This reservation does not impinge on any other rights of the Board or any others' rights which the Board may have against any such trespasser or inhabitant.
- 35.2 Each penalty may be levied against the Owners Levy account for each infringement and each Owner will be liable to pay such amount promptly.
- 35.3 For the enforcement of the Rules, the Conduct Rules or any of the provisions of this Constitution generally, the Board or the Management Company may:
 - 35.3.1 give notice to the Member concerned to remedy any breach within such period as they may determine;

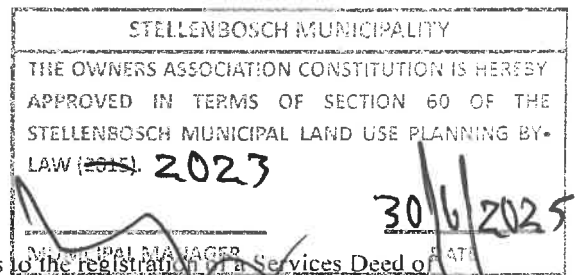

- 35.3.2 take or cause to be taken such action as they deem fit to remedy the breach of which the Member, or Occupant concerned may be guilty and debit the cost thereof, which shall be a debt due to the Association, to his Levy account, and which shall be payable as part of his Levy on the first day of the following month. and

- 35.5 In the event of any breach of the Rules or of any of the provisions of this Constitution by any person residing on a Land Unit of a Member or his guests, employees, contractors, and sub-contractors or agents, such breach shall be deemed to have been committed by the Member himself; but without prejudice to the foregoing, the Board or Management Company may take or cause to be taken such steps against the person actually committing the breach as they may in their discretion deem fit, in addition to any action which might be taken against the Member concerned.
- 35.6 Whenever the Board, the DRC or the Management Company consider that the appearance of any Land Unit or buildings owned by a Member is such as to be unsightly or injurious to the amenities of the surrounding area or the Estate generally, the Board or the Management Company may serve notice on such Member to take such steps as may be specified in the notice to eliminate such unsightly or injurious condition. Should the Member fail within a reasonable time, as specified in such notice, to comply therewith, the Board or Management Company or their employees, agents or contractors may enter upon the Land Unit or buildings concerned and take such steps as may be necessary and recover the costs thereof from the Member concerned, which costs shall be deemed to be a debt owing by that Member to the Association.

36 UTILITY SERVICES AND WASTE MANAGEMENT

- 36.1 Stellenbosch Bridge Properties (SBP) is the exclusive landowner of the Development Land on which the Estate is to be developed.
- 36.2 SBP will over time sell pockets of approved land, with the accompanying development rights to individuals and sub-developers that are desirous of developing and establishing light industrial, residential, commercial, mixed-use, medical and educational precincts (collectively referred to as end-users) buildings, nodes and precincts.
- 36.3 SBP will furthermore deploy road infrastructure that includes sidewalks and verges throughout the The Bridge, linking all the various precincts together. SBP will into perpetuity own the common land made up of roads, sidewalks and verges, as well as all private and open spaces and green belt areas.
- 36.4 SBP is responsible for deploying road, sidewalk and verge infrastructure on a roll-out schedule approved by its shareholders, starting with the Light Industrial zones – this will be followed by the mixed-use and residential precincts.
- 36.5 The deployment of world-class municipality-style Utility services plays an important role in the establishment of a large-scale development such as The Bridge and to this extent, SBP has identified the need for the establishment of a Utility Company responsible for the deployment, ownership and long-term management and maintenance of all the various Utility services. Stellenbosch Bridge Utilities (Pty) Ltd (SBU) has been established to be the owner and operator of all Utility services at The Bridge.
- 36.6 These Utility services include, yet are not limited to the following:
 - 36.6.1 Information and Communications Technology (ICT) Services over fibre, deployed on an open access, carrier-neutral basis;
 - 36.6.2 Electricity Smart Grid and Solar Services, incorporating renewable sources and smart switching technologies;
 - 36.6.3 Resilient Water Infrastructure and Water Management Services;
 - 36.6.4 Efficient Waste Infrastructure and Management Systems and Services;
- 36.7 The deployment of first-world infrastructure, combined with the delivery of professional management and maintenance services are essential when planning the deployment of a City of the size and extent of The Bridge.
- 36.8 The building of road infrastructure, sidewalks and verges link different end-users throughout The Bridge.
- 36.9 The deployment of the various Utility services follows these road, sidewalk and verge routes and servitudes.
- 36.10 It is critical to deploy the various Utility services with foresight from the outset, as to prevent the need to over time re-trench within the roads, sidewalks and verge servitudes for the re-deployment of the Utility services.
- 36.11 It is therefore paramount for SBP to appoint SBU on an up-front basis to deploy, own, service and maintain on an exclusive, single-trench and into-perpetuity basis the Utility infrastructure whilst the roads, sidewalks and verges are being built and established.
- 36.12 SBP has appointed SBU, as sole and exclusive Utility infrastructure, management,

