Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) requires that municipalities prepare a Service Delivery and Budget Implementation Plan (SDBIP) as a strategic financial management tool to ensure that budgetary decisions that are adopted by municipalities for the financial year are aligned with their strategic planning tool, the Integrated Development Plan (IDP). The SDBIP is a contract between Council, administration, and the community. It gives effect to the IDP and budget of the municipality.

The municipal budget shall give effect to the Strategic Focus Areas as contained in the IDP. The Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) shall contain details on the execution of the budget and information on programmes and projects. Quarterly, half-yearly and annual performance reports must also be submitted to the Council as a means to monitor the implementation of the predetermined objectives as contained in the IDP.

The SDBIP is a one–year detailed implementation plan which gives effect to the IDP and Budget of the municipality. It is a contract between the administration, Council and community expressing the goals and objectives set by the Council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis of measuring the performance in service delivery against end year targets and implementing budget.

Indicators developed for the Stellenbosch Municipality addresses the Strategic Focus Areas of the municipality. The municipality utilises the one-year TL SDBIP to ensure that it delivers of its service delivery mandate by indicating clear indicators and targets. These indicators also form the basis of the performance plans of the Directors, hence, the Directors are being evaluated on the approved TL SDBIP indicators.

The **five** necessary components are:

- Monthly projections of revenue to be collected for each month;
- Monthly projections of expenditure (operating and capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators;
- Ward information for expenditure and service delivery; and
- Detailed capital works plan broken down by ward over three years.

Note ***This chapter, the one-year Municipal Scorecard, will be updated in accordance with the approved Top Layer (TL) Service Delivery and Budget Implementation Plan (SDBIP) 2025/26 during June 2025 and, therefore, it is subject to change. The TL SDBIP 2025/26 must be approved by the Executive Mayor within 28 days after the adoption of the Municipal Budget to be tabled in the Council in May 2025.***

Subject: [EX] Speed limit sign and /or pedestrian crossing

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hello there,

I would like to send a note to your consideration please for the Integrated Development Plan for roads and safety of Franschhoek.

As you enter town and passed the sign of Franschhoek and technically in built up area there is no speed limit sign of 50 km/h or less. It is practically impossible to cross the road between petit Provance and Wiesenhof lifestyle centre as well as between La Farme Chantelle and Old rd Wine. I would suggest to integrate a pedestrian crossing somewhere between the two estate there across the main rd as well as installing a speed limit entering Franshhoek passed the “Franschhoek stone sign”. However I understand, people knowing rules should presume the lower speed limit entering town, in my experience a lot are not and there is a lot of traffic lately.

I hope you can consider those points and integrate at least one or both.

If you would like further explanation or any other feedback please let me know and I will do my best to elaborate further.

Kind regards,
Julia C

Beste Hennie,

Baie dankie, ek waardeer dit dat jy die brief skryf. Ons voel net so. Ek kan ook fotos stuur van my garage, swembad, ens.

Verder het ons verlede week by die Wyksbyeenkoms gesels oor die Woonerf idee. Iemand het gevra wat geword het van die “groen” strook tussen HSS en Merrimanlaan — dit is deel van die probleem, want voertuig, vlagmotors, en busse jaag daaroor heen en behalwe dat dit ’n veiligheidsrisiko vir fietsers, voetgangers, en scooter ryers is, dra dit by tot die stof en sand probleem.

Ek wil graag weet wat die Municipaliteit se planne is om die toestroming van voertuie en Uber bestuurders (wat reg oorkant ons huis parkeer en die hele dag in ons erf instaar) te bestuur. Daar is baie parkeerplekke in Jannashstraat wat skaars gebruik word...

Vriendelike groete,

Hans

>
> Dit was weereens geweldig erg met die wind wat in die week van 12 tot 16 Maart 2025 gewaai het. Die sand word in ons huis, motorhuis, geute en swembad gewaai. Veral met die swembad is groot onkoste aangegaan om dit skoon te kry. Dit is verstommend hoe die huis se geute verstop word met die sand.

Ek vra baie mooi dat daar asseblief so gou moontlik opgetree word om dié euwel teen te werk. Dit sal waardeer word indien daar met die betrokke huiseienaars onderhandel sal word oor die planne hoe om die probleem op te los. Ek wil nie eers kennis neem van wat gaan gebeur as die werk begin nie!

Ek wil ook net noem dat ons terdeë bewus is van die feit dat heelwat van die sand en stof as gevolg van die werkery by die Skool is/was, en ook agv die droogtetoestande van die afgelope maande. Dit is egter al jare dat ons sukkel wanneer die winde waai met dié dat daar geen plaveisel/gras/teer of enige ander stewige bedekking op die breë oop stuk aarde tussen Jannaschstraat en Simonsbergweg is nie.

Ek wil net noem dat ek foto's van my motorhuis geneem het wat die walle sand wys. Ek het ook vir mnr Raymond Lofty-Eaton gevra om te kom kyk.

By voorbaat dankie

Geagte Heer

(Hierdie brief is net so op al die eienaars in Merrimanlaan in die omgewing van die Skool van toepassing)

Ek wil deur hierdie skrywe 'n ernstige klag noem met betrekking tot die probleem van stof en sand wat met sterk suid/suidoostelike winde gepaard gaan. Die wind waai dit vanaf die Hoërskool Stellenbosch se kant.

Dit was weereens geweldig erg met die wind wat in die week van 12 tot 16 Maart 2025 gewaai het. Die sand word in ons huis, motorhuis, geute en swembad gewaai. Veral met die swembad is groot onkoste aangegaan om dit skoon te kry. Dit is verstommend hoe die huis se geute verstop word met die sand.

Ek vra baie mooi dat daar asseblief so gou moontlik opgetree word om dié euwel teen te werk. Dit sal waardeer word indien daar met die betrokke huiseienaars onderhandel sal word oor die planne hoe om die probleem op te los. Ek wil nie eers kennis neem van wat gaan gebeur as die werk begin nie!

Ek wil ook net noem dat ons terdeë bewus is van die feit dat heelwat van die sand en stof as gevolg van die werkery by die Skool is/was, en ook agv die droogtetoestande van die afgelope maande. Dit is egter al jare dat ons sukkel wanneer die winde waai met dié dat daar geen plaveisel/gras/teer of enige ander stewige bedekking op die breë oop stuk aarde tussen Jannaschstraat en Simonsbergweg is nie.

Ek wil net noem dat ek foto's van my motorhuis geneem het wat die walle sand wys. Ek het ook vir mnr Raymond Lofty-Eaton gevra om te kom kyk.

By voorbaat dankie

Hennie vd Merwe

Attachments: IDP and Budget Public Participation Schedule - April 2025 - v6.pdf

Dear Mr Davids,

Thank you for your email. It is much appreciated.

The IDP and Budget Public Participation meetings are conducted using an area-based public participation model. In the case of Ward 3, it is grouped with Ward 4, collectively referred to as the Dwarsriver Valley Area.

The time, date, and venue were discussed with both councillors during the planning stage of the meetings. Thereafter, the schedule of meetings is presented to the Speaker of the Council for consideration and approval.

At this point in time, the schedule is already distributed to all municipal account holders and published on various social media platforms of the municipality and in various WhatsApp groups of the councillors and ward committee members. Please refer to the attached schedule of meetings.

You will note from the schedule of meetings that the municipality is making transport available to community members to attend the meeting to submit their input verbally.

In addition to this, should a community member be unable to attend the meeting to submit their input verbally, the municipality has made available various other mechanisms for community members to submit their input. Please see below the infographic with respect to hereto.

For future meetings, please submit any suggestions / proposals to your ward councillor or ward committee member, or to the Speaker of the Council for consideration during the planning stage of the meetings.

Sincerely yours,

IDP/PMS/PP Team

_____

Dear Idp

I am the Chairperson of our Concerned Residents in Ward 3.

We would like to request if possible that the Idp meeting in Ward 3 that's scheduled for 8 April 2025 can be moved from Wemmershoek Community Hall to the Millennium Hall in Pniel please.

This is more central venue to accommodate most of our residents around.

Kindly consider our request please.

Warmest Regards
Isaac Davids

Stellenbosch, 7599

Dear Sir/Madam,

RE: REQUEST FOR THE INCLUSION OF PORTION 7 OF FARM 744 INTO THE KLAPMUTS URBAN EDGE

I am writing to submit a duly motivated request for the inclusion of a portion of Portion 7 of Farm 744 within the urban edge of Klapmuts for urban development purposes. This request is based on several factors, including the property's low agricultural potential, alignment with existing development initiatives, and the potential for contributing to the long-term growth and prosperity of the region.

1. Soil Survey and Agricultural Viability
A detailed soil survey conducted by Mr. B. Schloms in 2008 indicated that the soil potential on the property is predominantly medium-low to medium, with very low clay content. This is considered a limitation for plant growth, further substantiating the limited agricultural potential of the land. The agricultural output of the land has continued to decline, with harvest tonnages dropping significantly from 164.60 tons in 2023 to 102.56 tons in 2024 (a 37.7% decrease), and further to 85.29 tons in 2025 (a 16.84% decrease). This represents a total drop of 48.2% in tonnage between 2023 and 2025, confirming the unsuitability of the property for productive agricultural use.

2. Previous Approvals and Development Proposals
The Western Cape Department of Agriculture has no objection to the proposed development, as reflected in their letter dated 26 June 2017. The Stellenbosch Bridge development, which borders the land we are seeking to include within the urban edge, serves as a valuable example of successful urban expansion. Our proposed development aligns with this model and would follow similar principles. This proposed inclusion is a fraction of the already approved Stellenbosch Bridge development, supporting the ongoing growth and infrastructural needs of the area.

arra
VINEYARDS

3. Access and Community Needs
The proposed inclusion of the property would also facilitate better road access, particularly from the R44 to the Stellenbosch Bridge development, which would greatly benefit the Klapmuts community. It is evident that Klapmuts requires improved access routes, and the incorporation of this land into the urban edge could contribute significantly to addressing this critical need.

4. Geometrical and Sustainable Urban Edge Alignment
Incorporating this portion of the property into the urban edge would result in a natural and manageable outer edge for the town of Klapmuts, taking into account the existing low-cost housing initiative and its proposed expansion to the north. This would provide a more geometrically coherent boundary for the town, reducing the risk of future developmental pressure. The inclusion would also help prevent a jagged urban edge, which could create undesirable future development pressures.

5. Flood Risk and Dam Construction
The existing Mandela Park and low-cost housing area, located less than 10 meters from the Klapmuts Zicht Dam (12/2/G204/CM), presents a significant flood risk, as the dam holds 300,000m³ of water. The inclusion of the property within the urban edge could facilitate the construction of a new dam, mitigating the flood risk to many lives and allowing the redirection of rainfall water from the Klapmutskop mountain. This has been a concern raised with the municipality multiple times.

6. Protection of Agricultural Areas
The property is situated between the existing low-cost housing initiative and the mixed-use area known as Potbelly Pantry, as well as the proposed development on Farm 717. Its inclusion would not only support urban growth but also protect the larger agricultural lands to the south, which have higher agricultural potential. The objective of urban edge delineation is to safeguard these agricultural entities from the encroachment of urban sprawl, and the inclusion of this land would contribute to this protective measure.

7. Heritage and Long-term Economic Growth
No heritage resources of value are found on the property, further supporting the suitability of this land for urban development. Inclusion in the urban edge would facilitate the formalisation of Klapmuts, providing an opportunity for the sustainable growth of the town while protecting valuable agricultural land from leapfrog development. The effective management of the urban edge would ensure the protection of the larger agricultural farms to the south, contributing to long-term economic growth and stability.

arra
VINEYARDS

We believe that the inclusion of Portion 7 of Farm 744 within the urban edge will significantly benefit the development of Klapmuts, improve infrastructure, protect agricultural resources, and promote the sustainable growth of the region. We trust that this submission will be considered favourably in light of the points outlined above.

Thank you for your consideration of this request. We look forward to your response and are available to provide any additional information if required.

Yours faithfully,

.....

Subject: [EX] Request for Transparency on the Adam Tas Corridor and Immediate Action on Traffic Congestion

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear IDP Office,

I am writing to contribute to the 3rd Review of the 5 Generation IDP 2022 – 2027 to raise two key issues

1. **Transparency and urgency regarding the Adam Tas Corridor** and
2. **Immediate action on traffic congestion in central Stellenbosch**.

Adam Tas Corridor – Transparency and Public Accountability

The Adam Tas Corridor is a critical infrastructure project with the potential to enhance mobility, support economic development, and reshape Stellenbosch's urban future. However, there has been a **lack of transparency** about its status, phasing, and progress. As residents, we are left in the dark without clear communication from the municipality.

I urge the municipality and council to take the following steps:

Provide regular public updates on the Adam Tas Corridor project, including:

- A timeline of all phases
- Expected completion dates
- Challenges or delays encountered
- Achievements to date

Host a public engagement forum where residents can ask questions, receive honest answers, and contribute input to a project that will directly impact our lives.
Transparency is not optional but essential for public trust and democratic accountability. The Adam Tas Corridor is too important for silence and uncertainty.

Traffic Congestion – Time for Immediate, Visible Action

Stellenbosch is in gridlock. **Traffic congestion continues to worsen**, especially in and around the CBD and along main commuter routes like the R44. Despite being a repeated IDP priority, there has been **no visible progress**.

As a practical, immediate step, I support the **urgent implementation of park-and-ride facilities** modelled on the successful Woordfees system. The land is available, the model is proven, and the need is urgent. Further delays are indefensible.

As major traffic generators, the municipality and Stellenbosch University should lead by example by adopting a park-and-ride for staff and students.

We ask that the council treat the Adam Tas Corridor and the traffic congestion crisis as matters of priority and public accountability.

Sincerely,
Doreen Hall

Good morning to the IDP team

Please find my attached input regarding the traffic congestion problem in Stellenbosch. I decided to submit this after attending a Young Urbanisits meeting last week to discuss this pressing problem that Stellenbosch is facing.

I hope you find my thoughts on the matter constructive.

Kind Regards

Subject: Urgent Submission on Traffic Congestion for the 2025-26 IDP

Dear IDP Office,

I am writing to provide input for the 2025-26 Integrated Development Plan (IDP) regarding the worsening traffic congestion in Stellenbosch, emphasising the need for immediate, practical solutions.

The Congestion Crisis
Traffic congestion remains a persistent challenge in Stellenbosch, undermining quality of life and economic vitality. Despite its recognition as a priority in Ward 9 and past IDPs, no progress has been made. As major contributors to traffic—through municipal staff, students, and visitors—the municipality and Stellenbosch University are responsible for leading effective solutions.

Park-and-Ride: A Ready Solution
A park-and-ride system offers a proven, feasible way forward:

1. **Proven Success**: The annual Woordfees shows it works—minibus taxis efficiently shuttle attendees into town, easing CBD congestion.
2. **Existing Plans**: The municipality has identified suitable land, and the IDP already prioritises sustainable transport options like park-and-ride.
3. **Quick Implementation**: With decisive leadership, a permanent system with secure parking and regular shuttles could be operational within months.

Specific Recommendations

1. **Launch Park-and-Ride Now**: Model it on Woordfees and privatise operations if funding is limited.
2. **Encourage Use**: Reduce CBD parking spaces and increase fees to reflect congestion costs, making park-and-ride the smarter choice.
3. **Set the Standard**: Require the municipality and university to adopt park-and-ride for their own staff and students.

A Call for Action
The IDP is more than a plan—it's a promise to residents. Further delays are unacceptable. I urge the municipality and council to act swiftly and deliver a park-and-ride system as a cornerstone of the 2025-26 IDP.

Thank you for considering this submission. I am eager to see tangible results.
Sincerely,

Neville Lahner
083 777 5220
5 Middebosch, 163 Dorp Street, Stellenbosch.

Subject: [EX] Formal Submission to the 2025-26 Integrated Development Plan

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

8 April 2025

Subject: Comprehensive Submission on Addressing Traffic Congestion in Stellenbosch

Dear IDP Office,

I write to submit a formal contribution to the 2025-26 Integrated Development Plan (IDP), which addresses one of Stellenbosch's most critical and unresolved challenges: **traffic congestion**. This submission draws from existing community input, previous IDP priorities, and the municipality's **Comprehensive Integrated Transport Plan (CITP)**.

1. **The Congestion Crisis in Stellenbosch**

Traffic congestion in Stellenbosch is more than an inconvenience—a daily crisis undermining productivity, sustainability, and quality of life. Despite recurring commitments in past IDPs, including prioritising congestion-reducing infrastructure in Ward 9, residents have yet to see meaningful action or results.

Treating congestion as a long-term issue requiring endless discussion is no longer acceptable. As key contributors to traffic—via university staff, students, municipal staff, and visitors—**Stellenbosch University and the Municipality** must lead by example and take visible steps toward practical, sustainable transport solutions.

2. **Immediate, Practical Intervention: Park-and-Ride Facilities**

Among the most consistent and widely supported proposals is the implementation of a **comprehensive park-and-ride system**:

- **Proven Effectiveness**: Each year during *Woordfees*, a temporary park-and-ride system operates successfully, using l minibus taxis to shuttle attendees into town. This model is safe, reliable, and replicable.
- **Available Resources**: The municipality has already identified suitable land. There is no need for lengthy feasibility studies.
- **Community Support**: More than 70 people attended a meeting of the Young Urbanists on 2 April 2025, and park-and-ride was highlighted as one of the most urgent and consistent public priorities.
- **Quick Turnaround**: With the right leadership, park-and-ride facilities—whether operated municipally or through public-private partnerships—could be operational in months.

Recommended Actions:

- **Implement a permanent park-and-ride system** modelled on the *Woordfees* example.
- If funding is constrained, **engage private operators** to develop secure, well-managed parking areas with regular shuttles to the CBD.
- **Create incentives** to promote use, including:
    - Reducing CBD parking spaces.
    - Increasing parking tariffs in high-demand areas.
    - Designating park-and-ride as the default transport option for municipal staff and university students.

3. Structural Solutions in the Comprehensive Integrated Transport Plan

While park-and-ride is a necessary first step, the broader vision must include **structural interventions** from the CITP to build a modern, sustainable transport system:

- **Develop a Public Transport Lane** on the R44 to facilitate fast, dedicated access for shuttles and minibus taxis.
- **Establish a Stellenbosch Rapid Transit System**, similar to Cape Town's Integrated Rapid Transit (IRT), serving areas like Welgevonden, Jamestown, Kayamandi, Cloetesville, and the growing developments along the R304.
- **Student Shuttle Services**: Develop targeted routes from student residences and surrounding neighbourhoods to reduce reliance on private vehicles.
- **Pedestrianise Key CBD Streets** to reduce inner-city traffic and prioritise walkability.
- **Tour Bus Management**: Regulate routes and stops to prevent tour buses from congesting the CBD.
- **Investigate a Congestion Charge** strategy for non-local vehicles entering the CBD during peak times.

4. Call to Leadership and Accountability

Adopting the IDP is not symbolic but a binding commitment to Stellenbosch's residents. A failure to implement its stated priorities erodes public trust and prolongs a solvable problem.

Residents are not calling for more discussions but demanding visible, effective action. **Leadership means delivery**, and we urge this council to be the administration that finally turns commitments into concrete results.

5. Conclusion

The 2025-26 IDP must respond to the reality that **Stellenbosch is at a tipping point**. Either we act now to reduce congestion or accept a future defined by inefficiency, frustration, and decline.
We urge the municipality to:

- **Implement park-and-ride without further delay**.
- **Mobilise the Comprehensive Integrated Transport Plan** to unlock long-term mobility solutions.
- **Demonstrate leadership by setting an example** through municipal and university transport choices.

The time for excuses is over. The residents of Stellenbosch are watching—and we are ready to support decisive, forward-looking action.

Sincerely,

Teddy Hall

To: idp
Subject: [EX] IDP comment

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

Herewith are my IDP comments specifically related to Pniel (Ward 4) where I reside:

1. There is a river crossing from Lanquedoc to (Riverside Street, Pniel). As a result, many people from Lanquedoc are strolling along in Riverside Street and adjoining streets (i.e. Pastorielaan). Some are loitering in the area. These are residential parts of Pniel. There are already two other routes from Lanquedoc to Pniel from the town limits via the main road. So, it makes no sense to have a third route going through residential streets. There is a Community Safety aspect as there has been an increase in burgularies in adjoining streets (e.g. Pastorielaan). This river crossing is also the location of children's playpark on the Pniel side. I therefore request that the river crossing into Pniel be closed and made inaccessible (with accompanying clear warning signage).

2. Pniel suffers from a disproportionately high number of NON-loadshedding related power outages.
- When bad weather (esp. wind) hits, a power outage in Pniel is very likely. However, the municipality does NOT trim the trees lining the roads (next to the power lines) in Pniel & Franschhoek areas. These trees present a hazard to powerlines and other electricity infrastructure during bad weather.
- There has also been cable theft (reportedly at the same few spots at the same late night/early morning times). I request that the Municipality's law enforcement & SAPS officers devise a schedule of patrols along these repeat cable theft hotspots.
- Some non-loadshedding power outages are ESKOM's responsibility, because they are caused by problems at their substations. When Municipal employees are contacted about such outages, there should be greater effort on the part of Stellenbosch Municipality to follow up with ESKOM wrt progress reports.
- Similarly, there should be greater coordination with Drakenstein Municipality, when the power outage in Pniel is being caused by a problem within the territory of Drakenstein Municipality.

3. There is an informal settlement called "Die Gif" located next to the Pniel graveyard. Allowing such an informal settlement to develop in a town like Pniel where there are few businesses who can create jobs does not make sense. The residents of this informal settlement should be resettled to an area of greater economic activity (e.g. Stellenbosch itself).

Here are my comments regarding the town of Stellenbosch itself:

1. Stellenbosch parking
- There is a lack of parking spaces in general. The municipality's forecasting for the town's required parking seems to exclude the number of students who have vehicles who might need parking when shopping (as an example).
- There are far too few FREE PARKING facilities in town.

- Stellenbosch Municipality has allocated a third of previously available open air parking spaces at Eikestad Mall to its own employees/vehicles. The result: A chronic lack of parking for potential shoppers at Eikestad mall.
- In Banghoek road in Stellenbosch, students are parking on the sidewalk and non-parking spaces (bordering on the road itself). Can Stellenbosch Municipality and Stellenbosch University not jointly develop an area for proper student parking?

Comments on General policies of Stellenbosch Municipality:

1. Rebate for senior citizens
- threshold of R17000 is too low and out of touch with the cost of living.
Suggestions:
- there should be a tiered system as follows:
a) Over-65s should be exempted from paying if they earn e.g. less than R30 000.
b) Over-80s should be completely free from paying REGARDLESS of their level of monthly income.

I hope the above comments will be considered favourably.

Regards
Eben November

Subject: [EX] IDP comments re property valuations

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

Herewith my additional IDP comments with regard to Stellenbosch Municipality's Property Valuations policy:

Currently, the valuation the municipality assigns to a plot (including the dwelling upon the plot) is primarily based on the price for which another plot in a neighbouring street has been sold and therefore unrealistically inflated. There are several factors that the municipal valuation policy ignores. Using Pniel as an example, the municipal property valuation "formula" ignores:
1. The presence of an informal settlement ("Die Gif") within Pniel;
2. The existence of low-cost housing both within Pniel and in neighbouring Lanquedoc;
3. The lack of employment opportunities within Pniel and the need to travel to bigger centres such as Stellenbosch for such opportunities;
4. The lack of stores within Pniel and the need to travel to bigger centres such as Stellenbosch for shopping;
5. The closing of the local Post Office in Pniel and the need to travel to bigger centres such as Stellenbosch for such services or incurring the cost of private courier services.
6. The consistency and reliability of municipal services such water and electricity in Pniel is also ignored. In my street, for example, water supply has been interrupted approximately 20-plus times during the past year because of unplanned and unannounced maintenance/repairs. A similar state of affairs exists in terms of electricity supply. This is not reliable service delivery.
7. Plot-specific details are also ignored or disregarded. For example, if a property owner has or has never added an extension to his house, it should be taken into account.
8. Potential for Gentrification as an effect of inflated property values. These inflated valuations will invariably lead to (a) it becoming more expensive for current residents to pay property tax & rates and (b) only higher income individuals being able to afford to buy properties in Pniel. Under the current "based on nearby selling prices" property valuation system, this cycle will repeat and further inflate property values, and so forth. Since Pniel was historically (and to a degree still is) inhabited by the descendants of freed slaves, this gentrification has an unfortunate racial aspect, because current residents are mostly coloured and the higher income individuals who can afford to pay hyper-inflated selling prices are more likely to be white. The municipality should carefully consider if it truly wants to change the demographic make-up, heritage and character of a historic town like Pniel in such a manner.

Surely, the above factors should be considered (and, in fact, be given more weight than the selling prices of nearby properties) when calculating property valuations. The first SIX factors should decrease property valuations in the case of Pniel, but the municipality could assess every town and neighborhood in its territory using these factors. Factor number seven requires inspections of plots by municipal officials or at least checking building inspector records. Factor number eight is represents a vicious cycle and is inevitable if the policy is left unchanged.

Regards,
Eben

Subject: [EX] IDP comment differences in responsiveness

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

Herewith my additional IDP comments with regard to differences in Stellenbosch Municipality's Responsiveness to requests by different communities or stakeholder groups:

Residents of Pniel have for more than a decade requested - nay, begged - the municipality to tear down the informal settlement known as "Die Gif" (located next to the Pniel cemetery) and to relocate Gif inhabitants, but to no avail. To this day, Stellenbosch Municipality has simply ignored Pniel residents.

Now, compare Stellenbosch Municipality's response to similar requests regarding another informal settlement located across the road (i.e. the R45) from the Meerlust Community and next to the railway tracks. For a few years, Stellenbosch Municipality did nothing to remove this informal settlement. Then The Wine Tram (i.e. a tourism venture which transports tourists between Franschhoek, Simondium, and Stellenbosch wine estates for wine tastings, etc.) was established. Lo and behold, a miracle occured! The informal settlement (located next to the railway track used by The Wine Tram) was dismantled within a year and there is currently no trace that it ever existed.

The above clearly indicates which stakeholder opinions are more valued by Stellenbosch Municipality: The wishes of wine estate owners and tourism operators were acted upon, while the wishes of ordinary residents were not (even though they essentially requested the same thing).

Regards
Eben

Subject: [EX] IDP comment re consistency of services in terms of timing

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

Herewith my additional IDP comments regarding the inconsistent timing of certain services.

Two examples of inconsistent timing in terms of the rendering of certain municipal services:

1. Electricity and water meter reading usually takes place between the 18th and the 21st of each month, but sometimes meter readers show up unexpectedly as early as the 16th and as late as even the 24th of the month. In Pniel with its crime/safety issues (since the arrival if low-cost housing in Lanquedoc and the informal settlement in Pniel itself), it's not advisable to keep your gate unlocked for more than is necessary. So, it would be helpful if meter readers CONSISTENTLY did readings within a narrower band of dates (e.g. the 18th to the 21st).

2. Refuse Collection. In Pniel, refuse is collected on a Thursday. However, the exact pick-up time varies widely. Mostly, refuse is collected between 10h30 and 12h00, but sometimes it is collected at 16h00 and even as late as 18h30 or 19h00 without explanation. When we contact the municipality to enquire when or if refuse will still be collected on that day, the municipal officials often cannot give an answer. A more consistent collection time would be appreciated. In addition, better communication between refuse teams and contact persons at municipal offices as well as between these contact persons and residents is needed (re updates).

Regards
Eben

Subject: [EX] Additional IDP comments

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

To whom it may concern:

Herewith my additional IDP comments:

Helshoogte pass and the rest of the R310 heading toward Pniel:
1. It is illogical to me that cyclists are permitted to ride along this dangerous mountain pass. Cyclists on this route often disobey traffic rules (e.g. two or three cyclists riding next to one another instead of riding single file; no use of hand signals; weaving from beyond the yelow line into the lane and vice versa without warning).
2. These cyclists often use turn-offs/entrances into estates such as Tokara as gathering points (obstructing the flow of traffic). This is clearly a safety hazard.
3. Cyclists often ride into Pniel beyond the point where the yellow line ends. Therefore, there is no space for them to take evasive action if needed.
Clearly, traffic officers are required on Helshoogte pass to police these violations (especially on Saturdays and Sundays).

Franschhoek:
Many motorists travelling on the R45 from Franschhoek towards Stellenbosch or Paarl drive at speeds of 120km/h and above. There is not a week that goes by that residents of Pniel don't hear ambulance sirens coming from Stellenbosch heading towards Franschhoek (usually because of a traffic/ car accident). I would like to make three recommendations: 1. Reduce the speed limit to 80km/h on the R45 untill it reaches the R310 turn-off (heading towards Pniel/Stellenbosch). 2. Post visible speed cameras and traffic officers on that stretch of road. 3. Establish a base in the Franschhoek area where two ambulances and a sufficient number of paramedics can be stationed. I mention this, because the trip from Stellenbosch to Franschhoek is approximately 25-30 minutes and roundtrip is approximately 50-60 minutes. Over the years, this transport delay has led to fatalities, because patients could not reach Stellenbosch hospitals in time. About a decade ago, a space was furnished for paramedics at La Motte (Franschhoek) near the Working for Water offices, but paramedics did not want to be stationed outside of Stellenbosch. Surely, this "the tail wagging the dog" situation should not be allowed to persist at the potential cost of lives.

Here are my additional IDP comments regarding street and sidewalk planning in Stellenbosch:

1. There are several streets or entrances where the sidewalks are far too wide and the actual tarred roads/entrances are far too narrow.
Examples:
a. The entrance to the municipality-run parking lot behind Mill Street Checkers. It is so narrow that there is no Centre line drawn. This entrance should be made half a meter wider - this can be annexed from a large lawned area on the one side (currently cordoned off by planted concrete security posts

a.k.a bollards). It also seems that municipality is more concerned with maintaining an old oak tree that is next to lawned area than making a more practical/safer entrance.
b. The sidewalk at the corner of Piet Retief Street and Ackerman Street has a near right-angle (90 degrees) shape and is so wide (5-6 meters) that vehicles turning on to Retief street struggle to stay in their lane when making the turn. The same goes for the corner of Ackerman Street and Koch Road nearby. Surely, the municipality can make these corner sidewalks more curved in shape and reduce their width (from the current ridiculously wide 5 meters).

2. There are far too many roundabouts and mini-circles in Stellenbosch. The positions of the pedestrian crossings are also far too close to these circles, where two cars cannot properly exit the circle when a pedestrian is walking across. The first car is forced to stop just outside the circle and if a second car planned to take the same exit, they run the risk of rear-ending the first car or stopping inside the circle/roundabout. In other words, some space or distance between the circle/roundabout and the nearest pedestrian crossing would be welcome.

Regards,
Eben

Furthermore, there is credible concern that certain individuals within the local municipal structures may be acting as informants for the aforementioned parties.

Municipal Manager
Stellenbosch Municipality

Request for Urgent Intervention Regarding Refuse Collection Point – Welmoed Farms 468/10, Annandale Road

Dear Sir/Madam,

Thank you for your time and continued service to our community.

I am writing on behalf of several property owners located along Annandale Road, particularly those situated on and around the Welmoed farms. For the past eight years, municipal refuse removal for these farms has been consistently collected from a designated collection site along the road, as directed by the Stellenbosch Municipality. This location has functioned without issue, in accordance with the municipality's own guidelines and operational practices.

We were recently informed by the owners of Farm Welmoed 468 Portion 10, namely the Zetler family, that we are no longer permitted to place our municipal refuse bins at the long-standing designated collection point. This decision was communicated unilaterally and without prior engagement or consultation with the affected residents.

To the best of our knowledge, the land in question is not privately owned by the Zetler family, but rather believed to be under the ownership of the Department of Transport or another state entity. In light of this, and given that the area has been used continuously for over eight years for public service delivery without objection, it would appear that established usage rights may apply.

We respectfully and urgently request that the Stellenbosch Municipality investigate the ownership and status of the land in question, and engage directly with the Zetler family to resolve this matter. The sudden denial of access to the collection point is effectively obstructing our access to a paid municipal service, and if unresolved, will lead to sanitation and environmental issues in the area.

Legal Context:
Under South African law, continued and uninterrupted use of land for a specific municipal purpose, such as refuse collection, may be recognised under long-term land use principles. The *Spatial Planning and Land Use Management Act, requires fair administrative processes and planning decisions to be in the public interest. In addition, Stellenbosch Municipality's own Integrated Waste Management Plan and Refuse Collection By-laws affirm the right of residents to accessible and consistent municipal refuse services.

We trust that the municipality will act swiftly to ensure service continuity and to prevent further dispute.

Yours sincerely,
Regards
Riaan Eastes

Confidential Communication
Subject: Urgent Concerns Regarding Unlawful Developments and Procedural Irregularities – Request for Immediate Attention
To: Stellenbosch Municipality | Department of Environmental Affairs | Department of Water and Sanitation
Dear Mr. Williams and Respective Officials,
We hereby respectfully request that our identities and the contents of this communication remain strictly confidential. We and our immediate family members have received multiple threats which, on reasonable grounds, we believe are linked to the actions of the Zetler family. Furthermore, there is credible concern that certain

individuals within the local municipal structures may be acting as informants for the aforementioned parties.
Please find below a summary of critical and ongoing land use and environmental concerns involving the Zetler properties:

---

1. Misclassification and Unlawful Construction

The structure recently erected on the property is not, as alleged, a "shed" but rather a **pack-house** that falls under **agricultural industry use**, which requires formal land use approval. Furthermore, the structure is positioned in close proximity to Annandale Road, which raises compliance concerns under municipal zoning and road reserve regulations.
A previously erected structure was reclassified—reportedly with municipal assistance—from a **water treatment plant** to a **"pump-house."** This reclassification is, in our view, misleading and materially affects the interpretation of the site's compliance with relevant planning and environmental legislation. We request that this matter be revisited by a certified building inspector and town planner.

---

2. Consent Use and Public Participation

Both structures referenced above fall within categories that necessitate a **Consent Use application** in terms of the Stellenbosch Municipality's **Land Use Planning By-Law**, as well as a **Public Participation Process**. Such process is being actively called for by neighbouring landowners and interested and affected parties, in accordance with due administrative process.

---

3. Misrepresentation in Environmental Impact Assessment

The **Environmental Impact Assessment (EIA)** related to the ±350,000 m^3 dam on the property appears to have **omitted critical information**, including the existence of a **functioning pump-house** located at the Eerste River. Such an omission may constitute a material misrepresentation under applicable environmental law and warrants immediate review.

---

4. Ongoing Unlawful Development

New steel **greenhouses (hot houses)** are currently being constructed on **Portion 8 of Farm 468**, reportedly without the necessary building plan approvals or zoning consents. These actions may constitute a breach of the **Spatial Planning and Land Use Management Act (SPLUMA), 16 of 2013**, as well as the Stellenbosch Municipal Planning By-Laws.

