The criteria for the release of the equitable share which were covered in MFMA Circulars No. 122 remains relevant, and are still applicable for the release of equitable share instalments in the 2025/26 financial year.

Failure to comply with the criteria will result in National Treasury invoking Section 38 of the MFMA which empowers National Treasury to withhold a municipality's equitable share if the municipality commits a serious or persistent breach of the measures established in terms of Section 216(2) of the Constitution which includes reporting obligations set out in the MFMA and National Treasury requests for information in terms of Section 74 of the MFMA.

2.10. Criteria for the rollover of conditional grant funds

In terms of Section 21 of the Division of Revenue Act, 2024 (Act No.24 of 2024) (DoRA) in conjunction with the Division of Revenue Amendment Act, 2024 (Act No. 48 of 2024), any conditional allocation or a portion thereof that is not spent at the end of the 2024/25 financial year reverts to the National Revenue Fund (NRF), unless the rollover of the allocation is approved in terms of subsection (2). Furthermore, the receiving officer, provincial treasury and national transferring officer is required to prove to National Treasury that the unspent allocation is committed to identifiable projects, in which case the funds may be rolled over.

When requesting a rollover in terms of Section 21(2) of the 2024 DoRA, municipalities must include the following information with their submission to National Treasury:

1. A formal letter, signed by the accounting officer addressed to the National Treasury requesting the rollover of unspent conditional grants in terms of Section 21(2) of the 2024 DoRA;
2. A list of all the projects that are linked to the unspent conditional grants and a breakdown of how much was allocated, spent and the balance per project;
3. The following evidence indicating that work on each of the projects has commenced, as applicable to the specific rollover(s):

a) Proof that the service provider was appointed for delivery of the project before 31 March 2025; or
b) Proof of project tender and tender submissions published and closed before 31 March 2025 or with the appointment of contractor or service provider for delivery of service before 30 June 2025 in cases where additional funding was allocated during the course of the financial year of the project;
c) Incorporation of the Appropriation Statement; and
d) Evidence that all projects linked to an allocation will be fully utilised by 30 June 2025 (attach cash flow projection for the applicable grant).

4. A progress report (also reflecting percentages) on the status of each project's implementation that includes an attached legible implementation plan);
5. The value of the committed project funding and the conditional allocation from the funding source;
6. Reasons why the grants were not fully spent during the year on the original allocation per the DoRA;
7. Rollover of rollovers will not be considered. Municipalities must therefore not include previous year's unspent conditional grants as rollover request;
8. An indication of the time period within which the funds are to be spent if the rollover is approved; and
9. Proof that the Municipal Manager and Chief Financial Officer are permanently appointed.

No rollover requests will be considered for municipalities with vacant or acting Chief Financial Officers and Municipal Managers for a period exceeding 6 months from the date of vacancy; this also includes acting appointments because of suspensions of either MM or CFO that are more than 12 months.

If any of the above information is not provided or the application is received by National Treasury (Intergovernmental Relations Division) after 31 August 2025, the application will be declined.

In addition, National Treasury will also consider the following information when assessing rollover applications; and reserves the right to decline an application should there be non-performance by the municipality in any of these areas:

1. Compliance with the in-year reporting requirements in terms of Sections 71 and 72 of the MFMA and Section 12 of the 2024 DoRA, **including the Municipal Manager and Chief Financial Officer signing-off on the information** sent to National Treasury;
2. Submission of the pre-audited Annual Financial Statements to National Treasury by 31 August 2025;
3. Accurate disclosure of grant performance in the 2024/25 pre-audited Annual Financial Statements, (i.e. correct disclosure of grant receipts and spending in the notes to the AFS);
4. Despite the fact that local government is required to comply with different norms and standards prescribed by different legislations, municipalities are expected to fully comply with the provisions of DoRA that relate to rollover processes and disclose conditional grant performance in the 2024/25 pre-audited Annual Financial Statements (i.e. Cash coverage and unspent conditional grants in the Statement of Financial Position) in order to verify grant expenditure; and
5. Cash available reflected in the Statement of Financial Position and Cash Flow Statements and the bank (net position including short term investments) as at 30 June 2025 is equivalent to the unspent amount at the end of the financial year. If the amount that is requested for rollover is not entirely cash-backed, such a rollover will not be approved. National Treasury will also not approve portions of rollover requests.

It should be noted that under no circumstances will the National Treasury consider requests to rollover:

1. The entire 2024/25 allocation to the municipality. In cases where the rollover request is more than 50 per cent of the total allocation, National Treasury will approve the rollover amount up to 50 per cent of the 2024/25 allocation;
2. Rollover request of the same grant for the third consecutive time. In a case where a municipality is applying for rollover as a result of additional funding, the application will be carefully considered;
3. Funding for projects procured through Regulation 32 and 37 of the Municipal Supply Chain Management Regulations (Gazette No.27636) – Projects linked to additional funding and disasters are exempted; and
4. A portion of an allocation where the proof of commitment for the rollover application is linked to invoices that were issued before or on 31 March 2025. All invoices issued to the municipality before 31 March 2025 should be paid within the same year against the allocated conditional grants. i.e. invoices must be paid within 30 days.

2.11. Unspent conditional grant funds for 2024/25

The process to ensure the return of unspent conditional grants for the 2024/25 financial year will be managed in accordance with Section 21 of the DoRA. In addition to the previous MFMA Circulars, the following practical arrangements will apply:

Step 1: Municipalities must submit their June 2025 conditional grant expenditure reports according to Section 71 of the MFMA reflecting all accrued expenditure on conditional grants and further ensure that expenditure reported to both National Treasury and national transferring officers reconciles;
Step 2: When preparing the Annual Financial Statements, a municipality must determine the portion of each national conditional grant allocation that remained unspent as at 30 June 2025. The unspent grant values must be determined based on the guidance that was provided in *m*SCOA Circular No. 13 in as far as VAT, retention and interest is concerned; and
Step 3: If the receiving officer wants to motivate in terms of Section 21(2) of the 2024 DoRA that the unspent funds are committed to identifiable projects, the rollover application pack must be submitted to National Treasury by no later than 31 August 2025.

National Treasury will not consider any rollover requests that are incomplete or received after this deadline.

Step 4: National Treasury will confirm in writing whether or not the municipality may retain any of the unspent funds as a rollover based on criteria outlined above by 22 October 2025;
Step 5: National Treasury will communicate the unspent conditional grants amount by 12 November 2025. A municipality must return the remaining unspent conditional grant funds that are not subject to a specific repayment arrangement to the National Revenue Fund (NRF) by 19 November 2025; and
Step 6: Any unspent conditional grant funds that should have but has not been repaid to the National Revenue Fund (NRF) by 19 November 2025, and for which a municipality has not requested a repayment arrangement, will be offset against the municipality's December 2025 equitable share allocation.

All other issues pertaining to Appropriation Statement and reporting on approved rollovers are addressed in the Annexure to MFMA Circular No. 86.

2.12. Rollover of the Urban Development Financing Grant : metro trading services component

The normal rules regarding rollovers will apply to the incentive grant. Essentially the Budget allocated during the National MTEF and reflected in the annual Division of Revenue Bill will make provision that the cash flows be synchronised to achievements in line with the Annexure A3: Performance Improvement Action Plan (A3: PIAP).

Municipalities must submit all rollover applications and queries related to the conditional grants to Rolloverapplication@treasury.gov.za.

3. Revenue Management

3.1. Prioritise funding the Electricity Revenue Protection Program

Past years' increasing electricity tariffs continue to strain consumers' ability to afford this service. Municipalities as a result are at higher risk of non-technical losses particularly related to theft and illegal by-passing. Many municipalities do not have dedicated Revenue Protection staff in place or have reduced their operational funding for Revenue Protection culminating in an overall reduced collection and related strain on cash flow and the ability to pay creditors. Municipalities are advised to prioritise the following Revenue Protection measures in the 2025/26 and future MTREFs:

- A dedicated Revenue Protection Unit for Electricity administered by the senior manager responsible for the municipal Electricity Infrastructure Directorate taking into consideration the recommendations and standards the recommendations and standards set-out in NRS055 (Code of Practice for Revenue Protection);
- Allocating adequate funds in the budget to fund the municipality's Electricity Revenue Protection Unit's operational needs;
- In allocating funding, the business threat of increasing non-technical losses to the municipality's particular specifics must be considered to achieve a balance, while ensuring the Revenue Protection staff organogram and operational program is adequately funded and able to fulfil its role; and
- The municipality to demonstrate in its MTREF submission that a percentage of the revenue from the Energy function is ring-fenced to fund the municipal Revenue Protection Program operational need(s) towards developing the program to fruition.

3.2. Revenue Management Assessment Tool

Every municipality, in anticipation of the annual budget process and the review of critical revenue management related policies should assess and review its revenue management value chain to identify any gaps, duplications and / or inefficiencies for alignment with the approved organogram and related delegations. Refer to MFMA Budget Circular No. 126 (Annexure B: Submission checklist: Revenue Management Documents) and MFMA Budget Circular No. 128 (Item 7.3 contained in Annexure A). The municipality must submit its review to the National Treasury in the format of the Municipal Revenue Management Assessment Tool – to be uploaded to the National Treasury GoMuni upload portal annually as part of the Revenue Management Documents that are required.

The Revenue Assessment Tool was developed through the collaboration of the National Treasury, the Department of Cooperative Governance (DCoG) and SALGA. The initiative created the opportunity for stakeholders to acknowledge the fragmented and diverse nature of support provided to municipalities in this area often resulting in duplicated efforts and little

systemic change across municipalities and the need for a Single Integrated Revenue Management Framework (SIRMF).

The SIRMF is a national framework for revenue management that guides and outlines the intervention and leadership role both municipalities and oversight bodies should play in addressing challenges relating to the revenue management value chain and ultimately financial sustainability. The SIRMF emphasises the significant role of National and Provincial Government in supporting municipalities in the process of revenue management improvement and how the relevant departments will coordinate their support and their monitoring and evaluation role(s).

The SIRMF was designed on the existing statutory framework, with an emphasis on compliance. Within the scope of related tasks and responsibilities, the SIRMF provides direction on how municipalities may enhance revenue management as a major approach for increasing the municipality's viability and sustainability. Completing the Municipal Revenue Assessment Tool can assist the municipal council, senior management team and oversight bodies to assess, understand and improve critical revenue management practices of the municipality.

The tool provides an indication of gaps, flaws, duplications, inefficiencies and risks in the existing revenue value chain that could compromise or affect whether the revenue component of the budget sufficiently caters for long-term planning and is credible and funded. It further provides a comprehensive overview of current revenue management processes by identifying strengths, weaknesses, and areas that need improvement. The tool focuses on eighteen (18) critical areas within the revenue management value chain and helps pinpoint specific areas for optimising revenue collection processes.

National Treasury is in the process of institutionalising and implementing the tool, this includes conducting training throughout provinces.

The tool is comprehensive and must be completed by all municipalities during the 2025/26 MTREF with a thorough review of the revenue value chain, thereafter this exercise will only be necessary in every alternate year. However, municipalities with revenue collection rates below 85 per cent and all municipalities participating in Debt Relief must annually undertake this exercise until they achieve an average annual collection of 95 per cent as outlined in MFMA Circular No. 71.

The tool was already rolled out during the 2024/25 financial year and the National Treasury provided training. The Municipal Revenue Assessment Tool is attached as **Annexure A** of this Circular.

3.3. Cost Reflective Tariff Tool

As part of the budget process, the municipality must annually undertake an assessment to determine if the intended / implemented tariffs are cost reflective, whether all critical cost components were considered in the tariff calculation(s), whether the Local Government Equitable Share component relating to basic services were allocated to the actual service(s) and to demonstrate that the Revenue Component of the budget is credible and funded; etc. To facilitate this exercise, the municipality must complete and submit this calculation(s) / tariff assessment in the format of the National Treasury Tariff Tool as part of its tabled, adopted and adjustment MTREF submissions to the National Treasury GoMuni portal. The Cost Reflective Tariff Tool outcomes must also be reported to and approved by Council as part of the respective tabled and adopted MTREF submissions.

If the Tariff Tool indicates significant tariff shortfalls, any major tariff increases should be phased-in over two to three years and can be approved for the outer years (2026/27, 2027/28 and 2028/29). Thus, the indicative tariffs can be phased in over a period of three years.

The latest format of the National Treasury Tariff Tool that must be used and submitted is attached as **Annexure B** of this circular.

3.4. Electricity Tariffs

Cost of Supply Study (COS) for electricity tariff applications

On 20 October 2022, the Nelson Mandela Bay Chamber of Business issued a ruling outlining the requirements that municipalities must comply with when determining tariffs. The ruling found NERSA's Guideline and Benchmark method for approving municipal electricity tariffs unlawful and invalid. The court ordered that all electricity tariff applications from 2024/25 Financial Year, should be supported by a Cost of Supply (COS) study. Municipalities are reminded of the critical importance of complying with the court order, failing which, municipalities would be in breach of the court order and in contempt of court. The need for conducting a COS timeously and adhering to the timelines set by NERSA for the submission of applications is imperative as these cannot be approved by NERSA without the COS.

NERSA has indicated that it will be able to process and decide on municipal tariff applications based on Cost of Supply (COS) studies for the financial year 2025/26 by the end of June 2025 for the implementation in the new Financial Year. However, the Minister of Finance will engage NERSA to conclude this process sooner, to allow municipalities sufficient time to take account of the approved tariffs in the finalisation of their budgets. Tariff applications will not be considered unless they are supported by a Cost of Supply study. NERSA has indicated that the approval of Eskom's Retail Tariff Plan (RTP) and Eskom's Retail Tariff Structural Adjustment (ERTSA) for FY2025/26 is anticipated prior to 15 March 2025. Following the ERTSA decision, municipalities will be informed of the outcome to assist them in formulating their individual tariffs, which will then be approved for implementation in FY2025/26.

From the 2025/26 MTREF, municipalities will be required to submit the following documents pertaining to electricity tariff applications to the GoMuni Upload portal:

- NERSA D Form and COS study submitted to NERSA. For the 2025/26 tariff increase, municipalities with the tabled budget and thereafter 31 October 2025 (i.e. applications pertaining to 2026/27 tariff increases and beyond); and
- NERSA tariff approval with the tabled budget.

3.5. Municipal Valuation Roll Reconciliation Tool

Reference is made to MFMA Circulars No. 93 (paragraph 3), No. 98 (paragraph 4.1), No. 123 (paragraph 5.1), and particularly No. 126, (paragraph 3.1). To ensure the municipality's rates base is complete, and aligns to the business process and system requirements articulated in Annexure B of MFMA Circular No. 80 (08 March 2016) and the Municipal Property Rates Act (MPRA) (section 23): Part A: Register of the latest consolidated general valuation roll (GVR), and the MPRA categories, the municipality need to monthly perform the reconciliation in the format of the National Treasury Municipal Valuation Roll Reconciliation Tool.

The municipality must submit the completed tool together with the related documentation to the National Treasury GoMuni portal as follows:	**Timeframe**
1. The municipality's list of Property Rates tariffs approved by council for the financial year reported on together with the Council resolution that approved such.	Annually

2.	The municipality's time schedule for implementing its new general valuation roll (GVR) (aligned to the MPRA).	Annually
3.	The Municipal Property Rates Act (MPRA) (section 23): Part A Register of the latest consolidated general valuation roll (GVR).	Annually
4.	Municipality Valuation Roll Reconciliation – undertake monthly but only required to submit quarterly.	Quarterly
5.	Property Rates Transaction List (for the 3rd month of every quarter).	Quarterly

To assist municipalities in complying with these requirements, the National Treasury will provide follow-up training.

3.6. Prohibition on vending system(s) / third party vending solutions without consulting the National Treasury

Recently there have been several iterations on private service offerings of vending system(s) / solution(s) offered to municipalities. These include service provider(s) funding metering solutions for municipalities parallel to a pre-paid solution (requiring a vending platform) – these service providers then collect on behalf of the municipality in exchange for a fee. However, in several cases, the service provider does not pay over to the municipality what is collected and / or claim a fee that is out of proportion to what is reasonable. This is worsened by many municipalities not weekly / monthly undertaking the appropriate reconciliation of what they provide / sell (also via pre-paid) against what revenue they receive in return from the service provider(s). *As an Example*: Most recently a municipality in Eastern Cape was victim to an arrangement where the service provider offered the municipality R60 million funding but will takeaway almost R540 million at the end of the arrangement causing significant harm to the community and official(s) of that municipality and may leave the municipality worse off than initially.

The MFMA, read together with the recently assented Public Procurement Act, provide a clear framework for procurement in local government. The MFMA regulatory framework in terms of section 116 read with MFMA Circular No. 62 furthermore provide clear guidance on how amendments to contracts should be undertaken. Any offerings beyond the initial scope of the contract, in our view, should not be considered as a contract amendment, but rather a change or extension of scope, which warrants a whole new or separate procurement process.

The National Treasury therefore confirms that with immediate effect, no municipality may enter into and / or extend any related vending system(s) / solution(s) without consulting and obtaining the written input of the National Treasury and the relevant Provincial Treasury. Should any municipal official and / or political office bearer fail to honour this prohibition, she/ he could render themselves personally liable for any related financial loss over and above potential criminal liability for financial misconduct.

In addition, third party vending solutions used by municipalities must align to the integration requirements set out in Annexure B of MFMA Circular No. 80 (08 March 2016). In terms of the requirements, third party solutions must, without (manual) intervention or manipulation, integrate and constantly balance with the core financial system solution. The rules for integration are determined by vendor of the core system solution. Where the core system solution already provides the necessary functionality offered by the third-party vendor and the municipality has already paid for the functionality and / or are paying annual licencing fees to access this functionality, such expenditure will constitute wasteful and fruitless expenditure and should be dealt worth accordingly.

The municipality should send any request for the written input of the National Treasury together with the signed and / or proposed contract for such a service offering to: both RevenueManagement@treasury.gov.za and mfma@treasury.gov.za for the attention of Mr. Sadesh Ramjathan, Director: Local Government Budget Analysis: Revenue Section, and Mr. Wayne McComans, Chief Director: MFMA Implementation and parallel to the relevant Provincial Treasury.

3.7. Training Tools by the National Treasury

Revenue Management Assessment Tool

Municipalities must submit the Revenue Management Assessment Tool annually as set-out above. Training was already undertaken across all provinces during the 2024/25 financial year. The National Treasury will facilitate follow-up training during 2025/26 upon request only to municipalities, provincial treasuries and technical advisors deployed to municipalities and provincial treasuries. Municipalities and provincial treasuries can request training via the relevant Provincial Treasury who is responsible to coordinate requests for training. It is noted that any National Treasury deployed technical advisor may directly request training from the National Treasury as may be required. Requests for training and any related queries must be directed to RevenueManagement@treasury.gov.za and Sadesh.ramjathan@treasury.gov.za for the attention of Mr. Sadesh Ramjathan.

Tariff Tool

Municipalities must undertake a tariff assessment in the format of the National Treasury Tariff Tool as explained above. The National Treasury will facilitate follow-up training during the first quarter of the financial year 2025 and thereafter upon request only to municipalities, provincial treasuries and technical advisors deployed to municipalities and provincial treasuries. Training must be scheduled for a **full day** and would be more relevant towards municipal processes if scheduled:

- Before and/ or during the **Adjustments Budget preparation** (for re-allocations);
- Before and/ or during the **Tabled Budget process** (to evaluate tariff changes); or
- Before the **final MTREF submission** to Council for approval.

Municipalities and provincial treasuries can request training via the relevant Provincial Treasury. Any National Treasury deployed technical advisor may directly request training as may be directed to National Treasury as may be required. Requests for training and any related queries must be directed to RevenueManagement@treasury.gov.za and Sadesh.ramjathan@treasury.gov.za for the attention of Mr. Sadesh Ramjathan.

Municipal Valuation Roll Reconciliation Tool

The National Treasury confirms the guidance already provided in MFMA Circular No. 129 to the effect that municipalities must reconcile valuation rolls monthly and submit such quarterly to the National Treasury together with the related documentation set-out above.

The National Treasury will facilitate follow-up training during the first quarter of the financial year and thereafter upon request only to municipalities, provincial treasuries and technical advisors deployed to municipalities and provincial treasuries on Municipal Valuation Roll Reconciliation Tool. Training must be scheduled for at least **two full days** and can be facilitated at any time since municipalities perform this task monthly. Municipalities and provincial treasuries can request training via the relevant Provincial Treasury. Any National Treasury deployed technical

advisor may directly request training as may be required. Requests for training and any related queries must be directed to RevenueManagement@treasury.gov.za and Sadesh.ramjathan@treasury.gov.za for the attention of Mr. Sadesh Ramjathan.

4. Budget and other management issues:

4.1. 2025/26 Municipal Budget Tabling Timelines

The National Treasury would like to advise the municipalities that late tabling of the 2025 National Budget in Parliament does not really affect the timelines of the preparations/ conclusion of the municipal budget process. The 2025 National Budget was tabled by the Minister of Finance on 12 March 2025 which implies that Provincial Governments have two weeks thereafter to table the 2025 Provincial Budgets in the Provincial Legislatures, i.e. 31 March 2025. This is in line with the PFMA – Treasury Regulations. Municipalities have sufficient time to accommodate the allocations in the DOR Bill in their 2025/26 MTREF Budgets before tabling on 31 March 2025, that is 19 days or two weeks to table the budget before 31 March 2025.

The transfers from provinces to municipalities which are supposed to be included in provincial budgets and gazetted by provinces, should for all practical reasons also be available on the 27 March 2025. Given that municipalities have 10 months to prepare their upcoming budgets prior to tabling it in Council for consideration, National Treasury has previously advised municipalities to use the outer years of the Annual DoRA as projections, add inflation to calculate the third year of the MTREF, when finalising the tabled budget.

For those municipalities where the budgets were already in an advance stage of preparations, they will have between tabling and the adoption stage of the budget (end of May 2025) to include and accommodate all the transfers for both national and provincial governments. This will allow National and Provincial Treasuries to verify and reconcile the transfers with the DoR Bill and provincial Gazettes.

4.2. Management of Water Tankers

There is a growing trend of water challenges in most municipalities in the country which is spiraling out of control. This is a direct threat to municipalities' financial sustainability and could lead to a lack of trading in this key source of municipal revenue.

Most municipalities have tried to procure water tankers to close the gap in areas which are increasingly experiencing sporadic water supply challenges. As a result, the municipalities are not able to trade, leading to less revenue and an unprofitable water business.

It has emerged in the recent Mid-year Budget and Performance Review engagements that contracted water tankers have developed as a business rather than a stop gap measure.

As such, municipalities are encouraged to protect their revenue through avoiding protracted long contracts of water tankers. Where possible the municipality should use its internal water tankers as a temporary measure with a clear intention to restore the service.

If the municipality provides a long-term service, such as water for informal settlements, it is advised that tanks should be purchased and refilled with municipal water tankers. The aim should always be to strike a balance between the provision of service and protecting municipal revenue. Proper checks and balances must be considered as well as internal controls to avoid abuse in this regard and to ensure that in the event that the Office of the Auditor General Africa of South investigates these services, the use of water tankers and water tanks is based on sound business principles.

4.3. Asset Management

According to Municipal Budget and Reporting Regulations (Table A9), the municipalities were advised to allocate 60 per cent of the total Capital Expenditure budget to new acquisition while the remaining 40 per cent to renewal and upgrading of the new assets.

Given the current challenges of aging and dilapidated infrastructure faced by the municipalities, which contributes to high level of losses, municipalities are advised **to allocate at least 60 per cent** of the capital expenditure to renewal/ upgrading of the existing assets while 40 per cent should acquire new assets.

The National Treasury realised that year-on-year, municipalities priorities the acquisition of new assets and the existing assets are being neglected to a dilapidated condition. Another factor which causes a factor is lack of maintenance during the lifespan of the assets which National Treasury encourages the municipalities to allocate at least 8 per cent towards repairs and maintenance as outlined in MFMA Circulars No. 55 and 71.

5. Municipal Standard Chart of Accounts (*m*SCOA):

5.1. Go Live on Version 6.9 of the Chart

*m*SCOA version 6.9 will go live on 24 March 2025, whereafter municipalities will be able to upload their tabled budget (TABB) and tabled project files (PRTA) data strings for the 2025/26 MTREF on the GoMuni portal.

After going live on version 6.9 of the chart, all the reports available on the LGDRS will be aligned to *m*SCOA chart version 6.9. This includes the format of the Section 71 report for Q3 and Q4 of 2024/25 and the adjustments budget for 2024/25.

The Municipal Budget and Reporting Regulations (MBRR) Schedules (A to F) and non-financial data string (A1S) was also aligned to version 6.9 of the chart. A **protected** version of the MBRR Schedules for version 6.9 of the chart and A1 Schedule is available on the on the MFMA Webpage on the link below:

http://mfma.treasury.gov.za/RegulationsandGazettes/Municipal%20Budget%20and%20Reporting%20Regulations/Pages/default.aspx

The reports on the Local Government and Reporting System (LGDRS) are populated from financial and non-financial data strings and both strings are required for the data to pull through correctly on the reports available on the LGDRS. Municipalities must use the linkages on GoMuni referred to above and not the formulas in the regulated Municipal Budget and Reporting (MBRR) Schedules when generating their A schedule from the financial system.

In terms of the *m*SCOA Regulations, municipalities must generate the regulated MBRR schedules that is tabled and adopted by Council directly from their integrated financial system solutions and not import or captured it on their system solutions at a later stage. This is necessary to ensure that there is 'one version of the truth', namely the data in the integrated financial system solutions is the same as the report tabled and adopted by Council and the information submitted to the National Treasury and other stakeholders.

5.2. mSCOA data strings credibility

Municipalities must verify the credibility and accuracy of the tabled budget (TABB) and project file (PRTA) data strings **prior and post** to uploading it to the National Treasury Local Government Database and Reporting System (LGDRS). These data strings will be the sole source used by National and Provincial Treasuries to analyse and determine if the municipality's budget is funded, and the credibility is therefore of utmost importance.

Registered users from municipalities, provincial treasuries and National Treasury have full access to their data on the LGDRS and can draw the information to verify the accuracy of the figures for their respective municipalities or province (in the case of provincial treasuries). The LGDRS reports can be accessed by registered users on the following link:

https://lg.treasury.gov.za/ibi_apps/signin

5.3. Submission of virement information

From the 2025/26 MTREF, municipalities will be required to report on their virements through the submission of a separate data string, as well as a report on virements done by the municipality. This submission must be done monthly to the GoMuni Upload Portal and should be generated from the core financial system. The validation rules applicable to the monthly IYM submission will also be applied to the virement data strings.

The attached **Annexure D** provides guidance on the layout and information required on the virement budget report, while **Annexure E** provides the layout of the virement data strings.

This will enable national and provincial treasuries to keep track of the virements done when they do their Section 71 analysis. The virements will be reflected in a separate report and will not form part of the consolidated Section 71(7) reporting to provincial legislatures or the consolidated Section 71 publication issued by the National Treasury. For the consolidated S71 reporting and publication, performance will only be compared to the adopted budget in the first eight months of the year and the adjustments budget in the last four months of the year.

Municipalities must review their virement policy annually and ensure that it aligns with the principles and guidance in MFMA Circulars No 12, 51 and 88 and *m*SCOA Circular No. 8 (29 April 2020). Virements may only be made between existing budget provisions and must be included in an adjustments budget. The Council approved virement policy must be submitted as part of the budget documents on Go Muni. Please note that documents must be submitted individually and not as a batch.

5.4. Medium-Term Development Plan (MTDP)

Cabinet has recently approved the Medium-Term Development Plan (MTDP) for 2024 to 2029. The Department of Planning, Monitoring and Evaluation (DPME) will issue the MTDP in due course. These revised priorities, reflecting the new administration's vision, will be integrated into *m*SCOA version 6.10. For *m*SCOA budgeting and reporting in the 2025/26 MTREF, municipalities should continue using the IUDF and MTSF priorities as per *m*SCOA version 6.9.

5.5. Upgrading and procurement of *m*SCOA system solutions and/or functionality

From March 2023, the National Treasury has alerted municipalities that the minimum business processes and system specifications for *m*SCOA will be regulated and that municipalities should exercise extreme caution when changing or upgrading their integrated financial system solutions to avoid procuring system functionality that might not comply with the said regulations. Municipalities are reminded to implement the due diligence processes set out in MFMA Budget Circulars No. 93, 98, 107, 112, 123 and *m*SCOA Circulars No. 5 and 6 **prior** to procuring new or upgrading system functionality to protect them from making incorrect decisions in this regard.

This also applies when 3rd party system functionality is procured that is required to integrate with the core system solution.

Importantly, if an open tender process is not followed (e.g. when Section 33 or 116 of the MFMA and SCM Regulations 36 (deviations) are utilised), **the market must be tested prior to embarking on procurement**. The municipality must be able to substantiate that the product, service or similar offering is not available elsewhere in the market at a cheaper cost and that using these procurement vehicles have significant economic or financial value benefits to the municipality. Where legislation requires that the views of the National Treasury must be sought, the relevant documentation must be emailed to mfma@treasury.gov.za. If the processes required in term of legislative are not followed, a contract might be found invalid by a court of law.

5.6. Issues pertaining to the regulations on the minimum *m*SCOA requirements

National Treasury is currently in the process of developing business processes, standard operating procedures (SOPs) and minimum system specifications to underpin the Regulations of the minimum business processes and system specifications for *m*SCOA.

All the required business processes, procedures and systems functionality pertaining to the Regulations will be made available to municipalities **at no cost** in a format that can be imported, customised and utilised in a process modelling tool of their choice. Municipalities are cautioned against incurring unnecessary expenditure to procure specialised software and tools or appoint service providers to adapt and customize their business processes, especially as the requirements have not been finalised yet.

It must further be emphasized that the documents released for comments on the MFMA Webpage are the sole property of the National Treasury and may only be used for the intended purpose of providing comments on the proposals. **Any company that sells or distributes these documents or parts thereof for any other purposes without the explicit written permission of the National Treasury will be blacklisted on the basis of Intellectual Property Violations (i.e. unauthorized distribution of government documents)**.

It should also be noted that the intention of the recent demonstrations on the systems used by municipalities that was conducted by the National Treasury was to determine key implementation gaps as per MFMA Circular No. 80 (dated 08 March 2016). These gaps must be addressed by the respective municipalities in their *m*SCOA municipal road maps. National Treasury shared the observations with system vendors with a view that gaps in system functionality should be further explored and addressed by them. The demonstrations were not on any specific systems in the market but on modules used by a specific municipality to give effect to the requirements of MFMA Circular No 80. **It will therefore be unacceptable and a misrepresentation for any system vendor to claim that their respective system was found compliant by the National Treasury**.

5.7. Special adjustments budget to authorise unauthorised expenditure

In terms of regulation 23(6)(b) of the MBRR, council may authorise unauthorised expenditure in a special adjustments budget tabled in council when the mayor tables the annual report in terms of section 127(2) of the MFMA. This special adjustments budget **may only deal with unauthorised expenditure from the previous financial year which the council is being requested to authorise in terms of section 32(2)(a)(i) of the MFMA**. This process may not be used to condone poor planning, budgeting, or financial management after the adoption of the budget.

Detailed guidance in this regard was provided in MFMA Circular No. 68 (dated 13 October 2021).

Further development work with regard to this matter will be undertaken during 2025 and proper guidance will be provided in subsequent MFMA Budget Circulars. For now, municipality should continue with the current practices until further notice. Under no circumstances should municipalities require their systems vendors to open their financial systems especially where the Auditor General of South Africa have already signed off on their annual audited financial statements.

Municipalities are also reminded of the guidance provided in our email dated 21 August 2024 on the *Submission of the 2023/24 Annual Financial Statements (AFS) – (Pre-Audit Information)* and *m*SCOA Circular No. 15 (08 July 2024) on the period closures controls for the following periods.

- **Month 12**: The financial year ends in month 12 (as at 30 June of the financial year). Month 12 (4th Quarter section 71 reports) represents the **preliminary outcome** information. The closing balances of month 12 must be programmatically transferred in the core financial system to the opening balances of the new financial year in month 01 of the new reporting period;
- **Period 13** when the AFS are prepared during July and August annually. Period 13 represents the **pre-audit outcome** information (the AFS as submitted to the AG;
- **Period 14** represents the **audit outcome** information (the AFS on which the AGSA has expressed an opinion. Audit approved journals must be processed in period 14; and
- **Period 15** when the adjustments to the AFS following the approval of the adjustments budget to authorise and legalise unauthorised expenditure referred to in Regulation 28(6) of the MBRR is effected.

The AFS submitted to AGSA must reconcile with the pre-audited (PAUD, CRPA and DBPA), audited (AUDA, CRAU, DBAU) and restated (RAUD) data strings submitted to the GoMuni Upload portal and these data strings must be submitted as end-results and NOT movements when submitting the *m*SCOA data strings. Importantly, any transactions that were processed as part of the preparation and auditing of the AFS after year-end (month 12) in period 13, 14 and 15 must be reflected in the corresponding month of the new financial year by using net movements. The net movements will result in either an increase or decrease in the new financial year in the corresponding month of month 01 to 03 of the current financial year. E.g. changes in period 13 must be reflected in month 02 or 03 of the new financial year. A similar process is applicable when restatements of previous financial year figures occur and when material errors are identified which impacts on the previous years' AFS and must be corrected in period 15.

With regards to year-end information, the aim is to collect three sets of information (preliminary, pre-audited and audited). This ensures that the latest outcome information is always available to inform planning and budget decision making process for national, provincial and local government.

6. Submitting documents to the GoMuni Upload Portal:

6.1. Submission of additional reports

In addition to the virement policies that must be uploaded to GoMuni Upload portal from 01 July 2025, the following changes pertaining to document submissions to the GoMuni Upload portal must be noted:

Uploading of Section 41 Reports on prices and payments for bulk resources

From the 2025/26 MTREF, the Department of Water and Sanitation, Eskom, and Water Boards will be required to upload their monthly Section 41 reports on the GoMuni Upload portal to enhance transparency and oversight. This will replace the current email submission process. Training on the upload procedure will be provided to all relevant stakeholders to ensure a smooth transition.

Municipal Procurement Plans

MFMA Circulars No. 62 (dated 20 August 2012) and 94 (dated 08 March 2019) requested for the submission of annual municipal procurement plans. From the 2025/26 MTREF, municipalities will be required to upload their annual procurements plans in PDF format on the GoMuni Upload portal. These plans should encompass comprehensive information on planned procurements, estimated costs, and the proposed procurement strategies. Both draft and final procurement plans should be submitted with the annual tabled and adopted budget documentation.

Revenue related and debt relief documentation

All municipalities are required to annually upload the Revenue Management related documents as per the Document Submission Checklist attached as **Annexure C** to the GoMuni Upload Portal. These documents must be submitted in the specified format and within the timeframes indicated. Also note that items 15 and 17 in **Annexure C** are only relevant to Municipal (Eskom) Debt Relief participants and item 19 to both Municipal (Eskom) and Water Debt Relief participants. In relation to items 15, 17 and 19, all other municipalities must submit a "Not Applicable" form to prevent these items reflecting as outstanding.

6.2. Submission and sign-off of key tabling dates

In the past, the National Treasury requested information on an annual basis from municipalities on the actual tabling dates of legislated processes such as the various budget processes, AFS and Annual Report. This information was submitted through an excel spreadsheet. From 01 July 2025, municipalities will be required to enter the legislative tabling dates directly on the GoMuni portal, replacing the manual spreadsheet process.

Additionally, the Accounting Officer of each municipality will be required to sign-off on the accuracy of the captured dates on the LGDRS.

Further guidance on the submission and sign-off procedures will be provided in due course.

7. The Municipal Budget and Reporting Regulations:

7.1. Assistance with the compilation of budgets

If municipalities require advice with the compilation of their respective budgets, specifically the budget documents or Schedule A, they should direct their enquiries to their respective provincial treasuries or to the following National Treasury officials:

1. EXECUTIVE SUMMARY

This is a report on the Long-Term Financial Plan of Stellenbosch Local Municipality and details the methodology undertaken, key assumptions utilised and financial overview from 2026 to 2035. The report outlines in detail the revenue, expenditure, and cash flow forecasts as well as detailed analysis and recommendations

Key projections include:

- Exchange Revenue Growth: Exchange revenue is projected to increase from R1,860 million in 2026 to R3,078 million by 2035.
- Service Charges Trends: Service charges for electricity, water, waste water management, and waste management show consistent growth, with electricity charges expected to rise from R1,217 million in 2026 to R2,103 million in 2035.
- Operational Revenue Increase: Operational revenue is forecasted to grow from R59 million in 2026 to R88 million by 2035.
- Total Revenue Forecast: Total revenue (excluding capital transfers) is projected to grow from R2,861 million in 2026 to R4,642 million by 2035.
- Expenditure Trends: Total expenditure is expected to rise from R2,713 million in 2026 to R4,490 million in 2035, with employee-related costs being a significant contributor.
- Surplus/Deficit Estimates: The surplus/deficit is projected to fluctuate, starting at R148 million in 2026 and reaching R152 million by 2035.
- Cash Flow Analysis: Cash receipts are projected to increase from R3,211 million in 2026 to R4,501 million by 2035, while cash payments will also rise, indicating a growing financial footprint.
- Funding Mix Overview: The funding mix shows a reliance on internally generated funds, transfers, and borrowing, with capital transfers constituting a significant portion of the funding.

The document outlines several key risks that Stellenbosch Local Municipality needs to manage to ensure long-term sustainability:

1. **Revenue Collection**: The municipality must maintain the collection rates for property rates, service charges, and other revenues. Any decline in collection rates could significantly impact the municipality's financial health.
2. **Expenditure Management**: Controlling contracted services costs and other significant expenditure items is crucial. Rising costs without corresponding revenue increases could lead to budget deficits.
3. **Economic Factors**: External economic factors such as inflation, interest rates, and economic growth can impact the municipality's financial projections. The municipality needs to be prepared for economic fluctuations.
4. **Infrastructure Investment and Maintenance**: Investing is catalytic projects to grow the Municipality’s economic base is critical for long term growth and sustainability. Projects should be prioritised based on service requirements and anticipated returns. In addition, proper maintenance and upgrading of infrastructure are necessary to avoid costly repairs and ensure the continued provision of services. Sustained investment in infrastructure is vital to preserving asset value, supporting future development, and promoting inclusive economic growth.

By closely monitoring and managing these risks, Stellenbosch Local Municipality can work towards achieving long-term financial sustainability.

2. INTRODUCTION

Akhile Management and Consulting (Pty) Ltd was appointed to conduct an independent report of the long-term financial plan (LTFP) for Stellenbosch Local Municipality (SLM or Municipality) for the ten (10) year period up until 30 June 2035.

This report is the final report on the LTFP and presents a financial overview, detailing revenue, expenditure, and cash flow forecasts from 2026 to 2035 as well as detailed analysis and recommendations.

The report covers in detail the methodology undertaken, the assumptions made in preparing the financial model, the model outcomes, a detailed ratio analysis and recommendations for consideration by Stellenbosch Local Municipality.

3. METHODOLOGY

The development of the independent ten-year Long-Term Financial Plan (LTFP) for the Stellenbosch Local Municipality (SLM), covering the period ending 30 June 2035, followed a structured methodology based on collaboration, advanced tools, and proven processes.

The process commenced with a detailed analysis of SLM's unique financial context, strategic objectives, and operational requirements. This analysis informed the application of the primary tool: the Municipal Sustainability Tool (MST™) LTFP Module provided by Akhile.

The MST™ LTFP Module was utilised to structure and process historical financial data and generate the long-term forecast. This involved:

- **Integrating Historical Data**: Incorporating audited financial results for the 2021/22 to 2023/24 financial years and actual results for the 2024/25 current financial year (up to Period 9). Budgeted figures were used for the remainder of the 2024/25 financial year (Periods 10 to 12).
- **Constructing the 10-Year Projection**: The projection comprises the Municipality's approved 3-year Medium-Term Revenue and Expenditure Framework (MTREF) budget (covering 2025/26 to 2027/28) followed by a 7-year forecast (2028/29 to 2034/35) generated by the MST™ LTFP module.

The tool's capability to integrate standardized *m*SCOA (Municipal Standard Chart of Accounts) data with SLM-specific, customisable assumptions was leveraged. This framework facilitated robust, long-term financial modelling without requiring constant underlying model rebuilds.

Throughout the project, open communication and collaborative workshops were maintained with SLM stakeholders. This process benefited from our established partnership and prior experience applying the MST™ LTFP Module in developing components of SLM's Capital Expenditure Framework (CEF), specifically Chapters 6 and 7.

This combination of detailed analysis, stakeholder engagement, and the application of the specialised MST™ LTFP Module ensured the delivery of a comprehensive and actionable LTFP aligned with the Municipality's strategic vision.

4. ASSUMPTIONS

Description	2029	2030	2031	2032	2033	2034	2035	Motivation
CPI Headline (%)	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	Midpoint of the South African Reserve Bank's inflation target range (3%-6%).
Household Growth Rate (%)	1.125%	1.125%	1.125%	1.125%	1.125%	1.125%	1.125%	Stellenbosch population annual growth rate between 2011 and 2022 has been reported as 1.09% (STATSSA). Demand is increasing annually.
Interest Rate (%)	10.5%	10.5%	10.5%	10.5%	10.5%	10.5%	10.5%	Prime lending rate is currently 11% (9 May 2025). Interest rates are likely to come down and therefore 10.5% is used.
Employee Cost Escalation (%)	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	Inflation based adjustment as SLM has planned for market alignment in the MTREF period.
Bulk Water Escalation (%)	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	Aligned with the long-term headline CPI forecast assumption (4.5%)
Bulk Electricity Escalation (%)	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	Aligned with the long-term headline CPI forecast assumption (4.5%)
Depreciation Rate (%)	3.2%	3.2%	3.2%	3.2%	3.2%	3.2%	3.2%	Aligned with the historical average rate of depreciation.
Property Rates Escalation (%)	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	Aligned with the long-term headline CPI forecast assumption (4.5%)
Service Charges Escalation (%)	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	4.5%	Aligned with the long-term headline CPI forecast assumption (4.5%)
Collection Rate (%)	95%	95%	95%	95%	95%	95%	95%	Aligned with the National Treasury benchmark.

Description	2029	2030	2031	2032	2033	2034	2035	Motivation
Creditors Payment Days	30	30	30	30	30	30	30	Aligned with the National Treasury benchmark.
Capital Expenditure (R'Million)	500	500	500	500	500	500	500	Affordable capital expenditure.
Upgrade/Renewal (% of Total Capex)	48%	48%	48%	48%	48%	48%	48%	Aligned with historical average rate.
Funding – Borrowing (% of Total Capex)	20%	20%	20%	20%	20%	20%	20%	Affordable borrowings.
Funding - Transfers and Subsidies (% of Total Capex)	30%	30%	30%	30%	30%	30%	30%	Aligned with historical average rate.

Capital Expenditure/ Infrastructure Investment

Despite an initial short-term rise, the Capital Expenditure to Total Expenditure ratio for Stellenbosch Municipality reflects a gradual downward trend over the medium to long term. The ratio is projected to peak at 19.4% in 2026, followed by a steady decline to 10% by 2035 - remaining within the acceptable national norm of 10% to 20%.

This trajectory is not currently a cause for concern, as a conservative approach has been applied in projecting capital investment in the outer years. Importantly, SLM has ambitious infrastructure expansion plans underpinned by a realistic and achievable funding strategy over the next few years. These capital investments are critical to ensuring alignment with the Municipality's long-term strategic objectives, particularly in addressing growth, service delivery demands, and asset sustainability.

However, the declining trend should be carefully monitored to avoid underinvestment in critical infrastructure. Insufficient capital expenditure may compromise the quality, reliability, and availability of essential municipal services over time. Sustained investment in infrastructure is vital to preserving asset value, supporting future development, and promoting inclusive economic growth.

Impairment of Property

The impairment of property, plant, and equipment within Stellenbosch Municipality reflects consistently low values - ranging between -0.1% and 0% which indicates that municipal assets are generally well maintained and not subject to significant impairment losses. This is a positive indicator of effective asset management practices, proactive maintenance, and sound financial oversight. It also suggests that the Municipality is successfully preserving the economic value and operational capacity of its infrastructure assets, with minimal risk of unanticipated write-downs.

Maintaining such low levels of impairment supports long-term service delivery goals, reduces future replacement costs, and enhances the credibility of the Municipality's financial reporting.

Repairs and Maintenance as a % of Property

The Key Performance Indicator (KPI) for repairs and maintenance expenditure as a percentage of total asset value remains significantly below the National Treasury benchmark of 8%. In 2022, SLM recorded a low rate of approximately 1.1%, with a modest projected increase to 2.2% by 2028. Despite this upward trend, the allocation remains far below the recommended level, raising concerns about the long-term sustainability of municipal infrastructure.

SLM have established a repairs and maintenance target of 3% and the MTREF period reflects an increasing ratio to achieve this target. This is a positive sign that SLM are moving in the right direction.

It is important to note that insufficient investment in repairs and maintenance poses a substantial risk to the longevity and reliability of municipal assets. Underfunding in this area can accelerate asset deterioration, increase the frequency and cost of emergency repairs, and ultimately lead to premature asset replacement - placing unnecessary strain on future budgets and potentially compromising service delivery to residents.

It has been demonstrated that the National Treasury Norm is not realistic and other factors such as the age, usage and condition of assets should inform the repairs and maintenance plan. It is recommended that:

- SLM Establish a dedicated and adequately funded repairs and maintenance budget, aligned with the Municipality's approved Asset Management Plan and the condition assessments of critical infrastructure.
- Prioritise preventive maintenance strategies to extend the useful life of assets, enhance service reliability, and reduce long-term costs.
- Conduct comprehensive asset condition assessments to inform data-driven maintenance schedules and ensure that resource allocation is responsive to actual infrastructure needs.

Through these proactive actions Stellenbosch Municipality can strengthen its infrastructure resilience, improve service quality, and safeguard long-term financial sustainability.

6.1.1. Recommendations

It is recommended that SLM develop and implement a comprehensive, long-term Asset Management Plan that anticipates infrastructure lifecycles, service delivery targets, and fiscal constraints. The plan should prioritise infrastructure that underpins service delivery, economic development, and environmental sustainability, while ensuring that capital expenditure remains at levels that support long-term municipal resilience and growth.

The repairs and maintenance figure is understated by the remuneration component of internal technical teams undertaking repairs and maintenance of Municipal infrastructure. The Municipality should embark on an exercise to determine and incorporate the repairs and maintenance component of remuneration into the repairs and maintenance figure for reporting purposes which will further contribute to bringing this ratio closer to the SLM target and National Treasury Norm.

A stable, forward-looking approach to asset sustainability is essential to ensure the continued reliability, safety, and cost-effectiveness of municipal services across Stellenbosch.

6.1.2. Conclusion

The declining trend in the Capital Expenditure to Total Expenditure ratio - though within national norms, along with the historically low allocation for repairs and maintenance, signals the need for more proactive and balanced infrastructure investment. Similarly, the significant fluctuations in the asset sustainability ratio highlight gaps in long-term planning and execution, which may expose the Municipality to service delivery risks and future financial strain.

To ensure long-term resilience, service quality, and infrastructure sustainability, Stellenbosch Municipality must adopt a holistic and forward-looking asset management approach. By strengthening its asset management framework and aligning infrastructure investments with long-term

growth and service delivery priorities, Stellenbosch Municipality will be well-positioned to support sustainable development, protect public value, and maintain the confidence of its stakeholders and communities.

6.2. Liability Management

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Capital Cost (Interest Paid and Redemption) as a % of Total Operating Expenditure	percentage	6-8%	4	5.3	5.3	5.3	5.2	5.7	6.3	6.3	6.4	6.6	6.7	6.8	6.9	7
Debt (Total Borrowings) / Revenue	percentage	<= 45%	25	23.9	24.8	22.4	29.3	26.2	20.2	19.5	18.5	17.5	16.3	14.9	13.4	11.8
Solvency Ratio (Net Income + Depreciation) / All Liabilities	percentage	>= 20%	26	27.4	23.7	44.2	22.3	25.8	33.1	30.1	30.4	31	31.8	32.8	34.2	35.8

Over the next decade, Stellenbosch Municipality is projected to maintain a prudent and strategically sound liability management position. Key indicators point to improving financial sustainability, though certain trends warrant close monitoring to safeguard long-term service delivery capacity and fiscal resilience.

Capital Costs (Interest and Redemption) as a % of Total Operating Expenditure

The capital cost ratio is projected to rise gradually from 4% in 2022 to approximately 7% by 2035. This remains within the National Treasury's acceptable norm of 6-8%, indicating that the municipality is currently managing its debt servicing obligations within safe limits.

While the increase is manageable, the upward trend suggests a growing proportion of operational resources being allocated to debt servicing. Without appropriate controls, this may eventually place pressure on operational budgets, limiting the Municipality's flexibility to fund essential services and developmental priorities.

Debt-to-Revenue Ratio (Total Borrowings / Revenue)

This ratio reflects a strong downward trajectory from 25% in 2022 to a projected 11.8% by 2035. The improvement illustrates enhanced revenue-generating capacity relative to outstanding debt, signalling robust financial discipline and growing fiscal space.

As the Municipality reduces its reliance on borrowing, it simultaneously strengthens its ability to invest in infrastructure and service delivery from own revenue sources. This reduction in debt burden enhances overall creditworthiness and positions SLM favourably for future investment opportunities.

Solvency Ratio ((Net Income + Depreciation) / Total Liabilities)

The solvency ratio shows marked improvement from 26% in 2022 to 36% by 2035 indicating that Stellenbosch Municipality is steadily increasing its capacity to meet long-term obligations using internal resources. A rising solvency ratio reflects stronger financial stability and responsible asset and liability management. This trajectory improves confidence among investors, oversight bodies, and the broader public, and supports a sustainable growth path for municipal operations.

6.2.1. Recommendations for Strengthened Liability Management

SLM may consider refinancing existing loans at lower interest rates to reduce debt service cost and enhancing and broadening the revenue base through alternative revenue streams. It is also imperative that SLM control capital and operating costs through the introduction of cost efficiency measures and closely monitor expenditure against budget for timely corrective action.

6.2.2. Conclusion

The trends paint a largely positive picture of Stellenbosch Municipality's liability management efforts. Reduced debt-to-revenue levels signal greater resilience during economic shocks and a stronger ability to self-fund capital initiatives. While capital costs are rising, the Municipality remains

within normative thresholds. The steady rise in the solvency ratio strengthens long-term financial sustainability and increases the Municipality's capacity to meet strategic objectives.

Stellenbosch Municipality's liability management trends reflect a disciplined and forward-looking approach to financial governance. With decreasing reliance on debt, rising solvency, and manageable capital costs, the Municipality is on a positive trajectory. However, sustained fiscal health will depend on proactive planning, strategic investment in asset maintenance, and community-aligned budgeting. By continuing to refine its financial strategies, Stellenbosch can safeguard long-term sustainability while meeting the evolving needs of its communities.

6.3. Debtors Management

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Collection Rate	percentage	>= 95%		94.2	95	106	95	95	95	95	95	95	95	95	95	95
Net Debtors Days	value	<= 30 days	46.5	47	50	27.2	34.6	34.3	32.7	34.2	35.7	37.1	38.4	39.7	41	42.1

Collection Rate

Stellenbosch Municipality reported strong collections rates meeting the National treasury targets.

The model was based on a conservative view that collections will be at least 95%. It is imperative that SLM undertake collection strategies to ensure that the high levels of collection are maintained to avoid strained cash flow, affecting the Municipality's ability to meet its short-term operational and long-term service delivery commitments.

Net Debtor Days

The Municipality's net debtor days have increased from **46.5 days in 2022 to 50 days in 2024**, well above the National Treasury's benchmark of **≤30 days**. As indicated above the model was based on a conservative view that collections will be at least 95%. The projected trend suggests that the collection cycle has strengthened, highlighting a growing efficiency in converting billed revenue into actual cash which will need to be closely monitored. Extended collection periods lock up working capital, delay cash inflows, and increase the risk of non-payment. Over time, this undermines liquidity, constrains budget execution, and could result in reduced service delivery capacity or increased borrowing needs.

This would put pressure on Service Delivery and Budgets and the Municipality's ability to meet its operational and developmental obligations, with possible negative consequences for service quality and capital investment.

6.3.1. Recommendations for Improvement

As mentioned above, a conservative view was taken in the anticipated collection of debt. It is imperative that SLM sustain debt management practices to achieve high collection rates. This includes:

- Strengthened debt collection mechanisms through automated billing, SMS/email reminders, and digital payment platforms to streamline collections and stricter enforcement of payment terms, including structured follow-ups and consequences for non-compliance.
- Regularly review and audit of the debtors' books to ensure accurate provisioning and timely identification of problematic accounts and improve internal systems for tracking, reporting, and analysing debtor performance.
- Define clear criteria for creditworthiness and repayment plans, including formal agreements for high-risk accounts.
    - Engage debtors proactively and offer tailored repayment plans and payment initiatives such as discounts, rewards or loyalty programmes. Where needed consider early intervention initiatives to prevent accounts from becoming delinquent.

- Review the Municipalities strategy around customer deposits and align the policy with a strategy that ensures that the customer deposits held reflect at least one month of customer billings to serve as a mechanism to recover revenue in the case of non-payment.

6.3.2. Conclusion

While Stellenbosch Municipality has historically performed well in revenue collection, consistency and timely and strategic intervention is required to maintain this position. A declining collection rate, rising net debtor days, and the potential for increasing write-offs pose risks to financial health and operational sustainability.

By implementing a proactive and multi-pronged revenue management strategy - anchored in strong policy, data-driven oversight, community engagement, and modernized systems - the Municipality can maintain an impressive collection rate. Strengthened revenue performance will not only secure cash flow, but also enable Stellenbosch to deliver high-quality services, invest in infrastructure, and achieve its long-term developmental goals.

6.4. Liquidity Management

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Cash / Cost Coverage Ratio (Excl. Unspent Conditional Grants)	value	1-3 months	2.6	3.3	3	4.9	3	2.9	2.9	3.2	3.5	3.8	4.2	4.5	4.9	5.2
Current Ratio	value	1.5-2: 1	1.8	1.9	2	2.1	1.9	2	2.2	2.2	2.4	2.6	2.8	3	3.1	3.5

Cash / Cost Coverage Ratio (Excluding Unspent Conditional Grants)

Stellenbosch Municipality's Cash / Cost Coverage Ratio has shown a strong upward trend, rising from **2.6 months in 2022** to a **projected 5.2 months by 2035**. This means the municipality is increasingly able to cover its operating costs with available cash reserves, excluding conditional grant funding.

A higher coverage ratio is a clear indicator of improved financial resilience. It reflects enhanced liquidity management and the municipality's growing capacity to withstand revenue shortfalls or unexpected cost pressures. This trajectory positions Stellenbosch as a financially prudent institution capable of maintaining operations even under fiscal stress.

Current Ratio

The Current Ratio, a key indicator of short-term financial health, has increased from **1.8 in 2022 to a projected 3.5 in 2035**. This reflects a steady strengthening in the Municipality's ability to meet its short-term obligations using its current assets.

A Current Ratio above **2.0** is generally considered sound in public sector finance, suggesting strong liquidity and working capital management. Stellenbosch Municipality's upward trend signals prudent fiscal discipline, effective creditor management, and a strategic approach to balancing receivables, payables, and cash reserves. This contributes to operational stability and enhances credibility with creditors, investors, and oversight institutions.

6.4.1. Strategic Recommendations for Sustaining and Enhancing Liquidity Performance

To maintain and strengthen positive cash flows SLM must optimise the revenue collection processes (refer section above on debtors' management). In addition, it is important to adopt zero-based budgeting to ensure alignment between expenditures and strategic priorities along with scenario planning in forecasting to account for potential macroeconomic shocks or funding gaps

Municipalities in South Africa are currently under pressure to be sustainable and viable, and it is therefore recommended that SLM consider diversifying revenue streams through the identification of sustainable alternative revenues.

It goes without saying that close monitoring of cash flow performance is critical and therefore monitoring and early warning systems should be implemented, if not already in place.

6.4.2. Conclusion

Stellenbosch Municipality's improving liquidity indicators signal a positive financial trajectory marked by increased resilience and sound fiscal governance. The upward trends in the **Cash / Cost Coverage Ratio** and **Current Ratio** demonstrate a municipality that is not only meeting its current obligations but is also preparing for long-term sustainability and growth.

By proactively embedding best practices in financial planning, revenue enhancement, risk management, and stakeholder engagement, Stellenbosch can further solidify its reputation as a well-managed, future-ready municipality capable of delivering consistent, high-quality services to its residents.

6.5. Revenue Management

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Revenue Growth	percentage	>= 5%	13.3	9.4	11.9	22.5	-1.8	10.4	7.9	5.1	4.3	4.3	4.3	4.3	4.3	4.4
Revenue Growth (Excluding capital grants)	percentage	>= 5%	12.4	9.5	12	23.9	-1.9	9.9	8.4	4.5	4.5	4.5	4.5	4.5	4.5	4.5

Revenue Growth (% Including Capital Grants)

The spike in 2025 followed by a contraction in 2026 suggests volatility, possibly driven by once-off events, capital injections, or external shocks. While stabilisation in later years reflects improved forecasting and control, the lower growth rate may struggle to keep up with rising service delivery costs.

Revenue Growth (Excluding Capital Grants)

Excluding capital grants gives a clearer picture of organic revenue generation. The same volatility persists, emphasising the need for a stronger, more diversified, and resilient revenue base.

Implications for Financial Sustainability

- Irregular revenue growth, especially the decline in 2026, can strain budget execution, service continuity, and long-term planning. Municipalities require predictable and stable income to deliver basic services reliably.
- The projected revenue growth levelling off at 4.5% from 2030 onwards may not align with the increasing cost of service delivery, inflation, or infrastructure demands, which could cause a funding gap.
- If consumer account growth does not pace with revenue expectations, the municipality may be over-reliant on tariff increases, which could reduce affordability.

6.5.1. Strategic Recommendations to Strengthen Revenue Management

It has already been mentioned that SLM should explore alternative revenue sources for the Municipality and implement customer management practices to strengthen and retain the existing customer base.

Revenue in is closely linked to infrastructure availability and performance and with that, SLM should ensure infrastructure is maintained to perform optimally and align infrastructure expansion and upgrades with areas of population and economic growth to support increased account activation and revenue potential. This ensures capacity keeps up with demand, maintaining service quality and public trust.

Lastly, SLM should drive local economic development by investing in programs that stimulate SMME development, job creation, and sector diversification within the municipal boundaries. A stronger local economy will broaden the municipal tax base and supports sustained revenue growth.

6.5.2. Conclusion

While Stellenbosch Municipality has demonstrated periods of strong revenue performance, emerging volatility and flattening growth rates underscore the need for more strategic revenue management. By focusing on consumer growth, diversification, and proactive financial planning, the municipality can mitigate risks, unlock new revenue opportunities, and build a more resilient foundation for future service delivery.

6.6. Expenditure Management

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Creditors Payment Period (Trade Creditors)	value	<= 30 days	68	67	57	72	64	59	60	60	60	60	60	60	60	60
Remuneration as % of Total Operating Expenditure	percentage	25-40%	29.6	29.8	29.2	26.6	27	25.7	25.5	24.6	24.5	24.4	24.4	24.4	24.3	24.3
Contracted Services % of Total Operating Expenditure	percentage	2-5%	10.7	11.4	12.4	11.2	11.9	12.9	12	11.5	11.5	11.5	11.4	11.4	11.4	11.4
Remuneration and Contracted Services % Total Operating Expenditure	percentage		40.3	41.2	41.6	37.8	38.9	38.6	37.5	36.1	36	35.9	35.8	35.8	35.7	35.7

Creditors Payment Period (Trade Creditors)

The municipality has shown improvement in managing creditor payments, reducing the average period from **72 days in 2025 to 60 days by 2028.** This decline reflects efforts to strengthen liquidity and financial discipline. However, the payment period remains significantly above the accepted benchmark of **30 days**, potentially undermining supplier confidence and limiting the municipality's ability to negotiate favourable credit terms.

Remuneration as % of Total Operating Expenditure

This ratio has consistently remained within the National Treasury's guideline range of **25 - 40%,** with a **gradual decrease from 29.6% in 2022 to 24.3% by 2034**. A declining trend in remuneration expenditure may signal effective cost containment. However, prolonged underinvestment in personnel can lead to reduced staff capacity, low morale, and deteriorating service quality - particularly if critical posts remain vacant or skilled professionals are lost to better-paying employers. To address this, Stellenbosch Municipality has benchmarked salaries and undertaken adjustments to ensure that staff are remunerated in a fair and deserving manner and this practice must be maintained going forward.

Contracted Services as % of Total Operating Expenditure

This ratio was **10.7% in 2022** and is projected to remain above **11% through to 2035**, well above the typical **benchmark of 2 - 5%.**

The following are contributing factors to the higher contracted services amount for the Municipality:

- SLM acts as an implementing agent for housing projects for which it receives grants. These services are included in contracted services which distorts the contracted services amount.
- Security for the protection of critical infrastructure is also included in this amount. SLM are undertaking investment in security services linked to internal tactical response teams which will contribute to reducing this figure, the impact of which will be determined once implemented.

Persistent overreliance on outsourced services raises red flags regarding operational sustainability and cost efficiency. The contracted services expenditure would need to be analysed to assess the nature of the services and whether they should be brought in house. Excessive outsourcing, without rigorous cost-benefit analysis, can diminish the municipality's control over service standards and long-term expenditure. Strengthening internal capabilities could lead to more sustainable and cost-effective operations.

With the above in mind and in the case of SLM, when taking a view of the combined remuneration and contracted services ratio's, the total remains below the overall remuneration ratio (40%) from 2025 onwards, an indicator that the Municipality plans to effectively using external service providers and optimising the balance between internal and external support.

6.6.1. Strategic Recommendations for Expenditure Optimization

As mentioned previously, it is important to adopt zero-based budgeting to ensure alignment between expenditures and strategic priorities along with scenario planning in forecasting to account for potential macroeconomic shocks or funding gaps. It goes without saying that close monitoring of cash flow performance is critical and therefore monitoring and early warning systems should be implemented, if not already in place.

With regards to contracted services, SLM should undertake a comprehensive review of outsourced functions, identifying areas where internal capacity can be rebuilt or developed.

6.6.2. Conclusion

Stellenbosch Municipality's expenditure management trends reflect progress in some areas, such as improved payment periods and controlled remuneration costs. However, ongoing challenges, particularly related to high contracted service expenditure and underinvestment in human resources, could undermine service delivery and financial sustainability if left unaddressed.

By implementing the above recommendations, the municipality can strike a more effective balance between internal capacity, cost control, and strategic outsourcing - ensuring that it remains financially sound while delivering quality services to its residents.

6.7. Efficiency

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Net Operating Surplus Margin	percentage	>= 0%	0.2	4.8	4.7	16.1	5.2	6.1	7.8	4.4	4	3.8	3.5	3.4	3.3	3.3
Net Surplus /Deficit Electricity	percentage	0-15%	19.8	21.6	17.4	32.3	27.2	27.4	27.4	23.9	23.8	23.8	23.7	23.6	23.6	23.6
Net Surplus /Deficit Water	percentage	>= 0%	13.7	19.2	14.3	30.9	22.4	21.5	22.4	30.9	30.5	30.1	29.9	29.6	29.4	29.3
Net Surplus /Deficit Refuse	percentage	>= 0%	-23.9	41.1	-19.6	-19.6	-6.9	-3.4	-1.6	11.2	11	10.8	10.6	10.5	10.4	10.3
Net Surplus /Deficit Sanitation and Waste Water	percentage	>= 0%	-9.6	-15.4	-9.8	-0.7	-24.9	-26.2	-17.3	-11	-11.8	-12.4	-13	-13.4	-13.7	-14

A detailed examination of key efficiency metrics across municipal service sectors reveals both areas of progress and persistent challenges. The trends offer valuable insight into the municipality's capacity to operate sustainably and manage public funds effectively.

Net Operating Surplus Margin

The municipality’s operating surplus margin of **0.2% in 2022**, signifying operational inefficiency. However, it improved markedly to **4.8% in 2023**, peaked at **16.1% in 2025**, and is projected to stabilize around **3 – 4% through to 2035**. This trajectory reflects a successful financial recovery and adherence to acceptable benchmarks (0 - 30%). A stabilised surplus margin enhances credibility with investors, lenders, and the public.

Net Surplus/Deficit – Electricity

Electricity services consistently recorded surpluses, with figures significantly **above the 15% normative range**, peaking at **32.3% in 2025**, then moderating to **23 - 24%**. Stellenbosch Municipality continues to have large surpluses from the energy sources trading services to cross subsidise other services operating at a deficit and also to contribute to the capital expenditure requirements of the Municipality.

Net Surplus/Deficit – Water

The water function shows a healthy and **consistently positive performance**, peaking at **30.9% in 2025**, then gradually tapering off. This reflects strong cost recovery and efficient water management, which enhances the municipality's financial resilience and justifies further reinvestment in water infrastructure.

Net Surplus/Deficit – Refuse Removal

The performance of refuse removal indicates a steep deficit in **2022 (-23.9%)** followed by stabilisation at a more sustainable level of **10–11% in 2029**. This is mainly attributable to Stellenbosch Municipality establishing a land fill and no longer utilising that of City of Cape Town at a much higher cost, further affirming the Municipality endeavours to focus on strategic asset management planning to achieve long term sustainability. The Municipality's commitment to achieving sustainable service delivery is further affirmed by the cost of supply study for Refuse that was undertaken in 2025. The revised tariff is phased in over the MTREF period and is reflected by the improvement to breakeven point in 2027/28.

Net Surplus/Deficit - Sanitation and Wastewater

A worrying and persistent decline from **–9.6% in 2022 to –26.2% in 2027**, with no sign of recovery by 2035. This is a critical area of concern, pointing to serious structural inefficiencies, underfunding, or capacity constraints in wastewater operations. It poses environmental, regulatory, and public

health risks alongside financial strain. The Municipality should do a cost of supply study for Sanitation and Wastewater in 2025 to also look at the tariff structure and recoverability of funds.

Implications for Financial Sustainability

Strengths

Strong surpluses in water and electricity improve the municipality's revenue base and open opportunities for reinvestment into capital projects or social programs. The improving operating surplus margin overall indicates progress toward financial efficiency and long-term sustainability.

Concerns

- **Sanitation and Wastewater**: Continued deficits threaten the municipality's overall fiscal balance. If unaddressed, they could require cross-subsidisation or emergency funding, weakening service delivery in other sectors.

6.7.1. Strategic Recommendations

SLM should Introduce more sophisticated financial modelling to better anticipate surplus and deficit trends across sectors. This will Improve resource allocation and support strategic planning.

With this in mind, the Municipality has taken steps in the right direction. SLM is undertaking a cost of supply study for Sanitation and Wastewater in 2025 to also look at the tariff structure and recoverability of funds. This will reduce structural inefficiencies, improve service quality, and restore financial health in this vital area.

The performance of refuse management has shown impressive improvement following the investment made in a local landfill site and cost of supply study undertaken. This sector should be closely monitored to ensure turnaround in performance is achieved as anticipated

6.7.2. Conclusion

Stellenbosch Municipality has made meaningful progress in improving its operational efficiency, especially in water, electricity, and overall surplus margins. However, persistent deficits in sanitation highlight the need for proactive and targeted interventions.

A strategic, data-informed approach that prioritises reinvestment, operational audits, and community engagement will be essential to ensure long-term financial sustainability and resilient service delivery across all sectors.

6.8. Grant Dependency

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
Own funded Capital Expenditure (Internally generated funds + Borrowings) to Total Capital Expenditure	percentage	None	72.1	63.2	71.3	67.3	78.9	78.2	72.7	70	70	70	70	70	70	70
Own funded Capital Expenditure (Internally Generated Funds) to Total Capital Expenditure	percentage	None	34.2	36.5	38.6	44.4	48.6	48	57.9	50	50	50	50	50	50	50
Own Source Revenue to Total Operating Revenue (Including Agency Revenue)	percentage	None	85.6	85.9	86.1	85.2	87.9	86.7	87.5	87	87.2	87.3	87.5	87.6	87.7	87.8

Own-Funded Capital Expenditure (Internally Generated Funds + Borrowings) as % of Total Capital Expenditure

The ratio reached its **highest point in 2026 at 78.9%,** demonstrating the municipality's capacity to finance capital projects predominantly from its own resources. This follows a **dip from 72.1% in 2022 to 63.2% in 2023, after which the trend reverses with a gradual upward trajectory**.

The increasing trend post 2023 suggests a deliberate effort to strengthen internal financing mechanisms, which bodes well for fiscal autonomy. However, volatility in earlier years reveals the need for consistency in internal revenue and borrowing strategies.

Internally Generated Funds Only (Excluding Borrowings) as % of Total Capital Expenditure

Starting at **34.2% in 2022**, the percentage climbs steadily to **57.9% in 2028**, after which it **levels off at around 50% through 2035**.

The growing contribution of internally generated funds to capital expenditure is encouraging. To avoid a plateau after 2028 it is important for SLM to safeguard revenue growth and limit borrowing to fiscally sustainable levels.

Own Source Revenue to Total Operating Revenue (Incl. Agency Revenue)

This ratio remains strong and relatively stable at **approximately 85%,** with minor **incremental gains projected toward the latter years**.

A high own-source revenue ratio signals robust financial independence. It reflects the municipality's ability to fund its operational activities without undue reliance on intergovernmental grants, reinforcing budgetary flexibility and responsiveness to local priorities.

Impact on Financial Sustainability

Strengths

High levels of own-source revenue and self-funded capital expenditure position Stellenbosch Municipality among the more fiscally autonomous local governments. The trajectory of reduced dependency on conditional capital transfers allows for greater discretion in project selection and long-term infrastructure planning.

Concerns

Cyclical grant funding risks or higher debt reliance could pose a risk to SLM. The balance between internally generated funds and borrowings requires close management to prevent rising debt levels that could constrain future budgets.

6.8.1. Recommendations for Strengthening Fiscal Independence

Diversify and Strengthen Revenue Sources

- Broaden the Revenue Base: Introduce new income streams such as municipal service levies, tourism surcharges, or special economic zone contributions.
- Leverage Public-Private Partnerships (PPPs): Encourage co-investment in infrastructure projects to reduce sole reliance on municipal funds while stimulating local economic development.
- Improve Revenue Collection: Invest in advanced revenue collection systems (e.g., digitised billing, data analytics, and customer portals) to minimize leakages and maximize compliance.

Optimise Capital Expenditure Efficiency

- Conduct Cost-Benefit Analyses: Evaluate capital projects based on long-term value creation and financial return, prioritizing those that support economic growth and service delivery.
- Set Target Ratios for Self-Funding: Establish progressive benchmarks for internally generated capital funding, with annual targets and performance incentives.
- Integrate Capital Planning with Budgeting: Align long-term infrastructure needs with realistic revenue projections to avoid overextension or project delays.

6.8.2. Conclusion

Stellenbosch Municipality demonstrates commendable progress in reducing grant dependency and building a more self-reliant financial foundation. The municipality's strong own-source revenue position and increasing capacity to fund capital projects from internal sources mark critical steps toward sustainable governance.

However, to preserve this trajectory beyond 2028, deliberate interventions are needed to diversify revenue, control borrowing, and institutionalise long-term financial planning. By embracing innovation, fostering partnerships, and engaging stakeholders, the municipality can solidify its fiscal independence while continuing to deliver high-quality services and infrastructure to its community.

6.9. Municipal Sustainability Index (MSI)

Ratio	Format	Norm	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	2033	2034	2035
MSI (Municipal Sustainability Index)	percentage	75-100	68	76	73	80	70	79	81	83	82	82	82	82	82	83

The MSI started at 68 in 2022. By 2023, it increased to 76, surpassing the minimum norm of 75. However, it fell slightly to 73 in 2024. This fluctuation indicates an early period of instability or adjustment as new sustainability measures might be implemented. From 2025 onwards, the MSI shows a steady upward trend, reaching 80 in 2025 and peaking at 83 in both 2029 and 2035. This indicates that the municipality successfully improved its sustainability metrics. The index stabilizes in later Years around the high 80s, demonstrating consistent performance and suggesting the municipality has implemented successful long-term sustainability practices.

Impact on Financial Sustainability

The improvement in MSI can substantially impact the municipality's financial sustainability through:

- **Increased Investment Attraction:** A higher MSI can attract investors and grants focusing on sustainable projects. The municipality may benefit from funding aimed at further improving its sustainability index.
- **Operational Efficiency:** Sustainable practices often lead to operational efficiencies, such as reduced water, energy consumption, and waste management costs, leading to savings and better allocation of resources.
- **Community Engagement:** Enhanced sustainability initiatives can improve community engagement, leading to better local business conditions and an increase in property values.

- **Compliance and Risk Management:** A strong focus on sustainability can prepare the municipality for future regulations and environmental challenges, reducing legal and financial risks.

6.9.1. Recommendations for Improvement

To further improve the MSI and ensure sustained financial sustainability, the municipality can consider the following strategies:

- Invest in Renewable Energy: Transitioning municipal operations to renewable energy sources (solar, wind, etc.) can reduce energy costs and emissions, contributing to a higher MSI.
- Enhance Public Transport: Developing efficient public transport solutions can decrease traffic congestion and air pollution, enhancing the sustainability metrics while improving public health and community appeal.
- Focus on Community Education: Launch awareness campaigns to engage citizens in sustainability practices. Providing workshops and resources for reducing waste and saving energy can create a community-oriented approach to sustainability.
- Utilise Technology: Implement smart technologies for resource management (water, energy, waste) to monitor and optimize usage, which can lead to increased efficiency and savings.
- Evaluate and Adjust Policies Regularly: Regularly assess the effectiveness of sustainability policies and adapt them based on outcomes and emerging best practices. Ensure that there's flexibility to make necessary changes to remain aligned with long-term sustainability goals.
- Collaborate with Stakeholders: Build partnerships with local businesses, non-profits, and educational institutions to foster innovations in sustainability practices. This could lead to shared resources and knowledge that enhance outcomes.

By implementing these recommendations, the municipality can continue to improve its Municipal Sustainability Index and enhance financial sustainability in the long run.

7. CONCLUSION

The Long-Term Financial Plan (LTFP) for Stellenbosch Local Municipality (SLM) provides a comprehensive financial overview and projections for the ten-year period up until 30 June 2035. The key findings from the report indicate a growth trajectory in various revenue streams, including exchange revenue, service charges, and operational revenue. Exchange revenue is projected to increase from R1,860 million in 2026 to R3,078 million by 2035, while service charges for electricity, water, waste water management, and waste management show consistent growth. Total revenue, excluding capital transfers, is expected to grow from R2,861 million in 2026 to R4,642 million by 2035.

On the expenditure side, total expenditure is anticipated to rise from R2,713 million in 2026 to R4,490 million by 2035, with employee-related costs being a significant contributor. The surplus/deficit is projected to remain positive throughout the forecasted years. Cash flow analysis indicates an increase in cash receipts from R3,211 million in 2026 to R4,501 million by 2035, while cash payments will also rise, indicating a growing financial footprint. The funding mix shows a reliance on internally generated funds, transfers, and borrowing, with capital transfers constituting a significant portion of the funding.

The gearing trends paint a positive picture of Stellenbosch Municipality's liability management efforts. SLM's liability management trends reflect a disciplined and forward-looking approach to financial governance. With decreasing reliance on debt, rising solvency, and manageable capital costs, the Municipality is on a positive trajectory. If the Municipality can outperform the forecast, there will be room to take on additional borrowing, however any additional borrowing should be applied to revenue and growth generating assets. By continuing to refine its financial strategies, Stellenbosch can safeguard long-term sustainability while meeting the evolving needs of its communities.

Based on these findings, the following recommendations are made:

1. **Enhance Revenue Streams**: Focus on strategies to further enhance exchange revenue and service charges to ensure sustained financial growth.

2. **Manage Expenditure**: Implement measures to control contracted services and other significant expenditure items to maintain a reasonable surplus to fund investment in catalytic infrastructure projects and infrastructure renewal.
3. **Optimise Cash Flow**: Develop strategies to optimise cash flow management, ensuring that cash receipts and payments are balanced to support the municipality's financial stability.
4. **Diversify Funding Sources**: Explore opportunities to diversify funding sources, reducing reliance on borrowing and increasing internally generated funds and capital transfers.

By implementing these recommendations, Stellenbosch Local Municipality can achieve its financial goals and ensure long-term sustainability.

ANNEXURE A – AFFORDABILITY ENVELOPE

Capital Expenditure Affordability and Funding

- Total 10-year CAPEX Affordability (2026-2035): The projected capital expenditure over the 10-year period (FY2026-FY2035) totals approximately R5.34 billion. This includes budgeted figures for 2026-2028 and an assumed affordable level of R500 million per year from 2029 onwards.
- **MTREF Capital Funding Mix (2026-2028):** The funding mix for the first three years (MTREF period) is projected as follows:
  - **Capital Expenditure:** R654m (2026), R658m (2027), R529m (2028). Total = R1.84billion.
  - **Funding Sources (R'Million):**
    - Capital Transfers/Grants: R138 (2026), R143 (2027), R144 (2028). Total = R426m (~23%).
    - Borrowing: R198 (2026), R199 (2027), R78 (2028). Total = R475m (~26%).
- **10-Year Capital Funding Mix (2026-2035):** The overall funding mix for the 10-year planning period is forecasted as follows:
  - **Capital Grants:** R1.476 billion (~27.6%)
  - **Borrowing:** R1.175 billion (~22.0%)
  - **Internally Generated Funds:** R2.690 billion (~50.4%)
  - **Total Capital Expenditure:** R5.341 billion (100%)

Liquidity

- **Cash Balance Forecast:** Cash and cash equivalents are projected to show strong growth, increasing from R667 million in 2026 to R1.964 billion by 2035.
- The **Current Ratio** (Current Assets / Current Liabilities) improves significantly from 1.9 in 2026 to 3.5 in 2035, remaining well above the typical benchmark of 1.5-2:1, indicating strong short-term financial health.

- The **Cash/Cost Coverage Ratio** (excluding unspent conditional grants) also shows a positive trend, rising from 3.0 months in 2026 to 5.2 months by 2035, signifying an increasing ability to cover operating costs with available cash.

Gearing

- **Gearing Ratio Forecast:** The ratio of Debt (Total Borrowings) to Revenue shows a positive downward trend, projected to decrease from 29.3% in 2026 to 11.8% by 2035, indicating reduced reliance on debt relative to income. This remains comfortably below the benchmark of <=45%.
- **Debt Service Ratio Forecast:** The Capital Cost (Interest Paid and Redemption) as a percentage of Total Operating Expenditure is projected to increase gradually from 5.2% in 2026 to 7.0% by 2035. This stays within or very close to the acceptable norm of 6-8%, indicating manageable debt servicing obligations.

Conclusion

The affordability analysis based on the 2025 LTFP suggests that the projected capital expenditure program of R5.52 billion over ten years is affordable within the forecasted financial framework. This is supported by strong projected growth in own revenue sources, a significant contribution from internally generated funds towards Capex, improving liquidity ratios, and manageable debt levels. Key assumptions include maintaining collection rates, controlling expenditure growth, and achieving the projected revenue targets.

Annexure: Examples of NGO payments that do not qualify as section 67 transfers 8

1. Purpose of Circular

The purpose of this Circular is to guide municipalities on the implementation of section 67 in the Municipal Finance Management Act 56 of 2003 (MFMA) relating to instances when municipalities transfer funds to organisations or bodies outside of government, i.e. non-governmental organisations (NGOs), which also includes nonprofit organisation (NPOs). This Circular includes an Annexure, which outlines examples of instances where municipalities must follow procurement processes instead of making a transfer payment as contemplated in terms of section 67 of the MFMA. Note that the provisions of section 67 of the MFMA are not applicable to municipal entities.

2. Background

Section 67 of the MFMA outlines a process which must be followed before transferring funds to NGOs in instances where such transfers are not for the actual supply of goods or services. **Where a municipality procures goods and services, even from an NGO, it must comply with the procurement processes as required in terms of section 217 of the Constitution, read with chapter 11 of the MFMA, the Municipal Supply Chain Management (SCM) Regulations and other applicable procurement prescripts, before appointing an NGO to provide goods and services to a municipality.** Section 67 of the MFMA should, therefore, not be used as a mechanism to bypass official public sector procurement legal prescripts as it only enables municipalities to make transfers to NGOs in instances other than through the normal course of providing municipal services.

A transfer within the context of section 67 of the MFMA refers to instances where a municipality does not buy any item or pay for goods or services, regardless of whether it is in furtherance of a municipal assigned or unassigned function. Section 67 of the MFMA provides a mechanism for municipalities to make transfers to organisations or bodies outside of government, such as nonprofit organisations (which include non-governmental organisations and community-based organisations), to enable them to support projects and programmes of these organisations.

Municipalities should prioritise budgeting for sufficient service delivery municipal mandates over budgeting for unassigned functions. Irrespective of whether a municipality is performing an assigned or unassigned function, section 217 of the Constitution will apply to any procurement of goods or services in relation to the performance of the assigned or unassigned function. Therefore, section 67 of the MFMA cannot be used to procure goods and services from NGOs for unassigned functions.

In budgeting for section 67 transfers, municipalities must always take cognisance of sections 62(1)(a) of the MFMA, which stipulates that the accounting officer of a municipality is responsible for managing the financial administration of a municipality and must, for this purpose take all reasonable steps to ensure that the resources of the municipality are used effectively, efficiently and economically. Service delivery must always be prioritised.

3. Council Policy

Municipalities should develop and approve a policy to transfer funds to NGOs in terms of section 67 of the MFMA to ensure transparency and accountability. This policy must govern how a municipality will provide financial assistance to NGOs. Below are some key elements that should be addressed in a section 67 transfer policy:

- **Purpose and objectives:** Clearly state the purpose, desired outcomes, and impacts that the funding aims to achieve.

- **Eligibility criteria:** Specify the eligibility requirements for potential recipients. These criteria may include jurisdiction, project alignment with funding priorities, and compliance with legal and financial standards.
- **Application process:** Outline the process for NGOs to apply for transfer funding. This should include details on the application form, submission deadlines, and required documentation associated with the application.
- **Selection criteria:** Describe the criteria and evaluation process used to assess transfer applications. Explain how applications will be scored and selected for transfer funding.
- **Funding amounts and duration:** Specify the minimum and maximum transfer amounts that can be awarded and the duration of funding support. Address any conditions or milestones that may affect funding levels.
- **Reporting and accountability:** Define the reporting requirements for transfer funding recipients. Explain how recipients will be held accountable for the spending of transferred funds. Outline the responsibilities of the municipality and the transfer funding recipients in ensuring compliance with the funding terms and conditions. Describe the monitoring processes to ensure funds are used appropriately.
- **Payment and disbursement:** Detail the method of disbursement. Specify how funds can be used. This may include budget categories, allowable expenses, and limitations on administrative costs.
- **Amendment and termination:** Address the circumstances under which a transfer agreement may be amended or terminated and the procedures for doing so.
- **Appeals and grievance procedures:** Establish a process for addressing disputes or grievances related to funding decisions or implementation, which should also include reference to a public process as part of the annual budget approval process.
- **Transparency and public information:** Discuss the level of transparency the municipality will maintain regarding funding decisions, recipients, and outcomes. Clarify how information about the transfer program will be communicated to potential applicants, stakeholders, and the public.
- **Legal and regulatory compliance:** Ensure that the policy aligns with all relevant laws, regulations, and guidelines governing grant-making activities.
- **Evaluation and review:** Specify how the section 67 policy will be periodically reviewed and updated to reflect changing needs, priorities, and best practices.
- **Conflict of interest:** Address conflict of interest guidelines for both the municipality's staff and transfer review committee members.

The municipality's section 67 transfer policy should align with its integrated development plan and legal requirements and be regularly reviewed and updated to meet evolving needs.

4. Meaning of "otherwise, than in Compliance with a Commercial or Other Business Transaction"

Section 67 of the MFMA makes reference to "otherwise than in compliance with a commercial or other business transaction". These terms have not been defined in the MFMA and should, therefore, be interpreted based on the ordinary meanings of the words within the context of the scope and purpose of section 67 of the MFMA, as well as the overarching principles in the MFMA. The word "commerce" in general, is defined as the exchange of goods and services between two or more persons and "commercial" generally means one is engaged in commerce. The general meaning of "business transaction" is the process of executing a transaction where goods and services are exchanged between two or more parties. Therefore,

this section was never meant to be applied to procuring goods and services for the municipality's own benefit or even in the case where it is not for the municipality's own benefit.

In *Agribee Beef Fund (Pty) Ltd and Another v Eastern Cape Development Agency and Another* [2023] ZACC 6, the Court confirmed that section 217(1) of the Constitution applies to all public procurement, even if the organ of state is not the direct beneficiary of the goods or services. In line with the principle that section 217(1) is "not confined to instances of procurement of goods and services by an organ of state for its own benefit or use," any arrangement in which an organ of state procures goods and services, must be done in terms of section 217(1) of the Constitution.

5. Irregular Expenditure due to Incorrect Application of Section 67 of the MFMA

Chapter 11 of the MFMA, read together with Municipal Supply Chain Management Regulations apply to the procurement of goods and services. In the context of section 67 of the MFMA, where a municipality receives or is due to receive goods or services from an NGO, the payment for those goods or services cannot be made in terms of section 67 of the MFMA. For a transfer to be in line with section 67 of the MFMA, it must be truly unrequited for the municipality in form and in substance - i.e. the municipality should not receive or have not received any goods and services in exchange for the transfer to the NGO.

Therefore, municipalities must not circumvent the procurement processes by procuring goods and services from NGOs under the guise that section 67 of the MFMA is applicable. Where the municipality procures goods and services in terms of section 67 of the MFMA, instead of the applicable procurement processes, the expenditure incurred will be classified as irregular as defined in the MFMA. If a municipality pays an NGO without following procurement processes, this irregular expenditure must be referred to the Municipal Public Accounts Committee (MPAC) for investigation in terms of section 32(2)(b) of the MFMA. MPAC's recommendations must then be tabled at the next available council meeting. Municipalities must, therefore, identify and address transactions where section 67 was incorrectly applied, as required in section 32 of the MFMA.

6. Financial Misconduct, Financial Offence and Other Offences

The irregular expenditure incurred must also be referred to the municipality's disciplinary board for a financial misconduct investigation in line with section 171 of the MFMA, read together with the Municipal Regulations on Financial Misconduct Procedures and Criminal Proceedings, 2014. If there is suspected fraud or the conduct of the officials also amounts to a financial offence in terms of section 173 of the MFMA, then the matter must also be reported to the South African Police Service for investigation. Municipalities must also take cognisance of section 34 of the Prevention and Combating of Corrupt Activities Act 12 of 2004, where there is suspicion of corruption involving an amount of more than R100,000.

7. The Requirement to Provide Audited Financial Statements

Section 67(1)(a)(iv) of the MFMA requires an NGO that will be receiving a transfer in terms of section 67 to submit its audited financial statements to the municipality. Given the various legal forms an NGO can take, not all NGOs are compelled to have audited financial statements. If the organisation is a nonprofit organisation, then the municipality may, subject to compliance with section 67(4) of the MFMA, enter into an agreement with the relevant organisation requiring that organisation to submit financial statements that comply with the requirements of the Nonprofit Organisations Act 71 of 1997 (NPO Act) instead of submitting audited financial statements as required by section 67(1)(a)(iv) of the MFMA. Note that the possible exemption from submitting audited financial statements is limited to NGOs serving the poor, as contemplated in and subject to section 67(4) of the MFMA.

8. General Budgeting Requirements of Section 67 Transfers

Section 67 of the MFMA read with section 17(3)(j)(iv) of the MFMA, requiring that an annual budget tabled under section 16(2) of the MFMA includes details of proposed allocations to NGOs. Consequently, the municipal council approves NGO transfers as part of the budget, contingent on affordability. The accounting officer, empowered by section 67 of the MFMA, implements these transfers according to the approved budget. Municipalities must ensure that the proposed NGO transfers are clearly indicated in the budget submission to the council, including names of NGOs intended to receive funds.

Municipalities should start the section 67 process by July of the preceding financial year, ensuring provisional NGO allocations are disclosed during consultations on the draft budget. The section 67 policy must state that NGO allocations are provisional and subject to public participation. If objections arise, NGOs must be given a chance to respond to objections, but if the municipality deems their response inadequate, no transfer should be made to an NGO.

9. NGOs Serving the Poor/ Indigent

NGOs serving the poor/ indigent are exempted from compliance with section 67(1)(a) of the MFMA as stated in section 67(4) of the MFMA, subject to the following:

- If the transfer does not exceed a prescribed limit;
- If the accounting officer takes all reasonable steps to ensure that the targeted beneficiaries receive the benefit of the transferred funds; and
- If the accounting officer certifies to the Auditor-General that compliance by that NGO with subsection (1)(a) is uneconomical or unreasonable.

Although section 67(4) of the MFMA might appear to fully exempt municipalities from section 67(1)(a), this exemption is limited and applies only to specific NGO agreement requirements. A funding agreement with the NGO remains necessary, and if compliance is relaxed, the accounting officer must certify in writing to the Auditor-General of South Africa (AGSA) why such compliance would be uneconomical or unreasonable. The certification contemplated in section 67(4) refers to at least a letter to the AGSA.

The minimum considerations that must be included in the AGSA certification are the following:

- The relevant factors behind the accounting officer's conclusion;
- Why compliance with section 67(1)(a) of the MFMA is deemed uneconomical or unreasonable; and
- The compensatory compliance measures the municipality will require from the NGO.

The accounting officer's conclusion must be justifiable, reasonable and fact-specific.

While section 67(4) does not prescribe a limit on the total transfer amount per year, municipalities must consider their budget constraints. Despite relaxed compliance requirements under section 67(1)(a), the accounting officer must ensure internal controls confirm that funds reach intended beneficiaries.

10. Section 67 Application Process Timeline

Transfers in terms of section 67 of the MFMA should be effected in terms of a budget-related policy, and should, therefore, follow a municipality's typical budget process. The following minimum steps are relevant to consider as part of a full-cycle section 67 transfer process.

Figure 1: Steps in a typical section 67 transfer full-cycle process:

Step 1: •July: Assessment of prior financial year section 67 transfer payment performance of NGOs that received transfers.

Step 2: •August: Based on the section 67 transfer performance assessment of the prior financial year, determine if any changes to a section 67 policy for the new upcoming financial year will be required, specifically focusing on if changes need to be made to the sub-allocation of section 67 budgeted funds as it relates to the different social programs of the municipality as indicated by the municipality's IDP.

Step 3: •September: Compile call for proposals for section 67 transfers to NGOs, including dates for workshops to be held as part of the section 67 transfer application process based on the municipality's IDP objectives.

Step 4: •September: Advertise call for section 67 transfer proposals for the new upcoming financial year following the normal advertisement protocols, including advertising the date(s) of any section 67 workshop that will be held with NGOs considering applying for section 67 transfers.

