The intention of the application is to create two well-structured farms (as illustrated in **Figure 2** on the next page) that retain their agricultural function while introducing tourism-related activities. The development aims to strengthen the local economy by diversifying income streams, creating jobs, and attracting visitors, while maintaining the agricultural and rural character of the area.

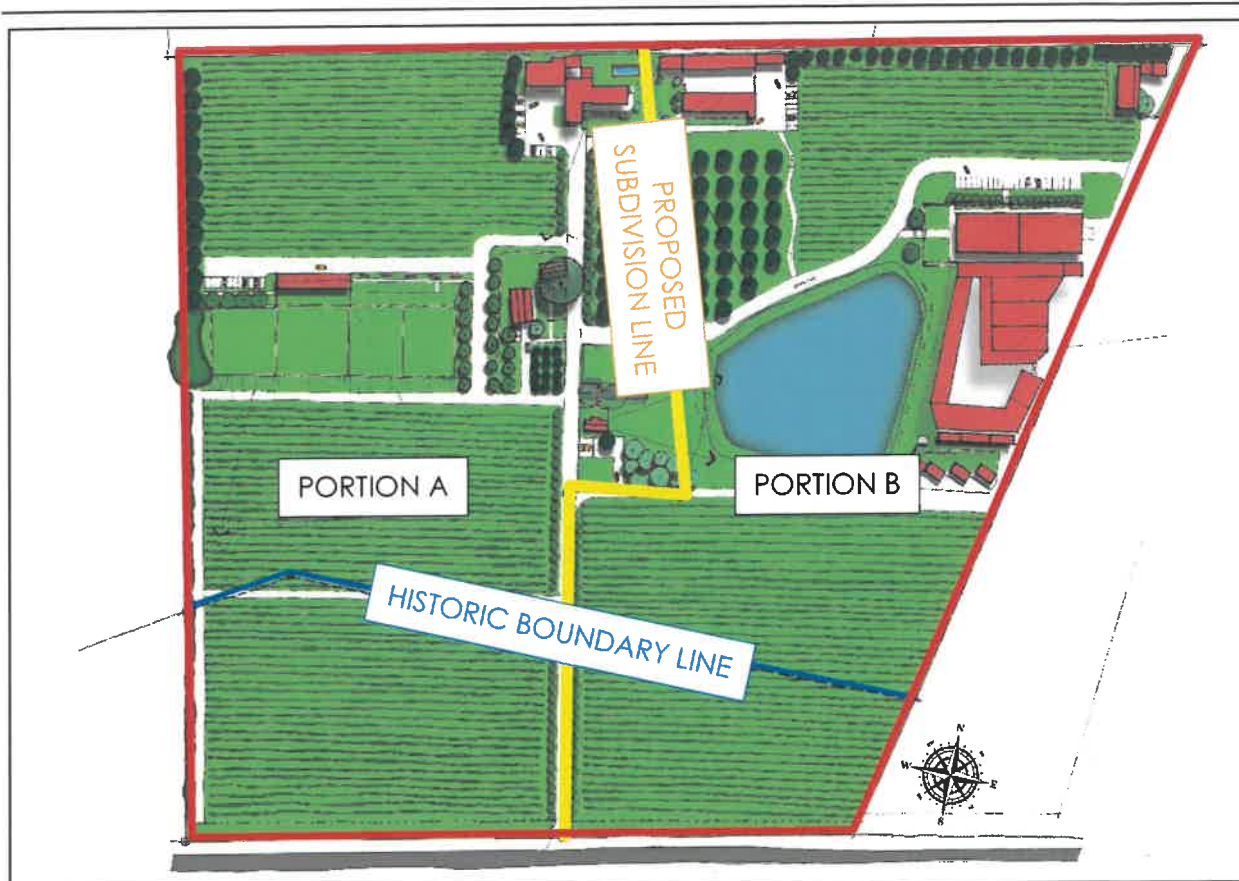

Figure 2: Illustration of proposed consolidation and subdivision

Key elements of the proposal include:

- Establishment of tourist accommodation, primarily self-catering units, to ensure long-term financial sustainability of the farms;
- A motor vehicle museum to showcase an existing classic car collection, offering cultural, educational, and tourism benefits; and
- Utilisation of existing farm structures and low-potential agricultural land for tourism facilities, ensuring that productive farmland remains unaffected.

Refer to **Figures 3** and **Figure 4** on the next page for detailed information regarding the proposed uses on the two respective Portions A & B.