---

5. Procedural Irregularities and Withholding of Information

Despite multiple formal requests, we have **not received the necessary documentation** and application forms to inspect building plans, zoning approvals,

land use rights, and fines issued against the Zetlers. The extended delay in enforcement—specifically in respect of the illegal erection of polytunnels—exceeds two years. Notably, construction has continued despite a formal notice having been issued, suggesting either non-compliance or lack of enforcement capacity.

---

6. Non-Compliance with NEMA and Related Legislation

We submit that the scale and nature of the developments in question should have **triggered a NEMA application** under the **National Environmental Management Act, 107 of 1998**, including a full **Environmental Authorisation** and **Basic Assessment** or **Scoping and EIA process**. The developments include:

- ±3,500 m^2 pack-house
- ±1,300 m^2 water treatment facility
- ±3,000–5,000 m^2 of paved surface with flooding potential
- Over 50 hectares of land under polytunnels
- 350,000 m^3 dam
- Unregulated channels redirecting water back into the Eerste River
- **No water use licenses** or metering for extraction from the Eerste River

Such developments are not minor in scale and clearly meet the thresholds for NEMA-triggered activities. Additionally, the construction and operation of water infrastructure without the requisite licenses may constitute a violation of the **National Water Act, 36 of 1998**, particularly under Sections 21 and 22 which govern water use and licensing requirements.

Final Position

For the record:
We **do not oppose development** per se. However, we **firmly oppose** any land use changes or infrastructural developments that are undertaken **without the required legal processes**, including **transparency**, **public consultation**, and **statutory compliance**. The rights of neighbouring landowners, the environment, and broader community interests must be upheld at all times.
We urge the relevant departments and officials to initiate immediate inspections, review applicable authorisations (or the lack thereof), and take corrective enforcement actions in accordance with the law.
We trust this matter will receive the serious attention it deserves.
Yours sincerely,

Concerned Stakeholders and Affected Parties

THE ZETLERS HAS TOLD ME THAT THEY HAVE THEIR INFORMANTS IN THE MUNICIPALITY

Good day Errol and Lizette,

Please note Errol's email on 7 February 2025:

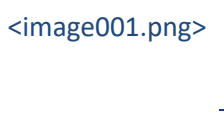
"On 07 Feb 2025, at 15:28, Errol Williams <Errol.Williams@stellenbosch.gov.za> wrote:

Dear Mr Eastes,

Sorry for the delay in communication.

Could you please clarify why the spaced used to park the vehicles is illegal.

Taxis waiting on the farm for staff for two to three hours is not a zoning violation as previously explained.



The new shed which has been recently built will be escalated to Stellenbosch Municipal court for action. Both building and planning notices has been served. I will inform you when the file has been sent through to court.

Complete the attached complaint form for the farm situated across the road to be investigated. (Farm 129/468)

Complete the attached complaint form concerning the "hot house" on Farm 10/468)

Send the pictures of the 'mini polly".

Kind regards

Errol Williams
Snr Land Use Inspector
Land Use Management
Planning & Economic Development

“

We hereby formally request clarification regarding the decision-making process that led to the extension of this matter, particularly in light of the fact that it falls within the jurisdiction of the Municipal Court. Kindly provide a detailed explanation specifying the authority responsible for granting the extension, as well as the legal basis upon which such a decision was made. We fail to see how the municipality can act as both adjudicator and decision-maker in a matter that has demonstrable adverse effects on neighboring properties.

Furthermore, despite our previous requests, neither you nor Ms. Lizette Barends have provided the case number or court date. As directly affected and interested parties, we require this information without further delay. Kindly furnish us with the relevant court details promptly.

Additionally, we formally request all necessary procedures, forms, and documentation required to lodge an objection against the proposed land use changes.

To date, we have yet to receive any forms from Ms. Joy Julius, as previously requested.

It is our position that this development ought to be subject to an application under the National Environmental Management Act (NEMA). Were this a mining operation, all relevant government authorities would be actively engaged. However, by categorizing the project under “agriculture,” it appears that applicable laws and municipal by-laws are being circumvented.

For the sake of clarity, we do not oppose development in principle. However, such development must comply with all legal requirements and be carried out in a transparent manner, adhering to the Stellenbosch Spatial Development Framework (SDF) and Integrated Development Plan (IDP).

Additionally, we note that the “consent use” activities have not ceased, as evidenced by the ongoing erection of agricultural netting and mini-poly tunnels. Please see the attached photographic evidence for reference.

We look forward to your response.

> - agricultural industry UNDER 2000sqm (building is >3500sqm and lots of paving), this high tech pack-house with cooling is not directly related to this one farm. They bringing produce from different farms they own and what

they are renting in the area. So this unit can not fall under “agricultural building”.
Again, see 202.1: “directly related to this land unit”

-why was the “stop work” order never issued?

Have you issued a “stop work” order on polly tunnels and agri netting? The Zetler family has not stop works. You also waiting for them to complete the development and them give the a small fine, no public participation, no traffic impact study, nothing.

Again we need a NEMA application to stop this “creeping development”.

Also we had no feedback on why we as neighbours should not seek compensation for the municipality failing to adhere to their own SDF and IDP.

We have invested here because of the Stellenbosch SDF and IDP.

Dear Mr Eastes,

Sorry for the delay in communication.

As previously stated, a compliance notice was served for the erection of an **Agricultural building exceeding 2000m2** on the 11/12/2024. The owners of the farm in question submitted a request for an extension of time in order to obtain the necessary land use approval for the structure

in question. This request was escalated to management. A decision has since been taken to afford the owners two months (calculated from todays date) to submit the required land use application. Upon receipt of such an application any further enforcement action will be pended until this application has been finalized. This decision was taken based on the fact that an **Agricultural building exceeding 2000m2** has been classified as an additional use and could be approved once a technical approval application has been considered.

Shafiek could you please elaborate on the processes concerning the building regulations.

Your complaint concerning the ground sheet plastic has been discussed amongst senior planners. This matter will be dealt with in the coming week and feedback will be provided.

As previously stated, please complete the attached complaint form for Farm 468/8 Stellenbosch.

Joy could you please forward Mr Eastes the access to information application forms.

WE HAD MULTIPLE THREATS TOWARDS OUR FAMILY FROM THE ZETLERS

THE ZETLERS HAS TOLD ME THAT THEY HAVE THEIR INFORMANTS IN THE MUNICIPALITY

Good day Errol

As municipality, you have still not acted on these “consent use” issues raised more that two years ago, nor the Department of Environmental affairs.

Please reply why we, a land owners, should not seek compensation from individuals and the municipality, for the loss of our “vista”

and sense of “beeing”, when we acquired these properties.
(penalty should be around R49.00/sqm x 4 x 500,000sqm= R98 million, if the rate is R49/sqm)

These illegal construction and agri industry (>2000 buildings, polly tunnels and agricultural netting/illegal, unmetered summer pumping from the EersteRiver), by Limberlost and the Zetler family is against the Stellenbosch Spatial Development Framework and also the Stellenbosch Integrated Development Plans.

Because of deviation on the SDF and IDP, we have lost our sence of beloning and the vita that was encapsulated in these plans. The deviantion is only enriching a few individuals and depleting other land owners space, being and vistas.

Please send form for access to information on land use rights for farms 10/468, 129/468 and 8/468.

Again, this is a “creeping” development, done to evade a NEMA application and to avoid public participation process.

(without giving up any of our rights)

Court orders demolition of illegal high-rise buildings in Pretoria West

A Pretoria West property developer is in hot water after the City of Tshwane secured a court order to demolish two high-rise buildings constructed without the required approved building plans.

Being in contempt of court, developers George Asaba and Gabsa Consolidated Prop (PTY) Ltd, have been held liable for the costs incurred in the demolition process.

The ruling by the High Court, Pretoria, comes after the respondents disregarded the first court order issued on July 16, 2024, barring him from erecting the buildings in question.

Although the respondents acknowledged in court documents that construction, which commenced in June 2023, proceeded without the City's approval of their plans, they claimed that their architect had, in fact, submitted the plans to the City for review.

The court said: “The submission of building plans does not accord one the right or permission to build. One needs permission first before one can build and I am of the view that the respondents were very much aware of this requirement but opted to go ahead as they are the law unto themselves.”

Pictures taken of the premises on August 28, 2024 showed certain buildings on the foundation phase.

However, upon visiting the premises, the court observed that the buildings had grown to three

stories high, revealing a blatant disregard by the respondents for the earlier court order.

The court determined that the respondents failed to submit building plans as mandated by the July 16, 2024 court order.

Furthermore, the court found that the respondents disregarded the order's injunction and proceeded with construction, contrary to its directives.

Although the respondent had submitted a rezoning application, the court deemed it an insufficient defence, viewing it as a belated attempt to circumvent the impending outcome.

MMC for Corporate and Shared Services, Kholofelo Morodi, condemned the illegal construction of buildings on Erf 1313 and Erf 1312, situated at 510 and 514 Luttig Street in Pretoria West.

She said the structures flagrantly contravene the National Building Regulations and Building Standards Act, while also failing to meet the zoning requirements stipulated for the properties.

“The City initiated legal proceedings after it was established that the buildings were constructed without approved building plans, posing significant risks to public safety and contravening municipal by-laws,” she said.

She said the Tshwane multi-party coalition government was duty-bound to “operate in the public’s interest and to ensure the safety and security of all our residents, including those residing and operating businesses in unlawfully erected structures”.

Morodi will collaborate with MMC for Economic Development and Spatial Planning, Sarah Mabotsa, to ensure that residents of unlawfully erected buildings are advised of alternative places of residence.

The court granted the City permission to enter the premises and demolish the unauthorised structures, including the conversions of dwelling houses into three or four multi-storey buildings.

The City was also authorised to demolish associated electricity, water, drainage, and sewerage installations.

THE ZETLERS HAS TOLD ME THAT THEY HAVE THEIR INFORMANTS IN THE MUNICIPALITY

Good day Errol

Please furnish us with a copy of the “stop work order” that you have issued to Limberlost/Zetler Family for the illegal polly tunnels and agricultural netting.

Also, we us neighbours demand a public participation proses if ANY “consent use” are given to this family.

You have also not provided us with the “content use” for farm 8/468, there is also new “hot houses” going up.

WE HAD MULTIPLE THREATS TOWARDS OUR FAMILY FROM THE ZETLERS

THE ZETLERS HAS TOLD ME THAT THEY HAVE THEIR INFORMANTS IN THE MUNICIPALITY

(Public Protector's Office is cc'ed in all emails from now on.)

Good day Lizette

As you can see, the Zetler family/Limberlos t (Pty) Ltd, is busy with a string of illegal developments that the Stellenbosch officials only "act" when they are completed, even when we rise these issues on inception of the transgression.

The Zetler family gets a small fine and they carry on:"business as usual". These fines are too small to faze them. They need to start taking

down their illegal structure, apply and the rebuild.

This has to stop please. I can send you al the transgressions over the years and then the complainant gets leaked to the Zetler family and the start harassing my family.

They have 50-60 hectares of illegal polly tunnels and agricultural netting. Nothing is done as they need consent from the municipality. The same with this enormous pack house. The people and traffic is horrific, but they don't care because the stay in Sea Point, Cape Town. The pollution is something else and their housekeeping does not exist. But Stellenbosch (or the DA), turns a blind eye to this family.

We as the neighbour would like to know what is happing in this case because we

are affected parties to this consent right. It influence our daily lives and our sense of being. We need a public participation process and a NEMA application on these big developments, there is big “creeping” with this Zetler family, every year the add something, but is should be part a NEMA process.

A urgent “stop works order” needs to be handed down. (You do not want another Botmanskop here).

See especially the email from errol on 7 Feb 2025.

Also: date of the court case and case no, please.

otenforced? We would like to see their “consent” rights on this property. (Farm

8/468)

- Also, there is new construction/development of a "hothouse", about 6

to 7 hectares. There is no “land use right’ change? They need consent for the seed

evelopments. This does not form part of the Stellenbosch Spatial Development Pl

an. (Farm129/468)

- Newroaddevelopmentnexttotheeersteriviier, theyallread

Limberlost Property Holdings (Pty) LTD

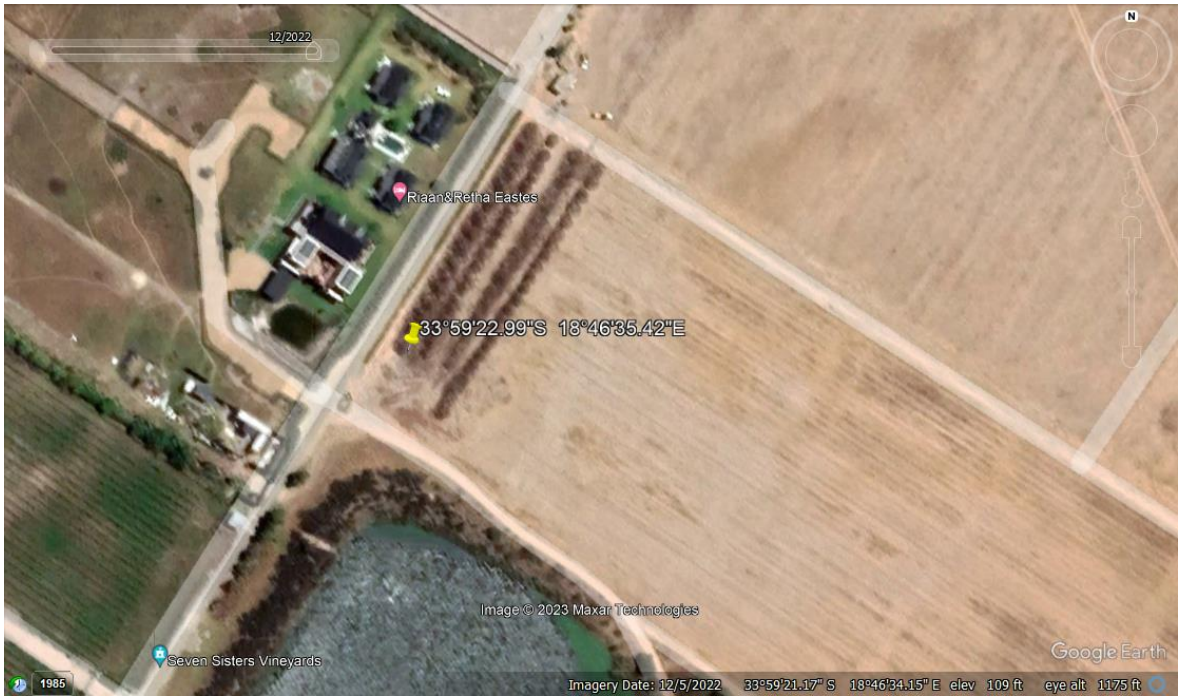
Portion 10 of Farm Welmoed No 468

Stellenbosch

7599

Attention: Mr Julien Zettler

PRE-COMPLIANCE NOTICE



Dear Sir

INTENTION TO ISSUE A COMPLIANCE NOTICE IN TERMS OF SECTION 31L OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998 IN RESPECT OF A CONTRAVENTION OF THE NATIONAL ENVIRONMENTAL MANAGEMENT: WASTE ACT, 2008

1. During an investigation into allegations of the commencement of a listed activity in terms of the National Environmental Management: Waste Act, 2008 ("NEM: WA"), a site inspection was conducted at Portion 129 of Farm Welmoed 468, Stellenbosch, by Environmental Management Inspectors from the Department's Directorate: Environmental Law Enforcement on 28 November 2022 and 14 March 2023, it was confirmed that you have commenced with organic waste

composting without registering with the Department and adhering to the requisite National Norms and Standards in terms of the NEM: WA.

[33°59'22.99"S 18°46'35.42"E]

Aerial map: Location of alleged illegal activity on the property.

2. A person who wishes to commence, undertake or conduct a waste management activity in terms of Category C in Government Notice (GN) No.921 of 29 November 2013 may not commence without registering with the Department and adhering to the requisite National Norms and Standards from the competent authority.

3. On considering the evidence before me, there are reasonable grounds to believe that the following listed activities were triggered in terms of the List of waste management activities in Government Notice No. 921 of 29 November 2013, without registering with the Department and adhering to the requisite National Norms and Standards:

Category C

Activity No. 1:

The organic waste composting facilities that have the capacity to process compostable organic waste, in excess of 10 tonne per day.

Photo 1: View of the compost windrows.

Photo 2: Additional windrows that were noted during the follow-up inspection.

Photo 3: Showing garden waste mixed with the organic compost.

4. In terms of section 67(1) (f) of the NEM: WA it is an offence to contravene or fail to comply with a norm or standard established in terms of this Act. A person convicted of such an offence is is liable to a fine not exceeding R5 000 000 or to imprisonment for a period not exceeding five years, or to both a fine and such imprisonment, in addition to any other penalty or award that may be imposed or made in terms of the National Environmental Management Act.

5. As such, you are hereby given notice of this Department's intention to issue you with a Compliance Notice in terms of section 31L of the NEMA, which will instruct you to:
   5.1 immediately cease the above listed activities;
   5.2 investigate, assess and evaluate the impact on the environment;

5.3 rehabilitate the entire site to its original condition;

5.4 carry out any other measure necessary to rectify the effects of the unlawful activity;

5.5 register with the Department within 30 calendar days and adhere to the NEM: WA "*National Norms and Standards for organic waste composting*", as contained in GN No. 561 of 25 June 2021;

6. Furthermore, failure to comply with a Compliance Notice is an offence in terms of section 49A(1)(k). A person convicted of failing to comply with a Compliance Notice is liable to a maximum fine of R5 million or 5 years imprisonment or both such fine and such imprisonment.

7. You are afforded a period of **7 (seven) calendar days** from the date of receipt of this Pre-Compliance Notice to make written representations to the Department as to why a Compliance Notice should not be issued.

8. If you inform the Department, in respect of paragraph 7 above that you intend to rectify the non-compliance, you must adhere to the request stipulated in paragraph 5.5 above, by contacting the Department's Directorate: Waste Management (on the contact details below), **within 30 (thirty) calendar days** of receipt of this Pre-Compliance Notice, to register the facility and comply with the relevant norms and standards, as well as providing proof of registration.

9. You may contact Mr Lance Mcbain-Charles from the Department's Directorate: Waste Management on tel: 021 483 2747 or email: Lance.McBain-Charles@westerncape.gov.za

Dear Sir/Madam

ALLEGED LAND USE CONTRAVENTION OF FARM 468 PORTION 10 AND FARM 468 PORTION 129 STELLENBOSCH (POLYTUNNELS)

SERVING OF COMPLIANCE NOTICE:

We refer to your complaint with reference Farm 468/10 & Farm 468/129 Stellenbosch and we would like to confirm the following:

1. The allocated inspector carried out a site inspection.

2. The owner has been instructed to act in accordance with the applicable laws and regulations, as well as with the Stellenbosch Municipality Land Use Planning By-Law (2023) and has been served with a compliance notice to cease the activity within 30 (thirty) days calculated from the 26 March 2025.

3. Please take note of the following:

    a. Whilst the owners/alleged offenders are still within their notice period as mentioned above and may apply to Council for the appropriate land use rights via a land use application, they must still cease the land use contravention within the period set out in the notice.

    b. Criminal prosecution via court proceedings is the preferred method of instituting legal action. It can take several months/years to obtain a criminal conviction and/or order of court compelling the owners/alleged offenders to cease the land use contravention and/or comply with such compliance notice. This is a separate process subject to all laws and regulations applicable thereto.

    c. In the event of court action, you may be required to give evidence/testimony during the hearing of this matter in court but will be informed in due time if such evidence/testimony is required.

4. You will be advised of any progress after a follow up inspection have been conducted.

Yours faithfully

For MANANGER: PLANNING AND ECONOMIC DEVELOPMENT

Table 26. Plan Elements and Proposals for Vlottenburg - Spier - Lynedoch

TYPE OF ACTION	SDF ELEMENT	SPATIAL PROPOSALS	RELATED NON SPATIAL PROPOSALS
Protective Actions	CBAs, ESA's, Protected areas	• Maintain and improve the nature areas surrounding small settlements along Baden Powell Drive. • Work to increasingly connect and integrate nature areas, also with the urban green areas, to form an integrated green web or framework across the municipal area.	• Implement management actions contained in the EMF.
	Water courses	• Improve public continuity, access, and space along the stream corridors.	
	Agricultural land	• Retain and improve the relationship between small settlements along Baden Powell Drive and surrounding agricultural land.	
	Urban edge	• As a general principle, contain the footprint of small settlements along Baden Powell Drive as far as possible within the existing urban edge.	
	Scenic landscapes, scenic routes, special places	• Retain the strong sense of transition between agriculture and human settlement at the entrances to the small settlements along Baden Powell Drive.	
	Historically and culturally significant precincts and places	• Maintain the integrity of historically and culturally significant precincts and places (as indicated in completed surveys).	
Change Actions	Informal settlements to be upgraded	• Prioritise informal settlements for upgrading and service provision.	
	Areas for residential densification and infill	• Focus infill development on undeveloped land within the urban edge.	
	Areas for mixed land use and improved economic opportunity	• Maintain the scale of mixed used and economic opportunity areas to reflect the current role of settlements.	
	Improved access and mobility	• Pro-actively improve conditions for walking and NMT within and between small settlements along Baden Powell Drive.	• Ensure that the design of all roads within and surrounding the settlements provides for appropriate NMT movement.
	Community/ institutional use	• Cluster community facilities together with commercial, transport, informal sector and other activities so as to maximise convenience, safety and socio-economic potential. • Maintain Lynedoch as a focus for education and training (with various focus areas and "levels" of education).	• Actively support the shared use of community facilities.
	Improved landscaping and public amenity	• As far as possible, focus investment in parks, open space, and social facilities accessible by public and NMT, in this way also increasing the surveillance of these facilities.	• Actively involve local communities in the development and management of public amenities.
New Development Actions	Significant new mixed use development	• Over the longer term, Vlottenburg, Spier, and Lynedoch along the Baden Powell-Adam Tas-R304 corridor could possibly accommodate more growth, and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritized for development at this stage. • Explore the feasibility of changing/ complementing the rail service along the Baden Powell Drive-Adam Tas-R304 corridor to a system providing a more frequent, flexible service better integrated into the urban realm. Alternatively, a regular bus service should be explored serving the same route.	• Support private sector led institutional arrangements to enable joint planning and development.
	Significant new residential development		
	Significant change to access and mobility provision

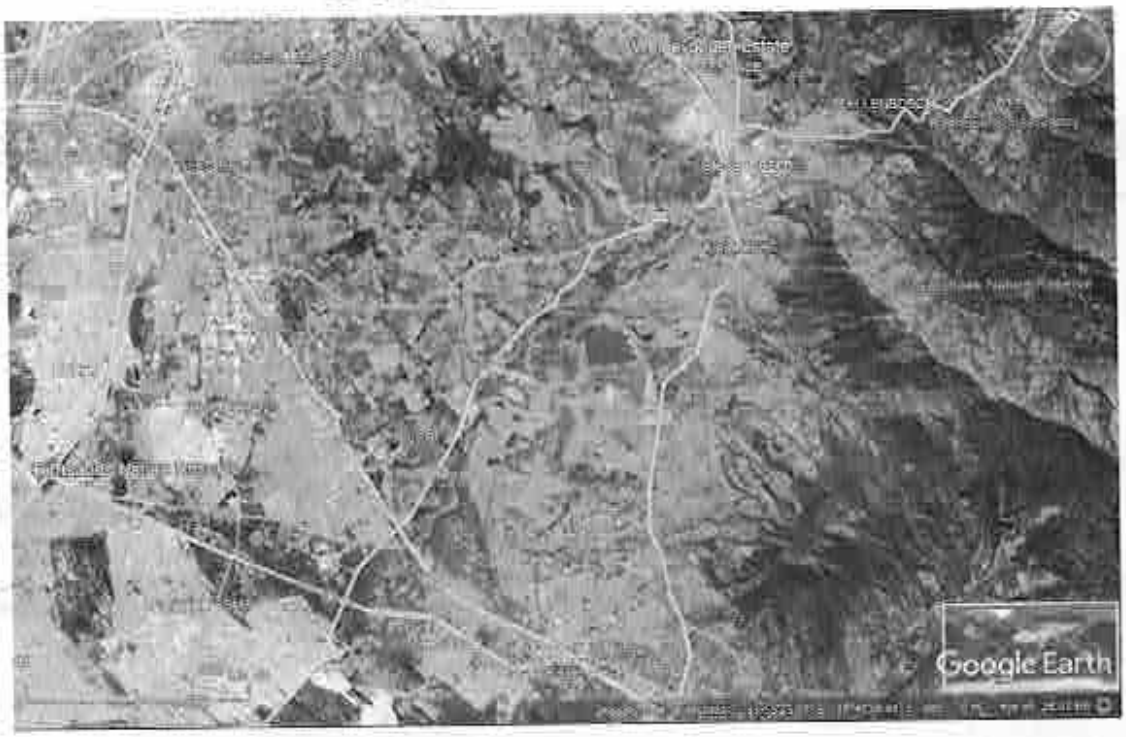
Stellenbosch

Attention: Mr Julian Zelter

PRE-COMPLIANCE NOTICE



Dear Sir

INTENTION TO ISSUE A COMPLIANCE NOTICE IN TERMS OF SECTION 31L OF THE NATIONAL ENVIRONMENTAL MANAGEMENT ACT, 1998

1. During an investigation into allegations of the commencement of a listed activity in contravention of section 24F of the National Environmental Management Act, 1998 ("NEMA"), a site inspection was conducted at Portion 10 of Farm Welmoed No. 468, Stellenbosch, by Environmental Management Inspectors from the Department's Directorate: Environmental Law Enforcement on 18 October 2022 which confirmed

that you have commenced with earthworks and infilling activities within a watercourse without environmental authorisation, on the aforesaid property.

Aerial map 1: Location of alleged illegal activity.

Aerial map 2: Zoomed in aerial image of the Location of alleged illegal activity.

Aerial map 3: SG Code of the property.

Aerial map 4: Water resource map on the property.

2. In terms of section 24F of the NEMA, no activity listed in the Environmental Impact Assessment ("EIA") Regulations Listing Notice 1 of 2014 may commence without environmental authorisation from the competent authority.

3. On considering the evidence before me, there are reasonable grounds to believe that you have commenced the following listed activity without environmental authorisation:

EIA Regulations Listing Notice 1 of 2014:

Activity no. 19:

The infilling or depositing of any material of more than 10 cubic metres into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 10 cubic metres from a watercourse;
but excluding where such infilling, depositing, dredging, excavation, removal or moving—

(a) will occur behind a development setback;

(b) is for maintenance purposes undertaken in accordance with a maintenance management plan;

(c) falls within the ambit of activity 21 in this Notice, in which case that activity applies;

(d) occurs within existing ports or harbours that will not increase the development footprint of the port or harbour; or

(e) where such development is related to the development of a port or harbour, in which case activity 26 in Listing Notice 2 of 2014 applies.

Photo 3: placement of rocks within the riverbank (indicated by the yellow arrow).

REMOVED TREES & SHRUBS = WILDLIFE NESTING AREAS = FROG BREEDING GROUNDS.

Photo 4: depicts earth moving/infilling activities that has been undertaken within the river.

Photo 5: depicts earth moving/infilling activities that has been undertaken within the river.

Photo 6: Evidence of earthmoving and working within the river (indicated by yellow arrow).

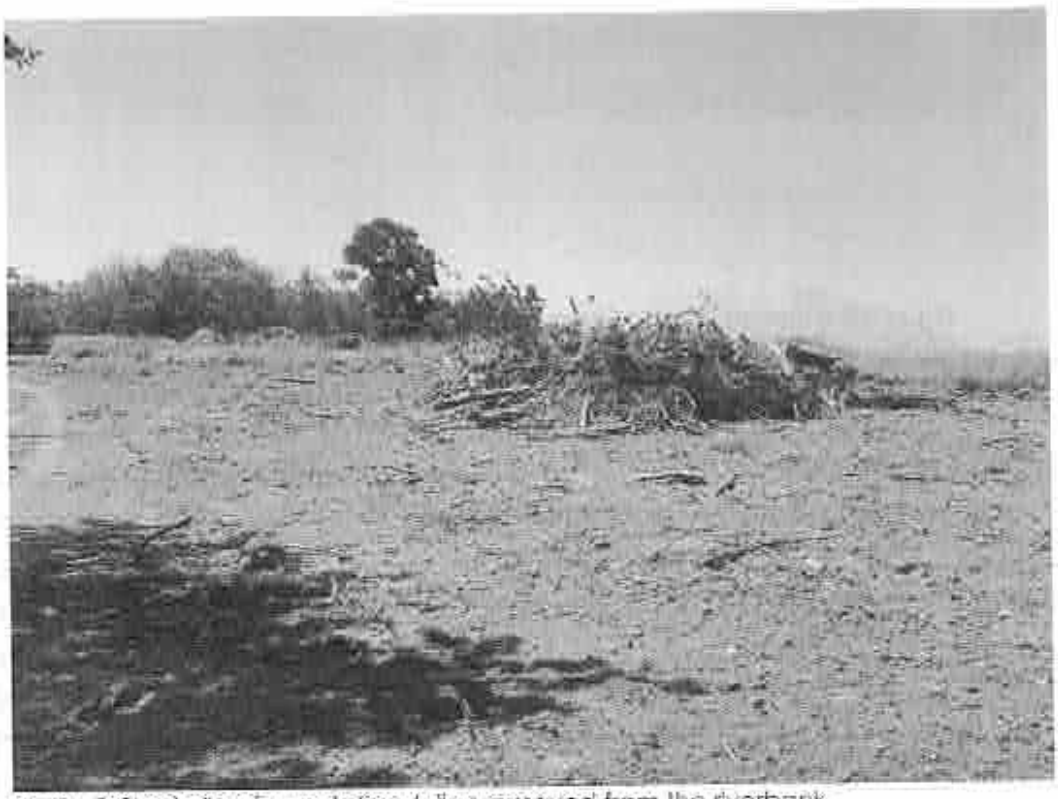

Photo 7: Stockpile of vegetation /alien removed from the riverbank.

Photo 8: depicts excavation/earthmoving activities (area circled in read) that has been undertaken within the river (indicated by the yellow arrow).

4. In terms of section 49A of the NEMA it is an offence to commence a listed activity without environmental authorisation. A person convicted of such an offence is liable to a fine not exceeding R10 million or to imprisonment for a period not exceeding 10 years or to both such fine and such imprisonment. * LIMBERLOST DID NOT STOP AFTER NOTICE

5. Please note, in addition to the above contraventions in terms of the NEMA, the activities within and/or along the banks of the watercourse may also contravene provisions in terms of the National Water Act, 1998, which is enforced by the Department of Water Affairs and Sanitation.

6. As such, you are hereby given notice of the Department's intention to issue you with a Compliance Notice in terms of section 31L of the NEMA, which will instruct you to:

   6.1. immediately cease the above listed activity; – DID NOT CEASE

   6.2. investigate, assess and evaluate the impact that the listed activity has / has had on the environment;

   6.3. " rehabilitate the entire site to its original condition; and – REPLANTING TREES & SCRUBS !

   6.4. carry out any other measure necessary to rectify the effects of the unlawful activity.

7. Furthermore, failure to comply with a Compliance Notice is an offence in terms of section 49A(1)(k). A person convicted of failing to comply with a Compliance Notice is liable to a maximum fine of R5 million or 5 years imprisonment or both such fine and such imprisonment. *DID NOT STOP AFTER NOTICE !

8. You are afforded a period of **7 (seven) calendar days** from the date of receipt of this Pre-Compliance Notice to make written representations to the Department as to why a Compliance Notice should not be issued.

9. If you inform the Department, in respect of paragraph 8 above that you intend to rectify the non-compliance, you must cease the above listed activity and submit to the Department for approval, **within 30 (thirty) calendar days** of receipt of this Pre-

* ACTIVITY DID NOT CEASE -> PUMP HOUSE WAS BUILD - WATERTRENCH WAS BUILD

Compliance Notice, a rehabilitation plan compiled by a suitably qualified and experienced independent environmental assessment practitioner, which must include the following:

9.1 assessment and evaluation of the impact on the environment; and 15/11/22

9.2 identification of proposed remedial and/or mitigation measures. → POOR REPORT GIVEN.

10. If the above plan is approved by the Department, you will be obliged to take the necessary remedial / mitigation measures at your own cost. * LIMBERLOST DID NOT STOP WORK.

11. Approval of the above report by the Department does not remedy the unlawful commencement of the above activity, which remains unlawful in terms of section 49A(1) (a) and/or (d) of the NEMA.

12. If you wish to continue with the listed activity you may apply for environmental authorisation by way of a section 24G ("s24G") application. However, such application does not constitute permission to continue with the listed activity, which remains unlawful unless environmental authorisation is granted. * WAS NOT DONE LIMBERLOST KEPT ON BUILDING AND DOING EARTHWORKS

13. Should you choose to apply in terms of s24G on the NEMA, you must submit to the Department for approval, **within 30 (thirty) calendar days** of receipt of this Pre-Compliance Notice, a project schedule compiled by a suitably qualified and experience independent environmental assessment practitioner. The project schedule must clearly stipulate the time frames in terms of the s24G process and by when a s24G application will be submitted to the Sub-Directorate: Rectification.

* WAS NOT DONE!

14. Notwithstanding the section 24G application, the Department may issue a Compliance Notice and/or commence criminal proceedings should circumstances so require. LIMBERLOST DID NOT COMPLY, KEPT ON WORKING AND BUILDING.

Kommentaar: Konsep begroting 2024/25 – 2026/27 (Review of the 5th Generation IDP 2022-2027)

Pniel Villagers neem kennis van die redes vir n onsuksesvoole aansoek om die "Grant in Aid" Donasies aansoek

Ons will graag skriftelik kapsie aanteken teen onsuksesvolle aansoek en versoek graag vriendelik hersiening van die uitslag . Ons voer graag die volgende redes as bewyse dat die grondwet soos ingesluit in die aanvanklike aansoek, nie die ware weergawe van die huidige bestuur soos voorgestel deur die hersiende grondwet nie van 31 October 2022 nie.

Die nuwe bestuur was ongelukkig onbewus van verandering aan die gronwet wat die samestelling van die uitvoerende bestuur na slegs 10 lede verander aangepas het. As bewys van die aanpassing van die grondwet, sluit ons graag n afdruk van die notules van die klub Jaarvergadering gehou en waar die veranderinge aan die grondwet aangeneem was, op **31 Oktober 2022.**

Ons sluit dan took n lys van die huidige amptenary en uitvoerende bestuur soos voorgestel en aanvaar deur die jaarvergadering gehou op 31 October 2022

Ons versoek graag n hersiening van ons aansoek en hoop dat die bewyse ingesluit n verandering aan die 1ste uitslag kan bewerkstelling.