Step 5: •October: Conduct a workshop with NGOs concerning the request for section 67 proposals related to the requirements of section 67 of the MFMA.

Step 6: •October: Review the section 67 transfer proposals received to determine the NGOs that may qualify for section 67 transfers, who will be subjected to the public participation process.

Step 7: •October: Review section 67 transfer policy and make proposals for any amendment to the policy, if so required.

Step 8: •November: Based on the section 67 transfer proposals received and the proposed revised section 67 transfer policy, proposed the budgeted amounts for the next three financial years.

Step 9: •March: Based on the draft of the new financial year budgeted figures, determine the provisional section 67 transfer amounts that will be paid to the identified NGOs, which will still be subjected to a public participation process.

Step 10: •April: Advertise the list of preferred NGOs that are contemplated to receive section 67 transfers in the new financial year, with the draft budget documents that are advertised for public comments.

Step 11: •April-May: As part of the draft budget public consultation, section 67 transfers to NGOs for the new financial year should be covered in the public budget consultation sessions.

Step 12: •May: Review public comments received on the proposed section 67 transfers and provide an opportunity for NGOs that have received unfavourable comments to respond to the comments.

Step 13: •June: Determine the final list of NGOs that will receive section 67 transfers based on the amounts of the new financial year's approved budget, including finalisation of the section 67 NGO agreements, after which the payments to the NGOs can commence from July.

11. Conclusion

The municipality's accounting officer must ensure that this Circular, including the Annexure to this Circular, are tabled in the next available Municipal Council meeting by submitting the Circular to the municipality's Speaker as an Annexure to a Council item. The contemplated Council item should explain the Circular and the impact of the Circular on the municipality's operations and policies. The Circular must also be brought to the attention of officials within the municipality, including the municipality's disciplinary board and the audit committee.

All clarification requests concerning this Circular should be emailed to mfma@treasury.gov.za.

Mr W McComans
Chief Director: MFMA Implementation
31 March 2025

Annexure: Examples of NGO payments that do not qualify as section 67 transfers

Annexure: Examples of NGO payments that do not qualify as section 67 transfers

The National Treasury has observed certain payments made to NGOs in terms of section 67 of the MFMA for goods and services provided to municipalities by the NGO. Below are examples of section 67 payments that should have been subjected to a proper supply chain management process.

The following examples are covered in this Annexure:

- Payments to NGOs providing local tourism promotion/ facilities for the accommodation, care and burial of animal services for which municipalities are responsible;
- Payments to NGOs in the furtherance of crime prevention, including initiatives to support the South African Police Service;
- Sponsorships to sports teams;
- Payments to NGOs/ NPOs operating special rating areas/ City Improvement Districts (CIDs);
- Ward projects; and
- Festivals/ events.

Payments to NGOs providing local tourism promotion/ facilities for the accommodation, care and burial of animal services for which municipalities are responsible

Municipalities have a constitutional mandate to promote local tourism (Schedule 4B) and to provide facilities for the accommodation, care, and burial of animals (Schedule 5B). The National Treasury has noted that some municipalities outsource these services to NGOs in terms of section 67 of the MFMA instead of following a procurement process as required by section 217 of the Constitution. Where tourism promotion and animal care functions are outsourced in this manner, any expenditure incurred should be disclosed as irregular expenditure if not procured through the prescribed supply chain management processes.

Payments to NGOs in the furtherance of crime prevention, including initiatives to support the South African Police Service

Where provincial and national functions have not been assigned to municipalities, such as crime prevention services, and a municipality partners with security firms to procure, maintain, and operate cameras under crime prevention objectives (mandated to the South African Police Services), these services must be procured through a procurement process. Paying any service provider in terms of section 67 of the MFMA without following the legally required procurement process—constitutes non-compliance and must be disclosed as irregular expenditure.

Sponsorships to sports teams or sports organisers

National Treasury has observed that municipalities sponsor sports teams in terms of section 67 of the MFMA for various reasons, including promoting local economic development and tourism. In some instances, irrespective of whether the sports team uses municipal facilities or its own, in order to receive a sponsorship, there will be an obligation to advertise and market the municipality. This is the procurement of a service, and it must follow the necessary procurement process.

When a municipality sponsors a sports team, the sports team or sports organiser's may provide complimentary tickets (including food and beverages) to councillors and officials, which constitutes fringe benefits not covered by the upper limits of councillor remuneration or salary agreements. This non-compliance triggers irregular expenditure and contravenes Regulation 10 of the Municipal Cost Containment Regulations, 2019.

Payments to NGOs/ NPOs operating special rating areas/ City Improvement Districts (CIDs)

Section 22 of the Municipal Property Rates Act 6 of 2004 allows municipalities to designate special rating areas and levy additional rates to fund extra services exceeding the standard level of service in a specific municipal area. Once a special rating area is established, the municipality collects additional rates from property owners in that area. It then pays the collected additional rate over to a nonprofit company (NPC) managing the area.

Payments to the NPC are not section 67 transfers as such payments are made in the normal course of business, e.g. paying a service provider for municipal waste collection or paying a security firm to provide security services for residents/organisations in the special rating area from the additional rates charged. As a result, the payment to the NPC is part of a standard business transaction, much like any other municipal service arrangement.

Ward projects

The basis of budgeting for ward projects lies in the municipality's Integrated Development Plan (IDP), with each ward identifying and prioritising local needs through its ward committee and councillor. These needs, such as youth camps, outreach programmes, and events for the elderly, are communicated to the municipal council as part of the budgeting process. Once the budget is approved, resources are allocated based on overall budgetary constraints, project priorities, and equitable distribution across the municipality.

Where the municipality appoints an NGO to implement ward projects, the required procurement processes must be followed to appoint the NGO. However, if the municipality donates funds to an organisation whose primary objective is to pursue social purposes, compliance with section 67 of the MFMA is required.

Festivals/ events

It has been observed that municipalities host annual events, such as festivals of lights and other cultural and heritage celebrations. Where a municipality appoints an NGO to execute the event, the NGO must be appointed via a procurement process before any payment is made to the NGO for the event services rendered. The municipality cannot simply pay the NGO via section 67 of the MFMA.

Where a municipality procures artists' or bands' services to perform at the festival or event, the artists or bands must be procured following a procurement process before any payment is made to the artist or band for the event services rendered. The municipality cannot simply pay the artist or band via section 67 of the MFMA.

6.3	MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR APRIL 2025

Collaborator No:
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **21 May 2025**

1. SUBJECT: MONTHLY FINANCIAL STATUTORY REPORTING: DEVIATIONS FOR APRIL 2025

2. PURPOSE

To comply with Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy 2024/2025 to report the deviations to Council.

3. DELEGATED AUTHORITY

Council

For noting.

4. EXECUTIVE SUMMARY

Regulation 36(2) of the Municipal Supply Chain Management Regulations and Section 36 of the Supply Chain Management Policy (2024/2025) stipulate that SCM deviations be reported to Council. In compliance thereto, this report presents to the Council the SCM deviations that occurred during April 2025.

5. RECOMMENDATION

that Council notes that there were no deviations approved for the month of April 2025.

6. DISCUSSION / CONTENTS

6.1 Background/Legislative Framework

The regulation applicable is as follows:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations

Deviation from and ratification of minor breaches of, procurement processes

36. (1) A supply chain management policy may **allow the accounting officer**.
(*a*) To **dispense with the official procurement processes** established by the policy and to procure any required goods or services through any convenient process, which may include direct negotiations, but only
(i) in an emergency.
(ii) if such goods or services are produced or available from a single provider only.
(iii) for the acquisition of special works of art or historical objects where specifications are difficult to compile.
(iv) acquisition of animals for zoos; or
(v) in any other exceptional case where it is impractical or impossible to follow the official procurement processes; and

(*b*) to ratify any minor breaches of the procurement processes by an official or committee acting in terms of delegated powers or duties which are purely of a technical nature.

(2) The accounting officer must record the reasons for any deviations in terms of sub regulation (1) (*a*) and (*b*) and **report them to the next meeting of the council**, or board of directors in the case of a municipal entity and include as a note to the annual financial statements.

6.2 Discussion

Reporting the deviations as approved by the Accounting Officer for April 2025:
No deviations were approved as indicated below:

6.3 Legal Implications

The regulation applicable is:

GNR.868 of 30 May 2005: Municipal Supply Chain Management Regulations: Deviations from and ratification of minor breaches of, procurement processes.

6.4 Staff Implications:

No staff implications

6.5 Previous / Relevant Council Resolutions:
None

6.6 Risk Implications

That the market may not be tested.
The measures in place to deal with deviations mitigate the risk to an acceptable level.
The auditor general also audit the deviations during the yearly audit.

6.7 Comments from Senior Management:

The item was not circulated for comment except to Municipal Manager

6.7.1 Municipal Manager

Supports the recommendations.

Meeting Date: **21 May 2025**

1. SUBJECT: RETURN ITEM: REPORT ON ERF 286 GROENDAL (LE ROUX)

2. PURPOSE

To report back to Council on the status of Erf 286 Groendal (Le Roux) and to obtain guidance on the way forward.

3. DELEGATED AUTHORITY

For consideration and decision by Municipal Council.

4. EXECUTIVE SUMMARY

In October 2024 the administration provided Council with a report on the status of Erf 286 Groendal, more specifically on the issues the administration has encountered with Kabouterland, who has been operating from the premises since the early 2000's. Council resolved that a letter be delivered to Kabouterland that, *inter alia,* states that they need to formally apply for a lease agreement and provide full access to the other creche making use of the premises as well as provide access to the Municipality and its consultants in order for the Municipality to attend to maintenance on the premises. A letter was prepared and hand delivered to Kabouterland and Kabouterland in turn appointed attorneys who has responded to indicate that Kabouterland is not going to apply for a lease agreement and further state that they are not willing to provide more access rights to the other creche. The attorneys request of the Municipality to do a diligent search for an existing lease agreement. It has been made clear to Kabouterland and the attorneys that the administration has not been able to locate any such agreement and is therefore of the view that no such an agreement exists.

The Property Management Department phoned the attorneys to try and reach a settlement however the attorneys were very hostile towards the administration and indicated that they do not have a copy of the lease agreement but that does not mean that it does not exist. It was explained that it is the intention of the municipality to ensure compliance with the Municipal Finances Management Act and to attend to maintenance of Council owned buildings, however it is apparent that Kabouterland has no intention of giving their assistance to resolve this matter. Council needs to consider if the municipality can proceed to appoint attorneys to institute eviction proceedings against Kabouterland.

5. RECOMMENDATIONS

(a) that Council takes note of the challenges that is still being experienced with Kabouterland; and

(b) that Council supports the appointment of attorneys to institute eviction proceedings against Kabouterland.

6. DISCUSSION / BACKGROUND

6.1 Background

Erf 286 Groendal (Le Roux) is an unregistered erf which has been sub-divided from Erf 233 Groendal (Le Roux), acquired from the Western Cape Government in terms of Section 19 of the Western Cape Housing Development Act, but not registered in the name of any entity yet. Erf 233 Groendal (Le Roux) is registered in the name of the Municipality and the administration is in the process of finalising the registration of Erf 286 Groendal also in the name of the Municipality. As the property is still unregistered it falls within the mother erf and is therefore already the property of the Municipality. The reason for the registration as a separate property is because of the issues experienced with Kabouterland.

Attached hereto as **APPENDIX 1** is a copy of the Title Deed for Erf 233.

During 2000 the Franschhoek/Belgian Development Trust (Belgian Trust) made available R206 000.00 for the purpose of converting one of the existing buildings in Mooiwater into a creche. The former Franschhoek Council accepted the donation on the condition that a trilateral agreement be entered into between Council, The Belgian Trust and Kabouterland creche. On 27 March 2001 Council resolved, *inter alia*, that Council approves the signing of a trilateral agreement. During this time attorneys were appointed to attend to the registration of Erf 286 Groendal in the name of the Municipality and the negotiations with Kabouterland to enter into a lease agreement started. During these negotiations and on suggestion of the attorneys acting on behalf of the Municipality it was decided that the property be registered in the name of Kabouterland and that it then de donated to the Municipality since there was an existing building on it. The registration from Province to Kabouterland and from Kabouterland to the Municipality would have been done on the same day. There are several letters between the attorneys acting for the Belgian Trust, the attorneys acting on behalf of the municipality and the State's attorneys. In 2003 the correspondence stops, and no registration takes place. The property therefore remains part of the mother erf which belongs to the Stellenbosch Municipality.

Since 2002 Kabouterland has been stating that they are the owners of the property. However, in terms of the agreement between the Belgian Trust, Kabouterland and the municipality, the trust would only make the donation on the condition that the property be registered in the name of the Municipality and that the Municipality will attend to the maintenance of the property. The administration has not been able to obtain a copy of the signed agreement however this was the condition on which the 2001 Council resolution was based and the correspondence between the attorneys as well as the Trust confirms the agreement. The donation of the money was accepted and the upgrades to Kabouterland was attended to. This is seen as Phase 1 of the building.

During 2017 a request was received from Cape Winelands Biosphere to allow them to make an offer to build the second phase on Erf 286 Groendal. The offer was accepted

by the Municipality, building works proceeded, the occupation certificate was issued and in April 2019 Efata Creche moved into the building.

Since almost the start of Efata taking occupation there has been numerous issues with Kabouterland. Kabouterland has locked the premises (there is only one access gate for both ECD facilities) and they are refusing a key to Efata and completely control the access to the property for both the staff as well as the children attending Efata. They have also on numerous occasions refused access to the Municipality as well as our consultants. The Directorate Community and Protection services is busy with a capital expenditure project which includes the upgrades to this ECD facility. Due to the refusal of Kabouterland to grant access to our consultants on our own property the project cannot continue. It therefore has a direct influence on the capital expenditure of the Municipality.

Efata has applied for a formal lease agreement which at this stage can't be processed as we are unable to provide them access to the property as and when needed. Efata requires the lease agreement in order to be registered as an ECD. Kabouterland on the other hand refuses to apply for a lease agreement stating on the one hand that they are in fact the owners of the property and on the other hand that there is already a lease agreement in place. We have not been able to find any records of an existing lease agreement and Kabouterland has never paid to make use of the premises. Kabouterland was able to register as an ECD without owning the property or without having a formal lease agreement. We did make enquiries as to how this was allowed however we have not been able to ascertain what documentation they filed in order to be compliant.

The administration has not been able to allocate any formal written lease agreement and Kabouterland has also confirmed in writing that they do not have a copy of a formal written lease agreement.

6.1.2 Previous Council resolution and correspondence:

In October 2024 Council resolved that a letter be hand delivered to Kabouterland indicating that, *inter alia,* they need to apply for a lease agreement within 30 days of the letter and grant full access to the premises to Efata Creche. A copy of the letter that was hand delivered to them is attached hereto as **APPENDIX 2.**

In response to the letter Kabouterland appointed attorneys who provided a written response that is attached hereto as **APPENDIX 3.** The attorneys confirmed it is their instruction that their client is not going to apply for a lease agreement and not going to provide access to Efata Creche, further than the access they are already providing them. They request from the Municipality to attend to a diligent search for the lease agreement, although it has been made very clear that the Municipality disputes that there has ever been a lease agreement. The administration contacted the attorneys to try and reach an amicable solution but was met with extreme hostility. It was explained to the attorneys that they Municipality wishes to formalise the lease agreement in order to comply with the Municipal Finances Management Act and further to attend to the maintenance of the building. It was however made very clear that Kabouterland has no intention of applying for a lease or granting access to the Municipality to attend to the maintenance issues. This also has an effect on the maintenance of the Efate Creche Building and is possibly putting all children attending the schools at risk.

6.2. DISCUSSION

6.2.1 Location and context

The property is located at 25 Stiebeuel Street, Groendal as indicated in Fig. 1 and Fig. 2. Take note that the imaging does not yet reflect the second phase that Efata is currently occupying.

Fig 1. Location

Fig 2. View of Property

6.2.3 Ownership

The ownership of the property's vests with Stellenbosch Municipality.

6.3 Financial Implications

Currently neither of the ECD's are paying any rent for the use of the property. Although the buildings were donated they should still be paying for the use of the land and all services. The Municipality is carrying the costs for the registration of the property.

There is also an implication for the capital expenditure for the Community and Protections Services Department in that they are not able to spend the money on the upgrades, although they have already paid the consultants to attend to draw up the specifications as well as the building plans.

If Council decides that eviction proceedings should be instituted then the Municipality will have to pay for the legal fees.

6.4 Legal Implications

Should Council decide to institute eviction proceedings against Kabouterland attorneys will have to be appointed to attend to the necessary.

6.5 Staff Implications

No additional staff implications.

6.6 Previous / Relevant Council Resolutions

COMMUNITY SERVICES COMMITTEE: 2001-03-12: ITEM 3.1

RECOMMENDED:

a) That Council approve the signing of a trilateral agreement, dealing with the issues as set out in the report;

b) That the maintenance of the building be referred for consideration as an additional expense on the 2001/2002 operating budget;

c) That Council consider providing bridging finance only until the R70 000.00 contribution by Mr McGahey is paid with the selling of unit number 70; and

d) That the recommendations be referred to Council via the Executive Committee Meeting.

FIRST EXECUTIVE COMMITTEE: 2001-03-20: ITEM 3.5

RECOMMENDED:

That the recommendations (a), (c) and (d) be accepted subject to the following amendments / additions:

a) That the operational costs of the creche not be the responsibility of Council initially or in future pending further investigation;

b) That the necessary provision for maintenance funds be made by the lessee; and

c) That the lessee submit audited financial statements to Council on an annual basis.

COUNCIL: 2001-03-27: ITEM 6.5

RESOLVED (nem con)

That the Executive Committee recommendations be approved.

EXECUTIVE MAYORAL COMMITTEE: 2024-09-26: ITEM 7.3.2

RESOLVED

That the matter be referred back for further administration.

26TH COUNCIL MEETING: 2024-10-30: ITEM 10.3.4

RESOLVED (majority vote with 4 abstentions)

(a) that Council takes note of the challenges that is experienced with Kabouterland;

(b) that the Administration writes a letter to Kabouterland to inform them that they have 30 days to apply for a lease agreement, alternatively provide a copy of a signed lease agreement with the Municipality, failing which the municipality will appoint an attorney to attend to an eviction;

(c) that the letter further indicates that Kabouterland must provide full access to Efata Creche to the premises, failing which an attorney will be appointed to attend to an eviction; and

(d) that the letter states that Kabouterland must give reasonable access to the Municipality to do inspections, upgrades and maintenance on the premises, failing which an attorney will be appointed to attend to an eviction.

6.6.1 Risk Implications

Kabouterland will continue to use the premises without paying and further refusing access to the Municipality as well as the staff and children of Efata. If the building is unsafe and anything happens to anyone making use of the premises, the Municipality will be held liable.

6.7 Comments from Senior Management

6.7.1 Director: Infrastructure

No further comments.

6.7.2 Director: Planning and Economic Development

No further comments. Item is supported.

REMAINDER: BY DEED OF TRANSFER T43509/80 THE WITHIN PROPERTY IS

Subject to the following conditions imposed by the Administrator of the Cape of Good Hope in terms of Section 9 of Ordinance 33 of 1934 when approving the subdivision of Erf No. **233 Le Roux.**

(i) The owner of this erf shall without compensation, be obliged to allow gas mains, electricity-, telephone- and television cables and/or wires and main and/or other waterpipes and the sewage and drainage including stormwater of any other erf or erven to be conveyed across this erf, if deemed necessary by the local authority and in such manner and position as may from time to time be reasonably required. This shall include the right of access to the erf at any reasonable time for the purpose of constructing, altering, removing or inspecting any works connected with the above.

(ii) The owner of this erf shall be obliged, without compensation, to receive such material or permit such excavation on the erf, as may be required to allow use of the full width of the street and provide a safe and proper slope to its bank owing to difference between the levels of the street as finally constructed and the erf, unless he elects to build retaining walls to the satisfaction of and within a period to be determined by the local authority.

CERTIFICATE AND APPLICATION

I, the undersigned,

WILSON FREDERICK FEINAUER

in my capacity as Control Administrative Officer in the Department of Community Development authorised thereto by the COMMUNITY DEVELOPMENT BOARD which authority is filed in C/B No. 291/13.

A. Certify that:

1. The Community Development Board (hereafter referred to as the Board) has acquired all the lots or erven within that portion of the township of le Roux situate on the land defined by Diagram No. 10142/76.

2. On the 11th March 1977, the date determined by the Board under the provisions of section 16 of Act No. 3 of 1966, all the public places within that portion of the township defined by the said diagram, vested in the Board in terms of section 16 aforesaid.

3. The Board is, in terms of section 16 aforesaid, entitled to obtain transfer in respect of the land (defined by the said diagram) comprising such lots or erven and public places, free from all restrictive conditions, servitudes or encumbrances, as if that land had become vested in the Board under circumstances contemplated in section 31(1) of Act No. 47 of 1937.

Seels hoef nie oorplak te word nie—ingevolge artikel 6 van Wet 58 van 1957, as amended.
Stamps need not be affixed by virtue of section 6 of Act 58 of 1957, as amended.

4. The .....

ADJUNK-STAATSPROKUREUR
DEPUTY STATE ATTORNEY

4. The provisions of any law in connection with the change of ownership in the land acquired in consequence of vesting have been complied with.

B. Apply to the Registrar of Deeds to make the appropriate entries prescribed by section 16(2)(b) of Act No. 3 of 1966, viz:

that the conditions of title attaching to any erf or lot in that portion of the said township defined by the said diagram have lapsed.

C. Request the said Registrar to register transfer to the Board of the aforesaid land which have vested in terms of section 16 of Act No. 3 of 1966 as hereinbefore set out, free of all restrictive conditions, servitudes or encumbrances.

SIGNED at CAPE TOWN on the 12th
day of NOVEMBER 1979.

KABOUTERLAND
ERF 286 GROENDAL (LE ROUX)
FRANSCHHOEK

BY HAND

Dear Sir / Madam

STELLENBOSCH MUNICIPALITY / KABOUTERLAND

We refer to the abovementioned matter.

We confirm that a report on the history and current status of the use of Erf 286 Groendal (Le Roux) was put before Council on 30 October 2024. Council resolved as follows:

a) That Council takes note of the challenges that is experienced with Kabouterland;
b) That the Administration writes a letter to Kabouterland to inform them that they have 30 days to apply for a lease agreement, alternatively provide a copy of a signed lease agreement with the Municipality, failing which the Municipality will appoint an attorney to attend to an eviction;
c) That the letter further indicates that Kabouterland must provide full access to Efata Creche to the premises, failing which an attorney will be appointed to attend to an eviction; and
d) That the letter states that Kabouterland must give reasonable access to the Municipality to do inspections, upgrades and maintenance on the premises, failing which an attorney will be appointed to attend to an eviction.

You are herewith notified to:

a) Provide the Municipality with a signed lease agreement in the alternative apply for a lease before 17 April 2025;
b) To immediately give access to Efata Educare to the property and remove any restrictions to deny them access; and
c) To provide immediate access to the officials of the Municipality and/or any service provider on behalf of the Municipality.

We attach hereto an application for lease of Municipal land to be completed and emailed to Yolande.vandenberg@stellenbosch.gov.za before 17 April 2025 if a signed lease cannot be produced.

We confirm that should you not provide full access to Efata Creche on the day of receiving this letter we will proceed to appoint an attorney to proceed with the eviction against Kabouterland. This includes removing the lock that you have put on the gate of the premises alternatively providing them with a key to the lock and gate.

We further confirm that on request of the Community Services Department of the Municipality you will provide reasonable access to the Municipality and/or its consultants to attend to inspections, upgrades and maintenance with immediate effect, failing which an attorney will be appointed to attend to the eviction of Kabouterland.

Yours faithfully,

.....

Dear Madams DeBeer and van den Berg

RE: KABOUTERLAND/STELLENBOSCH MUNICIPALITY – ERF 286 - LEASE

We act for our client, Kabouterland Community Educare, located at 25 Stiebeuel Street, Franschoek (Erf 286)("the Property").

The above matter, and the correspondence from Ms DeBeer to our client, dated 10 March 2025, refer.

We are instructed by our client that our client considers that it is nigh inconceivable that there is no lease agreement (or equivalent and/or similar document) providing for the terms of our client's occupation of the Property, considering the extensive documentary evidence pointing to the existence of same. In light of that, our client will oppose any application for its eviction from the Property.

Our client notes the demands in paragraphs "b)" and "c)" of your letter. We are instructed to convey that our client's view with respect to those demands is as follows:

1. Our client has occupied the property since 1988, and during that time the Municipality have never attempted any maintenance at the Property. Our client is perplexed as to why they

would require access for same now, and for what purposes such access is required – kindly elaborate.

2. Efata Educare has reasonable access. The access gate is open from 07:00 to 08:00 and locked during the operating hours of 08:00 to 16:00. Our client has never denied access, and, on prior notification, opens the access gate for them when they want to enter or leave - sometimes is several times a day. The Municipality should rather look to the conduct of Efata Educare in this regard, as there was a protection order granted by the Paarl Magistrate's Court, on 23 November 2023 for a five year period against Efata Educare's principal for placing children at risk. Apart from the protection order, our client has had to notify the Department of Social Development, in terms of Section 110 of the Children's Act 38 of 2005, of child neglect at Efata Educare. Our client's approach to access control speaks to those issues, and is in the best interests of the children at both facilities.

Our client remains open to a good faith and amicable resolution of the issues addressed in your correspondence, but the first step to achieve same must be a proper and diligent search by the Municipality to uncover a copy of the lease (or equivalent and/or similar document) between our client and the Municipality. Should the Municipality fail to provide such a copy of the lease (or equivalent and/or similar document) to our client by the 30th May 2025, then our client reserves its rights to make a request for same to the Municipality's Information Officer in terms of the provisions of the Promotion of Access to Information Act 2 of 2000.

Our client is from its side taking every possible step to uncover a copy of the lease agreement (or equivalent and/or similar document).

Failure to address any of the averments or claims in your correspondence should not be construed to constitute agreement with or acknowledgement of liability to same, and our clients reserve their rights.

Yours faithfully,

……..

1. SUBJECT: PROPOSED INFILL HOUSING DEVELOPMENT OF THE FOLLOWING OF ERVEN 11554- 11457 AND ERVEN 11452 – 11463, LINDIDA, IDAS VALEY, STELLENBOSCH

2. PURPOSE

To report to Council on the feasibility and the suitability of the sites for residential development in Idas Valley. The study was to investigate and assess the availability of infrastructure service and to provide a cost analysis for any upgrades (see report attached as **ANNEXURE 1**).

3. DELEGATED AUTHORITY

Council

4. EXECUTIVE SUMMARY

Stellenbosch Municipality is actively involved in creating housing opportunities for the disadvantaged, however there are an array of challenges including resources and allocations from National and Provincial Government as well as the availability of land for housing (Integrated Development Plan IDP, 5th Generation 2022- 2027). This project serves as a means to develop vacant and underdeveloped portions of land within Idas Valley to address the housing need.

The particular goal of this study was to perform an investigation to determine whether the proposed development area can be accommodated in the existing infrastucture systems or not. There was an urgent need for the Property to be investigated for an integrated urban development, providing for housing choice. This will be achieved with due consideration for the particular environment within which the project is located as well as the optimum development potential of the subject properties.

The report conducts a site investigation of the relevant properties, to make recommendations on the highest and best use and provide high level cost estimates to install all services (Water, sewer, roads and electrical services) to the respective erven.

The following sites were under investigation:

The location

Erven 11554- 11570 is situated in Talana Street which is off Lindida Drive in the suburb of Idas Valley, Stellenbosch. There is currently a stormwater trench running between the erven and the existing houses. A fenced play park is currently located on erven 11554- 11557. Erven 11554- 11570 is represented graphically in the Figure 1 below.

Figure 1: Erf 11554 to 11570

The Location

Erven 11452- 11463 is situated in Davy Street in the suburb of Idas Valley, Stellenbosch. Erven 11452- 11463 is represented graphically in the Figure 2 below.

Figure 2: Erven 11452- 11463 local context

5. RECOMMENDATIONS

(a) that the outcome of the link and bulk investigation study be noted;

(b) that the section of Newman Street be built to provide access to the erven11452 – 11463, Lindida, Idas Valley;

(c) that the stormwater channel behind erven 11554-11457 along Talana Street be upgraded;

(d) that the proposed development of the 29 erven be implemented to install water, sewer and stormwater connections;

(e) that erven 11452 – 11463, Lindida, Idas Valley be allocated for emergency housing in terms of the qualifying beneficiary criteria under the heading: Beneficiary Selection Criteria 6.3.1;

(f) that each of erven 11452 – 11463, Lindida, Idas Valley be subdivided into two (2) portions;

(g) that erven 11554-11457, Lindida, Idas Valley be allocated for first time homeowners in terms of the qualifying beneficiary criteria under the heading: Beneficiary Selection Criteria 6.3.2;

(h) that each of erven 11452 – 11463, Lindida, Idas Valley be subdivided into two (2) separate erven; and

(i) that Council considers funding the upgrading costs of R1,981,022.02 for the development of erven 11554-11457 and erven 11452 – 11463, Lindida, Idas Valley, Stellenbosch during the next budget process.

6. DISCUSSION / CONTENTS

6.1 Background

Imodie Projects was appointed by Stellenbosch Municipality to undertake a link and bulk investigation study (see attached as **ANNEXURE 1**) for the development of erven 11554-11457 and erven 11452 – 11463, Lindida, Idas Valley, Stellenbosch.

The proposed development is situated within an existing residential area, with uncertainty about the availability, level of service and/or condition of the existing services. The land is zoned for residential purposes and has already been subdivided, and form part of an approved General Plan.

The report attached as **ANNEXURE 1** is to provide technical information regarding the external and internal civil engineering services required for the implementation of the proposed vacant erven.

The scope of work during the feasibility phase consisted of:

- Assessing the availability of bulk water supply;
- assess availability of bulk sewerage handling;

- assess water pressure during peak demand period;
- assess sewerage flow during peak demand period;
- assess stormwater flow and capacity in channel over erven in Talana Street erven; and
- assess the construction of the extension of the Newman Street to Davy street to provide access to the subject erven.

6.2 Discussion

The Stellenbosch Municipality has an important responsibility of ensuring that all its citizens reside in developable, formalised, safe and sustainable human settlements and to the extent possible, within closer proximity to employment opportunities that would improve the quality of life of all citizens.

Based on this investigation, the following conclusions can be made:

a) The water connection to the erven is not in place.
b) From investigation into the sewer network, it appears that the sewer connections are in place, but assessments were based on a sample size and provision has been made for potentially 10 house connections.
c) The section of Newman Street must be built to provide acceptable access to a number of the new houses.
d) The stormwater channel at the back of Talan Street does not have sufficient capacity to accommodate the 1:50 year flood. Liaison with local residents revealed that flooding of the houses in the vicinity has taken place in the past directly as a result of the overflow from the inadequate channel.
e) The proposed development of the 29 erven can be implemented safely if the following are implemented first:
    - Install water connection;
    - Install sewer connections;
    - Construct section of Newman Street; and
    - Upgrade stormwater channel behind erven along Talana Street.
f) The upgrading costs amount to R1,981,022.02.

6.3 Beneficiary Selection Criteria

6.3.1 Non-Contribution Based Subsidy Programme (Enhanced Serviced Sites) Only applicable to erven 11452 – 11463, Lindida (Idas Valley), Stellenbosch

a) Must be on the Municipality's Housing Demand Database.
b) Must be a South African citizen.
c) Must reside in the project catchment area which is Ward 5 and proof of address by the applicant/s to be submitted.
d) Must be married/cohabiting with a long-term partner/single with financial dependants/if over 60 years of age or has a permanent disability can apply without a dependant.
e) Must earn from R0 - R7 000.
f) Prioritise households living in dire conditions. A detailed report of the condition of living with pictures and any other supporting documentation

be submitted to the Director: Planning and Economic Development for recommendations to the Municipal Manager for final approval of such households.

g) Prioritise potential beneficiaries over the age of 40.
h) Prioritise households with applicants or beneficiaries living with permanent disability as per SASSA definition.

6.3.2 Contribution based subsidy programme (First Home Finance Programme (FHFP) previously known as FLISP). Only applicable to Erven 11554 to 11570, Idas Valley

Principle:

This type of subsidy uses the principle of the applicants "self selecting" of which demand will equate to verifiable proof that the applicant/s have sure and access to the financial resources required to purchase the property.

If the demand outstrips the supply, then registration date ordering will be used

Round 1

a) Must be a South African citizen.
b) Must reside in Idas Valley- utility account/lease agreement/proof of address or sworn affidavit by third party to substantiate domicile.
c) One unit per purchaser.
d) Must be a first time owner.
e) Should have a combined income of up to R30 000 per month before tax.
f) Should potential buyer have moved out of Idas Valley due to circumstances, proof of municipal account or sworn affidavits by third party may be used as proof of domicile.
g) Should the potential benefciairy qualify for FHFP the financial institution will facilitate the subsidy application.

Round 2

a) Must be a South African citizen.
b) Must reside or work with the WC024 - utility account/lease agreement/proof of address or sworn affidavit by third party/proof of employment to substantiate domicile.
c) One unit per purchaser.
d) Must be a first time home owner.
e) Should have a combined income of up to R30 000 per month before tax.
f) Should potential buyer have moved out of Idas Valley due to circumstances, proof of municipal accou.nt or sworn affidavits by third party may be used as proof of domicile
g) Should the potential beneficiaries qualify for a FHFP, the financial institution will facilitate the subsidy application.

6.4 Financial Implications

That Council allocate funding for the upgrading costs of R1,981,022.02 for the development of erven 11554-11457 and erven 11452 – 11463, Lindida, Idas Valley, Stellenbosch.

6.5 Legal Implications

None

6.6 Staff Implications

This report has no staff implications to the Municipality.

6.7 Previous / Relevant Council Resolutions:

None

6.8 Risk Implications

None

Annexure A – Upgrading Costs

1 INTRODUCTION

1.1 Background

Imodie Projects was appointed by Stellenbosch Municipality under RFQ 58/25 to undertake a link and bulk investigation study for the further development erven 11554-11457 and erven 11452 – 11463, Lindida (Idas Valley), Stellenbosch.

The location of the erven is shown in Figure1.1 below.

Figure 1.1: Location of erven for further development

The proposed development is situated within an existing residential area, with uncertainty on the availability, level of service and/or condition of the existing services. The land is zoned for residential purposes and has already been subdivided, and form part of an approved General Plan.

This report was compiled to provide technical information regarding the external and internal civil engineering services required for the proposed development.

1.2 Goals and Objectives

The goal of this report is to assess the water and sanitation services, as well as the handling of stormwater for the implementation of the proposed housing project. The specific objectives are:

a) To assess availability of water and sanitation service.
b) To assess capacity and level of service of water and sanitation services
c) To assess the handling of stormwater on the sites

1.3 Scope of the Study

The proposed development is located in two locations in Talana Street (Erven 11554 – 11570) and Davy Street (Erven 11452 -11463). The study will cover the following services:

- Water
- Sanitation
- Roads
- Stormwater

The technical scope include:

- Assessing the availability of bulk water supply
- Assess availability of bulk sewerage handling
- Assess water pressure during peak demand period
- Assess sewerage flow during peak demand period.
- Assess stormwater flow and capacity in channel over erven in Talana Street erven.
- Assess road access needs.

2 WATER SUPPLY

2.1 Bulk Water Supply

This is an infill development with existing services directly adjacent where the erven will be connected to. The sufficiency of the storage capacity as well as the residual water pressure during the peak hour periods have been investigated.

Figure 2.1: Existing water supply in Talana Street according to Municipal records

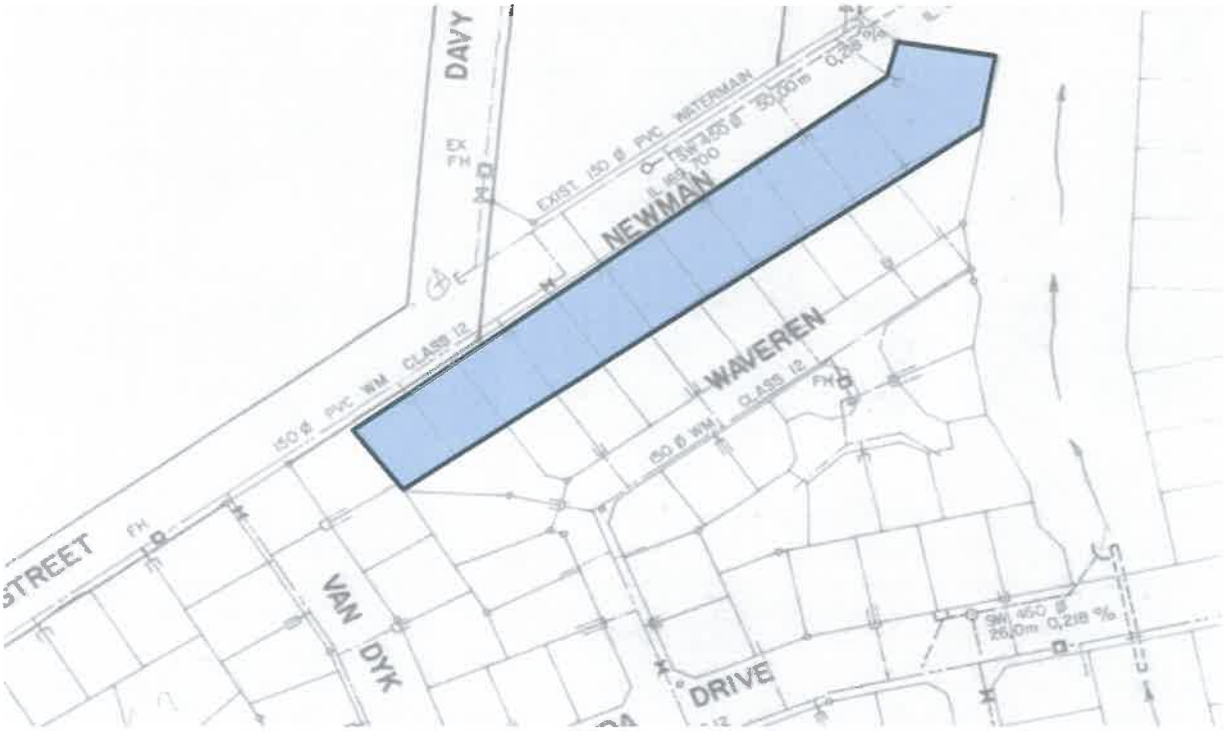

Figure 2.2: Existing Water supply in Newman Street according to Municipal Records

2.2Water Demand

The water demand for the proposed development will be based on Table 9.11 and Table 9.14 of the "Guidelines for Human Settlement Planning and Design" – Red Book. Provision is made for full-flush sanitation and irrigation.

The table below reflects the estimated water consumption from Table 9.11 and Table 9.14 to be applied once the development is approved:

Table 2.1: Water Demand along Talana Street

Land Use	Gross Building Area / Units	Annual Average Daily Demand (AADD)	Water Demand (kℓ/d)
Residential 1 in Talana Street	17 erven	900ℓ/day/erf	15,3
Residential 1 in Davy	12 erven	900ℓ/day/erf	10,8
		Total	**26,1**

The required storage capacity for these erven is 24hours of average daily demand and for the above demand, the required storage is 52,2kℓ or 0,0522Mℓ. The area is currently being provided with water from the reservoir along the Helshoogte Road, which has the capacity to accommodate the additional storage demand which is less than 1% of the storage capacity.

2.3 Internal Water Layout

The internal layout of the water reticulation system will be designed to accommodate peak demands in terms of the "Guidelines for Human Settlement Planning and Design".

2.4 Design Criteria and Materials

- Annual average daily demand l/day (AADD)
  - Residential and other - refer to Section 2.2 above
  - Instantaneous Peak - 4 (AADD)
  - Daily Peak - 2.4 (AADD)
  - Losses - 10%

- Fire protection
  - Fire Hydrants - Quick Coupler fittings or as requested by the fire department, maximum distance 180m apart
  - Development - 1500 l/min @ 7m residual head.

- Water network uPVC pipes Class 9 minimum, (SABS approved) minimum pipe diameter of 110mm
  - Maximum pressure - 90 meter
  - Minimum pressure - 24 meter
  - Maximum flow velocity - 2.0m/s

- Valves and fittings - Class 12 or a class higher than the required pipe class

2.5 Existing Water Infrastructure

The site has been inspected with an aim to expose existing services. We found the following existing services which have been plotted in and is shown Annexure A. This is the actual as built infrastructure. It is clear that the water connections to the individual houses are not installed. No water **meters** have also been installed. The **sewer line** has also been installed **and some sewer connections have been exposed. The possibility exist that some of the sewer connections may not be installed.**

The storm water infrastructure **consists** of an open v-drain that runs across the erven in Talana Street as shown on the drawing in Annexure A.

2.6 Flow capacity and Residual Pressure

The residual water pressure at the houses were measured on 26 November 2024 during the morning and afternoon peak hour periods. The location of where these measurements were made is shown in Figure 2.3

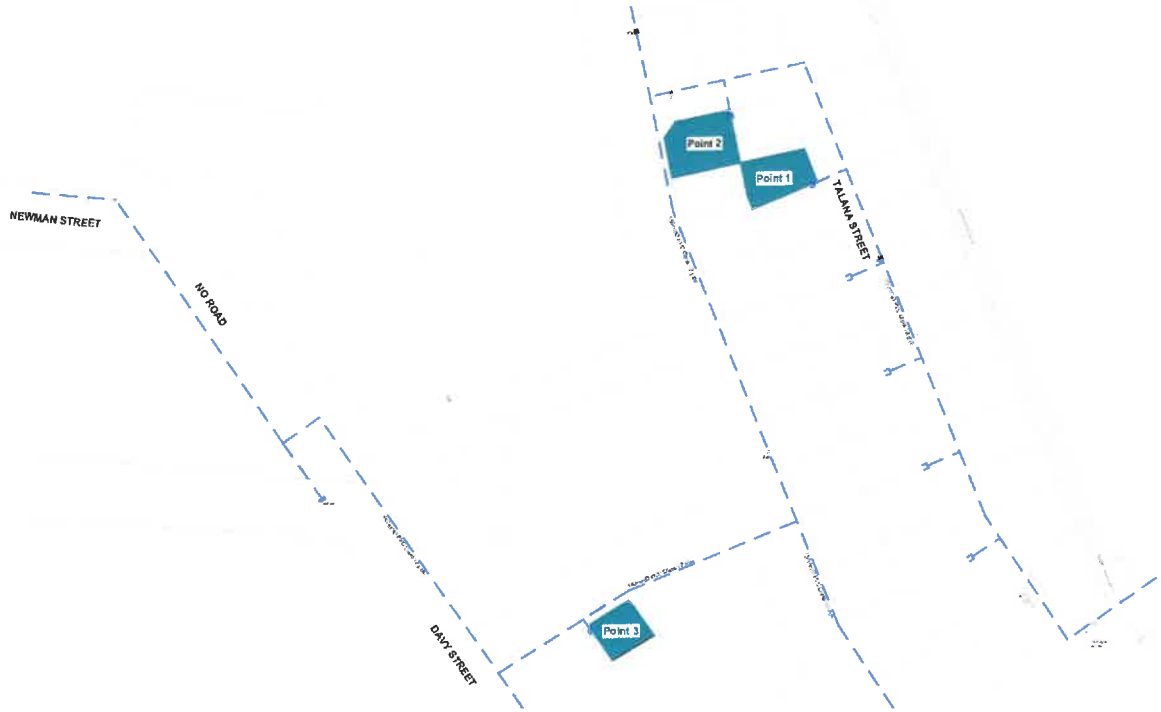

Figure 2.3: Location of residual water pressure measurements (Points 1 - 3)

The readings of these measurements are shown in Table 2.1 below.

Table 2.1: Residual water pressure measurement

Position	Morning peak period Pressure (bar)	Evening peak period Pressure (bar)
No1	7	6,5
No2	7	6,5
No3	7	6,5

From these readings it can be seen that the water pressure during the peak draw down periods **is approximately 7 bars, which is equivalent to approximately 70m water pressure.**

3 SEWER RETICULATION

3.1 Bulk Sewer

The existing sewer network according to municipal records is shown in Figures 3.1 and 3.2. The erven are all provided with a house connection according to these drawings. The sewerage is eventually transported towards the Stellenbosch Sewerage Treatment plant, which has not long ago been upgraded and will be able to accommodate the additional effluent of the 29 houses.

Figure 3.1: Existing sewer network in Talana Road according to municipal records

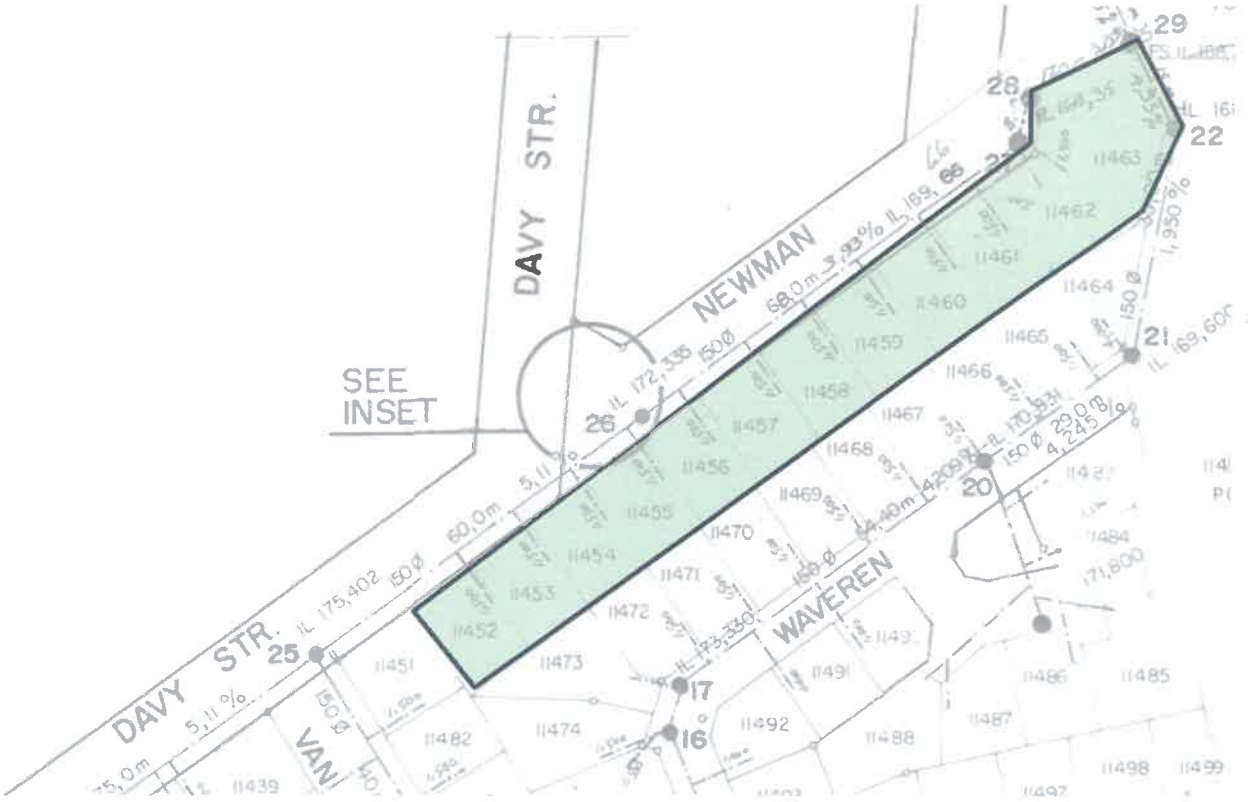

Figure 3.2: Existing sewer network in Newman Road according to municipal records

3.2 Sewerage Run-Off

The sewer flow for the proposed residential units will be estimated at 80% of the average daily water demand. Provision is made for full-flush sanitation.

The table below reflects the estimated sewer flow determined as indicated above.

Table 3.1: Sewerage run-off

Land Use	Units	Annual Average Daily Flow (AADF)	Sewerage Outflow (kℓ/d)
Residential 1	29 units	720ℓ/day/unit	20,88kℓ/day
		Total	**20.8kℓ/day**

The bulk sewerage treatment plant has a capacity of 35,000 kℓ/day. The additional outflow of the

houses is an additional 20,88kl which is less than 0,06% of the capacity of the treatment plant. This is a negligible load and can be comfortably accommodated.

3.3 Design Criteria and Materials

uPVC Class34 Free-flow pipe material as well as pre-cast concrete manholes to SABS standards will be used in the construction of the sewer network where needed with the following minimum requirements:

3.3.1 annual average daily flow l/day (AADF)

3.3.1.1 Residential and other - refer to Section 2.2 above

3.3.1.2 Instantaneous Peak - 4

3.3.1.3 Peak Factor - 2.5

3.3.1.4 Infiltration Allowance - 15%

3.3.2 Network and Main Sewer:

3.3.2.1 Minimum diameter pipe 160mm;

3.3.2.2 Minimum depth of cover 1m

DIAMETER	MINIMUM GRADIENT	MAXIMUM DEPTH OF FLOW	MINIMUM VELOCITY
160mm	1/200	0.85D	0,7m/s

3.3.3 Materials:

- Pre-cast concrete manholes from 1000mm diameter;
- Manhole frames and covers – Polymer Concrete (Lockable)
- Maximum spacing of manholes - 75 meters;
- Building connections (110mm) will be supplied (1 meter from erf boundary);
- Bedding and Backfill – SANS 1200

The peak flow from the proposed erven is as follows:

No of erven	Flow rate	Peak Factor	Infiltration	Peak flow (ℓ/sec)
Talana Str 17	720ℓ/day/unit	2,5	15%	0,4ℓ/sec
Newman Str 12	720ℓ/day/unit	2,5	15%	0,28/sec

3.4 Existing Sewer Layout from site inspections

The internal sewerage system with house connections is in place at the positions we dug open. We are not confident that all connections are in place and provision has been made for the installation of some of the connections. No additional designs are required and the capacity of the sewerage systems have been investigated and is discussed in section 3.8 below. The existing as-built sewer network in the areas is shown in Figure 3.3 and 3.4.

3.5 Flow capacity Analysis

Sewerage flow depth have been measured during the morning and evening peak hour periods. The positions of these measurements are shown in Figure 3.3 below.

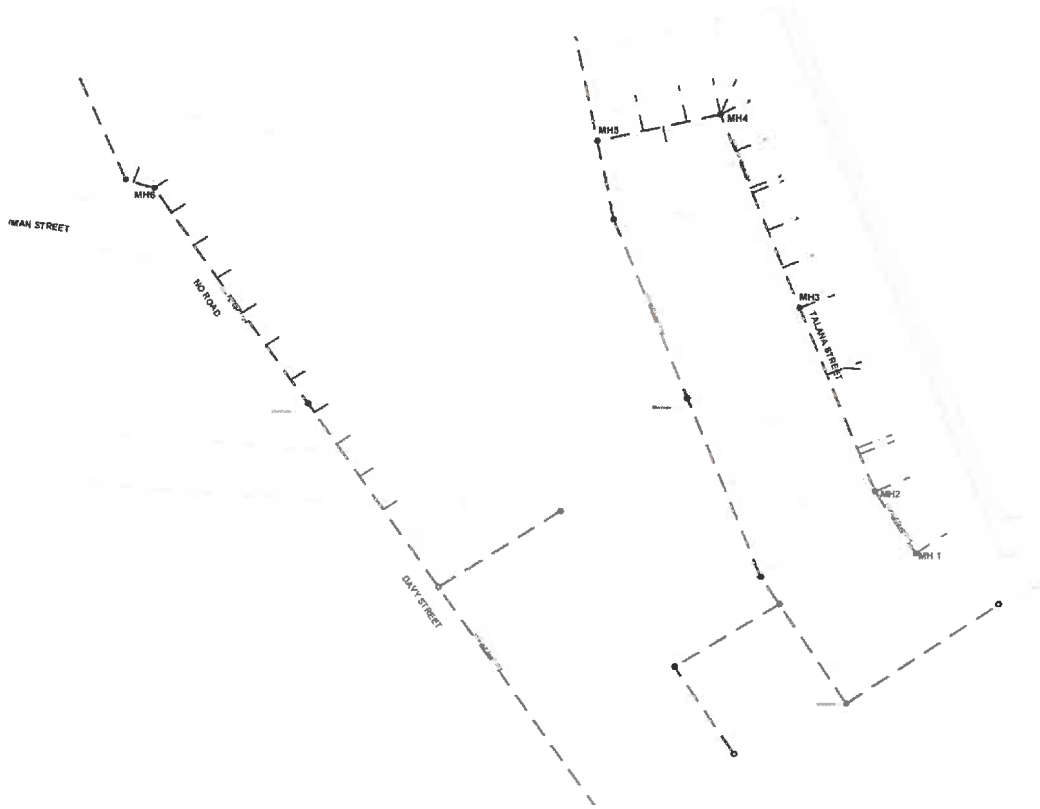

Figure 3.3: Existing Sewer network as obtained from site inspections and observations.

The flow data as measured on 26 November 2024 is shown in Table 3.2.

Table 3.2: Flow measurement results

Manhole No	Slope	Flowdepth	Flow	Capacity	Utilisation
MH1		0			
	2,3%		0,3ℓ/sec	12ℓ/sec	2,5%
MH3		20mm			
	1,75%		0,25ℓ/sec	11ℓ/sec	2,3%
MH4		20mm			
	1,5%		3,0ℓ/sec	10ℓ/sec	30%
MH5		60mm			

From the above analysis it is clear that sufficient capacity is available in the pipes to accommodate the additional flows of 0,4l/sec in Talana Street and 0,28l/sec in Newman Street. After the development of the houses the sewerage infrastructure will still only operate at less than 40% of its capacity.

4 ROADS

4.1 Layout and Access

The erven are located adjacent to existing roads. Talana road is a two-lane undivided surface road which can be classified as an Class 4 Access road. Newman street is for the section in front of the proposed erven not surfaced and no formal road exist. A formal road needs to be constructed as indicated in Figure 4.1 below.

Figure 4.1: Existing gravel road to be surfaced

4.2 Internal Roads

Access to the individual areas within the development will be obtained from an internal road system.

All geometry will be designed according to applicable standards. The proposed road that needs to be built in Newman Street can be classified as a Class 5 access street which will be an undivided single carriageway two lane road.

4.3 Design Criteria

The proposed pavement design will be based on anticipated traffic volumes and ground conditions. The anticipated design life of the proposed pavement will be 15 to 20 years on provision that repairs to the surface will be made where necessary to maintain the impermeability and integrity during the design life of the road.

Table4.1 indicates the proposed pavement design for the Access Roads in Newman Street.

Table 4.1: Pavement Design for Access Roads

Surface	25mm Asphalt
Base	150mm G2 type base
Sub-base	150 G6
Road-bed	150mm thick layers compacted to 93% of modified AASHTO density. Minimum CBR = 7 at 93% of modified AASHTO density – G9

4.4 Road Construction Standards

Roads are to be constructed to the standards specified in SANS 1200. Road materials conforming to the requirements of TRH 14 will be specified.

5 STORM WATER MANAGEMENT

5.1 Bulk Storm Water

The storm water runoff captured in the internal storm water network as well as the surface flow from the adjacent area development will flow towards the stormwater channel at the back of the erven in Talana Street. The drainage area has been determined to be 48ha.

Figure 5.1: Drainage catchment area (48ha)

5.2 Run-off Calculation

The stormwater run-off has been calculated using the Rational Design Formula, which is the most appropriate and, in our circumstances, and was utilized to determine the 1:2 year, the 1:5 year, the 1:10 year, the 1:20 year, and the 1:50 year recurrence interval flood discharge values.

The Rational Method relates the discharge associated with the rainfall event in the following relationship:

$$Q = 0{,}278 * C * I_T * A$$

Where

Q	=	Peak discharge measured in m^3 per second
C	=	Dimensionless run-off coefficient
I_T	=	Average Rainfall Intensity measured in millimeters per hour

A = Effective catchment area measured in km^2.

In calculating the capacity of the river channel and its surrounding floodplains, Manning's Equation was utilized:

$$Q_c = [A * (A / P)^{0.667} * S_o^{0.5}] / n$$

Where

Q_c = Flow Capacity measured in m^3 per second

A = Area

P = Wetted perimeter

S_o = Slope

n = Constant relating the surface roughness of the conduit

Different values of **n** were assumed for the main channel and the flood plains next to it.

These capacities were calculated for the section of houses along Talana street that could potentially flood the properties.

The natural drainage pattern of the terrain is towards the north. The area drains overland towards a stream that ends up in the channel behind the proposed houses along Talana Street.

Run-off and peak flow rates will be calculated according to selected return periods. The 1:50-year recurrence interval will be used for the major system design. Subsurface drainage and the 1:5-year recurrence interval is used for storm water design of the subsurface system. The design of the internal subsurface system is outside of the scope of this report as the existing road infrastructure already should have taken this into consideration. Some existing subsurface infrastructure on the site confirms this. The existing stormwater channel along Talana Street will be evaluated to assess whether it has the capacity to handle the runoff. Should sufficient capacity not be available, some changes to the channel will be proposed in order to manage the 1:50 year flood to protect the adjacent properties. A formal drainage system of pipes or canals will be provided to convey storm water.

Erosion protection should be provided in the form of concrete lining or grassblocks. Energy dissipaters will be provided at the lower end of the watercourse and at sites where the drainage is diverted away from roads.

The drainage system will be designed to minimize the impact of the development on the storm water characteristics of the property and adjacent properties by utilizing:

5.2.1 Surface drainage where possible.

5.2.2 Sub-surface (underground) pipe systems to convey storm water from higher laying areas.

5.2.3 Erosion protection, stabilization of erodible materials, and sediment control.

5.2.4 Retention where applicable.

5.3 Discharch from catchment area

The effective catchment area was estimated from topographical maps, and was estimated to be approximately 0,48 km^2.

→ A = 0,48 km^2

The longest watercourse in the catchment area was estimated from the same topographical maps, and estimated to be approximately 1,39 km long.

→ L = 1.39 km

The average slope was estimated using the 10-85 principle, whereby the height difference between the 10^{th} percentile of the distance and the 85^{th} percentile is used.

→ S_{av} = 0.08937m/m

The Mean Annual Rainfall for the area was obtained from Figure 4.7 from the Road Drainage Manual and was determined to be 380 mm.

→ MAR= 860mm

5.4 Flood Line

The erven along Talana road is a concern for flooding due to the water running through the stormwater channel at the back of the erven. As previously stated, the area draining toward this channel is 48 ha.

The capacity of the channel will be analysed and the safety of the development of houses will be evaluated. The stormwater runoff has been calculated and is shown below.

Table 5.1: Lindida Talana Street : Stormwater runoff analysis
Dertermination of Floods Using Rational Method

Catchment Area (A)	0.48	km²	Top Elevation	350	m
longest watercourse	1.85	km	Bottom Elevation	196	m
M.A.R	880	mm	[illegible]	154	m
[illegible]	1.39	km	Slope	0.11099	m/m
			Avarage grass r	0.3	

Time of Concentration tc

$t_c = 0.604(rl/S^{0.5})^{0.467}$ $t_c =$ 0.67

	Return Period T (yrs)	2	5	10	20	50
Rainfall Intensity	Point Rainfall h (mm)	33.57	44.19	54.41	66.99	88.18
	Point Intensity i = h/tc (mm/hr)	50.09	65.94	81.18	99.95	131.6
	Areal Reduction a	0.995	0.995	0.995	0.995	0.995
	Intensity Averaged Over Area	49.84	65.61	80.78	99.45	130.91
Runoff Coefficient	Rural C1	0.21	0.23	0.27	0.246	0.3403
	Urban C2	0.38	0.38	0.38	0.38	0.38
	Lakes C3	0.00	0.00	0.00	0.00	0
	C	0.29	0.30	0.33	0.31	0.36
Peak Discharge (Q)	Q = 0.278 CIA (m^3/s)	**1.94**	**2.67**	**3.52**	**4.14**	**6.26972**

	Areal Weighting Factors: alpha + beta + gamma =1			
	Rural	**Urban**	**Lakes**	**Sum**
Catchment Area split	0.5	0.5	0	1

Rural C1	Surface slope in % Cs	Soil Permability Cp	Vegetation Cv
	0.16	0.1	0.15
0.3403	50 yrs		
0.27	20 yrs		
0.246	10 yrs		
0.23	5 yrs		
0.205	2 yrs		

Urban C2	Lawns	Residential	Streets	Bussiness	Sum
0.38					
Areal %	0.45	0.4	0.15	0	1
F_t	0.2	0.4	0.85	0	

From the above calculation, it can be seen that the 1:50 stormwater flow will be 6,27m3/sec. The capacity of the stormwater channel as it currently is having been calculated and is as follows:

Table 5.2: Current Capacity of SW channel in Talana Street

		v-drain	Trapezoidal-drain	
Input	b			0
	d			1.1
	h			1.20
	w			0.8
	Pw			4.00
	1/n			83.33
	A			0.88
	$R^{(2/3)}$			0.36
	$S^{0.5}$			0.15
Input	S = 1/			46
Q m3/sec		**0**	**0**	**3.94**

$$(Q) = \frac{1}{n} \times A \times R^{(2/3)} \times S^{0.5}$$

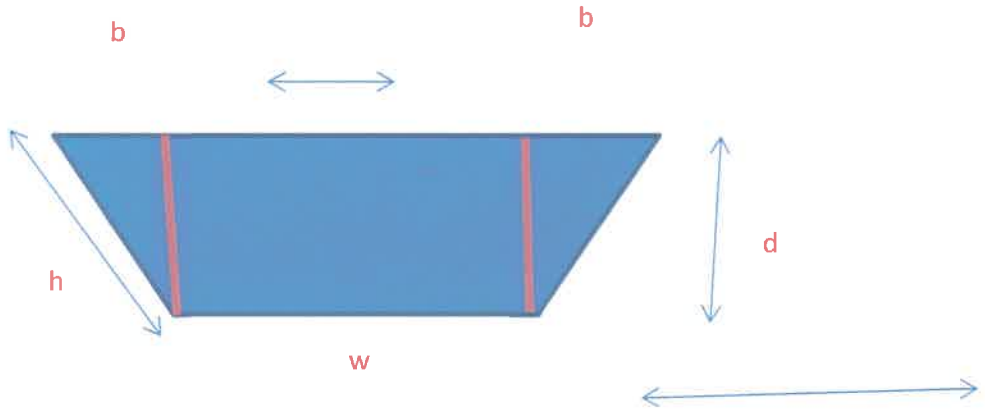

Figure 5.1: Channel profile

From the analysis it is clear that the **capacity** of **3,94m³/sec** is substantially less than the expected 1:50 peak flow of 6,27m³/sec. The risk exist that the proposed houses will be flooded. During interaction with the local residents along Talana street on the opposite side of the road, it was established that flooding of their houses did indeed occurred at some occasions when the banks of the channel along Talana Street overflowed.

Further analysis suggests that the base width (w) be increased to at least 1,5m and the channel be lined with concrete to ensure minimum maintenance costs and inconvenience due to maintenance. The results of this analysis is shown in Table 5.3 below.

Table 5.3: Improved Capacity

		v-drain		Trapezoidal-drain
Input	b			0
	d			1.1
	h			1.20
	w			1.5
	Pw			5.40
	1/n			83.33
	A			1.65
	$R^{(2/3)}$			0.45
	$S^{0.5}$			0.15
Input	S = 1/			46
Q		**0**	**0**	**9.20**

$$(Q) = \frac{1}{n} \times A \times R^{(2/3)} \times S^{0.5}$$

From the above results it can be seen that the capacity of the channel has increased to **9,2m³/sec**, which is more than the runoff of **6,27m³/sec.**

The improvement of the stormwater channel at the back will therefore contribute significantly in reducing the risk of flooding of the houses to be developed. The existing stormwater channel must therefore be widened to 1,5m at the base and the depth from the natural ground level should be at least 1,2m.

6 COST

The required improvement to the infrastructure has been determined based on the average of recent tender amounts of various projects. The estimated cost for having the erven properly upgraded and safe is amounts to **R1,981,022-02**. A breakdown of this cost is shown in Annexure A

7 CONCLUSION AND RECOMMENDATION

. Based on this investigation, the following conclusions can be made:

- The water connection to the erven are not in place
- From investigation into the sewer network, it appears that the sewer connections are in place, but assessments were based on a sample size and provision has been made for potentially 10 house connections
- The section of Newman road must be build to provide acceptable access to a number of the new houses.
- The stormwater channel at the back of Talan Street does not have sufficient capacity to accommodate the 1:50 year flood. Liaison with local residents revealed that flooding of the houses in the vicinity have taken place in the past directly as a result of the overflow from the inadequate channel.
- The proposed development of the 29 erven can be implemented safely if the following are implemented first:
  - Install water connection
  - Install sewer connections
  - Construct section of Newman road
  - Upgrade stormwater channel behind erven along Talana Street.
- The upgrading costs amount to R1,981,022-02

Based on the findings of this report, it is recommended that the upgrading requirements identified through this study be implemented.

7.5.2	**APPROVAL OF THE LAND AVAILIBILITY AGREEMENT BETWEEN THE STELLENBOSCH MUNICIPALITY AND CROWIE PROPERTY GROUP (PTY) LTD PROPERTY GROUP (PTY) LTD FOR THE DEVELOPMENT OF FARMS 81/2 AND 81/9, STELLENBOSCH FOR SOCIAL HOUSING**

Collaborator No: **785854**
IDP KPA Ref No: **Good Governance**
Meeting Date: **21 May 2025**

1. SUBJECT: APPROVAL OF THE LAND AVAILIBILITY AGREEMENT BETWEEN THE STELLENBOSCH MUNICIPALITY AND CROWIE PROPERTY GROUP (PTY) LTD PROPERTY GROUP (PTY) LTD FOR THE DEVELOPMENT OF FARMS 81/2 AND 81/9, STELLENBOSCH FOR SOCIAL HOUSING

2. PURPOSE

To seek Council's approval to sign the agreed Land Availability Agreement (LAA) (as **ANNEXURE A**) with Crowie Property Group (Pty) Ltd, the developer selected through the Municipality's tender process, to develop and manage the social housing project envisioned on Farms 81/2 and 81/9. Stellenbosch.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

On the 24th of November 2024, Council approved the draft Land Availability Agreement (LAA) and authorised the Municipal Manager to sign the LAA with minimum amendments between the Municipality and Crowie Property Group (Pty) Ltd. Included in the agreement is a set of municipal incentives that will assist in making the project viable. These incentives have been approved by Council in line with existing capital incentives for government financed housing projects as well as operational incentives linked to the Municipality's indigency policy.

5. RECOMMENDATIONS

(a) that the Council approves the Land Availability Agreement (LAA) (attached as **ANNEXURE A)** between Crowie Property Group (Pty) Ltd and the Stellenbosch Municipality;

(b) that a detailed project plan be prepared by Crowie Property Group (Pty) Ltd to be agreed for by Council, before the rights to the land on a 40-year leasehold basis is entered into;

(c) that the Municipal Manager be authorized to sign the LAA (attached as **ANNEXURE A**); and

(d) that the Municipal Manager be authorized to sign any additional information or documentation required as may be necessary to ensure compliance with regulatory requirements in order to facilitate the effective implementation of the project.

6. DISCUSSION / CONTENTS

6.1 Background

Council has approved the development and implementation of a Social Housing programme in the Municipality. The intention is provide well located, good quality and well managed rental housing opportunities affordable low- and moderate-income households. This is to be achieved through the National Social Housing programme governed by the Social Housing Act (2008) and its linked policy and procedures. The national responsibility for the overall management of the national programme rests with the Social Housing Regulatory Authority (SHRA) established in terms of the Social Housing Act. In terms of the legislation the Municipality is responsible for the facilitation of such development in among other ways in the release of municipal land at a price that makes such projects financially viable and other incentives within its authority.

Council has already agreed to the rollout of the Social Housing programme in Stellenbosch and the initial release of land for the first three projects. The release of the first of these sites Farms 81/2 and 81/9 was agreed by Council after public consultation on its plans to dispose of the land.

Having undertaken public consultation on the release of Farms 81/2 and 81/9 for this purpose, the Municipality followed a procurement process to call for proposals to develop and undertake the long-term management of the development in accordance with the Social Housing Regulations.

As a result of this Crowie Property Group (Pty) Ltd was appointed, on the 19 February 2024, as the preferred bidder. However, before signing the final contract awarding the land, it is necessary that Crowie Property Group (Pty) Ltd prepares a detailed Project Plan for formal approval by Council. The Project Plan involves a detailed description of the project, its financing and a timetable for delivery that meets the requirements of the award. For this Crowie Property Group (Pty) Ltd are required to invest financial and human resources. To best protect the interest of both the Municipality and the developer it is necessary to have a signed Land Availability Agreement between the Municipality and Crowie Property Group (Pty) Ltd. Council has already agreed in principle to enter into such agreements with Social Housing Institutions (SHIs) and/or Other Development Agencies (ODAs).

This was followed by a procurement process for eligible entities to apply for the development and long-term management of the site based on a 40-year lease. After adjudication of the submissions, through the Municipality's procurement process, Crowie Property Group (Pty) Ltd was chosen as the preferred bidder. Crowie Property Group (Pty) Ltd now need to finalise a detailed Project Plan for approval by the Council before the signing of the Land lease agreement.

The Land Availability Agreement provides a contractual framework that permits Crowie Property Group (Pty) Ltd to prepare such a Project Plan with the assurance that if it meets the Municipality's requirements while giving surety to the developer, that as long as they produce a financially viable detailed plan in line with the municipal intent and their submitted tender proposal, that the Municipality will sign the land lease agreement.

The Land Availability Agreement also outlines to the developer the key incentives that the Municipality will provide in terms of relevant development charges and access to indigency relief for eligible tenants.

6.2 Discussion

After the approval by Council of the draft LAA, the relevant departments of the Municipality, with the legal representatives of Crowie Property Group (Pty) Ltd entered into discussions/negotiations regarding various aspects of the approved draft LAA.

After successful discussions/negotiations, it was concluded that the attached LAA (attached as **ANNEXURE A**) expresses the intention and interest of Council to provide affordable rental stock, which will be managed by a competent Social Housing Institution (SHI) and/or Other Development Agency (ODA).

The most notable and relevant differences from the draft LAA submitted to Council on the 24th of November 2024 and the LAA presented to council in this report (attached as **ANNEXURE A**), are as follows:

- Additional information added to section 13**: Action for Non-performance in Terms of the Contract**
- Additional information added to section 16: **Confidentiality**
- Addition of section 17**: Representations and Warranties**
- Addition of section 21**: Force Majeure**
- Addition of section 22**: Protection of Personal Information**

6.3 Financial Implications

There are no substantive financial implications should the recommendations as set out in the report be accepted. The financial implication for the Municipality is in the price of the disposal of the land on a leasehold basis, based on the final Project Plan and its linked implementation. When this is prepared it will then be tabled to the Council for it final approval.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

This report has limited staff implications to the Municipality. These require time from the Department of Human Settlement staff to liaise with Crowie Property Group (Pty) Ltd to ensure preparation of the Project Plan in line with the Municipality's requirements.

6.6 Previous / Relevant Council Resolutions:

27th Council Meeting: 2024-11-27: ITEM 10.5.1

RESOLVED (with majority vote with 1 abstention)

(a) that Council approves the draft Land Availability Agreement (LAA) between Crowie Property Group (Pty) Ltd and the Stellenbosch Municipality;
(b) that Crowie Property Group (Pty) Ltd prepares a detailed project plan for approval Council before the rights to the land on a 40-year leasehold basis is entered into;
(c) that Council endorses the capital and operational incentives contained in the draft LAA, as per ANNEXURE 3;

(d) that the Municipal Manager be authorised to sign the draft LAA and negotiation minimum
amendments if required and submit to Council for condonation; and
(e) that the Municipal Manager be authorized to sign any additional information or documentation required as may be necessary to ensure compliance with regulatory requirements and to facilitate the effective implementation of the project.

RECOMMENDATIONS FROM THE EXECUTIVE MAYOR, IN CONSULTATION WITH THE EXECUTIVE MAYORAL COMMITTEE, TO COUNCIL: 2020-03-20: ITEM 7.4.2

*(a) that the land in question, remainder of Erf 2149, Stellenbosch (Lapland flats), Remainder of Farm 180 (open spaces near Teen-die-Bult flats) and Erf 81/2 and Erf 81/9 Stellenbosch, be identified as land parcels **not needed for the Municipality's own use** during the period for which the right is to be granted;*
*(b) that Council, **in principle**, approve the Municipality's entering into **Land Availability Agreements** with SHIs and ODAs successful in the Public Competitive Process (with SHIs and ODAs successful in the Public Competitive Process in terms of Regulation 34(1) (b) of the Asset Transfer Regulation (ATR), read with paragraph 9.2.2.1 (l) of the Policy on the Management of Council owned property, subject to the following conditions:*
*(i) that **Council's intention** so to act, i.e. the awarding of rights on a private treaty agreement basis, **be advertised** for public comments;*
*(ii) that, simultaneously, the **public participation** process envisaged in Regulation 35 of the ATR **be followed**;*
*(iii) that Lease Agreement be concluded, based on a **40-year term** based on applicable tariffs;*
*(iv) that the Lease Agreement provide for **review/revision**, should the need arise for further development/redevelopment of the area; and*
(c) that, following the public participation process referred to above, a report be submitted to Council in order for Council to give a mandate to the Administration to proceed with the Public Competitive Process that will result in the awarding of the long-term use rights.

35TH COUNCIL MEETING: 2020-02-26: ITEM 11.4.1

***RESOLVED** (majority vote)*

(a) that the progress report be noted;
(b) that Council approves in principle the development proposal as set out in the draft feasibility study;
(c) that the Municipal Manager is authorised to undertake a process towards entering into Land Availability Agreements with competent Social Housing Institutions (SHIs) or Other Development Agencies (ODAs);
(d) that a Smart Partnership and a Land Availability Agreement be entered into with the successful accredited Social Housing Institution (SHI) or Other Development Agency (ODA); and
(e) that the proposed base criteria which need to be met by a viable Social Housing Institution, be noted.

The following Councillors requested that their votes of dissent be minuted:

FT Bangani-Menziwa (Ms); DA Hendrickse; N Mananga-Gugushe (Ms); C Moses (Ms); N Sinkinya (Ms); P Sitshoti (Ms) and LL Stander.

6.6 Risk Implications

There are no substantial risks for the Council other than the failure of Crowie Property Group (Pty) Ltd to produce an acceptable plan for the Municipality. In such a case the award becomes null, and void and the Municipality would need to restart a process for the awarding of the site.

6.8 Comments from Senior Management:

None requested.

1. DEFINITIONS AND INTERPRETATION

1.1 In this Agreement, unless otherwise required or indicated by the context, the singular shall include the plural and vice versa, words indicating any one gender shall include the other genders, words indicating natural persons shall include juristic persons and bodies corporate and vice versa.

1.2 The following words or phrases shall bear the following special meaning assigned to them below, and shall be interpreted as such for this Agreement, even if such interpretation is contrary to the ordinary grammatical meaning of the words and phrases

1.3 if a definition imposes substantive rights and obligations on a Party, such rights and obligations shall be given effect to and shall be enforceable, notwithstanding that they are contained in a definition.

1.4 any definition, wherever it appears in this Agreement and Annexures, shall bear the same meaning and apply throughout this Agreement unless otherwise stated or inconsistent with the context in which it appears.

1.5 if there is any conflict between any definitions in this Agreement then, for purposes of interpreting any Clause of the Agreement or paragraph of any Annexure, the definition appearing in that Clause or paragraph shall prevail over any other conflicting definition appearing elsewhere in the Agreement.

1.6 where any number of days is prescribed, those days shall be reckoned exclusively of the first and inclusively of the last day unless the last day falls on a day which is not a Business Day, in which event the last day shall be the next succeeding Business Day.

1.7 where the day upon or by which any act is required to be performed is not a Business Day, the Parties shall be deemed to have intended such act to be performed upon or by the next succeeding Business Day.

1.8 the use of any expression covering a process available under South African law (including, for example, a winding-up) shall, if any of the Parties is subject to the Applicable Laws of any other jurisdiction, be interpreted in relation to that Party as including any equivalent or analogous proceeding under the Applicable Laws of such other jurisdiction.

1.9 the rule of construction that if general words or terms are used in association with specific words or terms which are a species of a particular genus or class, the meaning of the general words or terms shall be restricted to that same class (i.e. the *eiusdem generis* rule) shall not apply, and whenever the word

"including" is used followed by specific examples, such examples shall not be interpreted so as to limit the meaning of any word or term to the same genus or class as the examples given.

1.10 the expiration or termination of this Agreement shall not affect such of the provisions of this Agreement which are expressly provided to operate after any such expiration or termination, or which of necessity must continue to have effect after such expiration or termination, notwithstanding that the relevant provisions themselves do not provide for this.

1.11 each of the provisions of this Agreement has been negotiated by the Parties and drafted for the benefit of the Parties, and accordingly the rule of construction that the contract shall be interpreted against or to the disadvantage of the party responsible for the drafting or preparation of this Agreement (i.e. the *contra proferentem* rule), shall not apply.

1.12 The following terms shall have the meanings respectively assigned to them hereunder, namely:

"Anchor Business Plan"	Shows the project's financial viability. It includes a working financial model in Excel electronic format. It is based on approved density and buildable Gross Floor Area (GFA) for the entire site and individual buildings as applicable;
"Agreement"	means this agreement contained herein including all annexures thereto;
"Municipality"	means Stellenbosch Municipality listed on page 1 duly represented herein by **Geraldine Mettler** (including ~~his~~/her successors in title);
"Commencement Date"	means the date on which Crowie Property Group has the right to commence work in terms of this Agreement.
"Inception Date"	means the agreed date on which this Agreement is signed by both Parties or on any other date as the Parties may

	mutually agree in writing (whichever event is first).
"Contracts"	means this Agreement and the Project Agreement and the Land lease agreement read together;
"Calls for Proposals"	means the original Request for Proposals;
"Parties"	means the Municipality and the Partner;
"Partner"	means Crowie Property Group (Pty) Ltd a company duly registered in terms of the Company laws of the Republic of South Africa with registration number [2000/009437/07];
"Project Agreement"	means an Agreement to be concluded between the Municipality and the Partner which establishes the terms under which the project will be executed;
"Pre-Feasibility and Financial Project Proposal (PFF)"	The Pre-Feasibility and Financial Project Proposal is the project's initial development concept and preliminary financial viability model as presented by the Partner to the Municipality in response to the municipal Request for Proposal call on the Land. It has to be negotiated and approved by the Municipality prior to consideration and inclusion in the Land Availability Agreement;
"Programme Manager"	means an employee of the Municipality or any person nominated in writing by the Municipality responsible for the coordination of the Municipality's Social

	Housing Programme, whose details shall be communicated to the Partner;
"Project Manager"	means an employee of the Municipality, or such other person as may be nominated in writing by the Municipality;
"Project"	means the proposed development on the allocated land identified in this Agreement for planning of the social housing development by the Partner;
"Social Programme"	refers to the development of affordable rental stock for low-moderate income households in terms of the Social Housing policy, legislation and regulations;
"Social Housing Regulatory Authority (SHRA)"	means the Social Housing Regulatory Authority as established by Social Housing Act 16 of 2008;
"Social Housing Subsidy/ies"	means public funding, inclusive of institutional and consolidated capital grant funding, provided by the SHRA or any other organ of state defined in Section 239 of the Constitution of the Republic of South Africa of 1996, utilised for the creation of housing stock for social housing purposes;
"Social Housing Institution (SHI) or Other Delivery Agent (ODA)"	An SHI (Social Housing Institution) is a non-profit entity registered and accredited by the SHRA under the Social Housing Act 16 of 2008, and an ODA (Other Delivery Agent) is a for-profit company that can implement a social housing subject to project-specific accreditation from the SHRA;

"Municipal grants"	means public funds by the Municipality, inclusive of Municipal Infrastructure Grants (MIG), Urban Settlements Development Grants (USDG) or others that are allocated by Stellenbosch Municipality to support the proposed social housing development.

2. RECORDAL

2.1 The Municipality wishes to establish a Social Housing Programme to create well-located and well-managed affordable rental social housing schemes on land made available solely for social housing with or without other complementary land use approved by the Municipality.

2.2 The Partner is an ODA, that was elected through a Request for Proposal to allocate the subject land, which will be awarded for social housing development.

2.3 The Municipality wishes to agree on granting the Partner, the right to use, develop and occupy the subject land identified in this Agreement to the Partner based on an **Approved Pre-Feasibility and Financial Project Proposal (PFF) included as ANNEXURE 1,** that meets the conditions outlined in this Agreement or any changes to it agreed by parties in the process of the planning linked to this Agreement and its subsequent binding Project Agreement.

2.4 The land lease agreement allows the Partner to use the land for 40 years.

2.5 The Partner will pay the Municipality a determined value yearly.

2.6 The Parties wish to conclude this Agreement in writing.

3. AGREEMENT

3.1 The Municipality and the Partner hereby agree that the terms and conditions of this Land Availability Agreement (LAA) shall link contractually to the Project Agreement to be signed between the Parties, together with any future Project Agreement addendums that govern their relationship in respect of all services provided by the Partner currently or at any time in the future in respect of this social housing in Stellenbosch Municipality.

3.2 This LAA establishes a framework for preliminary arrangements for making land available on a leasehold basis for a social housing project, specifying the conditions under which Stellenbosch Municipality agrees to offer the subject land for social housing to the Partner and ensures it with exclusive rights on the subject land to the Partner to continue project packaging and financing process within agreed municipal conditions, performance compliance and milestone completion targets for the proposed social housing project.

4. OBJECTIVES

4.1 The objectives of this Agreement are as follows:

4.2 A systems approach to establishing strong, mutually beneficial contractual arrangements between the Municipality and the appointed social housing implementation company Crowie Property Group as its "Partner" on the Social Housing Programme.

4.3 To guarantee that the identified land will be leased to the Partner provided they meet the development conditions and requirements outlined in this Agreement, subsequent project Contracts, and any other agreed upon by the parties in planning this site's development.

4.4 To preserve the opportunity for the Partner to obtain the rights to develop land of the Municipality within a framework that protects the Municipality's land investment and resources to achieve their socio-economic housing program objectives.

4.5 Within this contracting agreement framework, the Parties will conclude a linked Project Agreement. The Project Agreement will be finalized once the project is more clearly defined, and the Partner submits a detailed execution plan.

5. INCEPTION AND COMMENCEMENT DATE

5.1 The inception date of this agreement shall be the date on which this agreement is signed by both Parties or on any other date as the Parties may mutually agree in writing.

5.2 From the Inception Date, the Partner shall have the right to commence due diligence activities on the land, including conducting site inspections and advance feasibility studies to determine the development concept and financial proposal precisely.

5.3 This Agreement shall commence on the date of approval from the Municipal Planning Tribunal. The approval shall be subject to such earlier termination as provided for in Clause 13, it shall continue in force and effect for two (2) years, with a possible extension of one (1) additional year not exceeding a total LAA period of three (3) years. The Municipality shall ensure that the approval is not unreasonably withheld and unduly delayed.

5.4 Should both Parties agree on an extension, it will be negotiated six (6) months before the expiry of the first term of the LAA.

6. LAND FOR DEVELOPMENT TRANSACTION TERMS

The Municipality offers the land to the Partner under the following terms:

6.1 A long-term lease agreement for a period of forty (40) years, subject to the following terms and conditions:

a) A detailed development plan linked to a financing proposal and project delivery schedule formally agreed by the Municipality in terms of the Partner's submitted proposal, which is subject to the following suspensive conditions:

(i) Approval of SHRA Capital Consolidated Grant Agreement (CCGA);

(ii) Town Planning Development including Township Proclamation servicing of land; and

(iii) Approval of the Project Financial Proposal and Development Plan.

b) The land lease payments (financial offer) in Rand value made by the Partner in the initial project proposal.

c) Payment is paid yearly in arrears over the lease agreement term.

7. PROPERTY DESCRIPTION OF LAND FOR DEVELOPMENT

The land subject of this agreement is defined as follows:

Erf numbers: FARM 81/2 AND FARM 81/9, STELLENBOSCH

Co-ordinates: 33°54'52"S 18°51'01"E (Farm 81/2)
33°55'00"S 18°51'04"E (Farm 81/9)

Extent (Area in sqm): 157 405 m² (Farm 81/2)
14 817 m² (Farm 81/9)

The cadastral details are contained in **ANNEXURE 2** of this agreement.

8. CONDITIONS FOR THE DEVELOPMENT OF THE LAND

8.1 The following general conditions apply to the development site:

8.1.1 Maximization of the development potential of the site and the Municipality's social housing development objectives.

8.1.2 Social and economic neighbourhood integration with the surrounding areas.

8.1.3 Access to adequate rental housing for low- and moderate-income households in well-managed urban environments.

8.2 The Municipality sets the following specific conditions:

8.2.1 Number of Social Housing Units: will be specified in the lease agreement.

8.2.2 Multi-story walk-up buildings with diverse housing typologies to accommodate different family sizes.

8.2.3 Comply with the Social Housing Policy and the SHRA's general norms and standards regarding project design, income targeting, and unit mix for internal cross-subsidization.

8.2.4 Integrate green spaces and gardens within the project, providing residents with recreational areas that enhance social interaction and well-being.

8.3 The Partner sets the following specific conditions:

8.3.1 That the Pre-Feasibility and Financial Project Proposal (PFF) is subject to the Provincial Department of Infrastructure (branch Human Settlements) approval of a Geotechnical Grant in the amount of R21 194.00 for poor soil conditions encountered on site.

9. CONSIDERATION OF DEVELOPMENT INCENTIVES

9.1 To promote investment and reduce the risk of developing sustainable social housing, the Municipality has decided to guarantee the following municipal incentives to the Partner, both capital and operational for this project:

9.1.1 Exemption from paying development charges (i.e. connection fees and bulk contributions);

9.1.2 Exemption from paying Planning Scrutiny charges;

9.1.3 Exemption from paying Town Planning and Building Plan approval charges;

9.1.4 Freezing the parking ratio of 0.75 per unit, or as per parking relaxation motivation approved based on SHRA Guidelines (amended from time to time) of 0.5 bays per unit if Partner makes a submission to the municipality and if this is agreed by the municipality in terms of its planning regulations;

9.1.5 Rates reduction charged at the residential base level;

9.1.6 Apply Indigency Policy to the Social Housing project as per **ANNEXURE 4**, beneficiating qualifying tenants subject to the means test;

9.1.7 Municipal support of any application by Partner to the Provincial Department of Infrastructure (branch Human Settlements) for Geotech grant of R21,194 per opportunity to be resourced from Provincial Department of Infrastructure (branch Human Settlements), for poor soil founding conditions;

9.1.8 The following site reports that will reduce the project capital costs will be provided to the Partner;

9.1.9 Environmental Authorizations (EA, ROD/EMPr);

9.1.10 Topographical surveys;

9.1.11 Geotechnical study;

9.1.12 Traffic Impact Assessment;

9.1.13 Flood line report; and

9.1.14 All town planning procedures as may be required, including Town Planning Rezoning Application.

9.2 Should the Partner trigger any bulk infrastructure upgrades which do not form part of the Municipality's Capital Expenditure Framework (MTREF) then the Partner will be held liable for any charges connected therewith.

10. OUTPUT OF THE LAND AVAILABLITY AGREEMENT PROJECT AGREEMENT

10.1 The terms and conditions and the process of the planning undertaken during the Land Availability Agreement period should result in a 'Property Development Plan' with an "Anchor Business Plan" agreed upon by both Parties that will guide the development of the land. The output of the Land Availability Agreement will conclude with the execution of a linked Project Agreement. The Project Agreement, at a minimum, will cover the following:

10.2 The Project Agreements will detail project-specific details and define terms and conditions for executing the project development.

10.3 The Project Agreements shall address the following sections but are not exclusively limited to the same:

10.3.1 The agreed property development plan contains the specific terms and conditions for the project development, development process, and post-construction property management details.

10.3.2 The "Anchor Business Plan", with all funding sources shown.

10.3.3 The development schedule with the development time frame and milestones.

10.3.4 The phasing plan of the project and performance management completion.

10.3.5 The material contribution of the Partners.

10.3.6 The system and procedures of monitoring the Agreement in coordination and collaboration with the relevant stakeholders, Municipality, Provincial Department of Infrastructure (branch Human Settlements), SHRA, and the SHRA mandatory reporting and performance monitoring procedures.

11. OVERALL ROLES OF THE PARTIES

11.1 The Municipality undertakes to:

11.1.1 Grant the Partner a 40-year lease agreement, provided that the proposed project development proposal aligns with the municipal vision articulated in this Agreement.

11.1.2 Provide access to information that affects the site available to the

Municipality, which can assist in the property development planning and packaging process right through to the tenanting and property management phase.

11.1.3 Actively participate in discussions with the Partner at different stages in the planning, implementation, and operational process; and

11.1.4 Give due consideration to additional incentives where there is a proven leverage to achieve the socio-economic and urban development vision.

11.2 The Partner undertakes to:

11.2.1 Carry out the Pre-Feasibility and Financial Project Proposal in response to the municipal Request For Proposal (RFP) on the land.

11.2.2 Carry out the planning process for the development of the site and/or building in accordance with the Land Availability Agreement and the subsequent Project Agreement to be executed with the Municipality.

11.2.3 To provide the proper opportunities to engage with the Municipality expediently on progress and content throughout the planning process in accordance with an agreed timetable.

11.3 Collaboration and Communication:

11.3.1 The Parties agree to convene monthly progress meetings to discuss the project's progress made by the Partner regarding the work assigned to them in terms of the Project Agreement as well as receiving progress updates from the Municipality on the necessary approvals.

11.3.2 Including any other matter relevant to the project as a whole that may affect the proper and timely completion of any aspect of the project.

11.3.3 Each meeting shall include representatives from the Municipality and the Partner and detailed minutes shall be recorded and distributed to all Parties within five (5) business days following each meeting.

12. CONDUCT OF SERVICES AND TIMETABLE FOR DELIVERY

12.1 The Partner shall provide those services as per an agreed Time Schedule and Completion Milestones as outlined in **ANNEXURE 3** of this Agreement and subsequently as per the Project Agreement. The time schedule may be adjusted from time to time if agreed to by both Parties in writing.

12.2 To ensure that the services provided comply with all the relevant prescripts.

12.3 That the Partner timeously advise of any deviation variation to schedule or any completion milestone changes, and which shall be agreed to by both parties before the Agreement expiry, as noted in Clause 5.3.

13. ACTION FOR NON-PERFORMANCE IN TERMS OF THE CONTRACT

13.1 In the event that the Partner fails to complete the work within the schedule or any agreed variations on this, the Municipality has the right to terminate this Agreement and withdraw rights to the land from the Partner. The Municipality shall not be entitled to terminate this Agreement, if the Partner's failure is attributable to the Municipality's act or omission.

13.2 To implement condition of termination noted in Clause 13.1, the Municipality must show that it has timely undertaken its responsibilities under this Agreement and did not intentionally or negligently omit its responsibilities.