maintenance and services provider. The owner agrees to the registration of a Servitude simultaneously with registration of the property into its name in favour of the Stellenbosch Utility Company.

- 36.13 The appointment by the Developer of the aforementioned entities as well as the mandatory fees payable to SBU, will be binding upon the Association and its Members.
- 36.14 The initial agreement will be concluded between the Developer and the Utility Company at a compulsory fee, payable for the provisioning of said utility services by each Member and included in the monthly Levy account, plus a yearly market-related escalation.
- 36.15 Ownership of the equipment and infrastructure used by any member or occupant will always vest in the Utility Company.
- 36.16 The Developer may conclude a further service level agreement pertaining to the maintenance of the utility services.
- 36.17 The mandatory fee will be included by The Bridge Property Owners Association in the monthly Levy account and will be collected and paid by the Management Company to the Utility Company. The mandatory monthly fee may not be excluded from the Levies.
- 36.18 The mandatory fee will only become payable by the Member as from the date of registration of transfer of a Land Unit in the name of the Member or on the date of occupation of a Land Unit, whichever event occurs first.
- 36.19 Upfront capital connection fees will be payable for the provisioning of the Utility Services. Connection fees that are not stated currently will be added from time to time. The capital connection fees will be added to the land or property sales price and be payable by the purchaser upon transfer.
- 36.20 The Developer will, for as long as the Developer is the Owner of a Land Unit, not be liable for the mandatory fee or the capital connection fee until the date of occupation or transfer of such Land Unit in favour of a Purchaser or Third Party Purchaser (excluding any affiliated entity of the Developer), whichever event occurs first.
- 36.21 No Member or Occupant may be in possession of or operate or use any illegal trans-receiving devices and / or radio equipment in addition to any other legal equipment which may interfere with the provision of the telecommunication services. The decision of the Developer, during the Development Period and thereafter, of the Board of The Bridge Property Owners Association, will be final and binding on any Member or Occupant.
- 36.22 To manage the process of refuse removal in the Development, the agreement to be entered into between the Developer, the Association and Stellenbosch Bridge Utilities (Pty) Ltd will include, inter alia, waste removal services.
- 36.23 Notwithstanding clause 36.22, should the Developer and the Association require the Stellenbosch Municipality to remove refuse from the Development, it will be responsible to provide the Municipality with the relevant infrastructure to perform such removal.
- 36.24 This infrastructure will include a centralized, refuse storage area which is accessible for collection from a public road.
- 36.25 The refuse storage area shall be large enough to store all receptacles needed for refuse disposal on the premises, including all material intended for recycling.
- 36.26 No waste is allowed to be disposed/ stored without a proper 240l wheelie bin.
- 36.27 The size of the refuse storage area depends on the rate of refuse generation and the frequency of the collection of refuse.
- 36.28 For design purposes, sufficient space should be available to store two weeks' refuse.