PROPOSED GRANT IN AID DONATIONS

2025-2026

10.11.4	2025/2026 GRANT IN AID APPLICATIONS AND RECOMMENDED DONATIONS

Collaborator No: 782136
IDP KPA Ref No: Good Governance and Compliance
Meeting Date: 24 March 2025 and 31 March 2025

1. SUBJECT: 2025/2026 GRANT IN AID APPLICATIONS AND RECOMMENDED DONATIONS

2. PURPOSE

To obtain Council's approval for Grant-in-Aid (GiA) applications and recommended donations for the financial year 2025-2026.

3. DELEGATED AUTHORITY

FOR DECISION BY MUNICIPAL COUNCIL

In terms of Municipal Finance Management Act (MFMA), Act (56 of 2003) Section 17. (3) (e) relating to content of annual budgets and supporting documents.

4. EXECUTIVE SUMMARY

The Grant-in-Aid policy aims to provide a framework for Grant-in-Aid to non-governmental organisations (NGOs), community-based organisations (CBOs), non-profit organisations (NPOs) or non-profit companies (NPC), Public Benefit Organisations (PBO's) and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by the Grant in Aid Policy approved at the Council Meeting in May 2024.

In terms of Council's Grant-in-Aid Policy, proposals were called for by means of advertisement in the press on 19 September 2024 (Eikestad Nuus) and on the municipal website and Facebook page.

The advertisement included an invitation to attend one of three compulsory workshops on either 14-16 October 2024 to assist and give guidance on the policy and application procedure. One hundred and sixty-two (162) persons attended the workshops.

A workshop to assist with capacity building of small, emerging organisations was conducted during October 2024 focussing on financial management. The workshop was attended by ninety (90) persons.

30TH COUNCIL MEETING: 2025-03-31: ITEM 10.11.4

RESOLVED (majority vote with 7 abstentions)

(a) that Council notes the organisations that are receiving funding are organisations or bodies serving the poor;

(b) that Council support the continuation of the food garden project and approve the donation to SA Institute for Entrepreneurship to conclude the final year of the three-year Cat B donation;

(c) that Council support the implementation of day services for persons who are homeless and approve the deferment of the approved 2024/2025 Cat B application to commence in 2025/2026;

(d) That Council notes that the Cat A donation allows for a maximum amount of R40 000 to be allocated per organisation;

(e) That Council consider and approve the recommended donations to organizations as per attached detailed register for public participation as part of the draft budget.

(f) That the Accounting Officer certifies to the Auditor General that the compliance requirements in terms of section 67 (1) (a) of the MFMA are uneconomical and unreasonable for organisations receiving Cat A donation.

NOTULE VAN ALGEMENE JAARVERGADERING GEHOU 14 OKTOBER 2019 .**Opening en verwelkoming:**Die waarnemende voorsitter Dudley Lackay open die vergadering met 'n gebed en verwelkoming die 29 lede teenwoordig hartlik welkom.Hy spreek sy dank uit teenoor almal teenwoordig en verduidelik hoe belangrik dit is dat 'n AJV jaarliks gehou moet, word.

Notule: Mnr.Ian Adams word versoek om die notule van die 2018 jaarvergadering voor te lees. Die notule is aangeneem soos gelees opvoorstel van Earl Cyster en gesekondeer Ivor Myburgh (jnr). Daar was geen sake voortvloeiend uit die notule wat bespeerk is nie **Korrespondensie:** Kennisgewing van Unie vergadering op Maandag 23 Oktober 2019 te Nuweland.Die vergadering neem kennis.Die voorsitter gee 'n breedvoerige verduideliking van hoe sake tans in die Unie staan en noem dat die Unie met 'n kontant vloei probleem sit.Hy noem ook dat met die spesiale Unie vergadering wat op 3 Oktober 2019 gehou was is daar besluit dat die Unie die ontwikkelings regte van Nuweland aan Investec verkoop het vir 'n honderd miljoen rand wanneer die Unie na die Cape Town stadium gaan verhuis in 2021

Finansiële Verslag: Die kassier doen 'n gespesialiseerde finansiële verslag: Inkomste beloop R352 304.50 Uitgawes beloop R351 519.80 Voordelige balans R784.70 nadat vrae oor finansies vanaf die vloer deur die kassier bevredigend beantwoord is word die verslag aangeneem opvoorstel van Brynwinn Hendricks en gesekondeer Adrian Cupido. Die kassier se boeke sal nou na die klub se boekhouers gestuur word vir oudetering waarna die boekhouers finansiële state vir die klub sal saamstel. Enige lidmaat kan aanspraak maak om die kassier se boeke na te gaan. Die volgende wysiging aan die grondwet word deur die huidige Bestuurskomitee voorgestel: Klousule 11 van die grondwet wat as volg lees: "All members of the Executive Committee of P.V.R.F.C shall be elected at the Annual General Meeting of the P.V.R.F.C for a period of three (3) years. The Executive Committee of P.V.R.F.C may co-op any member in good standing with the club or from the public who they feel can render a contribution to the benefit of the club. 11.1 Members of the Executive Committee shall be: 1.Live President. 2.The Chairman. 3.The Secretary. 4.The Treasurer.5.The Vice-Chairman.6.The Match & Registration Secretary.7.Assistent Treasurer.8.Scrumit Manager.9.The Head Coach.10.Convener of Selectors.11.Three additional members.12.A representative from the womens team shall form part of Exo" .The proposal by the Executive reads as follows:

" That the Annual General Meeting shall elect ten (10) members to serve on the Executive Committee for a period of three (3) years. These members shall appoint from among themselves:1.Chairperson.2.Secretary.3.Treasurer.4.Vice Chairperson.5.Match & Registration Secretary.6.Assistent Treasurer.7.Players Representative. The remaining 3 members shall be appointed to portfolios as need be." Nadat die proposal gedebateer is word dit eenparig aangeneem opvoorstel van Andrew Cyster en gesekondeer Earl Cyster.

Hierna gaan die vergadering oor tot die kiesing van 10 Bestuurslede.Mnr. Ivor Myburgh jnr. Word voorgestel om as verkiesings be-ampte op te tree.Die volgende persone word voorgestel:1.Winston Stubbs is voorgestel deur Roland Samuels en gesekondeer Aubern Williams.2.Dudley Lackay voorgestel Leroy Davids gesekondeer Earl Cyster.3.Ralphton Adams voorgestel Dudley Lackay en gesekondeer Adrian Cupido.4.Patrick Van Graan voorgestel Ian Adams en gesekondeer Steve Adams.5.Ian Adams voorgestel Rodger Cupido en gesekondeer Andrew Cyster.6. Ivor Myburgh jnr voorgestel Ian Adams en gesekondeer Andrew Cyster.7.Cecilia Daniels voorgestel Andrew Cyster en gesekondeer Dudley Lackay.8.Aubern Williams voorgestel Wayde Stubbs gesekondeer Winston Stubbs.9. Rozelda Mansfield voorgestel Wayde Stubbs en gesekondeer Jerome Daniels.10.Denowen Williams voorgestel Ian Adams gesekondeer Roland Samuels.11.Clydon Williams voorgestel Reginald Stubbs en gesekondeer Cicelia Daniels. Omdat daar 11 nominasies was onttrek Ivor Myburgh jnr sy benoeming sodat daar nie oorgegaan kan word na stemming.Die oorblywende 10 nominasies sal dus die Uitvorende Bestuur vir die volgende drie jaar wees.Hulle sal gedurende die komende week vergader om die persone te kies om die nodige bestuursposte te vul.Hierna is geen verdere sake bespreek nie en die vergadering sluit om 20h45 met gesamentlike gebed van Die Onse Vader. Aangeneem 31 Oktober 2022.

Good Day Catherine and Monique

See e-mail below. I would like to submit this as a comment in terms of the IDP process, specifically wrt the DC Policy.

There is merit in their request and I would need to amend the DC policy to make provision for this.

Monique – can you please advise on the correct process if I have to amend the DC Policy to cater for this comment?

I will basically add a new clause stating:

(New clause) 13.2) For a primary school or high school "Hostel" the Roads & Transport DC will not be applicable. It can be reasonably accepted that learners at such institutions will not have cars and that the hostels will be on the school premises – therefore zero, or very low trip generation is foreseen. For all other hostels, ie university hostels, the Roads & Transport DC will remain applicable."

Good day Kurt,

Refer to the attached DC calculation for the additional bedrooms to the Paul Roos Gymnasium school hostel.

While we are in agreement that the daily Water, Sewerage, Stormwater and Solid Waste (and Community Facilities) can be compared to a student hostel (the only land use category available in your DC table), we believe that the Roads / trip generation form a school hostel is much less than that of a student hostel as the learners don't have cars. Since the school hostel is on the school premises, the trip generation by the additional rooms is for all practical purposes, nil.

We kindly request that the Roads portion of this DC calculation be omitted from the calculation.
Your favourable evaluation of our request will be appreciated.

Regards.

Dear Sir/Madam

COMMENT ON STELLENBOSCH MUNICIPALITY IDP

The following submission is made in terms of the Municipality's request for public comment on the IDP review 2025. The submission is made in support of the inclusion of a portion of **Ptn 33/Farm 748, Klapmuts** into the urban edge, for development to be allowed to benefit the Municipality through investment and to support local communities through job creation and cascading benefits due to development.

1. **Relationship between IDP and MSDF**

   Section 26(e) of the Municipal Systems Act refers to the municipal SDF as a "core component" of the municipal IDP along with, amongst others, the council's development strategies, the council's operational strategies, disaster management plans, a financial plan and key performance indicators and targets.

   A credible IDP is dependent on being informed by a realistic and market related Spatial Development Framework.

   MSDP's are often based on theoretical planning principles that do not consider practical and market related development. In reviewing and IDP a musicality is obliged to consider whether its informants, such as the MSDF has in fact been realised. Where this is not the case, the IDP process allows for the business case of the municipality to be updated.

   The purpose of an SDF is to consider the medium to long term growth of the municipal urban area. In contrast the IDP is tasked with the short to medium term viability of a municipality. It is therefore incumbent on an IDP review process to consider the impacts of long-term decision making of SDF's and to fast-track decision where necessary.

   An Integrated Development Plan (IDP) can amend a Spatial Development Framework (SDF) if the IDP is a core component of the municipality's SDF. Any amendments to the SDF must be made as part of the IDP amendment process and subject to the Municipal Systems Act (MSA) and its regulations. Essentially, the IDP is the overarching development plan, and the SDF is a component within that plan.

   This submission argues that the case of Ptn 33 of Farm 748, Klapmuts, has not received the appropriate attention in the MSDF reviews to date, and that the Municipality now can give the appropriate financial attention to the possible inclusion of the property into the urban edge.

The IDP can make the necessary changes to its supporting structures for purposes of economic and social sustainability.

2. Whether the Klapmuts SDF reflects economic growth and market informants

The landowner has to date made various representations to the Municipality for the inclusion of the subject property into the urban edge:

- 2018 participation in Klapmuts Spatial Development Area Economic Feasibility Study
- 2019 Zoning Framework for Klapmuts
- 2023 SDF amendment process
- Recent 2024 meetings with various Municipal representatives culminating in formal submission in September 2024

It has become clear that the argument for not including the subject land in the urban edge is premised on the belief that sufficient development land is currently available in the greater Klapmuts area.

Municipal feedback on the IDP public meeting on 9 April 2025, referencing our previous submission regarding Ptn 33/Farm 748, indicated an amendment to urban edge could not be supported due to surplus land already included in the urban edge not being developed.

Reasons given at the meeting for not amending the urban edge previous are:

- "*Although this development (*Stellenbosch Bridge) *is extensive in nature, very little development has in fact taken place. As such the current urban edge contains ample space for development to take place over the medium term."*
- "*By extending the urban edge the municipality must provide infrastructure services that were not foreseen in the 10-year financial plan."*
- "*Should physical development gain momentum the review of the Klapmuts MSDF will consider the need to extend the urban edge at that time*".

(slide 11 at the public meeting)

Although the broad principle of not over supplying development land can be argued, the finer grain argument of whether such land is developable in the short term discounts a range of other opportunities that could benefit the Klapmuts community.

This submission does not question the potential benefit of the Stellenbosch Bridge development. What is missing is the fact that the proposed development is of such a large scale, the related bulk infrastructure is so substantive, that the rate of take up at Stellenbosch Bridge is by default impacted by macro-economic factors and the ability the cash flow large scale bulk services.

For the Municipality to argue that no other land should be released until Stellenbosch Bridge has been developed is a case of putting all eggs in one basket and risking the loss of the development of lower hanging fruit.

3. Comparison between Stellenbosch Bridge and Ptn 33 of Farm 748

Whilst Stellenbosch Bridge is purely a mixed-use urban development the development proposal for Ptn 33 of Farm 748 is a low scale agricultural village that includes an agricultural component. It seeks to round off the urban edge at a logical point and to create an edge treatment and gateway to the winelands.

- Stellenbosch Bridge is 340 ha <u>vs</u> 15 ha of Ptn 33/Farm 748
- Stellenbosch Bridge is a complex mixed urban development <u>whereas</u> the subject land will provide single residential and local retail facilities

- Stellenbosch Bridge is located to the southwest of Klapmuts whereas the subject land lies to the northeast of Klapmuts
- Stellenbosch Bridge is a large new scale greenfield development whereas the subject land is deemed to be a small scale in-fill development

It is patently clear that stalling the development of Ptn 33 / Farm 748 based on the slow development of Stellenbosch Bridge is not giving credence to the difference in nature and market segments of the two developments. The proposed development will in fact compliment the vision of Stellenbosch Bridge and most probably support the take up of development land in this development.

4. Value to Municipality in including a portion of Ptn 33/ Farm 748 into urban edge

There is substantial benefit to the Municipality in amending the urban edge as part of the IDP process:

4.1 The proposed inclusion of a portion of Ptn 33/Farm 748 in the urban edge will provide spatial clarity through the extension of the Anura development urban edge to the rail line to the north.
4.2 The extension of the urban edge on the ridge line along the alignment of the old provincial load will create an urban gateway to the winelands to the east.
4.3 The proposed agricultural use on the remainder of Ptn 33/Farm 748 to the east will set the tone and provide an example of a defendable urban edge treatment between urban and agriculture.
4.4 The municipality will not be required to extend current infrastructure capacities. All required services are already available at the edge of the property. Bulk services contributions will assist the Municipality to pay for infrastructure already provided.
4.5 Development will not require substantial services investment which implies that it can come to market substantially quicker than Stellenbosch Bridge whilst note competing for the same market segment.
4.6 The estimated investment value to the Stellenbosch Municipality and surrounding community is the following:
  4.6.1 Capital investment: R960 mil
  4.6.2 710 permanent jobs
  4.6.3 1,440 construction jobs
  4.6.4 R6.28 mil rates income to Municipality (excluding utility sales)

5. Community support

Engagements with the local ward committee confirms community support for the proposed development in parallel to other development initiatives such as Stellenbosch Bridge.

6. Conclusion

This submission is supported by various previous submission made to the Municipality which is reflected in the e-mail chain attached below.

It remains our submission and hope that the Municipality will utilise the IDP process to bring the necessary amendment to the urban edge to allow the necessary land use applications to be submitted for the development.

The economic and social benefits, which is the subject of the IDP process, stand on its own merit and should support the Municipality in overriding its current SDF.

Kindly confirm receipt of this submission.

Subject: Stellenbosch IDP Review: Motivation for Inclusion of a portion of Ptn 33 of Farm 748, into the Klapmuts Urban Edge & associated amendment of SDF

Dear Jeremy and Bernabe

(Cc. Councillor JC Anthony)

Stellenbosch IDP Review: Motivation for Inclusion of a portion of Ptn 33 of Farm 748, into the Klapmuts Urban Edge

Thank you for the meeting of 28 August 2024 and the constructive discussion regarding the development vision for an Agri-Estate on Ptn 30 & 33 of Farm 748 Klapmuts. Following your recommendation in the meeting we have been requested by the landowner (Mr Michael Back) to submit a formal motivation for a portion of Ptn 33 Farm 748 to be included into the Klapmuts Urban Edge as part of the Stellenbosch IDP Review that is currently underway. Your consideration of the following will be greatly appreciated.

1. **Background to Ptn 33 Farm 748:**
   i. In 1995 Ptn 33 of Farm 748 (±39 Ha in extent) was purchased by the Backsberg Trust for agriculture purposes.
   ii. Initially the farm was utilised for in situ vineyards that formed part of the greater Backsberg Wine Estate. However, ±15 years ago blueberry tunnels were constructed on the property which is a more viable crop than grapes.
   iii. 5 years ago, a Canadian Investor constructed a ±6 500m^2 state of the art cannabis product facility on a portion of the property, but this operator subsequently withdrew from the country and the facility now stands vacant.
   iv. Due to the lack of electricity and water storage facilities on the property only the portion which is currently under tunnels is considered viable for agriculture. Accordingly in 2018 the landowner participated in the '**Klapmuts Spatial Development Area Economic Feasibility Study**' (as drafted by Beal Africa on behalf of Stellenbosch Municipality). This study assessed the potential to maximise the socio-economic opportunities within Klapmuts. The findings of the study were a '**Zoning**

Framework for Klapmuts', completed in 2019. This plan formed the basis of the local community stakeholders' groups **inputs into the Metropolitan Spatial Development Framework** (MSDF) which was being advertised at the time – see attached documents.

v. The 2019 Zoning Frameworks Plan for Klapmuts also motivated for the extension of a residential zone over a portion of Ptn 33 of Farm 748, and for an associated minor amendment / rounding off of the eastern urban edge of Klapmuts, This would then have aligned with the approved urban development of Anura and the natural watershed running through the middle of Ptn 33 Farm 748 which also aligns with the historic provincial road and railway line boundary to the north of the property.

vi. Unfortunately, these recommendations were not adopted in the 2019 Approved **Spatial Development Framework for Klapmuts.** In May 2023, the landowner provided further motivation for the amendment of the urban edge in public submissions on the Draft Stellenbosch MSDF.

2. Development Vision for an Agric-Estate on Ptn 30 & 33 of Farm 748 Klapmuts

i. Failing further Municipal feedback for the proposals listed above and considering the lapsed development rights on the adjacent ±4,8Ha property (Ptn 30 Farm 748), the landowner undertook a holistic reassessment of their land holding and agriculture position in the area. The outcome of this assessment proposed the following:
   - A new development application is now required for Ptn 30 of Farm 748 to reinstate the lapsed or alternative development rights;
   - With water / electrical capacities limiting expansion of any form of extensive agriculture activity on Ptn 33 of Farm 748 and noting the availability of the high-tech unutilised 6500m^2 cannabis facility, there is now an ideal opportunity to modernise the agriculture component on the property to account for new markets and the latest waterwise high tech agriculture technologies.
   - The future of agriculture

ii. The proposed **'La Vita Agri-Estate'** as presented to you last month (see attached Plan) is the conceptual outcome of this reassessment in that:
   - Careful consideration has been given to the location and nature of the urban edge on the property (which is arguably the gateway to the Franschhoek Wine Route) whereby the intent of any redevelopment is for the realigned urban interface to add market value and sustainability to the agricultural component of the property and likewise the agricultural component to enhance the lifestyle of the urban component of the property.
   - Rather than a single stand-alone Residential Development (as was proposed in the 2019 'Zoning Framework for Klapmuts'), careful thought and design has gone into now ensuring a mix of sequentially compatible land uses that transition from urban to agriculture as follows:
     - higher density urban zone (lifestyle units) adjacent to the existing 'Freedom Road' farm worker cottages;
     - an urban park and associated early childhood development centre serving as a buffer to a low density residential estate;
     - a boutique retail & commercial convenience centre will then in turn buffers the residential estate zone from the boutique agriculture zone (intended for organic & lifestyle compatible crops that will be consumed by the in-estate market). The Convenience Centre will capitalise on the significant local demand from passing traffic arising from the upgrading of the Simondium Road;
     - the intent is that the urban "edge" be drawn at the interface between the convenience centre and the boutique agriculture zone i.e. everything to

the west of the convenience centre will be urban and the area to the east will be agriculture – noting that both will form part of the integrated Agri-Estate;

- In so doing the boutique agriculture zone will integrate into an Agri-Hotel facility which will look to draw more overnight tourism to the area;
- This hotel facility will back onto the high-tech 6 500m^2 greenhouse facility which will look at modern hydroponic farming technologies and as well as training facilities.
- A Regional Farmers Market showcasing local produce from the Valley is planned in the existing 500m^2 shed.
- The most eastern portion of the property will be set aside for ±6 HA of intensive commercial farming which will supply the local market and Estate

3. Benefits to the Local Klapmuts Community and Stellenbosch Municipality

i. An informal meeting took place with the Ward Councillor to obtain inputs into the development vision and to obtain advice on the process to amend the SDF. He advised the landowner to first obtain input from the Spatial Development team as well as the Ward Committee.

ii. The meeting with yourselves took place on 28 August 2024. We appreciate the advice provided.

iii. This Ward Committee presentation, on 16 September 2024, went very well. The community representatives expressed the view that unlike another residential estate that would only provide limited jobs and training during construction and future occupation, it was envisaged that the Agi-Estate could generate significantly more long-term jobs and training as per the following initial estimates:

   a. Estimated capital investment – **R960 mil**
   b. Permanent employment opportunities (direct and indirect) after completion of total project – **710 new permanent jobs**
   c. Construction job value – **R260 mil**
   d. Construction jobs (annual for development period) – **1,440**

iv. Further it is proposed to explore on-site training facilities in agriculture / hospitality / artisan crafts and cooking skills

v. The Expected Rates & Taxes = **R6.28 mil** (excluding utility costs)

We trust that you will consider the information provided. Kindly advise on any additional information that you may require to consider the possible inclusion of Ptn 33 of Farm 748 in the urban edge.

COMMENT STELLENBOSCH 2019 DRAFT MUNICIPAL SPATIAL DEVELOPMENT FRAMEWORK

We refer to your notice dated 6 March 2018 with reference to the drafting of the Stellenbosch Municipal Spatial Development Framework (MSDF) for the WC024 area in terms of Sections 28(3) and 29 of the Municipal Systems Act, 2000 (Act 32 of 2000), Section 20 of the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013), Chapter 3 of the Western Cape Land Use Planning Act, 2014 (Act 3 of 2014) and Chapter 2 of the Stellenbosch Land Use Planning By-Law (October 2015).

Further to your notice above we confirm that we are submitting the following comment in response to the Draft Stellenbosch MSDF (2019) on behalf of the following parties / land owners:

John Cornelius Anthony – on behalf of Klapmuts Community
Paul Novak - Arra Wines
Tymen Bouma - Anura
Klaus Göbel - Stellenbosch Wine Country Estate
Etienne du Toit - Braemar
Gielie du Toit - Duvelop
Michael Back - Backsberg
J Engelbercht – Klapmuts Small Business

Commenting Premise

The principle premise of our commenting relates to the apparent omission in our view from the Draft Stellenbosch SDF, the findings and recommendations of the **Klapmuts Special Development Area Economic Feasibility Study** as drafted by Beal Africa on behalf of the Stellenbosch Municipality. Accordingly, no or limited alignment exists between the proposed **Klapmuts Zoning Framework** (*copy attached as annexure A*) proposed as part of the Klapmuts Special Development Area Economic Feasibility Study and the Draft Stellenbosch SDF as published for comment. The implication of the above would be that if the Draft Stellenbosch SDF in respect of the Klapmuts node is to be adopted in

its current format, then any number of the provisions / proposals contained in, or as proposed as part of the Klapmuts Special Development Area Economic Feasibility Study, will not be able to be implemented as technically it would be considered to be inconsistent with the Stellenbosch SDF to be adopted in terms of the Municipal Systems Act (Act 32 of 2000).

Background to the drafting Klapmuts Special Development Area Economic Feasibility Study

Beal Africa was appointed by the Stellenbosch Municipality during 2017 to draft an Economic Feasibility Study to underpin the establishment of the Klapmuts Special Development Area with the specific purpose to:

- Firstly, investigate the development of an innovation hub which serves the region (Drakenstein Municipality and City of Cape Town included) and which attracts unique commercial and high technology (clean) industrial development that could in future qualify for the establishment of a SEZ (special economic zone). The Terms of Reference (ToR), highlighted that the focus of the development in the area should consider facilities for agriculture and veterinary research, development and educational facilities on the western side of the area; intensive agriculture activities in the centre, with a long-term reform focus on the eastern side on waste recovery and re-use facilities to complement the Drakenstein initiative and/or agriculture related industry; and

- Secondly, the purpose of the feasibility study was to develop a road map for the development and growth of Klapmuts based on a VISION that would inspire and motivate all role players towards an agreed upon future.

Confirmation of Klapmuts SDA Report Drafting Process

The above appointment and brief resulted in an exhaustive drafting process the key dates (milestones) of which are listed below. These milestones are also reflected in the broader Stellenbosch MSDF Process Plan a copy of which is attached hereto as *annexure B* for your reference.

Inter-Governmental Steering Committee Meetings (IGSC)

- 28th July 2017 - BEAL 1st Presentation of the Klapmuts SDA to the IGSC
- 4th August 2017 - BEAL 2nd Presentation of the Klapmuts SDA to the IGSC

Feedback received during and in response to the above presentations made to the IGSC was positive and in support of the recommendations as contained in the report.

Mayoral Meeting

- 31st July 2017 - BEAL Presentation of the Klapmuts SDA to the Mayor

Feedback received during and in response to the above presentation made to the Mayor was positive and in support of the recommendations as contained in the report.

The above process resulted in a **Klapmuts Status Quo Report** and the **Klapmuts SDA Draft Report** which was published by the Municipality for comment on the 25th August 2017, comments were required before the 25th October 2017.

The subsequent responses received in response to the above publishing for comment of the Draft Report were all in support of the proposals as contained in the report.

In addition to the above the **Klapmuts SDA Draft Report** was the subject of a further round of public participation conducted as part of the Stellenbosch Municipality's broader SDF process as set out below

Public Participation Meetings

- 8th Nov 2017 – Stellenbosch
- 9th Nov 2017 – Klapmuts
- 15th Nov 2017 – Franschhoek
- 16th Nov 2017 – Jamestown

In summary, the above illustrates that the **Klapmuts SDA Draft Report** and the proposed zoning framework proposes as part thereof, was the result of a detailed and exhaustive drafting process which resulted in a 91-page document which, based on the commenting received was generally well received and widely supported.

2019 Draft Stellenbosch Municipal SDF provisions and context

With above mentioned in mind our broad line comment on the current MSDF as it specifically relates to the Klapmuts node is as follows:

- The **Klapmuts Plan** labelled as Figure 30 *(attached hereto as annexure C)* in the MSDF Report clearly contains erroneous allocation of "green areas" to be contained, as it includes land portions with existing approved and established development rights as well as land portions which have in fact been developed.

- The MSDF refers to Klapmuts as a significant new regional economic node yet the land budget consideration only speaks to land required primarily for indigent housing and give no indication of allocation land to actually realise the "vision" for the establishment a significant new regional economic node. In the latter regard the MSDF spatial proposals from an economic perspective seems to focus on Re Farm 736 located to the north of the N1 for the proposed relocation of Distell whilst there is single statement require Klapmuts south of the N1 to provide for a range of housing opportunities. This clearly does not align with stated purpose of, nor the range of alternative land uses proposed with the **Klapmuts SDA Zoning Framework**.

- Following on the above it is noted that one of the Stellenbosch MSDF consultant firms, Built Environment Partnership is also the consultant for the individual development application specifically for the proposed relocation of Distell to Re Farm 736. This does raise the question of a potential conflict of interest that may arise from their involvement in this regard and how it in turn relates to their involvement with the drafting of the Stellenbosch MSDF with specific reference to the Klapmuts node.

- A further significant spatial consideration that is not reflected in the 2019 Stellenbosch Draft MSDF relates to the recent signing of a MOU between the Stellenbosch University and Stellenbosch Wine & Country Estate (Pty) Ltd which allows for the donation of approximately 30ha of land to the University as part of the Stellenbosch Smart City Development initiative. The latter allows for the develop of the donated 30ha for tertiary instruction; facilities supporting tertiary instruction; sports and recreational facilities; facilities supporting the commercialisation of any knowledge and/or know-how owned or co-owned by SU or licensed to SU; arts and culture, such as an amphitheatre; and relevant and appropriate supporting infrastructure. This initiative as amongst others provided for in the **Klapmuts SDA Zoning Framework** referred to above, represents a significant opportunity for the future development of Klapmuts. Due to the lack of integration of the **Klapmuts SDA** proposals within the 2019 Stellenbosch Draft MSDF, this particular initiative is as a result effectively spatially not provided for in the Klapmuts node. This particular consequence further strengthens the argument for duly adopting / integrating the **Klapmuts SDA** proposals within the 2019 Stellenbosch Draft MSDF. A copy of the MOU Public Press Release made by the Stellenbosch University on 25/03/2109 referred to above is attached as annexure D for your information and perusal.

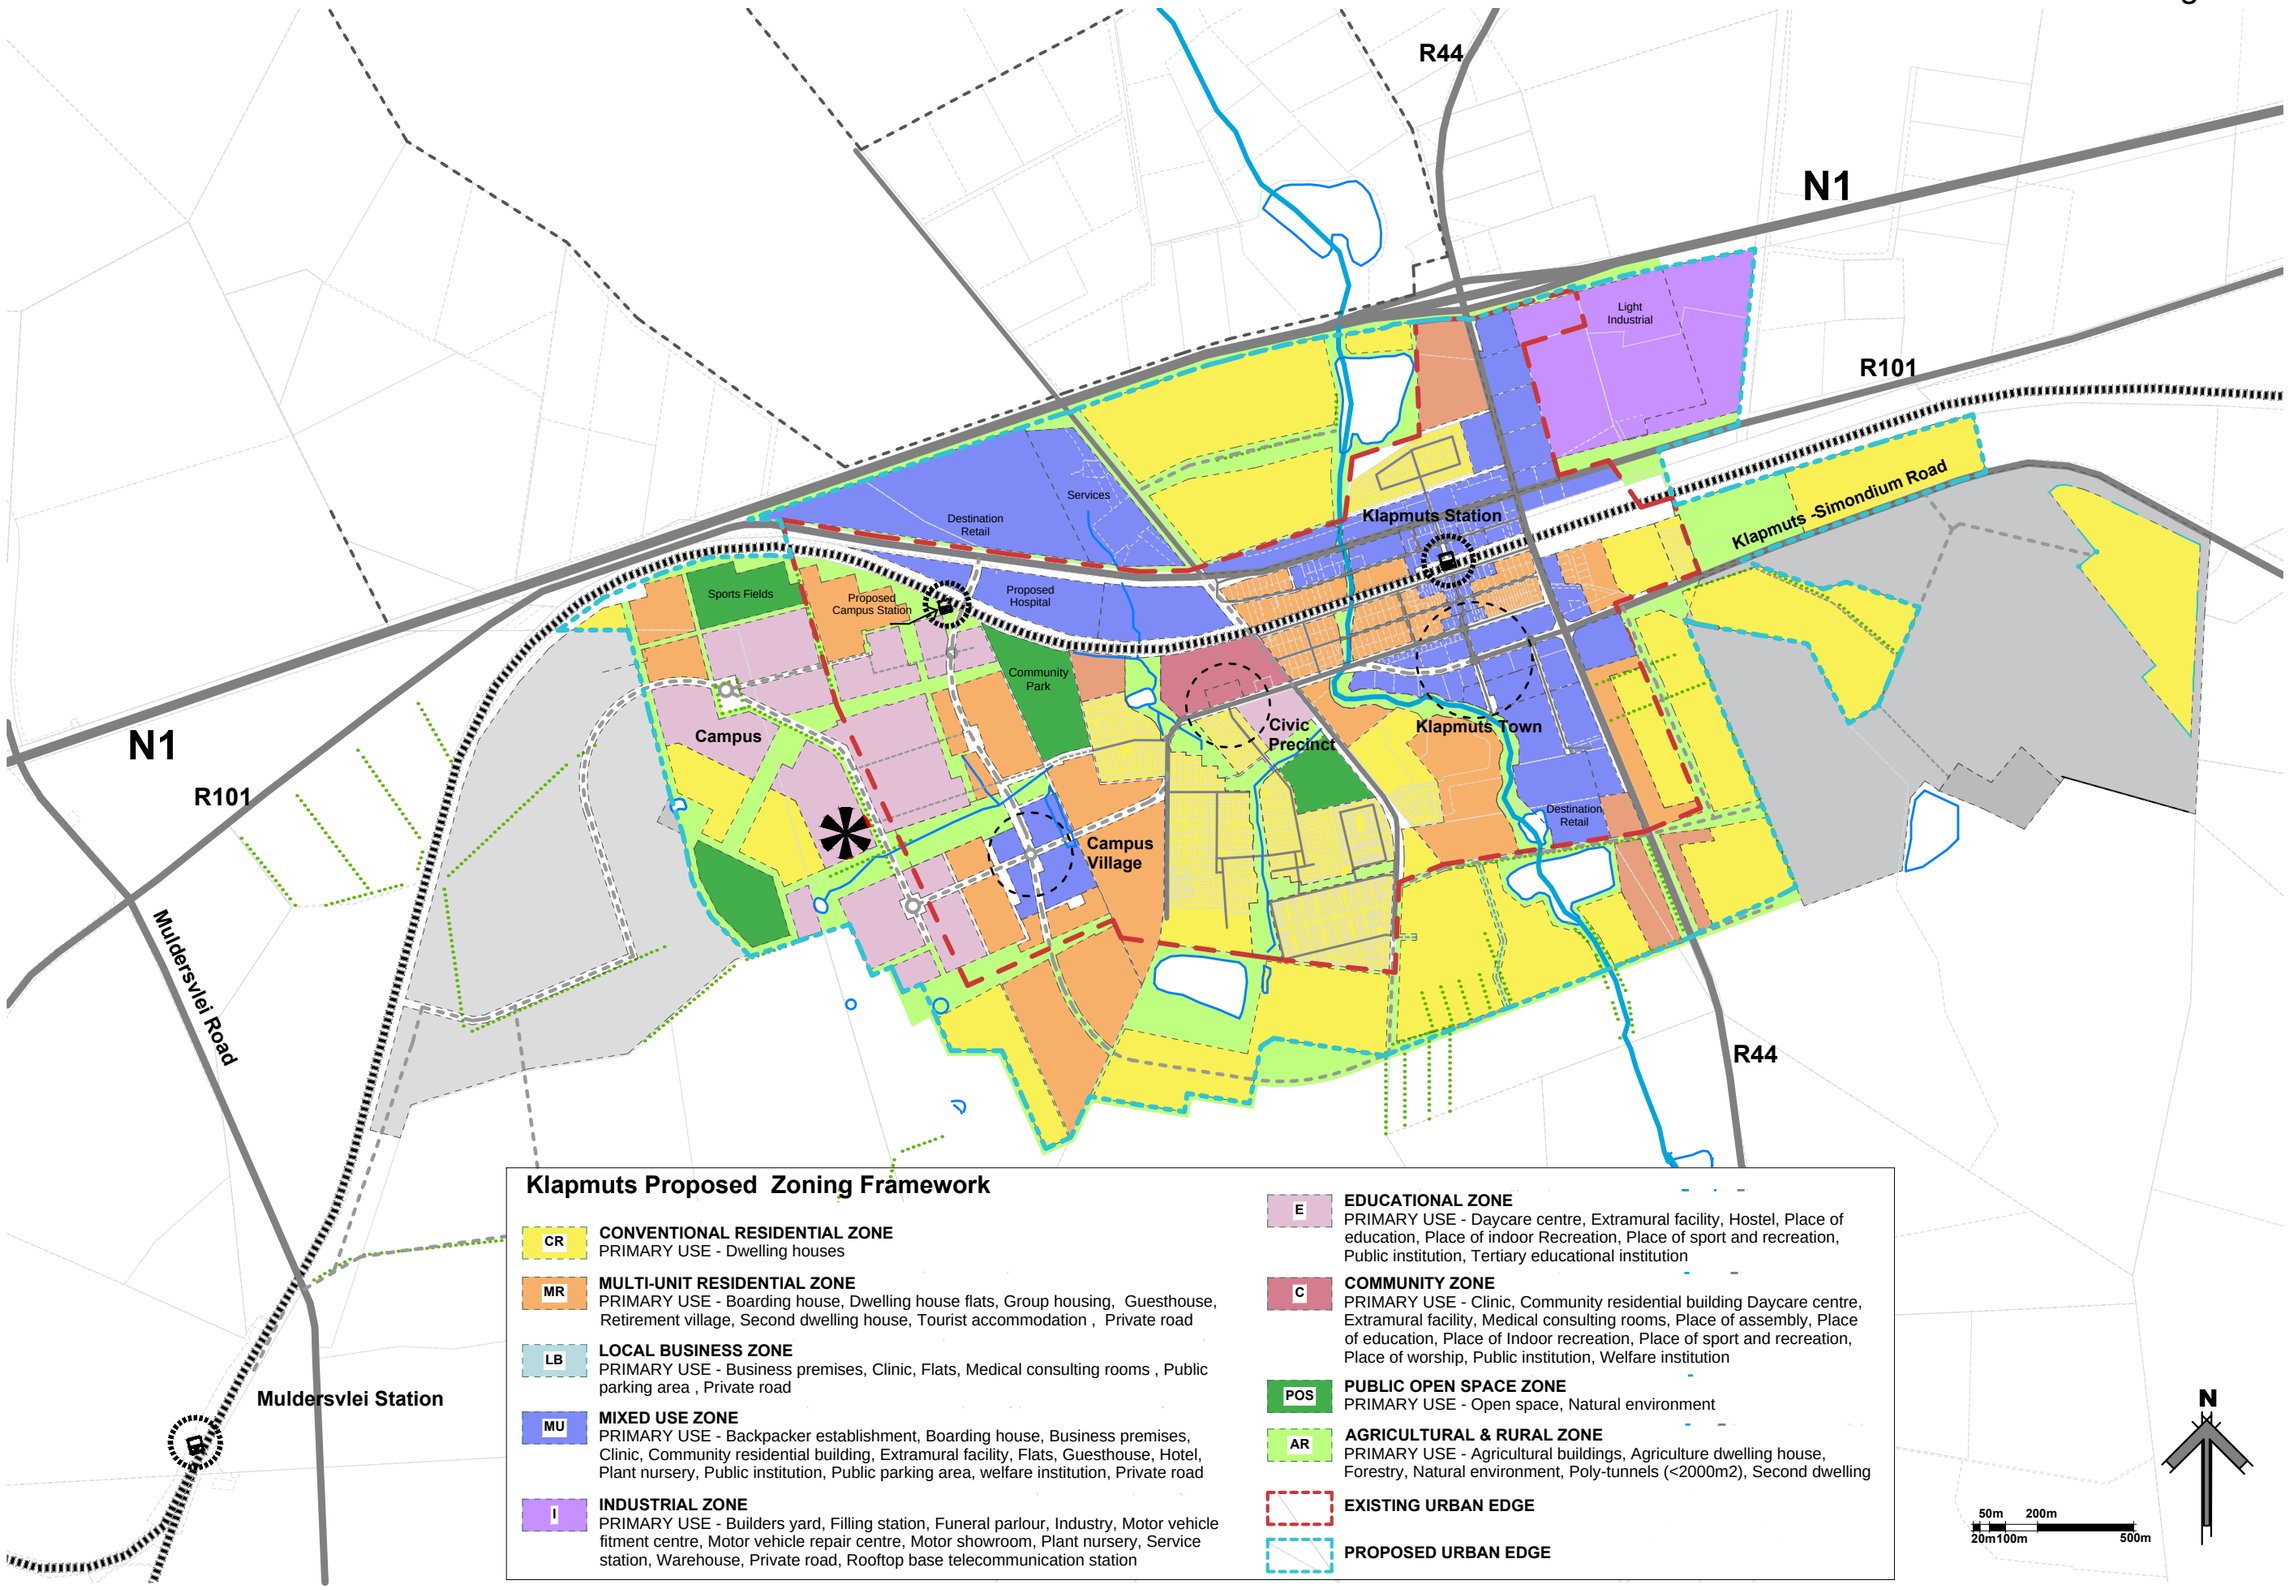
In summary the spatial concept input with specific reference to the Klapmuts node has effectively been reduced to a 4-page section within the MSDF. It should be evident that this input cannot and should for all intents and purposes not replace or supersede the extensive 91-page **Klapmuts SDA Report** as drafted.