13.3 If the reasons for failure by the Partner to complete its responsibility within the agreed time are outside of the control of the Partner having applied due diligence, then the parties should first attempt to reschedule the project failing which the municipality can terminate the agreement subject to any penalties being apportioned between the Parties.

13.4 In the event that the Municipality terminates the Agreement for non-performance, the Municipality has no liability to the Partner and, therefore, is responsible for reimbursement to the Partner for any work done to date unless there is a previous Agreement to do this to use for further work on the site.

13.5 The Municipality reserves the right to recover all costs, losses or damages incurred or suffered by it due to non-performance. Notwithstanding, except as otherwise required by applicable law, in no event shall Crowie Property Group or its affiliates, officers, employees, agents, or representatives be liable to Stellenbosch Municipality for any indirect, incidental, consequential, special, punitive, or exemplary damages, including but not limited to loss of profits, revenue, goodwill, or business opportunities, arising out of or in connection with this Agreement, regardless of the theory of liability (contract, tort, negligence, or otherwise), even if advised of the possibility of such damages.

13.6 Nothing in this section shall limit or exclude liability for:

(i) gross negligence;

(ii) wilful misconduct;

(iii) fraud or fraudulent misrepresentation; or

(iv) non-performance or any other liability that cannot be excluded or limited under applicable law.

13.7 If non-performance is due to malicious conduct, the Municipality can report the Partner to the Provincial Department of Infrastructure (branch Human Settlements), CIPC and the SHRA developer database, advocating a restriction (blacklisting) on the Partner from obtaining social housing business from the Municipality, Provincial Department of Infrastructure (branch Human Settlements) and the SHRA.

14. MANNER OF RENDERING SERVICES

14.1 All products developed and services performed by the Partner shall be of a standard and quality consistent with the Social Housing program standards. The Partner shall further exercise all reasonable skills, care and diligence in performing any such services and shall carry out all its responsibilities and duties following the recognized professional standards and in any manner and of a standard acceptable to the Municipality.

15. TERMINATION

The Parties reserve the right to terminate the provisions of any services relating to the project should:

15.1 either of the Parties fail to remedy its default in performing the services within 30 (Thirty) business days of receipt of a breach notice or within such further period as the Parties may agree in writing.

15.2 either of the Parties fails, in the absence of any legal review or appeal proceedings, to comply with any final decision reached as a result of any legal or arbitration proceedings.

15.3 either of the Parties engage in corrupt or fraudulent practices in competing for or executing the Agreement. For purposes of this Clause-

"corrupt practice" - means the offering, giving, receiving or soliciting of anything of value to influence the action of an official in the selection process or contract execution.

"fraudulent practice" - means a misrepresentation of facts in order to influence a selection process or the execution of a contract to the detriment of either Party, and includes collusive practice among parties (before or after submission of proposals), designed to establish prices at artificial, non-competitive levels and to deprive the other Party of the benefits of free and open competition.

15.4 The Municipality reserves the right to cancel this Agreement with the Partner in the event of the Partner being placed under liquidation. This will be dealt with as per the prescripts of the relevant section of the Social Housing policy and regulations if such liquidation results in the Partner not being able to render such services as agreed upon in this Agreement.

16. CONFIDENTIALITY

16.1 Each of the Parties shall at all times keep the existence and contents of this Agreement confidential and shall use reasonable efforts to keep confidential any information relating to the other Parties or their operations or affairs which it has acquired or may acquire in relation to the other Parties or their operations or affairs prior to or pursuant to this Agreement, save for any information:

16.1.1 which is publicly available or becomes publicly available through no act or default of any Party; or

16.1.2 which was in the possession of a Party prior to its disclosure otherwise than as a result of any breach by that Party of any obligation of confidentiality owed to any other person whether pursuant to this Agreement or otherwise; or

16.1.3 which is disclosed to a Party by a person which person did not acquire the information under an obligation of confidentiality; or

16.1.4 which is independently acquired by a Party as a result of work carried out by a person to whom no disclosure of such information has been made; or

16.1.5 which is required or requested to be disclosed by any court of competent jurisdiction or any governmental, banking, taxation or other regulatory authority or similar body, the rules of any relevant stock

exchange or pursuant to any applicable law or regulation; or

16.1.6 which is required to be disclosed in connection with, and for the purposes of, any litigation, arbitration, administrative or other investigations, proceedings or disputes, and each Party shall not use or disclose such information except with the prior written consent of the other Parties or in accordance with an order of a court of competent jurisdiction or in order to comply with any law or governmental regulations by which any Party concerned is bound or as may be lawfully requested or otherwise required or accessed by any governmental authority.

17. REPRESENTATIONS AND WARRANTIES

17.1 Each Party represents and warrants to the other Party that:

17.1.1 it has the legal capacity and, if applicable, has taken all necessary corporate action required to empower and authorise it to enter into this Agreement;

17.1.2 this Agreement constitutes an agreement valid and binding on it and enforceable against it in accordance with its terms;

17.1.3 the execution of this Agreement and the performance of its obligations hereunder does not and shall not:

(i) contravene any law or regulation to which it is subject.

(ii) contravene any provision of its constitutional documents, if applicable; or

(iii) conflict with or constitute a breach of any of the provisions of any other agreement, obligation, restriction or undertaking which is binding on it.

17.1.4 to the best of its knowledge and belief, it is not aware of the existence of any fact or circumstance that may impair its ability to comply with all of its obligations in terms of this Agreement;

17.1.5 it is entering into this Agreement as principal (and not as agent or in any other capacity);

17.1.6 the natural person who signs and executes this Agreement on its behalf is validly and duly authorised to do so;

17.1.7 no other party is acting as a fiduciary for it; and

17.1.8 it is not relying upon any statement or representation by or on behalf of the other Party, except those expressly set forth in this Agreement.

17.2 Each of the representations and warranties given by the Parties in terms of Clause 17.1 shall:

17.2.1 be a separate warranty and will in no way be limited or restricted by inference from the terms of any other warranty or by any other words in this Agreement.

17.2.2 continue and remain in force notwithstanding the completion of any or all the transactions contemplated in this Agreement; and

17.2.3 prima facie be deemed to be material and to be a material representation inducing the Company to enter into this Agreement.

18. BREACH

18.1 In the event that either Party ("the defaulting party") to this Agreement breaches any material term of this Agreement and fails to remedy such breach within 37 (seven Thirty) days of the date of receipt of a written notice from the other Party ("the aggrieved party") requiring such breach to be remedied, the aggrieved party will be entitled immediately to cancel this Agreement by written notice to the defaulting party, which cancellation will be without prejudice to any other rights which the aggrieved party may at law enjoy arising out of such breach and/or cancellation.

19. DISPUTE RESOLUTION

Any dispute arising between the parties in connection to or from the Agreement shall be settled as follows;

19.1 A dispute must be notified in writing.

19.2 The Parties must initially make a reasonable effort to settle any such dispute through amicable resolution.

19.2.1 If the parties fail to reach an amicable resolution within 20 business days from date of notification or any other period agreed between the Parties to resolve the dispute, the dispute shall be referred to a single arbitrator agreed on by the Parties.

19.2.2 If the Parties cannot agree on a nomination of who the Arbitrator shall be, the following criteria shall be used for the following disputes:

19.2.3 For an accounting matter, an independent practicing-chartered accountant who has been in practice for not less than Fifteen (15) years and who shall be nominated by the Chairman, for the time being, of the local Society of Charted Accountants.

19.2.4 For primarily a legal matter, a Senior practicing Advocate of the local Bar or Attorney who has been in practice for not less than Ten (10) years and who shall be nominated by the Cape Town Bar Association.

19.3 The Arbitrator powers of the Arbitrator shall be determined in the arbitration agreement to be concluded between the Parties, when the Arbitrator is nominated.

19.4 The arbitration shall be held as quickly as possible after it is demanded, with a view to completion within 30 (Thirty) days after it has been so demanded. The period of 30 days can be extended by written consent of the parties.

19.5 Immediately after the arbitrator has been agreed upon or nominated in terms of Clauses 18.3.1 to 18.3.3, any of the parties to the dispute shall be entitled to call upon the arbitrator to fix a date and place when and where the arbitration proceedings shall be held and to set the procedure and manner in which the arbitration proceedings will be held.

19.6 Such arbitration proceedings shall be conducted informally and as inexpensive and expeditiously as possible wherever the arbitrator may consider shall suit the balance of convenience under the circumstances.

19.7 Each Party consents, in terms of (insert section of the Magistrates' Court and Act, to the jurisdiction of local Magistrates) Court regarding any proceedings on this Agreement.

20. DOMICILIUM AND NOTICES

20.1 The Parties hereto choose *domicilia citandi et executandi* for all purposes of and in connection with this Agreement as follows:

The Municipality _____

_____

_____

_____

_____

Facsimile No. _____

the Partner _____

_____

_____

_____

Facsimile No. _____

20.2 Any Party hereto shall be entitled to change its *domicilium* from time to time, provided that any new *domicilium* selected by it shall be a street address and any such change shall only be effective upon receipt of notice in writing by the other Parties of such change.

20.3 Any notice given by or to either party in terms of this Agreement shall be given in writing and shall be delivered by hand to a responsible person present at or sent by prepaid registered post or facsimile transmission to the *domicilium* chosen by the addressee in terms of this Agreement.

20.4 A notice sent by one Party to another Party shall be deemed to be received:

20.4.1 on the date of delivery, if delivered by hand;

20.4.2 on the fourth day after posting, if sent by prepaid registered mail;

20.4.3 on the date sent if forwarded by facsimile transmission; and

20.4.4 on the date sent or forwarded by the email.

20.5 Notwithstanding anything to the contrary herein contained a written notice or communication actually received by a Party shall be an adequate written notice or communication to it notwithstanding that it was not sent to or delivered at its chosen *domicilium citandi et executandi*.

21. FORCE MAJEURE

21.1 Notice

21.1.1 Should a Force Majeure event occur then the invoking Party will forthwith give written notice thereof to the other party –

21.1.2 specifying the cause and anticipated duration of the Force Majeure; and

21.1.3 promptly upon termination of the Force Majeure, stating that such Force Majeure has terminated.

21.2 Suspension of performance

21.2.1 Performance of any such obligations will be suspended from the date on which notice is given of Force Majeure until the date on which notice is given of termination of Force Majeure (hereinafter referred to as the "Suspension Period"), subject always to the remaining provisions of this Clause 21.

21.2.2 The invoking Party will not be liable for any delay or failure in the performance of any obligation hereunder, or loss or damage due to or resulting from the Force Majeure during the Suspension Period, nor be entitled to any additional costs or additional time, provided that –

21.2.2.1 the invoking Party uses and continues to use its best efforts to perform such obligations.

21.2.2.2 if the Force Majeure shall continue for more than 60 (sixty) consecutive days, the other Party will be entitled to cancel this Agreement on the expiry of such period, but will not be entitled to claim damages against the invoking Party as a result of the delay or failure in the performance of any obligations hereunder due to or resulting from the Force Majeure; and

21.2.2.3 the Party not invoking Force Majeure will be entitled to elect, by giving written notice within 30 (thirty) days of the termination thereof, as to whether or not it requires the invoking Party to perform any obligations incurred prior to the Force Majeure.

22. PROTECTION OF PERSONAL INFORMATION

22.1 The Parties agree that they are each responsible for complying with their respective general obligations under POPI.

22.2 The Parties agree and undertake:

22.2.1 to use and process the Personal Information solely for the purpose it was collected;

22.2.2 not to allow any unauthorised persons access to the Personal Information of the other party;

22.2.3 not to do anything in relation to the Personal Information that requires the consent of, or notification to, a data subject without first acquiring such consent or providing such notification, as the case may be; and

22.2.4 to implement reasonable and appropriate technical and organisational security measures to prevent the loss of damage to and/or unauthorized access or destruction of Personal Information and take reasonable steps to ensure that all its representatives, employees, agents, partners and third-party sub-contractors, if applicable, comply with all the undertakings in this Clause.

23. WHOLE AGREEMENT

23.1 This agreement constitutes the entire agreement between the Parties regarding the subject matter hereof. No agreements, guarantees or representations, whether verbal or in writing, have been concluded, issued or made, upon which either party is relying in concluding this Agreement, save to the extent set out herein.

24. NO WAIVER

24.1 No waiver or indulgence of whatsoever nature shall be of any force of effect, including a waiver or indulgence in respect of this Clause 24, unless it is reduced to writing and signed by and on behalf of the Parties.

25. NO INDULGENCE

25.1 No indulgence, leniency or extension of time which a party (the "grantor") may grant or show to the other, will in any way prejudice the grantor or preclude the grantor from exercising any of his rights in the future.

26. SEVERABILITY

26.1 If any particular provision and/or term of this Agreement is found to be defective or unenforceable or is cancelled for any reason (whether by any competent Court or otherwise) then the remaining provisions and/or terms shall continue to be of full force and effect. Each provision and/or term of this Agreement shall accordingly be construed as entirely separate and separately enforceable in the widest sense from the other provisions and/or terms hereof.

27. NO CESSION OR ASSIGNMENT

27.1 Neither party hereto shall be entitled to cede or assign any of its rights, or delegate any of its obligations hereunder without the prior written consent of the other first being obtained.

28. NO VARIATION

28.1 No variation, suspension, deletion, amendment, or modification of this Agreement is of any force or effect, unless recorded in writing and signed by the Parties, and is effective only in the specific instance and for the purpose and to the extent set out.

29. EXECUTION/SIGNATURES

IN WITNESS WHEREOF;

The Parties have expressly executed this Agreement on the date of last signature herein under:

ANNEXURES

ANNEXURE 1: Approved Pre-Feasibility and Financial Project Proposal (PFF)

ANNEXURE 2: Cadastral details

ANNEXURE 3: Time Schedule and Completion Milestones

ANNEXURE 4: Proposed Incentives for Land Availability Agreement (LAA)

7.5.3	**THE ANNUAL REVIEW OF STELLENBOSCH MUNICIPALITY HOUSING PIPELINE FOR THE MTREF PERIOD OF 2025 – 2028**

Collaborator No: **785858**
IDP KPA Ref No: **Good Governance**
Meeting Date: **21 May 2025**

1. SUBJECT: THE ANNUAL REVIEW OF STELLENBOSCH MUNICIPALITY HOUSING PIPELINE FOR THE MTREF PERIOD OF 2025 – 2028

2. PURPOSE

To seek Council's approval of the Stellenbosch Municipality's Housing Pipeline (Projects) for the Medium-Term Revenue and Expenditure Framework (MTREF) period 2025 to 2028 attached herein as **ANNEUXRE 1**.

To inform Council of the Human Settlement Development Grant (HSDG) and the Informal Settlements Upgrading Partnership Grant (ISUPG) allocation for human settlements development projects received from the Provincial Department of Infrastructure (PDoI) for the (MTREF) 2025 to 2028.

To inform Council on the process being followed to prepare a Development Plan for Stellenbosch Urban Core PHSHDA (Priority Human Settlement and Housing Development Area) within the jurisdiction area of the Stellenbosch Municipality in conjunction with the Provincial Department of Infrastructure (PDoI).

To request that the Housing Pipeline be submitted to the Provincial Department of Infrastructure (PDoI) upon attainment of Council's approval.

To provide a status report to Council on the progress of existing human settlement development projects that were previously approved on the Housing Pipeline.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

This Council item relates to the annual review of the Stellenbosch Municipality's Housing Pipeline for the MTREF period 2025 – 2028.

The Provincial Department of Infrastructure (PDoI) requires that every Municipality must have a Housing Pipeline. The Housing Pipeline is premised on a ten-year horizon and serves as the planning and budgeting tool for the implementation of Human Settlements initiatives. Each Municipality's Housing Pipeline is an integral component of the Department of Human Settlements' Business Plan. It is required that the Housing Pipeline must be annually reviewed.

According to the PDoI housing demand database, Stellenbosch Municipality's current housing demand waiting list comprises of 19 759 applicants. The Municipality currently has numerous housing development projects under consideration to ensure a healthy delivery pipeline towards fulfilling the housing demand and its legislative mandate. The overall housing pipeline of the Municipality articulates active housing development projects that are at various planning and implementation stages.

In 2020, the Minister of Human Settlements Gazetted the declaration of the Priority Human Settlements and Housing Development Areas (PHSHDA's). The PHSHDAs intend to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households and overcome apartheid spatial patterns by fostering integrated urban forms.

5. RECOMMENDATIONS

(a) that **Council approves** the reviewed annual Housing Pipeline (Projects) for the Medium-Term Expenditure Framework ("MTREF") period 2025 to 2028 for Stellenbosch Municipality, attached as **ANNEUXRE 1** to this report;

(b) that **Council takes note** of the Human Settlement Development Grant ("HSDG") and Informal Settlements Upgrading Partnership Grant ("ISUPG") budget allocations for human settlements development projects received from the Provincial Department of Infrastructure (PDoI) for the MTREF period of 2025 to 2028;

(c) that **Council takes note** that the reviewed annual Housing Pipeline is aligned to the Stellenbosch Municipality's Spatial Development Framework ("MSDF") as amended in 2023; and the Stellenbosch Municipality's Capital Expenditure Framework (CEF);

(d) that **Council approves** the submission of the revised Stellenbosch Municipality's Housing Pipeline to the Provincial Department of Infrastructure (PDoI); and

(e) that **Council takes note** of the progress of the human settlements development projects that are at pre-planning, and/or planning phase as reflected in table 1 below, as contained in this report;

PRE-PLANNING AND/OR PLANNING PHASE					
Name of project / settlement		**Type of project / subsidy Mechanism**	**Estimated Number of opportunities**	**Status of project**	**Progress update**
1.	Adam Tas Precinct 10 (Northern Extension), Kayamandi	IRDP, FHF (formally known as FLISP")	3374 residential opportunities	Detailed planning	The Land Use Application has been advertised for public comment, and no objection to the proposed development was received. Discussions regarding an additional entrance to the development, which includes a servitude over certain properties had to be finalise for the submission to the MPT.
2.	Erf 64, Kylemore	IRDP	419 service sites and top structures	Detailed planning	The HDA submitted the Land Use Application for development rights. An advertisement for public comment will be advertise during May/June 2025. Furthermore, amendments had to be made in order to ahere to all land use planning regulations.
3.	Jamestown Development: Phase 4	IRDP, Formal Housing Finance (FHF — formally known as FLISP")	TBD	Detailed planning	A service provider has been appointed to undertake planning studies and obtain development rights for a mixed-used housing development. Specialist studies have been completed. A draft conceptual urban design framework is in progress.
4.	Erven 412, 217, and 284 Groendal, Franschhoek	IRDP, FHF (formally known as FLISP")	Business opportunities	Pre-planning	A call for proposal is being prepared to appoint an implementing agent for the development of Erven 412, 217, and 284.
5.	Portion of Erf 6847, Cloetesville, Stellenbosch	FHF (formally known as FLISP")	Service sites and top structures to be determined	Planning	Council has approved the project to proceed with detailed planning studies. No funding has been allocated on the PDoI Business Plan.

Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update
6.	La Motte Old Forest Station	IRDP, FHF (formally known as FLISP")	±1000 sites serviced sites; possible temporary relocation units	Planning	The HDA has been appointed to facilitate the transfer of land. The HDA submitted a new request for the State Land Release for the subject property. The NDoPW&I to provide HDA with Power of Attorney for specialist studies to commence.
7.	Droë Dyke	TBD	TBD	Planning	The HDA has been appointed to facilitate the transfer of land. The HDA submitted a new request for the State Land Release for the subject property. The NDoPW&I to provide HDA with Power of Attorney for specialist studies to commence.
***Social Housing Project**					
Name of project / settlement		**Type of project / subsidy Mechanism**	**Estimated Number of opportunities**	**Status of project**	**Progress update**
1.	Cloetesville Social Housing (Farms 81/2 and 81/9, Stellenbosch)	Social Housing	± 250 – 350 rental units	Detailed planning	An accredited Social Housing Institute (SHI) and/or Other Development Agency (ODA) to develop social housing was appointed by the BAC on 16 February 2024. The draft LAA item served before Council and was approved on 27 November 2024. Draft Project Agreement to be concluded before the end of July 2025.
2.	Lapland Precinct	Social Housing	±368 rental units	Feasibility study	The Municipality appointed a professional Social Housing team to undertake various studies to determine the viability for a Social Housing Project. These studies will be submitted during the 2025/26 Financial Year.

3.	Nietvoorbij Stellenbosch	Social Housing	TBD	Feasibility study	To be investigated
Formalising and upgrading of informal settlements and existing settlements					
Name of project / settlement		**Type of project / subsidy Mechanism**	**Estimated Number of opportunities**	**Status of project**	**Progress update**
1.	Erf 2183, La Rochelle, Klapmuts	UISP	109 serviced sites; possible temporary relocation units	Implementation	The MPT approved the Land Use Application end of February 2024. The PDoI approved the funding for the installation of the services. The user department appointed a service provider for the detail design of all associated infrastructure services. This will also include the construction management of the project for occupation.
2.	Langrug Dam, Franschhoek	UISP	250 - 300 sites	Detailed planning	The appointment of a service provider for finalizing detailed conceptual layout plans for the rehabilitation of the freshwater dam and implementation of an in-situ upgrade project has been completed. Funding applications have been submitted to the PDoI for the planning and implementation of the project. Funding for Interim Basic Services (IBS) has been approved approval from the PDoI.
3.	Kayamandi Town Centre	UISP, Institutional	1854 service sites and top structures	Detailed planning	The service provider submitted the land use application to obtain development rights for township establishments for 3-storey (BNG) walk-ups. Await MPT decision.
4.	Enkanini Informal Settlement	UISP	1300 sites	Implementation	Implementing of Interim Basic Services (IBS) will commence in the 2024/25 and 2025/26 Financial Years.

Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update
5.	Five housing projects in Kayamandi	Township establishment	396 erven	Detailed planning	The MPT approved the 4 projects on 27 January 2023 and the registration of 4 projects was registered at the Surveyor General (SG)'s office. One project that was submitted to Land Use Planning is currently withheld due to an outstanding PoA of Erf 66 which is not in ownership of the Municipality. The matter is currently being dealt with by Department: Corporate Services
6.	3460 Meerlust, Franschhoek (200)	IRDP	200 housing units	Feasibility study	The HDA has been appointed to facilitate the transfer of land and to finalise detailed planning studies for township establishment.
7.	Jonkershoek	Township Establishment, IRDP, FHF (formally known as FLISP)	Units and sites TBD, together with 40 existing units	Feasibility study	The HDA has been appointed to facilitate the transfer of land and to finalise detailed planning studies for township establishment.

Table 1

(f) that **Council take note** of the projects under construction (within the implementation phase which is dealt by the Section: Project Management Unit (PMU) or Section: Housing Development), as reflected in table 2 below contained in this report:

Housing projects being Implemented					
Name of project / settlement		**Type of project / subsidy Mechanism**	**Estimated Number of opportunities**	**Status of project**	**Progress update**
1.	Erf 3229, Mooiwater	UISP	253 sites	Implementation	Development rights for the project have been obtained. A contractor was appointed, and construction has commenced and be completed in the 2024/2025.

Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update
2.	Erf 7001, Cloetesville ("Soek-mekaar")	IRDP, FHF (formally known as FLISP")	201 Service Sites and GAP housing	Implementation	The development rights have been obtained to develop middle- to higher-GAP housing. A funding application will be submitted to DPoI to install the internal services.
3.	ISSP Kayamandi Zone O (711) UISP	UISP	178 sites	Implementation	The Project Management Unit is following a procurement process to appointment a contractor for the construction of 170 top structures.
4.	Jamestown Development: Phases 2 & 3	IRDP, FHF (formally known as FLISP")	274 service sites (top structures TBD)	Implementation	The MPT approved the Land Use Application for Phases 2 and 3 on 1 March 2024. A funding application has been submitted for the implementa-tion of Phases 2 and 3. As soon as the contractual agreement and PDoI is concluded, a call for proposal to appoint an Implementing Agent will commence.
5.	Watergang Phase 2C – Portion of Erf 3603, Kayamandi	UISP	86 sites	Implementation	The services are extremely vandalised and a report to determine the cost of damages was submitted for scrutiny. A funding application will be prepared and submitted to PDoI.
6.	Maasdorp Village, Franschhoek	Township Establishmen t	16 subdivided erven	Detailed planning	The MPT approved the Land Use Application and a funding model needs to be developed to address the specific needs of the Forest Village.

Table 2

(g) that **Council approves** the removal of Erven 6668, 6705, 7181, 7271, Cloetesville, (as explained on Page 29 of **ANNEUXRE** 1) Stellenbosch, from the Housing Pipeline due to the high cost of implementation, the steep terrain and unsuitable soil conditions.

6. DISCUSSION / CONTENTS

6.1 Background

The Housing Pipeline must be reviewed annually to effectively articulate the Municipality project list, targets, and budget allocations towards fulfilling the housing demand and its legislative mandate.

The objective of the housing pipeline is to provide more emphasis on the housing programmes administered by the Municipality such as:

- The provision of enhanced serviced sites;
- the upgrading of informal settlements;
- access to affordable housing (BNG);
- Social Housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in March 2017);
- the IRDP enables the development of well-located, socially diverse projects that provide a mix of income groups and land uses; and
- First Home Finance (FHF), formally known as Financed Linked Individual Subsidy Programme (FLISP) - for those within the GAP market to acquire existing properties or to buy a serviced site.

Upgrading of Informal Settlements

The Municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- In-situ upgrading of informal settlements;
- Upgrade informal settlements by the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with the Expanded Public Works Programme (EPWP) and longer-term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

Informal backyard dwellings

The Municipality through the Housing Pipeline is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently, it is required to be registered on the Housing Demand Database with the hope that it will result in a permanent dwelling in one of the Council's housing projects. This process is long and tedious and the chance of obtaining a formal house is very slim. Therefore, the Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes. The provision of Social Housing (affordable rental units) will be a key initiative to address the plight of the backyarders.

Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017, by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the Municipality and the latter culminated in a Council decision instructing the administration to attract Social Housing Institutions (SHI) and/or Other Development Agency (ODA) in order to effect to the Municipality's Social Housing programme.

The aim of this programme is to ensure improved quality of life for communities through a Rental Housing programme. This process of integration speaks to the importance of:

- Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium density housing stock etc.;
- Social sustainability: social integration between various income groups, access to educational, recreational and health facilities, etc.; and
- Ecological sustainability: conservation of scarce resources.

The aim and objective of Social Housing is to provide safe and affordable rental units for families earning R1 850 – R22 000 per month.

The image below depicts areas that have been declared as Restructuring Zones for Stellenbosch Municipality as Figure 1.

Figure 1: Restructuring Zones as indicated in green.

Business Plan

To give effect to the Housing Pipeline, the PDoI through the Human Settlements Business Plan allocated the Human Settlement Development Grant (HSDG) and Informal Settlements Upgrading Partnership Grant (ISUPG) in MTREF period (2025/26 – 2027/28 financial year) to the amount of **R286 026 000**.

6.2 Discussion

Housing Demand Overview

According to the Provincial Department of Infrastructure (branch Human Settlement) housing demand database, Stellenbosch Municipality's current housing demand database (waiting list) comprises of 19 759 applicants. For purposes of planning and

alignment, the active demand is used to determine the backlog and opportunities required to ensure a healthy delivery pipeline towards fulfilling the housing demand and its legislative mandate.

The table below articulates the housing subsidy programmes provided by Government.

Housing subsidy programmes		Income bracket (Monthly Household Income)	Description
1	Government subsidised housing	<R3500	100% government subsidy with no beneficiary contributions (Breaking New Ground units subsidised in full by government).
2.	Enhanced site and Service	R3 500 or R3 501 - R7 000	100% government subsidy with no beneficiary contributions for an enhanced service site (standpipe and toilet facility).
3.	GAP Housing	R 3501 – R 22 000	A bond must be obtained through a financial institution who will apply directly to the PDoHS for a top structure. The subsidy amount decreases as the monthly income increases.
4.	Social housing	R1 850 – R6 700 R6 701 - R22 000	Rental or co-operative housing option managed by an accredited SHI.
5.	First Home Finance (FHF), formally known as Finance-Linked Individual Subsidy Programme (FLISP) housing	R3 501 – R22 000	Provision of government subsidies on a sliding scale (of between R121 626 and R27 960) to reduce monthly home loan repayments (partially subsidised by government).
6.	Bonded housing	> R22 000	Private financing from financial institutions for housing on the open market.

Table 3: Housing subsidy programme

Budget - Medium Term Revenue and Expenditure Framework (MTREF)

The Municipality received a Business Plan from the Provincial Department of Infrastructure (PDoI) indicating the projects list, targets, and funding allocation of the approved 2025/26 – 2027/28 HSDG and ISUPG Business Plans.

Stellenbosch Municipality's allocation of the HSDG and ISUPG for the Medium-Term Revenue and Expenditure Framework (MTREF) of 2025/26 to 2027/28 is described in table below:

Housing Subsidy Programme	Financial Year (MTREF PERIOD)		
	2025/26	2026/27	2027/28
Human Settlement Development Grant (HSDG)	R17 803 000	R111 693 000	R114 443 000

Informal Settlements Upgrading Partnership Grant (ISUPG)	R14 212 000	R16 875 000	R11 000 000
Total	**R32 015 000**	**R128 568 000**	**R125 443 000**

Table 4: Grant allocation to the Municipality for the MTREF period

The following draft Municipal budget which includes the gazetted grant funding has been earmarked for the Department: Integrated Human Settlements and Section: Project Management Unit (PMU) relating to housing projects for the MTREF period of 2025/2026 to 2027/2028:

Funding Source	**Financial Years (MTREF PERIOD)**		
	2025/2026	**2026/27**	**2027/28**
Human Settlement Development Grant and Informal Settlements Up Partnership Grant	R32 015 000	R128 568 000	R125 443 000
CRR	R8 060 000	R6 070 000	R1 930 000
Operational budget (management of informal settlements)	R6 142 323	R6 335 170	R6 531 873
Operational budget (mantainance of rental stock)	R12 721 083	R12 865 499	R7 512 809
Total	**R58 938 406**	**R153 838 669**	**R141 417 682**

Table 5: Draft Municipal Budget

It should be noted that an staggering amount of **R354 194 757** for the provision of Human Settlements projects, upgrading of informal settlements as well as the maintenance of rental stock has been budgeted for the MTREF period 2025/26 to 2027/28 financial year.

Priority Human Settlements and Housing Development Areas (PDSHDA)

In 2020, the Minister of Human Settlements Gazetted the declaration of the Priority Human Settlements and Housing Development Areas (PHSHDA's). The PHSHDAs intends to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households and overcome apartheid spatial patterns by fostering integrated urban forms.

The key deliverables are a development plan, an implementation programme, and prioritised projects packaged.

The current status of the PHSHDA for Stellenbosch Municipality, namely:

- The "Stellenbosch Urban Core" Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazette on 15 May 2020 (Government

Gazette No. 43316) and consists of the neighborhoods of Jamestown, Kayamandi and Central Stellenbosch;

- The HDA appointed Plan Associates Development Planners to prepare a Development Plan for Stellenbosch Urban Core PHSHDA (Priority Human Settlement and Housing Development Area) located within the jurisdiction of the Stellenbosch Municipality.
- The project commenced in April 2024 and the Final Draft of the document was submitted in December 2024.
- The final draft document was presented to the Stellenbosch Section 80 committee in March 2025 where it was referred to MAYCO and tabling at Council.

Figure 2 below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PHSHDA):

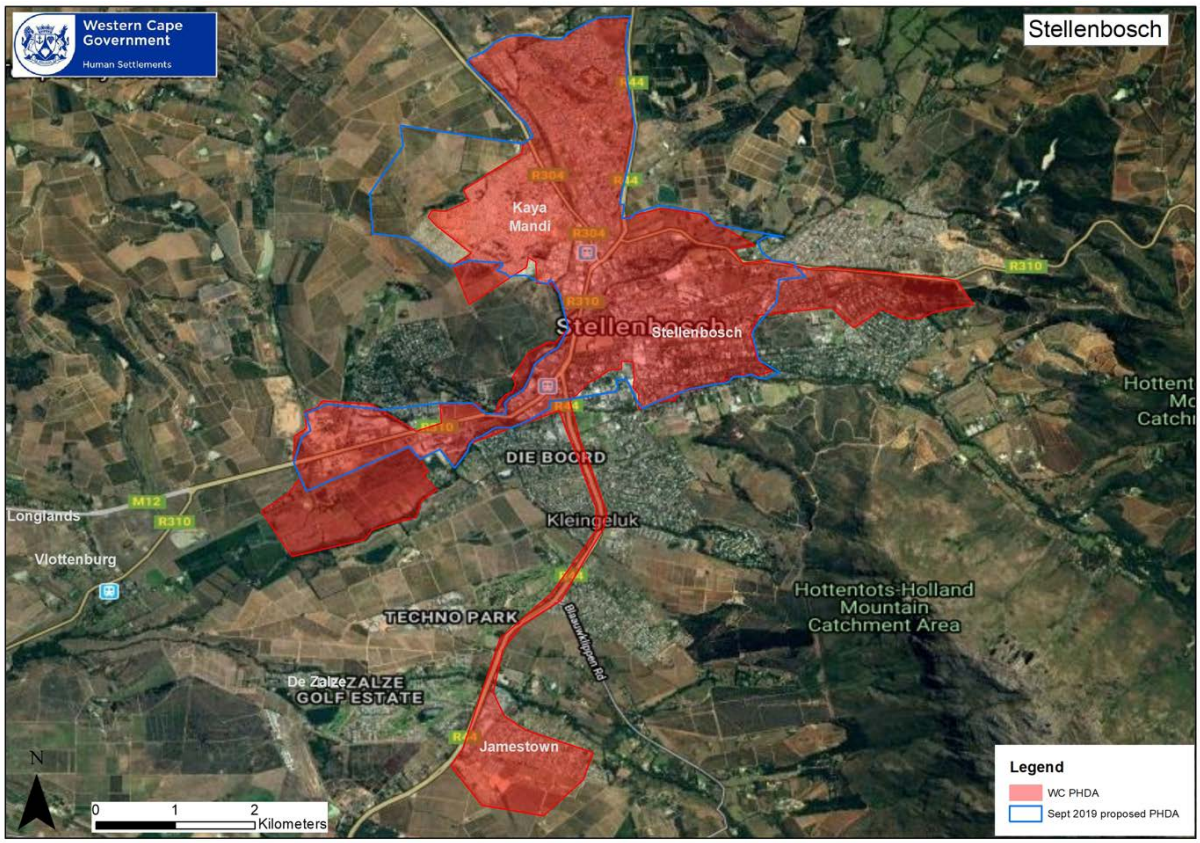

Figure 2: Priority Human Settlements and Housing Development Areas (PHSHDA)

Figure 3 and 4 below illustrates the positions of the various projects identified in the PHSHDA.

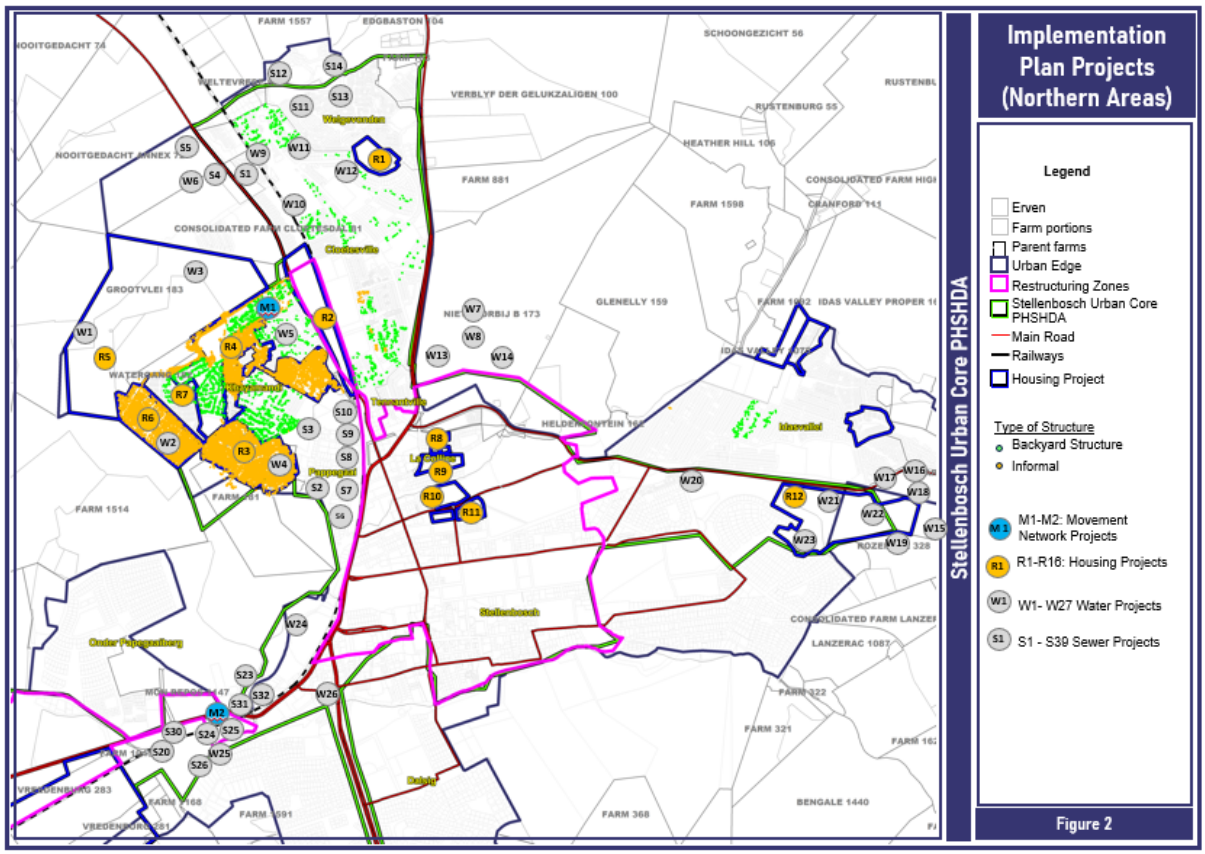

Figure 4: Implementation Plan Projects (Northern Areas)

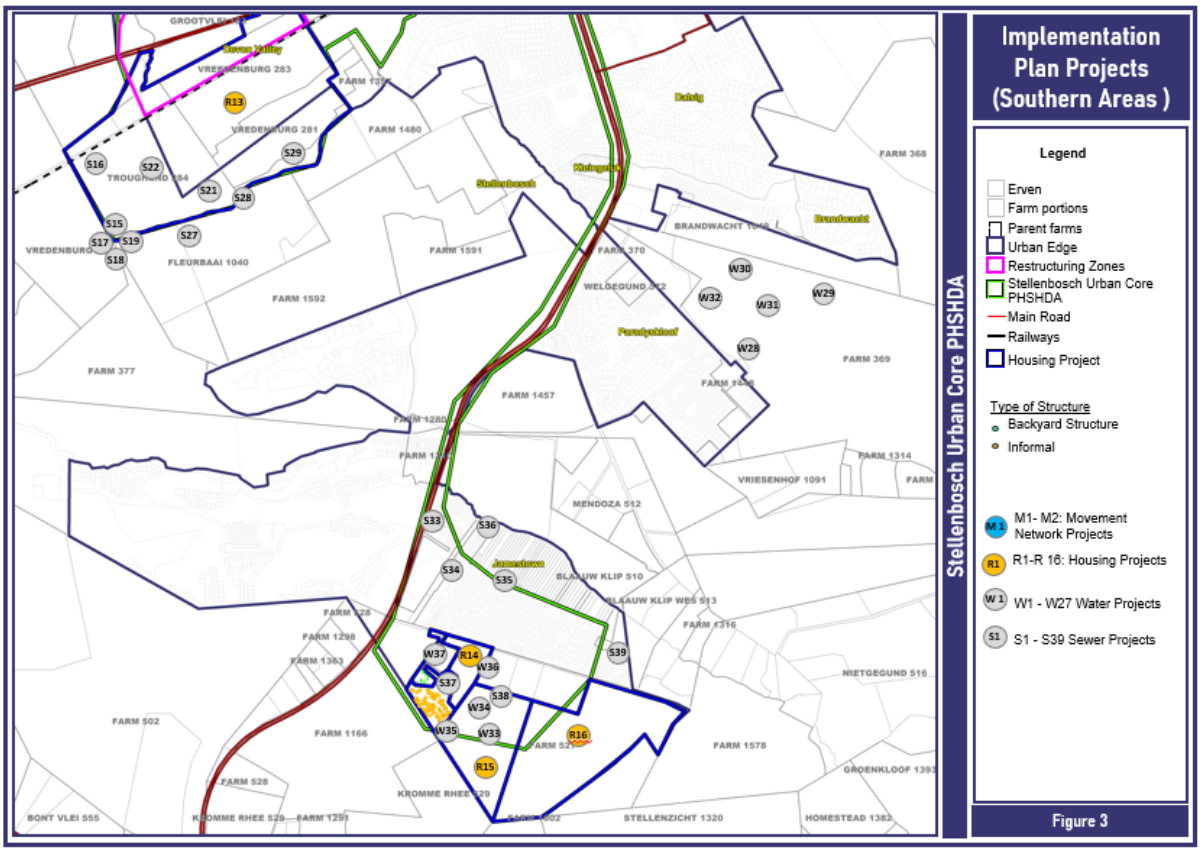

Figure 5: Implementation Plan Projects (Southern Areas)

6.4 Financial Implications

The proposed Housing Pipeline is submitted to Council on an annual basis. The financial implications are based on the approval of projects as per the funding submissions (applications) and project feasibility reports to the PDoI. The financial implications to Council for the Medium-Term Revenue and Expenditure Framework (MTREF) period are described in the table below.

Funding Source	Financial Years (MTREF PERIOD)		
	2025/26	2026/27	2027/28
Human Settlement Development Grant and Informal Settlements Up Partnership Grant	R32 015 000	R128 568 000	R125 443 000
CRR	R8 060 000	R6 070 000	R1 930 000
Operational budget	R18 863 406	R19 200 669	R14 044 682

Table 6

The Housing Pipeline reconciles with the PDoI approved budget/s and Business Plans as well as the infrastructure capacity as aligned with the Municipality's Capital Expenditure Framework.

6.4 Legal Implications

There are no legal implications.

6.5 Staff Implications

This report has staff implications in accordance with the approved organogram. The Section: Housing Development has a vacancy rate of 50%. An additional Programme Manager post has been advertised and the Recruitment and Selection process has been completed. Administrative assistance is also required, therefore the revisiting of the organogram for the Section: Housing Development, has been submitted to the Workplace Restructuring Sub-Committee.

6.6 Previous / Relevant Council Resolutions:

SPECIAL COUNCIL MEETING: 2024-05-31: ITEM 8.2
RESOLVED (nem con)

(a) that Council approves the reviewed annual Housing Pipeline (Projects) for the Medium-Term Expenditure Framework ("MTREF") period 2024 to 2027 for Stellenbosch Municipality, attached as **ANNEUXRE** 1 to this report;

(b) that Council takes note of the Human Settlement Development Grant ("HSDG") and Informal Settlements Upgrading Partnership Grant ("ISUPG") budget allocations for human settlements development projects received from the Provincial Department of Infrastructure (PDoI) for the MTREF period of 2024 to 2027;

(c) that Council takes note that the reviewed annual Housing Pipeline is aligned to the Stellenbosch Municipality's Spatial Development Framework ("MSDF") as amended in 2023; and the Stellenbosch Municipality's Capital Expenditure Framework (CEF);

(d) that Council approves the submission of the revised Stellenbosch Municipality's Housing Pipeline to the Provincial Department of Infrastructure (PDoI);

(e) that Council takes note of the progress of the human settlements development projects that are at pre-planning, and/or planning phase as reflected in table 1 below, as contained in this report; and

**PRE-PLANNING AND/OR PLANNING PHASE*					
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update
1.	Jamestown Development: Phases 2 & 3	IRDP, FLISP	274 service sites (top structures TBD)	Detailed planning	The MPT approved the Land Use Application for Phases 2 and 3 on 1 March 2024. An appeal has been received.
2.	Jamestown Development: Phase 4	IRDP, FLISP	TBD	Detailed planning	A service provider has been appointed to undertake planning studies and obtain development rights for a mixed-used housing development. Specialist studies are being undertaken.
3.	Erf 7001, Cloetesville ("Soek-mekaar")	IRDP, FLISP	± 250 – 300 service sites (top structures TBD)	Detailed planning	A service provider has been appointed to undertake planning studies and obtain development rights for middle to higher GAP housing development. The Land Use Application has been advertised for public comment before a decision can be made by the MPT.

4.	Erf 64, Kylemore	IRDP	+ 402 service sites and top structures	Detailed planning	Power of Attorney has been obtained by the HDA from the NDoPW&I for the planning and development of the property. The HDA has appointed a team of professionals to finalise detailed planning studies and to obtain development rights
5.	Adam Tas Precinct 10 (Northern Extension), Kayamandi	IRDP, FLISP	± 4500 residential opportunities	Detailed planning	Service provider has been appointed to obtain development rights for a mixed-use development. The Land Use Application has been advertised for public comment before a decision can be made by the MPT
6.	Erven 412, 217, Groendal, Franschhoek	IRDP, FLISP	Business opportunities	Pre-planning	A service provider has been appointed to draft different conceptual layout designs and proposals to make provision business orientated opportunities. The different layouts will be presented to Council to decide on a preferred option.
7.	La Motte Old Forest Station	IRDP, FLISP	±1000 sites serviced sites; possible temporary relocation units	Planning	The HDA has been appointed to facilitate the transfer of land. The HDA submitted a new request for the State Land Release for the subject property to the NDoPW&I in order to provide HDA with Power of Attorney for the planning to obtain development rights
8.	Droë Dyke	TBD	TBD	TBD	HDA is involved to facilitate the transfer of land. The HDA submitted a new request for the State Land Release for the subject property to the NDoPW&I in order to provide HDA with Power of Attorney for the planning to obtain development rights
9.	Watergang Phase 2C – Erf 3603, Kayamandi	UISP	87 sites	Detailed Planning	The services are extremely vandalised and a report to determine the cost of damages was submitted for scrutiny. A funding application will be prepared and submitted PDoI
**Social Housing Project*					
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update
1.	Cloetesville Social Housing (Farms 81/2 and 81/9, Stellenbosch)	Social Housing	± 250 – 350 rental units	Detailed planning	An accredited Social Housing Institute (SHI) and/or Other Development Agency (ODA) to develop social housing was approved by the BAC on 16 February 2024. A Draft Land Availability Agreement (LAA) and Draft Project Agreement to be concluded before the end of July 2024
**Formalising and upgrading of informal settlements and existing settlements*					
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update

1.	Erf 2183, La Rochelle, Klapmuts	UISP	109 serviced sites; possible temporary relocation units	Detailed planning	The MPT approved the Land Use Application end of February 2024. Funding applications have been submitted to the PDoI for the implementation of the project. Awaits funding approval from the PDoI.
2.	Langrug, Franschhoek	UISP	1900 sites	Detailed planning	The appointment of a service provider for finalizing detailed conceptual layout plans for the rehabilitation of the freshwater dam and implementation of an in-situ upgrade project has been completed. Funding applications have been submitted to the PDoI for the planning and implementation of the project. Awaits funding approval from the PDoI.
3.	Kayamandi Town Centre	UISP, Institutional	1854 service sites and top structures	Detailed planning	The service provider submitted the land use application to obtain development rights for township establishment for 3-storey (BNG) walk-ups. Additional bulk services investigation studies were undertaken due to requests from Infrastructure services. Await land use rights.

(f) that **Council take note** of the projects under construction (within the implementation phase which is dealt by the Section: Project Management Unit (PMU) as reflected in table 2 below contained in this report:

**Housing projects being Implemented*					
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Progress update
1.	Erf 3229, Mooiwater	UISP	253 sites	Implementation	Development rights for the project have been obtained. A contractor was appointed, and construction will commence in 2024/2025 for the installation of infrastructure services
2.	ISSP Kayamandi Zone 0 (711) UISP	UISP	178 sites	Implementation	A contractor to implement the civil infrastructure services has been appointed for the implementation of the project. 49 (forty-nine) of the 55 (fifty-five) households received and signed the MoU and/or relocation notices; 6 (six) structures / family members that re residing with the main family does not want to move with the main family.

12TH COUNCIL MEETING: 2023-03-29: ITEM 11.5.1

RESOLVED (majority vote)

(a) that Council approve the reviewed annual Housing Pipeline (Projects) for the Medium-Term Expenditure Framework ("MTREF") period 2023 to 2026 for Stellenbosch Municipality, attached as **ANNEUXRE** A to this report;
(b) that Council takes note of the draft Human Settlement Development Grant ("HSDG") and draft Informal Settlements Upgrading Partnership Grant ("ISUPG") budget allocations for human settlements development projects received from the Provincial Department of Human Settlements (PDoHS) for the MTREF period of 2023 to 2026;
(c) that Council takes note of the new strategic shifts pertaining the provision of human settlements development from the National Department of Human Settlements (NDoHS) and Provincial Departments of Human Settlements (PDoHS);
(d) that Council takes note that the reviewed annual Housing Pipeline is aligned to the Stellenbosch Municipality's Spatial Development Framework ("MSDF") as amended in 2023; and the Stellenbosch Municipality's Capital Expenditure Framework (CEF);
(e) that Council approves the submission of the revised Stellenbosch Municipality's Housing Pipeline to the Provincial Department of Human Settlements;
(f) that Council takes note of the progress of the human settlements development projects that are at pre-planning, and/or planning phase as reflected in table 1 below, as contained in this report;
(g) that Council takes note of the projects under construction (within the implementation phase which is dealt by the Department: Project Management Unit) as reflected in table 2 below contained in this report; and
(h) that Council approves that the reviewed Housing Pipeline for the MTREF period of 2023 to 2026 be advertised as an appendix to the Stellenbosch Municipality's Municipal Spatial Development Framework (MSDF) as amended during 2023.

6.7 Risk Implications

This report has no risk implications for the Municipality.

6.8 Comments from the relevant departments

6.8.1 Department: Development Planning

The reviewed Housing Pipeline is aligned with the proposed amended MSDF 2023.

6.8.2 Department: Development Services, Asset Management and Systems &

Project Management Unit (PMU)

The department will only support projects which have full signed funding approval, including the construction funding, and supported by the PDoI. In the instance where there are no signed construction funding Resolutions in place, the projects cannot be implemented by the PMU. It must be noted that the PMU also cannot take responsibility for any delays on site due to land invasions or illegal occupants that must be relocated to alternative sites prior to the implementation phase. Thus, the development facilitation, relocation and development rights must be in place prior to the project being handed over to the PMU for construction procurement to begin.

1. INTRODUCTION

The Provincial Department of Human Settlements (PDoI) requires that every Municipality must have a Housing Pipeline. The Housing Pipeline is premised on a ten-year horizon and serves as planning and budgeting tool for implementation of human settlements initiatives. Each Municipality's Housing Pipeline is an integral component of the Provincial Department of Human Settlements' Business Plan. The Housing Pipeline must be review on annually to effectively articulate the Municipality project list, targets and budget allocations towards fulfilling the housing demand and its legislative mandate.

The objective of the Housing Pipeline is to provide more emphasis on the housing programmes administered by the Municipality such as:

- The provision of enhanced serviced sites;
- the upgrading of informal settlements;
- access to affordable housing (Breaking New Ground - BNG);
- Social Housing (the National Minister of Human Settlements approved Stellenbosch as a restructuring town and restructuring zones in March 2017);
- the Integrated Residential Development Programme (IRDP) enables the development of well-located, socially diverse projects that provide a mix of income groups and land uses; and
- First House Finance (FHF) formally known as Financed Linked Individual Subsidy Programme (FLISP) for those within the gap market to acquire existing properties or to buy a serviced site.

Upgrading of Informal Settlements

The Municipality manages and coordinates the upgrading of informal settlements through the following broad objectives:

- In-situ upgrading of informal settlements;
- Upgrade informal settlements by the provision of basic services;
- Develop emergency housing sites geared to accommodate evictees;
- Enumerate / undertake demographic surveys of identified informal settlements;
- Facilitate tenure security in informal settlements;
- Assist in short-term job creation through linkages with Expanded Public Works Programme (EPWP) and longer term job creation through upgrading programmes;
- Facilitate capacity-building and training for residents and stakeholders through direct service provision and partnerships with outside agencies; and
- Manage the provision of services and development programmes to informal settlements.

Informal backyard dwellings

The Municipality through the Housing Pipeline is actively attempting to address the needs and plight of backyard dwellers within the municipal area. Currently it is required to be registered on the Housing Demand Database (municipal waiting list) and hopefully this will result in a permanent dwelling in one of Council's housing projects. This process is long and tedious and the chance of actually obtaining a formal house, is very slim. Therefore, Council is actively researching ways in which the service (and basic services) to backyard dwellers can be improved through its various housing programmes.

Social Housing

Stellenbosch Municipality was approved as a Restructuring Town in March 2017, by the National Minister of Human Settlements. This approval included the confirmation of the various Restructuring Zones within the Municipality and the latter culminated in a Council decision instructing the administration to attract Social Housing Institutions (SHI's) and/or Other Development Agency (ODA's) in order to effect to the Municipality's social housing programme.

The aim of this programme is to ensure improved quality of life for communities through a Rental housing programme. This process of integration speaks to the importance of:

- Economic sustainability: affordability, access to economic opportunities, and promoting job creation via the multiplier effect associated with building medium density housing stock etc.;
- Social sustainability: social integration between various income groups, access to educational, recreational and health facilities, etc.; and
- Ecological sustainability: conservation of scarce resources.

2. STELLENBOSCH MUNICIPALITY HOUSING DEMAND OVERVIEW

Stellenbosch Municipality's current housing demand database (waiting list) comprises of 19 759 applicants. This list is directly linked to the Western Cape Housing Demand Database. For purposes of planning and alignment, the active demand is used to determine the backlog and opportunities that are required.

The table 1 below indicates the housing products and finance options currently available based on the household income ranges.

Housing subsidy programmes		Income bracket (Monthly Household Income)	Description
1.	Government subsidised housing	<R3 500	100% government subsidy with no beneficiary contributions (Breaking New Ground units subsidised in full by government).
2.	Enhanced site and Service	R3 500 or R3 501 - R7 000	100% government subsidy with no beneficiary contributions for an enhanced service site (standpipe and toilet facility).
3.	GAP Housing	R 3501 – R 22 000	A bond must be obtained through a financial institution who will apply directly to the PDoI for a top structure. The subsidy amount decreases as the monthly income increases.
4.	Social Housing	R1 850 – R6 700 R6 701 - R22 000	Rental or co-operative housing option managed by an accredited Social Housing Institution (SHI) and/or Other Development Agency (ODA).
5.	First House Finance (FHF) formally known as Finance-Liked Individual Subsidy Programme (FLISP)	R3 501 – R22 000	Provision of government subsidies on a sliding scale (of between R121 626 and R27 960) to reduce monthly home loan repayments (partially subsidised by government).
6.	Bonded housing	> R22 000	Private financing from financial institutions for housing on the open market.

Table 1: Housing products and finance options

3. PRIORITY HUMAN SETTLEMENTS AND HOUSING DEVELOPMENT AREAS (PHSHDA)

In 2020, the Minister of Human Settlements Gazetted the declaration of the Priority Human Settlements and Housing Development Areas (PHSHDA's). The PHSHDAs intends to advance Human Settlements Spatial Transformation and Consolidation by ensuring that the delivery of housing is used to restructure and revitalise towns and cities, strengthen the livelihood prospects of households and overcome apartheid spatial patterns by fostering integrated urban forms.

The key deliverable is a development plan, an implementation programme, and prioritized projects packaged.

The current status of the PHSHDA for Stellenbosch Municipality, namely:

- The "Stellenbosch Urban Core" Priority Human Settlements and Housing Development Area (PHSHDA) was formally gazetted on 15 May 2020 (Government Gazette No. 43316) and consists of the neighbourhoods of Jamestown, Kayamandi and Central Stellenbosch.
- The HDA appointed Plan Associates Development Planners to prepare a Development Plan for Stellenbosch Urban Core PHSHDA (Priority Human Settlement and Housing Development Area) located within the jurisdiction of the Stellenbosch Municipality.
- The project commenced in April 2024 and the Final Draft of the document was submitted in December 2024.
- The Final Draft document was presented to the Stellenbosch Section 80 committee during March 2025 where it was referred to MAYCO and tabling at Council.

Image 1 below depicts areas that have been declared as Priority Human Settlements and Housing Development Areas (PDSHDA):

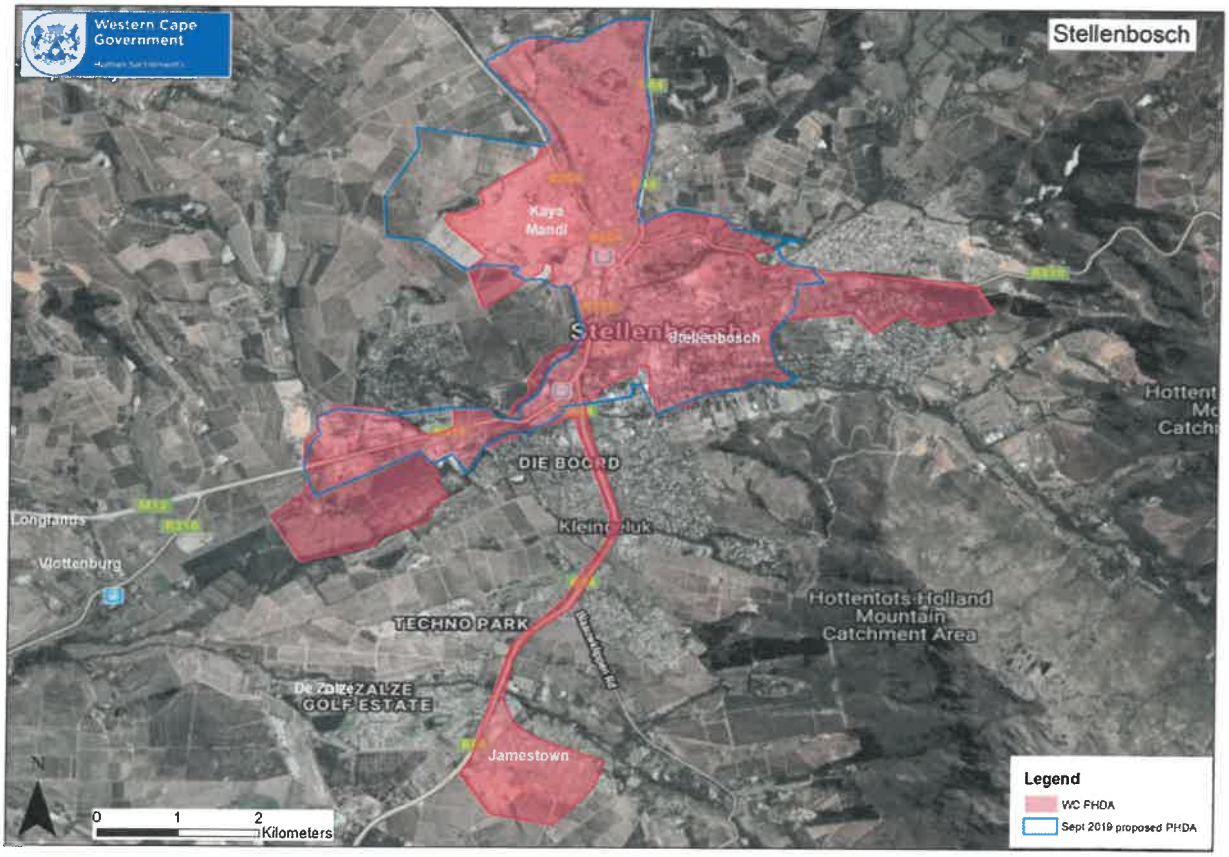

Image 1: Priority Human Settlements and Housing Development Areas (PDSHDA)

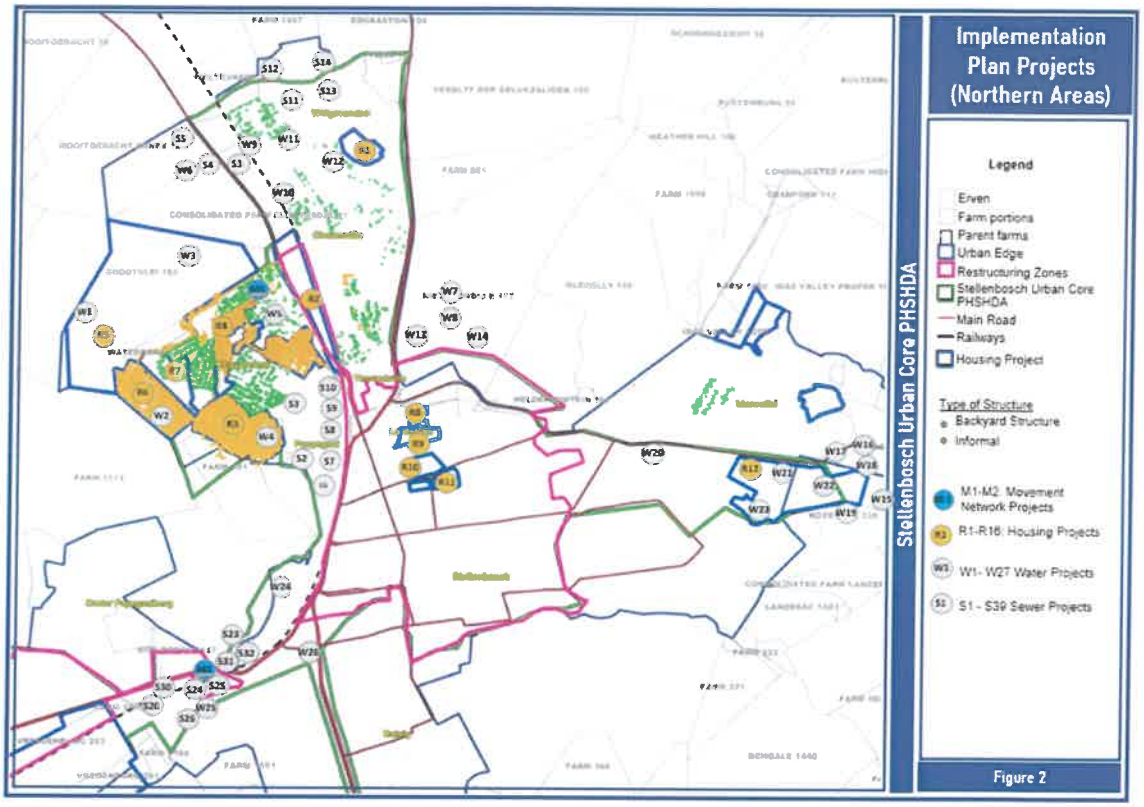

Image 2: Implementation Plan Projects (Northern Areas)

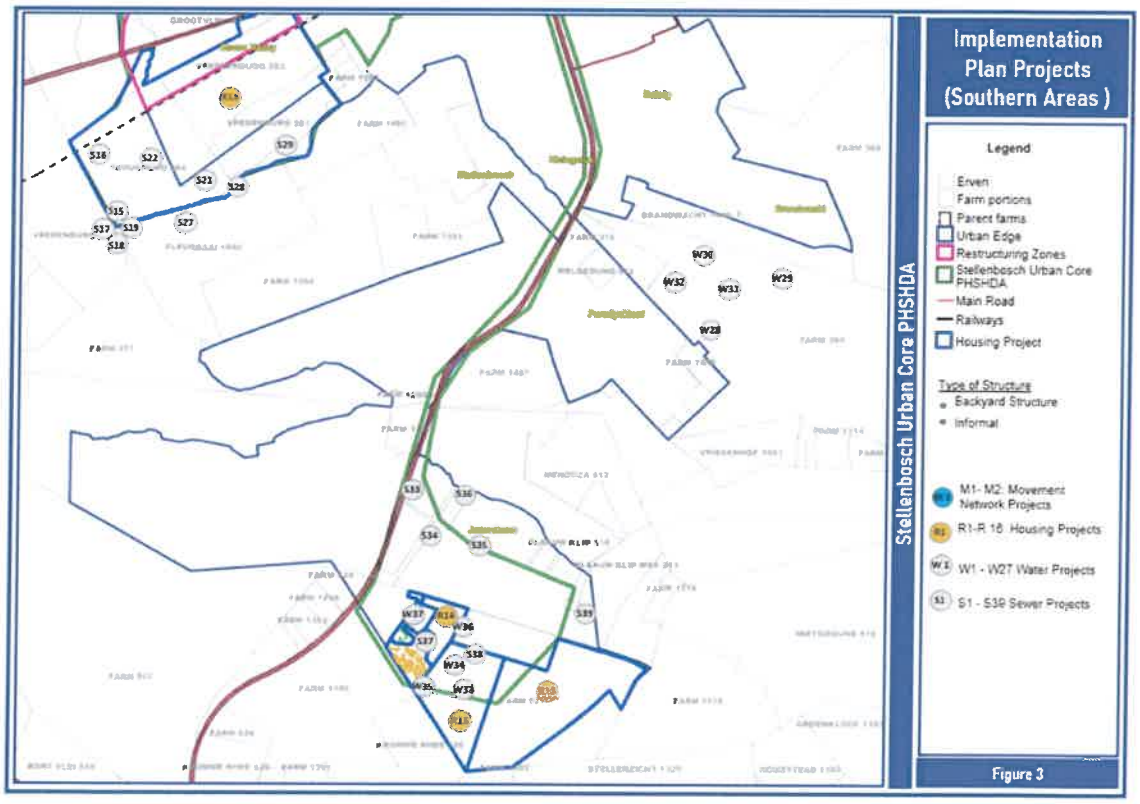

Image 3: Implementation Plan Projects (Southern Areas)

4. BUDGET - MEDIUM TERM REVENUE AND EXPENDITURE FRAMEWORK (MTREF)

The Human Settlement Development Grant (HSDG) and Informal Settlements Upgrading Partnership Grant (ISUPG) allocation for 2025/26 financial year is R32 015 million. Stellenbosch Municipality's allocation of the HSDG and ISUPG for the Medium-Term Revenue and Expenditure Framework (MTREF) period from 2025/26 to 2027/28 is described hereunder in table 2:

Housing Subsidy Programme	Financial Year (MTREF PERIOD)		
	2025/26	2026/27	2027/28
Human Settlement Development Grant (HSDG)	R17 803 000	R111 693 000	R114 443 000
Informal Settlements Upgrading Partnership Grant (ISUPG)	R14 212 000	R16 875 000	R 11 000 000
Total	**R32 015 000**	**R128 568 000**	**R125 443 000**

Table 2: Grant allocation to the Municipality for the MTREF period

The Municipality received the Gazetted Business Plan from the Provincial Department of Infrastructure (PDoI) indicating the projects list, targets and funding allocation for the approved 2025/26 HSDG and ISUPG Business Plans. The list of projects, targets and budget allocation for Stellenbosch Municipality in the 2025/26 financial year as well as the MTREF period are stipulated hereunder in the table below:

Business Plan 2025/26 - 2027/28 HSDG & ISUPG	PROGRAMME	2025/26	2026/27	2027/28
Average Site Cost (R'000)	60 000	FUNDING	FUNDING	FUNDING
Average Unit cost (R'000)	158 000	R	R	R
Stellenbosch		**R 32 015 000**	**R128 568 000**	**R 125 443 000**
Stellenbosch Jamestown Phase 2 - 4 (1016) IRDP	IRDP	10 000 000	16 000 000	51 000 000
Cloetesville (380) FLISP	IRDP	0	8 000 000	8 000 000

Table 3

5. STELLENBOSCH MUNICIPALITY PIPELINE AND EXISTING HOUSING PROJECTS

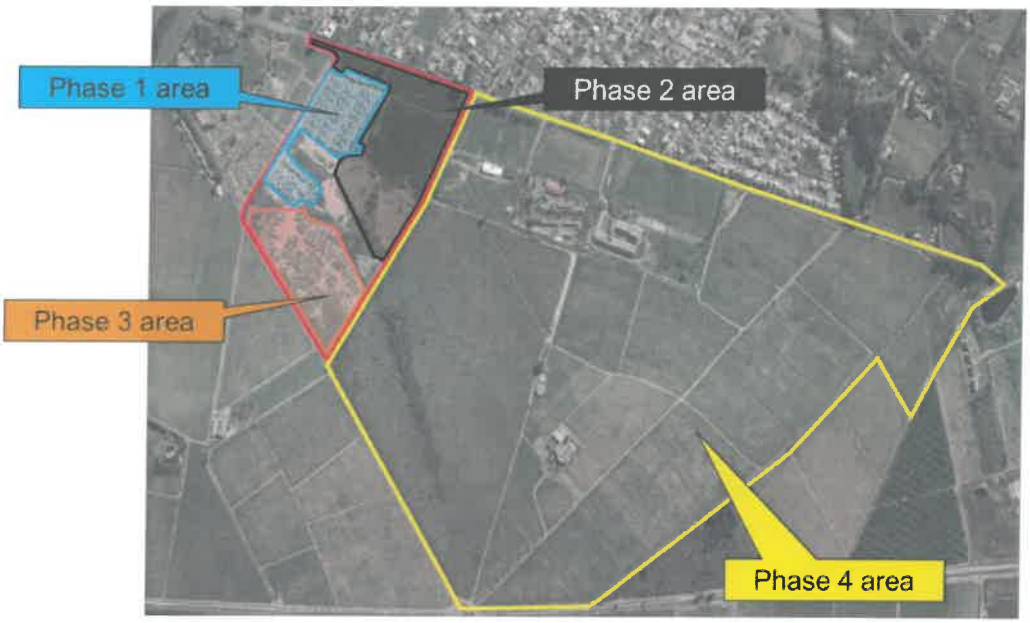
Stellenbosch Municipality currently has numerous planned and potential housing development projects under consideration to ensure a healthy delivery pipeline towards fulfilling the housing demand and its legislative mandate. The overall Housing Pipeline of the Municipality, potential planned and current projects provided includes the formalisation and/or upgrade of informal settlements. The housing development project information is provided per town/area and described in terms of its project name, locality, subsidy mechanism, targeted units, planning timeframes, and whether the projects have council approval or not. The housing development projects are at various stages of planning such as desktop studies, feasibility studies, detailed planning studies and securing development rights and implementation.

The implementation of housing projects in the Municipality is executed by the Directorate: Infrastructure Services, Section: Project Management Unit (PMU). The Directorate: Planning and Economic Development, Section: Housing Development hands over projects to the Section: Project Management Unit for implementation after obtaining all the required development rights. Projects that have been included in the Housing Pipeline for the 2025/26 financial year are indicated in the table below.

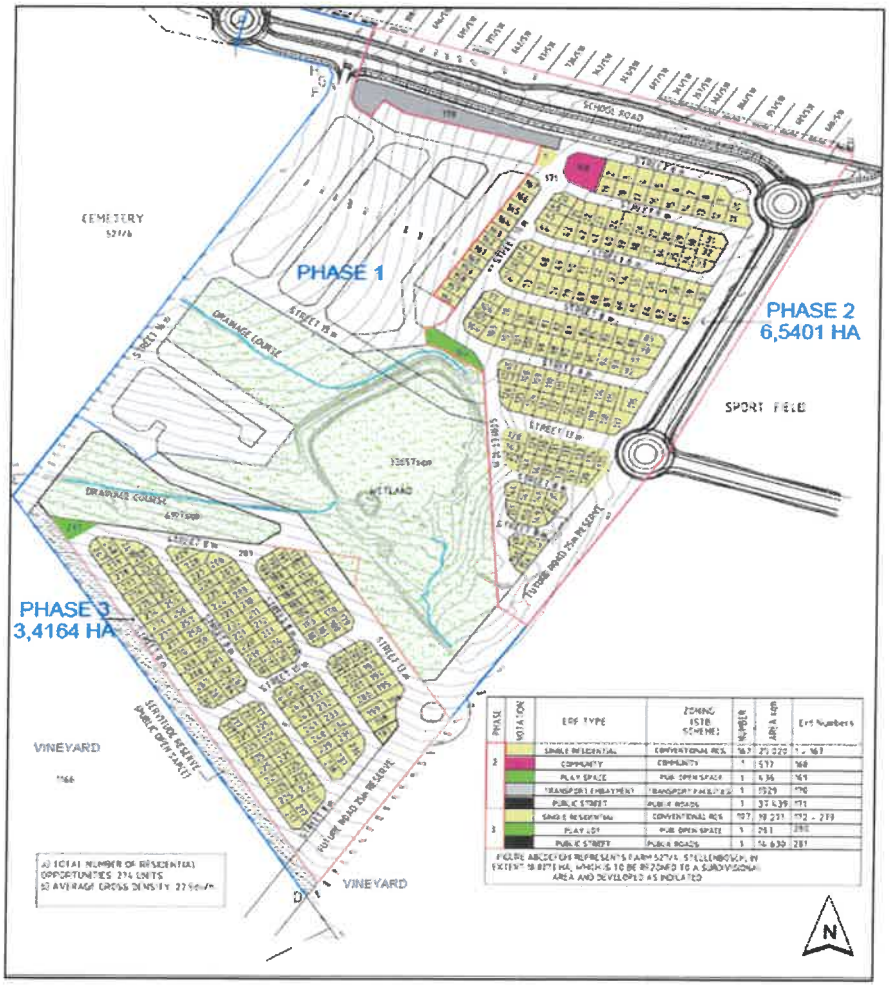
PRE-PLANNING AND/OR PLANNING PHASE								
Name of project / settlement		**Type of project / subsidy Mechanism**	**Estimated Number of opportunities**	**Status of project**	**Project timeframes Land use approvals**			**Comment**
					2025/26	**2026/27**	**2027/28**	
1.	Adam Tas Precinct 10 (Northern Extension), Kayamandi, Stellenbosch	IRDP, FHF (formally known as FLISP")	3374 residential opportunities	Detailed planning			-	The Land Use Application has been advertised for public comment, and no objection to the proposed development was received. Discussions regarding an additional entrance to the development, which includes a servitude over certain properties had to be finalise before submission to the MPT.
2.	Erf 64, Kylemore	IRDP	419 service sites and top structures	Detailed planning				The HDA submitted the Land Use Application for development rights. An advertisement for public comment will be advertise during May/June 2025. Furthermore, amendments had to be made in order to adhere to all land use planning regulations.
3.	Jamestown Development: Phase 4	IRDP, FHF (formally known as FLISP")	TBD	Detailed planning				A service provider has been appointed to undertake planning studies and obtain development rights for a mixed-used housing development. Specialist studies have been completed. A draft

								conceptual urban design framework is in progress.
4.	Erven 412, 217, and 284 Groendal, Franschhoek	IRDP, FHF (formally known as FLISP")	Business opportunities (Erven 412 and 217) and Residential opportunities (Erf 284)	Pre-planning			-	A call for proposal is being prepared to appoint an implementing agent for the development of Erven 412, 217, and 284.
5.	Portion of Erf 6847, Cloetesville, Stellenbosch	FHF (formally known as FLISP")	Service sites and top structures to be determined	Planning			-	Council has approved the project to proceed with detailed planning studies. No funding has been allocated on the PDoI Business Plan.
6.	La Motte Old Forest Station, Franschhoek	IRDP, FHF (formally known as FLISP")	±1000 sites serviced sites; possible temporary relocation units	Planning			-	The HDA has been appointed to facilitate the transfer of land. The HDA submitted a new request for the State Land Release for the subject property. The NDoPW&I to provide HDA with Power of Attorney for specialist studies to commence
7.	Droë Dyke, Stellenbosch	TBD	TBD	Planning				The HDA has been appointed to facilitate the transfer of land. The HDA submitted a new request for the State Land Release for the subject property. The NDoPW&I to provide HDA with Power of Attorney for specialist studies to commence.

*Social Housing Project								
Name of project / settlement		**Type of project / subsidy Mechanism**	**Estimated Number of opportunities**	**Status of project**	**Project timeframes Land use approvals**			**Comment**
					2025/26	**2026/27**	**2027/28**	
1.	Cloetesville Social Housing (Farms 81/2 and 81/9, Stellenbosch)	Social Housing	± 250 – 350 rental units	Detailed planning		-	-	An accredited Social Housing Institute (SHI) and/or Other Development Agency (ODA) to develop Social Housing was appointed by the BAC on 16 February 2024. The draft LAA item served before Council and was approved on 27 November 2024. Draft Project Agreement to be concluded before the end of July 2025.
2.	Lapland Precinct	Social Housing	±368 rental units	Feasibility study	-	-	-	The Municipality appointed a professional Social Housing team to undertake various studies to determine the viability for a Social Housing Project. These studies will be submitted during the 2025/26 Financial Year.
3.	Nietvoorbij Stellenbosch	Social Housing	TBD	Feasibility study	-	-	-	To be investigated



*Formalising and upgrading of informal settlements and existing settlements								
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Project timeframes			Comment
					2025/26	2026/27	2027/28	
1.	Erf 2183, La Rochelle, Klapmuts	UISP	109 serviced sites; possible temporary relocation units	Implementation			-	The MPT approved the Land Use Application end of February 2024. The PDoI approved the funding for the installation of the services. The user department appointed a service provider for the detail design of all associated infrastructure services. This will also include the construction management of the project for occupation.
2.	Langrug Dam, Franschhoek	UISP	250-300 sites	Detailed planning				The appointment of a service provider for finalising detailed conceptual layout plans for the rehabilitation of the freshwater dam and implementation of an in-situ upgrade project has been completed. Funding applications have been submitted to the PDoI for the planning and implementation of the project. Funding for Interim Basic Services (IBS) has been approved approval from the PDoI.
3.	Kayamandi Town Centre, Kayamandi	UISP, Institutional	1854 service sites and top structures	Detailed planning				The service provider submitted the land use application to obtain development rights for township establishment for 3-storey (BNG) walk-ups. Await MPT decision.
4.	Enkanini Informal Settlement	UISP	1300 sites	Implementation	-	-	-	Implementing of Interim Basic Services (IBS) will commence in the 2024/25 and 2025/26 Financial Years.



*Formalising and upgrading of informal settlements and existing settlements								
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Project timeframes Land use approvals			Comment
					2025/26	2026/27	2027/28	
5.	Five housing projects in Kayamandi	Township establishment	396 erven	Detailed planning		-	-	The MPT approved the 4 projects on 27 January 2023 and the registration of 4 projects was registered at the Surveyor General (SG)'s office. One project that was submitted to Land Use Planning is currently withheld due to an outstanding PoA of Erf 66 which is not in ownership of the Municipality. The matter is currently being dealt with by Department: Corporate Services
6.	3460 Meerlust, Franschhoek (200)	IRDP	200 housing units	Feasibility study			-	The HDA has been appointed to facilitate the transfer of land and to finalise detailed planning studies for township establishment.
7.	Jonkershoek	Township Establishment, IRDP, FHF (formally known as FLISP)	Units and sites TBD, together with 40 existing units	Feasibility study			-	The HDA has been appointed to facilitate the transfer of land and to finalise detailed planning studies for township establishment.

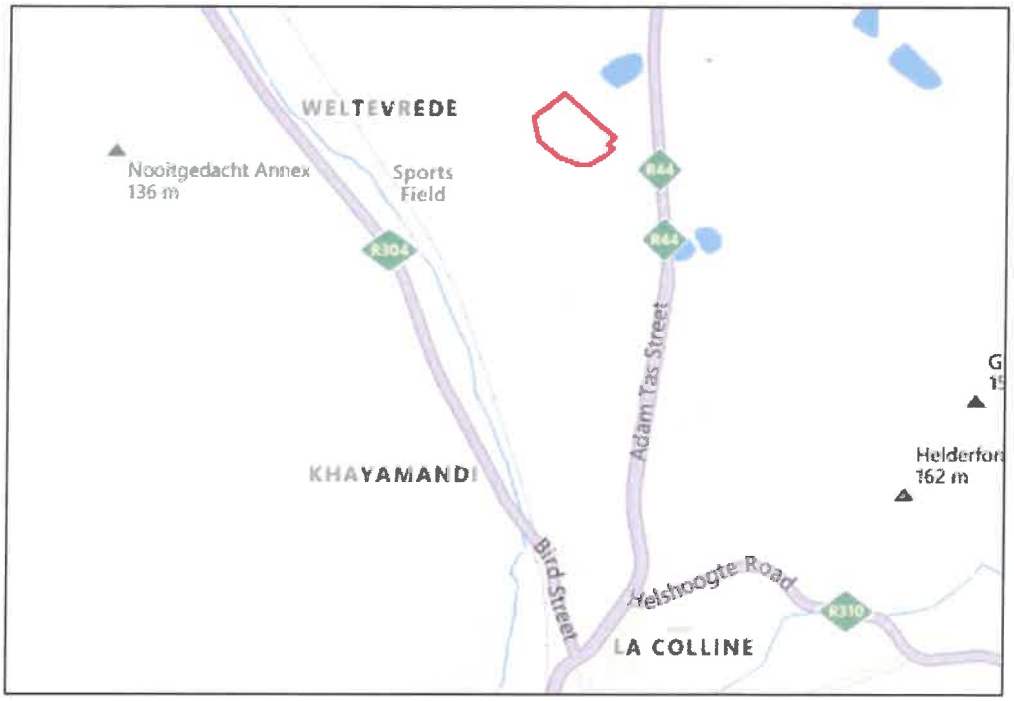
*Housing projects being Implemented								
Name of project / settlement		Type of project / subsidy Mechanism	Estimated Number of opportunities	Status of project	Project timeframes Implementation			Comment
					2025/26	2026/27	2027/28	
1.	Erf 3229, Mooiwater	UISP	218 sites	Implementation			-	Development rights for the project have been obtained. A contractor was appointed, and construction has commenced and be completed in the 2024/2025.
2.	Erf 7001, Cloetesville ("Soek-mekaar") Implementation	IRDP, FHF (formally known as FLISP")	201 Service Sites and GAP housing	Implementation				The development rights have been obtained to develop middle- to higher-GAP housing. A funding application will be submitted to DPoI to install the internal services.
3.	ISSP Kayamandi Zone O (711) UISP	UISP	178 sites	Implementation			-	The Project Management Unit is following a procurement process to appointment a contractor for the construction of 170 top structures.
4.	Jamestown Development: Phases 2 & 3	IRDP, FHF (formally known as FLISP")	274 service sites (top structures TBD)	Implementation				The MPT approved the Land Use Application for Phases 2 and 3 on 1 March 2024. A funding application has been submitted for the implementation of Phases 2 and 3. As soon as the contractual agreement and PDoI is concluded, a call for proposal to appoint an Implementing Agent will commence.
5.	Watergang Phase 2C – Portion of Erf 3603, Kayamandi	UISP	86 sites	implementation				The services are extremely vandalised and a report to determine the cost of damages was submitted for scrutiny. A funding application will be prepared and submitted to PDoI.
6.	Maasdorp Village, Franschhoek	Township Establishment	16 subdivided erven	Detailed planning				The MPT approved the Land Use Application and a funding model needs to be developed to address the specific needs of the Forest Village.

6. PRE-PLANNING AND/OR PLANNING PHASE

6.1 Jamestown Development: Phases 2 – 4 (Ward 21)

Project Name		3269 Jamestown Phases 2 to 4 (1069) IRDP
Property Description		Portion of the Remainder, Portion 3 and a broader portion of Portion 7 of Farm No 527
Town		Stellenbosch
Suburb		Jamestown
Geo-reference		33°59'00"S 18°50'38"E (Phases 2 & 3) 33°59'13"S 18°50'52"E (Phase 4)
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		2025/2026 (Phase 2 &3)
% of Total need addressed by Project		12,3
Housing Programme/s		IRDP / FHF (formally known as FLISP)
Housing Opportunities	**Sites**	±274 housing opportunities- Phases 2 and 3
	Serviced Sites	274 single residential and serviced sites
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	Yes
	Bulk capacity	Yes. Reservoir currently being upgraded
	Land Use Approval	Yes (Phases 2 and 3)
	PDoI Approval	Yes, on Business Plan of PDoI
	Council Approval	Yes
	Risks / Issues	Proposed road reduced the number of opportunities for Phases 2 and 3 by 134 opportunities. Bulk water upgrades currently under construction. The construction of the reservoir has an influence on the design layout affecting the number of housing opportunities for Phase 4.
	Readiness Score	3
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	Majority of the proposed development is located within the approved urban edge. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially. The appointed service provider and the specialist studies must be used to provide the detailed supporting evidence to substantiate the inclusion of portion of the property within the urban edge.
	Planning Opinion	PIRR application was submitted for the implementation of Phases 2 and 3. The following points serve as motivation for project support: • The project is consistent with the PSDF and Municipal SDF (2023) that promotes compaction and densification within the urban edge • The project was in principle supported by PPC in 2016 • The project forms part of the Municipality's Housing Pipeline and is incorporated in the Municipal 5-year IDP (dated 2022 – 2027) • The project is located within the proclaimed Stellenbosch PHDA • This project will provide new housing opportunities in the GAP-market which is a strategic objective of the Municipality.

The subject property is located on the southern edge of the suburb of Jamestown, east of the R44 between Stellenbosch and Somerset West. It is flanked by an existing cemetery on its western boundary and a sports



field located centrally on its northern edge. The site falls within an area characterized by medium to high-density residential as well as non-residential uses that serve the local community of Jamestown.

A professional team was appointed during June 2022 to undertake a broad conceptual urban design framework for a portion of Portion 7 of Farm 527 and remainder Farm 527, Stellenbosch, and to obtain town planning and development rights. A public participation process was concluded. It should be noted that development rights have been approved by the MPT on 1 March 2024 for Phases 2 and 3 on Portion 7 of Farm 527 (single residential erven and service sites. An appeal was lodged against the application. The final notice of appeal was issued on 26 August 2024 wherein the appeal was dismissed, and the application was approved.

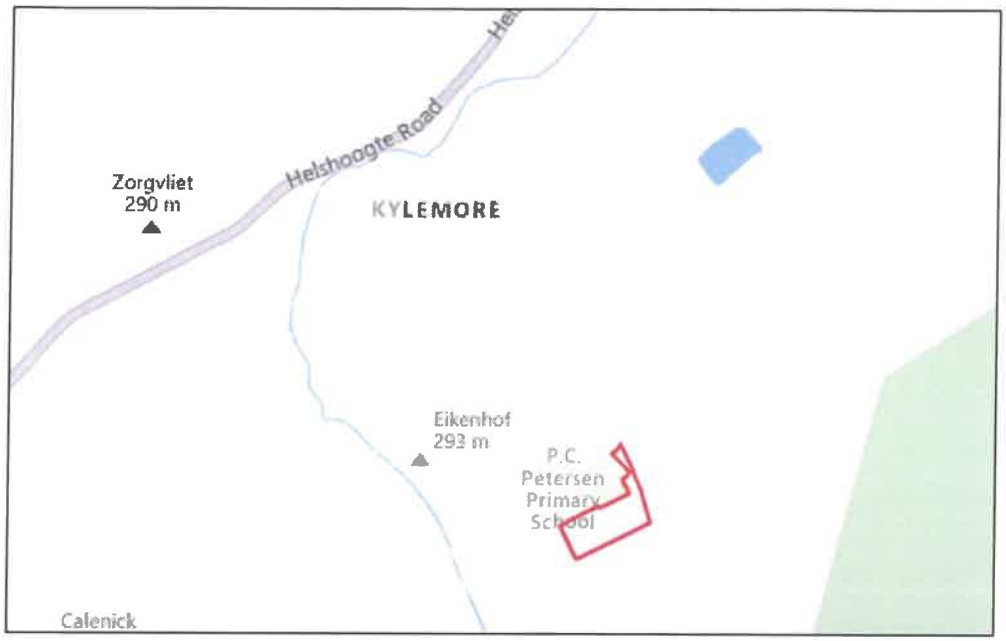
It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Implementation of Phases 2 – 3 Obtain development rights: Phase 4
2026/27	Implementation of Phases 2 – 3
2027/28	Implementation of Phasse 2 – 3

6.2 Erf 7001 Stellenbosch ("Soek-mekaar") - Ward 17

Project Name		3694 Erf 7001 Cloetesville (360) IRDP
Property Description		Erf 7001
Town		Stellenbosch
Suburb		Cloetesville
Geo-reference		33°54'13"S 18°51'16"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		2025/26
% of Total need addressed by Project		1,5 – 1,8
Housing Programme/s		IRDP / FHF (formally known as FLISP)
Housing Opportunities	**Sites**	201 housing opportunities GAP / FHF (formally known as FLISP) housing opportunities
	Serviced Sites	No
	Top Structures (Units)	201
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	N/A
	Bulk capacity	Yes
	Land Use Approval	Yes
	PDoI Approval	Yes. On Business Plan of PDoI
	Council Approval	Yes
	Risks / Issues	FLISP Beneficiaries
	Readiness Score	3

Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	Amended MSDF 2023 - Project falls within the approved Urban Edge of Stellenbosch, and the project is listed on page 199. MHSP 2023 - Project is included in the proposed Housing Pipeline noted on page 130. IDP 2022-2027 - Project is listed as a priority municipal project on page 189. PHSHDA - The Project is included in the Stellenbosch PHSHDA.
	Planning Opinion	The PDoI fully support this PID and PFR application. The PDoI honoured a claim submitted for Tranche 1.1 and Tranche 1,2 be released for 205 opportunities. This implies the release of R413 788.00 funding for Tranche 1.1 and 1.2 payment and provisional release of R1 195 550.00. The release of Tranches 1.1 and 1.2 allowed the Stellenbosch Municipality to complete the planning process. The following points serve as motivation for project support: • The project is consistent with the PSDF and Municipal SDF (2023) that promotes compaction and densification within the urban edge • The project was in principle supported by PPC in 2017 • The project forms part of the Municipality's Housing Pipeline and is incorporated in the Municipal 5-year IDP (dated 2022 – 2027) • The project is located within the proclaimed Stellenbosch PHDA • This project will provide new housing opportunities in the GAP-market which is a strategic objective of the Municipality.



A study was done by a service provider to investigate different sites for possible developments in Cloetesville. In accordance with the recommendations which were presented to Council, Erf 7001 was identified for possible GAP / FHF (formally known as FLISP) housing. A Call for Proposal for the mixed-use development of Erf 7001, Cloetesville was advertised on two occasions.

