MUNICIPAL NOTICE No. 131/2025

Road Closure:
Hofman Road upgrading between Dennesig Street and Paul Kruger Road

Dear Residents,

Groeneveld Civil Engineering Construction has been awarded the contract to upgrade the civil infrastructure and landscaping as part of the Dennesig Neighbourhood Transport Master Plan Project.

This project, approved by Council in April 2024, followed a public participation process which was conducted in January 2024 (Notice: 159/2023). Supporting documentation is available on the Municipality's website: https://stellenbosch.gov.za/?s=Dennesig.

The project was implemented in two phases:

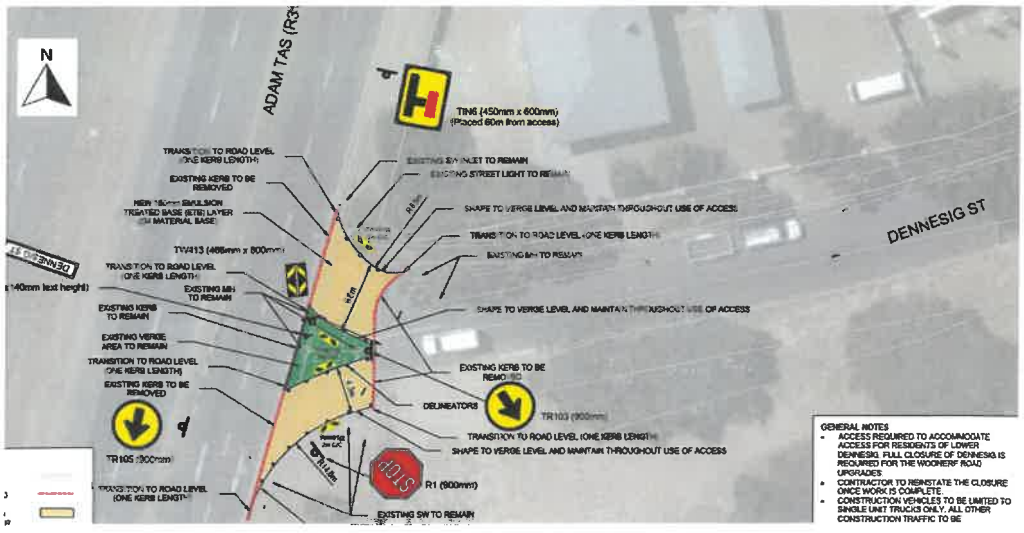
- **Phase 1(Complete):** Upgrading of Dennesig Street, construction of a raised intersection on Bird Street, and paving of sidewalks along Dennesig Street and Paul Kruger Road.
- **Phase 2:** Upgrading of Hofman Road from the intersection of Dennesig Street and Hofman Road to the intersection of Paul Kruger- and Hofman Roads.

The primary objective of the project is to enhance safety for pedestrians and non-motorized traffic by implementing traffic-calming measures.

Full closure will occur from the intersection of Dennesig Street and Hofman Road up to Paul Kruger- and Hofman Roads, from August 2025 until January 2026.

Temporary alternative access will be provided from Adam Tas Road to Dennesig Street for the residents of lower Dennesig Street. (see Figure 1)

Figure 1: Access from Adam Tas Road



Construction activities will however affect residents along Dennesig Street, Hofman-, and Paul Kruger Roads. A section of Hofman Road, between Paul Kruger Road and Merriman Avenue, will be closed for the construction. The Paul Kruger- and Hofman Roads as well as Dennesig Street and Hofman Road intersection will be partially closed. (see Figure 2)

Figure 2: Construction Programme

Area 6 and 7: August 2025 to January 2026
Area 2: August 2025
Area 3 and 5: October 2025 to January 2026

Residents and representative of body corporates are welcome to contact the Service Provider to view the upgrade drawings and discuss access arrangements.