<u>Conclusion and recourse sought</u>

Following from the input received at a Klapmuts Ward Councillor Community held on 4 April 2019 as well as the subsequent Stellenbosch IDP Budget input meeting of 11 April 2019, it was decided the following recommendations be put forwarded as part of this comment ins response to the proposed Draft Stellenbosch 2019 MSDF:

- The Klapmuts Broader Community including the business fraternity take note of the proposals as contained in the Draft Stellenbosch 2019 MSDF;
- The Klapmuts SDA Report be adopted as it is considered to be significantly more detailed in content and process than the current Stellenbosch MSDF Report and should accordingly represent the basis for the spatial planning proposals to be contained in and to be approved as part of the 2019 Stellenbosch MSDF;
- Suitable land be identified for a cemetery; and
- In addition to land for subsidy/ indigent housing land should also be identified for affordable and GAP Housing development in the broader Klapmuts area.

We trust you will give the above comment and input the necessary consideration in the finalisation of the 2019 Stellenbosch MSDF.



Kind regards

.....

Mr. J.C. Anthony
(On behalf of the Klapmuts Community)

ANNEXURE A

KLAPMUTS SDA PROPOSED ZONING FRAMEWORK

Klapmuts Proposed Zoning Framework

CR — **CONVENTIONAL RESIDENTIAL ZONE**
PRIMARY USE - Dwelling houses

MR — **MULTI-UNIT RESIDENTIAL ZONE**
PRIMARY USE - Boarding house, Dwelling house flats, Group housing, Guesthouse, Retirement village, Second dwelling house, Tourist accommodation , Private road

LB — **LOCAL BUSINESS ZONE**
PRIMARY USE - Business premises, Clinic, Flats, Medical consulting rooms , Public parking area , Private road

MU — **MIXED USE ZONE**
PRIMARY USE - Backpacker establishment, Boarding house, Business premises, Clinic, Community residential building, Extramural facility, Flats, Guesthouse, Hotel, Plant nursery, Public institution, Public parking area, welfare institution, Private road

I — **INDUSTRIAL ZONE**
PRIMARY USE - Builders yard, Filling station, Funeral parlour, Industry, Motor vehicle fitment centre, Motor vehicle repair centre, Motor showroom, Plant nursery, Service station, Warehouse, Private road, Rooftop base telecommunication station

ANNEXURE C
KLAPMUTS MSDF PLAN (FIG 30)

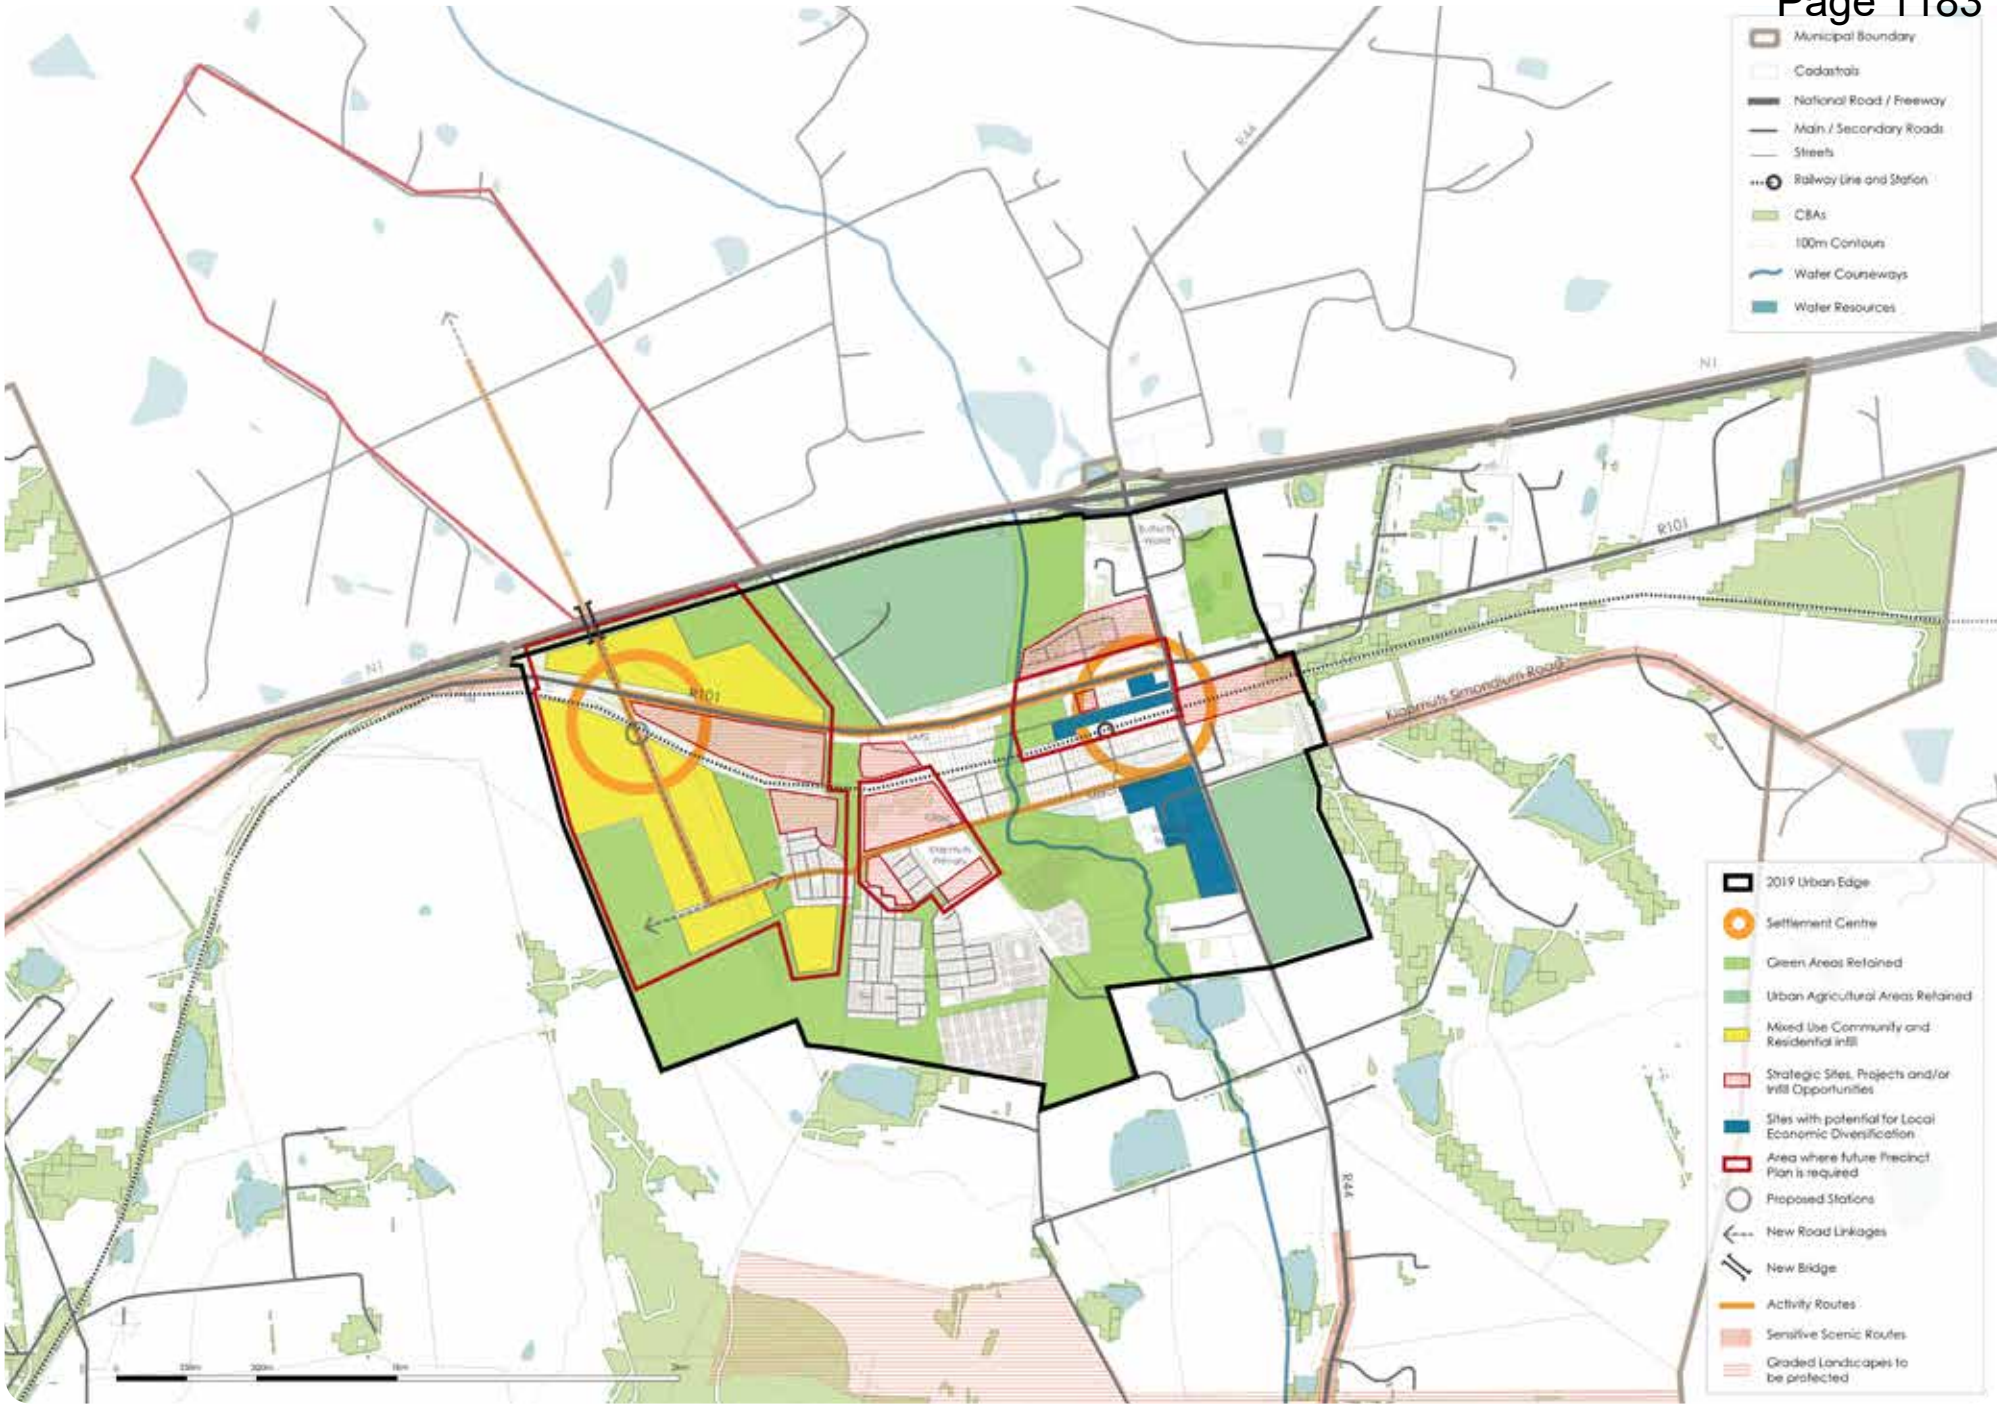

Figure 30. Klapmuts Plan

ANNEXURE D
STELLENBOSCH UNIVERSITY PUBLIC PRESS RELEASE
DATED 25 MARCH 2019

Stellenbosch University plans to expand Innovus within Stellenbosch Smart City

Innovation takes centre stage as Stellenbosch University enters its second century.

Stellenbosch University's vision to be Africa's leading research-intensive university, globally recognised as excellent, inclusive and innovative, a place where knowledge is advanced in service of society, is set to receive a major boost. This is thanks to a new world-class innovation hub to be established on 30 hectares of land that were recently donated to the University by the Stellenbosch Wine and Country Estate (Pty) Ltd.

The land donated is located in the Cape Winelands region of Klapmuts and forms part of 253 hectares of land owned by the Stellenbosch Wine and Country Estate; this land will be the site for the newly planned Stellenbosch Smart City development. Mr Jaap du Toit, in his capacity as chairperson and shareholder of the Stellenbosch Wine and Country Estate (the developer of this Smart City), was instrumental in making this donation possible. Du Toit, who graduated with a BAcc degree from SU in 1976, is also one of the founders of the investment management company the PSG Group and PSG Konsult.

The Stellenbosch Municipality sees the Klapmuts area as an important development node for the region over the next few decades.

"This wonderful gesture by the Stellenbosch Wine and Country Estate is testament to the trust that is placed in the future of Maties as we enter our second century as a university," SU Rector and Vice-Chancellor Prof Wim de Villiers said.

"We are particularly pleased about this donation as it is in line with our recently adopted Strategic Framework. It will help us to build a thriving Stellenbosch University and offer a transformative student experience, among other things.

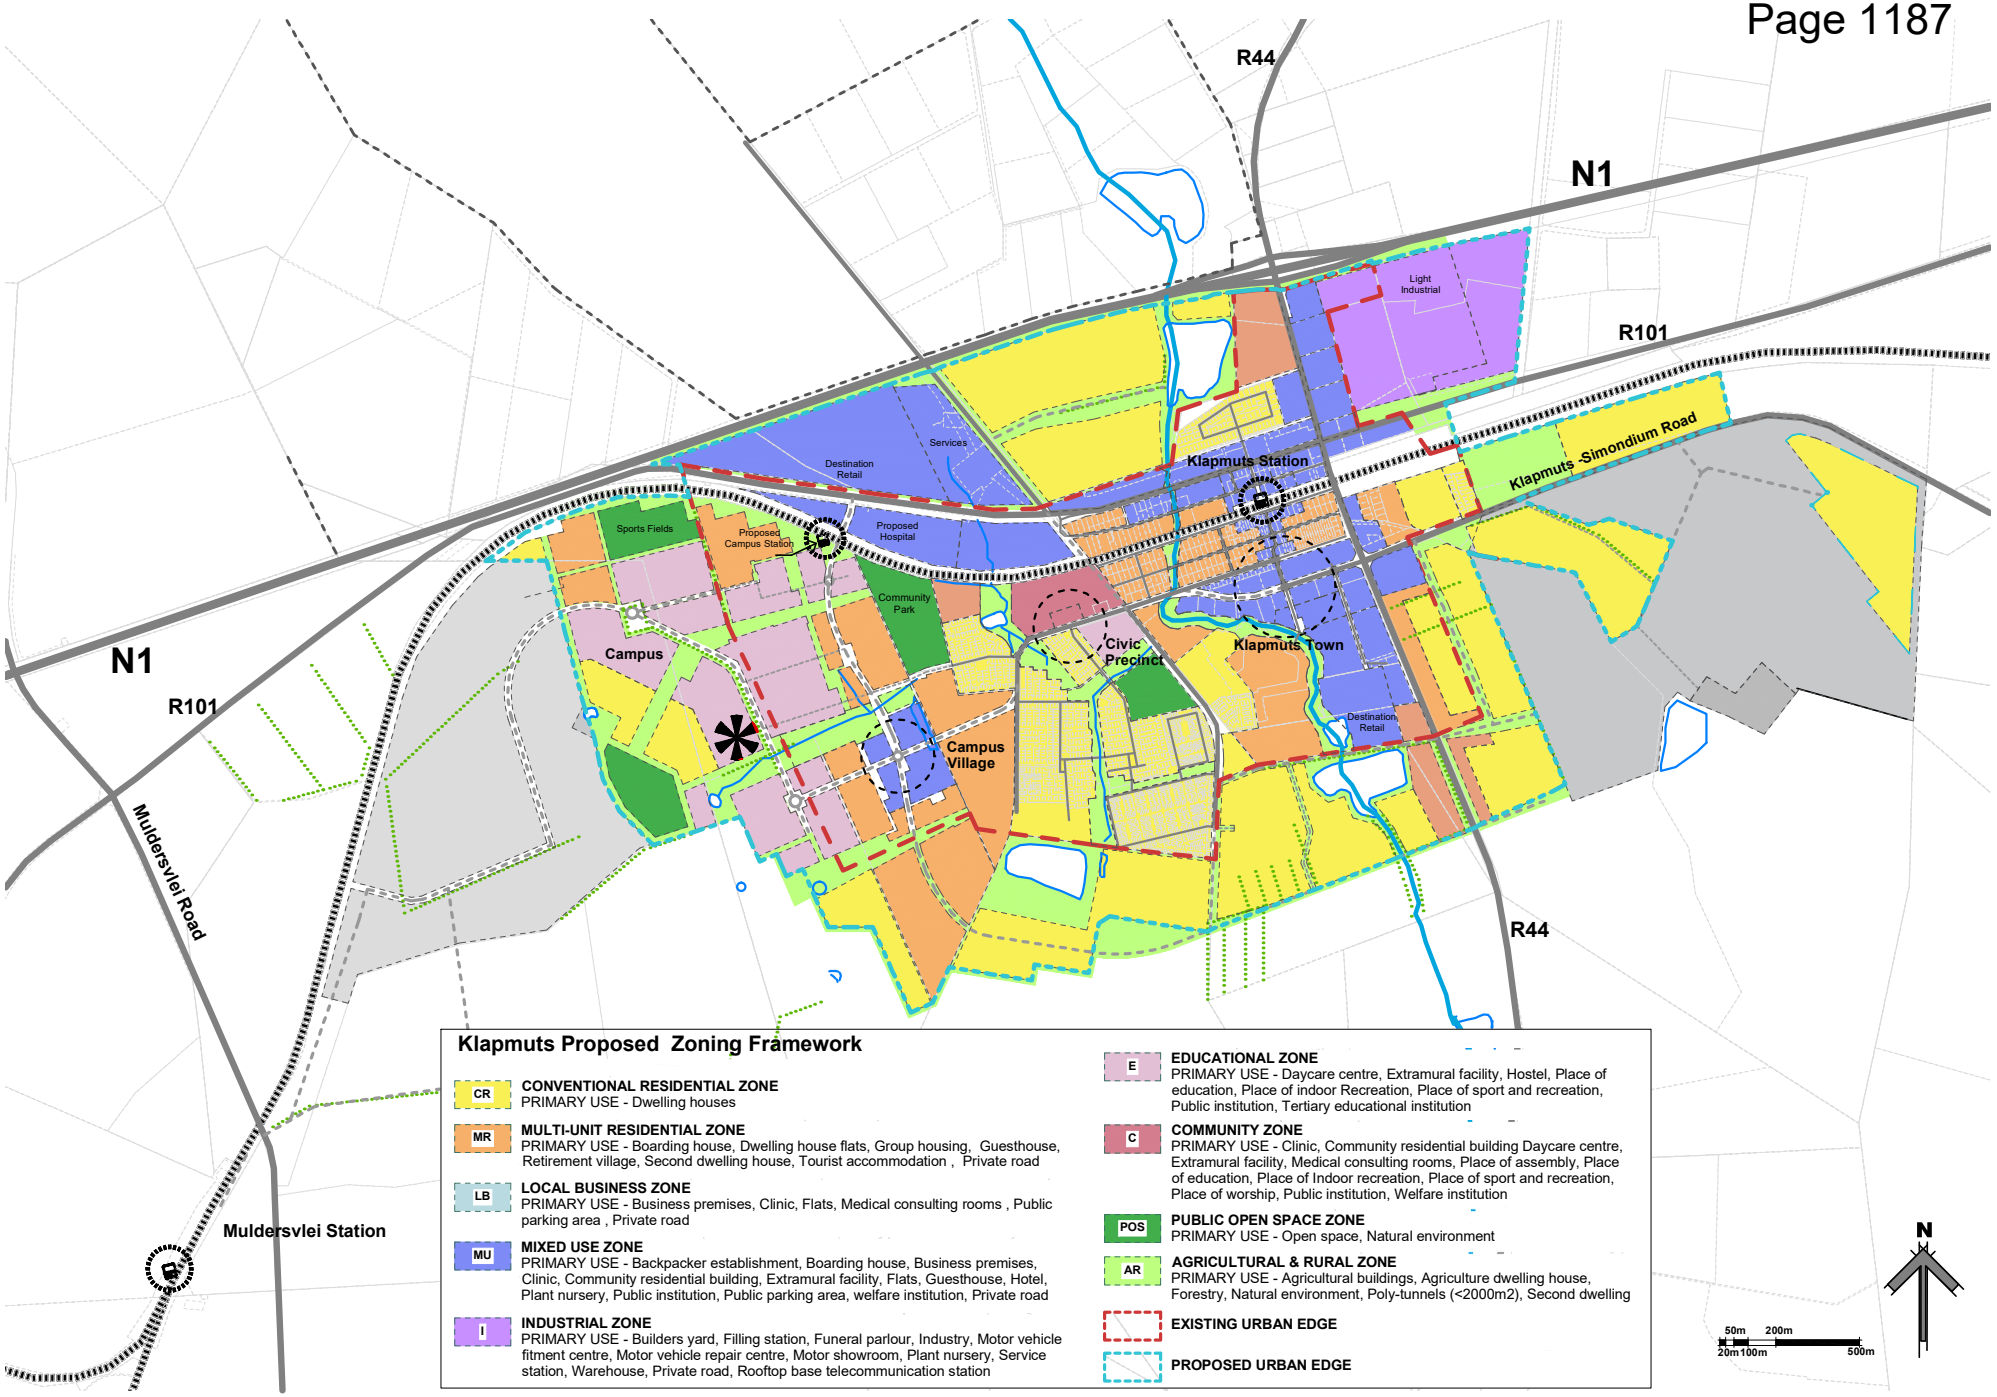
"Mr Du Toit is a loyal alumnus of the University, and this is both a magnificent and magnanimous gift to his alma mater. We appreciate it deeply and are very excited about the possibilities that it has opened up."

According to a memorandum of understanding between the University and the Stellenbosch Wine and Country Estate, SU may develop the area for tertiary instruction; facilities supporting tertiary instruction; sports and recreational facilities; facilities supporting the commercialisation of any knowledge and/or know-how owned or co-owned by SU or licensed to SU; arts and culture, such as an amphitheatre; and relevant and appropriate supporting infrastructure.

Ms Anita Nel, Chief Director of Innovation at SU and Director of Innovus, said that although projects to utilise this area were still in the planning stages, the first order of business was likely to be to establish an innovation hub with conference facilities. "We aim to offer alternative space on the designated SU land for the startups outgrowing the space within the University's LaunchLab business incubator."

The Nedbank-Stellenbosch University LaunchLab, a subsidiary company of Innovus, is a startup incubator that aims to build a thriving ecosystem for entrepreneurs in Africa.

"Our focus is on the entrepreneurs themselves and helping them to build a viable business through coaching and mentorship programmes. We support new businesses and foster a culture of entrepreneurship to entrepreneurs wishing to grow their businesses," Nel added.



Said Du Toit: "Stellenbosch University started 100 years ago with a donation by Jan H Marais. In line with history, we believe and trust that this donation will give SU the opportunity to grow for the next 100 years and further expand tertiary education.

"The University is bursting at its seams on its Stellenbosch campus, and an innovation satellite node will make a wonderful contribution. We believe that this donation will put the University on a path to establish a world-class node of innovation, which over time will also be able to serve more students."

The Stellenbosch Wine and Country Estate will elaborate and provide more details regarding its vision for the Stellenbosch Smart City in a follow-up media announcement.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good day,

Herewith a few items for the ward one IDP.

- Entrance road to Mont Rochelle Nature Reserve needs to be paved from R45 to helipad. Around 50m in total.
- Overflow of the Patrysfontein Reservoir is starting to come apart. Two sections have already broken off. If the weeds are cleared from it and it is properly repaired it will be good for another few decades.
- Most of the water furrow along Heide St was cleared of accumulated soil last year. However the last bit at the top of Van Riebeeck St was not done and is halfway clogged by soil. Also, several years ago, a leak was repaired under the furrow and the stone lining was never put back in place; ever since a pile of stones, now very overgrown with grass, has been lying there.
- The paving and rain water drainage around the Franschhoek Town Hall is in a shocking state. The paving is a tripping hazard in places and water runs everywhere but where it should.
- Trees need to be planted in the new parking area behind the Fhk Town Hall.
- The kerbs along most of Huguenot St need to be replaced. They're ancient and breaking apart in numerous places.
- The urban edge at the entrance to Groendal should be moved from the railway line to align with the R45 to preserve the rural entrance to the village.
- The Le Roux St/R45 intersection needs to be upgraded.
- A controlled burn needs to be done on the slope of Middagkrans in the Mt Rochelle Nature Reserve.
- Lighting required along the path on the NE side of the Patrysfontein Reservoir. The other 3 sides already have lighting.

Dear Mr/Ms
Herby attached my contribution for the 2025-2026 IDP.
Thank you.
D C Botha (ald)

IDP requests for Cycling in Stellenbosch Municipality: NMT Projects 25/26

In the Policies and Plans of the Stellenbosch Municipality much is made of a Car-Free CBD, cycling lanes and cycling paths and a modal shift in the CBD towards public transport, walkability and cycle-ability in the Municipality. (Non-Motorised Policy 2022, p.3). See the previous IDP and the Review of the Stellenbosch CITP 2022-2026 (9.7 Future Solutions Devlopments/Proposed Interventions. pp 113, 114) re the importance of cycling.

I do not say that cycling is the complete answer to the congestion of traffic and parking problems in Stellenbosch, but it can make a significant difference, as lately proven in other cities in the world, e.g. London, Paris and Copenhagen.

The Stellenbosch NMT Policy says:
The Cycle Plan (Therefore the NMT Policy acknowledges the Cycle Plan) has set the scene for promoting cycling in the CBD towards its aspirational goal of being "recognised as the best cycling town in South Africa and one of the best cycling tourism destinations in the world", and a series of action plans have been identified.- **NMT Policy p.3.**
If these important Policies and and Plans stress Cycling and Cycle-ability the Municipality largely neglects investments for cycling and cycle-ability.

This is a request that the Cycle Plan for the Town of Stellenbosch 2015 and its Review, Update and Consolidation of the Stellenbosch NMT Masterplan & Cycle Plan (2020) be Implemented in the Municipality. See Table 6. Details of NMT Short-Term Projects for SM. pp. 61, 62.-

In order to do this properly I request a separate and specified Cycling Budget.

The primary scope and objective of the above review document is the consolidation of Stellenbosch's NMT Masterplan and Cycle Plan (both prepared in 2015), the update thereof and the development of an implementation plan, as well as the preparation of NMT strategiesand policies. (page 2 of the Review 2020). The Review document (approved by CouncilOn 26 October 2022) implies that the Cycle Plan of 2015 is a part of it and therefore approved by Council.
The CITP, previous IDP's and the NMT Policy (approved 26 October 2022 by Council over and over stress the importance of of cycling.

Details of NMT Short-term Projects for SM (Table 6, Review document, p.61):

1. Project No. 28: Martinson Rd: Narrowing of road with a separate two-way bicycle facility on the southern side between Omega St and Simonsberg Rd; incl. gateways and sidewalk on northern side. (p.61)
2. Project No 29: Jonkershoek Rd: Upgrade of shared path (widen and resurface..)
3. Project No 19: Safe bicycle crossing from bicycle paths across Helshoogte Rd crossing from Cluver Rd to Rustenberg Rd and from Rustenberg Rd to Cluver Rd.

Other requests:

1. Rehabilitation of tarred NMT path from Van Riebeeck St to Merriman Ave.
2. Rehabilitation of ratelite NMT path from Victoria St to Jannasch St. At Martinson St ithe tarred extention must join the two-way bicyle path and sidewalk on southeastern side of Martinson St.
3. Safe and Separated bicyle paths in Cluver Rd.
4. Rehabilitation of laterite NMT path between Koloniesland and Eerste River.
5. Separated cycling lanes in Merriman Ave.
6. Two-way cycling in all One-way streets, as in Dennesig Street.
7. Redesign of fourway stop to accommodate cyclists and pedestrians between the old bridge at Coetzenburg and Dwarslaan, Die Laan and Noordwal-Oos.
8. Redesign of all crossings over Adam Tas Road, R44 and R301 to be safe for cyclists and pedestrians, e.g. Langs St and R44, R301 and Bird, Dorp St and R44, Van Reede street and R44. Rustenberg Rd over the Helshoote Road (R301).

The principle has to be ***connectivity*** between residential areas and between residential areas and the CBD and university campus. In other words ***the cycling network must be completed.***

The present budget for cycling is totally inadequate to meaningfully execute the cycling policies and plans of the Municipality. It is a mere fraction of the Roads budget.

If the Municipality is serious about carrying out its own policies and plans re cycling it must reprioritise, separate and specify its budget for cycling.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Sir/Ms

I have an addition to make to my comments on the IDP re Cycling:

1. The Lock-up facility for cycles in the Budget is not a priority in comparison to the completing of the network for cycles. I also do not see it as a priority
and it is not mentioned in1able 6: Details of NMT Short-term projects for SM in the Revised, Updated and Consolidated Cycle Plan (2022. p 61, 62)
I therefore submit that the two year budget for the Lock-up be transferred to the section of Develop and Implementation for Cycle Plan in the Budget.