A team of professionals have been appointed in April 2022 to undertake a to undertake a Broad Conceptual Urban Design framework for Erf 7001 and to obtain town planning and development rights. A public participation process was concluded to obtain public comment. The MPT approved the land use application and consequently, land development rights have been obtained. A funding application to PDoI is in progress.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Implementation
2026/27	Implementation
2027/28	Implementation

6.3 Erf 64 Kylemore - Ward 4

Project Name		Erf 64 Kylemore (402) IRDP
Property Description		Erf 64
Town		Kylemore
Suburb		Kylemore
Geo-reference		33°55'32"S 18°57'25"E
Catalytic / PHDA Project		No
Urgency (Proposed year of implementation)		2025/26
% of Total need addressed by Project		1.0
Housing Programme/s		IRDP
Housing Opportunities	**Sites**	0
	Serviced Sites	±419 serviced sites

	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	No (currently in process to be transferred from the National Department of Public Works and Infrastructure)
	EIA ROD	No
	Bulk capacity	Yes (Water is sufficient, Sewerage - Upgrades being undertaken. Link service for sewer needs to be upgrade)
	Land Use Approval	LUA submitted to Land Use Management and amendments are being made as per the recommendations from the Municipal town planner
	PDoI Approval	On the PDoI Business Plan. PFR funding application submitted. Funding allocated for 2024/25.
	Council Approval	Yes
	Risks / Issues	Land not in Municipal ownership, land invasion
	Readiness Score	2
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	The project falls within the approved urban edge and has been identified in the SDF as future mixed-use, community, and residential infill.
	Planning Opinion	This project has been approved and on the Business Plan of the PDoI. Although the project is located on the southern periphery of Kylemore, it can be considered as well located because of the proximity of two schools adjacent to Erf 64. The project will provide infill development on a site within the urban edge of Kylemore on well-located land and as such should be further investigated.

Stellenbosch Municipality identified a portion of Erf 64, Kylemore (approximately 8 hectares) as a possible site for a housing development and pre-feasibility studies were concluded a few years ago to determine the potential of this site for a proposed housing development. From the studies, and the outcome of the community meeting held, it was apparent that the site is suitable for the envisaged development.

The Remainder of Erf 64, Kylemore is located at the south-east end of the Kylemore village. Kylemore High School is situated on the northern side of Erf 64. The property is surrounded by agricultural land to the southern and western sides, immediately to the east there is undeveloped land and then a stream.

The Municipality has appointed the Housing Development Agency (HDA) via an Implementation Protocol Agreement (IPA) to assist and finalise the transfer of land from the National Department of Public Works and Infrastructure (NDoPW&I) to the Municipality. Treasury endorsed the release of Erf 64, Kylemore on 25 October 2021. The Department of Public Works and Infrastructure (NDoPW&I) released Erf 64, Kylemore to the HDA through Special Power of Attorney (SPoA) on 15 November 2021.

The HDA has reviewed previous planning studies and proposed layout options that were conducted more than 10 years ago. The HDA appointed a service provider for detailed planning and design of the preferred development option. A beneficiary committee was elected from a public meeting that was held on 13 March 2024. A formal meeting was held on 6 May 2024 with the newly elected beneficiary committee to discuss the signing of the social compact and the street naming process. A Memo for street naming and number was sent to the Section: Land Use Management. The HDA submitted the Land Use Application on 20 February 2025 and amendments are in progress as per the Municipal Town Planner's recommendations.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Obtain development rights
2026/27	Implementation
2027/28	Implementation

6.4 Adam Tas Precinct 10 (Northern Extension), Kayamandi - Ward 12

Project Name		Adam Tas Corridor Precinct 10 (Northern Extension), Kayamandi
Property Description		Various
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°54'55"S 18°50'08"E
Catalytic / PHDA Project		PHDA proposed to National Department of Infrastructure (branch Human Settlements)
Urgency (Proposed year of implementation)		2026/27
% of Total need addressed by Project		24,5 – 36,8
Housing Programme/s		IRDP / FLISP
Housing Opportunities	**Sites**	3761 housing opportunities Mixed-Use housing opportunities
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	1902 freestanding top structure, 1859 apartments
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	No Bulk is available. Upgrades to be completed 2025/26.
	Land Use Approval	No
	PDoI Approval	Yes. On the Business plan of PDoI. PIRR application will be submitted once Land Use Planning approval obtained.
	Council Approval	Yes
	Risks / Issues	Large scale, and land invasions. Water pressure standard reduced the proposed housing opportunities
	Readiness Score	3
Project Suitability	**Geotech Conditions**	Mostly suitable although some steep slopes are on certain properties
	Strategic alignment	This project falls within the approved urban edge and has been Identified in the SDF as future mixed-use, community, and residential infill. Portion of the property partially forms part of the ATC LSDF project. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	This project has already been supported through the release of planning funding as well as the funding of land acquisition of the Watergang site that was subsequently invaded. This project is seen as a viable solution to the continued formalisation of Kayamandi and will be critical to the decanting of the rest of the Kayamandi housing projects. Consideration should also be given to the provision of Enhanced Serviced Sites as additional housing opportunities in this project as well.

The Adam Tas Precinct 10 (Northern Extension) housing project of Stellenbosch is situated north of Kayamandi, adjacent to Cloetesville and Welgevonden Estate. The site is located on the western side of the R304 (main arterial from the North) to Stellenbosch.

The subject properties as per the sale agreements are Remainder Farm 182 Stellenbosch, Portion 1 of Farm 182 Stellenbosch, a portion of the Remainder of Farm 183 Stellenbosch (Farm 183 A, Farm 183 B, Farm 183 C), Portion 1 of Farm 183 Stellenbosch, Portion 5 of Farm 183 Stellenbosch and Portion 23 of Farm 183 Stellenbosch.

As per the Surveyor-General Database, the farms also included in the subject area are Portions 36 and 60 of the Farm 183 Stellenbosch.

The Adam Tas Precinct 10 (Northern Extension) is a potential development of approximately 130 hectares of land located north of Kayamandi. A key factor in this proposed development is the alignment of the proposed Western Bypass which is to form the western boundary of the project area as well as the new north-western urban edge of Stellenbosch town.

The specific site has been suggested by the Stellenbosch Municipality for the northward extension of the urban area of Stellenbosch. A feasibility study was conducted, and it was determined that the potential exists to provide between 3500 to 4 000 accommodation opportunities in the Adam Tas Precinct 10 (Northern Extension) of Stellenbosch. The Municipality is aiming to facilitate the development of the 3 500 to 4 000 residential opportunities, as well as providing the required social amenities and public facilities required.

The feasibility study identified developable land within the study area (different farmland identified). The development potential of the said site was evaluated from an engineering, planning and environmental perspective. The subsequent planning applications following this feasibility study will include the rezoning of the given properties from Agricultural to the relevant zonings in terms of the Stellenbosch Municipality Zoning Scheme By-Law suitable for the proposed residential densities and mix use development. What remains important is the overall objective of a mixed-income development, creating housing opportunities for the income categories as identified and a range of choice to prospective owners.

A service provider was appointed by Stellenbosch Municipality to appoint the necessary multidisciplinary team of professional consultants to conduct a due diligence assessment to assess whether it is suitable for the expansion of a mixed-use development to the north of Kayamandi.

A tender was advertised, and a service provider was appointed to undertake a Broad Conceptual Urban Design framework for the Adam Tas Precinct 10 (Northern Extension) and to obtain town planning and development rights. This project timeframe to obtain development rights is 2025/26 financial year.

It should be noted that a portion of the development of the northern extension has been identified as a possible relocation area for the redevelopment of the Kayamandi Town Centre project.

A Market Analyst study that was undertaken by DEA&DP was concluded during May 2022 and incorporated when drafting conceptual design layouts. The different conceptual design layout options were workshopped during June 2022 with departments Spatial Planning and PMU and on 25 August 2022 with the senior management of Infrastructure Services. Comments were received on 19 September 2022 from the Department Heritage Western Cape. The service provider submitted a Notice of Intent to Develop the application to Heritage Western Cape of which the service provider was informed that two additional specialist studies were required to be submitted namely an Archaeological impact assessment and a visual impact assessment on the cultural landscape. Service provider had their first pre planning meeting 30 August 2023 and final changes to the layout were completed on 17 November 2023 due to all the input and comments received from internal departments.

The formal Land Use Application was submitted to the Section: Land Use Management on 1 December 2023. A public participation process was conducted for public comment and the closing dates for comments was 25 February 2024. The application was circulated to internal department for comment. The Conceptual design layout was amended by Service provider due to the Planning and construction of the reservoir. The Development Plan and Proposed Subdivisional Areas layout for the proposed Northern Extension Development was submitted to Land Use Planning on 11 December 2024. Negotiations with private developers in process to register a servitude access over the property to the site. It is anticipated that the Land Use application will serve by end of June 2025 at MPT for decision.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Planning approvals
2026/27	Implementation
2027/28	Implementation

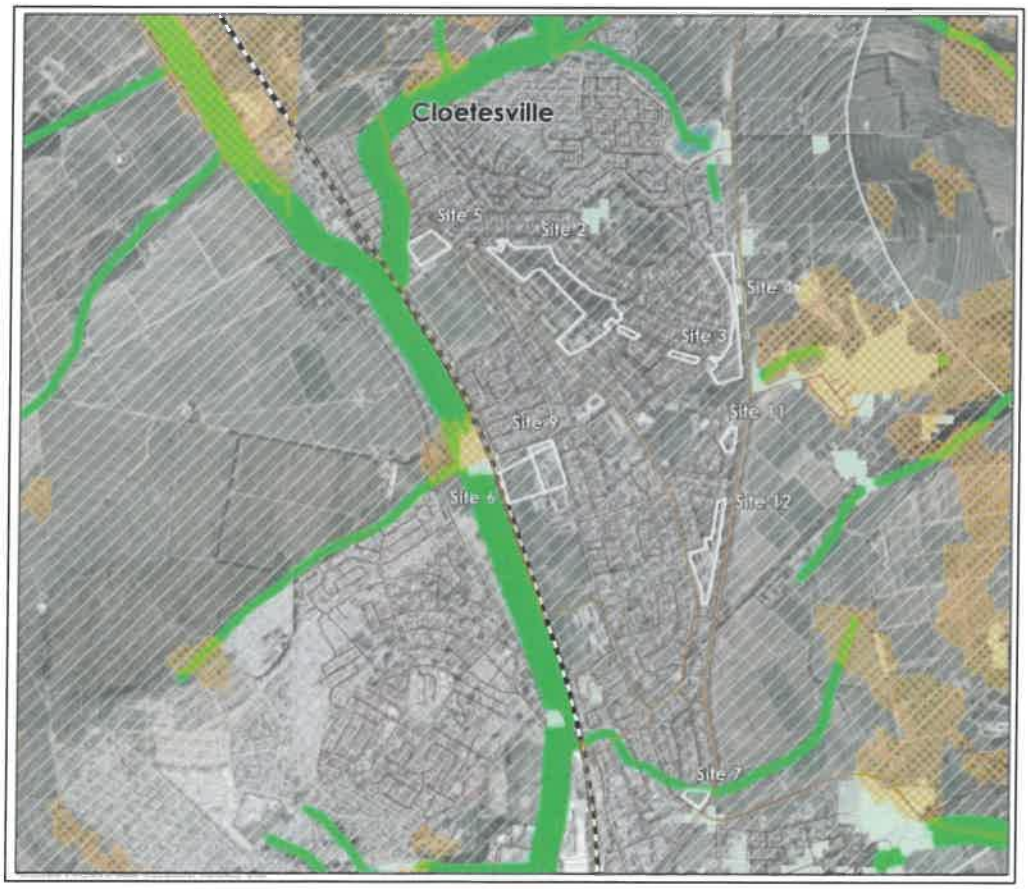
6.5 Erven 412, 217 and 284 Groendal, Franschhoek – Ward 2

Project Name		Erven 412, 217 and 284, Groendal
Property Description		Erven 412, 217 and 284, Groendal
Town		Franschhoek
Suburb		Groendal
Geo-reference		33°53'47"S 19°06'06"E and 33°53'43"S 19°06'11"E
Catalytic / PHDA Project		N/A
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		0,9 – 1,2
Housing Programme/s		IRDP / FHF (formally known as FLISP)
Housing Opportunities	**Sites**	Earmark for business and residential opportunities
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	Yes
	Risks / Issues	TBD
	Readiness Score	2
Project Suitability	**Geotech Conditions**	TBD
	Strategic alignment	This project falls within the approved urban edge and has been identified in the SDF as strategic sites, projects, and/or infill opportunities of the MSDF. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	Various studies have been undertaken over the years regarding the development of Erf 412. Most of the studies included extensive public participation processes. The result of these studies is that the property should be developed for business opportunities.

Erven 412, 217 and 284 Groendal are located along Santa Rose Street in Groendal, a suburb of Franschhoek, next to the R45. The site falls within an area characterised by medium to high-density residential as well as non-residential and light industrial uses.

Various studies have been undertaken over the years regarding the development of Erf 412. Most of the studies included extensive public participation processes. The outcome of these studies was that the property should be developed for high density residential units but also include business (light industrial) opportunities. Erf 412 has been rezoned to subdivisional area during 2016 allowing for general residential, local authority and general business. The initial plans for Erf 284 were to develop an old age home or retirement village, but due to financial constraints, this never materialised.

The Section: Property Management and the Section: Housing Development undertook a process to formulate a Call for Proposal in line with the approved agenda item. A service provider was appointed to draft different site development options.



An agenda item was drafted and circulated to the relevant departments for inputs/comments. An additional layout inputs were received from the Directorate: Infrastructure Services and therefore the item served at the Section 80 Human Settlements Committee meeting during May 2022. Discussions with senior role players were concluded on 11 November 2022, and an enquiry was raised during these discussions on Erf 284. The user department has forwarded this enquiry to the PDoI for input.

A professional service provider was appointed due to the project was referred to draft (3) new concept site development plans for Erf 214 and Erf 217. It was proposed that the layout for the allow for primarily for a business premises (i.e. business uses i.e. offices, shops, markets, food franchises, medical consulting rooms, clinics or any other business-related uses that will be allowed in terms of the Stellenbosch Municipal Zoning By-laws.

The purpose of this zone is to make provision for low-density commercial uses that are compatible with and located within residential areas. The three site development plans should take into consideration the analysis and analysis and assessment regarding the physical conditions of the site, the surrounding land uses, visuals, height, traffic and bulk services. An item served at Council and was approved on 30 October 2024. The user department is in process to draft a Call for Proposals to appoint an Implementing Agent for the Development of the Erven 412, 217 and 284 Groendal.

Timeframes	Project Deliverables
2025/26	Appoint an Implementing Agent and to obtain development rights
2026/27	Implementation
2027/28	Implementation

6.6 Cloetesville Infill housing project

The Cloetesville Infill Housing Project was implemented to serve as a means to develop vacant and underdeveloped portions of land within Cloetesville to address the housing need. A service provider was appointed to conduct a feasibility study on eight sites (11 erven) as identified by Council. The objective was to identify the development potential of each site and to provide a conceptual site development layout for the identified sites. The feasibility report served before Council during 26 May 2021 to determine if the sites is viable for housing purposes. The following sites were under investigation:

Erf 7271 is relatively flat, however the soil conditions and the permanent or perched water table, which is found less than 1,0m below the ground surface, is expecting to impact the cost of construction. The site makes allowance for a substantial number of units and is therefore a more attractive site. The proposed development of the site can potentially accommodate the following:

- Potential for mixed residential development.
- Each high-rise building is designed with an internal courtyard which provide safe recreational space.
- Concept plan makes provision for pedestrian walkways to be used by Smartie Town residents.
- Proposed development:
  - 16 serviced sites (Plot and Plan); and
  - 152 GAP/ and or FLISP units.

Erven 6847, 6886, 6300 is relatively flat, however the soil conditions and the permanent or perched water table, which is found less than 1,0m below the ground surface is expecting to impact the cost of construction since alternative construction methods are used to mitigate the risks. The site makes allowance for a substantial number of units and is therefore a more attractive site. The proposed development of the site can potentially accommodate the following:

- A small apartment block is proposed for the vacant space in the south-eastern corner of the site whilst larger high-rise buildings are proposed for the western portion of the site.
- Each high-rise building is designed with an internal courtyard which provide safe recreational space.
  - Proposed development: 279 GAP and/or FLISP units.

Erf 6705 is relatively flat; however, the soil conditions is expecting to impact the cost of construction. The site makes allowance for a limited number of units and a detailed cost-benefit analysis should be undertaken.

- Proposed housing typology should blend with the existing houses.
- Proposed development:
  - 12 serviced sites (Plot and Plan).

It is recommended that Council removes Erf 6705, Cloetesville, Stellenbosch, from the Housing Pipeline due to unsuitable soil conditions, making it costly to develop on. The development costs can subsequently cannot be addressed with the housing subsidy quantum.

Erven 7181 and 6668 are relatively steep and are located in close proximity to a wetland area. This wetland is in poor condition and there are several illegal dwelling units onsite.

It is, therefore, recommended that Council removes Erven 7181 and 6668 from the Housing Pipeline. Significant bulk earth works will be required for Erven 7181 and 6668 and will be costly to develop the land. It is, therefore, recommended to be removed from the Housing Pipeline.

6.6.1 A portion of Erf 7271 Stellenbosch, Cloetesville

Project Name	A portion of Erf 7271, Cloetesville
Property Description	A portion of Erf 7271, Cloetesville
Town	Stellenbosch
Suburb	Cloetesville
Geo-reference	33°54'17"S 18°50'50"E
Catalytic / PHDA Project	PHDA
Urgency (Proposed year of implementation)	TBD
% of Total need addressed by Project	1
Housing Programme/s	BNG / FHF (formally known as FLISP)

Housing Opportunities	**Sites**	0
	Serviced Sites	168
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	Yes
	Risks / Issues	Environmental sensitivity; cost of construction
	Readiness Score	1
Project Suitability	**Geotech Conditions**	Soil conditions and permanent or perched water table adds to the cost of construction
	Strategic alignment	The project is located within the approved urban edge and is identified in the SDF as strategic sites, projects, and/or infill opportunities of the MSDF. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	In terms of the Stellenbosch Municipality: Zoning Scheme By-Law, 2024 the site has a Community Zone and as such a township establishment application would be required. It is expected that application for the following would be required: • Rezoning to Subdivisional Area; • Subdivision of the consolidated property to make provision for the 16 residential units, 4 high-rise apartment building, public open space and roads; and • Rezoning of the BNG erven to Conventional Residential Zone and the erf with the GAP units should be zoned Multi-unit Residential Zone and the erf with the Municipal containers should be rezoned to Utility Service Zone.

The relevant portion of Erf 7271 Stellenbosch is located on Lang Street, behind Cloetesville sports ground. It is located in close proximity to Plakenberg River, which separates Smartie Town from the site area. Opposite the subject portion of Erf 7271 is a crèche and a park. This area has previously been used as a parking lot for the sports ground, but more recently the area was earmarked to house 'Slab Town'.

This site has potential for a mixed residential development. A row of single residential or BNG units located along the northern and eastern boundary of the site with the remainder of the site comprising of high-rise GAP units. It is expected that a total of 16 BNG units and 152 GAP units can be developed on the site, however significant relaxation of the parking requirements will be required. Each proposed high-rise building is designed with an internal courtyard which provides safe recreational space. The design of the concept plan makes provision for a number of pedestrian walkways that can be used by the residents of Smartie Town.

Council approved the feasibility study report to proceed with the planning processes to obtain development rights for the proposed housing project. The project has been approved on the Business Plan of the Provincial Department of Infrastructure for the outer financial year. Only after PDoI approves the funding, a procurement process will be followed to appoint a professional team to obtain development rights.

The soil conditions on Erf 7271 is classified as "soft excavation" and some areas contain intermediate material that may require additional excavation equipment and methods, increasing labour and equipment costs.

It is suggested that the following timeframes should be considered for project progression:

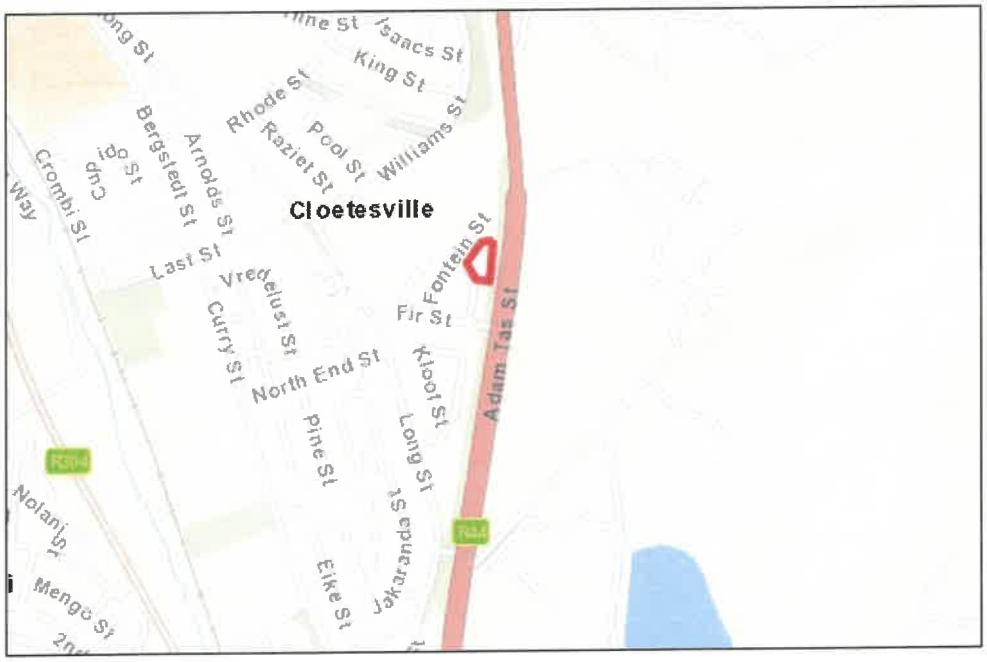
Timeframes	Project Deliverables
2025/26	Await funding approval from PDoI.
2026/27	Await funding approval from PDoI.
2027/28	Await funding approval from PDoI.

6.6.2 Erven 6300, 6847 and 6886 Stellenbosch, Cloetesville

Project Name		Erven 6300, 6847 and 6886, Cloetesville
Property Description		Erven 6300, 6847 and 6886, Cloetesville
Town		Stellenbosch
Suburb		Cloetesville
Geo-reference		33°54'38"S 18°51'07"E (Erf 6300) 33°54'43"S 18°51'02"E (Erf 6847) 33°54'41"S 18°51'02"E (Erf 6886)
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		1,7
Housing Programme/s		FLISP
Housing Opportunities	**Sites**	279
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	No
	Risks / Issues	Environmental sensitivity; construction costs
	Readiness Score	1
Project Suitability	**Geotech Conditions**	Soil conditions and the permanent or perched water table adds to the cost of construction
	Strategic alignment	The project is located within the approved urban edge and is identified in the amended MSDF 2023 as strategic sites, projects, and/or infill opportunities of the MSDF. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	In terms of the Stellenbosch Municipality: Zoning Scheme By-Law, 2024, Erf 6300 and 6886 is zoned as Public Open Space whilst Erf 6301 and Erf 6847 is zoned Community Zone and as such a township establishment application would be required. It is expected that application for the following would be required: • Closure of Public Open Space; • Consolidation of Erven 6300, 6886, 6301 and 6847; • Rezoning to Subdivisional Area; • Subdivision of the consolidated property to make provision for the 4 high-rise apartment building, community facility, public open space and roads; and • Rezoning of the high-rise apartment building site to Muti-unit Residential Zone, the existing sport facilities should be zoned Public Open Space Zone and the site with the community facility should be zoned Community Zone.

Erven 6300, 6847 and 6886 Stellenbosch are located between the railway line and Curry Road and adjacent to Cloetesville swimming pool and tennis courts. The swimming pool facility and the identified erven are directly situated behind the Cloetesville Secondary High School. Moreover, the swimming facility is clustered with a park and outdoor gym. The outdoor gym is being used effectively, and the vacant land is used as a hangout area for the youth. The area is monitored by houses on Last Street (street adjacent to swimming pool and vacant land), should matters get out of hand, law enforcement is called. Concerns raised were the lack of recreational activities for youths in the community.

The corner of Last Road and Curry Road provides good line of sight and, together with the sports facilities, provides an ideal location for a community facility. A small apartment block is proposed for the vacant space in the south-eastern corner of the site whilst larger high-rise buildings are proposed for the western portion of the site. It is expected that a total of 279 GAP/FLISP units can be developed on the site, however significant relaxation of the parking requirement will be required. Each proposed high-rise building is designed with an internal courtyard which provides safe recreational space.



Council approved the feasibility study report to proceed with the planning processes to obtain development rights for the proposed housing project. The project has been approved on the Business Plan of the Provincial Department of Infrastructure for the outer financial year. Only after PDoI approves the funding, a procurement process will be followed to appoint a professional team to obtain development rights.

It is recommended that Erven 6300 and 6886 be taken out of the housing pipeline due to the significance of the existing recreational activities on the adjacent Erven (skatepark and swimming pool) to the community and that only a Portion of Erf 6847 be utilised for development.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Await funding approval from PDoI.
2026/27	Await funding approval from PDoI.
2027/28	Await funding approval from PDoI.

6.6.3 Erf 6705, Cloetesville

Project Name		Erf 6705, Cloetesville
Property Description		Erf 6705, Cloetesville
Town		Stellenbosch
Suburb		Cloetesville
Geo-reference		33°54'38"S 18°51'31"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		0,07
Housing Programme/s		BNG
Housing Opportunities	**Sites**	0
	Serviced Sites	TBD
	Top Structures (Units)	12
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	Yes
	Risks / Issues	Soil conditions expected to impact on construction cost
	Readiness Score	1
Project Suitability	**Geotech Conditions**	Soil conditions expected to impact on construction cost
	Strategic alignment	The project is located within the approved urban edge and is identified in the Amended MSDF 2023 as strategic sites, projects, and/or infill opportunities of the MSDF. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.

	Planning Opinion	In terms of the Stellenbosch Municipality: Zoning Scheme By-Law, 2024 Erf 6705 is zoned Public Open Space and as such a township establishment application would be required. It is expected that application for the following would be required: • Closure of Public Open Space; • Rezoning to Subdivisional Area; • Subdivision of the consolidated property to make provision for the 12 residential units, and access road; and • Rezoning of residential units to Conventional Residential Zone and the road to Public Roads and Parking Zone.

Erf 6705, Cloetesville is a triangular shaped property with access from Wilger Road. Located to the north, north-west and south of the site are residential erven measuring between 450m² and 510m². The site is currently vacant.

The site is considered a part of an existing neighbourhood and proposed housing typologies should therefore blend with the existing houses. As such, BNG units are proposed; a total of 12 BNG units can be developed on the site. The site contains an embankment along the western boundary, and it is proposed that it should be formalised for stormwater drainage.

Council approved the feasibility study report to proceed with the planning processes to obtain development rights for the proposed housing project. The project has been approved on the Business Plan of the Provincial Department of Infrastructure for the outer financial year. Only after PDoI approves the funding, a procurement process will be followed to appoint a professional team to obtain development rights.

It is recommended that Council remove Erf 6705 from the Housing Pipeline due the site that presents a combination of soil instability, costly foundation requirements, and drainage challenges that may significantly impact construction costs and long-term structural integrity.

It is suggested that the following timeframes should be considered for project progression:

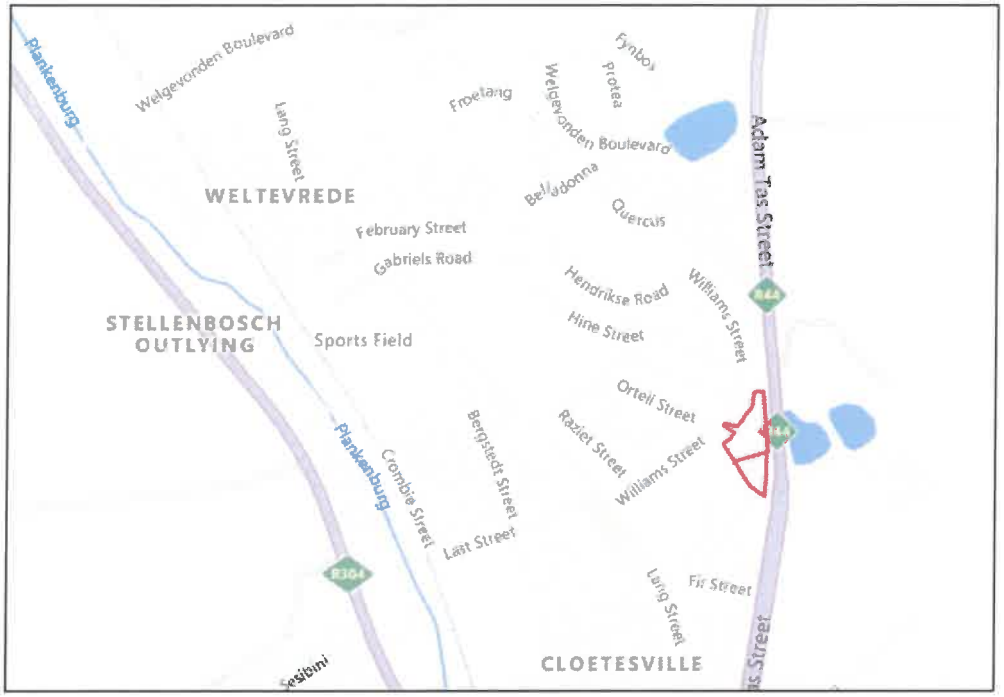
Timeframes	Project Deliverables
2025/26	Await funding approval from PDoI.
2026/27	Await funding approval from PDoI.
2027/28	Await funding approval from PDoI.

6.6.4 Erf 8915, Cloetesville

Project Name	Erf 8915, Cloetesville
Project Description	Erf 8915, Cloetesville
Project Location	Erf 8915 is situated adjacent to and stretches behind Pieter Langeveldt Primary School. Moreover, it is situated behind one row of houses. A concern raised for this site is that the expense of servicing the land could possibly jeopardise the feasibility of providing facilities for the disadvantaged. Another concern is the number of trees on the site, especially behind the school, and their environmental and heritage impact. Currently the site is being utilised as an illegal dumping site.

Town		Stellenbosch
Suburb		Cloetesville
Geo-reference		33°54'21"S 18°51'10"E
Catalytic / PHDA Project		N/A
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		0,5
Housing Programme/s		IRDP / FLISP / Other
Housing Opportunities	**Sites**	0
	Serviced Sites	84
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	Yes
	Risks / Issues	Steep slope; poor soil condition; insufficient infrastructure demand
	Readiness Score	1
Project Suitability	**Geotech Conditions**	The site is located along a steep slope
	Strategic alignment	Identified in the Amended MSDF, 2023 as strategic sites, projects, and/or infill opportunities of the MSDF. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
Project Suitability	**Planning Opinion**	In terms of the Stellenbosch Municipality: Zoning Scheme By-Law, 2024 the site is zoned Public Open Space and therefore a township establishment application would be required. It is expected that application for the following would be required: • Closure of Public Open Space; • Rezoning to Subdivisional Area; • Subdivision of Erf 8915 to make provision for the 84 residential units, public open space, roads as well as the existing apartment blocks; and • Rezoning of the BNG erven to Conventional Residential Zone. The road should be zoned Public Roads and Parking Zone. The southern portion of the property where the existing apartments are located should be zoned Multi-unit Residential Zone and the remainder of the property should be zoned Public Open Space Zone.

Erf 8915 is situated adjacent to and stretches behind Pieter Langeveldt Primary School. Moreover, it is situated behind one row of houses. A concern raised for this site is that the expense of servicing the land could possibly jeopardise the feasibility of providing facilities for the disadvantaged. Another concern is the number of trees on the site, especially behind the school, and their environmental and heritage impact. Currently, the site is being utilised as an illegal dumping site.



Council approved the feasibility study report to proceed with the planning processes to obtain development rights for the proposed housing project. Although it is expected that this site will be very costly to develop (due to the poor soil condition and subsequent required bulk earth works), it is recommended that the Stellenbosch Municipality develops the site for either BNG units or only serviced sites, depending on the subsidy quantum.

The project has been approved to the Business Plan of the Provincial Department of Infrastructure for the outer financial year. Only after PDoI approves the funding, a procurement process will be followed to appoint a professional team to obtain development rights.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Await funding approval from PDoI.
2026/27	Await funding approval from PDoI.
2027/28	Await funding approval from PDoI.

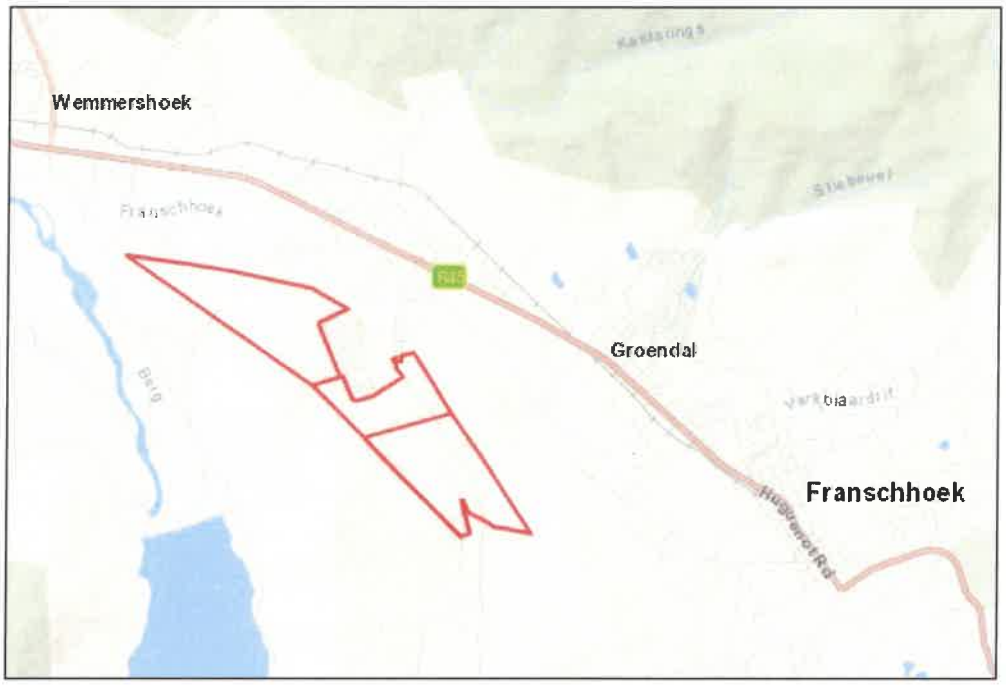
6.6.5 Erven 6668 and 7181, Cloetesville

Project Name		Erven 6668 and 7181, Cloetesville
Property Description		Erven 6668 and 7181, Cloetesville
Town		Stellenbosch
Suburb		Cloetesville
Geo-reference		33°54'33"S 18°51'32"E (Erf 6668) 33°54'31"S 18°51'31"E (Erf 7181)
Catalytic / PHDA Project		N/A
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		0,5
Housing Programme/s		IRDP / FLISP / Other
Housing Opportunities	**Sites**	0
	Serviced Sites	83
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	Yes
	Risks / Issues	Significant bulk earth works required
	Readiness Score	1
Project Suitability	**Geotech Conditions**	Soil conditions poor; significant bulk earth works required
	Strategic alignment	Located within the approved urban edge. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	In terms of the Stellenbosch Municipality: Zoning Scheme By-Law, 2024 the site is zoned Public Open Space and therefore a township establishment application would be required. It is expected that application for the following would be required: • Closure of Public Open Space; • Consolidation of erf 7181 and erf 6668; • Rezoning to Subdivisional Area; • Subdivision of the consolidated property to make provision for the 17 residential units, 2 high-rise apartment building, public open space and roads; and • Rezoning of the BNG erven to Conventional Residential Zone, the erf with the GAP units should be zoned Multi-unit Residential Zone, the road should be zoned Public Roads and Parking Zone, and the remainder of the erf should be zoned Public Open Space Zone.

Erven 6668 and 7181 Stellenbosch are situated adjacent to the R44 arterial road and are in close proximity to Rietenbosch Primary School. The old Drakenstein Road passes between the property and the R44. The site is relatively steep and located in close proximity to a wetland area. This wetland area is currently in a poor condition and there are several illegal dwelling units on the site. The current access to the site is not sufficient should development occur on site and portions of Erven 7296 and/or 7047 Stellenbosch would need to be acquired.

Only a portion of the site is developable. The developable portion of the site allows for a mix of opportunities in the form of single residential erven and high-rise apartment buildings. In total 17 BNG units and 65 GAP/FHF

units can be accommodated on the site. Depending on the socio-economic profile of the beneficiaries and the available subsidies, the site can also be developed as part of the UISP and the Stellenbosch Municipality would then be required to provide serviced sites (water, sewer and electrical connections) to the beneficiaries. The GAP units can be developed by the Municipality, or the land can be sold to the Social Housing Regulatory Authority (SHRA), which provides rental accommodation to people earning between R1 850 and R22 000 per month.



Council approved the feasibility study report to proceed with the planning processes to obtain development rights for the proposed housing project. The project has been approved on the Business Plan of the Provincial Department of Infrastructure for the outer financial year. Only after PDoI approves the funding, a procurement process will be followed to appoint a professional team to obtain development rights.

It is recommended that Council remove Erven 6668 and 7181 from the Housing Pipeline due to high implementation cost, steep terrain, and unsuitable soil conditions.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Await funding approval from PDoI.
2026/27	Await funding approval from PDoI.
2027/28	Await funding approval from PDoI.

6.7 La Motte: Farm 1339, Farm 1158 and Farm 1158/1 Paarl – Ward 2

Project Name		La Motte Old Forest Station IRDP
Property Description		Farm 1339, Farm 1158 and Farm 1158/1 Paarl
Town		Franschhoek
Suburb		La Motte
Geo-reference		33°53'54"S 19°04'19"E (Farm 1339) 33°53'56"S 19°04'36"E (Farm 1158) 33°54'05"S 19°04'45"E (Farm 1158/1)
Catalytic / PHDA Project		No
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		6,8
Housing Programme/s		IRDP / FLISP
Housing Opportunities	**Sites**	830 + 283 residential opportunities
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	No (Awaits State Land Release for the subject property from NDoPW&I)
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	Yes. Approved on the Business Plan
	Council Approval	Yes
	Risks / Issues	Land not in municipal ownership
	Readiness Score	2
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	Amended MSDF 2023 - The proposed housing development layout options falls within the urban edge of La Motte (Page 87), and the project is listed on Page 200. MHSP 2020 - Project is included in the proposed Housing Pipeline noted on Page 131. IDP 2022-2027 - Project is listed as a current municipal project on Page 245. PHSHDA - The Project is not included in the Stellenbosch PHSHDA.

Project Suitability	**Planning Opinion**	This project has been supported by the PDoI with the release of Tranche 1.1 and forms part of the Municipality's approach to dealing with the Langrug Informal Settlement. The project will allow for the decanting of qualifying beneficiaries from Langrug onto the site, but care must be taken with regard to the community dynamics associated with introducing a new group into an older rural community.

La Motte is a former Bosbou Hamlet situated approximately 3.5 km north-west of Franschhoek town, on the Robertsvallei Road, close to where it intersects the R45. Originally built to house forestry workers, the village is made up of the original dwellings and a range of community facilities. During the construction phase of the Berg River Water Scheme, new houses were built adjacent to the existing settlement to temporarily house the construction workers; these houses have been transferred to identified beneficiaries.

Portions of Farm 1653, Remainder Farm 1339, Remainder Farm 1158 and Portion 1 Farm 1158 Paarl have been identified for mixed-use housing development for the expansion of La Motte.

Feasibility studies and various development options have been completed for consideration. From the findings, the identified properties have sufficient capacity for the provision of an integrated housing development. Discussions with the owner of the land, the National Department of Transport and Public Works and Infrastructure, have occurred to initiate the transfer of land to the Stellenbosch Municipality for housing developments.

The La Motte properties are owned by the National Department of Public Works and Infrastructure & Infrastructure. In 2021, the Municipality entered into an Implementation Protocol Agreement (IPA) with the Housing Development Agency (HDA) to assist and facilitate the process of ensuring the transfer of the above-mentioned properties for housing development. The HDA estimates that the land may be transferred to the Municipality in 2025/26 FY, planning studies and approvals will be finalised thereafter.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Planning
2026/27	Planning approval
2027/28	Implementation

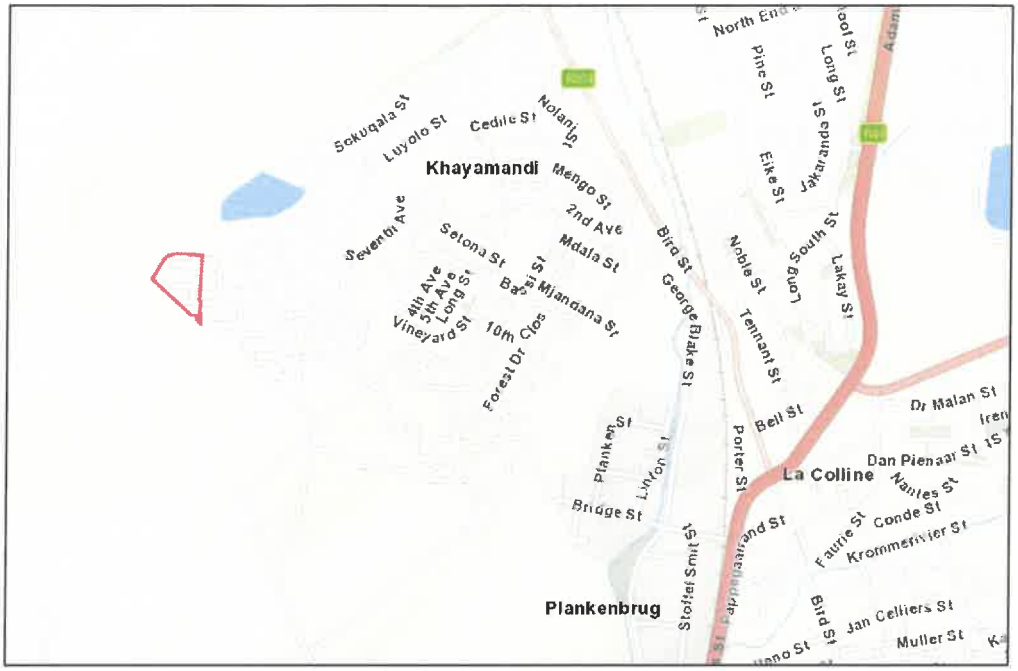
6.8 Droë Dyke – Ward 11

Project Name	Droë Dyke (1000)
Property Description	Portion 35 of Farm No. 183, Stellenbosch RD (2.4124 ha) Portion 8 of the Farm Vreedenburg No. 283, Stellenbosch RD (13.2302 ha)
Town	Stellenbosch
Suburb	Stellenbosch
Geo-reference	33°56'42"S 18°49'53"E (Farm 185/35) 33°56'51"S 18°49'44"E (Farm 283/8)
Catalytic / PHDA Project	PHDA
Urgency (Proposed year of implementation)	TBD
% of Total need addressed by Project	6,1
Housing Programme/s	IRDP, FLISP, Social Housing

Housing Opportunities	**Sites**	TBD
	Serviced Sites	TBD
	Top Structure (serviced)	TBD
	Other	0
Project Readiness	**Land Obtained**	No (Awaits State Land Release for the subject property to the NDoPW&I)
	EIA ROD	No
	Bulk capacity	No (Upgrades planned and being implemented)
	Land Use Approval	No
	PDoI Approval	No (Was previously supported by PPC in 2013/14, but no applications have been submitted)
	Council Approval	Yes (Part of the Adam Tas Corridor Precinct)
	Risks / Issues	Scale, dependence on Adam Tas TOD Project
	Readiness Score	1
Project Suitability	**Geotech Conditions**	TBD
	Strategic alignment	Amended MSDF 2023 - Project falls within Urban Edge. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	This project was previously presented to the Dept. of Infrastructure in 2013 and was in principle supported. The project did not proceed from the pre-planning stage because the land could not be transferred from the National Dept. of Transport and Public Works & Infrastructure. A letter was received from NDoPW&I on 6 February 2024 whereby the Deputy Director-General: Real Estate Management Services indicated that the application to transfer Portion of Remainder Farm 279; Portion 1 of Farm 284; Remainder Farm 284; Portion 17 of the Farm 183; Remainder Portion 35 of the Farm 183; Portion 8 of Farm 283; Remainder Farm 283; Farm 281 are not approved by the said department. The initial request from the Municipality amounted to different farm portions which estimated an area of 89,75 ha in extent. The entire area site is not required by the Municipality, as the mix used development only requires approximately 15ha of the land as identified. Therefore, a further application was submitted to NDoPW&I during March 2024 explicitly requesting land parcels as identified in property description above.

In terms of the Stellenbosch Municipal Spatial Development Framework Droë Dyke is seen as part of the Adam Tas Corridor Catalytic Initiative to restructure Stellenbosch Town. The Portion 35 of Farm No. 183, Stellenbosch RD (2.4124 ha), Portion 8 of the Farm Vreedenburg No. 283, Stellenbosch RD (13.2302 ha) which make up Droë Dyke comprise of Stellenbosch Farms Portion 35 of the Farm 183, Portion 8 of the Farm 238 has now been identified to accommodate possible housing development in the Adam Tas Corridor. Collectively, the land parcels (Droë Dyke) equate to approximately 15.6426 hectares.

Droë Dyke forms part of the residential component for the redevelopment of the Adam Tas Corridor. Droë Dyke is earmarked for medium to high density residential housing and commercial as well as public facilities.



The identified developable area with the precinct plan providing the context of the urban form, spatial arrangements and movement routes, the actual overall development area for the precinct is approximately 15 hectares.

Droë Dyke is suitable for social housing as it is a precinct in the Stellenbosch Restructuring Zone. The site offers significant opportunity to alleviate Stellenbosch Municipality's housing demand. The site can accommodate and is attractive for a mix of social, affordable and open market housing.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Project on Business Plan (BP) by PDoI, await PoA from NDoPW&I.
2026/27	-
2027/28	-

6.9 Watergang Phase 2C – Erf 3603, Kayamandi – Ward 14

Project Name		Watergang Phase 2C
Property Description		Erf 3603, Kayamandi
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'10"S 18°50'13"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		0,5
Housing Programme/s		UISP
Housing Opportunities	**Sites**	86
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	Yes
	Bulk capacity	Yes
	Land Use Approval	Yes
	PDoI Approval	Yes
	Council Approval	Yes
	Risks / Issues	Cost to install services and rehabilitate site
	Readiness Score	Current
Project Suitability	**Geotech Conditions**	TBC
	Strategic alignment	N/A
	Planning Opinion	Development rights have been obtained

Erf 3603, Kayamandi was subdivided, and the General Plan approved by the Surveyor-General. The property provides for 87 residential opportunities and has been serviced. It has been determined that the cost to rehabilitate the site to make it liveable is extremely high, especially considering the retaining walls to be constructed. This project is thus pending further discussions on the way forward.

The development of Erf 3603 is directly linked with the upgrade/development of the Zone O informal settlement. There are approximately 60 residents that do not qualify for a government subsidy programme. It has been resolved by the **Section: Informal Settlements** to temporary relocate the 60 residents from Zone O to Erf 3603 to create space for the implementation of the Zone O upgrading project. The Zone O upgrading project is set to commence with construction of top structures in 2025/2026 due to some of the residents refuse to relocate during the relocation process. A service provider was appointed by the Section: Informal Settlements during February 2024 to assess the damages on the sites of Erf 3603. A final report to determine the cost of damages was submitted for scrutiny and a funding application will be forwarded to PDoI.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Await funding approval from PDoI.
2026/27	Repair services
2027/28	Construction of top structures.

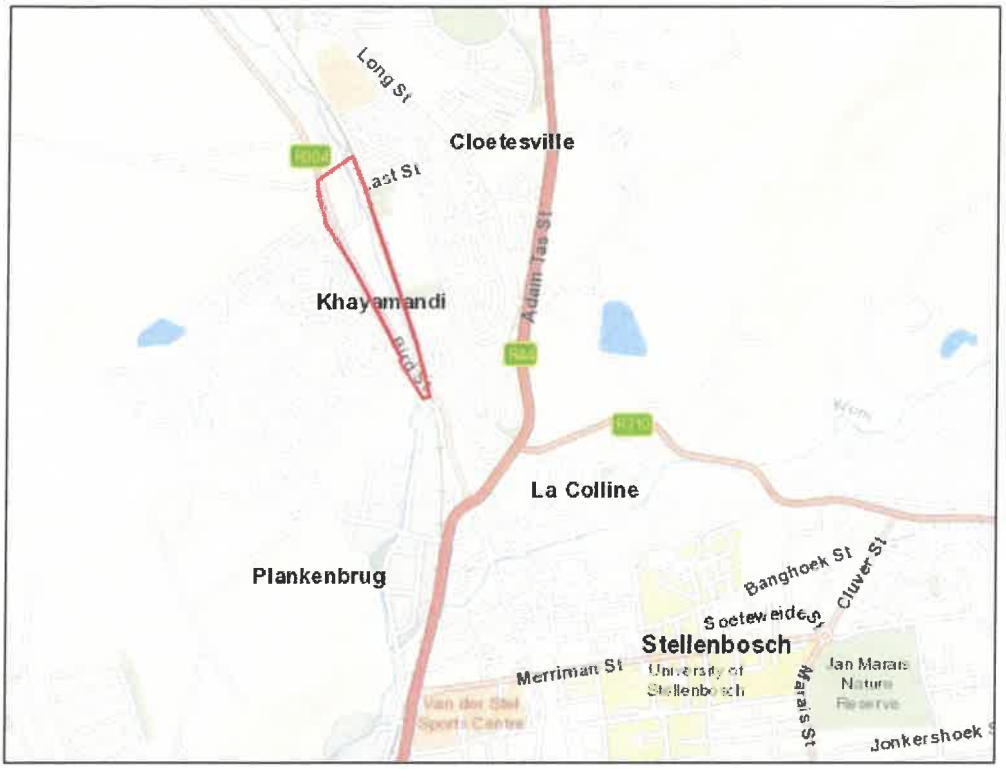
7. SOCIAL HOUSING

It is the intention of the Stellenbosch Municipality to give effect to the Social Housing Programme by making available land portions in the Restructuring Zones to Social Housing Institutions (SHI) and/or Other Development Agencies (ODA) who then will undertake all the necessary processes for the development of Social Housing Estates and the effective management of new rental stock. It is imperative that such SHI's and ODA's are duly accredited by the SHRA.

Social Housing is not a method for mass delivery, but a way to pursue integrated and sustainable urban development. Restructuring Zones were identified based on their proximity to social and economic amenities and their potential to promote integration, access to economic opportunities and spatial restructuring.

Social Housing currently caters for people earning between R1 850 – R22 000 per month. It is desirable that environments created through this process should conform to health and safety principles, be liveable, vibrant, with the requisite amenities and facilities that provide a better quality of life for tenants. The proposed Social Housing Estate should optimise the utilisation of the land portions through innovative approaches in the development of a medium to high density residential estate.

Stellenbosch Municipality's Social Housing Programme aims to affect the provision of affordable, well-located housing opportunities to low and moderate-income households. It is implemented within the framework of the National Social Housing policy, legislation, and regulations. The Municipality is on a drive to accelerate the pace and scale of housing delivery, maximising social housing opportunities, and promoting socio, spatial and economic integration of people into its urban fabric.



This transformative aim will be fulfilled by the Municipality's continued effort to identify well located municipal owned parcels of land for infill development of Social Housing with a precinct development approach. The key purpose is the creation of socially integrated neighbourhoods providing housing for low-middle income households into areas that they would normally be excluded from due to past legacies and the prevailing property markets.

It is crucial that the Social Housing projects complement the social functionality of the neighbourhood with inclusion of other minimum ancillary and complementary uses in the development driven by the integrated development principles. Social integration should be achieved by having an urban design approach that integrates the development with the existing surroundings. The creation of an enhanced public realm with quality environments should be promoted by designing active and passive green open space systems that link the proposed site with public facilities and amenities through safe pedestrian orientated public open space systems. Proposed layouts should consider barrier free access for physically disabled people and cater to people with special needs.

The urban design concept for such sites should be on the basis of a socially integrated development with a holistic and reasonable neighbourhood level planning approach that unfolds though the site plan. It should show some level of conformity with the character of the existing urban environment and some innovation that fosters a sense of place. The site plan must demonstrate an appropriate medium-high density approach by building height and compact site plan with minimum parking. In addition, the site plan design for the public realm, common spaces and landscaping have to facilitate social integration with existing neighbourhoods.

Sites situated in approved and gazetted Restructuring Zones are eligible for social housing grants. Application for the social housing grants will be the responsibility of the SHI and/or ODA.

7.1 Cloetesville Social Housing (Farms 81/2 and 81/9, Stellenbosch) - Ward 16

Project Name		Farms 81/2 and 81/9
Property Description		Farms 81/2 and 81/9
Town		Stellenbosch
Suburb		Cloetesville
Geo-reference		33°54'52"S 18°51'01"E (Farm 81/2) 33°55'00"S 18°51'04"E (Farm 81/9)
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		2025/2026
% of Total need addressed by Project		1,5 – 2,1
Housing Programme/s		Social Housing
Housing Opportunities	**Sites**	0
	Serviced Sites	0
	Top Structures (Units)	0
	Other	± 250 – 350 rental units
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No (Land Use Application submitted)
	PDoI Approval	No
	Council Approval	Yes (SHI appointed to develop and manage the site)
	Risks / Issues	Various site constraints; significance as gateway
	Readiness Score	2
Project Suitability	**Geotech Conditions**	The property is regarded as favourable to poor suitability for residential development. The factors that reduce the suitability of the land for development are the extent of uncontrolled fill, the existing topography and soil corrosivity.
	Strategic alignment	This project falls within the approved urban edge. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	TBD

In terms of the implementation of the Social Housing Programmes, the Stellenbosch Municipality has identified Portions 2 and 9 of the Farm No. 81, Stellenbosch. This site is located between the Cloetesville and Kayamandi settlements. Its boundary is framed by the R304 to the west and the railway line to the east. The Plankenburg River traverses the site along the eastern boundary. The southern boundary of property includes portions of the Kayamandi Tourism Centre, as well as a bridge over the railway line. The northern boundary is framed by the Mount Simon residential development.

A feasibility study has been done during January 2020 to determine the development potential of the site. Council approved the feasibility report on the 12 February 2020 for Social Housing (rental stock). Further planning studies were conducted by a suitable, qualified and experienced professional service providers during March 2021 to undertake a geotechnical investigation, flood line studies and a traffic impact assessment on the site.

In terms of the geotechnical investigation, the property is regarded as being of favourable to poor suitability for residential development. The factors that reduce the suitability of the land for development are the extent of uncontrolled fill, the existing topography and soil corrosivity.

The tender was awarded to the successful service provider in March 2024. The draft Land Availability Agreement (LAA) served before Council on 14 November 2024 to enter into a Land Availability Agreement (LAA) with the Developer. A Service provider has been appointed to obtain development rights for Portions 2 and 9 of the Farm No 81 Stellenbosch. The Land Use application has been submitted on 14 October 2024 and will be advertised for public comment.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Obtain development rights
2026/27	Implementation
2027/28	Implementation

7.2 Lapland Precinct - Ward 10

Project Name		Lapland Precinct
Property Description		Erven 2149, 6590, 2608, 2609, 6659, 9106 Stellenbosch
Town		Stellenbosch
Suburb		Stellenbosch
Geo-reference		33°55'38"S 18°51'38"E (Erf 2149) 33°55'42"S 18°51'40"E (Erf 2609) 33°55'41"S 18°51'44"E (Erf 6590) 33°55'40"S 18°51'49"E (Erf 6659)
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		2,3

	Top Structures (Units)	368
	Other	0
Project Readiness	**Land Obtained**	No (Properties owned by the Municipality and the National Department of Public Works & Infrastructure
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDOI Approval	No
	Council Approval	Yes
	Risks / Issues	Relocation of prison; construction above existing units
	Readiness Score	0
Project Suitability	**Geotech Conditions**	TBC
	Strategic alignment	This project is located within the approved urban edge and has been identified for infill development. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	TBD

The Lapland Precinct comprises Erven 2149, 6590, 2608, 2609, 6659 and 9106 Stellenbosch.

The Lapland precinct situated on the northern outskirts of the Stellenbosch CBD is ideally located in a well-connected node via the R44 and Helshoogte Roads and is near various commercial and economic facilities. The surrounding land uses consist of residential spaces, public spaces, and commercial properties. The properties located in the precinct are owned by the Stellenbosch Municipality and the National Department of Public Works. The properties have extents upwards of 1300m² to roughly 4000m², are developed on a gentle gradient and are bordered to the north by Kromriver and Teen-die-Bult, Plankenburg to the west, Stellenbosch CBD to the south and Die Rand to the east. The Lapland precinct is home to the Stellenbosch Traffic Department, the Stellenbosch Correctional Services building and three high rise municipal flats (Lavanda, Aurora and Phyllaria) with a total of 220 existing rental units. Preliminary building inspections revealed that the structures are sound with some upgrades having been performed recently.

The precinct is made up of three high rise municipal flats (Lavanda, Aurora and Phyllaria) with a total of 220 rental units, the Department of Home Affairs, the Traffic Department and the Correctional Services Prison and ancillary housing and facilities. Taking cognisance of the Status Quo Study findings and in line with densification principles, the following development concepts and land use rights are proposed for the Lapland precinct:

Two of the existing high-rise buildings are proposed to be developed as mixed use eight-storey high rise tower blocks incorporating the existing governmental uses on ground floor together with retail shops and offices.

Social housing with housing typologies ranging from one-bedroom to two-bedrooms are proposed for five floors. Market orientated Rental Housing Development of one bedroom and two-bedroom units are proposed for the two top floors. It is proposed that pavements be widened, and street furniture and informal traders be accommodated in a predesigned format. A density of 320 dwelling units per hectare is proposed.

It is proposed that the prison be relocated to the outskirts of Stellenbosch town on a site to be identified by the Stellenbosch Municipality and approved by the Department of Correctional Services. A portion of this property is to be set aside for market orientated rental housing development of one bedroom and two-bedroom units for two floors and retail and/or office spaces to be located on the ground floor. The proposed density is 616 dwelling units per hectare.

It is proposed that infill developments be implemented on the existing vacant land in between the existing flats in order to increase the density. This would allow for spatial and architectural maximisation of the existing site and the formulation of designs in line with SHRA design standards. To achieve the desired density and enhance the quality of living in the vicinity, it is proposed that the site be set aside for Social Housing purposes only with the accommodation of a crèche.

The Municipality intends to follow procurement process to appoint an accredited Social Housing Institutes (SHI's) and/or Other Development Agencies (ODA's) for a social housing project on the property.

The Municipality appointed three professional service providers to undertake the following studies during April 2023:

- Quantity Surveyor and Structural Engineer to do a Survey on the Structural Integrity/need for Structural maintenance of the rental stock ERF 2149.
- Geotechnical Investigation to examine all aspects of the feasibility of establishing a high-density residential development (8 Storey Walk ups) on R/E 2149, Stellenbosch.
- Traffic Impact Assessment to examine all aspects of the proposed high density residential development (8 Storey Walk ups) and the impact on the surrounding road network and possible mitigation of the anticipated traffic impact. The study also assesses the proposed site accesses, non-motorised and public transport aspects.

It is suggested that the following timeframes should be considered for project progression:

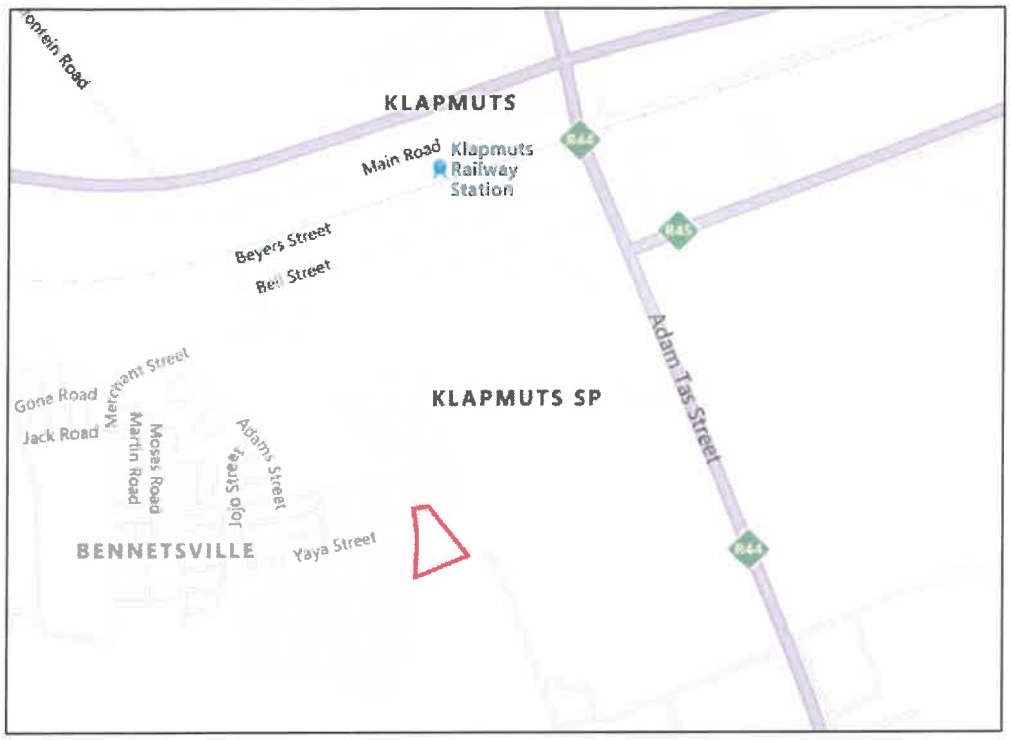
Timeframes	Project Deliverables
2025/26	Follow a procurement process to appoint a Service provider
2026/27	-
2027/28	

7.3 La Colline - Ward 10

Project Name	La Colline Precinct
Property Description	Erven 2644, 2645, 2660, 2661, 2666, 2667, 2683, 2684, 2727 and 2729 Stellenbosch
Town	Stellenbosch
Suburb	La Colline
Geo-reference	33°55'23"S 18°51'35"E (Erven 2644 and 2645) 33°55'23"S 18°51'38"E (Erven 2666 and 2667) 33°55'26"S 18°51'36"E (Erven 2660 and 2661) 33°55'26"S 18°51'38"E (Erven 2683 and 2684) 33°55'24"S 18°51'45"E (Erf 2729)
Catalytic / PHDA Project	PHDA
Urgency (Proposed year of implementation)	TBD

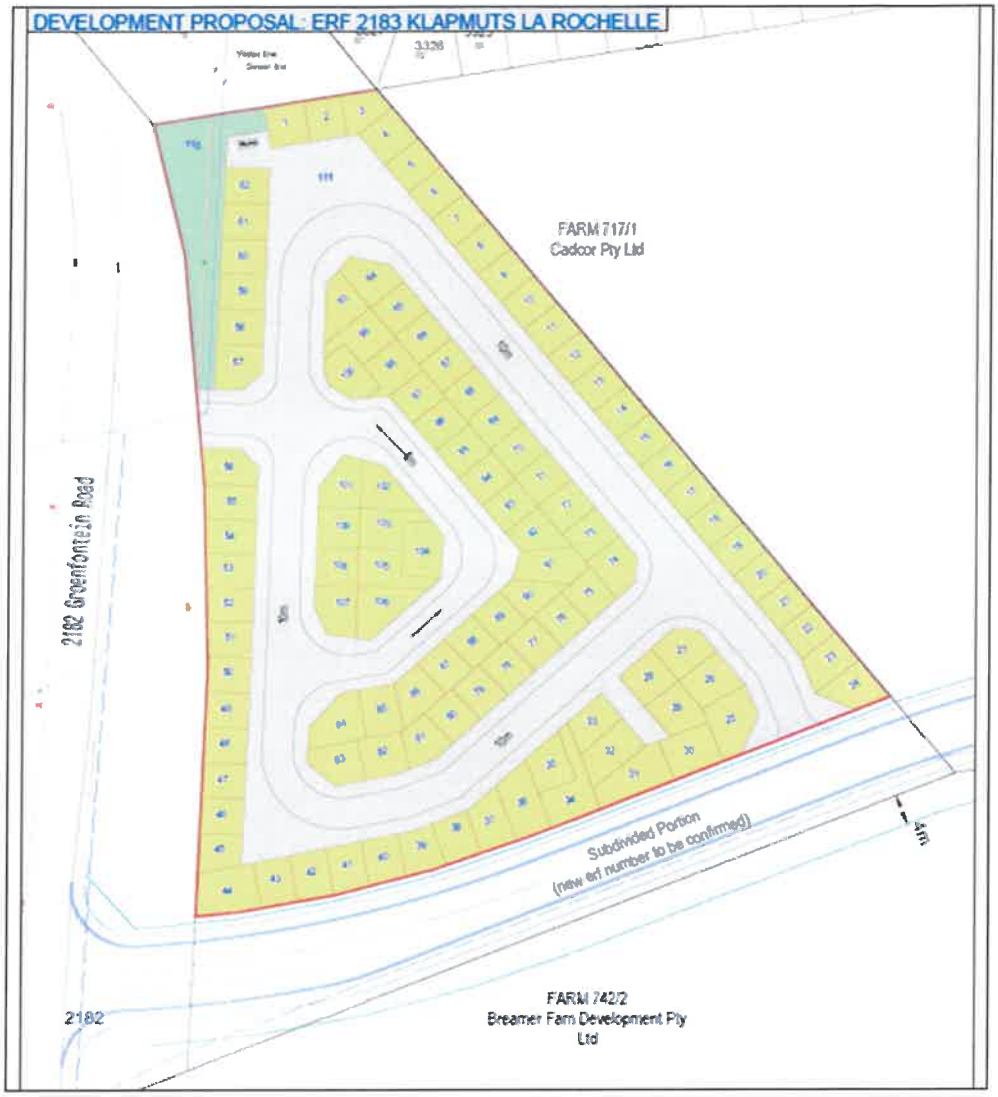
% of Total need addressed by Project		TBD
Housing Programme/s		Social Housing
Housing Opportunities	**Sites**	TBD
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	TBD
Project Readiness	**Land Obtained**	No (properties owned by the Municipality and the Department of Local Government and Housing)
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	No
	Risks / Issues	TBD
	Readiness Score	0
Project Suitability	**Geotech Conditions**	TBD
	Strategic alignment	This project falls within the approved urban edge. The two public open spaces are important to be retained and upgraded. There are densification opportunities available. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially. Once the project reaches the planning phase, it needs to be considered within the capital planning process/CEF.
	Planning Opinion	TBD

The La Colline Precinct comprises Erven 2644, 2645, 2660, 2661, 2666, 2667, 2683, 2684, 2727 (General Residential) and 2729 Stellenbosch (Public Open Space). The La Colline Precinct, just a short walk north from the Teen-die-Bult and Lapland Precincts, is easily accessible via Helshoogte Road from the east, Ryneveld Street from the south and the R44 from the north. The La Colline Precinct consists of residential properties built around a public open space, Tobruk Park (which forms part of the La Colline Precinct erven) and an additional public open space called La Colline Park. The residential properties are developed with low rise duplex flats that appear to be structurally sound with some minor cosmetic remedial work required. The properties are owned by the Department of Local Government and Housing and the Stellenbosch Municipality.



It is proposed that the residential properties remain as is and be the trade-off for the density maximisation development on the consolidated Teen-die-Bult sites. The open spaces should be developed as active open space for the enjoyment of the residents.

It is suggested that the following timeframes should be considered for project progression:



Timeframes	Project Deliverables
2025/26	-
2026/27	-
2027/28	

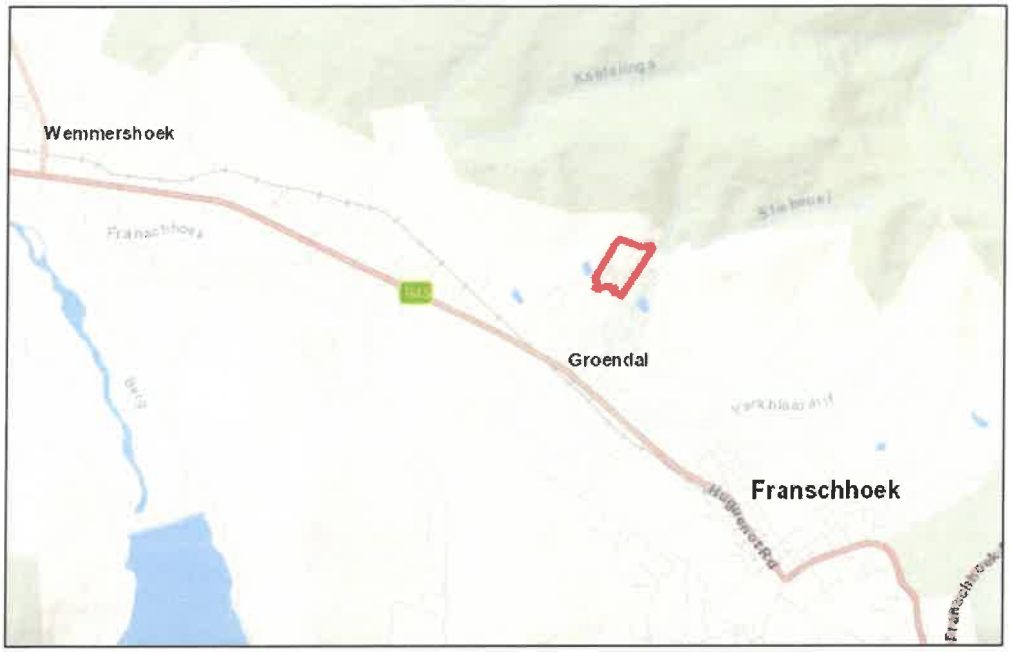
8. FORMALISING AND UPGRADING OF INFORMAL SETTLEMENTS AND EXISTING SETTLEMENTS

8.1 Erf 2183, La Rochelle, Klapmuts – Ward 18

Project Name		La Rochelle, Klapmuts
Property Description		Erf 2183, Klapmuts
Town		Klapmuts
Suburb		Klapmuts
Geo-reference		33°48'50"S 18°52'08"E
Catalytic / PHDA Project		No
Urgency (Proposed year of implementation)		2025/26
% of Total need addressed by Project		0,6
Housing Programme/s		UISP/IRDP
Housing Opportunities	**Sites**	0
	Serviced Sites	109
	Top Structures (Units)	Possible Temporary Relocation Units
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No (Awaits Environmental Authorisation)
	Bulk capacity	Yes (Water supply is being upgraded ETA 18 months, Sewerage will require upgrades)
	Land Use Approval	Yes
	PDoI Approval	Yes
	Council Approval	Yes
	Risks / Issues	Small size of project, high risk of possible land invasion
	Readiness Score	1
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area

	Strategic alignment	Amended MSDF 2023 - Project does fall within the approved Urban Edge of Klapmuts, and the project is listed on page 199. MHSP 2020 - Project is included in the proposed Housing Pipeline noted on page 129. IDP 2022 -2027- Project is not indicated in the IDP. PHSHDA - The Project is not included in the Stellenbosch PHSHDA.
	Planning Opinion	This project was previously presented to the PPC in 2016 and in principle supported for further studies. The specific type of housing program to be used was not confirmed by the Municipality. The site is located within in walking distance of socio-economic facilities in Klapmuts and development will increase the urban density of Klapmuts. The site is relatively small and will only be able to assist a small number of beneficiaries.

Klapmuts is situated on the N1 transport corridor and has significant potential to serve as centre for economic activity and residence within the metropolitan region and Stellenbosch Municipality. Erf 2183, Klapmuts is located along Gomas Street, Klapmuts, approximately 1.5km off the R310 that links Stellenbosch to the N1. The site is located on the south-eastern edge of the town of Klapmuts and is bordered by vacant land to its southern and eastern boundaries, with a proposed new housing development on the western and northern boundaries towards Mandela City, Klapmuts. To provide in the dire housing need in the Klapmuts area, especially for current backyarders, this property was identified as a possible option for a "site-and-service" housing project.



Erf 2183, Klapmuts is zoned Subdivisional Area for the following uses: Less Formal Residential Zone, Public Open Space Zone, Public Road and Parking Zone. A team of professional service providers have been appointed to attend to the subdivision of the property into residential erven of approximately 40m² to 50m², the submission of all diagrams to the Surveyor-General's office for approval and registration as well as the submission of all documents to the Provincial Department Human Settlements to obtain the relevant funding for this incremental housing project.

The Land Use Application was approved by the MPT. The PDoI has approved the project on the Business Plan funding for 2025/2026 for the installation of Interim Basic Services (IBS).

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Implementation
2026/27	Implementation
2027/28	Implementation

8.2 Langrug Dam, Franschhoek (Planning P1) - Ward 1 and 2

Project Name		3256 Franschhoek Langrug (1900) UISP
Property Description		Erven 959 – 1120 and Erf 2901
Town		Franschhoek
Suburb		Langrug
Geo-reference		33°53'09"S 19°06'23"E
Catalytic / PHDA Project		No
Urgency (Proposed year of implementation)		2025/26 – Rehabilitation of freshwater dam and fencing
% of Total need addressed by Project		TBD
Housing Programme/s		UISP
	Sites	0

Housing Opportunities	**Serviced Sites**	250-300
	Top Structures (Units)	0
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	Yes (PID)
	Council Approval	Yes
	Risks / Issues	Dense informal settlement that will require a large decanting site
	Readiness Score	3
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area, although structures are being constructed on steep mountain slopes.
	Strategic alignment	Amended MSDF 2023 - Project does fall within the approved Urban Edge of Franschhoek (page 77), and the project is listed on page 200. MHSP 2020 - Project is included in the proposed Housing Pipeline noted on page 131. IDP 2022-2027 - Project is listed as a current municipal project on page 245. PHSHDA - The Project is not included in the Stellenbosch PHSHDA.
	Planning Opinion	This project has been supported by the PDoI with the release of Tranche 1.1 and is a critical priority for the PDoI. Addressing the Langrug informal settlement must be a major priority for both local and provincial government. Decanting of Langrug informal settlement must be detail with carefully to avoid damaging the local community.

Langrug informal settlement is located in the north-eastern area of Franschhoek and falls within the jurisdiction of the Stellenbosch Municipality. On the southern side of the settlement is Groendal formal housing developments down to Franschhoek town. On the eastern side is the Mooiwater low-cost housing development. On the northern side of Langrug is a nature reserve that is located on the upper part of the mountain slope on which Langrug informal settlement encroaches.

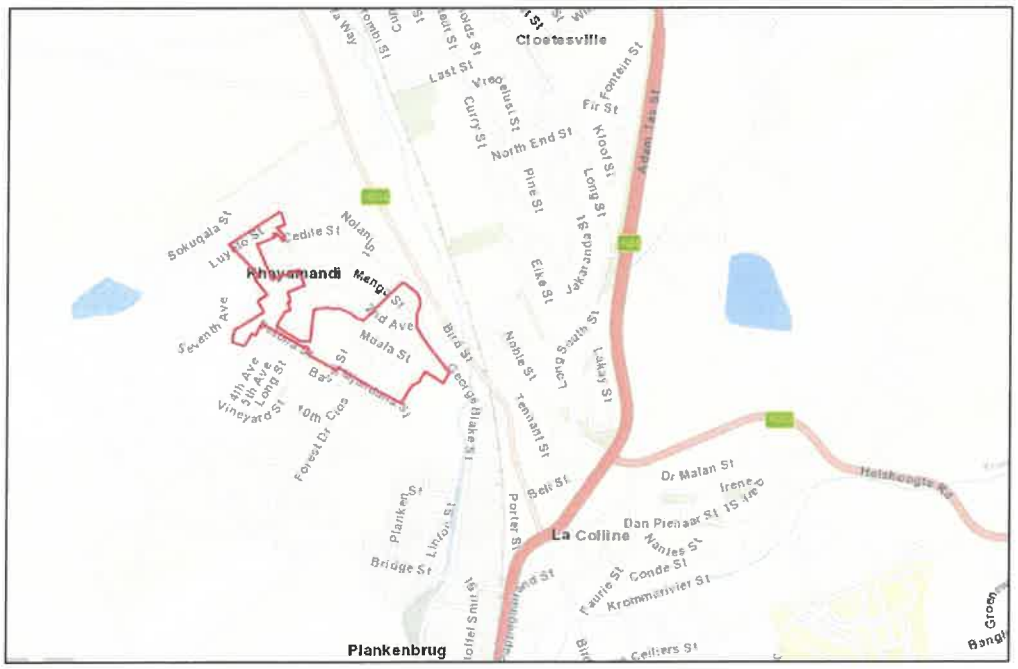
Living conditions at informal settlements are typically poor with residents facing a range of basic livelihood challenges, such as poor access to basic sanitation, low to no potable water supply, inadequate electricity provision, detrimental solid waste accumulation in public spaces, frequent shack fires, safety and security risks; to name a few. Langrug informal settlement is no exception to these deplorable living conditions. Furthermore, and due to the growing number of informal housing and population in the settlement coupled with the lack of availability of land for housing in the Franschhoek Area, there is a growing need at Langrug for additional basics services and amenities (roads, water, sanitation, electricity etc.), the management of grey and black water emanating from households, and the development of housing projects in the settlement.

In light of the above challenges, there are various projects and interventions which have been identified for planning and eventual implementation. The objective of these projects is to upgrade Langrug incrementally and to, as far as possible, formalise existing development patterns to improve the delivery of basic services.

Hereunder is a summary of the medium to long term projects:

- The construction of Phase 2 emergency access road and the installation of underground services.
- Relocation and subsequent rehabilitation of the dam area.
- Cancellation of the existing General Plan and consolidation to create one land unit.
- Construction of the fence

- Detailed planning for the rehabilitation of the freshwater dam
- Implement an in-situ upgrading project



The Municipality is planning to undertake detailed planning studies to unlock housing development opportunities, develop a phased approach implementation plan premised on detailed designs for the provision of basic services and formalisation of Langrug, apply for development rights and installation of basic services, and identify suitable land for decanting.

The **Section: Housing Development** to request technical proposals from service provider to finalise detailed planning for the rehabilitation of the freshwater dam and implement an in-situ upgrading project in 2025/26.

It is suggested that the following timeframes should be considered for project progression:

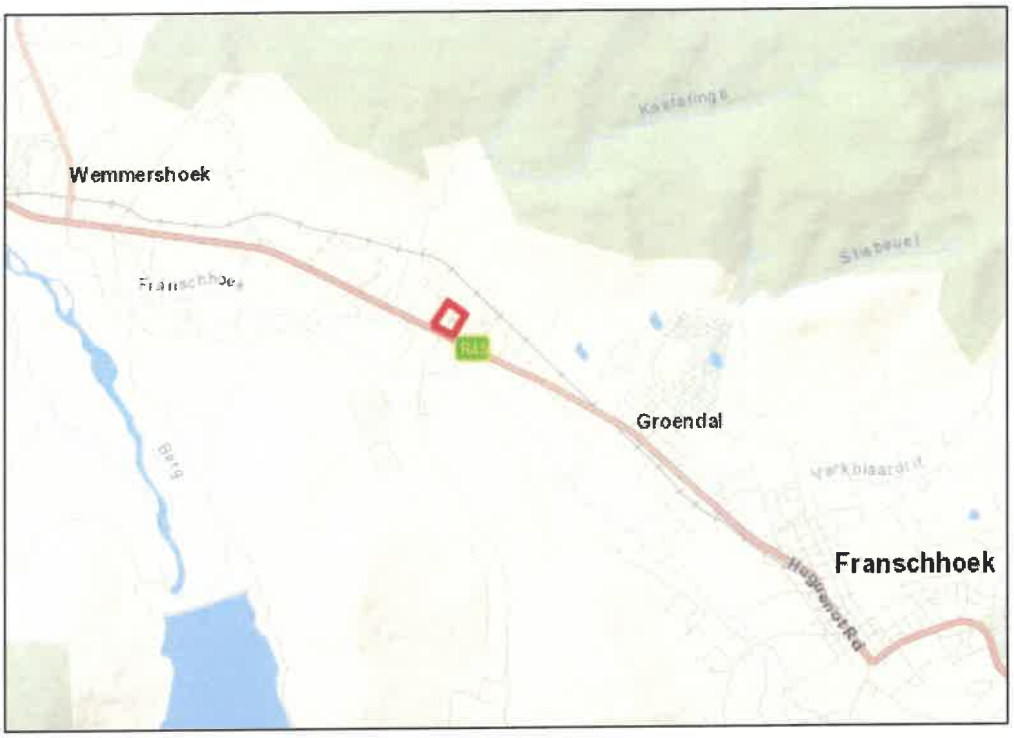
Timeframes	Project Deliverables
2025/26	Planning
2026/27	Implementation
2027/28	Implementation

8.3 Kayamandi Town Centre - Ward 12, 13, 14

Project Name		3258 ISSP Kayamandi Town Centre (1000) UISP
Property Description		Various
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'06"S 18°50'50"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		2025/2026
% of Total need addressed by Project		11,3
Housing Programme/s		UISP / Institutional
Housing Opportunities	**Sites**	0
	Serviced Sites	0
	Top Structures (Units)	1 854
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	Yes
	Land Use Approval	No
	PDoI Approval	Yes (PID)
	Council Approval	Yes
	Risks / Issues	Large scale of project and need for decanting onto a non-existent TRA
	Readiness Score	4

Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	Amended MSDF 2023 - Project does fall within the approved Urban Edge of Stellenbosch (page 70), and the project is listed on page 200. MHSP 2020 - Project is included in the proposed Housing Pipeline noted on page 130. IDP 2020-2025 - Project is listed as a current municipal project on page 179. PHSHDA - The Project is included in the Stellenbosch PHSHDA.
	Planning Opinion	This project has already been supported by the release of Tranche 1.1 and PFR application has been submitted on 20 June 2020. The project will entail the redevelopment of the older town centre of Kayamandi that is in desperate need of attention. The project will require a decanting site. This project can be further supported for feasibility studies.

A service provider has been appointed by Municipality to conduct a feasibility report to assess the redevelopment of the Town Centre of Kayamandi. The scope of their work during the feasibility phase consisted of determining the existing status quo, contextual assessment of the site, planning policy directives, site development plan with housing placed thereon, indicating the development patterns, proposed land uses and residential densities.



The feasibility studies were completed in December 2017 and Council approved the development at a Council Meeting on 28 March 2018. The objective has since been to prepare and submit a detailed planning application for the Town Centre of Kayamandi, to determine the civil services bulk capacity for the Kayamandi Town Centre, to compile engineering designs and submit them for approval and to apply for funding approval to install services and build multi-storey top structures. The Environmental and Heritage studies have been completed for the Town Centre and draft layouts and draft house typologies have been concluded. A Geotechnical study of the area has been conducted, and a funding application has been submitted to the Provincial Department of Infrastructure during June 2020 for the detailed planning of 1854 units. The planning layout has been approved by Council on 24 August 2020.

The Land Use application has been submitted during November 2022 and was advertised for public comment on 25 January 2024. Additional studies were requested by Infrastructure Service to determine if the proposed development from a bulk and link services perspective can be accommodated in the Kayamandi Town Centre. An investigation also needed to be determined whether the existing water and sewer distribution systems are sufficient. Department Infrastructure Service and Section Land Use Planning requested a revised SDP to make provision for parking as per the Land Use Application. After ammendments will be made by SDP the Department Land Use Management will submit a report to the MPT for decision.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	**Project Deliverables**
2025/26	Planning Approval
2026/27	Implementation into phases
2027/28	Implementation into phases

8.4 Maasdorp Village, Franschhoek – Ward 2

Project Name		Maasdorp Village, Franschhoek
Property Description		Farm La Motte 1041/27 and 1041/28 Paarl
Town		Maasdorp
Suburb		Rural

	Council Approval	Yes – with respect to a Memorandum of Understanding with the Department of Public Works and Infrastructure
	Risks / Issues	Costly sites
	Readiness Score	1

Project Suitability	**Geotech Conditions**	Suitable, already built-up area
	Strategic alignment	This project falls within the approved urban edge and has been identified in the SDF as future mixed-use, community, and residential infill. From a MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	TBD

The Maasdorp Forest Village comprises portions 27 and 28 of Farm La Motte No 1041 Paarl is located north of the intersection of Main Road 191 (R45) and Divisional Road 1351 approximately four kilometres northeast of Franschhoek.

The site currently accommodates approximately 32 formal houses and outbuildings. The property is currently zoned for Agricultural purposes and must be rezoned and subdivided to enable formal township establishment accommodating the existing households and as otherwise may be determined by further investigations and community engagements.

In June 2018 a service provider was appointed to attend to the township establishment process for Maasdorp Forest Village, Franschhoek: portions 27 and 28 of Farm La Motte No 1041 Paarl, and future expansion on Portions 3 and 7 of Farm La Motte No 1041, Franschhoek; the project has later been referred to only as the detailed planning and design for the township establishment of Maasdorp Forest Village.

Community engagements, a traffic impact study, engineering services reports and a geotechnical investigation have been completed together with draft plans of subdivision for further consideration. The required process for township establishment took longer than anticipated primarily due to the impact of Covid-19 on processes, the challenges on the ability to interact with relevant stakeholders and certain aspects in the planning process that arose and now requires additional input. Due to the socio-economic impact of Covid-19 and the relevancy of the socio-economic profile on the feasibility of proposed property extents and accommodation of original Maasdorp residents on these properties, the necessity to update the socio-economic survey and engineering services costing for efficient decision-making purposes on the development proposal, was identified.

The service provider submitted the Land Use Planning Application to the Section: Land Use Management and was advertised for public participation during February 2023. The MPT approved the Land Use Application, and a funding model needs to be developed to address the specific needs of the Forest Village.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Transfer of title deeds
2026/27	-
2027/28	

8.5 Enkanini ABS (Planning) – Ward 12

Project Name		3259 ISSP Kayamandi Enkanini (1300) UISP
Property Description		Various
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'29"S 18°50'46"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		Current (planning and service installation)
% of Total need addressed by Project		8
Housing Programme/s		UISP
Housing Opportunities	**Sites**	1 300
	Serviced Sites	0
	Top Structures (Units)	0
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No (Busy with 24G application)
	Bulk capacity	Yes
	Land Use Approval	Yes
	PDoI Approval	Yes (PRF)
	Council Approval	Yes
	Risks / Issues	Large scale of project and need for decanting onto a non-existent TRA
	Readiness Score	4
Project Suitability	**Geotech Conditions**	Steep slopes, increased cost of development
	Strategic alignment	This project is located within the approved urban edge and has been identified in the SDF as future mixed-use, community, and residential infill. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	This project has already been supported by the release of Tranche 1.1 and the PDoI is waiting for the PFR application currently. The project will entail the formalisation of the Enkanini Informal Settlement in Kayamandi. The project will require a decanting site. This project can be further supported for feasibility studies.

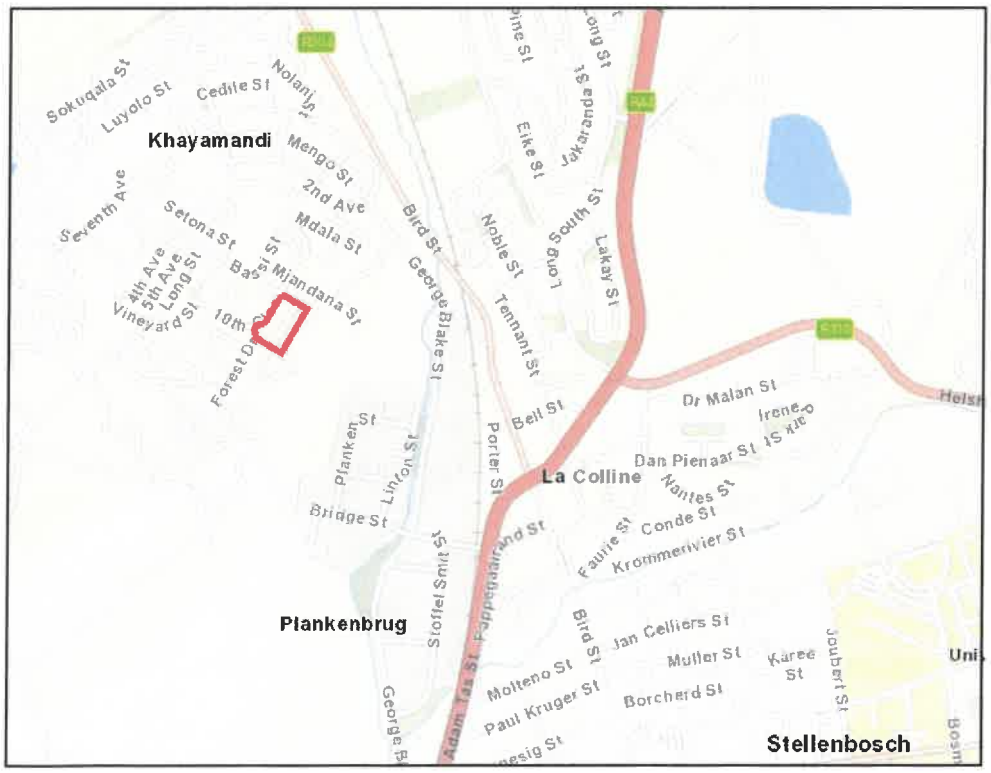
Enkanini is an informal settlement located to the northwest of Stellenbosch town. It abuts light industrial areas, informal settlements such as Zone O, the Town Centre and Watergang. The footprint of the Enkanini informal settlement covers an area of approximately 17.9 hectares of land located on portions of five properties being the Remainder of the Farm 183, the Farm 181, Portion 5 of Farm 175, Portion 33 of Farm 175 Stellenbosch and Erf 2175, Kayamandi. The informal settlement has a total number of structures estimated at approximately 3300 units and approximately 10 000 inhabitants.

All statutory land use planning, environmental and related approvals are obtained for the formalisation of the Enkanini informal settlement.

The **Directorate: Infrastructure Services** is currently busy with the installation of ±700 electrical connections. Integrated National Electrification Programme (INEP) approved and funded the project. It should be noted that the Programme is rolled out over the next three to four years, which will result in the installation of additional electrical connections. Implementation of Interim Basic Services (IBS) will commence in the 2024/25 and 2025/26 Financial Years.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Provision of electricity; In situ upgrading
2026/27	Implementation
2027/28	Implementation



8.6 Five housing projects in Kayamandi, Stellenbosch

In 1995, to direct and accommodate the accelerated growth and severe development pressure that prevailed in the Kayamandi Township, the former Stellenbosch Transitional Council commissioned the drafting of a Spatial Development Framework for Kayamandi and the immediate surrounding area. During 1996 and 1997 Special Council Meetings and workshops were held do deal with the Development Framework of Kayamandi with the aim to identify and implement priority projects within the area. The Spatial Development Framework was formally approved on 11 September 1996 and the priority projects plan during January 1997. Although the projects were implemented during the period, majority of the erven however have not been formally registered at the Surveyor General and the deeds office to proceed with the individual transfers of the properties to the respective end users/beneficiaries. For various reasons, the formal township establishment process for certain projects was not completed. Stellenbosch Municipality is now in a position to finalise the required statutory land use management approvals required for formal township establishment.

A service provider has been appointed to finalise township establishment by obtaining the necessary land use rights for each of the five projects situated in Kayamandi, Stellenbosch as well as submission of all diagrams in the Surveyor-General's office for registration and approval.

Five of these properties are now the subject of a township establishment process. Four of the projects have obtained land use rights by the MPT. Project 5B was submitted to Land Use department and was withheld due to no Power of Attorney could be submitted for Erf 66.