I would also like to submit the following priorities in Table 6 (mentioned above)
Projects No 1 ;2 ;10; 13; 14; 18; 19; 20; 23; 26; 27; 28; also provide safe crossing for bicycles: 30 - 32; Groendal 44 - 48. Many of my suggestions in my first submission, are priorities according Table 6.

Thank you.

IDP requests for Ward 7: NMT Projects 25/26

Introduction:

This is a request that the Cycle Plan for the Town of Stellenbosch 2015 and its Review, Update and Consolidation of the Stellenbosch NMT Masterplan & Cycle Plan (2020) be Implemented in Ward 7.

The primary scope and objective of the above document is the consolidation ofStellenbosch's NMT Masterplan and Cycle Plan (both prepared in 2015), the update thereof and the development of an implementation plan, as well as the preparation of NMT strategies and policies. (page 2 of the Review 2020). The Review document (approved by Council On 26 October 2022) implies that the Cycle Plan of 2015 is a part of it and therefore approved by Council.

The CITP, previous IDP's and the NMT Policy (approved 26 October 2022 by Council stresses the importance of importance of cycling.

Details of NMT Short-term Projects for SM (Table 6, Review document, p.61):

1. Project No. 28: Martinson Rd: Narrowing of road with a separate two-way bicycle facility
   on the southern side between Omega St and Simonsberg Rd; incl. gateways and sidewalk on northern side. (p.61)
2. Project No 29: Jonkershoek Rd: Upgrade of shared path (widen and resurface..)
3. Project No 19: Safe bicycle crossing from bicycle paths across Helshoogte Rd crossing from Cluver Rd to Rustenberg Rd and from Rustenberg Rd to Cluver Rd.

Other requests in Ward 7:

1. Rehabilitation of tarred NMT path from Van Riebeeck St to Merriman Ave.
2. Rehabilitation of ratelite NMT path from Victoria St to Jannasch St. At Martinson St its tarred extention aa must join the two-way bicyle path and sidewalk on southeastern side of Martinson St.
3. Safe and Separated bicyle paths in Cluver Rd.
4. Rehabilitation of laterite NMT path between Koloniesland and Eerste River.

STELLENBOSCH
7599

Dear Madam

COMMENTS: THIRD REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP 2022 – 2027)

The Stellenbosch Agricultural Society representing organised agricultural in the Stellenbosch area hereby formally provides their comments on the Third Review of the 5th Generation IDP 2022/2027 (April 2025).

The Society over the last number of years has submitted comments on the IDP and associated processes. The Society however remains concerned about the lack of integration and alignment between the IDP and SDF with special reference to land reform, rural development programmes, farm worker housing and incentives for commercial farmers to sustain their farming activities.

SECTION 1.21 – STAKEHOLDERS (REFER TO TABLE 19)

As per the previous engagement and review process it is again emphasised that the Stellenbosch Agricultural Society should be recognised and included as a strategic partner of the Municipality. The Agricultural Society represents organised agriculture in the Stellenbosch area and is affiliated with Agri Western Cape on provincial level and AgriSA on a national level. The primary focus of the Society is to ensure sustainable food security and to protect high potential agricultural land in support of sustainable agriculture and

employment opportunities especially relation to the primary producers. The Society in collaboration with the Stellenbosch Farm Worker Forum and other role players are actively involved in aspects that ranges from alternative energy provision, minimum wages, economic constraints with reference to export (ports), water allocations, WIETA standards, diesel rebates etc. This partnership can have mutual and strategic benefits to strengthen the agricultural resource and production base in support of economic development of the rural areas.

CHAPTER 4: SPATIAL DEVELOPMENT FRAMEWORK

Calcutta Memorial Park

In terms of the 2024/2025, 2025/2026 capital projects the Calcutta Memorial Park is listed as the 4th highest capital project as set out in the Medium Term Revenue and Expenditure Framework with a total amount of R72,320, 550. The Spatial Development Framework and Capital Expenditure Framework in this regard is not aligned and it therefore is recommended that the Spatial development framework be revised in order to include the Calcutta Memorial Park on a spatial level.

Local Spatial Development Frameworks

The formulation, preparation and approval of local spatial development frameworks for the rural nodes have been outstanding for a long period of time. This especially is of importance for the areas alongside the Baden-Powell and R304 corridor. Areas like Vlottenburg and Koelenhof are experiencing severe development pressure and it therefore is requested that funding be made available towards the planning and approval of the Vlottenburg and Koelenhof rural node.

INTEGRATED HUMAN SETTLEMENTS: HOUSING PROJECTS

The objective of the Housing Pipeline is to provide more emphasis on the following housing types or programmes:

- Social housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in November
- Provision of serviced sites;
- Access to affordable housing (GAP housing);
- Mixed-use housing (formalised homeownership employer housing - especially farmworker housing).

The IDP and assoicated Housing pipeline recognises the importat role of farm worker houses as par the mix-use housing programme. The Municipality must give a clear and definte indication as to where and in which projects opportunities will be made available to accommodate for farm worker housing

SPECIFIC PROJECTS

KAYAMANDI NORTHERN EXTENSION

The Stellenbosch Agricultural Society supports the northern extension of Kayamandi. The area indicated in green on the proposed rezoning and subdivision plan however must be retained and protected for agricultural purposes. The said area is located on the eastern boundary of commercial farms and our concern is that further residential development on this portion could infringe on property rights and operational management and agricultural activities of the farms.

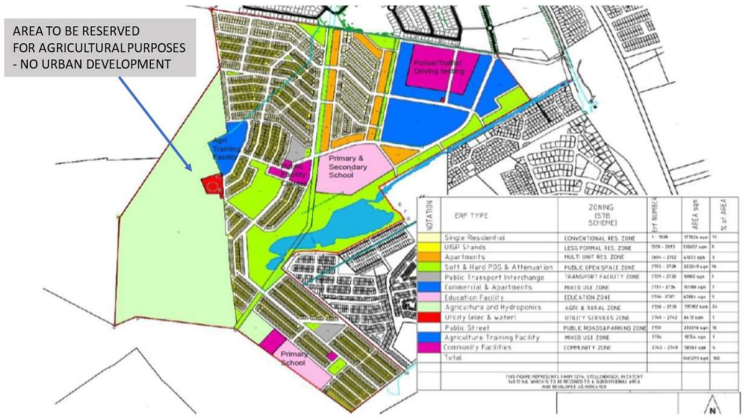

Figure 25 - Northern Extension Integrated Mixed-Income Human Settlement Development Subdivision Layout

SOCIAL HOUSING PROPOSED ON FARM 81/2 AND FARM 81/9

The proposed development of approximately 250 social housing units on the properties will not complement the social functionality of the neighbourhood since it cannot be integrated with other minimum ancillary and complementary uses. The properties are wedged between the railway line to the east and the R304 to the west which does not allow for holistic and integrated neighbourhoods. Urban development in the form of social housing units on the said properties furthermore will compromise the objectives of the Scenic Overlay Zone as set out in the approved Stellenbosch Zoning Scheme By-Law (2023).

LOCAL ECONOMIC DEVELOPMENT STRATEGY

Local economic development is the means of systematic identification, development and utilisation of economic opportunity, to benefit local businesses and create opportunities for local communities to improve the lives of residents. The Stellenbosch Agricultural Society in dealing with the rural community and organised agriculture hereby proposed the following interventions:

- Red tape reduction in planning department
- Building plan approvals
- Streamlined process that conforms to By-Laws stipulations
- Tax rebates in relation to heritage protection of farms, new vineyard plantations, provision of institutional/community facilities on farms (creches, pre-schools, public transport, housing, sport fields etc)
- Alien clearing and river management practises
- Partnering/engaging with the Society and the Farm worker Forum in relation to land availability and allocation to emerging farmers
- Liquor and trade licences
- Issuing of zoning certificates
- Streamline/prioritise applications aimed and agri-processing and related tourist facilities

CONCLUSION

It is trusted that the Municipality will consider and include the comments of the Stellenbosch Agricultural Society as part of the Draft Second review of 5th Generation IDP 2022/2027.

Yours faithfully

EMILE VAN DER MERWE

Dear Madam

COMMENTS: THIRD REVIEW 5th GENERATION IDP 2022- 2027: INFRASTRUCTURE SERVICES DEVELOPMENT CHARGES POLICY (DC POLICY); 2025/2026

The Stellenbosch Agricultural Society, hereby comments on the *2024/2025 Revised Infrastructure Services Development Charges Policy.*

DEVELOPMENT CHARGES (APPENDIX 15 OF IDP)

The Stellenbosch Municipality adopted the new Stellenbosch Zoning Scheme By-law that came into effect on 1 November 2019 as amended during November 2023. The properties that are **located outside the urban areas are predominantly zoned Agricultural/Rural Zone** in terms whereof certain additional land use and consent uses are permitted with the approval of Council. These rights were specifically incorporated in order to assist the farmers with small scale diversification in support of local and rural economic development.

Paragraph 6.2 of the Policy makes provision for certain types of land uses where development **charges do not apply** since the impact of the land use will have an insignificant impact on engineering services infrastructure and it may have a social and/or economic benefit to the Municipality and/or the community:

Paragraph 6.2: Development charges do not apply

It also does not apply to the following types of land use applications, as the impact of those land uses have an insignificant impact on engineering services infrastructure and those uses have a social and/or economic benefit to the Municipality and/or the community. An example as provided for in terms of the policy is provided below:

6.2.3. *House shops up to the lesser of 30% of the floor area of the buildings on the site or 50m2 per erf*

The Society hereby proposes and recommends that provision must also be **made for a <u>home occupation practise</u>** that is conducted from the dwelling house on a farm as per the requirements of the zoning scheme by-law (2023) listed below:

(16) For a <u>home occupation practice</u> in this zone, the following further parameters shall apply together with the provisions in subsections (1) to (13):

(a) the activity should be of such a limited nature that the operator shall employ no more than two persons.

(b) the hours of operation shall be limited to between 07:30 to 18:00 Mondays to Saturdays.

(c) the maximum floor area for a home occupation practice (including storage) shall be no more than 30% of the floor area of the buildings on the land unit up to a maximum of 50m².

Reason for exemption:

- The primary uses of the land unit shall remain the residence of the proprietor
- The maximum area will not exceed 50m²
- The proposed area (for examples an administrative office for the on-line marketing and sale of wine) will have no impact on engineering services
- The area is not open for the public and no goods can be purchases on site
- No additional traffic will be generated

<u>The Society therefore proposes that a home occupation practise on a farm (existing dwelling) also be exempted from paying development charges and that it be included under Section 6.2</u>

PARAGRAPH 13 SPECIAL ARRANGEMENTS

The Stellenbosch Agricultural Society fully supports the provision on farms whereby development charges will not be levied in respect of buildings that are reasonably connected with the permissible main farming activities on the farm (e.g. wine cellars, bottling facilities, packaging and storage). Development charges however will be levied of any other development on farms that requires land use applications. A scientifically calculated reduction

factor of 50% will be however be applied to the trip generation rates as specified for agricultural uses outside of urban areas.

Notwithstanding the above provision (50% reduction on trip generation) the Society is of the opinion that tourism related facilities on farms also be exempted from paying development charges. The current formula, even with the 50% reduction on trip generation, is not conducive and contradicts the overarching objectives of the IDP as it will restrict and prevent rural investment and associated job opportunities. The rate per square meter (based on Gross Leasable Area) differs substantially in an urban and rural context. The extreme inset costs together with a development charge is considered counterproductive and is seen as additional burden placed on farmers to sustain their farming practises.

It is sincerely trusted that the Municipality favourably will consider the comments and revision of Development Charges Policy.

Yours faithfully,

Emile van der Merwe

Dear Madam

COMMENTS: THIRD REVIEW : 5TH GENERATION IDP 2022–2027 DRAFT BUDGET: TARIFF AND RATES POLICY

The Agricultural and associated tourism industry contributes significantly to the areas gross geographic product (GGP) of the Stellenbosch Municipal (WC0024) area.

However as a result of various environmental and economic conditions in the Western Cape the agricultural sector is becoming under severe pressure and the majority of the producers are experiencing difficulty in sustaining their farming operations. These detrimental economic factors leads to severe pressure to conform to the recommendations indicated in the Integrated Development Plan (IDP) read together with the National Development Plan. It therefore is imperative that the IDP and associated budget policies creates an enabling environment that is conducive to increased agricultural activities, so as to ensure food security as well as sustaining the employment opportunities related to the sector.

According to recent statistics new vineyard establishment has decreased significantly over the last few years with declining profit margins in relation to other production areas. These detrimental economic circumstances currently associated with the production and wine industry can lead to an ever changing rural environment to the detriment of the town, the

historical and cultural landscape as well as sustaining the employment opportunities that benefit from the agricultural sector.

As a result of constant increasing external factors influencing the rural economy there are unfortunately various needs and priorities like farm worker housing, installation and upgrading of essential services, provision of social facilities (schools, crèches etc.), the provision and upgrading of the sport facilities as well as skills and training programmes that cannot be addressed adequately by farming entities alone. In light of the current economic environment the producers and land owners are really experiencing great difficulties to maintain the services on an acceptable level of standard. Research however has shown that "*rebates on property tax"* can be of great value to encourage the farmers in assisting municipalities with the provision and maintenance of these services as far as possible.

The Stellenbosch Agricultural Society in association with The Stellenbosch Farmworker Forum hereby requests and propose that the Stellenbosch Municipality adopts the same financial model as currently being implemented by the Bergriver Local Municipality as part of their budget and rates policy framework. The proposed tax rebate policy will apply to bona-fide agricultural owners belonging to agricultural societies affiliated to Agri Western Cape and subsequently also to the SA Agricultural Union, situated in the Stellenbosch WC0024 municipal area.

PROPOSAL

"Agricultural properties will be granted rebates as determined by council in its annual Budget.

(a) An additional 10% rebate calculated as follow could also be granted:

i.	1 x two bedroom houses on property	1.00%
ii.	2 x two bedroom houses on property	2.00%
iii.	3 x two bedroom houses on property	4.00%
iv.	>3 x two bedroom houses on property	5.00%
v.	If electricity provided to worker's houses	0.25%
vi.	If water is provided to worker's houses	0.25%
vii.	If sewer is removed from worker's houses	0.25%
viii.	If refuse is removed from worker's houses	0.25%
ix.	If school on property or transport is provided to learners	1.00%
x.	If sport facilities on property	1.00%
xi.	If transport to nearest town is provided at	

	no cost to workers at least once per month	1.00%
xii.	If training is provided to workers	1.00%”

(b) An additional 2.5 % for every 5ha of newly planted vineyards
(An additional proposal for rebate specifically for the SW024 area)

The above additional rebate will only be evaluated and granted to Bona Fide farmers with submission of the following documentation with their application:

(i) Proof of VAT registration
(ii) Existing account must not be in arrears with the Municipality.
(iii) Copy of I.D. Document of all workers residing on the farm

Applications for the rebate must be submitted in accordance with the prescribed process in terms of the Rates Policy. The additional rebate can only be granted on the value of the property as it appears on the valuation roll. Properties of the same owner, but valued separately cannot be added together for the calculation purposes.

The Stellenbosch Agricultural Society as well as the Stellenbosch Farmworker Forum sincerely believes that the implementation of the above holds a significant advantage to stimulate public private working relations to the benefit of the area and its community in a sustainable manner. The proposal is consistent with the vision and it will give practical execution to the five (5) strategic objectives as adopted in terms of the existing and proposed Municipal Integrated Development Plan.

We trust that the Stellenbosch Municipality favourably will consider these requests and recommendations in support of the agricultural sector.

Your feedback in this regard is kindly awaited.

Yours faithfully,

Emile van der Merwe
GENERAL MANAGER: STELLENBOSCH AGRICULTURAL SOCIETY

Etienne Malan

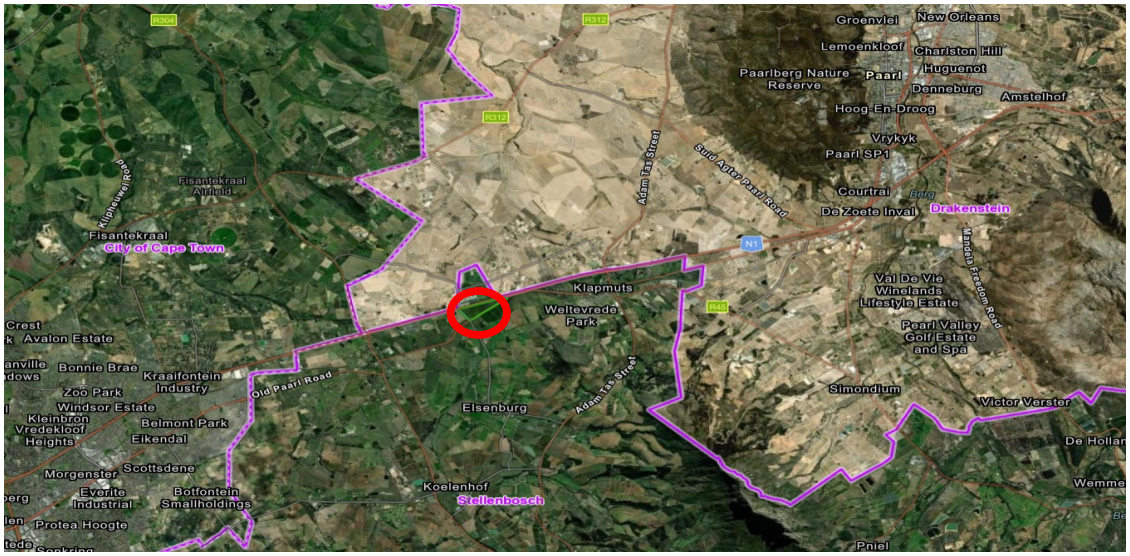
DATUM / DATE: **29 April 2025** ONS VERW / OUR REF: **13703/AC/EM**

PER EMAIL

Attention: G Mettler,
Municipal Manager
Stellenbosch Local Municipality
PO. Box 17
Stellenbosch
7600



Sir,

STELLENBOSCH IDP 2025 CONTRIBUTION:
PROPOSED DEVELOPMENT CORRIDOR – KLAPMUTS

With reference to the above-mentioned , a Land Use Application will be submitted from this Office pertaining to the amendment of the Stellenbosch MSDF that is included with the Draft 3 of the 5th Generation Integrated Development Plan (IDP) 2022- 2027.

In accordance with Section 34(a)(i)(iii) and Chapter 4 of the Municipal Systems Act,2000 (Act No.32 of 2000(MSA)) , the contribution is made as part of the Stellenbosch MSDF component of the IDP review public participation process on behalf of the owners of Portion 1 of Farm 1151, Stellenbosch (Refer to Notice letter in ***Addendum C).***

Portion 1 of Farm 1151, Stellenbosch is located south and along the N1 between Klapmuts and Joostenberg.

VENNOTE / PARTNERS:

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

Purpose

The proposed delineation of a rural development corridor between Klapmuts and Joostenberg, in an effort to address key socio-economic and urban development challenges facing the Stellenbosch Municipality, such as unemployment and sufficient land earmarked for business and industrial development. The proposed development on Portion 1 of Farm 1151, Stellenbosch, located within the proposed rural corridor, could serve as a catalyst for development in the area and especially along the R101 (Old Paarl Road). The proposed development on Portion 1 of Farm 1151, Stellenbosch, and the proposed rural development corridor, will further enhance the N1 as a prominent and important development corridor.

Context of proposed development of Portion 1 of Farm 1151, Stellenbosch:

Due to the location of Portion 1 of Farm 1151, Stellenbosch, and the close proximity of various important routes, and the boundaries of the Drakenstein and City of Cape Town Metropolitan, it is very important to establish a clear context for the purpose of this submission. The Context can be established from the following points:

a) Portion 1 of Farm 1151, Stellenbosch could be part of a **development link between Muldersvlei and Koelenhoef along the R304 corridor**, as promoted by the Stellenbosch MSDF that should accommodate more growth. As a long-term proposal, it requires private sector led institutional arrangements and support to enable planning and development.

NEW DEVELOPMENT ACTIONS	SIGNIFICANT NEW MIXED USE DEVELOPMENT	• Over the longer term, Muldersvlei and Koelenhof along the R304 corridor could possibly accommodate more growth, and be established as inclusive settlements offering a range of opportunities. However, these settlements are not prioritised for development at this stage.	• Support private sector led institutional arrangements to enable joint planning and development.
	SIGNIFICANT NEW RESIDENTIAL DEVELOPMENT	• Explore the feasibility of changing/complementing the rail service along the Baden Powell Drive-Adam Tas-R304 corridor to a system providing a more frequent, flexible service better integrated into the urban realm.. Alternatively, a regular bus service should be explored serving the same route.	
	SIGNIFICANT CHANGE TO ACCESS AND MOBILITY PROVISION	• Explore the development of De Novo as an emerging farmer incubator. As far as possible, focus investment in parks, open space, and social facilities accessible by public and NMT, in this way also increasing the surveillance of these facilities.	

Table 26: Plan Elements and Proposals for Koelenhof - Muldersvlei

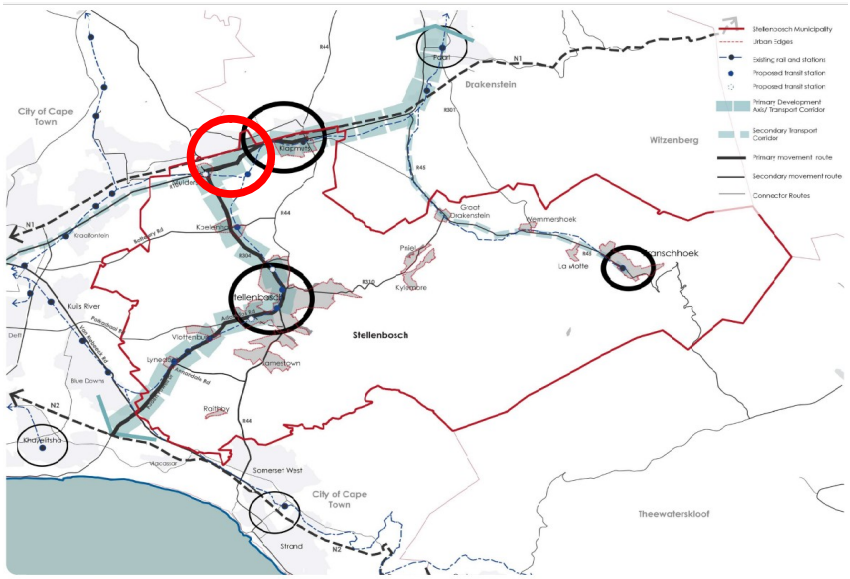
PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS



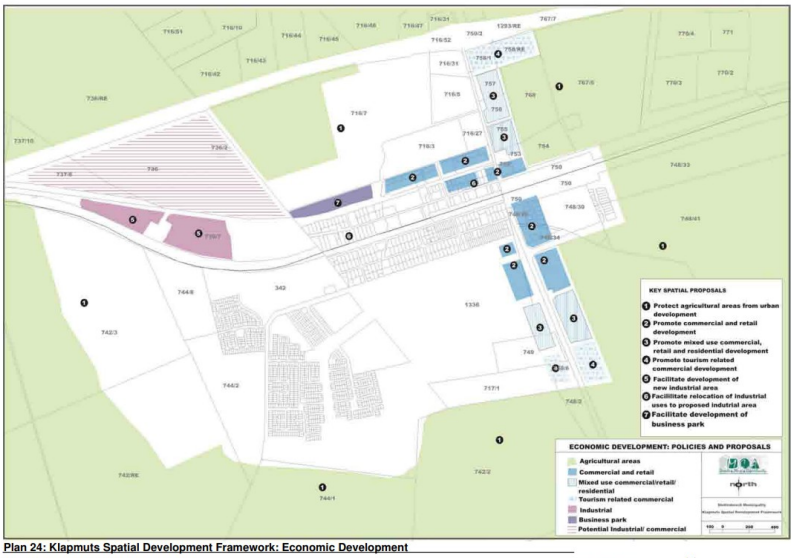


Figure 20. Concept 3 - Direct growth to areas of lesser natural and cultural significance as well as movement opportunity SMSDF

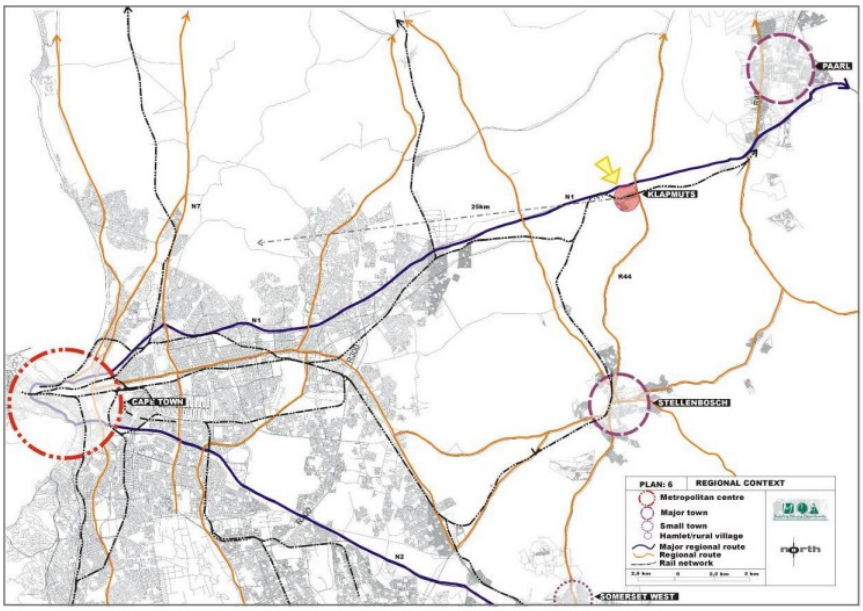
b) According to the MSDF, the **proposed business and industrial development within Klapmuts is limited and the socio-economic environment of the municipal area beckoning**, as the settlement has a high unemployment rate 15,2% (SEP 2022) of and low levels of income, whilst the link between the R304 Corridor and Muldersvlei and indirectly to Klapmuts is being earmarked as a longer-term solution with private led initiatives which is what the development of Portion 1 of Farm 1151 intend to achieve.

Plan 24: Klapmuts Spatial Development Framework: Economic Development
Klapmuts Spatial Development Framework
Stellenbosch Municipality
September 2007

84



CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

c) CoCT MSDF, promotes **development corridors, nodes** and Transit Accessible Precincts: Development corridors are broadly defined **as urban areas of high-intensity** (i.e. dense and diverse nodal or 'strip' development **focussed around (a combination of) rail** (Belville Paarl line and beyond), **high-capacity roads** (N1, R44, R304 and R101) **and trunk bus routes** (R304). They are characterised by a dynamic, mutually supporting relationship between land use the movement system. Klapmuts and Portion 1 of Farm 1151 are located along such a corridor that connects and includes Cape Town CBD, Belville and Brackenfell.

d) CoCT MSDF supports linkages to **Klapmuts and its role as a settlement in the regional context** as

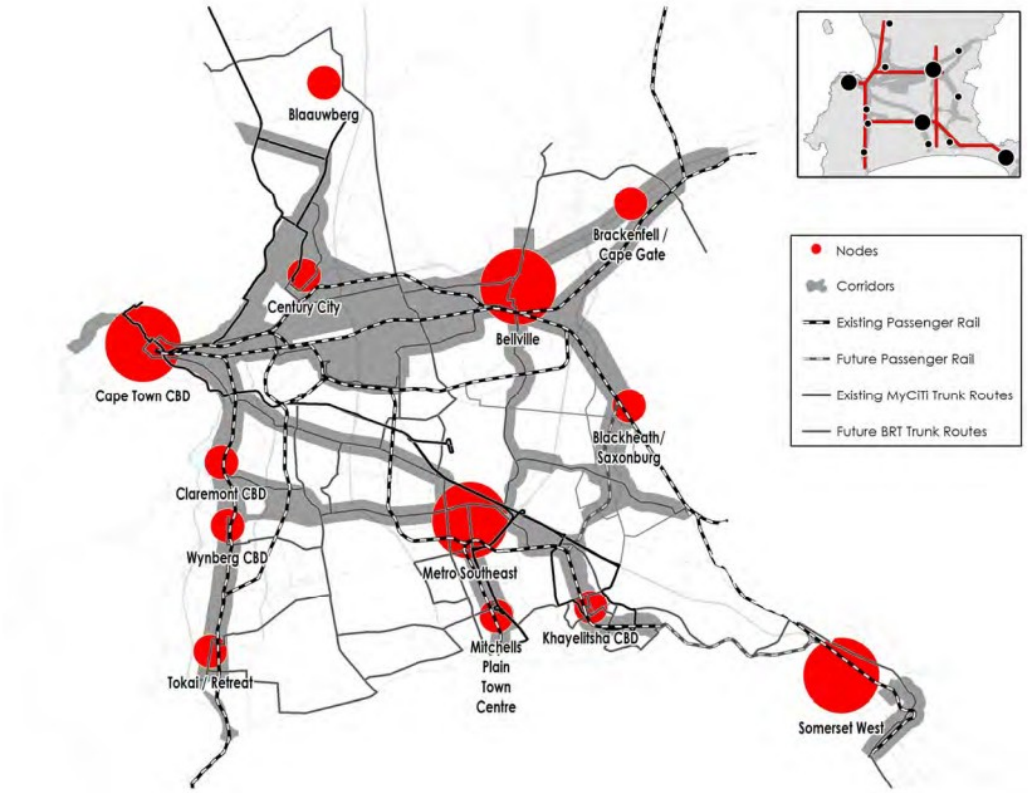
- Firstly, its proximity and linkages to significant economic activities and markets, and
- Secondly, the challenges being faced in Cape Town functional region.

Plan 6: Regional context

e) The **development corridors** from Brackenfell in the direction to Klapmuts is once again portrayed as a new development that is subject to capacity and particularly **as *Incremental Growth and consolidation areas*.** For such development Investment Partnerships are a requirement. Such a partnership between the City and the private sector will attend to the bulk infrastructure and will be implemented as condition of approval.

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS



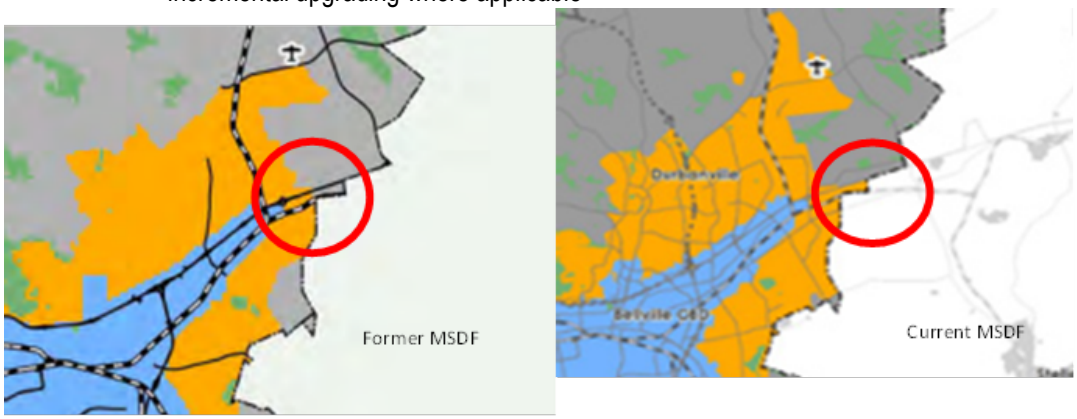


Diagram 20: Conceptual development corridors and *existing and emerging* urban nodes

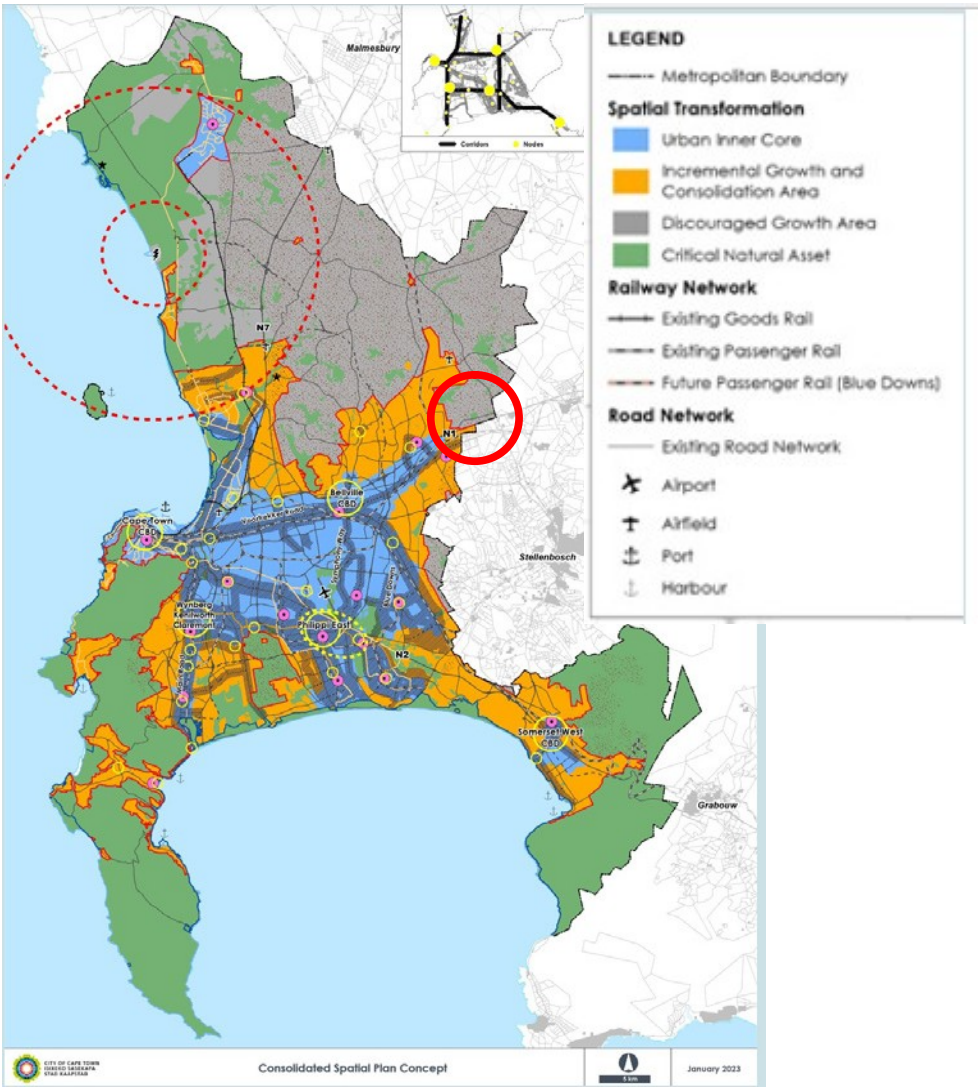


f) The **Incremental development** area on the edge of CoCT along the N1 is a new initiative being promoted. Desired spatial outcomes and Land Use guidelines for incremental development areas include:

- consolidation and diversification of land uses in support of city growth
- incremental upgrading where applicable

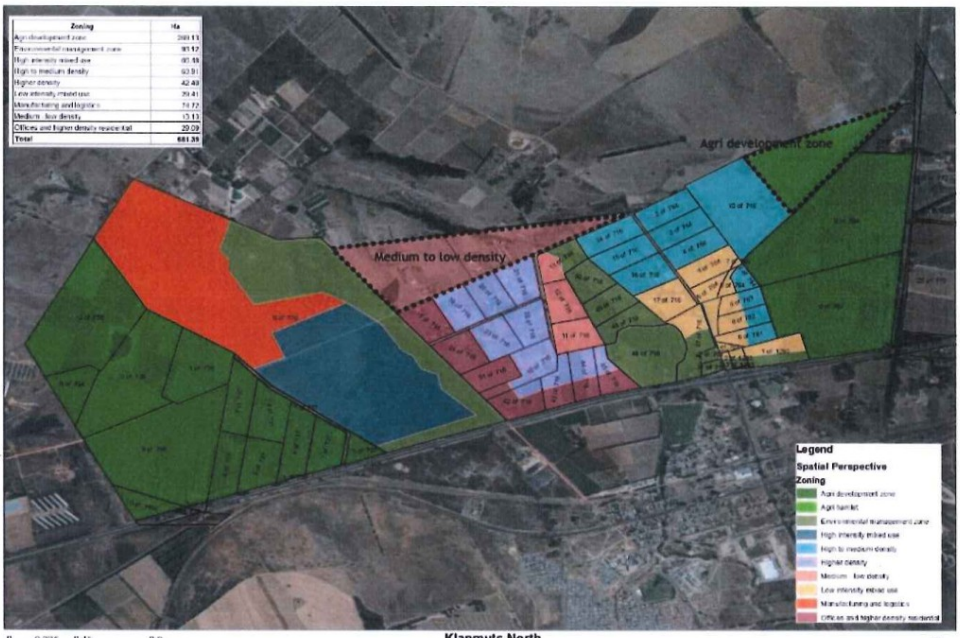
CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

g) **Incremental development is further promoted by routes and roads fulfilling a mobility function for people and goods, but that do not permit direct access to abutting land uses** (freeways/ primary roads). The high connectivity provided by direct freeway/ expressway connection trends to attract manufacturing, warehousing, major retail and industrial uses. These opportunities tend to be realized around key intersections or off-ramps and on roads running parallel to, or linked to, freeways. In the case of Klapmuts, the R101 runs parallel to the N1 and there are several connections where access off the N1 can be obtained.