8.6.1 Erven 1080 – 1112 Kayamandi (33 erven) – Ward 12

Project Name		Erven 1080 – 1112 Kayamandi (33 erven)
Property Description		Erven 1080 – 1112 Kayamandi
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'15"S 18°50'53"E | 33°55'16"S 18°50'55"E

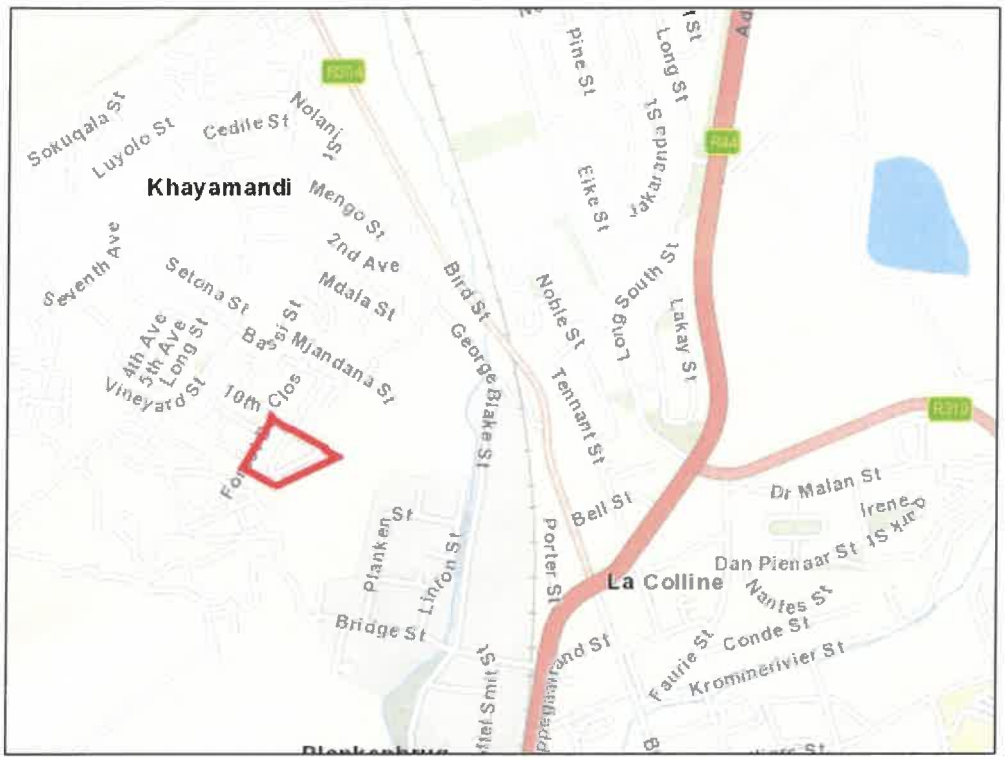
	Land Use Approval	Yes
	PDoI Approval	Yes (previous)
	Council Approval	Yes
	Risks / Issues	Community challenges and possible encroachments
	Readiness Score	4
Project Suitability	**Geotech Conditions**	Suitable, already built-up area
	Strategic alignment	These projects fall within the approved urban edge and have been identified in the SDF as future mixed-use, community, and residential infill. From an MSDF/CEF perspective, these projects fall within the functional area and priority development areas and from a strategic perspective align spatially.
	Planning Opinion	TBD

The project was approved by Council in 1996 and comprised the development of 146 family units by Stocks Housing Cape (Pty) Ltd. The 146 units were developed as rental stock units on Erven 1080 to Erven 1112 and were completed in 1998. The relevant statutory land use approvals are required to enable the registration of the sectional title scheme on the consolidated properties. This process will also entail the amendment of the approved General Plan (GP 3343/1993).

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Investigation possible of sectional title deeds.
2026/27	Transfer of title deeds.
2027/28	

8.6.2 Red Bricks Hostels: Erven 112, 114, 115, 116 Kayamandi – Ward 13



Project Name		Red Bricks Hostels: Erven 112, 114, 115 & 116, Kayamandi
Property Description		Erven 112, 114, 115 & 116, Kayamandi
Town		Stellenbosch
Suburb		Kayamandi

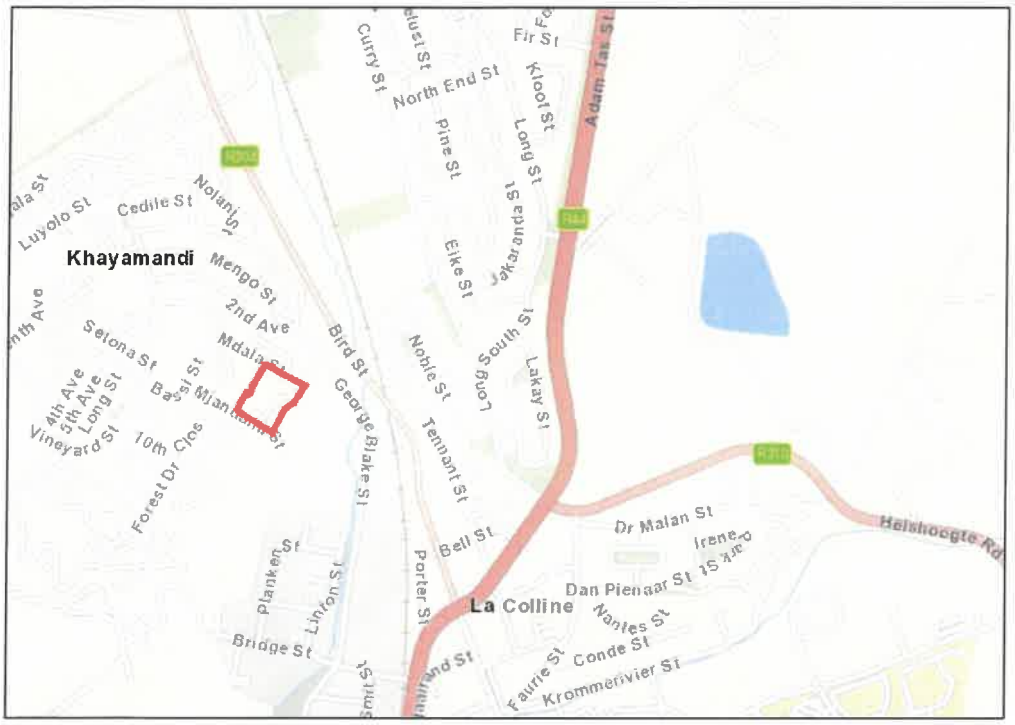
	Risks / Issues	Community challenges and possible encroachments
	Readiness Score	4
Project Suitability	**Geotech Conditions**	Suitable, already built-up area
	Strategic alignment	TBD
	Planning Opinion	TBD

The project formed part of the hostel upgrading programme for Kayamandi and was implemented and constructed in 2004. It comprised the consolidation of erven 112, 114, 115 and 116 as registered in terms of General Plan L 149/1987. The project entails the rezoning and the subdivision of the property into 51 units and 5 public open spaces.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Transfer of title deeds
2026/27	-
2027/28	

8.6.3 Erven 1123 – 1154 and 1113 – 1120 Kayamandi – Ward 15



Project Name		Erven 1123 – 1154 and 1113 – 1120, Kayamandi
Property Description		Erven 1123 – 1154 and 1113 – 1120, Kayamandi
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'20"S 18°50'52"E
Catalytic / PHDA Project		PHDA

	EIA ROD	No
	Bulk capacity	Yes
	Land Use Approval	Yes
	PDoI Approval	Yes (previous)
	Council Approval	Yes
	Risks / Issues	Community challenges and possible encroachments
	Readiness Score	4
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	TBD
	Planning Opinion	TBD

The project entailed the consolidation of Erven 1123 and 1152 as well as Erven 1113 and 1122 as registered in terms of General Plan 3343/1993. The project entails the subdivision of the property into 175 higher density units and public open spaces. Although the General Plan (Erven 1982 – 2165) was submitted to the Provincial Government Western Cape, the registration of the plan was not been done to date due to that Erf 1120 (public space) not being closed.

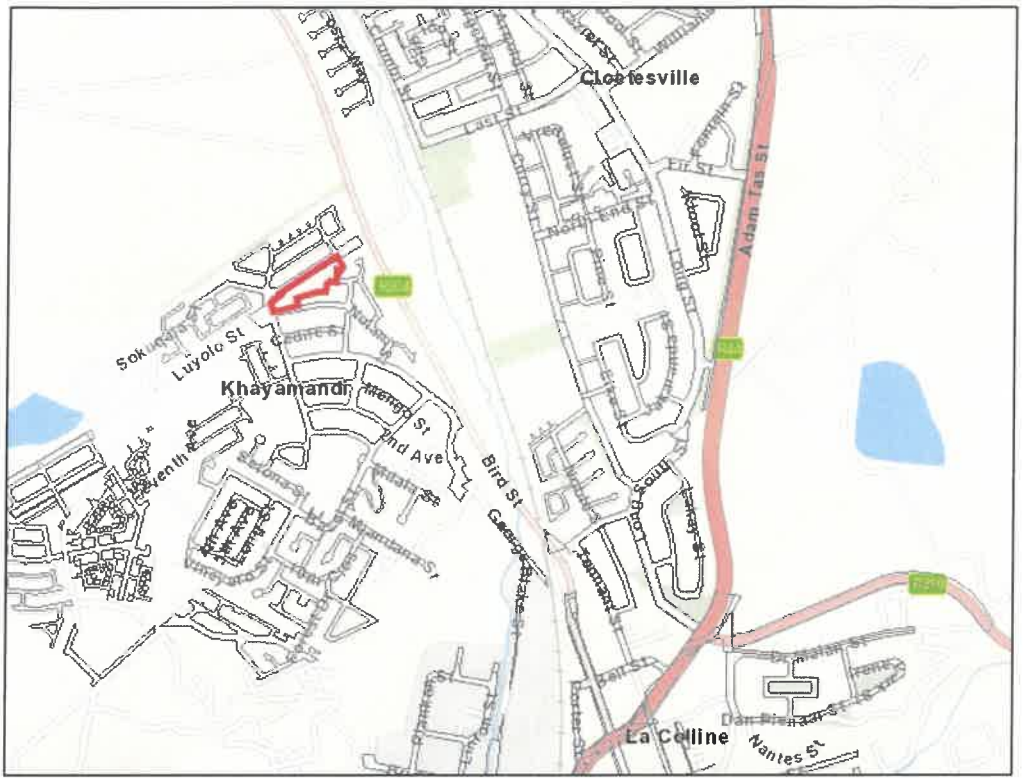
It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Transfer of title deeds.
2026/27	
2027/28	

8.6.4 Erven 513-522, 66, 67, 69 and Portion of Erf 523, Kayamandi – Wards 12 and 15

Project Name		Erven 513-522, 66, 67, 69, a portion of Erf 523, Kayamandi
Property Description		Erven 513-522, 66, 67, 69, a portion of Erf 523, Kayamandi
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'11"S 18°51'00"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		Existing structures
% of Total need addressed by Project		0,8
Housing Programme/s		Township establishment
Housing Opportunities	**Sites**	0
	Serviced Sites	0
	Top Structures (Units)	0
	Other	137
Project Readiness	**Land Obtained**	Yes. Only Erf 66 is in private ownership
	EIA ROD	No
	Bulk capacity	Yes
	Land Use Approval	No
	PDoI Approval	Yes (previous)
	Council Approval	Yes
	Risks / Issues	Community challenges and possible encroachments
	Readiness Score	4
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	TBD
	Planning Opinion	TBD

This project formed part of the Kayamandi Town Centre urban renewal project, as funded in terms of the overall hostel project upgrading programme. The development made provision for 137 higher density units, a new road and several open spaces.



The underlying erven forms part of General Plan 149/1987 and General Plan 290/1989. The development entails the consolidation of Erven 67, 69, a portion of Erf 523 and Erven 513-522 and the resubdivision thereof into individual higher density units.

The project was implemented and constructed during 2004. The project was partially completed due to the construction of informal structures on the remainder of the property. A total of 42 units have been built. It is recommended that the amendments of the General Plans (149/1987 and 290/1989) be done.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Planning approval outstanding due to PoA for Erf 66
2026/27	Registration of erven at the SG office/ Transfer of title deeds
2027/28	Transfer of title deeds

8.6.5 Mpelazwe: Remainder Erf 288 Kayamandi - Ward 13

Project Name		Mpelazwe: Remainder Erf 288, Kayamandi
Property Description		Mpelazwe: Remainder Erf 288, Kayamandi
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°54'52"S 18°50'48"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		Existing structures
% of Total need addressed by Project		0,3 – 0,4
Housing Programme/s		Township Establishment
Housing Opportunities	**Sites**	0
	Serviced Sites	0
	Top Structures (Units)	0
	Other	54 - 65
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	Yes
	Land Use Approval	Yes
	PDoI Approval	Yes (previous)
	Council Approval	Yes
	Risks / Issues	Community challenges and possible encroachments
	Readiness Score	4
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	TBD
	Planning Opinion	TBD

Mpelazwe is one of the oldest parts of the Kayamandi town and was identified as a priority project considering its historic character and response from the community. The development formed part of the hostel upgrading programme and comprised the development of 54 residential units. Although approval was previously granted for the re-layout of the area, it still forms part of Remainder Erf 288 as per General Plan 149/1987. Erf numbers (Erven 2392-2446) have been allocated; however, the formal rezoning, subdivision and closure of public roads have not been completed.

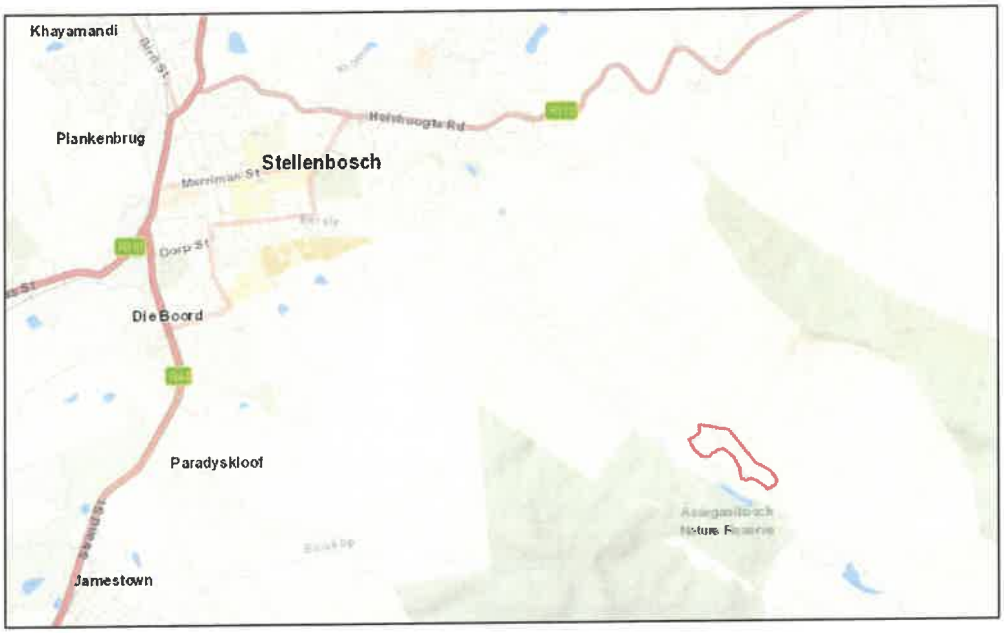
It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Transfer of title deeds
2026/27	-
2027/28	

8.7 Portion 1 of the Farm Meerlust No 1006 Paarl, Franschhoek – Ward 3

Project Name		3460 Meerlust, Franschhoek (200)
Property Description		Portion 1 of the Farm Meerlust 1006
Town		Franschhoek
Suburb		Meerlust
Geo-reference		33°51'35"S 18°58'41"E
Catalytic / PHDA Project		No
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		1,2
Housing Programme/s		IRDP
Housing Opportunities	**Sites**	0
	Serviced Sites	TBD
	Top Structures (serviced)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No
	Bulk capacity	TBD
	Land Use Approval	No
	PDoI Approval	Yes (PID)
	Council Approval	Yes
	Risks / Issues	Location, site is not located close to any urban settlements and the extremely small scale of the project
	Readiness Score	3
Project Suitability	**Geotech Conditions**	TBD
	Strategic alignment	This property is partially located within the approved urban edge. The portion within the urban edge has been identified in the SDF as future mixed-use, community, and residential infill as well as green areas to be retained. The Section: Spatial Planning will undertake a Local Spatial Development Framework (LSDF) to determine the potential and future development of this property.
	Planning Opinion:	TBD

In accordance with the housing need, Stellenbosch Municipality has identified a portion of land, Portion 1 of the Farm Meerlust No 1006 Paarl, in the Franschhoek Valley known as Meerlust for residential development. Ownership of the property currently vests with the National Department of Public Works and Infrastructure.



The site is located on the southern edge of the R45 close to the intersection of the R45 and the R310 and lies between Werda in the north-west and Allee Bleue, Lekkerwyn and the Pickstones to the east. The site is located on a sub-regional corridor linking the towns of Franschhoek and Paarl.

The Municipality has appointed the Housing Development Agency (HDA) via an Implementation Protocol Agreement (IPA) to assist and finalise the transfer of land from the National Department of Public Works and Infrastructure (NDoPW&I) to the Municipality. The HDA has reviewed previous planning studies and proposed layout options that were conducted on the property. On the 5th of November 2024, a request was given to the HDA to complete an audit and report of the management of basic water services in the Meerlust Village following irregularities in consumption and billing in the village. The HDA is facilitating the release of land from NDoPW&I to Stellenbosch Municipality through power of attorney.

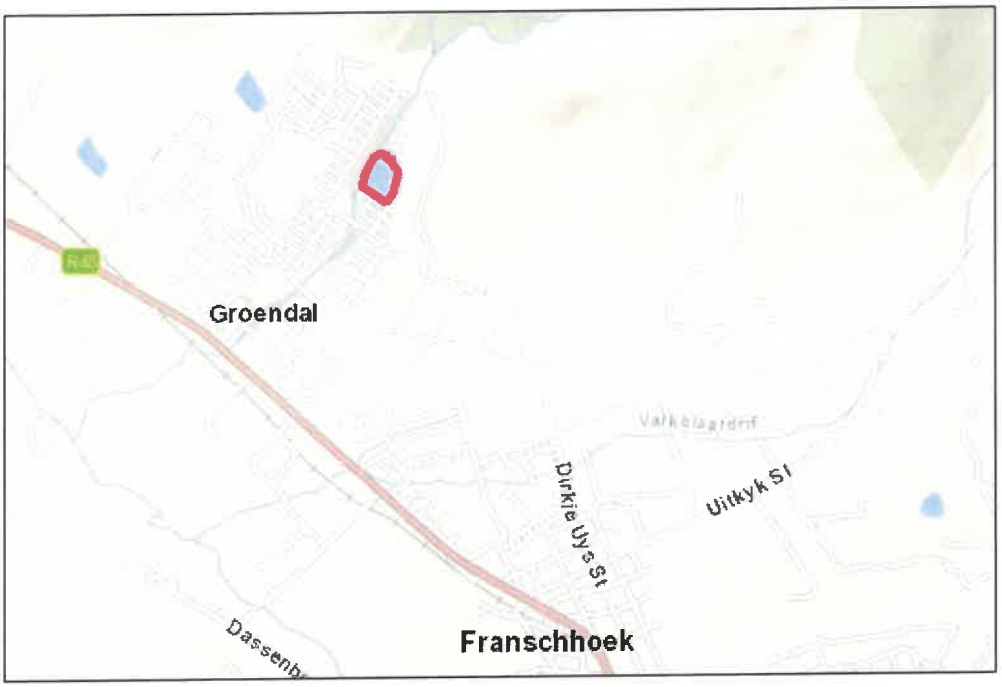
It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Transfer of land from NDoPW&I;
2026/27	Detailed Planning studies
2027/28	Planning

8.8 Jonkershoek – Ward 5

Project Name		Jonkershoek
Property Description		Various
Town		Stellenbosch
Suburb		Jonkershoek
Geo-reference		33°57'47"S 18°55'42"E
Catalytic / PHDA Project		N/A
Urgency (Proposed year of implementation)		TBD
% of Total need addressed by Project		0,7
Housing Programme/s		Township establishment / IRDP / FHF (formally known as FLISP)
Housing Opportunities	**Sites**	TBD
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	40 existing units
Project Readiness	**Land Obtained**	No
	EIA ROD	No
	Bulk capacity	No
	Land Use Approval	No
	PDoI Approval	No
	Council Approval	Yes- with respect to a Memorandum of Understanding
	Risks / Issues	Conservation status and bulk service provision restraints
	Readiness Score	0
Project Suitability	**Geotech Conditions**	TBD
	Strategic alignment	The Section: Spatial Planning planned to undertake a Local Spatial Development Framework (LSDF) to determine potential and future development of this property.
	Planning Opinion	TBD

The Jonkershoek Valley is located about 10km east of Stellenbosch, below the imposing Hottentots-Holland Mountains. The valley is relatively narrow (3-5 km) and approximately 13 kilometres in length. The upper Jonkershoek Valley has been conserved as part of the Jonkershoek Nature Reserve to preserve the mountain fynbos ecosystems; however, large areas have been converted to plantation forestry. Besides the original Jonkershoek farmyard, Jonkershoek has a Bosdorp, which historically accommodated the labour force of forestry and catchment management.



The Municipality has appointed the Housing Development Agency (HDA) via an Implementation Protocol Agreement (IPA) to assist and finalise the transfer of land from the National Department of Public Works and Infrastructure (NDoPW&I) to the Municipality. The HDA has reviewed previous planning studies and proposed layout options that were conducted on the property. On receipt of the Power of Attorney (PoA), the Land Use Application to obtain land use rights to develop the subject properties for human settlement purposes will be lodged with the municipality.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Obtain PoA and Detailed planning studies
2026/27	Obtain development rights
2027/28	Obtain development rights

9. IMPLEMENTATION PHASE

9.1 Erf 3229, Franschhoek (Mooiwater) – Ward 1

Project Name	Erf 3229, Mooiwater, Franschhoek TRA
Property Description	Erf 3229
Town	Franschhoek
Suburb	Mooiwater
Geo-reference	33°53'23"S 19°06'27"E
Catalytic / PHDA Project	No
Urgency (Proposed year of implementation)	Current
% of Total need addressed by Project	1,6
Housing Programme/s	UISP

Housing Opportunities	**Sites**	258
	Serviced Sites	TBD
	Top Structures (Units)	TBD as temporary units
	Other	Provision of communal basic services 51 standpipes and waterborne toilets
Project Readiness	**Land Obtained**	Yes
	EIA ROD	No (Directive from DEADP was issued two years ago, SM needs to address this before processing with the EIA process – DEADP & SM to engage)
	Bulk capacity	Yes (Water supply sufficient, Sewerage needs some upgrades)
	Land Use Approval	No (But a shorter LUPA process will be followed)
	PDoI Approval	No
	Council Approval	Yes
	Risks / Issues	Decanting of beneficiaries, invasion is a high risk
	Readiness Score	1
Project Suitability	**Geotech Conditions**	Suitable, location in an already built-up area
	Strategic alignment	Amended MSDF 2023 - Project does fall within the approved Urban Edge but is not indicated specifically. MHSP 2020 - Project is not included in the HSP. IDP 2022-2027 - Erf 3229 is noted as necessary for the decanting of Langrug, but the project is not specifically mentioned. PHSHDA - Not included in the Stellenbosch PHSHDA, although Langrug Informal Settlement is included.
	Planning Opinion	This project will allow for the partial decanting of the Langrug Informal Settlement and as such can be supported by the PDoI. The location of the decanting site is within the urban area of Franschhoek and within walking distance of the Langrug settlement. Consideration should be given to a long-term solution for this site, as experience with the Langrug Informal Settlement has been that addressing this settlement will not be a speedy process.

Erf 3229 at Mooiwater was identified as a temporary decanting site for the relocation of families residing and impacted by the freshwater dam at Langrug informal settlement. Their livelihoods are under constant threat during winter and rainy session as the freshwater dam fills up and flood structures within the dam area. The freshwater dam was flagged as a risk and unsafe for human settlement purposes. It was recommended that the dam wall be rehabilitated.

Erf 3229 is currently vacant and is being used for illegal dumping. A consultant was appointed in 2019 to undertake a Geotechnical Study to assess the feasibility of establishing a decanting site on Erf 3229. The outcome of the study indicates that the property is suitable for human settlement purposes, subject to undertaking site works and rehabilitation of the property.

The Municipality appointed a team of professionals to undertake planning studies for the proposed development of a Temporary Relocation Area (TRA) on Erf 3229, Franschhoek. The primary purpose of this project is to create a decanting site (TRA) for the relocation of households residing and impacted by the freshwater dam at Langrug informal settlement.

The design of the layout plan for the proposed development has been completed. The Land Use Application to use the property as a decanting site was approved by the Municipal Planning Tribunal in February 2022. Environmental authorisation from DEA&DP was obtained in July 2022.

The **Section: Project Management Unit** has appointed a contractor for the construction of the wendy houses. It is anticipated that the construction process will be completed by the end of 2024/25 financial year.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Installation of basic services; relocation of households
2026/27	
2027/28	

9.2 Zone O, Kayamandi – Wards 14 and 15

Project Name		ISSP Kayamandi Zone O (711) UISP
Property Description		Erf 2991
Town		Stellenbosch
Suburb		Kayamandi
Geo-reference		33°55'06"S 18°50'35"E
Catalytic / PHDA Project		PHDA
Urgency (Proposed year of implementation)		Current
% of Total need addressed by Project		4,4
Housing Programme/s		UISP
Housing Opportunities	**Sites**	711
	Serviced Sites	TBD
	Top Structures (Units)	TBD
	Other	0
Project Readiness	**Land Obtained**	Yes
	EIA ROD	Yes
	Bulk capacity	Yes
	Land Use Approval	Yes
	PDoI Approval	Yes (PIRR)
	Council Approval	Yes
	Risks / Issues	Risk of land invasion and community unrest
	Readiness Score	Current

Project Suitability	**Geotech Conditions**	Suitable
	Strategic alignment	This project is located within the approved urban edge. From an MSDF/CEF perspective, this project falls within the functional area and priority development areas and from a strategic perspective aligns spatially.
	Planning Opinion	Development rights have been obtained (MPT approval)

The property is located on the western side of Kayamandi, on the slope leading up to the school and reservoir. The access to the land is through Kayamandi, with the most direct route being from the R304 (Bird Street extension) via the northern entrance to Kayamandi (Sokuqala Street). Zone O comprises an original portion of Remainder of Erf 2183, Portion of Erf 1714, Unregistered Erven 863 and 873 (Portions of Erf 707) Kayamandi.

The civil designs and drawings for project have been approved by the relevant competent authorities. The project will be implemented in phases as indicated in the map above (i.e. Phase 1, Phase 2 and Phase 3). For technical reasons, the implementation of the project will commence at Phase 3 which comprises of 178 sites. The **Section: Project Management Unit (PMU)** is project co-ordinating and manages the implementation of 178 internal services for Phase 3. The Section: PMU is in the final stages of appointing a contractor for the construction of the top structures.

It is suggested that the following timeframes should be considered for project progression:

Timeframes	Project Deliverables
2025/26	Construction of top structures.
2026/27	Construction of top structures.
2027/28	Relocation of Phases Construction of top structures.

7.6	**INFRASTRUCTURE SERVICES : (PC : R PHEIFFER)**

7.6.1	**STATUS REPORT ON THE ALTERNATIVE ENERGY GENERATION PROGRAMME – MAY 2025**

Collaborator No: **784933**
IDP KPA Ref No: **Green & Sustainable Valley**
Meeting Date: **21 May 2025**

1 SUBJECT: STATUS REPORT ON THE ALTERNATIVE ENERGY GENERATION PROGRAMME – MAY 2025

2. PURPOSE

For Council to note the progress of the Municipality's as well as Provincial Government initiatives regarding the Alternative Energy Programme projects which are underway at present.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

4.1 20 MW Independent Power Producer Contract: Tender conditionally awarded to successful bidder. A Legal Firm has been appointed by the Municipality and has interrogated the draft Power Purchase Agreement. Once the draft Power Purchase Agreement is finalised and signed off by both parties, development rights will commence.

4.2 50 MW Independent Power Producer Tender: The closing date for the Request for Proposals is 30 September 2025.

4.3 The installation of the 66kV switchgear at Main and University substations was initially planned to be completed in April 2025, the revised estimated completion date is June 2025. This will then enable the installation of the Supervisory Control and Data Acquisition (SCADA) completion at those substations.

4.4 The new (SCADA) tender closed on 17 March 2025.The new tender is for the Supply, Delivery, Off-Loading, Installation, Setup, Configuration and Commissioning/Testing of Electrical Substation Telemetry Monitoring Equipment (SCADA System) and Supervisory Communication Network Installations.

4.5 Fire Station Progress: The tender for the Stellenbosch Fire Station battery storage system was awarded and construction work will be completed by 30 June 2025.

4.6 NPK Building Progress: Tender documentation is being prepared at present for the retrofitting of the building with alternative energy equipment.

4.7 Main Building (Neethling Huis) Progress: Currently at detailed design and tender documentation stage (Electrical and Mechanical Fire Compliancy).

4.8 Energy Performance Certification: The frames have been delivered, and the certificates have been installed in all buildings except the NPK building.

4.9 Municipal Community Buildings Progress: Tender B/SM 34/25 Turnkey – Engineering, Procurement and Construction (EPC) of Hybrid Inverter with Battery Storage Systems at fourteen Stellenbosch Municipality Community Buildings. The tender was awarded and the successful bidder notified on 7 March 2025.

4.10 Eskom Hot Water Load Control (HWLC) and RT 29-2024 Contracts for smart meters:

A new tender will be prepared with the objective of becoming effective on 1 July 2025.

4.11 The Municipality's load curtailment application is still with Eskom at present, and Eskom responded formally to the Municipality's request. The Municipality will still pursue this option, but mitigating measures are in place should Eskom not allow it.
The above projects, 4.1 to 4.10, are still being pursued by the Municipality's Alternative Energy Program with the focus on securing cheaper and renewable energy, as well as the focus on business continuity during outages and ensuring that critical plants and systems are still operational.

5. RECOMMENDATION

that Council notes the latest progress with the Alternative Energy Generation projects in implementation at present.

6. DISCUSSION / CONTENTS

6.1 Background

The Constitution did not allow Local Government to enter into the generation of electricity, and the Electricity Regulation Act did not allow municipalities to purchase electricity from any company other than Eskom. Through the promulgation of Electricity Regulation Act Regulations, on 16 October 2020, this changed, and municipalities are now allowed to generate electricity and purchase electricity from other electricity providers other than Eskom.

6.2 Discussion

6.2.1 20 MW Independent Power Producer Contract: The legal firm has requested a meeting with the municipality to discuss their comments prior to scheduling a meeting with the bidder. The meeting with the legal firm and the municipality is scheduled for 23 April 2025.

6.2.2 50 MW Independent Power Producer Tender: The closing date for the Request for Proposals is 30 September 2025. The non-compulsory bidder's conference is scheduled for 23 April 2025.

6.2.3 The installation of the 66kV switchgear at Main and University substations was initially planned to be completed in April 2025, the revised estimated completion date is June 2025. The delay in the completion date is due to a faulty isolator

at Golf Substation. A circuit breaker replacement on either of the 2 feeders at Main Substation would result in an "N" configuration of the network. This means that, in the event of a fault in certain sections of the network during this period, there would be no alternate power supply available. The department is currently working on establishing a contingency plan to address this unlikely but possible scenario. This will then enable the installation of the Supervisory Control and Data Acquisition (SCADA) completion at those substations.

6.2.4 Tender B/SM 75/25 - The new SCADA tender for the Supply, Delivery, Off-Loading, Installation, Setup, Configuration and Commissioning/Testing of Electrical Substation Telemetry Monitoring Equipment (SCADA System) and Supervisory Communication Network Installations. The tender closed on 17 March 2025. The technical evaluation report was submitted to SCM on 16 April 2025, awaiting Bid Evaluation Committee meeting date. The new tender pertains to Phase 3 of the SCADA project, which entails the implementation of remote monitoring at the 11kV secondary substations. The current ongoing tender scheduled for completion by June 2025 pertains to Phase 2 which involves the implementation of remote switching at the seven main substations.

6.2.5 Fire Station Progress: The tender for the Stellenbosch Fire Station battery storage system was awarded and construction work will be completed by 30 June 2025.The snag list has been completed, a date is currently being scheduled for the final inspection prior to handover of the installation to the municipality.

6.2.6 NPK Building Progress: Tender documentation is being prepared at present for the retrofitting of the building with alternative energy equipment.

6.2.7 Main Building (Neethling Huis) Progress: Currently at detailed design and tender documentation stage (Electrical and Mechanical Fire Compliancy).

6.2.8 Energy Performance Certification: The frames have been delivered, and the certificates have been installed in all buildings except the NPK building. The position for the NPK building frame has been confirmed, the frame will be installed before end of April 2025.

6.2.9 Municipal Community Buildings Progress: Tender B/SM 34/25 Turnkey – Engineering, Procurement and Construction (EPC) of Hybrid Inverter with Battery Storage Systems at fourteen Stellenbosch Municipality Community Buildings. The tender was awarded, and the successful bidder was notified on 7 March 2025. The form offers and acceptance was signed on 1 April 2025, and the kick-off meeting was on 7 April 2025. The contractor commenced site inspections on 14 April 2025.

6.2.10 Eskom Hot Water Load Control (HWLC) and RT 29-2024 Contracts for smart meters:

A new tender will be prepared with the objective of becoming effective on 1 July 2025.

6.2.11 The Municipality's load curtailment application: Eskom submitted a formal response regarding load curtailment application. The response states that Eskom cannot allow the Municipality to be on load curtailment, however, it was

determined that the Municipality can implement load curtailment for its end customers. The response will be shared with the consultants for review. An internal meeting is scheduled for 9 May 2025 to discuss the way forward.

The above projects, 4.1 to 4.10, will still be pursued by the Municipality's Alternative Energy Program with the focus on securing cheaper and renewable energy, as well as the focus on business continuity during outages and ensuring that critical plants and systems are still operational.

6.3 Financial Implications

This report has no further financial implications for the municipality and the projects have been appropriately budgeted for.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

Specialized technical staff would be required to facilitate and implement the switching and optimization of different sources of energy into the Municipal grid. The department has identified vacancies as well as new posts which have been submitted in a new draft organogram for review.

6.6. Previous / Relevant Council Resolutions

URGENT COUNCIL MEETING: 2025-03-04: ITEM 5.1

NOTED

(a) the clarification of the Feasibility Study Report (**Stellenbosch Municipal Independent Power Producer Procurement Pioneering Project – T008/23)** approved in August 2024;

(b) the project is in the Bid Specification phase of the procurement process of the 50MW Solar PV and 15 MWh BESS Project;

(c) that Council be reminded that the chosen option and size of battery energy storage, as per the approved Feasibility Study by Council in August 2024, will unfortunately not contribute to the Municipality reducing Eskom loadshedding levels, but is projected to significantly contribute towards electricity costs savings to the Municipality and ratepayers; and

(d) that should no responsive bidders be found, it will result in the tender cancellation, whereafter Council will be informed.

23RD COUNCIL MEETING: 2024-06-14: ITEM 10.6.1

NOTED

The Alternative Energy Generation project updates identified by the AEG Committee and the latest progress with the Alternative Energy Generation projects in implementation at present.

"40TH COUNCIL MEETING: 2021-01-27: ITEM 11.5.1

RESOLVED (nem con)

(a) that Council approves the investigation into alternate methods of electricity generation and purchases.

(b) that Council approves the joint investigation to be done by University of Stellenbosch, Council for Scientific and Industrial Research (CSIR), and the Western Cape Government.

(c) that Council accepts the initiating of the following processes as may be required:

i. Municipal Systems Act, Section 78(1) processes

ii. Municipal Finance Management Act, Section 33 investigation processes

iii. Electricity Regulation Act, Section 13; and

(d) that Council considers the funding of such investigations and implementation of completed investigations within the determination of the 2021/22 budget process.

16TH COUNCIL MEETING: 2023-08-23: ITEM 11.6.3

NOTED

The progress of the Alternate Energy Generation initiatives and studies.

20TH COUNCIL MEETING: 2024-02-21: ITEM 11.6.1

NOTED

The Alternative Energy Generation strategies identified by the AEG Committee and the progress with the Alternative Energy Generation projects initiated.

6.7 Risks / Challenges: Implications and Mitigation:

- The approval of the municipality's load curtailment application by Eskom's Load Shedding Committee is a risk but the program is now focusing on affordability of future energy costs for the Municipality, as well as security of supply.
- The existing ICT network infrastructure is being upgraded in tandem with the SCADA project.

6.8 Comments from Senior Management:

6.8.1 Director: Corporate Services

The ICT department is part of the planning regarding the SCADA monitoring project. Additional staff must be appointed once the project of SCADA installation is completed to monitor the equipment. The organogram will have to be amended for this process.

6.8.2 Municipal Manager

Requested item on agenda.

7.6.2	**STELLENBOSCH MUNICIPALITY PARTNERSHIP WITH GERMAN WATER UTILITY: HAMBURGER STATDENTWASSERUNG AND HAFENCITY UNIVERSITY HAMBURG**

Collaborator No:
IDP KPA Ref No: **Green & Sustainable Valley**
Meeting Date: **21 May 2025**

1. SUBJECT: STELLENBOSCH MUNICIPALITY PARTNERSHIP WITH GERMAN WATER UTILITY: HAMBURGER STATDENTWASSERUNG AND HAFENCITY UNIVERSITY HAMBURG

2. PURPOSE

To obtain Council's approval for the Municipality to enter into a partnership with Hamburger Stadtentwasserung AoR and HafenCity University Hamburg (Germany) to explore interventions into Water Recycling and Re-use.

3. DELEGATED AUTHORITY

Municipal Council.

4. EXECUTIVE SUMMARY

Potable water is fast becoming our most important natural resource, as well as the protection of our riverine systems and ecological habitats. Stellenbosch Municipality has been approached by Hamburger Stadtentwasserung AoR and HafenCity University Hamburg, both based in Germany, to explore the possibility of entering into a Water Operators' Partnership within the NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse.

The research project "NEU-Water: Nature Engineered Urban Design for Water Recycling and Re-use is funded by the German Federal Ministry of Education and Research and aims to develop solutions and processes that promote the re-use of stormwater and greywater as part of water sensitive urban design. The research project seeks to address these issues whilst working in dense, low-income urban contexts which have limited access to water infrastructure and represents the challenges in the Southern African countries.

Municipal water and wastewater are key players for sustainable prosperity and economic development. Therefore, the Water Operator Partnership intends to look at a more sustainable adaptation and integration of water sensitive urban design. The aim of the partnership is to share knowledge and expertise through peer support and working together on defined areas in order to progressively strengthen utilities' capacity and performance on aspects particulary relating to stormwater management, drinking water supply and sanitation.

The activities of the partnership are driven by the demand of the Stellenbosch Municipality and are jointly decided on between the parties.

The ethos of the partnership will contribute towards the two IDP Strategic Focus Areas of SFA 4: "Dignified Living" as well as SFA 2: "Green and Sustainable Valley"

- To provide access to basic services for households in the WC024 area and;
- Enhancing the integrity of the environment is imperative for long-term sustainability.

The Municipality will also benefit from learnings, methods and technicques regarding water filtration, treatment of grey-water runoff from settlements, incorporating water-sensitive urban design techniques into current and future developments and human settlement initiatives.

The partnership is also geared for both parties to contribute towards research initiatives, peer learning from each other, as well as implementable projects on existing sites where feasible.

The partnership will be funded by the German Federal Ministry of Education and Research. The partnership makes available funds for the German officials to travel to Stellenbosch Municipality to be involved in research, designs and implementable pilot projects, as well as up to 12000 EUR for officials to travel to Hamburg, Germany to learn from initiatives, water operators and the University abroad as well. No financial obligations are placed on the Stellenbosch Municipality.

The duration of the partnership and proposed Memorandum of Understanding will be from date of signature until the research project ends, prospectively April 2028.

5. RECOMMENDATIONS

(a) that Council approves the Stellenbosch Municipality enters into a Water Operators' Partnership with Hamburger Stadtentwasserung AoR and HafenCity University Hamburg on the topic of Nature Engineered Urban Design for Water Recycling and Reuse;

(b) that Council approves the Memorandum of Understanding attached hereto as **ANNEXURE A**;

(c) that the Directorate: Infrastructure submits a progress report to Council after one year, alternatively as soon as practically possible; and

(d) that Council approves the travel related costs (accommodation and daily allowances).

6. DISCUSSION / CONTENTS

6.1 Background

Stellenbosch Municipality has been approached by Hamburger Stadtentwasserung AoR and HafenCity University Hamburg, both based in Germany to explore the possibility of entering into a Water Operators' Partnership within the NEU-Water: Nature Engineerd Urban Design for Water Recycling and Reuse.

The research project "NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse" is funded by the German Federal Ministry of Education and Research and aims to develop solutions and processes that promote the reuse of stormwater and greywater as part of water sensitive urban design.

The research project seeks to address these issues whilst working in dense, low-income urban context which has limited access to water infrastructure and represents the challenged in the Southern African countries.

6.2 Discussion

Stellenbosch Municipality has entered into partnership agreements with European Municipalities and entities before, such as Belgium and Sweden. According to the participants in these partnerships, the learning experience has been immense and many of the lessons learnt by both parties are to this day being implemented.

It is commonly known that the German system is one of the most advanced and matured systems and the lessons learned can be immeasurable to Stellenbosch Municipality.

The Hamburg officials have already visited the Municipality, as well as possible sites for concept designs and possibly implementation such as in Mooiwater and Langrug.

It is therefore imperative that Stellenbosch Municipality enters into the proposed partnership agreement and commence with the aims set out in the Memorandum of Understanding.

A copy of the Memorandum of Understanding is attached hereto as **ANNEXURE 1**.

6.3 Financial Implications

The research project "NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse" is fully funded by the German Federal Ministry of Education and Research. At this stage there are no financial implications for the Municipality.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

A task-team will be appointed as the committee working together with the partners in order to reach the aims of the partnership. The team will consist of employees in the Infrastructure, Planning (informal Settlements) and Corporate Services departments.

6.6 Previous / Relevant Council Resolutions:

None.

6.7 Risk Implications

This report has no risk implications for the Municipality.

6.8 Comments from Senior Management:

6.8.1 Director: Infrastructure Services

Author of report.

6.8.2 *Director: Planning and Economic Development :*

I have no further comment on the item. I support the item.

6.8.3 Director: Community and Protection Services:

No further comments.

6.8.4 Director: Corporate Services:

6.8.5 Chief Financial Officer:

Supported

6.8.6 *Municipal Manager:*

ANNEXURE A

Memorandum of Understanding

Water Operators` Partnership (WOP)

Within

"NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse"

This Memorandum of Understanding ("MoU") is concluded between the "partners":

Stellenbosch Municipality
1st Floor, Ecclesia Building Plein Street, PO Box 17
Stellenbosch, 7599, South Africa
Represented by Garaldine Lezette Mettler
in her capacity as Municipal Manager
(called „SM" in this MoU)

and

Hamburger Stadtentwässerung AöR
Billhorner Deich 2, 20539 Hamburg, Germany
Represented by Dr. Franziska Meinzinger
(called "HSE" in this MoU)

and

HafenCity University Hamburg
Henning-Voscherau-Platz 1, 20457 Hamburg, Germany
Represented by Prof. Dr. Jörg Müller-Lietzkow, President
Coordinated by Prof. Dr.- Ing. Wolfgang Dickhaut,
(called "HCU" in this MoU)

1. Preamble

The research project "NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse" ("research project") funded by the German Federal Ministry of Education and Research aims to develop solutions and processes that promote the reuse of stormwater and greywater as part of water sensitive urban design. The research project seeks to address these issues while working in the dense, low-income urban context which has limited access to water infrastructure and represents the challenges in the southern African countries. The research project consists of four work packages (WP). This MoU addresses the activities in WP 1.2.

Municipal water and wastewater companies and institutions are key players around the world for sustainable prosperity and economic development. Therefore, the WP 1.2 of the research project includes a Water Operator Partnership ("WOP") for a more sustainable adaptation and integration of water sensitive urban design. The WOP will be between SM and HSE. HCU as the coordinator in the research project will accompany the WOP administratively. The aim of the WOP is to share knowledge and expertise through peer support and work together on defined areas in order to progressively strengthen utilities' capacity and performance on aspects particularly relating to stormwater management and water sensitive urban design. Other areas of urban water management such as drinking water supply and sanitation may also be addressed. The key to the success of the WOPs is the peer-to-peer approach among the involved colleagues. The WOP activities are driven by the demand of SM and are determined jointly.

2. Scope of the MoU

The purpose of this MoU is to establish the frame conditions under which the partners shall collaborate to achieve the goal and objectives set out below for all partners through collaborative work.

3. Goal

The overall goal is to establish a sound long-lasting cooperation in partnership among the partners in terms of trust and relation. Further, to cooperate in various fields in order to enhance the performance of each partner and to promote the delivery of commercially viable stormwater and greywater management, water and sanitation services. The partners agree on:

1) Mutual strengthening in achieving their mandates in terms of stormwater and greywater management, water and sanitation services.
2) Establish a trustful cooperation between the peer experts of HSE and SM to share information and ensure knowledge transfer.
3) Work with and consult each other on ways and means of enhancing performance in the field of water and sanitation.

4. Areas of Cooperation and Objectives

The partners will work together on the following objectives which are in line with the "NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse" project proposal attached as Annex 1 ("research project proposal"):

- Improvement of stormwater and greywater management

- Strengthening municipal water security through strategies for WSUD and water reuse measures

The areas of cooperation must not be restricted to the above-mentioned objectives. The WOP should act in synergy with other projects and related activities. Detailed objectives and other WOP activities will be derived as part of this partnership and the research project.

The WOP methodology for collaboration is built on elements such as:

- regular professional online meetings with peer colleagues
- annual on-site activities and visits
- visit of peers from SM in Hamburg

5. General Responsibilities of the Partners

All partners explain their commitment to the WOP. They agree to fulfill the agreed goals and areas of cooperation (see under clause 3 and 4) as well as detailed in the research project proposal (Annex 1). The partners establish permanent contact persons in their utilities, through whom the coordination and communication are organised. The partners ensure the commitment of the related experts for the defined tasks and to apply the peer-to-peer approach. The partners agree to join efforts and to maintain close and transparent working relationships in order to achieve the objectives of the WOP.

The specific roles of the partners are the following:

- HSE is the lead partner within this WOP and takes over the general coordination of WOP and the coordination on German side.
- SM takes over the WOP coordination on South African side.
- The lead partner prepares meetings and initiates activities and is responsible for documentation. HSE peer experts will be provided with sufficient working time to fulfil their tasks within this WOP.
- SM ensures reliable arrangements within this WOP in terms of preparing and taking part in the dedicated activities, either online or in presence and dedicating sufficient working time of the related peer experts in order fulfill their tasks within this WOP.
- As research project coordinator, the HCU is responsible for the overarching coordination of the WOP in the context of the research project, provides

administrative support for the WOP and coordinates any joint activities of the WOP with other work packages of the research project.

The partners shall refrain from any action that may adversely affect the interests of the other partner and shall fulfil their commitments with fullest regard for the frame conditions of this MoU and the research project proposal (Annex 1).

6. Financials

The WOP is part of the research project NEU Water funded by the German Federal Ministry of Education and Research and is a not-for-profit project. The research project includes funds up to 12000 EUR (managed by HCU) for a designated group of expert peers of SM to travel to Hamburg (Germany) to visit their peers at HSE (study visit/ job shadowing). The MoU places no further financial obligations on either of the partners.

7. Duration, Amendment and Termination

This MoU shall be effective until research project end, prospectively 30 April 2028, from the date of the last signature by the authorized representative of each partner. The partner may mutually agree to review the MoU. When failing to do so the MoU will expire on due date.

8. Secrecy/ Confidentiality

The documents, knowledge and experience given to the other partners may only be used for the purposes of this WOP in the research project unless otherwise agreed upon.

9. Disputes Resolution

The partners or their designate representatives shall amicably resolve any disputes arising from the interpretation or implementation of this MoU.

10. Annexes

Annex 1: NEU-Water: Nature Engineered Urban Design for Water Recycling and Reuse" project proposal

I. Ziele

Gesamtziel des Vorhabens

Der steigende Wasserbedarf und der Klimawandel erhöhen weltweit die Risiken für die Wassersicherheit. Angesichts anhaltender Dürren und zunehmender Überschwemmungen ist die Wassersicherheit in der südafrikanischen Westkap-Provinz zu einem kritischen Thema geworden. Die Wassernachfrage in der Region übersteigt bereits das verfügbare Angebot, was zu einer erhöhten Belastung der vorhandenen Wasserressourcen führt und den Bedarf an alternativen Quellen verdeutlicht. Die dezentrale Bewirtschaftung von Wasserressourcen kann der Region neue Wasserquellen erschließen und innovative Wege zur Bewältigung der Auswirkungen des Klimawandels aufzeigen. Darüber hinaus tragen dezentrale, naturbasierte Wasserwiederverwendungssysteme zur ökologischen Nachhaltigkeit bei, indem sie die direkte Einleitung von Regenwasser und unbehandeltem Abwasser minimieren. In Kapstadt ist bereits ein zentraler Ansatz für die Abwasseraufbereitung und -wiederverwendung geplant, bei dem bis 2028 das Abwasser aufbereitet und die Wasserversorgung aufgestockt wird. Ein solcher Ansatz kann die Gesamtbelastung der Wasserressourcen verringern, erfordert jedoch erhebliche Investitionen in die Abwasserbehandlung und die Wasserversorgungsnetze. Durch die Anwendung der Prinzipien der wassersensiblen Stadtentwicklung (WSUD) will das NEU-Water Projekt die Herausforderung des Wasserrecyclings in einer lokalisierten und ressourceneffizienten Weise identifizieren und angehen. Das Projekt zielt darauf ab, dies in den dicht besiedelten und einkommensschwachen Stadtgebieten von Franschhoek zu demonstrieren, in denen es derzeit an einer angemessenen Versorgung mangelt. Dies soll durch Pläne, Entwürfe und Umsetzungen erreicht werden, die auf die Menschen und den Kontext abgestimmt sind und in Zusammenarbeit mit den lokalen Stadtentwicklungsprozessen integriert werden. Solche Lösungen können ein praktikabler Ansatz sein, um die Wassersicherheit zu verbessern und eine zuverlässige Wasserversorgung für Gemeinden, Landwirtschaft und Industrie in der Provinz Westkap zu gewährleisten. Das Gesamtziel für die Hauptphase des Projekts lautet

Pilotierung, Prüfung und Integration dezentraler, naturbasierter Lösungen für die Bewirtschaftung und Wiederverwendung von Regen- und Grauwasser als Ansatz für die Einbeziehung einer wassersensiblen Stadtgestaltung in die Stadtplanung in Südafrika

Bezug des Vorhabens zu den förderpolitischen Zielen

Die Initiative verbindet gezielte Lösungstests mit angewandter Forschung und Kapazitätsaufbau und fördert die Zusammenarbeit mit Regierungssystemen, lokaler Zivielgesellschaft und Unternehmern. Dieser kollaborative Ansatz gewährleistet die Eignung der Aktivitäten und die langfristige Nachhaltigkeit der Ergebnisse und spiegelt das Engagement für eine fundierte Entscheidungsfindung und effektive Umsetzung wider. Durch die Untersuchung des Potenzials naturbasierter Lösungen für die Wasseraufbereitung und die Integration von Konzepten der wassersensiblen Stadtentwicklung wird das Projekt einen Beitrag zum Themenbereich 2.2 Wasserinfrastruktur und -technologie leisten.

Wissenschaftliche und/oder technische Arbeitsziele des Vorhabens

In Anbetracht der Lücken bei der Bereitstellung von Dienstleistungen für die arme Bevölkerung in den Städten besteht das wissenschaftliche/technische Ziel des Projekts darin, Folgendes zu entwickeln

-

a) kontextbezogene Lösungen, die die Verschmutzung von Wasserströmen, die aus Siedlungen mit hoher Bevölkerungsdichte stammen, verringern können und die sich wirksam in den städtischen Raum integrieren lassen, indem sie multifunktionale Nutzungen ermöglichen und alternative Wasserquellen schaffen.
b) realistische Wege für die Annahme solcher Lösungen, begünstigt durch d das Monitoring der umgesetzten Lösungen, die Entwicklung von Wissensprodukten und Leitfäden sowie die Durchführung von Workshops zum Aufbau von Kapazitäten für verschiedene Interessengruppen.

Das Projekt setzt auf die Prinzipien der Dezentralisierung und angepasster Technologien, um multifunktionale, sozial integrative und nachhaltige Infrastrukturpläne und -konzepte zu erreichen.

II. Stand der Wissenschaft und Technik

Stand der Wissenschaft und Technik

In diesem Unterkapitel wird der aktuelle Stand von Wissenschaft und Technik für die Gesamtanwendung des Projekts NEU-Water kurz zusammengefasst. Der Stand der Technik ist auf alle Arbeitspakete anwendbar.

Das an der Südspitze des afrikanischen Kontinents gelegene Südafrika hat eine Bevölkerung von etwa 60 Millionen Menschen, von denen 67 % in städtischen Gebieten leben. Die Fortschritte bei der Verwirklichung des Ziels Nr. 6 für nachhaltige Entwicklung in Südafrika folgen einem globalen Trend mit kritischen Lücken im Abwassermanagement und der Wasserqualität. Laut den jüngsten Fortschrittsberichten zu SDG 6 werden nur 41 % der häuslichen Abwässer sicher behandelt und nur 52 % der Gewässer haben eine gute Wasserqualität (gemäß den Definitionen von SDG 6). In nicht kanalisierten Gebieten werden 72 % der häuslichen Abwasserströme in Südafrika durch Klärgruben und damit verbundene Fäkalschlamm-Management-Systeme (FSM) behandelt (UN Water, 2023). Während FSM den hoch konzentrierten, klein-volumigen häuslichen Abwasserstrom ("Schwarzwasser") behandelt, bleibt der gering verschmutzte, großvolumige Abwasserstrom ("Grauwasser") in nicht versorgten Gebieten unbehandelt. Etwa 80 % der kommunalen Abwasserströme aus häuslichen und institutionellen Quellen können als Grauwasser betrachtet werden. Nur dort, wo es kanalisierte Abwassersysteme gibt, wird Grauwasser gemeinsam mit Schwarzwasser behandelt und nach der Behandlung entsorgt (Oteng-Peprah, Acheampong, & deVries, 2018). In nicht kanalisierten Siedlungen wie Kleinstädten, stadtnahen Gebieten und informellen Siedlungen wird Grauwasser jedoch meist in die Umwelt oder in die Regenwasserkanäle eingeleitet. Mehrere Forschungsinitiativen haben bewiesen, dass die Trennung von Schwarz- und Grauwasser am Ort ihrer Entstehung und Multibarrieresysteme bei der Bereitstellung von behandeltem Grauwasser als alternative Ressource die Nachfrage nach bestehenden städtischen Wasserquellen erheblich reduzieren und damit den Wasserstress verringern sowie die Wassersicherheit und die Gesundheit von Mensch und Umwelt in informellen Gebieten verbessern können.

WSUD integriert das ganzheitliche Management des städtischen Wasserkreislaufs in die Planung und Gestaltung der gebauten Form einer städtischen Umgebung (Wong, 2006). Dabei werden alle Teile des städtischen Wasserkreislaufs berücksichtigt und die Funktionalität der Wasserwirtschaft mit den Grundsätzen der Stadtgestaltung kombiniert (Hoyer, Dickhaut, Kronawitter, & Weber, 2011). Mehrere Studien haben die Relevanz von WSUD als Schlüsselansatz zur Bewältigung des drohenden städtischen Wasserstresses und der Wasserunsicherheit hervorgehoben. WSUD ist kein neues Konzept. In den letzten zehn Jahren, wurde es weltweit in Gebieten mit Wasserstress untersucht, umgesetzt und diskutiert, insbesondere auch in Südafrika Zu den WSUD-Optionen gehören nachhaltige Technologien für das Wassermanagement, neue Technologien für das Recycling anthropogener Wasserströme, neue architektonische Entwürfe für die Landnutzung und neue Entwürfe für die Nutzung natürlicher Wasserströme (Payne, et al., 2015). Die Anwendung von WSUD in Südafrika erfolgte in erster Linie im Bereich des Hochwassermanagements, und es gibt einige Fallstudien im Westkap, wie z. B. im Cape Flats Aquifer zur Bewältigung von Regenwasserströmen und Infiltration (Mclachlan, et al., 2023).

Herkömmliche Systeme für die Bewirtschaftung von Wasserressourcen und die Wasseraufbereitung haben in der Vergangenheit einen linearen Ansatz verfolgt: Quelle, Aufbereitung, Verteilung, Sammlung, Behandlung und Entsorgung (Armitage et al., 2013).

Diese Systeme sind meist zentralisiert und umfassen in der Regel große, ressourcenintensive zentrale Aufbereitungsanlagen mit teuren Wartungssystemen. Die rasante Urbanisierung in Entwicklungsländern wie Südafrika erfordert Wassersysteme, die zirkulär, dezentral, skalierbar, kosteneffizient und einfach zu warten sind (Morgan, 2019). WSUD ist ein Wassermanagementansatz, der Regenwasser, Grundwasser und Wasserversorgung sowie Abwassermanagement integriert, um die Umweltbelastung zu minimieren und die Ästhetik und den Erholungswert zu verbessern (Ahmed et al., 2022). Noch wichtiger ist, dass WSUD dazu dient, natürliche hydrologische Verhalten von Einzugsgebieten zu erhalten, die Wasserqualität von Oberflächen- und Grundwasser zu schützen und den Bedarf an Trinkwasser aus dem konventionellen Wasserversorgungssystem zu minimieren (Charlesworth et al., 2003). Naturnahe Lösungen wie Pflanzenkläranlagen, Rückhaltebecken usw. können, wenn sie dezentral angewandt werden, die Schadstoffbelastung in den natürlichen Wasserströmen verringern und als alternative Wasserquelle dienen, die den umliegenden Gemeinden zugutekommt. Das NEU-Water Projekt zielt darauf ab, Umsetzungsprozesse für diese Systeme zu entwickeln, die die Prinzipien von WSUD nutzen, Multifunktionalität fördern und natürliche Wassereinzugsgebiete erhalten, so dass sie an die Bedürfnisse und Herausforderungen der südafrikanischen Region angepasst sind.

Auch das Recycling von Regen- und Grauwasser ist kein neues Konzept. Wie von Angelakis, et al. (2018) erläutert, reicht die Praxis der Wasserwiederverwendung Jahrhunderte zurück. Derzeit wird die Wiederverwendung von Wasser in der urbanisierten Welt nur selten praktiziert. Selbst im europäischen Kontext werden weniger als 5 % des gereinigten Abwassers verwendet, und die Menge macht weniger als 0,5 % der gesamten Süßwasserentnahme aus (EU, 2021). Obwohl mehrere Studien die Vorteile des Recyclings sowohl in wirtschaftlicher als auch in landwirtschaftlicher Hinsicht aufgezeigt haben, gibt es nur wenige erfolgreiche Beispiele für das Recycling und die Wiederverwendung von Grau- und Regenwasser in informellen Siedlungen und dichten städtischen Gebieten weltweit, insbesondere im südlichen Afrika. Höhere Wartungskosten, die Notwendigkeit komplexer betrieblicher Fähigkeiten, fehlende Eigenverantwortung der Gemeinschaft und mangelnde Akzeptanz wurden als mögliche Gründe genannt (Maquet, 2020). Die Aktivitäten des NEU-Water-Projekts sind darauf ausgerichtet, diese Herausforderungen anzugehen, um den Änderungsprozess zur Nachhaltigkeit zu gewährleisten.

Zu den WSUD-Optionen gehören nachhaltige Technologien in der Wasserwirtschaft, neue Technologien im Bereich des anthropogenen hydrologischen Flussrecyclings, neue architektonische Entwürfe in der Flächennutzung und neue Entwürfe in der natürlichen hydrologischen Flussernte (Payne, et al., 2015). Während die Sammlung, Speicherung und Wiederverwendung von Regenwasser in mehreren Städten als wirksamer und finanziell machbarer Schritt zur Verringerung des Abflusses und der Verschmutzung anerkannt wurde, ist die praktische Anwendung des Abwasserrecyclings auf einige wenige Fälle beschränkt. Wie in der folgenden Abbildung dargestellt, wurden weltweit mehrere Instrumente für die Bewirtschaftung von Regen- und Niederschlagswasser eingeführt.

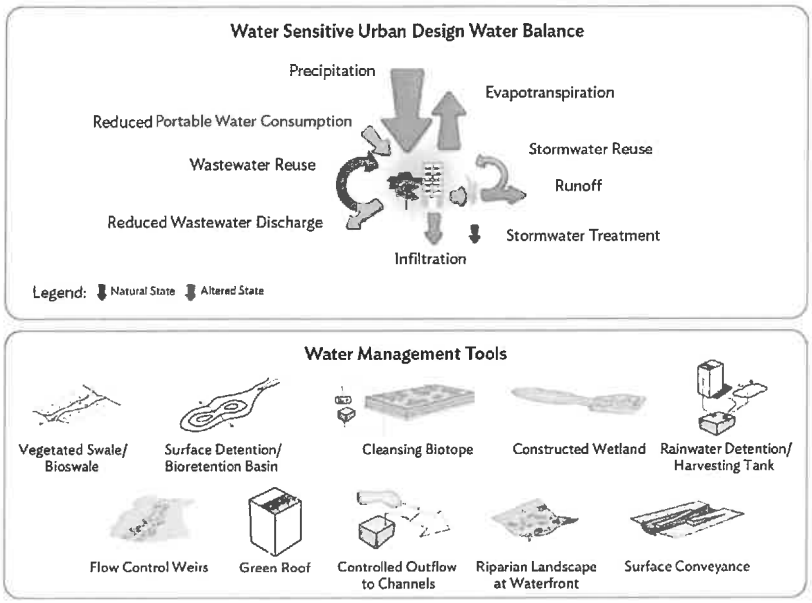

Figure 1: A. Hoban and T.H.F. Wong. 2006. WSUD Resilience to Climate Change

Sowohl Recycling als auch WSUD sind Konzepte, die derzeit in der Region Westkap breit diskutiert werden. Mit der Kapstädter Wasserstrategie "Our Shared Water Future" hat sich die Stadt verpflichtet, bis 2040 wassersensibel zu werden (City of Cape Town, 2020). Das kürzlich geplante groß angelegte Wasserrecyclingprojekt in Kapstadt und die langjährigen Erfahrungen mit dem Abwasserrecycling in Namibia zeigen die Notwendigkeit und das Engagement für Wasserrecycling in der Region. Die Erfahrungen mit nachhaltigen Stadtentwässerungssystemen (SUDS) und die vorgeschlagene Produktion von aufbereitetem Wasser dienen größtenteils Gebieten, die bereits Zugang zu wasserwirtschaftlichen Dienstleistungen haben. In informellen und dicht besiedelten Gebieten besteht jedoch eine große Lücke bei der Erbringung von Dienstleistungen, insbesondere bei der Regenwasser- und Grauwasserbewirtschaftung. Das NEU-Water-Projekt schlägt einen alternativen Ansatz vor, der den Prinzipien nachhaltiger und angemessener Lösungen folgt und speziell auf solche Siedlungen ausgerichtet ist.

Die rasche und unzureichend geplante Urbanisierung in Afrika und die jüngsten Fälle von hohem Wasserstress, wie die Wasserkrise am Day Zero 2017-18 in Kapstadt, haben die Notwendigkeit eines neuen Ansatzes für das städtische Wassermanagement verstärkt. Es wurden mehrere Studien zur Anpassung von WSUD durchgeführt, darunter auch die Arbeit von Projektpartnern (Beispiele: BMBF-gefördertes Blue Green Streets Project - HafenCity Universität und Report - Water Sensitive Urban Design (WSUD) for South Africa: Framework and guidelines developed by the University of Cape Town). Zwar gibt es bereits einige Erfahrungen mit der Regenwasserbewirtschaftung im Rahmen von WSUD, aber die Einbeziehung von Recycling und Wiederverwendung durch WSUD könnte eine weiter zu untersuchende Strategie sein, da sie das Potenzial hat, Städte vor künftigen Herausforderungen der Wassersicherheit zu schützen und den Gemeinden zahlreiche Vorteile zu bieten.

In Südafrika fallen in informellen Siedlungen erhebliche Mengen komplexer Abwässer an - typischerweise eine Mischung aus menschlichen Ausscheidungen, Grauwasser und

Regenwasser, die direkt in verschiedene Wassersysteme fließen (Muanda et al., 2020) und eine Reihe von bedenklichen Chemikalien (CEC) enthalten. Es wird geschätzt, dass in den informellen Siedlungen Südafrikas täglich durchschnittlich über 490000 m³ Grauwasser anfallen und entsorgt werden (Carden, 2006). Dieses weggeworfene Wasser bildet oft einen Strom von Oberflächenabfluss, der mit Schwarzwasser aus Nachtböden und anderen allgemeinen festen Abfällen kombiniert wird (Abia et al., 2017; Winter & Mgese, 2011; Winter et al., 2010). Diese Kombination aus dem Abfluss von Abwasser und der Einleitung von unerwünschtem Wasser lässt sich aufgrund des hohen organischen Gehalts, der in den Fluss gelangt, am besten als dunkler Geysir-Schatten beschreiben. Dies führt zu einer Mischung aus Oberflächenwasserabfluss mit erhöhten Konzentrationen von Nährstoffen und CECs wie pharmazeutischen Wirkstoffen, Medikamenten und antibiotikaresistenten Bakterien, die häufig in nahe gelegene Gewässer und Flüsse gelangen (Abia et al., 2018; Dalu et al., 2017). Frühere Studien haben gezeigt, dass Oberflächenwasser aus informellen Siedlungen in der Regel stark verschmutzt ist, mit CSB-Konzentrationen zwischen 1500 und 8500 mg/L, Öle und Fette zwischen 30 und 2000 mg/L, Leitfähigkeiten zwischen 50 und 1500 mS/m und pathogene Keime enthält, die mit denen von Rohabwasser vergleichbar sind (Carden et al., 2007; Armitage et al., 2009). Ohne eine angemessene Behandlung stellen Oberflächenwassereinleitungen aus informellen Siedlungen daher eine erhebliche Gefahr für die Qualität des verfügbaren Süßwassers dar und haben negative Auswirkungen auf die Gesundheit von Menschen und Umwelt.

Aus diesen Gründen hat sich das NEU-Water Projekt entschieden, sich auf die Vorteile und Möglichkeiten von naturbasierten Lösungen zu konzentrieren, die integraler Bestandteil effektiver WSUD- und SUD-Prinzipien und -Praktiken sind. Biofiltrationssysteme stellen eine der vielversprechendsten naturbasierten Lösungen (NBS) zur Entfernung von Umweltschadstoffen dar (Oral et al., 2020). Studien haben gezeigt, dass Biofilter Schadstoffe, einschließlich organischer und anorganischer Stoffe, Nährstoffe und Krankheitserreger, aus kontaminiertem Wasser entfernen können (Saeed und Sun, 2012), ähnlich den Prozessen, die in natürlichen Feuchtgebieten ablaufen (Roy-Poirier et al., 2010). Dazu gehören Sedimentation, Filtration, chemische Ausfällung und Adsorption, mikrobielle Interaktionen und Aufnahme durch die Vegetation (Kadlec und Wallace, 2008). Das Ausmaß, in dem diese Prozesse Schadstoffe entfernen und/oder reduzieren, hängt jedoch neben anderen Faktoren von der Art des verwendeten Biofilters, der Wassermenge und -qualität sowie den lokalen Klimabedingungen ab (Oral et al., 2020).

Die Literatur weist auf mehrere Wissenslücken in der Biofiltrationsforschung hin. Erstens: Obwohl die Forschung zeigt, dass Biofilter die Nährstoffe im Abfluss reduzieren und die Wasserqualität verbessern können, gibt es nur wenige Untersuchungen darüber, inwieweit diese Systeme in der Lage sind, die Wasserqualitätsziele unter Bedingungen zu erreichen, wie sie in informellen Siedlungen zu finden sind. Zweitens: Obwohl Studien darauf hinweisen, dass Biofilter das Potenzial haben, die Wiederverwendung von Ressourcen zu verbessern, gibt es nur wenige Untersuchungen darüber, inwieweit Biofilter die Anforderungen an die Wiederverwendung von Wasser unter Bedingungen erfüllen können, wie sie in informellen Siedlungen anzutreffen sind. Einige neue Studien haben gezeigt, dass Biofilter mit anderen technischen Lösungen wie anaeroben Prozessen integriert werden können, um die strengen Vorschriften für die Wasserwiederverwendung zu erfüllen (Kisser et al., 2020). Bisher wurde jedoch nicht versucht, das gereinigte Abwasser aus informellen Siedlungen trotz der hohen Nährstoffbelastung zurückzugewinnen und/oder wiederzuverwenden, da Bedenken bestehen,

dass erhöhte CSB-Konzentrationen und das Vorhandensein von Krankheitserregern die menschliche Gesundheit beeinträchtigen könnten (Carden et al., 2007; Armitage et al., 2009).

Die jüngste Forschungsarbeit, die im "Water Hub" in Franschhoek, Südafrika, durchgeführt wurde, verwendet Rohwasser, das aus dem Stiebeuel-Fluss entnommen wird (weitere Erläuterungen in WP2). Das Team der UCT zeigte, dass bepflanzte und unbepflanzte Biofilterzellen aus großen Steinen die NH_3 und PO^{3-}_4 -Konzentrationen im kontaminierten Wasser unter verschiedenen Wasserqualitätsbedingungen um bis zu 92 % senken. Das entnommene Wasser umfasste sowohl Regenwasser als auch Grauwasser aus der informellen Siedlung Langrug und Teilen der Wohngebiete von Groendal. Die geringen Schwankungen zwischen den Zellen lassen darauf schließen, dass die Pflanzenabsorption nur in geringem Maße für die Beseitigung von Schadstoffen verantwortlich war. Mit Ausnahme der Pfirsichkernzellen reduzierten alle anderen Zellen effektiv die N- und EC-Konzentrationen durch eine Kombination von simultaner Nitrifikations- und Denitrifikationsprozessen (SND), so dass sie schließlich die Mindestanforderungen an die Wasserqualität für Bewässerungszwecke erfüllten und den südafrikanischen Wasserqualitätsrichtlinien für aquatische Systeme zur Einleitung in Binnengewässer (Süßwasser) entsprachen. Weitere Untersuchungen zum Pflanzenwachstum wurden durchgeführt. Labornormen und Vergleiche mit lokalen Supermarktprodukten zeigen, dass die Qualität der aufeinanderfolgenden Ernten weitgehend den Erwartungen entsprach (Winter, Mgese, Nicklin, & Maraj, 2023).

Bisherige Arbeiten des Antragstellers

Hafencity Universität Hamburg (HCU) beschäftigt sich mit der Zukunft von Großstädten und verfolgt dabei einen systematischen transdisziplinären Forschungsansatz. Das Fachgebiet "Umweltgerechte Stadt- und Infrastrukturplanung" (USIP) arbeitet interdisziplinär an den Schnittstellen zwischen technischer Infrastrukturplanung (z.B. Wasserwirtschaft) und Raum-, Stadt-, Landschafts- und Freiraumplanung. Die Abteilung arbeitet daran, nachhaltige Strategien für Klimaschutz und Klimaanpassung zu entwickeln und umweltplanerisches Wissen effektiv und innovativ umzusetzen.

Das HCU-Team hat in den letzten zehn Jahren an dem Konzept der wassersensiblen Städte gearbeitet. Im Rahmen des 2011 von der EU geförderten Projekts "SWITCH - Managing Water for the City of the Future" wurde ein Handbuch zur wassersensiblen Stadtgestaltung entwickelt. Das Handbuch beschreibt die Grundsätze, Techniken und Beispiele für die Integration einer wassersensiblen Stadtgestaltung mit besonderem Schwerpunkt auf der dezentralen Regenwasserbewirtschaftung. Die Konzepte der dezentralen Regenwasserbewirtschaftung wurden im Projekt "RegenInfraStrukturAnpassung (RISA)" mit Partnern der Behörde für Stadtentwicklung und Umwelt Hamburg (BSU) und Hamburg Wasser (HW) im Rahmen der Arbeitsgruppe/Arbeitspaket "Stadt- und Landschaftsplanung" des Kooperationsprojekts weiter untersucht. Im Rahmen dieses Projektes wurde eine systematische Analyse der bestehenden Planungs- und Umsetzungsinstrumente (u.a. Stadt- und Landschaftsplanung auf verschiedenen Planungsebenen, Baugenehmigungsverfahren, Grünordnungsplanung, informelle Instrumente) für den Umgang mit Regenwasser - fördernd und hemmend - in Hamburg durchgeführt.

Derzeit leitet die Abteilung das vom BMBF geförderte Projekt BlueGreenStreets (Phase 2), in dem die Wirksamkeit von (bestehenden) Planungsinstrumenten und -regelungen zu grüner städtischer Infrastruktur, Siedlungswasserwirtschaft, Sanierungsmanagement von Straßen

und Kanälen sowie Verkehrs- und Freiraumplanung untersucht, bewertet und weiterentwickelt werden soll. Durch innovative Konzepte wie Retentionsbegrünungen und Baumrigolen wird der multifunktionale Einsatz von WSUD-Maßnahmenarten erforscht. Die Anwendbarkeit dieser Technologien und ihre Integration in die Politik und die kommunalen Verwaltungsprozesse in Deutschland werden ebenfalls untersucht.

Mit dem Masterstudiengang Ressourceneffizienz in Architektur und Planung (REAP) bietet der Fachbereich USIP jungen Studierenden eine Lernmöglichkeit zum Thema nachhaltiges Wassermanagement. Das REAP-Programm läuft seit über 10 Jahren, und richtete sich hierbei überwiegend an internationalen Studierende. Die Kombination aus der Lehre von Technologien und der Erforschung des sozioökonomischen Kontextes, in dem städtische Dienstleistungen erbracht und verwaltet werden, ist das Alleinstellungsmerkmal dieses Programms. Die Erkenntnisse aus dem NEU-Water-Projekt werden direkt in den Lehrplan des REAP-Programms einfließen.

Hamburger Stadtentwässerung AöR (HSE) bildet zusammen mit den Hamburger Wasserwerken GmbH (HWW) den Gleichordnungskonzern HAMBURG WASSER. Die Hamburger Stadtentwässerung ist das öffentliche Wasserentsorgungsunternehmen in Hamburg, das Abwasserdienstleistungen (Kanalisation und Abwasserbehandlung) für mehr als zwei Millionen Kunden in Norddeutschland erbringt. Die HSE ist für die Niederschlagswasserentwässerung in Hamburg sowie einer Reihe von Gemeinden in der Metropolregion Hamburg zuständig. Die Gruppe Wasserwirtschaft und Quartiersentwicklung in der Stabsstelle Infrastrukturentwicklung befasst sich mit einer angepassten Bewirtschaftung von Regenwasser in städtischen Gebieten. Bereits 2007 wurde für Hamburg das Kompetenznetzwerk Regenwasser gegründet. Eine stete Ausweitung der Aktivitäten in diesem Bereich erfolgte mit dem langfristig angelegten Kooperations-Projekt Regeninfrastrukturanpassung (RISA). RISA verfolgt das Ziel, Ressourcen über Institutionen hinweg zu bündeln, innovative Ansätze für neue Herausforderungen im Regenwassermanagement zu entwickeln und diese umzusetzen. Des Weiteren unterstützt die HSE und HWW im Rahmen von Betreiberpartnerschaften die Wasserversorger in Jordanien, Tansania, Südafrika und der Ukraine bei der Verbesserung der Wasserversorgungs- und Abwasserentsorgungsprozesse. Hamburg Wasser wird das Projekt unterstützen, indem es die Zusammenarbeit mit Versorgungsunternehmen und staatlichen Institutionen leitet.

URBANWaters Consulting GmbH (UWC) berät weltweit Kommunen, Stadtverwaltungen und Ministerien im Ausbau der kommunalen Abwasser- und Sanitärversorgung und Stadthygiene sowie im Ausbau der institutionellen Kapazitäten für eine nachhaltiges Wassermanagement. Die Beratungsleistungen die Erstellung von Investitionsplänen, städtische Masterplänen, nationale Richtlinien und Guidelines, ingenieurtechnische Planung und Umsetzungsbetreuung sowie Trainingsmaßnahmen von der Ministerium- bis zur Betriebs- und Nutzerebene. Inhaltliche Schwerpunkte sind die Themen lokal angepasstes dezentrales Wasser- und Abwassermanagement mit Einsatz von naturnahen und gering technisierten Lösungen zur Behandlung und Wiederverwendung sowie deren Integration in die Stadtplanung und Bereitstellung kommunaler Daseinsvorsorge.

In den letzten 5 Jahren hat UWC zusammen mit lokalen Partnern in Länder wie Tansania, Uganda, Mali, Bangladesch, Laos, Philippines für knapp 1.0 Millionen Menschen Infrastrukturen für die Abwasser- und Fäkalschlammbehandlung geplant und umgesetzt. Für Städte wie Malindi/Kenia oder Mazar-e-sharif/Afghanistan wurden strategische Masterpläne in enger Zusammenarbeit mit den lokalen Stadtverwaltungen erstellt. In 2022 führte die UWC

ein mehrtägige Trainingsprogramm durch für Vertreter von Wasserver- und Entsorgungsbetrieben, Privatsektor und Zivilgesellschaft allein zum Thema Einsparung und Wiederverwendung von Wasser/Abwasser in Kommunen und Industrie.

Das Team des **Future Water Institute an der University of Cape Town (UCT)** leistete Pionierarbeit bei der Erforschung und Umsetzung von wassersensiblen Städten in der Region und hat eine Community of Practice (CoP) zu diesem Thema entwickelt und geleitet. UCT war einer der Hauptakteure bei Veröffentlichungen wie "Water Sensitive Urban Design (WSUD) for South Africa: Framework & Guidelines". Unter den verschiedenen laufenden Aktivitäten des UCT-Teams ist die Studie zur Bewertung der Leistung von Biofilterzellen wahrscheinlich diejenige, die am stärksten mit dem NEU-Water-Projektkonzept verbunden ist. Das UCT-Team hat die Forschungsaktivitäten in der alten Kläranlage in Franschhoek, die als "The Water Hub" bezeichnet wird, als Reallabor geleitet, in dem bereits einige Studien zu verschiedenen Elementen naturbasierter Lösungen durchgeführt wurden.

Stellenbosch Municipality ist die lokale Gemeinde, die die Städte Stellenbosch, Franschhoek und Pniel sowie die umliegenden ländlichen Gebiete in der Provinz Westkap in Südafrika verwaltet. Die Abteilung für Infrastruktur ist für mehrere Dienste verantwortlich, einschließlich, aber nicht beschränkt auf Wasserwirtschaft; Abfallwirtschaft; Straßen und Regenwasser.

Die 2007 gegründete **Ardhi University (ARU)** entwickelte sich vom Survey Training Center (1956 – 1972) zum Ardhi Institute (1972 – 1997) und dann zum University College of Land Architectural Studies der University of Dar es Salaam (1997 – 2007), und letztendlich zu einer vollwertigen Universität. Die School of Spatial Planning and Social Science (SSPSS) ist eine der wichtigsten vier der Universität, und hat mehrere Projekte durchgeführt, die sich mit den Auswirkungen des Klimawandels, der Eindämmung und Anpassung sowie Resilienzstudien in städtischen Siedlungen in Tansania befassten. Die HCU arbeitet seit über 10 Jahren mit Ardhi zusammen, unteranderem im Bereich Regenwasserbewirtschaftung.

III. Work Plan // Arbeitsplan

(in englischer Sprache)

Strukturplan

1. Capacity Building

(Lead: HCU; Co-lead: HSE)

1.1 Sensitization & decision support on WSUD measures

- Toolkit on WSUD measures appropriate for the South African context including guidelines and experiences relevant for the South African Context
- Workshop on promoting business concepts supporting water security and recycling

1.2 Water Operator Partnership - Exchange between German & South African Water Utilities

- Diagnostic assessment & interventions on infrastructure improvements for increasing water security
- Frameworks for implementation, operation and monitoring of WSUD measures

2. Demonstration of NEU-Water Concept

(Lead: UCT; Co-lead: HCU)

2.1.: Demonstration – Water Hub

- Monitoring systems for greywater and stormwater treatment downstream of the community

2.2 Multi-functional, neighbourhood integrated solution

- Piloting and assessment of a neighbourhood integrated NBS for greywater and stormwater treatment at Franschhoek, South Africa

2.3 Stormwater Management in Institutions

- Monitoring systems fir decentralized stormwater management systems at Dar es Salaam

3. Applied Research

(Lead: HCU; Co-lead: UCT)

3.1 Assessment of Technical concepts

3.2 Enabling environment and Urban Planning

4. Project Management (Lead: HCU)

Gantt Chart // Balkenplan

Added as Annex 1

Objectives, activities, resource and milestone planning

The following tables show the objectives, expected results, methods/solution paths, activities/tasks/sub-tasks (separated by partners) for each work package with time periods, risks and essential prerequisites for the fulfilment of the work, milestones (in terms of content and time) and the project-related resource planning and milestone planning.

WP 1 Capacity Building

WP1.1.: Sensitization & decision support on WSUD measures

Task 1.1 builds on the existing initiatives in Cape Town and the Western Cape region, such as the WSUD Community of Practice (CoP), by developing decision support tools and collating case studies relevant to southern African. The tools are planned to be hosted and disseminated via existing knowledge management platform such as www.sswm.info. The toolkit is planned as a collection of factsheets on WSUD examples that showcase water reuse and case studies from international, southern African or comparable contexts. The tool is envisaged to be an easy-to-use online compendium. A comparable example of wastewater management can be found on the links: NaWaTech or Sanitation Systems compendium.

Learning from the tool will be developed as a training workshop targeted at private entrepreneurs (from the southern African region) who are interested in developing businesses and products relevant to urban water security and recycling. The HCU will lead the development of tools with the support of project partners especially UCT and Hamburg Wasser. Workshops, knowledge management. Consultations with local stakeholders (entrepreneurs, water experts as well as marketing of the training activities) shall be co-ordinated between HCU and UCT.

Responsible	Prof. Dr.-Ing. Wolfgang Dickhaut, Project lead HCU
Team	• Ajith Edathoot • NN, Researcher • NN, Researcher
Co-operation Partner NEU-Water	A/Profs Kevin Winter & Kirsty Carden, Project co-leads, Future Water Institute, UCT NN, HSE NN, Viva con Agua Andreas Schmidt, Urban Waters Consulting
Co-operation Partner External	External experts (regional and thematic) shall be identified and invited for consultations
Goals	Decision support on selection and use of WSUD measures for stormwater and greywater management and reuse in South African context
Expected results	A toolbox including technical information and case studies on applications and experiences will be disseminated among the local entrepreneurs for further application.
Methods / Solutions	• Systematic literature analysis using research databases. • Research of (research) project reports; interviews of stakeholders at potential case study sites and technical experts • Interactive Workshops
Activities/tasks/ subtasks	1. Literature studies and qualitative analysis by thematic focus (II-2024 and IV-2025) HCU and UCT

(separated by partners) with time periods	2. Interviews: Conducting and qualitatively analysing expert interviews (I-2025 – II 2025): HCU and UCT 3. Preparation of the tools: Consolidation and preparation of the technical compendium report (III-2025 – III 2026): HCU and UCT 4. Content development and delivery of workshop (II - 2026- II -2027): UCT+ all partners
Preconditions and essential requirements for the fulfilment of the work	Not specific
Milestones (in terms of content and time)	• Ms1.1.1: Report: Technical Compendium of WSUD measures for addressing water security risks, applicable in the project context (II-2025); • Ms1.1.2: Collection of case studies of application of NBS for addressing water security risks, applicable in the project context (IV-2026) • Ms1.1.3: Workshop on promoting business concepts supporting water security and recycling through application of NBS (I-2027)

Partner	**Person months**	**Person known (= Name), Person unknown, not yet decided (= NNZ); Person unknown, not yet hired (= NN)**

UCT	6	• Dr. Victor Parry
HSE	3	• N.N., Project team
UWC	0.5	• Andreas Schmidt

WP1.2.: Water Operators' Partnership

Water Operators' Partnerships (WOPs) are collaborative arrangements or structured partnerships between water utilities or operators aimed at capacity building on a not-for-profit basis. The core element is the exchange of peer colleagues between the water operators in order to strengthen capacities and enhance performance. This will be beneficial for the utilities' ability to provide public services to residents. This sets off a positive cycle; when customers perceive that the quality of their services is increasing, payment morale rises, and the company will generate more revenue, thereby allowing further improvement.

In this research project, WOP is used as capacity-building tool in the field of stormwater and greywater management and includes a peer-to-peer partnership with the Stellenbosch Municipality. The partners plan to have a broader scope of action and focus on the people in the municipality.

The methodical components of the WOP are as follows:

1. Fact-Finding Mission
2. monthly professional online meetings with peer colleagues
3. at least one on-site visit per year with 2-4 people
4. job shadowing in Hamburg for partners from South Africa.

In the initial phase, technical and personal data will be exchanged in the working groups on Water Sensitive Urban Design (WSUD) consisting of representatives from HSE and Stellenbosch Municipality to facilitate acquaintance and develop an understanding of the process of nature-based and decentralized solutions as well as on the different issues, chances and challenges linked to this topic in Stellenbosch. To structure and enhance the information exchanges, various tools will be utilized, such as a questionnaire and stakeholder analysis. Following this initial data exchange and personal discussions, peers from the partner institutions will be identified and the draft agenda for the first on-site workshop, the Fact-Finding Mission (FFM), will be derived.

As part of the FFM, HSE plans to travel to South Africa to engage in detailed discussions with their partners regarding challenges, potential opportunities, and needs in the field of WSUD and water reuse. The FFM is intended to be kept open to respond to ongoing discussions and requirements. The focus will be on implementing nature-based and decentralized solutions, as well as addressing operational and monitoring needs.

Within peer-to-peer knowledge sharing between the Stellenbosch municipality and Hamburg, advances will be made through the co-development of improved management and adaptation to water security. Therefore, a diagnostic assessment on selected infrastructure will be conducted and the option of optimization of infrastructure analysed. If required, it is also possible to involve other stakeholders from Hamburg, such as the Hamburg Environmental Agency (BUKEA), in order to establish further contact between the peer colleagues. Together with the Stellenbosch Municipality, a framework for the implementation, operation and monitoring of WSUD and water reuse is carried out using results from WP1.1, adapting experiences from Hamburg to Stellenbosch's needs and available information. Through a needs assessment, key factors such as the demand for recycled water, the preferences of residents, and the feasibility of implementing water reuse strategies will be identified.

The HSE brings extensive experience in stormwater infrastructure management and collaboration and the involvement of stakeholders. This includes gathering information, facilitating communication among the parties involved, and defining the framework conditions.

This experience is intended to be applied within the WOP to assist partners in optimizing collaboration with stakeholders who often have limited exposure to rain-greywater management, such as school authorities and housing departments, by following participative approaches. Together with the Stellenbosch Municipality it is planned to work towards a change in residents' perception of water reuse.

HSE will host a 1-week job-shadowing workshop with specialist colleagues from the Stellenbosch municipal administration in Hamburg. They shadow the day-to-day work of the peers and gain an insight into the HSE's processes for implementing, managing and operating infrastructure measures and meetings with relevant stakeholders involved in WSUD activities in Hamburg, enabling them to understand the processes. The impact of job shadowing therefore goes far beyond a study visit. By integrating a WOP into this research project, WP 1.2. aims to build a resilient and sustainable water infrastructure in settlements through workshops, development of methods, collaboration between local partners, and the development of long-term strategies. The WOP establishes the framing of a sustainable capacity building out in WP1.2., the topics in the field of WSUD will be derived from the FFM and linked to the work done within WP1.1, WP2 and WP3. Therefore, it is planned to work

closely together with other project partners to combine innovative work on WSUD with sustainable capacity building.

Responsible	Dr. Pascale Rouault, Hamburger Stadtentwässerung AöR (HSE)
Team	1 Person: Project lead 1 Person: Engineer/Coordinator 2 Person: Engineer Specialist 1 Person: Specialist WOP Students
Co-operation Partner NEU-Water	Ajith Edathoot, Researcher, HCU A/Professor Kevin Winter and Kirsty Carden, Future Water Institute, UCT N.N. Project Staff, Viva con Agua
Co-operation Partner External	External experts (regional and thematic) shall be identified and invited for consultations
Goals	• Utilizing Water Operators' Partnerships (WOPs) as a collaborative and structured approach for a sustainable capacity building in stormwater and greywater management • Analysing the stakeholder in WSUD and water reuse infrastructure • Diagnostic Assessment: Evaluating selected infrastructure to identify areas for improvement. • Optimization of Infrastructure: Analysing options for optimizing existing infrastructure. • Framework Development: Collaboratively developing a framework for the implementation, operation, and monitoring of WSUD and water reuse. • Recommendations for knowledge transfer strategies and stakeholder collaboration • Identification of adaptation strategies • Combining innovative WSUD work with sustainable capacity building efforts (collaboration with other WP)
Expected results	• Strengthened municipality in water security through strategies on WSUD and water reuse measures • Adapted methods and strategy documents on WSUD and reuse
Methods / Solutions	• Interviews of stakeholders • Continuous exchange with peer-partners e.g. by monthly online meeting, FFM, on-site meetings • Development of approved methods • Capacity building and workshops
Activities/tasks/ subtasks (separated by partners) with time periods	• Data exchange between partner utilities (II-2024); • Preparing, conducting and qualitatively analysing interviews with partner utility and stakeholder (II-2024- III 2024): HSE and Stellenbosch • Fact-Finding Mission in SA (III-2024): HSE, Stellenbosch and HCU • Monthly professional online meetings with peer colleagues --> Analysing and optimizing WSUD infrastructure; optimizing collaboration with stakeholders (III-2024 –III-2026): HSE and Stellenbosch • Development of strategic methods (IV-2024- IV-2026): HSE and Stellenbosch • Preparation of the strategic report (IV-2026- III-2027): HSE and Stellenbosch • Content development and delivery of workshop (II-2027): HSE+ all partners

Preconditions and essential requirements for the fulfilment of the work	• LOI Stellenbosch Municipality and close collaboration
Milestones (in terms of content and time)	• Ms1.2.1: FFM -workshop: challenges, potentials, and needs in the field of WSUD in the Stellenbosch Municipality are identified (II-2024); • Ms1.2.2: selected infrastructure has been assessed and optimization proposed (III-2026) • Ms1.2.3: Knowledge transfer on collaboration with stakeholders (IV-2025) • Ms1.2.4: Report and Workshop on WSUD and reuse strategies concepts supporting water security and recycling of NBS (III-2027)

HSE	• 25	• Pascale Rouault with team

WP 2. Demonstration of NEU-Water Concept

Through field studies carried out during the initial phase, the project consortium has identified the following solutions which represents the principles proposed by the project and can be implemented and studied within the time and budget resources available during the main phase.