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS



h) **Regional Development Nodes** provide further support to develop Klapmuts and similarly:

- Enhancing the **role and potentials of existing settlement nodes** based on the capacity of existing infrastructure to accommodate change and growth.
    - i.e., railway infrastructure that guides how other sectors, services, or functional areas, should adjust their focus and work to support change and growth.
- Address the **challenge to restructure Stellenbosch town** having manufacturing concerns leaving Stellenbosch town in search of better locations such as
    - the economic generative opportunities associated with Klapmuts and current development pressure of settlements on the periphery in the SM:
        - Distell has made the decision to consolidate its operations, and relocate to Farm 736/RE, which is located north of the N1 road. These operations include: beverage production, bottling, warehousing and a distribution facility. The total area of the farm is approximately 200ha, but the Distell operations would only comprise approximately 53ha of the site. The proposed development is located on land which is not environmentally sensitive and which, in turn, will provide opportunities for other businesses, suppliers and industries to co-locate to the area (Stellenbosch SDF, 2019).
    - And as per the proposed industrial and Agri-industrial node on Portion 1 of Farm 1151.

- Support **New Industrial Developments**:
    - Such as the Proposed Distell Development – Klapmuts is a light industrial and commercial node that has the potential to grow into a sub-regional growth node in the medium to long-term. Portion 1 of Farm 1151 is located diagonally across the N1 and in close proximity of the relocation site purchased by Distell.

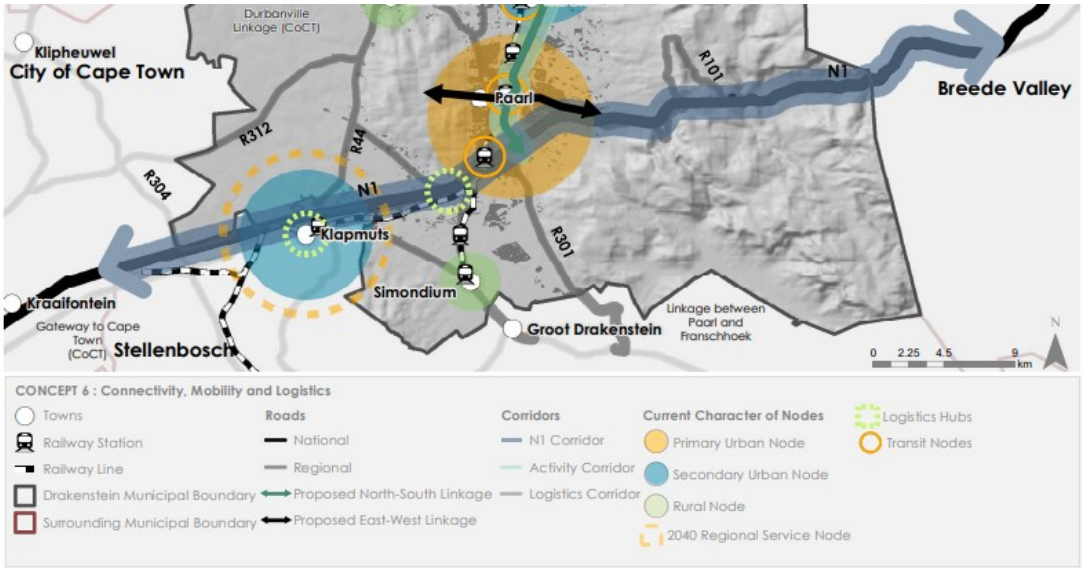
- And the identification for land for investment purposes, e.g. having the (Fisante Kraal) Cape Winelands Airport development being implemented that is in close proximity of Klapmuts.



i) The Drakenstein MSDF support a **N1 Corridor** (big move project) development from Klapmuts North, Ben Bernhard, De Poort, Paarl Hamlet (including the Paarl Mall precinct) to Hugenot Tunnel). The implementation of an **integrated Commercial and Industrial Hub at Klapmuts** (Big Move Project) should be funded by Drakenstein Municipality and Cape Wineland District Municipality. Such a development corridor should:

- Implement an Integrated Commercial and Industrial Hub at Klapmuts
- Promotion of a Light Industrial and Commercial Business Hub at Ben Bernhard
- Development of De Poort and Paarl Hamlet node
- Development of Carolina / Lustigan Intersection Area (North of the N1)
- Development of the Hugenot Tunnel Long Haul Facility

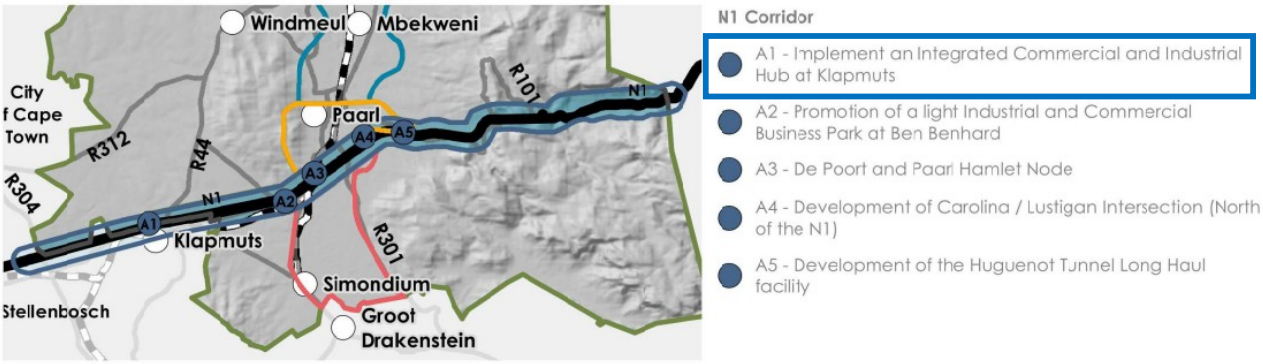
VENNOTE / PARTNERS



PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

Map 4.12: Concept 6 - Promoting Connectivity, Mobility and Logistics Corridors

Establishing N1 Corridor as a gateway to the Municipality by means of a series of nodal developments

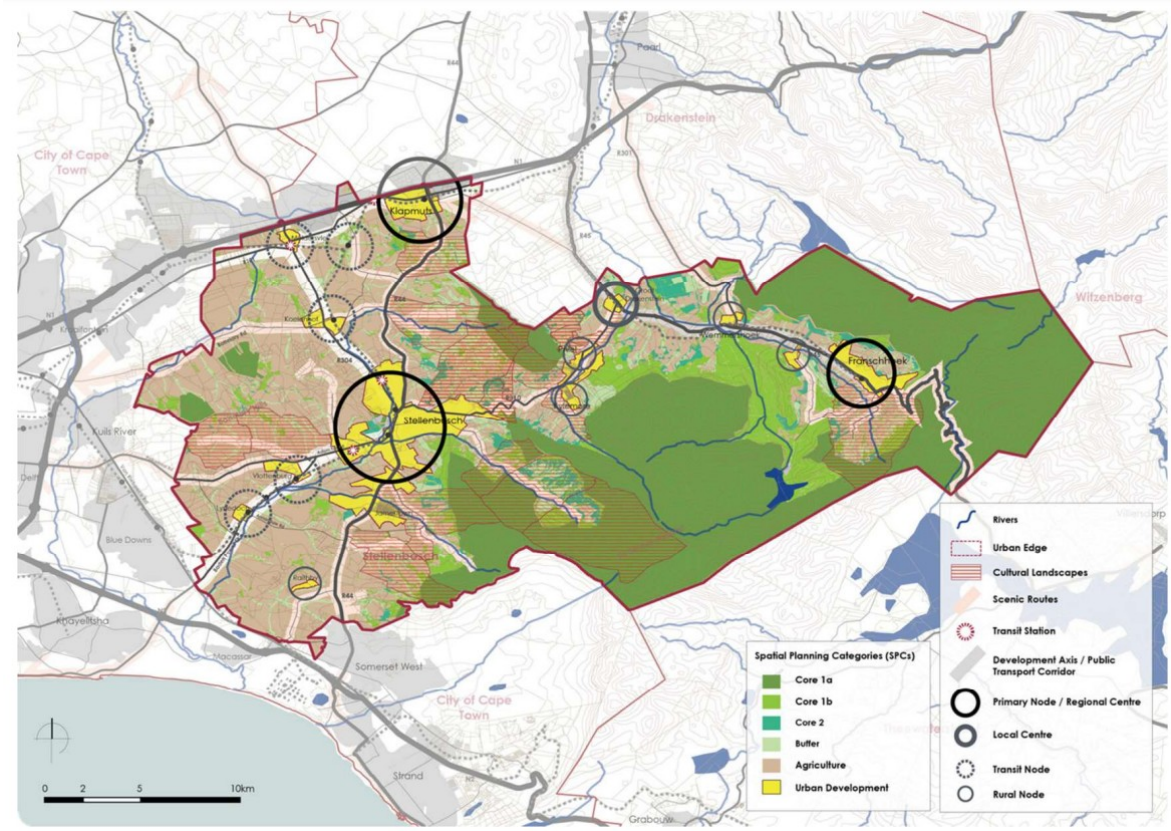
Taking advantage of the favourable location of the N1 Corridor (between Klapmuts and Paarl) and the associated ease of access and visibility. Specifically, Ben Bernhard has already started attracting significant investment and new development. Using this momentum, it is critical that the Drakenstein Municipality takes a strong leading role in guiding this development in a sustainable and desirable way. This also involves the addressing the shortage of bulk services specifically water, electricity and sewerage in this area

Map 4.7: Drakenstein N1 Corridor indicating proposed Big Moves

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

The N1 Corridor



- Promotes Connectivity, Mobility and Logistics Corridors.
- Promotes Spatial Transformation toward resilient, inclusive, smart and sustainable settlements
- Advances “Gateway”, “Infill Development”, “Proposed Industrial”, and “Business/ Commercial” and establish
- Connections with the Cape Metro and serving as “Mobility Route”

The above directives firmly locate the development of Portion 1 of Farm 1151 **within a rural corridor** that links Klapmuts in the east and the R304 (Joostenberg) in the west including the Muldersvlei station and Elsenburg to the south and the N1, to the north, including Old Paarl Road. **The corridor will be referred to as the Klapmuts N1 Muldersvlei Rural Corridor**. The corridor supports the SDF vision of **“being a valley of opportunity and innovation” and “being a valley of dignified living”.**

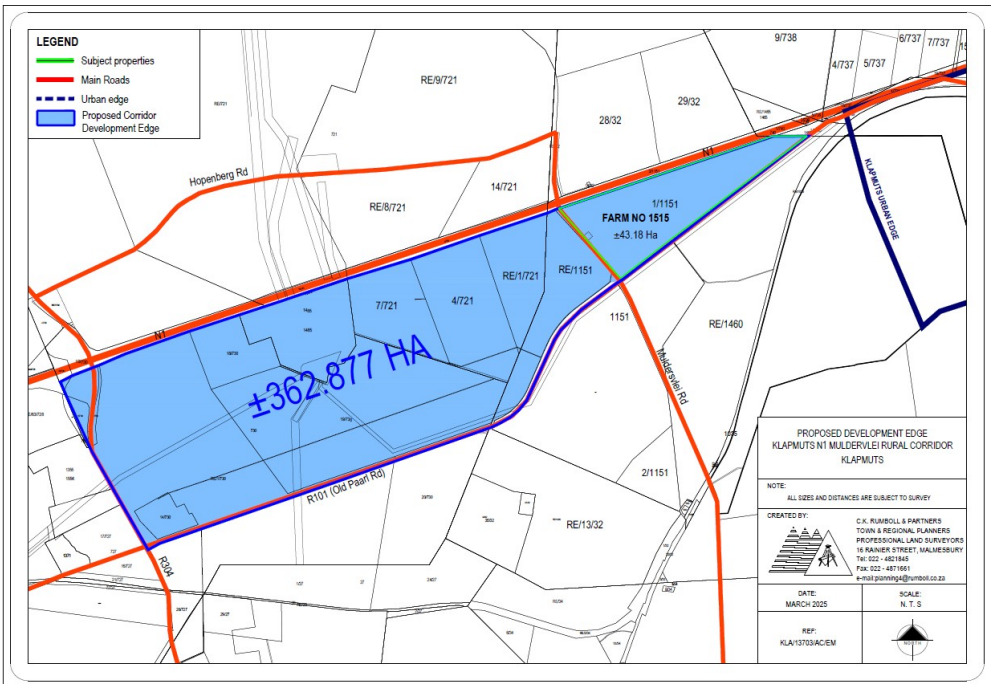
CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

Motivation

Such a rural development corridor should be delineated with its own edge (±362.87ha) (Refer to ***Annexure A and B***) and its own development parameters that promote the following uses:

- Agri-industry,
- alternative energy,
- educational facilities (institutions that are linked to tertiary education and can become community facilities)
- industrial development particularly along the N1, in support of the Agri- industry and agricultural activities.
- datacentres.
-



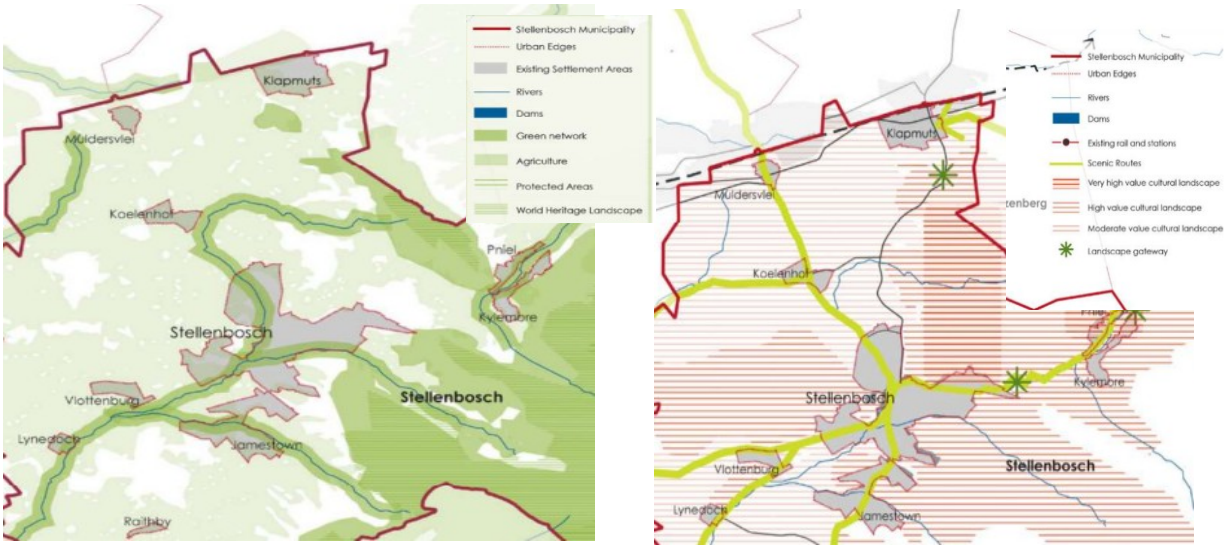
The development of Portion 1 of Farm 1151 within this rural corridor should be earmarked for industrial and light industrial and amenities such as datacentres to link Klapmuts to the R304 corridor (Malmesbury to Stellenbosch). The proposed development should promote industry and agri-industry as it has ease of access onto minor road crossing the N1 and linking

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

onto the R304 and the R45. Portion 1 of Farm 1151 is located approximately 1,5km from the Eskom substation. The area along the N1 is thus ideal for promoting alternative energy.

CK RUMBOLL &
VENNOTE / PARTNERS



PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

The development of such an industrial and Agri-industrial precinct should contribute to:

a) *Economic development and employment opportunities*

- addressing the socio-economic challenges of having one of the highest Gini-Coefficients in South Africa, having 53% of households classified as low-income, with 20% of these having no registered income, having an unemployment rate of 20% in 2011, which continues to rise particularly in low and semi-skilled sectors and having almost 23% of the population being under 15 years in age who will be entering the labor market in the next two decades.
- In a sustainable form: as the property integrates with the corridor and the natural and productive landscapes. The proposed development provide for a range of citizens from all walks of life, a significant choice in place of work.
- directing growth to areas of lesser natural and cultural significance as well as movement opportunity. Being located within the corridor ensure that placement within a grade.

b) *Directing growth to areas of lesser natural and cultural significance:*
Both the node and precinct are not located in a graded landscape to protect sensitive scenic routes (links between R44 and Old Paarl Road).

VENNOTE / PARTNERS:

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

a) *Mobility and transportation*

- 60% of households do not have access to a car and are dependent on unsupported informal public transport or travel on foot. Hence mobility and the development of
- transport systems and approaches that serve the most effective and sustainable movement of people and goods should be a priority. The transport infrastructure, Muldersvlei railway station provides access to public transport. It is easily accessible from the N1 and R304 and R44.
- And explore the feasibility of changing/ complementing the rail service along the Baden Powell Drive-Adam Tas-R304 corridor to a system providing a more frequent, flexible service that is better integrated into the urban realm. Alternatively, a regular bus service should be explored serving the same route.

b) *Private public partnerships*

- enabling joint planning of new development actions led by private sector.
- the eastward extension of the proposed R304 corridor towards Klapmuts (and ultimate link to Paarl) and in addition contribute to the 2019 approved Stellenbosch Spatial Development Framework's long term planning framework that earmarked Muldersvlei and Koelenhof being part of the R304 corridor to possibly accommodate more growth and be established as inclusive settlements offering a range of opportunities.

c) *Regional Development Nodes*

- Enhancing Klapmuts as a significant new regional economic node within the metropolitan area and spatial target for developing a "consolidated platform for export of processed agri-food products (e.g., inland packaging and "containerization port") and "an inter-municipal growth management priority".
- Utilizing existing infrastructure in the area (i.e., N1, R101, R44 and the Paarl-Bellville railway line and station), which dictate the location of certain transport, modal change or break-of-bulk land uses as being encouraged by both the SDF and RSIF
- addressing service needs in cluster developments (a Agri-industrial, industrial and alternative energy corridor) and in this way improving mixed use and enhancing economic opportunities.
- Enhancing the role and potentials of existing settlement nodes based on the capacity of existing infrastructure to accommodate change and growth of activities in space. i.e., railway infrastructure that guides how other sectors, services, or functional areas, should adjust their focus and work to support the change and growth.

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

- addressing the challenge to restructure Stellenbosch town having manufacturing concerns leaving Stellenbosch town in search of better locations such as the economic generative opportunities associated with Klapmuts.
- Current development pressure of settlement on the periphery in the SM, and as per the proposed Agri-industrial node Muldersvlei station and Agri-industrial precinct between Muldersvlei and Klapmuts being envisaged by private sector led development initiatives.

To conclude, the development of Portion 1 of Farm 1151 including industrial and agri-industrial uses does:

- Enable joint planning of new development actions led by private sector and;
- For Klapmuts to be established as an inclusive settlement, offering a range of opportunities.
- Further enhance Klapmuts as;
    - a significant new regional economic node within the metropolitan area
    - spatial target for developing a "consolidated platform for export of processed agri-food products (e.g., inland packaging and "containerization port")
    - "an inter-municipal growth management priority".
    - Anchor on the eastward extension of proposed R304 development and movement corridor and ultimate link to Paarl (SMSDF long term planning framework) to accommodate growth,
- Utilize existing infrastructure in the area (i.e., N1, R101, R44 and the Paarl-Bellville railway line and station),
    - dictating the location of certain transport, modal change or break-of-bulk land uses as being encouraged by both the SDF and RSIF.
- address service needs in cluster developments (Agri-industrial corridor and settlement nodes) and in this way improving mixed use and enhancing economic opportunities.

At a regional scale the establishment of a rural development and industrial corridor, precinct and node is facilitated as both City of Cape Town and Drakenstein MSDFs promote corridor development

As the proposed node and precinct development supports the Stellenbosch SDF vision and regional proposals, and address the challenge to restructure Stellenbosch town by relocating industries to better locations such Klapmuts, Muldersvlei station and surroundings, the proposal should be considered and should be included and illustrated as an Agri-industry, industry and rural development corridor delineated by its own development edge, in the revised SDF.

CK RUMBOLL &
VENNOTE / PARTNERS

PROFESSIONELE LANDMETERS ~ ENGINEERING AND MINE SURVEYORS ~ STADS- EN STREEKSBEPLANNERS ~ SECTIONAL TITLE CONSULTANTS

Going forward, the DEA&DP, DoA and DEDAT need to collectively assess the need for the development of a rural development corridor regional implementation framework, or if there are perhaps other means to better support the sustainable economic development and growth of these regions, such as the development of an infrastructure plan.

In Conclusion

- The proposed development of Portion 1 of Farm 1151:
    - supports Stellenbosch SDF vision and regional proposals
    - Address challenges to restructure Stellenbosch town through relocation of industries to better locations (along the N1, at Klapmuts, Muldersvlei station and surroundings)
    - develops a connection to the newly developed Cape Winelands Airport.
- Proposal to be considered and included in MSDF are: Area should be delineated with an industrial and rural corridor edge to allow for Agri-industry, related industry development and educational institution development all being part of rural development corridor.
- The proposed development of Portion 1 of Farm 1151 will have good access to important roads and routes, including the N1, R101, R304 and R44.
- Is located near a prominent substation, which provide access to electricity relatively ease.
- Will be visible from the N1, thus further promoting the area as an area of development.
- The proposal will not only benefit the Stellenbosch Municipality, but also the greater region along the N1 corridor.

We trust you find the above to be in order.

Kind regards

.....

Anelia Coetzee/Etienne Malan

NOTICE FOR PUBLIC COMMENT
DRAFT 3RD REVIEW OF THE 5TH GENERATION INTEGRATED DEVELOPMENT PLAN (IDP) 2022 – 2027
AND
MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK (DRAFT BUDGET) for 2025/26 – 2027/28

Notice is hereby given in terms of Section 34(a)(i)(ii) and Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000) (MSA) and Section 22 of the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) (MFMA) that the draft 3rd review of the 5th Generation Integrated Development Plan (IDP) 2022 – 2027, the draft Medium Term and Revenue Expenditure Framework (MTREF) 2025/26 - 2027/28, the draft Property Taxes, Tariffs, New and Revised Budget-related Policies, and Revised By-laws for 2025/26, as envisaged by Section 17 of the MFMA for the Stellenbosch Municipality, are available for inspection, public representations, inputs, and comments.

The set of Council resolutions and all other relevant documents are made public at all libraries and ward offices during normal office hours and are also displayed on the Stellenbosch Municipality's website at **www.stellenbosch.gov.za.**

Hard copies of the above-mentioned documents will also be available at the following venues:

- Municipal Office, Plein Street, Stellenbosch;
- Municipal Office, Hugenote Way, Franschhoek;
- Municipal Office, Main Road, Pniël;
- Ward Offices;
- Library, Sonnebloem Street, Ida's Valley, Stellenbosch;
- Library, Long Street, Cloetesville, Stellenbosch;
- Library, Masithandane Street, Kayamandi, Stellenbosch;
- Library, Main Road, Pniël;
- Library, Reservoir Street West, Franschhoek; and
- Library, Le Roux Street, Groendal, Franschhoek.

Comments must be in writing and addressed to the Municipal Manager, PO Box 17, Stellenbosch 7599, or sent to the following email address: idp@stellenbosch.gov.za, clearly stating "Comments: Draft 3rd Review of the 5th Generation IDP 2022 – 2027 or Draft Budget 2025/26 – 2027/28".

Persons wishing to comment on the **draft Budget** documentation (inclusive of the policies and tariffs / charges), but who cannot read or write will be assisted during office hours by the Administrative Officer: Budget Office (Ms Adele Wagenaar), First Floor, Municipal Building, Neethlingshuis, Stellenbosch, at 021 808 8512, to write down his / her comments.

Persons wishing to comment on the **draft 3rd Review of the 5th Generation IDP 2022 – 2027**, but who cannot read or write will be assisted during office hours by the IDP Officer (Ms Catherine Muller), Second Floor, Ecclesia Building, 71 Plein Street, Stellenbosch, at 021 808 8060 / 8175, to write down his / her comments.

Members of the community can participate in the public participation process of the draft 3rd review of the 5th Generation IDP 2022 – 2027 and draft Budget 2025/26 – 2027/28 by using the following platforms to submit input / comments:

- Electronic form on the municipal website: www.stellenbosch.gov.za;
- WhatsApp: 067 427 1556;
- Email: idp@stellenbosch.gov.za; and
- IDP and Budget Comment forms will also be available at all libraries and ward offices during normal office hours.

Should you wish to submit your inputs **verbally** during the IDP and Budget open days, members of the community and other interested and affected parties are encouraged to attend the public participation open days for their ward / area, as scheduled below.

The official date for public release is **04 April 2025**, as published on the municipality's website. The public participation period commences on **07 April 2025**, and the closing date for comments is **29 April 2025** at 16:30.

Re: Appeal on Call for Proposals – **GIA Application 2025 / 2026**

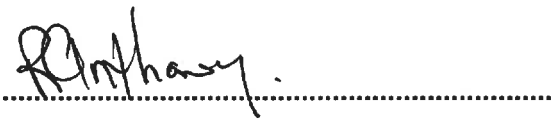
Sir/Madam

The above-mentioned club herewith appeal agianst the departmental decition not to recommend our GIA Application as successful for the Grant payout.

Our response to your comments are as follows:

1. General Application required overall Budget.

	Is funding required for the ensuing year?	**YES**		**NO**	
	Is funding required for a specific project? (If YES attach details separately)	**YES**		**NO**	
	Is funding required for general support? (If YES, attach a copy of the Organization's Overall Budget)	**YES**	X	**NO**	
	Budgeted amount requested			R 40 000	
	Duration of project?			One year	



Attached you will find the overall budget

2. **Board members listed in Application does not align with approved board members in Constitution:**
   The General Council added the positions of Head Coach of the Teams as members of the Executive in order to streamline the decition making on the executive while the position of deputy secretary was combined with that of the match secretary. The Constitution Committee added the changes later on as changes to the constitution were only approved at

the next AGM of the Club. The correct person reflect on the application for as well as the amount(8) of members as per the constitution.

Hoping that our Appeal application will be concidered positively and our appeal upheld.

Thanking You in Advance

Me Roxanne Anthony (072 219 9164)

Dear Sir/Madam

For attention: Mrs Michelle Aalbers

Re: Appeal against Council decision of not recommended of GIA 2025/2026

The Klapmuts Sport Forum, Klapmuts appeals against the recommendation from the administration for not recommending our GIA 2025/2026 application.

The Klapmuts Sport Forum complaint is summary as follows:

- Did not indicate Specific vs General and the Proposal does not include a cost breakdown.

I	REQUEST FOR FUNDING:				
	Is funding required for the ensuing year?	**YES**		**NO**	
	Is funding required for a specific project? (If YES attach details separately)	**YES**		**NO**	
	Is funding required for general support? (If YES, attach a copy of the Organization's Overall Budget)	**YES**	X	**NO**	
	Budgeted amount requested			R 40 000	
	Duration of project?			One year	

Attach is the cost breakdown as required.

Hoping that our application will be carefully and diligently reconsidered.

Thanks

M. Everts

Klapmuts Sport Forum – Cost Breakdown for GIA 2025/2026

Klapmuts Sports Forum vision is to build on the principles of **BROTHERHOOD** & **COMMUNITY**. Our organizations instill these values in majority of its activities in pursuit of not only building successful teams, but to ensure that the community becomes united.

Our vision is then derived from our ethos and is as follows:
"Building a community through sports"

Our organizations are locally based and mainly recruit from the Klapmuts Community itself. This has become the primary objective of all our organizations and has contributed immensely towards realizing our vision.

1. PROJECTS FOR 2025/2026

The sports council aims to focus on 5 areas/operations for the years 2025 – 2026.

1.1. All Registered Clubs Capacity Building

We aim to send various officials of our clubs & organizations for capacity building programs to assist in growing skills and knowledge within our club structures. We aim to focus on the following capacity building programs:

- Clubs Administrative Development
- Accredited Training of Administrators
- Accredited Training of Coaches on all sporting codes
- Training Technical Officials on compliance issues
- Various Player Skills Development Programs

1.2. Council Administration

This consists of the day-to-day administrative expenses of the sports council as well as audit and other financial & administrative fees accrued to the sports council in conducting its administrative duties.

The Klapmuts Sports Forum wants to purchase various sports equipment that will be used by our sports clubs to successfully and most important safely practice their sporting codes. This equipment will include:

- Post Protectors
- Line Markers/Flags
- Trauma Boards & Medical Bags
- Netball posts
- Various training equipment for various codes (cones, tackle bags, water bottles, training balls, etc.)
- Match equipment (Balls, dart boards, backpacks, etc.)

1.3. Sports Apparel for Council and Clubs

As part of the objective to grow our organizations and growing their brands, it is in the sports council's view that expenditure for various apparel for our sports council and clubs will be a necessity in building a community through sports. These expenditures will include the following apparel:

- Match Apparel for teams (e.g. Jerseys, Shorts, socks, bibs, etc.)
- Officials & Coaches Apparel
- Executive Apparel
- Team Apparel (e.g. Jackets, Tracksuits, Warm-ups, Golfers)

Safety and Security

- Installation of Close Circuit Camera on Old Helshoogte Park in Old Helshoogte Road
- Installation of an LPR Camera at the Main Road 5 (Traffic lights on the corner of Helshoogte Road and R44)
- New camara installation on the corner of Rustenburg Road and Sonnebloem Street
- Use of building at the Community Market as a Satellite Police Station
- Cleaning and fencing (Clearview of Betafence) of all Electricity Boxes in the ward. (Hotspots Electricity Box in front of Idas Valley Primary in Bloekom Avenue; Madrassa in Protea Street and on the corner of Weber Street and Old Helshoogte Road.
- More visibility and regular patrols of the Police and Law Enforcement officials in all roads, the Sport Ground, and farms in the area. If the budget allows using neighbourhood watches and give them a stipend.
- Regular pruning of tress hanging over electricity wires in the roads of Ward 6, as the need requires,
- Removal of the trees between the back of No 2 – 94 in Botmanskop Road and the back of Helshoogte Road
- Conduct a need and cost analysis for fencing off with clear fencing the area near the big tree next to the Water Reservoir in Dahlia Street.

Infrastructure

- Construct of pavements or sidewalks for Weber Street, Erasmussmith Street, Bakker Street, Botmanskop Road, Dahlia Street and Speler Street
- Tar the Public parking area next to Idas Valley Library and the Ward Office.
- Upgrading and resealing of roads and potholes as required in the ward.
- More regular basis cutting of the grass on the parks and on all pavements in Ward 6. As well as on Helshoogte Road and R44. Not only the 6 weeks cycle as currently implemented for the Main Roads
- Request traffic lights on the turn-off from Kromme Rhee Road in the direction of Koelenhoff and turn-off from Elsenburg (near Kanonkop)
- Warning sign board indicating pupils/people crossing the R44 near the second entrance of Cloetesville near Nietvoorbij in the direction of Klapmuts
- Warning sign board indication pupils/people crossing the R44 near Timerlea Farm (Blue Jay) in the direction of town.
- Warning sign boards indication pupils/people rossing the R44 on both sides near Remhoogte and Lavinir
- Pedestrian Traffic light on Helshoogte Road near Spar in the direction of Stellenbosch Primary and High School
- Replacement of current outdated sewerage and water pumps as needed in the ward
- Parking Embayment in front of Old Apostolic Church in Luckhoff Street to help ease the parking problem of dropping and picking up pupils of Idas Valley Primary School.
- Parking Embayment in front of the New Apostolic Church in Hahn Street
- Paint the Bus shelters in the ward which is covered by graffiti.
- Regular cleaning of the drains to prevent overflowing during rainy conditions.
- Regular maintenance and repairs of all streetlights in Ward 6.

LED Planning

- Request waterproof covers for the Community Market to allow residents to use the facility as a hall and through all weather conditions.
- Support and funding for Tourism/Running/Cycling/Walking
- Support and funding for Skills Development (Arts and Crafts), Reading and other Soft Skills Programs (First Aid, Learners), ect.

Recreation and Sport

- Replacement of the vibrance wall with a solid wall or clear view fencing on the Sport Grounds
- Conduct a feasibility study for the planning of a new rugby clubhouse.
- Conduct regular maintenance of the facilities of the sport field in Idas Valley
- Tar the entrances of Idas Valley Sportsground
- Upgrade of the lights on the Rugby Fields
- Upgrade seating in the stadium with recycling chairs or wooden panels.
- Upgrade of BMX Track and clear view fencing around it
- Purchase of BMX Bicycles
- Request First Aid equipment set and a stretcher per sport code.
- 2 x 65 cm Large Garden Chessboards Sets with nylon chess board bag and storage bag for the ward for skills development and recreational purposes.

Human Settlements

- Conduct a need and cost analysis for a Frail Care Centre in WCO23

Late submission

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon Joswin,

I hope that you are well. Please see this forwarded message regarding comments that we made at the IDP public participation event for ward 20 on 14 April. Schalk van Der Merwe recommended that I send this information to you. Unfortunately I had the wrong email address so my initial email did not go through.

Please let me know if you have any questions and kindly confirm receipt of this email.

Best,

Irma

Good afternoon,

We are pleased to submit this contribution to the Ward 20 Integrated Development Plan (IDP) and budget process on behalf of the Valley Collaborative, a community-led initiative active in the Lynedoch Valley (Vlottenburg, Vlaeberg and Lynedoch communities). We represent a volunteer network of over 60 individuals from diverse backgrounds including community leaders, businesses, schools and NGOs. On 14 April, representatives of the Valley Collaborative, attended the Ward 20 IDP public participation event. This document captures and submits the key points and proposals shared during that engagement. We kindly request your assistance in ensuring this information reaches the relevant municipal departments.

This submission arises from a year-long process of community engagement through participatory focus groups and workshops, in collaboration with Ranyaka Community Transformation. Our aim is to contribute to sustainable, inclusive development by voicing the community's key priorities and intervention proposals. These focus on four central areas:

1. Economic Empowerment

- Support for the **Lynedoch Agripark and Stellenbosch Farmer Production Support Unit (Annandale road)** as hubs for job creation and business development.
- Creation of a **communal training and technology centre** for computer skills, CV development, entrepreneurship and online learning.

2. Youth Empowerment

- Development of a **Youth Hub and Sports Facility in Vlottenburg (Longlands)**: to provide activities such as arts, sports, vocational training, and mental health support in a safe and inspiring environment.

3. Food Security and Wellbeing

- Establishment of a **Food Hub in Vlottenburg (Longlands)**: a communal space for food kitchens, food gardens, mobile clinic support, and wellness initiatives.

4. Housing, Infrastructure and Safety

- Provision of **affordable, dignified, and safe housing** within well-planned rural village models.
- Improvement of **basic infrastructure** (e.g. speed bumps, signage, communal facilities in Vlottenburg).
- Implementation of **safety measures** such as surveillance cameras, neighbourhood watches, and closer partnerships with SAPS.

We have included the following documents:

1. A **focus group summary** of key issues, visions, and proposed interventions (includes content of this email)
2. A **Valley Collaborative background** document summarising our initiative's goals and work to date.

Kind regards,

Irma

New email address: I have changed my email address from irma@sustainabilityinstitute.net to irma@valleycollaborative.co.za. The Valley Collaborative is an independent, community-led initiative supported by local organisations, including the Sustainability Institute, one of our valued partners. Previously, I used a Sustainability Institute email as they provided administrative support. Emails sent to my old address will still reach me, but all my replies will come from my new email. I still have access to all my contacts and past emails, so communication will continue as usual.

Detailed Summaries of Focus Groups

1. Economic Empowerment

- **Key issues identified:**
    - High levels of unemployment
    - High dependence on social support grants
    - Few opportunities for training and upskilling of the community
    - Lack of communal space for training and business
    - Poor access to technology
- **Vision for the future**
    - Support Lynedoch Agripark project and Stellenbosch Farmer Production Support Unit (FPSU)
        - Communal space for:
            - Production of fresh, quality products
            - Space to sell products produced in community
            - Access to training and skills development for unemployed
            - Technology centre to train members in basic computer skills, online short courses, CV compilation.

2. Youth Empowerment

- **Key issues identified**
    - Youth unemployment
    - Substance abuse
    - Lack of opportunities
    - School leaving
    - Involvement in crime and gang activity
    - Lack of education and training
    - Poor mental health
    - Food insecurity
    - Teenage pregnancy
    - Teenage led households
- **Vision for the future**
    - Youth hub and sports facility including the following activities:
        - Sports
        - Culture - Art and drama
        - Skills - Baking and cooking; Carpentry; Training in technology
        - Entrepreneur workshops
        - Create a space for talent discovery in the Valley
        - Extra lessons to assist struggling students
        - Space for selling services and goods produced by surrounding community
        - Keeping youth safe and busy with stimulating activities
        - Unlock employment opportunities at the youth hub

3. Food Security and Wellbeing

- **Key issues identified:**
    - Food insecurity
    - Substance abuse
    - Teenage pregnancy
    - Infectious diseases (TB/HIV/Syphilis/Other STD's)
    - Chronic disease control – Diabetes, Hypertension, Empysema
    - No communal space available for use when Mobile clinic comes in Vlottenburg
- **Vision for the future**
    - Food Hub: Communal space where multiple activities regarding food and health could be hosted:
        - Food kitchens can make and serve food.

        - Area for a food garden where ingredients for food kitchens could be grown to supplement donations.
        - Space to host health and wellness events: Eg. TB educational talks and screening, contraceptive drives.
        - Space to accommodate patients attending Mobile clinic

4. Housing, Infrastructure and Safety

- **Key issues identified**
    - Housing shortage
        - Lack of available land
        - High cost of housing
    - Service delivery to existing housing – Eg. Street names only recently put up
    - Very limited communal spaces available in the Lynedoch Valley- especially in Vlottenburg
    - Lack of safe spaces for children to play – They end up playing in the road (Especially Vlottenburg)
    - Safety concerns
        - High level of drug and alcohol use leads to violent individuals in community – Gun and knife violence
        - Domestic violence
        - No security cameras
        - Cable theft and petty crime
    - Infrastructure:
        - Speed bumps only available on the main road and not on inner roads in Vlottenburg
- **Vision for the future**
    - Rural villages
        - Areas to stay, work and live
        - Communal space to keep children safe and off the streets
        - Low cost housing/gap housing
        - Training of community members in building/plumbing/electricity
        - Security cameras in high crime areas
        - Building relationships with SAPS and Municipality to assist with safety and security
        - Development of existing Neighbourhood watch

The Valley Collaborative Project

Collaborating For A Valley Worth Believing In

VALLEY COLLABORATIVE

The Lynedoch Valley: Vlottenburg , Vlaeberg and Lynedoch Communities

About the Valley Collaborative

The Valley Collaborative is a community-driven initiative that tackles critical issues including safety, youth empowerment, food security, housing and infrastructure, substance abuse and wellbeing, and economic empowerment. Our goal is to enhance communication, coordination, and project clarity to effectively address challenges and create a positive impact. We work in the Lynedoch Valley which includes the Vlottenburg, Vlaeberg and Lynedoch communities

Our aim is to collaborate for a Valley that is:

These focus areas are aligned with the Ranyaka model, the approach that we are following: https://ranyaka.co.za/

1
Healthy, educated, active

2
Productive and employed

3
Safe, clean, attractive

4
Socially cohesive

How and why we started:

- The Valley Collaborative began during the COVID-19 pandemic with local leaders addressing food security in the Lynedoch Valley. This evolved into monthly Community Committee meetings, expanding the focus to other areas.
- In 2023, the Collaborative had 20 members, today, this network has grown to 53 volunteers and 90+ active participants*!

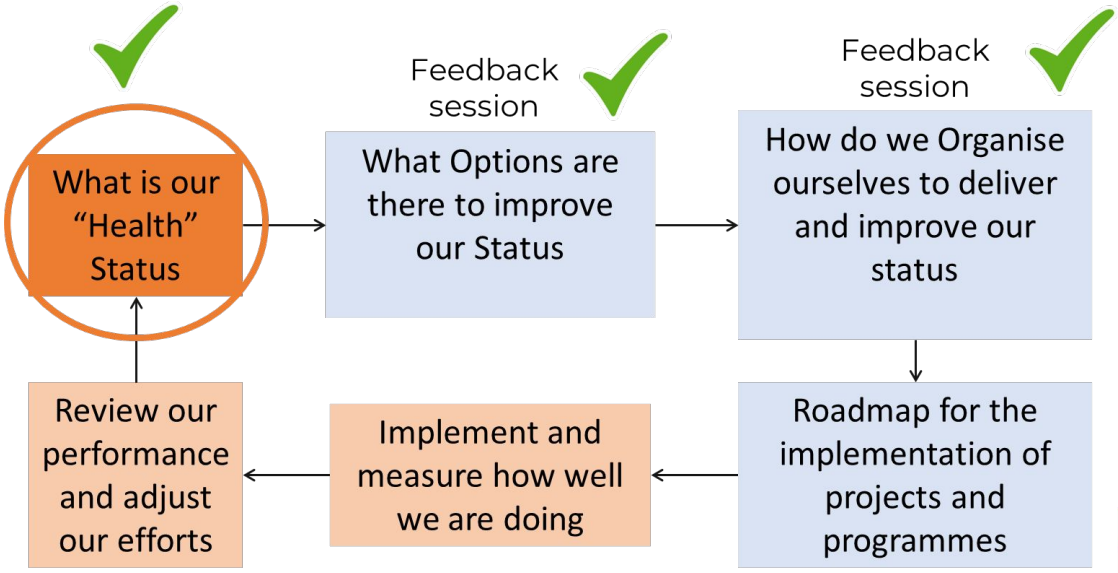
*Active participants include people that signed up for action groups, are part of our WhatsApp group, engage regularly in meetings/workshops or have shown interest in other ways.

The Valley Collaborative started with the following role players:

Education sector: Vlottenburg After-school program, Vlottenburg Primary, Klein Ma Getrain Creche, Stellenbosch Waldorf School, Lynedoch Community School, Lynedoch Children's House, Lynedoch Youth Programme

Arts and recreation: The Living Arts Foundation, Stellenbosch gymnastics

Food security: Living Soils Community Learning Farm, Helping Hands Sunday meals and 4 other community kitchens in Vlottenburg



Residents (not entire HOA) from: Lynedoch EcoVillage, Longlands Subsidised Housing, Klein Digteby, Digteby Estate, Longlands Estate

Other: Spier Wine farm, The Sustainability Institute, Vlottenburg Vineyard Church, Longlands Beneficiary Committee, Vlottenburg Neighbourhood watch

Our approach:

- **Ranyaka** is a pioneering urban planning NP Company the co-designs, implements and sustains social and economic development.
- **SHARE** is a PTY (Ltd) company established by Ranyaka to design and sustain new economic and ownership models in towns and townships
- Towards the end of 2023, the Valley Collaborative started a partnership with Ranyaka Community Transformation to guide us on our journey

The Ranyaka model:

SHARE

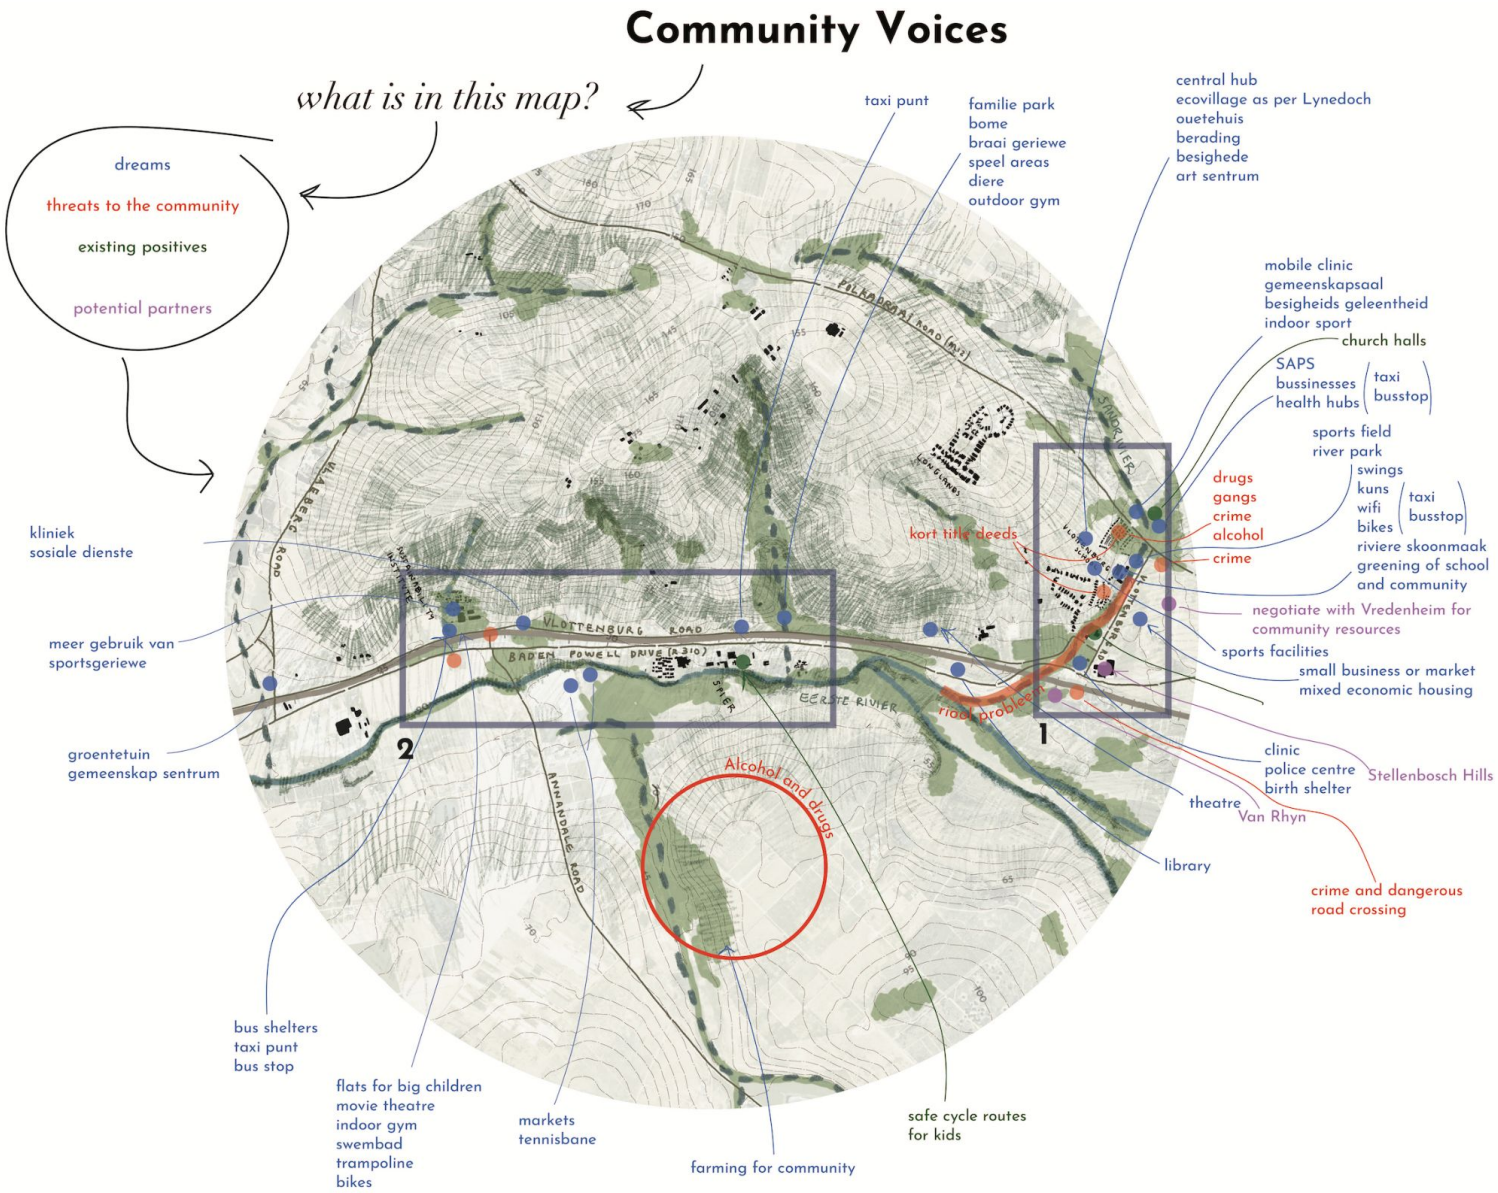
Ranyaka Activating Communities

For more information see: https://ranyaka.co.za/

The focus for 2024:

1) Identify strengths, pain points and priority areas
2) Bring the valley stakeholders around a common agenda
3) Formation of action groups to collectively design and take action to build a stronger, healthier valley

In April 2024, we co-facilitated a workshop with Ranyaka where we gathered with local stakeholders and community leaders. We completed two tasks:



1) A DNA map with 93 different indicators to assess the social, economic, spatial and social cohesion dynamics of the communities
2) An aerial map where participants highlighted areas of concern and of opportunity

1) DNA map

See Appendix A: p9-10 for more results

2) Aerial map

How we work: Action Groups

What is an Action Group:
The goal of an action group is to work together to address specific issues in the communities that were highlighted as a priority. Each group plays an important role in designing and implementing a plan for action

What it means to be part of an action group:

- Participate in a small team focused on solving a specific community issue and contribute ideas to help shape decisions and actions.
- Attend monthly/quarterly meetings (frequency depends on dynamics of the group)
- Help plan and implement solutions or activities that address the identified issue.
- Collaborate with community members and stakeholders to achieve sustainable, long-term goals.
- Join a WhatsApp group for regular communication with the group (optional)

4 Groups

Youth Empowerment

Empower youth to reach their full potential

Food Security and Wellbeing

Collaborate with existing community kitchens to address food insecurity and health challenges.

Housing, Infrastructure and Safety

Tackle housing challenges, improve community facilities, ensure clean and safe environments

Economic Empowerment

Design interventions to improve mentorship access, support skills and enterprise development, boost job creation

Number of Stakeholders Mapped:

130+

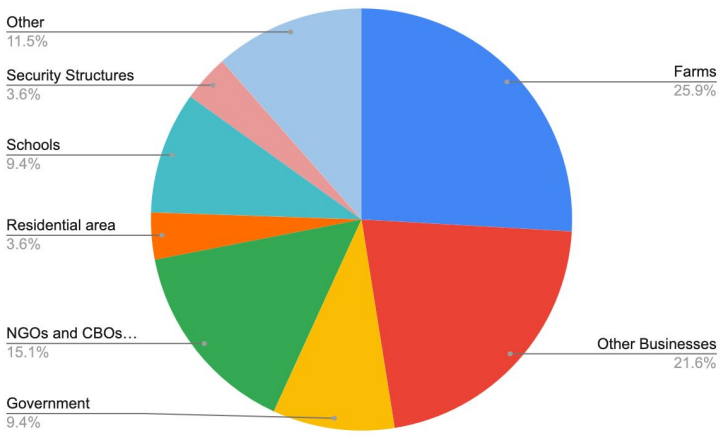
Number of People Participating in Action Groups:

53

Total Number of Active Participants*:

90+

ACTION GROUP PARTICIPATION	
Group	**Number of members**
Youth Empowerment	19
Food security and wellbeing	16
Economic empowerment	7
Housing and infrastructure	16
Total # of Volunteers	53

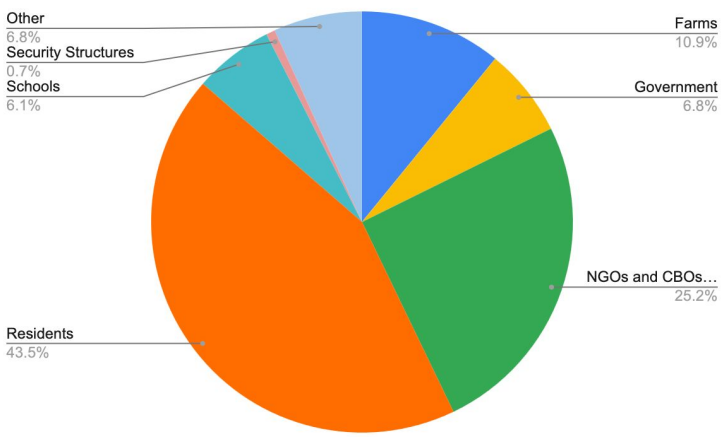


*Active participants include who people signed up for action groups, are part of our community WhatsApp group, engage regularly in meetings/workshops or have shown interest in other ways.

Stakeholder Groups by%

Stakeholders Mapped Since October 2023:

130+ institutions



- Represents organisations, schools, government, businesses and more mapped through desktop research

Volunteers and active Valley Collaborative Network:

90+ people

- Represents people who have signed up for action groups, have attended meetings and workshops, show eagerness to be involved or volunteer in other ways

Timeline 2025

- **February:** Establish volunteer advisory team for planning.
- **5 March:** Business Engagement Event to involve farms and businesses.
- **12 April:** Community Event to develop shared and action group visions.
- **April–June:** Action groups meet to co-design projects and draft budgets.
- **June–July:** Action groups begin implementing pilot initiatives.
- **Mid-August:** Valley Collaborative gathering to share progress.
- **September–October:** Action groups execute projects.
- **August–October:** Coordinated fundraising efforts.
- **November-December:** Evaluate progress, document lessons, and refine strategies for 2026.

Ongoing Activities

- **Building Partnerships:** Engage community leaders, businesses, NGOs, and the municipality.
- **Continuously Activate People:** Train leaders, mentor volunteers, and strengthen self-organization.
- **Ongoing Project Management** Refine management structures and explore collaborative leadership.
- **Managing Funds:** Plan and track project and group finances.
- **Ongoing Measurement and Research:** Measure project outcomes; part of a Master's study (2025–2026).

can we use what we have as a starting point to dream?

Zooming in on Vlottenburg and Lynedoch

1. Vlottenburg

Arrival Points

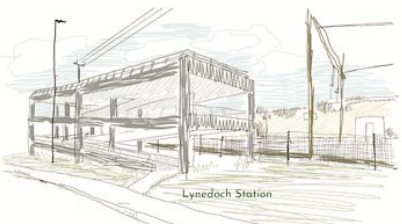
Development Principles

Environmental Sustainability

Focus on preserving and restoring natural ecosystems, biodiversity, and water resources. Implement renewable energy sources and sustainable agricultural practices.

Economic Sustainability

Develop local economies that are resilient and diverse. Promote activities that have minimal environmental impact and encourage circular economy practices.



Social Sustainability

Focus on full participatory planning, social equity, access to essential services, and community well-being.

25	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Property Management	Provision of feedback on land that was identified by Property Management for churches in Mooiwater	The zoning of this erven is not suitable for the proposed proposal. The matter was referred back to the Council. Currently referred to as the MSA Section 80 committee, after which it will serve again at Mayco and Council. Feedback on page 51 of Ward 1 and 2 Presentation.	Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
26	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Property Management	Provision of the rules and procedures of the court regarding the case of Erf 66, 45 Dirkie Uys Street. It has been used illegally for short-term lease (rental). The owners have made an application for consent use. Because of the extreme anti-social behaviour, the Municipality has stopped the used for the property while the application is considered. The owners live oversees, therefore the Municipal Court has postponed the case until the owners are back in the country. The neighbour is suffering during this time due to the activities carried out at the property.	The resident must contact the Prosecutor at the Municipal Court to find out the rules/ procedures of the Municipal Court.	Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
27	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Electrical Services	Repairing of lamppost in front of 24 Van Wijk str not standing 100% upright	The enquiry will be attended to as soon as a Crane truck is available, not later than 30 April 2025	Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
28	IDP Open Day	Ward 1	Cllr. Reginald Pheiffer	Water Services	Repairing the frequently overflowing sewer pump station at Bosbou		Directorate: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	
29	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Installation of a speed limit sign of 50 km/h or less at the entrance of Franschhoek town by the sign of Franschhoek		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
30	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Installation of a pedestrian crossing between Petit Provance and Wiesenhof Lifestyle Centre in Franschhoek		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
31	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Installation of a pedestrian crossing between La Farme Chantelle and Old Road Wine in Franschhoek		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
32	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Installation of a pedestrian crossing between the two estates across the main road in Franschhoek		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
33	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Installation of a speed limit entering Franschhoek installing a speed limit entering Franschhoek passed the "Franschhoek stone sign"		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
34	Email	Ward 1	Cllr. Reginald Pheiffer	Environmental Management	Paving of the entrance road to Mont Rochelle Nature Reserve from R45 to helipad. Around 50m in total.		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
35	Email	Ward 1	Cllr. Reginald Pheiffer	Water Services	Overflow of the Patrysfontein Reservoir is starting to come apart. Two sections have already broken off. If the weeds are cleared from it and it is properly repaired it will be good for another few decades.		Directorate: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local

No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
36	Email	Ward 1	Cllr. Reginald Pheiffer	Water Services	Most of the water furrow along Heide St was cleared of accumulated soil last year. However the last bit at the top of Van Riebeeck St was not done and is halfway clogged by soil. Also, several years ago, a leak was repaired under the furrow and the stone lining was never put back in place; ever since a pile of stones, now very overgrown with grass, has been lying there		Directorate: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	
37	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Maintenance of the paving and rainwater drainage around the Franschhoek Town Hall		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
38	Email	Ward 1	Cllr. Reginald Pheiffer	Environmental Management	Planting of trees in the new parking area behind the Franschhoek Town Hall		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
39	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Replacement of the kerbs along most of Hugunote Street		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
40	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	The urban edge at the entrance to Groendal should be moved from the railway line to align with the R45 to preserve the rural entrance to the village		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
41	Email	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Upgrading of the Le Roux St/R45 intersection		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
42	Email	Ward 1	Cllr. Reginald Pheiffer	Environmental Management	A controlled burn needs to be done on the slope of Middagkrans in the Mount Rochelle Nature Reserve		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
43	Email	Ward 1	Cllr. Reginald Pheiffer	Electrical Services	Installation of lighting along the path on the NE side of the Patrysfontein Reservoir		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
44	Email	Ward 1	Cllr. Reginald Pheiffer	Environmental Management	Construction of paving from the R45 to the entrance gate of the Mont Rochelle Nature Reserve		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
45	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Repair damaged infrastructure caused by the 2023 Floods in Ward 1 Comment: This is obviously important as the infrastructure relates to road networks, effective water supply, effective sewerage control and others. By not attending to the repair of infrastructure, one could introduce health and safety hazards		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
46	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Repainting of road markings in Ward 1 Comment: It is a small but important win by having clear road markings. It will contribute to road safety		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
47	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Develop traffic calming measures at Uitkyk Street and Main Road intersection, Franschhoek (e.g. Raised Intersection or 4-way stop) Comment: Ensure the safety of pedestrians and motorists in the Village: Temper vehicle speeding by introducing raised pedestrian crossings at all road intersections (not just at Uitkyk Street and Main Road); and introducing numerous speed bumps throughout the village. Lower the speed in the Village to 30km/h.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
48	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Repair paving / sidewalks in Franschhoek Town Comment: Franschhoek is known nationally and internationally for its culture, cuisine and heritage status. Numerous tourists and locals flock to the Village to experience these offerings. It is thus important to ensure that the tourists and residents can walk around safely		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
49	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Construction of the Franschhoek Taxi Rank across the Franschhoek Wine Tram Terminal (PRASA Property) in consultation with the local taxi association Comment: Hopefully, this will assist in ensuring that the informal transport is located in a central area		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025											
	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
50	Online Form	Ward 1	Cllr. Reginald Pheiffer	Waste Management	Ward Priority 2: Provide space for the collection and processing of recyclable waste at the Fabriek Street Waste Drop-off site Comment: By providing a facility to drop off recyclable waste, it will aid in keeping the Streets of the Village clean. BUT MORE: Provide a facility where organic waste material is collected by the municipality		Directorate: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	
51	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Street names to be installed in the new housing section in Mooiwater: Sunflower Street, Jacaranda Street, Orchid Street, Lavender Street, Aloe Street, Fennel Street, Bellflower Street, Cypress Street, Barberry Street, Fern Street and Everlasting Street Comment: This would have a positive impact as the residences would have a firm point of reference.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
52	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Establishment of a parking area at the back of Franschhoek Town Hall / Franschhoek Municipal Offices for use of the public. Comment: This would require a full EIA as it could push even more traffic to the surrounding areas such as Dirkie Uys Street. The latter area is already overrun by speeding traffic and it will create a further hazard by pushing more traffic into this historic area.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
53	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Upgrade and/or establish sidewalks in Reservoir Street specific, and frequently utilised residential routes in Franschhoek Town Comment: Ensure safety of pedestrians, not only in the mentioned Street but also in others, specifically the historical section of Dirkie Uys Street. Numerous vehicles are showing zero regard to the fact that they are driving in a Village and more so, a beautiful historical area of the Village. The speeding vehicles has created a hazardous situation for pedestrians and other users of the Street. Sidewalks will provide a place where pedestrians can walk safely. Lower the speed in the Village to 30km/h.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
54	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Construction and upgrading of sidewalks in Mooiwater, Groendal (Accessible for persons with disabilities) Comment: Ensure the safety of pedestrians, not only in the mentioned Street but in all areas where pedestrians are currently having to walk in the Street. Numerous vehicles are showing zero regard for the fact that pedestrians actually have the right of way. The speeding vehicles have created a hazardous situation for pedestrians and other users of the Street. Sidewalks will provide a place where pedestrians can walk safely. Lower the speed in the Village to 30km/h		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
55	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Removal of the parking bays on the west side of Hugenote Street between Berg and De La Rey Street and widening the sidewalks Comment: This is a beautiful first step to creating an additional safe zone for pedestrians in the main Village area. However, it must be considered that the above suggestion may push additional traffic to Streets adjacent to Hugenote Street. It is thus vital to ensure that comprehensive traffic calming facilities are put into place in the adjacent Streets first, before proceeding with this suggested change.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025

	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
56	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Closure of the southeast side of Church Street and conversion of the existing road into a public amenity area. Comment: This is a fabulous first step towards creating a non-motorised area in the centre of the Village. However, it must be considered that the above suggestion may push additional traffic to Streets adjacent to Hugenote Street. It is thus vital to ensure that comprehensive traffic calming facilities are put into place in the adjacent Streets first, before proceeding with this suggested change.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
57	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Construct traffic calming measures and resurfacing of Reservoir Street Comment: Ensure safety of pedestrians and motorists in the Village: Temper vehicle speeding by introducing raised pedestrian crossings at all road intersections; and introducing numerous speed bumps throughout the village. Lower the speed in the Village to 30km/h.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
58	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Construction of a raised pedestrian crossing on Akademie Street across the Hospice Comment: Ensure the safety of pedestrians and motorists in the Village: To temper vehicle speeding by introducing raised pedestrian crossings at all road intersections and introducing numerous speed bumps throughout the village. Lower the speed in the Village to 30km/h. Further, the section of road between the church and Louis Botha Street is a historical part of the Village. It is currently used by people who are showing zero regard to the fact that they are driving in a Village and, more so, a beautiful historical area of the Village. The speeding vehicles have created a hazardous situation for pedestrians and others.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
59	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Fourway stop at the intersection of Oaklodge- and Akademie Street Comment: Ensure the safety of pedestrians and motorists in the Village: To temper vehicle speeding by introducing raised pedestrian crossings at all road intersections and introducing numerous speed bumps throughout the village. Lower the speed in the Village to 30km/h. Further, the section of road between the church and Louis Botha Street is a historical part of the Village. It is currently used by people who are showing zero regard to the fact that they are driving in a Village and, more so, a beautiful historical area of the Village. The speeding vehicles have created a hazardous situation for pedestrians and others.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
60	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Erection of more pedestrian signage on Akademie Street at Franschhoek High School Comment: Ensure the safety of pedestrians and motorists in the Village: Temper vehicle speeding by erecting pedestrian signage as proposed. However, Dirkie Uys Street is also well used by pedestrians, and additional signage is further required in this area. Lower the speed in the Village to 30km/h.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
61	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Installation of pipes under the intersection to flatten the dip at the intersection of Dirkie Uys and La Rochelle Street towards the school in Akedemie Street in Franschhoek Comment: Various comments have already been made regarding tempering speeding vehicles. This dip is assisting with slowing down vehicles		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local

62	Online Form	Ward 1	Cllr. Reginald Pheiffer	Roads, Transport and Stormwater	Ward Priority 2: Traffic calming measures are needed at the busy intersection leading from Franschhoek Village to R45, e.g. Uitkyk, DeVilliers, Louis Botha and Reservoir Streets Comment: Ensure the safety of pedestrians and motorists in the Village, not only as proposed above but generally throughout the Village. Further, the section of road between the church and Louis Botha Street is a historical part of the Village. It is currently used by people who are showing zero regard to the fact that they are driving in a Village and, more so, a beautiful historical area of the Village. The speeding vehicles have created a hazardous situation for pedestrians and others. Please introduce traffic calming measures in Dirkie Uys Street as well		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
63	Online Form	Ward 1	Cllr. Reginald Pheiffer	Property Management	Ward Priority 3: Formalised braai spots at the circus grounds on the Triangle section of Robertsvlei- and Excelsior Road Comment: This area provides a lovely informal spot for people to gather. Having formalised braai spots will expand this facility. However, it needs to be properly managed, i.e. wastage collection and noise tempering		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
64	Online Form	Ward 1	Cllr. Reginald Pheiffer	Property Management	Ward Priority 3: Provision of staff to manage the Circus Grounds facilities (ablution, park and other) Mon-Sun and Public Holidays Comment: This area provides a lovely informal spot for people to gather. Having formalised braai spots will expand this facility. However, it needs to be properly managed, i.e. wastage collection and noise tempering.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
65	Online Form	Ward 1	Cllr. Reginald Pheiffer	Parks and Open Spaces	Ward Priority 3: Construction of Natural Focused Parks alongside the Stiebeuel River in Mooiwater Comment: Franschhoek is known nationally and internationally for its culture, cuisine and heritage status. Numerous tourists and locals flock to the Village to experience these offerings. It is thus important to ensure that the tourists and residents are catered to while promoting the offerings of Franschhoek.		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
66	Online Form	Ward 1	Cllr. Reginald Pheiffer	Environmental Management	Ward Priority 3: Clean-up operation of the Stiebeuel River and implementation of the river stewardship programme Comment: This once pristine and beautiful river can hopefully be brought back to its original status.		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
67	Online Form	Ward 1	Cllr. Reginald Pheiffer	Waste Management	Ward Priority 3: Replacement of the two dog poo bins that were removed in Franschhoek at the corners of Patrysfontein Reservoir and Lambrecht's and Nerina Street Comment: This is currently a health hazard.		Directorate: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	
68	Online Form	Ward 1	Cllr. Reginald Pheiffer	Safety and Security	Ward Priority 3: Increase visibility of law enforcement to address crime and kidnapping in Franschhoek, residents are scared to go hiking Comment: Franschhoek is known nationally and internationally for its beautiful surroundings. Numerous tourists and locals flock to the Village to experience these offerings. It is thus important to ensure that the tourists and residents can walk around safely.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
69	Online Form	Ward 1	Cllr. Reginald Pheiffer	Property Management	Ward Priority 4: Development of an Amphitheatre and Wine Museum on the Franschhoek Circus Ground Comment: This is a lovely area to be used to the benefit of both visitors and local alike. Franschhoek is known nationally and internationally for its culture, cuisine and heritage status. Numerous tourists and locals flock to the Village to experience these offerings. It is thus important to ensure that the tourists and residents are catered to while promoting the offerings of Franschhoek.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
70	Online Form	Ward 1	Cllr. Reginald Pheiffer	Local Economic Development and Tourism	Ward Priority 4: Establish a well-positioned Tourism Office in Franschhoek CBD Comment: Franschhoek is known nationally and internationally for its culture, cuisine and heritage status. Numerous tourists and locals flock to the Village to experience these offerings. It is thus important to ensure that the tourists and residents are properly informed of available offerings.		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local