Concept	**Description**	**Planned activity**
A) Multi-functional Building/ Neighbourhood integrated solution	With this concept, developing & testing of WSUD measures for that can be applied in high-density social housing areas is planned. Decentralized management of mixed stormwater and greywater by treatment and reuse using multi-functional measures shall be demonstrated within the project. Potential reuse option: Urban gardening	WP 2.2
B) "End of the pipe' solution	Due to limitations such as land availability, in certain locations, WSUD measures can only be implemented away from the settlements. Through collection & treatment of greywater and stormwater (mixed) at a suitable downstream location with access to land and proximity to agriculture areas, remediation of pollution of surface water sources and production of water for agriculture can be achieved.	WP 2.1
C) Institutional solution	Large institutional areas such as schools, hospitals, etc. can be ideal locations for learning, demonstrating WSUD measures due to their visibility to the public. With adequate monitoring and management of measures such systems are easier to replicate while ensuring citizen participation.	WP 2.3

Relevance/ Replicability of Demonstrations: These three concepts have been chosen for implementation based as they can be used as typical references for infrastructure improvement projects in the municipality and within the wider southern African context.

With over 147,000 households in Cape Town and over 9000 in Stellenbosch, informal dwellings constitute a significant part of the population in most cities of Western Cape (Centre for Affordable Housing Finance in Africa, 2022). Housing projects are being developed through both public and private investments. The Groendal – Langrug area (B, Figure 2) is representative of similar locations and initiatives as it includes high density informal and low/middle income areas and proposed new housing development site. Interventions in this area can be further replicated in other areas of the province.

The location of the Water Hub – downstream from the urban settlement – is also an ideal study location as there are several informal settlements that are adjacent to water bodies in the region. For example, the dense settlements at Kayamandi (Stellenbosch) and Khayelitsha (Cape Town) have areas which are adjacent to rivers which have reported to be polluted. Nature based solutions can be integrated in the flood plain areas of such rivers for reducing the pollution load on the rivers.

Decentralized stormwater management is highly relevant especially in the context of Dar es Salaam as there are repeated localized flooding events in several parts of the city. The concept for institutional areas (in the current project: hospital and school) which includes both infrastructure and management measures can be further taken up by similar institutions in the city.

WP2.1.: Demonstration – Water Hub

The first Franschhoek wastewater treatment plant was constructed in the 1960s is non-functional since 2010 due to sewer diversion to a new treatment plant. The site, currently used for water and resource recovery research, was dubbed the 'Water Hub' by researchers in 2018. As illustrated in the figure below, Water Hub (D) is located the downstream to the settlements of Groendal (C) and Langrug (A). While toilets and ablution blocks are present in the settlements, significant amounts of greywater enter the stormwater drain and reaches the Stiebeuel river.

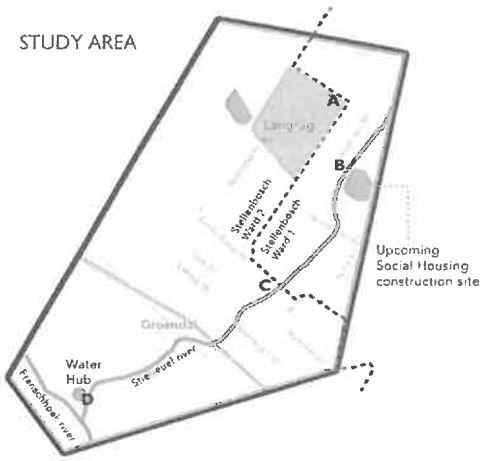

Figure 2: Study Area at Franschhoek (Source:HCU)

Through multiple projects (since the start of initial phase), UCT has developed the constructed wetland systems required for treatment studies at the Water Hub. The proposed activity 2.1 is aimed at developing the monitoring and treated water reuse studies using the six biofiltration cells (constructed wetlands).

Within this activity, the following modifications of the biofiltration systems are planned inorder to facilitate the research activities.

- Installation of instrumentation systems in the inlet and treatment areas for online measurement of key parameters such as flow and pollutant loads
- Modifications on the treatment through civil construction works to adapt the treatment trains for optimizing reuse systems.

The studies and results from the measurements will be shared with the community upstream to the river through innovative community engagement and awareness activities.

Responsible	A/Prof Kevin Winter, University of Cape Town
Team	Ms Emily Nicklin (PhD student), Environmental Science, UCT Ms Kalpana Maraj (PhD student), Chemical Engineering, UCT Dr Victor Parry (post-doc), Future Water Institute, UCT
Co-operation Partners NEU-Water	Ajith Edathoot, (N.N), Research Staff HCU Andreas Schmidt, Engineer, UWC (N.N), Project Staff, VcA Mr Shane Chandaka, Director of Infrastructure, Stellenbosch Municipality
Co-operation Partner External	Professor Neil Armitage, Civil Engineer and SUDs specialist Langrug Community Project
Goals	Characterisation of water quality in the river and its diurnal /seasonal variation Establish a high-resolution water quality reference dataset. Use a bioremediation treatment train to treat up to 20Kl of water per day being pathogen-free and capable of meeting health and safety standards for irrigation purposes and compliant with discharge standards. Building community awareness and measures for mitigating pollution at source
Expected results	A predictive model to determine the conditions and peak concentrations of contaminants in the river. Achieving water quality standards that meet South African discharge and irrigation guidelines
Methods / Solutions	Use high-resolution and continuous, near real-time deployment of multi-probes to monitor and measure water quality capturing diurnal fluctuations, rainfall events and seasonal change Anallysing water quality parameters in the biofiltration beds to determine the optimal performance of the biofiltration system with improvement in the management of the detention time and discharge.
Activities/tasks/ subtasks (separated by partners) with time periods	1. *Installation of monitoring systems in biofilters*: Installation of multiple monitoring probes and loggers in existing biofiltration beds to determine the optimal performance of the filtration system with improvement in the management of the detention time and discharge of high-quality treated water that is informed by decision-support system comprising data and models. (III-2024 - IV-2024); 2. *Calibration and verification of the data collection in biofilters:* Calibration and verification of the data collection from multi-probe devices and completion of real-time monitoring system for a selected range of parameters including chemicals of emerging concern such as drugs and pharmaceuticals ((IV-2024- II 2025);) 3. *Installation and calibration of inflow monitoring system:* Re-confirm monitoring points and parameters for measurement in Stiebeuel River based on existing datasets. Deployment of monitoring instrumentation in the river at the Water Hub - repeat sampling throughout year (includes level sensors for flow monitoring) (IV-2024-I-2025); 4. *Site preparation for agricultural reuse*: (I 2025 – III 2025) 5. *Post assessment adaptation of systems:* Adaptation of treatment trains and natural media informed by initial data results (I- 2026-II 2026) 6. Project dissemination workshop will be organized (I 2025, I 2026 and I 2027) to discuss the outputs of the demonstration with relevant stakeholders at Franschhoek, Stellenbosch Municipality and Western Cape Government on replication of technical concepts.

Preconditions and essential requirements for the fulfilment of the work	Development and testing of multi-probe devices (low-cost, low maintenance locally assembled instrumentation) Confidence in reliability, calibration drift and securing deployment in the river and treatment cells. Improved techniques and familiarity with HPLC chromatography for reality soil, plant and water analysis in quantifying CECs
Milestones (in terms of content and time)	Ms2.1.1 High-resolution data and model for determining the diurnal and seasonal condition of water to inform abstraction operations and management (IV-2025) Ms 2.1.2 Completion of monitoring systems at Water Hub site (IV 2026)

WP2.2.: Multi-functional, neighbourhood integrated solution

NBS solutions that can be integrated into building/neighbourhood design can be used as a tool not only for water management but also for generating awareness, improving urban landscapes as well as for augmenting water supply. The experience of a previous pilot project titled "Genius of Space" on greywater management in the informal settlement of Langrug was studied during the initial phase of NEU-Water. The existing service delivery gaps in wastewater and solid waste management as well as lack of continuity in expanding the project area have resulted in abandonment of most of the parts of the pilot project. During the initial phase, three potential locations were identified to plan or implement a building/neighbourhood integrated solution for decentralized, nature-based stormwater/greywater management – marked as A, B and C in Figure 2 (page 20). The demonstration of NEU Water concepts shall be limited to one location within the settlement due to the resource constraints.

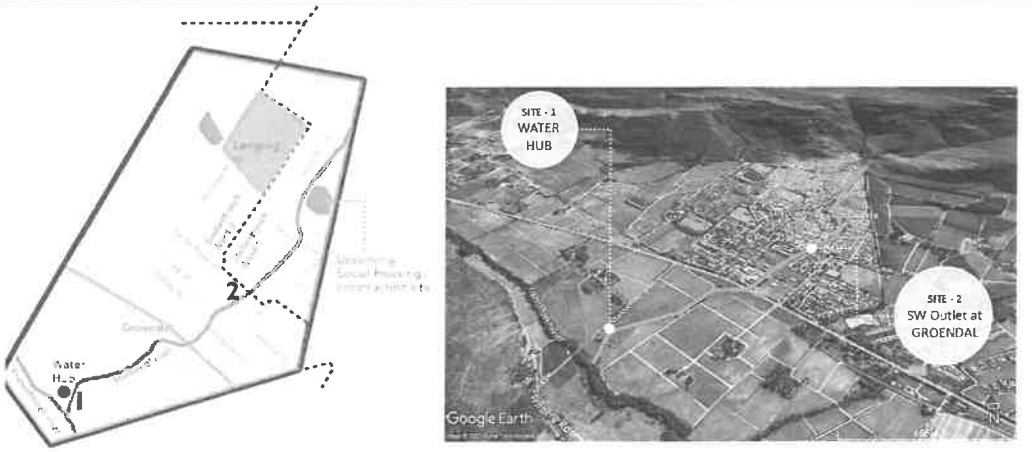

Figure 3: Proposed sites for demonstration at Franschhoek

Demonstration of treatment system within the settlement - Location 2: – The intervention is planned at the point where one of the stormwater drains enter the Steibeuel River. The stormwater drain collects rainwater and greywater from the upstream settlements and disposes to the river. Recent studies of the river water quality by UCT has indicated peaks of pollutant loads at 10am and 4pm which is directly associated to the greywater discharge . A biofilter based greywater treatment system willl be implemented at this location collecting a part of the outflow to reduce the pollution and prepare treated water that is fit for landscaping. Landscaping using treated water will be studied in the space adjacent to the river and the adjacent green spaces (public parks). Within the main phase a biofilter system capable of treating a part of the mixed greywater flow (approx. $6m^3$) shall be implemented here. The impact of treatment on the river water quality shall be studied within WP 3.1

Prototyping of building integrated solutions: Prototyping of a resource efficient model house is planned within the project to showcase building integrated concepts for stormwater & greywater reuse aligned to the NEU Water approach. The prototyping is aimed at research and dissemination and will be located on one of the existing buildings at the Water Hub. As a practical example, and stakeholders will find it easier to engage in furthering its development and in considering designs and plans for the proposed temporary housing scheme. The model house is conceptualized with cost affective, 'green' building materials and includes water, sanitation, drainage, and cost-effective technologies that will mitigate rising temperature resulting from climate change and poor environmental conditions. This house, will be used for near-real time data collection & analysis over a year representing seasonal and diurnal conditions.

Development of Planning Concept: The potential for integration of NEU Water concepts in the social housing projects shall be studied and a concept plan for the upcomg social housing areas shall be developed. According to the current spatial development plan of Stellenbosch Municipality, new developments are being planned at Stellenbosch, Klapmuts and at Franchshoek. The study shall assess these sites to identify WSUD measures that can be integrated in these settlements and the required institutional measures for sustainabilitywithin temporary & new housing projects shall be studied from an urban planning perspective using locations at Mooiwater, Stellenbosch and Klapmuts where planning processes as per the current spatial development plan.

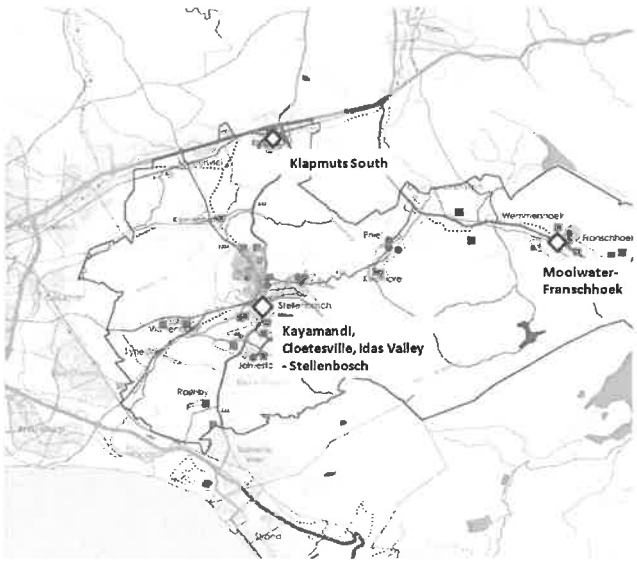

Figure 4: Potential study areas for development of WSUD concept plan mapped on Housing Backlog map of Stellenbosch (Source: Stellenbosch Municipality)

Responsible	Prof. Dr.-Ing. Wolfgang Dickhaut, Project lead HCU
Team	(N.N), Research Staff, HCU

Co-operation Partner NEU-Water	A/Profs Kevin Winter & Kirsty Carden, Project co-leads, Future Water Institute, UCT (N.N), Project Staff, HSE Andreas Schmidt, Engineer, UWC (N.N), Project Staff, VcA Mr Shane Chandaka, Director of Infrastructure, Stellenbosch Municipality
Co-operation Partner External	Prof Neil Armitage, SUDs specialist and Civil Engineer Langrug Community Project External experts (regional and thematic) shall be identified and invited for consultations
Goals	Establish a planning partnership with Stellenbosch Municipality and stakeholder in the re-development of a new chousing settlement alongside the informal settlement of Langrug Plan the layout of the new settlement to include WSUD principles. Facilitate the implementation of WSUD principles by working with community and local municipality
Expected results	Improved working relationships between researchers, municipal officials and community stakeholders to achieve WSUD outcomes. Implementation of a demonstration of stormwater/greywater reuse system within the community space Significant benefits for residents in a new approach to housing developments that priorities water sensitivity, drainage, public health and living conditions. Improved access to water and benefits of safe reuse for multiple uses
Methods / Solutions	Participate in a series of collaborative design workshops to co-design a WSUD temporary housing settlement. Implement cost-benefit analysis studies to • A demonstration house: use this for education / inspiration purposes and install monitoring instruments in the dwelling to capture water-energy related data. Existing houses at the Water Hub (experimental and control shack dwelling at the site with partial monitoring e.g. fitted with real time temperature and humidity loggers) or upcoming houses at the new housing area could be used for this purpose. • A multifunctional demonstration space for treatment and reuse of mixed stormwater and greywater within the neighbourhood:
Activities/tasks/ subtasks (separated by partners) with time periods	1 Development of concept plan for integration of WSUD measures in the social housing projects(II 2024 – IV 2025 months) , HCU, UCT, HSE 2 Demonstration of NEU Water concept at SW outlet (Location 2: Figure 3) (III 2024 – I 2026) HCU, UCT, HSE 3 Demonstration house at Water Hub (Location 1: Figure 3); (III 2025 – II 2026) HCU, UCT, HSE

WP2.3.: Stormwater Management in Institutions (Dar es Salaam)

Stormwater management is a critical issue in coastal Tanzania due to inadequate infrastructure and the geoclimatic situations. Through the ongoing partnership between the cities of Hamburg and Dar es Salaam, HCU has been involved in the implementation of two decentralized stormwater management systems in institutional settings in Dar es Salaam. The system at Mburahati Secondary School was completed in 2022 through funding from the city partnership. A second pilot at a municipal hospital is currently being planned to be built in 2024 as a part of BLP-BMZ-Projekt "Water sensitive urban development (WSUD) in Dar es Salaam, Tanzania". Both these projects did not have significant resources for monitoring and research.

The pilots provide opportunities to incorporate water reuse and assess the impacts on water security. Within NEU-Water project, system performance and management modes for reuse will be assessed.

Responsible	Prof. Dr.-Ing. Wolfgang Dickhaut, Project lead HCU
Team	(N.N), Research Staff, HCU
Co-operation Partner NEU-Water	Prof Ally Namangaya, Ardhi University
Co-operation Partner External	Dar es Salaam City Council through Hamburg-Dar es Salaam city partnership
Goals	Monitoring of decentralized stormwater management systems in institutional buildings Analysis of performance, maintenance, and acceptance of water reuse system
Expected results	Benefits of stormwater reuse in institutional setting quantified
Methods / Solutions	• Development of maintenance and performance data sets
Activities/tasks/ subtasks (separated by partners) with time periods	1 Adaptation of systems for optimizing water reuse (III 2025-I 2026) HCU 2 Installation of monitoring measures (III 2025-I 2026) HCU 3 O&M workshops with stakeholders (I - 2026) HCU
Preconditions and essential requirements for the fulfilment of the work	Completion of implementation under the ongoing BLP project in 2024.
Milestones (in terms of content and time)	Ms 2.3.1 – Monitoring system prepared in 2 project sites at Dar es Salaam (I - 2026) Ms 2.3.2 – O&M Workshop (I - 2026)

WP3 Applied Research

WP3.1.: Assessment of Technical concepts

This WP will use the analyse of quantitative data from biofiltration cells at the Water Hub and to improve the techniques and design to improve treatment of contaminated water to ensure the increasing reliability of safe reuse and discharge despite the varied quality of influent entering the treatment system. It will account for the varying conditions of flow and quality of the raw water from improved monitoring and reporting in near-real time data collection. This will result in a much-needed higher resolution dataset that will be used to characterise and model the condition of the Stiebeuel River resulting in an improved management of the influent entering the biofiltration cells. This is a critical knowledge gap in the use of NbS water treatment and is important to understand as a building block for upscaling biofiltration in a decentralised context. In addition, the technical data will include an assessment of the uptake of minerals, heavy metals, nutrients, bacteria and physical effects of different treated water sources on the soil and the quality of vegetables as observed in experimental food gardens by comparing different water sources (raw water from river; municipal water; and treated water from biofilters). Successive harvest can provide a robust indicator of the efficacy of using nature-based treated water. High quality data analysis and interpretation will inform future publications in the form of academic articles; literature that is accessible to public and of general interest; material for local news media; and a video production on the state of the catchment system, progress in the use of NbS treatment of water and voices of stakeholders participating in the co-creation of innovative solutions to social and environmental challenges.

The co-design and development of a plan for treating greywater, contaminated surface water runoff and associated collection solid waste in the upper reaches of the Stiebeuel River is one of the most serious challenges that need attention within the NEU-Water project. Addressing these issues is partly technical but mostly about new ways and means of addressing public service deprivation and new forms of agency (WP 3.2). At a technical level, research into WSUD design and implementation would be most appropriate and worthwhile if it can be applied to the new temporary housing area that is envisage by the municipality.

Responsible	A/Prof Kevin Winter, University of Cape Town
Team	Ms Emily Nicklin (PhD student), Environmental Science, UCT Ms Kalpana Maraj (PhD student), Chemical Engineering, UCT Dr Victor Parry (post-doc), Future Water Institute, UCT
Co-operation Partners NEU-Water	Ajith Edathoot, (N.N), Research Staff HCU Andreas Schmidt, Engineer, UWC
Co-operation Partner External	External experts (regional and thematic) shall be identified and invited for consultations, e.g. a panel of expertise from the universities of Cape Town, Stellenbosch and the Western Cape.
Goals	To analyse qualitative and quantitative data collection on the performance of implemented measures to treat contaminated water for its safe reuse and discharge, and to determine the level of risk and options for mitigating further risk. To analyse data and convert the results in high impact publications and publicly accessible news and information.

Expected results	Nature-based treatment of water and WSUD is established as a feasible and reliable solution for management of stormwater/greywater in dense urban/ informal settlement.
Methods / Solutions	Onsite and online data collection Statistical data analysis and interpreation. Development of models to improve predictions of water quality and influence of environmental variables that affect water quality, e.g. rainfall events and hydrualic flow.
Activities/tasks/ subtasks (separated by partners) with time periods	1 Development of a reporting, response and information systems (II 2025-I 2026) UCT 2 Data Analysis: Laboratory preparation of soils, plants and water samples for analysis of chemicals of emerging concern and other characteristics including physical, chemical and microbiological Coding and modelling of data on system performance (III 2025-II 2026) HCU, UCT, UWC 3 Development and validation of results using dataset of inlet monitoring (I 2026 – IV 2026) HCU, UCT, UWC, HSE 4 Research Publications (III 2026 – III 2027) HCU, UCT, UWC, HSE

WP3.2.: Enabling environment and Urban Planning

The location of the communities around Stiebeuel river and the Water Hub is strategically positioned to facilitate an enabling environment and is set to advance its offerings as an urban living lab with new opportunities to demonstrate practical, sustainable solutions to 'wicked' problems. WP 3.2 is an essential component for the development of WSUD in the catchment and the approach, i.e. establishment of living labs, an important approach and catalyst for similar WSUD initiatives in southern African. Living laboratories are sites or arenas that have potential for advancing sustainability transitions and in finding ways to strengthen the capacity of actors and agency in responding to critical social and environmental challenges. Achieving these ideas in practice and understanding how the implementation of WSUD can be accelerated and improved is a critical goal of the NEU-Water project. Academics involved in managing the site are strategically positioned to guide the development of the Water Hub to transform thinking and practice to contribute to a more just, equitable and sustainable world.

To date, progress in the Water Hub and the catchment becoming a living lab has been slow and uncertain partly because the project is dependent on research-led grants and a willingness of academics to champion transformative research, but mainly because it has been difficult to sustain community and stakeholder interest. While the Water Hub has demonstrated innovative and creative ways of treating polluted water, including ways of recovering and reusing resources, little has been done to advance these activities further upstream. The ongoing challenge and success of acceptance of WSUD resides largely in being able to effectively facilitate community-based collaboration and to enable authorities to find the resources to deal with complex causal factors that are a challenge in the sustainable transition from theory-to-practice. Figure 3 shows the development and goals of the Water Hub in its quest to establish a progressive living lab centre that facilitates learning and practical actions that can advance this transition to a more desirable, sustainable outcome.

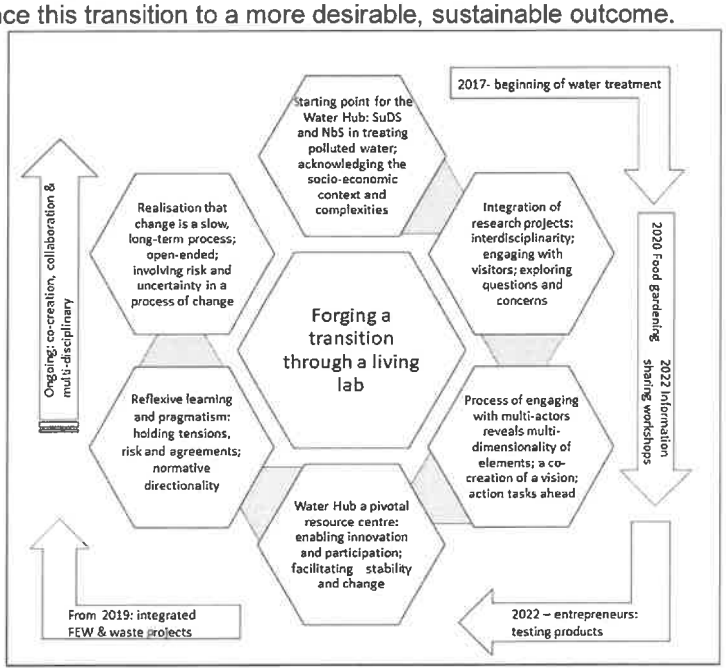

Figure 5: Pathways and elements of sustainability transitions in establishing an enabling environment through the living lab at the Water Hub

This activity will assess and validate how an enabling environment can be achieved by deliberately encouraging collaboration of multi-stakeholder groups with a clear intention of finding sustainable solutions to social and environmental challenges in the catchment. The community engagement activities organized within the project (WP 2.2), activities of other private and public institutions will be studied throughout the project to extract learnings. The study shall also be extended to the project demonstrations in the Water Hub and at Dar es Salaam to assess the challenges and impacts in WSUD thinking in diverse settings.

Responsible	Prof. Dr.-Ing. Wolfgang Dickhaut, Project lead HCU
Team	Ajith Edathoot, N.N, Researchers HCU
Co-operation Partner NEU-Water	All partners
Co-operation Partner External	External experts (regional and thematic) shall be identified and invited for consultations
Goals	To understand the obstacles and challenges of implementing WSUD in a dense peri-urban settlement.

	To identify the approach and support required to manage the form(s) required to sustain WSUD in an informal/ urban poor settlement. Analysis of cost-benefit of WSUD based on economic analysis and social analysis.
Expected results	Development and validation stakeholder engagement processes for integrating WSUD principles in stormwater/greywater management to address water security challenges in South Africa
Methods / Solutions	Identification of qualitative indicators of social learning, actions and support practical transfer of knowledge and capacity to address critical issues in the catchment Collection of social data and information using mixed methods: interviews, observations, group work, and recording of events.
Activities/tasks/ subtasks (separated by partners) with time periods	1 Literature review of the social indicators of the uptake of WSUD concepts (II-2024 – IV 2024) HCU & UCT 2 Identification and attribution of social indicators in understanding acceptance of WSUD for governing and managing the long-term prospects in the context of the NEU-Water project in South Africa (II-2024 – II 2027) All partners 3 Analysis on how the activities in the project areas is transferring learning and uptake of knowledge and actions beyond the boundaries of site (II-2026 – II 2027) HCU & UCT
Preconditions and essential requirements for the fulfilment of the work	Timely completion of WP 2

IV. Verwertungsplan

In den folgenden Tabellen sind wirtschaftliche Erfolgsaussichten, Angaben zur wissenschaftlich-technischen Verwertung, wissenschaftlicher und wirtschaftlicher Folgeentwicklungen/-projekte und Angaben zum Wissenstransfer für jeden Partner dargestellt.

1. Hafencity Universität Hamburg (HCU)

1. Wirtschaftliche Verwertung aus Sicht der Hochschule und ggf. aus Sicht Dritter		
Lfd. Nr.	**Konkrete Verwertung**	**Zeithorizont**
	keine	
2. Wissenschaftlich-technische Verwertung aus Sicht der Hochschule und ggf. aus Sicht Dritter		
Lfd. Nr.	**Konkrete Verwertung**	**Zeithorizont**
1	Fachveröffentlichungen NEU-Water	Ab 2026
2	Vorträge auf Fachtagungen und Kongressen, national und international	Ab 2026
3. Wissenschaftliche und wirtschaftliche Folgeentwicklungen/-projekte aus Sicht der Hochschule und ggf. aus Sicht Dritter		
Lfd. Nr.	**Nächste Schritte**	**Zeithorizont**
1	Folgeanträge EU, etc.	Ab 2026
2	Netzwerkbildung zwischen Wissenschafts-, Klein- und Mittelunternehmens- (KMU), und Kommunal-Partnern, auch mit dem Ziel, die Entwicklung von über das Verbundprojekt hinausgehenden gemeinsamen (FuE-)Aktivitäten zu prüfen	Ab 2026

4. Wissenstransfer (Studien-/Semesterarbeiten, Abschlussarbeiten, kooperative Promotionen, Ausgründungen)		
Lfd. Nr.	**Nächste Schritte**	**Zeithorizont**
1	Bachelor- / Masterthesis, ca. 4	2024-2027
2	Promotion, ca. 1-2	2026-2027
3	Übernahme von Inhalten der Forschung in Lehrformate der HCU in den Studienprogrammen Bauingenieurwesen, Stadtplanung und REAP	Ab 2026

Hamburger Stadtentwässerung AöR HSE

1. Wirtschaftliche Verwertung aus Sicht der HSE		
Lfd. Nr.	**Konkrete Verwertung**	**Zeithorizont**
1	Beitrag zur Agenda2030-Erreichung der Stadt Hamburg, SDG6 und SDG17	Kurz- bis langfristig
2	Steigerung von Image und Attraktivität der HSE als Arbeitgeber	Kurz- bis langfristig
3	Personalentwicklung und Stärkung des Know-Hows	Kurzfristig
2. Wissenschaftlich-technische Verwertung aus Sicht der HSE		
Lfd. Nr.	**Konkrete Verwertung**	**Zeithorizont**
1	Planungs- und Bewertungstoolkit für informale Siedlungen in Südafrika	2-5 Jahre
2	Verknüpfung einer Betreiberpartnerschaft mit Fokus auf die wassersensible Quartiersentwicklung und Wasserwiederverwendung	Mittel- bis Langfristig
3	Publikationen internationalen Fachjournalen und nationalen Branchenzeitschriften	Kurzfristig
3. Wissenschaftliche und wirtschaftliche Folgeentwicklungen/-projekte aus Sicht der HSE		
Lfd. Nr.	**Nächste Schritte**	**Zeithorizont**
1	Ausweitung der Zusammenarbeit der HSE in Rahmen einer WOP mit südafrikanischen Betreibern	Langfristig
2	Projektergebnisse können durch HSE direkt in das Netzwerk der Betreiberpartnerschaften eingebracht werden	Langfristig
4. Wissenstransfer (Studien-/Semesterarbeiten, Abschlussarbeiten, kooperative Promotionen, Ausgründungen)		
Lfd. Nr.	**Nächste Schritte**	**Zeithorizont**
1	Studentische Abschlussarbeiten bei HSE	Kurz- bis Mittelfristig (2-5 Jahre)

Urban Waters Consulting (UWC)

1. Wirtschaftliche Verwertung aus Sicht der Hochschule und ggf. aus Sicht Dritter		
Lfd. Nr.	**Konkrete Verwertung**	**Zeithorizont**
1	Kooperationsausbau und Referenzprojekt in Südafrika	Kurz- bis langfristig
2	Profilstärkung im Bereich angewandte Forschung und Entwicklung	Kurz- bis langfristig

2. Wissenschaftlich-technische Verwertung aus Sicht der Hochschule und ggf. aus Sicht Dritter		
Lfd. Nr.	**Konkrete Verwertung**	**Zeithorizont**
1	Planungs- und Bewertungstoolkit für informale Siedlungen in Südafrika	2-5 Jahre
2	Wissenschaftlich-technische Fachaustausch zu angewandten technischen und nicht-technischen Lösungen	Kurz- bis mittelfristig
3. Wissenschaftliche und wirtschaftliche Folgeentwicklungen/-projekte aus Sicht der Hochschule und ggf. aus Sicht Dritter		
Lfd. Nr.	**Nächste Schritte**	**Zeithorizont**
1	Kooperationsausbau mit HafenCity Universität und Hamburg Wasser	Langfristig
4. Wissenstransfer (Studien-/Semesterarbeiten, Abschlussarbeiten, kooperative Promotionen, Ausgründungen)

V Arbeitsteilung/Zusammenarbeit mit Dritten

Die Leitung des Verbundes wird durch die HCU-Hamburg, Fachgebiet umweltgerechte- Stadt- und Infrastrukturplanung, Prof.-Dr.-Ing. Wolfgang Dickhaut geleistet. Hierfür ist eine Unterstützung in der Ressourcenplanung von insgesamt ca. 3 PM in der Projektlaufzeit vorgesehen, die bei den WIMIs verankert werden.

Er verantwortet das Monitoring des gemeinsam noch zu erarbeitenden detaillierteren Projektablaufplanes sowie die daraus resultierende Meilenstein- und Projektberichtskontrolle im Verbund.

Für jedes Arbeitspaket ist ein verantwortlicher Partner des Verbundes festgelegt worden, der/die die Arbeiten des Modules koordiniert und in Abstimmung mit der HCU die Meilensteinerreichung monitort.

Als Kernelement der Zusammenarbeit werden die monatlicher Online-Jourfix und 3 Projektpartner-Workshops etabliert, die zu einem regelmäßigem Austausch und zu einer Abstimmung von Methoden und (Zwischen.-) Ergebnissen beitragen werden.

Beitrag des afrikanischen Partner (UCT) seit Beginn der Initialphase. Zur Überbrückung der Lücke nach der Initialphase von NEU-Water wurde der Water Hub erweitert und für die Hauptphase vorbereitet (Januar 2023 – Januar 2024). Dies ist als Eigenanteil der Partner in Südafrika anzuerkennen und wird NEU-Water signifikant zugutekommen. Die Ausgaben beliefen sich auf insgesamt R1799132 (€89956).

Position	***Cost***
Personnel:	
Supervisory and management	R8000 per month. Total cost: R96 000

Monitoring Equipment purchases:	
Handheld flow meter	R14 000
Dissolved Oxygen meter	R11 500
Weather Station	R3 200
Data for site	@R149 / month. Total cost: R1 788
Travel:	
Weekly site visits	4 visits each month for 11 months @ R4.20 per trip. Total cost: R32 894
Private investors: entrepreneurs	
Blue Planet SA – experiment with nano-bubbler generator. Estimated cost of travel, fittings, gas tanks and personnel cost (time)	R12500
Chrislor Environmental – partnership in investing in development of laboratory at the Water Hub and biochar production and costt	R84000
Cost of biochar purchased by UCT from vendor Mamre Compost	R30000
Support for enzyme testing to remove algal bloom – Earth Science Labs Global (Murray Jones): estimated cost of reagents, travel and personnel (time)	R4500
Western Cape government contract to restore lower Stiebeuel River.	

Planting, irrigation and maintenance to subcontractors SME: Intaba Pty Ltd. Total cost of contact	R1 100 000
General maintenance and repair	
Fittings, pipes, irrigation values, development of experimental gardens: estimated cost	R17 500
Repair of site from flood damage:	
Hire of caterpillar (front-end loader to regrade site):	5 days at R650 per day. Total cost: R3250
Replacement of 220m of fencing that was washed away in 24/25 September flood.	Total cost R250000.
Restoration of the river plants and irrigation system post-flood.	Est total cost including labour R120 000

VI. Notwendigkeit der Zuwendung

Die beantragte Zuwendung ist notwendig, keine der beteiligten Institutionen kann das Projekt ohne diese Förderung durchführen.

Die beteiligten Universitäten können die hier beantragten Forschungsarbeiten nicht aus den Haus-haltsmitteln bestreiten. Sie sind zur Durchführung auf die hier beantragte Förderung im Umfang von 100% angewiesen.

7.6.3	**THE 7th SOUTH AFRICAN – GERMAN PEER LEARNING NETWORK WORKSHOP AND TO INFORM COUNCIL OF THE GRANT EXPERTFUND APPROVAL FOR MUNICIPAL PARTNERSHIP WORLDWIDE**

Collaborator No:
IDP KPA Ref No: **Good governance and compliance**
Meeting Date: **21 May 2025**

1. SUBJECT:THE 7th SOUTH AFRICAN – GERMAN PEER LEARNING NETWORK WORKSHOP AND TO INFORM COUNCIL OF THE GRANT EXPERTFUND APPROVAL FOR MUNICIPAL PARTNERSHIP WORLDWIDE

2. PURPOSE

To obtain Council's permission to attend the 7th South African - German Peer Learning Network and a hospitation as well as to inform Council of the grant approval linked to the Expert fund for Municipal Partnership Worldwide.

3. DELEGATED AUTHORITY

In terms of 9.2 of the Cost Containment Policy 2019, only the Municipal Council in a Council Meeting can approve the international travel for any official or political bearer.

4. EXECUTIVE SUMMARY

Stellenbosch Municipality is part of the IUDF Intermediate City Support Programme which is being implemented in partnership with the Cooperative Governance and Traditional Affairs (COGTA) and the South African - German City Network. Dialogues for Urban Change (D4UC) is a project implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH on behalf of the Federal Ministry for Housing, Urban Development and Building (BMWSB). It is framed by the visions for sustainable cities included in the New Urban Agenda, the UN's Sustainable Development Goal 11, the New Leipzig Charter, and the German National Urban Development Policy. D4UC aims at bringing these ideas and approaches into the daily practice of cities by creating an environment for mutual learning among practitioners of urban development. The core of the D4UC project are three city networks from partners in the USA, Ukraine, South Africa and Germany.

The aim is to inform Council of the benefits of the network engagements to date as well as permission to attend the last workshop meeting:

4.1 The extended learning opportunities beyond the eight participating cities during the Stellenbosch learning Network engagements;

4.2 Council to cover cost in terms of travel related costs in Germany for the 4-night stay (accommodation, daily allowances, local transport to and from airport). See attached as **ANNEXURE 1.**

4.3 The successful application of Expertfund for municipal partnerships worldwide

4.4 Council take note that the Expert Climate Change will commence with service from 1st of June 2025 in the office of the Municipal Manager.

4.5 Council to note the hospitation request received from Bottrop to exchange learning ideas

4.6 Council to note that the flight tickets have already been booked and paid for by GIZ for the period of 10th – 18th June 2025,

5. RECOMMENDATIONS

(a) that Council approves the request for attendance of the 7th South African – German peer learning network workshop and a hospitation by Germany from 10th - 18th June 2025;

(b) that Council approves the travel related costs in Germany for 4-night stay (accommodation and daily allowances);

(c) that Council take note of the successful grant funding application for Expertfund for municipal partnerships worldwide; and

(d) that the Expert Climate Change will commence service from 1st of June 2025 within the office of the Municipal Manager.

6. DISCUSSION / CONTENTS

6.2 Background

The concept driving the city network is to generate new thinking in urban development towards more integrated and safe neighbourhoods for all in the eight partner cities and beyond. As part of a “living lab”, each city provided one of their strategic urban development projects, ready to share knowledge and experiences as well as draw inspiration from their peers for the project’s continuing implementation.

Stellenbosch Municipality had the opportunity to host the third meeting of the South African - German P2P Learning Network from 26/02 to 03/03/2023.

During the network workshop the focus was on the complexity of urban development in Stellenbosch. The historic inner city, mixed-use housing development areas as well as informal settlements were visited, and the cross-cutting issue of urban safety was highlighted.

Site visit to Violence Prevention through Urban Upgrading (VPUU) NPC in Monwabisi Park Khayelitsha to understand the VPUU approach to co-creating safe and sustainable neighbourhoods in urban areas, linked to the joint South African initiative “Safer Places: Resilient Institutions and Neighbourhoods Together” (SPRINT). Exploration of selected cohorts of interventions and joint discussions. It was here that the opportunity was triggered for further engagements beyond the workshop. The engagements and learning network has contributed to current development of a parking management model for the municipality and has provided valuable insight into similar challenges experienced by fellow network members in sharing challenges with possible solutions. We also had the opportunity to network with their Police in relation to CCTV software and AI used within policing, which has contributed to information included within our recent CCTV tender.

Reflection on the network activities up to now and joint decisions on the further development of the network, such as way forward, working plan, upcoming events/papers/webinars. The valuable input from Stellenbosch Municipality

representatives have created further opportunities of which GIZ has requested to share information with other network groups i.e. Ludritz especially relating to safety as Stellenbosch Municipality is seen as a leading role player in safety initiatives. Protection services has also benefitted from training initiatives which has been rolled out to staff and community members focussing on safety within neighbourhoods in the form of the park activation training, community safety training, Stepping stones Project training (GBV), conducted a baseline study in Kayamandi through NICRO and the National Youth resilience training program where 25 youths from communities within Stellenbosch have been trained.

6.1.1 NETWORK WORKSHOP CONCEPT

The concept driving the network was to generate new thinking in urban development towards more integrated and safe neighborhoods for all in the eight partner cities and all other partners. As part of a “living lab” each city had to provide one of their strategic urban development projects, ready to share knowledge and experiences as well as draw inspiration from their peers for the project’s continuing implementation.

The primary focus of the network was on topical urban development challenges: Within the overarching topic of integrated urban development for the common good in the spirit of the New Leipzig Charter, the South African - German peer learning network aims at contributing to the implementation of the South African Integrated Urban Development Framework (IUDF) stipulations and linking them to tangible projects at a neighborhood level.

The network focus on the sub-themes of how to co-create and maintain livable and safe neighborhoods and quality public spaces with special regard to equitable access and use, as well as social cohesion and citizen safety, keeping in mind vulnerable groups such as women, children, and the elderly.

The workshop engaged with the higher-level policies on integrated urban development in the two countries with the intention of contextualizing the successes and challenges of the cities in the realization of projects for integrated and safe urban neighborhoods for all. The main reference points for the peer exchange were the strategic integrated projects which each of the eight participating cities selected in the preparatory phase. Other themes and interests of the participants were explored through a bilateral exchange and the provision of ample opportunities for unstructured networking.

The unique “vertical” (i.e., national-local) learning dimension of the network was integrated into every network activity and (a) extended the case studies and learning opportunities beyond the eight directly participating cities and (b) provided lessons to feed into national-level policy- making.

6.1.2 NETWORK WORKSHOP OBJECTIVES

The following objectives of the network workshop were to create:

A mutual understanding of the respective challenges, potentials and solutions in the field of urban development which will be further improved.

The D4UC peer learning community will be further consolidated and expanded with new members (e.g. the German cities of the Ukrainian - German network). All new participants will be introduced to the framework of the Dialogues for the Urban Change (D4UC) approach.

At the end of the peer-to-peer learning network, it was agreed to develop various working materials (papers) on selected topics within the framework of the D4UC learning network. The working materials will include a short introduction to the respective topics as well as a collection of good examples from the participating network cities. The topic of pop-up/temporary interventions in public spaces will also include examples from Ludwigsburg and Karlsruhe. This will serve as blueprint for the South African cities in order to deal with some of the challenges confronting them.

In preparation for the next physical network meeting, a series of virtual meetings were conducted with all the network members. Some of the topics that will be discussed in the meetings include:

- Neighbourhood management / ward management including participation
- Urban safety (including issues on infrastructure vandalism)
- Climate change (including Smart Cities)

The Senior Manager: Protection Services, Mr Charl Kitching, and the Senior Manager: Asset Management & Systems, Development Services & Project Management Unit (PMU), Ms Myrah Francis, were nominated to participate as the two members of the learning network group that will represent Stellenbosch Municipality.

6.1.3 EXPERTS FOR PARTNERS - GRANT APPLICATION

Stellenbosch Municipality had the opportunity to strengthen their partnership with the City of Karlsruhe during the 4th Network meeting. This led to the successful application by the two cities to form a partnership and to apply for the Expertfund for municipal partnerships worldwide that is funded by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH. The application was completed on the 31st of January 2024 and approved during March 2025. The funding was applied to appoint an Expert in Climate Change, in the Office of the Municipal Manager at Stellenbosch Municipality.

This application was motivated by the severe inclement weather conditions over the past three years, especially the floods that occurred during the weekend of September of 2023, that left the town of Franschhoek without the required Infrastructure services.

Herewith some of the key objectives as per the application, attached as **ANNEXURE 2**, that motivated the funding of the expert:

- Climate Vulnerability Assessment.
- Emergency Preparedness for climatic weather events.
- Adaptation Planning specific to the municipality’s challenges and vulnerabilities.
- Mitigation Strategies to reduce greenhouse gas emissions within the municipality.
- Data Collection and Monitoring.
- Community and stakeholder engagement with regard to climate change impacts.
- Policy Development.
- Ecosystem Protection, Restoration and river corridor development
- Collaboration, Education, and Partnerships.
- Education and Capacity Building with regards to climate change and its effects on the municipality.

The municipality had to follow a lengthy process to motivate why the appointment of an expert within the municipality is required as well as the funding request to appoint a local expert. A site visit from the proposed GIZ partners was conducted during August 2024

to visit the respective sites and to motivate Franschhoek as the pilot project. Various presentations were done, and it was concluded by the GIZ personnel that they supported the funding application. After consideration by the internal funders the municipality were informed to continue with an appointment of the local expert, herewith attached as **ANNEXURE 3**, the approved funding letter.

The job description of the Expert Climate Change was finalised and a recruitment and selection process followed by the Human Resource department to appoint the best suitable candidate for this position. The panel was compiled by the Municipal Manager and the most suitable candidate was appointed. It was confirmed that the candidate will commence with her duties at the municipality on the 1st of June 2025 until the 31st of December 2026.

It must be noted that the Municipal Manager already made provision for the Top Layer Key Performance Indicators (KPI's) to which the newly appointed incumbent must report on.

6.3 Financial Implications

Council to cover the cost for the travel related cost in Germany for the 4-night stay, (accommodation and daily allowances).

6.4 Legal Implications

In line with the Cost Containment Policy.

6.4 Staff Implications

None.

6.5 Previous / Relevant Council Resolutions

6th COUNCIL MEETING: 2022-07-27: ITEM 11.11.3

RESOLVED (nem con)

(a) that Council approves the request for attendance of the 2nd South African – German peer learning network workshop and Federal National Urban Policy Congress that will be hosted in Germany from 10 to 16 September 2022; and

(b) that Council approves the daily allowance for the duration of the forum.

8TH COUNCIL MEETING: 2022-10-26: ITEM 13.4

RESOLVED (nem con)

(a) that Council takes note of the visit to Germany by a delegation from Stellenbosch Municipality; and

(b) that Council takes note that Stellenbosch Municipality will be hosting the next engagement during February 2023.

16TH COUNCIL MEETING: 2023-08-23: ITEM 11.11.2

RESOLVED (nem con)

(a) that Council note the feedback report with regards to the 3rd South African – German Peer Learning Network workshop that was held in Stellenbosch;

(b) that Council approves the request for attendance of the 4th South African – German Peer Learning network workshop and a hospitation by Germany from 6 – 20 October 2023;

(c) that Council approves the hospitation in Nuremburg (6th – 7th and 13th – 16th October 2023) for 4-nights, visa costs and take care of any further travel related costs (daily allowances, local transport to and from airport); and

(d) That Council approves all further engagements linked to the partnership that will entail financial implications.

6.6 Risk Implications

Addressed in the content of the item.

6.7 Comments from Senior Management

6.7.1 Director: Infrastructure Services

Author of report.

6.7.2 Chief Financial Officer

Supported.

6.7.3 Municipal Manager

Re: Invitation to the *South African-German Peer Learning Network* to attend the seventh workshop of the network in Germany from June 10th to 18th 2025

Dear Mr Kitching,

With this letter, I would like to thank you and your institution for your continued dedication to the partnership between South Africa and Germany in the field of integrated urban development and express an invitation to the upcoming activities of the *South African-German Peer Learning Network* in Germany. The 7th network meeting of the **Dialogues for Urban Change** programme will take place from 10th-13th of June in Bottrop, Germany. You are invited by the City of Bottrop to continue your stay until June 18th. For further details on the Hospitation please refer to the Invitation by the City of Bottrop.

Apart from taking another close look at all our living lab projects during the stay **Bottrop**, the workshop will continue to deepen our understanding of the issue of integrated urban development, sharpen our thinking around the issues of equitable access to safe and lively public spaces (especially for vulnerable groups, i.e. women or the elderly), whilst allowing enough space for peer advice and engagement on further/current topics that are on your minds.

Costs for accommodation, transport (air tickets in economy class, **Group transfer from Duesseldorf to Bottrop, Germany on 10.06.2025**), lunches as well as selected dinners will be covered through the programme from the 10th – 13th of June. **Accommodation** in Bottrop is secured at Hotel Ramada (Paßstraße 6, 46236 Bottrop) from 10. – 18.06.2025.

We kindly request your organisation/city administration to take care of any further travel-related costs (visa costs, daily allowances,

ANNEXURE 2

Declaration of Interest by Municipal Partnerships
Wishing to Participate in the Program:
Expertfund for municipal partnerships worldwide (Experts for Partners)

Name and address of the local or regional authority in Germany (or local government association):
Stadt Karlsruhe
Karl-Friedrich-Straße 10
76133 Karlsruhe

Postal Address:
Stadt Karlsruhe
76124 Karlsruhe

Name and position of the contact person within the local or regional authority in Germany (or local government association):
Sigrun Hueger
Planning Office, Head of Department

Name and address of the partner municipality or local government association in the Global South (developing or emerging country):
Myra Francis

Please describe the **partnership** in a few sentences (date of inception, basis for cooperation, nature of cooperation, key areas of work, actors involved etc.).

The partnership between the two cities were established during the 2nd Network meeting in Karsruhe. The living lab projects that the two cities focused on were in line with the SDG's and the objectives of D4UC.

During the 4th Network meeting the partnership was strengthened with the exchanged of various cooperate measures and principals that the cities focused on during hospitation. The key areas of work are the following:

1. Parking Management Models
2. Community Safety Initiatives
3. Control room model
4. Homeless interventions
5. Enforcement of by-laws of the homeless
6. Tourism and NMT initiatives to increase the economy
7. Inclusionary housing models

The various stakeholders involved in our partnership are the Town Planning, Engineers, Social government and Housing officials.

Which specific **objectives** for the partnership should have been achieved by the end of the expert's assignment?

The Stellenbosch Municipality was severely impacted by the inclement weather conditions over the weekend of 24 September 2023, that resulted in major damages to all the various infrastructure such as roads, electricity, underground pipes, buildings, and other municipal facilities. The region was hit by flash floods, that were recorded as 1/200-year floods that wreaked havoc on the municipality. Therefore, the municipality would like to ensure that it will be better equipped for events such as this in the future through partnerships with a climate change expert. An expert in climate change can bring valuable perspectives, skills, and objectives to a team in Stellenbosch Municipality. Here are some key objectives that such an expert should focus on:

- **Climate Vulnerability Assessment.**
- **Emergency Preparedness for climatic weather events.**
- **Adaptation Planning specific to the municipality's challenges and vulnerabilities.**
- **Mitigation Strategies to reduce greenhouse gas emissions within the municipality.**
- **Data Collection and Monitoring.**
- **Community and stakeholder engagement with regards to climate change impacts.**
- **Policy Development.**
- **Ecosystem Protection, Restoration and river corridor development**
- **Collaboration, education, and Partnerships.**
- **Education and Capacity Building with regards to climate change and its effects on the municipality.**
- **Inform Infrastructure Services on Climate resilient considerations for infrastructure development projects.**
- **Green Finance and Funding by Exploring and advocating for funding mechanisms, grants, and partnerships to support climate change initiatives.**

german cooperation DEUTSCHE ZUSAMMENARBEIT
Implemented by giz
and
in cooperation with ENGAGEMENT GLOBAL
with its SERVICE AGENCY COMMUNITIES IN ONE WORLD

Which **tasks** should the expert perform within the partner municipality? (For example, regarding the project to be professionally supported in the context of the municipal partnership work or activities to consolidate and further develop a viable and multifaceted partnership)

The expert with the partner municipality should focus on but not limited to:

- Conduct a comprehensive assessment of the municipality's vulnerability to climate change, identifying key areas and sectors at risk.
- Develop and update emergency preparedness plans that specifically address climate-related events, such as floods, droughts, or storms.
- Develop and implement climate change adaptation plans tailored to Stellenbosch's specific challenges and vulnerabilities. This may involve identifying infrastructure improvements, land-use planning changes, and community resilience strategies.
- Introduce and promote strategies to reduce greenhouse gas emissions within the municipality. This could involve energy efficiency programs, renewable energy adoption, and sustainable transportation initiatives.
- Establish systems for collecting and monitoring climate-related data to track changes over time. This includes temperature, precipitation, sea level, and other relevant indicators.
- Facilitate community engagement initiatives to raise awareness about climate change impacts, garner support for mitigation and adaptation measures, and involve residents in the decision-making process.
- Work with municipal officials to develop and implement climate-resilient policies.
- Identify and implement measures to protect and restore local ecosystems, as they play a crucial role in climate regulation and resilience.
- Foster collaboration with regional, national, and international organizations, as well as academia and research institutions such as Stellenbosch university, to share knowledge, best practices, and resources for effective climate action.
- Integrate climate resilience considerations into the planning and development of infrastructure projects, ensuring that they can withstand the impacts of climate change.
- Explore and advocate for funding mechanisms, grants, and partnerships to support climate change initiatives. This could involve tapping into national and international funding sources for climate-related projects.

Meeting Date: **21 May 2025**

1. SUBJECT:IDENTIFICATION OF A MARKET TRADING SITE IN STELLENBOSCH

2. PURPOSE

To seek Council's approval for the designation of a market trading site within Stellenbosch town, thereby promoting local economic development and support for informal trading activities. Furthermore, to request approval from Council to proceed with advertising of potential trading sites, for public participation.

3. DELEGATED AUTHORITY

Council.

4. EXECUTIVE SUMMARY

The Stellenbosch Municipality envisions a thriving informal trade sector that is valued, legally recognized, and fully integrated into the economic, urban, and social fabric of WC024. As part of its mandate, the Municipality is committed to fostering an environment that supports economic growth and enhances the well-being of its communities.

The Stellenbosch Municipality Informal Trading Policy (2019) outlines the importance of identifying suitable trading areas, such as markets, to create sustainable opportunities for informal traders. A key strategic objective of the Economic Development Section is to support the sector's growth through initiatives that promote entrepreneurship, enhance market access, and foster social cohesion within public spaces.

The Economic Development Section recognises the vital role of informal trade in strengthening the local economy. Key considerations include:

- Enabling Environment: The Municipality has a constitutional mandate to create conditions that promote social and economic well-being.

- Entrepreneurship & Job Creation: Small businesses and startups drive job creation, wealth generation, and increased household incomes.

- Economic Circulation: Affordable infrastructure investments attract new capital and stimulate local economic activity.

- Accessibility & Inclusion: Informal trade provides platforms for individuals with diverse skills, capacities, and financial resources.

- Local Impact: Locally owned and staffed businesses contribute significantly to the economy, with a higher likelihood of income remaining within the community.

- Community Buy-in: Engaging local stakeholders builds capacity, strengthens community ownership, and enhances the long-term sustainability of initiatives.

By fostering a supportive environment for informal traders, the Municipality aims to unlock economic potential, create inclusive opportunities, and build a resilient local economy:

- The initiative focuses on establishing a dedicated space primarily designed for community markets.

- Job creation and new business opportunities are essential for Stellenbosch, requiring a diverse and inclusive approach.

- The selected site should be an inviting open space, offering ample room not only for trading but also for light entertainment.

- Traders will operate on a “pack-up-and-go” basis, ensuring the site remains flexible and multi-purpose.

5. RECOMMENDATIONS

(a) that Council approves the following 3 sites as potential market sites which can be operated by organisers and entrepreneurs from Stellenbosch W024;
- Eerste Riverbank
- Die Braak
- Bloemhof Parking (weekend’s only)

(b) that Council approves the advertising of these potential trading sites, for public participation;

(c) that Council notes that potential market organisers wishing to operate markets on these sites will have to comply with all Municipal Policies and by – laws applicable to public events; and

(d) that Council mandates the Municipal Manager to enter into agreements with potential market organisers wishing to operate these sites as a public market on terms as prescribed in Municipal by – laws and any other applicable legislation.

6. DISCUSSION / CONTENTS

6.1 Background

A technical evaluation and multi-departmental consultation process was conducted to assess the suitability of various sites. The following 8 key locations were considered:

	Site	Zoning	Size (m²)	Key Considerations
1	**Jan Marias Park**	Public Open Space / Education	2 291	Environmental sensitivity, pressure on amenities, limited parking.
2	**Eersterivier Bank (Suidwal)**	Public Open Space / Roads & Parking	4 107	Ideal location, some concerns on residential proximity and environmental impact; mitigation measures required.
3	**Die Braak**	Public Open Space	4 333	Heritage site; adequate space; parking availability; higher likelihood of objections.
4	**Mountain Breeze Caravan Park**	Agricultural	6 315	Under redevelopment via Council resolution: currently not viable.
5	**La Pinetta**	Agricultural	1 037	Limited access, off-grid, suited to farmers' market; tenant agreements required.
6	**Toy Museum**	Community Property	4 181	Centrally located. There is an MOU in place with the Historical Houses Organisation where they will investigate the possibility of leasing the property from the Municipality on a long-term basis.
7	**George Blake Avenue**	Public Open Space and Sports and recreation	Upper George Blake : 7328 Lower George Blake: 5501 and 7671	The George Blake properties fall within the ATC corridor (precinct 9) for which design guidelines were developed and approved by Council. Of importance is the General Development Guidelines, applicable to all precincts as well as the Guidelines for Precinct 9. George Blake Avenue, which is parallel to the Plankenburg river, is see as the main NMT and public transport route as well as the primary open space system that depends heavily on the revived and cleaned Plankenburg river. The spaces refer to are all open spaces important for development as park landscapes. An informal market, although relatively small, that services users of the park landscape, will not be out of place.
8	**Bloemhof Parking Area**	Public Roads and Parking Zone	3483	Bloemhof parking area currently serves as parking space for staff and members of the public who have long-term contracts for leasing the parking area. Community services that manage the contracts with the public parking contracts and the day-to-day operations must be consulted with in detail. Should the Market proceed - the Market Area must fall outside of areas that are designated for public parking. The market can then only operate in the Municipal staff parking area. Community Services and affected staff members (should they need to work weekends) must be communicated with. Community services sometimes store municipal vehicles in the municipal parking area over weekends. The Market should also not obstruct access to the parking area.

				Traffic Operations have no objections and deduces that it would be better to have this market on Sundays when parking demand is typically lower, that seems like a practical and effective approach. It would also be beneficial for the organisers to have marshals to assist with the flow of traffic If the market is going to be after hours or over weekends, then the Staff parking would mostly be available. The MM's office has an arrangement (through Director de Beer office) with adjoining restaurants and businesses that Bloemhof (staff parking) can be utilised for their customers after hours and over weekends barring that the car park is open. There are also monthly parking bays which businesses and private individuals hire from the Municipality to park at Bloemhof and some of them work over weekends. This will or may also create further problems. From a planning perspective, the Bloemhof site is ideally situated and central to the town and the university. It is within walking distance of the business district as well as most tourist amenities. A big advantage is that it is close to the university community, also. Some disadvantages are that it also serves as one of the bigger parking reservoirs in town, which will be in direct competition with the market. Should a market be organised on this site, it would be important to do so when parking is not in demand, i.e. on Sundays. There are also no ablution facilities available and portable ablution units will have to be provided. If managed properly, it can work as is currently seen by the street soirée that takes place in Drostdy Street.

Interdepartmental feedback highlighted important requirements for any approved site, including:

- Provision of security and waste management by market organisers,
- Environmental protections (especially near rivers or parks),
- Infrastructure provision (electrical, ablution, water),

- Public participation and traffic assessments where needed (See **ANNEXURE 1** for full report).

It is recommended that the following sites be advertised for public participation:

1. The Eersteriver Bank (Suidwal) be designated as a preferred market trading site, subject to:

    - Implementation of mitigation measures to protect the surrounding environment and manage noise;
    - Engagement with affected nearby residents through a public participation process;
    - Conditions of approval addressing security, waste management, infrastructure, and usage guidelines.

2. Die Braak may be considered, acknowledging:

    - Its historical significance and central location;
    - The potential need for special heritage-related approvals and public consultation;
    - That use of the site be regulated to avoid damage to the grass and infrastructure.

3. Bloemhof Parking may be considered, acknowledging:

    - Ample space that is not formally occupied,
    - The Bloemhof site is ideally located—central to town, close to the university, business district, and tourist amenities.
    - Hosting the market on Sundays is considered practical due to lower parking demand, minimizing disruption.
    - Traffic Operations have no objections, supporting the idea of a Sunday market and suggesting the use of marshalls for smoother traffic flow.
    - Staff parking is mostly available after hours and on weekends, offering potential space for the market.

6.2 Financial Implications

No expenditure is foreseen at this stage. Costs associated with basic site preparation (if any) and interdepartmental coordination will be accommodated within the existing Economic Development and Tourism operational budget.

6.3 Legal Implications

The recommendations in this report comply with Council’s policies and all applicable legislation.

6.4 Staff Implications

None.

6.5 Previous / Relevant Council Resolutions:

None.

6.6 Risk Implications

The risks are addressed through the content of the item.

6.7 Comment from Senior Management

The item has been circulated for comments to the following internal departments:

- **Directorate of Planning and Economic Development**: Development Management – Comments have been received and incorporated.
- **Directorate of Infrastructure Services**: Roads and Stormwater - Comments have been received and incorporated.
- **Directorate of Corporate Services**: Comments have been received and incorporated.
- **Directorate Community Services**: Comments have been received and incorporated
- **Cape Winelands District Municipality**: Comments have been received and incorporated
- **Municipal Manager**
  Supports the recommendations.

Planning and Economic Development

TO: **MUNICIPAL MANAGER**

FROM: **LOCAL ECONOMIC DEVELOPMENT OFFICER: INFORMAL TRADING AND BUSINESS HUBS**

DATE: **07 APRIL 2025**

SUBJECT: **IDENTIFICATION OF POTENTIAL MARKET TRADING SITES IN STELLENBOSCH TOWN**

Memorandum: Potential Market Trading site

1. Background

The Stellenbosch Municipality envisions a thriving informal trade sector that is valued, legally recognized, and fully integrated into the economic, urban, and social fabric of WC024. As part of its mandate, the Municipality is committed to fostering an environment that supports economic growth and enhances the well-being of its communities.

The Stellenbosch Municipality Informal Trading Policy (2019) outlines the importance of identifying suitable trading areas—such as markets—to create sustainable opportunities for informal traders. A key strategic objective of the Economic Development Section is to support the sector's growth through initiatives that promote entrepreneurship, enhance market access, and foster social cohesion within public spaces.

The Role of Informal Trade in Economic Development

The Economic Development Section recognizes the vital role of informal trade in strengthening the local economy. Key considerations include:

- Enabling Environment: The Municipality has a constitutional mandate to create conditions that promote social and economic well-being.
- Entrepreneurship & Job Creation: Small businesses and startups drive job creation, wealth generation, and increased household incomes.
- Economic Circulation: Affordable infrastructure investments attract new capital and stimulate local economic activity.
- Accessibility & Inclusion: Informal trade provides platforms for individuals with diverse skills, capacities, and financial resources.
- Local Impact: Locally owned and staffed businesses contribute significantly to the economy, with a higher likelihood of income remaining within the community.

- Community Buy-in: Engaging local stakeholders builds capacity, strengthens community ownership, and enhances the long-term sustainability of initiatives.

By fostering a supportive environment for informal traders, the Municipality aims to unlock economic potential, create inclusive opportunities, and build a resilient local economy:

- The initiative focuses on establishing a dedicated space primarily designed for community markets.
- Job creation and new business opportunities are essential for Stellenbosch, requiring a diverse and inclusive approach.
- The selected site should be an inviting open space, offering ample room not only for trading but also for light entertainment.
- Traders will operate on a **"pack-up-and-go"** basis, ensuring the site remains flexible and multi-purpose.
- The location must be open and easily accessible, equipped with tamper-proof electrical connections, potable water, and well-maintained ablution facilities.

Project Administration

- The **Economic Development Section** will oversee the project, ensuring alignment with municipal economic growth objectives.
- A **service provider** will be appointed through a transparent public tender process to manage operations fairly and efficiently.

2. Proposed Sites and Departmental Stakeholder Notes

Area	Comments						
	Property Details	**Environmental**	**Land Use**	**Infrastructure Services**	**Law Enforcement**	**Cape Winelands Health**	**General Comments**
Jan Marais Park	Proposed site is zoned as a public open space and education zone with an approximate trading space of **2 291m²** **(See Annexure 2)**	Restrictive Guidelines should be clearly stipulated The primary functionality as a recreational facility should remain uppermost; adding an additional recreational activity to the area will result in increased pressure in the Park Area. The Park area is utilised on a weekly basis, for small gatherings and events, such as Parties, picnics, photo shoots and weddings. The Parks uniqueness offers a tranquil area to accommodate these small but significant gatherings. By adding a Market could create a scenario where these gatherings as mentioned may be compromised because of the	Should advertise a Call for Proposal with clear criteria. Follow a multi-departmental approach to define and refine rules and regulations and contractual obligations	Traffic congestion and lack of parking is a major concern. Road Reserve was closed for access by engineering department It is advised that Jan Marais Park should develop a designated parking area with 45 degree angled parking (to maximise the number of parking bays) We support all the locations as presented.	Area is big enough to have a market Parking is limited and therefore will pose a challenge for visitors and vendors alike Organisers will have to provide security to safeguard visitors to the market and their vehicles Additional ablution facilities will have to be provided by the organisers as well as waste management The increased foot traffic may impact on the grass and soil which will result	Number of bathrooms should be reflective of capacity and usage of the property. Waste disposal is key, especially for food stalls	

		cosmopolitan change. There will be increased pressure on resource utilisation. • Water • Ablution facilities, • Electricity, • Sensitivity of the environment, • Increased foot traffic and movement will result in erosion of soil and grass (displacement of soil due to erecting and braking up of stalls) The Park area is used formally and informally for events and small gatherings for members of the public for once off events. Jan Marais does not have a formal Parking area. What is the frequency of Market? There will be an increased			in increased maintenance Little to no impact on other businesses and residents in the vicinity Noise will have to be controlled (no loud music)		

		expectation from the section to service the Park with an already stretched budget. This includes but not limited: • Maintenance of grass, • Cleaning of ablution facilities, • Waste Management • Increased pressure on security. • Staff Capacity constraints (Cleaning of the Park- this will impact on day at maintenance and upkeep)					
Eersteriver Bank	**Property Details** Proposed site is zoned as a public open space, public roads and parking area with an approximate trading space of **4 107 m^2**	**Environmental / Parks** Resource capacity is a major concern; able to accommodate +/- 1500 in and out Restrictive Guidelines should be clearly stipulated Primary functionality as a recreational	**Land Use** From a land use perspective there is on face value no objection on the use of any of these sites for the purpose of a market.	**Infrastructure Services** The service provider should provide their own security services to mitigate potential safety issues Sufficient space for a market	**Law Enforcement** Existing on road parking is in place Open space nearby traditionally used for parking overflow during sports events, etc.	**Cape Winelands Health** Number of bathrooms should be reflective of capacity and usage of the property Waste disposal is key,	**Other**

	(See Annexure 3)	facility should remain uppermost Existing calendar commitments approved uses takes priority	The proposed market along the Eerste River, with interface on residential properties, may however cause concern and the feasibility of such use will have to be tested through public participation and may require special mitigation measures to manage any impact.	On street parking can be used by visitors and vendors Security to be provided as well as ablution facilities Should have little impact on nearby businesses May negatively impact on peace and convenience of nearby residents, thus they will have to be consulted Noise control measures will have to be implemented Organisers will have manage waste themselves Environmental impact may be negative as vendors might dump waste products in river	We support all the locations as presented. We just want to limit the area next to the Eersteriver as shown in red, with a condition that walkways should not be obstructed.	especially for food stalls Potential dumping in the river is a concern	
Die Braak	**Property Details** Proposed site is zoned as a public open space, with	**Environmental / Parks** No ablution facilities at the site Potential of infrastructure	**Land Use** No objection on the use of the site for the purpose of a market.	**Infrastructure Services** No trading on the road reserve and sidewalks	**Law Enforcement** The site is large enough to have a market	**Cape Winelands Health** Number of bathrooms should be	**Other** **Building Development Management**

	an approximate trading space of **4 333m^2** **(See Annexure 4)**	(irrigation network) damage is a risk Damage to grassy areas is also risk should trading take place on the grassy areas and is not advised/ desired General cleanliness of the site has proven problematic in the past; custodian department received numerous complaints Existing events will need to be prioritised The primary functionality as a recreational facility should remain uppermost		On and off-street parking is sufficient Limit the footprint as this is a heritage site We support all the locations as presented	Visitors to the market can make use of on street parking The organisers will have to provide security for the safety of visitors and safeguarding of their vehicles Ablution facilities may have to be provided by the organisers There should be minimum impact on the environment in terms of noise and nearby residents and businesses However, is this not a historical site? They foresee many objections to the use of the site for a market. In terms of environmental impact, damage to the grass will result	reflective of capacity and usage of the property Waste disposal is key, especially for food stalls	No objections Stipulate Operating Framework for adherence to by vendors **Property Management** No objections

					and thus more maintenance will be required.		
Mountain Breeze Caravan Park	**Property Details** Proposed site is zoned as an agricultural and rural area and is 6 315m^2. It is an unutilized and dilapidated municipal caravan park with chalets and a swimming pool. **(See Annexure 5)**	**Environmental**	**Land Use**	**Infrastructure Services**	**Law Enforcement**	**Cape Winelands Health**	**General Comments** Property advertised on Call for Proposal as per a Council resolution and in the process of finalisation, therefore not a viable option as a market site.
La Pinetta	**Property Details** Proposed site is zoned as an agricultural and rural area with an approximate	**Environmental**	**Land Use**	**Infrastructure Services**	**Law Enforcement**	**Cape Winelands Health**	**General Comments** Property is slightly off the grid and potentially better suited as a farmers' market

	trading space of 1 037m^2 **(See Annexure 6)**						Access is a challenge, and traffic needs to do an impact assessment Currently have a tenant on a section of the property and need to put an additional agreement in place
Toy Museum	**Property Details** Proposed site is zoned as Community Property and is 4181m^2 in extent and is currently vacant. **(See Annexure 7)**	**Environmental**	**Land Use**	**Infrastructure Services** We support all the locations as presented.	**Law Enforcement** The site is large enough to have a market Visitors to the market can make use of on street parking The organisers will have to provide security for the safety of visitors and safeguarding of their vehicles Ablution facilities may	**Cape Winelands Health**	**General Comments** Whilst the property is ideally situated in the centre of Stellenbosch with sufficient on-street parking, it is not currently available.

					have to be provided by the organisers There should be minimum impact on the environment in terms of noise and nearby residents and businesses.		
George Blake Avenue	**Property Details** Proposed site **Kayamandi Sports Ground** is 7328m² in extent and is currently in use for sporting activities. Proposed site **Kayamandi Economic and Tourism Corridor** is 6196m² in extent and is currently in use for events, meetings and rental office space	**Environmental** Kayamandi Sports field is currently utilised for sporting activities. The lower George Blake is plausible in terms of site identity and availability (Open Public Space). Analysis as to whether the site will be acceptable to the applicants is to be answered. Currently the site is not utilised for any specific formal activity hence why this site is feasible to investigate it as a possible Market Site, also taking all other	**Spatial Planning** The George Blake properties fall within the ATC corridor (precinct 9) for which design guidelines were developed and approved by Council. I have attached said development Guidelines for your convenience. Of importance is the General Development	**Infrastructure Services** No objection, but please take into account the following condition: • Agreements must be in drawn up with existing users of the facility, existing sporting bodies etc. Check also - the parking area on George Blake Road does not belong to the Municipality	**Law Enforcement**	**Parks and Recreation** An application for the upgrade of the Kayamandi sport grounds by Open Play foundation, is currently under consideration. If this application is approved, it will be a 100-million-rand investment in the upgrade of the Kayamandi sports fields. The fields will be replaced by artifice fields, athletic track	**Sport and Recreation** Endorsement needs to be obtained from the Kayamandi Sport Council for any usage that is not sport related on the sport fields. Currently there are various programs taking place during the week aimed at the youth, schools and elderly.

	Proposed site **Lower George Blake Site 1** is 5501m² in extent and is zoned as public open space. Proposed site **Lower George Blake Site 2** is 7671m² in extent and is zoned as public open space. **(See Annexure 8)**	market prerequisites into consideration.	Guidelines (Part A of the report) applicable to all precincts as well as the Guidelines for Precinct 9. You will notice that the George Blake Avenue, which is parallel to the Plankenbrug river, is see as the main NMT and public transport route as well as the primary open space system that depends heavily on the revived and cleaned Plankenbrug river. The spaces you refer to are all open spaces important for development as park			and other facilities, which will not be suitable for a market. I am of the opinion that the George Blake area will be suitable, as well as the area next to Stoffel Smit Road.	Should the market be on weekends; Please note that the sport facility has official league fixtures for various sporting codes over weekends.

			landscapes. I would imagine that once the primary goal of restoring and developing the high-quality park landscape we envisaged there, a sort of informal market, although relatively small, that service users of the park landscape, will not be out of place.				
Bloemhof Parking Area	**Bloemhof Parking** is 3483m² in extent and is zoned as public roads and parking zone. **(See Annexure 9)**	**Environmental**	**Spatial Planning** The Bloemhof site, previously owned by the provincial education department, was split between Stellenbosch	**Infrastructure Services** Bloemhof parking area currently serves as parking for staff and members of the public who have long term contracts for leasing the parking area.	**Law Enforcement/ Traffic Services** Traffic Operations have no objections. 			Municipality and Stellenbosch University. Disputes arose over ownership and usage, prompting a joint planning effort. Initial plans for a conference facility and hotel were dropped due to traffic concerns. A revised plan focusing on municipal land led to a land exchange that allowed for a more functional layout. The approved plan included: An underground	Community services who manage the contracts with the public parking contracts and the day to day operations must be consulted with in detail. Should the Market proceed - the Market Area must fall outside of areas that is designated for public parking. The market can then only fall on Municipal staff parking area. Community Services and affected staff members (should they need to work weekends) must be communicated with. Community services sometimes park municipal vehicles on the municipal parking area over weekends. The Market should also	typically lower, that seems like a practical and effective approach. It would also be beneficial for the organisers to have marshalls to assist with the flow of traffic.		as very few work over weekends in the NPK Building but since they pay a fee per month, they may use the parking if they come to do business in the town. The MM's office has an arrangement (through Director Co-operative Services) with adjoining restaurants and businesses that Bloemhof (staff parking) can be utilised for their customers after hours and over weekends barring that

			parking garage (180 bays) with a versatile, paved public space above. Restoration of historic buildings (Perdestalle and Faure House) to house public amenities. A new public square linking the town and university precincts, with proximity to the Botanical Garden, Sasol Museum, and commercial areas. The De Cameron building was designed to integrate with the square, offering	not obstruct access to the parking area.			the parking is open. There are also monthly parking bays which businesses and private individuals hire from the Municipality to park at Bloemhof and some of them work over weekends. This will or may also create further problems.

			public-facing shops and restaurants. The site is centrally located and walkable from key areas, but has challenges, including loss of parking during events and lack of permanent ablution facilities. With good management, it has strong potential, as shown by similar successful events like the Drostdy Street soirées.				

3. Recommendations

3.1 It is recommended that the Suidwal Eerste Riverbank be considered as a potential market site due to its ideal location and the positive feedback received from stakeholder departments.

3.2 As an alternative, the Braak could be considered a potential site, given its historical significance as a military parade ground for the Stellenbosch and Drakenstein infantry since 1703. Over the years, it has hosted various festivities, including Queen Victoria's birthday celebrations, during which the small cannons—now housed in the Arsenal—were fired. In 1908, the Town Council formally resolved to preserve the Braak as an open space for the residents of Stellenbosch.

The concerns raised by the municipal internal departments can be addressed through appropriate conditions of approval.

7.9	**COMMUNITY SERVICES:(PC:)**

7.9.1	**UNIVERSAL ACCESS (UA) IMPLEMENTATION PROGRESS REPORT 2024/2025**

Collaborator No: **785309**
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **21 May 2025**

1. SUBJECT: UNIVERSAL ACCESS (UA) IMPLEMENTATION PROGRESS REPORT 2024/2025

2. PURPOSE

To provide a progress report on the implementation of Universal Access within Stellenbosch Municipality.

3. DELEGATED AUTHORITY

For information to Mayco.

4. EXECUTIVE SUMMARY

The department employed the services of Change Ability to assist with the components required for the mainstreaming of the UA Policy across all directorates. The components include the following:

- Establishment of a UA Champion forum to drive processes internally per directorate.
- Practical and Experiential Learning on UA theory and practise in the workplace
- Assessment of policies in terms of alignment with the UA Policy.
- Policy operationalisation and the setting of objectives per directorate.

A report on the implementation of the above is attached as **ANNEXURE 1**.

5. RECOMMENDATION

that MAYCO note the Universal Access Progress Report 2024-2025.

6. DISCUSSION / CONTENTS

6.1 Background

Stellenbosch Municipality approved the Universal Access Policy that guides how we render services to ensure accessibility for all persons including persons with disabilities. The policy aims to ensure the human rights of people with diverse needs and requirements through alignment projects and programmes to support the principle of universal access, participation and equalization of opportunities for all people including people with disabilities.

The aim of mainstreaming the UA Policy is to:

1. To create an understanding of the municipal-approved UA Policy.
2. To establish an understanding of what Universal Access is among a broad base of municipal decision-makers and how it relates to each of their functions; and
3. To align 2 policies / SOP / Norms and Standards per directorate to the UA Policy – the intent being that further policy alignment will take place over following years.

6.2 Discussion

The Universal Access program implementation required the identification of UA Champions for each directorate as a directorate representative. General UA (Universal Access) / UD (Universal Design) consultations are conducted with champions, empowering them to execute the Universal Access implementation plan. Introductory awareness training sessions about disability, diversity, and the Universal Access Policy (UAP) of Stellebosch Municipality have been conducted with UA Champions per Directorate and managers of departments within each directorate. The training below was implemented

Activities for 2024/25 focused on the following:

- Monthly consultations with directorate UA Champions
- Policy assessment and alignment
- Policy operationalization

Varying success was achieved with the above depending on the attendance of the monthly UA Champion meetings, the level of support the champions received from management, and availability and willingness of policy holders to make the required changes to policies.

Progress per directorate can be found in **ANNEXURE 1**. It should be noted that after two years of awareness, sensitization and training, officials across the municipality still do not have the accessible way of doing their work front of mind.

Support was gained from the Municipal Manager and a KPI per director relating to the achievement of Universal Access mainstreamed throughout all directorates has been approved for 2025/26.

4.3. Financial Implications

In accordance with the approved budget.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation and has specific bearing on the implementation of the Universal Access Policy.

6.5 Staff Implications

This report has no additional staff implications to the Municipality.

6.6 Previous / Relevant Council Resolutions:

40TH COUNCIL MEETING: 2021-01-27: ITEM 11.9.1

RESOLVED (nem con)

(a) that Mayco notes the Universal Access Summary Report.

6.7 Risk Implications

Risks are addressed through the content of the report.

6.8 Comments from Senior Management:

6.8.1 *Director Community and Protection Services*

Content noted.

6.8.2 *Municipal Manager:*

Content noted.

ANNEXURE 1

ChangeAbility

OUR PURPOSE IS TO PIONEER PROGRAMMES THAT CHANGE COMMUNITIES BY IMPROVING THE LIVES OF PEOPLE WITH DISABILITIES.

REPORT FOR 2024-25:

B/SM 60/22: UNIVERSAL ACCESS TRAINING AND OTHER SERVICES FOR THE PERIOD ENDING 30 JUNE 2025

The Stellenbosch Municipality adopted a Universal Access Policy (UAP) to "inform service delivery standards of all municipal departments to achieve the highest level of accessibility possible." The UAP stipulates that "although specific roles and responsibilities are outlined with specific attention to the Office of the Municipal Manager and the Department Community Development, all directorates and departments have a responsibility in mainstreaming the rights of persons with disability within their realm of responsibilities. Each directorate has a specific function in service delivery to the community and are responsible for the inclusion of UA and UD in the conceptualization, implementation and reporting of projects."

The Stellenbosch Municipality appointed ChangeAbility as the service provider to facilitate the systematic implementation and integration of the UAP throughout all directorates and services of the Municipality. To do this, we are dependent on the cooperation of key role players in all directorates and departments, as well as internal collaboration with, and support of the allocated UA Champions. There were significant delays to start the Tender activities i.e. Awareness and Sensitisation training in 2022-23, due to the unavailability of key participants from different municipal directorates.

The second year of the tender saw a significant increase in activities and outcomes. An Universal Access Implementation Plan for 2023-24 was developed in consultation with the Community Development Department. This plan was presented to the Municipal Manager for approval and activities commenced on 21 September 2023.

During the third and final year of the tender, we focused on the alignment of several Municipal policies with the UAP, policy operationalisation, the development of implementation plans for each directorate, and capacitating key role players to maintain the focus on a practical approach to the UAP.

This report presents a brief summary of the key outcomes and is supplemented by the more regular reports on activities submitted to the Department of Community Development.

Champions

Six municipal champions, one per directorate, were required for the project execution. At the start of the 2023-24 financial year, only five champions were confirmed. The champion for the Corporate Services directorate joined us during the year. The champions group gathered for seven group consultation sessions during the second year of the project. These meetings were relatively well attended by the champions, with an average attendance of 4 per meeting in the first two years. In addition, the service provider engaged with each champion in individual online consultation sessions during May 2024.

These champion meetings were crucial to the projects as the champions actively discussed their highlights and challenges, affected municipal policies, and shared recommendations for the way forward.

During the 2024-25 financial year, the champions engaged in six group consultation sessions to date (on 17 Sept '24, 17 Oct '24, 14 Nov '24, 16 Jan '25, 25 Feb '25, 13 Mar '25), with three additional sessions scheduled for 17 Apr '25, 15 May '25, and 12 Jun '25. The Financial Services champion was unable to attend any of these sessions in person due to an increased workload. In response, we moved all the group consultation sessions to online Teams meetings.

The Infrastructure Services champion unexpectedly left the employ of the Municipality at the end of the 2023-24 financial year. He played a leading role in the UAP implementation process, and the loss of his valuable contributions was evident following his departure. The new Infrastructure Services champion joined the team in November 2024.

In January 2025, the Office of the Municipal Manager champion moved to a new position within the Municipality with added responsibility and could not continue in her role as champion. The Office of the Municipal Manager nominated a new champion who joined the team in January 2025.

The service provider supported the two new champions through individual consultation meetings and worked through the original UA Awareness and Sensitisation training with them on 5 March 2025.

The champions play a crucial role in the UAP implementation process. However, all the champions indicated the need for more support from all levels of management within their respective directorates. The champions collectively agreed to collaborate with colleagues from their directorate to form a small UA committee or working group to expand their reach.

Directorates

1. Planning and Economic Development Services
    a. Activities
        i. General UA/UD Monthly Consultation:
            i. Champion attended four monthly UA champion meetings and one individual consultation meeting with the service provider.
        ii. Policy Assessment and UA alignment
            i. Champion and policy owner/s attended two feedback sessions (one in person and one online) on the three policy documents submitted for review.
        iii. Policy Operationalisation
            i. Feedback document with recommendations generated and shared with champion.
            ii. Manager requested additional consultation and training for Housing Administration division.
            iii. No additional policies submitted for UAP alignment.
        iv. The following policies were assessed for UA alignment:
            i. Informal Traders Policy (2014)
            ii. Policy for the Naming and Renaming of Streets, Public Places etc. (2022)
            iii. Staff Rental Stock Allocation Policy (2022)
    b. Buy-in
        i. While the UAP champion for this directorate did not attend all the meetings, he is committed and dedicated to the UAP implementation process.
        ii. The champion approached a colleague to join him as an additional UAP champion.
        iii. During the policy alignment process, managers identified challenges with the buy-in and support from senior managers within the directorate.

2. Finance
    a. Activities
        i. General UA/UD Monthly Consultation:
            i. Champion attended four monthly UA champion meetings and one individual consultation meeting with the service provider.
        ii. Policy Assessment and UA alignment
            i. Champion and policy owner/s attended two feedback sessions (online) on the two policy documents submitted for review.
        iii. Policy Operationalisation
            i. Feedback document with recommendations generated and shared with champion.
    b. Policies
        i. The following policies were assessed for UA alignment:
            i. Indigent Policy (2014)

ii. Credit Control and Debt Collection Policy (2014)

c. Buy-in
   i. While the UAP champion for this directorate could not attend all the meetings, she is committed and dedicated to the UAP implementation process. The champion could only attend online Teams meetings due to her workload.
   ii. During the training and awareness sessions, attendees identified challenges with the support and buy-in from senior managers within the directorate.
   iii. The champion highlighted a lack of emotional support within the directorate amid very high stress levels experienced by employees.

3. Community and Protection Services
   a. Activities
      i. General UA/UD Monthly Consultation:
         i. Champion attended six monthly UA champion meetings and seven individual consultation meetings with the service provider.
      ii. Awareness and Sensitisation
         i. Six representatives from Community Development attended an Awareness and Sensitisation training session presented by the service provider.
      iii. UA/UD Theory Training
         i. Six representatives from Community Development an UA/UD Theory training session presented by the service provider.
      iv. Policy Assessment and UA alignment
         i. Champion and policy owner/s attended three feedback sessions on the policy documents submitted for review and alignment.
      v. Policy Operationalisation
         i. Feedback document with recommendations generated and shared with the champion and policy owners.
         ii. Review of Universal Access Policy in progress.
         iii. Development of KPI indicators for directors in progress.
      vi. Development of Implementation Plans
         i. Training manual for UA/UD and UAP implementation in progress.
   b. Policies
      i. The following policies were assessed for UA alignment:
         i. Tree Management Policy (2020)
         ii. Electricity and Community Fire Bylaws (2013)
         iii. Universal Access Policy (2021)
   c. Buy-in
      i. The UAP champion for this directorate is committed and dedicated to the UAP implementation process.

ii. Senior managers within this directorate are actively involved in the UAP implementation process.

4. Infrastructure Services
    a. Activities
        i. General UA/UD Monthly Consultation:
            i. Newly appointed champion attended three monthly UA champion meetings and two individual consultation meeting with the service provider.
        ii. Introductory Awareness and Sensitisation
            i. Newly appointed champion attended an Awareness and Sensitisation training session presented by the service provider.
        iii. UA/UD Theory Training
            i. Newly appointed champion attended a UA/UD Theory training session presented by the service provider.
        iv. Policy Assessment and UA alignment
            i. Champion and policy owner/s attended two feedback sessions (online) on the two policy documents submitted for review.
        v. Policy Operationalisation
            i. Feedback document with recommendations generated and shared with champion.
    b. Policies
        i. The following policies were assessed for UA alignment:
            i. Policy on Sidewalk Accessibility (2023)
            ii. Non-motorised Transport Policy (2021)
    c. Buy-in
        i. The UAP champion for this directorate from July 2022 to June 2024 was committed and dedicated to the UAP implementation process. He understood the principles of UA/UD and applied it in his direct environment. However, he unexpectedly left his position at the Municipality at the end of the 2023-24 financial year. He played a leading role in the UAP implementation process, and the loss of his valuable contributions was evident following his departure.
        ii. A new Infrastructure Services champion joined the team in November 2024. He joined the champions' meetings with active participation and enthusiasm. He was familiar with some of the UA/UD work and the UAP but did not attend the initial training sessions. The service provider offered individual support and training to assist. On 5 March 2025, the new champion attended an online UA Awareness and Sensitisation training session.

5. Office of the Municipal Manager
    a. Activities
        i. General UA/UD Monthly Consultation:
            i. Original champion attended three monthly UA champion meetings and one individual consultation meeting with the service provider.
            ii. Newly appointed champion attended two monthly UA champion meetings and two individual consultation meeting with the service provider
        ii. Introductory Awareness and Sensitisation
            i. Newly appointed champion attended an Awareness and Sensitisation training session presented by the service provider.
        iii. UA/UD Theory Training
            i. Newly appointed champion attended a UA/UD Theory training session presented by the service provider.
        iv. Policy Assessment and UA alignment
            i. Champion and policy owner/s attended three feedback session (one in person and two online) on the policy documents submitted for review.
        v. Policy Operationalisation
            i. Feedback documents with recommendations generated and shared with champion.
            ii. The Communications manager and team finalised and uploaded the UA online resource library to the Municipality's internal network.
    b. Policies
        i. The following policies were assessed for UA alignment:
            i. Communication Policy (2018)
            ii. Performance Management Policy (2020)
            iii. Public Participation Policy (2023)
    c. Buy-in
        i. The UAP champion for this directorate from July 2022 to January 2025 was committed and dedicated to the UAP implementation process, attending most meetings with active participation and insight. However, she moved to a new position within the Municipality with added responsibility in January 2025, and could not continue in her role as champion.
        ii. The Office of the Municipal Manager timeously nominated a new champion who joined the team in January 2025. She was not familiar with UA/UD work and the UAP and did not attend the initial training sessions. The service provider offered individual support and training to assist. She attended an online UA Awareness and Sensitisation training session with the new Infrastructure champion on 5 March 2025.

6. Corporate Services
    a. Activities
        i. General UA/UD Monthly Consultation
            i. Champion attended four monthly UA champion meetings and one individual consultation meeting with the service provider.
        ii. Policy Assessment and UA alignment
            i. Champion and policy owner attended one online feedback session on the policy document submitted for review.
        iii. Policy Operationalisation
            i. Document generated and completed following individual consultation with champion.
    b. Policies
        i. The following policies were assessed for UA alignment:
            i. Outdoor Dining Policy (2010)
            ii. No further policies submitted.
    c. Buy-in
        i. The director only appointed a champion for this directorate to join the team in October 2023.
        ii. While the UAP champion for this directorate only joined the process much later, he is committed and dedicated to the UAP implementation process.
        iii. This directorate demonstrated several challenges with the buy-in from senior management with low attendance of awareness sessions and delayed identification and provision of policies for UAP alignment.

Policy alignment

The following policies were reviewed for alignment with the UAP. The implementation of suggested changes to ensure alignment with the UAP needs to be actioned by each directorate.

Directorate	Policy	Status
MM's Office	Communication Policy (2018)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
	Performance Management Policy (2020)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.

	Public Participation Policy (2023)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
Financial Services	Indigent Policy (2014)	Reviewed for alignment and feedback provided to champion to implement with next policy review.
	Credit Control and Debt Collection Policy (2014)	Reviewed for alignment and feedback provided to champion to implement with next policy review.
Planning and Economic Development	Informal Traders Policy (2014)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
	Policy for the Naming and Renaming of Streets, Public Places etc. (2022)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
	Draft Staff Rental Housing Policy (2022)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
Infrastructure Services	Policy on Sidewalk Accessibility (2023)	Reviewed for alignment and feedback provided to champion to implement with next policy review.
	Non-motorised Transport Policy (2021)	Reviewed for alignment and feedback provided to champion to implement with next policy review.
Protection and Community Services	Tree Management Policy (2020)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
	Electricity and Community Fire Bylaws (2013)	Reviewed for alignment and feedback provided to policy owner to implement with next policy review.
	Universal Access Policy (2021)	Review of UAP in progress. Suggested changes to be discussed with UA champions from each directorate.
Corporate Services	Outdoor dining	Reviewed for alignment and feedback provided to champion to implement with next policy review.

Project management

Regular progress meetings were held with our main contact, Priscilla Napoleon during the period to date. These meetings were productive and sufficient in ensuring that the project is executed as planned and adjusted were necessary.

To date, a total of 103.5 hours has been billed for a total of R96 979.50.

Report date: 07 April 2025.