	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	**Source**	**Ward**	**Ward Councillor**	**Priority**	**Community / Stakeholder Comments / Input**	**Departmental Action**	**Linkage to Directorate**	**Department**	**Responsible Mayoral Portfolio**	**Government Competency**	**WCG: Provincial Department**
71	Online Form	Ward 1	Cllr. Reginald Pheiffer	Land Use Management and Building	Ward Priority 5: Implementation of a policy and effective mechanisms to limit and control formula restaurants in historic areas of Franschhoek Comment: Franschhoek is known nationally and internationally for offering fine dining experiences. This is what makes the Franschhoek experience unique to visitors and locals. Keep this uniqueness.		Directorate: PED	Department: Development Management	Deputy Mayor (Planning, LED and Tourism)	Local	
72	Online Form	Ward 1	Cllr. Reginald Pheiffer	Land Use Management and Building	Ward Priority 5: Establish a policy to control and limit the use of private houses and flats for short-term rental in Franschhoek (AirBnB) Comment: Franschhoek is an extremely popular tourist destination. However, it is unfortunately at the point of being overrun by over-tourism. It is thus important to ensure that this is not a town filled with tourists only, but that there are sufficient residents to actually run and manage the place. Thus a good idea to limit the use of private houses and flats for short-term rental.		Directorate: PED	Department: Development Management	Deputy Mayor (Planning, LED and Tourism)	Local	
73	Online Form	Ward 1	Cllr. Lwando Nkamisa	Roads, Transport and Stormwater	Quality of Life, Equity, and Safety: Core IDP Themes This request is deeply aligned with the core values of the Stellenbosch Municipality, relevantly interpreted as follows: Mobility Justice: Safe access for all users—young, elderly, disabled—is a basic right, as present for several years in documents and policy papers, at local, provincial and national level. Quality of Life: Better Streets mean healthier, more connected communities. Sustainable Growth: Active transport reduces congestion, improves air quality, and supports local economies.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
74	IDP Open Day	Ward 2	Cllr. Wilhelmina Petersen	Recreation and Sport	Remove the soccer from the Groendal sports ground to a different facility and keep Groendal sport ground for rugby only	Mr Adams explained that there are too many soccer clubs, and not all these clubs are affiliated to Franschhoek Sport Council. 146	Have Your Say	Ward 2	Cllr. Wilhelmina Petersen	Waste Management	Cleaning of the illegal dumping in open spaces in Groendal		Directorate: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	
147	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Housing Development	The municipality must explore other alternative methods such as negotiating with farmers that possess suitable land to swop their land with other municipal land of similar value, not necessarily located in Franschhoek, to make way for housing. Erf 3229 in Mooiwater to be used as a temporary relocation site for the people living on the dam needs to be rezoned from community zone to residential zone to build permanent structures extended on the existing nearby phase2 housing project. This is to keep in line with the current pressing needs of the community which is houses, not sports fields or parks.		Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
148	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Housing Development	Agree that housing is a critical need in ward 2. Developing open spaces in Bosbou and Groendal would not only address the housing shortage but also improve living conditions for many residents. On the contrary, the tendency to build social housing projects further from town centers and employment hubs, a phenomenon known as "spatial drift", is very disturbing. It extremely perpetuates the racist spatial divide in Franschhoek, where rich white people live on the other side of the town (employment hub), and the poor black and coloured population on the other side, having to bear the costs of commuting to town.		Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
149	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Informal Settlements	There are a few brick structures that were built on the B and C sections of Langrug near the dam at top. Rumour has it that these structures were built as a pilot test project on the issue of Insitu upgrading of Langrug. These structures are a very good solution for small families and should be continued to be built. This is vital for improving basic services and ensuring equitable living standards for all residents.		Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
150	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Roads, Transport and Stormwater	Upgrading and beautification of sidewalks in La Motte and Groendal: These sidewalks need asphalt paving, not brick paving because those are regularly being stolen and vandalised.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
151	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Roads, Transport and Stormwater	Sewerage outlet in the Stiebeuel River near Mooiwater informal Settlement in Skool Street: It looks like a stormwater outlet that has been vandalised. It does not pose any immediate threat to anyone.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
152	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Recreation and Sport	Construct a swimming pool in Groendal next to Groendal Sports Grounds: The whole Groendal community has no communal swimming pool. In summer, children opt to vandalise water taps, climb to dangerous mountain rivers, or swim along the untidy Stiebeuel River. The pool would bring joy to people of all ages as most cannot afford to travel to Paarl or Riverside pools, which charge entrance fees.		Directorate: Community and Protection Services	Department: Community Services	Youth, Sport and Culture	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025

	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	**Source**	**Ward**	**Ward Councillor**	**Priority**	**Community / Stakeholder Comments / Input**	**Departmental Action**	**Linkage to Directorate**	**Department**	**Responsible Mayoral Portfolio**	**Government Competency**	**WCG: Provincial Department**
153	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Recreation and Sport	Soccerfield: The field belonging to Groendal Secondary School should be developed into a permanent soccer field for the people of Langrug and Mooiwater. This field has been illegally used as a soccer field for years and has uplifted many aspiring soccer players from Langrug, but little has been done to support the initiative. The sports centre field is very far, therefore denying the people of Langrug the opportunity to conveniently participate in sport.		Directorate: Community and Protection Services	Department: Community Services	Youth, Sport and Culture	Local	
154	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Education	IsiXhosa Secondary School: The construction of an IsiXhosa secondary school is very important and critical, given the large number of Xhosa-speaking population in Franschhoek. Xhosa learners are forced to travel to Kayamandi and Mbekweni to be able to learn in their mother language. Groendal Secondary School does have Xhosa classes, but cannot accommodate this huge demand.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
155	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Budget	The council must refrain from their habit of approving budgets which allocate a huge chunk towards servicing the rich and well off and shift their focus on servicing the poor and marginalised communities.		Directorate: Financial Services	Department: Financial Management Services	Financial Services	Local	
156	Online Form	Ward 2	Cllr. Lwando Nkamisa	Roads, Transport and Stormwater	**Proposed Immediate Actions - recommend the IDP include provisions for:** Quick-build infrastructure (e.g., bollards, class 1 and 2 bike lanes, raised crossings) in danger zones Design competitions or participatory workshops for high-profile nodes (like Merriman) A municipal cycling mobility coordinator/approach, to oversee strategy, delivery, and public communication		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
157	Online Form	Ward 2	Cllr. Wilhelmina Petersen	Housing Development	Ward Priority 1: Housing as well as land for housing in Ward 2 Comment: Rating 2		Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local

Charles Manuel	Income and Expenditure	Provision of information on who is responsible for the payment of water consumption for the taps installed by the municipality for the squatters at the back of Vuurpyl Street in Lanquedoc	Alicia checked at the office on the morning of 11/04/2025, via GIS and Google Maps where in Vuurpyl the water tap is installed. The tap was found under a tree on the corner of Vuurpyl Street. Alicia emailed on 11/04/2025 the Water Metering Department with a copy of the GIS mapping of where the tap is at for them to investigate through which water meter is the water consumption of the water tap metered. As soon as the Water department confirms the meter details will the Finance office be able to allocate the meter on the financial system to check who is currently billed for the water consumption and who is paying the account. Alicia will contact the client on her cell phone with the feedback as soon as above information is confirmed. 251	Stakeholder Engagement	Ward 3	Cllr. Charles Manuel	Community Development	Request for a Partial Care Facility: What about the partial care in ECD in Lanquedoc		Directorate: Community and Protection Services	Section: Community Development	Community Services	Local	
252	Stakeholder Engagement	Ward 3	Cllr. Charles Manuel	Community Development	There is a vandalised building not being utilised. Why is that not being upgraded to accommodate two ladies in the Lanquedoc area, which is making provision for a partial care facility on top of their small houses	Ms Aalbers requested more information about the building referred to and explained that the municipality can only spend funds on municipality property. Explained that people might not be aware, but the Municipality can only spend funds on municipal owned property. Therefore the municipality first need to determine what facilities is referred to and take it from there.	Directorate: Community and Protection Services	Section: Community Development	Community Services	Local	
253	Email	Ward 3	Cllr. Charles Manuel	Integrated development planning and public participation	Request for IDP open day scheduled for 8 April 2025 for wards 3 and 4 to be moved from Wemmershoek Community Hall to the Millennium Hall in Pniël to accommodate most of our residents around.	The IDP and Budget Public Participation meetings are conducted using an area-based public participation model. In the case of Ward 3, it is grouped with Ward 4, collectively referred to as the Dwarsriver Valley Area. The time, date, and venue were discussed with both councillors during the planning stage of the meetings. Thereafter, the schedule of meetings is presented to the Speaker of the Council for consideration and approval. At this point in time, the schedule is already distributed to all municipal account holders and published on various social media platforms of the municipality and in various WhatsApp groups of the councillors and ward committee members. Please refer to the attached schedule of meetings. You will note from the schedule of meetings that the municipality is making transport available to community members to attend the meeting to submit their input verbally. In addition to this, should a community member be unable to attend the meeting to submit their input verbally, the municipality has made available various other mechanisms for community members to submit their input.	Office of the Municipal Manager	Section: IDP/PMS/PP	Executive Mayor	Local

343	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Land Use Management and Building	After the court judgement was in favour of Mr Arend, to date, the neighbour had not removed the pins, and therefore Mr Arends wanted to know what the following recourse would be for his neighbour		Directorate: PED	Department: Development Management	Deputy Mayor (Planning, LED and Tourism)	Local	
344	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Installation of speedhumps requested at Kahler Street in Ida's Valley		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
345	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Installation of additional speedbumps at Oak Tree Village in Ida's Valley		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
346	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Housing Development	Provision of an update on the Hillside housing development	Approved for 60 houses. A meeting will be called for the community to give feedback regarding the petition.	Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
347	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Housing Development	Provision of RDP and GAP housing development opportunities in Ida's Valley	It was explained the housing that being build is private project the RDP project is not in progress	Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
348	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Housing Administration	Enquiry on housing waiting list application	Checked on waiting list application is on and updated	Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
349	IDP Open Day	Ward 5	Cllr. Roy Van Rooyen	Housing Administration	Enquiry on housing waiting list application	Need to be updated (Application date: 2021)	Directorate: PED	Department: Integrated Human Settlements	Human Settlements	Local	
350	WhatsApp	Ward 5	Cllr. Roy Van Rooyen	Electrical Services	Request to unblock the electricity connection at 35 Hahn Street, Ida's Valley		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
351	Online Form	Ward 5	Cllr. Roy Van Rooyen	Environmental Management	Ward Priority 1: Ida's Valley Community Trails initiative. Activating Ida's Valley Community Market as trail Centre. Comment: There are plenty of SMME operating from their homes in Ida's Valley. This encourages the maintenance of the natural environment whilst encouraging entrepreneurship.		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
352	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: Erect a Clearview fence at Assegaai Street and Old Helshoogte Road to prevent access to the open land where illegal dumping takes place. Comment: Don't need to fence the area off, but rather hold those dumping accountable and perhaps have CCTV to enforce this.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
353	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Streets in Hillside Village do not have any visible signs of Street names. Comment: The names are there, but the paint from the road is easily removed due to high traffic and weather. Street signs are needed instead of names on the pavement.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
354	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Re-installation of speedbump at Old Helshoogte Rd at the Ridge in Ida's Valley. Comment: CCTV and regular painting for the road lines are needed though.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
355	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 3: Re-installation of speedbump at Old Helshoogte Rd at the Ridge in Ida's Valley. Comment: CCTV and regular painting for the road lines are needed though.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
356	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Erect tarred sidewalks in Martin Street, Johnson Street and Moses Street in Ida's Valley. Comment: Perhaps gravel and beautification should be encouraged instead.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
357	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 5: One security camera is to be installed at the four-way stop at the entrance to The Ridge. One security camera is to be installed at the old Asla building site in Hillside Village, Helderberg Street. Comment: There is continuously dumping in this area and this will aid neighbourhood watch.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025											
	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
358	Online Form	Ward 5	Cllr. Roy Van Rooyen	Beautification	Trees are to be planted along Assegaai Road behind Merton Street, but in Hillside, oak trees and the surrounding Ida's Valley, as a pedestrian, you are exposed to heavy rains and bad sun at peak hours, especially on playparks.		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local	
359	Online Form	Ward 5	Cllr. Roy Van Rooyen		Rated the ward priorities with no supporting comments.					Local	
360	Online Form	Ward 5	Cllr. Roy Van Rooyen	Local Economic Development and Tourism	Ward Priority 1: Ida's Valley Community Trails initiative. Activating Ida's Valley Community Market as a trail Centre. Comment: The need is for a Police Station. Tourism is good, but it will increase crime, so put a police station there as well.		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Provincial	
361	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 1: Future tourism hub together with Botmaskop Mountain. This will enable integration and social cohesion between wards 5, 6 and 7. Comment: The first priority is for a Police Station to service the community of Ida's Valley.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Provincial	
362	Online Form	Ward 5	Cllr. Roy Van Rooyen	Community Development	Ward Priority 1: Process of enquiring about the land, the open space next to the Bruckner De Villiers school in Ida's Valley (ward 5) for a community garden to plant vegetables and flowers to sell and use some for household consumption. Comment: This is a great idea. The same should be done for Hillside Village as there is space.		Directorate: Community and Protection Services	Section: Community Development	Rural Management and Environment	Local	
363	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 1: Fencing of the open space next to Bruckner De Villiers school in Ida's Valley (ward 5). Comment: This is a great idea.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
364	Online Form	Ward 5	Cllr. Roy Van Rooyen	Housing Development	Ward Priority 1: Provide clarity on why Jonkershoek is part of Ward 5. Comment: They should be their own ward. They have needs to be met as well, but they live in their own area. Give them houses where they currently are.		Directorate: PED	Department: Integrated Human Settlements	Deputy Mayor (Planning, LED and Tourism)	Local	
365	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: Work together with DCAS, surrounding schools, NGOs tennis academy and SAS to build multipurpose courts at the netball fields. Comment: It is always a good idea to uplift the community.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
366	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: The other properties, like the rugby clubhouse, can be used as spaces for this after-school programme. Comment: Support this priority.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
367	Online Form	Ward 5	Cllr. Roy Van Rooyen	Cleaning of Rivers	Ward Priority 2: Open space, nature areas and rivers in Ida's Valley. Comment: Need to be cleaned, kept clean and fenced. Access should be restricted for conservation and health purposes.		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
368	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: Fencing and installation of gates at Mccoy Street, Hillside Village open spaces in Ida's Valley. Comment: This area to be fenced is one of the areas where a community garden can be created for upliftment of community. Fence it for now with a gate for access please.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
369	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: Erect a Clearview fence at Assegaai Street and Old Helshoogte Rd to prevent access to the open land where illegal dumping takes place. Comment: Yes. Hillside Village has a few areas to be fenced as well.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local

No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
370	Online Form	Ward 5	Cllr. Roy Van Rooyen	Recreation and Sport	Ward Priority 2: Build a play park in Oaktree Village. Comment: In all fairness, Hillside Village first. It is the first development with the most kids, and it includes the RDP housing, please, the project. Furthermore, a petition was sent to Municipal Offices and the Ward councillor on 16 January 2025.		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
371	Online Form	Ward 5	Cllr. Roy Van Rooyen	Beautification	Ward Priority 2: Pruning of trees on the play park in Packham Street. Comment: Please make the place look good.		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
372	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: Gates at La Gratitude Park and extension of Clearview fence to the river. Comment: Yes, govern movement.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
373	Online Form	Ward 5	Cllr. Roy Van Rooyen	Beautification	Ward Priority 2: Cutting of overhanging branches at the Reservoir in Ida's Valley. Comment: Request to clean the place.		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
374	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 2: Extend the Clearview fence at Kreefgat Playpark into the river to prevent access behind the houses in Newman Street. Comment: Security is important. Increase in house burglary.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
375	Online Form	Ward 5	Cllr. Roy Van Rooyen	Recreation and Sport	Ward Priority 2: Construction of a play park in Hillside Village. Comment: Please add an outdoor gym. There is a possibility for more like a community veg garden as well. Have it fenced with a lockable gate as well.		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
376	Online Form	Ward 5	Cllr. Roy Van Rooyen	Area Cleaning	Ward Priority 3: Install skips at the open space next to the Bruckner De Villiers school in Ida's Valley (Ward 5). Comment: Do the same for Hillside Village as well please. Lots of rubble being dumped in open spaces.		Directorate: Infrastructure Services	Department: Waste Management	Infrastructure Services	Local	
377	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Cleaning of drains in Ida's Valley. Comment: Cleaning of drains to be done before the winter / stroms start		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
378	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Road signs and sidewalks are needed in Oaktree Village (new development). Comment: Road signs are being stolen. What about monitoring cameras?		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
379	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Streets in Hillside Village do not have any visible signs of Street names. Comment: Put engraved signs down. Add on monitoring cameras as well.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
380	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 3: Streets in Oaktree Village (new development) does not have Streetlights. Comment: Add additional cameras.		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
381	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Re-installation of speedbump at Old Helshoogte Rd at the Ridge in Ida's Valley. Comment: Please elevate the four-way stop at The Ridge/Hillside Village entrance. Lots of people coming from La Roche and surrounding areas are not stopping and speeding through a four-way stop.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
382	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Construction of speedbump at the end of Lindida Drive before Helderberg Street or Assegaai Street. Comment: Construct a high speed hump because young people with their cars are turning it into a raceway. Add on more speed humps to Hillside Village.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
383	Online Form	Ward 5	Cllr. Roy Van Rooyen	Electrical Services	Ward Priority 3: Installation of Streetlights on the open space opposite in Talana Street in Ida's Valley. Comment: Visibility is important.		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025

	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
384	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Erect tarred sidewalks in Martin Street, Johnson Street and Moses Street in Ida's Valley. Comment: This is a good idea.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
385	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 3: Stabilize the channel construction behind the houses at Olyf Street and Oaktree Village in Ida's Valley. Comment: Consider doing the same with river channel flowing through Hillside Village. A concrete channel can be laid to stabilize it.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
386	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 3: Installation of additional speed bump at the entrance of Wilgerbroom Road in Oaktree Village in Ida's Valley. Comment: For road safety. We have to many speedsters in our community		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
387	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 4: Identify land in Jonkershoek and Ida's Valley for future housing projects and development. Comment: It can be done. If Botmanskop can be sold of to foreigners for billions then locals also deserve to have housing.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
388	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 5: Provide information about the CCTV Cameras Masterplan Comment: Installation of more cameras in hot spot for crime identified areas.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
389	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 5: Provide information on the procedures to follow to access CCTV footage. Comment: This is very important		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
390	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 5: Investigation of better communication methods between the NHW and the police station. Comment: As part of the Hillside Village NHW I can confirm that communication with SAPS is important.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
391	Online Form	Ward 5	Cllr. Roy Van Rooyen	Safety and Security	Ward Priority 5: Monitoring of ashtray animals posing danger to livestock in the Jonkershoek area. Comment: Do you mean stray animals? Then yes.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
392	Online Form	Ward 5	Cllr. Roy Van Rooyen	Roads, Transport and Stormwater	Ward Priority 5: Closing of the channels on the open space behind Hillside Village in Ida's Valley. Comment: Yes please. Vagrants are sleeping under the bridge.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
393	Online Form	Ward 5	Cllr. Roy Van Rooyen	Electrical Services	Ward Priority 5: Streetlights are to be installed on Helshoogte Road, behind The Ridge, in the direction of Pniël. Comment: This is a good idea.		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
394	Online Form	Ward 5	Cllr. Roy Van Rooyen	Local Economic Development and Tourism	Ward Priority 1: Ida's Valley Community Trails initiative. Activating Ida's Valley Community Market as trail Centre Comment: Not only as a trail centre, but also as a place where local vendors can sell different cuisine and host events and monthly markets. To sustain it, we need to first arrange a reimagining of the space with the community. This space can boom with all the students and development happening in Ida's Valley. It is a place where we market all businesses and activities within Ida's Valley.		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
395	Online Form	Ward 5	Cllr. Roy Van Rooyen	Local Economic Development and Tourism	Ward Priority 1: Future tourism hub together with Botmaskop Mountain. This will enable integration and social cohesion between wards 5, 6 and 7 Comment: Rating 5		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
396	Online Form	Ward 5	Cllr. Roy Van Rooyen	Community Development	Ward Priority 1: Process of enquiring about the land the open space next to the Bruckner De Villiers school in Ida's Valley (ward 5) for a community garden to plant vegetables and flowers to sell and use some for household consumption Comment: This is to create jobs and supply access to proper nutrition. This is also a way to ensure an open space next to the school can be used to educate kids about agriculture.		Directorate: Community and Protection Services	Section: Community Development	Community Services	Local

397	Online Form	Ward 5	Cllr. Roy Van Rooyen	Property Management	Ward Priority 1: Fencing of the open space next to Bruckner De Villiers school in Ida's Valley (ward 5) Comment: Important to prevent theft to ensure proper security along the river.		Directorate: Corporate Services	Section: Properties Management and Municipal Building Maintenance	Corporate Services	Local	
398	Online Form	Ward 5	Cllr. Roy Van Rooyen	Integrated development planning and public participation	Deeply disappointed with the priorities listed for my ward, as the majority of them reflect routine municipal functions rather than meaningful development initiatives. These basic services should already be part of standard municipal operations, not presented as special priorities.		Office of the Municipal Manager	Section: IDP/PMS/PP	Executive Mayor	Local	
399	Online Form	Ward 5	Cllr. Roy Van Rooyen	Electrical Services	Streetlights should be erected along the R304, as this road is prone to accidents and is used daily by many pedestrians.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
400	Online Form	Ward 5	Cllr. Roy Van Rooyen	Local Economic Development and Tourism	Employment opportunities should be prioritised for skilled residents within the municipal area to promote local development and reduce unemployment.		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
401	Online Form	Ward 5	Cllr. Roy Van Rooyen	Human Resource Management	My biggest concern with the Stellenbosch Municipality is the appointment of staff from outside the municipal area, while local residents are often only offered contract positions. The municipality should prioritize the employment of skilled individuals from within the WC024 boundaries. Furthermore, it is troubling that some existing staff members are appointed to vacant positions despite not having the required qualifications, while qualified and experienced individuals are overlooked. This practice undermines fairness and merit-based employment.		Directorate: Corporate Services	Department: Human Resources Management	Corporate Services	Local	
402	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Safety and Security	Increase visibility from Law Enforcement in Ida's Valley		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
403	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Safety and Security	Conduct inspection at 9 Cypress Street in Ida's Valley, young people doing drugs		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
404	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Traffic Enforcement	Deployment of Traffic officers to assist with cars obstructing the road at Lückhoff Street and Juffernbruch Street in Ida's Valley		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
405	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Safety and Security	Increase visibility from Law Enforcement at R44 Timberlea between 06:00 – 08:00 in the morning and 16:30 – 18:00 in the evening		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
406	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Roads, Transport and Stormwater	Installation of robot at Elsenburg as you go to Klapmuts		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
407	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Electrical Services	Provision of information on whether electrical rates are the same at all vendors		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
408	IDP Open Day	Ward 6	Cllr. Nateshia Mcombring	Environmental Management	Pruning of trees right across 47 Rustenburg Road, Ida's Valley		Directorate: Community and Protection Services	Department: Community Services	Rural Management and Environment	Local

578	Online Form	Ward 7	Cllr. Annemarie Ferns	Budget	The CITP and MSDF clearly state as principles that we must move away from building new dormitory communities outside the urban edge, moving away from building new roads for private cars, do not develop agricultural land, etc - but when the budget is made up, and developments approved, exactly the opposite happens. Serious amounts of money are budgeted for a possible new road and the consultants. eg the Trumali link road serves absolutely no purpose unless there are plans that are not made known. Almost no budget for NMT, cycling roads, etc. If the money for roads (that we do not need - because the source of the problems is not defined or solved) is used to attend to people's needs, many projects can be dealt with. Push the ATC, that complies with the principles of the MSDF (one of the best docs ever), forward and stop developments that are not sustainable.		Directorate: Financial Services	Department: Financial Management Services	Financial Services	Local	
579	Online Form	Ward 7	Cllr. Annemarie Ferns	Spatial Planning	The CITP and MSDF clearly state as principles that we must move away from building new dormitory communities outside the urban edge, moving away from building new roads for private cars, do not develop agricultural land, etc - but when the budget is made up, and developments approved, exactly the opposite happens. Serious amounts of money are budgeted for a possible new road and the consultants. eg the Trumali link road serves absolutely no purpose unless there are plans that are not made known. Almost no budget for NMT, cycling roads, etc. If the money for roads (that we do not need - because the source of the problems is not defined or solved) is used to attend to people's needs, many projects can be dealt with. Push the ATC, that complies with the principles of the MSDF (one of the best docs ever), forward and stop developments that are not sustainable.		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
580	Online Form	Ward 7	Cllr. Annemarie Ferns	Budget	Businesses, money must be spent on projects that will have the best return on investment. As "a" one voice, I will probably not even be heard, but Stellenbosch cannot afford to lose its character (that will the end) and we are losing just that!!! - There are solutions, but we must be heard and discuss solutions. We made many inputs in the budget indicating the shortcomings over the years but have now stopped, as the best reaction we had was "noted".		Directorate: Financial Services	Department: Financial Management Services	Financial Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025

	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	**Source**	**Ward**	**Ward Councillor**	**Priority**	**Community / Stakeholder Comments / Input**	**Departmental Action**	**Linkage to Directorate**	**Department**	**Responsible Mayoral Portfolio**	**Government Competency**	**WCG: Provincial Department**
581	Online Form	Ward 7	Cllr. Annemarie Ferns	Local Economic Development and Tourism	Promote and manage tourism, the industry that creates the most job opportunities in Stellenbosch (and nationally). The challenge is job creation, not building houses many of the security and safety issues will be solved if people have jobs.		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
582	Online Form	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Do not spend money on new roads to solve the traffic issues - the problem (cause of the problem) is Student Traffic. We have done many calculations and observations - when schools are open, no holidays, admin and lecturing personnel of the US are in town, and the students start writing exams (or students only on holiday), have very few traffic issues, if at all.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
583	Online Form	Ward 7	Cllr. Annemarie Ferns	Budget	The calculation of rates tariffs will increase the property tax substantially, and many inhabitants cannot afford these increases. Very difficult to mention everything, but there should be ways/means to discuss these issues		Directorate: Financial Services	Department: Financial Management Services	Financial Services	Local	
584	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Request for a speedhump in Provinsielaan in Uniepark between Groen Street and the Arboratum		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
585	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Request to tar the road from Suidooster Street and Piekesig Street in Mostertsdrift		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
586	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Water Services	Replacement of the waterpipe in Jonkershoek, Mostertdrift		Directorate: Infrastructure Services	Department: Water and Wastewater Services	Infrastructure Services	Local	
587	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Painting of Street names in ward 7 – it is reported on the IDP that this project is completed. It is not the case because several Street names are still unpainted and not readable		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
588	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Parks and Open Spaces	Extra refuse bins required at Hangbrug – Currently, there is only one bin, which is not sufficient over a busy weekend. A second bin is required		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
589	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Parks and Open Spaces	Installation of a notice board on Hangbrug: Thank you for repairing the Hangbrug. To prevent future damage, please have a notice board installed on the Hangbrug (both sides) indicating " No jumping allowed on the bridge. Trespassers will be executed".		Directorate: Community and Protection Services	Department: Community Services	Parks and Open Spaces	Local	
590	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Electrical Services	Maintenance of electrical sub-station at Lanzerac Park: The electrical sub-station at Lanzerac Park on Jonkershoek Road needs maintenance. The roof tiles are missing, the gutters is broken and downpipes missing, side slates are broken and building is half-painted		Directorate: Infrastructure Services	Department: Electrical Services	Infrastructure Services	Local	
591	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Installation/construction of curbs and bollards: An extended curb and bollards are required at the mini-circle in the Merriman / Martinson / Simonberg intersection across from Padel Court. Visitors to Padel Courts should be prevented from turning in and out the road too close to the mini–circle. The speed of the cars approaching the circle from Martinson Rd side, create a dangerous situation, which can result in accidents		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
592	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Repair of the damage to the road surface in Omega Street: It was reported by a resident in Omega Street that the recently repaired road (after a water pipe burst) was damaged due to the many large trucks delivering sand to the property at the top end of Omega Street		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025

	Community and Stakeholder Comments / Input					Municipal Directorate and Western Cape Government Information					
No.	Source	Ward	Ward Councillor	Priority	Community / Stakeholder Comments / Input	Departmental Action	Linkage to Directorate	Department	Responsible Mayoral Portfolio	Government Competency	WCG: Provincial Department
593	Have Your Say	Ward 7	Cllr. Annemarie Ferns	Integrated development planning and public participation	Communication regarding the IDP: Once the IDP is approved and budgets allocated to the various departments, the departments, before the September / October review takes place, must indicate to the ward which of the listed IDP projects of that ward will be dealt with in the current financial year. This will enable ward committees to plan ahead and set new priorities for the following year. The departments should consult with the councillor about the requests before executing it, and, if there is any uncertainty and report to the councillor when the project will be finalised		Office of the Municipal Manager	Section: IDP/PMS/PP	Executive Mayor	Local	
594	Email	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	The Lock-up facility for cycles in the Budget is not a priority in comparison to the completing of the network for cycles.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
595	Email	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Details of NMT Short-term projects for SM in the Revised, Updated and Consolidated Cycle Plan		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	
596	Email	Ward 7	Cllr. Annemarie Ferns	Roads, Transport and Stormwater	Request that the two year budget for the Lock-up be transferred to the section of Develop and Implementation for Cycle Plan in the Budget		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local

656	IDP Open Day	Ward 11	Alderman Johannie Serdyn	Safety and Security	Deployment of Law Enforcement to enhance patrolling on the routes from Cloetesville to the CDB Stellenbosch	Regular enforcement and patrols are conducted by safety partners within the Stellenbosch WC024. This includes Law Enforcement, Traffic, SAPS and other security entities.	Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
657	IDP Open Day	Ward 11	Alderman Johannie Serdyn	Safety and Security	Increase visibility of SAPS and Law Enforcement in rural areas (Ida's Valley, Kayamandi and Cloetesville)	Weekly Safety Partnership meetings are held to ensure enforcement in all the areas within the Stellenbosch WC024. Community to report crime and lodged complaints to ensure focus driven operations within their areas.	Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
658	IDP Open Day	Ward 11	Alderman Johannie Serdyn	Safety and Security	Implementation of bicycle patrolling along George Blake when workers walk to work a lot R304	Safety monitors, the eyes and ears for Law Enforcement Services are deployed on bicycle patrols along the George Blake Avenue to assist with visible patrols during peak and when public travel to and from work.	Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
659	IDP Open Day	Ward 11	Alderman Johannie Serdyn	Safety and Security	Request partnership with Stellenbosch Municipality to establish security in the reserve and around Onderpapeggaiberg	Suggest utilising the Rent a Cop Policy of the municipality. Meeting to be set up with Senior Manager Protection Services to discuss resolutions and proposal and Rent a Cop.	Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local	
660	IDP Open Day	Ward 11	Alderman Johannie Serdyn	Income and Expenditure	Establishment a SRA in the Onder Papegaaiberg community	SRA not with Protection Services – referred to Finance, Senior Manager Mitchell	Directorate: Financial Services	Department: Revenue and Expenditure	Financial Services	Local	
661	Online Form	Ward 11	Alderman Johannie Serdyn	Spatial Planning	As road, public transport, and non-motorised transport upgrades are key to the ATC corridor's success, how will the municipality ensure that these improvements are implemented in parallel with private development. Enhancing accessibility, safety, and public amenities will be critical to attracting investment and users to these precincts. Use of development contributions to fund NMT projects should be considered as an innovative funding mechanism (there is precedent to do so already in SPLUMA and it has been done in other municipalities). Please comment on this?		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
662	Online Form	Ward 11	Alderman Johannie Serdyn	Spatial Planning	The IDP proposes a dedicated Project Management Unit for ATC implementation—how will this operate, and what mechanisms exist to ensure it is effective, transparent, and insulated from political interference or delays? Is there a due date for this to be implemented as it was supposed to be implemented by August 2023?. The IDP clearly recognises budgetary constraints but could go into more detail on how public-private partnerships will be structured to deliver enabling infrastructure, and what risk mitigation measures will be adopted to prevent the stalling of critical projects?		Directorate: PED	Department: Development Planning	Deputy Mayor (Planning, LED and Tourism)	Local	
663	Online Form	Ward 11	Alderman Johannie Serdyn	Roads, Transport and Stormwater	Ward Priority 2 - No input was asked from the public about the Taxi rank at Stellenbosch Station. Comment: The Stellenbosch Station parking lot is plagued by overflowing litter, persistent graffiti, and excessive noise from taxi drivers and passengers. This creates an unsightly environment, fosters insecurity, and disrupts our daily lives with unbearable levels of noise pollution. Taxi use of Weidenhoff Street for parking and queuing causes severe traffic congestion and poses a serious safety hazard to pedestrians and motorists alike.		Directorate: Infrastructure Services	Department: Roads, Transport and Storm Water (RTS)	Infrastructure Services	Local	

IDP and Budget Comments and Input - draft 3rd review of the 5th Generation IDP - April 2025

664	Online Form	Ward 11	Alderman Johannie Serdyn	Safety and Security	Safety Concerns in Weidenhof and Blersch Streets: Weidenhof and Blersch Streets urgently require attention regarding safety and security. Vehicle break-ins are a constant problem, with cars parked on the Streets frequently targeted by thieves. Our complex is experiencing recurring break-ins, highlighting a concerning lack of security in the area. Residents feel unsafe walking alone at night, often requiring accompaniment from ABC Security for protection. These issues create a climate of fear and insecurity, significantly impacting our quality of life. Urgent action is needed to address these concerns and ensure the safety of residents.		Directorate: Community and Protection Services	Department: Protection Services	Protection Services	Local