Report compiled by: Dr. Cindy Wiggett-Barnard & Hetsie Veitch

7.10	**RURAL MANAGEMENT AND ENVIRONMENT: (PC: CLLR C MANUEL)**

7.10.1	**REQUEST FOR THE ALLOCATION OF FARM No(s): 502AS PORTION AS1; 502AS PORTION AS2, AND 502AS PORTION AS2; TO EMERGING FARMERS IN ACCORDANCE WITH THE STELLENBOSCH MUNICIPALITY POLICY FOR MANAGEMENT OF MUNICIPAL AGRICULTURAL LAND, 2016**

Collaborator No: **785640**
IDP KPA Ref No: **Green & Sustainable Valley**
Meeting Date: **21 May 2025**

1. SUBJECT:REQUEST FOR THE ALLOCATION OF FARM No(s): 502AS PORTION AS1; 502AS PORTION AS2, AND 502AS PORTION AS2; TO EMERGING FARMERS IN ACCORDANCE WITH THE STELLENBOSCH MUNICIPALITY POLICY FOR MANAGEMENT OF MUNICIPAL AGRICULTURAL LAND, 2016

2. PURPOSE

To provide Council with the pertinent facts in order to approve the request to allocate the three (3) agricultural land portions (see **APPENDIX 1**) as prescribed in the said Policy.

3. DELEGATED AUTHORITY

Executive Mayor in consultation with the Executive Mayoral Committee has the delegated powers, in terms of Stellenbosch Municipality: System of Delegations as amended on 22 June 2022 to approve lease agreements of Council properties for a period shorter than 10 years and a contract value of less than R5 million.

4. EXECUTIVE SUMMARY

Stellenbosch Council adopted “The Policy for the Management of Municipal Agricultural Land (2016)” with the purpose of availing agricultural land for emerging farmers. The item deals with the allocation of vacant municipal land to successful land applicants after the Council resolved to advertise portions of vacant municipal agricultural land for leasing purposes to current and potential emerging and small-scale farmers.

5. RECOMMENDATIONS

(a) that Council take note of the process and scoring undertaken to allocate and award the three (3) municipal agricultural land portions to the highest scoring applicant convened at the operational committee meeting that took place 17 April 2024 (refer to **APPENDIX 2**). The Operational Committee’s combined evaluation scoring sheets is attached as **APPENDIX 3**;

(b) that Council approves that Farm No.: 502AS, portions AS1, AS2 and AS3, Stellenbosch Division, with a total area of 26.1-hectare (ha), with no (nil) water rights, be awarded to StellCARE, copy of application is attached as **APPENDIX 4**;

(c) that Council approve that the land portions awarded in (b) be leased for a period of Nine (9) Years & Eleven (11) Months, with the option of renewal;

(d) that Council take note that the monthly rental amount for emerging farmers is determined as per the calculation for the previously allocated tariff for emerging farmers; and

(e) that Council take note that in the event 502AS is awarded to StellCARE, a separate service level agreement (SLA) will be established. This SLA aims to enable the Local Economic Department to ensure that their emerging farmer program extends its benefits to all emerging bee farmers located in the WC024 area.

6. DISCUSSION / CONTENTS

6.1 Background

During 2016, Council adopted the Stellenbosch Municipality Policy for the Management of Municipal Agricultural Land. Following the adoption of the said policy a number of land parcels have been allocated to emerging farmers for a period of less than 10 years.

Farm 502AS is owned by the Stellenbosch Municipality and is situated next to several other portions of agricultural land that is currently being leased out to different farmers. Some of these farms are under long-term lease agreements and dealt with by the Property Management department whilst others are currently rented out to small scale farmers through the Local Economic Development Department.

Farm 502AS was initially leased to Mr. HW Gebers. The lease agreement was formally terminated on 30 April 2021. The property has been vacated by the tenant and the council approved that the property is given to the Local Economic Department (LED) for use for small scale farmers.

It must be noted Council approved that Farm No(s) 502AS, Portions AS1, AS2 and AS3, be advertised for the potential lease to emerging farmers. The notice to request for the Lease of Municipal Agricultural Land was advertised in the local newspaper on 20 February 2025, copy attached as **APPENDIX 5**. On the closing date of 13 March 2025, twelve (12) applications were received, and the list of applicants including their application form are attached as **APPENDIX 6.**

6.2 Discussion

The Operational Committee approved by Council and comprising of officials from internal municipal departments (Property Management, Local Economic Development, Legal Services, Community Services, and Environmental Management) evaluated the twelve (12) applications in accordance with the criteria to obtain land set out in the Policy for the Management of Municipal Agricultural Land. Each application was assessed against its business plan, with particular attention to the proposed business model, production viability, market access, financial viability, support services, and financial model. Based on this evaluation (refer to **Appendix 7** for the independent evaluation forms), the top-scoring applicant have been recommended for allocation of their respective land portion/s.

FARM 502AS APPLICANT DETAILS				
NO	**APPLICANT**	**FARM PORTION**	**SCORE**	**COMMENTS**
1	Andile Balula	No indication		Compulsory documents not submitted
2	Chithakalo Mbalula	Any portion		Compulsory documents not submitted
3	Isak Swarts	AS3		Compulsory documents not submitted
4	John Williams	No indication		Compulsory documents not submitted
5	Kurt Jacobs	Any portion		Compulsory documents not submitted
6	Kyle Davids	Any portion		Applicant wants to plant grapes which is not in line with Council Resolution
7	Rudolf Matthews	AS1		Insufficient Supporting Documents
8	S & M Eco Farming	No indication		Cultivation proposal which is not in line with Council Resolution
9	SP Can Land & Rivers Project	AS2		Insufficient Supporting Documents
10	**StellCare**	**All three portions**		**Established Program and the proposal is appropriate as it relates to 502 AS**
11	Stuart R Burgess	AS1 or (All three portion)		Compulsory documents not submitted
12	Three Beauty LM	All three portions		Compulsory documents not submitted

StellCARE a registered non-profit organisation (NPO) received the highest overall score from the operational committee across all evaluation criteria. The organisation has a

proven track record of actively implementing projects and programmes within the WC024 municipal area and through their employment initiative, StellCARE has successfully facilitated a total sixteen thousand one hundred and thirty-one (16 131) employment opportunities for Stellenbosch residents from 2022 to date (refer to **APPENDIX 8**).

In 2024 StellCARE launched a pilot programme in which eight (8) emerging farmers received training between October and December. As part of this initiative the organisation procured 100 beehives, 26 of which are currently in the vicinity of Spier. The success of this project has highlighted the need for land to scale the operations effectively and therefore StellCARE submitted an application for the aforementioned portions of land on Farm 502AS.

Should the application be approved StellCARE intends to expand its emerging farmer development programme by training and equipping 40 honeybee farmers. The anticipated outcome of the expanded project includes the production of 1000 to 1500 kilograms of honey per annum, with an estimated revenue of R100,000 to R200,000 annually through both wholesale and bottled honey sales. A presentation illustrating the scalability of the initiative and the potential for achieving economies of scale is attached for reference (see **APPENDIX 9**).

6.3 Financial Implications

The successful applicants will get a discount of 20% of the normal municipal tariff for agricultural land to bring them on par with tariffs applied to the current emerging farmers.

6.4 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.5 Staff Implications

This report has no staff implications to the Municipality.

6.6 Previous / Relevant Council Resolutions:

24TH COUNCIL MEETING: 2024-07-30: ITEM 10.3.1

RESOLVED (majority vote with 2 abstentions)

(a) that the access to area be confirmed;

(b) that the allocation to upcoming farmers for farming that is not invasive and harmful to the biodiversity be approved in principle and the item be brought back after allocation process was followed; and

(c) that the CFO confirms the financial situation regarding the recouping of the outstanding money.

6.7 Risk Implications

This report has no risk implications for the Municipality.

17 April 2025, 09:14am

Mark Harris 0:03
Welcome, everyone. Present the committee members for the evaluation of our applications that we received on Form 502A. S persons 1:00 to 3:00.
We need to discuss the applications that we receive. I think there was a total of 12 correctly. If I'm wrong, I think there was 12, yes.
And we have worked through all the applications and we would like to just discuss the ones that we feel is not of merit on these applications.
That they have failed to submit all the necessary paperwork, in particular the business plan that speaks to.
Their proposed business model.
Production viability, market access.
Financial viability and they finance model, which was indicated right on the front of the application forms. So each person that applied would have no known what documents is required. So if they have failed to submit those documents, I would like to suggest to the committee or proposed to the committee. I can't suggest that.
Such a bit be made non compliant.
Everyone happy with that?

Yolande van den Berg 1:37
Thank you, Steve.

Schalk Van der Merwe 1:38
Yes.

Mark Harris 1:40
Thank you.
So if we make our way, I just need to get my forms back in order. I want to go to applicant #1, so I'm just going to share my screen so that everybody can see it.
Let me know if you can see the screen.
Call David Hatson to move over.

Schalk Van der Merwe 2:17
I hope we can see it.

Mark Harris 2:20
You just need to move it over.
Us.
Just bear with me. What do I need to go here?
You the number one person.
I'm just going to.
So OK, I'm going to read this out as we go along.
Hold on. Wait, wait. Open it up.
Use the silence everyone.

Tammy Leibrandt 3:34
I'm going. What can you feel the song a lullaby.

Mark Harris 3:40
OK, sorry, perfect. Let me know if you can see this. Is this the evaluation sheet?

Yolande van den Berg 3:43
I'd love a bell.

Mark Harris 3:48
So this was for andiley balula.
Well, in my notes, you know, he, he he submitted a a business plan but it didn't cover a lot of the things.
And I actually want to because they are formed dwellers. They live on farms. There was no proof of residency in the form of a affidavit or anything submitted.
And his intention also, he mentioned on his little proposal that he wrote out, was to plant fame boss.
So.
If if I can just get everybody's agreement on whether he's non compliant.

Schalk Van der Merwe 4:41
No, I agree.

Mark Harris 4:42
It's you.

Schalk Van der Merwe 4:44
Yeah, he's the one that's got the the three halves and he wants to extend it to 20. But but like you said, the information that was submitted.
Gives you no confidence of of how it's gonna work and and and that is going to be successful in in that endeavour, which is sad because he is local, he's got experience in that area. But yeah, the application is just is is lacking.

Mark Harris 4:57
Yes.
Yeah.
With you anyone else?

Joan Felix 5:15
I'm just picking on the correction myself and.
This together as a department and I think what is indicated is he also wants to do. Farm with bees, but at the end the indicated that he wants to assist with the alien plants. Removing the alien plants to ensure that the plane goes survives or something like that. Do workers can just come in and.

Mark Harris 5:38
Mm hmm.
OK, OK.

Joan Felix 5:46
So you don't want to farm with the finest, yeah.

Mark Harris 5:48
One thing, bus. OK, my apologies for that. I detect that.

Yeah, that's if you and crystal wanna come in or should.
See the Yonkers.
Is he in?

Daniel Jonkers 6:09
I'm in, Sir. My apology. Today I concur with Miss Felix.

Mark Harris 6:14
Thank you, Chief Yonkers and and thank you for being part of the committee.
If you would like, I can gladly take you through it. If you are happy because I am quite certain that Mrs Felix must have just taken you through what the committee does and the role that the committee plays when it comes to the issuing of municipal agricultural land, especially to our emerging and small scale farmers. If you are happy, then we will proceed. Thank you, chief.

Daniel Jonkers 6:48
So I'm quite happy. Yes, Miss Felix did believe me. So I'm on the same page with you guys. Thank you.

Mark Harris 6:56
I think you think you've. Then we will proceed to the second applicant which is.
I mean, there was just nothing at that and I just moved past that one.

Tammy Leibrandt 7:13
Agreed.

Mark Harris 7:15
Thank you. Thank you. And then there was #3, which was Isaac Schwartz also no business plan.
Yes, in he is also only in residency within 7 bus for six years and not the 10 as as required.

Schalk Van der Merwe 7:36
I agree we can move on.

Joan Felix 7:38
Green.

Mark Harris 7:39
Thank you. Thank you, thank you. Then we have John Williams also, no business plan at that.

Tammy Leibrandt 7:40
Move on. Thank you.

Yolande van den Berg 7:40
Green.

Schalk Van der Merwe 7:51
Y'all agree.

Yolande van den Berg 7:52
I agree that we move on. It's actually quite sad. It's sad to even look at this because you know these people, we are trusting them to take care of quite valuable land. So if they don't even attach the minimum.

Mark Harris 7:54
Thank you. When, yes you.

Tammy Leibrandt 7:54
Move on.

Mark Harris 8:06
Yes.
Yes, boss.

Yolande van den Berg 8:12
Then yeah, we shouldn't process it, so agreed.

Schalk Van der Merwe 8:13
Yeah.

Mark Harris 8:15
Sure. Then there's Kurt Jacobs also had a little small proposal that he wrote, but no business plan attached.

Schalk Van der Merwe 8:24
Is that and and he's clearly a livestock farmer, yes.

Mark Harris 8:28
I've stopped, guy. Yes. You wanted to use the land for livestock?

Schalk Van der Merwe 8:32
And and that is a that is a risk. So for me he doesn't qualify.

Mark Harris 8:38
Thank you, Scott.
We move on to.

Yolande van den Berg 8:42
I agree with scope.

Mark Harris 8:45
Call Davids.
In queue, do we want to call David's also?
No business plan.
And we move on.

Schalk Van der Merwe 9:02
Yep.

Mark Harris 9:04
We have Rudolph Matthews. We had a little bit of a proposal, but he's the person

that I spoke about when you could see that the conclusion about the the municipality can evaluate the land over three years as well as take yearly drone footage of that particular suit. He be awarded land, but he clearly did not.
Cover anything that we requested as far as business plan is.
What we needed in the business plan, can we move on or do anybody want to say have something else to say?

Schalk Van der Merwe 9:44
It said he he is an existing bee farmer, but I agree there was just no information to go on. So yeah, in my opinion we can move on.

Joan Felix 9:55
Yes, we can come.

Mark Harris 9:55
Thank you.
Thank you, everyone. And then there is SNM eco farming. I know these guys they've applied last year also, but interesting when I went through their business plan, I think it is exactly the same as last year, nothing changed, it was copy and pasted and it still speaks to livestock, nothing to do with beekeeping, so yeah.

Schalk Van der Merwe 10:06
Yeah.
And cultivation.

Mark Harris 10:23
That yes, yes, exactly.
So we move on, we have.
#9 would be SP can land in the Rivers project. They are. They attached. The business plan is not detailed. It was just a proposal, so it doesn't it's it's this company that spoke about lavender planting as well as Ginza planting. So yeah, how does the committee feel?
And we move on.

Schalk Van der Merwe 10:58
Yep.

Joan Felix 10:58
Yes, we can move on.

Mark Harris 11:01
So now we have steel key and I think Selke took really time. I do know that they called me. They currently do have.
Hives and the hives is on 502 B eights, so they're using the hives to cross pollinate on those farmers land, but they don't have their own land and they actually went out to the land to see if there was adequate food for the bees because they are financially, you know, strong enough to to procure more hives. But it was just a fact that they did not have adequate land space.
So even though it is an PO.
It's corporate citizen. We know that the criteria is that you must be able to prove that you are a part of a disadvantaged group.
And I think with what's delta does.
They are currently working with mostly historically disadvantaged groups and different key populations within the Stalin Bas area. That is what I know about Stalkare.
They they really, they really want this land because they want to give back and that they want to train more people in the areas of beekeeping. I mean, you've read through the.
Business plan and proposal please anybody that want to add, please go ahead.

Schalk Van der Merwe 12:31
For me, this was basically the only one that that qualified for me. It's an established programme. It's an appropriate proposal as far as portion A is relates. You threw a curveball at the beginning where you propose that we might look at them for and then, you know, some of the other applicants can can apply to participate through them.
But if they're an established programme, they've got their farmers under them.
And perhaps when we enter into a contract with them, we can just basically maybe

specify that the farmers they employ must be.
From previously at disadvantage for me.

Mark Harris 13:16
Yeah.

Schalk Van der Merwe 13:16
From from the package of applicants, this was.
Head and shoulders above anything that we received. So so my proposal will be to to engage with him, to assign those all three all three portions, because they also indicated that they are interested in in all three portions.

Mark Harris 13:28
Yeah.
Yeah.

Schalk Van der Merwe 13:37
I got the most confidence from the application.

Mark Harris 13:38
OK.
No, for sure for sure. And then like you mentioned, we can obviously just go into a separate service level agreement with them where we tie them to, you know, really get your people from the historically disadvantaged groups.
Yolandi have you worked with Cellcare before?

Yolande van den Berg 14:00
I have not in the forming industry, but I've worked with stalkers.
With the early childhood development centres and with some of the other.
Community projects and I'm very comfortable with style care. I think that it's an organisation that, you know, they've been around for quite some time and it's well run.

Mark Harris 14:20
That they do.

Yolande van den Berg 14:33
And I've always experienced them as good, honest people. And so I'm very comfortable.

Mark Harris 14:38
Yep.

Yolande van den Berg 14:42
With the organisation.

Mark Harris 14:44
OK, thank you, Tammy. You may go ahead.

Tammy Leibrandt 14:48
Thank you, Jay. I agree. I've worked with him.
In terms of the Sauki River project and the professionalism is or as per the document that was submitted. So I am also comfortable with the application and the evaluation regarding the business plans. So I am in agreement.

Mark Harris 15:03
Yes.
OK.
I'm happy with that. Anyone else perhaps?
Then we can move on. We are all happy with stealth care. Stealth care gets the green light.

Yolande van den Berg 15:28
Yeah.

Mark Harris 15:29
And then the next one. Yeah, yeah. Sorry. Oh, yeah. Oh, yeah. Perfect. And then we go on to miss.

Yolande van den Berg 15:34

Yeah, yeah, I'm. I'm just happy because this this portion of land has a very long history and it's just it's good to allocate it to someone so it can be used.

Mark Harris 15:44
Especially someone that does well within our locality and community. I I mean that.

Yolande van den Berg 15:45
For.
Absolutely.

Mark Harris 15:51
Was perfect. Then we move on to Mr Steward Burgess.
Who in his proposal he there was a lot that he had to say. I would really encourage the members of the committee who did not read through his proposal to just go read through it.
I unfortunately, Mr Burgers, if we should put him up against style care. Mr. Burgess has not worked with our community.
And because he is saying he's in his.
Proposal that he would venture into working with the community. But for me, I I don't think Mr. Burgess is the correct person because he sought falls of even being.
A previously disadvantaged individual or part of a previously disadvantaged group, and that is also one of the the requirements.
Because if he was an entity and he could have proved like stelke, then maybe he could have.
Also benefited from this, but unfortunately he is a individual and not his application is not linked to a corporate citizen, that even being an NPO similar to stalking. So I am moving on from Mr Burgers. Anyone else within the community.
Committee.

Yolande van den Berg 17:20
Indeed, no, I agree.

Schalk Van der Merwe 17:24
I agree.
Long story short, he wants to see the the portions conserved and protected, and I

think if we if, let's say theoretically the committee agrees and we go the style care route with with bee farming hives on the property, we're going to be achieving that in any case.

Mark Harris 17:27
Yeah.
Yeah.
For sure.

Schalk Van der Merwe 17:44
So yeah, so I'm happy to move on from from his proposal.

Mark Harris 17:49
Yes, thank you. Thank you for that. Anyone else?
And then we are at three beauty LM like I said.
Similar, they had a proposal, but it did not speak to anything.
Anyone else?

Schalk Van der Merwe 18:09
Agree.

Mark Harris 18:10
Perfect. So.

Joan Felix 18:12
We agree it.

Mark Harris 18:14
Thank you. So that concludes this evaluation. Now it would be to finalise the report and then I will say that report with the committee and we can see how we can.
Maybe just skulk, especially your expertise for what you've mentioned. Now, when it comes to the conservation of that particular portion, it would also be good that we can maybe sit yolandi sit with.
Normally what what I've done with District Municipality Winelands when we wanted to award.

Especially funding to a farmer, there was a site visit that was basically done with that farmer. I am glad to do that where I can maybe go to them, do a little interview with Stelke regarding the business model and that they proposed and maybe also put that into.
As a as a appendices that we have done that we are happy with the.
You know the setup of their business, their offices. You can see this is not somebody that's working, not out of the garage, but they have property that they're working from. They they have done this projects so that I can strengthen our item that will go to Council.
Does anyone in the committee think that would be a benefit? Should I should I proceed in doing that?

Yolande van den Berg 19:56
Walk I think. I think you should.

Mark Harris 19:59
Yeah, OK. I will definitely do that.

Joan Felix 20:01
Let's see.

Mark Harris 20:03
Perfect. OK. So I think the members of the committee that concludes this meeting, I'm happy. I'm actually excited. Yolandi when I went through the when I went through the.
Applicants there was a winemaker from Salon, both a young boy.

Yolande van den Berg 20:25
Really, I think right.

Mark Harris 20:26
And yes, so so hopefully soon, hopefully soon. The committee will also form part of another initiative that corporate services has mentioned that we think would be a first for.
And boss also, but further discussions on that will happen in future.

Yolande van den Berg 20:47
A very, very exciting project that Mark and I are working on.
Yeah, but hopefully soon we will.

Mark Harris 20:55
Yeah. One, yes. Once we have that land, then we can definitely inform the committee and I think everybody would would be up in arms of joy about that.

Yolande van den Berg 21:07
OK. Thank you, Tim.

Mark Harris 21:07
So thank you to everyone. Thank you to everyone. We I mean I hope and pray that you have a blessed Easter be safe. If you go on holiday for those that are working. Also enjoy work, stay blessed. Stay safe.
Thank you everyone.

Schalk Van der Merwe 21:27
Goodbye, donkey. I'll let you see in a few years.

Yolande van den Berg 21:28
Thanks to you, Donkey Ela molad.

Mark Harris 21:30
See out there.

Joan Felix 21:30
Thank you for placing yourself goodbye.

Yolande van den Berg 21:32
Yes, bye.

Mark Harris 21:35
8.

Yes. OK. So your Landy spoke to me yesterday. She said, you know what, Mark, stop recording it. Stop.
You stop recording? Yes. Started by you.
On Skype, then.

Mark Harris stopped transcription

STELLCARE
Stellenbosch & Districts Family Services

STELLCARE

1. Executive Summary

StellCARE is a Stellenbosch-based non-profit organisation focused on social and economic development projects within the Cape Winelands area. A key strategy driver for local economic development on areas with little water availability for crop production, StellCARE has identified honey production and pollination services as one of the key economic drivers, which may also support other programs to benefit stipend social employment participants who all form part of the organisation's social employment cooperative.

A pilot program trained eight (8) emerging farmers between October and December 2024, and StellCARE has already procured 100 hives, of which 26 currently active near Spier. However, more land is required to scale operations, and Portion 502-AS1-3 has been identified as an optimal site for the establishment of four (4) geographically spread apiaries, each housing 25 hives. The project is expected to produce 1000 – 1500 kg of honey annually, generating revenue of R100 000 – R200 000 per year through wholesome and bottled sales.

StellCARE proposes a minimum of 9-year lease, with the possibility of renewal. The organisation commits to maintaining the land's fencing and access roads, to ensure the property remains in pristine condition.

2. Operational Plan

StellCARE aims to expand its emerging farmer development program by training and equipping 40 honey bee farmers, an annual intake of 10 new trainees. The goal is to scale operations to 500 hives producing 5000 kg of honey annually.

StellCARE collaborates with the IDC (Industrial Development Cooperation) Social Employment Fund, ensuring funding for hives, swarms, machinery, PPE and training. The phased operation roll-out over 4 years as follows:

Activities	Year 1	Year 2	Year 3	Year 4	Total
a) Basic Bee Farming Training	10	10	10	10	40
a) Advanced Bee Farming Training	10	10	10	10	40
b) Expansion of bee hives	100	200	300	500	500
c) Value Chain Management	500kg honey	1000kg honey	3000kg honey	5000kg honey	5000-6000kg per annum
d) Monthly Mentorship and	2 Sites	4 sites	6 sites	8 sites	8 sites

Coaching visits by specialists to each apiary					

Table 1: Operational Plan

a) Training programmes

The basic course, covers:

- Health and Safety
- Protective gear management and maintenance
- Swarm management
- Wax management
- Extraction of honey operations
- Systems to improve colony production
- Pest control

The advanced certificate in agricultural business management – apiary specialisation provides knowledge and skills to increase hives and manage the finances. Course outlines include:

- Swarm multiplication
- Budgets
- Value adding
- Quality Standards
- Legal compliance

No additional cost will be necessary for the procurement of the initial outstanding hives, where-as money are allocated for 400 more bee-hives.

b) Expansion of bee hives

Local suppliers such as Overberg Honey will provide (already supports StellCARE) hives, supers and tools. Overberg Honey has also committed to purchasing bulk honey, ensuring a market for produce.

c) Value Chain Management

StellCARE in collaboration with IDC will oversee honey processing (extraction and bottling) to maximise income per kilogram of honey.

d) Sustainability and Support

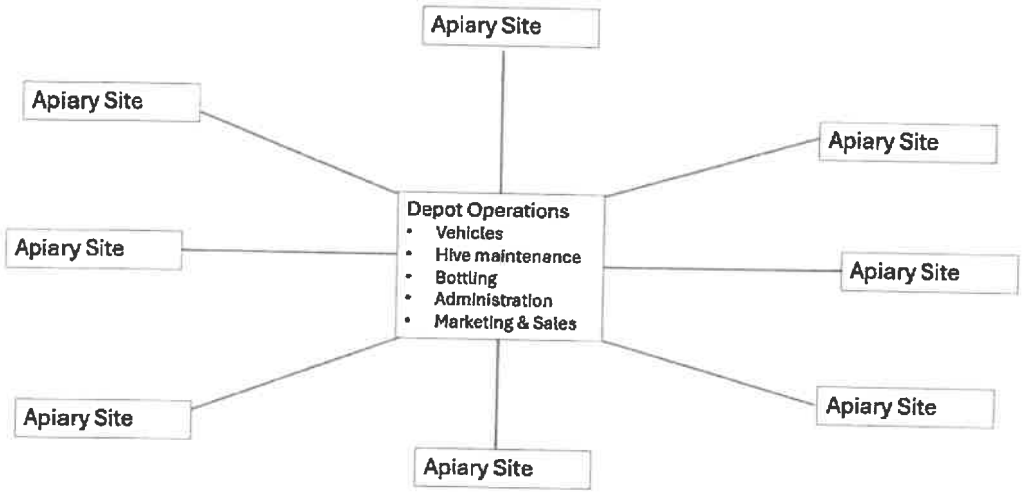
Experienced specialists will conduct monthly hive inspections, offering guidance on feeding, production, and pest control, as well as guidance to the emerging farmers (on-site training).

3. Marketing Plan

StellCARE will target bulk honey buyers and retail consumers with the assistance of our collaborative partners, without interference from all parties. South Africa imports over 6,000 tons of honey annually, highlighting significant demand (Sishlobo, Agbizz, 2023). Bulk honey is globally used in food production, while bottled honey will be sold in delis, farm stalls and select retails stores within 100 km of Stellenbosch. Current market prices are R 70-R80 per kg bulk and R 60 per bottle. The sales plan looks as follows:

Honey Production	Year 1	Year 2	Year 3	Year 4-
Bulk Sales (kg)	500kg (50%)	1000kg (50%)	1000kg (33%)	2000kg (33%)
Bottled Sales (units)	1000	2 000	4 000	6 000
Hives in production	100	200	300	500

Table 2: Sales Plan



4. Human Resources Plan & Job Creation

Bee farming requires minimal intervention, with routine site visits, monthly hive inspections, and seasonal harvesting. Forty (40) trainees will manage eight apiary sites in teams of four, equipped with vehicles, red lights, and specialized tools.

This initiative supports StellCARE's broader cooperative framework under the Social Employment Fund, integrating with programs in education, community safety, and urban farming.

Current Agricultural Employment Breakdown:

- Women: 479 (Youth 214)
- Men: 207 (Youth: 58)

Schematic 1: Structure

STELLCARE

5. Financial Management

Key investments for the project include hive procurement, protective clothing, processing machinery, and operational expenses.

Items	Details	Investment
Hives with swarms	R 2000 x 500 units over 5 years	R 1 000 000
Protective clothing and tools for 30 people	R 5000pp x 30	R 150 000
Training and Coaching provision	40 people x R 15 000	R 600 000
Processing Machinery	Extractors, bottling, label printer	R 250 000
Operational Capital provision	12 months	R 500 000
Total Investment	5- year period	R 2 500 000

Income Projections from Portion 502 -AS 1-3

Income Projection		**Year 1**	**Year 2**	**Year 3**	**Year 4-7**

6. Project Developmental Benefits

- Empowers emerging farmers
- Creates income for previously unemployed individuals
- Promotes sustainable land use in protected areas
- Provides training and mentorship for 40 emerging farmers
- Establishes a high-demand honey value chain

7. Conclusion

StellCARE's bee farming initiative is designed to create lasting economic and social impact. The cooperative model ensures sustainability by integrating apiary operations with broader community programs. With skilled oversight, compliance, and strategic market partnerships, the initiative provides long-term benefits for all participants (686 current participants).

Through this project, emerging farmers will gain the necessary skills, resources, and market access to become independent entrepreneurs in the honey industry, contributing to South Africa's local honey production and economic resilience.

Dear Business Owner

REGISTRATION: STELLENBOSCH & DISTRICTS PRIMARY COOPERATIVE LIMITED: 2023 / 006289 / 24

I have pleasure in informing you that the above-mentioned co-operative was registered in this office on 20/11/2023 in terms of the Co-operatives Amendment Act, No.6 of 2013.

I further certify that **STELLENBOSCH & DISTRICTS PRIMARY COOPERATIVE LIMITED** is with effect from 20/11/2023, entitled to commence business. See attached registration documents and Constitution.

Congratulations on registering your co-operative. The Companies and Intellectual Property Commission (CIPC) wishes you all the best in your business endeavours.

Registering your co-operative is only the first step in managing it. Throughout its life span, a co-operative is required to maintain its information and legal status with the CIPC. Failure to do so may have serious consequences for the co-operative and your business activities, as it may result in deregistration.

The Co-operatives Amendment Act, No.6 of 2013 places compliance requirements on all registered entities throughout its life cycle, which includes any changes to the co-operative information and annual submission of audited financial statements. The annexure hereto is an easy guide to assist you with managing your co-operative compliance obligations.The table is not a legal document, but rather a guide to some of the most pertinent requirements that must be adhered to.

Please ensure that CIPC always has the latest contact details for the directors or the authorized representative so that important information relating to annual submission of financial reports, director changes and pending deregistration's can be transmitted efficiently and effectively to the correct person.

Should you require information on any of other requirements, please direct your enquiries to:

- Website: www.cipc.co.za
- Tel: 0861002472

Kind Regards
COMMISSIONER - SIGNATURE

REGISTRAR OF CO-OPERATIVE:CIPC

Registration Number: **2023 / 006289 / 24**

Enterprise Name: **STELLENBOSCH & DISTRICTS PRIMARY COOPERATIVE LIMITED**

COMPLIANCE ACTIVITY	NOTES	PROCESS/FORM
Annual submission of information to the registrar	• Co-op 8 must be submitted together with Form Co-op 7 containing the submission by the co-op of its audited report, independent reviewed report or annual report, in terms of regulation 21 or within 30 days thereafter	
Annual Returns	• Due on anniversary date of co-operative incorporation date. • Must be filed within 30 business days of its due date. • Must be filed electronically via the CIPC website • A fee is payable at the time of filing that is dependant on the turnover of your business • An Annual return is not the same as a tax return which is filed with SARS. • Failure to file the annual return will result in your co - operative being deregistered.	
Changes in directors or auditors	• CIPC must be notified of any changes in the directorship of your co - operative within 30 business days of such change on Form Co-op2. • CIPC must also be notified of any changes to the auditor (appointment, resignation or removal) of your co-operative within 15 business days of such change or approval on form Co-op4	
Changes in address and contact details	• If a change in the physical / postal address and/or e-mail address occurs, the co-operative must notify the CIPC of such change by filing form Co-op3 within 5 working days of the decision to change contact details.	

Companies and Intellectual Property Commission

a member of the dtic group

Deregistration & Liquidation	• When a co-operative stops trading, it needs to apply either for deregistration or for liquidation, depending on the circumstances. • When a co-operative does not file annual financial statements for a period of 2 years of its establishment it will be presumed that it is dormant Non-submission of annual financial statements will trigger deregistration process. • Liquidation process is followed when a co-operative has assets and liabilities that must be distributed to creditors.	
Judicial Management	• A co-operative may voluntarily apply/any interested person/the Minister to Court for judicial management order if there is reasonable probability that if placed under judicial management it will be able to pay its debts and become a viable going concern.

Dear Taxpayer

TAX COMPLIANCE STATUS PIN ISSUED

The South African Revenue Service (SARS) has issued your tax compliance status (TCS) PIN as indicated below:

TCS Details:	
Taxpayer Name	[redacted]
Trading Name	
Taxpayer Reference Number(s)	5 PAYE - 7240758948
Purpose of Request	
Request Reference Number	
PIN	
PIN Expiry Date	

You may authorise a third party to view your TCS by providing them the PIN. The PIN only allows the third party access to your TCS. All your other tax information remains secure.

Your TCS displayed is based on your compliance as at the date and time the PIN is used.

You may cancel this PIN at any time before the expiry date reflected above. Once cancelled, a third party will not be able to verify your TCS.

SARS reserves the right to cancel the TCS application and associated PIN in the event that it was issued in error or provided on the basis of fraud, misrepresentation or non-disclosure of material facts.

More details regarding our channels, office hours, services, tailored information regarding tax as well as a comprehensive FAQ repository are available on the SARS website: www.sars.gov.za.

We value your support and contribution to our country's economy and prosperity. We strive to ensure that you clearly understand what is expected from you, as well as what your rights as a taxpayer are.

Sincerely

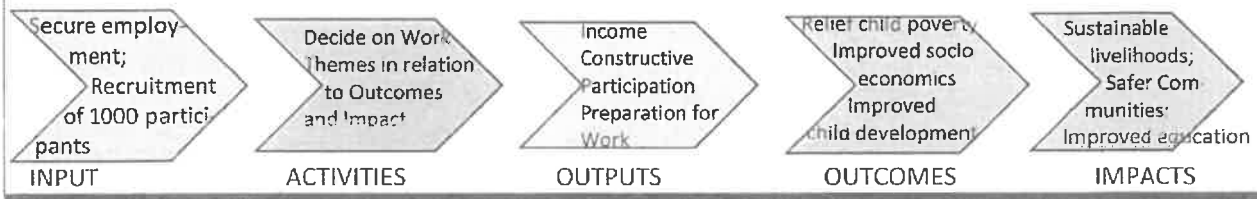
SOCIAL EMPLOYMENT FUND

SIP CLOSE OUT REPORT	
Project Start Date	SEPT 2022
Province	WESTERN CAPE
No. of Sites	6
Project End Date	31 MARCH 2023



NARRATIVE SECTION

1. Executive Summary and Theory of Change

(Provide a summary of the purpose of the report including reflection of the project's initial theory of change and the extent to which this has been met, milestones achieved, outputs/outcomes, challenges encountered and any other relevant information.)

In order to arrive at acquiring results of the existing social employment fund, it is necessary to evaluate the outcomes of the project as had been envisaged by the implementing social implementing partner, in this case, StellCARE.

In terms of our service delivery mandate and contractual arrangement with the Department of Social Development, measured against the increase in numbers of alleged neglect and/or abuse of children; levels of child poverty; increase in unemployment; increase in gang activities and juvenile involvement in violence related incidents, StellCARE as a child protection facility with its focus on support of families, realised for a very long time that change is needed and urgently so. The focus would be to prevent further decay of the family as the primary focus of service delivery, with the outcome through impact driven initiatives, safer communities. The realisation of the ***HOW***, was vested in job creation and aligning actions to keep youth of the streets in jobs. It was for this reason, that StellCARE applied for participation in the Presidential Employment Fund programme

2. Reflections on the Project Design

(Provide a narrative summary on the appropriateness in respect of the effectiveness and efficiencies of the project design including training, activities undertaken, and the extent to which the design enabled targets and impact being achieved. To the extent possible, this must address each of the thematic areas and include areas of improvement in the respective design.

NUMBER OF SEF PARTICPANTS ALLOWED EMPLOYMENT OPPORTUNITIES THROUGH SOCIAL GOOD: 1334

The appropriateness of the effectiveness of the project can never be underestimated and in line with the social and community anomalies reported in the quarterly reports of the organisation. Areas that present challenges in terms of achieving total outcomes and impacts as perceived, was mostly training, long waiting periods between ordering PPEs and goods, underestimation of the level of M&E against systems implementation. The fact that the initial phase was, even on requesting support, aided at "not necessarily" being 100% as per tender document, later turned out not supportive of acceptable governance. The fact that the accounting functions of StellCARE are outsourced, also seems not be beneficial, albeit beneficial in terms of the operational context of StellCARE, in relation to budgetary constraints.

Thematic Area 1 - EDUCATION

Number of Participants – 192

Number of Children - 2672

Early Childhood Development and Main Stream Education play and equal essential part in supporting families to ensure effective development of children. Given the success rate experienced through earlier EPWP programs within this thematic area; the high number of school dropouts; young children between the ages of 9 and 14 years getting involved in gang activities, as well as the poor school performance of children within our mandated service areas, left us with the challenge to continue to provide support to Pieter Langeveldt Primary

STELLCARE
Stellenbosch & District's Family Services
093-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

School. Based on the success of school support assistance, RR Franks in Eerste River, as well as Cloetesville Primary School, Rietenbosch Primary School and Raithby, approached StellCARE for support. The biggest impact reported by schools and parents, are allowing children to develop at an acceptable space; assist children with learning difficult at an acceptable level, but the most important aspect, to reduce children being expelled from classes, to almost zero.

School assistant renders extra-mural services in relation to sport, cultural activities as well as nutrition. Our assistants are involved in the basket of services rendered by schools, including maintenance, cleaning, safety on the school grounds, school holiday programs – and not limited to that.

Early childhood must be prioritised as per the President's commitment towards parents during the State of the Nation address. Children enrolled in our facilities had been, after professional assessment, indicated between 70% and 35% loss of all learning; including regress in emotional development. Placement of ECD assistants in classrooms, provide a conducive environment for children to develop optimally and to address backlogs effectively. As ECD-facilities are funded by the Department of Education, the fund is completely insufficient, thus through this initiative, parents participating in the SEF program, must enrol children, and not paying school fees.

Thematic Area 2 - NUTRITION AND COMMUNITY KITCHENS

Number of Soup Kitchens – StellCARE: 24

Number of Conduit Kitchens (LangaCan, Maxinjana; Siyakhula; Vrygrond, WDTI, Faith Revival Ministries): 24

Number of participants: 12

Number of meals per month: 52 000 only StellCARE kitchens

Due to the fact that StellCARE had been requested by the Department of Social Development to manage on their behalf 24 community kitchens outside our operational area as conduits, the Department decided to fund our nutrition program for the period 2022/2023. The operator at community level, thus forms part of the EPWP-program funded by DSD. For this reason, participants recruited to be part of SEF, could not be captured as such, but where was needed, participants had been assign to those in need of assistance. Hence the fact that is seems as if the outputs and impact had not been reached; those outcomes and impact far overreached. The fact that the StellCARE kitchens are community based, convenors screened and trained by StellCARE, assisted with the success of our facilities. The facilities are concurrently used as awareness raising outlets, assist to early identify vulnerable children and persons, and ensure that especially children and disabled persons on the receiving lists, receive daily meals. The outcomes are reported based on daily attendance registers and inspections on outputs. The impact had been already reflected in the Rapid Assessment study instituted by USAID in relation to hunger and stunting in pre-identified areas. One area was Cloetesville, where the results clearly indicated that the nutritional situation of children within our area, given the high unemployment rate as poverty, had been effectively address. This had been proved of the importance of StellCARE to continue with our nutritional programs. The budgetary cuts by DSD impacted negatively, and as no money may be diverted from the SEF-program, the reality of the threat to scale down is real.

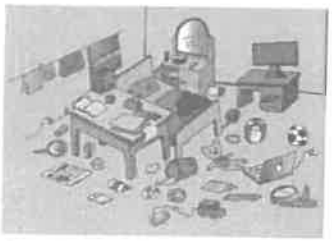
Thematic Area 3 - COMMUNITY SAFETY AND GBV

Participants: 23

Safe and Thriving Communities: A New Approach to Community Safety and GBV

The Safe and Thriving Communities initiative under the SEF is an initiative that aims to consolidate safety, gender-based violence, victim support, as well as support to the perpetrator. StellCARE is focused on prioritizing the needs of mandated communities and supporting community-based organizations working to address violence and injustice. By adopting a comprehensive approach to community safety and GBV, and StellCARE's goal towards Safe and Thriving Families and Communities, SEF had been the primary vehicle to reached outputs that impacted on the lives of individuals and families across our communities.

STELLCARE
Stellenbosch & Districts Family Services
003-296 - NPO PBO 130061154



SOCIAL EMPLOYMENT FUND

It is believed that in building safe and supportive communities, it requires a comprehensive approach that addresses the root causes of violence and injustice, of which unemployment, disenfranchising of men and systemic violence are the main contributors toward VAW and VAC. By advancing research-based evidence, assist communities and individual to understand behaviour and to practice and promoting sound and revisited community values and collaboration, community safety and GBV initiatives can contribute to creating environments where everyone can thrive.

Despite targets set out in the initial application, again DSD came in late with subsidy of the 2022/2023 EPWP program. That caused StellCARE to terminated 42 participants from SEF, in order to facilitate the DSD process. Impact is best described in the Network created between community, StellCARE and SAPS to jointly address the GBV occurrence.
Volunteers are fully trained and screened to perform their task. One designated social worker and community assistant are assigned to this, working hand in hand with SAPS. All SEF participants received training in GBV victims are supported throughout the process, including court support.

Thematic Area 4 - CLEANING AND GREENING

The Transformative Power of Cleaning, Greening and Beautification – GIVING HOPE TO THE HOPELESS

***1107* Jobs Creating in Waste Management and Environmental Cleaning**
The 1107 jobs created in 5 communities in the waste management and environmental cleaning sector was the most powerful initiative within our municipalities with a significant impact on both the economy and the environment. The outputs and impacts of these jobs, reflected from waste reduction and resource recovery to the improvement of public health and the promotion of sustainable development.

1. **Waste Reduction and Resource Recovery**

1.1. Less Waste, Cleaner and Healthier Communities toward Sustainability
One of the major outputs of these 1107 jobs (was but still) is waste reduction and cleaning of communal areas. By deploying more participants in the waste collection / cleaning sector, unfortunately the of waste ending up in landfills, were not minimized but this will be the goal for the second phase. 5 communities benefitted from this output.

1.2. Enhanced Recycling and Composting towards a Circular Economy
In addition to waste reduction, the creation of 1107 jobs in the waste management sector shifted the focus to recycling and composting potential. Recyclable items were recovered from waste streams, resulting in conserving natural resources especially open spaces and water streams, reduce pollution, and lower the environmental impact of waste disposal. The potential of new circular economic opportunities was created by all 1107 participants

2. **Waste Reduction and Resource Recovery**

2.1. Less Waste, Cleaner and Healthier Communities toward Sustainability
One of the major outputs of these 1107 jobs (was but still) is waste reduction and cleaning of communal areas. By deploying more participants in the waste collection / cleaning sector, unfortunately the of waste ending up in landfills, were not minimized but this will be the goal for the second phase. 5 communities benefitted from this output.

2.2. Enhanced Recycling and Composting towards a Circular Economy
In addition to waste reduction, the creation of 1107 jobs in the waste management sector shifted the focus to recycling and composting potential. Recyclable items were recovered from waste streams, resulting in conserving natural resources especially open spaces and water streams, reduce pollution, and lower the environmental impact of waste disposal. The potential of new circular economic opportunities was created by all 1107 participants.

STELLCARE
Stellenbosch & Districts Family Services
093-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

3. Environmental Protection and Public Health

3.1. Cleaner Environment and Improved Public Health

Employment in waste management and environmental cleaning directly contributes to a cleaner environment. By ensuring daily clean-up of waste improperly disposed by community members, the participants assisted in contributing to a cleaner and safer environment and mitigate the impacts health and disease transmission through rodents, snakes and cockroaches and exposure to harmful substances.

3.2. Environmental Awareness

The 1107 participants in the environmental sector now fosters greater environmental awareness. As more people work in these fields, they become advocates for sustainable waste management practices and environmental conservation. This can inspire others to adopt sustainable habits and contribute to a greener future and a sustainable circular income, providing dignity and pride to participants.

4. Economic Growth and Job Creation

4.1. Direct Employment Opportunities

The direct impact of the 1107 new jobs of previously unemployed persons, of which the biggest percentage were youth, is unmeasurable. These jobs offered an income to 800 families with no income or child support grant benefits only. Participants' were afforded an opportunity to improve their quality of life and their families. Participants who were found guilty of misconduct were discipline and allowed to better, whilst participants were encouraged to find permanent jobs with referral of experience and work ethics.

4.2. Economic Growth

The SEF program serves as a catalyst for economic growth and contribution to service delivery of municipalities. The 1107 jobs contributed to increased production and consumption at local government level, ultimately boosting the overall economy. Furthermore, the promotion of sustainable waste management practices will now lead to the growth of green programs and initiatives, further enhancing economic growth.

5. Types of Jobs Created

5.1. Waste Collection and Disposal

Jobs involve the collection, transportation, and disposal of waste materials. Workers in this field are responsible for operating waste collection operation, sorting waste materials, and ensuring that waste is collected and disposed of by the municipalities.

5.2. Recycling and Composting

Due to the degrading of waste in this current phase, effective recycling and composting was not possible. However, in the next phase waste material would be recyclable and be processed into recyclable products or compost. In the new cycle, workers in this field will be responsible for operating recycling or composting facilities, sorting and preparing materials, and marketing the end products in order to provide sustainable income streams.

5.3. Environmental Cleaning

Environmental cleaning jobs involve the removal of pollution and contaminants from various environments, such as water bodies, soil, and air. Workers in this field may be involved in activities like hazardous waste clean-up, oil spill response, and air quality monitoring.

6. Education and Training for Waste Management and Environmental Cleaning Jobs

6.1. Formal Education

Depending on the specific job, individuals may need varying levels of education to work in the waste management and environmental cleaning sector. Some positions may require a high school diploma, while others may require a college degree in environmental science, engineering, or a related field.

STELLCARE
Stellenbosch & Districts Family Services
093-296 - NPO PBO 130001164

SOCIAL EMPLOYMENT FUND

6.2. Vocational Training

Collaboration with Stellenbosch Municipality secured specialised vocational training where required. This can include certifications and licensing for operators of equipment, handling hazardous materials, and/or managing recycling and composting facilities.

6.3. On-the-Job Training

All 1107 participants received on-the-job training to develop the necessary understanding, skills and expertise, safety procedures, and the operation of specialized equipment in relation to the work. Most importantly is understanding fauna and flora within the bio-sphere (snakes, lizards, and all other species, including reeds).

7. Challenges and Opportunities

7.1. Collaboration and Cooperation with Local Authorities

This remains the biggest challenge yet to obtain buy-in from Stellenbosch Municipality. In respect of support by Wards, excellent progress had been made with the City of Cape Town. How to engage with local authorities to allow StellCARE to participate in opportunities must to be prioritised.

7.2. Public Perception

The positive shift in public perception of waste management and environmental cleaning must be raised as an achievement; however it remains a challenge for some workers in this sector being treated with disrespect. Positive feedback from ordinary community members affirms the success of creating a conducive and clean environment within communities.

7.3. Clean and Safe Parks and Open Spaces

StellCARE took sole responsibility for cleaning 73 parks and open spaces in Idas Valley, Cloetesville and Kleinvlei. The impact is visible and provide safety to patrons, especially children who use the parks, where youth use to loiter in parks. The challenge shifted to the local municipalities perform general maintenance.

8. The Social Impact of 766 Jobs in Waste Management and Environmental Cleaning

8.1. Community Engagement

The community appreciate the cleaning of areas and this lead to increased community engagement. Workers become local ambassadors for waste management and prevention of littering. Participants acted as warriors against littering and encourage communities to adopt environmentally friendly habits and contribute to a greener future.

8.2. Poverty Alleviation

Stable employment opportunities -= poverty alleviation, which directly addressed and improve the quality of life for workers and their families. This specifically applies to the majority of participants in this category with no income or access to finances. 766 participants now maintained their employment by the end of contract, leading to increased economic growth and social development.

8.3. Gender Equality

The waste management and environmental cleaning sector offers opportunities for all genders of all ages, thus promotes gender equality in the workforce. By creating equal opportunities for all, we can work towards a more inclusive and diverse workforce.

9. Sustainable Development Goals

The SEF program and the 766 jobs in this sector supports the 2019 – 2024 WC SDGs - focusing on Safe & Cohesive Communities; Growth & Jobs within an enabling environment; empowering people through creating opportunities to shape their lives and others; thus ensuring a meaningful and dignified life for all its citizens.

10. Impact derivative

The reality of the jobs created in waste management and environmental cleaning has far-reaching impacts on the economy, environment and society. Participants contribute to waste removal, environmental protection, public health, economic growth, and dignified living and mobility spaces. Through this for good initiative, participants are allowed to opportunity to provide in their economic needs within the family system and can work towards a more sustainable future to improve the quality of life for individuals and communities. The support provided to local government is immensely, allowing municipalities to focus on service delivery areas which would otherwise be continued to be neglected, e.g. storm water draining systems.

3. Implementation Challenges

(Provide an overview of the challenges experienced and remedial actions implemented including risks that had to be managed to achieve targets and maximise impact)

Budgetary challenges, as guidance received from the support desk could not provide clear instructions. As budgeting allocation per Thematic Areas and Work Themes was not clear and difficult to decide beforehand. Guidance received indicated that it would not need to be specific, hence the problem with actual allocations. The interpretation of "no permanent staff" allowed to be "paid", had been followed according to guidelines, to learn from several SIPS that this is how they manage to manage the program.

Training: This had been experienced as tedious and a hampered the timeous implementation. The training in respect of onboarding and capturing of participants disallowed StellCARE to start in July already when we were ready and familiar with the process. Yet, the decision was that permission would be granted. Training in specifics as requested, to this date were never provided, that is the allocation of budgets to the sites. It was also communicated that the dash board does not reflect the correct budgetary allocations, as no site could be activated should the budget not be allocated. Yet, it still, to date, does not reflect all StellCARE's sites and budget. StellCARE had been informed that the organisation's details are not correctly reflected as it is a developmental process. StellCARE is being adversely affected, as the platform does not reflect even all sites, municipalities and activities.

Project Management: Despite not having a professional or qualified project management per sé, and receiving assistance from our accountants, lacking a dedicated financial person to this project had been identified. It is imperative that StellCARE employ services of a dedicated project leader who can assist with financial reporting and allocation of budgetary items correctly. This will also assist with proper, effective and on-time reporting, which is crucial to StellCARE, also in terms of our financials policy framework and the PFMA.

The **KWANTU** system: The support received from the Kwantu system much be commend with appreciation. The IDC should however, decided on what was expected, and not allowed SIPs to utilise it for individual use, and not for programme specific use. In allowing that, assistance from certain SIPs was overwhelming, whilst other requests never get attention, or very late responses. SIPs must also take responsibility in self-training of new staff members, i.e. capturers, and not the responsibility of Kwantu.

4. Reflection on Performance vs contracted Targets

(Provide an overview of the targets achieved, variances and reasons thereof.)

StellCARE created 1372 jobs for the period September 2024 to 31 March 2023.

StellCARE regarded the general SEF outcomes as extraordinarily, despite the fact that targets as per the contracted agreement, not achieved. It was always being envisaged that the need for assistance in relation to all Thematic Areas and Work Themes, will never be met in terms of 1000 participants. Whereas the allocation of participants per Work Theme was based on the internal social services needs, unknown factors and financial constraints, forced StellCARE to request deviation of e.g. play groups and agriculture allocations. It is also important to mention that StellCARE had been honest in communication and reporting without providing any false information. StellCARE always knew and understand that the biggest need would be in the field of Cleaning and Greening, given the exceptional high unemployment levels, poverty, low scholastic qualifications and the disintegration and dysfunctionality of families and especially youth. StellCARE therefor regards the ability to provide the targeted 1035 jobs as a victory over poverty, a victory to provide parents an opportunity to uplift their social-environmental situation and to experience acceptance, respect and an opportunity to earn without begging.

Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

5. Skills acquired and pathways for participants

(Provide an overview of the training undertaken as part of the programme including whether training is accredited or prospects for accreditation, skills acquired on the part of participants including certification where applicable, participant attrition rate from the programme and the reasons thereof – please also attach participant exit interview forms for both attrition and completion instances)

Professional:

Social Work and Social Auxiliary Work experience of unemployed staff being enrolled on the programme; Teachers who did not find placements at schools being placed in schools, thus acquiring experience which would allow them to apply for permanent positions within WCED.

Trained Early Childhood Development practitioners placed in facilities gaining experience in programme implementation which would allow them an opportunity (as was the case) of finding permanent employment.

School Support:

Grade 12 unemployed persons with an interest in education, being allowed to enter to workplace and gaining valuable experience in dealing with children and behaviour challenges, allowing them to arrive at decisions pertaining to career choices.

Nutrition:

In reaching between 52000 and 62000 meals per week must tell the tale of deep seated poverty. As participants of the Work Theme resides within the communities, beneficiaries of feeding points would take jointly responsibility should the coordinator become ill, or even in the event that he/she found permanent employment.

Community Safety and GBV: Surely the biggest impacts and positive results in addressing GBV and support services in respect of safe communities and Prevention and Early Intervention Services as part of the "basket of social work services" to be rendered in relation to vulnerable persons and communities by StellCARE. 42 individuals and neighbourhood watch members received training as being provided for in the Children's Act 38 of 2005 and internal policies of StellCARE in relation to volunteers working with children. Trained volunteers provided services at the level of Child and Youth Care Workers.

Cleaning and Greening: The skills transfer in this sector rest more on the basis of awareness and environmental management in terms of the importance of waste management and allowing participants to discover potential of income generation through waste management.

Resignation: As participants do not resign officially from the programme, it does not allow StellCARE to have exist interviews. Should they officially resign, as in the labour field, they would not be able to apply for UIF; hence the tendency for participants just not to return to work without any notification of resignation.

6. Engagements with stakeholders

(Provide an overview of engagements with the respective community structures including challenges experienced such as any form of resistance including protests/violence; municipalities, and funders)

Monthly meetings with participants are being held.

No incidents of protests had been reported.

In case of misconduct or allegation of substance or alcohol abuse, the participant will receive counselling and if applicable, receive a written warning, following up with continued support. As we allow parolees onto the programme, misconduct must be reported to the correctional official who then must provide counselling and support and also the decision to cancel parole if applicable.

All participants sign a conduct order agreement. Gender base violence, due to the high incidences in all communities we serve, receive priority and is addressed in every meeting with participants.

7. Summary of key lessons learnt

(Please provide a summary of key lessons learnt over the implementation period – these should include project specific lessons as well as lessons to potentially inform future design of social employment programme/s)

Proper budget in relation to work themes;

Project management skills must be acquired and sourced;

Monitoring and Evaluation form the back bone of successful execution of the program;

.

Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

8. Project Legacy and Sustainability Prospects

(Provide an overview of the legacy the project will leave behind, pathways for participants post project closure, sustainability prospects of the project including funding avenues being explored)

Restoring dignity and hope are the digest contribution which no money can buy and this is the most important outcome from the SEF program, for which StellCARE would always be grateful for. The continued economic situation communities are confronted with, will not be solved any soon. It is also not realistic that individuals will realise businesses out of i.e. waste management, and we have to guard against unrealistic expectations, as we might be setting people up for failure.

The most rewarding experience from this is the cohesion formed amongst community members and creating a kind of camaraderie amongst our participants. People start to be on the lookout for one another, show humanity and stand-up against the wrongs in the community. StellCARE beliefs in the power of asset based community development, and this provides the only opportunity to the organisation to assist families to strengthen themselves and to protect our most vulnerable persons, being children, the elderly and the disabled persons.

The establishment of a ***SOCIAL COOPERATIVE*** must be developed to provide ownership to community members to decide on their own futures within a conducive and safe environment, where crime and gang activities would not be tolerated.

Alternative funding opportunities will be explored in order to provide continued stipend related employment post cooperative formation and enterprise development.

The struggle to obtain agricultural land since the inception of the programme, must surely be regarded as one of the biggest hurdles preventing the programme to reach the agricultural goals and objectives. The fact that land belongs either to the municipalities or private, coupled with lengthy negotiation episodes, still is a frustrating aspect in preventing to establish real sustainable agricultural business entities.

9. Financial Review

(Provide an overview in respect of the adequacy of the budget, budget structure, grant disbursement method and controls, and any areas of improvement)

Under budgeted on non-wage items due to misinterpretation

Financial outsourcing of StellCARE did not provide in-house resources to support project management

10. Conclusion and Overall Recommendations the Continuation of Social Employment Program

Secure Long-term Funding

By ensuring the continuation and success of social employment programs, social employment initiatives can become more resilient and sustainable in the face of economic and political changes. The situation is of such a nature, that funding for at least 5 to 6 years is needed in order to effect change.

Improve Coordination and Collaboration

Enhancing coordination and collaboration among stakeholders is essential for the effective implementation and scaling-up of social employment programs. Platforms like SEN and other stakeholders in sharing experience and networking is important as a platform to facilitate information sharing, joint planning, and monitoring of social employment initiatives. Moreover, assisting (mediating) NGOs like StellCARE to form partnerships between public and private sector actors can help leverage additional resources, expertise, and networks to support the goals of social employment programs.

Address Stigmatisation and Discrimination

Continued efforts and actions to foster the positive image of social employment programs and reduce the risk of stigmatisation and discrimination, through awareness campaigns that highlight the benefits and successes of these initiatives. By showcasing the positive impact of social employment on individuals, families, and communities, these campaigns can help shift public perceptions and promote acceptance of these programs.

Stellenbosch & District's Family Services
003-206 – NPO PBO 130001164

SOCIAL EMPLOYMENT FUND

Customize and Adapt Programs to Local Needs and Mandated Areas

Successful social employment programs should be tailored to the specific needs and contexts of the communities they serve. StellCARE focused through this initiative on customising programs to address local social needs and priorities. Therefore, social employment initiatives can be more effective in addressing the unique challenges faced by unemployed individuals and vulnerable families, and in the case of StellCARE, act as a support system to the social service delivery program within the mandated areas or the organisation.

Conclusion

The SEF program has proved successful in addressing the issue of unemployment and supporting vulnerable and poor families. By providing temporary jobs, skills training, and social services, this initiative can continue to generate significant economic, social, and individual benefits. However, to ensure the continuation and success of social employment programs, it is essential to address the challenges of funding, coordination, potential stigmatisation, and program customisation. The success of the IDC in managing the program must be commended, and therefore the request from StellCARE to be assisted to secure the future of social employment initiatives to contribute to the well-being of thousands of unemployed individuals and vulnerable families and to address and hopefully impact on the violence and drug abuse in our mandated areas.

Programme Impact Indicator 1 - Education *School Support* *ECD* *Playgroups*	215 141 44 30	192 148 44 0	11.9%	Deviation were requested not to implement playgroups, due to the fact that 3 other SIPS, without notification moved into the SSA area. More schools approached StellCARE and the school support component will increase where it is absolutely needed. As the WCED reintroduced the "Game Changer School Support" program, some SEF participants opted to join that program, as the stipend paid are more than double of the SEF. As the
Programme Impact Indicator 2 *Nutrition*	34	12	35.3%	The perceived number of participants could be preserved on the EPWP program funded for the period 2022/2023 by DSD. Those participants will be moved onto the Work Theme in the new contracted period.
Programme Impact Indicator 3 Community Safety & GBV	90	23	34.3%	Funding for NHW had been reintroduced and removed from the SEF funding. However, 3 professionals in this sector are not on the stipend component, as additional funding was secured. The additional Eye-on-Community members will be trained in the extended contract period and placed on the program after completion.
Programme Impact Indicator 4 *Cleaning, Greening and Environment griculture*	573 80	1107	(70%) over reached	StellCARE always recognised that this Thematic area would accommodate the majority of unemployed persons in our mandated areas, to supplement social service delivery to our beneficiaries. The goal to eradicate and address poverty in a more dignified way & to prevent further disintegration of the family systems, was realised in this work theme. Sustainable income streams would only be made possible through this initiative, hence our continued strive to obtain agricultural land in order to implement our programs through the co-operative model.

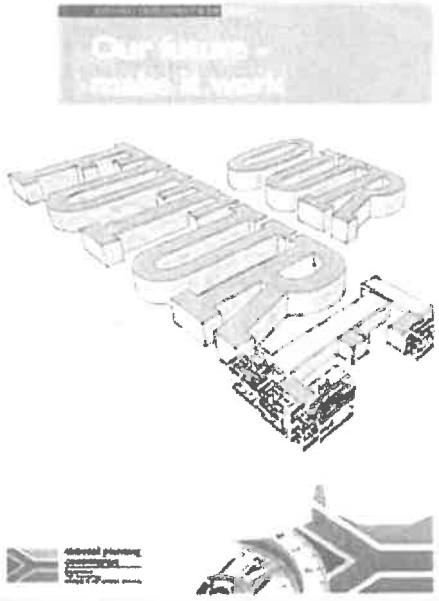
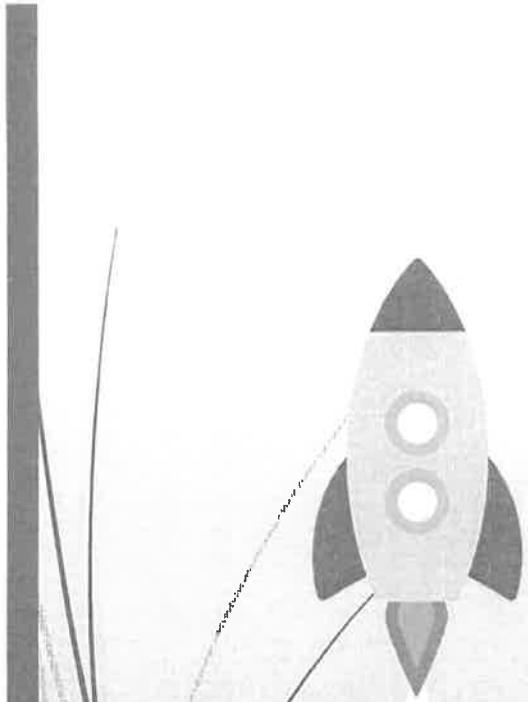
StellCARE: Stellenbosch & Districts Family Services In a Nutshell

- Organisation is founded on the principles of philanthropy and upholds its care of vulnerable sectors of society by promoting public good through its vision and mission.
- In order to achieve its objectives, the organisation shall, inter alia:
  - be voluntary by nature and this characteristic shall be reflected in its management;
  - remain non-governmental and independent;
  - confirm its belief in the dignity, diversity, equality and worth of all people;
  - In collaboration with our partners, StellCARE delivers a **basket of social development services and community promotive initiatives**, focusing to the poor, vulnerable and those with **special needs**.
  - Participate in initiatives to address structural poverty by participating in the Presidential Employment Fund initiative to support families, women and the youth



Social Service Delivery Mandate



Constitutional Mandate and Legal Framework

Section 28 (1) of the Constitution sets out the **rights of children** with regard to **appropriate care (income, basic nutrition, shelter, health care services and social services)** and that the detention of children is a measure of last resort.

What if we do not fix this - or not reaching our goals?

What we do

Addressing the social needs of beneficiary communities in our mandated areas through these activities:

Activities	Purpose
1. School Support	Institutional management services, with special reference to governance (NPO Act; PFMA) and contractual arrangements and compliance in terms TPA (DSD) and other stakeholders (IDT; IDC and corporates) at operational level in terms of service deliverance.
2. Early Childhood Development Support	Provide comprehensive child and family care and support services to communities in partnership with stakeholders and civil society organisations.
3. Safe and Cohesive Communities	Provide integrated developmental psycho- social services to poor and vulnerable persons in partnership with stakeholders.
4. Cleaning, Greening and protecting the environment	Provide integrated developmental social crime prevention and anti-substance abuse services to youth under our care in partnership with stakeholders.
5. Nutrition	Address hunger and child hunger specifically, support sustainable livelihoods and poverty alleviation through dignified jobs and self-sustained families; assist communities with food by creating food gardens
6. GBV (VAC & VAW) and Violence in General	Implement effective intervention programmes and skills of affected person and perpetrators; employment opportunity to restore self-worth and dignity; Provide safe space and effective support at grass-root level.
7. Administration & Monitoring and	Recruitment, capturing and implementation. Monitoring and Evaluation procedures to measure effectiveness; understand

SEF in a NUTSHELL

48% unemployment in operational area and exacerbate by Covid-19

Agriculture and Tourism industry hit hardest with a sectors closed down in totality.

Social anomalies increase exponentially with hunger, gender base violence and children being left orphaned exploded, putting exceptional challenges on social service deliverance.

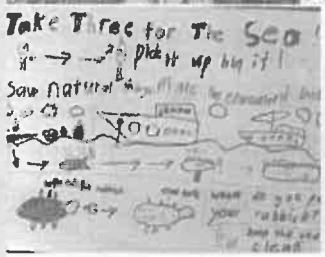
StellCARE to change service model "overnight.

Through the participation of StellCARE in SEF,

- vulnerable and poor persons within mandated communities are being engaged with and family systems being preserved; dignity restored and hope provided;
- National and provincial governments assist with the envisaged recovery and reform plan to build a resilient economy that comprises of an equal resilient citizenry who can participate in a sustainable economy.

StellCARE's contributes specifically in

- Recovery of the local economy through the fiscus of 1035 SEF participants who had been unemployed;
- the recovery of the tourism industry insofar as clean and conducive environment;
- Gender equality through the inclusion of women and youth;
- Green economy interventions;
- Mass public employment interventions - – 1035 participants and can be expanded;
- Strengthening food security and nutrition; and
- Normalising the education system through support to affected and challenged school as well as early childhood development.



Outcomes Achieved

- **1035 previously unemployed persons are employed and contribute to their own livelihood in a dignified way**
- **Gender Based Violence** are prioritised as primary focus of intervention. Participants serve on Action Committee. Victims reached out for assistance and both victim and perpetrator are being assisted. SAPS are fully committed to fulfil their legal obligation.
- **Participants take ownership for littering in communities and understand the impact of actions on the environment and general well-being. Participants start to advocate for cleaner communities and respect for one another.**
- **Five (5) youth in school support programme enrolled through UNISA for B.Ed based on experience gained and passion for children.**

What we do

Sef + StellCARE = Progressive Communities

- Poverty alleviation and a reduction in child poverty specifically;
- +- 55000 meals are provided to vulnerable persons per month, of which 92,% are children;
- Eye-on-Community members in collaboration with NWH assist in creating safer communities open spaces. This has contributed towards -
- 5% decrease in referrals of allegations of child neglect and abuse received during period Sept. 2022 to Dec. 2022
- Continued daily cleaning of areas in communities contribute to a more hygienic environment and safer spaces.

COLLABORATION AND NETWORKING

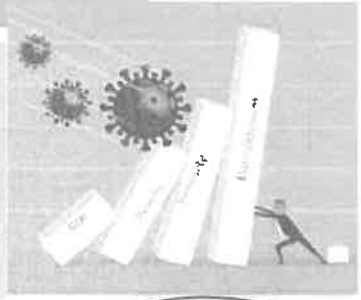
- CocT and Stellenbosch Municipality;
- Cloetesville Sports Council

Support in respect of

Wellington Community

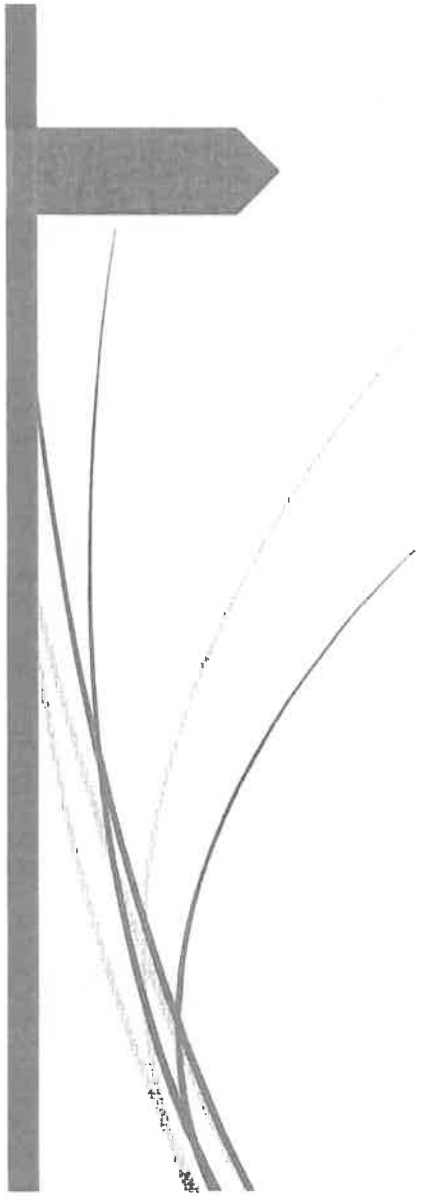


Merweville

Langa, Gugulethu, Vrygrond, Portsland and East Ridge in terms of management of community kitchens

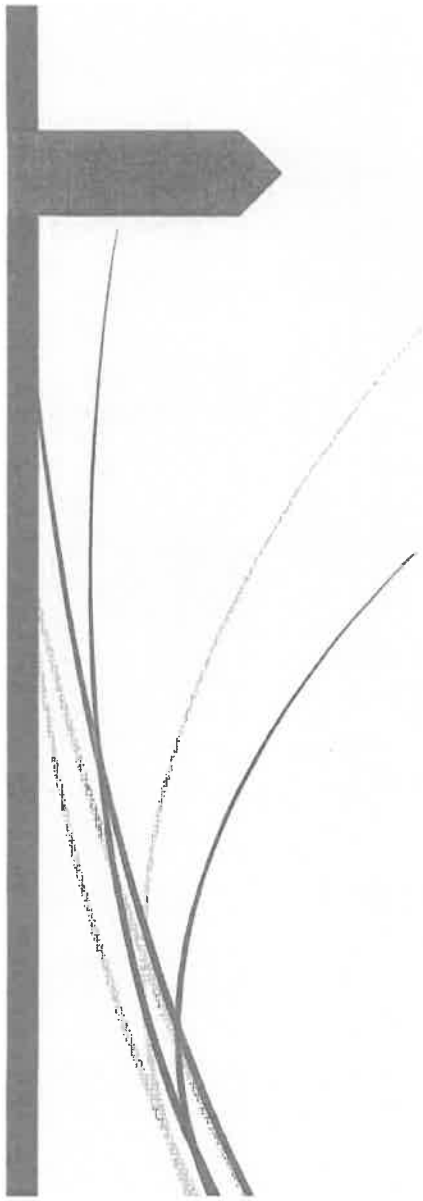
Suggestion on how SEF can be enhance in the next rounds

1. Invest in and provide support to StellCARE to improve on deliverables in order to expand our programme as there is a very prominent need.
2. Programme must be multi year and be sustainable in relation to participants already in the programme. It is immoral to allow persons to better their livelihoods with realising that there is no possibility of further employment, and to end such relationship. Participants will be in exactly same predisposition as before the implementation of the programme.
3. Assist StellCARE in the agricultural development, since the organisation succeeded in obtaining land for agricultural development.
4. The facilitation in securing job opportunities and continuation of participation in the programme must be allowed as per p1. Failing to achieve this, equals failure of endeavours as being pronounced in the NDP as well as the economic recovery and restoration plan of government. The current status of load shedding and the economic impact thereof present the same threat, if not more severe, than the Covid-19 pandemic in relation to the health and welfare of our communities.
5. Extension of the program to 5 days and at least 5 working hours per day.



Financial Contributions

- Salaries of Staff deployed to manage the SEF process
- Vehicle and fuel use
- Telephone and internet
- Data
- Office space and office furniture
- Insurance
- Security
- Catering for awareness programs and school holiday programmes
- Care packs for Gender Base Violence activities
- Equipment and Stationary for holiday programs
- Food and gas for 24 community kitchens
- Salary of teacher – Merweville School Support
- Additional stipend for carers – Merweville School Support



STORIES

- My name is Nomalungisa Bhayibhile from Kayamandi. I am very grateful for this opportunity to be part of this project, it has been long overdue I have waited for years to get job and bring something on my table. Working in my community came as a blessing

- I am Ernest Lof from Cloetesville. I am a transgender person – not belonging anywhere – so it felt. I could not manage to find any employment, most probably because of my sexuality, or so I believe. When I approached StellCARE to be allowed on the program, StellCARE accepted me right away, without questioning my sexuality or my ability. StellCARE was aware of the fact that I am tik-addicted. Mrs Nieuwoudt was clear that we would not be discriminated against, but expected to come clean. After an incident and a positive test in November 2022, I was confronted with a choice – come clean or resign. I made the choice, and manage thus far to stay clean. I will be for ever thankful towards StellCARE and SEF for this opportunity.

- Abe September – I lost my job during Covid in 2020. I was involved in our local Neighbourhood Watch and devoted all my time to this. I was aware of the programme of StellCARE and Pieter Langeveldt Primary School, and assist where I could. Having heard of SEF, I was approached by StellCARE to enroll in the programme which I did. I was ashamed at first, but I will never leave the programme, even if I am offered a better salary. The impact this programme has on the community cannot be quantified. I have learnt a lot and developed my skills through the biometrics system – something I would never have come across. Thank you SEF and thank you StellCARE.

- I am Mr Axxx from Wellington. I am a politician and labour expert, but not employed. For many years I worked with StellCARE and since 2022 StellCARE supported a welfare organisation where I am involved in with excellence. When informed by Mrs Nieuwoudt about SEF, and that StellCARE would again take me onboard and did not even asked which political party I am involved with. I never thought of the possibility of being a recipient of a stipend in lieu for my services. I gained dignity and earn the respect of our participants, knowing that we all earn the same stipend. StellCARE does an amazing job and allow our participant over whom they have no responsibility for, to earn a living and to move out of the darkness of poverty.

SUCCESS STORIES

- School support and AFTER SCHOOL support
- ECD support
- **EYE-ON-COMMUNITY**: IDT – 220 job opportunities; 72 sustainable livelihood WC DSD
- **GBV trauma counselling** , networks and groups – designated social work position to this
- Nutrition established and excellent co-operation with our SAPS station
- Environmental
- Establishment of the Stellenbosch & Districts Primary Cooperative Limited as the most important vehicle to provide a sustainable income stream to participatory participants once profitable.

NOTICE: 19/2025

LEASE OF MUNICIPAL AGRICULTURAL LAND

Notice is hereby given that proposals are requested from individuals or enterprises to lease the land below in line with the approved Policy: Management of Municipal Agricultural Land as published in the Government Gazette of 27 March 2017, including but not limited to:

The aim of leasing the properties as listed below is to advance the Local Economic Development objectives of Council in terms of creating access to municipal agricultural land for current and potential emerging farmers. It must be noted that Farm 502 AS 1, 502 AS 2 and 502 AS 3 are located in a Critical Biodiversity Area (CBA) which is highly sensitive and the only farming purpose this land could be utilised for is beekeeping or similar.

Application forms can be collected from the Economic Development office at the NPK Building, 2nd Floor, Cnr Ryneveld and Plein Street, Stellenbosch or requested via email from Mark.Harris@stellenbosch.gov.za or downloaded from www.stellenbosch.gov.za.

For more information contact Mark Harris at Mark.Harris@stellenbosch.gov.za or at 021 808 8159 / 021 808 8974. Proposals must be submitted no later than **12h00 on 13 March 2025** to the Local Economic Development office at the 2nd Floor, NPK Building, Cnr Ryneveld and Plein Street, Stellenbosch.

Ms Geraldine Mettler
Municipal Manager
Stellenbosch Municipality

KENNISGEWING: 19/2025

HUUR VAN MUNISIPALE LANDBOUGROND

Kennis word hiermee gegee dat voorstelle van individue of ondernemings versoek word om die grond hieronder te verhuur in ooreenstemming met die goedgekeurde beleid op die Bestuur van Munisipale Landbougrond soos gepubliseer in die Staatskoerant van 27 Maart 2017, insluitend maar nie beperk nie tot:

Die doel om die onderstaande landbougronde te verhuur is gefokus op die Plaaslike Ekonomiese Ontwikkelings objektief van die Raad om toegang tot landbougrond vir huidige en potensiële opkomende boere te bevorder. Daar moet kennis geneem word dat Plaas 502 AS 1, 502 AS 2 en 502 AS 3 in 'n Kritieke Biodiversiteitsgebied geleë is wat hoogs sensitief is en die enigste boerderydoel waarvoor hierdie grond benut kan word, is byeboerdery of soortgelyk..

Aansoekvorms kan by die Ekonomiese Ontwikkelingskantoor by die NPK-gebou, 2de Vloer, Hv Ryneveld- en Pleinstraat, Stellenbosch afgehaal word, of per e-pos aangevra word van Mark.Harris@stellenbosch.gov.za of dit kan afgelaai word vanaf www.stellenbosch.gov.za

Vir meer inligting kontak Mark Harris by Mark.Harris@stellenbosch.gov.za of by 021 808 8159 / 021 808 8974. Voorstelle moet nie later as **12h00 op 13 Maart 2025** ingedien word nie by die Ekonomiese Ontwikkelingskantoor by die NPK-gebou, 2de Vloer , Hv Ryneveld- en Pleinstraat, Stellenbosch.

Beekeeping Business Plan for Andile Balula

Applicant: Andile Balula

Residence: Stellenbosch

Application for Lease: Portion 502 AS (Raithby)

1. About Me

My name is Andile Balula. I was born and raised on Roulou Farm on Annandale Road. I lived there my whole life and learned about farming with cattle and horses. After school, I got involved with the Stellenbosch Riding Club (SR) and the Stellenbosch District Riding Club (SRDC). I started building the jumps for cross-country riding on their property, and I have been doing this for years. I am still involved with horses and know the fynbos area well because I built the jumps there.

2. Proposed Business Model

I started working with bees when I was young, looking after beehives on Roulou Farm. Now, I have three beehives that I manage, and I want to expand my beekeeping business. If I get this land, I will be able to keep more hives in a safe place, grow my honey production, and sell honey to more customers. I will also remove alien plants from the land and help restore the fynbos.

3. Production Viability

Right now, I can only manage three hives, but if I get this land, I can expand my hives to at least 20 over time. With better space and management, my honey production will increase. I will take care of my hives properly and make sure they produce more honey each season. This will allow me to grow my income and keep the land in good condition.

4. Market Access

I already know people who buy honey locally. I have been selling beehives to locals, and I know that many people want to buy honey. If I can produce more honey, I can sell to more customers in Stellenbosch and nearby areas. With more production, I can also look for bigger buyers, including markets and shops.

5. Financial Viability

With secure land, I will not have to worry about losing hives or moving them around. This means I will have stable honey production and a steady income. By growing from 3 hives to 20 hives, I will be able to sell more honey and support myself with this business.

6. Financial Model

Current Financial Situation

Year	Honey Production (kg)	Revenue (R80/kg)	Expenses
1	30	R2,400	Hive maintenance
2	50	R4,000	Hive maintenance
3	70	R5,600	Hive maintenance

Projected Financial Situation After 3 Years

Year	Honey Production (kg)	Revenue (R80/kg)	Expenses
1	200	R16,000	Hive maintenance, helper salary
2	350	R28,000	Hive maintenance, helper salary
3	500	R40,000	Hive maintenance, helper salary

7. Commitment to the Land

I understand that this land must be protected. I will remove alien plants and help restore the fynbos. The municipality can inspect the land every three months to check my progress. I will also take drone photos every year to show how I am improving the land.

8. Conclusion

Getting this land will help me build my beekeeping business and support myself in the future. I am ready to work hard, take care of the land, and grow my business. This is an opportunity for me to create something stable and long-lasting.

Byeboerdery Besigheidsplan vir John Matthews

Aansoeker: John Matthews

Woonplek: Jamestown, Stellenbosch

Aansoek vir Huur: Erf 502 AS (Raithby)

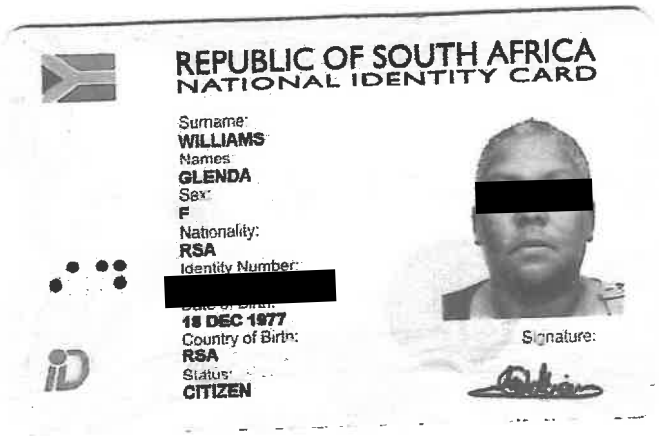
1. Oor My

Ek John Matthewsis op die plaas De Groote Zalze gebore. Ek het skool gegaan in Jamestown ,maar op die plaas gewerk in my vrye tyd, Daar het ek geleer van bye en toe die plaas verkoop is ,moes on Jamestown toe trek.ek het tans 6 byekorwe en dit vir eie gebruik en ek verkoop aan die mense van jamestown..

2.Plaas 502.

ek doen aansoek vir n stuk grond van grond op Erf 502 AS in Raithby . Dit sal my in staat stel om n besigheid van die bye te maak. Ek het 'n kar, so ek kan maklik na die bye ry en hulle versorg. Dit sal ook die probleem met my familie en bure oplos, want ek hoef nie meer die bye by die huis te hou nie.

3. Wat Ek Wil Doen



Ek wil my byekas-bedryf groter maak en meer bye kry. Ek sal na die bye kyk en seker maak hulle het alles wat hulle nodig het. Ek verstaan dat hierdie 'n bewaringsgebied is en ek sal die indringer plante uithaal en help om die land skoon te hou. Ek weet hoe om hard te werk en ek is reg om hierdie kans te gebruik.

4. Hoe Dit My Sal Help

Hierdie sal vir my 'n groot geleentheid wees om my byeboerdery reg te kry. Ek kan dit ordentlik doen sonder probleme by my huis. Dit gee vir my die kans om ekstra inkomste te maak en iets op te bou vir die toekoms.

5, Slot

Ek is gewillig om hard te werk en hierdie grond goed op te pas en te verbeter. Ek sal help om die grond reg te maak en seker maak my bye is veilig. Ek vra vir hierdie kans sodat ek my lewe kan verbeter en iets goeds kan bou vir die toekoms.

RE: Application for lease of farms 502 AS 1, 502 AS 2, 503 AS3 of Stellenbosch, Western Cape

To whom it may concern

I am a 52-year-old, Coloured communal, small scale farmer at farm 996 Ithembe Farm, Old Faure Road, Eerste River. I am farming among a community of farmers, and have been on Ithemba since 2010.

I have been residing in Stellenbosch for over 10 years.

I am currently farming with livestock, which includes 7 cattle, +-100 pigs, five goats, and 20 New Zealand rabbits.

In 2020, I was sponsored R50 000 (Fifty Thousand Rand) by the *Department of Agriculture, Land Reform and Rural Development*, for feed and medicine.

The breakup of the ownership is:

- Kurt Jacobs 30%
- Veronica Jacobs 40%
- Deidre Jacobs 15%
- Robyn Jacobs 10%
- Jeremiah Titus 5%

65% of the farm is woman empowerment.

My own capital contribution towards the farm consists of R100k investment (One Hundred Thousand in savings). The personal assets I have are farm vehicles which includes a 2002 Land Rover and a 2013 Nissan NP 200 bakkie. The equipment I have are basic hand tools (a jack hammer worth R25 000, two Bosch grinders worth R5000, and electrical tools worth R10 000).

I am registered with the Department of Agriculture, and Fisheries, with a certificate as a mark of identification, for large livestock since 2013. Please find attached, the copy of the certificate. I have also completed a certificate with the SPCA Compassion in farming in 2019 (Please see attached). In 2023, with the help of the Stellenbosch university, I have completed a course in Livestock Management Database (LMDS).

I hope my application is viewed favourable.

Kind regards

Kurt Jacobs

GENERAL INFORMATION

SIZES OF IDENTIFICATION MARKS (Regulation 9)

(1) **Large stock** The size of a character by means of **(a) tattooing** must not be more than 20mm at the widest and the highest part, **(b) branding** must be between **40mm and 100mm** at the widest and the highest part.
(2) **Small stock tattooing** must not be more than **20mm** at the widest and the highest part.
(3) **Ostriches** The size of a character by means of **(a) tattooing** must not be more than **20mm** at the widest and the highest part, **(b) branding** must be between **25mm** and **25mm** at the widest and the highest part.

SHAPE, PATTERN AND COMPOSITION (Regulation 10)

(1) **Large stock**
  (a) An identification mark in the case of large stock must consist of **one to three** characters.
  (b) In the case of **tattooing** the characters of an identification mark consisting of more than one character must be **tattooed from left to right next to, and 6mm from each other.**
  (c) In the case of **branding** the identification mark must be **branded**
    (i) **next to** and **20mm** from each other
    (ii) **below** and **20mm** from each other
    (iii) **triangular pattern** in which the first character forms the apex and the other two characters, applied next to and **20mm** from each other, and 20mm below the first character, form the base or
    (iv) **triangular pattern** in which the first character forms the bottom and the other two characters, applied next to and **20mm** from each other, and 20mm above the first character, form the top edge.
(2) **Small stock**
An identification mark in the case of small stock must consist of **one to three** characters and the characters must be **tattooed next to, from left to right and 6mm from each other.**
(3) **Ostriches** An identification mark in the case of ostriches must consist of **one to two** characters and the characters must be
  (a) **branded next to** and **6mm** from each other
  (b) **branded below** and **6mm** from each other or
  (c) **tattooed next** to and **6mm** from each other.

AGE OF LIVESTOCK AT THE TIME OF MARKING (Regulation 11)

(a) **Cattle**
  (i) **Must** be **marked** by the age of **six months**
  (ii) **can** be tattooed from the age of **one month** or
  (iii) **can** be branded at the age of **six months** and
  (iv) **must** be branded by the **age of the first pair of permanent incisors (two-tooth stage).**
(b) **Small stock must** be **tattooed** at the age of **one month.**
(c) **Pigs must** be **tattooed** at the age of **one month.**
(d) **Ostriches** (i) **can** be **tattooed** at the age of **one month** and (ii) **can** be **branded** at the age of **six months.**
(e) **Equine** (i) **can** be **tattooed** at the age of **six months** and (ii) **can** be branded by the age of **twelve months.**

PARTS ON WHICH ANIMALS MUST BE IDENTIFIED (Regulation 12)

(1) **Cattle**
  (a) **tattoo mark** the mark must be applied in the **left or right ear** and
  (b) **brand mark** the mark must be applied on any clearly visible part, with the exception of the neck.
(2) **Small stock** the mark must be **tattooed** in the **left or right ear.**
(3) **Pigs** the mark must be **tattooed** in the **left or right ear.**
(4) **Ostriches**
  (a) **ostriches under** the age of **six months**, the **tattoo** mark must be applied under the left or right wing
  (b) **ostriches over** the age of **six months**, the **brand mark** must be applied on the left or right outer thigh.
(5) **Equine**
  (a) the mark must be tattooed on the upper jaw, lower lip, left or right ear
  (b) the mark must be branded on any clearly visible part, with the exception of the neck.

PROPOSAL FOR MUNICIPAL LAND:

Submitted by: Kyle Davids
Date:13 March 2025
To: Stellenbosch Municipality
Subject: Proposal for Vineyard Development on Municipal Land

Introduction:

My name is Kyle Davids, and I am from Pniel, Stellenbosch, where I was born and raised. I have lived in Stellenbosch for the past 28 years and hold a Bachelor of Science(BSc.) in Viticulture and Oenology from Stellenbosch University, which I obtained in 2019. With seven years of practical experience in the wine industry, I have developed a deep understanding of viticulture and winemaking.

Currently, I am part-time employed and seeking a permanent position as a winemaker or viticulturist. I believe this project serves as a crucial stepping stone into the wine industry, allowing me to realize my long-term vision of owning a vineyard and wine cellar. Beyond personal growth, this initiative will contribute to greater inclusivity within the wine sector and provide a valuable training ground for future graduates, equipping them with practical knowledge and hands-on experience.

Additionally, the establishment of a vineyard and wine cellar presents a significant economic opportunity. By producing high-quality grapes and wine, we can generate revenue and build a sustainable, profitable business that contributes to the local economy while creating jobs and fostering industry growth

I have established a strong network within the wine industry to support the development of this project. Additionally, I have secured private investment for the establishment of vineyards and the construction of a wine cellar for production. To bring this vision to life, I require suitable land for vineyard development and production facilities. This project presents a significant opportunity to drive economic growth and create employment.

Proposal for Municipal Land Allocation

Submitted by: Kyle Davids
Date:13 March 2025
To: Stellenbosch Municipality
Subject: Proposal for Vineyard Development on Municipal Land

---

1. Executive Summary

Stellenbosch is the heart of South Africa's wine industry, renowned for its premium vineyards and world-class wines. This proposal seeks to secure municipal land for the development of a **sustainable vineyard**, with the primary goal of **growing high-quality grapes for local wine producers**.

With a **BSc Degree in Viticulture and Oenology**, I have the expertise and industry knowledge to successfully manage a vineyard. This project represents the foundation of my long-term vision to **own and operate my own vineyards and wine cellar**, ultimately contributing to the continued growth of Stellenbosch as a premier wine destination.

2. Project Overview

- **Objective:** Establish a vineyard on municipal land and supply premium grapes to local wineries.
- **Location:** Property 502 AS 1/2/3, Stellenbosch, Western Cape
- **Size Required:** 8.7 ha.
- **Grape Varieties:** Cabernet Sauvignon, Cabernet Franc,Chardonnay and Sauvignon blanc.
- **Business Model:** Sell grapes to established wineries in the Western Cape Winelands and develop future expansion into wine production, wine sales and wine tourism. We produce grapes and establish a full supply chain from vineyard to consumer.

3. Strategic Advantages & Industry Connections

This project is positioned for success due to:
✔ **Industry Connections:** I have extensive relationships with winemakers and vineyard owners, ensuring strong partnerships and market access.
✔ **Secured Buyer:** I have already secured a buyer for the grapes, guaranteeing immediate demand and financial stability.
✔ **Job Creation:** The project will hire skilled professionals, particularly graduates in Viticulture and Oenology, fostering employment opportunities within the sector. We will also be hiring local

workers for maintaining vineyards and helping with general vineyard work during harvest.
✔ **Expansion Potential:** The long-term vision includes **winemaking, local and international wine sales, and opening a tasting room**, which will further boost Stellenbosch's tourism and job market.

4. Economic & Agricultural Benefits

This vineyard project is designed to generate sustainable economic growth and create employment opportunities for both skilled and unskilled workers. Key benefits include:

✅ Revenue Generation & Economic Growth;

The vineyard will produce high-quality grapes that will be sold to established wine producers, creating a steady revenue stream.

Over time, profits from grape sales can be reinvested to expand operations, increasing productivity and financial stability.

Expansion into wine production and a tasting room will open new revenue streams, including direct-to-consumer sales, wine tourism, and local and international exports.

✅ Job Creation & Skills Development;

The vineyard will provide full-time and seasonal employment opportunities for local residents, particularly those who are unemployed or have limited job prospects.

We will prioritize hiring graduates with Viticulture and Oenology degrees, as well as individuals with experience in vineyard management, helping to retain local talent within the wine industry.

For individuals without prior experience, on-the-job training programs will be implemented to teach vineyard maintenance, grape harvesting, and sustainable farming techniques.

As the business expands, additional roles in winemaking, cellar management, marketing, and hospitality will be created, offering long-term career growth opportunities.

✅ Support for Local Businesses;

The project will stimulate demand for local suppliers, including equipment manufacturers, irrigation system providers, transport services, and packaging companies.

By working closely with Stellenbosch wineries, we will enhance the overall supply chain, boosting productivity and efficiency across the wine industry.

The tasting room and wine tourism expansion will attract visitors, benefiting restaurants, accommodation providers, and other tourism-related businesses in the area.

✅ Sustaining Agriculture & Land Utilization;

The vineyard will optimize the use of agricultural land, ensuring that valuable resources are utilized for productive and sustainable farming.

By implementing eco-friendly practices such as drip irrigation, organic composting, and biodiversity preservation, the project will contribute to long-term agricultural sustainability.

Supporting local grape cultivation helps maintain Stellenbosch's reputation as a world-class wine-producing region, strengthening its appeal in domestic and international markets.

5. Environmental & Sustainability Plan

-**Water Conservation** – Implementing drip irrigation and rainwater harvesting.
-**Soil Health Management** – Using organic compost and cover crops to maintain soil fertility.
-**Eco-Friendly Pest Control** – Reducing chemical pesticides and promoting biodiversity.
-**Carbon Footprint Reduction** – Minimizing emissions through efficient land use and transport.

6. Financial & Investment Plan

- **Initial Investment:** Self-funded with potential partnerships from wine producers. We will also receive private funding.
- **Projected Revenue:** Based on grape sales at market rates. Stellenbosch has the highest Rand/ton grapes in Western Cape. This is because of the high demand and quality of grapes that can be produced on Stellenbosch soils.
- **Long-Term Viability:** Sustainable business model with future expansion into winemaking and wine sales.

7. Municipal Support & Land Request

To make this project successful, we request:

- **Lease or allocation of 8 hectares** of municipal land for vineyard development.
- **Long-term partnership opportunities** with the municipality for sustainable agricultural initiatives.
- **Infrastructure support where applicable** (access to water, roads, etc.).

8. Conclusion & Call to Action

This project is not just about **growing grapes**—it is about **creating jobs, supporting local wineries, and building a sustainable wine industry** in Stellenbosch. With my qualifications, industry connections,financial backing and already secured buyer for the grapes, I am well-positioned to ensure the success of this venture.

The vineyard will serve as a foundation for **future wine production, local and international sales, and a tasting room that enhances tourism and employment opportunities.**

By expanding inclusivity in the wine sector, creating employment opportunities, and providing a training ground for future agriculture graduates and local youth, this project will play a key role in empowering underrepresented communities and driving sustainable economic development.

I look forward to discussing this proposal further and working together to bring this vision to life. Please let me know a convenient time to meet.

Sincerely,
Kyle Davids

Beekeeping Business Plan for Dolf Matthews

Applicant: Matthews

Age: 61 years old

Residence: Stellenbosch

Application for Lease: Portion 1, 2, or 3 of Farm 502 AS

1. About Me

My name is Dolf Matthews I am 61 years old. I have worked my whole life as a machinist at different furniture factories. My wife has a stable job at Rhodes Fruit Farm, but she will retire soon. She has a small pension, but I do not have one because I worked at smaller furniture factories for many years.

2. My Experience with Beekeeping

I have been building beehives for many years. I have my own transport, which I use to sell hives to people. I also have a few beehives of my own. Over the years, I have built up many customers who can help me get more bee colonies. Right now, I have six hives. My customers often have swarms, and I can get more bees if I have a good place to put them.

3. Why I Need This Land

I sell honey on a small scale, but I want to grow my business. If I am successful , I can keep my beehives in one place instead of moving them around. I understand that this is a conservancy, and I will take out the alien plants to help restore it. I can also sell the alien wood as firestarters to help start my business.

4. My Plan to Grow the Business

If I get this property, I can also help the two other people who lease the other portions. We can work together and I can also help them to sell the wood from the alien plants as firestarters. This will generate money for a few years while the business grows and help to restore the land.

5. Market and Future Growth

I already sell beehives in the local market, and I know people who buy honey. If I get more hives, I can sell more honey and build a business that can support me when I retire. I can use my 17 years of woodwork experience to produce beehives at a low price and so keep my input costs low.

6. Commitment to the Land

I understand that the land must be taken care of. I will remove the alien plants on a scheduled program and as the land rehabilitates the more hives it will be able to accommodate. The municipality can do inspections every three months to see how I am looking after the land. I will also take drone photos every year to show my progress.

7. Conclusion

I look forward to this opportunity so I can grow my beekeeping business and support myself in retirement. I already have the skills, transport, and customers. I just need a place to keep my hives. I am ready to work hard, take care of the land, and build something that will last.

BUSINESS PLAN

EXECUTIVE SUMMARY

S & M Eco-farming is a small scale enterprise organic farm that is based in the kayamandi location in Stellenbosch at Kuyasa Horizon. We have done our detailed market research and feasibility studies and we were able to secure a well-situated and suitable farm land to lease for our organic farm. Our organic farm is going to be a standard farm that will be involved in herbs and vegetable growing, livestock farming and other crops production.

We want to compete with the best in the industry which is why aside from the fact that we have secured the required lease land, we have also employed a student from Elsenburg Agric College, who's currently undergoing training so as to fit into the ideal picture of the 21st century organic farm workforce that we want to build.

S & M Eco-farming is well positioned to become one of the leading small enterprise organic businesses in the Stellenbosch region, which is why we have been searching for best manual resources and farm machinery to run the business to its maximum capacity.

S & M Eco-farming, is a business that is owned by Mr. Mlondozi Mnxeba and Simlindile Patekile. Akhona Songelwa who is currently on training will soon be joining as a member of the business. Since inception, the business has been financed by the owners.

Both business owners obtained NQF level 4 in mixed farming and their potential partner has a Higher Certificate in Agriculture from Elsenburg Agricultural Training Institute and currently studying diploma in agricultural extension.

The business is already supplying Spier Hotel, Lucky Bean School, Food Forest and the Kayamandi community. At S & M Eco-farming, we will ensure that we hire people that are qualified, hardworking, dedicated and with high customer services. The business will require R400 000 to be able to operate at its maximum capacity.

4.1 Strategies

Our sales and marketing team will be recruited based on their vast experience in the industry and they will be trained on a regular basis so as to be well equipped to meet their targets and the overall goal of the organization. We want to build a standard and world – class organic farm that will leverage on word of mouth advertisement from satisfied clients (both individuals and corporate organizations).

In summary, S & M Eco-farming will adopt the following strategies in marketing our organic farm produce:

- Introduce our business by sending introductory letters alongside our brochure to stakeholders in the agriculture industry, organic food merchants, restaurants and groceries stores et al;
- Advertise our business in agriculture and food related magazines and websites;
- Attend related agriculture and food expos, seminars, business fairs et al;
- Engage in direct marketing, and
- Encourage the use of word of mouth marketing (referrals

4.2 Timeline

Week days	Activities	Time-frame	
Monday	Monitoring garden yields, feeding of chickens, send available stock to our reliable clients	07:00h-16:00h	
Tuesday	pre-harvest, post-harvest, washing, sorting and packaging of products and order delivery	07:00h-16:00h	
Wednesday	transplanting	07:00h-16:00h	
Thursday	Workers training, monitoring the garden, method demonstration to new labourers	07:00h-16:00h	
Friday	Evaluating the week plan, harvest for weekend orders,	07:00h-16:00h	

5. ORGANISATION STRUCTURE AND HUMAN RESOURCES

5.1 Management and Support Personnel

The people behind the business are the owners and 3 employees, the two owners has an NQF level 4 qualification in mixed farming obtained from the sustainable institution, one of their employee is a student for a higher certificate qualification in agriculture. and the two learners who's still completing their high school this year working as part time.

BUSINESS DESCRIPTION

S & M Eco- farming is a micro business that is committed to cultivate organic crops and breed livestock for the business target market.

We ensure that we adhere to standard organic food packaging regulations to ensure that our products are safe for eating. We are business to satisfy the needs of our community and also make profit. We will ensure that we comply with the regulations and the law of the country to achieve our business goals and objectives.

2. BUSINESS OPERATIONS

S & M Eco- farming that is operating at a small scale and committed to farm organic crops and livestock to supply to their target market being Stellenbosch and surrounding areas. We are in business to fulfil the needs of our community, make profits and create jobs.

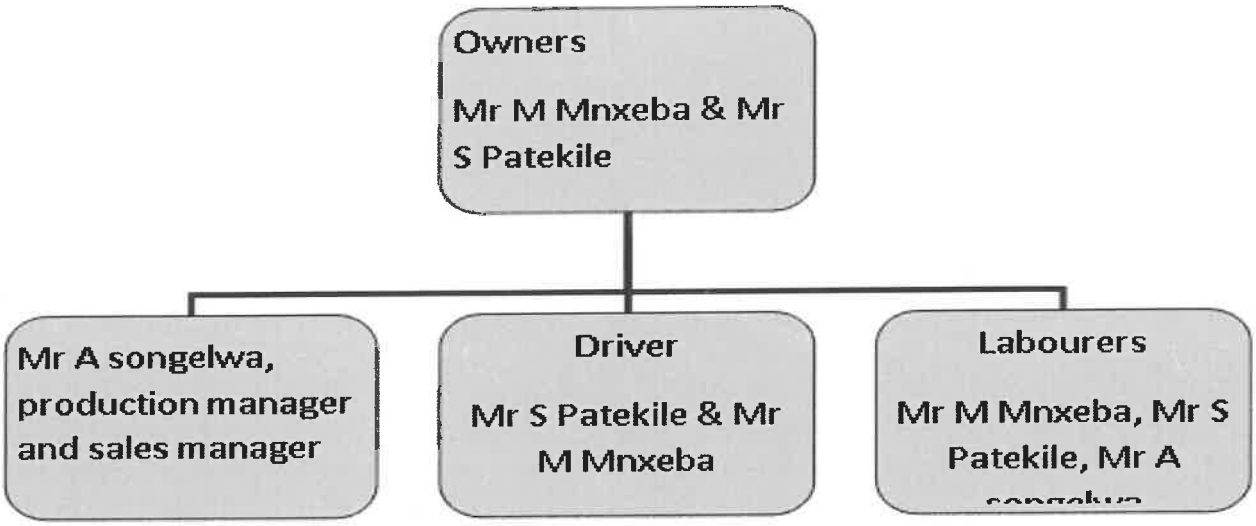
The business has a framework of day-day activities. During planting season, we prepare the soil for planting, do plots to plant directly seeds. We plant some other seeds in the seedling trays and allow germination of seeds for approximately for about 7-14 days after germination we monitor, irrigate to keep the soil moist, and weeding. We pre-harvest and post-harvest after post-harvest we follow the necessary routine up until our product is ready for the market. With our chickens we buy them small and feed them with starter feed, grower feed and post finisher and after 6 weeks our chicken broilers are ready for market as well.

3. MARKET AND COMPETITION

3.1 Environment Analysis

S & M Eco-farming is operating at the Kuyasa Community Horizon, in a secured place. The business is requiring a fenced and safe land to lease and the place is well fenced and safe from theft since the place is well fenced and the place.

3.2 Target Market Analysis



Currently most of our clients prefers organic food which is why S & M Eco-farming saw the opportunities and we are working hard to satisfy their needs, S &M eco-farming is producing quality and pure organic product Our customers are Spier Hotel, Lucky Bean, Food Forest and Kayamandi community and surrounding areas.

3.3 Competitor Analysis

Commercial farmers in the Stellenbosch Region. There is nothing that they are doing wrong but they are not catering for small orders as we do. We deliver daily and same day harvest.

Funding Required

Going by the report from detailed research and feasibility studies conducted, we will need an average of **R400, 000** to start a standard commercial organic farming business in the RSA. These are some of the equipment that we would need to fully launch our organic farming business,

- 5 fork spades (R850)
- 5 spades (R965)
- 5 Rakes (R750)
- Sprinkler system irrigation (R30 000)
- 3 Wheel Barrows (R2340)
- Bakkie (R115,000)
- 3 Hand hoes (R390)
- 2 picks (R474.00)
- 3 Nepsec sprayers (R484.00)
- 4 bags Guano group 2 (R3 250)
- Gypsum 50kg *2 (R144,24)
- 5 bags Go-organic group2 (R2 500)
- 5 Vermiculite bags (R406)
- Compost big truck (R10 000)
- Snaile bate (R999.00)
- 5 Rolls green fence (R1 127.00)
- 300 Poles (R33 000)
- 2 Gates (R 5 534)
- Nursery (R30 000)
- 5 JoJo tanks (R1 1783.00)
- Big pump (R15 400)
- Big generator (R 17 241.81)
- 3 Laptops (R15 000)
- Store room container (R40 000)
- Cold room container (R30 000)

Total amount required: R 367 638, 05

8. CONCLUSION

S & M Eco- farming that is operating at a small scale and committed to farm organic crops and livestock to supply to their target market being Stellenbosch and surrounding areas. We are in business to fulfil the needs of our community, make profits and create jobs. The business works according to its customer preferences and it ensures that the needs of their clients are satisfied by producing purely organically and that is why it will be successful. Our Vision is to become one of the leading commercial organic farms not only in the Stellenbosch region but also in the provincial stage and global wise more reasons why S&M eco-farming needs to be supported so that more jobs opportunities can be created by the farm.

STELLCARE
Stellenbosch & Districts Family Services

1. Executive Summary

StellCARE is a Stellenbosch-based non-profit organisation focused on social and economic development projects within the Cape Winelands area. A key strategy driver for local economic development on areas with little water availability for crop production, StellCARE has identified honey production and pollination services as one of the key economic drivers, which may also support other programs to benefit stipend social employment participants who all form part of the organisation's social employment cooperative.

A pilot program trained eight (8) emerging farmers between October and December 2024, and StellCARE has already procured 100 hives, of which 26 currently active near Spier. However, more land is required to scale operations, and Portion 502-AS1-3 has been identified as an optimal site for the establishment of four (4) geographically spread apiaries, each housing 25 hives. The project is expected to produce 1000 – 1500 kg of honey annually, generating revenue of R100 000 – R200 000 per year through wholesome and bottled sales.

StellCARE proposes a minimum of 9-year lease, with the possibility of renewal. The organisation commits to maintaining the land's fencing and access roads, to ensure the property remains in pristine condition.

2. Operational Plan

StellCARE aims to expand its emerging farmer development program by training and equipping 40 honey bee farmers, an annual intake of 10 new trainees. The goal is to scale operations to 500 hives producing 5000 kg of honey annually.

StellCARE collaborates with the IDC (Industrial Development Cooperation) Social Employment Fund, ensuring funding for hives, swarms, machinery, PPE and training. The phased operation roll-out over 4 years as follows:

Activities	Year 1	Year 2	Year 3	Year 4	Total
a) Basic Bee Farming Training	10	10	10	10	40
a) Advanced Bee Farming Training	10	10	10	10	40
b) Expansion of bee hives	100	200	300	500	500
c) Value Chain Management	500kg honey	1000kg honey	3000kg honey	5000kg honey	5000-6000kg per annum
d) Monthly Mentorship and	2 Sites	4 sites	6 sites	8 sites	8 sites

Coaching visits by specialists to each apiary					

Table 1: Operational Plan

a) Training programmes

The basic course, covers:

- Health and Safety
- Protective gear management and maintenance
- Swarm management
- Wax management
- Extraction of honey operations
- Systems to improve colony production
- Pest control

The advanced certificate in agricultural business management – apiary specialisation provides knowledge and skills to increase hives and manage the finances. Course outlines include:

- Swarm multiplication
- Budgets
- Value adding
- Quality Standards
- Legal compliance

No additional cost will be necessary for the procurement of the initial outstanding hives, where-as money are allocated for 400 more bee-hives.

b) Expansion of bee hives

Local suppliers such as Overberg Honey will provide (already supports StellCARE) hives, supers and tools. Overberg Honey has also committed to purchasing bulk honey, ensuring a market for produce.

c) Value Chain Management

StellCARE in collaboration with IDC will oversee honey processing (extraction and bottling) to maximise income per kilogram of honey.

d) Sustainability and Support

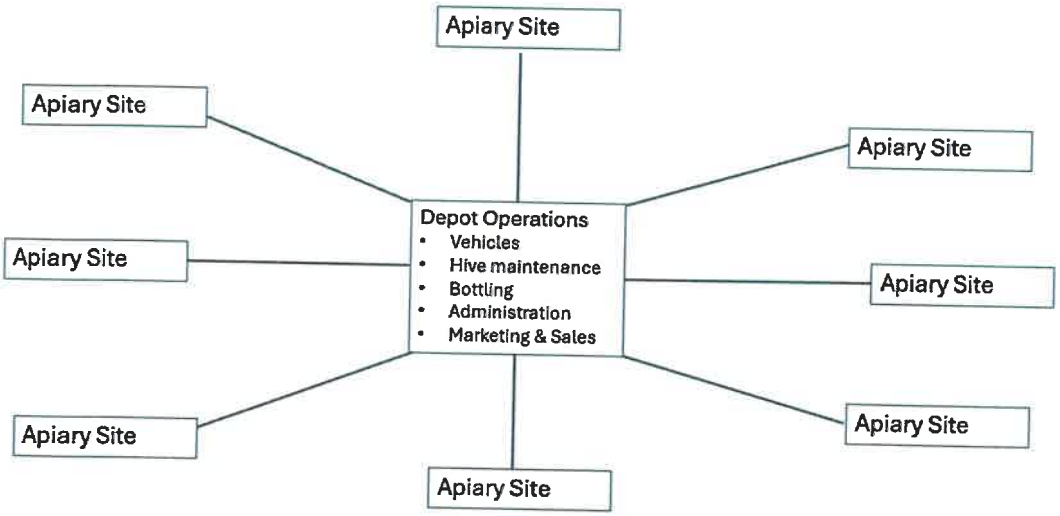
Experienced specialists will conduct monthly hive inspections, offering guidance on feeding, production, and pest control, as well as guidance to the emerging farmers (on-site training).

3. Marketing Plan

StellCARE will target bulk honey buyers and retail consumers with the assistance of our collaborative partners, without interference from all parties. South Africa imports over 6,000 tons of honey annually, highlighting significant demand (Sishlobo, Agbizz, 2023). Bulk honey is globally used in food production, while bottled honey will be sold in delis, farm stalls and select retails stores within 100 km of Stellenbosch. Current market prices are R 70-R80 per kg bulk and R 60 per bottle. The sales plan looks as follows:

Honey Production	Year 1	Year 2	Year 3	Year 4-
Bulk Sales (kg)	500kg (50%)	1000kg (50%)	1000kg (33%)	2000kg (33%)
Bottled Sales (units)	1000	2 000	4 000	6 000
Hives in production	100	200	300	500

Table 2: Sales Plan



4. Human Resources Plan & Job Creation

Bee farming requires minimal intervention, with routine site visits, monthly hive inspections, and seasonal harvesting. Forty (40) trainees will manage eight apiary sites in teams of four, equipped with vehicles, red lights, and specialized tools.

This initiative supports StellCARE's broader cooperative framework under the Social Employment Fund, integrating with programs in education, community safety, and urban farming.

Current Agricultural Employment Breakdown:

- Women: 479 (Youth 214)
- Men: 207 (Youth: 58)

Schematic 1: Structure

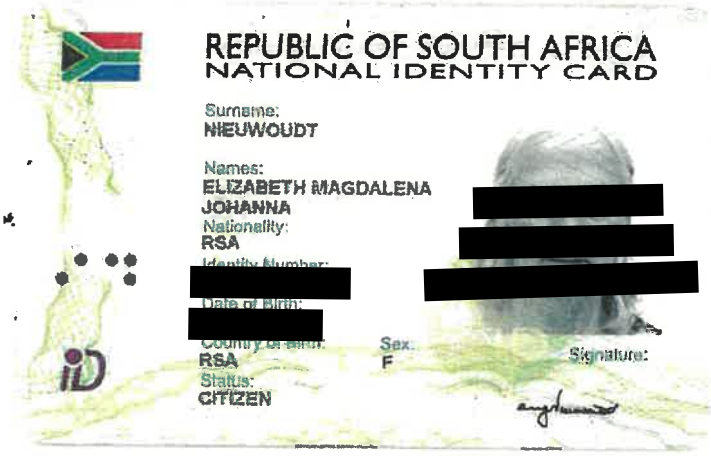
5. Financial Management

Key investments for the project include hive procurement, protective clothing, processing machinery, and operational expenses.

Items	Details	Investment
Hives with swarms	R 2000 x 500 units over 5 years	R 1 000 000
Protective clothing and tools for 30 people	R 5000pp x 30	R 150 000
Training and Coaching provision	40 people x R 15 000	R 600 000
Processing Machinery	Extractors, bottling, label printer	R 250 000
Operational Capital provision	12 months	R 500 000
Total Investment	5- year period	R 2 500 000

Income Projections from Portion 502 -AS 1-3

Income Projection		**Year 1**	**Year 2**	**Year 3**	**Year 4-7**
Hives		100	100	100	100
Production (kg)		500	1000	1000	1200
Sales		**R47 500**	**R95 000**	**R105 000**	**R134 000**
Bulk (kg)	R70 per kg	250	500	300	200
Bottled (units)	R60 per unit	500	1000	1400	2000



6. Project Developmental Benefits

- Empowers emerging farmers
- Creates income for previously unemployed individuals
- Promotes sustainable land use in protected areas
- Provides training and mentorship for 40 emerging farmers
- Establishes a high-demand honey value chain

7. Conclusion

StellCARE's bee farming initiative is designed to create lasting economic and social impact. The cooperative model ensures sustainability by integrating apiary operations with broader community programs. With skilled oversight, compliance, and strategic market partnerships, the initiative provides long-term benefits for all participants (686 current participants).

Through this project, emerging farmers will gain the necessary skills, resources, and market access to become independent entrepreneurs in the honey industry, contributing to South Africa's local honey production and economic resilience.

Dear Business Owner

REGISTRATION: STELLENBOSCH & DISTRICTS PRIMARY COOPERATIVE LIMITED: 2023 / 006289 / 24

I have pleasure in informing you that the above-mentioned co-operative was registered in this office on 20/11/2023 in terms of the Co-operatives Amendment Act, No.6 of 2013.

I further certify that **STELLENBOSCH & DISTRICTS PRIMARY COOPERATIVE LIMITED** is with effect from 20/11/2023, entitled to commence business. See attached registration documents and Constitution.

Congratulations on registering your co-operative. The Companies and Intellectual Property Commission (CIPC) wishes you all the best in your business endeavours.

Registering your co-operative is only the first step in managing it. Throughout its life span, a co-operative is required to maintain its information and legal status with the CIPC. Failure to do so may have serious consequences for the co-operative and your business activities, as it may result in deregistration.

The Co-operatives Amendment Act, No.6 of 2013 places compliance requirements on all registered entities throughout its life cycle, which includes any changes to the co-operative information and annual submission of audited financial statements. The annexure hereto is an easy guide to assist you with managing your co-operative compliance obligations.The table is not a legal document, but rather a guide to some of the most pertinent requirements that must be adhered to.

Please ensure that CIPC always has the latest contact details for the directors or the authorized representative so that important information relating to annual submission of financial reports, director changes and pending deregistration's can be transmitted efficiently and effectively to the correct person.

Should you require information on any of other requirements, please direct your enquiries to:

- Website: www.cipc.co.za
- Tel: 0861002472

Kind Regards
COMMISSIONER - SIGNATURE

REGISTRAR OF CO-OPERATIVE:CIPC

Companies and Intellectual Property Commission

a member of the dtic group

Registration Number: [redacted]

Enterprise Name: **STELLENBOSCH & DISTRICTS PRIMARY COOPERATIVE LIMITED**

COMPLIANCE ACTIVITY	NOTES	PROCESS/FORM
Annual submission of information to the registrar	• Co-op 8 must be submitted together with Form Co-op 7 containing the submission by the co-op of its audited report, independent reviewed report or annual report, in terms of regulation 21 or within 30 days thereafter.	
Annual Returns	• Due on anniversary date of co-operative incorporation date. • Must be filed within 30 business days of its due date. • Must be filed electronically via the CIPC website. • A fee is payable at the time of filing that is dependent on the turnover of your business • An Annual return is not the same as a tax return which is filed with SARS. • Failure to file the annual return will result in your co - operative being deregistered.	
Changes in directors or auditors	• CIPC must be notified of any changes in the directorship of your co - operative within 30 business days of such change on Form Co-op2. • CIPC must also be notified of any changes to the auditor (appointment, resignation or removal) of your co-operative within 15 business days of such change or approval on form Co-op4	
Changes in address and contact details	• If a change in the physical / postal address and/or e-mail address occurs, the co-operative must notify the CIPC of such change by filing form Co-op3 within 5 working days of the decision to change contact details.	

Deregistration & Liquidation	• When a co-operative stops trading, it needs to apply either for deregistration or for liquidation, depending on the circumstances. • When a co-operative does not file annual financial statements for a period of 2 years of its establishment it will be presumed that it is dormant Non-submission of annual financial statements will trigger deregistration process. • Liquidation process is followed when a co-operative has assets and liabilities that must be distributed to creditors.	
Judicial Management	• A co-operative may voluntarily apply/any interested person/the Minister to Court for judicial management order if there is reasonable probability that if placed under judicial management it will be able to pay its debts and become a viable going concern.

Issue Date: 2024/05/09

Dear Taxpayer

TAX COMPLIANCE STATUS PIN ISSUED

The South African Revenue Service (SARS) has issued your tax compliance status (TCS) PIN as indicated below:

TCS Details:	
Taxpayer Name	Stellcare/Stellsorg
Trading Name	STELLCARE SEF
Taxpayer Reference Number(s)	[redacted]
Purpose of Request	Good Standing
Request Reference Number	0008755276GS0905241347525
PIN	ECG9716223
PIN Expiry Date	09/05/2025

You may authorise a third party to view your TCS by providing them the PIN. The PIN only allows the third party access to your TCS. All your other tax information remains secure.

Your TCS displayed is based on your compliance as at the date and time the PIN is used.

You may cancel this PIN at any time before the expiry date reflected above. Once cancelled, a third party will not be able to verify your TCS.

SARS reserves the right to cancel the TCS application and associated PIN in the event that it was issued in error or provided on the basis of fraud, misrepresentation or non-disclosure of material facts.

More details regarding our channels, office hours, services, tailored information regarding tax as well as a comprehensive FAQ repository are available on the SARS website: www.sars.gov.za.

We value your support and contribution to our country's economy and prosperity. We strive to ensure that you clearly understand what is expected from you, as well as what your rights as a taxpayer are.

Sincerely

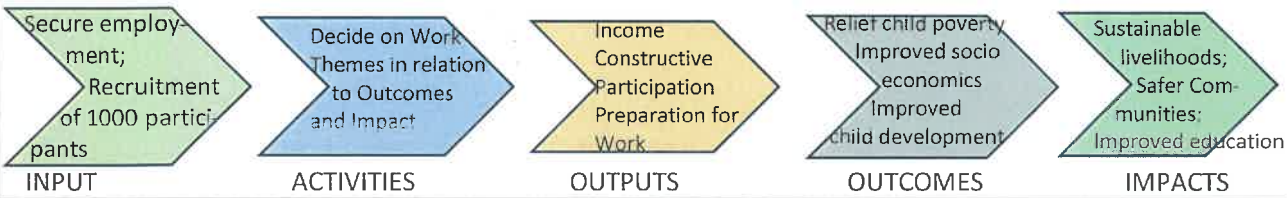
SOCIAL EMPLOYMENT FUND

SIP CLOSE OUT REPORT	
Project Start Date	SEPT 2022
Province/s	WESTERN CAPE
No. of Sites	6
Project end date	31 MARCH 2023



NARRATIVE SECTION

1. Executive Summary and Theory of Change

(Provide a summary of the purpose of the report including reflection of the project's initial theory of change and the extent to which this has been met, milestones achieved, outputs/outcomes, challenges encountered and any other relevant information.)

In order to arrive at acquiring results of the existing social employment fund, it is necessary to evaluate the outcomes of the project as had been envisaged by the implementing social implementing partner, in this case, StellCARE.

In terms of our service delivery mandate and contractual arrangement with the Department of Social Development, measured against the increase in numbers of alleged neglect and/or abuse of children; levels of child poverty; increase in unemployment; increase in gang activities and juvenile involvement in violence related incidents, StellCARE as a child protection facility with its focus on support of families, realised for a very long time that change is needed and urgently so. The focus would be to prevent further decay of the family as the primary focus of service delivery, with the outcome through impact driven initiatives, safer communities. The realisation of the ***HOW***, was vested in job creation and aligning actions to keep youth of the streets in jobs. It was for this reason, that StellCARE applied for participation in the Presidential Employment Fund programme

2. Reflections on the Project Design

(Provide a narrative summary on the appropriateness in respect of the effectiveness and efficiencies of the project design including training, activities undertaken, and the extent to which the design enabled targets and impact being achieved. To the extent possible, this must address each of the thematic areas and include areas of improvement in the respective design.

NUMBER OF SEF PARTICPANTS ALLOWED EMPLOYMENT OPPORTUNITIES THROUGH SOCIAL GOOD: 1334

The appropriateness of the effectiveness of the project can never be underestimated and in line with the social and community anomalies reported in the quarterly reports of the organisation. Areas that present challenges in terms of achieving total outcomes and impacts as perceived, was mostly training, long waiting periods between ordering PPEs and goods, underestimation of the level of M&E against systems implementation. The fact that the initial phase was, even on requesting support, aided at "not necessarily" being 100% as per tender document, later turned out not supportive of acceptable governance. The fact that the accounting functions of StellCARE are outsourced, also seems not be beneficial, albeit beneficial in terms of the operational context of StellCARE, in relation to budgetary constraints.

Thematic Area 1 - EDUCATION

Number of Participants – 192
Number of Children - 2672

Early Childhood Development and Main Stream Education play and equal essential part in supporting families to ensure effective development of children. Given the success rate experienced through earlier EPWP programs within this thematic area; the high number of school dropouts; young children between the ages of 9 and 14 years getting involved in gang activities, as well as the poor school performance of children within our mandated service areas, left us with the challenge to continue to provide support to Pieter Langeveldt Primary

STELLCARE
Stellenbosch & Districts Family Services
093-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

School. Based on the success of school support assistance, RR Franks in Eerste River, as well as Cloetesville Primary School, Rietenbosch Primary School and Raithby, approached StellCARE for support. The biggest impact reported by schools and parents, are allowing children to develop at an acceptable space; assist children with learning difficult at an acceptable level, but the most important aspect, to reduce children being expelled from classes, to almost zero.
School assistant renders extra-mural services in relation to sport, cultural activities as well as nutrition. Our assistants are involved in the basket of services rendered by schools, including maintenance, cleaning, safety on the school grounds, school holiday programs – and not limited to that.
Early childhood must be prioritised as per the President's commitment towards parents during the State of the Nation address. Children enrolled in our facilities had been, after professional assessment, indicated between 70% and 35% loss of all learning; including regress in emotional development. Placement of ECD assistants in classrooms, provide a conducive environment for children to develop optimally and to address backlogs effectively. As ECD-facilities are funded by the Department of Education, the fund is completely insufficient, thus through this initiative, parents participating in the SEF program, must enrol children, and not paying school fees.

Thematic Area 2 - NUTRITION AND COMMUNITY KITCHENS

Number of Soup Kitchens – StellCARE: 24
Number of Conduit Kitchens (LangaCan, Maxinjana; Siyakhula; Vrygrond, WDTI, Faith Revival Ministries): 24
Number of participants: 12
Number of meals per month: 52 000 only StellCARE kitchens
Due to the fact that StellCARE had been requested by the Department of Social Development to manage on their behalf 24 community kitchens outside our operational area as conduits, the Department decided to fund our nutrition program for the period 2022/2023. The operator at community level, thus forms part of the EPWP-program funded by DSD. For this reason, participants recruited to be part of SEF, could not be captured as such, but where was needed, participants had been assign to those in need of assistance. Hence the fact that is seems as if the outputs and impact had not been reached; those outcomes and impact far overreached. The fact that the StellCARE kitchens are community based, convenors screened and trained by StellCARE, assisted with the success of our facilities. The facilities are concurrently used as awareness raising outlets, assist to early identify vulnerable children and persons, and ensure that especially children and disabled persons on the receiving lists, receive daily meals. The outcomes are reported based on daily attendance registers and inspections on outputs. The impact had been already reflected in the Rapid Assessment study instituted by USAID in relation to hunger and stunting in pre-identified areas. One area was Cloetesville, where the results clearly indicated that the nutritional situation of children within our area, given the high unemployment rate as poverty, had been effectively address. This had been proved of the importance of StellCARE to continue with our nutritional programs. The budgetary cuts by DSD impacted negatively, and as no money may be diverted from the SEF-program, the reality of the threat to scale down is real.

Thematic Area 3 - COMMUNITY SAFETY AND GBV

Participants: 23
Safe and Thriving Communities: A New Approach to Community Safety and GBV
The Safe and Thriving Communities initiative under the SEF is an initiative that aims to consolidate safety, gender-based violence, victim support, as well as support to the perpetrator. StellCARE is focused on prioritizing the needs of mandated communities and supporting community-based organizations working to address violence and injustice. By adopting a comprehensive approach to community safety and GBV, and StellCARE's goal towards Safe and Thriving Families and Communities, SEF had been the primary vehicle to reached outputs that impacted on the lives of individuals and families across our communities.

STELLCARE
Stellenbosch & Districts Family Services
093-206 - NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

It is believed that in building safe and supportive communities, it requires a comprehensive approach that addresses the root causes of violence and injustice, of which unemployment, disenfranchising of men and systemic violence are the main contributors toward VAW and VAC. By advancing research-based evidence, assist communities and individual to understand behaviour and to practice and promoting sound and revisited community values and collaboration, community safety and GBV initiatives can contribute to creating environments where everyone can thrive.

Despite targets set out in the initial application, again DSD came in late with subsidy of the 2022/2023 EPWP program. That caused StellCARE to terminated 42 participants from SEF, in order to facilitate the DSD process. Impact is best described in the Network created between community, StellCARE and SAPS to jointly address the GBV occurrence.
Volunteers are fully trained and screened to perform their task. One designated social worker and community assistant are assigned to this, working hand in hand with SAPS. All SEF participants received training in GBV victims are supported throughout the process, including court support.

Thematic Area 4 - CLEANING AND GREENING

The Transformative Power of Cleaning, Greening and Beautification – GIVING HOPE TO THE HOPELESS

***1107* Jobs Creating in Waste Management and Environmental Cleaning**
The 1107 jobs created in 5 communities in the waste management and environmental cleaning sector was the most powerful initiative within our municipalities with a significant impact on both the economy and the environment. The outputs and impacts of these jobs, reflected from waste reduction and resource recovery to the improvement of public health and the promotion of sustainable development.

1. Waste Reduction and Resource Recovery

1.1. Less Waste, Cleaner and Healthier Communities toward Sustainability

One of the major outputs of these 1107 jobs (was but still) is waste reduction and cleaning of communal areas. By deploying more participants in the waste collection / cleaning sector, unfortunately the of waste ending up in landfills, were not minimized but this will be the goal for the second phase. 5 communities benefitted from this output.

1.2. Enhanced Recycling and Composting towards a Circular Economy

In addition to waste reduction, the creation of 1107 jobs in the waste management sector shifted the focus to recycling and composting potential. Recyclable items were recovered from waste streams, resulting in conserving natural resources especially open spaces and water streams, reduce pollution, and lower the environmental impact of waste disposal. The potential of new circular economic opportunities was created by all 1107 participants

2. Waste Reduction and Resource Recovery

2.1. Less Waste, Cleaner and Healthier Communities toward Sustainability

One of the major outputs of these 1107 jobs (was but still) is waste reduction and cleaning of communal areas. By deploying more participants in the waste collection / cleaning sector, unfortunately the of waste ending up in landfills, were not minimized but this will be the goal for the second phase. 5 communities benefitted from this output.

2.2. Enhanced Recycling and Composting towards a Circular Economy

In addition to waste reduction, the creation of 1107 jobs in the waste management sector shifted the focus to recycling and composting potential. Recyclable items were recovered from waste streams, resulting in conserving natural resources especially open spaces and water streams, reduce pollution, and lower the environmental impact of waste disposal. The potential of new circular economic opportunities was created by all 1107 participants.

Stellenbosch & Districts Family Services
093-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

3. Environmental Protection and Public Health

3.1. Cleaner Environment and Improved Public Health

Employment in waste management and environmental cleaning directly contributes to a cleaner environment. By ensuring daily clean-up of waste improperly disposed by community members, the participants assisted in contributing to a cleaner and safer environment and mitigate the impacts health and disease transmission through rodents, snakes and cockroaches and exposure to harmful substances.

3.2. Environmental Awareness

The 1107 participants in the environmental sector now fosters greater environmental awareness. As more people work in these fields, they become advocates for sustainable waste management practices and environmental conservation. This can inspire others to adopt sustainable habits and contribute to a greener future and a sustainable circular income, providing dignity and pride to participants.

4. Economic Growth and Job Creation

4.1. Direct Employment Opportunities

The direct impact of the 1107 new jobs of previously unemployed persons, of which the biggest percentage were youth, is unmeasurable. These jobs offered an income to 800 families with no income or child support grant benefits only. Participants' were afforded an opportunity to improve their quality of life and their families. Participants who were found guilty of misconduct were discipline and allowed to better, whilst participants were encouraged to find permanent jobs with referral of experience and work ethics.

4.2. Economic Growth

The SEF program serves as a catalyst for economic growth and contribution to service delivery of municipalities. The 1107 jobs contributed to increased production and consumption at local government level, ultimately boosting the overall economy. Furthermore, the promotion of sustainable waste management practices will now lead to the growth of green programs and initiatives, further enhancing economic growth.

5. Types of Jobs Created

5.1. Waste Collection and Disposal

Jobs involve the collection, transportation, and disposal of waste materials. Workers in this field are responsible for operating waste collection operation, sorting waste materials, and ensuring that waste is collected and disposed of by the municipalities.

5.2. Recycling and Composting

Due to the degrading of waste in this current phase, effective recycling and composting was not possible. However, in the next phase waste material would be recyclable and be processed into recyclable products or compost. In the new cycle, workers in this field will be responsible for operating recycling or composting facilities, sorting and preparing materials, and marketing the end products in order to provide sustainable income streams.

5.3. Environmental Cleaning

Environmental cleaning jobs involve the removal of pollution and contaminants from various environments, such as water bodies, soil, and air. Workers in this field may be involved in activities like hazardous waste clean-up, oil spill response, and air quality monitoring.

6. Education and Training for Waste Management and Environmental Cleaning Jobs

6.1. Formal Education

Depending on the specific job, individuals may need varying levels of education to work in the waste management and environmental cleaning sector. Some positions may require a high school diploma, while others may require a college degree in environmental science, engineering, or a related field.

STELLCARE
Stellenbosch & Districts Family Services
093-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

6.2. Vocational Training

Collaboration with Stellenbosch Municipality secured specialised vocational training where required. This can include certifications and licensing for operators of equipment, handling hazardous materials, and/or managing recycling and composting facilities.

6.3. On-the-Job Training

All 1107 participants received on-the-job training to develop the necessary understanding, skills and expertise, safety procedures, and the operation of specialized equipment in relation to the work. Most importantly is understanding fauna and flora within the bio-sphere (snakes, lizards, and all other species, including reeds).

7. Challenges and Opportunities

7.1. Collaboration and Cooperation with Local Authorities

This remains the biggest challenge yet to obtain buy-in from Stellenbosch Municipality. In respect of support by Wards, excellent progress had been made with the City of Cape Town. How to engage with local authorities to allow StellCARE to participate in opportunities must to be prioritised.

7.2. Public Perception

The positive shift in public perception of waste management and environmental cleaning must be raised as an achievement; however it remains a challenge for some workers in this sector being treated with disrespect. Positive feedback from ordinary community members affirms the success of creating a conducive and clean environment within communities.

7.3. Clean and Safe Parks and Open Spaces

StellCARE took sole responsibility for cleaning 73 parks and open spaces in Idas Valley, Cloetesville and Kleinvlei. The impact is visible and provide safety to patrons, especially children who use the parks, where youth use to loiter in parks. The challenge shifted to the local municipalities perform general maintenance.

8. The Social Impact of 766 Jobs in Waste Management and Environmental Cleaning

8.1. Community Engagement

The community appreciate the cleaning of areas and this lead to increased community engagement. Workers become local ambassadors for waste management and prevention of littering. Participants acted as warriors against littering and encourage communities to adopt environmentally friendly habits and contribute to a greener future.

8.2. Poverty Alleviation

Stable employment opportunities -= poverty alleviation, which directly addressed and improve the quality of life for workers and their families. This specifically applies to the majority of participants in this category with no income or access to finances. 766 participants now maintained their employment by the end of contract, leading to increased economic growth and social development.

8.3. Gender Equality

The waste management and environmental cleaning sector offers opportunities for all genders of all ages, thus promotes gender equality in the workforce. By creating equal opportunities for all, we can work towards a more inclusive and diverse workforce.

9. Sustainable Development Goals

The SEF program and the 766 jobs in this sector supports the 2019 – 2024 WC SDGs - focusing on Safe & Cohesive Communities; Growth & Jobs within an enabling environment; empowering people through creating opportunities to shape their lives and others; thus ensuring a meaningful and dignified life for all its citizens.

10. Impact derivative

The reality of the jobs created in waste management and environmental cleaning has far-reaching impacts on the economy, environment and society. Participants contribute to waste removal, environmental protection, public health, economic growth, and dignified living and mobility spaces. Through this for good initiative, participants are allowed to opportunity to provide in their economic needs within the family system and can work towards a more sustainable future to improve the quality of life for individuals and communities. The support provided to local government is immensely, allowing municipalities to focus on service delivery areas which would otherwise be continued to be neglected, e.g. storm water draining systems.

SOCIAL EMPLOYMENT FUND

3. Implementation Challenges

(Provide an overview of the challenges experienced and remedial actions implemented including risks that had to be managed to achieve targets and maximise impact)

Budgetary challenges, as guidance received from the support desk could not provide clear instructions. As budgeting allocation per Thematic Areas and Work Themes was not clear and difficult to decide beforehand. Guidance received indicated that it would not need to be specific, hence the problem with actual allocations. The interpretation of "no permanent staff" allowed to be "paid", had been followed according to guidelines, to learn from several SIPS that this is how they manage to manage the program.

Training: This had been experienced as tedious and a hampered the timeous implementation. The training in respect of onboarding and capturing of participants disallowed StellCARE to start in July already when we were ready and familiar with the process. Yet, the decision was that permission would be granted. Training in specifics as requested, to this date were never provided, that is the allocation of budgets to the sites. It was also communicated that the dash board does not reflect the correct budgetary allocations, as no site could be activated should the budget not be allocated. Yet, it still, to date, does not reflect all StellCARE's sites and budget. StellCARE had been informed that the organisation's details are not correctly reflected as it is a developmental process. StellCARE is being adversely affected, as the platform does not reflect even all sites, municipalities and activities.

Project Management: Despite not having a professional or qualified project management per sé, and receiving assistance from our accountants, lacking a dedicated financial person to this project had been identified. It is imperative that StellCARE employ services of a dedicated project leader who can assist with financial reporting and allocation of budgetary items correctly. This will also assist with proper, effective and on-time reporting, which is crucial to StellCARE, also in terms of our financials policy framework and the PFMA.

The **KWANTU** system: The support received from the Kwantu system much be commend with appreciation. The IDC should however, decided on what was expected, and not allowed SIPs to utilise it for individual use, and not for programme specific use. In allowing that, assistance from certain SIPs was overwhelming, whilst other requests never get attention, or very late responses. SIPs must also take responsibility in self-training of new staff members, i.e. capturers, and not the responsibility of Kwantu.

4. Reflection on Performance vs contracted Targets

(Provide an overview of the targets achieved, variances and reasons thereof.)

StellCARE created 1372 jobs for the period September 2024 to 31 March 2023.

StellCARE regarded the general SEF outcomes as extraordinarily, despite the fact that targets as per the contracted agreement, not achieved. It was always being envisaged that the need for assistance in relation to all Thematic Areas and Work Themes, will never be met in terms of 1000 participants. Whereas the allocation of participants per Work Theme was based on the internal social services needs, unknown factors and financial constraints, forced StellCARE to request deviation of e.g. play groups and agriculture allocations. It is also important to mention that StellCARE had been honest in communication and reporting without providing any false information. StellCARE always knew and understand that the biggest need would be in the field of Cleaning and Greening, given the exceptional high unemployment levels, poverty, low scholastic qualifications and the disintegration and dysfunctionality of families and especially youth. StellCARE therefor regards the ability to provide the targeted 1035 jobs as a victory over poverty, a victory to provide parents an opportunity to uplift their social-environmental situation and to experience acceptance, respect and an opportunity to earn without begging.

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

5. Skills acquired and pathways for participants

(Provide an overview of the training undertaken as part of the programme including whether training is accredited or prospects for accreditation, skills acquired on the part of participants including certification where applicable, participant attrition rate from the programme and the reasons thereof – please also attach participant exit interview forms for both attrition and completion instances)

Professional:
Social Work and Social Auxiliary Work experience of unemployed staff being enrolled on the programme;
Teachers who did not find placements at schools being placed in schools, thus acquiring experience which would allow them to apply for permanent positions within WCED.
Trained Early Childhood Development practitioners placed in facilities gaining experience in programme implementation which would allow them an opportunity (as was the case) of finding permanent employment.
School Support:
Grade 12 unemployed persons with an interest in education, being allowed to enter to workplace and gaining valuable experience in dealing with children and behaviour challenges, allowing them to arrive at decisions pertaining to career choices.
Nutrition:
In reaching between 52000 and 62000 meals per week must tell the tale of deep seated poverty. As participants of the Work Theme resides within the communities, beneficiaries of feeding points would take jointly responsibility should the coordinator become ill, or even in the event that he/she found permanent employment.
Community Safety and GBV: Surely the biggest impacts and positive results in addressing GBV and support services in respect of safe communities and Prevention and Early Intervention Services as part of the "basket of social work services" to be rendered in relation to vulnerable persons and communities by StellCARE. 42 individuals and neighbourhood watch members received training as being provided for in the Children's Act 38 of 2005 and internal policies of StellCARE in relation to volunteers working with children. Trained volunteers provided services at the level of Child and Youth Care Workers.
Cleaning and Greening: The skills transfer in this sector rest more on the basis of awareness and environmental management in terms of the importance of waste management and allowing participants to discover potential of income generation through waste management.
Resignation: As participants do not resign officially from the programme, it does not allow StellCARE to have exist interviews. Should they officially resign, as in the labour field, they would not be able to apply for UIF; hence the tendency for participants just not to return to work without any notification of resignation.

6. Engagements with stakeholders

(Provide an overview of engagements with the respective community structures including challenges experienced such as any form of resistance including protests/violence; municipalities, and funders)

Monthly meetings with participants are being held.
No incidents of protests had been reported.
In case of misconduct or allegation of substance or alcohol abuse, the participant will receive counselling and if applicable, receive a written warning, following up with continued support. As we allow parolees onto the programme, misconduct must be reported to the correctional official who then must provide counselling and support and also the decision to cancel parole if applicable.
All participants sign a conduct order agreement. Gender base violence, due to the high incidences in all communities we serve, receive priority and is addressed in every meeting with participants.

7. Summary of key lessons learnt

(Please provide a summary of key lessons learnt over the implementation period – these should include project specific lessons as well as lessons to potentially inform future design of social employment programme/s)

Proper budget in relation to work themes;
Project management skills must be acquired and sourced;
Monitoring and Evaluation form the back bone of successful execution of the program;

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

8. Project Legacy and Sustainability Prospects

(Provide an overview of the legacy the project will leave behind, pathways for participants post project closure, sustainability prospects of the project including funding avenues being explored)

Restoring dignity and hope are the digest contribution which no money can buy and this is the most important outcome from the SEF program, for which StellCARE would always be grateful for. The continued economic situation communities are confronted with, will not be solved any soon. It is also not realistic that individuals will realise businesses out of i.e. waste management, and we have to guard against unrealistic expectations, as we might be setting people up for failure.

The most rewarding experience from this is the cohesion formed amongst community members and creating a kind of camaraderie amongst our participants. People start to be on the lookout for one another, show humanity and stand-up against the wrongs in the community. StellCARE beliefs in the power of asset based community development, and this provides the only opportunity to the organisation to assist families to strengthen themselves and to protect our most vulnerable persons, being children, the elderly and the disabled persons.

The establishment of a ***SOCIAL COOPERATIVE*** must be developed to provide ownership to community members to decide on their own futures within a conducive and safe environment, where crime and gang activities would not be tolerated.

Alternative funding opportunities will be explored in order to provide continued stipend related employment post cooperative formation and enterprise development.

The struggle to obtain agricultural land since the inception of the programme, must surely be regarded as one of the biggest hurdles preventing the programme to reach the agricultural goals and objectives. The fact that land belongs either to the municipalities or private, coupled with lengthy negotiation episodes, still is a frustrating aspect in preventing to establish real sustainable agricultural business entities.

9. Financial Review

(Provide an overview in respect of the adequacy of the budget, budget structure, grant disbursement method and controls, and any areas of improvement)

Under budgeted on non-wage items due to misinterpretation

Financial outsourcing of StellCARE did not provide in-house resources to support project management

10. Conclusion and Overall Recommendations the Continuation of Social Employment Program

Secure Long-term Funding

By ensuring the continuation and success of social employment programs, social employment initiatives can become more resilient and sustainable in the face of economic and political changes. The situation is of such a nature, that funding for at least 5 to 6 years is needed in order to effect change.

Improve Coordination and Collaboration

Enhancing coordination and collaboration among stakeholders is essential for the effective implementation and scaling-up of social employment programs. Platforms like SEN and other stakeholders in sharing experience and networking is important as a platform to facilitate information sharing, joint planning, and monitoring of social employment initiatives. Moreover, assisting (mediating) NGOs like StellCARE to form partnerships between public and private sector actors can help leverage additional resources, expertise, and networks to support the goals of social employment programs.

Address Stigmatisation and Discrimination

Continued efforts and actions to foster the positive image of social employment programs and reduce the risk of stigmatisation and discrimination, through awareness campaigns that highlight the benefits and successes of these initiatives. By showcasing the positive impact of social employment on individuals, families, and communities, these campaigns can help shift public perceptions and promote acceptance of these programs.

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

SOCIAL EMPLOYMENT FUND

Customize and Adapt Programs to Local Needs and Mandated Areas

Successful social employment programs should be tailored to the specific needs and contexts of the communities they serve. StellCARE focused through this initiative on customising programs to address local social needs and priorities. Therefore, social employment initiatives can be more effective in addressing the unique challenges faced by unemployed individuals and vulnerable families, and in the case of StellCARE, act as a support system to the social service delivery program within the mandated areas or the organisation.

Conclusion

The SEF program has proved successful in addressing the issue of unemployment and supporting vulnerable and poor families. By providing temporary jobs, skills training, and social services, this initiative can continue to generate significant economic, social, and individual benefits. However, to ensure the continuation and success of social employment programs, it is essential to address the challenges of funding, coordination, potential stigmatisation, and program customisation. The success of the IDC in managing the program must be commended, and therefore the request from StellCARE to be assisted to secure the future of social employment initiatives to contribute to the well-being of thousands of unemployed individuals and vulnerable families and to address and hopefully impact on the violence and drug abuse in our mandated areas.

What if we do not fix this - or not reaching our goals?

What we do

Addressing the social needs of beneficiary communities in our mandated areas through these activities:

Activities	Purpose
1. School Support	Institutional management services, with special reference to governance (NPO Act; PFMA) and contractual arrangements and compliance in terms TPA (DSD) and other stakeholders (IDT; IDC and corporates) at operational level in terms of service deliverance.
2. Early Childhood Development Support	Provide comprehensive child and family care and support services to communities in partnership with stakeholders and civil society organisations.
3. Safe and Cohesive Communities	Provide integrated developmental psycho- social services to poor and vulnerable persons in partnership with stakeholders.
4. Cleaning, Greening and protecting the environment	Provide integrated developmental social crime prevention and anti-substance abuse services to youth under our care in partnership with stakeholders.
5. Nutrition	Address hunger and child hunger specifically, support sustainable livelihoods and poverty alleviation through dignified jobs and self-sustained families; assist communities with food by creating food gardens
6. GBV (VAC & VAW) and Violence in General	Implement effective intervention programmes and skills of affected person and perpetrators; employment opportunity to restore self-worth and dignity; Provide safe space and effective support at grass-root level.
7. Administration & Monitoring and	Recruitment, capturing and Implementation. Monitoring and Evaluation procedures to measure effectiveness; understand

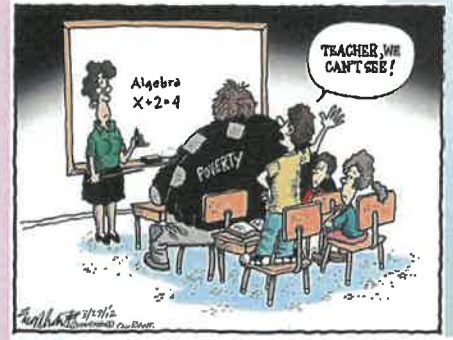
SEF in a NUTSHELL

48% unemployment in operational area and exacerbate by Covid-19

Agriculture and Tourism industry hit hardest with a sectors closed down in totality.

Social anomalies increase exponentially with hunger, gender base violence and children being left orphaned exploded, putting exceptional challenges on social service deliverance.

StellCARE to change service model "overnight.

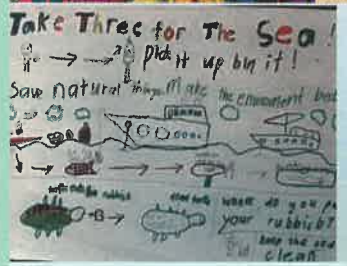


Through the participation of StellCARE in SEF,

- vulnerable and poor persons within mandated communities are being engaged with and family systems being preserved; dignity restored and hope provided;
- National and provincial governments assist with the envisaged recovery and reform plan to build a resilient economy that comprises of an equal resilient citizenry who can participate in a sustainable economy.

StellCARE's contributes specifically in

- Recovery of the local economy through the fiscus of 1035 SEF participants who had been unemployed;
- the recovery of the tourism industry insofar as clean and conducive environment;
- Gender equality through the inclusion of women and youth;
- Green economy interventions;
- Mass public employment interventions - – 1035 participants and can be expanded;
- Strengthening food security and nutrition; and
- Normalising the education system through support to affected and challenged school as well as early childhood development.



Outcomes Achieved

- 1035 previously unemployed persons are employed and contribute to their own livelihood in a dignified way
- **Gender Based Violence** are prioritised as primary focus of intervention. Participants serve on Action Committee. Victims reached out for assistance and both victim and perpetrator are being assisted. SAPS are fully committed to fulfil their legal obligation.
- Participants take ownership for littering in communities and understand the impact of actions on the environment and general well-being. Participants start to advocate for cleaner communities and respect for one another.
- Five (5) youth in school support programme enrolled through UNISA for B.Ed based on experience gained and passion for children.

What we do

Sef + StellCARE = Progressive Communities

- Poverty alleviation and a reduction in child poverty specifically;
- +- 55000 meals are provided to vulnerable persons per month, of which 92,% are children;
- Eye-on-Community members in collaboration with NWH assist in creating safer communities open spaces. This has contributed towards -
- 5% decrease in referrals of allegations of child neglect and abuse received during period Sept. 2022 to Dec. 2022
- Continued daily cleaning of areas in communities contribute to a more hygienic environment and safer spaces.

Suggestion on how SEF can be enhance in the next rounds

1. Invest in and provide support to StellCARE to improve on deliverables in order to expand our programme as there is a very prominent need.
2. Programme must be multi year and be sustainable in relation to participants already in the programme. It is immoral to allow persons to better their livelihoods with realising that there is no possibility of further employment, and to end such relationship. Participants will be in exactly same predisposition as before the implementation of the programme.
3. Assist StellCARE in the agricultural development, since the organisation succeeded in obtaining land for agricultural development.
4. The facilitation in securing job opportunities and continuation of participation in the programme must be allowed as per p1. Failing to achieve this, equals failure of endeavours as being pronounced in the NDP as well as the economic recovery and restoration plan of government. The current status of load shedding and the economic impact thereof present the same threat, if not more severe, than the Covid-19 pandemic in relation to the health and welfare of our communities.
5. Extension of the program to 5 days and at least 5 working hours per day.

2500 potential job opportunities awaiting us

Financial Contributions

- Salaries of Staff deployed to manage the SEF process
- Vehicle and fuel use
- Telephone and internet
- Data
- Office space and office furniture
- Insurance
- Security
- Catering for awareness programs and school holiday programmes
- Care packs for Gender Base Violence activities
- Equipment and Stationary for holiday programs
- Food and gas for 24 community kitchens
- Salary of teacher – Merweville School Support
- Additional stipend for carers – Merweville School Support

STORIES

- My name is Nomalungisa Bhayibhile from Kayamandi. I am very grateful for this opportunity to be part of this project, it has been long overdue I have waited for years to get job and bring something on my table. Working in my community came as a blessing
- I am Ernest Lof from Cloetesville. I am a transgender person – not belonging anywhere – so it felt. I could not manage to find any employment, most probably because of my sexuality, or so I believe. When I approached StellCARE to be allowed on the program, StellCARE accepted me right away, without questioning my sexuality or my ability. StellCARE was aware of the fact that I am tik-addicted. Mrs Nieuwoudt was clear that we would not be discriminated against, but expected to come clean. After an incident and a positive test in November 2022, I was confronted with a choice – come clean or resign. I made the choice, and manage thus far to stay clean. I will be for ever thankful towards StellCARE and SEF for this opportunity.
- Abe September – I lost my job during Covid in 2020. I was involved in our local Neighbourhood Watch and devoted all my time to this. I was aware of the programme of StellCARE and Pieter Langeveldt Primary School, and assist where I could. Having heard of SEF, I was approached by StellCARE to enroll in the programme which I did. I was ashamed at first, but I will never leave the programme, even if I am offered a better salary. The impact this programme has on the community cannot be quantified. I have learnt a lot and developed my skills through the biometrics system – something I would never have come across. Thank you SEF and thank you StellCARE.
- I am Mr Axxx from Wellington. I am a politician and labour expert, but not employed. For many years I worked with StellCARE and since 2022 StellCARE supported a welfare organisation where I am involved in with excellence. When informed by Mrs Nieuwoudt about SEF, and that StellCARE would again take me onboard and did not even asked which political party I am involved with. I never thought of the possibility of being a recipient of a stipend in lieu for my services. I gained dignity and earn the respect of our participants, knowing that we all earn the same stipend. StellCARE does an amazing job and allow our participant over whom they have no responsibility for, to earn a living and to move out of the darkness of poverty.

SUCCESS STORIES

- School support and AFTER SCHOOL support
- ECD support
- **EYE-ON-COMMUNITY**: IDT – 220 job opportunities; 72 sustainable livelihood WC DSD
- **GBV trauma counselling** , networks and groups – designated social work position to this
- Nutrition established and excellent co-operation with our SAPS station
- Environmental
- Establishment of the Stellenbosch & Districts Primary Cooperative Limited as the most important vehicle to provide a sustainable income stream to participatory participants once profitable.

IT IS AN HONOUR

SWORN AFFIDAVIT – B-BBEE EXEMPTED MICRO ENTERPRISE (SPECIALISED ENTITY) - which include (Not Limited to) Non-Profit Organisations, Non-Profit Companies, Public Benefit Organisations etc.

I, the undersigned,

Full name & Surname	Elizabeth Magdalena Johanna Nieuwoudt
Identity number	[redacted]

Hereby declare under oath as follows:

1. The contents of this statement are to the best of my knowledge a true reflection of the facts.

2. I am a Director of the following enterprise and am duly authorised to act on its behalf:

Enterprise Name:	StellCARE: Stellenbosch & Districts Family Serivces
Trading Name (If Applicable):	StellCARE/StellSORG
Registration Number:	[redacted]
Vat Number (If Applicable)	
Enterprise Physical Address:	Helshoogte Road, Ida's Valley 7609 7609
Type of Entity (NPO, PBO etc.):	NPO & PBO
Nature of Business:	
Definition of "Black People"	As per the Broad-Based Black Economic Empowerment Act 53 of 2003 as Amended by Act No 46 of 2013 "Black People" is a generic term which means Africans, Coloureds and Indians – (a) Who are citizens of the Republic of South Africa by birth or descent; or (b) Who became citizens of the Republic of South Africa by naturalization- i. Before 27 April 1994; or ii. On or after 27 April 1994 and who would have been entitled to acquire citizenship by naturalization prior to that date
Definition of "Black Designated groups"	"Black Designated Groups means: (a) unemployed black people not attending and not required by law to attend an educational institution and not awaiting admission to an educational institution; (b) Black people who are youth as defined in the National Youth Commission Act of 1996; (c) Black people who are persons with disabilities as defined in the Code of Good Practice on employment of people with disabilities issued under the Employment Equity Act; (d) Black people living in rural and under developed areas; (e) Black military veterans who qualifies to be called a military veteran in terms of the Military Veterans Act 18 of 2011;"

3. I hereby declare under Oath that:

- The Enterprise has 100 % Black Beneficiaries as per Amended Code Series 100 of the Amended Codes of Good Practice issued under section 9 (1) of B-BBEE Act No 53 of 2003 as Amended by Act No 46 of 2013,
- The Enterprise has _____% Black Female Beneficiaries as per Amended Code Series 100 of the Amended Codes of Good Practice issued under section 9 (1) of B-BBEE Act No 53 of 2003 as Amended by Act No 46 of 2013,
- The Enterprise has _____% Black Designated Group Beneficiaries as per Amended Code Series 100 of the Amended Codes of Good Practice issued under section 9 of B-BBEE Act No 53 of 2003 as Amended by Act No 46 of 2013,
- Black Designated Group Owned % Breakdown as per the definition stated above:
  - Black Youth %= _____%
  - Black Disabled % = _____%
  - Black Unemployed % = _____%
  - Black People living in Rural Areas % = _____%
  - Black Military Veterans % = _____%

- Based on the Audited Financial Statements/ Financial Statements and other information available on the latest financial year-end of 31 MARCH 2024 (DD/MM/YYYY), the annual Total Revenue/Allocated Budget/Gross Receipts was R10,000,000.00 (Ten Million Rands) or less.

- Please Confirm on the below table the B-BBEE Level Contributor, **by ticking the applicable box.**

At Least 75% Black Beneficiaries	**Level One** (135% B-BBEE procurement recognition level)	X
At Least 51% Black Beneficiaries	**Level Two** (125% B-BBEE procurement recognition level)	
Less than 51% Black Beneficiaries	**Level Four** (100% B-BBEE procurement recognition level)

The Responsible Offical
Economic Development Office
Stellenbosch Municipality

Dear Sir / Madam

SUPPORTING MOTIVATION: APPLICATION TO LEASE PORTION 502 AS 1 / 2 / 3

The above lease opportunity recently advertised, and my application as attached refer.

I acknowledge that I do not meet the advertised criteria namely:

1. I am not currently resident in Stellenbosch, however I am a tenant of the Stellenbosch Municipality in that I own a hangar at the Stellenbosch Airfield;
2. I am a white member of the community and while not one of the listed demographic groups indicated as qualifying for consideration, I do not believe that I can be excluded on this basis.

BACKGROUND AND CONCERNS

I am of the opinion that offering this piece of land to emergent farmers as an agricultural opportunity is misguided for the following reasons:

1. The area is indicated as a World Heritage Site and identified as the Raithby Critical Biodiversity Area which by it's very nature precludes virtually every possible form of agricultural activity. While beekeeping is indicated as a possibility (probably the only one), this is highly unlikely to be economically viable and it is questionable if such activities would generate the revenue required to cover the rental as a minimum;
2. The allocation of this area would require maintenance thereof by the tenant including management of alien vegetation, fencing, access etc and considering this financial burden on top of the rental, it is highly unlikely that an emergent farmer would be able to manage this both from a financial and a practical execution perspective, given that with the restrictions the land classification imposes, the generation of revenue is likely to be neglible;
3. The land is classified as a critical biodiversity area, and also as a World Heritage Site and I believe that this should be the primary consideration when management and allocation of access to this very important piece of land is considered. As endangered renosterveld which forms part of the Cape fynbos biome, this is potentially an area of immensely rich and diverse flora and fauna and every effort should be made to protect and nurture it. The extensive alien vegetation on the property is of concern and during a recent site visit it was seen to be re-establishing rapidly following the last eradication

activities which judging by the deterioration of the cut stumps was some time ago. Alien clearing and management is critical to the protection of the renosterveld vegetation. It would be unfair and even irresponsible to place this burden directly onto an emerging farmer considering the scale of the work required and the extremely limited or non-existent revenue generating potential represented by the erven on offer. Such management would require specialist input.

PROPOSAL AND MOTIVATION

I am not a farmer and I would not be looking to generate revenue out of the lease of this property, however I do recognise the importance of community involvement, especially in terms of upliftment and opportunity generation for previously disadvantaged sectors. Based on the information available, the non-availability of services and resources and the sensitive and special nature of this piece of land my proposal is as follows:

1. That the three erven on offer should be allocated as a single lease all together, in order to ensure that the greatest possible environmental benefit is derived form the management thereof;
2. That I be considered for the allocation of the lease of this piece of land and the sensitive management thereof for the following reasons:
    a. As the serving chairman of the Stellenbosch Flying Club I have extensive experience in dealing with the Stellenbosch Municipality and believe that I am best placed to ensure that the lease thereof is managed most effectively, with the minimum effort expected of the Municipality;
    b. The Stellenbosch Flying Club is as I understand it the leading example of effective management of leased property owned by the Stellenbosch Municipality and the same principles would be applied;
    c. I am gainfully employed and would not need to derive an income from the property. I am therefore well placed to be able to implement management strategies in the best interest of the land, it's flora and fauna while actively looking for opportunities for community involvement;
    d. Should the lease be allocated to me, I would undertake to engage with other applicants who may wish to establish hives for beekeeping on the property and make such opportunities available to them with no financial interest in their venture. I would be able to provide coaching and mentorship in their respective business activities and would see that as my community contribution, while taking care of the land, in the spirit of the indicated intention of the Stellenbosch Municipality in making this land available. Should the allocation be made directly to emergent farmers, my concern is that the land and it's needs would become a secondary or non-existent consideration.
3. I recognise that the community aspect is a significant consideration and creating opportunity for members of the local community would be a high priority consideration. I have in my capacity as chairman of the Flying Club launched a number of community initiatives and my wife works for an American company involved in the fruit industry and she is starting a community social investment initiative project for the company which is Stellenbosch based. She has indicated interest in supporting possible projects on the property, perhaps including beekeeping which is a fundamental component of fruit production. She believes that her board would see merit in the connection and may

want to become involved. There are other opportunities including education, using the piece of land and it's restoration as an outdoor classroom for schools in the local area. All of these considerations require coordination and management however and this cannot be expected of an emergent farmer whose priority would understandably be the generation of revenue.

CONTRIBUTION AND ACCESS TO RESOURCES AND SPECIALIST INPUT

I would see my main contribution to what is proposed above as being the management and coordination of the needs of the land along with the community involvement and benefit aspects relating to relevant and acceptable agriculture and upliftment opportunities, education and conservation.

I have worked in the past for a number of environmental management consultancies and still have a wide ranging network of consultant specialists in biodiversity, alien management and wetland conservation among others. These resources would be available and most likely at no cost to assist with whatever initiatives and efforts are identified and implemented on the property. What is clear, is that the classification of the site as a critical biodiversity area which is recognised as a world heritage site warrants proper management and protection. An inextricable consideration is community involvement and opportunity creation, but this must be aligned with the protection of this special area.

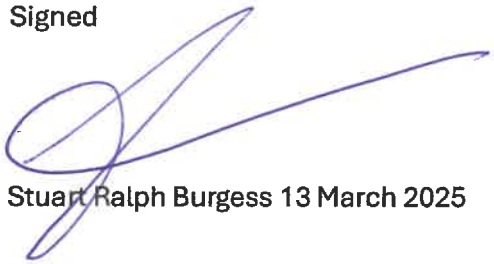
REQUEST AND CONCLUSION

What is clear is that this special area requires a more considered approach than to simply allocate it to an emergent farmer, as this would have a negative impact on the future conservation of this area and could well become a liability to the farmer considering the needs of the land, and the extremely limited revenue generation capacity.

My request therefore is that consideration is given to the following options:

1. That in the first instance consideration is given to allocation to me the lease for the full area consisting of 502 AS 1, 502 AS 2 and 502 AS 3, for the reasons presented above;
2. If option 1 is not possible, that one of the three is allocated with the same undertaking as above, with the preference being for the northernmost subdivision being the section which includes the dam, which I understand to be 502 AS 1, as this has appears to have been the least impacted by earlier agricultural activities and would most readily respond to restoration efforts.

In all considerations of my application I request that my undertaking to create opportunity for qualifying community members who were intended to benefit from this allocation as indicated in the original advertisement will be borne in mind. I will make myself available to discuss my proposal at the convenience of the responsible officials.



Sincerely

Stuart Burgess

AFFIDAVIT

I, Stuart Ralph Burgess, [redacted] do hereby state and affirm that in the event that my application for the lease of erf 502 AS is successful, that I undertake to pay the required rent in terms of the lease agreement when due and payable, in terms of the contract and agreement to be concluded.

Signed

Stuart Ralph Burgess 13 March 2025

Dear Sir/ Madam

Hope you doing well, can you please attach our documents of application of Land that is available in the Stellenbosch. The purpose of our application is to start our business of Livestock.

Yours faithful

Three Beauty LM

BUSINESS ETHIC

MARKET RESEARCH:

It is important to know your target market you are going to serve. You need to know what they need so that you satisfied their need.

After doing the research to the people of Stellenbosch area especial in Kayamandi regarding their needs the results showed that there is a need of a close Farmer that sell Chickens and eggs. Most consumers depend to the people who come from outside Stellenbosch to satisfy their need of buying chicken and eggs that happen to come once or twice a month and buying these products at well-known shops it's expensive. Consumers are real interested to get a business that will meet their and satisfy their need and overcome this challenge of waiting for plus minus two weeks to get these products at the affordable price.

These are other findings:

- **Scarce of resource**
- **Interested to get business that satisfied them**
- **Business must meet needs and want of societies.**

SURVEY:

- ✓ **Designed Questionnaires**
- ✓ **Face to Face conversation**
- ✓ **Interview**
- ✓ **Collect their view**
- ✓ **Evaluate**
- ✓ **Take the best solution**
- ✓ **Make follow up.**

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

By-Product Potential of the Proposed Apiary

Presentation to Stellenbosch Municipality

Stellenbosch Social Employment Co-operative

1. Introduction

- - Apiary as part of the Social Employment Fund
- - 1,035 participants; each contributes a beehive (R1,000 value)
- - Expansion to 2,000 hives
- - Inclusive model: all participants share in benefits

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

2. Primary Product: Honey

- - Raw Honey: retail and wholesale
- - Infused Honey: herbs and spices
- - Honeycomb: premium market
- - Honey Sachets: hospitality and school use

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

3. Major By-Products and Market Potential

A. Beeswax

- Candles, balms, soaps, wraps
- Markets: crafts, organic shops
- Skill development opportunities

B. Propolis

- Tinctures, sprays, balms
- Market: wellness, traditional healers
- High demand, low volume

C. Royal Jelly

- Skincare, supplements
- Niche export market
- High value, technical harvesting

D. Bee Pollen

- Superfoods, supplements
- Markets: health stores, gyms

E. Pollination Services

- Rent hives to farmers
- Vineyards, orchards
- Stable income stream

4. Socio-Economic Impact

- - Shared ownership and cooperative model
- - Benefits for all employment roles
- - Job creation in value chain: packaging, marketing, production

5. Sustainability and Growth

- - Hive contribution model ensures sustainability
- - R1,000 exit model maintains capital
- - Supports local economy and reduces imports

PROFITABILITY POTENTIAL

Initial Scale (1,035 Hives)

- **Total Revenue:** **R2,163,150**
  - Honey: R 1,759,500
  - By-products: R 403,650

(wax, propolis, pollen, royal jelly, pollination)

- Total Costs: R 608,750
  - Hive maintenance: R 258,750
  - Operational: R1, 350,000
- **Est Net Income:** **R1,554,400**

Target Scale (2,000 Hives)

- **Total Revenue:** **R4,180,000**
  - Honey: R3,400,000
  - By-products: R 780,000

Total Costs: R 850,000

- Hive maintenance: R 500,000
- Operational: R 350,000

(staff, packaging, transport)

- **Est. Net Income:** **R3,330,000**

These figures show strong potential for profitability even at the current scale, with excellent growth prospects if you reach 2,000 hives.

6. Recommendations

- - Municipal support: land, infrastructure, training
- - Include in local development strategies
- - Foster market access: schools, wellness stores

Conclusion

STELLCARE
Stellenbosch & Districts Family Services
003-206 – NPO PBO 130001154

- The apiary project aligns social, economic, and environmental goals.
- With municipal support, it can become a scalable model for inclusive development.

7.11	**MUNICIPAL MANAGER**

7.11.1	**2025/2026 GRANT IN AID APPLICATIONS AND RECOMMENDED DONATIONS**

Collaborator No: **785307**
IDP KPA Ref No: **Good Governance and Compliance**
Meeting Date: **21 May 2025**

1. SUBJECT:2025/2026 GRANT IN AID APPLICATIONS AND RECOMMENDED DONATIONS

2. PURPOSE

To obtain Council's approval for Grant-in-Aid (GiA) applications and recommended donations for the financial year 2025-2026.

3. DELEGATED AUTHORITY

FOR DECISION BY MUNICIPAL COUNCIL

In terms of Municipal Finance Management Act (MFMA), Act (56 of 2003) Section 17. (3) (e) relating to content of annual budgets and supporting documents.

4. EXECUTIVE SUMMARY

The Grant-in-Aid policy aims to provide a framework for Grant-in-Aid to non-governmental organisations (NGOs), community-based organisations (CBOs), non-profit organisations (NPOs) or non-profit companies (NPC), Public Benefit Organisations (PBO's) and bodies that are used by government as an agency to serve the poor, marginalised or otherwise vulnerable as envisaged by the Grant in Aid Policy approved at the Council Meeting in May 2024.

In terms of Council's Grant-in-Aid Policy, proposals were called for by means of advertisement in the press on 19 September 2024 (Eikestad Nuus) and on the municipal website and Facebook page.

The advertisement included an invitation to attend one of three compulsory workshops on either 14-16 October 2024 to explain application and policy requirements. One hundred and sixty-two (162) persons attended the workshops.

A workshop to assist with capacity building of small, emerging organisations was conducted during October 2024 focussing on financial management. The workshop was attended by ninety (90) persons.

By the closing date (22 November 2024), 95 applications were received of which one was withdrawn.

The outcome of proposed donations was advertised for public comment. By the closing date of 29 April 2025, 27 comments/appeals and/or feedback reports were received.

5. RECOMMENDATIONS

(c) that Council notes the organisations that are receiving funding are organisations or bodies serving the poor;

(d) that Council support the continuation of the food garden project and approve the donation to SA Institute for Entrepreneurship to conclude the final year of the three-year Cat B donation;

(e) that Council support the implementation of day services for persons who are homeless and approve the deferment of the approved 2024/2025 Cat B application to commence in 2025/2026;

(f) that Council notes that the Cat A donation allows for a maximum amount of R40 000 to be allocated per organisation;

(g) that Council consider and approve the recommended donations to organizations as per attached detailed register inclusive of public comments and feedback received as part of the draft budget public participation process; and

(f) that the Accounting Officer certifies to the Auditor General that the compliance requirements in terms of section 67 (1) (a) of the MFMA are uneconomical and unreasonable for organisations receiving Cat A donation.

6. DISCUSSION / CONTENTS

6.1 Background

Grant in Aid donations are considered on an annual basis and has over the years contributed to valuable services in vulnerable communities. The programme allows Stellenbosch Municipality to demonstrate that it is a caring municipality which supports civil society to render services which contribute to the municipal Dignified Living strategic pillar.

The Municipality would like to support as many as possible organizations delivering valuable services within our communities but cannot disregard requirements of the MFMA (56 of 2003) Section 67 stipulating the responsibility of council to ensure donations are made to organizations who has the capacity to govern itself according to accepted financial practises and who can deliver the services for which the donation is required and benefiting the intended target audience.

6.2 Discussion

The Department Community Development and the Sport and Recreation Department scrutinized and evaluated ninety-five (94) applications representing the following categories:

CATEGORY	SUB CATEGORY	APP's RECEIVED	APP's RECOMMENDED/ CONDITIONALLY RECOMMENDED	WARDS SERVED THROUGH THE ORGANIZATIONS	RECOMMENDED AMOUNT (2025-2026)
Social Development	General	7	3	1-3, 6-11, 13, 16, 19, 22	120 000.00
	Partial Care	36	21	ALL	817 000.00
	Disability	3	3	ALL	120 000.00
	Elderly	6	2	1, 2 and 4	80 000.00
	Youth	8	5	ALL	200 000.00

	Total	**94**	**47**		**5 958 421.12**

Table 1: Applications received and draft grant recommendations per category

Communication received from U Turn Homeless Ministries relating to the approved Grant in Aid Category B application for 2024/2025 – 2026/2027: The communication request that their approved application be deferred to start in 2025/2026 as they were not able to meet the condition to obtain access to a facility within WC024 from where they can deliver services. The organisation is, however, still committed to deliver the much-needed day services to persons on the street and submitted updated audited financial reports to support their request. A new application was not submitted as the proposal is to simply defer an existing approved application to the following year.

Table 2 contains the complete list of donations under consideration and can be found below.

CATEGORY	SUB CATEGORY	APP's RECEIVED	APP's RECOMMENDED/ CONDITIONALLY RECOMMENDED	WARDS SERVED THROUGH THE ORGANIZATIONS	RECOMMENDED AMOUNT (2025-2026)
Social Development	General	7	3	1-3, 6-11, 13, 16, 19, 22	120 000.00
	Partial Care	36	21	ALL	817 000.00

	Total	**95**	**47**		**7 053 901.12**

Table 2: Complete list of donations under consideration for Draft Budget purposes.

The detailed register of applications/requests received and assessed is attached as **ANNEXURE A.** Reasons for not recommending organizations are contained in the notes column of said register.

Declarations of Interest:

Where officials were indicated as linked to an applicant, either directly or indirectly and said official formed part of the Grant in Aid assessment team, the official was excused from any assessment or discussions relating to the application in question. The following declarations relating to municipal officials and councillors are noted:

Applicant	Person	Organisation Capacity	Municipal Capacity
Abba Stellenbosch	Portia Jansen	Vice Chairperson	Community Development Coordinator (Daughter of Chairperson)
	Wilfred Frederick Pietersen	Chairperson	PR Councillor
Blue Stars United RFC	JC Anthony	Patron	Ward 18 Councillor
Cape Winelands Farm Workers Sport and Recreation Association	Tanya Carstens	Vice Chairman	Snr Clerk: Administration Infrastructure Services
	Adele Wagenaar	Vice Secretary	Administrative Officer, Financial Services
Celtic United FC	Adele Wagenaar	Secretary	Administrative Officer, Financial Services

Christian Dependency Ministry	Wilfred Frederick Pietersen	Chairperson	PR Councillor
Family in Focus	JC Anthony	Patron	Ward 18 Councillor
Hospice NPC	Wilfred Frederick Pietersen	Director	PR Councillor
Isibane Sempumelelo	Mary Nkopane	Chairperson	Ward 13 Councillor
Klapmuts Sport Forum	JC Anthony	Patron	Ward 18 Councillor
Kylemore Secondary School	Gerrit Africa	Additional Member	General Worker, Community and Protection Services
	Franklin Peceur	Additional Member	Fire Fighter, Community and Protection Services
La Motte Wanderers	Reginald Pheiffer	Secretary	Ward 1 Councillor
Legacy Community Development	Nono Khulela	Director	
Pniel Villagers RFC	Bradley Williams	Additional Member	Technician, Infrastructure Services
Stellenbosch en Distrikte Coronation RFC	Richard Seconds	Match and Registration Secretary	Sr Clerk Credit Control
Stellenbosch Muslem Helping Hands	Emaan Galphie		General Worker, Housing Stock
Stellenbosch Work Centre for Adult Persons with Disabilities	Portia Jansen	Manager	Community Development Coordinator (Niece of Manager)
Stellemploy	Portia Jansen	Director	Community Development Coordinator (Daughter of Director)
Wemmershoek Buurtwag	Charles Manuel	Unclear	Ward 3 Councillor
	Greg Viljoen	Unclear	Ward Administrator

Policy Directive: Paragraph 7.12

The policy in paragraph 7.12 states *that "…the CFO after considering the merits of an application not complying with the minimum application criteria and after consulting the Municipal Manager, may for the purpose of this policy approve a deviation from the norm".*

Minimum requirements are interpreted as all prescribes of the approved Grant in Aid policy.

1. Requirement to submit audited financial statements if the applicant is older than 5 years:

Auditing fees are very expensive and have in the past contributed to applicants not being approved for a Grant in Aid donation. The department sourced two accounting firms who indicated their willingness to perform independent reviews at a reduced cost for those applicants who cannot afford auditing fees. The firms participated in the financial management and compulsory clarification workshops

and introduced their services. Applicants were advised that they can include the cost of the review as part of their GiA application.

Prospective applicants were also invited to a workshop on governance training to further capacitate them to comply with the requirements of the Grant in Aid policy and MFMA regulations. These efforts assisted 27 organisations who would otherwise not have been able to qualify for financial assistance.

2. Requirement to attend the compulsory clarification meeting:

Applicants are required to RSVP by a due date to attend a compulsory clarification meeting. The SA Institute for Entrepreneurship is delivering a flagship GiA project as the first Cat B application to focus on addressing ward priorities which cannot be addressed by the municipality alone. In so doing they have trained 720 individuals in home food gardens, have started with the development of community food gardens by eliciting support from schools, churches and started with food gardens at ECD centres. 2025/2026 will be the final year of their three-year application. The applicant missed the call for proposals and contacted the department after the closing date for the RSVPs to attend the compulsory clarification meeting. The applicant submitted their application with a specific appeal in relation to par 7.12 of the GiA policy. Due to the successful implementation and reporting of the initial years of the project, the department supports the request to approve the application for the final year of the project.

3. Request to defer the approved 2024/2025 GiA U Turn Homeless Ministries donation to the 2025/2026 financial year:

The GiA Policy requires Cat B applications to be re-submitted on an annual basis. A 2024/25 Cat B application was approved for U Turn Homeless Ministries on condition that they secure a physical venue within WCO24 from where they can deliver their services. The applicant launched repeated attempts to access a Stellenbosch based venue from where day services can be rendered to persons on the street. All attempts were unsuccessful and no GiA payment has been made to the organisation during the 2024/25 financial year.

U Turn Homeless Ministries did not submit a new application but requested that there existing approved application be re-considered for funding in the 2025/26 funding cycle. The planned day services remain the same as per the original application and include serving 250 unique individuals per year.

Due to the high demand (included as Ward 23 priority) for an appropriate response to the increasing homelessness within Stellenbosch and in recognition of the fact that a Night Shelter only provides limited services, the department is in support of the request to defer the existing approved application to the 2025/2026 financial year.

Below applicants did not comply with the requirements for audited financial statements and/or other policy requirements as discussed above. However, where applicable, financial statements which were independently reviewed by a registered accountant were submitted to the satisfaction of the department. The names will be included in the MFMA 67 (4)(b)(ii) Certificate should their applications be approved in terms of par 7.12 of the GiA Policy.

StellCare on behalf of Nora Tyres ECD	Appeal based on premise that ECD is separate legal entity even if it is under guardianship of StellCare. Legal opinion upheld by Municipal Manager.	Recommended

Kin Culture	No appeal submitted as they did not apply for 25/26 funding. Provided feedback on 24/25 donation.	NA
Noxolo Educare	In process to provide feedback. One receipt outstanding. Commit to provide final feedback In process of providing final feedback.	Recommended on condition that final feedback is submitted by 15 June 2025.
Okuhle Connie's Educare	Final Feedback Provided	Recommended
Sibongumusa ECD Centre	Final Feedback Provided	Recommended
Simni Educare	In process to provide feedback. One receipt outstanding. Commit to provide final feedback	Conditional Recommendation.
StellCare on behalf of Sizamile Child Care Facility	Appeal based on premise that ECD is separate legal entity even if it is under guardianship of StellCare. Legal opinion upheld by Municipal Manager.	Recommended on condition that final feedback is submitted by 15 June 2025.
Vinyard Houses	Final Feedback Provided	Recommended
Vision Africa	Final Feedback Provided	Recommended
Zenzele Educare Centre	Final feedback provided not in line with approved application	Not Recommended
ChangeAbility	Final Feedback Provided	Recommended
Stellenbosch Work Centre for Adult Persons with Disabilities	Final Feedback Provided	Recommended
ABBA Stellenbosch a project of BADISA Stellenbosch	Final Feedback Provided	Recommended
Christian Dependency Ministry	Appeal submitted after the closing date. Claim that bank form was signed.	After closing date and reassessment of bank form confirmed that it was not signed. Not Recommended
Bergzicht Training	Final Feedback Provided	Recommended
Franschhoek Hospitality Academy and Learning Centre	Admit that mistake was not made during assessment of application and that by not signing the application, the applicant did not include the required declaration in terms of sound financial management and governance.	Not Recommended Par 8.4
More Recycling	Submitted proof of registration via DSD	Recommended
Blue Stars United	Make reference to required overall budget in appeal without including same. Explain that General Council made changes to structure of board which was later ratified which was not indicated in document submitted as	Not Recommended Par 8.4

	Constitution. Proof of above through minutes of meetings was not included.	
Celtic United FC	Applicants confirm mistake was not made during assessment of application. Submitted another application containing list of board members now with one person serving in two positions and another now serving in a different portfolio to previously identified. New application not signed / dated in terms of undertaking to mm.	Not Recommended Par 8.4
Klapmuts Sport Forum	Appeal confirms that the application is a general application. No overall budget was submitted.	Not Recommended Par 8.4
Kylemore Football Club	Appeal not based on mistake made during assessment. Club re-submitted application without providing basis for appeal on initial assessment. Board members were aligned with constitution, but AFS span 15 months. Constitution does not indicate fin year.	Not Recommended Par 8.4
Pniel Villagers RFC	applicants confirm that mistake was not made during assessment of application. Submitted new board members on the application which still does not align with the requirements in original constitution submitted with application nor with the AGM minutes submitted as part of appeal.	Not Recommended Par 8.4
eBosch	Applicants confirm that mistake was not made during assessment of application and confirmed own mistake of not committing to provide feedback	Not Recommended Par 8.4
Imbali Western Cape T/A Sunny Sky Projects NPC	No appeal submitted as they did not apply for 25/26 funding. Provided feedback on 24/25 donation.	NA

4.4 Financial Implications

This report has the following financial implications:

2025-2026 (Cat A)
1 947 000.00

2025-2026 (Cat B)	2026-2027 (Cat B)	2027-2028 (Cat B)
5 276 901.12	3 025 160.11	1 277 900.00

FINAL BUDGET TOTAL 2025-2026	**7 223 901.12**

6.5 Legal Implications

The recommendations in this report comply with Council's policies and all applicable legislation.

6.6 Staff Implications

This report has no staff implications to the Municipality.

6.7 Previous / Relevant Council Resolutions:

SPECIAL COUNCIL MEETING: 2024-05-31: ITEM 7.2

RESOLVED (majority vote)

(a) that the Draft High Level Budget Summary, as set out in **APPENDIX 1** – PART 1 – SECTION C; be approved;

(b) that the Annual Budget Tables as prescribed by the Budgeting and Reporting Regulations, as set out in **APPENDIX 1** – PART 1 – SECTION D, be approved;

(c) that the Grants-In-Aid allocations as set out in **APPENDIX 1** – PART 2 – SECTION J, be approved;

(d) that the three-year Capital Budget for 2024/2025, 2025/2026 and 2026/2027, as set out in **APPENDIX 1** – PART 2 – SECTION N, be approved;

(e) that the proposed draft rates on properties in WCO24, tariffs, tariff structures and service charges for water, electricity, refuse, sewerage and other municipal services, as set out in APPENDIX 3, be approved;

(f) that the proposed amendments to existing budget related policies and other policies as set out in APPENDICES 4 - 34, be approved;

(g) that Council specifically note and consider the need to take up an external loan, needed for investment in income generating infrastructure to the amount of R600 million of which R200 million will be required in year one, R200 million in year two and R200 million in year three (refer to Section G: High Level Budget Overview and Table A1 Budget Summary) and confirm approval of same;

(h) that Council specifically take note of the fact that the proposed electricity charges and tariff structure is subject to NERSA approval that could change materially;

(i) that Council takes note of MFMA circulars 126 and 128 that was published to guide the MTREF for 2024/2025 to 2026/2027 as set out **in APPENDICES 35 – 36**;

(j) that Council takes note of the Long-Term Financial Plan that contains the financial management principles for sound financial management that was considered with the compilation of the final budget as set out **in APPENDIX 37**;

(k) that Council takes note of the Capital Investment Plan as set out in **APPENDIX 38**; and

(l) that Council takes note that the public comments and submissions were considered with the compilation of the final budget.

30TH COUNCIL MEETING: 2025-03-31: ITEM 10.11.4

RESOLVED (majority vote with 7 abstentions)

(a) that Council notes the organisations that are receiving funding are organisations or bodies serving the poor;
(b) that Council support the continuation of the food garden project and approve the donation to SA Institute for Entrepreneurship to conclude the final year of the three-year Cat B donation;
(c) that Council support the implementation of day services for persons who are homeless and approve the deferment of the approved 2024/2025 Cat B application to commence in 2025/2026;
(d) that Council notes that the Cat A donation allows for a maximum amount of R40 000 to be allocated per organisation;
(e) that Council consider and approve the recommended donations to organizations as per attached detailed register for public participation as part of the draft budget; and
(f) that the Accounting Officer certifies to the Auditor General that the compliance requirements in terms of section 67 (1) (a) of the MFMA are uneconomical and unreasonable for organisations receiving Cat A donation.

6.8 Risk Implications

Risks are addressed through the content of the report.

6.9 Comments from Senior Management

6.9.1 Chief Financial Officer:

Financial Services agree with the recommendations. The funding for the Grant in Aid donations will be provided for in the Medium-Term Revenue and Expenditure Framework (MTREF/Budget).
